

Curious About Net Neutrality?

CYBR 4400/5400: Principles of Internet Policy

**Fall 2019
Semester!**

Controversial Internet policy issues dominate today's headlines every day.

CYBR 4400/5400 covers today's key societal Internet public policy issues:

**T & TH
2–3:15 p.m.**

- ☑ Net Neutrality
- ☑ Online Privacy
- ☑ Broadband as a Universal Service
- ☑ Spectrum Management for Smartphones
- ☑ Cybersecurity Threats

Conduct critical strategic analysis and debate of these controversial issues. **Develop** well-reasoned positions on how to regulate new Internet-based business models. **Apply** interdisciplinary concepts to characterize the significant intersection of technology, economics, business, and public policy.

David Reed, TCP Faculty
Technology policy expert with over 20 years hands-on industry experience in Internet tech and policy

Open to **all graduate** and upper-division **undergraduate students**.
