

ENGINEERING AND DESIGN SUMMER INTERNSHIP

June 19 - July 20, 2023

25 hours per week | Summer Pay | CU Boulder Campus

Teens are invited to participate in an immersive internship and research project focused on using Maker technologies to create accessible materials for blind or visually impaired clients.

Student interns will learn about and complete projects using:

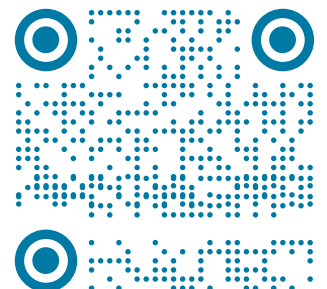

- Universal Design principles and empathy-driven design
- Accessibility tools and designing for disabilities
- Maker technologies such as 3D modeling & printing, sound, computer programming, laser cutters
- Tactile and multi-modal learning styles
- Characteristics of blindness, vision impairments, and other disabilities
- Job skills and designing for a specific client

Open to students currently in high school (rising grades 10–12) and who are at least age 14 years or older at the time of the internship.

Apply Online! Applications accepted February 7 - April 2, 2023.
