

## Class Participation for Today!

- Look at a bunch of coins (it doesn't matter how many). For each one, jot down things you see and notice about it! What questions does it raise in your mind?
- Find a partner. Pick a coin, any coin. If you were going to make a museum exhibit centered on this coin, what kinds of things would you want to illustrate, and what would you want your viewers to go away thinking about or having learned?
