

Tactile Othello Game

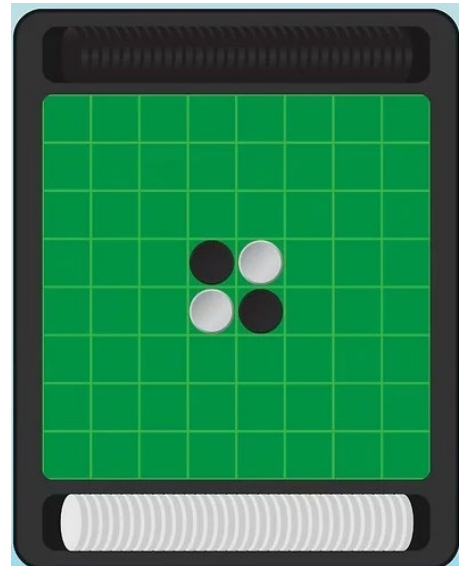

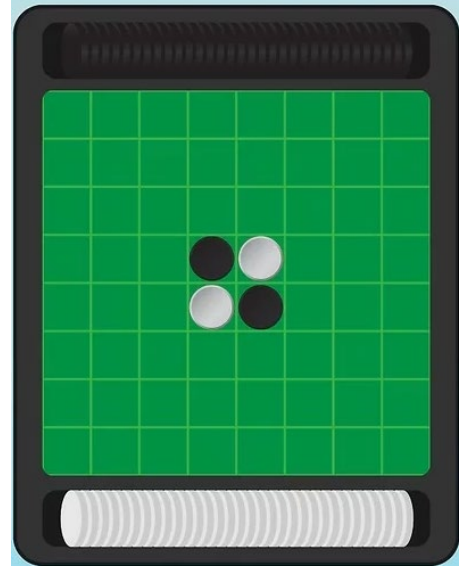

OBJECTIVE: Try playing a board game using only your sense of touch.

SET UP:

- Divide the different color discs between two players, one playing with white (smooth) and one with black (raised).
- Set up four disks in a square in the middle of the board, as shown in the picture, alternating colors.

STEPS:

- Start play with black/raised pieces. Place one piece that will trap at least one of the white pieces between two black pieces.
- Flip over any white pieces trapped between two black pieces. These are now playable as black pieces.
- Whoever has the most disks facing up at the end wins!
- Try to play with your eyes closed- can you feel the difference between the pieces?

As a first move, black could play in any of the spots marked with a red dot. The white piece trapped between the two black pieces is then flipped to black.
