This is an example of how the requirements for a BA in Journalism could be scheduled within a four-year period. For more information on the Core Curriculum requirements for the College of Communication, Media, Design and Information, please read the Policies & Requirements (https://catalog.colorado.edu/undergraduate/colleges-schools/media-communication-information/policies-requirements/#corecurriculumtext) section of this catalog.

Year One		
Fall Semester		**Credit Hours**
JRNL 1000	Principles of Journalism and Networked Communication	3
CMDI 1040 Foundational CMDI (4), or CMDI Core or Elective (3)		4
Quantitative Thinking		3

Lower Division Writing		3
	Credit Hours	**13**
Spring Semester		
JRNL Major Course (Conceptual Course)		3
CMDI Core Elective (3), or CMDI 1040 Foundational CMCI (4)		3
CMDI Core Computing		3
CMDI Core or elective (P/S; H & A; Hist V; Div & Global)		6
	Credit Hours	**15**
Year Two		
Fall Semester		
JRNL 2000	Writing for the Media	3
JRNL 2001	Fundamentals of Reporting Technologies	3
CMDI Core (Natural World)		3
CMDI Core or elective (P/S; H & A; Hist V; Div & Global)		3
Secondary Area		3
	Credit Hours	**15**
Spring Semester		
CMDI Core (Natural World w/Lab)		4
CMDI Core or elective (P/S; H & A; Hist V; Div & Global)		6
JRNL Elective		3
Secondary Area		3
	Credit Hours	**16**
Year Three		
Fall Semester		
JRNL 3651	Media Law and Ethics	3
JRNL Major Course (Upper-Division Reporting)		3
CMDI Core or elective (P/S; H & A; Hist V; Div & Global)		7
Secondary Area		3
	Credit Hours	**16**
Spring Semester		
JRNL Major Course (Upper-Division Conceptual Course)		3
JRNL 4931	Internship	3
JRNL Elective		3
CMDI Core or elective (P/S; H & A; Hist V; Div & Global)		3
Secondary Area		3
	Credit Hours	**15**
Year Four		
Fall Semester		
JRNL Elective		3
CMDI Core or elective (P/S; H & A; Hist V; Div & Global)		6
Secondary Area		6
	Credit Hours	**15**
Spring Semester		
JRNL 4572	News Corps	3
CMDI Core or elective (P/S; H & A; Hist V; Div & Global)		9
Secondary Area		3
	Credit Hours	**15**
	Total Credit Hours	**120**

Learning Outcomes

The Department of Journalism is accredited by the Accrediting Council for Education in Journalism and Mass Communication (ACEJMC). The Council requires that graduates of accredited programs be aware of the following professional values and competencies, and be able to:

- Apply the principles and laws of freedom of speech and press, in a global context, and for the country in which the institution that invites ACEJMC is located.
- Demonstrate an understanding of the multicultural history and role of professionals and institutions in shaping communications.
- Demonstrate culturally proficient communication that empowers those traditionally disenfranchised in society, especially as grounded in race, ethnicity, gender, sexual orientation and ability, domestically and globally, across communication and media contexts.
- Present images and information effectively and creatively, using appropriate tools and technologies.
- Write correctly and clearly in forms and styles appropriate for the communications professions, audiences and purposes they serve.
- Demonstrate an understanding of professional ethical principles and work ethically in pursuit of truth, accuracy, fairness and diversity.
- Apply critical thinking skills in conducting research and evaluating information by methods appropriate to the communications professions in which they work.
- Effectively and correctly apply basic numerical and statistical concepts.
- Critically evaluate their own work and that of others for accuracy and fairness, clarity, appropriate style and grammatical correctness.
- Apply tools and technologies appropriate for the communications professions in which they work.

Journalism - Minor

In consultation with their advisers, students who are majoring in another discipline may pursue a minor in journalism. Because journalism is a popular career choice for students in other units—art and art history, business, communication, English, sociology, women and gender studies, and other fields in the College of Arts and Sciences, the College of Media, Communication and Information and the Leeds School of Business—we offer an 18-credit hour journalism minor (six courses) with the courses and options listed under the Requirements tab.

Requirements

Students must complete 18 credit hours of coursework toward the minor with a grade of C- or better and an overall GPA in the minor of 2.0. Students may apply no more than six credit hours of transfer work, including three hours of upper-division credit.

Students will take two required courses, JRNL 1000 and JRNL 2000, which will introduce them to a range of possible interests from broadcasting to print and online media to digital and emerging media and writing for the media. After successfully completing JRNL 1000 and 2000, students should select one 2000-level course and three 3000- or 4000-level journalism courses.

Students may emphasize conceptual and theory courses, may select skills courses that help to prepare them for possible careers, or complete a combination of the two. Students in the minor may take up to three credits of independent study and three credits of internship. Students may apply no more than six credit hours of transfer work, including three hours of upper-division credit.

Students may not use the same JRNL course for the JRNL major or minor and the sports media minor with the exception of JRNL 3804.

Required Courses and Credits

Code	Title	Credit Hours
Required Course		
JRNL 1000	Principles of Journalism and Networked Communication	3
JRNL 2000	Writing for the Media	3
Electives		
Select one 2000-level JRNL course from the following:		3
JRNL 2001	Fundamentals of Reporting Technologies	
JRNL 2014	Race and Sports Journalism	
JRNL 2301	Journalism Ethics and History in Film	
JRNL 2401	Media Coverage of Diverse Populations	
Select three 3000- or 4000-level JRNL courses		9
JRNL 3000	Intermediate Reporting	
JRNL 3102	Photojournalism I	
JRNL 3112	Concepts in Visual Culture	
JRNL 3201	Critical Perspectives on Journalism	
JRNL 3202	Covering Political Campaigns	
JRNL 3211	History of Broadcasting	
JRNL 3221	History of Digital Journalism	
JRNL 3231	History of Documentary Film	
JRNL 3241	History of Journalism	
JRNL 3344	Short Form Documentary	
JRNL 3401	Sociology of News	
JRNL 3402	Social Media Storytelling	
JRNL 3552	Online Production and Editing	
JRNL 3614	Audio Storytelling and Podcasting	
JRNL 3644	Video News Production and Reporting	
JRNL 3651	Media Law and Ethics	
JRNL 4011	Principles of Media Relations	
JRNL 4102	Photojournalism II	
JRNL 4311	Literary Journalism	
JRNL 4344	Video Documentary Production	
JRNL 4351	Reporting Wars, Conflict and Peace	
JRNL 4354	Video News Reporting	
JRNL 4401	News and Public Perception	
JRNL 4402	Journalism and Social Identity	
JRNL 4411	International Media and Global Crises	
JRNL 4502		
JRNL 4562	Digital Journalism	
Total Credit Hours		**18**

Media Studies

The Department of Media Studies specializes in scholarly and industry-based research on media and technologies that underlie contemporary culture, economics, and politics. Students learn how media industries, practices and narratives shape the way we think about, relate to and engage with the world around us. Enter our tight-knit community and participate in innovative media production work and research projects that engage emerging technology practices, seek to understand new digital cultures and change society in meaningful ways.

Media studies students examine ways of thinking about and conducting research into the intersection of media, communication and cultural practices in both historical and contemporary perspectives. Encompassing humanistic, social scientific and multimodal approaches to the study of media and culture, and interdisciplinary in its theoretical and methodological approaches, the media studies degrees span traditional boundaries between theory and practice. The program fosters media "literacy" in the broadest sense by providing students with critical skills to analyze contemporary media and culture, along with technical, aesthetic and intellectual principles that facilitate strong media practices.

Course code for this program is MDST.

Bachelor's Degree

- Media Studies - Bachelor of Arts (BA) (p. 768)

Minor

- Media Studies - Minor (p. 770)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Ardizzoni, Michela (https://experts.colorado.edu/display/fisid_145152/)
Assistant Professor, Director; PhD, Indiana University Bloomington

Berggreen, Shu-Ling Chen (https://experts.colorado.edu/display/fisid_101636/)
Associate Professor; PhD, University of Tennessee-Knoxville

Calabrese, Andrew (https://experts.colorado.edu/display/fisid_101073/)
Professor; PhD, Ohio State University

Echchaibi, Nabil (https://experts.colorado.edu/display/fisid_145054/)
Associate Chair; PhD, Indiana University Bloomington

Fisher, Jolene (https://experts.colorado.edu/display/fisid_158335/)
Assistant Professor; PhD, University of Oregon

Frost, Steven (https://experts.colorado.edu/display/fisid_156502/)
Instructor, Associate Chair; MFA, School of Art Institute of Chicago

Goldstein, Donna M. (https://experts.colorado.edu/display/fisid_100448/)
Professor; PhD, University of California, Berkeley

Hall, Kira (https://experts.colorado.edu/display/fisid_123111/)
Professor; PhD, University of California, Berkeley

Tracey, Michael (https://experts.colorado.edu/display/fisid_104259/)
Professor Emeritus; PhD, Univ of Leicester (England)

Trager, Robert
Professor Emeritus

Courses

MDST 1001 (3) Foundations of Media Studies
Introduces students to key issues and debates and contemporary applications of critical media studies focusing on economic, social, political and cultural implications. Provides an understanding of the relationship between theory and practice and equips students with the tools to critically analyze various forms of textual transmission.
Grading Basis: Letter Grade

MDST 1002 (3) Introduction to Social Media
Introduces students to network structures and principles, the technology and infrastructures that allow them to flourish, and the cultures that grow up through and around them. Explores how social media enables community, how it assembles and empowers agents of change and how design informs individual and group behavior.
Grading Basis: Letter Grade

MDST 1003 (3) Critical Media Literacies
Learn to strategically access, analyze, evaluate, and produce communication in a variety of forms. This course explores the expanding nature of literacy in a digital world. Students will use applied research practices and communication tools to expand their existing media literacy skills and to design innovative presentations and projects that take advantage of new media. Meets Practice Course Requirement.
Grading Basis: Letter Grade

MDST 1009 (3) Truth, Beauty, and Conspiracy
With conspiracy at the forefront of social and political discourse, this course illuminates these problems of knowledge and representation by approaching conspiracy culture from the perspective of media theory. Explores conspiracy theories as narratives, analyzing their specific narrative features and the ways that different media platforms represent conspiracy. Students also consider how conspiracy narratives complicate the relationship between knowledge and aesthetic form. Offered in Fall or Spring.

MDST 2001 (3) Introduction to Global Media
Explores a world in which new media have enabled humans to be joined in a global system of socio-cultural and economic relations. Underscores the political dimensions of global media, the convergence of global culture, and the ways in which values are produced. Prepares students to become critical of media practices and empowered as active civic participants.

MDST 2002 (3) Media and Communication History
Examines the historical development of communication forms, tools, technologies and institutions (orality, writing, printing, photography, film, radio, television, computers, internet); their influence on culture (forms of expression and social relationships); and their impact on social and individual experience. Applies knowledge of communication history to contemporary social issues and problems in media and society, domestically and internationally.

MDST 2010 (3) Media and Social Movements
Surveys the history and contemporary efforts of social activists to bring about democratic media reform and examines how media are used as tools for connecting and advancing social movements. Emphasis is given to media activism and social movements in the United States, as well as to similar and related transnational activism and movements. Meets Practice Course Requirement.
Requisites: Requires a prerequisite course of MDST 1001 (minimum grade C-).
Grading Basis: Letter Grade

MDST 2011 (3) Disruptive Entrepreneurship in the Internet's New Economies
Grapples with the disruptive business models that drive the online economy: both the dominant ones and the alternatives vying to transform it. In addition to the Silicon Valley model, this course explores lesser known internet economies around the world and proposals for a more equitable online future. Meets Practice Course Requirement.
Grading Basis: Letter Grade

MDST 2012 (3) Hacker Culture
Chronicles the evolution of hacker culture from its origins as a geeky subculture to a criminal underground to its adaptation by CEOs. Considers how hacker formations sometimes represent a new kind of politics, sometimes a rejection of politics. Explores the contested figure of the hacker in the past, present and science-fiction of the internet. Meets Practice Course Requirement.
Grading Basis: Letter Grade

MDST 2031 (3) Documentary and Social Change
Explores how local, national and international filmmakers use documentaries to provide cultural observation, education, entertainment and memories to making sense of and transform the realities of contemporary societies. Emphasizes contemporary issues and practices in the production of documentaries, including the participatory means such as the crowdsourcing of documentary footage and the use of newer, non-theatrical means of distribution. Meets Practice Course Requirement.
Grading Basis: Letter Grade

MDST 2032 (3) Visual Literacies & Design
Examines cultural visual experiences from critical perspectives and social effects. The course acquaints students with visual design in ways that include image-making as a cognitive and perceptual practice, the production of visual significance and meaning, and the role of technology in creating and understanding mediated images. Students will use a variety of means to produce visual narratives. Meets Practice Course Requirement.
Grading Basis: Letter Grade

MDST 2046 (3) Future Histories of Technology
This class explores both literature about future technologies and literary technologies that move across periods, regions, and disciplines. Our cultural and historical approach to future histories of technology will illuminate how race, gender and sexuality, class, and nationality structure seemingly neutral research and development, usage, and innovation. Ultimately, our goal is to see how we¿re not passive consumers but active participants in reimagining the present and future of technology.
Equivalent - Duplicate Degree Credit Not Granted: ENGL 2046

MDST 3001 (3) Media Research
Introduces theoretical approaches and practices used to analyze the content, structure, influence and contexts of media. Explores factors shaping media, including: politics, economics, technology, cultural traditions. Studies concepts, theoretical approaches and research methods of media criticism, and adopts and adapts these frameworks in analyses of mediated communication.

MDST 3002 (3) Digital Culture and Politics
Examines issues at the intersection of digital media, culture and politics, such as regulation and network architecture, piracy and hacking, and grassroots activism. Engage with a range of theories about cultural politics, democracy, liberalism and neo-liberalism in relation to digital information and communication technologies.

MDST 3021 (3) Comic Books: Culture and Industry
Explores practices of comic culture across a broad range of graphic stories. Using culture studies approaches to industry analysis and fan community discourses, students examine culture created through and around graphic texts, particularly representations of race, gender, sexuality, institutions and ideology. Considers the political economy of the comic industry, the struggles of independent producers and active fan practices.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

MDST 3022 (3) Social Media Cultures
Expands students' understanding of network cultures, including how social media tools influence conversation strategies, how interfaces interact with perceived communication values, and how network boundaries reinforce distinct cultural identities. Students engage in projects to measure network behavior, create strategic messages to achieve communication and information goals, and to engage in social listening.
Requisites: Restricted to students with 55 or more hours.
Grading Basis: Letter Grade

MDST 3101 (3) History of Computing and Information
Focusing on two topics: the changing role of information in everyday life over time and the increasing role of information in disciplinary studies such as social science, engineering, computer science, mathematics, digital humanities. Examines information related academic disciplines, businesses, industries and technologies from multiple perspectives from the 17th century to the present.
Equivalent - Duplicate Degree Credit Not Granted: INFO 3101

MDST 3201 (3) Media, Culture and Globalization
Surveys the political and economic structures of media system in developed and developing countries and discusses the impact of privatization, ownership consolidation, and globalization on the flow of information across national borders. Also looks at how global media flows and counter-flows affect conceptions of nationhood and cultural identity.
Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Communication, Media, Design and Information (CMDI) or International Affairs (IAFS) majors only.

MDST 3321 (3) Media Industries and Economics
Focuses on the institutions and practices of the media industries. Surveys the histories, structures, and activities of these organizations and the contemporary issues surrounding them.
Requisites: Restricted to students with 57-180 credits (Junior or Senior) in College of Communication, Media, Design and Information (CMCIU).
Additional Information: Departmental Category: Core Curriculum and General Electives

MDST 3331 (3) Sports-Media Complex
Explores the rich connections between the sports industry, spectating, the media complex and social life. Using theories of cultural studies and drawing on specific examples from the sports world, students focus on how sport shapes and reinforces understandings of gender, race, class and sexuality. Addresses major questions about the political economy, commodification, mediation and reception of the spectacle of the sports complex, as well as politics and cultural consequences of its transnational reach.
Requisites: Restricted to College of Communication, Media, Design and Information (CMDI) students with a minimum of 45 credit hours completed, or non-CMDI students who have completed CMDI 2001 (minimum grade D-).
Grading Basis: Letter Grade

MDST 3341 (3) Designing Alternative Media Platforms
Explores alternative forms of media to exhibit student research and build connections with community leaders. Surveys alternative exhibition traditions such as Social Practice, Relational Aesthetics and Craftvism to expand the impact of student work, culminating in the design of a unique cultural event focusing on each individual's research. Software/digital presentation skills. Meets Practice Course Requirement.

MDST 3401 (3) Media, Food and Culture
Explores the topic of food as a subject of popular culture: essential to life and the enter of local, national and transnational conflict and social movements. Students will examine media representations of food, what our food choices say about us and what the mediated politics of food mean for our collective future.
Requisites: Requires a prerequisite course of MDST 2002 (minimum grade C-).
Grading Basis: Letter Grade

MDST 3711 (3) Media and Popular Culture
Examines culture in the form of discourse, symbols, and texts transmitted through the media. Explores the relationship between such mediated culture and social myth and ideology.
Additional Information: Departmental Category: Core Curriculum and General Electives

MDST 3791 (3) Media and the Public
Provides an overview of how publishing in print and electronic forms has been tied closely to democratic ideals for centuries. Explores how the idea of the public is central to the theory and practice of media politics, and how the contested concepts of "the public sphere" and "public opinion" have long been linked to debates about the proper relationship between media and democratic citizenship.
Requisites: Restricted to students with 57-180 credits (Junior or Senior) in College of Communication, Media, Design and Information (CMCIU), and MDST minors.
Additional Information: Departmental Category: Core Curriculum and General Electives

MDST 4000 (3) Media Genre Studies
Introduces students to the critical study of genres in media cultures. Genre exists as a form of organizing and packaging mediated content, but also as formulaic patterns for analysis that work for and against audience expectations to produce culture. Topics will vary by genre, medium, and transmedia strategies.
Equivalent - Duplicate Degree Credit Not Granted: MDST 5000
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

MDST 4003 (3) Digital Media Production and Design
Introduces techniques, technologies of online development and online media presentation. Contextualizes the technical and social implications of the Internet through historical and critical perspectives. Students engage in online media projects designed to emphasize the affordances, conventions and usability considerations of effective online communication. Meets Practice Course Requirement.
Equivalent - Duplicate Degree Credit Not Granted: MDST 5003
Requisites: Restricted to students with 55 or more hours.
Grading Basis: Letter Grade

MDST 4071 (3) Screenwriting
Students will be taught the fundamentals of screenwriting, but will also learn from peers. Students will workshop scenes, share, and discuss. Students will work scenes through description, dialogue, and action, combine those scenes into sequences, and those sequences into scripts. Students will learn how to create dramatic tension, how to write compelling dialogue, how to deal with character development.
Equivalent - Duplicate Degree Credit Not Granted: MDST 5071
Requisites: Requires prerequisite course of MDST 2002 or MDST 3021 (minimum grade B).

MDST 4111 (3) Crime, Media and Contemporary Culture
Addressed in the course are a range of issues from within a variety of literatures that consider the ways in which the media cover crime. Those literatures are particularly drawn from sociology and the emergent, and increasingly dominant, field of cultural criminology. The focus of the class is to get students to think of "crime" as a constructed and mediated concept and set of narratives that often create problematic public "understandings".
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Grading Basis: Letter Grade

MDST 4121 (3) Deconstructing Disney: Mediated American Mythology
Explores various Disney cultural products ¿ some with which students will be very familiar, some students may have never seen ¿ in order to discuss the cultural messaging The Walt Disney Company has presented over its long and illustrious history. Students will conduct analysis research in popular culture studies.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

MDST 4211 (3) Asian Media and Culture
Offers an understanding of the various people, cultures and nations of East Asia through their media systems. Provides a critical overview of the historical, cultural, social, political and economic dimensions of East Asian communication systems in today's digitally connected/disconnected world.
Equivalent - Duplicate Degree Credit Not Granted: MDST 5211
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Departmental Category: Asia Content

MDST 4220 (3) Viral Video & Media
Students will examine how viral videos are produced and shared on social media platforms by developing an understanding of the components that make a viral video as well as by engaging in a critical analysis of those viral videos. Students will engage in critical analysis, consider strategies for virality, and learn about production and publishing. Students will analyze their own and their peers¿ work in terms of genre, convention, format, structure, and audience.
Equivalent - Duplicate Degree Credit Not Granted: MDST 5220
Requisites: Requires prerequisite course of MDST 2002 OR MDST 3021 (minimum grade B).

MDST 4221 (3) Media Technology and Cultural Change
Explores how media technologies affect social orders and shape cultural practices across the globe. Compares and critically evaluates different theories of technology, emphasizes the social construction of technology, asks how media technologies inform conceptions of social reality and individual identity and considers how media technologies can be understood across a range of academic disciplines.
Requisites: Requires prerequisite courses of MDST 2002 and MDST 3001 and MDST 3002 (minimum grade C-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior).
Grading Basis: Letter Grade

MDST 4231 (3) Youth Media: Culture and Politics
Emphasizes the sociological understandings of youth cultures, identities and practices in relation to media and politics. Topics include the influences of consumer branding, participatory culture, youth media production and representation, use of social media, mobile phones, gaming, and other digital media, and integrating them around themes of youth styles, gender, ethic, political identities, consumer culture, social behavior and other trends.
Requisites: Requires prerequisite course of MDST 3711 (minimum grade C-). Restricted to students with 57-180 credits (Juniors or Seniors).
Grading Basis: Letter Grade

MDST 4241 (3) Visual Culture and Human Rights
Provides the critical tools needed to understand images and their impact on the recognition and restitution of human rights claims. The course examines both visual practices (e.g. documentation, archiving, witnessing, advocacy and surveillance) and visual media (e.g. photography, film, video, drone and satellite images), unpacking the growing entanglement between visual culture and human rights.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Grading Basis: Letter Grade

MDST 4311 (3) Mass Communication Criticism
Introduces the critical perspectives most often employed in qualitative media analysis: semiology, structuralism, Marxism, psychoanalytical criticism, sociological criticism. Texts from contemporary print and broadcast media. Meets Practice Course Requirement.
Equivalent - Duplicate Degree Credit Not Granted: MDST 5311

MDST 4331 (3) Gender, Race, Class, and Sexuality in Popular Culture
Studies the construction, interconnections, and replications of gender, race, class, and sexuality in popular culture and how these constructs become cultural norms and mores. Uses critical methods with a focus on producing responsible viewers and readers.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

MDST 4341 (3) International Media and Global Crises
Examines strengths and limits on media¿s role in globalized crises (e.g. financial, climate change, health) in light of changing distribution of global power. Introduction to current crises; context-analytical approach to media technologies, financing and uses; application to national cases.
Requisites: Restricted to students with 57-180 credits (Junior or Senior) Media Studies (MDST) majors and minors, Journalism (JRNL) majors or International Affairs (IAFS) majors only.
Additional Information: Departmental Category: Asia Content

MDST 4361 (3) TV and the Family in American Culture and Society
Examines the history and character of two central institutions in American society--the family and television--to gain deeper understanding of their formative and enduring roles. Topics include: intersecting histories of the family and television; economic logic of the TV industry and programming; representations of the family in television programming; how families use and interact with television.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

MDST 4371 (3) Media and Religion
Examines the way religion uses media as a social and political force. Introduces the major themes and trends in the mediation of religion and the religious inflection of the media in professional, popular, and emerging media contexts.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

MDST 4372 (3) Islam, Pop Culture and Media
Explores the shifting boundaries of cultural and religious Muslim identities through media representation and production in Muslim-majority countries and in the West. Using popular culture as a complex site of struggle, this course examines how Muslims address questions of gender, ethnicity, class, democracy, sexuality, religion, and modernity in a variety of media forms and practices.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Grading Basis: Letter Grade

MDST 4401 (3) Fan and Audience Studies
Considers how audiences and fans are conceptualized, how they are constructed by media enterprises and how they operate within their cultural ecosystems. While media shape the sociocultural, political and economic dimensions of the social world, fan studies suggest a more active set of practices form sites of resistance and enable a greater degree of influence over cultural production.
Requisites: Requires prerequisite courses of MDST 2002 and MDST 3001 and MDST 3002 (all minimum grade C-).
Grading Basis: Letter Grade

MDST 4402 (3) Transmedia Worldbuilding
Guides students to develop entertainment concepts for transmedia delivery. Students will develop concepts and characters built around storytelling themes capable of producing serial and multimedia storylines. This course considers essential elements of storytelling; how to design and actively participate across media platforms; essential elements of meta-narratives; and how to create an immersive and interactive experience for audiences.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

MDST 4405 (3) Queer and Trans Identities in Popular Culture
Gives students the theory, media history, and cultural frameworks to advocate for better queer & trans presentation in popular media. Uses queer studies, critical theory, media surveys, and trans theory as a tool for discussing and addressing gaps in media representation. Explores the emergence, codification, and rejection of queer and trans identities to deconstruct the documentaries, televisions shows, advertisements, print media, music, and digital media that contributed to the formation of these identities.
Equivalent - Duplicate Degree Credit Not Granted: MDST 5405
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

MDST 4601 (3) Media Law, Policy and Ethics
Explores ethical and legal complexities of information and communication technology. Combines real-world inquiry with creative speculation to probe everyday ethical dilemmas faced by digital consumers, creators and coders, as well as policy-makers. Explore themes such as privacy, intellectual property, social justice, free speech, artificial intelligence, social media and ethical lessons from science fiction.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Grading Basis: Letter Grade

MDST 4841 (1-6) Undergraduate Independent Study
Involves in-depth independent research and/or project work completed under the direction of a faculty member that demonstrates learning at the upper-division level within the discipline. Department consent required.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Core Curriculum and General Electives

MDST 4871 (1-3) Special Topics
Special Topics.
Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to students with a minimum of 27 hours taken.
Additional Information: Departmental Category: Core Curriculum and General Electives

MDST 4931 (1-6) Internship
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Prerequisite of MDST 2002 and MDST 3001 and MDST 3002. (All require minimum grade of C-). Restricted to MDST majors
Additional Information: Departmental Category: Core Curriculum and General Electives

Media Studies - Bachelor of Arts (BA)

The Bachelor of Arts in Media Studies emphasizes the creative and analytical skills needed to make sense of current and future trends in

media, and to gain a deep understanding of the history and development of various means and forms of communication.

Explorations of media theory, history, criticism, practices, popular culture, technology and emerging cultures are enhanced by practical training in media design, storytelling, digital art, online community engagement, documentary filmmaking and social media.

Requirements

Required Courses and Credits

Students pursuing the BA in media studies complete 12 courses, for 36 credit hours. MDST requires an internship (3 credit hours; MDST 4931) in a field of the student's choice, and a capstone course (3 credit hours; MDST 4221 or MDST 4401), both usually completed in the senior year.

Code	Title	Credit Hours
MDST Core		
Required Courses		
MDST 1001	Foundations of Media Studies	3
MDST 1002	Introduction to Social Media	3
MDST 2002	Media and Communication History	3
MDST 3001	Media Research	3
MDST 3002	Digital Culture and Politics	3
MDST 4221	Media Technology and Cultural Change	3
or MDST 4401	Fan and Audience Studies	
MDST 4931	Internship	3
Students would then take six hours of Media Practice courses offered by MDST, other departments or programs in CMDI or departments outside CMDI. Courses meeting this requirement include: MDST 1003, MDST 2010, MDST 2011, MDST 2012, MDST 2031, MDST 2032, MDST 3341, MDST 4003, MDST 4071, MDST 4220, MDST 4331, MDST 4402, ATLS 1300, ATLS 2000, ATLS 2100, ATLS 2200, ATLS 2300, CMDP 2500, CMDP 2860, CMDP 2870, CMDP 3510, CMDP 3600, CMDP 3610, CMDP 3620, CMDP 3700, CMDP 3720, CMDP 3810, CMDP 3820, CMDP 3830, CMDP 3840, CMDP 3860, CMDP 4610, CMDP 4620, CMDP 4640, CMDP 4900, INFO 1111, INFO 1121, INFO 4602, JRNL 2001, JRNL 3102, JRNL 3552, JRNL 3614 and JRNL 3644.		6
Electives/Areas of Concentration		
Select three courses from any of the following (at least one must be upper division): [1]		9
Media, Technology & Society		
MDST 2010	Media and Social Movements [2]	
MDST 2011	Disruptive Entrepreneurship in the Internet's New Economies [2]	
MDST 2012	Hacker Culture [2]	
MDST 2032	Visual Literacies & Design [2]	
MDST 2046	Future Histories of Technology	
MDST 3021	Comic Books: Culture and Industry	
MDST 3101	History of Computing and Information	
MDST 3022	Social Media Cultures	
MDST 3331	Sports-Media Complex	
MDST 3341	Designing Alternative Media Platforms [2]	
MDST 3401	Media, Food and Culture	
MDST 3711	Media and Popular Culture	
MDST 4111	Crime, Media and Contemporary Culture	
MDST 4121	Deconstructing Disney: Mediated American Mythology	
MDST 4221	Media Technology and Cultural Change	
MDST 4311	Mass Communication Criticism [2]	
MDST 4331	Gender, Race, Class, and Sexuality in Popular Culture	
MDST 4361	TV and the Family in American Culture and Society	
MDST 4371	Media and Religion	
MDST 4372	Islam, Pop Culture and Media	
MDST 4401	Fan and Audience Studies	
MDST 4402	Transmedia Worldbuilding [2]	
MDST 4601	Media Law, Policy and Ethics	
MDST 4841	Undergraduate Independent Study	
MDST 4871	Special Topics	
Global Media Industries & Culture		
MDST 2001	Introduction to Global Media	
MDST 2010	Media and Social Movements [2]	
MDST 3201	Media, Culture and Globalization	
MDST 3321	Media Industries and Economics	
MDST 3331	Sports-Media Complex	
MDST 3401	Media, Food and Culture	
MDST 4211	Asian Media and Culture	
MDST 4241	Visual Culture and Human Rights	
MDST 4341	International Media and Global Crises	
MDST 4371	Media and Religion	
MDST 4372	Islam, Pop Culture and Media	
MDST 4601	Media Law, Policy and Ethics	
MDST 4841	Undergraduate Independent Study	
MDST 4871	Special Topics	
Advocacy, Entrepreneurship & Social Change		
MDST 1003	Critical Media Literacies [2]	
MDST 1009	Truth, Beauty, and Conspiracy	
MDST 2010	Media and Social Movements [2]	
MDST 2011	Disruptive Entrepreneurship in the Internet's New Economies [2]	
MDST 2012	Hacker Culture [2]	
MDST 2031	Documentary and Social Change [2]	
MDST 3321	Media Industries and Economics	
MDST 3341	Designing Alternative Media Platforms [2]	
MDST 3401	Media, Food and Culture	
MDST 3711	Media and Popular Culture	
MDST 3791	Media and the Public	
MDST 4003	Digital Media Production and Design [2]	
MDST 4071	Screenwriting [2]	
MDST 4220	Viral Video & Media [2]	
MDST 4231	Youth Media: Culture and Politics	
MDST 4405	Queer and Trans Identities in Popular Culture	
MDST 4601	Media Law, Policy and Ethics	
MDST 4841	Undergraduate Independent Study	
MDST 4871	Special Topics	

Self-Designed Concentration		
MDST 4841	Undergraduate Independent Study	
MDST 4871	Special Topics	
Total Credit Hours		**36**

1 The concentrations represent the priorities and specialities of the MDST curriculum, but students work with faculty to develop their own concentrated emphasis from available electives (to help determine which courses may or may not need to be available).

2 Meets Practice Course Requirement.

Secondary Area of Study

In addition to coursework required for the major, all students in MDST must complete a secondary area of study outside of MDST. This secondary area of study can be met by any of the following: a minor, a second major within CMDI, a double degree or any credit-based certificate program of at least 12 credit hours.

Sample Four-Year Plan of Study

This sample plan of study is one possible approach to completing degree requirements and that students should use their degree audit and work with their academic advisors to plan classes.

Year One		
Fall Semester		**Credit Hours**
CMDI 1040: Foundational Concepts and Creativity in Communication, Media, Design and Information (4) or CMDI Elective (3)		
MDST 1001	Foundations of Media Studies	3
Quantitative Thinking		3
WRTG 1160 or other first year writing course		3
	Credit Hours	**9**
Spring Semester		
CMDI Elective (3) or CMDI 1040: Foundational Concepts and Creativity in Communication, Media, Design and Information (4)		3
MDST 1002	Introduction to Social Media	3
CMDI Core Computing		3
CMDI Core or elective (P/S; H & A; Hist V; Div & Global)		6
	Credit Hours	**15**
Year Two		
Fall Semester		
MDST 2002	Media and Communication History	3
CMDI Core (Natural World)		3
CMDI Core or elective (P/S; H & A; Hist V; Div & Global)		7
Secondary Area		3
	Credit Hours	**16**
Spring Semester		
Media Practice course		3
CMDI Core (Natural World w/Lab)		4
CMDI Core or elective (P/S; H & A; Hist V; Div & Global)		6
Secondary Area		3
	Credit Hours	**16**
Year Three		
Fall Semester		
MDST 3001	Media Research	3
Media Practice course. Courses meeting this requirement include: MDST 1003, MDST 2010, MDST 2011, MDST 2012, MDST 2031, MDST 2032, MDST 3341, MDST 4003, MDST 4071, MDST 4220, MDST 4402, MDST 4311, ATLS 1300, ATLS 2000, ATLS 2100, ATLS 2200, ATLS 2300, CMDP 2500, CMDP 2860, CMDP 2870, CMDP 3510, CMDP 3600, CMDP 3610, CMDP 3620, CMDP 3700, CMDP 3720, CMDP 3810, CMDP 3820, CMDP 3830, CMDP 3840, CMDP 3860, CMDP 4610, CMDP 4620, CMDP 4640, CMDP 4900, INFO 1111, INFO 1121, INFO 4602, JRNL 2001, JRNL 3102, JRNL 3552, JRNL 3614 and JRNL 3644		3
CMDI core or elective (P/S; H & A; Hist V; Div & Global)		6
Secondary Area		3
	Credit Hours	**15**
Spring Semester		
MDST 3002	Digital Culture and Politics	3
MDST Electives		6
CMDI Core or elective (P/S; H & A; Hist V; Div & Global)		3
Secondary Area		3
	Credit Hours	**15**
Year Four		
Fall Semester		
MDST 4221 or MDST 4401 capstone course		3
Area of Media Concentration		3
CMDI Core or elective (P/S; H & A; Hist V; Div & Global)		3
Secondary Area		6
	Credit Hours	**15**
Spring Semester		
MDST 4931	Internship	3
CMDI Core or elective (P/S; H & A; Hist V; Div & Global)		9
Secondary Area		3
	Credit Hours	**15**
	Total Credit Hours	**116**

Learning Outcomes

By the completion of the program, students will be able to:

- Awareness of communication and power within and across networks.
- An understanding of the historic and contemporary systems of inequity across social identities, nationalities, socioeconomic class and the role of media, communication and information in both creating and addressing them.
- Competence to conduct research using at least one method appropriate to media research.
- The ability to produce compelling and effective problem-solving in their given fields.

Media Studies - Minor

The minor in media studies (MDST) emphasizes the creative and analytical skills needed to make sense of current and future trends in media, and to gain a deep understanding of the history and development of various means and forms of communication.

Explorations of media theory, history, criticism, practices, popular culture, technology and emerging cultures are enhanced by practical training in media design, storytelling, digital art, online community engagement, documentary filmmaking and social media.

Requirements

A minimum of 18 credit hours is required for the minor, including 9 credit hours of courses numbered 3000 or above.

All courses counted toward the minor must be completed with a grade of C- or better. No pass/fail work may be applied. No more than six credit hours of transfer work may be applied to the minor, including 3 hours of upper-division credit. The grade point average for minor degree coursework must be equal to 2.00 or higher.

Code	Title	Credit Hours
Required Courses		
MDST 1001	Foundations of Media Studies [1]	3
or MDST 1002	Introduction to Social Media	
MDST 2002	Media and Communication History [1]	3
Additional Courses		
Select 12 hours of MDST courses, 9 of which must be 3000 or 4000 level [1]		12
MDST 1001	Foundations of Media Studies	
MDST 1009	Truth, Beauty, and Conspiracy	
MDST 1002	Introduction to Social Media	
MDST 1003	Critical Media Literacies	
MDST 2001	Introduction to Global Media	
MDST 2010	Media and Social Movements	
MDST 2011	Disruptive Entrepreneurship in the Internet's New Economies	
MDST 2012	Hacker Culture	
MDST 2031	Documentary and Social Change	
MDST 2032	Visual Literacies & Design	
MDST 2046	Future Histories of Technology	
MDST 3001	Media Research	
MDST 3002	Digital Culture and Politics	
MDST 3021	Comic Books: Culture and Industry	
MDST 3022	Social Media Cultures	
MDST 3101	History of Computing and Information	
MDST 3201	Media, Culture and Globalization	
MDST 3321	Media Industries and Economics	
MDST 3331	Sports-Media Complex	
MDST 3341	Designing Alternative Media Platforms	
MDST 3401	Media, Food and Culture	
MDST 3711	Media and Popular Culture	
MDST 3791	Media and the Public	
MDST 4003	Digital Media Production and Design	
MDST 4071	Screenwriting	
MDST 4111	Crime, Media and Contemporary Culture	
MDST 4121	Deconstructing Disney: Mediated American Mythology	
MDST 4211	Asian Media and Culture	
MDST 4220	Viral Video & Media	
MDST 4221	Media Technology and Cultural Change	
MDST 4231	Youth Media: Culture and Politics	
MDST 4241	Visual Culture and Human Rights	
MDST 4311	Mass Communication Criticism	
MDST 4331	Gender, Race, Class, and Sexuality in Popular Culture	
MDST 4341	International Media and Global Crises	
MDST 4361	TV and the Family in American Culture and Society	
MDST 4371	Media and Religion	
MDST 4372	Islam, Pop Culture and Media	
MDST 4401	Fan and Audience Studies	
MDST 4402	Transmedia Worldbuilding	
MDST 4405	Queer and Trans Identities in Popular Culture	
MDST 4601	Media Law, Policy and Ethics	
MDST 4841	Undergraduate Independent Study	
MDST 4871	Special Topics	
MDST 4931	Internship	
Total Credit Hours		**18**

[1] The minor requires either MDST 1001 or MDST 1002 as a core course. The other introductory course may be used as an elective towards the 18 required hours, but the minor must still result in 18 hours (the introductory course used as a core requirement does not also count as an elective).

Learning Outcomes

By the completion of the program, students will be able to:

- Awareness of communication and power within and across networks.
- An understanding of the historic and contemporary systems of inequity across social identities, nationalities, socioeconomic class and the role of media, communication and information in both creating and addressing them.
- Competence to conduct research using at least one method appropriate to media research.
- The ability to produce compelling and effective problem-solving in their given fields.

Sports Media

CMDI provides students with training in all areas of sports media through its programs in Journalism and through its interdisciplinary Sports Media Minor. These programs allow students the opportunity to study sports as culture, as communication, as an industry and as a social force.

The Sports Media Minor offers students the freedom to explore many aspects of one of the largest industries in the world. The minor harnesses the strength of all of CMDI's academic departments to deliver an introduction to numerous fields in the sports industry such as sports journalism, promotion and publicity, the economics of the industry, and sports media relations. The sports media minor is open to all CU Boulder undergraduates, regardless of college, school or major.

Sports Media - Minor

The mission of the minor in sports media is to broaden students' understanding of the role of sports in society by enhancing the quality of public communication on sports, especially the quality of sports journalism and the delivery of sporting events. The goal of the minor is to take the student's interest in sports and provide perspective so that they can tell a meaningful story of the sport either through journalistic reporting, media relations or entertainment.

Additional information on the minor may be found on CMDI's Sports Media Minor (https://www.colorado.edu/cmci/sportsmediaminor/) webpage.

Requirements

Required Courses and Credits for CMDI Students

Students who minor in journalism may not use the same JRNL courses for the JRNL major or minor and for the sports media minor, with the exception of JRNL 3804. Only courses with grades of C- or better count toward the minor, and the overall minor GPA must be 2.0.

Students may apply no more than six credit hours of transfer work, including three hours of upper-division credit.

Code	Title	Credit Hours
Required Courses		
JRNL 3804	Sports, Media and Society	3
Electives		
Select 4 from the list below; at least 2 must be upper-division. [1]		12
CMCI 3910	CMDI Practicum [2]	
CMCI 4021	Prime Time: Public Performance and Leadership	
CMCI 4931	Internship [2]	
COMM 3430	Communication, Culture and Sport	
ETHN 3024	Introduction to Critical Sports Studies	
ETHN 3104	Selected Topics in American Studies (Governance of Sport)	
ETHN 3701	Gender, Sport and Culture	
ETHN 3702	African American Sport Experience	
ETHN 3704	Athlete as a National Symbol: Nationhood/Nationalism, Sport	
ETHN 4714	Sport for Social Justice	
HIST 2516	America Through Baseball	
JRNL 2014	Race and Sports Journalism	
JRNL 3251	History of Sports Journalism	
JRNL 3704	Sports Reporting I	
JRNL 3904	Sports Journalism and Gender	
JRNL 4004	The Sports Media Industry	
JRNL 4704	Athletic Media Relations	
JRNL 4714	Sports Broadcasting	
JRNL 4724	Sports Announcing	
MDST 3331	Sports-Media Complex	
PHIL 2240	Philosophy and Sports	
Total Credit Hours		**15**

1 JRNL majors may not use any JRNL classes to meet the requirements in this section.

2 If students would like to take a practicum or internship: Practicums are preferred; students must petition the minor's director to be able to complete internship credit. The internship does *not* replace the internship required for the major. Prerequisites for either the practicum or the internship are MDST 3331 or JRNL 3804 and at least junior standing.

Required Courses and Credits for Non-CMDI Students

Code	Title	Credit Hours
Required Courses		
CMCI 2001	Introduction to Sports Media Practices	2
JRNL 3804	Sports, Media and Society	3
Electives		
Select 4 from the list below; at least 2 must be upper-division, including one practice (P) and one conceptual (C) course		12

PHIL 2240	Philosophy and Sports (C)	
Total Credit Hours		**17**

1 If students would like to take a practicum or internship: Practicums are preferred; students must petition the minor's director to be able to complete internship credit. Prerequisites for either the practicum or the internship are CMCI 2001 and MDST 3331 or JRNL 3804 and at least junior standing.

Education

The School of Education offers programs that prepare individuals to lead in a wide array of educational settings, including teaching in K–12 classrooms, conducting educational research, developing evidence-informed policy and designing innovative learning environments both in schools and in community-based settings.

Whether it is the dream to be a classroom teacher, a community activist or an innovator in research and policy, the School of Education programs are designed for a student's success with field-based experiences, mentorship and community at the core.

Mission

Our mission in the School of Education is grounded in a lived commitment to democracy, diversity, equity and justice. We teach and conduct research to make a positive difference with and in schools and communities. The work of our faculty, researchers, staff and students leads to evidence-based policy and practice. We aim for our graduates to be engaged and informed educators, researchers, policymakers and community leaders.

Licensure

The School of Education is authorized by the Colorado Department of Education and the Colorado Department of Higher Education to offer teacher preparation programs.

Because each state has its own laws and standards regarding teacher preparation, our teacher education programs do not prepare candidates for licensure in states other than Colorado. It is strongly recommended that students planning to seek professional licensure or certification in a state other than Colorado contact the appropriate licensing entity (https://www.colorado.edu/education/out-state-licensing-or-reciprocity-co-licensure-other-states/) in that state to seek information and guidance regarding licensure or certification requirements and how a degree from CU Boulder aligns with another state's requirements for licensure in advance of program completion.

Policies & Requirements

Admission Requirements

Individuals who are not currently enrolled at CU Boulder should apply for admission following Office of Admissions (https://www.colorado.edu/admissions/) guidelines.

Students interested in the BA in Leadership and Community Engagement or in Education Studies should apply to the School of Education. These two degrees are non-licensure degrees and can be paired with another degree outside of the School of Education. Applicants interested in becoming qualified for licensure as a teacher, should apply either to the BA in Elementary Education (grades K-6) or to the BA in Middle and High School Teaching (grades 6-12). Applicants pursuing secondary teaching grades 6-12 must also complete a content area degree, often in the College of Arts and Sciences, and will indicate on their application which degree they intend to pursue. That degree will be added to their record once the student begins their program, after consultation with a School of Education academic advisor.

Undergraduate students currently enrolled in a degree program at CU Boulder must complete an intra-university transfer (IUT) application to be considered for admission to School of Education BA or licensure programs. All IUT applicants to licensure programs must meet with a School of Education advisor before their application will be processed. Non-licensure applicants are not required to meet with an advisor before applying but are strongly encouraged to do so. Details about IUT applications, including prompts for the required essay, are available on the School of Education website (https://www.colorado.edu/education/admissions/change-or-add-your-cu-boulder-major/).

Individuals who have completed a baccalaureate degree at an accredited institution and wish to pursue secondary licensure only, may apply by following the "Post-BA Licensure Application" link on the School of Education website (https://www.colorado.edu/education/admissions/). Please note that post-baccalaureate licensure is only available for secondary licensure in mathematics, science and Spanish.

Personal statements are required of all applicants. Decisions are made holistically, with consideration to an applicant's academic record as well as supplemental materials.

Transfer Credit

Coursework completed at another college or university will be considered for transfer credit in accordance with CU Boulder policies upon receipt of an official transcript from the credit-granting institution. (https://catalog.colorado.edu/undergraduate/admissions/transfer-college-level-credit/) Advanced Placement, International Baccalaureate, CLEP, and other approved examination credit will be evaluated in accordance with CU Boulder policies (https://catalog.colorado.edu/undergraduate/admissions/credit-examination/) upon receiving an official score report from the examining organization. Courses evaluated as direct equivalents to other CU Boulder courses will satisfy the same requirements as if the student took the class at CU Boulder. Courses that transfer without direct equivalents may satisfy content or general education requirements.

Transfer credit typically cannot satisfy specific education requirements toward licensure. Education courses approved for transfer will typically go toward elective credit. Licensure programs will take at least two years to complete, regardless of the number of credits a student is able to transfer.

Associate's Degrees from Colorado Community Colleges

Students who have completed an Associate of Arts (AA) or Associate of Science (AS) degree from a Colorado Community College will be exempt from School of Education general education requirements. However, licensed students may still be required to complete courses toward specifically-required content requirements.

Elementary Education majors who have completed the Colorado Community College AA in Elementary Education, a Degree with Designation for statewide transfer, can finish their Elementary Education degree at CU Boulder in four consecutive fall and spring semesters, provided they took world history as one of their electives as specified in the Colorado Department of Higher Education's guide to electives for the Elementary Education degree (https://cdhe.colorado.gov/sites/highered/files/documents/Revised%20ELEMENTARY%20EDUCATION%20STAA%20IHE%20ELECTIVE%20CREDITS%20JULY%202023.pdf). Students who completed the AA without taking the world history elective will need to take a world history class as part of their CU Boulder coursework.

Scholarships and Awards

The School of Education offers over 60 scholarships each year. Application instructions and step-by-step information is accessible through CU Boulder's scholarship application. (http://www.colorado.edu/scholarships/)

Students are eligible to apply for university-wide financial assistance through the Office of Financial Aid. State and federal programs are available for loan cancellation or forgiveness for Colorado teachers of certain subjects or who teach in designated schools serving students

from low-income families. Information about these opportunities may be found at the School of Education Financial Aid and Scholarships (https://www.colorado.edu/education/student-life/financial-aid-scholarships/) page.

Graduation with Distinction

School of Education BA students who have a cumulative GPA of 3.75 or above upon graduation are awarded "Graduation with Distinction" honors. This designation will appear on the student's transcript and diploma.

Academic Standards

School of Education students are responsible for familiarizing themselves with degree and/or licensure requirements detailed in the CU Boulder Catalog, the School of Education Student Handbook, and, if applicable, the School of Education Teacher Education Handbook. Students pursuing teacher licensure are in a professional program guided by a code of conduct and other requirements beyond classroom performance. A student not meeting professional licensure expectations may be subject to additional requirements or performance reviews even if they maintain satisfactory grades in their coursework, and may be transitioned to a non-licensure major if professional expectations are not fulfilled.

Academic Standing

Please see the Undergraduate Academic Records (https://catalog.colorado.edu/undergraduate/academic-records/#academicstandingtext) page for Academic Standing information. If you have questions about academic standing and related options, see your School of Education academic advisor.

General Education Requirements

The School of Education General Education (Gen Ed) curriculum consists of at least 40 credits in three basic categories of requirements: Skills, Distribution and Diversity. Courses used to fulfill the diversity requirements may also fulfill a distribution requirement, otherwise courses may not simultaneously fulfill more than one requirement. EDUC 3013 (https://catalog.colorado.edu/search/?P=EDUC%203013) fulfills both the Social Science Distribution and the US Perspective Diversity requirements.

- Skills requirement: 9 credits (6 Written Communication [including one upper-division course], 3 Quantitative Reasoning and Mathematical Skills) plus a third-level proficiency in a world language other than English
- Distribution requirement: 31 credits (12 Arts & Humanities, 12 Social Sciences, 7 Natural Sciences and Natural Sciences lab)
- Diversity requirement: 6 credits (3 US Perspective and 3 Global Perspective)

The world language graduation requirement for the School of Education's undergraduate BA programs is third-level proficiency in a modern or classical language (other than English). Students may fulfill this requirement by:

- Successfully completing three years of high school coursework in a single language, or
- Earning AP or IB credit for an appropriate third-semester college-level course that is part of a three-course sequence, or
- Passing, with a C- or better, an appropriate third-semester college-level course that is part of a three-course sequence, or
- Passing a CU Boulder approved language proficiency examination at third-level proficiency.

The world language area of the Skills requirement aligns with the School of Education's commitment to prepare graduates who are well equipped to serve the needs of all students and advocate for educational equity and justice in our increasingly diverse communities and schools.

Residency Requirement

School of Education undergraduate students must complete a minimum of 30 credit hours in coursework through the Boulder campus. Of these 30 credit hours, a minimum of 15 upper-division credit hours must be completed as a matriculated student in the School of Education. A maximum of 6 credit hours completed at other University of Colorado campuses can be counted towards the minimum 30 credit hours in coursework completed through the Boulder campus. Coursework completed through a CU Boulder-approved education abroad program will count towards the 30 credit hours in coursework though the Boulder campus.

Grading Policies

Passing Grades

Undergraduate teacher licensure candidates must earn a grade of C- or better for a course to fulfill degree requirements, skills requirements, or content requirements for elementary or secondary licensure. For elementary education candidates, whose content requirements are the same as their distribution requirements, this means that C- or better grades must be earned in courses fulfilling distribution requirements as well.

All undergraduate teacher licensure candidates must earn a grade of B- or better in their upper-division EDUC courses to progress through course sequences required for licensure. Courses in which grades of D+, D, or D- are earned may apply toward elective credit only.

Undergraduate majors in non-licensure programs must earn grades of C- or better in all courses applied toward major requirements. A grade of D- or better is required for all other courses applied toward non-licensure undergraduate majors (e.g., skills and distribution requirements, except the world language requirement as defined above).

Incomplete Grades

An incomplete (I) grade indicates that the student did not complete the requirements for the class by the end of the grading period for that semester, and has made a written agreement with the instructor for additional time to do so. Requests for incomplete grades must be initiated by the student and only when, for reasons beyond their control, the student is unable to complete the class requirements within the semester of enrollment.

To be eligible to request an incomplete grade in a course, a student must have

1. satisfactorily completed at least 60% of all course requirements;
2. a grade below the minimum grade required for that course to apply to degree or licensure requirements, calculating the missing coursework as zero.

If the instructor approves the request, the student and instructor should work together to generate a list of the outstanding work to be completed, its weighted value towards the final grade, and clear timelines for submission. The student must document the expectations on the Incomplete Grade Agreement Form, located on the School of Education website (https://www.colorado.edu/education/student-life/policies-forms/), and submit it for the instructor's signature.

Submission deadlines should take into consideration time needed to read the materials and submit the grade change paperwork before university grading deadlines. The university allows up to one year to complete requirements, but the instructor may specify a shorter time period. If no updated agreement is in place and work is not submitted by agreed-upon deadlines specified in the agreement, the instructor will update the grade based on the work that has been submitted at that time. It is the student's responsibility to keep track of their deadlines. If no update is submitted by the grading deadline of the semester one year after the semester in which the incomplete grade was earned, it will convert to an F grade per campus policies (https://catalog.colorado.edu/undergraduate/credits-grading/).

Pass/Fail and No-Credit Coursework

Coursework applied toward School of Education degree, minor, certificate, or licensure requirements may not be taken pass/fail or as a no-credit course. During the Spring 2020 semester, the Boulder campus created an exception to this policy due to the COVID-19 shutdown of in-person campus activities. In accordance with the requirements for passing grades described above, P+ grades, reflective of C- or better, are required for applicability to degree or licensure requirements for courses taken in spring of 2020.

Grade Replacement

Students may retake certain courses for grade replacement in accordance with university policies (https://www.colorado.edu/registrar/students/degree-planning/grade-replacement/).

Grade Changes

To request a change in grade status after published deadlines (e.g. pass/fail to letter grade), you must complete and submit a School of Education Petition Form, located on the School of Education (https://www.colorado.edu/education/student-life/policies-forms/) website. Please contact your primary academic advisor for details.

Attendance Policy

The education discipline is collaborative, therefore classroom presence and engagement is critical to appropriately reach a class's learning goals. Classes may have a maximum number of absences after which work cannot be made up and the course is automatically failed, regardless of the nature of or reason for the absence. Each course's attendance policies and expectations for make-up work will be clearly outlined in its syllabus.

Student Grievance Policy

The School of Education Student Grievance Procedure is intended to provide a procedure for the resolution of disputes between students and faculty or staff of the School of Education, as well as procedures for handling student disciplinary matters. Please consult the School of Education's Student Handbook for the grievance procedures, located on the School of Education (https://www.colorado.edu/education/student-life/policies-forms/) website. Any question about these procedures should be directed to the Associate Dean for Undergraduate and Teacher Education.

If you have a grievance with an individual faculty member, the first step is to speak directly to the faculty member about your concerns. However, if you feel that this would put your safety or wellbeing at risk, or if this doesn't resolve the issue, please meet with your academic advisor.

Your academic advisor will help you navigate this process. If the complaint involves your academic advisor, the Director of Advising can support you in this process. Students in INVST Community Studies should first go through that program's grievance procedures.

Advising

Academic advisors are students' primary point of contact in the School of Education, and students should maintain regular contact with their assigned advisor, including meeting at least once per semester, to ensure that they maintain progress toward graduation and licensure requirements, if applicable. Undergraduate majors will have a hold placed on their record several weeks before their assigned registration date each term, and must meet with their advisor before they will be allowed to register unless otherwise exempted. Students in secondary teacher education programs (for teaching grades 6-12), who are also completing a major outside the School of Education, should maintain contact with advisors from the School of Education and from the School, College, or Department where their content-area major is located. In addition to working with their advisor(s), students should familiarize themselves with all policies and deadlines.

Students may make appointments with an advisor through Buff Portal Advising or by emailing edadvise@colorado.edu. More information is available on the School of Education's Advising (https://www.colorado.edu/education/student-life/advising/) webpage.

Graduation

Students wishing to graduate at the end of a term must submit an online application to graduate in Buff Portal, meeting all appropriate application deadlines published by the Office of the Registrar. Students who do not apply to graduate will not have degrees conferred, regardless of completion of requirements, and must apply to graduate for a future term.

Both the university and the School of Education hold graduation ceremonies only at the end of the spring semester. The School of Education spring ceremony is open to School of Education majors, minors, and certificate students who graduate that semester, as well as those who graduated in the previous fall or summer and those who will graduate in the subsequent summer or fall. The ceremony is also open to students pursuing teaching licensure who complete their student teaching in the spring or the previous fall semesters, regardless of the term in which they graduate (if different).

Students who apply to graduate but do not fulfill all degree requirements by the deadline for that term/year must submit a new online graduation application for the term in which they will fulfill remaining requirements.

Programs of Special Interest

CU Engage

The mission of CU Engage is to leverage the resources of the Boulder campus to work collaboratively with community groups to address complex public challenges. CU Engage, which is part of the School of Education, develops and sustains equity-oriented partnerships, organizes opportunities for students to learn alongside community members and supports participatory research methods focused on the public good.

CU Engage provides support for two focal activities: 1) community-based learning pathways and 2) community-based research. These activities are linked through the formation of community partnerships that support both learning and research. Community-based learning pathways—including INVST Community Studies, Public Achievement, CU Dialogues and the Leadership Studies Minor—prioritize experience (learning by doing), reciprocity (work with rather than for communities) and intellectual rigor rooted in academic disciplines. Community-based research refers to projects that bring people together with varied training and expertise, working collectively in mutually beneficial ways, on research studies that matter to the public.

Equity & Diversity Initiatives

As an important part of its mission, the CU Boulder School of Education has a strong commitment to democracy, diversity and social justice. Given that education is a cornerstone of individuals' life chances and opportunities as well as an informed and engaged public, the unwavering evidence of inequality in American education demands the sustained and dedicated attention of researchers, educators and policymakers.

Education Diversity Scholars Program

The Education Diversity Scholars (EDS) program works with the University of Colorado's LEAD Alliance Neighborhood to provide students of color and first-generation college students with social and academic support, as well as advising on financial support and career preparation. The goal of the program is to offer students a welcoming environment and a strong support network in order to help them excel in their chosen fields. By participating in the Education Diversity Scholars neighborhood, students have access to the personal contact and support of a small community while still being able to take advantage of the benefits of a large university.

INVST Community Studies

Consistent with their vision for a just and sustainable world, the INVST Community Studies program develops engaged citizens and leaders who work for the benefit of humanity and the environment. INVST Community Studies innovatively operates as a community-based organization, practicing service learning and participatory education. In order to fulfill this mission, the program offers:

- Comprehensive two-year Community Leadership Program (CLP) focused on developing community leaders who engage in compassionate action as a lifetime commitment;
- Community Studies electives that foster civic responsibility and leadership potential;
- Public Achievement Program where CU undergrads coach local primary and secondary school students in the design and implementation of public action projects; and
- Youth Council for Public Policy that empowers young people to use the democratic process as a tool for positive social change.

The INVST CLP offers a unique and transformational educational experience to all majors. Each year the INVST CLP admits a small group of students who are committed to making a positive difference with their lives. The two-year program is designed to cultivate deep understanding about issues facing people and the planet and to provide skills and experiences for community leaders to fulfill progressive visions for change. Specifically, students participate in theory classes, skills-training classes and two summer service-learning experiences, one domestic and one international. In addition, students intern six hours each week with community-based organizations during their first academic year, and collectively design, implement and evaluate community leadership projects during their second academic year. Students learn and serve together in a small group environment throughout the program. Applications for the INVST CLP are due every year in February.

Multicultural Leadership Scholars Program

The Multicultural Leadership Scholars (MLS) program offers engaging courses, advising and co-curricular activities, and is open to first-year students from all majors. Based on a social justice approach, coursework for the the MLS program emphasizes that building community, collaboration, ethical reflection, respect and valuing diversity are hallmarks of contemporary leadership practice. Taking classes as a Multicultural Leadership Scholar as a first-year student allows one to complete 8 of the 16 credits needed to earn a Leadership Studies Minor.

STEM Initiatives

CU is a leader in Science Technology Engineering and Math (STEM) education. The School of Education, in collaboration with the College of Arts & Sciences, developed and is a national leader in the Learning Assistant model. Additionally, CU Boulder was one of the original 13 institutions selected to replicate the U Teach Model which started at the University of Texas, Austin. Both the LA and CU Teach programs help us prepare outstanding secondary math and science teachers.

The Learning Assistant (LA) Model at CU Boulder uses the transformation of large-enrollment science courses as a mechanism for achieving four goals:

- Recruit and prepare talented science majors for careers in teaching;
- Engage science faculty in the recruitment and preparation of future teachers;
- Improve the quality of science education for all undergraduates; and
- Transform departmental cultures to value research-based teaching for ourselves and for our students.

The transformation of large-enrollment courses involves creating environments in which students can interact with one another, engage in collaborative problem solving and articulate and defend their ideas. To accomplish this, undergraduate LAs are hired to facilitate small-group interaction in our large-enrollment courses.

CU Teach is a four-year degree/licensure program that allows students to complete a rigorous education in a mathematics, science or engineering major and fulfill requirements for a Colorado initial teaching license in secondary mathematics or secondary science. It is a unique collaborative program between the College of Arts and Sciences, the College of Engineering and Applied Science, and the School of Education. CU Teach students get immediate hands-on teaching experience by enrolling in the first course in the program, EDUC 2035 Designing STEM

Learning Environments and Experiences. Students can enroll in EDUC 2035 as early as their first semester at CU. In addition to taking courses from research faculty in the School of Education, the College of Arts & Sciences, and the College of Engineering and Applied Science, CU Teach students get support from Mentor Teachers (current K–12 teachers) and Master Teachers (CU faculty who are veteran classroom teachers). The student organization hosts activities and events that are social as well as service-oriented, and that help students develop career networks.

Programs of Study

The School of Education provides initial teacher licensure programs that ensure rigorous content preparation and extensive clinical experience in local partner schools. Initial teacher licensure programs are available at the undergraduate, post-baccalaureate and master's level. The School of Education collaborates with the College of Arts & Sciences, the College of Engineering and Applied Science and the College of Music to design initial teacher licensure programs for undergraduates that combine a major in Arts & Sciences, Engineering and Applied Science or Music with courses and field experiences in education. Undergraduates pursing licensure in Secondary or K–12 Music complete the teacher licensure requirements while earning a bachelor's degree from another college on campus. Undergraduate students interested in K–6 Elementary Education pursue a major in Elementary Education.

The Education Studies major is an option for undergraduates interested in the study of education, but not necessarily classroom teaching. This program does not lead to teacher licensure but rather prepares students for a broad range of career paths, which could include advocacy, policymaking, higher education or graduate work.

The Leadership and Community Engagement major integrates college courses with work in real world settings. Through this program, undergraduates are provided opportunities to participate in community-based research and programs.

In addition, the School of Education offers two undergraduate minors – one in Education and one in Leadership Studies – and an undergraduate certificate in STEM Education.

Course codes for the programs are EDUC, INST, INVS, and LEAD.

Bachelor's Degrees

- Education Studies - Bachelor of Arts (BA) (p. 792)
- Elementary Education - Bachelor of Arts (BA) (p. 794)
- Leadership and Community Engagement - Bachelor of Arts (BA) (p. 798)

Minors

- Education - Minor (p. 808)
- Leadership Studies - Minor (p. 809)

Certificates

- STEM Education - Certificate (p. 813)

Teacher Licensure Programs

- Post-Baccalaureate (p. 814)
- Undergraduate Teacher Licensure (p. 821)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Taylor, Edward V. (https://experts.colorado.edu/display/fisid_151510/)
Associate Teaching Professor; PhD, University of California, Berkeley

Valladares, Michelle
Associate Research Professor, Associate Director; PhD, University of California, Los Angeles

Van Buskirk, Allison (https://experts.colorado.edu/display/fisid_159795/)
Assistant Teaching Professor; MA, Naropa University

Veveer, Elaina
Assistant Teaching Professor; MA, University of Colorado Boulder

Webb, David C. (https://experts.colorado.edu/display/fisid_141204/)
Associate Professor; PhD, University of Wisconsin–Madison

Welner, Kevin G. (https://experts.colorado.edu/display/fisid_115565/)
Professor Emeritus; PhD, University of California, Los Angeles

White, Terrenda Corisa (https://experts.colorado.edu/display/fisid_152828/)
Associate Professor; PhD, Teachers College at Columbia University

Wilson, Terri Suzanne (https://experts.colorado.edu/display/fisid_155469/)
Associate Professor, Faculty Director; PhD, Columbia University

Courses

Education

EDUC 1001 (1) Humanities Teaching for Equity: Naming
Critically frames learning to teach for equity and justice. Focuses on naming and examining students' identities and positionalities. Orients students to the School of Education's mission and guiding principles of the Secondary Humanities program. Meets weekly on CU campus.
Requisites: Restricted to teacher licensure students with an EDEN-LICU, EDSS-LICU, or EDSP-LICU plan
Grading Basis: Letter Grade

EDUC 1020 (1) First Year Success at CU
Introduces first-year majors to campus resources and academic success strategies. Students learn about a wide range of topics, including time management, research, and student involvement. This course also serves as a forum for continued conversations about concepts from EDUC 3013: School in Society, as well as the social justice implications for emerging leaders and educators.
Repeatable: Repeatable for up to 2.00 total credit hours.
Requisites: Restricted to Education (EDUC) or Leadership/Community Engagement (LDCE) majors only.

EDUC 1080 (3) Decolonizing Education: Design for New Futures
What does critical pedagogy mean? What does it mean to be a transformative educator? What does emancipatory, critical, culturally sustaining education praxis, actually look like? These are the central questions that guide this course. In this course, students will have the opportunity to explore the intersection of curriculum design, critical pedagogy, and learning theory through conversations with scholars, teaching sample lessons, reflective writing, practice-based pedagogical activities, and examinations of current-events related to critical pedagogy. Formerly offered as a special topics course.
Grading Basis: Letter Grade

EDUC 1500 (1) Success Strategies in Higher Education
Introduces students to learning theories and a range of college success strategies to deepen their engagement with their academic work. Students will learn metacognitive practices to identify the values and aims driving their academic ambitions and craft their most successful path through their undergraduate experience.
Repeatable: Repeatable for up to 2.00 total credit hours.
Grading Basis: Letter Grade
Additional Information: Departmental Category: General Education

EDUC 1580 (3) Energy and Interactions
Engages non-physics majors in hands-on, minds-on activities and labs to investigate the physical world, the nature of science, and how science knowledge is constructed. This introductory course is especially relevant for future elementary and middle school teachers although it will meet the needs of most non-physics and non-science majors. Physics content focuses on interactions and energy.
Equivalent - Duplicate Degree Credit Not Granted: PHYS 1580
Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences
Departmental Category: General Education
MAPS Course: Chemistry
MAPS Course: Natural Science
MAPS Course: Physics

EDUC 2001 (2) Humanities Teaching for Equity: Noticing
Critically frames learning to teach for equity and justice. Focuses on noticing classroom and school spaces. Orients students to the School of Education's mission and guiding principles of the Secondary Humanities program. Meets weekly on CU campus. Includes 4 hours of middle school practicum each week.
Requisites: Requires prerequisite or corequisite course of EDUC 1001 (minimum grade C-). Restricted to teacher licensure students with an EDEN-LICU, EDSS-LICU, or EDSP-LICU plan.
Grading Basis: Letter Grade

EDUC 2015 (1) Elementary Mathematics and Science Teaching for Social Justice
Working for social justice is central to teaching mathematics and science with elementary-aged children. This course engages prospective elementary teachers with a multitude of early math and science experiences that children draw upon to understand their worlds. Participants will develop interest-driven, culturally sustaining, and inclusive action plans for teaching math and science for social justice with young learners.
Requisites: Restricted to Elementary Education (EDEL) majors only.
Grading Basis: Letter Grade

EDUC 2020 (2) Step 1: Inquiry Approaches to Teaching STEM
Invites science, mathematics and engineering students to explore teaching as a career by providing first-hand experiences teaching science/math lessons in local elementary classrooms. Introduces theory and practice necessary to design and deliver excellent instruction. Master teachers provide ongoing support and feedback. Meets weekly on CU campus (1.5 hours/week) and involves five visits to an elementary school.
Additional Information: Departmental Category: General Education

EDUC 2025 (1) Step 1: Inquiry Approach to Teaching in Informal Settings
Invites science, mathematics and engineering students to explore teaching and learning in informal K-12 environments. Introduces theory and practice necessary to design and deliver excellent instruction. Meets weekly on CU campus (1.5 hours/week) and requires participants to work a minimum of five hours with K-12 students at STEM-related special events such as science fairs, after school programs, and science camps.
Requisites: Restricted to AMEN, ASTR, BCHM, CHEM, EBIO, GEOL, IPHY, MATH, MCDB, PHYS, IDEN, NRSC, Arts and Sciences Open Option majors, Exploratory Studies or College of Engineering majors, or Education minors only.
Additional Information: Departmental Category: General Education

EDUC 2030 (2) Step 2: Inquiry-Based Lesson Design
Builds on EDUC 2020 and further develops lesson design and inquiry-based teaching practice. Offers opportunity to explore teaching career and learn about middle school culture. Master teacher provides support as students design and deliver lessons in middle school classrooms. Emphasizes assessment of student learning. Meets weekly on CU campus (1.5 hours/week) and involves five visits to a local middle school.
Requisites: Requires prerequisite of EDUC 2020 or EDUC 4610 (all minimum grade C).
Additional Information: Departmental Category: General Education

EDUC 2035 (3) Designing STEM Learning Environments and Experiences
This introductory course to the CU Teach licensure program will facilitate students exploring secondary STEM teaching as a career and provide foundational knowledge for the design of learning environments. Following an introduction to the theory and practice behind research-based and equity-seeking STEM instruction, students will observe and team-teach lessons in a middle school classroom to obtain introductory, firsthand experience in the design of learning environments and experiences.

EDUC 2050 (1) Step Up to Social Justice Teaching
Engages students in theory and practice for justice-centered teaching. This first required course for majors introduces the principles guiding the elementary program and provides opportunities for students to enact those principles in collaboration with children and teachers in public school classrooms. Meets weekly on CU campus (1.25 hours/week). Involves additional visits to local schools.
Requisites: Restricted to School of Education (EDUC) undergraduates only
Additional Information: Departmental Category: General Education

EDUC 2060 (3) Step Up to Social Justice Teaching
Engages students in theory and practice for justice-centered teaching. This first required course for majors introduces the principles guiding the elementary education program in connection to teaching literacy, mathematics, and science. This semester-long inquiry space provides opportunities for students to observe, explore, and enact the guiding principles in collaboration with children and teachers in public school classrooms and/or other community spaces. Teacher candidates will learn how schooling can open up, sustain, and/or close down opportunities for children to be seen, heard, and regarded as knowers and do-ers.
Requisites: Restricted to Elementary Education (ELED-BA) majors only.

EDUC 2125 (3) History of American Public Education
Provides an overview of the history of American education by exploring major reforms efforts from the common school movement to "Nation at Risk." Examines what intellectuals were thinking about public schools and what ordinary people experienced in them. Assesses how differences in race/ethnicity, class, gender, and power shaped public schools.
Additional Information: Arts Sci Core Curr: United States Context
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: General Education

EDUC 2130 (3) Teaching and Learning Math: Calculus, Trig and Adv Functions
This course focuses on the design and facilitation of mathematics experiences that embody more active approaches to learning advanced mathematics topics, including advanced algebra, trigonometry, and calculus. The parallel investigation of mathematics content, task design, and issues of teaching and learning occur throughout the course; this intertwining of perspectives is accomplished through the use of various instructional materials, readings, activities, and mathematics curricula. One overarching goal is to engage participants in advanced mathematical reasoning, to reflect on their own knowledge of mathematical relationships, and to examine pedagogical ideas that can foster productive mathematical teaching and learning.
Additional Information: Arts Sci Gen Ed: Quantitative Reasoning Math

EDUC 2150 (3) Education in Film
Provides opportunities to view and analyze how facets of education are represented (or misrepresented) in film. Considers narratives constructed about education and how those stories fuel popular conceptions of and assumptions about students, teachers, and schools. Examines how issues of race, class, and gender are embedded in how films represent schools, teachers, students, and communities.
Additional Information: Departmental Category: General Education

EDUC 2311 (3) Children's Literature and Literacy Engagement in Elementary Schools
Focuses on teaching children's literature in elementary schools & youth organizations. Participants will understand theoretical and developmental processes associated with literary learning, methods for teaching literature in a diverse society, and the integration of classroom instruction with the Colorado Academic Content Standards that foster such processes.
Additional Information: Departmental Category: Elementary Education

EDUC 2400 (3) Cultural Diversity and Awareness
Enhances students' self-awareness in a variety of educational and cultural settings. Investigates self within a cultural context, inviting students to engage more deeply with their cultural assumptions and lenses, as well as the cultural practices and beliefs of other distinct groups. Explores themes relating to diversity through works of fiction, cultural contexts, contemplative practices, poetry, music and experiential activities.
Additional Information: Departmental Category: General Education

EDUC 2411 (3) Educational Psychology for Elementary Schools
Integrates theories and ideas from elementary school child development, educational psychology and the learning sciences. Explores theories of learning and child development and considers implications for teaching, student engagement and the design of equitable and effective learning environments. Students are required to attend a practicum off-site for this class.
Additional Information: Departmental Category: General Education

EDUC 2425 (3) Foundations of Bilingual/Multicultural Education
Provides the conceptual, linguistic, sociological, historical, political, and legal foundations that have shaped bilingual education policies, program models, and teaching and assessment practices of bilingual and multicultural education in the U.S. Designed for undergraduate elementary teacher education majors, the course presents an overview of the types of bilingual education programs and the principles that anchor equitable and quality bilingual and multicultural education for emergent bilingual students, including those identified as English learners. Can be taken concurrently with EDUC 2615 (but should not be taken after).

EDUC 2490 (3) Educational Psychology for Elementary Schools
This course integrates theories and ideas from human development, educational psychology, and the learning sciences. Together, we will explore theories of learning and human development and consider implications for teaching, student engagement, and the design of equitable and effective learning environments.
Recommended: Prerequisite EDUC 3013 School and Society.

EDUC 2500 (3) Strategies for Social Change
Examines strategies for social change locally and internationally. Critically explores a range of social change case studies including: community organizations, social movements, social entrepreneurship, philanthropy, political and legal advocacy and technology. Students will develop their own proposal for a social change initiative.
Grading Basis: Letter Grade
Additional Information: Departmental Category: General Education

EDUC 2615 (3) Foundations of Language Acquisition for Bilingual Learners
This course provides an overview of the processes associated with bilingual and biliteracy development with a focus on children who are learning and living in two (or more) languages in their homes, communities, and schools. Designed for undergraduate elementary teacher education majors and preservice teachers, the course examines the complexity of bilingualism and biliteracy in school-age children, including the roles of language and culture in schooling.
Recommended: Corequisite EDUC 2425.

EDUC 2625 (3) Teaching English Language Development
Exposes students to strategies used to teach English Language Development. Covers both theoretical and applied aspects of language learning and teaching. Exposes students to techniques, activities, strategies and resources to plan instruction for students learning English Language Development. Emphasizes oral language development, literacy and content-area instruction for teaching K-12 students.
Additional Information: Departmental Category: General Education

EDUC 2800 (1-3) Special Topics
Designed to meet needs of students with topics of interest.
Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: General Education

EDUC 2910 (1-3) Field Practicum 1
Offers supervised campus and off-campus experiences tied to course work in the INVST program. See also EDUC 2920.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: General Education

EDUC 2919 (3) Renewing Democracy in Communities and Schools
Examines curriculum theory, K-12 reform, and the concepts of citizenship, democracy, power, and diversity through classroom discussion and participation in a school-based Public Achievement program. Students will dialogue with diverse groups of people; identify multiple perspectives around controversial issues; and learn to use research and writing to articulate public problems and advocate for their solutions.
Equivalent - Duplicate Degree Credit Not Granted: INVS 2919
Repeatable: Repeatable for up to 6.00 total credit hours.
Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Distribution-Social Sciences
Arts Sci Gen Ed: Diversity-U.S. Perspective
Departmental Category: General Education

EDUC 2920 (1-3) Field Practicum 2
Offers supervised campus and off-campus experiences tied to course work in the INVST program. See also EDUC 2910.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: General Education

EDUC 3001 (2) Humanities Teaching for Equity: Negotiating
Critically frames learning to teach for equity and justice. Focuses on how relationships are negotiated in classroom spaces. Orients students to the School of Education's mission and guiding principles of the Secondary Humanities program. Meets weekly on CU campus. Includes 4 hours of high school practicum each week.
Requisites: Requires prerequisite or corequisite course of EDUC 1001 (minimum grade C-). Restricted to teacher licensure students with an EDEN-LICU, EDSS-LICU, or EDSP-LICU plan.
Grading Basis: Letter Grade

EDUC 3013 (3) School and Society
Introduces students - both future teachers and those simply interested in education - to pressing issues surrounding education within the United States. The course reveals the complex relationship between schools and the larger society of which they are a part. Examines issues of diversity and equity from different disciplinary lenses, including history, philosophy, sociology and anthropology.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Core Curr: Contemporary Societies
Arts Sci Gen Ed: Distribution-Social Sciences
Arts Sci Gen Ed: Diversity-U.S. Perspective
Departmental Category: General Education

EDUC 3030 (3) Race, Class, and Gender in Young Adult Literature
This course is designed for students who are interested in learning more about how race, class, and gender appear in literature for young people, ages 10-18, and how literary explorations of these intersecting elements of identity might enrich, complicate, and/or challenge how we see ourselves, others, and our world. Together and independently, we will read and share in conversation around several multicultural young adult texts across multiple genres, including novels, short stories, poetry, drama, and nonfiction.
Grading Basis: Letter Grade

EDUC 3190 (3) Introduction to Teaching and Learning
This course engages students in questions about what it means to teach and what it means to learn. Through readings, video, and illustrations of teaching and learning in and outside of schools, the course builds understandings about some key areas of teaching, learning, and schooling that will complement the content from other courses in the program. The course is centered in a framework of educational equity and justice that is threaded through the modules. The course is designed to support students in their post-degree goals across career contexts in which knowledge of teaching learning will enhance their work.
Grading Basis: Letter Grade

EDUC 3320 (3) Literacy in the Elementary Classroom 1
Over the two-course sequence in literacy, students in the elementary major develop a foundational knowledge of core aspects of literacy learning and instruction and apply this knowledge in practica settings, working at individual, small group, and whole-class levels. Literacy 1 focuses primarily on the structure and components of equitable and robust reading instruction in K-5 classrooms, the five pillars of the reading process (phonics, phonemic awareness, fluency, vocabulary, and comprehension), and the analysis and implementation of evidence-based reading instruction practices, with some connections to writing development and assessment and writing instruction.
Requisites: Requires corequisite courses of EDUC 3350 and EDUC 4535 and EDUC 4595. Restricted to Elementary Education (ELED-BA) majors only.
Grading Basis: Letter Grade

EDUC 3321 (3) Literacy in the Elementary Classroom 2
Over the course of the two-course sequence in literacy, students in the elementary major develop a foundational knowledge of core aspects of literacy learning and instruction and apply this knowledge in practica settings, working at individual, small group, and whole-class levels. Literacy 2 builds on the goals of the first course in the sequence and provides a central focus on the structure and components of equitable and robust writing instruction in K-5 classrooms. The course addresses the skills and processes of writing, how to support and engage writers, writing assessment, and the analysis and enactment of evidence-based writing instruction practices. In addition, the course includes content area literacy and continues building students¿ facilities with digital and multimodal literacy in elementary classrooms.
Requisites: Requires prerequisite courses of EDUC 3320 and EDUC 3350 and EDUC 4535 and EDUC 4595 (all minimum grade B-). Requires corequisite courses of EDUC 4205 and EDUC 4435 and EDUC 4455. Restricted to Elementary Education (ELED-BA) majors only.
Grading Basis: Letter Grade

EDUC 3350 (3) Dis/Ability in Contemporary Classrooms
Examines major issues in special education focusing on a) developing an inclusive stance to teaching all students; b) understanding laws, responsibilities and RTI/MTSS; c) planning for and delivering differentiated instruction in a universally designed classroom environment; e) the social construction and identification of dis/abilities; f) understanding potential variations across federal disabilities categories; g) teaching students with gifts and talents and; h) collaborating with families and professionals.
Requisites: Requires corequisite courses of EDUC 3320 and EDUC 4535 and EDUC 4595. Requires prerequisite or corequisite courses of EDUC 2425 and EDUC 2615 (minimum grade D-). Restricted to Elementary Education (ELED-BA) majors only.

EDUC 3570 (3) Learning With Technology In and Out of School
Examines ways digital media are changing the way young people learn, play, make friends, and participate in civic life. Studies widely implemented digital tools intended to support literary, math, and science learning of children ages 4-18. Involves brief internship (5 hours outside class) and design projects that integrate these tools to transform in either a classroom or after-school program.
Additional Information: Departmental Category: General Education

EDUC 3621 (1-3) Art for the Elementary Teacher
Introduces elementary education students to art education. Introduces many visual art techniques, art media and processes used in art education. Includes hands-on studio art experiences in a format that supports subjects such as literature, writing, music and social studies. Emphasizes the role of art education and materials in supporting the artistic development and visual literacy of children. Department enforced prerequisite: completion of 30 hours of course work.
Requisites: Restricted to School of Education (EDUC) undergraduates only
Additional Information: Departmental Category: Elementary Education

EDUC 4001 (3) Framing Equity and Justice in the Humanities Classroom
Critically frames learning to teach for equity and justice within schools as systems. Orients students to the School of Education's mission and guiding principles of the Secondary Humanities program. Provides opportunities for students to enact those principles with mentor teachers in local classrooms. Meets weekly on CU campus and involves a minimum of 50 hours in local schools.
Equivalent - Duplicate Degree Credit Not Granted: EDUC 5001
Requisites: Restricted to EDEN-LICU, EDSS-LICU or EDSP-LICU students.
Grading Basis: Letter Grade

EDUC 4010 (3) Race and Equity in Higher Education
This course introduces students to recent research and theory surrounding race, ethnicity, access, inclusion, and equity in higher education. It focuses on the development of knowledge, skills and awareness that is crucial in becoming an engaged scholar and practitioner in the areas of diversity, equity, and inclusion. We discuss the responsibilities, tensions, and opportunities one must have in creating and maintaining a pluralistic and inclusive campus for all. We also discuss ways in which themes of identity and diversity operate far beyond one-on-one relationships but rather extend to systems and structures that comprise a college and/or university environment.
Equivalent - Duplicate Degree Credit Not Granted: EDUC 5010

EDUC 4015 (3) International / Comparative Education
Comparatively studies education in other countries, emphasizing its role in developing nations, with an emphasis on successful models in basic literacy, primary education, secondary curriculum and teacher education. Analyzes political, social and economic policies and ideologies for their relevance to the development process, including the role of international organizations: World Bank, UNICEF, UNESCO, Peace corps and Volunteer Agencies.
Equivalent - Duplicate Degree Credit Not Granted: EDUC 5015
Additional Information: Departmental Category: General Education

EDUC 4023 (3) Differentiating Instruction in Diverse Secondary Classrooms
Focuses on teaching culturally and linguistically diverse students, special education students, and differentiation in the classroom. Emphasizes evidence-based teaching practices and programmatic interventions that support student learning. Includes practicum.
Equivalent - Duplicate Degree Credit Not Granted: EDUC 4351
Requisites: Restricted to EDEN, EDFR, EDGR, EDIT, EDJP, EDLT, EDMA, EDMU, EDSC, EDRU, EDSP, EDSS or MMED majors only.
Additional Information: Departmental Category: Secondary Education

EDUC 4035 (3) Family and Community Engagement
Supports teachers to develop, improve and maintain positive relationships between families, communities, and schools. Discusses theories of family/community engagement with focus on embracing an assets-orientation. Explores the impacts families and communities can have in education, policies that impact family/community engagement in schools, and other potential bridges and barriers to meaningful partnerships. Challenges students to understand and embrace community-driven systemic education reform.
Requisites: Requires prerequisite courses of EDUC 3321 and EDUC 4205 and EDUC 4435 and EDUC 4455 (all minimum grade B-). Requires corequisite courses of EDUC 4215 and EDUC 4331 and EDUC 4710. Restricted to Elementary Education (ELED-BA) majors only.
Grading Basis: Letter Grade

EDUC 4050 (3) Knowing and Learning in Mathematics and Science
Explores current theories of learning in mathematics and science at the secondary level. This course focuses on learners' opportunities to learn mathematics and science in a classroom context from the perspective of different theoretical orientations. Students examine their own assumptions about learning, and critically examine the needs of a diverse student population in the classroom. Includes a weekly two hour field component.
Equivalent - Duplicate Degree Credit Not Granted: EDUC 5050
Requisites: Restricted to AMEN, ASTR, BCHM, CHEM, EBIO, GEOL, IPHY, MATH, MCDB, PHYS, IDEN, NRSC, Arts and Sciences Open Option majors, Exploratory Studies or College of Engineering majors, or Education minors only.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences Departmental Category: Secondary Education

EDUC 4060 (3) Classroom Interactions
Students design and implement instructional activities informed by what it means to know and learn mathematics and science, and then evaluate the outcomes of those activities on the basis of classroom artifacts. Students examine how content and pedagogy combine to make effective teaching. Students are required to work in a classroom 4 hours per week.
Equivalent - Duplicate Degree Credit Not Granted: EDUC 5060
Requisites: Restricted to School of Education (EDUC), Mathematics-Secondary Education (EDMA) or Science-Secondary Education (EDSC) majors only.
Additional Information: Departmental Category: Secondary Education

EDUC 4110 (1-3) Cultural Mentoring with Dual Language Learners
Introduces students to cultural mentoring, the role of cultural identity in schooling, and culturally responsive pedagogies through a partnership with a local elementary School. Students will be assigned fifth grade mentees to work with throughout the semester and will work with other mentors to plan group activities for the after-school program. Requires 2 hours/per week outside of meeting times for participant-observation at a local elementary school. Mentors can repeat the mentoring component one time for 1-credit. This course is designed for first generation and/or students from minoritized backgrounds who can serve as role models for Elementary students in a Dual Language Program. Interested students should contact the instructor prior to enrolling. Previously offered as a special topics course.
Repeatable: Repeatable for up to 4.00 total credit hours.
Requisites: Requires prerequisite of EDUC 3013 (minimum grade C-) or Ethnic Studies (ETHN) majors. Restricted to students with 57-180 credits (Juniors or Seniors).

EDUC 4112 (3) Adolescent Development and Learning for Teachers
Examines current theory and research about adolescent learning and development and explore implications for secondary teaching. Topics include human diversity as a resource for learning, adversity and agency, connecting instruction to students' everyday lives, and the role of belonging and relationships in positive youth development. This course is appropriate for masters degree students.
Equivalent - Duplicate Degree Credit Not Granted: EDUC 5112
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Additional Information: Departmental Category: Secondary Education

EDUC 4125 (3) Secondary World Language Methods
Presents and discusses issues in secondary school curriculum, instruction, and classroom management as they play out in world language classroom. Examines, analyzes, and evaluates a variety of teaching strategies, their effectiveness for students, and teacher dispositions to facilitate learning. Includes in-school experiences.
Additional Information: Departmental Category: Secondary Education

EDUC 4135 (3) Story and Memoir
Explores narrative theory and the epistemological/stylistic commitments of stories as the basis for writing memoir, as well as for studying the written and spoken memoirs of others. We use the word memoir to mean a story of "how one remembers one's own life." Introduces and discusses narrative theory and selected memoirs. Students engage in reflection on their own narrative-making processes and evaluate their practical and analytic understanding of daily narrative practice.
Equivalent - Duplicate Degree Credit Not Granted: EDUC 5135
Additional Information: Departmental Category: Secondary Education

EDUC 4150 (3) Introduction to Qualitative Research Methods
Introduces students to qualitative research in education. Examines the foundations, design, methods and analysis of qualitative research methods. Readings include texts about the foundations and purposes of qualitative inquiry, and methodological readings about the application of research techniques. Students will complete a variety of small, hands-on projects that introduce major dimensions of qualitative research including observation, interviewing, and document analysis.
Equivalent - Duplicate Degree Credit Not Granted: EDUC 5150
Grading Basis: Letter Grade
Additional Information: Departmental Category: General Education

EDUC 4161 (1-3) Children's Literature
Addresses reading and evaluation of books, children's, interests, authors and illustrators, folk literature, multicultural literature, modern fanciful tales, and trends.
Additional Information: Departmental Category: General Education

EDUC 4205 (3) Elementary School Mathematics Theory and Methods
The course focuses on learning theories, different instructional practices, models, and tools that can be utilized to elicit, assess, and build on elementary students¿ mathematical reasoning. The course subscribes to a view of mathematics that (1) all students can learn mathematics, (2) that powerful mathematics learning is an active process that engages students in deep mathematical inquiry, and (3) that equitable and culturally responsive teaching of mathematics requires strong mathematics knowledge for teaching.
Requisites: Requires prerequisite courses of EDUC 3320 and EDUC 3350 and EDUC 4535 and EDUC 4595 (all minimum grade B-). Requires corequisite courses of EDUC 3321 and EDUC 4435 and EDUC 4455. Restricted to Elementary Education (ELED-BA) majors only.
Grading Basis: Letter Grade

EDUC 4215 (3) Elementary Science Theory and Methods
Provides pre-service elementary teachers opportunities to explore contemporary theories of learning, curriculum development, pedagogical strategies, and assessment. Blends scientific content, pedagogy, and practical applications.
Requisites: Requires prerequisite courses of EDUC 3321 and EDUC 4205 and EDUC 4435 and EDUC 4455 (all minimum grade B-). Requires corequisite courses of EDUC 4035 and EDUC 4331 and EDUC 4710. Restricted to Elementary Education (ELED-BA) majors only.

EDUC 4220 (3) Gender Issues in Education
Provides a strong foundation in the various issues of gender and sexual diversity in education. Stimulates explorations into the ways the construct of "gender" affects and is affected by the educational system and process. Presents theory and research about contemporary educational issues related to sexism, homophobia, and transphobia. Encourages development of well-considered views about the various issues, research, and theories.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Recommended: Prerequisite EDUC 3013.

EDUC 4222 (3) Language Study for Educators
Focuses on the nature of linguistic development and performance. Examines works that reflect a range of scholarly approaches to language study, explores language use both in and out of school, takes up the relationships between language practices and power and considers implications for classroom teaching.
Equivalent - Duplicate Degree Credit Not Granted: EDUC 5222
Additional Information: Departmental Category: General Education

EDUC 4232 (3) Language and Literacy across the Curriculum
Explores the relationship between language and learning in math and science classrooms with the goal of developing teaching practices that engage students in using language as a tool for understanding and constructing meaning across the curriculum. Explores how language/literacy take on different forms and functions in different social contexts and academic disciplines.
Equivalent - Duplicate Degree Credit Not Granted: EDUC 5235
Requisites: Restricted to undergraduate Science-Secondary Education (EDSC) or Mathematics-Secondary Education (EDMA) majors only.
Additional Information: Departmental Category: Secondary Education

EDUC 4240 (3) African American Education in the United States
Explores development of schooling for African Americans in the U.S.. Emphasizes historical and contemporary struggles of this group in their quest to access meaningful educational opportunities. Examines how social, economic, political, and judicial action defined and organized policy and practice for this group. Degree credit not granted for EDUC 4240 and 6240.
Additional Information: Departmental Category: General Education

EDUC 4295 (3) Narrative and Story in the Humanities
Explores a wide variety of texts that might be used in secondary English and Social Studies classrooms. Examines philosophies and instructional approaches to the teaching of reading and literature. Considers the influence of story and storytelling in the construction of personal and societal meaning.
Equivalent - Duplicate Degree Credit Not Granted: EDUC 5295
Requisites: Requires corequisite of EDUC 3001 or EDUC 4001. Restricted to teacher licensure students in English (EDEN-LICU).
Grading Basis: Letter Grade
Additional Information: Departmental Category: Secondary Education

EDUC 4301 (3) Queer(ing) Topics in Education
Bring critical and queer theoretical perspectives to bear on an inquiry into what's counted as "normal" in social, historical, and political contexts of education in the United States. We'll explore queerness, queer theory, and queer pedagogy, in an effort to examine schooling as a heteronormative institution that has tended toward (re)producing heterosexism, homophobia, and violence against queer bodies and identities.
Equivalent - Duplicate Degree Credit Not Granted: EDUC 5301
Grading Basis: Letter Grade
Additional Information: Departmental Category: General Education

EDUC 4310 (3) Social and Emotional Learning in Schools
Explore the ways SEL benefits students through investigating its purposes and goals, the competencies it seeks to promote, the characteristics of effective programs, and the range of program formats. We frame these topics through examining ongoing dilemmas in the field. We also conduct in-depth reviews of several programs and the research that supports them.
Equivalent - Duplicate Degree Credit Not Granted: EDUC 5310

EDUC 4315 (3) Perspectives on Science
Explores contemporary ideas and issues in the history, philosophy and sociology of science education and science, science as a social and cultural activity and how contemporary issues in science relate to and impact educational practice.
Equivalent - Duplicate Degree Credit Not Granted: EDUC 5315
Additional Information: Departmental Category: General Education

EDUC 4316 (3) Nature of Social Studies and Social Studies Education
Prepares teacher education candidates for teaching social studies in a social context. Participants will understand theoretical and developmental processes associated with social studies learning, methods for teaching social studies in a diverse society, andthe integration of classroom instruction with the Colorado Academic Content Standards that foster such processes.
Equivalent - Duplicate Degree Credit Not Granted: EDUC 5316
Requisites: Restricted to Social Studies Secondary Education (EDSS-LICU or EDSS-LICG) students only.

EDUC 4317 (3) Perspectives on Mathematics
Explores the historical development of mathematics as a human construct, and the relationship between the discipline and the contemporary school mathematics curriculum. Focuses on the sociology of mathematics education and how cultural traditions and societal needs influence the school mathematics curriculum and educational practice.
Equivalent - Duplicate Degree Credit Not Granted: EDUC 5317

EDUC 4320 (3) Reading Instruction for Elementary Schools
Participants will engage theories and processes of literacy learning, reading development, and equity-oriented teaching. Students will learn, develop, and enact instructional strategies and lessons to support all students' successful participation in a range of print and multimodal literacy practices embedded in reading instruction in elementary classrooms.
Requisites: Restricted to Elementary Education (EDEL) majors only.
Additional Information: Departmental Category: Elementary Education

EDUC 4321 (3) Writing Instruction for Elementary Schools
Participants will engage theories and processes of literacy learning, writing development, and equity-oriented teaching. Students will learn, develop, and enact instructional strategies and lessons to support all students' successful participation in a range of multimodal literacy practices embedded in writing instruction in elementary classrooms.
Requisites: Requires prerequisite courses of EDUC 3350, EDUC 4320, EDUC 4535 and EDUC 4615 (minimum grade C-). Requires corequisite courses of EDUC 4205, EDUC 4435, EDUC 4455 and EDUC 4595. Restricted to Elementary Education (ELED) majors only.
Additional Information: Departmental Category: Elementary Education

EDUC 4325 (3) Queering Literacy in Secondary Classrooms
Engages theories and practices of literacy teaching and learning that challenge multiple forms of oppression. Using the tools of queer pedagogy, students will learn, develop, and enact strategies for planning and implementing literacy instruction that moves beyond inclusion of differences in the English/language arts and social studies curriculum.
Equivalent - Duplicate Degree Credit Not Granted: EDUC 5325
Requisites: Restricted to students with an English-Secondary Education Licensure pan (EDEN-LICU) or Social Studies-Secondary Education Licensure plan (EDSS-LICU).
Grading Basis: Letter Grade

EDUC 4330 (3) Secondary Social Studies Methods I
Explores effective social studies teaching techniques used to prepare secondary students for success in college, career, and civic life. An emphasis is placed on interpreting sources, understanding multiple perspectives, and employing critical thinking with diverse students.
Equivalent - Duplicate Degree Credit Not Granted: EDUC 5330
Requisites: Requires a prerequisite of EDUC 3001 or EDUC 4001 (both minimum grade C-). Restricted to teacher licensure students in Social Studies (EDSS-LICU).
Grading Basis: Letter Grade

EDUC 4331 (3) Elementary Social Studies Methods
Prepares teacher education candidates for teaching social studies in a social justice and equity context. Participants will understand theoretical and developmental processes associated with social studies learning, culturally responsive teaching pedagogy in social studies, methods for teaching social studies in a diverse society, and the integration of classroom instruction with the Colorado Academic Content Standards.
Requisites: Requires prerequisite courses of EDUC 3321 and EDUC 4205 and EDUC 4435 and EDUC 4455 (all minimum grade B-). Requires corequisite courses of EDUC 4035 and EDUC 4215 and EDUC 4710. Restricted to Elementary Education (ELED-BA) majors only.
Additional Information: Departmental Category: Elementary Education

EDUC 4340 (3) Advanced Issues of Assessment, Teaching, and Learning in Reading, Mathematics, and Science
In this course, students engage with theories and practices of assessment and instruction in the key content areas of reading, mathematics, and science. This course is taught in two half-semester modules¿one focused on reading and one on mathematics/science¿and occurs in the fourth and final year of the elementary major. The course addresses issues of assessment, teaching, and learning that build from and extend knowledge and practice from the assessment course and the methods courses in the three focal content areas. Modules will examine the purposes and practices of assessment in reading, mathematics and science education in elementary education. Particular attention will be given to theoretical foundations in assessment, applications of theory in classroom practice, and the design and use of assessment techniques and tools to support teaching for student understanding. While some attention will be given to large-scale assessment, this will be necessarily limited and addressed only as it pertains to the in
Requisites: Requires prerequisite courses of EDUC 4035 and EDUC 4215 and EDUC 4331 and EDUC 4710 (all minimum grade B-). Requires corequisite course of EDUC 4720. Restricted to Elementary Education (ELED-BA) majors only.
Grading Basis: Letter Grade

EDUC 4341 (3) Elementary Reading Assessment and Instruction
Builds on knowledge and teaching practices introduced in EDUC 4320. Addresses five critical components of reading. Refines understanding of research-based practices for diagnostic assessments and intervention, and teaching strategies for elementary age learners. Prepares candidates to deliver a comprehensive reading curriculum in the elementary grades.
Requisites: Requires corequisite courses of EDUC 4331 and EDUC 5215. Restricted to Elementary Education (EDEL) majors only.
Additional Information: Departmental Category: Elementary Education

EDUC 4345 (3) Secondary English Methods I
Explores the underlying principles and philosophies of several approaches to the teaching of English in the areas of language, writing, and speaking and the practical application of these methods in the secondary classroom. Provides support in constructing activities, assignments, assessments, and units that meet the differentiated needs of students given their diverse identities, lives, interests, and needs.
Equivalent - Duplicate Degree Credit Not Granted: EDUC 5345
Requisites: Requires a prerequisite of EDUC 3001 or EDUC 4001 (both minimum grade C-). Restricted to teacher licensure students in English (EDEN-LICU).
Grading Basis: Letter Grade
Additional Information: Departmental Category: Secondary Education

EDUC 4351 (3) Language and Equity in Inclusive Learning Environmnents
Focuses on responsive instructional approaches for elementary school students, including culturally and linguistically diverse students requiring special education services. Addresses relevant educational laws and policies aimed at protecting students' rights to a quality education. Includes practicum experiences in elementary school settings.
Equivalent - Duplicate Degree Credit Not Granted: EDUC 4023
Requisites: Requires corequisite course of EDUC 5205. Restricted to Music (EDMU) Education majors or Elementary (EDEL) majors only.
Additional Information: Departmental Category: Elementary Education

EDUC 4355 (3) Secondary Social Studies Methods II
Explores effective techniques associated with reading, processing, and assessing social studies subject area content with an emphasis on developing critical thinking skills and meeting the needs of diverse students.
Equivalent - Duplicate Degree Credit Not Granted: EDUC 5355
Requisites: Requires prerequisite course of EDUC 4330 (minimum grade C-). Restricted to Social Studies - Secondary Education (EDSS-LICU) students only.

EDUC 4365 (3) Secondary English Methods II
Explores the underlying principles and philosophies of several approaches to the teaching of English in the areas of reading, thinking, and viewing and the practical application of these methods in the secondary classroom. Provides support in constructing activities, assignments, assessments, and units that meet the differentiated needs of students given their diverse identities, lives, interests, and needs.
Equivalent - Duplicate Degree Credit Not Granted: EDUC 5365
Requisites: Requires prerequisite course of EDUC 4345 (minimum grade C-). Restricted to English - Secondary Education (EDEN-LICU) students only.

EDUC 4375 (3-4) Problem-Based Math Instruction
Focuses on curriculum, materials, methods and assessment, and related aspects of instruction. Introduces best practices in teaching mathematics in middle and high schools. Students are required to work in a classroom 4 hours per week. Examines the Colorado Academic Content Standards.
Equivalent - Duplicate Degree Credit Not Granted: EDUC 5375
Requisites: Restricted to EDCI, EDSC, or EDMA majors only.
Recommended: Corequisite EDUC 4023.

EDUC 4385 (4) Phenomenon-Based Science Instruction
Focuses on curriculum, materials, methods, assessment, and related aspects of instruction. Introduces best practices in teaching science in middle and high schools. Students are required to work in a classroom 4 hours per week. Examines the Colorado Academic Content Standards.
Equivalent - Duplicate Degree Credit Not Granted: EDUC 5385
Requisites: Requires prerequisite of EDUC 4060.
Recommended: Corequisite EDUC 4023.

EDUC 4390 (3) Teaching for Equity and Justice
Supports candidates as they continue to develop the skills and stance to teach for equity and justice in public school settings. Explores how educators for equity and justice sustain their commitments through ongoing learning and reflection, care for their students and themselves, and collaboration and advocacy. Supports candidates in making the transition from the university into the profession in a way that allows them to remain true to their vision of who they are and want to be as educators.
Requisites: Requires prerequisite course of EDUC 4330 or EDUC 4345 (all minimum grade C-). Restricted to English - Secondary Education (EDEN-LICU) and Social Studies - Secondary Education (EDSS-LICU) students only.
Grading Basis: Letter Grade

EDUC 4425 (3) Introduction to Bilingual/Multicultural Education
Provides an introduction for education minors and others with an interest in education policy and practice to bilingual and multicultural education programs for emergent bilinguals. Includes an overview of the history and legislation related to the education of emergent bilingual students, identification and placement, as well as the various models, theoretical and philosophical underpinnings, and pedagogical practices that constitute sound educational practices for emergent bilingual students.
Equivalent - Duplicate Degree Credit Not Granted: EDUC 5425
Additional Information: Departmental Category: General Education

EDUC 4435 (3) Culturally Sustaining Pedagogies for Bilingual Learners
Explores multicultural education, critical pedagogy, and culturally sustaining pedagogies, including their underlying theories, curriculum design, and curriculum examples. Students will analyze curriculum with a focus on its representation of different socio-cultural groups, identities, points of view, relationship to different communities, and ideology. Students will also begin planning, teaching, and evaluating instruction anchored in critical, culturally sustaining pedagogies.
Requisites: Requires prereq courses of EDUC 3320 and EDUC 3350 and EDUC 4535 and EDUC 4595 (all min B-). Requires coreq courses of EDUC 3321 and EDUC 4205 and EDUC 4455. Requires prereq or coreq courses of EDUC 2425 and EDUC 2615. RSTR to Elem Ed (ELED-BA) mjrs.

EDUC 4455 (3) Methods of Biliteracy Instruction
Critique and analyze the linguistic, social, political and cultural factors that influence the acquisition of literacy for emerging bilingual (EB) learners. We will examine and apply evidence-based practices that support the development of reading, writing, speaking and listening in all of the students¿ languages regardless of the program model schools enact to serve them.
Requisites: Requires prerequisite courses of EDUC 3320 and EDUC 3350 and EDUC 4535 and EDUC 4595 (all minimum grade B-). Requires corequisite courses of EDUC 3321 and EDUC 4205 and EDUC 4435. Restricted to Elementary Education (ELED-BA) majors only.

EDUC 4460 (3) Teaching and Learning Physics
Learn how people understand key concepts in physics. Through examination of physics content, pedagogy and problems, through teaching, and through research in physics education, students will explore the meaning and means of teaching physics. Students will gain a deeper understanding of how education research is done and how people learn. Useful for all students, especially for those interested in physics, teaching, and education research.
Equivalent - Duplicate Degree Credit Not Granted: EDUC 5460 and PHYS 4460 and PHYS 5460
Requisites: Requires prerequisite courses of PHYS 3210 and PHYS 3310 (all minimum grade C-).
Additional Information: Departmental Category: Graduate Education

EDUC 4490 (3) Blurring Disciplinary Lines in the Humanities
Explores theories, methods, and materials for building interdisciplinary connections within and across secondary English and Social Studies classrooms. Provides opportunities for collaborative work in building lessons and unit plans that challenge disciplinary boundaries and advocate for complex problem solving.
Equivalent - Duplicate Degree Credit Not Granted: EDUC 5490
Requisites: Requires prerequisite of EDUC 3001 or EDUC 4001 (minimum grade C-). Restricted to teacher licensure students in English (EDEN-LICU) or Social Studies (EDSS-LICU).
Grading Basis: Letter Grade

EDUC 4500 (3) Community-Based Research for Social Change
Complete a research project that draws on theories of social change and is developed in partnership with a community or civic agency. Become skilled at doing original research to address complex social problems.
Requisites: Requires prerequisite course of EDUC 2500 (minimum grade B-).
Grading Basis: Letter Grade
Additional Information: Departmental Category: General Education

EDUC 4513 (2) Education and Practice
Meets during student teaching assignment. Includes topics of concern to teachers, such as classroom organization and management, lesson planning, assessment, preparation of edTPA, etc.
Requisites: Requires corequisite course of EDUC 4691 or 4712 or 4722. Restricted to EDEL, EDEN, EDFR, EDGR, EDJP, EDLT, EDMA, EDRU, EDSC, EDSP or EDSS majors only.
Additional Information: Departmental Category: General Teacher Education

EDUC 4535 (3) Assessment for Bilingual Learners
Introduce students to the theory, methods, practice, and problems in the testing and assessment of bilingual students at the classroom and large-scale level. Topics include the specification of English Learners as a student population and the assessment of their language proficiency and academic achievement. The course additionally addresses reliability, validity, and fairness in the testing of linguistically diverse populations.
Requisites: Requires corequisite courses of EDUC 3320 and EDUC 3350 and EDUC 4595. Restricted to Elementary Education (ELED-BA) majors only.

EDUC 4595 (3) Practicum for Bilingual/Multicultural and ELD Education
University supervised, school based field experiences teaching culturally and linguistically diverse students. Accompanies university coursework required for the Colorado endorsement in Culturally and Linguistically Diverse Education.
Requisites: Requires corequisite courses of EDUC 3320 and EDUC 3350 and EDUC 4535. Restricted to Elementary Education (ELED-BA) majors only.

EDUC 4610 (2) Becoming a Learning Assistant
Introduces undergraduate Learning Assistants (LAs) to education research, active learning, and strategies that support: (1) eliciting student ideas and helping all group members become active and engaged in the class; (2) listening and questioning; (3) building relationships; and (4) integrating learning theories with effective practices. Also "LA Pedagogy Course." Department enforced prequisite: Learning Assistant Program admission. First-semester LAs requirement.
Grading Basis: Letter Grade
Additional Information: Departmental Category: General Education

EDUC 4611 (1) Advanced Topics in Learning Assistant Pedagogy
Builds on education research and inclusive pedagogical principles discussed in EDUC 4610, and introduces new topics for experienced Learning Assistants to learn and apply to their LA-student interactions. This course is also referred to as Returning LA Professional Development.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Requires prerequisite course of EDUC 4610 (minimum grade C-).

EDUC 4615 (3) Language Acquisition for Bilingual Learners
Provides an introduction for education minors and others with an interest in education and human development topics to the variables that interact in the process of bilingual development in emergent bilinguals, from birth to adolescence. These variables include the learner¿s background, motivation, linguistic, cognitive, emotional, social, cultural, and political factors. The course will examine these factors and generate understandings about how they work together to foster or inhibit successful development of bilingualism in community, home, and school contexts.

EDUC 4620 (2) LA Mentoring I: Becoming a Mentor
This field-based course is the second in a three-sequence course intended for Learning Assistants. This course provides opportunities for advanced Learning Assistants (LAs) to practice mentoring strategies as they mentor first-time LAs. LA mentors will observe and consult with their LA mentees each week and observe entire contexts in which LAs are used. In the seminar component of the course, LA mentors will discuss their readings about mentoring, skillful teaching, and group facilitation and they will reflect on their work with their LA mentees.
Requisites: Requires prerequisite course of EDUC 4610 (minimum grade C-).
Grading Basis: Letter Grade

EDUC 4621 (1) Learning Assistant Mentoring in Practice: Building Inclusive Learning Communities
Builds on education research and inclusive mentoring and pedagogical principles and practices discussed in EDUC 4610 and EDUC 4620, and creates opportunities for LA Mentors to plan for, receive feedback about, and reflect upon, their individual and group mentoring experiences.
Repeatable: Repeatable for up to 4.00 total credit hours.
Requisites: Requires prerequisite course of EDUC 4610 and prerequisite or corequisite course of EDUC 4620 (all minimum grade C-).

EDUC 4625 (3) Methods of Teaching English Language Development
Prepares students to teach English as a new language in K-6 U.S. public schools. Grounded in theoretical understandings of language acquisition and development, students develop resources and strategies to plan instruction for emergent bilingual children. Oral language development, literacy, and content-area language instruction are emphasized, with a focus on supporting children¿s linguistic, cognitive, academic and social development.
Grading Basis: Letter Grade

EDUC 4630 (2) LA Mentoring II: Improving the Program
This is a continuation of EDUC 4620. LA mentors will continue to mentor first-time LAs, but they will also design and test projects intended to address issues with the LA program that they have identified in the field. LA mentors will complete instructional innovation projects through cycles of design, testing, feedback, and revision. In this course, LA mentors enact projects leading to the improvement of the LA program through improved student and faculty experiences.
Requisites: Requires prerequisite course of EDUC 4620 (minimum grade D-).
Grading Basis: Letter Grade

EDUC 4691 (10) Student Teaching: Elementary School 1
Kindergarten through sixth grades. Department enforced prerequisite: completion of all education and content-specific arts and sciences requirements, and passing required licensure exam.
Requisites: Requires corequisite course of EDUC 4513. Restricted to Elementary Education (EDEL-LICU or LICG) majors only.
Additional Information: Departmental Category: General Teacher Education

EDUC 4706 (3) Assessment in Mathematics and Science Education
Examines purposes and practices of assessment in mathematics and science education. Particular attention is given to application of theoretical foundations and contemporary research in the design and use of assessment techniques and tools to support teaching for student understanding. Addresses the role of effective formative assessment in teaching and learning.
Equivalent - Duplicate Degree Credit Not Granted: EDUC 5706

EDUC 4710 (3) Elementary Student Teaching for Cultural and Linguistic Diversity 1
This course is the first semester of a year-long, elementary classroom-based internship. Building on prior and concurrent Education courses, candidates are expected to design and deliver culturally and linguistically responsive instruction in collaboration with an experienced elementary teacher, as well as independently. Assignments and the required student teaching seminar support candidates to reflect critically on their practice and learning. Recommendation for a Colorado initial teaching license requires excellent performance in both semesters of student teaching.
Requisites: Requires prerequisite courses of EDUC 3321 and EDUC 4205 and EDUC 4435 and EDUC 4455 (all minimum grade B-). Requires corequisite courses of EDUC 4035 and EDUC 4215 and EDUC 4331. Restricted to Elementary Education (ELED-BA) majors only.
Grading Basis: Letter Grade

EDUC 4712 (10) Student Teaching: Secondary School
Student teacher apprentices in a middle/junior or senior high school. Must be admitted to a secondary teacher education program in English, Japanese, Latin, math, Russian, science or social studies. Department enforced prerequisites: completed all education and content-specific artsand sciences courses and passed required licensure exam.
Requisites: Requires corequisite course of EDUC 4513. Restricted to EDEN, EDJP, EDLT, EDMA, EDRU, EDSC or EDSS (LICU or LICG) majors only.
Additional Information: Departmental Category: General Teacher Education

EDUC 4715 (3) Elementary Student Teaching Seminar Part 1
This seminar supports sense making during elementary student teaching through deliberative dialogues, culture circles, and teacher inquiry. During the final year of the Elementary Education program, teacher candidates complete advanced coursework and engage in extended student teaching field experiences in local schools. These activities raise important problems of practice that can fuel teacher learning. This seminar provides structure, support, and guidance from skillful facilitators and peers to support sensemaking during the elementary student teaching experience.
Requisites: Requires co-requisite course of EDUC 4710. Restricted to Elementary Education (ELED-BA) majors only.
Grading Basis: Letter Grade

EDUC 4716 (3) Basic Statistical Methods
Introduces descriptive statistics including graphic presentation of data, measures of central tendency and variability, correlation and prediction, and basic inferential statistics, including the t-test.
Additional Information: Departmental Category: General Education

EDUC 4720 (9) Elementary Student Teaching for Cultural and Linguistic Diversity 2
This course is the second semester of a year-long, elementary classroom-based internship. Building on prior and concurrent Education courses, candidates are expected to design and deliver culturally and linguistically responsive instruction in collaboration with an experienced elementary teacher, as well as independently. Assignments and the required student teaching seminar support candidates to reflect critically on their practice and learning. Recommendation for a Colorado initial teaching license requires excellent performance in both semesters of student teaching.
Requisites: Requires prerequisite courses of EDUC 4035 and EDUC 4215 and EDUC 4331 and EDUC 4710 (all minimum grade B-). Requires corequisite course of EDUC 4340. Restricted to Elementary Education (ELED-BA) majors only.
Grading Basis: Letter Grade

EDUC 4722 (5) Student Teaching: Secondary School 2
Student teacher apprentices in a middle/junior high or senior high school. Department enforced prerequisites: completed all education and content-specific arts and sciences courses and passed required licensure exam.
Requisites: Requires corequisite course of EDUC 4513. Restricted to EDFR, EDGR or EDSP (LICU or LICG) majors only.
Additional Information: Departmental Category: General Teacher Education

EDUC 4725 (3) Elementary Student Teaching Seminar Part 2
This seminar supports sense making during elementary student teaching through deliberative dialogues, culture circles, and teacher inquiry. During the final year of the Elementary Education program, teacher candidates complete advanced coursework and engage in extended student teaching field experiences in local schools. These activities raise important problems of practice that can fuel teacher learning. This seminar provides structure, support, and guidance from skillful facilitators and peers to support sensemaking during the elementary student teaching experience.
Requisites: Requires co-requisite course of EDUC 4720. Restricted to Elementary Education (ELED-BA) majors only.
Grading Basis: Letter Grade

EDUC 4732 (4-12) Student Teaching K-12
Required experience for music students seeking education at both elementary and secondary levels. Department enforced prerequisites: completed all education and content-specific music courses and passed required licensure exam.
Requisites: Requires corequisite course of MUSC 4193. Restricted to EDMU (LICU or LICG) majors only.
Additional Information: Departmental Category: General Teacher Education

EDUC 4742 (9) Student Teaching: Secondary for Engineers
Student teacher apprentices in a middle/junior or senior high school. Must be admitted to a secondary teacher education program in English, Japanese, Latin, math, Russian, science or social studies. Department enforced prerequisites: completed all education and content-specific arts and sciences courses and passed required licensure exam.
Requisites: Requires a prerequisite course of EDUC 4513 or EDUC 4050 (minimum grade C-). Restricted to EDMA or EDSC majors only.
Additional Information: Departmental Category: Secondary Education

EDUC 4800 (1-9) Special Topics
Designed to meet needs of students with topics of pertinent interest.
Repeatable: Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: General Education

EDUC 4801 (3) Race and its Implications for Science Education
Science and science-related professionals have played an important role in supporting and challenging conceptions of ¿race.¿ In this class, we explore historical constructions of race and their implications for teaching and learning in science education. Our goal is to develop a deep understanding of how ¿race¿ manifests in educational contexts. We conclude our class by constructing our own social dream about what science education ought to be. Formerly offered as a special topics course.

EDUC 4810 (1-9) Special Topics
Repeatable: Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: General Education

EDUC 4811 (3) Teaching and Learning Biology
Provides an introduction to recent research into student learning on the conceptual foundations of modern biology, together with pedagogical methods associated with effective instruction and its evaluation. Students will be involved in active research into conceptual and practical issues involved in biology education, methods to discover student preconceptions, and the design, testing and evaluation of various instructional interventions.
Equivalent - Duplicate Degree Credit Not Granted: EDUC 6811 and MCDB 4811 and MCDB 5811 and EBIO 4811
Recommended: Prerequisite At least two semesters of Biology.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

EDUC 4815 (3) Teaching K-12 Mathematics: Number Sense
Provides teachers opportunity to explore fundamental mathematical theories and pedagogical perspectives pertaining to the teaching and learning of number and operation. Engages students in explorations of mathematical content underlying number and operations, while highlighting relevant problem solving, reasoning and proof, and mathematical connections. Explores implications of teachers' mathematical learning on their classroom teaching. Develops practices supporting learner's number sense development.
Equivalent - Duplicate Degree Credit Not Granted: EDUC 5815

EDUC 4821 (3) Teaching K-12 Mathematics: Algebraic Thinking
Uses reform-based mathematics curricula to engage participants in algebraic thinking, to reflect on their own knowledge of algebraic concepts, and to examine pedagogical ideas that can foster K-12 students' algebraic thinking and learning. Algebraic topics include patterning, variable, functions, multiple representations, equality, and solving linear and systems of equations.
Equivalent - Duplicate Degree Credit Not Granted: EDUC 5821

EDUC 4822 (3) Teaching and Learning Chemistry
Explores issues related to how people learn and teach chemistry. Reviews high school and early college chemistry concepts both from the content and pedagogical perspectives. Delves into the chemistry education research, education, psychology, and cognitive science literature. Provides an opportunity to observe and/or teach K-12 or college chemistry classes.
Recommended: Prerequisite of one semester of college-level chemistry.
Additional Information: Departmental Category: General Education

EDUC 4831 (3) Advanced Peer Education
Second semester of an academic year's training for students interested in peer counseling. Expand upon what you learned in ARSC 2274. Focus on presentations, leadership, and group facilitation. Basic group leadership, facilitation theory, and technique taught. Co-create and co-lead your own small groups/presentations for other CU students. Offered only spring semesters.
Requisites: Requires prerequisite course of ARSC 2274 (minimum grade D-).
Additional Information: Departmental Category: General Education

EDUC 4833 (3) Teaching and Learning Earth Systems
Learn and develop pedagogically effective strategies for teaching and understanding Earth Science concepts. Particular emphasis is placed on understanding the importance of geoscience habits of mind (i.e. spatial/temporal reasoning, multiple working hypotheses, geographic context). Focuses upon inquiry and evaluation of evidence, the importance of background knowledge and misconceptions, and developing effective discourse within and outside the classroom.
Equivalent - Duplicate Degree Credit Not Granted: EDUC 5833 and GEOL 4833 and GEOL 5833
Requisites: Requires prerequisite course of ATOC 1060 or ENVS 1000 or GEOL 1010 or GEOL 1020 or GEOL 1060 (minimum grade C-).
Grading Basis: Letter Grade
Additional Information: Departmental Category: General Teacher Education

EDUC 4835 (3) Teaching K-12 Mathematics: Geometry & Measurement
Provides an opportunity to explore how to foster geometric thinking while examining fundamental mathematical theory underlying the content area of geometry and measurement. Emphasizes investigative approach involving problem solving, reasoning, connections, and communication as well as learning mathematics content in a flexible and conceptual way. Challenges participants to apply their understanding to teaching practices that foster geometric thinking in K-12 learners. Also see EDUC 5835.

EDUC 4840 (1-4) Independent Study
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: General Education

EDUC 4844 (3) Teaching and Learning Computational Thinking
This course is designed for current and future STEM educators interested in understanding Computational Thinking and how it can be enacted to support student learning. Computational Thinking is the process by which people make sense of problems where computation, or computational tools, could be leveraged to enact the solution. For example, when students are tasked with solving a word problem they engage in computational thinking by identifying important elements in the written problem and then leveraging mathematical or scientific methods that would lead to a solution. During this course, students will engage with research-based theories, conceptualizations, and practices for engaging with Computational Thinking in STEM learning environments and experiences. Following an introduction to Computational Thinking, students will be supported in making sense of the ideas and practices through published research, existing tools, classroom activities, and reflection on experiences of problem solving and overcoming

EDUC 4850 (3) Teaching K-12 Mathematics: Probability & Statistics
Focuses on teaching probability, data analysis, and statistics in K-12 classrooms. Explores curriculum and assessment strategies in the areas of probability and statistics. Examines research on students' thinking on stochastic tasks and how this research informs teaching practice. Emphasizes deepening of one's conceptual understanding of probability and statistics and their importance in the current information age.
Equivalent - Duplicate Degree Credit Not Granted: EDUC 5850

EDUC 4901 (3) Student Teaching
Provides opportunities for practice around classroom community building, instruction, assessment, etc. in partnership with a mentor teacher and public school students. Experiences will vary depending upon the context, grade level, and school/course placement.
Requisites: Requires prerequisite of EDUC 5001 (minimum grade C-). Requires corequisite of EDUC 5330 or EDUC 5345. Restricted to MA+ teacher licensure students in English (EDEN-LICG), Mathematics (EDMA-LICG), Science (EDSC-LICG), or Social Studies (EDSS-LICG).
Grading Basis: Letter Grade

EDUC 4902 (4) Student Teaching II
Provides opportunities for practice around classroom community building, instruction, assessment, etc. in partnership with a mentor teacher and public school students. Although experiences will vary depending upon the context, grade level, and school/course placement, in this practicum students will build upon their work in Student Teaching I and take greater responsibility for teaching.
Requisites: Requires prerequisite of EDUC 4901 (minimum grade C-) and corequisite of EDUC 5355 or 5365. Restricted to students with an English-Secondary Education Licensure pan (EDEN-LICU) or Social Studies-Secondary Education Licensure plan (EDSS-LICU).
Grading Basis: Letter Grade

EDUC 4910 (3) Peer Counseling Practicum
Controlled enrollment. Credit given for peer counseling activities. Students are selected to participate in this class and act as peer counselors or TAs for the peer counseling training. Repeatable up to 9 total credit hours.
Repeatable: Repeatable for up to 9.00 total credit hours.
Additional Information: Departmental Category: General Education

EDUC 4912 (1) Practicum in Teacher Education
Provides in-school practicum experience
Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: General Teacher Education

INVST Community Studies

INVS 1000 (4) Responding to Social and Environmental Problems Through Service Learning
By integrating theory with required community service, students explore how problems are shaped by cultural values and how alternative value paradigms affect the definition of problems in areas such as education and the environment. Students examine different approaches to solving problems and begin to envision new possibilities.
Additional Information: Arts Sci Core Curr: Ideals and Values
Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Invst Community Studies

INVS 1513 (3) Civic Engagement: Using the Electoral Process as a Tool for Social Change
Designed to educate and inspire civic engagement primarily in the area of electoral politics. Examines various explanations of why people participate in the electoral process and whom they choose to support. Develops the practical skills necessary to participate successfully in the electoral arena. Through a service component, the course provides experience working on a campaign and mobilizing others to participate in the electoral process.
Additional Information: Departmental Category: Invst Community Studies

INVS 2005 (2) Puksta Scholars Practicum
Integrates critical reflection and community-based experiences for undergraduates in the Puksta Scholars Program. This two-semester course will focus on the development of knowledge, attitudes and skills to productively engage the public realm. Examines topics includes ethical leadership, frameworks for social action, project design and participatory action research.
Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.
Grading Basis: Letter Grade

INVS 2919 (3) Renewing Democracy in Communities and Schools
Examines concepts of activism, citizenship, democracy, power, and diversity through classroom discussions and participation in a local K-12 school's Public Achievement project. Through community-based partnerships, students will develop leadership skills; dialogue with diverse groups of people; identify multiple perspectives around controversial issues; and learn to use research and writing to articulate public problems and advocate for their solutions.
Equivalent - Duplicate Degree Credit Not Granted: EDUC 2919
Repeatable: Repeatable for up to 6.00 total credit hours.
Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Distribution-Social Sciences
Arts Sci Gen Ed: Diversity-U.S. Perspective
Departmental Category: Invst Community Studies

INVS 2989 (3) Dialogue Across Difference
Provides practical facilitation training that equips students to be change makers in any setting. Students examine models of dialogic communication and theories of intergroup relations to understand how dialogue can build deeper understanding of self/others, reinvigorate democratic values and foster a more just society. Through hands-on experience participating in, observing, and leading dialogue, students learn to facilitate dialogue among their peers.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Diversity-U.S. Perspective

INVS 3000 (3-4) Innovative Approaches to Contemporary Issues through Service Learning
Explores creative approaches for solving complex social and environmental issues, with a focus on peace and population. Students analyze the root causes of issues in theoretical and historical contexts, and develop their understanding of effective and innovative approaches to change. This course has a requirement of community service.
Recommended: Requisite upper-division status.
Additional Information: Arts Sci Core Curr: Contemporary Societies
Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Invst Community Studies

INVS 3041 (3) Self and Consciousness
Explores human development from a psychosocial perspective, focusing on the interplay between psychological patterns and social forms. Issues such as self-image and social consciousness are studied within the larger context of individual and collective forces leading to transformation.
Equivalent - Duplicate Degree Credit Not Granted: SOCY 3041
Requisites: Requires prerequisite courses of SOCY 1001 and SOCY 3001 or SOCY 3011 (all minimum grade D-).
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Invst Community Studies

INVS 3100 (3) Social Justice, Leadership and Community Engagement Internships
Focuses on leadership theories and skills necessary for effectiveness in social justice settings. Students gain understanding of traditional and culturally diverse approaches to leadership and change. Community service required.
Equivalent - Duplicate Degree Credit Not Granted: ETHN 3201
Recommended: Prerequisite ETHN 2001.
Grading Basis: Letter Grade
Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: Invst Community Studies

INVS 3301 (3) Climate Justice Summer
The Climate Justice Summer for 1st-year students in The INVST Program focuses on community organizing, antiracism, climate change, environmental sustainability, activism, energy, power, equity & social justice.

INVS 3302 (3) Facilitating Peaceful Community Change
Students gain knowledge and skills that enable them to become effective agents of community change. Focuses on understanding the processes of community building with a multicultural emphasis. Students are encouraged to apply their own life experiences and to examine themselves as potential change agents.
Equivalent - Duplicate Degree Credit Not Granted: WGST 3302
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Invst Community Studies

INVS 3402 (3) Implementing Social and Environmental Change
Examines grassroots innovation as a means for creating comprehensive, solution-based strategies to address social and environmental problems. Students develop an understanding of the root causes of problems, identify how changes are initiated at the grassroots level, and learn the theory and practice of effective and responsible change efforts.
Additional Information: Departmental Category: Invst Community Studies

INVS 3671 (3) People of Color and Social Movements
People of color the world over are struggling for sovereignty, independence, civil and human rights, food security, decent wages and working conditions, healthy housing, and freedom from environmental racism and other forms of imperialism. Course analyzes and brings alive these struggles.
Equivalent - Duplicate Degree Credit Not Granted: ETHN 3671

INVS 3931 (3) The Community Leadership Internship, Part 1
Develops students' competencies as community leaders working for a just and sustainable world. Under the supervision of an instructor and a community supervisor, students learn organizational leadership skills by serving as volunteer staff members at community-based organizations. Required requisite, admission into INVST CLP.
Repeatable: Repeatable for up to 6.00 total credit hours.
Additional Information: Departmental Category: Invst Community Studies

INVS 3932 (3) Community Leadership Internship, Part 2
Develops students' competencies as community leaders working for a just and sustainable world. Under the supervision of an instructor and a community supervisor, students learn organizational leadership skills by serving as volunteer staff members at community-based organizations. Required requisite, membership in INVST CLP.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Requires prerequisite course of INVS 3931 (minimum grade D-).
Additional Information: Departmental Category: Invst Community Studies

INVS 4302 (3) Critical Thinking in Development
Exposes students to current issues in the political economy of development. Subjects range from globalization, democratization and economic development. Specifically explores the international and domestic determinants of economic development with special reference to currency markets, foreign direct investment, trade, and democratization.
Equivalent - Duplicate Degree Credit Not Granted: PSCI 4732
Requisites: Requires prerequisite courses of PSCI 2012 or IAFS 1000 and ECON 2010 and 2020 (all minimum grade D-).
Recommended: Prerequisite one upper-division PSCI course.
Additional Information: Arts Sci Core Curr: Contemporary Societies
Departmental Category: Invst Community Studies

INVS 4402 (3) Nonviolent Social Movements
Explores theories of democracy and development in relation to movements for nonviolent social change. Focuses on means and ends, spirituality, leadership, decision-making, civil society, cooperative economics, ecology and decentralized powers.
Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Sociology (SOCY) or Political Science (PSCI) majors only.
Additional Information: Departmental Category: Invst Community Studies

INVS 4919 (1-2) Teaching Social Justice for Public Achievement
Participate as teaching assistants for the practicum course INVS 2919. Focusing on the issues of democratic education, diversity, social justice and social change, students learn how to foster undergraduates' skills as experiential educators.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Requires a prerequisite course of INVS 2919 (minimum grade B).

INVS 4931 (1-6) Community Leadership in Action, Part 1
Develops students' expertise as community leaders. Under the supervision of an instructor and a community advisor, students design a community-based project.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Requires prerequisite courses of INVS 3931 and INVS 3932 (all minimum grade D-).
Recommended: Prerequisite admission to INVST CLP.
Additional Information: Departmental Category: Invst Community Studies

INVS 4932 (1-6) Community Leadership in Action, Part 2
Develops students' expertise as community leaders working for a just and sustainable world. Under the supervision of an instructor and a community advisor, students learn organizational and leadership skills by designing, implementing and evaluating a community-based project. First-hand experience provides students with a deepened understanding of the complex issues facing humanity, and competence with solution-based strategies.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Requires prerequisite course of INVS 4931 (minimum grade D-).
Additional Information: Departmental Category: Invst Community Studies

INVS 4999 (1-4) Teaching Social Justice
Students participate in a service-learning practicum under the supervision of a Community Studies instructor. They explore teaching strategies for implementing concrete educational goals. Focusing on the issues of social justice and social change, they learn how to encourage higher levels of creativity and analysis among students.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Invst Community Studies

LEAD

LEAD 1000 (3) Becoming a Leader
The foundation course will prepare students to exercise leadership in business, government and community organizations. Introduces leadership skills useful in a variety of settings including community and civic activities. Helps students to improve self awareness, understand multiple theories, recognize moral courage, build analytic and critical thinking skills and adapt leadership practices to different people and contexts.
Additional Information: Departmental Category: CU Engage

LEAD 1001 (3) Becoming a Leader: Multicultural Leadership Scholars
Introduces students to the theories and practices of historical and contemporary leadership studies. Students will also examine both the moral and ethical dimensions of leadership and how cultural diversity, inclusivity and social justice apply to culturally competent leadership in the 21st century.
Equivalent - Duplicate Degree Credit Not Granted: LEAD 1000
Requisites: Requires corequisite course of EDUC 2910.
Recommended: restricted to students admitted into the Multicultural Leadership Scholars Program.

LEAD 1002 (3) Becoming a Leader: Leadership & Community Engagement
Introduces students to the theories and practices of historical and contemporary leadership studies. Serves as the foundation course for the Leadership and Community Engagement Major. Students examine the relationships between leadership and social identities, ethics, democratic engagement, diversity and inclusion, and social practices.
Equivalent - Duplicate Degree Credit Not Granted: LEAD 1000
Requisites: Restricted to Leadership/CommunityEngagement (LDCE) majors only.

LEAD 1571 (2) Topics in Leadership: Introduction to Research Methods
Participants will establish their understanding of research through critical exploration of research language, ethics, and approaches. The course introduces the language of research, ethical principles and challenges, and the elements of the research process within quantitative, qualitative, and mixed methods approaches. Participants will use these theoretical underpinnings to begin to critically review literature relevant to their field or interests and determine how research findings are useful in forming their understanding of their work, social, local and global environment. Their work will culminate in a research project proposal submitted to CU's Undergraduate Research Opportunity Program.
Requisites: Requires prerequisite courses of LEAD 1001, LEAD 2410 and INVS 3100 (all minimum grade C-).
Recommended: Students in the Multicultural Leadership Scholars program.
Grading Basis: Letter Grade

LEAD 2410 (3) Dynamics of Power, Privilege, Oppression and Empowerment in Leadership
Examines the theoretical frameworks of social identity and power dynamic development (individual, group, institutional, cultural) and the resulting inequalities formed by systems of privilege and oppression - and their intersections - are manifested in society and how leadership is used to continue these systems or lead to empowerment and liberation.
Requisites: Requires prerequisite course of LEAD 1000 (minimum grade C).
Additional Information: Departmental Category: CU Engage

LEAD 4000 (4) Leadership in Context and Emerging Challenges: A Capstone
Integrates leadership topics and experiences students pursued through the Leadership Studies Minor. Using advanced critical thinking skills, the seminar requires students to evidence their knowledge, competencies and skills related to leadership theory and practice through examining contemporary leadership challenges. Further, the seminar directs students to justify decision-making processes, demonstrating their ability to synthesize prior knowledge to effect desirable, ethical outcomes.
Requisites: Requires a prerequisite course of LEAD 1000 or LDSP 1000 (minimum grade C-). Restricted to students with 57-180 credits (Juniors or Seniors).
Grading Basis: Letter Grade
Additional Information: Departmental Category: CU Engage

LEAD 4501 (3) Leadership Capstone 1
Apply skills and knowledge developed throughout the Leadership and Community Engagement Major to design and implement public action project. Critically examine local context, including organizations, agencies, firms, and movements. Identify partners and develop relationships based on reciprocity and mutually. Develop theory of change for project and design evaluation tools to measure impact.
Requisites: Requires corerequisite course of EDUC 4500. Restricted to Leadership and Community Engagement (LDCE) majors only.
Recommended: Prerequisite EDUC 4150.
Grading Basis: Letter Grade

LEAD 4502 (3) Leadership Capstone 2
Apply skills and knowledge developed throughout the Leadership and Community Engagement Major to design and implement public action project. Manage complex project with team of students and multiple community partners. Evaluate public impact of project with partners.
Requisites: Requires prerequisite courses of LEAD 4501 and EDUC 4500 (all minimum grade C-). Restricted to Leadership and Community Engagement (LDCE-BA) majors only.

Education Studies - Bachelor of Arts (BA)

Education studies majors engage in a deep study of how political, cultural, social and historical dynamics shape both policy and practice in education. In addition to three core courses, students complete an additional ten courses chosen from four areas of emphasis:

- Curriculum and Instruction
- Educational Foundations, Policy and Practice
- Equity, Bilingualism and Biliteracy
- Learning Sciences and Human Development

Students work with an education advisor to select coursework that best supports their career trajectory. Education studies graduates are engaged

and informed educators, researchers, policymakers and community leaders.

Requirements

Students complete a minimum of 39 credit hours in the major. Of those 39 credit hours, 24 must be at the upper-division level. All major requirements must be completed with a grade of C- or better.

The Education Studies major consists of nine credit hours of core coursework and 30 credit hours chosen from a list of approved courses, of which at least three credit hours must include a field-based or community-engagement component.

In addition to the education studies core requirements, the major's curriculum is divided into four main areas:

- Curriculum and Instruction
- Educational foundations, Policy and Practice
- Equity, Bilingualism and Biliteracy
- Learning Sciences and Human Development

Students must complete at least one course from each of the four areas above. For the remaining credits required for the major, students work in consultation with an academic advisor to pursue a combination of coursework that will support their career trajectory.

Code	Title	Credit Hours
Education Studies Core		
EDUC 3013	School and Society	3
EDUC 4150	Introduction to Qualitative Research Methods	3
EDUC 4716	Basic Statistical Methods	3
Curriculum and Instruction Requirements		
Curriculum and Instruction undergraduate courses focus on teaching and learning in the following curricular areas: Literacy Studies and Humanities, and STEM Education. Coursework focuses on foundations of learning, foundations of education and subject matter knowledge and pedagogy. Choose at least one course from the following:		
Literacy Studies and Humanities		
EDUC 2150	Education in Film	
EDUC 2311	Children's Literature and Literacy Engagement in Elementary Schools	
EDUC 3030	Race, Class, and Gender in Young Adult Literature	
EDUC 4135	Story and Memoir	
EDUC 4222	Language Study for Educators	
EDUC 4310	Social and Emotional Learning in Schools	
EDUC 4316	Nature of Social Studies and Social Studies Education	
STEM Education		
EDUC 2130	Teaching and Learning Math: Calculus, Trig and Adv Functions	
EDUC 4050	Knowing and Learning in Mathematics and Science	
EDUC 4315	Perspectives on Science	
EDUC 4317	Perspectives on Mathematics	
EDUC 4815	Teaching K-12 Mathematics: Number Sense	
EDUC 4821	Teaching K-12 Mathematics: Algebraic Thinking	
EDUC 4835	Teaching K-12 Mathematics: Geometry & Measurement	
EDUC 4844	Teaching and Learning Computational Thinking	
EDUC 4850	Teaching K-12 Mathematics: Probability & Statistics	
Educational Foundations, Policy and Practice		
Choose at least one course from the following:		
EDUC 2125	History of American Public Education	
EDUC 4015	International / Comparative Education	
EDUC 4220	Gender Issues in Education	
EDUC 4240	African American Education in the United States	
EDUC 4301	Queer(ing) Topics in Education	
Equity, Bilingualism and Biliteracy		
Choose at least one course from the following:		
EDUC 2625	Teaching English Language Development	
EDUC 4425	Introduction to Bilingual/Multicultural Education	
EDUC 4435	Culturally Sustaining Pedagogies for Bilingual Learners	
EDUC 4615	Language Acquisition for Bilingual Learners	
Learning Sciences and Human Development		
Choose at least one course from the following:		
EDUC 2411	Educational Psychology for Elementary Schools	
EDUC 3570	Learning With Technology In and Out of School	
EDUC 4112	Adolescent Development and Learning for Teachers

Learning Outcomes

By the completion of the program, students will be able to:

- Examine the historical, cultural and ideological contexts of public schooling.
- Explore theories of learning and teaching across families, schools, peer groups, communities and cultures.
- Develop and apply strong critical thinking, analysis, communication, interpersonal/team-building and problem-solving skills based on skills, knowledge and dispositions in the discipline of education.
- Recognize and develop a skill set to support and create supportive learning experiences that are culturally responsive and build on the strengths and knowledge of all participants.
- Gain expertise in important topics in contemporary educational topics, such as: roles and meanings of education in a democratic society; justice and equity in education; creativity and agency of youth from nondominant backgrounds; explorations of popular representations or conventional narratives of students, teachers, and schooling; perspectives on multicultural and bilingual education; perspective on learning mathematics; teaching and reading children's literature.

Elementary Education - Bachelor of Arts (BA)

Responding to increasing diversity and inequality in public schools, the BA in Elementary Education, with the endorsement in Culturally and Linguistically Diverse Education, is designed to dramatically change schooling for the underserved students of Colorado and the nation. The program aims to prepare reflective, ethical, anti-racist and inclusive elementary (K-6) teachers who are committed to making the world more equitable and just, through their work in public schools.

The program requires that students take a range of education courses, including those focused on the roles of schooling in the broader society and on theories of learning as they relate to historically underserved students and communities. The program also requires numerous "methods" courses, which engage students in the practices and skills needed for teaching all subject areas in self-contained classrooms, and for teaching students with a range of identities and abilities, who represent diverse cultural, linguistic, ethnic, racial, economic and religious communities. In order to be recommended for teacher licensure, students must additionally complete extensive fieldwork in public elementary classrooms serving diverse learners.

The BA in Elementary Education's guiding principles that students will work on across their courses and field experience include learning how to engage in humanizing pedagogies; becoming critically conscious educators; developing a holistic understanding of bilingualism and a dynamic understanding of culture; designing curriculum and instruction, and enacting teaching practices, grounded in research centered on learning and learners; and viewing themselves as agents of change, who advocate on behalf of minoritized students, including bilingual learners.

To learn more, contact the Education advisors at 303-492-6555 or edadvise@colorado.edu. To apply, visit the CU Boulder Admissions (http://www.colorado.edu/admissions/) website.

Requirements

A total of 120 credit hours is required to earn a BA, including content requirements, licensure and major requirements, and electives. Students must complete all EDUC coursework in the final two years with a grade of B- or better. All other requirements must be completed with a grade of C- or better.

[1] Must be completed with a grade of B- or better.

Content Requirements/General Education Requirements

Content requirements include coursework designed to expose elementary education majors to the array of subject matter that K-6 educators are responsible for introducing to their students. Because the expectations of the final two years of the elementary education program, known as the "professional sequence," are inflexible and not compatible with much additional coursework, students are expected to complete all of their content requirements (except upper-division writing), as well as their lower-division licensure requirements and EDUC 3013, before they will be allowed to begin the professional sequence.

The content areas and some licensure requirements overlap with the School of Education general education requirements. General Education requirements are fulfilled by elementary education majors as follows:

Skills Requirement

- Written Communication: 6 credit hours (Including one upper-division course.)
- Quantitative Reasoning and Mathematical Skills: 4-6 credits (One 4-5 credit calculus course OR two 3-credit math courses. Many elementary education majors choose MATH 1110 & 1120, Math for Elementary Educators 1 and 2, to complete this requirement.)
- World Language: Third-level proficiency in a single modern or classical language (other than English).

Distribution Requirement

- Arts and Humanities (12 credit hours)
  - United States History (content requirement; 3 credit hours)
  - World History (content requirement; 3 credit hours)
  - Literature and the Arts (content requirement; 3 credit hours)
  - EDUC 2311 Children's Literature (licensure requirement; 3 credit hours)
- Social Science (12 credit hours)
  - United States Government (content requirement; 3 credit hours)
  - Cultural Geography (content requirement; 3 credit hours)
  - EDUC 3013 School & Society (licensure requirement; 3 credit hours)
  - EDUC 2411 Educational Psychology for Elementary Schools (licensure requirement; 3 credit hours)
- Natural Science (7 credit hours)
  - Biological Science (content requirement; 3 credit hours)
  - Physical Science (content requirement; 3 credit hours)
  - Science lab (content requirement; 1 credit hour)

Diversity Requirement

- U.S. Perspective: 3 credit hours (Fulfilled by EDUC 3013.)
- Global Perspective: 3 credit hours (May be fulfilled by a course that also fulfills a distribution requirement, e.g., world history, literature and the arts, or cultural geography.

The courses listed below are representative of the types of courses that students commonly take to fulfill the content/general education requirements for which they can choose from multiple options. The lists below are not exhaustive. The full range of options available to a student to complete content requirements can be found in their degree audits or by consulting with a School of Education academic advisor

Total Credit Hours	**22**

1 Indicates that a course also fulfills Global Perspective Diversity

2 Some science labs are built into 4-credit courses, some must be taken either concurrently with or after taking an associated lecture, and some can be taken as a standalone course. Consult a School of Education academic advisor for more information.

Required Tests and Assessments

Recommendation for licensure requires passing scores on each subtest of the Praxis Elementary Education Three-Subject Bundle exam (code 5901), as well as the Praxis Teaching Reading: Elementary exam (code 5205). All exams must be attempted at least once before students before students begin student teaching. Students who have not attempted all exams before they are scheduled to begin student teaching may either delay student teaching by a year and take their exams in the interim, or switch to a non-licensure degree. Students who have not passed all their Praxis exams by the degree conferral date for the semester in which they complete student teaching may complete their exams at a later date, but their recommendation for licensure will be delayed and they may not be able to timely accept employment.

[1] Due to the intensive nature of student teaching, students may not take other coursework during this semester.

Learning Outcomes

By the completion of the program, students will be able to:

- Demonstrate content knowledge in subject areas they are becoming licensed to teach.
- Develop pedagogical expertise in planning for instruction for students in K-6 settings, including bi/multilingual students and students with disabilities.
- Develop pedagogical expertise in teaching students in K-6 settings, including bi/multilingual students and students with disabilities.
- Develop the knowledge and skills required to work with, and advocate for, culturally and linguistically diverse students and families in schools.

Leadership and Community Engagement - Bachelor of Arts (BA)

The Bachelor of Arts in Leadership and Community Engagement (LDCE) prepares ethical, skilled leaders committed to addressing complex public challenges. The major integrates theory and practice. Students will learn about theories of leadership, applied research and learning in community settings. This knowledge is put into practice through structured experiences working with communities to diagnose social problems and design innovative solutions.

This major prepares students for careers in community or nonprofit organizations, higher education, international development, urban planning, social work and government, as well as for graduate study.

The coursework builds on the work of CU Engage: Center for Community-Based Learning and Research (http://www.colorado.edu/cuengage/).

Requirements

Secondary Area of Study

The Leadership and Community Engagement major requires students to complete a secondary area of study outside of the major. The secondary area of study can be fulfilled by completing a second degree, a minor or a certificate. Leadership and Community Engagement majors may not complete a minor in leadership studies.

Pathways

There are three pathways in the Leadership and Community Engagement major. The first is the general pathway. There are additional pathways for students in the Multicultural Leadership Scholars (https://www.colorado.edu/lsm/coursework/minor-pathways/multicultural-leadership-scholars-pathway/) program or the INVST Community Studies (https://www.colorado.edu/invst/) program. These programs are selective cohort-based programs. MLS applications are restricted to incoming first year students. INVST Community Studies Program applications are open to incoming first-year students, first-year students and second-year students.

Elective		3
	Credit Hours	**14**
	Total Credit Hours	**123-124**

Learning Outcomes

Learning goals can be understood in terms of five strands of expertise. By the completion of the program, students will be able to:

- Understand the theoretical foundations of leadership and community engagement.
- Develop expertise in applied research and evaluation.
- Develop understanding of learning and identity formation in community settings
- Develop their identity as a community leader through academic study, action and reflection.
- Develop disciplinary expertise through a secondary area of study.

Middle and High School Teaching - Bachelor of Arts (BA)

Our Bachelor of Arts in Middle and High School Teaching (MHST) prepares classroom teachers in grades 7–12 in English, math, science, social studies or Spanish. Our program is designed to support the preparation of reflective, ethical and responsive teachers committed to making the world more equitable and just through their work in public schools and with the communities they serve.

Program graduates earn a Bachelor of Arts in Middle and High School Teaching and a Colorado provisional teacher license in Secondary (7–12) English, math, science, social studies or Spanish. Given the dual-degree nature of the program, they simultaneously pursue and earn a BA/BS in their content area major. Completion of the bachelor's degree requires candidates satisfy the general education requirements for the School of Education as well as the coursework and fieldwork required to be recommended for licensure. For candidates with content area majors in the College of Arts and Sciences, this requires no additional coursework. For candidates with content majors in other colleges or schools, additional coursework to complete School of Education general education requirements may be required.

Over the course of the program, candidates engage with teachers and students in public secondary school classrooms through a series of supported practicum placements that result in over 800 hours of school-based experience.

Requirements

Grade Requirements

Middle and High School Teaching students must maintain a 2.00 GPA in cumulative, content and education coursework. All grades in Education courses must be a B- or better to maintain good standing in the program. All grades must be a C- or better to satisfy a content coursework requirement.

Content Major Requirement

Middle and High School Teaching students must pursue a degree in another college on campus with a major in a content area aligning with their chosen Middle and High School Teaching content area

track. To learn more, contact the Education advisors at 303-492-6555 or edadvise@colorado.edu.

Content Exam Requirement

Middle and High School Teaching students must pass the state-approved licensure exam aligning with their chosen Middle and High School Teaching content area track. To learn more, contact the Education advisors at 303-492-6555 or edadvise@colorado.edu.

Student Teaching Requirement

Middle and High School Teaching students will complete an intensive final year of field experiences while taking courses. Students will generally not be able to take other coursework in the final, student teaching semester of the program. To learn more, contact the Education advisors at 303-492-6555 or edadvise@colorado.edu.

Content Area Track Course Requirements

English Language Arts Track

Content Coursework Requirements

Code	Title	Credit Hours
Courses and Minimum Required Credit Hours		
Advanced Writing: Critical or creative writing beyond the lower-division/introductory composition level.		3
Visual or Digital Communication: Includes theatre, film, or digital media courses.		3
Literature: Must include a component of American literature, British literature, World literature (non-American/non-British literature), and Multicultural literature.		12
English and English Language Arts related courses.		30
Acceptable coursework may be in communication/speech, composition, drama/ theatre, humanities, journalism and/or literature. (May include courses from the content requirements above.)		

Education Coursework Requirements

Code	Title	Credit Hours
Take Any Time Prior to Final Year in the Program		
EDUC 1001	Humanities Teaching for Equity: Naming	1
EDUC 2001	Humanities Teaching for Equity: Noticing	2
EDUC 3001	Humanities Teaching for Equity: Negotiating	2
EDUC 3013	School and Society	3
EDUC 4023	Differentiating Instruction in Diverse Secondary Classrooms	3
EDUC 4112	Adolescent Development and Learning for Teachers	3
EDUC 4295	Narrative and Story in the Humanities	3
EDUC 4490	Blurring Disciplinary Lines in the Humanities	3

Courses and Minimum Required Credits		
Mathematics		
MATH 1300	Calculus 1	5
or MATH 1310	Calculus for Life Sciences	
or APPM 1350	Calculus 1 for Engineers	
Science		
Choose one biology course.		3
Choose one chemistry course.		3
Choose one earth/space science course.		3
Choose one physics course.		3
Complete three out of four of the following content area lab courses separately or as part of a course:		1
Biology lab		
Chemistry lab		
Earth/space science lab		
Physics lab		
Science coursework. Students must complete 24 credit hours from one of the content areas below:		24
Biology: Complete a major in Ecology & Evolutionary Biology, Integrative Physiology, Neuroscience, or Molecular, Cellular & Developmental Biology (may include courses from the content requirements above).		
Chemistry: Complete a major in Chemistry or Biochemistry (may include courses from the content requirements above).		
Earth/Space Science: Complete a major in Astronomy, Atmospheric & Oceanic Sciences or Geology (may include courses from the content requirements above). Please contact an education advisor for more information (edadvise@colorado.edu).		
Environmental Science: Complete a major in environmental studies with coursework in astronomy, ecology, and 17 credit hours of biology (may include courses from the content requirements above). Please contact an education advisor for more information (edadvise@colorado.edu).		
Complete a major in Physics with Plan 3 (may include courses from the content requirements above). Students pursuing Plan 1 or Plan 2 in the Physics major, or a major in Engineering Physics, should contact an education advisor (edadvise@colorado.edu).		

Education Coursework Requirements

Code	Title	Credit Hours
Take Any Time Prior to the Final Semester in the Program		
EDUC 2035	Designing STEM Learning Environments and Experiences	3
EDUC 3013	School and Society	3
EDUC 4023	Differentiating Instruction in Diverse Secondary Classrooms (Includes up to four (4) hours per week of school-based practicum. Should be taken concurrently with EDUC 4385. EDUC 4060 is a prerequisite.)	3
EDUC 4050	Knowing and Learning in Mathematics and Science	3
EDUC 4060	Classroom Interactions (Includes up to five (5) hours per week of school-based practicum. This course is a prerequisite for EDUC 4023 and EDUC 4385. Fall only.)	3
EDUC 4232	Language and Literacy across the Curriculum (Spring Only)	3
EDUC 4385	Problem-Based Science Instruction (Includes up to six (6) hours per week of school-based practicum. Should be taken concurrently with EDUC 4023. EDUC 4060 is a prerequisite. Spring only.)	3
Choose two courses from the following:		6
EDUC/PHYS 1580	Energy and Interactions	
EDUC 4460/ PHYS 1580	Teaching and Learning Physics	
EDUC/EBIO/MCDB 4811	Teaching and Learning Biology	
EDUC 4822	Teaching and Learning Chemistry	
EDUC 4833	Teaching and Learning Earth Systems	
GEEN 4400	Teaching Design	
Take in the Final Semester of the Program		
EDUC 4513	Education and Practice	2
EDUC 4712	Student Teaching: Secondary School	10
Total Credit Hours		**39**

Social Studies Track

Content Coursework Requirements

Code	Title	Credit Hours
Courses and Minimum Required Credit Hours		
U.S. History		6
World History		6
Economics: Must be completed in an economics department.		3
Political Science: Must be completed in a political science department.		3
Cultural/Human Geography: Must be completed in a geography department. Physical geography does NOT qualify.		3
Sociology or Social/Cultural Anthropology: Must be completed in a sociology or anthropology department. Physical anthropology does NOT qualify.		3
Thirty credit hours or coursework in one of the following disciplines: Anthropology, Economics, Ethnic Studies, Geography, History, International Affairs or Political Science (may include courses from the content requirements above). A minimum of 12 credits must be upper division.		30

Plans of Study

English Language Arts Track

Sample four-year plan of study (with BA in English – Literature and Cultural Studies Track).

Year One

Fall Semester		Credit Hours
EDUC 1001	Humanities Teaching for Equity: Naming	1
ENGL 2102	Literary Analysis	3
ENGL Required Elective [1]		3
Gen. Ed. Distribution/Diversity course (example: Social Sciences/Global Perspective)		3
Gen. Ed. Skills course (example: Lower-division Written Communication)		3
	Credit Hours	**13**
Spring Semester		
ENGL 2017	World Literature [2]	3
Gen. Ed. Skills course (example: QRMS)		3

Gen. Ed. Distribution course (example: Social Sciences)		3
Elective		3
Elective		3
	Credit Hours	**15**
Year Two		
Fall Semester		
EDUC 2001	Humanities Teaching for Equity: Noticing	2
EDUC 3013	School and Society [3]	3
ENGL 2112	Introduction to Literary Theory	3
ENGL Requirement (example: Medieval and Early Modern Period)		3
Gen. Ed. Distribution course (example: Natural Sciences)		3
Elective		3
	Credit Hours	**17**
Spring Semester		
EDUC 4112	Adolescent Development and Learning for Teachers	3
ENGL Requirement (example: 18th- or 19th-Century Literature)		3
ENGL Requirement (example: Studies in Ethnicity, Race, Disability, Gender, and Sexuality)		3
Gen. Ed. Distribution course (example: Natural Sciences)		3
Gen. Ed. Distribution course (example: Social Sciences)		3
	Credit Hours	**15**
Year Three		
Fall Semester		
EDUC 3001	Humanities Teaching for Equity: Negotiating	2
EDUC 4295	Narrative and Story in the Humanities	3
ENGL Requirement (example: Form, Genre, or Poetics)		3
Gen. Ed. Distribution/Diversity course (example: Natural Sciences with Lab)		4
Gen. Ed. Skills course (example: Upper-Division Written Communication)		3
	Credit Hours	**15**
Spring Semester		
EDUC 4023	Differentiating Instruction in Diverse Secondary Classrooms	3
EDUC 4490	Blurring Disciplinary Lines in the Humanities	3
ENGL Required Elective		3
ENGL Required Elective		3
Gen. Ed. Distribution course (example: Natural Sciences)		3
	Credit Hours	**15**
Year Four		
Fall Semester		
EDUC 4325	Queering Literacy in Secondary Classrooms	3
EDUC 4345	Secondary English Methods I	3
ENGL 4039	Capstone in Literary Studies	3
ENGL Required Elective		3
Elective		3
	Credit Hours	**15**
Spring Semester		
EDUC 4365	Secondary English Methods II	3
EDUC 4390	Teaching for Equity and Justice	3
EDUC 4712	Student Teaching: Secondary School	10
	Credit Hours	**16**
	Total Credit Hours	**121**

1 The ENGL Requirements (Medieval and Early Modern Period; 18th- or 19th- Century Literature; Studies in Ethnicity, Race, Disability, Gender, and Sexuality; and Form, Genre, and Poetics) and/or ENGL Electives may also count towards the Secondary English Language Arts track's American Literature, British Literature, Multicultural Literature and Visual/Digital Communication requirements.

2 ENGL 2017 fulfils the Secondary English Language Arts track's World Literature requirement.

3 EDUC 3013 satisfies a Social Sciences Distribution requirement and the US Perspective Diversity requirement for both the College of Arts & Sciences and the School of Education.

Mathematics Track

Sample four-year plan of study (with BA in Mathematics – Secondary Education Track).

Year One		
Fall Semester		**Credit Hours**
EDUC 2035	Designing STEM Learning Environments and Experiences	3
MATH 1300	Calculus 1	5
Gen. Ed. Distribution/Diversity course (example: Social Sciences/Global Perspective		3
Gen. Ed. Distribution course (example: Natural Sciences with Lab)		4
	Credit Hours	**15**
Spring Semester		
MATH 2300	Calculus 2	5
Gen. Ed. Skills course (example: Lower-division Written Communication)		3
Gen. Ed. Distribution/Diversity course (example: Arts & Humanities)		3
Gen. Ed. Distribution course (example: Natural Sciences)		3
	Credit Hours	**14**
Year Two		
Fall Semester

Gen. Ed. Skills course (example: Lower-division Written Communication)		3
	Credit Hours	**16**
Year Two		
Fall Semester		
EDUC 3013	School and Society [2]	3
EBIO 2040	Principles of Ecology	4
CHEM 1113	General Chemistry 1 [3]	4
CHEM 1114	Laboratory in General Chemistry 1 [3]	1
Gen. Ed. Distribution course (example: Arts & Humanities)		3
	Credit Hours	**15**
Spring Semester		
EDUC 4050	Knowing and Learning in Mathematics and Science	3
EBIO laboratory or field course (Upper-Division)		4
PHYS 2010	General Physics 1 [3]	5
Gen. Ed. Distribution course (example: Social Sciences)		3
	Credit Hours	**15**
Year Three		
Fall Semester		
EDUC 4060	Classroom Interactions	3
EDUC 4811	Teaching and Learning Biology	3
EBIO 2070	Genetics: Molecules to Populations	4
Gen. Ed. Distribution course (example: Social Sciences)		3
Gen. Ed. Distribution course (example: Arts & Humanities)		3
	Credit Hours	**16**
Spring Semester		
EDUC 4023	Differentiating Instruction in Diverse Secondary Classrooms	3
EDUC 4232	Language and Literacy across the Curriculum	3
EDUC 4385	Problem-Based Science Instruction	3
EBIO 3080	Evolutionary Biology	4
Gen. Ed. Skills course (example: Upper-division Written Communication)		3
	Credit Hours	**16**
Year Four		
Fall Semester		
EDUC 4833	Teaching and Learning Earth Systems	3
EBIO Upper-Division		4
EBIO Upper-Division		4
EBIO Upper-Division		4
	Credit Hours	**15**

Spring Semester		
EDUC 4513	Education and Practice	2
EDUC 4712	Student Teaching: Secondary School	10
	Credit Hours	**12**
	Total Credit Hours	**120**

1 MATH 1310 counts towards the EBIO Ancillary Mathematics/Science Coursework, and satisfies the QRMS Skills requirement for both the College of Arts & Sciences and the School of Education.

2 EDUC 3013 satisfies a Social Sciences Distribution requirement and the U.S. Perspective Diversity requirement for both the College of Arts & Sciences and the School of Education.

3 Counts towards the EBIO Ancillary Mathematics/Science Coursework, and satisfies the Science Content requirements for the School of Education.

Social Studies Track

Sample four-year plan of study (with BA in History).

Year One		
Fall Semester		**Credit Hours**
EDUC 1001	Humanities Teaching for Equity: Naming	1
Any of the required 1000-level HIST United States geographic survey courses		3
Any of the required 1000-level HIST World Areas geographic survey courses		3
Ancillary lower-division written communication course		3
Gen. Ed. Distribution/Diversity course (example: Social Sciences/Global Perspective[1])		3
	Credit Hours	**13**
Spring Semester		
Any of the required 1000-level HIST Europe geographic survey courses		3
1000-level Global History (usually HIST 1800)		3
Gen. Ed. Skills course (example: QRMS)		3
Gen. Ed. Distribution course (example: Social Sciences)		3
Elective		3
	Credit Hours	**15**
Year Two		
Fall Semester		
EDUC 2001	Humanities Teaching for Equity: Noticing	2
EDUC 3013	School and Society [2]	3
HIST 3020	Historical Thinking & Writing [3]	3
HIST upper or lower division level elective		3
Gen. Ed. Distribution course (example: Natural Sciences)		3
Gen Ed Distribution course (example: Social Sciences)		3
	Credit Hours	**17**
Spring Semester		
EDUC 4112	Adolescent Development and Learning for Teachers	3
HIST upper or lower division level elective		3
Either a 2000 or 4000-level HIST elective (4000-level preferred)		3
Gen. Ed. Distribution course (example: Natural Sciences)		3
Gen Ed Distribution course (example: Social Sciences)		3
	Credit Hours	**15**
Year Three		
Fall Semester		
EDUC 3001	Humanities Teaching for Equity: Negotiating	2
EDUC 4316	Nature of Social Studies and Social Studies Education	3
Two 4000-level HIST geographic area requirements		6
Gen. Ed. Distribution course (example: Natural Sciences with Lab)		4
	Credit Hours	**15**
Spring Semester		
EDUC 4023	Differentiating Instruction in Diverse Secondary Classrooms	3
EDUC 4490	Blurring Disciplinary Lines in the Humanities	3
Two 4000-level HIST geographic area requirements		6
Gen. Ed. Distribution course (example: Natural Sciences)		3
	Credit Hours	**15**
Year Four		
Fall Semester		
EDUC 4325	Queering Literacy in Secondary Classrooms	3
EDUC 4330	Secondary Social Studies Methods I	3
Social Studies Content Area course not fulfilled with Social Sciences Distribution course [1]		3
HIST 3000-level Senior Seminar		3
HIST 4000-level elective		3
	Credit Hours	**15**
Spring Semester		
EDUC 4355	Secondary Social Studies Methods II	3
EDUC 4390	Teaching for Equity and Justice	3
EDUC 4712	Student Teaching: Secondary School	10
	Credit Hours	**16**
	Total Credit Hours	**121**

1 The Social Sciences Distribution requirements may also count towards the Secondary Social Studies track's Content Area requirements in Cultural/Human Geography, Economics, Political Science and Sociology or Social/Cultural Anthropology.

2 EDUC 3013 satisfies a Social Sciences Distribution requirement and the U.S. Perspective Diversity requirement for both the College of Arts & Sciences and the School of Education.

3 HIST 3020 fulfills Gen. Ed. Skills Upper-Division Written Communication requirement for both the College of Arts & Sciences and the School of Education.

Spanish Track

Sample four-year plan of study (with BA in Spanish – Spanish Language and Literatures Track).

Year One

Fall Semester		**Credit Hours**
EDUC 1001	Humanities Teaching for Equity: Naming	1
SPAN 1010	Beginning Spanish 1 (If needed, does not fulfill Spanish major or Spanish licensure course requirements)	5
Gen. Ed. Skills course (example: Lower-division Written Communication)		3
Gen. Ed. Distribution course (example: Natural Sciences with Lab)		4
Elective		3
	Credit Hours	**16**
Spring Semester		
SPAN 1020	Beginning Spanish 2 (If needed, does not fulfill Spanish major or Spanish licensure course requirements)	5

SPAN 4170 or SPAN 4180	Major Works/Trends in Literature and Culture in Latin America Up to the 19th Century or Major Works and Trends in Literature and Culture in Latin America: 1900-Present	3
SPAN 4000 level literature course		3
	Credit Hours	**15**
Spring Semester		
EDUC 4513	Education and Practice	2
EDUC 4722	Student Teaching: Secondary School 2	5
SPAN 4660	High School Spanish Teaching	6
	Credit Hours	**13**
	Total Credit Hours	**121**

1. EDUC 3013 satisfies a Social Sciences Distribution requirement and the U.S. Perspective Diversity requirement for both the College of Arts & Sciences and the School of Education.
2. Choosing an upper-division Culture & Civilization course will also count towards the nine credits of upper-division SPAN electives in the Spanish major.
3. SPAN 3010 fulfills Gen. Ed. Skills Upper-Division Written Communication requirement for both the College of Arts & Sciences and the School of Education.

Learning Outcomes

By the completion of the program, students will be able to:

- Demonstrate expertise in teaching and learning within and, when relevant, across content domains (e.g., Literacy, STEM Education).
- Demonstrate knowledge of research and practitioner inquiry for evidence-informed teaching and equitable learning experiences within and, when relevant, across content domains.
- Demonstrate knowledge of research, scholarship, principles, and practices for broadening participation among youth, families, and communities in the design of equitable learning opportunities within and, when relevant, across content domains.

Education - Minor

The Education Minor is designed for students who wish to supplement their academic major with studies in the field of education. The Education Minor allows students to explore the intersection of their chosen major and career path with the field of education, without committing to becoming a classroom teacher. The Education Minor provides a deep study into to how political, cultural, social and historical dynamics shape both policy and practice in education, as well as opportunities to focus on particular areas of education as a field of study and practice.

The minor, comprising three credit hours of core coursework and 15 credit hours of electives, is available to all undergraduates. Students are encouraged to meet with an education advisor to help determine which elective courses provide the best opportunities to supplement their specific field of study and/or explore a career path in the field of education.

Requirements

Declaration Process and Minor Requirements

Students may declare the Education Minor at any point in their undergraduate career. To declare the Education Minor, please submit a declaration form online on the School of Education website (https://www.colorado.edu/education/academics/undergraduate-programs/education-minor/).

A B (3.00) grade point average must be maintained in education minor coursework (with C- as lowest acceptable course grade) to complete the minor.

ETHN 4306	The Chicana and Chicano and U.S. Social Systems	
GEEN 4400	Teaching Design	
INVS 3100	Social Justice, Leadership and Community Engagement Internships	
WGST 3302	Facilitating Peaceful Community Change	
Total Credit Hours		**18**

Learning Outcomes

The education minor curriculum values and promotes the central role of education for preparing critically/socially engaged and democratically-minded citizens for an increasingly complex, socially diverse, and culturally rich world. The education minor curriculum organizes learning experiences for non-majors that foster, among other things, critical awareness, empathy, flexibility, vulnerability, open-mindedness,

imagination, comfort with ambiguity, and an understanding of common experiences, amidst diverse contexts and student histories.

By the completion of the program, students will be able to:

- Examine the historical, cultural and ideological contexts of public schooling.
- Explore theories of learning across families, schools, peer groups, communities and cultures.
- Analyze and explore a self-selected range of topics related to education and connected to major areas of study, for example: roles and meanings of education in a democratic society; justice and equity in education; creativity and agency of youth from non-dominant backgrounds; explorations of popular representations or conventional narratives of students, teachers, and schooling; perspectives on multicultural and bilingual education; perspective on learning mathematics; teaching and reading children's literature.

Leadership Studies - Minor

The Leadership Studies Minor prepares students to courageously lead through a combination of academic study, critical self-reflection and team projects. The 16-credit hour academic program includes an introductory course (LEAD 1000), three individualized electives and an experiential capstone course (LEAD 4000). LEAD 1000 and 4000 feature interactive and hands-on learning applicable to a variety of life experiences, leadership contexts and chosen fields of study. The minor is open access to all undergraduate students from any college or major.

Requirements

Core Requirements

To declare the Leadership Studies Minor, students should submit an online declaration form (https://www.colorado.edu/lsm/coursework/declare-minor/) and an advisor in the School of Education will add the minor to their degree audit. The program accepts declaration forms on a rolling basis.

The 16 credit hour academic minor is comprised of:

1. LEAD 1000 introductory course or an approved substitute for a pre-existing leadership program (3 credit hours)
2. Three individualized elective courses across three elective categories (3 credit hours per category, 9 credit hours total)
3. LEAD 4000 capstone course (4 credit hours)

All coursework must be completed with a grade of a C- or better to fulfill the above requirements.

LEAD 4000 includes a 3 credit hour seminar course with a corresponding 1 credit hour experiential practicum. Through the practicum, student teams will partner with organizations to critically examine a complex social or ecological issue. Capstone students will be automatically enrolled in the practicum when registering for the seminar course. The introductory course requirement and at least two out of three elective courses must be completed to register for the capstone.

Students can meet with an academic advisor in the School of Education to plan a course of study in the minor (edadvise@colorado.edu) after declaring. Contact leadershipstudies@colorado.edu for general inquiries or additional information.

Completion Options

The majority of students will complete the Leadership Studies Minor as open enrollment through the core requirements outlined above (LEAD 1000, 3 elective courses and LEAD 4000). Elective courses options are flexible and individualized to incorporate a variety of student interests and meet degree requirements in other areas.

Students admitted to a partnering leadership program can complete the Leadership Studies Minor through an approved course sequence. Participating "pathway" programs include the Presidents Leadership Class, INVST, Engineering Leadership program, Multicultural Leadership Scholars, and ROTC units (Air Force, Army, Naval).

Open Enrollment Electives

The Leadership Studies Minor requires students to complete 9 credit hours of elective coursework across three categories:

1. **Leadership foundations**: Courses focused on moral and ethical reasoning, ability to evaluate behavior, and improved decision-making. (3 credit hours)
2. **Leadership application**: Courses focused on leadership in practice, including building teams with diverse perspectives and leading teams to accomplish shared goals. (3 credit hours)
3. **Leadership in context**: Courses focused on historical and situational analysis of leadership, critical evaluation of historical or contemporary leaders, and ability to connect leadership behaviors to organizational outcomes. (3 credit hours)

Students can submit a petition (https://www.colorado.edu/lsm/lsm-elective-petition/) for a course not on the approved list to count as a minor elective and complete electives through Education Abroad (https://abroad.colorado.edu/?FuseAction=Abroad.ViewLink&Parent_ID=B207274A-0059-71AF-E694D487757CFC7C&Link_ID=0B53051A-5056-BA1F-7479E530E19C7B18&Wrapper=1). Students should contact leadershipstudies@colorado.edu to correct an issue on their degree audit, move an elective to a different category for their plan of study, and/or inquire about a course petition.

Multicultural Leadership Scholars Pathway

Students should meet with MLS faculty for additional guidance.

Code	Title	Credit Hours
Introductory Course		
LEAD 1001	Becoming a Leader: Multicultural Leadership Scholars	3
Electives		
All courses required from each of the three categories below		
1. Leadership Foundations		*2*
LEAD 1571	Topics in Leadership: Introduction to Research Methods	
2. Leadership Application		*4*
LEAD 2410	Dynamics of Power, Privilege, Oppression and Empowerment in Leadership	
EDUC 2910	Field Practicum 1	
3. Leadership in Context		*3*
INVS 3100	Social Justice, Leadership and Community Engagement Internships	
Capstone		
LEAD 4000	Leadership in Context and Emerging Challenges: A Capstone	4

Presidents Leadership Class Pathway

Students who are selected members of the Presidents Leadership Class can meet the requirements of the Leadership Studies Minor as outlined below. Students should meet with the PLC professional staff for additional guidance.

Code	Title	Credit Hours
Introductory Course		
PRLC 1810	Leadership Foundations and Applications I	3
Electives		
One elective required from each of the three categories below		
1. Leadership Foundations		*3*
PRLC 2820	Multilevel Issues in Leadership (or PRLC 4010 (Maymester) CU in D.C. Science Policy)	
or ENLP 3100	Complex Leadership Challenges	
2. Leadership Application		*3*
PRLC 1820	Leadership Foundations & Applications II	
or PRLC 3810	Global Issues in Leadership	
3. Leadership in Context		*3*
PRLC 3810	Global Issues in Leadership	
or PRLC 3800	Global Inquiry for 21st Century Leadership	
Capstone		
LEAD 4000	Leadership in Context and Emerging Challenges: A Capstone	4

Air Force ROTC Pathway

Students pursuing the Leadership Studies Minor through Air Force ROTC can meet the requirements for the Minor as outlined below.

Code	Title	Credit Hours
Introductory Course		
AIRR 1020	Competition and Security	1
AIRR 2010	Team and Leadership Fundamentals 1	1
AIRR 2020	Team and Leadership Fundamentals 2	1
Electives		
One elective required from each of the three categories below		
1. Leadership Foundations		*3*
AIRR 3010	Leading People and Effective Communication 1	
2. Leadership Application		*3*
AIRR 3020	Leading People and Effective Communication 2	
3. Leadership in Context		*3*
AIRR 4010	National Security, Leadership Responsibilities/Commissioning Preparation 1	
Capstone		
LEAD 4000	Leadership in Context and Emerging Challenges: A Capstone	4

Army ROTC Pathway

Students pursuing the Leadership Studies Minor through Army ROTC can meet the requirements for the minor as outlined below.

Code	Title	Credit Hours
Introductory Course		
MILR 1011	Adventures in Leadership 1	2
MILR 1021	Adventures in Leadership 2	2
Electives		
One elective required from each of the three categories below		
1. Leadership Foundations		*3*
MILR 2031	Methods of Leadership and Management 1	
2. Leadership Application		*3*
MILR 3052	Military Operations and Training 1	
3. Leadership in Context		*3*
MILR 4072	Leadership 1: Adaptive Leadership	
Capstone		
LEAD 4000	Leadership in Context and Emerging Challenges: A Capstone	4

Naval ROTC Pathway

Students pursuing the Leadership Studies Minor through Naval ROTC, including traditional Midshipmen programs, Seaman to Admiral (STA-21) and Marine Corps Enlisted Commissioning Educational Program (MECEP), can meet the requirements for the minor as outlined below.

Code	Title	Credit Hours
Introductory Course		
NAVR 4010	Leadership and Management	3
Electives		
One elective required from each of the three categories below		
1. Leadership Foundations		*3*
NAVR 4020	Leadership and Ethics	
2. Leadership Application		*3*
NAVR 2020	Seapower and Maritime Affairs	

3. Leadership in Context		*3*
NAVR 3020	Naval Operations and Seamanship	
Capstone		
LEAD 4000	Leadership in Context and Emerging Challenges: A Capstone	4

Learning Outcomes

By the completion of the program, students will be able to:

- Analyze leadership theories or approaches from multiple perspectives.
- Critically reflect on personal leadership capacities, social identities, and values.
- Meaningfully collaborate with others across difference.

STEM Education - Certificate

At both the state and national level, the importance of a technologically literate workforce is essential to meeting the challenges of the 21st Century.

Preparing students for this workforce depends not only on producing high quality science, technology, engineering and mathematics (STEM) majors, but also improving their ability to communicate STEM concepts and work effectively with others. Whether they become doctors, teachers, or engineers, it is imperative that STEM majors are able to work in a variety of collaborative environments. Paramount to creating collaborative environments is recognizing the inherent strengths in embracing diverse perspectives, creating safe and affirming spaces, and valuing social justice and equitable teaching/learning.

The STEM Education Certificate provides STEM majors with skills in how to effectively communicate STEM related concepts, as well as an awareness of discipline-specific approaches to teaching and learning. Students enrolled in the STEM Education Certificate become part of a supportive CU Teach community. They work collaboratively teaching STEM concepts in local elementary and secondary schools and also experience working with youth in programs across campus and in the community. Moreover, the STEM Education Certificate allows students to graduate with a skill set that can be applied in business and industry, while providing them required foundational courses if they choose to complete a secondary mathematics or science teaching license.

The STEM Education Certificate is a collaborative venture between the School of Education, the College of Engineering and Applied Science, and the College of Arts and Sciences and focuses on creating learning environments that support the sharing of diverse perspectives in the process of solving interesting and relevant mathematical, scientific and engineering problems.

Requirements

Student Eligibility

Degree-seeking undergraduate students majoring in math, science or engineering (through Engineering Plus) are eligible to enroll in the STEM Education Certificate. Students must maintain at least a 3.0 GPA in the STEM Education Certificate courses.

Many of the courses included in the STEM Education Certificate are also applicable to the curriculum for obtaining licensure in secondary math or science; thus, students who decide to pursue a STEM secondary teaching license will be able to do so in a timely manner (approximately two additional semesters plus student teaching).

Required Courses and Credits

Code	Title	Credit Hours
Courses and Minimum Required Credit Hours		
EDUC 2035	Designing STEM Learning Environments and Experiences	3-4
or EDUC 2020 & EDUC 2030	Step 1: Inquiry Approaches to Teaching STEM and Step 2: Inquiry-Based Lesson Design	
EDUC 4050	Knowing and Learning in Mathematics and Science	3
Choose two:		6
EDUC 1580	Energy and Interactions	
EDUC 2130	Teaching and Learning Math: Calculus, Trig and Adv Functions	
EDUC 4317	Perspectives on Mathematics	
EDUC/PHYS 4460	Teaching and Learning Physics	
EDUC 4706	Assessment in Mathematics and Science Education	
EDUC/MCDB 4811	Teaching and Learning Biology	
EDUC 4815	Teaching K-12 Mathematics: Number Sense	
EDUC 4821	Teaching K-12 Mathematics: Algebraic Thinking	
EDUC 4822	Teaching and Learning Chemistry	
EDUC 4833	Teaching and Learning Earth Systems	
EDUC 4835	Teaching K-12 Mathematics: Geometry & Measurement	
EDUC 4844	Teaching and Learning Computational Thinking	
EDUC 4850	Teaching K-12 Mathematics: Probability & Statistics	
GEEN 4400	Teaching Design	
Total Credit Hours		**12-13**

In addition to the required courses listed above, students must complete a total of 15 hours in various STEM education and outreach institutions that partner with CU Teach (Possible collaborators/venues include tutoring in BVSD, SVVSD, CU Science Discovery, CU Fiske Planetarium, WOW! Children's Museum, Destination Imagination, Butterfly Pavilion, and Science Fair judging). Students may propose their own partnership/collaboration (future or in the past) for approval by a co-chair of CU Teach.

Learning Outcomes

By the completion of the program, students will be able to:

- Demonstrate knowledge of disciplinary-specific approaches to teaching and learning STEM.
- Effectively communicate STEM related concepts in educational, business and industry settings.
- Describe approaches for improving STEM education in formal and informal learning environments.

Teacher Licensure Program

The School of Education offers coursework leading to a Colorado initial teaching license to undergraduate, post-baccalaureate and master's degree students. Colorado requires public school teachers to be licensed by its state department of education. Students who successfully complete all School of Education requirements will be recommended for a Colorado initial teaching license. The initial teaching license is for Colorado only. Licensure requirements vary from state to state and from teaching area to area. Students who are interested in teaching in other states should familiarize themselves with the requirements of those states so they may plan an appropriate degree program.

Teacher education at the University of Colorado, while administered by the School of Education, is a university-wide function. Many academic departments provide coursework that supports teacher preparation. Undergraduate students follow a prescribed set of core courses that meet state content preparation standards, complete a major and satisfy professional education requirements concurrently. The program involves a combination of courses at the university and K–12 school placements.

Students interested in pursuing Elementary (grades K–6) Education teacher licensure should refer to the Elementary Education - Bachelor of Arts (BA) (p. 794) section of the catalog for more information.

Program Mission & Commitments

The School of Education prepares educators who are able to enact commitments to social justice and equitable access to deep content learning in school, family and community contexts.

The following principles guide our work in preparing the next generation of educators:

- Teachers must position students as sense-makers and knowledge-generators, who desire to invest and succeed in school. This involves noticing children/youth, building relationships with them, valuing their perspectives and attending to their thinking, curiosities and capabilities.
- Teaching is both intellectual work and a craft. Deep knowledge of content and pedagogy, creativity and passion fuel both learning and teaching.
- Teachers must design equitable learning environments in which all children are engaged in robust and consequential learning.
- Teacher's instruction and student learning is always conducted within the context of larger social systems, structures and hierarchies.
- What we do and say matters and must be analyzed. Our language and action constructs or constrains opportunities for children to build meaningful, positive and sustained relationships to learning and one another.

Colorado Teacher Quality Standards

Teacher education candidates engage in a planned sequence of courses and accompanying clinical experiences in local community and school sites. Courses and assessments ensure candidates have demonstrated appropriate mastery of (1) content taught in the Colorado Academic Standards and (2) professional practices and dispositions associated with the Colorado Teacher Quality Standards listed below.

1. Teachers demonstrate mastery of and pedagogical expertise in the content they teach. The secondary teacher has knowledge of literacy and mathematics and is an expert in his or her content endorsement area(s).
2. Teachers establish a safe, inclusive and respectful learning environment for a diverse population of students.
3. Teachers plan and deliver effective instruction and create an environment that facilitates learning for their students.
4. Teachers demonstrate professionalism through ethical conduct, reflection and leadership.

Admission Requirements

To be eligible for admission to the undergraduate nondegree or the post-baccalaureate teacher licensure program, applicants must meet all of the requirements below. Please note, satisfying the minimum criteria does not guarantee acceptance.

- **GPA**: Secondary students must have a 2.50 (on a 4.00 scale) cumulative GPA, 2.50 at CU Boulder, 2.50 in their subject area (secondary teacher fields) and 2.50 in education to be considered for admission. K-12 Music Education students must have and maintain a 3.00 overall and in their subject area.
- **Prior Degrees**: Students applying to Post-Baccalaureate programs must have a bachelor's degree from an accredited institution.
- **Basic Skills**: All teacher education students must demonstrate basic skills competence in mathematics and literacy. This may be done through acceptable grades in appropriate college coursework, or by acceptable standardized test scores. Contact the School of Education for more information.
- **Letters of Recommendation**: Students applying to an undergraduate nondegree program must have one letter of recommendation from a college-level instructor, professor, graduate student instructor, lab instructor, or a teaching assistant. Students applying to post-baccalaureate programs must have two letters of recommendation from a college-level instructor, professor, graduate student instructor, lab instructor, or a teaching assistant.
- **Personal Statement**
- **Background Check and Fee**: Please contact the School of Education for the most updated information.

Post-Baccalaureate

The post-baccalaureate teacher licensure programs are designed for students who have previously completed a BA/BS/BM degree and are only pursuing a Colorado initial teaching license. The programs do not lead to a degree.

Post-Baccalaureate (Non-Master's Degree) Teacher Licensure Programs

- Music Education (K–12) (p. 815)
- Middle School Math (6–8) (p. 815)
- Secondary Math (6–12) (p. 816)
- Secondary Science (6–12) (p. 817)
- World Languages (6 (p. 818)– (p. 817)12) (p. 818) - French, German, Japanese, Latin or Spanish

Music Education (K–12) Teacher Licensure Program for Post-Baccalaureate Students

K-12 Music Education teacher licensure candidates must maintain a 2.00 GPA in cumulative, content and education coursework. All grades in Education courses must be a B- or better to maintain good standing in the program. All grades must be a C- or better to satisfy a content coursework requirement.

Content Coursework Requirements

The College of Music evaluates all music content requirements, and recommends applicants to the School of Education. Students who have an undergraduate degree in music (BA, BM) may apply to the Masters of Music Education plus licensure program. Please contact the College of Music for details.

Non-Music Content Coursework Requirements

Code	Title	Credit Hours
Courses and Minimum Required Credit Hours		
Arts & Humanities (excluding music courses)		3
Quantitative Reasoning and Mathematical Skills: Three credit hours in college-level mathematics.		3
Natural Sciences		3
Social Sciences or World Language (third semester or higher)		3
Written Communication: Three credit hours in college-level composition or writing.		3
Non-music Electives: Any coursework offered outside of music, excluding any School of Education (EDUC) courses.		9

Education Course Requirements

Code	Title	Credit Hours
Courses and Minimum Required Credit Hours		
EDUC 3013	School and Society	3
EDUC 4112	Adolescent Development and Learning for Teachers (Includes up to two hours per week of outside-class service learning. May be taken at any time.)	3
or EDUC 2411	Educational Psychology for Elementary Schools	
MUSC 4323	Differentiating Instruction in K-8 Music Classrooms	3
or EDUC 4023	Differentiating Instruction in Diverse Secondary Classrooms	
Total Credit Hours		**9**

Student Teaching

Satisfactory completion of all content and education course requirements is a prerequisite for student teaching. No other courses may be taken during the student teaching semester.

- EDUC 4732 Student Teaching K-12 (8 credits). Pass/fail only.
- MUSC 4133 Student Teaching Practicum (3 credits). This course may be optional. Please check with the College of Music.
- MUSC 4193 Student Teaching Seminar (1 credit).

Required Tests and Assessments

Basic Skills: Prior to Student Teaching

Complete an appropriate, college-level math *and* composition course with a B- or better. Acceptable scores on the ACT, SAT, GRE or Praxis CORE exam will also satisfy the requirement.

Licensure Exam: Prior to Student Teaching

Pass the state-approved licensure exam, PRAXIS Music: Content Knowledge (test code 5113).

Middle School Mathematics (6–8) Teacher Licensure Program for Post-Baccalaureate Students

Middle School Mathematics teacher licensure candidates must maintain a 2.00 GPA in cumulative, content and education coursework. All grades in Education courses must be a B- or better to maintain good standing in the program. All grades must be a C- or better to satisfy a content coursework requirement.

Content Coursework Requirements

Code	Title	Credit Hours
Courses and Minimum Required Credit Hours		
Literature & Arts		3
Natural Science		3
Social Science		3
Written Communication: College-level composition or writing		3
EDUC 2130	Teaching and Learning Math: Calculus, Trig and Adv Functions (or a 4-5 credit Calculus 1 course or equivalent.)	3-5
or APPM 1350	Calculus 1 for Engineers	
or MATH 1300	Calculus 1	
or MATH 1310	Calculus for Life Sciences	
EDUC 4815	Teaching K-12 Mathematics: Number Sense (Spring only.)	3
EDUC 4821	Teaching K-12 Mathematics: Algebraic Thinking (Spring only.)	3
EDUC 4835	Teaching K-12 Mathematics: Geometry & Measurement (Fall only.)	3
EDUC 4850	Teaching K-12 Mathematics: Probability & Statistics (Fall only.)	3
Math or applied math coursework. 24 credit hours at the college-level or higher. (May include requirements above. May include EDUC 4317.)		24
Recent mathematics coursework in the past five years. (May include EDUC 4317.)		6

Education Course Requirements

Code	Title	Credit Hours

EDUC 4023	Differentiating Instruction in Diverse Secondary Classrooms (Includes up to four (4) hours per week of school-based practicum. Should be taken concurrently with EDUC 5375 Problem-Based Instruction. EDUC 4060 is a prerequisite.)	3
EDUC 4050	Knowing and Learning in Mathematics and Science (May be taken any time. Includes up to two (2) hours per week of school-based practicum.)	3
EDUC 4060	Classroom Interactions (Includes up to five (5) hours per week of school-based practicum. This course is a prerequisite for EDUC 4023 and EDUC 5375. Fall only.)	3
EDUC 4232	Language and Literacy across the Curriculum (May be taken at any time. Spring only.)	3
EDUC 4317	Perspectives on Mathematics (May be taken at any time. Fall only.)	3
EDUC 5375	Problem-Based Math Instruction (Includes up to six (6) hours per week of school-based practicum. Should be taken concurrently with EDUC 4023 Differentiating Instruction in Diverse Secondary Classrooms. EDUC 4060 is a prerequisite. Spring only.)	3
Total Credit Hours		**24**

Student Teaching

Satisfactory completion of all content and education course requirements is a prerequisite for student teaching. No other courses may be taken during the student teaching semester.

- EDUC 4513 Education and Practice (2 credits). Must be taken with EDUC 4712.
- EDUC 4712 Student Teaching: Secondary School (10 credits). Must be taken with EDUC 4513.

Required Tests and Assessments

Basic Skills: Prior to Student Teaching

Complete an appropriate, college-level math *and* composition course with a B- or better. Acceptable scores on the ACT, SAT, GRE or Praxis CORE exam will also satisfy the requirement.

Licensure Exam: Prior to Student Teaching

Pass the state-approved licensure exam, PRAXIS: Middle School Mathematics (test code 5164).

Teacher Performance Assessment

Pass a performance-based, subject-specific assessment designed by program faculty.

Secondary Mathematics (7–12) Teacher Licensure Program for Post-Baccalaureate Students

Secondary Mathematics teacher licensure candidates must maintain a 2.00 GPA in cumulative, content and education coursework. All grades in Education courses must be a B- or better to maintain good standing in the program. All grades must be a C- or better to satisfy a content coursework requirement.

Total Credit Hours		**24**

Student Teaching

Satisfactory completion of all content and education course requirements is a prerequisite for student teaching. No other courses may be taken during the student teaching semester.

- EDUC 4513 Education and Practice (2 credits). Must be taken with EDUC 4712.
- EDUC 4712 Student Teaching: Secondary School (10 credits). Must be taken with EDUC 4513.

Required Tests and Assessments

Basic Skills: Prior to Student Teaching

Complete an appropriate, college-level math *and* composition course with a B- or better. Acceptable scores on the ACT, SAT, GRE or Praxis CORE exam will also satisfy the requirement.

Licensure Exam: Prior to Student Teaching

Pass the state-approved licensure exam, Praxis: Mathematics (test code 5165).

Teacher Performance Assessment

Pass a performance-based, subject-specific assessment designed by program faculty.

Secondary Science (7–12) Teacher Licensure Program for Post-Baccalaureate Students

Secondary Science teacher licensure candidates must maintain a 2.00 GPA in cumulative, content and education coursework. All grades in Education courses must be a B- or better to maintain good standing in the program. All grades must be a C- or better to satisfy a content coursework requirement.

Content Coursework Requirements

Code	Title	Credit Hours
Courses and Minimum Required Credit Hours		
Literature & Arts		3
Social Science		3
Written Communication: College-level composition or writing.		3
Calculus I: Including or equivalent to APPM 1350,MATH 1300, or MATH 1310.		4-5
Choose one biology course.		3
Choose one chemistry course.		3
Choose one earth/space science course.		3
Choose one physics course.		3
Complete three out of four of the following content area lab courses separately or as part of a course:		
Biology lab		
Earth/space science lab		
Chemistry lab		
Physics lab		
Recent science coursework in the past five years.		6
Students must complete 24 credit hours in one of the sections below:		24
Biology (may include courses from biology area above). Coursework must include the study of general biology, matter & energy in living systems, ecology, evolution, genetics, molecular biology, human anatomy, environmental biology and biotechnology.		
Chemistry (may include courses from chemistry area above). Coursework must include the study of analytical, inorganic, organic and physical chemistry.		
Earth/space science (may include courses from earth/space science area above). Coursework must include the study of environmental science, astronomy, historical & physical geology, meteorology, oceanography, and geomorphology & earth systems.		
Environmental science. Coursework must include the study of ecology and astronomy, and 17 credit hours in biology.		
Physics (may include courses from Physics area above). Coursework must include the study of mathematics through differential equations, astronomy, atomic & nuclear, classical mechanics, electricity & magnetism, heat & thermodynamics, optics & sound, quantum mechanics, radiation & radioactivity, relativity and waves.

Required Tests and Assessments

Basic Skills: Prior to Student Teaching

Complete an appropriate, college-level math *and* composition course with a B- or better. Acceptable scores on the ACT, SAT, GRE or Praxis CORE exam will also satisfy the requirement.

Licensure Exam: Prior to Student Teaching

Pass the state-approved licensure exam, PRAXIS Spanish: World Language (test code 5195).

Secondary Spanish licensure candidates will need to demonstrate content knowledge and Advanced Low communication skills in Spanish on the PRAXIS exam. An additional measure of oral proficiency at the Advanced Low level is the Oral Proficiency Interview (OPI). The faculty advisor in the Spanish Department can provide more information about the benefits of taking the OPI and how to sign up for it.

Learning Outcomes

In their development as teachers for equity and justice who value and center humanistic, anti-oppressive, anti-racist, and queer-inclusive stances and practices, candidates in the CU licensure programs:

- Demonstrate expertise in teaching and learning within and, when relevant, across content domains (e.g., Literacy, STEM Education).
- Demonstrate knowledge of research and practitioner inquiry for evidence-informed teaching and equitable learning experiences within and, when relevant, across content domains.
- Demonstrate knowledge of research, scholarship, principles, and practices for broadening participation among youth, families, and communities in the design of equitable learning opportunities within and, when relevant, across content domains.

Undergraduate Teacher Licensure

The undergraduate nondegree teacher licensure programs are designed for current, CU Boulder undergraduates in a college or school outside of the School of Education. The students will complete teacher licensure coursework simultaneously with their undergraduate degree coursework.

Secondary licensure in English, mathematics, science, social studies or Spanish can be completed with or without also completing a bachelor's degree in Middle & High School Teaching. Completion of the bachelor's degree requires the undergraduate candidate satisfy the general education requirements for the School of Education as well as the coursework and fieldwork required to be recommended for licensure. For candidates with content area majors in the College of Arts and Sciences, this requires no additional coursework. For candidates with content majors in other colleges or schools, additional coursework to complete School of Education general education requirements may be required. If, upon consultation with the School of Education academic advisor, a candidate determines they would like to pursue the requirements for licensure without also earning the bachelor's degree in Middle & High School Teaching, the nondegree option is available.

Undergraduate Nondegree Teacher Licensure Programs

- Music Education (K–12) (p. 821)
- Secondary English Language Arts (6–12) (p. 822)
- Middle School Math (6–8) (p. 823)
- Secondary Math (6–12) (p. 824)
- Secondary Science (6–12) (p. 824)
- Secondary Social Studies (6–12) (p. 825)
- World Languages (p. 826) (French, German, Japanese, Latin or Spanish)

Music Education (K–12) Teacher Licensure Program

Grade Requirements

K-12 Music Education teacher licensure candidates must maintain a 2.00 GPA in cumulative, content and education coursework. All grades in Education courses must be a B- or better to maintain good standing

in the program. All grades must be a C- or better to satisfy a content coursework requirement.

Content Coursework Requirements

K-12 Music Education teacher licensure candidates will meet content coursework requirements with the completion of their Bachelor of Music Education (p. 1081) degree program. Please contact the College of Music for details.

Non-Music Coursework Requirements

Code	Title	Credit Hours
Courses and Minimum Required Credit Hours		
Arts & Humanities (excluding music courses)		3
Quantitative Reasoning and Mathematical Skills		3
Natural Sciences		3
Social Sciences or World Language (3rd semester or higher)		3
Written Communication: Three credit hours in college-level composition or writing.		3
Non-Music Electives: any courses outside of the College of Music, excluding any School of Education (EDUC) courses.		9

Education Course Requirements

Code	Title	Credit Hours
EDUC 3013	School and Society	3
EDUC 4112	Adolescent Development and Learning for Teachers (includes up to 2 hours per week of outside-class service learning; may be taken at any time)	3
or EDUC 2411	Educational Psychology for Elementary Schools	
MUSC 4323	Differentiating Instruction in K-8 Music Classrooms	3
or EDUC 4023	Differentiating Instruction in Diverse Secondary Classrooms	
Total Credit Hours		**9**

Student Teaching

Satisfactory completion of all content and education course requirements is a prerequisite for student teaching. No other courses may be taken during the student teaching semester.

Code	Title	Credit Hours
EDUC 4732	Student Teaching K-12 (Pass/fail only.)	8
MUSC 4133	Student Teaching Practicum (This course may be optional. Pease contact the College of Music.)	3
MUSC 4193	Student Teaching Seminar	1
Total Credit Hours		**12**

Required Tests and Assessments

Basic Skills: Prior to Student Teaching

Complete an appropriate, college-level math *and* composition course with a B- or better. Acceptable scores on the ACT, SAT, GRE or Praxis CORE exam will also satisfy the requirement.

Licensure Exam: Prior to Student Teaching

Pass the state-approved licensure exam, PRAXIS Music: Content Knowledge (test code 5113).

Secondary English Language Arts (6–12) Teacher Licensure Program

Major Requirements

Secondary English Language Arts teacher licensure candidates must major in English Literature, Ethnic Studies, Communication, Journalism, or Humanities with a literature concentration.

Grade Requirements

Secondary English Language Arts teacher licensure candidates must maintain a cumulative 2.00 GPA in content and education coursework. All grades in Education courses must be a B- or better to maintain good standing in the program. All grades must be a C- or better to satisfy a content coursework requirement.

Content Coursework Requirements

Code	Title	Credit Hours
Courses and Minimum Required Credit Hours		
Advanced Writing: Critical or creative writing beyond the lower-division/introductory composition level.		3
Visual or Digital Communication: Includes theatre, film, or digital media courses.		3
Literature: Must include a component of American literature, British literature, World literature (non-American/non-British literature), and Multicultural literature.		12
Thirty credit hours or coursework in one of the following disciplines: Communication/Speech, Composition, Drama/Theatre, Humanities, Journalism, or Literature (may include courses from the content requirements above).		30

Education Course Requirements

Code	Title	Credit Hours
Take Prior to Final Year in the Program		
EDUC 1001	Humanities Teaching for Equity: Naming	1
EDUC 2001	Humanities Teaching for Equity: Noticing	2
EDUC 3001	Humanities Teaching for Equity: Negotiating	2
EDUC 3013	School and Society	3
EDUC 4023	Differentiating Instruction in Diverse Secondary Classrooms	3
EDUC 4112	Adolescent Development and Learning for Teachers (Includes up to 2 hours per week of outside-class service learning.)	3
EDUC 4295	Narrative and Story in the Humanities	3
EDUC 4490	Blurring Disciplinary Lines in the Humanities	3
Final Year in Program		
EDUC 4325	Queering Literacy in Secondary Classrooms (Fall Only.)	3
EDUC 4345	Secondary English Methods I (Fall Only.)	3

EDUC 4712	Student Teaching: Secondary School (Spring Only.)	10
EDUC 4365	Secondary English Methods II (Spring Only.)	3
EDUC 4390	Teaching for Equity and Justice (Spring Only.)	3
Total Credit Hours		**42**

Student Teaching

Candidates will complete an intensive final year of field experiences while taking courses. Candidates will generally not be able to take other coursework in the final Spring semester of the program. Please contact an Education advisor for more information.

Required Tests and Assessments

Basic Skills: Prior to Student Teaching

Complete an appropriate, college-level math *and* composition course with a B- or better. Acceptable scores on the ACT, SAT, GRE or Praxis CORE exam will also satisfy the requirement.

Licensure Exam: Prior to Student Teaching

Pass the state-approved licensure exam, PRAXIS English Language Arts: Content Knowledge (test code 5038).

Middle School Mathematics (6–8) Teacher Licensure Program

Grade Requirements

Middle School Mathematics teacher licensure candidates must maintain a 2.00 GPA in cumulative, content and education coursework. All grades in Education courses must be a B- or better to maintain good standing in the program. All grades must be a C- or better to satisfy a content coursework requirement.

Content Coursework Requirements

Code	Title	Credit Hours
Courses and Minimum Required Credit Hours		
EDUC 2130	Teaching and Learning Math: Calculus, Trig and Adv Functions	3
or MATH 1300	Calculus 1	
or MATH 1310	Calculus for Life Sciences	
or APPM 1350	Calculus 1 for Engineers	
EDUC 4815	Teaching K-12 Mathematics: Number Sense (Spring only.)	3
EDUC 4821	Teaching K-12 Mathematics: Algebraic Thinking (Spring only.)	3
EDUC 4835	Teaching K-12 Mathematics: Geometry & Measurement (Fall only.)	3
EDUC 4850	Teaching K-12 Mathematics: Probability & Statistics (Fall only.)	3
Math or applied math coursework. 24 credit hours at the college-level or higher. (May include requirements above. May include EDUC 4317.)		24

Education Course Requirements

Code	Title	Credit Hours
Take Any Time (Do not have to be admitted to teacher licensure program)		
EDUC 2035	Designing STEM Learning Environments and Experiences	3-4
or EDUC 2020	Step 1: Inquiry Approaches to Teaching STEM	
and EDUC 2030	Step 2: Inquiry-Based Lesson Design	
EDUC 3013	School and Society	3
EDUC 4050	Knowing and Learning in Mathematics and Science (Includes up to 2 hours per week of school-based practicum.)	3
EDUC 4317	Perspectives on Mathematics (Fall only.)	3
Education Coursework (must be admitted to teacher licensure program)		
EDUC 4023	Differentiating Instruction in Diverse Secondary Classrooms (Includes up to four (4) hours per week of school-based practicum. Should be taken concurrently with EDUC 5375. EDUC 4060 is a prerequisite.)	3
EDUC 4060	Classroom Interactions (Includes up to five (5) hours per week of school-based practicum. This course is a prerequisite for EDUC 4023 and EDUC 5375. Fall only.)	3
EDUC 4232	Language and Literacy across the Curriculum (Spring only.)	3
EDUC 5375	Problem-Based Math Instruction (Includes up to six (6) hours per week of school-based practicum. Should be taken concurrently with EDUC 4023. EDUC 4060 is a prerequisite. Spring only.)	3
Total Credit Hours		**24-25**

Student Teaching

Satisfactory completion of all content and education course requirements is a prerequisite for student teaching. No other courses may be taken during the student teaching semester.

- EDUC 4513 Education and Practice (2 credits). Must be taken with EDUC 4712.
- EDUC 4712 Student Teaching: Secondary School (10 credits). Must be taken with EDUC 4513.

Required Tests and Assessments

Basic Skills: Prior to Student Teaching

Complete an appropriate, college-level math *and* composition course with a B- or better. Acceptable scores on the ACT, SAT, GRE or Praxis CORE exam will also satisfy the requirement.

Licensure Exam: Prior to Student Teaching

Pass the state-approved licensure exam, PRAXIS: Middle School Mathematics (test code 5164).

Teacher Performance Assessment

Pass a performance-based, subject-specific assessment designed by program faculty.

Secondary Mathematics (6–12) Teacher Licensure Program

Grade Requirements

Secondary Mathematics teacher licensure candidates must maintain a 2.00 GPA in cumulative, content and education coursework. All grades in Education courses must be a B- or better to maintain good standing in the program. All grades must be a C- or better to satisfy a content coursework requirement.

Mathematics		
MATH 1300	Calculus 1	4-5
or MATH 1310	Calculus for Life Sciences	

or APPM 1350	Calculus 1 for Engineers	
Science		
Choose one biology course.		3
Choose one chemistry course.		3
Choose one earth/space science course.		3
Choose one physics course.		3
Complete three out of four of the following content area lab courses separately or as part of a course:		
Biology lab		
Chemistry lab		
Earth/space science lab		
Physics lab		

Content Majors

- **Biology**: Complete a major in ecology & evolutionary biology, integrative physiology, neuroscience, or molecular, cellular & developmental biology (may include courses from the content requirements above).
- **Chemistry**: Complete a major in chemistry or biochemistry (may include courses from the content requirements above).
- **Earth/Space Science**: Complete a major in astronomy, atmospheric & oceanic sciences or geology (may include courses from the content requirements above). Please contact an education advisor for more information (edadvise@colorado.edu).
- **Environmental Science**: Complete a major in environmental studies with coursework in astronomy, ecology, and 17 credit hours of biology (may include courses from the content requirements above). Please contact an education advisor for more information (edadvise@colorado.edu).
- **Physics**: Complete a major in physics with Plan 3 (may include courses from the content requirements above). Students pursuing Plan 1 or Plan 2 in the physics major, or a major in engineering physics, should contact an education advisor (edadvise@colorado.edu).

Complete an appropriate, college-level math *and* composition course with a B- or better. Acceptable scores on the ACT, SAT, GRE or Praxis CORE exam will also satisfy the requirement.

Licensure Exam: Prior to Student Teaching

Pass the state-approved licensure exam, PRAXIS Social Studies: Content Knowledge (test code 5581).

World Languages

Secondary French (7–12) Teacher Licensure Program

Grade Requirements

Secondary French teacher licensure candidates must maintain a 2.00 GPA in cumulative, content and education coursework. All grades in Education courses must be a B- or better to maintain good standing in the program. All grades must be a C- or better to satisfy a content coursework requirement.

Content Coursework Requirements

Students must complete at least 30 credits in French at the 3000-level level or above.

Code	Title	Credit Hours
Courses and Minimum Required Credit Hours		
FREN 3010	French Phonetics and Pronunciation	3
FREN 3050	French Composition	3
FREN 3100	Introduction to Critical Reading and Writing in French Literature	3
FREN 3110	Main Currents of French Literature 1	3
FREN 3120	Main Currents of French Literature 2	3
FREN 3500	French Current Events: Conversation and Composition	3
Thirty credit hours of upper-division French coursework. May include courses from above.		30

Education Course Requirements

Code	Title	Credit Hours
EDUC 3013	School and Society	3
EDUC 4112	Adolescent Development and Learning for Teachers (includes up to 2 hours per week of outside-class service learning)	3
EDUC 4023	Differentiating Instruction in Diverse Secondary Classrooms (includes up to 4 hours per week of school-based practicum)	3
EDUC 4125	Secondary World Language Methods (fall only; includes up to 5 hours per week of school-based practicum)	3
FREN 5770	Methods of Teaching French as a Foreign Language (fall only)	2
Total Credit Hours		**14**

Student Teaching

Satisfactory completion of all content and education course requirements is a prerequisite for student teaching. No other courses may be taken during the student teaching semester.

- EDUC 4513 Education and Practice (2 credits). Must be taken with EDUC 4722 and FREN 4960.
- EDUC 4722 Student Teaching: Secondary School 2 (5 credits). Must be taken with EDUC 4513 and FREN 4960.

- FREN 4960 High School French Teaching (6 credits). Must be taken with EDUC 4513 and EDUC 4722.

Required Tests and Assessments

Basic Skills: Prior to Student Teaching

Complete an appropriate, college-level math *and* composition course with a B- or better. Acceptable scores on the ACT, SAT, GRE or Praxis CORE exam will also satisfy the requirement.

Oral Proficiency Interview: Prior to Student Teaching

Pass the ACTFL Oral Proficiency Interview with a score of Advanced Low or better.

Licensure Exam: Prior to Student Teaching

Pass the state-approved licensure exam, PRAXIS French: World Language (test code 5174).

Secondary German (7–12) Teacher Licensure Program

Grade Requirements

Secondary German teacher licensure candidates must maintain a 2.00 GPA in cumulative, content and education coursework. All grades in Education courses must be a B- or better to maintain good standing in the program. All grades must be a C- or better to satisfy a content coursework requirement.

Content Coursework Requirements

Students must complete at least 30 credits in German. GRMN 4450 or GRMN 5020 may not count towards requirements.

Code	Title	Credit Hours
Courses and Minimum Required Credit Hours		
GRMN 2010	Intermediate German 1	4
GRMN 2020	Intermediate German 2	4
GRMN 3010	Advanced German 1	3
GRMN 3020	Advanced German 2	3
GRMN 4010	Advanced German III	3
Fifteen credit hours of German coursework. At least six hours must be upper-division, and least six hours must be taught in German.		15

Education Course Requirements

Code	Title	Credit Hours
EDUC 3013	School and Society	3
EDUC 4112	Adolescent Development and Learning for Teachers (Includes up to two (2) hours per week of outside-class service learning. May be taken at any time.)	3

EDUC 4125	Secondary World Language Methods (Includes up to five (5) hours per week of school-based practicum. Fall only.)	3
GRMN 4450	Methods of Teaching German	3
or GRMN 5020	Applied Linguistics and Foreign Language Teaching Methodology	
Note: May not count GRMN 5020 for academic preparation in German (section C, item 6) and for methods.		
Total Credit Hours		**15**

Student Teaching

Satisfactory completion of all content and education course requirements is a prerequisite for student teaching. No other courses may be taken during the student teaching semester.

- EDUC 4513 Education and Practice (2 credits). Must be taken with EDUC 4722.
- EDUC 4722 Student Teaching: Secondary School 2 (5 credits). Must be taken with EDUC 4513.
- GRMN 4460 High School German Teaching (6 credits). Pass/fail only. Must be taken concurrently EDUC 4513 & EDUC 4722.

Required Tests and Assessments

Basic Skills: Prior to Student Teaching

Complete an appropriate, college-level math *and* composition course with a B- or better. Acceptable scores on the ACT, SAT, GRE or Praxis CORE exam will also satisfy the requirement.

Oral Proficiency Interview: Prior to Student Teaching

Pass the ACTFL Oral Proficiency Interview with a score of Advanced Low or better.

Licensure Exam: Prior to Student Teaching

Pass the state-approved licensure exam, PRAXIS German: World Language (test code 5183).

Secondary Japanese (7–12) Teacher Licensure Program

Grade Requirements

Secondary Japanese teacher licensure candidates must maintain a 2.00 GPA in cumulative, content and education coursework. All grades in Education courses must be a B- or better to maintain good standing in the program. All grades must be a C- or better to satisfy a content coursework requirement.

Content Coursework Requirements

Students must complete at least 30 credits in Japanese.

Code	Title	Credit Hours
Courses and Minimum Required Credit Hours		
JPNS 2120	Intermediate Japanese 2	5
JPNS 3110	Advanced Japanese 1	5
JPNS 3120	Advanced Japanese 2	5
JPNS 4110	Advanced Readings in Modern Japanese 1	3
JPNS 4120	Advanced Readings in Modern Japanese 2	3
Fifteen upper-division credits in Japanese language, literature and/or culture.		15

Education Course Requirements

Code	Title	Credit Hours
EDUC 3013	School and Society	3
EDUC 4112	Adolescent Development and Learning for Teachers (includes up to 2 hours per week of outside-class service learning)	3

EDUC 4023	Differentiating Instruction in Diverse Secondary Classrooms (includes up to 4 hours per week of school-based practicum)	3
EDUC 4125	Secondary World Language Methods (fall only; includes up to 5 hours per week of school-based practicum)	3
Total Credit Hours		**12**

Student Teaching

Satisfactory completion of all content and education course requirements is a prerequisite for student teaching. No other courses may be taken during the student teaching semester.

- EDUC 4513 Education and Practice (2 credits). Must be taken with EDUC 4712.
- EDUC 4712 Student Teaching: Secondary School (10 credits). Must be taken with EDUC 4513.

Required Tests and Assessments

Basic Skills: Prior to Student Teaching

Complete an appropriate, college-level math *and* composition course with a B- or better. Acceptable scores on the ACT, SAT, GRE or Praxis CORE exam will also satisfy the requirement.

Oral Proficiency Interview: Prior to Student Teaching

Pass the ACTFL Oral Proficiency Interview with a score of Intermediate High or better.

Licensure Exam: Prior to Student Teaching

Pass the state-approved licensure exam (at this time, exams are not available for Japanese; please contact the School of Education for more information).

Secondary Latin (7–12) Teacher Licensure Program

Grade Requirements

Secondary Latin teacher licensure candidates must maintain a 2.00 GPA in cumulative, content and education coursework. All grades in Education courses must be a B- or better to maintain good standing in the program. All grades must be a C- or better to satisfy a content coursework requirement.

Content Coursework Requirements

Students must complete at least 30 credits in Latin language and literature courses beyond 1000-level language courses.

Code	Title	Credit Hours
Courses and Minimum Required Credit Hours		
LATN 2114	Intermediate Latin 1	4
LATN 2124	Intermediate Latin 2	4
LATN 3014	Introduction to Latin Prose	3
LATN 3024	Introduction to Latin Poetry	3
Thirty credit hours of Latin coursework above the 1000-level. May include courses from above.		30

Education Course Requirements

Code	Title	Credit Hours
EDUC 3013	School and Society	3
EDUC 4112	Adolescent Development and Learning for Teachers (Includes up to two (2) hours per week of outside-class service learning. May be taken at any time.)	3

EDUC 4125	Secondary World Language Methods (Includes up to five (5) hours per week of school-based practicum. Fall only.)	3
LATN 4824	Latin Teaching Methods: Open Topics	3
or LATN 5824	Latin Teaching Methods: Open Topics	
Total Credit Hours		**15**

Student Teaching

Satisfactory completion of all content and education course requirements is a prerequisite for student teaching. No other courses may be taken during the student teaching semester.

- EDUC 4513 Education and Practice (2 credits).
- EDUC 4712 Student Teaching: Secondary School (10 credits).

Required Tests and Assessments

Basic Skills: Prior to Student Teaching

Complete an appropriate, college-level math *and* composition course with a B- or better. Acceptable scores on the ACT, SAT, GRE or Praxis CORE exam will also satisfy the requirement.

Licensure Exam: Prior to Student Teaching

Pass the state-approved licensure exam, PRAXIS Latin (test code 5601).

Secondary Spanish (7–12) Teacher Licensure Program

Grade Requirements

Secondary Spanish teacher licensure candidates must maintain a 2.00 GPA in cumulative, content and education coursework. All grades in Education courses must be a B- or better to maintain good standing in the program. All grades must be a C- or better to satisfy a content coursework requirement.

Content Coursework Requirements

Students must complete at least 30 credits in Spanish at the 3000-level or above.

Code	Title	Credit Hours
Courses and Minimum Required Credit Hours		
SPAN 3000	Advanced Spanish Language Skills	5
SPAN 3002	Advanced Spanish Conversation	3
SPAN 3050	Spanish Phonology and Phonetics	3
SPAN 3100	Literary and Cultural Analysis in Spanish	3
SPAN 3120	Advanced Spanish Grammar	3
Hispanic Linguistics. Choose one of the following courses:		3
SPAN 3010	Advanced Rhetoric and Composition	
SPAN 4450	Introduction to Hispanic Linguistics	
SPAN 4430	Special Topics in Hispanic Linguistics	

Peninsular Literature. Choose one of the following courses:		3
SPAN 4150	Major Works and Trends in Literature and Culture in Spain Up to 1700	
SPAN 4160	Major Works and Trends in Literature and Culture in Spain: 1700-Present	
Latin American Literature. Choose one of the following courses:		3
SPAN 4170	Major Works/Trends in Literature and Culture in Latin America Up to the 19th Century	
SPAN 4180	Major Works and Trends in Literature and Culture in Latin America: 1900-Present	
Literature. One additional 4000-level course in Spanish or Latin American Literature.		3
Culture & Civilization: Peninsular or Latin American		3
Please contact an education advisor for a list of acceptable courses.		

Education Course Requirements

Code	Title	Credit Hours
EDUC 1001	Humanities Teaching for Equity: Naming	1
EDUC 2001	Humanities Teaching for Equity: Noticing	2
EDUC 3001	Humanities Teaching for Equity: Negotiating	2
EDUC 3013	School and Society	3
EDUC 4112	Adolescent Development and Learning for Teachers (includes up to 2 hours per week of outside-class service learning)	3
EDUC 4125	Secondary World Language Methods (fall only; includes up to 5 hours per week of school-based practicum)	3
EDUC 4023	Differentiating Instruction in Diverse Secondary Classrooms (includes up to 4 hours per week of school-based practicum; should be taken concurrently with SPAN 4650.)	3
SPAN 4650	Methods of Teaching Spanish (should be taken concurrently with SPAN 4023.)	3
Total Credit Hours		**20**

Student Teaching

Satisfactory completion of all content and education course requirements is a prerequisite for student teaching. No other courses may be taken during the student teaching semester.

- EDUC 4513 Education and Practice (2 credits). Must be taken with EDUC 4722 and SPAN 4660.
- EDUC 4722 Student Teaching: Secondary School 2 (5 credits). Must be taken with EDUC 4513 and SPAN 4660.
- SPAN 4660 High School Spanish Teaching (6 credits). Must be taken with EDUC 4513 and EDUC 4722.

Required Tests and Assessments

Basic Skills: Prior to Student Teaching

Complete an appropriate, college-level math *and* composition course with a B- or better. Acceptable scores on the ACT, SAT, GRE or Praxis CORE exam will also satisfy the requirement.

Licensure Exam: Prior to Student Teaching

Pass the state-approved licensure exam, PRAXIS Spanish: World Language (test code 5195).

Secondary Spanish licensure candidates will need to demonstrate content knowledge and Advanced Low communication skills in Spanish on the PRAXIS exam. An additional measure of oral proficiency at the Advanced Low level is the Oral Proficiency Interview (OPI). The faculty advisor in the Spanish Department can provide more information about the benefits of taking the OPI and how to sign up for it.

Learning Outcomes

In their development as teachers for equity and justice who value and center humanistic, anti-oppressive, anti-racist, and queer-inclusive stances and practices, candidates in the CU licensure programs:

- Demonstrate expertise in teaching and learning within and, when relevant, across content domains (e.g., Literacy, STEM Education).
- Demonstrate knowledge of research and practitioner inquiry for evidence-informed teaching and equitable learning experiences within and, when relevant, across content domains.
- Demonstrate knowledge of research, scholarship, principles, and practices for broadening participation among youth, families, and communities in the design of equitable learning opportunities within and, when relevant, across content domains.

Engineering & Applied Science

The College of Engineering and Applied Science has a tradition of excellence in engineering education dating back to 1893, and we continually update and improve our programs to reflect the highest standards in teaching and learning, discovery, innovation, community and culture. Our college is the top-ranked engineering school in the Rocky Mountain region.

Mission & Vision

The College of Engineering & Applied Science's mission is to generate new knowledge in engineering and related fields, and to equip students from diverse backgrounds to become leaders and citizens responsible for the betterment of individuals and society. Our vision is to be a recognized world leader for excellence and innovation in engineering research and education, with an emphasis on inclusive excellence, active learning and global society.

Degrees

The College of Engineering and Applied Science offers Bachelor of Science degrees in:

- Aerospace engineering sciences (p. 842)
- Applied mathematics (p. 854)
- Architectural engineering (p. 900)
- Biological engineering (p. 877)
- Biomedical engineering (p. 865)
- Chemical engineering (p. 880)
- Civil engineering (p. 904)
- Computer science (p. 941)
- Creative technology and design (p. 956)
- Electrical engineering (p. 975)
- Electrical and computer engineering (p. 970)

- Engineering physics (p. 994)
- Environmental engineering (p. 907)
- Integrated design engineering (p. 1003)
- Mechanical engineering (p. 1029)

Along with a Bachelor of Arts degree in Computer Science (p. 937) and a post-baccalaureate Bachelor of Science degree in Applied Computer Science (p. 945).

Accreditation

The CU Boulder campus is accredited by the Higher Learning Commission. Programs accredited by ABET (https://www.abet.org/) can be found on the College of Engineering & Applied Science Accreditation (https://www.colorado.edu/engineering/accreditation/) webpage. The degrees in applied mathematics and engineering physics are offered in cooperation with the Department of Applied Mathematics and Department of Physics in the College of Arts and Sciences.

Professional Registration

Professional registration is recommended for all fields of engineering in order to protect the health, safety and welfare of the public. Registration is required in all states for the legal right to practice professional engineering. Although there are variations in state laws regarding engineering licensure, there is a general four-step process for licensure candidates: earn a degree from an EAC/ABET-accredited engineering program, pass the FE exam, gain acceptable work experience under the supervision of a PE and pass the PE exam. Students typically take the FE exam during their senior year in college.

Areas of Interest

BOLD Center

The BOLD Center (https://www.colorado.edu/engineering/bold/) is part of the College of Engineering and Applied Science's (CEAS) commitment to cultivate community, belonging and a positive educational environment for students. Students are engaged with academic, cultural, social, professional and leadership experiences to enhance their skillsets and preparedness to implement engineering and social solutions in an increasingly complex world. Our scholarship programs and student societies incorporate mentoring and meaningful engagement with alumni and industry partners. BOLD's academic services are central to supporting student success in the CEAS.

Colorado Space Grant Consortium

CU's Space Grant program provides interdisciplinary students with access to space through innovative courses and real-world, hands-on space hardware programs that include short and long-duration, high altitude balloon payloads, sounding rocket payloads and low-Earth orbiting satellite missions. NASA's Colorado Space Grant Consortium (http://spacegrant.colorado.edu) (also known as Space Grant) is part of a national program.

Space Grant students interact with engineers and scientists from NASA and industry to develop, test and fly new space technologies. All missions are entirely student run—including students in the roles of team members, team leads, systems engineers, project managers and mission operators. Students participate in programs that aid them in their future academic courses and careers.

Engineering Connections

Engineering Connections is the residential community for first-year engineering students (https://www.colorado.edu/engineering/engineering-residential-community/), which has staff and faculty dedicated to developing curricular, co-curricular, social and wellness programs just for them. These programs are specifically designed to help engineering and applied science students build the sense of community and belonging they need to succeed—from their first day through graduation day.

Engineering Honors Program

Incoming first-year students are selected to participate in the Engineering Honors Program via an online application process. The Engineering Honors Program (http://www.cuhonorsengineering.com/) (EHP) provides an educational experience that transcends the classroom and matches the unique abilities, needs and ambitions of this select group of students. The program is for students who want to help build an honors culture that cares more about learning than grades; more about maximizing opportunities than meeting minimum requirements; and more about being thoughtful, critical, engaged and intentional than being passively defined by the vague expectations of others. Being part of EHP means belonging to a community that is ambitious without being competitive and committed to a wide range of goals from international development work to graduate school, from research to teaching, and from industry to service. It means living next to students already doing research, returning from summer internships, working with Engineers without Borders and applying to graduate school.

Engineering Leadership Program

The Engineering Leadership Program (https://www.colorado.edu/engineering/academics/engineering-leadership-program/) (ENLP) explores leadership challenges in applied science using liberal arts pedagogy. The program aims to cultivate leaders of curiosity and character, whose technical expertise is enriched through the study of the political, moral and philosophic dilemmas posed by the perpetual advancement of science and technology. The program offers a wide variety of courses on the thought and practice of leadership, many of which utilize primary source texts in history, the philosophy of science, moral philosophy, political science and anthropology. The program's courses (with ENLP course prefix) count for humanities and social sciences credit in the College of Engineering and Applied Science, and most courses are discussion-based seminars. Students with a deep interest in ENLP's curriculum are encouraged to pursue the Engineering Leadership Certificate (https://www.colorado.edu/engineering/academics/engineering-leadership-program/). The program also addresses contemporary concerns in engineering practice. CU engineering alumni and established leaders from engineering industry, business and politics frequently visit ENLP classes to give guest lectures, hold interview sessions and converse with students over informal lunches. The Engineering Leadership Program has also partnered with the Engineering Management Program to offer coursework for ENLP students interested in engineering project management, engineering entrepreneurship and engineering economics.

Global Engineering

In today's global environment, engineers can expect to work in multilingual and multicultural teams and to engage in projects with global impact. It is therefore essential that students develop global engineering competencies alongside their technical skills, and engineering students have numerous pathways to build those competencies. The Global Engineering Residential Academic Program (https://www.colorado.edu/

center/mortenson/residential-academic-program/program/) prepares students for the global marketplace of ideas. The program not only supports students in understanding the global context and their role as engineers through coursework, but also provides a community through which to explore, discuss and apply the concepts of global engineering in their personal and professional lives. Students have direct interaction with faculty, staff, graduate and undergraduate students who are engaging in global engineering research, policy and practice. The program also builds connections with international experts outside of CU Boulder, drawing on the experience of alumni, international research partners and organizations based in the Greater Denver area.

Additional opportunities include engineering study abroad and completing a Global Engineering Minor. For more information, visit the college's International Programs (http://www.colorado.edu/engineering-international/) website.

Herbst Program for Engineering, Ethics & Society

The Herbst Program for Engineering, Ethics & Society (http://www.colorado.edu/herbst/) enriches and broadens the education of engineering students with seminar and lecture courses in literature, philosophy, history, social issues and the arts.

In its two seminars, ENES 1010 and ENES 3100, class time is devoted almost exclusively to roundtable discussion of original texts in literature, philosophy and the fine arts. These seminars have fewer than 14 students, so students can hone their critical thinking skills through reading, discussion and extensive writing. Both of these seminars satisfy the college's writing requirement. Note: ENES 1010 satisfies the writing requirement only when taken in a student's freshman year.

Idea Forge

The Idea Forge (http://www.colorado.edu/ideaforge/) is a flexible, cross-disciplinary collaborative space where students can imagine, design, create and test products and solutions to meet a range of societal and customer needs. The space serves as the home for Design Center Colorado and Catalyze CU. It supports student teams working on invention and innovation as part of courses, as well as design and development driven by entrepreneurial-minded individuals and service-oriented groups. With all these students working side-by-side, the Idea Forge boosts student learning through collaborative, hands-on experience, while supporting industry interaction through scheduled workshops as well as spontaneous exchanges. The mission of the Idea Forge is to enhance interdisciplinary creativity and synergy to develop flexible, adaptable and practical graduates. To do this, the Idea Forge supports design from a variety of perspectives, from the most formal engineering design process to the human-centered design philosophy. By providing students the opportunity to design, build and test their concepts, the Idea Forge builds creative confidence and promotes the formation of strong professional skills.

The Idea Forge boasts a variety of flexible spaces to achieve its mission and to fit individual student needs. These spaces fit into three categories: fabrication shops, project space and community space. The fabrication shops provide students with the tools and equipment needed for prototyping through machining, welding, 3D printing, laser cutting, woodworking and sewing with an additional emphasis on electronics and micro-controllers. Students learn safe, efficient use of the tools and equipment through action, by taking workshops or tackling a project. Project spaces fill the Idea Forge – students are able to find their nearest wood-topped workbench to assemble their design. The central Idea Forge Commons, an inspiring environment for teamwork and brainstorming, doubles as a project space and a community space. Just off the Commons, the Thinking Lounge community space provides students with a comfortable place to take a break. Additional community space consists of two impressive conference rooms, which are perfect for meetings with industry and community members.

Integrated Teaching and Learning Program

The Integrated Teaching and Learning (ITL) program (http://itll.colorado.edu) provides K–16 engineering education initiatives aimed at supporting the teaching and learning of hands-on, minds-on engineering curriculum so that students of all ages can imagine a future in engineering. With a focus on engineering design, undergraduate engineering students have the ability to create what they dream via modern manufacturing and electronics capabilities—reinforced through innovative engineering courses, as well as through time set aside for the creation of personal projects to expand one's creative thinking.

Through ITL Program skill-building workshops on tools, machining, soldering, circuits, strain gauges, laser cutters, Arduino microcontrollers, LabVIEW, SolidWorks, spatial visualization and more, students become comfortable with the resources that help them do the engineering that impacts everyday life. The multidisciplinary, hands-on ITL Laboratory features two open and interactive laboratory plazas that support inquiry-based experimentation, data acquisition and analysis capability. The laboratory also hosts design studios, team work areas, active learning spaces—all designed to be used by all disciplines of CU engineering students as they do engineering.

ProReady

The ProReady (https://www.colorado.edu/engineering/proready/) initiative is designed to prepare College of Engineering & Applied Science students for professional readiness and career success in their chosen field. The ProReady formula helps students: chart their career path, gain relevant experience and grow their professional network. Career exploration and preparation, internships, undergraduate research, study abroad, student organization leadership, graduate school preparation and more are all part of being ProReady!

Policies & Requirements

Admission

First-Year Applicants

When students apply to the College of Engineering and Applied Science from high school, they may apply to enter the college as "open option" (unsure of engineering major), or they may apply to a specific engineering major. Students may declare, change, or add a major (https://www.colorado.edu/engineering-advising/get-your-degree/first-year-freshmen/changing-your-major-or-adding-major/) by following the procedure on the College website.

Specific admission requirements are detailed in the Admissions (p. 29) section of this catalog. Contact the campus Admissions Office (http://www.colorado.edu/admissions/) for more information.

Transfer Students

Students desiring to transfer (http://www.colorado.edu/engineering/future-students/transferring-cu/) from other accredited collegiate institutions are considered for admission on an individual basis. Transfer students must be admitted to the college prior to the last 45 credit hours

of their degree program. Admission criteria for students from other CU campuses are the same as for other transfer students.

Intra-University Transfer Students

Intra-University Transfers (IUTs) (https://www.colorado.edu/engineering-advising/transfer-within-cu/) on the Boulder campus to the College of Engineering and Applied Science are considered on designated criteria.

Former Students

Former students may readmit to the university (https://www.colorado.edu/admissions/process/readmit/). Courses taken at other collegiate institutions may or may not be a determining factor in the student's readmission to CU Boulder, but transcripts on all such work must be submitted.

Interruption of studies may require completion of current degree work in addition to repetition of coursework for new degree requirements.

A former student returning to the college after a break in attendance must have coursework reevaluated by the student's major department/program if it is older than 10 years from the date of their return.

Academic Excellence

Dean's List

An undergraduate student in the College of Engineering and Applied Science who completes at least 12 credit hours of coursework for a letter grade during the fall or spring semester on the Boulder campus, and who earns a semester grade point average (GPA) of at least 3.600, will be designated as making the college dean's list for that semester. An actual list of students is not published, but the notation of "Dean's List" is placed on the student's transcript and is viewable at the end of the semester in which the designation is earned.

Honors at Graduation

Undergraduate students my be eligible for honors designations at graduation (http://www.colorado.edu/engineering-advising/get-your-degree/graduation/honors-graduation/).

Engineering Scholarships

Undergraduate engineering scholarships (http://www.colorado.edu/engineering/future-students/financial-aid-scholarships/) are provided by public funds and private donations by alumni, corporations and friends of the college. In some cases, endowments have been established; other scholarships are based on annual gifts. Some companies provide matching funds for gifts from their employees who are alumni.

Anyone interested in providing an undergraduate scholarship or contributing to the scholarship fund may contact:

Engineering Advancement
University of Colorado Boulder
422 UCB
Boulder, CO 80309-0422
303-492-7899

Academic Standards

Academic Policies

Students in the College of Engineering and Applied Science must abide by all college policies and procedures as outlined on the college's Student Support & Advising Services (http://www.colorado.edu/engineering-advising/) website, such as Academic Expectations and Policies (http://www.colorado.edu/engineering-advising/get-your-degree/academic-expectations-policies/). Students should refer to these webpages often since policies, procedures and forms may be updated throughout the academic year.

Petition Policy

A student desiring a waiver of college or department/program policies must request and secure approval for this waiver through a petition procedure. Petitions (http://www.colorado.edu/engineering-advising/forms/) are first presented to the student's major department/program for review, followed by review at the dean's office if applicable. It is the student's responsibility to obtain official notification of the final petition decision from the major department, program and/or dean's office.

Academic Integrity

Students in the College of Engineering and Applied Science are required to pass an annual Academic Integrity Quiz. See also the campus wide Honor Code (https://www.colorado.edu/sccr/students/honor-code-and-student-code-conduct/) website.

Academic Standing

University Academic Standing policies (p. 28) apply to all degree-seeking undergraduate students at CU Boulder. More details regarding good academic standing, academic alert, academic warning, academic suspension, and academic dismissal are available on the Office of the Registrar's website (https://www.colorado.edu/registrar/students/your-information-records/academic-standing/).

Credit and Enrollment

Attendance

Successful work in the College of Engineering and Applied Science is dependent upon regular attendance in all classes. Students may be administratively dropped from classes for any non-attendance during the first few weeks of the semester. Students who are unavoidably absent should make arrangements with instructors to make up the work missed. Non-attendance does not constitute withdrawal from a class. If students stop attending a class in which they are formally enrolled, they are likely to receive a failing grade (F).

Registration and Enrollment

To ensure the prompt completion of degree requirements and satisfaction of the four-year guarantee, the undergraduate student is expected to register for, and complete each semester, a full-time course load as outlined in the relevant major department/program curriculum. Part-time enrollment (less than 12 credit hours) will negatively impact the student's financial aid and scholarships, and is likely to negatively impact student health insurance, on-campus housing and the four-year graduation guarantee. Students must also petition to be enrolled in more than 19 credit hours in any given semester. New students in their first semester at CU Boulder are limited to 17 credit hours.

Add and Drop Policies

See the Office of the Registrar website (https://www.colorado.edu/registrar/students/registration/register/) for campuswide add and drop policies, and specific deadline dates for a given semester/term. See Late Drops (https://www.colorado.edu/engineering-advising/get-your-degree/academic-expectations-policies/) for eligibility to drop a class after the 10th week semester deadline but before the last day of classes.

Withdrawal from the University

Withdrawal is the term used when a student wishes to drop all classes in a given semester/term. See the the Office of the Registrar website (https://www.colorado.edu/registrar/students/withdraw/) for campus-wide withdrawal deadlines and procedures, along with withdrawals (https://www.colorado.edu/engineering-advising/get-your-degree/academic-expectations-policies/) on the college website. Students who interrupt their course of study may be required to complete all current degree requirements and to repeat courses previously completed.

Sequence of Courses

Students are expected to follow the curriculum recommended by their major department/program. All courses are not necessarily offered each semester. According to college policy, undergraduate courses having an enrollment of fewer than 20 students may be cancelled. Students can minimize scheduling problems by closely following the curricular sequence recommended by their major department/program. If a course is unavailable, a student may petition to enroll for equivalent study.

Prerequisites and Passing Grades

The minimum passing grade for a course that is considered a prerequisite for another course is C-, allowing a student to progress through the curriculum and apply these courses towards degree requirements. If the minimum required grade in a prerequisite course is not achieved, the student is required to repeat the course until the minimum acceptable grade has been earned (maximum of 3 graded attempts total to master the subject content at the required level). If a student takes the advanced (post-requisite) course, it does not remove the obligation to meet the prerequisite course minimum grade requirement, even if the grade earned in the advanced course is acceptable.

In general, the minimum passing grade for a course that is not specifically a prerequisite for another required course is D-. However, individual degree programs in the College may require higher minimum grades for specific terminal courses in their curricula.

Academic departments and programs reserve the right to drop students enrolled in their courses who have not met the minimum prerequisite requirement. It is the student's responsibility to communicate with their major department/program if summer coursework and/or transfer credit will be used to meet the prerequisite requirement.

Repeating Courses

A student is permitted a maximum of three graded attempts to demonstrate sufficient proficiency in a particular subject area (such as Calculus 1, Physics 2, etc.), including attempts at CU Boulder or other collegiate institutions. A "W" is not considered an attempt towards demonstrating sufficient proficiency. After the third unsuccessful attempt, a student may not be able to retake the course or substitute it with a course in the same subject area from CU Boulder or another institution.

The College will apply the grade a student earned in their most recent course attempt to determine if the student meets the grade required for a pre-requisite course. If a student has already earned AP, IB or transfer college credit for a course, the letter grade from a subsequent attempt of the class through CU Boulder will become part of the student's CU cumulative GPA. Students cannot retroactively claim AP or earlier earned credit for a course after a subsequent unsuccessful attempt of the class.

Grade Replacement

Students may also retake a course for grade replacement (https://www.colorado.edu/registrar/students/degree-planning/grade-replacement/) under the grade replacement policy. When a student retakes a course for grade replacement, the grade earned in the most recent prior attempt will still appear on the transcript, but their cumulative GPA and credit totals on the transcript will only include the grade from the latest attempt.

Incompletes

Incomplete grades are given only when students, for documented reasons beyond their control, are unable to complete course requirements. A substantial amount of work must have been satisfactorily completed before approval for such a grade is given. An Incomplete Grade Record Form (https://www.colorado.edu/engineering-advising/forms/) must be completed by the instructor and student. In addition to reflecting the course and term taught, it also states what work must be completed to award the final grade and when the work must be finished (not to exceed one year). Incomplete grades are not calculated into the GPA. If a student does not complete a course assigned an Incomplete grade within one year, the Incomplete grade will automatically convert to an F grade. Students cannot repeat an equivalent course at another campus of the university or at another institution and expect the CU Boulder grade of “I” to be removed, changed or excluded from conversion to an F. A student is expected to complete any course with an “I” grade and not to re-enroll in a course in which a grade of “I” was awarded. Once the work has been completed, the instructor completes an online grade change from "I" to the final earned grade. However, it is the student's responsibility to verify that the grade change was processed and is reflected properly on the transcript.

Final Grade Appeal

If a student (rostered in any college/school on campus) wishes to appeal the final grade in a course offered by a College of Engineering and Applied Science academic unit, refer to the college’s official grade appeal policy and procedures (http://www.colorado.edu/p17ac5aa8dc5/rules-policies/grade-appeal-policy/).

Credit Policies

Advanced Placement (AP)

College credit may be granted on the basis of scores earned on the College Board's Advanced Placement (AP) exams. See the Advanced Placement (AP) Credit table (p. 37) for additional details.

International Baccalaureate (IB)

College credit may be granted on the basis of International Baccalaureate (IB) program exam scores. See the International Baccalaureate (IB) Credit table (p. 40) for additional details.

College-Level Examination Program Credit

College credit may be granted for select College-Level Examination Program (CLEP) examinations. See the list of eligible CLEP exams (p. 44) for more information.

Credit for Reserve Officers Training Corps (ROTC)

Up to 6 credit hours of approved ROTC courses may be counted toward a student's degree requirements in the humanities/social sciences. These approved courses may be found at the Humanities, Social Sciences and Writing Requirements (https://www.colorado.edu/engineering-advising/get-your-degree/degree-requirements/humanities-social-sciences-and-writing-requirements/) webpage. With written approval from the student's

major department/program, additional ROTC credit hours may be applied as free electives and/or technical professional electives.

No Credit Restrictions

In the College of Engineering and Applied Science, courses required for fulfillment of graduation requirements *cannot be taken for no credit (NC)*. Once a course has been taken for no credit, the course cannot be repeated for credit. Engineering students must be approved by the College after making a request of the Office of the Registrar to enroll in any course NC.

Pass/Fail Option

The primary purpose for offering courses on a pass/fail grading option is to encourage students to broaden their educational experience by selecting elective courses with this grade option without serious risk to their academic record. See Pass/Fail (https://www.colorado.edu/engineering-advising/get-your-degree/academic-expectations-policies/) policy for details.

Transfer Credit

After a prospective transfer student has been admitted, the Office of Admissions issues a transfer credit evaluation listing those courses acceptable for transfer by University of Colorado Boulder standards. A copy of this evaluation is made a part of the student's college record. The student's major department/program will then indicate which of those courses are acceptable in meeting engineering degree requirements. It is the responsibility of the transfer student to request final validation of the transfer credit hours by the major department/program and confirm that this validation is noted in the student's record. *Note*: if a student changes major, the new major department/program will reassess how the transfer credit applies toward the new degree program.

If at any time a student wishes to have a course not previously accepted reconsidered for transfer, the student should consult with the faculty transfer credit evaluator in the relevant academic department/program.

Nontransferable Credit Hours

Students desiring to transfer credit hours from engineering technology programs should note that such credit hours are accepted only upon submission of evidence that the work involved was fully equivalent to that offered in this college.

Some technology courses are taught with titles and textbooks identical to those in similar engineering courses. These courses may still not be equivalent to engineering courses because the areas of academic emphasis are divergent.

In order to assist engineering technology students with transfer problems, the following guidelines have been established:

1. Courses on basic subjects such as mathematics, physics, foreign languages, literature or history may be acceptable for transfer credit if they were taught as part of an accredited program for all students and were not specifically designated for technology students.
2. Students who have taken courses with technology designations that may be valid equivalents for engineering courses have these options:
   - They may petition for permission to waive the course requirement. The course requirement can be waived if students demonstrate that, by previous coursework, individual study or work experience, they have acquired the background and training normally provided by the course. No credit is given for a waived course, but students may benefit from the waiver by being able to include more advanced work in their curriculum. A student will need to substitute an equivalent number of credit hours (approval by major department/program and college required). Other students may profit by repeating the course at this college and thus establishing a fully sound basis for what follows.
   - The appropriate University of Colorado Boulder academic department may recommend to the dean's office that credit be transferred to count toward the requirements for a related course in its curriculum. Credit cannot be given for vocational/technical or remedial courses under rules of the university.
   - The student may seek credit for the course by examination, if available, and the student pays the appropriate fee.

For more information on transfer of credit policies, see Transfer of College-Level Credit (p. 48) in the Admission section of this catalog.

Requirements

Academic Advising

Students are advised by professional staff advisors (https://www.colorado.edu/engineering-advising/people/) and faculty mentors from their respective major department/program, typically at least once a semester. Students use Buff Portal Advising (https://www.colorado.edu/buffportaladvising/) to communicate with professional academic advisors, schedule appointments, explore majors, etc.

Premedical Option

Students interested in meeting requirements for entry into medical or other health professions schools while earning a degree in engineering should consult with a pre-health advisor (https://www.colorado.edu/programs/prehealth-advising/). Students should also discuss their plans with their primary academic advisor, since some of the required coursework may fulfill electives in their engineering curriculum.

Four-Year Graduation Guarantee

For academically prepared freshmen who do not wish to extend their studies beyond eight semesters, the University of Colorado extends a guarantee (http://www.colorado.edu/engineering-advising/get-your-degree/graduation/four-year-graduation-guarantee/) that required or essential courses, or acceptable alternative courses, will be available to allow each student to complete all coursework required for a baccalaureate degree from the College of Engineering and Applied Science no later than the end of eight consecutive semesters of full-time enrollment. In the event the University of Colorado is not successful in meeting the terms of this guarantee, the university will reimburse the student all tuition and course fees for those courses remaining to successfully complete the previously designated bachelor of science degree.

Degree and Graduation Requirements

To be eligible for any of the baccalaureate degrees from the College of Engineering and Applied Science, students must meet graduation requirements (http://www.colorado.edu/engineering-advising/get-your-degree/graduation-requirements/). Students should run an online degree audit and meet with their academic advisor to discuss progress towards degree requirements, and then when appropriate, apply for graduation in Buff Portal (https://buffportal.colorado.edu/) according to timelines provided by the college and the Office of the Registrar.

Dual Degrees

A student in the College of Engineering and Applied Science may be able to obtain two degrees in engineering, or obtain one degree in engineering and obtain one in another field, such as business, music or one of the

arts and sciences disciplines. Full degree requirements must be met for each degree program. Students should apply to graduate from both degree programs for the same term (the same graduation date is required for both degrees and the student must submit a separate graduation application for each degree program).

BAM (Bachelor's–Accelerated Master's) Degree Programs in Engineering

The Bachelor's–Accelerated Master's (BAM) program (https://www.colorado.edu/registrar/students/degree-planning/bam-program/) offers currently enrolled CU Boulder undergraduate students the opportunity to receive a bachelor's and master's degree in a shorter period of time. Students receive the bachelor's degree first, but begin taking graduate coursework as undergraduates, typically in their senior year. Because some courses are allowed to double count for both the bachelor's and the master's degrees, students receive a master's degree in less time and at a lower cost than if they were to enroll in a stand-alone master's degree program after completion of their baccalaureate degree. In addition, staying at CU Boulder to pursue a bachelor's–accelerated master's program enables students to continue working with their established faculty mentors.

Students with strong academic records who plan to continue in the Graduate School usually find it advantageous to apply for admission to a BAM degree program. Application is made to the Graduate School through the appropriate academic department. Application and admission may occur as early as the junior year; consult individual departments for their exact timing. The College of Engineering and Applied Science requires a minimum GPA of 3.000 for admission to this program; some departments may have higher requirements. Requirements for the two degrees are the same as those for two degrees taken separately: 128 credit hours for the BS degree (fewer credit hours for the BA in Computer Science or post-baccalaureate degree programs); plus 30 credit hours including 4–6 thesis hours (Plan I) or 30 credit hours (Plan II) for the MS degree. In some departments, up to 6 hours of graduate coursework may be applied to the undergraduate degree.

For additional details on this program, contact the appropriate engineering academic department/program or the Graduate School.

Programs of Study

Aerospace Engineering Sciences

Aerospace engineering sciences prepares students for successful and rewarding careers in aerospace and other high-tech industries, national research laboratories, government services and academia. This program provides students unique opportunities to develop in-depth technical knowledge, effective communication skills and a systems engineering perspective that enables them to develop creative solutions to complex problems. The curriculum encompasses core aerospace engineering subjects including fluid dynamics, thermodynamics, materials and structures, dynamical systems, orbital mechanics, air and space vehicle design with multidisciplinary applications including bioastronautics, unmanned systems, remote sensing and GPS.

The mission of the Ann and H.J. Smead Department of Aerospace Engineering Sciences (https://www.colorado.edu/aerospace/) is to provide students the highest quality education in aerospace engineering sciences, emphasizing hands-on learning, and to conduct fundamental, applied and interdisciplinary research to meet societal needs through analysis, design and implementation of aerospace systems, leveraging synergies between aerospace engineering and related sciences.

The department is uniquely characterized by:

- Blending aeronautics, astronautics and science applications.
- Providing an undergraduate experience characterized by rigorous preparation in mathematics and engineering sciences, a hands-on experiential approach to learning and an extensive emphasis on design in a systems context.
- Emphasizing our graduate education and research programs in the forefront of aerospace fundamentals, technology development, and integration of engineering and science activities to solve critical problems in the earth and space sciences.
- Creating graduates who are broadly educated, interdisciplinary, agile, team-oriented engineers and scientists, with end-to-end mission and systems perspectives.

Course code for this program is ASEN.

Bachelor's Degree

- Aerospace Engineering Sciences - Bachelor of Science (BSAE) (p. 842)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Ahmed, Nisar R. (https://experts.colorado.edu/display/fisid_153237/)
Associate Professor, Director; PhD, Cornell University

Akos, Dennis M. (https://experts.colorado.edu/display/fisid_131119/)
Professor; PhD, Ohio University

Ali, Hisham (https://experts.colorado.edu/display/fisid_168718/)
Assistant Professor; PhD, Georgia Institute of Technology

Argrow, Brian M. (https://experts.colorado.edu/display/fisid_102860/)
Distinguished Professor, Director, Endowed/Named Professor; PhD, University of Oklahoma

Arquilla, Katya (https://experts.colorado.edu/display/fisid_173943/)
Assistant Professor; PhD, University of Colorado

Arya, Vischala (https://experts.colorado.edu/display/fisid_176850/)
Assistant Professor; PhD, Texas AM University

Axelrad, Penina (https://experts.colorado.edu/display/fisid_100792/)
Distinguished Professor, Endowed/Named Professor; PhD, Stanford University

Bosanac, Natasha (https://experts.colorado.edu/display/fisid_158199/)
Assistant Professor; PhD, Purdue University

Boyd, Iain (https://experts.colorado.edu/display/fisid_165828/)
Professor, Director, Endowed/Named Professor; PhD, University of Southampton (England)

Brasseur, James G. (https://experts.colorado.edu/display/fisid_156801/)
Research Professor; PhD, Stanford University

Chu, Xinzhao (https://experts.colorado.edu/display/fisid_141893/)
Professor; PhD, Peking University (China)

Clark, Torin K. (https://experts.colorado.edu/display/fisid_155959/)
Associate Professor, Associate Chair; PhD, Massachusetts Institute of Technology

Culp, Robert D.
Professor Emeritus; PhD, University of Colorado Boulder

Doostan, Alireza (https://experts.colorado.edu/display/fisid_147382/)
Professor, Faculty Fellow; PhD, Johns Hopkins University

Emery, William J. (https://experts.colorado.edu/display/fisid_106038/)
Professor Emeritus; PhD, University of Hawaii

Evans, John A. (https://experts.colorado.edu/display/fisid_152970/)
Associate Professor, Associate Chair, Faculty Fellow; PhD, University of Texas at Austin

Farnsworth, John A. (https://experts.colorado.edu/display/fisid_153255/)
Associate Professor; PhD, Rensselaer Polytechnic Institute

Felippa, Carlos A. (https://experts.colorado.edu/display/fisid_105701/)
Professor Emeritus; PhD, University of California, Berkeley

Forbes, Jeffrey M. (https://experts.colorado.edu/display/fisid_100264/)
Professor Emeritus; PhD, Harvard University

Frew, Eric W. (https://experts.colorado.edu/display/fisid_134685/)
Professor; PhD, Stanford University

Gerren, Donna S. (https://experts.colorado.edu/display/fisid_108563/)
Teaching Professor Emerita; PhD, University of Kansas

Ghobadi-Far, Khosro (https://experts.colorado.edu/display/fisid_174031/)
Assistant Professor; PhD, University of Newcastle

Glusman, F. Jeff (https://experts.colorado.edu/display/fisid_172040/)
Assistant Teaching Professor; PhD, University of Colorado Boulder

Gremban, Keith (https://experts.colorado.edu/display/fisid_166519/)
Research Professor; PhD, Carnegie Mellon University

Hayman, Allison P. (https://experts.colorado.edu/display/fisid_156275/)
Associate Professor; PhD, Massachusetts Institute of Technology

Hodgkinson, Robert F. (https://experts.colorado.edu/display/fisid_153274/)
Associate Teaching Professor; MS, University of Colorado Boulder

Hoke, Charles (https://experts.colorado.edu/display/fisid_175280/)
Associate Teaching Professor; PhD, University of New South Whales

Holzinger, Marcus J. (https://experts.colorado.edu/display/fisid_164054/)
Professor, Endowed/Named Professor; PhD, University of Colorado Boulder

Hussein, Mahmoud I. (https://experts.colorado.edu/display/fisid_144300/)
Professor, Endowed/Named Professor; PhD, University of Michigan Ann Arbor

Jansen, Kenneth E. (https://experts.colorado.edu/display/fisid_147360/)
Professor, Endowed/Named Professor; PhD, Stanford University

Kantha, Lakshmi H. (https://experts.colorado.edu/display/fisid_100231/)
Professor Emeritus; PhD, Massachusetts Institute of Technology

Khan, Alia (https://experts.colorado.edu/display/fisid_158495/)
Associate Professor; PhD, University of Colorado Boulder

Klaus, David M. (https://experts.colorado.edu/display/fisid_107103/)
Professor Emeritus; PhD, University of Colorado Boulder

Knipp, Delores Jane (https://experts.colorado.edu/display/fisid_147655/)
Research Professor; PhD, University of California, Los Angeles

Knudsen, Erik (https://experts.colorado.edu/display/fisid_172046/)
Associate Teaching Professor; PhD, University of Florida

Koster, Jean N.
Professor Emeritus; PhD, Karlsruher Institut für Technologie (Germany)

Lahijanian, Morteza Mehdi (https://experts.colorado.edu/display/fisid_164179/)
Assistant Professor; PhD, Boston University

Larson, Kristine M.
Professor Emerita; PhD, Scripps Institution of Oceanography

Lawrence, Dale A. (https://experts.colorado.edu/display/fisid_104057/)
Professor Emeritus; PhD, Cornell University

Le Moine, Alexandra (https://experts.colorado.edu/display/fisid_168419/)
Assistant Teaching Professor; MS, University of Wisconsin

Leben, Robert R.
Research Professor Emeritus; PhD, University of Colorado Boulder

Li, Xinlin (https://experts.colorado.edu/display/fisid_100016/)
Professor; PhD, Dartmouth College

Lopez Jimenez, Francisco (https://experts.colorado.edu/display/fisid_157867/)
Assistant Professor; PhD, California Institute of Technology

Macdonald, Robyn (https://experts.colorado.edu/display/fisid_165823/)
Assistant Professor; PhD, University of Illinois at Urbana-Champaign

Mah, John K. (https://experts.colorado.edu/display/fisid_164214/)
Associate Teaching Professor; MS, Stanford University

Marshall, David B. (https://experts.colorado.edu/display/fisid_158629/)
Research Professor; PhD, Monash University (Australia)

Marshall, Robert A. (https://experts.colorado.edu/display/fisid_155957/)
Associate Professor, Associate Chair; PhD, Stanford University

Maslanik, James
Research Professor Emeritus

Matsuo, Tomoko (https://experts.colorado.edu/display/fisid_145041/)
Associate Professor, Faculty Fellow; PhD, SUNY at Stony Brook

Maute, Kurt (https://experts.colorado.edu/display/fisid_113875/)
Professor, Associate Dean, Endowed/Named Professor; PhD, University of Stuttgart (Germany)

McMahon, Jay W. (https://experts.colorado.edu/display/fisid_150062/)
Associate Professor, Faculty Fellow; PhD, University of Colorado Boulder

Minton, Timothy K. (https://experts.colorado.edu/display/fisid_167230/)
Professor; PhD, University of California Berkeley

Morton, Yu Jade (https://experts.colorado.edu/display/fisid_159076/)
Professor, Endowed/Named Professor; PhD, The Pennsylvania State University

Nabity, James A. (https://experts.colorado.edu/display/fisid_153102/)
Associate Professor, Associate Chair; PhD, University of Colorado Boulder

Neogi, Sanghamitra (https://experts.colorado.edu/display/fisid_156773/)
Associate Professor; PhD, Pennsylvania State University

Nerem, R. Steven (https://experts.colorado.edu/display/fisid_118478/)
Professor, Director; PhD, University of Texas at Austin

Niederwieser, Tobias (https://experts.colorado.edu/display/fisid_164789/)
Assistant Research Professor; PhD, University of Colorado Boulder

Palo, Scott E. (https://experts.colorado.edu/display/fisid_109033/)
Professor, Endowed/Named Professor; PhD, University of Colorado Boulder

Park, Kwang-Chun
Professor Emeritus; PhD, Clarkson College

Peters, Sean (https://experts.colorado.edu/display/fisid_174034/)
Assistant Professor; PhD, Stanford University

Rafi, Melvin
Assistant Teaching Professor; PhD, Wichita State University

Rhode, Matthew (https://experts.colorado.edu/display/fisid_165079/)
Assistant Teaching Professor; BS, University of Colorado

Schaub, Hanspeter (https://experts.colorado.edu/display/fisid_143818/)
Distinguished Professor, Endowed/Named Professor, Chair; PhD, Texas A&M University

Scheeres, Daniel J. (https://experts.colorado.edu/display/fisid_145035/)
Distinguished Professor, Endowed/Named Professor; PhD, University of Michigan Ann Arbor

Schwartz, Trudy L. (https://experts.colorado.edu/display/fisid_108607/)
Teaching Professor, Associate Chair; MS, University of Colorado Boulder

Shakiba, Maryam (https://experts.colorado.edu/display/fisid_172206/)
Assistant Professor; PhD, Texas AM University

Sirangelo, Mark (https://experts.colorado.edu/individual/fisid_164135/)
Entrepreneur in Residence; JD, Seton Hall University

Sternovsky, Zoltan (https://experts.colorado.edu/display/fisid_115211/)
Professor; PhD, Charles University (Czech Republic)

Stodieck, Louis S. (https://experts.colorado.edu/display/fisid_105272/)
Research Professor; PhD, University of Colorado Boulder

Sunberg, Zachary (https://experts.colorado.edu/individual/fisid_165833/)
Assistant Professor; PhD, Stanford University

Thayer, Jeffrey P. (https://experts.colorado.edu/display/fisid_134469/)
Professor Emeritus, Research Professor, Director; PhD, University of Michigan Ann Arbor

Williams, Christopher (https://experts.colorado.edu/display/fisid_105765/)
Research Professor; PhD, University of Colorado Boulder

Wingate, Kathryn (https://experts.colorado.edu/display/fisid_164029/)
Associate Teaching Professor; PhD, University of Colorado Boulder

ASEN 1000 (1) Introduction to Aerospace Engineering Sciences
Introduces aerospace history, curriculum, ethics, and the many areas of emphasis within aerospace engineering. Academic and industry speakers are invited to address various aerospace topics.
Requisites: Restricted to students with 0-26 credits (Freshmen) Aerospace Engineering (ASEN) or Engineering Open Option majors only.
Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 1009 (1) Undergraduate Aerospace Seminar
Introduce aerospace undergraduate students to world-class aerospace researchers and technical, policy, and/or current events topics.
Repeatable: Repeatable for up to 2.00 total credit hours.
Requisites: Restricted to Undergraduate Aerospace (ASEN-BSAE) or Undergraduate Engineering Open Option majors only.

ASEN 1022 (3) Materials Science for Aerospace Engineers
Covers prerequisite chemistry topics for materials science and introduces material types, properties and behavior for aerospace engineers. Topics include review of chemistry; atomic bonding; crystals; diffusion; mechanical/thermal properties; phase diagrams; heat treatment; failure mechanisms; materials selection; and a general introduction to modern materials for aerospace engineering applications including composites and materials with engineered properties. Lab project or tensile testing is included.
Requisites: Requires pre/co-reqs APPM 1350 or MATH 1300 or APPM 1340 or APPM 1345 ASEN 1320 or CHEN 1310 or CSCI 1300 or CSCI 1310 or CSCI 1320 or ECEN 1310 (all min grade C-). Restricted to ASEN mjs, IDEN-BSIDE mjrs w/ Aero emphasis, IUT On Track students.
Additional Information: Departmental Category: Structures, Materials, and Structural Dynamics

ASEN 1030 (3) Introduction to Computing for Aerospace Engineering
Develop a foundational understanding of computational thinking required to approach engineering challenges with systematic problem-solving skills. By the end of this class, students will be able to apply computational thinking principles to design, implement, and debug programs using a high-level programming language. Additionally, students will demonstrate proficiency in fundamental programming concepts, including variables, control structures, arrays, and functions, while also showcasing the ability to analyze problems, decompose them into smaller tasks, and devise algorithmic solutions.
Requisites: Requires a prerequisite or corequisite course APPM 1340 or APPM 1345 or APPM 1350 or MATH 1300 or MATH 1310 (all minimum grade C-). Restricted to College of Engineering majors IUT On Track applicants.

ASEN 1400 (3) Gateway to Space
Introduces the basics of atmosphere and space sciences, space exploration, spacecraft design, rocketry and orbits. Students design, build, and launch a miniature satellite on a high altitude balloon. Explores the current research in space through lectures from industry.
Equivalent - Duplicate Degree Credit Not Granted: ASTR 2500, GEEN 1400, ASEN 1403 and ECEN 1400
Requisites: Restricted to College of Engineering students with 75 credit hours or less completed.
Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 1403 (3) Introduction to Rocket Engineering
Introduces students to the engineering profession through completion of a team-based project. Students design, build, and static test-fire a liquid-solid hybrid rocket motor. Topics explored include: pressure vessels, combustion, ideal fluid behavior, systems engineering, data acquisition, and model verification. Learned skills will include technical writing, teamwork, computer modelling and analysis tools, 3D printing and prototyping technologies.
Equivalent - Duplicate Degree Credit Not Granted: ASTR 2500, GEEN 1400, ASEN 1400 and ECEN 1400
Requisites: Restricted to College of Engineering students with 75 credits or less completed.

ASEN 1969 (3) Pathway to Space
Explore the many paths one can take to be a part of a space-related career in a unique, engaging and interactive course. Students will learn about the following topics: space science and exploration, human spaceflight and life sciences, aeronautics and near space, launch and spacecraft systems, climate and environment, space business, policy and politics, space arts, media, and history.
Additional Information: Departmental Category: Specialized Courses

ASEN 2012 (2) Experimental and Computational Methods in Aerospace Engineering Sciences
Introduces statistical, experimental, and computational methods used in aerospace engineering sciences. Usage of MatLab is extensive.
Requisites: Requires prereqs ASEN 1320 or CSCI 1300 or CHEN 1310 or ECEN 1310 PHYS 1110 (all min grade C-). Requires pre/co-req APPM 2360 or MATH 2130 MATH 3430 (min grade C-). Restricted to ASEN mjrs, IDEN-BSIDE mjrs w Aero emphasis, IUT On Track students.
Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 2401 (3) Statics
Introduces applied vector mechanics with an emphasis on static equilibrium. Focuses on vectors, free body diagrams, and static equilibrium in 2D and 3D. Covers analysis of trusses, frames, and machines. Examines internal forces in structures and the development of shear and bending moment diagrams.
Requisites: Requires prerequisite courses APPM 1360 or MATH 2300 and PHYS 1110 (all minimum grade C-).

ASEN 2402 (3) Thermodynamics
Introduces the fundamental concepts and principles of thermodynamics with an emphasis on understanding how these basic physical principles can be used to solve numerical problems. Covers the properties of pure substances, control volume analysis, first law of thermodynamics, ideal gas law, second law of thermodynamics, and thermodynamic cycles. Synthesizes as a primary goal basic science (physics) and mathematics for the analysis and design of thermodynamic systems.
Requisites: Requires prerequisite courses APPM 1360 or MATH 2300 and PHYS 1110 (all minimum grade C-).
Recommended: Corequisites MCEN 1024 or CHEN 1201 or CHEN 1211 or CHEM 1113 or CHEM 1400.

ASEN 2403 (3) Dynamics
Provides students with essential concepts in dynamics, serving as a prerequisite for advanced courses that build upon these foundational principles, including those focused on the dynamics and control of air and space vehicles.¿
Requisites: Requires prerequisite courses ASEN 1030 or ASEN 1320 or CSCI 1300 or CHEN 1310 or ECEN 1310 and ASEN 2401 or MCEN 2023 or CVEN 2121 or GEEN 2851 (all minimum grade C-). Requires corequisites APPM 2360 or MATH 2130 and MATH 3430.

ASEN 2501 (3) Introduction to Astronautics
Introduces spacecraft mission topics such as orbital mechanics, spacecraft design, rocket propulsion, communications, remote sensing, and the space environment. Utilizes active and problem-based learning techniques to expose students to the space industry.
Requisites: Requires prerequisite courses ASEN 1030 or ASEN 1320 or CSCI 1300 or CHEN 1310 or ECEN 1310 and APPM 1360 or MATH 2300 and PHYS 1110 (all minimum grade C-).

ASEN 2502 (3) Introduction to Aeronautics
Introduces theory and methods for the design and performance analysis of aeronautical vehicles with a focus on fixed wing aircraft. Emphasizes systems engineering aspects, touching upon relevant subdisciplines including: the standard atmosphere and air transport environment, aerodynamics, propulsion, stability and control, and structural dynamics. Incorporates hands-on laboratory and design components throughout the semester.
Requisites: Requires prerequisite courses ASEN 1030 or ASEN 1320 or CSCI 1300 or CHEN 1310 or ECEN 1310 and APPM 1360 or MATH 2300 and PHYS 1110 (all minimum grade C-).

ASEN 2519 (1-3) Special Topics
Studies specialized aspects of the aerospace engineering sciences or innovative treatment of required subject matter at the lower-division level. Course content is indicated in the online Schedule Planner. Department enforced prerequisites: varies.
Repeatable: Repeatable for up to 10.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.
Additional Information: Departmental Category: Specialized Courses

ASEN 2701 (3) Introduction to Statics, Structures, and Materials
Introduces the fundamental analytical tools for statics and structural analysis in the context of the physics of aerospace materials. Topics include force/moment equilibrium, truss analysis, beam theory, stress and strain, stiffness and strength of material, and aerospace structural design.
Requisites: Requires prereqs APPM 1360 or MATH 2300 PHYS 1110 (all min grade C-). Requires pre/co-req of APPM 2360 or MATH 2130 MATH 3430 (all min grade C-). Restricted to Aero(ASEN) mjrs, Integ Dsgn Engr(IDEN-BSIDE) mjrs w Aero emphasis, IUT OnTrack students

ASEN 2702 (3) Introduction to Thermodynamics and Aerodynamics
Introduces the fundamental principles and concepts of thermodynamics and aerodynamics. Topics include the first law of thermodynamics, properties of pure substances, control volume analysis, one-dimensional incompressible and compressible flows, two-dimensional lift and drag, and introduction to viscous flows.
Requisites: Requires prereqs APPM 1360 or MATH 2300 PHYS 1110 (all min grade C-). Requires pre/co-req of APPM 2360 or MATH 2130 MATH 3430 (all min grade C-). Restricted to Aero(ASEN) mjrs, Integ Dsgn Engr(IDEN-BSIDE) mjrs w Aero emphasis, IUT OnTrack students

ASEN 2703 (3) Introduction to Dynamics and Systems
Introduces the principles of particle and planar rigid body dynamics, systems, and controls. Topics include kinematics, kinetics, momentum and energy methods, system modeling, and simple feedback control.
Requisites: Requires prerequisite courses ASEN 2701 and APPM 2360 or MATH 2130 MATH 3430 (all min grade C-). Requires prerequisite or corequisite course of APPM 2350 or MATH 2400 (min grade C-). Restricted to ASEN majors and IDEN majors with an Aerospace emphasis

ASEN 2704 (3) Introduction to Aerospace Vehicle Design and Performance
Introduction to the theory and methods for design and performance analysis of aircraft and spacecraft. Aircraft topics include wing design, propulsion, aircraft performance, and stability and control. Spacecraft topics include mission design, rocket performance, orbital mechanics and spacecraft subsystems. Emphasis is placed on introducing systems engineering aspects of design and analysis for aerospace vehicles.
Requisites: Requires prerequisite courses ASEN 2702 and APPM 2360 or MATH 2130 MATH 3430 (all min grade C-). Requires prerequisite or corequisite course of APPM 2350 or MATH 2400 (min grade C-). Restricted to ASEN majors and IDEN majors with an Aerospace emphasis

ASEN 2802 (1) Aerospace Sciences Lab I
Provides an introductory laboratory experience in aerospace sciences, with a focus on statics, structural mechanics, thermodynamics, and aerodynamics. Emphasizes model-based design, experimental data collection, and interpretation of experimental data.
Requisites: Requires prereq ASEN 1320 or CHEN 1310 or CSCI 1300 or 1310 or 1320 or ECEN 1310 (min grade C-). Requires pre/co-reqs ASEN 2012 ASEN 2701 ASEN 2702 (min grade C-). Restricted to ASEN mjrs, IDEN-BSIDE mjrs w Aero emphasis, IUT On Track students.

ASEN 2803 (1) Dynamics and Controls Lab
Experimental and design laboratory exercises for aerospace applications of dynamics, systems, and controls principles.
Requisites: Requires prereqs ASEN 1320 or CHEN 1310 or CSCI 1300 or 1310 or 1320 or ECEN 1310 (min. grade C-). Requires pre/co-req ASEN 2012 and ASEN 2703. Restricted to Aerospace (ASEN) majors and IDEN majors with Aero emphasis.

ASEN 2804 (2) Aerospace Vehicle Design Lab
Design lab focused on integrating knowledge of 2000-level aerospace course concepts towards the open-ended exploration of conceptual and preliminary designs of an aerospace vehicle.
Requisites: Requires prereq ASEN 1320 or CHEN 1310 or CSCI 1300 or 1310 or 1320 or ECEN 1310 (min. grade C-). Requires pre or coreqs ASEN 2012 and ASEN 2704 (min. grade C-). Restricted to Aerospace Eng (ASEN) mjrs IDEN mjrs w/Aerospace emphasis.

ASEN 2849 (1-3) Independent Study
Study of special projects agreed upon by student and instructor. Department consent required.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Specialized Courses

ASEN 3036 (3) Introduction to Human Spaceflight
Introduces students to the challenges of human space flight. Historical and current space programs and spacecraft are discussed with emphasis on those systems specific to sustaining human crews. Other topics include space environment with respect to sustaining human life and health, physiological and psychological concerns in a space habitat, astronaut selection and training, anomalies, mission operations motivation, costs rationale for human space exploration, and future program directions. Not accepted as a Professional Area Elective for ASEN majors.
Additional Information: Departmental Category: Bioastronautics and Microgravity Science

ASEN 3046 (3) Introduction to Humans in Aviation
Investigates the history of crewed aviation accomplished through a review of the history of flight, the physiological and psychological limitations facing aviators, and investigates the human related causal factors in aviation accidents. The course also looks at the social and economic impacts of aviation in modern society. Not accepted as a Professional Area Elective for ASEN majors.
Additional Information: Departmental Category: Bioastronautics and Microgravity Science

ASEN 3300 (4) Aerospace Electronics and Communications
Provides the fundamentals of electronics and communications widely used in aerospace engineering. Includes analog instrumentation electronics, data acquisition, digital electronics and radio communication.
Requisites: Requires prerequisite courses ASEN 2703 and PHYS 1120 and APPM 2350 or MATH 2400 and APPM 2360 or MATH 2130 MATH 3430 (all minimum grade C-). Restricted to Aerospace Engineering (ASEN) majors and Integrated Design Eng majors with an Aerospace emphasis
Additional Information: Departmental Category: Systems and Control

ASEN 3401 (3) Aerospace Structures
Introduces concepts of stress and strain; axial loading, torsion, simple bending, transverse shear, and deflections of beams; analysis of stress and strain in 2-D and 3-D; failure analysis of structural components; and criteria for designing structural elements to meet requirements for aerospace structures.
Requisites: Requires prerequisite course of ASEN 2401 or MCEN 2023 or CVEN 2121 or GEEN 2851 (minimum grade C-).
Recommended: Prerequisites APPM 2350 or MATH 2400 and APPM 2360 or MATH 2130 & MATH 3430.

ASEN 3402 (3) Aerospace Heat Transfer
Introduces the fundamental concepts and principles of heat transfer in aerospace contexts. Covers the mechanisms of heat transfer by conduction, convection, and radiation. Emphasizes problem formulation and selection of appropriate solution techniques, with applications to modern aerospace engineering systems.
Requisites: Requires prerequisite courses of ASEN 2402 or MCEN 3012 or GEEN 3852 or AREN 2110 or EVEN 3012 and APPM 2360 or MATH 2130 MATH 3430 (all minimum grade C-). Requires corequisite course of APPM 2350 or MATH 2400.

ASEN 3403 (3) Aerodynamics
Introduces models for the analysis of subsonic, transonic, and supersonic flow. Teaches methodologies for the prediction of aerodynamics forces and moments experienced by aerospace vehicles and systems. Develops a fundamental understanding of gas dynamics in nozzles with application to wind tunnels and rocket propulsion.
Requisites: Requires prerequisite courses of ASEN 2402 or MCEN 3012 or GEEN 3852 or AREN 2110 or EVEN 3012 and APPM 2350 or MATH 2400 and APPM 2360 or MATH 2130 MATH 3430 (all minimum grade C-).

ASEN 3404 (3) Aerospace Dynamics and Control
Provides an overview of fundamental topics for aerospace vehicle dynamics and control. Introduces 3D rigid body dynamics, attitude representations, environmental forces and moments, linearization, modal responses and stability, control analysis and design, and attitude determination with examples from aircraft and spacecraft throughout.
Requisites: Requires prereqs ASEN 2403 or MCEN 2043 or CVEN 3111 and APPM 2350 or MATH 2400 and APPM 2360 or MATH 2130 MATH 3430.

ASEN 3405 (3) Astrodynamics
Provides a foundational knowledge of astrodynamics with a focus on spacecraft traveling near a single central body.
Requisites: Requires prerequisite course of ASEN 2501 (minimum grade C-). Requires corequisite course of ASEN 3404.

ASEN 3406 (3) Aircraft Dynamics
Provides a framework and methods for analyzing aircraft dynamics and designing aircraft control systems building on fundamental dynamics and control theory.
Requisites: Requires prerequisite courses of ASEN 2502 and ASEN 3403 (all minimum grade C-).

ASEN 3501 (3) Aerospace Experimental Methods
Introduces the essential aspects of hands-on experimentation for aerospace engineering applications, allowing students to learn the practical skills required for designing and conducting experiments in addition to analyzing results and quantifying confidence and uncertainty. Explores the importance of systematically analyzing experimental data, emphasizing the application of basic statistical methods and validation of fundamental engineering models.¿
Requisites: Requires prerequisite courses of ASEN 2402 or MCEN 3012 or GEEN 3852 or AREN 2110 or EVEN 3012 and ASEN 2403 or MCEN 2043 or CVEN 3111 and APPM 2350 or MATH 2400 and APPM 2360 or MATH 2130 MATH 3430 (all minimum grade C-).
Recommended: Prerequisites ASEN 2501 and ASEN 2502.

ASEN 3502 (3) Aerospace Computational Methods
Introduces computational methods commonly employed in the aerospace industry, emphasizing computational cost, accuracy, and error control.¿ Covers numerical solution of systems of algebraic and differential equations, numerical optimization, and regression.¿ Explores application to modeling, simulation, design, and control of aerospace systems.
Requisites: Requires prerequisite courses of ASEN 2402 or MCEN 3012 or GEEN 3852 or AREN 2110 or EVEN 3012 and ASEN 2403 or MCEN 2043 or CVEN 3111 and APPM 2350 or MATH 2400 and APPM 2360 or MATH 2130 MATH 3430 (all minimum grade C-).
Recommended: Prerequisites ASEN 2501 and ASEN 2502.

ASEN 3503 (3) Aerospace Electronics
Provides an overview of the fundamentals of analog and digital electronics widely used in aerospace engineering. Covers DC and AC circuits, frequency domain analysis, operational amplifiers, digital logic circuits, and computer interfaces.
Requisites: Requires prereqs ASEN 2403 or MCEN 2043 or CVEN 3111 and APPM 2360 or MATH 2130 MATH 3430 and PHYS 1120

ASEN 3519 (1-3) Special Topics
Studies specialized aspects of the aerospace engineering sciences or innovative treatment of required subject matter at the upper-division level. Course content is indicated in the online Schedule Planner. Department enforced prerequisite: varies.
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.
Additional Information: Departmental Category: Specialized Courses

ASEN 3700 (3) Orbital Mechanics/Attitude Dynamics and Control
Presents the fundamentals of orbital mechanics, 3D rigid body dynamics and satellite attitude dynamics and controls.
Requisites: Requires prerequisite courses of ASEN 2703 and ASEN 2704 and APPM 2350 or MATH 2400 (all minimum grade C-). Restricted to Aerospace Engineering (ASEN) majors and IDEN majors with an Aerospace emphasis.

ASEN 3711 (3) Aerodynamics
Introduces models for the analysis of subsonic, transonic, and supersonic flow. Teaches methodologies for the prediction of aerodynamics forces and moments experienced by aircraft. Develops a fundamental understanding of gas dynamics in nozzles with application to aircraft and rocket propulsion.
Requisites: Requires prerequisite courses of ASEN 2704 and APPM 2350 or MATH 2400 (all minimum grade C-). Restricted to Aerospace Engineering (ASEN) majors and IDEN majors with an Aerospace emphasis.

ASEN 3712 (3) Structures
Teaches Mechanics of Materials methods of stress and deformation analysis applicable to the design and verification of aircraft and space structures. It offers an introduction to matrix and finite element methods for truss structures, and to mechanical vibrations.
Requisites: Requires prerequisite courses of ASEN 2703 and APPM 2350 or MATH 2400 (all minimum grade C-). Restricted to Aerospace Engineering (ASEN) majors and IDEN majors with an Aerospace emphasis.

ASEN 3713 (3) Thermodynamics and Heat Transfer
Focuses on the applications of the first and second laws of thermodynamics and teaches the fundamental concepts of different modes of energy and heat transfer, with applications of these concepts in gas dynamics, high-speed vehicle and spacecraft design, environmental systems, and energy analysis.
Requisites: Requires prerequisite courses ASEN 2702 and APPM 2350 or MATH 2400 and APPM 2360 or MATH 2130 MATH 3430 (all minimum grade C-). Restricted to ASEN majors and IDEN majors with an Aerospace emphasis.

ASEN 3728 (3) Aircraft Dynamics
Develops the fundamental concepts of aircraft dynamics. Covers flight mechanics, performance, dynamics and control of aircraft and how they impact aircraft design.
Requisites: Requires prerequisite courses of ASEN 2703 and ASEN 2704 and APPM 2350 or MATH 2400 (all minimum grade C-). Restricted to Aerospace Engineering (ASEN) majors and IDEN majors with an Aerospace emphasis.

ASEN 3801 (1) Aerospace Vehicles Dynamics and Controls Lab
Emphasizes applications of engineering dynamics and control principles for modeling, simulating, designing, analyzing, and evaluating aerospace vehicle systems. Experimental and computational focus on problems in aircraft flight stabilization and spacecraft attitude control.
Requisites: Requires prerequisite courses ASEN 2803 and ASEN 2804 (all minimum grade C-).Requires prerequisite or corequisite ASEN 3700 and ASEN 3728 (all minimum grade C-).Restricted to Aerospace Engineering (ASEN) majors and IDEN majors with an Aerospace emphasis

ASEN 3802 (1) Aerospace Sciences Lab II
Provides an intermediate laboratory experience in aerospace sciences, with a focus on aerodynamics, structural mechanics, thermodynamics, and heat transfer. Emphasizes design and analysis of experiments, processing and analysis of experimental data, and model validation using experimental data.
Requisites: Requires prerequisite courses ASEN 2012 and ASEN 2802 (min grade C-). Requires prerequisite or corequisite courses ASEN 3711, ASEN 3712 and ASEN 3713 (min grade C-). Restricted to Aerospace Engineering (ASEN) majors and IDEN majors w/ Aerospace emphasis

ASEN 3930 (6) Aerospace Engineering Cooperative Education
Students will participate in a previously arranged, department-sponsored cooperative education program with a government agency or industry. 0.
Requisites: Restricted to students with 57-180 credits (Junior or Senior) Aerospace Engineering (ASEN) majors only.
Recommended: Prerequisite GPA above 3.
Additional Information: Departmental Category: Specialized Courses

ASEN 4013 (3) Foundations of Propulsion
Describes aerothermodynamics and design of both rocket and air-breathing engines. Includes ramjets, turbojets, turbofans, and turboprop engines, as well as liquid, solid, and hybrid rockets.
Requisites: Requires prerequisite courses of ASEN 3711 and ASEN 3713 (all minimum grade C-). Restricted to Aerospace Engineering (ASEN), Aerospace Engineering Concurrent Degree (C-ASEN) or IDEN-BSIDE majors with Aerospace emphasis.
Additional Information: Departmental Category: Thermodynamics and Propulsion

ASEN 4018 (4) Senior Projects 1: Design Synthesis
Focuses on the synthesis of technical knowledge, project management, design process, leadership, and communications within a team environment. Students progress through the design process beginning with requirements development, then preliminary design and culminating with critical design. Offered fall only.
Requisites: Restricted to ASEN mjrs w/ prereqs ASEN 1022, 3711, 3712, 3713, 3728, 3700, 3300, 3801 and 3802 (all min grade C-). OR restricted to IDEN majors with an Aero emphasis w/ prereqs GEEN 2400, 3400, ASEN 1022, 3713, and 3300 (all min grade C-).
Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 4028 (4) Senior Projects 2: Design Practicum
Focuses on the fabrication, integration, verification and validation of designs produced in ASEN 4018. Students work within the same teams from ASEN 4018. Offered spring only.
Requisites: Requires prerequisite course of ASEN 4018 (minimum grade C-). Restricted to Aerospace Engineering (ASEN) majors and Integrated Design Engineering majors with an Aerospace emphasis.
Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 4057 (3) Aerospace Software
Provides an overview of prevalent software and hardware computing concepts utilized in practice and industry. Establishes the background necessary to tackle programming projects on different computing platforms with various software tools and programming languages.
Requisites: Requires prerequisite course of ASEN 1320 or CSCI 1300 or ECEN 1310 or CHEN 1310 (minimum grade C-). Restricted to Aerospace Engineering (ASEN) or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.
Recommended: Prerequisite CSCI 2270 or instructor consent.
Additional Information: Departmental Category: Computational and Analytic Methods

ASEN 4067 (3) Microavionics: Introduction to PIC Microcontrollers for Aerospace Systems
Provide students an introduction into embedded systems that teaches a basic understanding about the fundamental architecture of a microcontroller and how it operates and interfaces with both sensors and actuators applicable to aerospace engineering. Students will learn how to interface sensors to a PIC microcontroller, collect input, make decisions and take an action in real-time. To gain a full appreciation about how microcontrollers work, students develop their own software code using MPLAB X to program the development board hardware, which uses the Microchip PIC18F87K22 microcontroller as the foundation of the course. Students learn-by-doing through lab assignments and a semester final project. This includes programming in assembly language and then C, to collect data from external sources such as a serial terminal, temperature and rotary sensors, etc. and outputting results to a liquid crystal display (LCD), and sending commands to an actuator such as a servo.
Equivalent - Duplicate Degree Credit Not Granted: ASEN 5067
Requisites: Requires prereq courses ASEN 1320 or CSCI 1300 or CSCI 1310 or CHEN 1310 or ECEN 1310 and ASEN 3300 (all minimum grade C-).

ASEN 4090 (3) Global Positioning Systems Applications
Focuses on GPS technology, software development, and applications. Lectures will cover the principal concepts used in GPS, and weekly laboratories will apply that knowledge. Culminates in student design projects using GPS.
Requisites: Requires prerequisite courses of APPM 2360 and CHEN 1310 (all minimum grade C).
Recommended: Prerequisite junior/senior standing in engineering.
Additional Information: Departmental Category: Global Positioning Systems

ASEN 4114 (3) Automatic Control Systems
Methods of analysis and design of feedback control for dynamic systems. Covers nyquist, bode and linear quadratic methods based on frequency domain and state space models. Laboratory experiments provide exposure to computation for simulation and real time control, and typical control system sensors and actuators. Degree credit not granted for MCEN 4138 and MCEN 5138 and ECEN 4138 and ECEN 5138.
Equivalent - Duplicate Degree Credit Not Granted: ASEN 5114
Requisites: Requires prereq courses ASEN 3128 or ASEN 3728 and ASEN 3200 or ASEN 3700 (all minimum grade C-). Restricted to Aerospace Engineering (ASEN) majors only.
Additional Information: Departmental Category: Systems and Control

ASEN 4123 (3) Vibration Analysis
Highlights free and forced vibration of discrete and continuous systems. Examines Lagrange's equation, Fourier series, Laplace transforms, and matrix and computational methods. Applies knowledge to practical engineering problems.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 4123
Requisites: Requires prerequisite course of ASEN 3112 or MCEN 3030 (minimum grade C). Restricted to Aerospace Engineering (ASEN) majors only.
Additional Information: Departmental Category: Thermodynamics and Propulsion

ASEN 4128 (3) Human Factors in Engineering and Design
Introduces the field of human factors engineering and investigates human psychological, physiological and performance limitations in complex systems and why it is vital for engineers to understand human operational limitations when designing complex systems. Course includes studies of real accidents caused by human error, good and bad designs, latent conditions and accident-producing designs. Goal is an understanding of how to conduct engineering design with consideration of human factors.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 4138 (3) Aircraft Design
Two lectures and one lab per week. Examines principles of aircraft configuration and design to meet given performance specifications, taking into account aerodynamic, stability and control, and flying quality considerations, as well as airworthiness regulations. Includes preliminary design of the major elements of an aircraft.
Requisites: Requires prerequisite course of ASEN 3128 or ASEN 3728 (minimum grade C-). Restricted to Aerospace Engineering (ASEN) or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.
Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 4218 (3) Large Space Structures Design
Develops the necessary structural analysis skills for conducting conceptual and preliminary designs of large space structures with a practical emphasis on structures considered by NASA over the past 20 years. Applies analysis skills to a broad range of space missions requiring large space structures, emphasizing low cost and practical design.
Equivalent - Duplicate Degree Credit Not Granted: ASEN 5218
Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Aerospace Engineering (ASEN) or Mechanical Engineering (MCEN) majors only.
Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 4338 (3) Computer Analysis of Structures
Covers basic structural design concepts and finite element modeling techniques. Emphasizes use of finite element static and dynamic analysis to validate and refine an initial design. Introduces basic design optimization and tailoring. Proficiency in Matlab required.
Requisites: Requires prerequisite course of ASEN 3112 (minimum grade C). Restricted to Aerospace Engineering (ASEN) majors only
Additional Information: Departmental Category: Structures, Materials, and Structural Dynamics

ASEN 4401 (3) Aerospace Communication Systems
Provides students with an understanding of basic wireless communication concepts relevant to aerospace systems and the near-earth atmosphere as well as an understanding of space-environment conditions that impact wireless aerospace communication systems.
Requisites: Requires prerequisite courses of ASEN 2501 and ASEN 3503 (all minimum grade C-)

ASEN 4402 (3) Aerospace Materials and Structural Analysis
Reviews essential concepts normally covered in undergraduate solid mechanics or mechanics of materials courses, such as concepts of stress and strain in two dimensions and three-dimensional systems. Covers more advanced topics such as structural instabilities and vibrations, materials classification and basic properties, viscoelastic and plastic material behavior and commonly used ductile failure theories. Introduces the finite-element (FE) method to analyze complex geometries and exposes students to methods utilized extensively by companies engaged in structural design.
Requisites: Requires prerequisite courses of ASEN 3401 and MCEN 1024 or CHEN 1201 or CHEN 1211 or CHEM 1113 or CHEM 1400 (all minimum grade C-).

ASEN 4519 (1-3) Special Topics
Studies specialized aspects of the aerospace engineering sciences or innovative treatment of required subject matter at the upper-division level. Course content is indicated in the online Schedule Planner. Department enforced prerequisite varies.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.
Additional Information: Departmental Category: Specialized Courses

ASEN 4849 (1-3) Independent Study
Special projects agreed upon by student and instructor. Department consent required.
Repeatable: Repeatable for up to 6.00 total credit hours.
Additional Information: Departmental Category: Specialized Courses

ASEN 4859 (1-6) Undergraduate Research
Assigns a research problem on an individual basis. Department consent required.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Specialized Courses

Aerospace Engineering Sciences - Bachelor of Science (BSAE)

The undergraduate curriculum in aerospace engineering sciences is designed to prepare students to advance to a distinguished professional career in the aerospace industry or for graduate school, consistent with our stated program educational objectives. In particular, this involves

providing students with an interdisciplinary systems perspective of aerospace engineering. The curriculum accomplishes these goals by:

- providing a strong basis in mathematics, science and engineering fundamentals;
- extending these fundamentals to advanced topics in aerospace engineering;
- complementing the engineering education with sufficient exposure to the humanities and social sciences; and
- beginning and ending in major design experiences that stress an interdisciplinary systems perspective.

AES students are also encouraged to consider a technical minor or double major in electrical engineering, computer science, applied math, engineering physics, astrophysical and planetary sciences or atmospheric and oceanic sciences. In most cases, the junior- and senior-level courses required for the above-mentioned minors can be applied to the technical elective requirements.

For students having sufficient ability and interest, planning for graduate study should begin by the start of the junior year. Such a plan should consider the foreign language requirements of appropriate graduate schools and an advanced mathematics program. Students who wish to combine the business and aerospace engineering sciences curricula are advised to consider obtaining the BS degree in aerospace and a master's degree in business rather than a combined BS degree.

For more information, visit the department's Prospective Students (https://www.colorado.edu/aerospace/prospective-students/undergraduates/) webpage.

Requirements

The Bachelor of Science curriculum in Aerospace Engineering Sciences is revised annually to keep up with advances in technology, to make use of new educational methodologies and to satisfy current program accreditation criteria. A minimum of 128 credit hours is required. For up-to-date program requirements, visit the Bachelor of Science in Aerospace Engineering Sciences web page (https://www.colorado.edu/aerospace/current-students/undergraduates/curriculum/).

Note: This major cannot be combined with a BS in Integrated Design Engineering with an aerospace engineering emphasis.

In addition, students must meet the general undergraduate degree requirements of the College of Engineering and Applied Science. (https://www.colorado.edu/engineering-advising/get-your-degree/graduation-requirements/)

Required Courses and Credits

Code	Title	Credit Hours
Required Courses		
ASEN 1030	Introduction to Computing for Aerospace Engineering	3
or CSCI 1300	Computer Science 1: Starting Computing	
or CHEN 1310	Introduction to Engineering Computing	
or ECEN 1310	Introduction to C Programming	
ASEN 1400/ ASTR 2500	Gateway to Space	3
or ASEN 1403	Introduction to Rocket Engineering	
or GEEN 1400	Engineering Projects	
or ECEN 1400	Introduction to Digital and Analog Electronics	
ASEN 2401	Statics	3
or CVEN 2121	Analytical Mechanics 1	
or GEEN 2851	Statics for Engineers	
or MCEN 2023	Statics and Structures	
ASEN 2402	Thermodynamics	3
or AREN 2110	Thermodynamics	
or EVEN 3012	Thermodynamics for Environmental Science and Engineering	
or GEEN 3852	Thermodynamics for Engineers	
or MCEN 3012	Thermodynamics	
ASEN 2403	Dynamics	3
or CVEN 3111	Analytical Mechanics 2	
or MCEN 2043	Dynamics	
ASEN 2501	Introduction to Astronautics	3
ASEN 2502	Introduction to Aeronautics	3
ASEN 3401	Aerospace Structures	3
ASEN 3402	Aerospace Heat Transfer	3
ASEN 3403	Aerodynamics	3
ASEN 3404	Aerospace Dynamics and Control	3
ASEN 3501	Aerospace Experimental Methods	3
ASEN 3502	Aerospace Computational Methods	3
ASEN 3503	Aerospace Electronics	3
ASEN 4013	Foundations of Propulsion	3
ASEN 4018	Senior Projects 1: Design Synthesis	4
ASEN 4028	Senior Projects 2: Design Practicum	4
Astronautics Focus: [1]		*6*
ASEN 3405	Astrodynamics	
ASEN 4401	Aerospace Communication Systems	
Aeronautics Focus: [1]		*6*
ASEN 3406	Aircraft Dynamics	
ASEN 4402	Aerospace Materials and Structural Analysis	
Basic Engineering Electives		
Required Math		
APPM 1350	Calculus 1 for Engineers	4
or APPM 1345	Calculus 1 with Algebra, Part B	
or MATH 1300	Calculus 1	
APPM 1360	Calculus 2 for Engineers	4
or MATH 2300	Calculus 2	
APPM 2350	Calculus 3 for Engineers	4
or MATH 2400	Calculus 3	
APPM 2360	Introduction to Differential Equations with Linear Algebra	4
or MATH 2130 & MATH 3430	Introduction to Linear Algebra for Non-Mathematics Majors and Ordinary Differential Equations	
or MATH 2135 & MATH 3430	Introduction to Linear Algebra for Mathematics Majors and Ordinary Differential Equations	
Required Science		
MCEN 1024	Chemistry for Energy and Materials Science	3

or CHEM 1113	General Chemistry 1	
or CHEM 1400	Foundations of Chemistry	
or CHEN 1201	General Chemistry for Engineers 1	
or CHEN 1211	Accelerated Chemistry for Engineers	
PHYS 1110	General Physics 1	4
or PHYS 1115	General Physics 1 for Majors	
PHYS 1120	General Physics 2	4
or PHYS 1125	General Physics 2 for Majors	
Required Humanities, Social Sciences and Writing		
College-approved humanities & social sciences courses. At least 6 credits must be upper-division (3000 level or higher). [2]		15
College-approved writing course. [2]		3
Electives		
Aerospace Engineering Elective [3]		3
Math and Science Elective [4]		3
Free Electives		6
Technical Electives [5]		12

1 Students select from either the Aeronautics Focus Area or the Astronautics Focus Area and complete 6 credit hours of required coursework in that area.

2 Courses from approved Humanities, Social Sciences and Writing Requirements (https://www.colorado.edu/engineering-advising/get-your-degree/degree-requirements/humanities-social-sciences-and-writing-requirements/).

3 Any ASEN course at the 4000-level or above that is not a required course can be used to satisfy the Aerospace Engineering Elective requirement. Additionally, for Astronautics Focus students, either ASEN 3406 or ASEN 4402 can be used to satisfy the Aerospace Engineering Elective requirement, while for Aeronautics Focus students, either ASEN 3405 or ASEN 4401 can be used to satisfy the Aerospace Engineering Elective requirement.

4 A full listing of approved math and science elective courses can be found in the degree audit.

5 A technical elective is generally a course in math, engineering, or science at the 3000 level or above. Any ASEN course at the 4000 level or above that is not a required course can be used as a technical elective if it is not used to satisfy the Aerospace Engineering Elective requirement. Additionally, for Astronautics Focus students, either ASEN 3406 or ASEN 4402 can be used as a technical elective if it is not used to satisfy the Aerospace Engineering Elective requirement, while for Aeronautics Focus students, either ASEN 3405 or ASEN 4401 can be used as a technical elective if it is not used to satisfy the Aerospace Engineering Elective requirement. A full listing of approved technical elective courses can be found in the degree audit.

Prerequisites and Passing Grades

The minimum passing grade for a course that is a prerequisite for another required course is C-. If a grade of D+ or lower is earned in a course which is a prerequisite to another, the student may not register for the subsequent course until the first grade has been raised to a C- or higher.

The minimum passing grade for a course that is not specifically a prerequisite for another required course is D-.

The Ann and HJ Smead Department of Aerospace Engineering Sciences (AES) reserves the right to drop students enrolled in ASEN courses who have not met the minimum prerequisite grade requirements. It is the student's responsibility to communicate with the department if summer coursework and/or transfer credit will be used to meet the prerequisite requirement.

Recommended Four-Year Plan of Study

Year One

Fall Semester		**Credit Hours**
APPM 1350 or MATH 1300	Calculus 1 for Engineers or Calculus 1	4
GEEN 1400 or ASEN 1403	Engineering Projects or Introduction to Rocket Engineering	3
PHYS 1110	General Physics 1	4
COEN 1500	CEAS First Year Seminar [2]	1
Humanities/Social Science Elective [1]		3
	Credit Hours	**15**
Spring Semester		
APPM 1360 or MATH 2300	Calculus 2 for Engineers or Calculus 2	4
ASEN 1030	Introduction to Computing for Aerospace Engineering	3
MCEN 1024	Chemistry for Energy and Materials Science	3
Humanities/Social Science Elective [1]		6
	Credit Hours	**16**

Year Two

Fall Semester		
APPM 2360 or MATH 2130 ***and*** MATH 3430	Introduction to Differential Equations with Linear Algebra or Introduction to Linear Algebra for Non-Mathematics Majors ***and*** Ordinary Differential Equations	4
ASEN 2401	Statics	3
ASEN 2402	Thermodynamics	3
ASEN 2501	Introduction to Astronautics	3
Free Elective		3
	Credit Hours	**16**
Spring Semester		
APPM 2350 or MATH 2400	Calculus 3 for Engineers or Calculus 3	4
ASEN 2403	Dynamics	3
ASEN 2502	Introduction to Aeronautics	3
PHYS 1120	General Physics 2	4
Free Elective		3
	Credit Hours	**17**

Year Three

Fall Semester		
ASEN 3401	Aerospace Structures	3
ASEN 3402	Aerospace Heat Transfer	3
ASEN 3404	Aerospace Dynamics and Control	3
ASEN 3501	Aerospace Experimental Methods	3
Math and Science Elective [3]		3
Humanities/Social Science Elective [1]		2
	Credit Hours	**17**

Spring Semester		
ASEN 3403	Aerodynamics	3
ASEN 3405 or ASEN 3406	Astrodynamics or Aircraft Dynamics	3
ASEN 3502	Aerospace Computational Methods	3
ASEN 3503	Aerospace Electronics	3
Technical Elective [5]		3
	Credit Hours	**15**
Year Four		
Fall Semester		
ASEN 4013	Foundations of Propulsion	3
ASEN 4018	Senior Projects 1: Design Synthesis	4
Aerospace Engineering Elective [4]		3
College-Approved Writing Course [1]		3
Technical Elective [5]		3
	Credit Hours	**16**
Spring Semester		
ASEN 4028	Senior Projects 2: Design Practicum	4
ASEN 4401 or ASEN 4402	Aerospace Communication Systems or Aerospace Materials and Structural Analysis	3
Humanities/Social Science Elective [1]		3
Technical Elective [5]		6
	Credit Hours	**16**
	Total Credit Hours	**128**

1. Courses from approved Humanities, Social Sciences and Writing Requirements (https://www.colorado.edu/engineering-advising/get-your-degree/degree-requirements/humanities-social-sciences-and-writing-requirements/).
2. Students may elect to apply this course towards free elective or Humanities and Social Sciences credits.
3. A full listing of approved math and science elective courses can be found in the degree audit.
4. Any ASEN course at the 4000-level or above that is not a required course can be used to satisfy the Aerospace Engineering Elective requirement. Additionally, for Astronautics Focus students, either ASEN 3406 or ASEN 4402 can be used to satisfy the Aerospace Engineering Elective requirement, while for Aeronautics Focus students, either ASEN 3405 or ASEN 4401 can be used to satisfy the Aerospace Engineering Elective requirement.
5. A technical elective is generally a course in math, engineering, or science at the 3000 level or above. Any ASEN course at the 4000 level or above that is not a required course can be used as a technical elective. Upper-division independent study courses from technical areas (math, science and engineering) are acceptable for up to 6 credit hours of technical elective credit. A full listing of approved technical elective courses can be found in the degree audit.

Learning Outcomes

By the completion of the program, students will be able to:

- Identify, formulate and solve complex engineering problems by applying principles of engineering, science and mathematics.
- Apply engineering design to produce solutions that meet specified needs with consideration of public health, safety and welfare, as well as global, cultural, social, environmental and economic factors.
- Communicate effectively with a range of audiences.
- Recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental and societal contexts.
- Function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks and meet objectives.
- Develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
- Acquire and apply new knowledge as needed, using appropriate learning strategies.

Bachelor's–Accelerated Master's Degree Program(s)

The bachelor's–accelerated master's (BAM) degree program options offer currently enrolled CU Boulder undergraduate students the opportunity to receive a bachelor's and master's degree in a shorter period of time. Students receive the bachelor's degree first but begin taking graduate coursework as undergraduates (typically in their senior year).

Because some courses are allowed to double count for both the bachelor's and the master's degrees, students receive a master's degree in less time and at a lower cost than if they were to enroll in a stand-alone master's degree program after completion of their baccalaureate degree. In addition, staying at CU Boulder to pursue a bachelor's–accelerated master's program enables students to continue working with their established faculty mentors.

Admission Requirements

BS and MS in Aerospace Engineering Sciences

In order to gain admission to the BAM program named above, a student must meet the following criteria:

- Have a CU cumulative GPA of 3.50 or higher.
- Have a minimum major GPA (in sophomore level/2000+ coursework and above) of 3.50.
- Have at least junior class standing; enrolled in ASEN 3000-level courses.
- Completion of all MAPS requirements and no deficiencies remaining (students admitted to CU Boulder prior to Summer 2023 only).
- Transfer students must have completed a minimum of 24 credit hours at CU Boulder.

BS in Aerospace Engineering Sciences, Professional ME in Engineering Management

In order to gain admission to the BAM program named above, a student must meet the following criteria:

- Have a CU cumulative GPA of 3.0 or higher.
- Have at least junior class standing.
- Completion of all MAPS requirements and no deficiencies remaining (students admitted to CU Boulder prior to Summer 2023 only).

Program Requirements

For both programs named above, students may take up to and including 12 hours while in the undergraduate program which can later be used toward the master's degree. However, only 6 credits may be double counted toward the bachelor's degree and the master's degree. Students must apply to graduate with the bachelor's degree, and apply to continue with the master's degree, early in the semester in which the undergraduate requirements will be completed.

Please see the Aerospace Engineering Sciences BAM program (https://www.colorado.edu/aerospace/academics/graduates/bachelors-accelerated-masters/) webpage for more information on the BS and MS in Aerospace Engineering Sciences BAM program.

Please see the Lockheed Martin Engineering Management Program (https://www.colorado.edu/emp/graduate-programs/bachelors-accelerated-masters-bam/) webpage for more information on the BS in Aerospace Engineering Sciences and a Professional ME in Engineering Management BAM program.

Applied Mathematics

Applied mathematics graduates have the expertise and mathematical sophistication necessary to make contributions in a wide variety of fields, including scientific computation, actuarial science, financial modeling and most areas of science and engineering that have a mathematical basis.

A professional applied mathematician may work with engineers, scientists, programmers and other specialists. The curriculum at CU Boulder is designed to have the breadth for such an interdisciplinary career.

Course offerings at the undergraduate level focus on providing students with mathematical tools, problem-solving strategies and expertise useful in science and engineering. To fulfill requirements, a concentrated area of engineering courses (or approved natural science courses) must be completed. The college has formulated several recommended options within the discipline.

The Department of Applied Mathematics offers a BS degree in applied mathematics through the College of Engineering & Applied Science and a BA degree in Statistics and Data Science through the College of Arts & Sciences. Both undergraduate degrees are designed to prepare graduates for exciting and diverse professional careers, and for graduate study in a wide variety of disciplines. A minor in applied mathematics (p. 105) and a minor in statistics and data science (p. 118) are offered through the College of Arts & Sciences.

The objectives of the Department of Applied Mathematics at CU Boulder are summarized below:

- provide undergraduate and graduate students with high-quality education and training in applied mathematics, and prepare them for careers in industry, laboratories and the academic professions;
- offer and monitor degree programs leading to BS, MS and PhD degrees in applied mathematics and BA in statistics and data science;
- nourish and maintain a professional environment in which excellence in teaching, learning, scholarship and creativity are of central importance;
- assure teaching and research expertise in a number of key areas of applied mathematics, including the methodology of applied mathematics, computational mathematics and algorithms, industrial applications, mathematical biology, applied probability and statistics.

Courses at the undergraduate level provide training in a broad range of mathematical and statistical techniques and problem-solving strategies. These courses teach the concepts and methods central to applications of linear algebra, ordinary and partial differential equations, numerical analysis, probability and statistics, complex variables and nonlinear dynamics. Since alumni are often involved in interdisciplinary work, the undergraduate degrees require an in-depth knowledge of some area of science or engineering where mathematics is used. This knowledge prepares graduates to successfully communicate and cooperate with engineers and scientists. Both the BA and BS degrees also requires knowledge of a programming language and skill in using the computer.

Course codes for this program are APPM and STAT.

Desired Outcomes

The undergraduate degree in applied mathematics emphasizes knowledge and awareness of:

- differential and integral calculus in one and several variables;
- vector spaces and matrix algebra;
- ordinary and partial differential equations;
- at least one programming language;
- at least one application software package in either mathematics or statistics;
- methods of complex variables as used in applications; and
- numerical solutions of linear and nonlinear problems.

In addition, students completing a degree in applied mathematics acquire:

- an in-depth knowledge of an area of application (an engineering discipline or a natural science field or one of the quantitative areas of business and economics);
- knowledge of problem-formulation, problem-solving and modeling techniques, and strategies central to applications; and
- the ability to communicate analytic arguments clearly and concisely in oral and written forms.

Bachelor's Degree

- Applied Mathematics - Bachelor of Science (BSAM) (p. 854)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Ablowitz, Mark J. (https://experts.colorado.edu/display/fisid_100691/) Distinguished Professor; PhD, Massachusetts Institute of Technology

Appelö, Daniel E. (https://experts.colorado.edu/display/fisid_159438/) Assistant Professor Adjunct; PhD, KTH Royal Institute of Technology (Sweden)

Becker, Stephen R. (https://experts.colorado.edu/display/fisid_154263/) Associate Professor; PhD, California Institute of Technology

Benim, W. Robert (https://experts.colorado.edu/display/fisid_167716/) Assistant Teaching Professor

Beylkin, Gregory (https://experts.colorado.edu/display/fisid_100437/)
Professor; PhD, New York University

Bhat, Yermal Sujeet (https://experts.colorado.edu/display/fisid_146506/)
Associate Teaching Professor; PhD, University of Florida

Bortz, David Matthew (https://experts.colorado.edu/display/fisid_143348/)
Professor; PhD, North Carolina State University

Chang, Silva (https://experts.colorado.edu/display/fisid_145582/)
Teaching Professor; MS, Yale University

Chi, Jocelyn T.
Assistant Professor; PhD, North Carolina State University

Corcoran, Jem (https://experts.colorado.edu/display/fisid_118142/)
Associate Professor Emeritus; PhD, Colorado State University

Cox, Rachel (https://experts.colorado.edu/display/fisid_158450/)
Assistant Teaching Professor; MS, University of Colorado Boulder

Courses

APPM 1235 (4) Pre-Calculus for Engineers
Prepares students for the challenging content and pace of the calculus sequence required for all engineering majors. Covers algebra, trigonometry and selected topics in analytical geometry. Prepares students for the calculus courses offered for engineering students. Requires students to engage in rigorous work sessions as they review topics that they must be comfortable with to pursue engineering course work. Structured to accustom students to the pace and culture of learning encountered in engineering math courses. For more information about the math placement referred to in the "Enrollment Requirements", please contact your academic advisor. Formerly GEEN 1235.
Equivalent - Duplicate Degree Credit Not Granted: MATH 1021 or MATH 1150
Requisites: Requires an ALEKS math exam taken in 2016 or earlier, or placement into pre-calculus based on your admissions data and/or CU Boulder coursework.

APPM 1236 (1) Precalculus Work Group
Develops and enhances problem solving skills for students enrolled in APPM 1235. Course is conducted in a collaborative learning environment with students working in groups under the guide of a facilitator.
Requisites: Requires enrollment in corequisite course of APPM 1235.

APPM 1340 (4) Calculus 1 with Algebra, Part A
Studies selected topics in analytical geometry and calculus: rates of change of functions, limits, derivatives and their applications. This course and APPM 1345 together are equivalent to APPM 1350. The sequence of this course and APPM 1345 is specifically designed for students whose manipulative skills in the techniques of high school algebra and precalculus may be inadequate for APPM 1350. For more information about the math placement referred to in the "Enrollment Requirements", please contact your academic advisor.
Requisites: Requires prerequisite course of APPM 1235 or MATH 1021 or MATH 1150 or MATH 1160 (minimum grade C-) or an ALEKS math exam taken in 2016 or earlier, or placement into pre-calculus based on your admissions data and/or CU Boulder coursework.
Additional Information: Arts Sci Gen Ed: Quantitative Reasoning Math

APPM 1345 (4) Calculus 1 with Algebra, Part B
Continuation of APPM 1340. Studies selected topics in calculus: derivatives and their applications, integration, differentiation and integration of transcendental functions. Algebraic and trigonometric topics are studied throughout, as needed.
Equivalent - Duplicate Degree Credit Not Granted: APPM 1350 or ECON 1088 or MATH 1081 or MATH 1300 or MATH 1310 or MATH 1330
Requisites: Requires prerequisite course of APPM 1340 (minimum grade C-).

APPM 1350 (4) Calculus 1 for Engineers
Topics in analytical geometry and calculus including limits, rates of change of functions, derivatives and integrals of algebraic and transcendental functions, applications of differentiations and integration. Students who have already earned college credit for calculus 1 are eligible to enroll in this course if they want to solidify their knowledge base in calculus 1. For more information about the math placement referred to in the "Enrollment Requirements", contact your academic advisor.
Equivalent - Duplicate Degree Credit Not Granted: APPM 1345 or ECON 1088 or MATH 1081 or MATH 1300 or MATH 1310 or MATH 1330
Requisites: Requires prerequisite course of APPM 1235 or MATH 1021 or MATH 1150 or MATH 1160 or MATH 1300 (minimum grade C-) or an ALEKS math exam taken in 2016 or earlier, or placement into calculus based on your admissions data and/or CU Boulder coursework.
Additional Information: GT Pathways: GT-MA1 - Mathematics
Arts Sci Core Curr: Quant Reasn Mathmat Skills
Arts Sci Gen Ed: Quantitative Reasoning Math

APPM 1351 (1) Calculus 1 Work Group
Provides problem-solving assistance to students enrolled in APPM 1350. Student groups work in collaborative learning environment. Student participation is essential.
Repeatable: Repeatable for up to 2.00 total credit hours.
Requisites: Requires enrollment in corequisite course of APPM 1350 or APPM 1345.

APPM 1360 (4) Calculus 2 for Engineers
Continuation of APPM 1350. Focuses on applications of the definite integral, methods of integration, improper integrals, Taylor's theorem, and infinite series.
Equivalent - Duplicate Degree Credit Not Granted: MATH 2300
Requisites: Requires prerequisite course of APPM 1345 or APPM 1350 or MATH 1300 (minimum grade C-).

APPM 1361 (1) Calculus 2 Work Group
Provides problem solving assistance for students enrolled in APPM 1360. Conducted in a collaborative learning environment. Student work groups solve calculus problems with assistance of facilitator.
Requisites: Requires enrollment in corequisite course of APPM 1360.

APPM 1390 (1) A Game for Calculus
Coaches students to implement study strategies geared specifically toward APPM Calculus in a structured, supportive, small group environment. Department consent required.
Repeatable: Repeatable for up to 3.00 total credit hours.

APPM 1650 (4) Python for Math and Data Science Applications
Uses Python to teach the fundamentals of computer programming with an emphasis on mathematical and statistical applications. Topics will include data types, data structures, iteration, visualization, and simulations. Techniques covered will be applicable to many scientific and technical fields. No prior programming experience is required. Formerly offered as a special topics course.
Requisites: Requires prerequisite or corequisite courses of APPM 1350 or APPM 1345 or MATH 1300 or MATH 1310 (all minimum grade C-).

APPM 2340 (4) Calculus 3 for Statistics and Data Science
Covers vectors and vector analysis, partial derivatives and the multivariable Taylor theorem, and multiple integrals. Introduces matrices and statistical applications.
Requisites: Requires prerequisite courses APPM 1360 or MATH 2300 (both minimum grade C-).

APPM 2350 (4) Calculus 3 for Engineers
Covers multivariable calculus, vector analysis, and theorems of Gauss, Green, and Stokes.
Equivalent - Duplicate Degree Credit Not Granted: MATH 2400
Requisites: Requires prerequisite course of APPM 1360 or MATH 2300 (minimum grade C-).

APPM 2351 (1) Calculus 3 Work Group
Provides problem solving assistance to students enrolled in APPM 2350. Conducted in a collaborative learning environment. Student work groups solve calculus problems with the assistance of a facilitator.
Requisites: Requires enrollment in corequisite course of APPM 2350.

APPM 2360 (4) Introduction to Differential Equations with Linear Algebra
Introduces ordinary differential equations, systems of linear equations, matrices, determinants, vector spaces, linear transformations, and systems of linear differential equations.
Equivalent - Duplicate Degree Credit Not Granted: both MATH 2130 and MATH 3430
Requisites: Requires prerequisite course of APPM 1360 or MATH 2300 (minimum grade C-).

APPM 2361 (1) Differential Equations Work Group
Provides problem solving assistance to students enrolled in APPM 2360. Conducted in a collaborative learning environment. Student work in groups solve ordinary differential equations and linear algebra problems with the assistance of a facilitator.
Requisites: Requires corequisite course of APPM 2360.

APPM 2450 (1) Calculus 3 Computer Lab
Selected topics in analytic geometry and calculus with a focus on symbolic computation using Mathematica.
Requisites: Requires a corequisite course of APPM 2350.

APPM 2460 (1) Differential Equations Computer Lab
Selected topics in differential equations and linear algebra with a focus on symbolic computation using MATLAB.
Requisites: Requires enrollment in a corequisite course of APPM 2360.

APPM 2720 (1-3) Open Topics in Lower Division Applied Mathematics
Provides a vehicle for the development and presentation of new topics that are accessible to lower division Applied Mathematics students. These topics have the potential to be incorporated into the core APPM curriculum.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Requires prerequisite course of APPM 1350 or MATH 1300 (minimum grade C-).
Grading Basis: Letter Grade

APPM 2750 (4) Java: Training, Mathematical Algorithms, and Mobile Apps
Preparatory course for Java programming. Provides necessary background for Java language: basic object-oriented concepts, analysis, and design. Learn to create Java applets, applications and mobile apps, create graphic context, and identify the key features of Java foundation classes as well as other Java-related technology. Material is taught in the context of mathematical algorithms from calculus. Department enforced requisite, knowledge of a programming language.
Requisites: Requires prerequisite course of APPM 1350 or MATH 1300 (minimum grade C-).

APPM 3010 (3) Chaos in Dynamical Systems
Introduces undergraduate students to chaotic dynamical systems. Topics include smooth and discrete dynamical systems, bifurcation theory, chaotic attractors, fractals, Lyapunov exponents, synchronization and networks of dynamical systems. Applications to engineering, biology and physics will be discussed.
Requisites: Requires prerequisite course of APPM 2360 or MATH 3430 (minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

APPM 3050 (3) Scientific Computing in Matlab
Topics covered include: approximations in computing, computer arithmetic, interpolation, matrix computations, nonlinear equations, optimization, and initial-value problems with emphasis on the computational cost, efficiency, and accuracy of algorithms. The problem sets are application-oriented with examples taken from orbital mechanics, physics, genetics, and fluid dynamics.
Requisites: Requires prerequisite course of APPM 2360 or MATH 3430 (minimum grade C-).

APPM 3170 (3) Discrete Applied Mathematics
Introduces students to ideas and techniques from discrete mathematics that are widely used in science and engineering. Mathematical definitions and proofs are emphasized. Topics include formal logic notation, proof methods; set theory, relations; induction, well-ordering; algorithms, growth of functions and complexity; integer congruences; basic and advanced counting techniques, recurrences and elementary graph theory. Other selected topics may also be covered.
Requisites: Requires a prerequisite of APPM 1360 or MATH 2300 (all minimum grade C-).

APPM 3310 (3) Matrix Methods and Applications
Introduces linear algebra and matrices with an emphasis on applications, including methods to solve systems of linear algebraic and linear ordinary differential equations. Discusses vector space concepts, decomposition theorems, and eigenvalue problems.
Equivalent - Duplicate Degree Credit Not Granted: MATH 2130 and MATH 2135
Requisites: Requires prerequisite course of APPM 2340 or APPM 2350 or APPM 2360 or MATH 2400 (minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

APPM 3311 (1) Matrix Methods Workgroup
Provides problem-solving assistance to students enrolled in APPM 3310. Student groups work in collaborative learning environment. Student participation is essential.
Requisites: Requires enrollment in corequisite course of APPM 3310.

APPM 3350 (3) Advanced Engineering Calculus
Extends the treatment of engineering mathematics beyond the topics covered in Calculus 3 and differential equations. Topics include non-dimensionalization, elementary asymptotics and perturbation theory, Reynold's transport theorem and extensions of Leibnitz's rule, as applied to continuum conservation equations, Hamiltonian formulations, Legendre and Laplace transforms, special functions and their orthogonality properties.
Requisites: Requires prerequisite course of APPM 2350 or MATH 2400 and APPM 2360 (all minimum grade C-).

APPM 3570 (3) Applied Probability
Studies axioms, counting formulas, conditional probability, independence, random variables, continuous and discrete distribution, expectation, joint distributions, moment generating functions, law of large numbers and the central limit theorem.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 3810 or MATH 4510 STAT 3100
Requisites: Requires a prerequisite or corequisite course of APPM 2350 or APPM 2340 or MATH 2400 (prereq minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

APPM 3650 (3) Algorithms and Data Structures in Python
Covers data structures (stacks, queues, linked lists, hash tables, heaps), algorithms (divide and conquer, sorting, greedy, graph, dynamic programming), and asymptotic complexity with an emphasis on applied math topics. Assignments will include programming projects written in Python
Requisites: Requires prerequisite courses of APPM 1650 and (APPM 1360 or MATH 2300) (minimum grade C-) or instructor consent.

APPM 4120 (3) Introduction to Operations Research
Studies linear and nonlinear programming, the simplex method, duality, sensitivity, transportation and network flow problems, some constrained and unconstrained optimization theory, and the Kuhn-Tucker conditions, as time permits.
Equivalent - Duplicate Degree Credit Not Granted: APPM 5120 and MATH 4120 and MATH 5120
Requisites: Requires a prerequisite course of APPM 3310 or MATH 2130 or MATH 2135 (minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

APPM 4320 (3) Introduction to Dynamics on Networks
Introduces modern approaches to model and analyze dynamical processes on complex networks. Many dynamical processes such as epidemic propagation, opinion formation, synchronization, and cascading processes take place on complex social or technological networks. This course will introduce the tools to understand the interplay between network structure and the outcome of these dynamical processes. Previously offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: APPM 5320
Requisites: Requires prerequisite courses of APPM 2360 and APPM 3310 (all minimum grade C-).
Grading Basis: Letter Grade

APPM 4350 (3) Methods in Applied Mathematics: Fourier Series and Boundary Value Problems
Reviews ordinary differential equations, including solutions by Fourier series. Physical derivation of the classical linear partial differential equations (heat, wave, and Laplace equations). Solution of these equations via separation of variables, with Fourier series, Fourier integrals, and more general eigenfunction expansions.
Equivalent - Duplicate Degree Credit Not Granted: APPM 5350
Requisites: Requires prerequisite courses of APPM 2350 or MATH 2400 and APPM 2360 (all minimum grade C-) and a prerequisite or corequisite course of APPM 3310 (prereq minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

APPM 4360 (3) Methods in Applied Mathematics: Complex Variables and Applications
Introduces methods of complex variables, contour integration and theory of residues. Applications include solving partial differential equations by transform methods, Fourier and Laplace transforms and Reimann-Hilbert boundary-value problems, conformal mapping to ideal fluid flow and/or electrostatics.
Equivalent - Duplicate Degree Credit Not Granted: APPM 5360
Requisites: Requires prerequisite courses of APPM 2350 or MATH 2400 and APPM 2360 (all minimum grade C-) and a prerequisite or corequisite course of APPM 3310 (prereq minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

APPM 4370 (3) Computational Neuroscience
Applies mathematical and computational methods to neuroscience. Techniques from linear algebra, differential equations, introductory dynamical systems, probability, stochastic processes, model validation, and machine learning will be learned and used. Neuroscience topics include neural spiking, network dynamics, probabilistic inference, learning, and plasticity. Will learn how the brain uses computational principles to enact decision making, vision, and memory. Recommended background includes linear algebra, differential equations, probability, and programming. Students will hone programming skills in MATLAB/Python and TensorFlow.
Equivalent - Duplicate Degree Credit Not Granted: APPM 5370
Requisites: Requires prerequisite courses of APPM 2360 and APPM 3310 (all minimum grade C-).
Recommended: Prerequisite APPM 3570/STAT 3100, STAT 2600 or CSCI 3022.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

APPM 4380 (3) Modeling in Applied Mathematics
An exposition of a variety of mathematical models arising in the physical and biological sciences. Students' modeling projects are presented in class. Topics may include: GPS navigation, medical imaging, ocean waves, and computerized facial recognition.
Equivalent - Duplicate Degree Credit Not Granted: APPM 5380
Requisites: Requires prerequisite courses of APPM 2350 or MATH 2400 and APPM 2360 (all minimum grade C-).
Recommended: Prerequisites APPM 3310 and APPM 4350 and APPM 4650.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

APPM 4390 (3) Modeling in Mathematical Biology
Investigates how complex systems in biology can be studied using applied mathematics. Examines several case studies which include topics from microbiology, enzyme reaction kinetics, neuroscience, ecology, epidemiology, physiology and bioengineering.
Equivalent - Duplicate Degree Credit Not Granted: APPM 5390
Requisites: Requires prerequisite courses of APPM 2360 and APPM 3310 or MATH 3130 or MATH 3135 (all minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

APPM 4440 (3) Undergraduate Applied Analysis 1
Provides a rigorous treatment of topics covered in Calculus 1 and 2. Topics include convergent sequences; continuous functions; differentiable functions; Darboux sums, Riemann sums, and integration; Taylor and power series and sequences of functions.
Requisites: Requires prerequisite courses of APPM 2350 or MATH 2400 and APPM 2360 (all minimum grade C-) and a prerequisite or corequisite course of APPM 3310 (prereq minimum grade C-).

APPM 4450 (3) Undergraduate Applied Analysis 2
Continuation of APPM 4440. Study of multidimensional analysis including n-dimensional Euclidean space, continuity and uniform continuity of functions of several variables, differentiation, linear and nonlinear approximation, inverse function and implicit function theorems, and a short introduction to metric spaces.
Requisites: Requires prerequisite course of APPM 4440 or MATH 3001 (minimum grade C-).

APPM 4490 (3) Theory of Machine Learning
Presents the underlying theory behind machine learning in proofs-based format. Answers fundamental questions about what learning means and what can be learned via formal models of statistical learning theory. Analyzes some important classes of machine learning methods. Specific topics may include the PAC framework, VC-dimension and Rademacher complexity.
Requisites: Requires prerequisite course of APPM 4440 (minimum grade C-).
Recommended: Prerequisite CSCI 5622 (minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

APPM 4510 (3) Data Assimilation in High Dimensional Dynamical Systems
Develops and analyzes approximate methods of solving the Bayesian inverse problem for high-dimensional dynamical systems. After briefly reviewing mathematical foundations in probability and statistics, the course covers the Kalman filter, particle filters, variational methods and ensemble Kalman filters. The emphasis is on mathematical formulation and analysis of methods.
Equivalent - Duplicate Degree Credit Not Granted: APPM 5510, STAT 4250 and STAT 5250
Requisites: Requires prerequisite courses of APPM 3310 and (STAT 4520 or MATH 4520). All minimum grade C-.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

APPM 4515 (3) High-Dimensional Probability for Data Science
Provides students with an exposition of the most recent methods of high-dimensional probability for the analysis of high dimensional datasets. Applications include randomized algorithms and high-dimensional random models of datasets.
Equivalent - Duplicate Degree Credit Not Granted: APPM 5515
Requisites: Requires prerequisite courses of APPM 3310 and APPM 3570 (minimum grade C-).

APPM 4530 (3) Stochastic Analysis for Finance
Studies mathematical theories and techniques for modeling financial markets. Specific topics include the binomial model, risk neutral pricing, stochastic calculus, connection to partial differential equations and stochastic control theory.
Equivalent - Duplicate Degree Credit Not Granted: APPM 5530, STAT 4230 and STAT 5230
Requisites: Requires prerequisite courses of APPM 3310 and APPM 3570, or STAT 3100, or MATH 4510 (all minimum grade C-).

APPM 4560 (3) Markov Processes, Queues, and Monte Carlo Simulations
Brief review of conditional probability and expectation followed by a study of Markov chains, both discrete and continuous time, including Poisson point processes. Queuing theory, terminology and single queue systems are studied with some introduction to networks of queues. Uses Monte Carlo simulation of random variables throughout the semester to gain insight into the processes under study.
Equivalent - Duplicate Degree Credit Not Granted: APPM 5560 and STAT 4100
Requisites: Requires prerequisite courses of APPM 3570 or STAT 3100 or MATH 4510 (all minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

APPM 4565 (3) Random Graphs
Introduces mathematical techniques, including generating functions, the first- and second-moment method and Chernoff bounds to study the most fundamental properties of the Erdos-Renyl model and other celebrated random graph models such as preferential attachment, fixed degree distribution, and stochastic block models.
Equivalent - Duplicate Degree Credit Not Granted: APPM 5565
Requisites: Requires prerequisite APPM 3570 or MATH 4510 (both minimum grade C).

APPM 4600 (4) Numerical Methods and Scientific Computing
Provides an introduction to numerical analysis and scientific computing. Numerical analysis topics include root finding, interpolation, quadrature, linear system solution techniques, and techniques for approximating eigenvalues. Scientific computing topics include code development and repository management in addition to an introduction to shared and distributed memory computing. Involves hands-on learning with weekly group interactions and a final project including a report and in-class presentation.
Requisites: Requires prerequisite course of APPM 3310 (minimum grade C-).
Recommended: Prerequisite knowledge of a programming language such as Python, and C++.

APPM 4610 (3) Numerical Differential Equations
Provides an introduction to the most commonly used techniques for numerically solving boundary value problems and time dependent problems and the corresponding linear systems. Topics include finite difference methods, the finite element method, the spectral method, spectral collocation methods, Euler and Runge-Kutta methods. Scientific computing skills such as advanced code and memory management will be developed. Involves hands-on learning with weekly group interactions and a final project. Department enforced prerequisite: Knowledge of a programming language such as Python, and C++ is required.
Requisites: Requires prerequisite courses of APPM 2360 and APPM 4600 (all minimum grade C-).

APPM 4650 (3) Intermediate Numerical Analysis 1
Focuses on numerical solution of nonlinear equations, interpolation, methods in numerical integration, numerical solution of linear systems, and matrix eigenvalue problems. Stresses significant computer applications and software. Department enforced prerequisite: knowledge of a programming language.
Equivalent - Duplicate Degree Credit Not Granted: MATH 4650
Requisites: Requires a prerequisite course of MATH 3430 or APPM 2360 and APPM 3310 (minimum grade C-).

APPM 4720 (1-3) Open Topics in Applied Mathematics
Provides a vehicle for the development and presentation of new topics that may be incorporated into the core courses in applied mathematics. Department enforced prerequisite: variable, depending on the topic, see instructor.
Equivalent - Duplicate Degree Credit Not Granted: APPM 5720
Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

APPM 4840 (1-3) Reading and Research in Applied Mathematics
Introduces undergraduate students to the research foci of the Department of Applied Mathematics. Department enforced prerequisite: variable depending on the topic.
Repeatable: Repeatable for up to 9.00 total credit hours.

APPM 4950 (1-3) Seminar in Applied Mathematics
Introduces undergraduate students to the research foci of the program in applied mathematics. It is also designed to be a capstone experience for the program's majors. Department enforced prerequisite: variable depending on the topic.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

STAT 2600 (4) Introduction to Data Science
Introduces students to importing, tidying, exploring, visualizing, summarizing, and modeling data and then communicating the results of these analyses to answer relevant questions and make decisions. Students will learn how to program in R using reproducible workflows. During weekly lab sessions students will collaborate with their teammates to pose and answer questions using real-world datasets.
Requisites: Requires prerequisite or corequisite of APPM 1350 or APPM 1345 or MATH 1300 (minimum grade C-).
Grading Basis: Letter Grade

STAT 3100 (3) Applied Probability
Studies axioms, counting formulas, conditional probability, independence, random variables, continuous and discrete distribution, expectation, joint distributions, moment generating functions, law of large numbers and the central limit theorem.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 3810 or MATH 4510 APPM 3570
Requisites: Requires a prerequisite or corequisite course of APPM 2350 or APPM 2340 or MATH 2400 (prereq minimum grade C-).

STAT 3101 (1) Probability Workgroup
Provides problem-solving assistance to students enrolled in STAT 3100 and APPM 3570. Student groups work in collaborative learning environment. Student participation is essential.
Requisites: Requires enrollment in corequisite course of STAT 3100 or APPM 3570.

STAT 3400 (3) Applied Regression
Introduces methods, theory, and applications of linear statistical models, covering topics such as estimation, residual diagnostics, goodness of fit, transformations, and various strategies for variable selection and model comparison. Examples will be demonstrated using statistical programming language R.
Requisites: Requires prerequisite STAT 2600 and STAT 3100 or MATH 4510 (all minimum grade C-). Requires corequisite APPM 3310.
Grading Basis: Letter Grade

STAT 4000 (3) Statistical Methods and Application I
Introduces exploratory data analysis, probability theory, statistical inference, and data modeling. Topics include discrete and continuous probability distributions, expectation, laws of large numbers, central limit theorem, statistical parameter estimation, hypothesis testing, and regression analysis. Considerable emphasis on applications in the R programming language.
Equivalent - Duplicate Degree Credit Not Granted: STAT 5000
Requisites: Requires prerequisite APPM 1360 or MATH 2300 (both minimum grade C-).
Grading Basis: Letter Grade

STAT 4010 (3) Statistical Methods and Applications II
Expands upon statistical techniques introduced in STAT 4000. Topics include modern regression analysis, analysis of variance (ANOVA), experimental design, nonparametric methods, and an introduction to Bayesian data analysis. Considerable emphasis on application in the R programming language.
Equivalent - Duplicate Degree Credit Not Granted: STAT 5010
Requisites: Requires prerequisite STAT 4000 (minimum grade C-).
Grading Basis: Letter Grade

STAT 4100 (3) Markov Processes, Queues, and Monte Carlo Simulations
Brief review of conditional probability and expectation followed by a study of Markov chains, both discrete and continuous time, including Poisson point processes. Queuing theory, terminology and single queue systems are studied with some introduction to networks of queues. Uses Monte Carlo simulation of random variables throughout the semester to gain insight into the processes under study.
Equivalent - Duplicate Degree Credit Not Granted: APPM 4560 and APPM 5560
Requisites: Requires prerequisite courses of APPM 3570 or STAT 3100 or MATH 4510 (all minimum grade C-).

STAT 4230 (3) Stochastic Analysis for Finance
Studies mathematical theories and techniques for modeling financial markets. Specific topics include the binomial model, risk neutral pricing, stochastic calculus, connection to partial differential equations and stochastic control theory.
Equivalent - Duplicate Degree Credit Not Granted: APPM 4530, APPM 5530 and STAT 5230
Requisites: Requires prerequisite courses of APPM 3310 and APPM 3570, or STAT 3100, or MATH 4510 (all minimum grade C-).

STAT 4250 (3) Data Assimilation in High Dimensional Dynamical Systems
Develops and analyzes approximate methods of solving the Bayesian inverse problem for high-dimensional dynamical systems. After briefly reviewing mathematical foundations in probability and statistics, the course covers the Kalman filter, particle filters, variational methods and ensemble Kalman filters. The emphasis is on mathematical formulation and analysis of methods.
Equivalent - Duplicate Degree Credit Not Granted: APPM 5510, APPM 4510 and STAT 5250
Requisites: Requires prerequisite courses of APPM 3310 and (STAT 4520 or MATH 4520). All minimum grade C-.

STAT 4350 (3) Applied Deep Learning 1
Introduces students to state-of-the-art deep learning techniques employed in the industry. This course will focus on training neural networks and computer vision, including image classification and transformation, object detection, and facial recognition. Advanced topics will include domain adaptation and learning techniques. There will be an emphasis on reading current literature.
Equivalent - Duplicate Degree Credit Not Granted: STAT 5350
Requisites: Requires prerequisite courses of APPM 3570 or STAT 3100 and STAT 3400 or STAT 4520 and APPM 4650 or APPM 4600 (all minimum grade C-).
Recommended: Prerequisite knowledge of Python is required, and familiarity with TensorFlow and PyTorch is a plus but is not a requirement.

STAT 4360 (3) Applied Deep Learning 2
Introduces students to state-of-the-art deep learning techniques employed in the industry. This course will focus on natural language processing, multimodal learning, generative and graph neural networks, speech and music recognition, and reinforcement learning. Students will learn software engineering techniques using Python. There will be an emphasis on reading current literature.
Equivalent - Duplicate Degree Credit Not Granted: STAT 5360
Requisites: Requires prerequisite course of STAT 4350 (minimum grade C-).

STAT 4400 (3) Advanced Statistical Modeling
Introduces methods, theory and applications of modern statistical models, from linear to hierarchical linear models, to generalized hierarchical linear models, including hierarchical logistic and hierarchical count regression models. Topics such as estimation, residual diagnostics, goodness of fit, transformations, and various strategies for variable selection and model comparison will be discussed in depth. Examples will be demonstrated using statistical programming language R.
Equivalent - Duplicate Degree Credit Not Granted: STAT 5400
Requisites: Requires prerequisite STAT 3400 and (STAT 4520 or STAT 5010) (all minimum grade C-).
Grading Basis: Letter Grade

STAT 4430 (3) Spatial Statistics
Introduces the theory of spatial statistics with applications. Topics include basic theory for continuous stochastic processes, spatial prediction and kriging, simulation, geostatistical methods, likelihood and Bayesian approaches, spectral methods and an overview of modern topics such as nonstationary models, hierarchical modeling, multivariate processes, methods for large datasets and connections to splines.
Equivalent - Duplicate Degree Credit Not Granted: STAT 5430
Requisites: Requires prerequisite courses of STAT 3400 AND APPM 3310 (all minimum grade C-).
Recommended: Prerequisites STAT 4520 OR STAT 5520 OR MATH 4520 OR MATH 5520.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

STAT 4520 (3) Introduction to Mathematical Statistics
Examines point and confidence interval estimation. Principles of maximum likelihood, sufficiency, and completeness: tests of simple and composite hypotheses, linear models, and multiple regression analysis if time permits. Analyzes various distribution-free methods.
Equivalent - Duplicate Degree Credit Not Granted: STAT 5520 and MATH 4520 and MATH 5520
Requisites: Requires prerequisites APPM 3570 or STAT 3100 or MATH 4510 (all minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

STAT 4540 (3) Introduction to Time Series
Studies basic properties, trend-based models, seasonal models modeling and forecasting with ARIMA models, spectral analysis and frequency filtration.
Equivalent - Duplicate Degree Credit Not Granted: STAT 5540 and MATH 4540 and MATH 5540
Requisites: Requires prerequisite course of APPM 4520 or STAT 4520 or MATH 4520 (minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

STAT 4610 (3) Statistical Learning
Consists of applications and methods of statistical learning. Reviews multiple linear regression and then covers classification, regularization, splines, tree-based methods, support vector machines, unsupervised learning and Gaussian process regression.
Equivalent - Duplicate Degree Credit Not Granted: STAT 5610
Requisites: Requires prerequisite course of STAT 3400 (minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

STAT 4630 (3) Computational Bayesian Statistics
Introduces Bayesian statistics, normal and non-normal approximation to likelihood and posteriors, the EM algorithm, data augmentation, and Markov Chain Monte Carlo (MCMC) methods. Additionally, introduces more advanced MCMC algorithms and requires significant statistical computing. Examples from a variety of areas, including biostatistics, environmental sciences, and engineering, will be given throughout the course.
Equivalent - Duplicate Degree Credit Not Granted: STAT 5630
Requisites: Requires prerequisite courses of (APPM 4560 or STAT 4100) and STAT 3400 and (STAT 4520 or MATH 4520) (minimum grade C-).
Recommended: Prerequisite prior programming experience.

STAT 4640 (3) Capstone in Statistics and Data Science
Course provides senior-level and graduate students the opportunity to apply the knowledge, skills, and abilities developed throughout the Statistics and Data Science major. Working in teams, students undertake a data-driven problem presented by domain experts from government, industry, or academia. The course provides valuable real-world experience for students intending to pursue graduate education or technical careers. Topics include team building, problem solving, research methods, project management, data ethics, and clear communication (oral, written, and visual).
Equivalent - Duplicate Degree Credit Not Granted: STAT 5640
Requisites: Requires prerequisite course of STAT 4400 or STAT 4610 (minimum grade C-)
Grading Basis: Letter Grade

STAT 4680 (3) Statistics and Data Science Collaboration
Educates and trains students to become effective interdisciplinary collaborators by developing the communication and collaboration skills necessary to apply technical statistics and data science skills to help domain experts answer research or policy questions. Topics include structuring effective meetings and projects; communicating statistics to non-statisticians; using peer feedback, self-reflection and video analysis to improve collaboration skills; creating reproducible statistical workflows; working ethically.
Equivalent - Duplicate Degree Credit Not Granted: STAT 5680
Requisites: Requires a prerequisite course of STAT 4400 or STAT 4010 (minimum grade C-).
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

STAT 4690 (2) Advanced Statistical Collaboration
Educates and trains students to become advanced interdisciplinary collaborators by developing and refining the communication, collaboration and technical statistics and data science skills necessary to collaborate with domain experts to answer research questions. Students work on multiple projects. Discussions center on technical skills necessary to solve research problems and video analysis to improve communication and collaboration skills.
Equivalent - Duplicate Degree Credit Not Granted: STAT 5690
Requisites: Requires prerequisite course of STAT 4680 or STAT 5680 (minimum grade C-).
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

STAT 4700 (3) Philosophical and Ethical Issues in Statistics
Introduces students to philosophical issues that arise in statistical theory and practice. Topics include interpretations of probability, philosophical paradigms in statistics, inductive inference, causality, reproducible, and ethical issues arising in statistics and data analysis.
Equivalent - Duplicate Degree Credit Not Granted: STAT 5700
Requisites: Requires prerequisites STAT 4520 or STAT 3400 or STAT 4000 (all minimum grade C-).
Grading Basis: Letter Grade

STAT 4720 (1-3) Open Topics in Statistics and Data Science
Provides a vehicle for the development and presentation of new topics that may be incorporated into the core courses in statistics and data science. Department enforced prerequisite: variable, depending on the topic, see instructor.
Equivalent - Duplicate Degree Credit Not Granted: STAT 5720
Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

STAT 4840 (1-3) Reading and Research in Statistics
Introduces undergraduate students to research in statistics and data science. Department enforced prerequisite: variable depending on the topic.
Repeatable: Repeatable for up to 9.00 total credit hours.

Applied Mathematics - Bachelor of Science (BSAM)

The Department of Applied Mathematics in the College of Arts and Sciences offers a Bachelor of Science degree in applied mathematics through the College of Engineering and Applied Science. The BS degree is designed to prepare graduates for exciting and diverse professional careers, and for graduate study in a wide variety of disciplines.

Courses at the undergraduate level provide training in a broad range of mathematical techniques and problem--solving strategies. These courses teach the concepts and methods central to applications of linear algebra, ordinary and partial differential equations, numerical analysis, probability, statistics and data science, complex variables and nonlinear dynamics. Since applied mathematicians often are involved in interdisciplinary work, the BS degree requires an in-depth knowledge of some area of science or engineering where mathematics is used. This knowledge prepares graduates to successfully communicate and cooperate with engineers and scientists. The BS degree also requires knowledge of a programming language and skill in using the computer.

For more information, visit the department's Prospective Students (https://www.colorado.edu/amath/prospective-students/undergraduate/) webpage.

Research Opportunities

The Department of Applied Math offers a broad range of undergraduate research opportunities funded by multiple agencies including the National Science Foundation. Working with faculty, applied math students have developed solutions to a variety of problems in fluids, dynamical systems, data analysis, networks, signal processing, math biology, math education and numerics. Students can do both theoretical and experimental work in the Dispersive Hydrodynamics Lab (https://www.colorado.edu/amath/research/dispersive-hydrodynamics-lab/), gain practical experience in statistics and data science through LISA, the Laboratory for Interdisciplinary Statistical Analysis (https://www.colorado.edu/lab/lisa/) or work on individual research projects with departmental and affiliated faculty.

Students can gain professional exposure through the student chapter of the Society of Industrial and Applied Mathematics (SIAM) or through the Data Buffs, the student chapter of the American Statistical Association. Applied Math also has a local chapter of AWM, the Association for Women in Mathematics.

Requirements

Required Courses and Credits

The BS degree in applied mathematics requires the satisfactory completion of a minimum of 128 credit hours as follows. All prerequisite courses must be passed with a C- or better.

All AMEN-BS majors are required to take a minimum of 19 credits in APPM or STAT on the CU Boulder campus, with a minimum of 16 credits being upper-division APPM or STAT coursework.

Code	Title	Credit Hours
Calculus		
APPM 1350	Calculus 1 for Engineers	4
or APPM 1345	Calculus 1 with Algebra, Part B	
or MATH 1300	Calculus 1	
APPM 1360	Calculus 2 for Engineers	4
or MATH 2300	Calculus 2	
APPM 2350	Calculus 3 for Engineers	4
or MATH 2400	Calculus 3	
Computing Experience		
APPM 1650	Python for Math and Data Science Applications	4
or CSCI 1300	Computer Science 1: Starting Computing	
or CSCI 2275	Programming and Data Structures	
or CHEN 1310	Introduction to Engineering Computing	
or ECEN 1310	Introduction to C Programming	
Science Requirement		
PHYS 1110	General Physics 1	4
or PHYS 1115	General Physics 1 for Majors	
PHYS 1120	General Physics 2	4
or PHYS 1125	General Physics 2 for Majors	
PHYS 1140	Experimental Physics 1 [1]	1

Select one of the following options (including at least 1 credit of laboratory science): [2]		*4*
CHEN 1201 & CHEM 1114	General Chemistry for Engineers 1 and Laboratory in General Chemistry 1	
CHEN 1211 & CHEM 1221	Accelerated Chemistry for Engineers and Engineering General Chemistry Lab	
CHEM 1113 & CHEM 1114	General Chemistry 1 and Laboratory in General Chemistry 1	
EBIO 1210 & EBIO 1220 & EBIO 1230 & EBIO 1240	General Biology 1 and General Biology 2 and General Biology Laboratory 1 and General Biology Laboratory 2	
MCDB 1150 & MCDB 2150	Introduction to Cellular and Molecular Biology and Principles of Genetics (and one 2-credit lab) [3]	
PHYS 2130 & PHYS 2150	Introduction to Quantum Mechanics and Its Applications and Experimental Physics 2	
PHYS 2170 & PHYS 2150	Foundations of Modern Physics and Experimental Physics 2	
APPM Courses		
APPM 2360	Introduction to Differential Equations with Linear Algebra	4
or MATH 2130 & MATH 3430	Introduction to Linear Algebra for Non-Mathematics Majors and Ordinary Differential Equations	
or MATH 2135 & MATH 3430	Introduction to Linear Algebra for Mathematics Majors and Ordinary Differential Equations	
APPM 3310	Matrix Methods and Applications	3
APPM 4350	Methods in Applied Mathematics: Fourier Series and Boundary Value Problems	3
APPM 4360	Methods in Applied Mathematics: Complex Variables and Applications	3
APPM 4440	Undergraduate Applied Analysis 1	3
or MATH 3001	Analysis 1	
or MATH 3140	Abstract Algebra 1	
APPM 4600	Numerical Methods and Scientific Computing	4
APPM or STAT Senior Sequence		
Complete a two-semester course sequence of applied mathematics or statistics courses numbered 4000 or above, chosen from the following [4]		6
APPM 4380 & APPM 4390	Modeling in Applied Mathematics and Modeling in Mathematical Biology	
APPM 4440 & APPM 4450	Undergraduate Applied Analysis 1 and Undergraduate Applied Analysis 2	
APPM 4600 & APPM 4610	Numerical Methods and Scientific Computing and Numerical Differential Equations	
APPM 3570 & STAT 4520	Applied Probability and Introduction to Mathematical Statistics [4]	
APPM 3570 & APPM 4560	Applied Probability and Markov Processes, Queues, and Monte Carlo Simulations [4]	
APPM 4560 & STAT 4520	Markov Processes, Queues, and Monte Carlo Simulations and Introduction to Mathematical Statistics	
STAT 4000 & STAT 4010	Statistical Methods and Application I and Statistical Methods and Applications II	
APPM or STAT Courses Numbered 3000 or Above		
Select additional coursework to bring total upper-division APPM or STAT credit hours to at least 25 including required courses above. [5]		3
Area of Application		
A minimum of 24 credit hours in Engineering, Arts & Sciences, Business, or other approved courses with significant mathematical content (see "Recommended Areas of Application").		24
Humanities, Social Sciences and Writing Requirements [6]		**18**
Free Electives		**28**
Free electives should be chosen to bring the total credit hours to a minimum of 128.		
Total Credit Hours		**128**

1 Waived for students also completing B.S. in Aerospace Engineering Sciences. If waived, student completes additional Free Elective credits.

2 Students completing a B.S. in Aerospace Engineering Sciences or a B.S. in Mechanical Engineering may use MCEN 1024 to complete this requirement. If this course is used to fulfill this requirement, one additional credit of Free Electives is needed.

3 Plus one MCDB lab course for 2 credits, chosen from MCDB 1161, MCDB 1171, MCDB 1181, or MCDB 2171.

4 APPM 3570 is the only 3000-level course that can be used to satisfy this requirement.

5 No more than 3 credit hours of APPM 4840 may count towards these 25. No more than 6 credit hours of independent study are allowed for credit towards the BS degree in applied mathematics.

6 Students may choose from the list of college-approved humanities and social sciences (HSS) and writing requirements (https://www.colorado.edu/engineering-advising/get-your-degree/degree-requirements/humanities-social-sciences-and-writing-requirements/).

Recommended Areas of Application

To fulfill their degree requirements, applied mathematics majors are required to take a coherent set of 24 credit hours in Engineering, Arts & Sciences, or Business courses with significant mathematical content. Areas of application must include:

- At least 6 credit hours in courses numbered 3000 or above.
- At least 15 credit hours in courses numbered 2000 or above.

Several possible options are listed below. It should be stressed that the listed courses and options are *suggestions* and not *requirements*. Students may formulate their own option to meet their educational and career goals, but final course selection should be made in consultation with an applied math advisor or faculty mentor.

Students cannot double count area of application courses with credits applying toward other requirements for their Applied Math degree, including the APPM/STAT Senior Sequence, Humanities & Social Science,

computing, or science requirement. Students cannot count coursework toward their area of application that is equivalent to another course that is already applying toward degree requirements (e.g., a student who has completed CHEN 1201 for a degree requirement cannot apply CHEM 1113 toward their area of application).

For additional information and planning advice, consult the Applied Mathematics Undergraduate Curriculum Guide on the Applied Mathematics Major webpage (https://www.colorado.edu/amath/academics/undergraduate-program/applied-math-major-bs/).

I. Actuarial

Students must be admitted to the Actuarial Studies and Quantitative Finance Certificate Program (https://www.colorado.edu/program/asqf/) to enroll in required BCOR/FNCE courses.

Students cannot double count area of application courses with credits applying toward other requirements for their Applied Math degree, including the upper division APPM, APPM/STAT Senior Sequence, Humanities & Social Science, computing, or science requirement.

Code	Title	Credit Hours
BCOR 2203	Principles of Accounting I [1]	1.5
BCOR 2204	Principles of Financial Management [1]	1.5
ECON 3070	Intermediate Microeconomic Theory	4
ECON 4070	Topics in Microeconomics	3
FNCE 3010	Corporate Finance	3
APPM 3570	Applied Probability [2]	3
STAT 4520	Introduction to Mathematical Statistics	3
STAT 4540	Introduction to Time Series	3
At least one of the following courses must be taken		3
FNCE 3030	Investment and Portfolio Management	-
FNCE 4040	Derivative Securities	-
ECON 4818	Introduction to Econometrics	-
Total Credit Hours		**25**

1. The prerequisites for BCOR 2203 and BCOR 2204 are waived for students enrolled in the Actuarial Studies and Quantitative Finance Certificate Program (https://www.colorado.edu/program/asqf/).
2. The first actuarial examination, Exam P/1, can be taken after completing this course.

II. Aerospace Engineering Sciences

Students who pursue this area of application are usually double majors. Students who wish to enroll in ASEN courses without being a double major should see their applied mathematics advisor for next steps.

III. Chemical Engineering

Students completing this area of application must take at least 24 credits of coursework in this area. See recommended courses below:

Code	Title	Credit Hours
Recommended courses include:		
CHEN 1310	Introduction to Engineering Computing	
CHEN 2120	Chemical Engineering Material and Energy Balances	
CHEN 3200	Chemical Engineering Fluid Mechanics	
CHEN 3210	Chemical Engineering Heat and Mass Transfer	
CHEN 3220	Chemical Engineering Separations	
CHEN 3320	Chemical Engineering Thermodynamics 1	
CHEN 3660	Energy Fundamentals	
CHEN 4330	Kinetics and Reactor Design	
CHEN 4521	Physical Chemistry for Engineers	
CHEM 3311	Organic Chemistry 1	

IV. Civil, Environmental and Architectural Engineering

Students completing this area of application must take at least 24 credits of AREN/CVEN/EVEN coursework (see recommended courses below). Students completing this area of emphasis may wish to complete a minor in Architectural (https://catalog.colorado.edu/undergraduate/colleges-schools/engineering-applied-science/programs-study/civil-environmental-architectural-engineering/architectural-engineering-minor/#requirementstext) or Civil (https://catalog.colorado.edu/undergraduate/colleges-schools/engineering-applied-science/programs-study/civil-environmental-architectural-engineering/civil-engineering-minor/#requirementstext) Engineering.

Students wishing to enroll in AREN or CVEN courses that are restricted to majors only must do so through the departmental course request form (https://www.colorado.edu/engineering-advising/departmental-course-request-forms/).

Code	Title	Credit Hours
Recommended Basic Courses		
AREN 2110	Thermodynamics	3
CVEN 2121	Analytical Mechanics 1	3
CVEN 3161	Mechanics of Materials 1	3
CVEN 3313	Theoretical Fluid Mechanics	3
or AREN 2120	Fluid Mechanics and Heat Transfer	
Additional Courses		
Select two courses from any one of the following groups plus additional AREN, CVEN, or EVEN courses to bring the total credit hours to 24:		12
Environmental and Water Resources Engineering		
CVEN 3414	Fundamentals of Environmental Engineering	
CVEN 4333	Engineering Hydrology	
Structural Engineering		
CVEN 3525	Structural Analysis	
CVEN 3708	Geotechnical Engineering 1	
CVEN 4545	Steel Design	
CVEN 4555	Reinforced Concrete Design	
Architectural Engineering		
AREN 2050	Building Materials and Systems	
AREN 3010	Energy Efficient Buildings	
AREN 3540	Illumination I	
Total Credit Hours		**24**

V. Computational Biology and Bioinformatics

The following concentration of selected courses from computer science, biology and chemistry provide the foundation for work in mathematical biology, computational biology and/or bioinformatics.

Complete at least 24 credits from the following:

Code	Title	Credit Hours
CSCI 2270	Computer Science 2: Data Structures	4
or APPM 3650	Algorithms and Data Structures in Python	
CHEM 3311 & CHEM 3321	Organic Chemistry 1 and Laboratory in Organic Chemistry 1	5
MCDB 1150 & MCDB 1152	Introduction to Cellular and Molecular Biology and Problem Solving Co-Seminar for Introduction to Molecular and Cellular Biology	4
MCDB 2150 & MCDB 2152	Principles of Genetics and Problem Solving Co-Seminars for Genetics	4
MCDB 3135 & MCDB 3140	Molecular Biology and Cell Biology Laboratory	5
CSCI 3104	Algorithms	4
CSCI 4314	Dynamic Models in Biology	3

VI. Computer Science

Students completing this area of application should have a minor in computer science (https://catalog.colorado.edu/undergraduate/colleges-schools/engineering-applied-science/programs-study/computer-science/computer-science-minor/) plus take additional CSCI coursework to bring the total to at least 24 credits.

VII. Creative Technology and Design

Students interested in this area of application should complete requirements for the Creative Technology and Design Minor (https://www.colorado.edu/atlas/ctd-minor/) plus additional ATLS or CSCI coursework to bring the total to at least 24 credits.

Students must declare the Creative Technology and Design Minor (https://www.colorado.edu/atlas/ctd-minor/) to enroll in ATLS classes.

VIII. Electrical, Computer & Energy Engineering

Students interested in this area of application should consult with the Electrical, Computer and Energy Engineering website (https://www.colorado.edu/ecee/academics/undergraduate-programs/minor-programs/), as several minors are available. A minimum of 24 credits is required.

IX. Engineering Physics/Physics

Students completing the physics area of application should complete the Minor in Physics (https://catalog.colorado.edu/undergraduate/colleges-schools/arts-sciences/programs-study/physics/physics-minor/), plus additional PHYS coursework to bring the total to at least 24 credits.

Note: PHYS 1230, PHYS 1240, PHYS 2010 and PHYS 2020 cannot count toward this area of application.

X. Finance

Students must be admitted to the Actuarial Studies and Quantitative Finance Certificate Program (https://www.colorado.edu/program/asqf/) to enroll in required BCOR/FNCE courses.

Students cannot double count area of application courses with credits applying toward other requirements for their Applied Math degree, including the upper division APPM, APPM/STAT Senior Sequence, Humanities & Social Science, computing, or science requirement.

Code	Title	Credit Hours
Required Courses		
BCOR 2203	Principles of Accounting I	1.5
BCOR 2204	Principles of Financial Management	1.5
FNCE 3010	Corporate Finance	3
ECON 3070	Intermediate Microeconomic Theory	4
ECON 4818	Introduction to Econometrics	3
Complete a minimum of two of the following courses		6
ACCT 3220	Corporate Financial Reporting 1	
FNCE 3030	Investment and Portfolio Management	
FNCE 4040	Derivative Securities	
FNCE 4820	Topics in Finance	
FNCE 4070	Financial Markets and Institutions	
Additional courses that may be taken to bring the total to 24 credits		5
ACCT 3230	Corporate Financial Reporting 2	
FNCE 4000	Financial Institutions Management	
FNCE 4050	Capital Investment Analysis	
FNCE 4060	Special Topics in Finance	
Total Credit Hours		**24**

XI. Geographic Information Science (GIS)

Students interested in this area of application must complete the requirements for the Certificate in GIS and Computational Science (https://www.colorado.edu/geography/undergraduate-certificate-gis-and-computational-science/) plus additional GIS Electives to bring the total to at least 24 credits.

XII. Geological Sciences

Students interested in this area of application must complete the requirements for the Minor in Geology (https://catalog.colorado.edu/undergraduate/colleges-schools/arts-sciences/programs-study/geological-sciences/geology-minor/) plus additional GEOL Electives to bring the total to at least 24 credits.

XIII. Mechanical Engineering

Students completing this area of application must take at least 24 credits of MCEN coursework (see recommended courses below).

Students wishing to enroll in MCEN courses that are restricted to majors must do so through the departmental course request form (https://www.colorado.edu/engineering-advising/departmental-course-request-forms/).

Code	Title	Credit Hours
Recommended Courses		
MCEN 2023	Statics and Structures	3
MCEN 2043	Dynamics	3
MCEN 2063	Mechanics of Solids	3
MCEN 3012	Thermodynamics	3
MCEN 3021	Fluid Mechanics	3
MCEN 3022	Heat Transfer	3
MCEN 3025	Component Design	3
MCEN 4043	System Dynamics	3

XIV. Statistics and Data Science

Students interested in this area of application must complete the requirements for the Statistics and Data Science Minor (https://catalog.colorado.edu/undergraduate/colleges-schools/arts-sciences/programs-study/applied-mathematics/statistics-minor/) plus additional Minor electives to bring the total to at least 24 credits.

Note: the 12 upper-division statistics credits required for the minor may not be counted toward the 25 credits of upper-division math courses for the bachelor's degree.

XV. Advisor Approved Option

Students may formulate their own area of application to meet their educational and career goals.

The area of application must have a focused theme that is significantly different from the areas of application listed above. Final course selection must be approved by an applied math advisor or faculty mentor.

Recommended Four-Year Plan of Study

Students must complete 128 hours for graduation.

Year One		
Fall Semester		**Credit Hours**
APPM 1350	Calculus 1 for Engineers	4
CHEN 1201	General Chemistry for Engineers 1	4
CHEM 1114	Laboratory in General Chemistry 1	1
APPM 1650	Python for Math and Data Science Applications	4
COEN 1500	CEAS First Year Seminar	1
Humanities or Social Sciences Elective [1]		2
	Credit Hours	**16**
Spring Semester		
APPM 1360	Calculus 2 for Engineers	4
PHYS 1110	General Physics 1	4
Free Electives		3
Area of Application Course		3
Humanities or Social Sciences Elective [1]		3
	Credit Hours	**17**
Year Two		
Fall Semester		
APPM 2350	Calculus 3 for Engineers	4
PHYS 1120	General Physics 2	4
PHYS 1140	Experimental Physics 1	1
APPM 3170	Discrete Applied Mathematics (Recommended, but not required)	3
Humanities or Social Sciences Elective [1]		3
	Credit Hours	**15**
Spring Semester		
APPM 2360	Introduction to Differential Equations with Linear Algebra	4
APPM 2460	Differential Equations Computer Lab (Recommended, but not required)	1
APPM 3310	Matrix Methods and Applications	3
Area of Application course		3
Free Electives		3
Humanities or Social Sciences Elective [1]		3
	Credit Hours	**17**
Year Three		
Fall Semester		
APPM 4350	Methods in Applied Mathematics: Fourier Series and Boundary Value Problems	3
APPM 4440	Undergraduate Applied Analysis 1	3

	Total Credit Hours	**128**

1. Students may choose courses from the list of college-approved humanities and social sciences (HSS) electives (http://www.colorado.edu/engineering/academics/policies/hss/).
2. Students may choose a course from the list of college-approved writing courses (http://www.colorado.edu/engineering/academics/policies/hss/).

Learning Outcomes

Content Knowledge

Students completing the undergraduate degree in Applied Mathematics will be broadly knowledgeable in a number of mathematical areas including:

- Differential and integral calculus in one and several variables.
- Vector spaces and matrix algebra.
- Ordinary and partial differential equations.
- At least one programming language.
- At least one application software package in either mathematics or statistics.
- Methods of complex variables as used in applications.
- Numerical solutions of linear and nonlinear problems.
- An in-depth knowledge of an area of application (statistics, an engineering discipline, a natural science field, or one of the quantitative areas of business and economics).

Student Outcomes

Upon graduation, students will:

- Acquire foundational knowledge in calculus, ordinary and partial differential equations, vector spaces and matrix methods, analysis, numerical analysis, complex variables, and probability and statistics.
- Develop proficiency in at least one programming language.
- Acquire an in-depth knowledge of an area of application (statistics, an engineering or natural science field, or one of the quantitative areas of finance and economics).
- Acquire problem-solving and modeling skills that allow them to formulate a real-world problem in a mathematical setting and implement a numerical solution.
- The ability to clearly and concisely, in oral and in written forms, communicate analytic arguments.

Bachelor's–Accelerated Master's Degree Program(s)

The bachelor's–accelerated master's (BAM) degree program options offer currently enrolled CU Boulder undergraduate students the opportunity to receive a bachelor's and master's degree in a shorter period of time. Students receive the bachelor's degree first but begin taking graduate coursework as undergraduates (typically in their senior year).

Because some courses are allowed to double count for both the bachelor's and the master's degrees, students receive a master's degree in less time and at a lower cost than if they were to enroll in a stand-alone master's degree program after completion of their baccalaureate degree. In addition, staying at CU Boulder to pursue a bachelor's–accelerated master's program enables students to continue working with their established faculty mentors.

BS and MS in Applied Mathematics

Admissions Requirements

In order to gain admission to the BAM program named above, a student must meet the following criteria:

- Have a cumulative GPA of 3.40 or higher.
- Have a minimum GPA of 3.40 in APPM, STAT, and MATH courses.
- Have at least junior class standing.
- Completion of all MAPS requirements and no deficiencies remaining (students admitted to CU Boulder prior to Summer 2023 only).
- Satisfactory completion of at least two APPM courses numbered 3000 or higher.
- Two letters of recommendation from CU Boulder Department of Applied Mathematics faculty.

Program Requirements

Students may take up to and including 12 graduate credit hours while in the undergraduate program which can later be used toward the master's degree. However, only six credits may be double counted toward the bachelor's degree and the master's degree. Students must apply to graduate with the bachelor's degree, and apply to continue with the master's degree, early in the semester in which the undergraduate requirements will be completed.

Please see the Applied Mathematics/Applied Mathematics BAM degree program (https://www.colorado.edu/amath/academics/bs-ms-program/) webpage for more information.

Biomedical Engineering

Biomedical engineering is an exciting, multidisciplinary field that lies at the interface of medicine, biology and engineering. Biomedical engineers use engineering principles to analyze and solve problems in biology and medicine, providing an overall enhancement to healthcare. Biomedical engineers create technology to save lives and improve the quality of life. Much of the equipment in hospitals and clinics across the globe was designed, built and tested by biomedical engineers. At the same time, biomedical engineers employ concepts learned from biology and medicine to generate new (biomimetic) engineering designs in fields such as robotics and artificial intelligence.

Course code for this program is BMEN.

Bachelor's Degree

- Biomedical Engineering - Bachelor of Science (BSBM) (p. 865)

Minor

- Biomedical Engineering - Minor (p. 870)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Ahmed, Alaa A. (https://experts.colorado.edu/display/fisid_144736/)
Assistant Professor; PhD, University of Michigan

Alistar, Mirela (https://experts.colorado.edu/display/fisid_164177/)
Assistant Professor; PhD, Technical University of Denmark

Allen, Mary Ann (https://experts.colorado.edu/display/fisid_149077/)
Research Associate Professor; PhD, University of Colorado Boulder

Borden, Mark A. (https://experts.colorado.edu/display/fisid_148514/)
Associate Professor; PhD, University of California, Davis

Bottenus, Nick (https://experts.colorado.edu/individual/fisid_165371/)
Assistant Professor; PhD, Duke University

Bruns, Carson J. (https://experts.colorado.edu/display/fisid_159851/)
Assistant Professor; PhD, Northwestern University

Calve, Sarah (https://experts.colorado.edu/individual/fisid_165779/)
Associate Professor; PhD, University of Michigan

Cha, Jennifer N. (https://experts.colorado.edu/display/fisid_151746/)
Professor; PhD, University of California, Santa Barbara

Clark, Torin K. (https://experts.colorado.edu/display/fisid_155959/)
Assistant Professor; PhD, Massachusetts Institute of Technology

Davis, Robert H. (https://experts.colorado.edu/individual/fisid_113653/)
Associate Faculty Director; PhD, Stanford University

Del Rio Flores, Antonio
Assistant Professor; PhD, University of California, Berkeley

Ding, Xiaoyun (https://experts.colorado.edu/display/fisid_158563/)
Assistant Professor; PhD, Pennsylvania State University

Dowell, Robin D. (https://experts.colorado.edu/display/fisid_147779/)
Professor; DSc, Washington University

Enoka, Roger M. (https://experts.colorado.edu/display/fisid_110122/)
Professor; PhD, University of Washington

Ferguson, Virginia L. (https://experts.colorado.edu/display/fisid_110131/)
Associate Professor; PhD, University of Colorado Boulder

Fox, Jerome Michael (https://experts.colorado.edu/display/fisid_156682/)
Assistant Professor; PhD, University of California, Berkeley

Gopinath, Juliet T. (https://experts.colorado.edu/display/fisid_147075/)
Associate Professor; PhD, Massachusetts Institute of Technology

Grabowski, Alena Marie (https://experts.colorado.edu/display/fisid_149727/)
Associate Professor; PhD, University of Colorado Boulder

Hayman, Allison P. (https://experts.colorado.edu/display/fisid_156275/)
Assistant Professor; PhD, Massachusetts Institute of Technology

Hind, Laurel (https://experts.colorado.edu/individual/fisid_165642/)
Assistant Professor; PhD, University of Pennsylvania

Huang, Shu-Wei (https://experts.colorado.edu/display/fisid_159847/)
Assistant Professor; PhD, MIT, Cambridge

Jayaram, Kaushik (https://experts.colorado.edu/display/fisid_165370/)
Assistant Professor; PhD, University of California-Berkeley

Layer, Ryan M. (https://experts.colorado.edu/display/fisid_163567/)
Assistant Professor; PhD, University of Virginia

Lynch, Maureen Ellen (https://experts.colorado.edu/display/fisid_163404/)
Assistant Professor; PhD, Cornell University

McLaughin, Jessica (https://experts.colorado.edu/individual/fisid_167401/)
Teaching Assistant Professor; PhD, Northeastern University

McLeod, Robert R. (https://experts.colorado.edu/display/fisid_107547/)
Professor; PhD, University of Colorado Boulder

Mukherjee, Debanjan (https://experts.colorado.edu/individual/fisid_164181/)
Assistant Professor; PhD, University of California, Berkeley

Murray, Todd W. (https://experts.colorado.edu/display/fisid_146549/)
Professor; PhD, Johns Hopkins University

Myers, Chris (https://experts.colorado.edu/display/fisid_167168/)
Professor; PhD, Stanford University

Neu, Corey P. (https://experts.colorado.edu/display/fisid_156210/)
Associate Professor; PhD, University of California, Davis

Park, Won (https://experts.colorado.edu/display/fisid_122676/)
Associate Professor, Associate Chair; PhD, Georgia Institute of Technology

Piestun, Rafael (https://experts.colorado.edu/display/fisid_118538/)
Professor; PhD, Israel Instit of Tech (Israel)

Regueiro, Richard A. (https://experts.colorado.edu/display/fisid_134705/)
Associate Professor; PhD, Stanford University

Rentschler, Mark E. (https://experts.colorado.edu/display/fisid_146091/)
Associate Professor; PhD, University of Nebraska-Lincoln

Sankaranarayanan, Sriram (https://experts.colorado.edu/display/fisid_147413/)
Associate Professor; PhD, Stanford University

Shields, C. Wyatt IV (https://experts.colorado.edu/individual/fisid_165173/)
Assistant Professor; PhD, Duke University

Spencer, Sabrina Leigh (https://experts.colorado.edu/display/fisid_154911/)
Associate Professor; PhD, Massachusetts Institute of Technology

Sprenger, Kayla (https://experts.colorado.edu/individual/fisid_165650/)
Assistant Professor; PhD, University of Washington

Tan, Wei (https://experts.colorado.edu/display/fisid_141464/)
Associate Professor; PhD, University of Illinois at Chicago

Welker, Cara (https://experts.colorado.edu/display/fisid_168549/)
Assistant Professor; Ph.D., Stanford University

Xu, Nicole (https://experts.colorado.edu/display/fisid_172095/)
Assistant Professor; PhD, Stanford University

Yeh, Tom (https://experts.colorado.edu/display/fisid_151584/)
Associate Professor; PhD, Massachusetts Institute of Technology

Zhang, Yide
Assistant Professor; PhD, University of Notre Dame

Courses

BMEN 1000 (1) Exploring Biomedical Engineering
Introduces the biomedical engineering profession, curriculum, career pathways, ethics and responsibilities, and research opportunities. Academic and industry speakers are invited to address various biomedical engineering topics.
Requisites: Restricted to Biomedical Engineering (BMEN) and Open Option Engineering (XXEN) majors only.

BMEN 1025 (4) Computer-Aided Design & Fabrication
Introduces engineering drawing techniques through modern computer aided design (CAD) software, and fabrication of some of these designs. The course will begin with an introduction of spatial visualization skills, then an in-depth introduction to Solidworks, an industry standard CAD software tool, along with introduction to fabrication processes including laser cutting, and 3D printing. Additional topics include geometric design and tolerancing techniques and design for manufacturing.
Requisites: Restricted to Biomedical Engineering (BMEN) majors only.

BMEN 1035 (1) Introduction to Fabrication for Biomedical Engineering
The purpose of this course is to provide biomedical and other engineering students with an introduction to fabrication processes and rapid prototyping techniques including laser cutting, 3D printing, and 3D scanning. Additional topics include geometric design and tolerancing (GD&T) techniques and design for manufacturing (DFM) methods. Provides additional fabrication experience for students in CEAS who have already taken CAD courses and do not want to duplicate material by taking BMEN 1025.
Equivalent - Duplicate Degree Credit Not Granted: the fabrication component of BMEN 1025
Requisites: Requires prerequisite course of GEEN 1017 (minimum grade C-).

BMEN 2000 (3) Introduction to Biomedical Engineering
Reviews concepts from molecular and cellular biology. Establishes important aspects of human physiology and engineering principles to develop a basic understanding of the biomedical engineering field. Introduces topics such as biomechanics, bioinstrumentation, bioimaging and biotechnology.
Requisites: Requires prerequisite or co-requisite Biology course MCDB 1150 or BIEN 2810 or EBIO 1210 (min grade C-). Requires prerequisite Chemistry course CHEN 1201 or CHEN 1211 or CHEM 1113 or MCEN 1024 (min grade C-). Restricted to BMEN minors.

BMEN 2010 (3) Biomaterials
Introduces the science and engineering of biomaterials, with an emphasis on biomechanical aspects. Addresses the design, fabrication, testing, applications and performance of synthetic and natural materials that are used in a wide variety of biomedical prosthetics, implants and devices. In addition to attending lectures, students will conduct a laboratory experiment and a case study.
Requisites: Requires prerequisite course of CHEN 1201 or CHEN 1211 or CHEM 1113 (minimum grade C-). Restricted to Biomedical Engineering (BMEN) majors only.
Recommended: for students in fourth semester of Biomedical Engineering curriculum or higher.

BMEN 2100 (3) Biomedical Engineering Principles and Methods
This course is an introduction to the fundamental principles and mathematical methods of biomedical engineering. Core conservation equations are applied to mass, energy, charge, and momentum transfer in biomedical systems. Additional topics may cover a breadth of exposure in diagnostics and analytical techniques, statistical analysis of biomedical data, bioinformatics, bioinstrumentation.
Requisites: Required prereqs (APPM 1350 or Math 1300 or APPM 1345) and (CHEN 1201 or CHEN 1211 or CHEM 1113) and (PHYS 1110 or PHYS 1115) and (MCDB 1150 or BIEN 2810 or EBIO 1210) (all min grade C-). Restricted to BMEN majors, minors IUT On Track applicants.

BMEN 3010 (3) Biotransport
An introduction to the modeling of complex biological systems using principles of transport phenomena and biochemical kinetics. Includes the conservation of mass and momentum; rheology of Newtonian and non-Newtonian fluids; steady and transient diffusion in reacting systems; dimensional analysis; homogeneous versus heterogeneous reaction systems; and physiological transport systems, including receptor-mediated endocytosis and oxygen and drug transport.
Requisites: Requires prereq courses BMEN 2100 or BMEN 2000; CHEN 1310 or ASEN 1320 or CSCI 1300 or ECEN 1310; PHYS 1100 or PHYS 1115; and coreq of APPM 2360 or MATH 3430 (min grade C-). Restricted to Biomedical Engineering (BMEN) majors.
Recommended: for students in fifth semester of Biomedical Engineering curriculum or higher.

BMEN 3030 (3) Bioinstrumentation
This course will provide an overview of instrumentation systems used in clinical medicine and biomedical research. Systems for measuring biologic signals will be discussed including biopotentials, stress and strain, pressure, temperature, and optical properties to interpret data from living systems. There will be applications to engineering design, including a semester-long design project that incorporates the interactions between living and non-living systems. There will also be discussion of ethical and regulatory issues related to bioinstrumentation.
Requisites: Requires prerequisite courses of BMEN 2000 or BMEN 2100 and ECEN 2260 and ECEN 2270 (all minimum grade C-). Restricted to Biomedical Engineering (BMEN) major students.
Recommended: for students in sixth semester of Biomedical Engineering curriculum or higher.

BMEN 4010 (3) Biomedical Engineering Capstone Design I
Offers the first in a two-course sequence of capstone design. Project supervisors and teams are paired through a pitch process, wherein teams pitch their design ideas to meet an existing need on a project. Project is in an area of biomedical engineering, such as biomedical instrumentation, biosensors, tissue engineering, biological signal processing, biological modeling and simulation, clinical imaging or informational systems, etc. Projects will be conducted by teams of typically three to five students, and projects must include significant design experience. The first semester focuses on research of background, planning, crafting of needs statement, and initial work on senior design project . Formal proposal must be approved by technical advisor.
Requisites: Prereq of (BMEN 1025 or MCEN 1025) and BMEN 2010 and BMEN 3010. Pre or coreq of ENES 1010 or ENES 3100 or ENLP 3100 or PHYS 3050 or WRTG 3030 or WRTG 3035 (all min. grade C-). Restricted to BMEN majors w 87-180 credits.

BMEN 4020 (3) Biomedical Engineering Capstone Design II
Continues BMEN 4010. Teams continue to develop, construct, and evaluate prototypes with consideration of real-world fiscal, regulatory, and safety conditions. Progress is monitored through a series of oral presentations and peer review of teamwork and team dynamics. Requires students to complete a working prototype or simulation as appropriate, and a final written report with oral presentation at the semester Design Expo. Written final report must be approved by the faculty.
Requisites: Requires prerequisite course of BMEN 4010 (minimum grade C-). Restricted to Biomedical Engineering (BMEN) majors.

BMEN 4110 (3) Regenerative Biology and Tissue Repair
Presents the regenerative biology behind tissue systems, along with the regenerative medicine of that tissue with an emphasis on engineering principles, using the assigned reading as a guideline. Follows lectures with class discussions of current papers on the regenerative biology of the same tissue system. In the final 1 ¿ 2 classes assigned to this topic, individual graduate students give 20 min presentations on a relevant regenerative medicine/engineering-focused paper.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 4110, BMEN 5110, and MCEN 5110
Requisites: Restricted to Biomedical Engineering majors with 57+ credits only.

BMEN 4111 (3) Introduction to Microfluidics
Microfluidics deals with the behavior of fluids in small scale. It is a highly multidisciplinary field at the intersection of engineering, physics, chemistry, biology, medicine, nanotechnology, and biotechnology. This course covers the fundamentals and fabrication of microfluidic devices and their applications, particularly in lab-on-a-chip. Includes lectures, literature discussion, team presentations, and possibly one lab on microfluidic devices. Enhances your understanding of microfluidic technologies and their broad applications.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 5111 and MCEN 4111 and BMEN 5111
Requisites: Requires prerequisite course of MCEN 3021 or CHEN 3200 or CVEN 3313 (all minimum grade C-). Restricted to Biomedical Engineering majors only.

BMEN 4113 (3) Mechanics of Cancer
Cancer is considered to be an organ or an ecosystem, in which a critical component of the tumor microenvironment is mechanical forces. This course will cover the role of mechanics in cancer and cancer-related processes, with a focus on solid mechanics and fluid mechanics. In this course, you will apply engineering principles to come away with an appreciation of how mechanics influence cancer and its etiology as well as the development of future treatments.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 4113 and MCEN 5113 and BMEN 5113
Requisites: Requires prerequisite course of MCEN 3021 or CHEN 3200 or CVEN 3313 or MCEN 2063 or CVEN 3161 (all minimum grade C-). Restricted to Biomedical Engineering majors with 57+ credits only.

BMEN 4117 (3) Anatomy and Physiology for Biomedical Engineering
The main objective of this multidisciplinary course is to explore human physiological function from the viewpoint of an engineer. It provides an introduction to human anatomy and physiology with a focus on learning anatomical structures, biological signaling, physiological and pathological conditions, as well as fundamental biomedical engineering concepts that apply quantitative analyses (mass transfer, fluid dynamics, mechanics, modeling) and engineering concepts (e.g., device design to restore defective physiological functions) to understand physiology and pathology.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 4117 or MCEN 5117 BMEN 5117
Requisites: Requires prerequisite of BMEN 2000 or BMEN 2100 (minimum grade C-). Restricted to Biomedical Engineering (BMEN) and Mechanical Engineering (MCEN) majors.
Recommended: Prerequisites BMEN 2010 or BMEN 3010 (all minimum grade C-).

BMEN 4127 (3) Biomedical Ultrasound
Covers the design of ultrasound systems for medical imaging and therapy, including the physics of wave propagation, transducers, pulse-echo imaging, flow, tissue characterization, and microbubble contrast, with an emphasis on current topics in biomedical ultrasound. Includes lectures on theory, practice and special topics; a laboratory on wave propagation; oral presentations on current literature; signal processing exercises; and a team project. Some experience with MATLAB is strongly encouraged for exercises throughout the course.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 4127 and BMEN 5127 and MCEN 5127
Requisites: Requires prerequisite course of ECEN 3300 or ECEN 3301 or MCEN 4043. Restricted to Biomedical Engineering majors with 87+ credits only.

BMEN 4157 (3) Modeling of Human Movement
Human movement analysis is used in physical rehabilitation, sport training, human-robot interaction, animation, and more. Course provides a systematic overview of human movement on multiple levels of analysis, with an emphasis on the phenomenology amenable to computational modeling. Covers muscle physiology, movement-related brain areas, musculoskeletal mechanics, forward and inverse dynamics, optimal control and Bayesian inference, learning and adaptation. Inspires students to see and appreciate the complexities of movement control in all aspects of daily life.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 4157 and MCEN 5157 and BMEN 5157
Requisites: Requires prerequisite of (MCEN2043 or GEEN 3024 or ASEN 1022) and (APPM2360 or MATH2130 or MATH3130) all minimum grade C-. Restricted to students with 57-180 credits (Jrs/Srs) Biomedical Engineering (BMEN) majors only.

BMEN 4171 (3) Biofluids on the Micro Scale
Introduces fundamental physical concepts and basic mechanisms of biological fluids in microscale. Elaborates on the application of fluid mechanics principles to major biological systems, including human organ systems and animal locomotion in microscale. Covers physiologically relevant fluid flow phenomena on the cellular level and the underlying physical mechanisms from an engineering perspective. Related state-of-art technologies such as organ-on-a-chip and micro/nano fabrication will be emphasized. Will enhance your understanding of organ-on-a-chip technologies and their broad applications.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 4171 and MCEN 5171 and BMEN 5171
Requisites: Requires prerequisite course of MCEN 3021 or CHEN 3200 or CVEN 3313 (all minimum grade C-). Restricted to Biomedical Engineering majors only.

BMEN 4195 (3) Bioinspired Robotics
Bioinspired design views the process of how we learn from nature as an innovation strategy translating principles of function, performance, and aesthetics, from biology to human technology. The creative design process is driven by interdisciplinary exchange among engineering, biology, medicine, art, architecture and business. Diverse teams of students will collaborate on, create, and present original bioinspired design projects in the ITLL.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 5195, BMEN 5195 and MCEN 4195
Requisites: Requires prerequisite courses of MCEN 3017 and MCEN 3025 (minimum grade C-). Restricted to students with 57+ credits, BMEN majors only.

BMEN 4231 (3) Computational Fluid Dynamics
This course is an in-depth introduction to the basic principles and applications of computational fluid dynamics (CFD). Students learn about fundamental CFD concepts such as discretization, meshing, error and accuracy; and focus on computational solutions of flow and transport problems using the finite element method. Students conduct multiple hands-on simulation-based activities and exercises on canonical and realistic engineering flow/transport problems. Final project for the course culminates in a mini-conference/symposium where students present their work.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 4231 and MCEN 5231 and BMEN 5231
Requisites: Requires prerequisite courses of MCEN 3021 or CHEN 3200 or CVEN 3313 and MCEN 3030 or APPM 4650 or CSCI 3656 (all minimum grade C-). Restricted to Biomedical Engineering majors only.

BMEN 4292 (3) Materials and Devices in Medicine
The main objective of this multidisciplinary course is to provide students with a broad survey of biomaterials and their use in medical devices for restoring or replacing the functions of injured, diseased, or aged human tissues and organs. The topics to be covered include: evolution in the medical device industry, a broad introduction to the materials used in medicine and their chemical, physical, and biological properties, discovery of medical problems, potential impacts of treatment innovations, existing devices and design considerations for several major physiological systems (cardiovascular, neuromuscular, skeletal, pulmonary, renal, dermal), materials interaction with the human body, basic mechanisms of wound healing, biocompatibility issues, testing methods and techniques in accordance with standards and relevant regulations, biofunctionalities required for specific applications, as well as state-of-the-art approaches for the development of new regenerative materials targeting cellular mechanisms. Sam
Requisites: Requires prerequisite courses of MCEN 2024 and MCEN 4117 or MCEN 5117 (all minimum grade C-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) BMEN majors only.

BMEN 4519 (1-3) Special Topics in Biomedical Engineering
Credit hours and subject matter to be selected from topics of current interest.
Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to students with 57-180 credits. Biomedical Engineering (BMEN) majors only.

BMEN 4840 (1-3) Independent Study
Provides opportunities for independent study at the undergraduate level. Subject and/or project agreed upon by the student and instructor to fit the needs of the student.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Biomedical Engineering (BMEN) majors only.

BMEN 5110 (3) Regenerative Biology and Tissue Repair
Presents the regenerative biology behind tissue systems, along with the regenerative medicine of that tissue with an emphasis on engineering principles, using the assigned reading as a guideline. Follows lectures with class discussions of current papers on the regenerative biology of the same tissue system. In the final 1 ¿ 2 classes assigned to this topic, individual graduate students give 20 min presentations on a relevant regenerative medicine/engineering-focused paper.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 5110, BMEN 4110, and MCEN 4110
Requisites: Restricted to any College of Engineering and Applied Science graduate students or to Biomedical Engineering undergraduate majors only.

BMEN 5111 (3) Introduction to Microfluidics
Microfluidics deals with the behavior of fluids in small scale. It is a highly multidisciplinary field at the intersection of engineering, physics, chemistry, biology, medicine, nanotechnology, and biotechnology. This course covers the fundamentals and fabrication of microfluidic devices and their applications, particularly in lab-on-a-chip. Includes lectures, literature discussion, team presentations, and possibly one lab on microfluidic devices. Enhances your understanding of microfluidic technologies and their broad applications.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 5111 and MCEN 4111 and BMEN 4111
Requisites: Restricted to any College of Engineering and Applied Science graduate students or to Biomedical Engineering undergraduate majors only.

BMEN 5113 (3) Mechanics of Cancer
Cancer is considered to be an organ or an ecosystem, in which a critical component of the tumor microenvironment is mechanical forces. This course will cover the role of mechanics in cancer and cancer-related processes, with a focus on solid mechanics and fluid mechanics. In this course, you will apply engineering principles to come away with an appreciation of how mechanics influences cancer and its etiology as well as the development of future treatments.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 5113 and BMEN 4113 and MCEN 4113
Requisites: Restricted to any College of Engineering and Applied Science graduate students or to Biomedical Engineering undergraduate majors only.

BMEN 5117 (3) Anatomy and Physiology for Biomedical Engineering
The main objective of this multidisciplinary course is to explore human physiological function from the viewpoint of an engineer. It provides an introduction to human anatomy and physiology with a focus on learning anatomical structures, biological signaling, physiological and pathological conditions, as well as fundamental biomedical engineering concepts that apply quantitative analyses (mass transfer, fluid dynamics, mechanics, modeling) and engineering concepts (e.g., device design to restore defective physiological functions) to understand physiology and pathology. Graduate students will be required to present a primary literature review and lead discussion during a class period, as well as take the lead on the final project: a mock NIH grant proposal.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 4117 or MCEN 5117 BMEN 4117
Requisites: Restricted to graduate Biomedical Engineering students only.

BMEN 5127 (3) Biomedical Ultrasound
Covers the design of ultrasound systems for medical imaging and therapy, including the physics of wave propagation, transducers, pulse-echo imaging, flow, tissue characterization, and microbubble contrast, with an emphasis on current topics in biomedical ultrasound. Includes lectures on theory, practice and special topics; a laboratory on wave propagation; oral presentations on current literature; signal processing exercises; and a team project. Some experience with MATLAB is strongly encouraged for exercises throughout the course.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 5127 and MCEN 4127 and BMEN 4127
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

BMEN 5133 (3) Intro to Tissue Biomechanics
Focuses on developing an understanding of the fundamental mechanical principles that govern the response of hard and soft biological tissue to mechanical loading. Specifically, covers mechanical behavior of biological materials/tissues, classical biomechanics problems in various tissues, the relationship between molecular, cellular and physiological processes and tissue biomechanics and critical analysis of related journal articles.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 4133 and MCEN 5133
Requisites: Restricted to any College of Engineering and Applied Science graduate students or to Biomedical Engineering undergraduate majors only.

BMEN 5157 (3) Modeling of Human Movement
Human movement analysis is used in physical rehabilitation, sport training, human-robot interaction, animation, and more. Course provides a systematic overview of human movement on multiple levels of analysis, with an emphasis on the phenomenology amenable to computational modeling. Covers muscle physiology, movement-related brain areas, musculoskeletal mechanics, forward and inverse dynamics, optimal control and Bayesian inference, learning and adaptation. Inspires students to see and appreciate the complexities of movement control in all aspects of daily life.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 5157 and MCEN 4157 and BMEN 4157
Requisites: Restricted to graduate students in the College of Engineering and Applied Science or undergraduate Biomedical Engineering (BMEN) majors with 57+ credits (Junior or Senior).

BMEN 5171 (3) Biofluids on the Micro Scale
Introduces fundamental physical concepts and basic mechanisms of biological fluids in microscale. Elaborates on the application of fluid mechanics principles to major biological systems, including human organ systems and animal locomotion in microscale. Covers physiologically relevant fluid flow phenomena on the cellular level and the underlying physical mechanisms from an engineering perspective. Related state-of-art technologies such as organ-on-a-chip and micro/nano fabrication will be emphasized. Will enhance your understanding of organ-on-a-chip technologies and their broad applications.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 5171 and MCEN 4171 and BMEN 4171
Requisites: Restricted to any College of Engineering and Applied Science graduate students or to Biomedical Engineering undergraduate majors only.

BMEN 5195 (3) Bioinspired Robotics
Bioinspired design views the process of how we learn from nature as an innovation strategy translating principles of function, performance, and aesthetics, from biology to human technology. The creative design process is driven by interdisciplinary exchange among engineering, biology, medicine, art, architecture and business. Diverse teams of students will collaborate on, create, and present original bioinspired design projects in the ITLL.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 4195, BMEN 4195, and MCEN 5195
Requisites: Restricted to graduate students in the College of Engineering and Applied Science or undergraduate Biomedical Engineering (BMEN) majors with 57+ credits (Junior or Senior).

BMEN 5231 (3) Computational Fluid Dynamics
This course is an in-depth introduction to the basic principles and applications of computational fluid dynamics (CFD). Students learn about fundamental CFD concepts such as discretization, meshing, error and accuracy; and focus on computational solutions of flow and transport problems using the finite element method. Students conduct multiple hands-on simulation-based activities and exercises on canonical and realistic engineering flow/transport problems. Final project for the course culminates in a mini-conference/symposium where students present their work.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 5231 and MCEN 4231 and BMEN 4231
Requisites: Restricted to any College of Engineering and Applied Science graduate students or to Biomedical Engineering undergraduate majors only.

BMEN 5292 (3) Materials and Devices in Medicine
The main objective of this multidisciplinary course is to provide students with a broad survey of biomaterials and their use in medical devices for restoring or replacing the functions of injured, diseased, or aged human tissues and organs. The topics to be covered include: evolution in the medical device industry, a broad introduction to the materials used in medicine and their chemical, physical, and biological properties, discovery of medical problems, potential impacts of treatment innovations, existing devices and design considerations for several major physiological systems (cardiovascular, neuromuscular, skeletal, pulmonary, renal, dermal), materials interaction with the human body, basic mechanisms of wound healing, biocompatibility issues, testing methods and techniques in accordance with standards and relevant regulations, biofunctionalities required for specific applications, as well as state-of-the-art approaches for the development of new regenerative materials targeting cellular mechanisms. Sam
Requisites: Requires prerequisite course of MCEN 4117 or MCEN 5117 (minimum grade C-). Restricted to any College of Engineering and Applied Science graduate students or to BMEN undergraduate majors only.

BMEN 5840 (1-6) Independent Study
Provides opportunities for independent study at the graduate level. Subject and/or project agreed upon by the student and instructor to fit the needs of the student.
Repeatable: Repeatable for up to 30.00 total credit hours.
Requisites: Restricted to graduate Biomedical Engineering students only.

BMEN 5939 (1-6) Biomedical Engineering Internship
Grants credit to international graduate students for conducting research via professional research opportunities in the biomedical engineering field. Students are responsible for securing their own internships.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.

BMEN 6519 (1-3) Special Topics in Biomedical Engineering
Credit hours and subject matter to be arranged.
Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

BMEN 6949 (1) Master's Candidate for Degree
Credit hours and subject matter to be arranged.

BMEN 6950 (1-6) Master's Thesis
Work with a faculty advisor on a masters thesis.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate Biomedical Engineering students only.

BMEN 7840 (1-6) Independent Study
Provides opportunities for independent study at the graduate (PhD) level. Subject and/or project agreed upon by the student and instructor to fit the needs of the student.
Repeatable: Repeatable for up to 10.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Biomedical Engineering BMEN-PhD students only.

BMEN 8990 (1-10) Doctoral Dissertation
Work with a faculty advisor on a doctoral dissertation.
Repeatable: Repeatable for up to 60.00 total credit hours.
Requisites: Restricted to Biomedical Engineering (BMEN) Ph.D. graduate students only.

Biomedical Engineering - Bachelor of Science (BSBM)

Biomedical engineering is an exciting, multidisciplinary field that lies at the interface of medicine, biology and engineering. Biomedical engineers use engineering principles to analyze and solve problems in biology and medicine, providing an overall enhancement to healthcare. Biomedical engineers create technology to save lives and improve the quality of life. Much of the equipment in hospitals and clinics across the globe was designed, built and tested by biomedical engineers. At the same time, biomedical engineers employ concepts learned from biology and medicine to generate new (biomimetic) engineering designs in fields such as robotics and artificial intelligence.

Western Colorado University/University of Colorado Boulder Engineering Partnership Program

Western Colorado University (Western) (https://western.edu/school/paul-m-rady-school-of-computer-science-engineering/) and CU Boulder have created a partnership to deliver specific engineering baccalaureate programs **in their entirety in Gunnison, Colorado.** The first two years of coursework are taught by Western faculty and the second two years of coursework are taught by CU Boulder faculty located in Gunnison. Students completing the programs will be awarded a Bachelor of Science from CU Boulder.

Degrees are offered in biomedical engineering and mechanical engineering. Additional details can be found on the CU Boulder/Western Engineering Partnership Program website. (https://western.edu/school/paul-m-rady-school-of-computer-science-engineering/)

Requirements

Prerequisites and Passing Grades

The minimum passing grade for a course that is a prerequisite or corequisite for another required course is C-. If a grade of D+ or lower is received in a course that is a prerequisite to another, the student may not register for the subsequent course and must repeat the prerequisite course until a grade of C- or higher is achieved.

The minimum passing grade for a course that is not specifically a prerequisite or corequisite for another required course is D-.

The biomedical engineering program reserves the right to drop students enrolled in BMEN courses who have not met the minimum prerequisite requirements. It is the student's responsibility to communicate with the program if summer coursework and/or transfer credit will be used to meet the prerequisite requirement.

Required Courses and Credits

Required courses in engineering, physical science, and mathematics are interwoven throughout the curriculum to provide a balanced education in the fundamentals of the biomedical engineering profession. The core courses are complemented by technical electives, humanities and social sciences electives (https://www.colorado.edu/engineering-advising/get-your-degree/degree-requirements/humanities-social-sciences-and-writing-requirements/), free electives, and a writing course (https://www.colorado.edu/engineering-advising/get-your-degree/degree-requirements/humanities-social-sciences-and-writing-requirements/), for a total of 128 credits required for the degree.

Code	Title	Credit Hours
Required Biomedical Courses		
BMEN 1000	Exploring Biomedical Engineering	1
or AREN 1316	Introduction to Architectural Engineering	
or ASEN 1009	Undergraduate Aerospace Seminar	
or CHEN 1300	Introduction to Chemical and Biological Engineering	
or CSCI 1000	Computer Science as a Field of Work and Study	
or CVEN 1317	Introduction to Civil and Environmental Engineering	
or ECEN 1100	Exploring ECE	
or EVEN 1000	Introduction to Environmental Engineering	
or MCEN 2000	Mechanical Engineering as a Profession	
BMEN 1025	Computer-Aided Design & Fabrication	4
or MCEN 1025	Computer-Aided Design and Fabrication	
or GEEN 1017 & BMEN 1035	Engineering Drawing and Introduction to Fabrication for Biomedical Engineering	
BMEN 2100	Biomedical Engineering Principles and Methods	3
BMEN 2010	Biomaterials	3
BMEN 3010	Biotransport	3
BMEN 3030	Bioinstrumentation	4
BMEN 4010	Biomedical Engineering Capstone Design I	3
BMEN 4020	Biomedical Engineering Capstone Design II	3
BMEN 4117	Anatomy and Physiology for Biomedical Engineering	3
or MCEN 4117	Anatomy and Physiology for Engineers	
or MCEN 5117	Anatomy and Physiology for Engineers	
or BMEN 5117	Anatomy and Physiology for Biomedical Engineering	
Required Mechanics Courses		
MCEN 2023	Statics and Structures	3
or GEEN 2851	Statics for Engineers	
or CVEN 2121	Analytical Mechanics 1	
Required Electrical Courses		
ECEN 2250	Introduction to Circuits and Electronics	3
ECEN 3301	Biomedical Signals and Systems	3
Technical Electives		
Choose 24 credit hours of technical elective coursework. At least 18 of 24 must be 3000 level or above, and at least 15 must be Engineering Technical Electives, including 6 credits from BME approved focused electives. [1]		24
Required Mathematics Courses		
APPM 1350	Calculus 1 for Engineers	4
or MATH 1300	Calculus 1	
or APPM 1345	Calculus 1 with Algebra, Part B	
APPM 1360	Calculus 2 for Engineers	4
or MATH 2300	Calculus 2	
APPM 2350	Calculus 3 for Engineers	4
or MATH 2400	Calculus 3	
APPM 2360	Introduction to Differential Equations with Linear Algebra	4
or MATH 2130 & MATH 3430	Introduction to Linear Algebra for Non-Mathematics Majors and Ordinary Differential Equations	
or MATH 2135 & MATH 3430	Introduction to Linear Algebra for Mathematics Majors and Ordinary Differential Equations	
Required Physics Course		
PHYS 1110	General Physics 1	4
or PHYS 1115	General Physics 1 for Majors	
PHYS 1120	General Physics 2	4
or PHYS 1125	General Physics 2 for Majors	
PHYS 1140	Experimental Physics 1	1
Required Chemistry Courses		
Select one of the following chemistry sequence options:		7
Option 1:		
CHEN 1201	General Chemistry for Engineers 1 [3]	
or CHEN 1211	Accelerated Chemistry for Engineers	
or CHEM 1113	General Chemistry 1	
or CHEM 1400	Foundations of Chemistry	
CHEN 1203	General Chemistry for Engineers 2 [3]	
or CHEN 1211	Accelerated Chemistry for Engineers	
or CHEM 1133	General Chemistry 2	
or CHEM 2100	Foundations of Chemistry 2	
CHEM 1221	Engineering General Chemistry Lab	
or CHEM 1134	Laboratory in General Chemistry 2	
or CHEM 1114	Laboratory in General Chemistry 1	
or CHEM 2101	Laboratory in Foundations of Chemistry 2	
Option 2: (Students who take Option 2 must take two extra Free Electives)		
CHEN 1211	Accelerated Chemistry for Engineers	
CHEM 1221	Engineering General Chemistry Lab	
or CHEM 1134	Laboratory in General Chemistry 2	
or CHEM 1114	Laboratory in General Chemistry 1	
or CHEM 1401	Foundations of Chemistry Lab	
Required Biology Course		
BIEN 2810	Biology for Engineers	3
or MCDB 1150	Introduction to Cellular and Molecular Biology	
or EBIO 1210 & EBIO 1220	General Biology 1 and General Biology 2	
Required Computing and Data Analysis Courses		
CHEN 1310	Introduction to Engineering Computing [4]	3
or CSCI 1300	Computer Science 1: Starting Computing	
CHEN 3010	Applied Data Analysis [4]	3
or STAT 4000	Statistical Methods and Application I	
Humanities, Social Sciences and Writing		
Complete the college's humanities, social sciences and writing requirement as specified [2]		18
Free Electives		
Choose at least 9 credit hours of free electives to meet the minimum 128 credit hours required for the bachelor's degree.		9
Total Credit Hours		**128**

1 Choose from the course options listed on the program's Advising & Curriculum webpage.

2 For more information, see the College of Engineering & Applied Science (https://www.colorado.edu/engineering-advising/get-your-degree/degree-requirements/humanities-social-sciences-and-writing-requirements/) website.

3 For CHEN 1201–CHEM 1113 and CHEM 1400 substitutions and for CHEN 1203–CHEM 1133 substitution are restricted to transfer students only.

4 For CHEN 1310–CSCI 1300 and for CHEN 3010–STAT 4000 substitutions are restricted to CS minors only.

Optional Program Track

The BME Program offers a Pre-medical track option (https://www.colorado.edu/bme/academics/bachelors-program/advising-curriculum/#pre_med_bioinstrumentation_track_sample_curriculum-287) for students preparing for medical school and who are in interested in learning about medical devices, biomechanics, therapeutics, imaging and diagnostics.

Premedical Track

For more information, including curriculum requirements, visit the program's Advising & Curriculum (https://www.colorado.edu/bme/academics/bachelors-program/advising-curriculum/) webpage.

4 For CHEN 1310–CSCI 1300 and for CHEN 3010–STAT 4000 substitutions are restricted to CS minors only.

Plan(s) of Study

Year One

Fall Semester		**Credit Hours**
APPM 1350	Calculus 1 for Engineers	4
CHEN 1201	General Chemistry for Engineers 1	4
BIEN 2810	Biology for Engineers	3
BMEN 1025	Computer-Aided Design & Fabrication	4
COEN 1500	CEAS First Year Seminar	1
	Credit Hours	**16**
Spring Semester		
BMEN 1000	Exploring Biomedical Engineering	1
APPM 1360	Calculus 2 for Engineers	4
CHEN 1203	General Chemistry for Engineers 2	2
CHEM 1221	Engineering General Chemistry Lab	1
PHYS 1110	General Physics 1	4
Humanities or Social Sciences		2
	Credit Hours	**14**

Year Two

Fall Semester		
BMEN 2100	Biomedical Engineering Principles and Methods	3
APPM 2350	Calculus 3 for Engineers	4
PHYS 1120	General Physics 2	4
Humanities or Social Science Elective [1]		6
	Credit Hours	**17**
Spring Semester		
BMEN 2010	Biomaterials	3
APPM 2360	Introduction to Differential Equations with Linear Algebra	4
MCEN 2023	Statics and Structures	3
PHYS 1140	Experimental Physics 1	1
CHEN 1310	Introduction to Engineering Computing	3
Free Elective		3
	Credit Hours	**17**

Year Three

Fall Semester		
BMEN 3010	Biotransport	3
BMEN 4117	Anatomy and Physiology for Biomedical Engineering	3
CHEN 3010	Applied Data Analysis	3
ECEN 2250	Introduction to Circuits and Electronics	3
Humanities or Social Sciences		3
	Credit Hours	**15**
Spring Semester		
BMEN 3030	Bioinstrumentation	4
ECEN 3301	Biomedical Signals and Systems	3
Writing Requirement		3
Technical Elective [3]		6
	Credit Hours	**16**

Year Four

Fall Semester		
BMEN 4010	Biomedical Engineering Capstone Design I	3
Technical Elective [3]		9
Free Elective		3
Focus Technical Elective		3
	Credit Hours	**18**
Spring Semester		
BMEN 4020	Biomedical Engineering Capstone Design II	3
Focus Technical Elective [3]		3
Technical Elective [3]		3
Humanities or Social Sciences Elective [1]		3
Free Elective		3
	Credit Hours	**15**
	Total Credit Hours	**128**

1 Students may choose courses from the list of college-approved humanities and social sciences (HSS) electives. (http://www.colorado.edu/engineering/academics/policies/hss/)

2 Students may choose a course from the list of college-approved writing courses (http://www.colorado.edu/engineering/academics/policies/hss/). (https://www.colorado.edu/engineering-advising/get-your-degree/degree-requirements/humanities-social-sciences-and-writing-requirements/)

[3] Standard curriculum requires a total of 24 credit hours of technical elective coursework. At least 18 of 24 must be 3000 level or above, and at 15 must be Engineering Technical Electives with 6 credits from the approved BME focus technical elective list. Visit the program's Advising & Curriculum webpage for options.

Premedical Track

Year One

	Credit Hours	**15**
	Total Credit Hours	**128**

[1] Students may choose courses from the list of college-approved humanities and social sciences (HSS) electives.

[2] Students may choose a course from the list of college-approved writing courses.

[3] Choose 9 credit hours of 3000 level or above of Engineering Technical Electives, including 3 credit hours from the BME focused electives list. Visit the program's Advising & Curriculum webpage for options.

Learning Outcomes

Program Educational Objectives

The biomedical engineering program at CU Boulder is dedicated to preparing each of our graduating students for one or more the following achievements within 5-10 years of receiving their undergraduate degrees:

- Professional engineering employment in life sciences and healthcare industries, in interdisciplinary areas including but not limited to the medical device industry, engineering consulting, biomechanics, digital health and biotechnology, with promotions and increasing levels of leadership and responsibility over time.
- Completion of graduate degree in biomedical engineering or related fields, with subsequent employment in academy, industry or related professions.
- Completion of medical or other professional school, with subsequent placement in residency, clinical practice and/or other professional employment.

General Learning Outcomes

By the completion of the program, students will be able to:

- Identify, formulate and solve complex engineering problems by applying principles of engineering, science and mathematics.
- Apply engineering design to produce solutions that meet specified needs with consideration of public health, safety and welfare, as well as global, cultural, social, environmental and economic factors.
- Communicate effectively with a range of audiences.
- Recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental and societal contexts.
- Function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks and meet objectives.
- Develop and conduct appropriate experimentation, analyze and interpret data and use engineering judgment to draw conclusions.
- Acquire and apply new knowledge as needed, using appropriate learning strategies.

Biomedical Engineering Specific Outcomes

Upon graduation, students will be able to:

- Apply principles of engineering, biology, human physiology, chemistry, calculus-based physics, mathematics (through differential equations) and statistics.
- Solve biomedical engineering problems, including those associated with the interaction between living and non-living systems.
- Analyze, model, design and realize biomedical engineering devices, systems, components or processes.
- Make measurements on and interpret data from living systems.

Bachelor's–Accelerated Master's Degree Program(s)

The bachelor's–accelerated master's (BAM) degree program options offer currently enrolled CU Boulder undergraduate students the opportunity to receive a bachelor's and master's degree in a shorter period of time. Students receive the bachelor's degree first but begin taking graduate coursework as undergraduates (typically in their senior year).

Because some courses are allowed to double count for both the bachelor's and the master's degrees, students receive a master's degree in less time and at a lower cost than if they were to enroll in a stand-alone master's degree program after completion of their baccalaureate degree. In addition, staying at CU Boulder to pursue a bachelor's–accelerated master's program enables students to continue working with their established faculty mentors.

BS and MS in Biomedical Engineering

Admission Requirements

In order to gain admission to the BAM program named above, a student must meet the following criteria:

- Have a cumulative GPA of 3.000 or higher.
- Have no MAPS deficiencies (students admitted to CU Boulder prior to Summer 2023 only).
- Have at least junior class standing.
- Have completed all prerequisite courses with a passing grade at the time of admission: BMEN 2000 or BMEN 2100; BMEN 2010 and BMEN 3010.

Program Requirements

Students may take up to and including 12 hours while in the undergraduate program which can later be used toward the master's degree. However, only 6 credits may be double-counted toward the bachelor's degree and the master's degree. Students must maintain a 3.000 GPA while in the BAM program.

Students must apply to graduate with the bachelor's degree and apply to continue with the master's degree early in the semester in which the undergraduate requirements will be completed.

Biomedical Engineering - Minor

The biomedical engineering minor is open to undergraduate students from engineering or non-engineering majors who are interested in an exciting, multidisciplinary field that lies at the interface of medicine, biology and engineering.

Biomedical engineers use engineering principles to analyze and solve problems in biology and medicine, providing an overall enhancement to healthcare. At the same time, biomedical engineers employ concepts learned from biology and medicine to generate new engineering designs.

Current research in biomedical engineering focuses on innovative areas such as biomechanics and mechanobiology; medical devices; imaging and diagnostics; and therapeutics.

For more information, visit the college's Minor in Biomedical Engineering (https://www.colorado.edu/bme/academics/minor-program/) webpage.

Requirements

Course Requirements

Completion of 18 credit hours is required for the minor, distributed as follows:

Code	Title	Credit Hours
BMEN 2000	Introduction to Biomedical Engineering	3
or BMEN 2100	Biomedical Engineering Principles and Methods	
Focused Elective - choose one of the following:		3
BMEN 2010	Biomaterials	
BMEN 2100	Biomedical Engineering Principles and Methods [1]	
BMEN 4117	Anatomy and Physiology for Biomedical Engineering [2]	
BIEN 3800	Fundamentals of Biotechnology	
BIEN 4802	Tissue Engineering and Biofabrication	
IPHY 3410	Human Anatomy	
IPHY 3430	Human Physiology	
ECEN 4933	Engineering Genetic Circuits	
MCDB 2150	Principles of Genetics	
MCDB 3300	Personalized Medicine - Recent Advances in Diagnostics and Therapeutics	
PHIL 1160	Introduction to Medical Ethics	
PHIL 3160	Bioethics	
Electives [3]		12
Total Credit Hours		**18**

[1] If BMEN 2100 is taken in place of BMEN 2000, it cannot also count as a focused elective.

[2] Students who take IPHY 3410 or 3430 cannot count BMEN 4117 as either a focused elective or general elective.

[3] For more information and a list of approved electives, visit the college's Minor in Biomedical Engineering (https://www.colorado.edu/bme/academics/minor-program/) webpage.

Requirements for the minor are met by completing the required gateway course, one focused elective from the list above and 12 elective credit hours identified below. Here are additional guidelines regarding the focus elective and electives requirements:

- At least 12 credit hours must be upper-division (3000 or higher level).
- 6 credit hours must be taken in engineering courses (including computer science). Submit enrollment requests for department-restricted courses using the departmental course request forms (https://www.colorado.edu/engineering-advising/departmental-course-request-forms/).
- Up to 9 credit hours can be taken outside of engineering (i.e. IPHY, MCDB, PHIL).
- Relevant independent study coursework can be petitioned.
- 5000-level courses are allowed where undergraduate students are eligible to enroll.
- Prior coursework may be transferred from other institutions with approval.
- At least 9 credit hours need to be taken on the CU Boulder campus, at least 6 credits of which must be at the upper-division level.

Grade Requirements

A grade point average (GPA) of 2.000 or better is required in the courses that are used to satisfy the requirements for this minor. Each individual course that is counted towards these degree requirements must be passed with a D- or better. Note, however, that a C- or better is required in all prerequisite courses to move on to a subsequent course.

Chemical and Biological Engineering

The Department of Chemical and Biological Engineering (http://www.colorado.edu/chbe/) offers degrees at the bachelor's, master's and doctoral levels. The department offers two distinct BS degree programs, one in chemical engineering and one in biological engineering.

Chemical engineering prepares students for careers in a range of industries including energy, consumer products, sustainability and semiconductors. Modern industry depends on chemical engineers to tailor manufacturing technology to the requirements of its products, and chemical engineers play a central role in development of new polymeric materials, alternative energy sources and safe, efficient processes for chemical synthesis.

The biological engineering undergraduate program prepares students for careers in biotechnology, pharmaceuticals, medicine and materials. Exploring the structure of protein molecules, the functioning of cells and the growth and regeneration of tissues are among the new frontiers that biological engineering students will address.

In addition to the standard chemical and biological curricula, a premedicine curriculum is also offered. The chemical and biological engineering department has active research and educational programs in the exciting field of biotechnology, which involves the use of individual cells and their components for producing pharmaceuticals and other important products. The department is also active in biomedical engineering, which involves medical devices, tissues and biomaterials.

There are opportunities to specialize via electives, independent study, research and senior thesis.

Students can carry out part of their studies in another country while staying on track to a four-year degree. This is a wonderful opportunity to delve into a new culture and learning environment, and can be valuable professional experience given the international ties of many companies and researchers. Many faculty members have significant international experience.

Course codes for these programs are CHEN and BIEN.

Senior Thesis

The department offers this program for undergraduates with a strong interest in research. The student carries out a yearlong project under the direction of a faculty member in lieu of taking CHEN 4130 (for CHEN students) or BIEN 4810 (for BIEN students). Students must apply at the end of their junior year.

Research Facilities

Chemical and biological engineering research facilities are extensive and modern. Nearly all research equipment is interfaced to computers for automated data collection, monitoring and control. A full description of chemical and biological engineering research facilities can be found on the department website. (http://www.colorado.edu/chbe/)

Bachelor's Degrees

- Biological Engineering - Bachelor of Science (BSBE) (p. 877)
- Chemical Engineering - Bachelor of Science (BSCHE) (p. 880)

Minors

- Biological Engineering - Minor (p. 883)
- Chemical Engineering - Minor (p. 884)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Teaching Professor, Associate Chair; PhD, University of Colorado Boulder

Courses

BIEN 2810 (3) Biology for Engineers
Develops a basic understanding of the science of biology, including an introduction to the disciplines of biochemistry, cell organization, metabolism, genetics, genomics, molecular biology, recombinant DNA technology and evolution. Provides a basic introduction to several key techniques used in biological engineering laboratories. Uses examples of complex and creative structures engineered by natural processes. Formerly CHEN 2820.
Requisites: Requires prereq or coreq course of CHEN 1201 or CHEN 1211 or CHEM 1113 or MCEN 1024 (minimum grade C-). Restricted to College of Engineering (ENGRU) undergraduates and IUT On Track applicants only.

BIEN 2840 (1-4) Independent Study
Available to sophomores with approval of Department of Chemical and Biological Engineering. Subject arranged to fit needs of student.
Repeatable: Repeatable for up to 6.00 total credit hours.

BIEN 3800 (3) Fundamentals of Biotechnology
Surveys the five areas of modern biotechnology (human, industrial, agricultural, animal, environmental), highlighting engineering principles in biology in all five areas. Delves into how biology is used to create useful materials and medicines. Imparts a working knowledge of synthetic DNA technology, including recombinant DNA, genome editing, DNA synthesis, and DNA sequencing.
Requisites: Requires prerequisite courses of BIEN 2810 or MCDB 1150 or EBIO 1220 and APPM 1350 or MATH 1300 and CHEN 1201 or CHEN 1211 or CHEM 1113 or MCEN 1024 (all minimum grade C-).

BIEN 3840 (1-4) Independent Study
Available to juniors with approval of the Department of Chemical and Biological Engineering. Subject arranged to fit needs of the student.
Repeatable: Repeatable for up to 6.00 total credit hours.

BIEN 4010 (2) Biological Engineering Senior Thesis 1
Provides an opportunity for advanced students to conduct exploratory research in biological engineering.
Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

BIEN 4020 (2) Biological Engineering Senior Thesis 2
Continuation of BIEN 4010.
Requisites: Requires prerequisite course of BIEN 4010 (minimum grade C-). Restricted to College of Engineering students only.

BIEN 4520 (3) Biological Process and Product Design
Provides a team-based capstone design experience for biological engineering students. The design synthesis activities, the considerations of numerous options, and the practical application of the fundamentals all need to be integrated from first year courses through to this senior design course. The sequence provides a culmination for all previous chemical and biological engineering courses (transport processes, thermodynamics, reaction kinetics, unit operations, etc.). Students are expected to know the basics of fluids, heat transfer, bioseparations, and reactor engineering (kinetics). In BIEN 4520, students will be exposed to design of equipment used for separations and reactions. Students will be taught how to select process units and interconnect them in an overall process flowsheet with the primary goal being to find the optimal design conditions for the best possible design scenario among various conceptualized alternatives. With the exception of cost estimation, process economics, heat integration, se
Requisites: Requires prerequisite courses of CHEN 3010 and BIEN 4820 and BIEN 4830 and BIEN 3800 or MCDB 2150 (all minimum grade C-). Restricted to College of Engineering majors only.

BIEN 4530 (2) Biological Engineering Design Project
This is the 2nd course in the team-based capstone biodesign sequence of classes. Projects are sponsored by industry and student design teams collaborate with industrial consultants. Projects consider biological process and product design with emphasis on economic analysis. Deliverables include an oral mid-project design review, a final oral presentation and a final written design report.
Requisites: Requires prerequisite course of BIEN 4520 (minimum grade C-). Restricted to College of Engineering majors only.

BIEN 4801 (3) Pharmaceutical Biotechnology
Focuses on the engineering needed to bring therapeutic products derived from living organisms (e.g., proteins, peptides, DNA, RNA) from the production plant to the patient. Covers the challenges of keeping these products "active" as they are stored, shipped, and administered to patients. Formerly CHEN 4801.
Requisites: Requires prerequisite courses of CHEN 3320 and prerequisite or corequisite courses of BIEN 4830 or CHEN 4330 (all minimum grade C-). Restricted to College of Engineering majors only.

BIEN 4802 (3) Tissue Engineering and Biofabrication
Tissue engineering demonstrates enormous potential for improving human health and the field of biofabrication has advanced our ability to position cells and materials into 3D configurations for the engineering of new tissues. This course explores principles of tissue engineering and biofabrication, drawing upon diverse fields such as cell biology, material science, and chemical and biological engineering. Current and developing methods of tissue engineering, as well as specific applications will be discussed in the context of these principles. The course will involve review of current literature within this developing field, as well as focus on translational concepts of tissue engineering. Formerly known as CHEN 4802.
Equivalent - Duplicate Degree Credit Not Granted: BIEN 5802
Requisites: Requires prerequisite course of BIEN 2810 or MCDB 1150 or EBIO 1210 and EBIO 1220 and prerequisite or corequisite of BIEN 4520 or CHEN 4520 or BMEN 4010 (minimum grade C-). Restricted to College of Engineering students only.

BIEN 4803 (3) Metabolic Engineering
Introduces basic concepts in metabolic engineering and explores modern approaches in metabolic and strain engineering. Application areas that will be discussed will include the use of metabolic engineering approaches in biofuels and biorefining as well as biopharmaceutical production. Formerly CHEN 4803.
Equivalent - Duplicate Degree Credit Not Granted: BIEN 5803
Requisites: Requires prerequisite course of BCHM 4611 (minimum grade C-). Restricted to College of Engineering majors only.

BIEN 4804 (3) Protein and Enzyme Engineering
This course reviews various applications of protein and enzyme engineering and covers key concepts in protein and enzyme design, including protein structure-function relationships; rational and evolutionary engineering approaches; genetic code expansion; cell-free protein synthesis; computational design; and biophysical methods for protein characterization. Additionally, students gain valuable experience reading, analyzing, and interpreting research results from scientific literature, as well as drafting an original research proposal.
Equivalent - Duplicate Degree Credit Not Granted: BIEN 5804
Requisites: Requires prerequisite courses of CHEN 3320 and BIEN 2810 and BCHM 4611 (minimum grade C-). Restricted to College of Engineering undergraduates only.

BIEN 4805 (3) Biomaterials
Provides an overview of biomaterials. Covers major classes of materials used in medical applications, properties, degradation mechanisms, and characterization methods, foreign body response, methods to control physiological response to biomaterial surfaces, biocompatibility, biomaterials used in soft and hard tissue replacements, drug delivery devices and tissue engineering, and design criteria for developing a material for a given biological application.
Requisites: Requires prerequisite courses of BIEN 2810 or MCDB 1150 or EBIO 1220 and CHEM 3311 (all minimum grade C-). Restricted to College of Engineering students only.
Recommended: Prerequisite CHEM 3331.

BIEN 4806 (3) Immunoengineering
Examines the fundamentals of immunology and covers engineering approaches to study and control immune reactions and their applications in therapy and diagnostics for infectious disease, cancer, allergy, and autoimmune disease.
Equivalent - Duplicate Degree Credit Not Granted: BIEN 5806
Requisites: Requires prerequisite course of BIEN 2810 and prerequisite or corequisite of CHEN 4330 or BIEN 4830 or BMEN 3010 (minimum grade C-). Restricted to College of Engineering students only.

BIEN 4810 (3) Biological Engineering Laboratory
Involves planning and execution of chemical engineering experiments on mass transfer operations, bioseparations, and biological reactors. Interprets experimental data with theoretical principles and statistical analysis. Emphasizes communication with written memos, full reports and oral presentations.
Requisites: Requires prerequisite courses of BIEN 2810 or MCDB 1150 or (EBIO 1210 and EBIO 1220) and CHEN 3010 and BIEN 4820 and BIEN 4830 (all minimum grade C-). Restricted to College of Engineering majors only.

BIEN 4820 (3) Biochemical Separations
Lect. and lab. Presents purification methods, mass transfer coefficients, problems specific to biologicals, and scale-up of processes. Also covers chromatography, phase extraction, supercritical fluids, sedimentation, precipitation, electrophoresis, dialysis, affinity techniques, cell separation, application of separations to bioreactors, and comparison of batch and continuous processes. Formerly CHEN 4820.
Requisites: Requires prerequisite course of CHEN 3210 and prereq or coreq of CHEN 4330 or BIEN 4830 (all minimum grade C-). Restricted to College of Engineering majors only.

BIEN 4830 (3) Biokinetics and Reactor Design
Introduces chemical kinetics, chemical reactor design, and biological kinetics. Involves mass and energy balances for steady-state and transient reactor systems. Also covers residence time distribution, mass transfer, catalytic reactions, multiple steady states in reactors, enzyme kinetics, metabolic networks, and cell growth kinetics.
Requisites: Requires prerequisite courses of CHEN 3320 and CHEN 3210 and (CHEN 4521 or CHEM 4531) (all minimum grade C-). Restricted to College of Engineering majors only.

BIEN 4838 (1-3) Special Topics in Biological Engineering
Examines a special topic in Biological Engineering.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

BIEN 4840 (1-4) Independent Study
Available to seniors with approval of Chemical and Biological Engineering department. Subject arranged to fit needs of student.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

CHEN 1000 (3) Creative Technology
Delve into cutting-edge topics such as the science of climate change, biotechnology, biomedical devices, advanced materials, renewable energy, and environmental sustainability! This course will introduce undergraduate students to the most recent concepts in technology and how these concepts impact all aspects of life, including human health and the health of the planet.
Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence Arts Sci Gen Ed: Distribution-Natural Sciences

CHEN 1100 (3) Gourmet Science: Exploring Chemistry, Biology, and Technology through Food
This course explores chemistry, biology, and technology fundamentals through food. Ingredients utilized in cooking and baking processes demonstrate a breadth of key science and engineering concepts, intertwined with social significance and historical context. Students will learn about the chemical behaviors and biological interactions of molecules in food, understand critical ratios and reactions in baking and cooking, survey techniques and relevant technology, evaluate industrial and agricultural developments, and analyze global impacts of trade and policy on food science and engineering.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

CHEN 1201 (4) General Chemistry for Engineers 1
Designed to meet the general chemistry requirement for some engineering students and serve as part one for students whose academic plans require advanced work in chemistry. Topics include components of matter, stoichiometry, electron configuration, chemical bonding, molecular shapes, covalent bonding, classes of reactions, thermochemistry, gases, atomic structure, organic compounds, intermolecular forces, and phase equilibria. Examples and problems illustrate the application of chemistry to engineering sub-disciplines. Department enforced prerequisites: High school Algebra, one year of high school Chemistry or CHEM 1021 (minimum grade C-).
Equivalent - Duplicate Degree Credit Not Granted: CHEN 1211, CHEM 1113, CHEM 1400 and MCEN 1024
Requisites: Restricted to College of Engineering (ENGRU) undergraduates and IUT On Track applicants only.
Recommended: Not recommended for students with grade below B- in CHEM 1021.

CHEN 1203 (2) General Chemistry for Engineers 2
Designed for students whose academic plans require advanced work in chemistry. Topics include kinetics, solubility/solubility equilibria, acid-bases, buffers and titrations, thermodynamics, and electrochemistry. Examples and problems illustrate the application of chemistry to engineering sub-disciplines. AP Chemistry credit not accepted in lieu of any of these prereq classes.
Equivalent - Duplicate Degree Credit Not Granted: CHEN 1211 or CHEM 1133 or CHEM 2100
Requisites: Requires prerequisite courses of CHEN 1201 or CHEM 1113 or MCEN 1024 (all minimum grade C-). Restricted to College of Engineering undergraduates (ENGRU) and IUT On Track applicants only.
Recommended: Corequisite CHEM 1221.

CHEN 1211 (4) Accelerated Chemistry for Engineers
One-semester lecture and recitation course designed for engineering students with more advanced chemistry backgrounds. Topics include stoichiometry; thermodynamics; gases, liquids, and solids; equilibrium; acids and bases; bonding concepts; kinetics; reactions; and materials science. Examples and problems illustrate the application of chemistry to engineering sub-disciplines. Department enforced prerequisite of 3, 4 or 5 on the AP Chemistry exam or equivalent IB scores or a passing score on the "Chemistry Readiness Exam for Engineers." Degree credit not granted for this course and CHEM 1113 and CHEM 1400 and CHEN 1201 and MCEN 1024.
Requisites: Restricted to College of Engineering (ENGRU) undergraduates and IUT On Track applicants only.
Recommended: Corequisite CHEM 1221.

CHEN 1300 (1) Introduction to Chemical and Biological Engineering
Meets for one lecture per week. Examines the different fields of chemical engineering and chemical & biological engineering including energy, materials, pharma, and biomedical; addresses how to be successful in college and engineering; and showcases some of the opportunities here at CU.
Requisites: Restricted to Chemical Engineering, Chemical Biological Engineering, Biological Engineering, and open option (XXEN) majors only with a maximum of 50 credit hours.

CHEN 1310 (3) Introduction to Engineering Computing
Introduces the use of computers in engineering problem solving, including elementary numerical methods. Teaches programming fundamentals, including data and algorithm structure, and modular programming. Software vehicles include Excel/Vba and Matlab. Formerly GEEN 1300 and COEN 1300.
Requisites: Requires prerequisite or corequisite course of APPM 1340 or 1345 or 1350 or GEEN 3830 or MATH 1300 (all minimum grade C-). Restricted to College of Engineering majors and IUT On Track applicants only

CHEN 1400 (3) Drugs, Driving and Dynamic Processes
Project-based course that applies the principles of chemistry, biology, mechanics and electronics to the production and application of sustainable commodities (fuels, drugs, chemicals, and energy). Examples include student-developed green vehicles, sustainable nutraceuticals, or renewable electrical generation.
Requisites: Restricted to Chemical Engineering (CHEN) and Chemical and Biological Engineering (CBEN), and open option (XXEN) majors only with a maximum of 70 credit hours.

CHEN 2120 (3) Chemical Engineering Material and Energy Balances
Provides a basic understanding of chemical engineering calculations involving material and energy balances around simple chemical processes.
Requisites: Requires prerequisite courses of CHEN 1211 or CHEN 1201 or CHEM 1400 or CHEM 1113 or MCEN 1024 (all min grade C-). Requires corequisite courses of CHEN 1310 (CHEN 1203 or CHEM 1133). Restricted to Coll of Engineering mjrs IUT On Track applicants onl

CHEN 2840 (1-4) Independent Study
Available to sophomores with approval of Department of Chemical Engineering. Subject arranged to fit needs of student.
Repeatable: Repeatable for up to 6.00 total credit hours.

CHEN 3010 (3) Applied Data Analysis
Teaches students to analyze and interpret data. Topics include engineering measurements, graphical presentation and numerical treatment of data, statistical inference, and regression analysis.
Requisites: Requires prerequisite course of CHEN 1310 and APPM 2360 or MATH 2130 and MATH 3430 (all minimum grade C-). Restricted to College of Engineering students only.

CHEN 3200 (3) Chemical Engineering Fluid Mechanics
Introduces fluid mechanics and momentum transfer, emphasizing the application of these principles to chemical engineering systems.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 3313 and MCEN 3021
Requisites: Requires prereq courses of PHYS 1110 and (APPM 2350 or MATH 2400) and (CHEN 2120 or CVEN 2121 or GEEN 2851 or MCEN 2023) (all min grade C-).Requires prereq or coreq courses of APPM 2360 or (MATH 2130 and MATH 3430) (min grade C-). Restricted to ENGR mjr

CHEN 3210 (4) Chemical Engineering Heat and Mass Transfer
Examines conservation and transfer of mass and thermal energy. Focuses on conduction and convection of heat in the context of chemical processes and heat exchangers. Addresses radiation. Also studies mass transfer rate processes, including diffusion, microscopic material balances, and correlations for mass transfer coefficients.
Requisites: Requires prerequisite courses of (CHEN 3200 or MCEN 3021) and (APPM 2360 or MATH 3430) (minimum grade C-). Restricted to College of Engineering majors only

CHEN 3211 (1) Chemical Engineering Mass Transfer
Study of mass-transfer rate processes, including diffusion, convection, microscopic material balances, and correlations for mass-transfer coefficients. Requires department approval and a department-approved heat transfer course.
Requisites: Requires prerequisite course of either CHEN 3200 or MCEN 3021 (minimum grade C-). Restricted to College of Engineering (ENGRU) undergraduates only.

CHEN 3220 (3) Chemical Engineering Separations
Studies separation methods including distillation, absorption, extraction, and membranes, and graphical and computer-based solutions to separation problems. Applies mass transfer rate theory to packed and tray columns.
Requisites: Requires prerequisite courses of CHEN 3210 and CHEN 3320 and (CHEN 4521 or a prerequisite or corequisite of CHEM 4531) (all minimum grade C-). Restricted to College of Engineering majors only.

CHEN 3320 (3) Chemical Engineering Thermodynamics
Applies thermodynamic principles to nonideal systems, phase equilibrium, chemical equilibrium, power generation, refrigeration, and chemical processes.
Requisites: Requires prerequisite courses of CHEN 2120 and (CHEN 4521 or a prerequisite or corequisite of CHEM 4531) and (APPM 2360 or MATH 3430) (all minimum grade C-). Restricted to College of Engineering majors only

CHEN 3660 (3) Energy Fundamentals
Explains the most important energy technologies and systems; provides tools to analyze performance using science and engineering principles. This course will investigate important energy concepts from sources and extraction to utilization, storage and efficiency. Topics include fossil fuels, hydropower, renewable energy, biofuels, carbon capture and waste disposal.
Requisites: Requires prerequisite courses of CHEN 1201 or CHEN 1211 or CHEM 1113 or MCEN 1024 and PHYS 1110 and APPM 1360 or MATH 2300 (all minimum grade C-). Restricted to College of Engineering majors only.

CHEN 3670 (3) Sustainable Design of Chemical and Materials Systems
Explains the principles of green engineering and provides tools to analyze sustainability of engineered processes and materials. This course will investigate important sustainability concepts from utilization of renewable feedstocks for chemicals and materials manufacturing to recycling, waste elimination, and toxicology. Topics include analysis of environmental effects of chemical processes and products, mechanical and chemical recycling of plastics and other materials, minimizing fossil energy demands in manufacturing processes, and approaches to life cycle assessment of candidate technologies.
Requisites: Requires prerequisite courses of PHYS 1110 and (CHEN 1211 or CHEN 1201 or CHEM 1113 or MCEN 1024) and (APPM 1360 or MATH 2300) (all minimum grade C-). Restricted to College of Engineering majors only.

CHEN 3840 (1-4) Independent Study
Available to juniors with approval of the Department of Chemical Engineering. Subject arranged to fit needs of the student.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

CHEN 3930 (6) Chemical Engineering Cooperative Education
Students enrolled in this course participate in a previously arranged, department-sponsored cooperative education program.
Requisites: Requires prerequisite course of CHEN 2120 (minimum grade C-). At least a 2.85 cumulative GPA is required. Restricted to College of Engineering majors only.
Recommended: Prerequisite 3.00 GPA or higher.

CHEN 4010 (2) Chemical Engineering Senior Thesis 1
Provides an opportunity for advanced students to conduct exploratory research in chemical engineering.
Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

CHEN 4020 (2) Chemical Engineering Senior Thesis 2
Continuation of CHEN 4010. This course and CHEN 4020 can substitute for CHEN 4130.
Requisites: Requires prerequisite course of CHEN 4010 (minimum grade C-). Restricted to College of Engineering students only.

CHEN 4090 (1) Undergraduate Seminar
Provides chemical engineering career and professional information, facilitates contact with faculty and industry representatives, and improves communication and leadership skills. Consists of a series of seminars and field trips and requires a research project involving a written and oral report.
Requisites: Restricted to Chemical (CHEN) Engineering or Chemical and Biological (CBEN) Engineering or Biological (BIEN) Engineering majors only.

CHEN 4130 (3) Chemical Engineering Laboratory
Involves planning and execution of chemical engineering experiments on mass transfer operations, separations, and chemical reactors. Interprets experimental data with theoretical principles and statistical analysis. Emphasizes communication with written memos, full reports, and oral presentations.
Requisites: Requires prerequisite courses of CHEN 3010 and CHEN 3220 and CHEN 3320 and CHEN 4330 (all minimum grade C-). Restricted to College of Engineering majors only.

CHEN 4330 (3) Kinetics and Reactor Design
Introduces chemical kinetics and chemical reactor design. Involves mass and energy balances for steady-state and transient reactor systems. Also covers residence time distribution, mass transfer,catalytic reactions, and multiple steady states in reactors.
Requisites: Requires prerequisite courses of CHEN 3320 and CHEN 3210 and (CHEN 4521 or CHEM 4531) (all minimum grade C-). Restricted to College of Engineering majors only.

CHEN 4440 (3) Chemical Engineering Materials
Introduces materials engineering, including properties of polymers, metals, ceramics, and semiconductors, especially as related to chemical engineering processes.
Requisites: Requires prerequisite courses of CHEN 3320 and CHEM 3311 (all minimum grade C-). Restricted to College of Engineering majors only.

CHEN 4450 (3) Polymer Chemistry
Introduces polymer science with a focus on polymer chemistry and polymerization reactions. Focuses on polymerization reaction engineering and how polymer properties depend on structure.
Equivalent - Duplicate Degree Credit Not Granted: CHEN 5450
Requisites: Requires prerequisite courses of CHEN 4830 or CHEN 4330 and CHEM 3311 (all minimum grade C-). Restricted to College of Engineering majors only.

CHEN 4460 (3) Polymer Engineering
Introductory polymer engineering course reviewing basic terminology and definitions; the properties and synthetic routes of important industrial polymers; and processing of polymers and their applications.
Equivalent - Duplicate Degree Credit Not Granted: CHEN 5460
Requisites: Requires prerequisite courses of CHEM 3311 and CHEN 3320 (all minimum grade C-). Restricted to College of Engineering majors only.

CHEN 4480 (3) Solar Cells and Optical Devices for Sustainable Buildings
This course assumes no background in electronic materials and explains how silicon and cutting-edge metal halide perovskite solar cells are designed, fabricated and characterized. Topics will include optics, band diagrams, wafer fabrication, most thin film deposition techniques, module design and economics. Other optical devices that can help the world rapidly reduce its carbon emissions, such as light-emitting diodes and energy saving windows with dynamic tinting, will also be covered.
Equivalent - Duplicate Degree Credit Not Granted: CHEN 5480
Recommended: Prerequisite a course in materials science (for example CHEN 4440), the physics of electromagnetism and optics at a very basic level.

CHEN 4490 (3) Electrochemical Engineering
This course discusses fundamentals and applications of electrochemical systems from an engineering perspective. Aspects of thermodynamics, reaction kinetics, and transport phenomena relevant to the description of electrode/electrolyte interfaces and charge transfer reactions are covered. Topics include cell equilibrium (Nernst equation), reactions rates within Butler-Volmer and Marcus theory, electrochemical double layer structure, ion transport (Poisson-Nernst-Planck equation), potential and current distributions in electrochemical cells, and experimental electroanalytical techniques. Applications include fuel cells, electrolyzers, batteries, sensors, and corrosion. Contact instructor to request to take prerequisites as corequisites.
Equivalent - Duplicate Degree Credit Not Granted: CHEN 5490
Requisites: Requires prerequisite courses of (CHEN 4330 or CHEN 4830) and PHYS 1120 (minimum grade C-). Restricted to College of Engineering (ENGRU) undergraduates only.

CHEN 4520 (3) Chemical Process Design
Studies applied chemical process design including equipment specification and economic evaluation.
Requisites: Requires prerequisite courses of CHEN 3010 and CHEN 3210 and CHEN 3220 and CHEN 4330 or CHEN 4830 (all minimum grade C-). Restricted to College of Engineering majors only.

CHEN 4521 (3) Physical Chemistry for Engineers
Examines the laws of classical thermodynamics followed by physical transformations of pure substances, the thermodynamics of simple mixtures and chemical equilibrium. Applies quantum theory to atomic and molecular structure. Presents the concepts and applications of statistical thermodynamics. Introduces rates of chemical reactions, reaction dynamics and catalysis.
Requisites: Requires prereq courses of APPM 2350 or MATH 2400 and CHEN 1211 or CHEN 1203 or CHEM 1133 (all min. grade C-). Requires a prereq or coreq course of APPM 2360 or MATH 2130 and MATH 3430 (min. grade C-). Restricted to College of Engineering majors only.

CHEN 4530 (2) Chemical Engineering Design Project
Provides a team-based capstone design experience for chemical engineering students. Projects are sponsored by industry and student design teams collaborate with industrial consultants. Projects consider chemical process and product design with emphasis on economic analysis. Deliverables include an oral mid-project design review, a final oral presentation and final written design report.
Requisites: Requires prerequisite course of CHEN 4520 (minimum grade C-). Restricted to College of Engineering majors only.

CHEN 4570 (4) Process Dynamics and Control
Examines principles of controls theory and controls application to chemical processes. Focuses on feedback, feedforward and distributed control systems. Laboratory sessions cover measurement fundamentals, signal transmission, dynamic testing, control system synthesis, and implementation and adjustment.
Requisites: Requires prerequisite courses of CHEN 3220 and CHEN 4330 or BIEN 4830 and PHYS 1120 and APPM 2360 or MATH 2130 and MATH 3430 (all minimum grade C-). Restricted to College of Engineering majors only.

CHEN 4630 (1) Intellectual Property Law and Engineering
Learn the fundamentals of the various types of intellectual property, obtain the ability to search the USPTO database for patents, learn the difference between provisional patents, utility patents and foreign patents and learn the timing requirements related to the filing of patents and public disclosure, use, and/or sale of an invention.
Equivalent - Duplicate Degree Credit Not Granted: CHEN 5630
Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Engineering majors only.

CHEN 4650 (3) Particle Technology
Aims to identify the important physical mechanisms occurring in processes involving particles, formulate and solve mathematical descriptions of such processes, and analyze experimental and theoretical results in both a qualitative and quantitative manner. Teaches students to apply this knowledge to the design of particulate systems. Conveys the breadth and depth of natural and industrial applications involving particulates.
Equivalent - Duplicate Degree Credit Not Granted: CHEN 5650
Requisites: Requires prerequisite courses of APPM 2360 or MATH 2130 and MATH 3430 and CHEN 3200 or MCEN 3021 (all minimum grade C-). Restricted to College of Engineering majors only.

CHEN 4831 (1) Biokinetics and Bioreactors Module
Study of biokinetics of enzyme reactions, cell growth and bioproduct formation. Design of batch, semi-batch and continuous bioreactors. Overview of biotechnology industry. Introduction to pharmacokinetics and drug delivery. Requires department approval and a department-approved kinetics and reactor design course.
Requisites: Requires prerequisite course CHEN 3210 (minimum grade C-). Restricted to College of Engineering (ENGRU) undergraduates only.

CHEN 4836 (3) Nanomaterials
Presents fundamental chemical and physical concepts that give rise to the unique optical, electronic and magnetic properties of nanoscale materials. Introduces important synthetic routes for producing nanomaterials, and interparticle forces governing colloidal behavior and self-assembly. Discusses current and potential applications in catalysis, biomedicine, renewable energy, and other fields.
Equivalent - Duplicate Degree Credit Not Granted: CHEN 5836
Requisites: Require prerequisite or corequisite of CHEN 3320 (minimum grade C-). Restricted to College of Engineering students only.

CHEN 4838 (1-3) Special Topics in Chemical Engineering
Examines a special topic in Chemical Engineering.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

CHEN 4840 (1-4) Independent Study
Available to seniors with approval of chemical engineering department. Subject arranged to fit needs of student.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Engineering majors only.

Biological Engineering - Bachelor of Science (BSBE)

Vaccine and therapeutic development. Genome-engineering for gene therapy and biofuels applications. Tissue engineering directing tissue growth for regenerating cartilage and cardiac muscle using stem cells. Quantum dots for imaging and therapeutics. Nanomaterials for labs-on-a-chip diagnostics. Polymers for drug delivery and in vivo imaging (e.g., detecting cancer). Synthetic biology to redesign organisms for useful purposes. Immunoengineering to create tools which investigate and change the immune system.

Biological engineers at CU Boulder learn the skills necessary to work on these cutting-edge technologies and more. Learn from world-class faculty leveraging innovative, award-winning education practices and hands-on lab experiences. Join the ranks of engineers making an impact in these life-saving fields!

Requirements

Prerequisites and Passing Grades

Unless otherwise specified, minimum passing grades for all courses that are prerequisites for other required courses is C-. If a grade of D+ or lower is received in a course which is a prerequisite to another, the student may not register for the subsequent course until the first grade has been raised to a C- or higher. In addition, biological engineering and/or CHEN core courses taken in a student's senior year also require a minimum grade of C-, even though they are not prerequisites.

Unless specified otherwise, the minimum passing grade for a course that is not specifically a prerequisite for another required course is D-.

Students may be dropped from courses if they do not meet the minimum prerequisite grade requirements. It is the student's responsibility to communicate with the department if summer coursework and/or transfer credit will be used to meet the prerequisite requirement.

Course Requirements

Required Engineering Courses

A total of 128 credit hours is required.

Code	Title	Credit Hours
CHEN 1310	Introduction to Engineering Computing	3
CHEN 2120	Chemical Engineering Material and Energy Balances	3

CHEM 3321	Laboratory in Organic Chemistry 1	1
CHEM 3331	Organic Chemistry 2	4
CHEM 3341	Laboratory in Organic Chemistry 2	1
PHYS 1110	General Physics 1	4
or PHYS 1115	General Physics 1 for Majors	

Humanities, Social Sciences and Writing

Complete the College's Humanities, Social Sciences, and Writing requirements (https://www.colorado.edu/engineering-advising/get-your-degree/degree-requirements/humanities-social-sciences-and-writing-requirements/) (18 credits total).

Technical Electives

General Technical Electives must meet specific requirements (9 credits total). Visit the department's Current Students (https://www.colorado.edu/chbe/current-students/) webpage and consult the current advising guide.

Free Electives

3 credits of Free Electives allowed.

Modified Pathways

Premed Path

This path is offered for students preparing for medical school. Since biological engineering already requires most of the premed courses, it is a logical choice for students who desire an engineering degree and the opportunity to pursue a medical profession. For information on the premed path, visit the department's current students (http://www.colorado.edu/chbe/academics/undergraduate-program/current-students/) webpage and consult the current advising guide.

Recommended Four-Year Plan of Study

Year One		
Fall Semester		**Credit Hours**
APPM 1350	Calculus 1 for Engineers	4

Technical Elective [1, 3]		3
Focus Technical Elective [6]		3
Humanities or Social Science Elective [2]		3
	Credit Hours	**14**
	Total Credit Hours	**128**

1. CHEN 1300 is an optional Engineering Technical Elective. If it is taken, one of the Technical Elective courses in this Plan of Study will only require 2 credits (instead of 3 credits).
2. Students may choose courses from the list of college-approved humanities and social sciences (HSS) electives (https://www.colorado.edu/engineering-advising/get-your-degree/degree-requirements/humanities-social-sciences-and-writing-requirements/).
3. General Technical Electives and Free Electives must meet specific requirements. Visit the department's Current Students (https://www.colorado.edu/chbe/current-students/) webpage for more information.
4. Students may choose a course from the list of college-approved writing courses (https://www.colorado.edu/engineering-advising/get-your-degree/degree-requirements/humanities-social-sciences-and-writing-requirements/).
5. BIEN/CHEN Technical Electives can be any BIEN or CHEN 3000+ course.
6. Focus Technical Electives can be any BIEN 4000+ course. These courses will be taught in alternating years and should be taken in the junior or senior year as available.

Learning Outcomes

Program Educational Objectives

The department prepares graduates to make significant contributions in many diverse areas. Specifically, within a few years of graduation our graduates will have achieved one or more of the following attributes:

- In their chosen field, be established in a professional career, be pursuing an advanced degree or be seeking advanced certification.
- Be recognized as successful in an academic, industrial, or entrepreneurial position.
- Be successfully working and contributing in a variety of technical fields.
- Be adapting to new technologies and changing professional environments.

Student Outcomes

By the completion of the program, students will be able to:

- Identify, formulate and solve complex engineering problems by applying principles of engineering, science and mathematics.
- Apply engineering design to produce solutions that meet specified needs with consideration of public health, safety and welfare, as well as global, cultural, social, environmental and economic factors.
- Communicate effectively with a range of audiences.

- Recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental and societal contexts.
- Function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks and meet objectives.
- Develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
- Acquire and apply new knowledge as needed, using appropriate learning strategies.

Bachelor's–Accelerated Master's Degree Program(s)

The bachelor's–accelerated master's (BAM) degree program options offer currently enrolled CU Boulder undergraduate students the opportunity to receive a bachelor's and master's degree in a shorter period of time. Students receive the bachelor's degree first but begin taking graduate coursework as undergraduates (typically in their senior year).

Because some courses are allowed to double count for both the bachelor's and the master's degrees, students receive a master's degree in less time and at a lower cost than if they were to enroll in a stand-alone master's degree program after completion of their baccalaureate degree. In addition, staying at CU Boulder to pursue a bachelor's–accelerated master's program enables students to continue working with their established faculty mentors.

BS in Biological Engineering, MS in Chemical Engineering

Admissions Requirements

In order to gain admission to the BAM program named above, a student must meet the following criteria:

- Have a cumulative GPA of 3.00 or higher.
- Have a minimum GPA of 3.00 in CHEN coursework.
- Have completed CHEN 2120, CHEN 3200, CHEN 3210, CHEN 3320 and CHEN 3010 prerequisite courses with grades of B- in each course.
- Have at least junior class standing.
- Provide a one-page statement of purpose. The statement should describes briefly your past work in the field, including non-course educational experiences, teaching, or other relevant employment, publication, theses, research in progress, other scholarly activities, and your plans for graduate study and a professional career.
- GRE.
- Provide an unofficial transcript.

Program Requirements

Students may take up to and including 12 credit hours while in the undergraduate program which can later be used toward the master's degree. However, only six credit hours may be double counted toward the bachelor's degree and the master's degree. Students must apply to graduate with the bachelor's degree, and apply to continue with the master's degree, early in the semester in which the undergraduate requirements will be completed.

BS in Biological Engineering, Professional MS in Materials Science

Admissions Requirements

In order to gain admission to the BAM program named above, a student must meet the following criteria:

- Have a cumulative GPA of 3.25 or higher.
- Completion of the following five CHEN core courses with a minimum grade of B- in each course: CHEN 2120, CHEN 3200, CHEN 3210, CHEN 3320 and CHEN 3010.
- Be enrolled in BIEN 4805.
- Provide an unofficial transcript.

Students with a GPA below 3.25 (but above 3.00, the university minimum standard) may submit a petition with a letter of recommendation from a professor and a one-page statement of purpose. The statement should briefly describe the student's past work in the field, including any non-course educational experiences or other relevant employment, and the student's plans for graduate study and a professional career.

Program Requirements

Students must declare a track in which to specialize. Students may take up to and including 12 hours while in the undergraduate program that satisfy the specialized track courses and/or the breadth elective courses, which can later be used toward the master's degree. However, only six credit hours may be double counted toward the bachelor's degree and the master's degree. Students must apply to graduate with the bachelor's degree, and apply to continue with the master's degree, early in the semester in which the undergraduate requirements will be completed.

Please see the BAM degree program (https://www.colorado.edu/chbe/undergraduate-program/undergraduate-opportunities/) webpage for more information.

Chemical Engineering - Bachelor of Science (BSCHE)

Alternative and renewable energy. Carbon capture and CO2 emissions reduction. Semiconductor and microprocessor fabrication. Novel nanomaterials and polymers. Plastic upcycling. Data science. Chemical engineers are on the front lines of all of these cutting-edge technologies.

Chemical engineering students at CU Boulder learn the skills necessary to address the energy, climate change and technology challenges of tomorrow. Learn from world-class faculty leveraging innovative, award-winning education practices and hands-on lab experiences. Benefit from department connections to the National Renewable Energy Laboratory, the BioFrontiers Institute, the Renewable and Sustainable Energy Institute and more.

Requirements

Prerequisites and Passing Grades

Unless otherwise specified, minimum passing grades for all courses that are prerequisites for other required courses is C-. If a grade of D+ or lower is received in a course which is a prerequisite to another, the student may not register for the subsequent course until the first grade has been raised to a C- or higher. In addition, CHEN core courses taken in a student's senior year also require a minimum grade of C-, even though they are not prerequisites.

Unless specified otherwise, the minimum passing grade for a course that is not specifically a prerequisite for another required course is D-.

Students may be dropped from courses if they do not meet the minimum prerequisite grade requirements. It is the student's responsibility to communicate with the department if summer coursework and/or transfer credit will be used to meet the prerequisite requirement.

Required Courses

A total of 128 credit hours is required.

Humanities, Social Sciences and Writing

Complete the College's Humanities, Social Sciences and Writing requirements (https://www.colorado.edu/engineering-advising/get-your-degree/degree-requirements/humanities-social-sciences-and-writing-requirements/) (18 credits total).

Technical Electives

General Technical and Engineering Technical Electives must meet specific requirements (15 credits total). Visit the department's Current Students (https://www.colorado.edu/chbe/current-students/) webpage and consult the current advising guide.

Free Electives

3 credits of Free Electives allowed.

Modified Pathways

To follow a curricular pathway in a field of particular interest requires careful planning and course selection by student and advisor.

Premed Path

This path is offered for students preparing for medical school. Since chemical engineering already requires most of the premed courses, it is a logical choice for students who desire an engineering degree and the opportunity to pursue a medical profession. For information on the premed path, visit the department's current students (http://

www.colorado.edu/chbe/academics/undergraduate-program/current-students/) webpage and consult the current advising guide.

Recommended Four-Year Plan of Study

CHEN/BIEN 3000+ Technical Elective [5]		3
Technical Elective [1, 5]		3
Humanities or Social Science Elective [2]		3
	Credit Hours	**15**
	Total Credit Hours	**128**

1. CHEN 1300 is an optional Engineering Technical Elective. If it is taken, one of the Technical Elective courses in this Plan of Study will only require 2 credits (instead of 3 credits).
2. Students may choose courses from the list of college-approved humanities and social sciences (HSS) electives (https://www.colorado.edu/engineering-advising/get-your-degree/degree-requirements/humanities-social-sciences-and-writing-requirements/).
3. Students may choose a course from the list of college-approved writing courses (https://www.colorado.edu/engineering-advising/get-your-degree/degree-requirements/humanities-social-sciences-and-writing-requirements/).
4. Advanced Chemistry Electives include: Principles of Biochemistry (BCHM 4611, 3), Modern Inorganic Chemistry (CHEM 4011, 3), and Physical Chemistry 2 (CHEM 4531, 3).
5. General Technical Electives, Engineering Technical Electives, and Free Electives must meet specific requirements. Visit the department's Current Students (https://www.colorado.edu/chbe/current-students/) webpage for more information.

Learning Outcomes

Program Educational Objectives

The department prepares graduates to make significant contributions in many diverse areas. Specifically, within a few years of graduation our graduates will have achieved one or more of the following attributes:

- In their chosen field, be established in a professional career, be pursuing an advanced degree or be seeking advanced certification.
- Be recognized as successful in an academic, industrial, or entrepreneurial position.
- Be successfully working and contributing in a variety of technical fields.
- Be adapting to new technologies and changing professional environments.

Student Outcomes

By the completion of the program, students will be able to:

- Identify, formulate and solve complex engineering problems by applying principles of engineering, science and mathematics.
- Apply engineering design to produce solutions that meet specified needs with consideration of public health, safety and welfare, as well as global, cultural, social, environmental and economic factors.
- Communicate effectively with a range of audiences.
- Recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental and societal contexts.
- Function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks and meet objectives.
- Develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
- Acquire and apply new knowledge as needed, using appropriate learning strategies.

Bachelor's–Accelerated Master's Degree Program(s)

The bachelor's–accelerated master's (BAM) degree program options offer currently enrolled CU Boulder undergraduate students the opportunity to receive a bachelor's and master's degree in a shorter period of time. Students receive the bachelor's degree first but begin taking graduate coursework as undergraduates (typically in their senior year).

Because some courses are allowed to double count for both the bachelor's and the master's degrees, students receive a master's degree in less time and at a lower cost than if they were to enroll in a stand-alone master's degree program after completion of their baccalaureate degree. In addition, staying at CU Boulder to pursue a bachelor's–accelerated master's program enables students to continue working with their established faculty mentors.

BS and MS in Chemical Engineering

Admissions Requirements

In order to gain admission to the BAM program named above, a student must meet the following criteria:

- Have a cumulative GPA of 3.00 or higher.
- Have a minimum GPA of 3.00 in CHEN coursework.
- Students must have completed CHEN 2120, CHEN 3200, CHEN 3210, CHEN 3320 and CHEN 3010 prerequisite courses with grades of B- in each course.
- Have at least junior class standing.
- Completion of all MAPS requirements and no deficiencies remaining (students admitted to CU Boulder prior to Summer 2023 only).
- Provide a one-page Statement of Purpose. The statement should briefly describe your past work in the field, including non-course educational experiences, teaching, or other relevant employment, publication, theses, research in progress, other scholarly activities and your plans for graduate study and a professional career
- GRE.
- Provide an unofficial transcript.

Program Requirements

Students may take up to and including 12 hours while in the undergraduate program which can later be used toward the master's degree. However, only six credit hours may be double counted toward the bachelor's degree and the master's degree. Students must apply to graduate with the bachelor's degree, and apply to continue with the master's degree, early in the semester in which the undergraduate requirements will be completed.

BS in Chemical Engineering, Professional MS in Materials Science

Admissions Requirements

In order to gain admission to the BAM program named above, a student must meet the following criteria:

- Have a cumulative GPA of 3.25 or higher.
- Completion of all MAPS requirements (students admitted to CU Boulder prior to Summer 2023 only).
- Completion of the following five CHEN core courses with a minimum grade of B- in each course: CHEN 2120, CHEN 3200, CHEN 3210, CHEN 3320 and CHEN 3010.
- Be enrolled in CHEN 4440.
- Provide an unofficial transcript.

Students with a GPA below 3.25 (but above 3.0, the university minimum standard) may submit a petition with a letter of recommendation from a professor and a one-page statement of purpose. The statement should briefly describe the student's past work in the field, including any non-course educational experiences or other relevant employment, and the student's plans for graduate study and a professional career.

Program Requirements

Students must declare a track in which to specialize. Students may take up to and including 12 hours while in the undergraduate program that satisfy the specialized track courses and/or the breadth elective courses, which can later be used toward the master's degree. However, only six credit hours may be double counted toward the bachelor's degree and the master's degree. Students must apply to graduate with the bachelor's degree, and apply to continue with the master's degree, early in the semester in which the undergraduate requirements will be completed.

Please see the BAM degree program (https://www.colorado.edu/chbe/undergraduate-program/undergraduate-opportunities/) web page for more information.

Biological Engineering - Minor

Biological engineers are instrumental in driving fields such as tissue engineering, personalized medicine, sustainable biofuels, pharmaceuticals, biotechnology, biomaterials and therapeutics. A biological engineering minor prepares students to approach these fields from a biochemical engineering perspective.

Students first complete fundamental courses on topics such as mass and energy balances and transport and then pick from a wide array of more advanced biological engineering classes to suite their individual interests.

A minor in biological engineering can be earned in conjunction with any CU Boulder engineering major.

Requirements

Course Requirements

The biological engineering minor requires a minimum of 18 credit hours, distributed as follows:

Code	Title	Credit Hours
Required Courses		
CHEN 2120	Chemical Engineering Material and Energy Balances	3
or BMEN 2100	Biomedical Engineering Principles and Methods	
CHEN 3210	Chemical Engineering Heat and Mass Transfer	4
or BMEN 3010	Biotransport	
Electives		
Choose 11-12 credits from any of the following:		11-12
BCHM 4611	Principles of Biochemistry	
BMEN 2010	Biomaterials	
BIEN 3800	Fundamentals of Biotechnology	
BIEN 4010	Biological Engineering Senior Thesis 1	
BIEN 4020	Biological Engineering Senior Thesis 2	
BIEN 4520	Biological Process and Product Design	
BIEN 4530	Biological Engineering Design Project	
BIEN 4801	Pharmaceutical Biotechnology	
BIEN 4802	Tissue Engineering and Biofabrication	
BIEN 4803	Metabolic Engineering	
BIEN 4804	Protein and Enzyme Engineering	
BIEN 4805	Biomaterials	
BIEN 4806	Immunoengineering	
BIEN 4810	Biological Engineering Laboratory	
BIEN 4820	Biochemical Separations	
BIEN 4830	Biokinetics and Reactor Design	
BIEN 4838	Special Topics in Biological Engineering	
Total Credit Hours		**18-19**

Additional guidelines regarding the requirements:

- Relevant independent study coursework can be petitioned.
- 5000-level BIEN courses are allowed where undergraduate students are eligible to enroll.
- Prior coursework may be transferred from other institutions with approval.
- At least 9 credit hours need to be taken on the CU Boulder campus, at least 6 credits of which must be at the upper-division level.

Grade Requirements

A grade point average (GPA) of 2.000 or better is required in the courses that are used to satisfy the requirements for this minor. Each individual course that is counted towards these requirements must be passed with a C- or better.

Plan(s) of Study

Year Two		
Fall Semester		**Credit Hours**
CHEN 2120 or BMEN 2000	Chemical Engineering Material and Energy Balances or Introduction to Biomedical Engineering	3
	Credit Hours	**3**
Year Three		
Fall Semester		
CHEN 3210 or BMEN 3010	Chemical Engineering Heat and Mass Transfer or Biotransport	4
Elective [1]		3
	Credit Hours	**7**
Spring Semester		
Elective [1]		3
	Credit Hours	**3**
Year Four		
Fall Semester		
Elective [1]		3
	Credit Hours	**3**
Spring Semester		
Elective [1]		2
	Credit Hours	**2**
	Total Credit Hours	**18**

[1] This is a sample distribution of electives. A total of at least 11 credit hours of approved electives must be completed for the minor and the actual distribution may look different depending on actual courses chosen.

Chemical Engineering - Minor

The chemical engineering minor provides students with a foundational set of tools to tackle the world's energy and climate change challenges from a new perspective. From materials and microelectronics to alternative energy, chemical engineers have the technical background to provide sustainable solutions.

Upon taking select core chemical engineering classes including separations and heat & mass transfer, students can pick from more advanced chemical engineering electives based on their interests.

A minor in chemical engineering can be earned in conjunction with any CU Boulder engineering major.

Requirements

Course Requirements

The chemical engineering minor requires a minimum of 18 credit hours, distributed as follows:

Code	Title	Credit Hours
Required Courses		
CHEN 2120	Chemical Engineering Material and Energy Balances	3
CHEN 3210	Chemical Engineering Heat and Mass Transfer	4
CHEN 3320	Chemical Engineering Thermodynamics 1	3
CHEN 3220	Chemical Engineering Separations	3
Electives		
Choose five credits from any of the following:		5
CHEN 1300	Introduction to Chemical and Biological Engineering	
CHEN 3660	Energy Fundamentals	
CHEN 4130	Chemical Engineering Laboratory	
CHEN 4440	Chemical Engineering Materials	
CHEN 4450	Polymer Chemistry	
CHEN 4460	Polymer Engineering	
CHEN 4480	Solar Cells and Optical Devices for Sustainable Buildings	
CHEN 4490	Electrochemical Engineering	
CHEN 4520	Chemical Process Design	
CHEN 4530	Chemical Engineering Design Project	
CHEN 4570	Process Dynamics and Control	
CHEN 4630	Intellectual Property Law and Engineering	
CHEN 4650	Particle Technology	
CHEN 4836	Nanomaterials	
CHEN 4838	Special Topics in Chemical Engineering	
Total Credit Hours		**18**

Additional guidelines regarding the requirements:

- Relevant independent study coursework can be petitioned.
- 5000-level CHEN courses are allowed where undergraduate students are eligible to enroll.
- Prior coursework may be transferred from other institutions with approval.
- At least 9 credit hours need to be taken on the CU Boulder campus, at least 6 credits of which must be at the upper-division level.

Grade Requirements

A grade point average (GPA) of 2.000 or better is required in the courses that are used to satisfy the requirements for this minor. Each individual course that is counted towards these requirements must be passed with a C- or better.

Plan(s) of Study

Year Two		
Fall Semester		**Credit Hours**
CHEN 2120	Chemical Engineering Material and Energy Balances	3
	Credit Hours	**3**
Year Three		
Fall Semester		
CHEN 3210	Chemical Engineering Heat and Mass Transfer	4
CHEN 3320	Chemical Engineering Thermodynamics 1	3
	Credit Hours	**7**
Spring Semester

	Credit Hours	**3**
Spring Semester		
Elective [1]		2
	Credit Hours	**2**
	Total Credit Hours	**18**

[1] This is a sample distribution of electives. A total of at least 5 credit hours of approved electives must be completed for the minor and the actual distribution may look different depending on actual courses chosen.

Civil, Environmental & Architectural Engineering

Civil Engineering

Civil engineering offers a wide range of careers for students interested in the planning, design and construction management of facilities essential to modern life in both the public and private sectors. Varying widely in nature, size and scope, such facilities include buildings, bridges, tunnels, highways, transit systems, dams, airports, irrigation projects, water treatment and distribution facilities, waste treatment and processing facilities, structures for space exploration and offshore engineering designs applications. This course of study fulfills the academic requirements for registration as a professional engineer.

In the coming decades, almost two billion more people will populate earth in both developed and developing countries. This growth will create unprecedented demands and opportunities for new methods and innovations in energy production, food supply, land development, water treatment, transportation systems, materials processing, waste disposal, healthcare delivery, environmental preservation and structural designs. Civil engineers play both direct and indirect roles in meeting many of these needs, with the goal of providing and improving the quality and infrastructure of life.

Environmental Engineering

Environmental engineering plays a vital role in maintaining the quality of both public health and the natural environment. Environmental engineering encompasses the scientific assessment and development of sustainable engineering solutions to environmental problems impacting the biosphere and land, water and air quality. Environmental issues affect almost all commercial and industrial sectors, and are a central concern for the public, for all levels of government and in international

relations. This course of study fulfills the academic requirements for registration as a professional engineer.

In common with other engineering fields, courses in solid mechanics, fluid dynamics and thermal sciences are central to the environmental engineering degree. Coursework specific to environmental engineering includes environmental chemistry and microbiology, as well as treatment processes and approach.

Architectural Engineering

Architectural engineering prepares students for leadership careers in the building design, consulting, construction and management industry and for research at the graduate level on building- and sustainability-related topics. In particular, the architectural engineering program prepares students to design, build and operate facilities that improve our quality of life. This course of study fulfills the academic requirements for registration as a professional engineer.

The architectural engineering curriculum is recommended for those wishing to specialize within the building industry in engineering design (heating, cooling, illumination, electrical, solar and structures) or construction and contracting (facilities management). Architectural engineering students may select from several focus areas, including: electrical systems; lighting systems; heating, ventilating and air conditioning (HVAC) systems; materials and structural systems; construction engineering and management.

Course codes for these programs are AREN, CVEN and EVEN.

Bachelor's Degrees

- Architectural Engineering - Bachelor of Science (BSARE) (p. 900)
- Civil Engineering - Bachelor of Science (BSCV) (p. 904)
- Environmental Engineering - Bachelor of Science (BSEV) (p. 907)

Minors

- Architectural Engineering - Minor (p. 911)
- Civil Engineering - Minor (p. 912)
- Sustainability Engineering - Minor (p. 912)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Amadei, Bernard (https://experts.colorado.edu/display/fisid_105978/)
Professor Emeritus; PhD, University of California, Berkeley

Zhang, Yida (https://experts.colorado.edu/display/fisid_158222/)
Associate Professor; PhD, Northwestern University

Courses

Architectural Engineering

AREN 1027 (3) Engineering Drawing
Introduces engineering drawing including sections and dimensioning, print readings, computer 3D, and building information modeling (BIM).
Requisites: Restricted to Engineering Physics (EPEN), Architectural (AREN), Integrated Design Engineering (IDEN) or Civil (CVEN) Engineering majors only and to IUT On Track students.
Additional Information: Departmental Category: Miscellaneous

AREN 1316 (1) Introduction to Architectural Engineering
Surveys the broad subject of architectural engineering and professional practices. Includes professional design services, design documents, methods of construction delivery, materials for construction, codes and standards, life safety, professional ethics, structural systems, mechanical systems, electrical systems, and building systems integration.
Requisites: Restricted to students with 0-56 (Freshmen or Sophomore) College of Engineering majors only.
Additional Information: Departmental Category: Miscellaneous

AREN 2050 (3) Building Materials and Systems
Covers the broad subject of building materials and systems. Includes a practical approach to assembly details, methods of construction, codes, foundations, steel, concrete, masonry, cladding, doors and windows, interiors, finishes, mechanical, plumbing, electrical, life safety and conveyance. Includes investigation of an existing facility along with a team presentation trends in commercial building construction.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) Civil (CVEN) or Architectural (AREN) or Integrated Design Engineering (IDEN) or Applied Mathematics (AMEN) majors or IUT On Track students only.
Additional Information: Departmental Category: Building Systems Engineering

AREN 2110 (3) Thermodynamics
Explores fundamental principles of thermodynamics, including first and second law of thermodynamics, thermophysical properties, power and refrigeration cycles, gas mixtures and psychrometrics.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 3012 or GEEN 3852
Requisites: Requires a prereq course of PHYS 1110 (min grade C-) and a prereq or coreq course of APPM 1360 or MATH 2300 (min grade C-). Restricted to AREN, CVEN, EVEN, IDEN, or AMEN majors or to IUT On Track students only.
Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences
Departmental Category: Building Systems Engineering

AREN 2120 (3) Fluid Mechanics and Heat Transfer
Explores fundamental principles of fluid mechanics and heat transfer. Topics include fluid statics, momentum and energy conservations; laminar and turbulent viscous flows; conduction, convection and radiation heat transfer. Emphasizes topics and problems that are important to Architectural Engineers including flow of fluids in pipes and ducts, heat transfer in buildings and building systems.
Requisites: Requires prereq or coreq of (APPM 2350 or MATH 2400) (APPM 2360 or (MATH 2130 3430)) prereq course (AREN 2110 or GEEN 3852 or MCEN 3012 or ASEN 2002 or ASEN 2702) (all min grade C-).Restricted to Coll of Engineering mjrs IUT on track students onl
Additional Information: Departmental Category: Building Systems Engineering

AREN 2121 (1) Heat Transfer
This is an elective course for students who want to obtain an AREN BS degree and have taken Fluid Mechanics course but not heat transfer. This course will fulfill their curriculum requirement and allow them to take the following courses that require heat transfer knowledge. Previously offered as a special topics course.
Requisites: Requires prereq or coreq courses (APPM 2350 or MATH 2400) (APPM 2360 or (MATH 2130 3430)) prerequisite course (AREN 2110 or GEEN 3852 or MCEN 3012 or ASEN 2002 or ASEN 2702) (all minimum grade C-). Restricted to College of Engineering majors only

AREN 2830 (1-3) Special Topics
Supervised study of special topics of interest to students under instructor guidance.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.
Additional Information: Departmental Category: Special Topics

AREN 3010 (3) Energy Efficient Buildings
Lecture course on the analysis and design of buildings and their systems to satisfy the requirements for a comfortable and healthy indoor environment. Examines psychometrics, thermal comfort, building heating and cooling loads, fluid flow basics, and HVAC components and systems.
Requisites: Requires prerequisite courses of AREN 2050 and (AREN 2120 or ((MCEN 3022 or AREN 2121) and (CVEN 3313 or MCEN 3021 or CHEN 3200))) (all minimum grade C-). Restricted to College of Engineering majors only.
Additional Information: Departmental Category: Building Systems Engineering

AREN 3040 (3) Circuits for Architectural Engineers
This course will cover the basics of DC and AC circuit theory relevant to the modeling, design, and control of residential and commercial building systems, including Kirchoff's laws, Thevenin/Norton theorems, transient analysis of DC systems, three phase analysis, induction and synchronous motors, AC power (including real and reactive power analysis), power factor correction, and transformers.
Requisites: Requires prerequisite courses of (APPM 2360 or (MATH 2130 and 3430)) and PHYS 1120 (all minimum grade C-). Restricted to AREN, CVEN, and EVEN majors only.

AREN 3080 (3) Architectural Design Studio 1
Learn about the fundamentals of architectural design and the ways in which it compliments architectural engineering. This introductory studio welcomes students to explore the strategies and techniques through which architects design and communicate. As a studio, the course culminates in a small-scale architecture project through which students will explore and become trained in the architectural design process.
Requisites: Requires prerequisite of AREN 1027 (minimum grade C-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) College of Engineering majors only.

AREN 3140 (3) Illumination Laboratory
Introduces the measurement of photometric and psychophysical quantities used in lighting. Experience is acquired in using light measurement instruments to evaluate lighting equipment and luminous environments. Taught intermittently.
Requisites: Requires prerequisite course of AREN 3540 (minimum grade C-).
Additional Information: Departmental Category: Building Systems Engineering

AREN 3430 (3) Architectural (Interior) Lighting Design
Studies the fundamentals of architectural illumination with an emphasis in design and application. Introduces and applies basic principles and vocabulary to problems in the lighting of interior environments for the performance of visual work, the proper interaction with architecture, and compliance of energy requirements.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only. College of Engineering majors are excluded from this course.

AREN 3440 (3) Architectural Daylighting Design
Enables students to develop sufficient working facility with the core principles and practices of architectural daylighting to allow for meaningful integration into future design work. Students work in active project-based environments to explore both quantitative and qualitative aspects of primary daylighting issues and precepts. Previously offered as a special topics course.
Requisites: Restricted to junior and above non-engineering majors only.
Recommended: Prerequisite AREN 3430.

AREN 3540 (3) Illumination I
Studies the fundamentals of architectural illumination. Introduces and applies basic principles and vocabulary to elementary problems in the lighting of environments for the performance of visual work and the proper interaction with architecture.
Requisites: Requires prerequisite courses of (CSCI 1200 or CHEN 1310 or CSCI 1300 or ASEN 1320 or ECEN 1310) and (APPM 2350 or MATH 2400) (all minimum grade C-). Restricted to College of Engineering majors only.
Additional Information: Departmental Category: Building Systems Engineering

AREN 4010 (3) Energy System Modeling and Control
Engineering course devoted to building automation and control systems. Topics include HVAC control technology and strategies, measurement and device technologies, analysis and modeling of dynamic systems, simulation of conventional and advanced control approaches, assessment of control loop performance and hands-on direct digital control (DDC) programming exercises as used in current building control practice.
Equivalent - Duplicate Degree Credit Not Granted: AREN 5010
Requisites: Requires prerequisite course of AREN 4110 (minimum grade C-).
Additional Information: Departmental Category: Building Systems Engineering

AREN 4040 (3) Building Energy Audits
Provides students with the fundamental tools and procedures required to perform energy audits of building systems typically required for energy efficiency projects including performance contracting and retro-commissioning projects.
Equivalent - Duplicate Degree Credit Not Granted: AREN 5020
Requisites: Requires prerequisite course of AREN 3010 (minimum grade C-). Restricted to students with 57-180 credits (Juniors or Seniors).

AREN 4061 (3) Distributed Electricity Generation
Introduces basic distributed generation (DG) technologies including fuel-based systems and renewable energy technologies and overview approaches to conduct energy, economical, and environmental analysis of selected DG technologies using state-of-the-art analysis tools to evaluate optimal hybrid distributed generation systems to meet required electrical loads specific to urban centers, campuses, and residential communities.
Equivalent - Duplicate Degree Credit Not Granted: AREN 5061
Requisites: Requires prerequisite course of AREN 3010 (minimum grade C-). Restricted to juniors and seniors.
Grading Basis: Letter Grade

AREN 4110 (3) Building Energy Systems Engineering
Prepares students for professional practice in building energy systems engineering, i.e., analysis and design of residential and commercial buildings, including district energy systems. Upon completion, students possess the skills to calculate heating, cooling, and ventilation requirements, as well as analyze, design, and evaluate integrated building energy systems to meet the following goals: indoor environmental health, safety, and productivity (codes and standards); economic drivers (affordability, life cycle cost), and societal needs (environmental equity, energy justice, decarbonization).
Equivalent - Duplicate Degree Credit Not Granted: AREN 5110
Requisites: Requires prerequisite course of AREN 3010 (minimum grade C-).
Additional Information: Departmental Category: Building Systems Engineering

AREN 4130 (3) Optical Design for Illumination and Solid State Lighting
Covers the optical design process for illumination-based optics, emphasis on applications in architectural lighting. In-depth coverage of luminaire photometry, lamps, materials, manufacturing methods, product performance requirements. Projects utilize optical design software and include a variety of lamp types including LEDs using both reflector/lens optics.
Equivalent - Duplicate Degree Credit Not Granted: AREN 5130
Requisites: Requires prerequisite course of AREN 3540 (minimum grade C-). Restricted to Architectural (AREN) or Civil (CVEN) Engineering majors only.
Additional Information: Departmental Category: Building Systems Engineering

AREN 4315 (3) Design of Masonry Structures
Covers modern masonry construction; properties and behavior of the reinforced masonry component materials, clay and concrete masonry units, mortar, grout, and steel reinforcement; vertical and lateral load types and intensities; and design of reinforced masonry walls, beams and columns by the strength design method.
Requisites: Requires prerequisite course of CVEN 3525 (minimum grade C-).
Additional Information: Departmental Category: Structures

AREN 4318 (5) Architectural Engineering Design 1
Provides a capstone experience to AREN students. Students design a modest commercial building and complete an integrated engineering design of the building systems executed for the conceptual and schematic design phases. Students' teams work on structural, mechanical, electrical/lighting, and construction engineering management design. Each stage produces a professional-quality design document. Faculty and industry mentors participate in the teaching and evaluation.
Requisites: Requires prerequisites of AREN 3080, AREN 4110, AREN 4506 and AREN 4550. Requires prerequisite or corequisite of AREN 4570 and (CVEN 4545 or 4555) (all minimum grade C-).

AREN 4319 (2) Architectural Engineering Design 2
Continues the capstone experience for AREN students. Student teams continue their design of a modest commercial building through the Design Development phase with support from faculty and industry mentors. Additionally, topics of professionalism, engineering ethics, and life-long learning are covered.
Requisites: Requires prerequisites of AREN 4318 (minimum grade C-).

AREN 4440 (3) Lighting Design Capstone
Synthesizes and applies knowledge and skills from previous lighting design courses in the Lighting Design Certificate. Students work on a real-world lighting design project following industry-standard phases of design while learning about lighting design professional practice, current design topics, trends, and industry issues.
Requisites: Requires prerequisites of AREN 3430 and (AREN 4530 or AREN 4620 or THTR 3055) (all minimum grade C-). Restricted to students in the Lighting Design Certificate (LGHT-CERU plan).

AREN 4506 (3) Pre-construction Estimating and Scheduling
Covers project management estimating and scheduling methods with an emphasis on the techniques used to create pre-construction estimates and schedules for architectural and civil engineering projects.
Requisites: Requires prerequisite course of CVEN 3246 (minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Architectural (AREN), Civil (CVEN) or Integrated Design (IDEN) Engineering majors only.
Additional Information: Departmental Category: Construction

AREN 4540 (3) Architectural Exterior and Landscape Lighting Design
Introduces the fundamentals of nighttime illumination for architectural exteriors and landscapes. Students will learn about the interaction of light and human vision at night; lighting technologies used in outdoor settings; societal, environmental and ecological issues related to the application of light at night; lighting design principles and techniques that use light and darkness both creatively and responsibly.
Equivalent - Duplicate Degree Credit Not Granted: AREN 5540
Requisites: Requires prerequisite course of AREN 3430 (minimum grade C-). Restricted to junior and above non-engineering majors only.
Additional Information: Departmental Category: Building Systems Engineering

AREN 4550 (3) Illumination 2
Applies the principles studied in Illumination 1. Provides further study in architectural lighting design methods. Uses lighting studio work to develop a broad knowledge of lighting equipment, design methods, and their application in a series of practical design problems in modern buildings.
Equivalent - Duplicate Degree Credit Not Granted: AREN 5550
Requisites: Requires prerequisite course of AREN 3540 (minimum grade C-).
Additional Information: Departmental Category: Building Systems Engineering

AREN 4560 (3) Luminous Radiative Transfer
Teaches fundamentals of radiative exchange as applied to illumination engineering. Describes and uses principal numerical techniques for radiative transfer analysis. Applies techniques to lighting design and analysis.
Equivalent - Duplicate Degree Credit Not Granted: AREN 5560
Requisites: Requires prerequisite course of AREN 3540 (minimum grade C-).
Additional Information: Departmental Category: Building Systems Engineering

AREN 4570 (3) Building Electrical Systems Design 1
Introduces the generation and distribution of electrical power. Focuses on understanding the loads, control, and protection of secondary electrical distribution systems in building. Applies the national electric code to residential and commercial buildings.
Equivalent - Duplicate Degree Credit Not Granted: AREN 5570
Requisites: Requires prerequisite of AREN 3040 or ECEN 2250 or MCEN 3017 or GEEN 3010 (all minimum grade C-). Restricted to College of Engineering majors only.
Additional Information: Departmental Category: Building Systems Engineering

AREN 4580 (3) Daylighting
Applies the fundamental principles of illumination engineering to architectural daylighting design, exploring the quantitative methods and tools used to develop daylighting designs and evaluate their performance. Topics include solar resource models, energy transfer models, design methods, and controls for integration with electric lighting systems.
Equivalent - Duplicate Degree Credit Not Granted: AREN 5580
Requisites: Requires prerequisite courses of AREN 4130 and AREN 4550 (minimum grade C-).
Additional Information: Departmental Category: Building Systems Engineering

AREN 4590 (3) Computer Graphics in Lighting Engineering
Studies the numerical methods and computer implementation of computer graphics visualization for architectural lighting engineering and design. Implements finite element radiative transfer and ray-tracing in computer programs. Studies the use of computer graphics visualization in lighting analysis. Taught intermittently.
Requisites: Requires prerequisite courses of AREN 3540 and AREN 4560 (minimum grade C-).
Additional Information: Departmental Category: Building Systems Engineering

AREN 4606 (3) Construction Project Execution and Control
Integrates project execution and control techniques for construction scope, cost and schedule. Includes progress measurement, resource planning, earned value methods, productivity, risk management methods and key contract clauses.
Requisites: Requires prerequisite courses of CVEN 3246 and AREN 4506 (all minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Civil (CVEN), Architectural (AREN) or Integrated Design (IDEN) Engineering majors only.
Additional Information: Departmental Category: Construction

AREN 4620 (3) Adaptive Lighting Systems
Builds on architectural lighting principles studied in Illumination 1 and 2. Explores quantitative methods and the design process to develop architectural lighting control solutions. Topics include adaptive lighting applications such as daylight integration and occupant well-being, as well as control system architecture and components, codes and standards, and design implementation.
Equivalent - Duplicate Degree Credit Not Granted: AREN 5620
Requisites: Requires prerequisites AREN 3540 and AREN 4550 (both minimum grade C-), or prerequisite of AREN 3430 (minimum grade C-) for students in the LGHT-CERU program.
Recommended: Prerequisite AREN 4130.

AREN 4630 (3) Advanced Lighting Design
Intended to help students understand light as a medium in design, begin the formulation of a philosophical perspective for its application, and continue to develop the skills required to design and implement lighting systems. Knowledge from previous lighting classes (Illumination I and Illumination II) is essential to this course. Formerly AREN 4530.
Equivalent - Duplicate Degree Credit Not Granted: AREN 5630
Requisites: Requires prerequisite courses of (AREN 3540 and AREN 4550) (all minimum grade C-) or AREN 3430 (minimum grade C-). Restricted to AREN majors or students in the Lighting Design Certificate (LGHT-CERU).
Additional Information: Departmental Category: Building Systems Engineering

AREN 4830 (1-3) Special Topics for Seniors/Grads
Supervised study of special topics of interest to students under instructor guidance.
Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.
Additional Information: Departmental Category: Special Topics

AREN 4849 (1-3) Independent Study
Offers an independent, in-depth study, research or design in a selected area of architectural engineering. Offerings are coordinated with individual faculty. Students should consult the Department of Civil, Environmental, and Architectural Engineering.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Special Topics

AREN 4890 (3) Sustainable Building Design
Introduces green building design procedure/approach and provides insight into evolving design principles; explores aspects of building thermal/energy performance, indoor/outdoor environmental quality, occupant comfort and climate relevant to building design (structures not covered); emphasizes both comprehensive understanding and practical applications of sustainable building design strategies; applies prevailing simulation tools to assist green building design.
Equivalent - Duplicate Degree Credit Not Granted: AREN 5890
Requisites: Requires a prerequisite course of AREN 3010 (minimum grade C-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Engineering students only.
Additional Information: Departmental Category: Building Systems Engineering

AREN 4990 (3) Compu Fluid Dynamics (CFD) Analysis for Built/Natural Envmnts
Explores the fundamentals of simulating/analyzing civil and architectural environments with Computational Fluid Dynamics (CFD) method. Run with two parallel sessions: fundamentals and applications, with fundamental lectures presenting the principles of CFD technologies, and application sessions demonstrating the application of CFD for resolving building and environmental engineering problems (different than MCEN/ASEN) with hands-on exercises.
Equivalent - Duplicate Degree Credit Not Granted: AREN 5990
Requisites: Requires prerequisite courses of AREN 2120 and (APPM 2360) or (MATH 2130 and 3430)) (all minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) College of Engineering majors only.
Additional Information: Departmental Category: Building Systems Engineering

Civil Engineering

CVEN 1027 (3) Civil Engineering Drawing
Develops drawing and drafting skills for civil engineering projects in both hand drawing and software tools. Students will learn to read and interpret design and construction drawings.
Requisites: Restricted to Civil Engineering (CVEN) majors and IUT on track students only.
Additional Information: Departmental Category: Miscellaneous

CVEN 1317 (1) Introduction to Civil and Environmental Engineering
Surveys the broad subject of civil and environmental engineering and professional practice. Includes the subdisciplines of structures, water resources, geotechnics, transportation, environment, and construction. Discusses professional ethics, important skills for engineers, and the engineering design process as it fulfills multiple objectives.
Requisites: Restricted to students with 0-56 credits (Freshmen or Sophomore) College of Engineering majors only.
Additional Information: Departmental Category: Miscellaneous

CVEN 1837 (1-3) Special Topics
Supervised study of special topics of interest to student under instructor guidance.
Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.
Additional Information: Departmental Category: Miscellaneous

CVEN 2012 (3) Introduction to Geomatics
Presents basic techniques of land and construction surveying, including measurement of position, elevation, orientation and length of lines, area, volume and layout calculations. Optical, GPS and GIS equipment and methods are included.
Requisites: Restricted to Architectural (AREN) or Civil (CVEN) or Integrated Design (IDEN) Engineering majors and IUT on track students only.
Additional Information: Departmental Category: Surveying and Transportation

CVEN 2017 (1) Excel Matlab R Primer
Introduces basic usage of Excel, Matlab, and R software programs. Includes overview of fundamental operations such as data input and output, arithmetic, graphics, and programming syntax; more specific operations such as algebraic functions, linear algebra, plotting, loops, conditional statements, statistics and data analysis. Students will complete a final programming project with one of the software programs.
Requisites: Requires prerequisite course of CSCI 1200 or CHEN 1310 or CSCI 1300 or ECEN 1310 (all minimum grade C-). Restricted to College of Engineering majors or IUT on track students only.
Recommended: Corequisite APPM 2360.

CVEN 2121 (3) Analytical Mechanics 1
Applies mechanics to the study of static equilibrium of rigid and elastic bodies. Includes composition/resolution of forces; moments/couples; equivalent force systems; free-body diagrams; equilibrium of particles and rigid bodies; forces in trusses/beams; frictional forces; first/second moments of area; moments and products of inertia.
Equivalent - Duplicate Degree Credit Not Granted: GEEN 2851 and MCEN 2023
Requisites: Requires a prereq course of PHYS 1110 (min grade C-). Requires a prereq or coreq course of APPM 2350 or MATH 2400 (min grade C-). Restricted CVEN or EVEN or AREN or AMEN or EPEN or IDEN majors with a CIV, ENR or ARC subplan or IUT on track students.
Additional Information: Departmental Category: Mechanics

CVEN 2545 (3) Construction Materials
Introduce material science of engineering materials, such as atomic and crystal structures, defects, and phase diagrams; discusses in details three construction materials: Portland cement concrete, metals, and asphalts including classification and composition, engineering properties, and testing methods. Covers basic information of two materials: fiber reinforced polymers and wood.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) College of Engineering students only.
Recommended: Prerequisite CVEN 2121.
Grading Basis: Letter Grade

CVEN 2837 (1-3) Special Topics
Supervised study of special topics of interest to student under instructor guidance.
Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.
Additional Information: Departmental Category: Miscellaneous

CVEN 2909 (3) Introduction to Global Sustainability
This course introduces engineering and non-engineering students to basic definitions and principles of sustainability (i.e., environment, economy, society) and the historical context regarding modern social and technical sustainability challenges as they pertain to population growth and climate change. The course places an emphasis on identifying the drivers, determinants and solutions favoring equitable access to water, sanitation, energy, food, transportation and shelter. Topics include technology development and validation, data collection and impact evaluation.
Equivalent - Duplicate Degree Credit Not Granted: EVEN 2909

CVEN 2919 (3) Sustainability in Action
Using contemporary case studies, this course introduces students to real-world applications of sustainability principles in developing and deploying social and technological solutions to sustainability challenges in climate change, energy, water, oceans, buildings, air quality, human health, food and agriculture, environmental justice, ethics, business, policy, and education. This course answers the following question: Given that sustainability challenges persist, what can we do about it?
Recommended: Prerequisite CVEN 2909.

CVEN 3022 (3) Construction Surveying
Studies construction and highway surveying, horizontal and vertical curves, earthwork, and analysis of data.
Requisites: Requires prerequisite course of CVEN 2012 (minimum grade C-). Restricted to College of Engineering majors only.
Additional Information: Departmental Category: Surveying and Transportation

CVEN 3032 (3) Photogrammetry
Familiarizes students with characteristics of aerial photographs. Measures and interprets aerial photos for planimetric, topographic, hydrological, soil, and land use surveys. Analyzes and presents field measurements over extensive reaches.
Additional Information: Departmental Category: Surveying and Transportation

CVEN 3042 (3) Advanced Engineering Drawing for Infrastructure
Applying drawing and drafting skills for infrastructure projects using advanced CAD software tools. This course will provide an overview of general CAD standards related to civil engineering. Students will create and modify 3D infrastructure CAD models. Students will learn advanced topics, including terrain surface modeling and grading, earthwork calculations, horizontal and vertical alignment design, subsurface pipe design, and development of construction plans.
Requisites: Requires prerequisite course of CVEN 1027 (minimum grade C-). Restricted to College of Engineering students only.
Grading Basis: Letter Grade

CVEN 3111 (3) Analytical Mechanics 2
Studies the motion (kinematics) of particles and rigid bodies, and the forces that cause the motion (kinetics). Newton's laws as well as energy methods are used to study the motion of particles and rigid bodies in two and three dimensions.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 2043
Requisites: Requires prerequisite courses of CVEN 2121 or GEEN 2851 or MCEN 2023 or ASEN 2001 or ASEN 2701 (all minimum grade C-). Restricted to AREN, CVEN, EVEN, or IDEN majors only.
Additional Information: Departmental Category: Mechanics

CVEN 3141 (2) Engineering Materials Lab
Additional Information: Departmental Category: Mechanics

CVEN 3161 (3) Mechanics of Materials 1
Addresses concepts of stress and strain; material properties, axial loading, torsion, simple bending, and transverse shear; analysis of stress and strain; and deflections of beams. Includes selected experimental and computational laboratories.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 2063
Requisites: Requires prereq of (CVEN 2121 or GEEN 2851 or MCEN 2023 or ASEN 2001 or ASEN 2701) and prereq or coreq of (APPM 2360 or (MATH 2130 and 3430)) (all min grade C-). Restricted to AREN, CVEN, EVEN, or IDEN majors with CIV, ENR or ARC subplan.
Additional Information: Departmental Category: Mechanics

CVEN 3227 (3) Probability, Statistics and Decision
Introduces uncertainty based analysis concepts and applications in the planning and design of civil engineering systems emphasizing probabilistic, statistics, and design concepts and methods.
Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.
Additional Information: Departmental Category: Miscellaneous

CVEN 3246 (3) Introduction to Construction
Provides a broad view of concerns, activities, and objectives of people involved in construction: the owner, architect/engineer, contractor, labor and inspector. Interactive gaming situation relates these people to the construction contract, plans/specifications, estimates/bids, scheduling, law and financial management. Students with a Business School Real Estate emphasis may be considered for this course.
Requisites: Restricted to junior or senior Civil (CVEN) or Architectural (AREN), Environmental (EVEN) or Integrated Design (IDEN) Engineering majors only.
Additional Information: Departmental Category: Construction

CVEN 3256 (3) Construction Equipment and Methods
Integrated study of construction equipment, methods, and economics. Topics include equipment productivity, equipment selection, and construction engineering design within economic constraints. Examples include earthmoving, concrete formwork, and temporary construction.
Requisites: Requires prerequisite course of CVEN 3246 (minimum grade C-). Restricted to Architectural (AREN) or Civil (CVEN) or Integrated Design (IDEN) Engineering majors only.
Additional Information: Departmental Category: Construction

CVEN 3313 (3) Theoretical Fluid Mechanics
Basic principles of fluid mechanic. Covers fluid properties, hydrostatics, fluid flow concepts, including continuity, energy, momentum, dimensional analysis and similitude and flow in closed conduits.
Equivalent - Duplicate Degree Credit Not Granted: CHEN 3200 and MCEN 3021
Requisites: Requires prerequisite course of CVEN 2121 or GEEN 2851 or ASEN 2001 or ASEN 2701 or MCEN 2023 (all min grade C-). Restricted to Civil (CVEN) or Environmental (EVEN) majors, or Integrated Design Engineering (IDEN-BSIDE) majors with a CIV or ENR subplan.
Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 3323 (3) Hydraulic Engineering
Studies hydraulic engineering theory and applications. Topics include incompressible flow in conduits, pipe system analysis and design, open channel flow, flow measurement, analysis and design of hydraulic machinery.
Requisites: Requires prerequisite course of CVEN 3313 or MCEN 3021 or AREN 2120 or CHEN 3200 (all minimum grade C-). Restricted to Civil (CVEN), Environmental (EVEN), Architectural (AREN) or Integrated Design (IDEN) Engineering majors only.
Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 3414 (3) Fundamentals of Environmental Engineering
Emphasizes chemical, ecological and hydrological fundamentals and importance of mass and energy balances in solving environmental engineering problems related to water quality, water and wastewater treatment, air pollution, solid and hazardous waste management, sustainability and risk assessment.
Requisites: Requires prereq courses CHEN 1201 or CHEN 1211 or CHEM 1113 or MCEN 1024 and APPM 1360 or MATH 2300 (all min grade C-). Restricted to CVEN, AREN, EVEN, MCEN, CHEN, IDEN or AMEN majors only.
Additional Information: Departmental Category: Environmental

CVEN 3424 (3) Water and Wastewater Treatment
Introduces design and operation of facilities for treatment of municipal water supplies and wastewater. Provides an engineering application of physical, chemical, and biological unit processes and operations for removal of impurities and pollutants. Involves an integrated design of whole treatment systems combining process elements.
Requisites: Requires prerequisite course of CVEN 3414 (minimum grade C-).
Additional Information: Departmental Category: Environmental

CVEN 3434 (3) Introduction to Applied Ecology
Emphasizes the integration of physical, chemical and biological processes in controlling terrestrial and aquatic ecosystems. Ecosystem concepts are applied to current environmental and water quality problems. Includes field trips and a group project.
Equivalent - Duplicate Degree Credit Not Granted: ENVS 3434
Requisites: Requires prereq courses of (CHEN 1201 or CHEN 1211 or CHEM 1113 or CHEM 1400 or MCEN 1024) and (CHEM 1114 or CHEM 1221) (all min grade C-).Restricted to students w/ 57-180 credits (Jr or Sr) Civil (CVEN), Environ (EVEN) or Arch Eng (AREN) or (IDEN) mjrs
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences Departmental Category: Environmental

CVEN 3525 (3) Structural Analysis
Studies structural analysis of statically determinate and indeterminate systems, deflections, energy methods, and force and stiffness methods.
Requisites: Requires prerequisite course of CVEN 3161 or MCEN 2063 (minimum grade C-). Restricted to Civil (CVEN), Environmental (EVEN), Architectural (AREN), Integrated Design (IDEN) or Applied Mathematics (AMEN) majors only.
Additional Information: Departmental Category: Structures

CVEN 3602 (3) Transportation Systems
Introduces the principles of transportation systems with a focus on highway engineering and traffic analysis. Provides the basic skill set that will allow students to solve transportation problems related with highway design and traffic control and analysis. Provides an introduction to technology, operating characteristics, and relative merits of highway, airway, waterway, railroad, pipeline, and convey or transportation systems.
Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.
Additional Information: Departmental Category: Surveying and Transportation

CVEN 3698 (3) Engineering Geology
Highlights the role of geology in engineering minerals; rocks; surficial deposits; rocks and soils as engineering materials; distribution of rocks at and below the surface; hydrologic influences; geologic exploration of engineering sites; geologic hazards; mapping; and geology of underground excavations, slopes, reservoirs and dam sites.
Requisites: Requires prereq or coreq courses of (CVEN 2121 or GEEN 2851 or ASEN 2001 or ASEN 2701 or MCEN 2023) and (APPM 2350 or MATH 2400) (all minimum grade C-). Restricted to College of Engineering majors only.
Additional Information: Departmental Category: Geotechnical

CVEN 3708 (3) Geotechnical Engineering 1
Covers basic engineering characteristics of geological materials; soil and rock classifications; site investigation; physical, mechanical, and hydraulic properties of geologic materials; the effective stress principle; soil and rock improvement; seepage analysis; stress distribution; and consolidation and settlement analyses. Selected experimental and computational laboratories.
Requisites: Requires prerequisite course of CVEN 3161 or MCEN 2063 (minimum grade C-). Restricted to Civil (CVEN), Environmental (EVEN), Architectural (AREN), Integrated Design (IDEN) or Applied Mathematics (AMEN) majors only.
Additional Information: Departmental Category: Geotechnical

CVEN 3718 (3) Geotechnical Engineering 2
Covers stress analysis and plastic equilibrium, sheer strength of soil, bearing capacity, lateral earth pressures, slope stability and underground construction. Analysis and design of shallow and deep foundations, retaining walls and other earth and rock structures. Selected experimental and computational laboratories.
Requisites: Requires prerequisite course of CVEN 3708 (minimum grade C-). Restricted to College of Engineering majors only.
Additional Information: Departmental Category: Geotechnical

CVEN 3837 (1-3) Special Topics
Supervised study of special topics of interest to student under instructor guidance.
Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.
Additional Information: Departmental Category: Miscellaneous

CVEN 4122 (3) The Colorado River Water Crisis: Water Policy, Hydrological Variability, and Climate Change
Analyzes the physical basis and policy origins for today¿s Colorado River water crisis. Surveys the history of Colorado River water development, and allocation. Examines political and policy decisions that have occurred. Unravels the physical drivers for the river¿s flow, its variability, and change. Places timelines of policy choices into context of emerging scientific understanding of Colorado River hydro-climate. Integrates evolving policy and physical factors to address today¿s water crisis that informs pathways for solutions.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 5122
Requisites: Restricted to students in College of Engineering and Applied Science (ENGR) and students in ATOC, HIST, CAMW, ENVS, GEOG, PSCI, Law School, Getches-Wilkinson Law Center, Ecology and Evolutionary Biology, Journalism, or Environmental Journalism.
Recommended: Prerequisite physical hydrology; This is a multi-disciplinary upper division lecture course open to both undergraduate and graduate students with interest in history, policy, politics, humanities, geography, hydrology, and meteorology.

CVEN 4133 (3) Land Use and Water Quality
Principles, processes, and control of nonpoint source pollution. Particular emphasis is placed on non-point source (NPS) problems associated with urban runoff, agricultural influences on water quality, and impacts of mining and forestry. Surface and ground water pollution in diverse aquatic systems including stream, river, lake, reservoir, estuarine environments are considered. Students are exposed to a variety of structural and non-structural management principles.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 5133
Requisites: Restricted to students in College of Engineering and Applied Science (ENGR) only.
Recommended: Prerequisite CVEN 4333, Engineering Hydrology.

CVEN 4147 (3) Civil Engineering Systems
Theory and application of the principles of engineering economics and classical and metaheuristic optimization techniques for evaluating problems in civil and environmental engineering.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 5147
Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Engineering majors only.
Additional Information: Departmental Category: Miscellaneous

CVEN 4157 (3) A Systems Approach to Global Engineering
Introduces engineering students to the global context in which engineers are asked to operate in the 21st century using system dynamics tools and other decision-making tools (network analysis, agent based modeling, etc.) necessary to analyze the uncertainty and complexity inherent in global projects.
Equivalent - Duplicate Degree Credit Not Granted: EDEN 4147, CVEN 5157 and EDEN 5147
Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

CVEN 4161 (3) Mechanics of Materials 2
Covers advanced topics in the mechanics of solids. Some topics such as asymmetric bending of beams, torsion of non-circular cross-sections, are extensions of topics seen in CVEN 3161. Others like 3-D stress and strain analysis, failure theories and stability of columns and frames are new. Includes selected laboratory experiments.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 5161
Requisites: Requires prerequisite course of CVEN 3161 (minimum grade C-).
Additional Information: Departmental Category: Mechanics

CVEN 4303 (3) Analysis of Urban Water Systems
Examines water systems in the urban environment in an integrated manner. Focus is placed on analyzing the behavior of urban water distribution and collection systems using model applications. Students completing this course will be able to understand local urban water resources problems, effectively use complementary urban water models, and examine the interactions between water supply, drainage systems, surface water, and groundwater.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 5303
Requisites: Requires prerequisite course of CVEN 3313 or MCEN 3021 or CHEN 3200 or AREN 2120 (minimum grade C-). Restricted to College of Engineering students only.
Recommended: Prerequisite CVEN 3323 (Hydraulic Engineering).

CVEN 4323 (3) Water Resources Engineering Design
Studies principles and techniques of water resources engineering design. Introduces environmental modeling under uncertainty, stormwater design, precipitation estimation and flow routing. Surveys hydropower, reservoir management and water resources economics.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 5423
Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.
Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 4333 (3) Engineering Hydrology
Studies engineering applications of principles of hydrology, including hydrologic cycle, rainfall and runoff, groundwater, storm frequency and duration studies, stream hydrography, flood frequency, and flood routing.
Requisites: Requires prerequisite course of CVEN 3313 or AREN 2120 or CHEN 3200 or MCEN 3021 (all minimum grade C-). Requires prerequisite or corequisite course of CVEN 3227 or MCEN 3047 or CHEN 3010 or GEEN 3853 (all minimum grade C-).
Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 4353 (3) Groundwater Engineering
Studies the occurrence, movement, extraction for use,and quantity and quality aspects of groundwater. Introduces and uses basic concepts to solve engineering and geohydrologic problems.
Requisites: Requires prerequisite course of CVEN 3313 or MCEN 3021 or CHEN 3200 or AREN 2120 (minimum grade C-).
Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 4383 (3) Applied Groundwater Modeling
Studies analytical and numerical methods for solving problems of groundwater flow and chemical transport. Emphasizes fundamental modeling techniques and the relationship between the physical system and the model results. Applies models and modeling techniques to solve problems in ground water hydrology using contemporary software. Include computer laboratory sessions.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 5383
Requisites: Requires prerequisite course of CVEN 3313 or MCEN 3021 or CHEN 3200 or AREN 2120 (minimum grade C-).
Recommended: Prerequisite CVEN 4353 (minimum grade C-).
Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 4404 (3) Water Chemistry
Introduces chemical fundamentals of inorganic aqueous compounds and contaminants in lecture and laboratory. Lecture topics include thermodynamics and kinetics of acids and base reactions, carbonate chemistry, air-water exchange, precipitation, dissolution, complexation, oxidation-reduction and sorption.
Equivalent - Duplicate Degree Credit Not Granted: EVEN 4404
Requisites: Requires prerequisite course of (CHEN 1203 or CHEN 1211 or CHEM 1133) and (CHEM 1221 or CHEM 1134) (all minimum grade C-). Requires corequisite course of CVEN 3414.
Additional Information: Departmental Category: Environmental

CVEN 4414 (1) Water Chemistry Laboratory
Reinforces chemical fundamentals of inorganic aqueous compounds and contaminants from CVEN/EVEN 4404 in laboratory experiments and reports. Topics include acids and bases, carbonate chemistry (alkalinity) and other water chemistry characteristics (hardness, dissolved oxygen); precipitation, complexation and oxidation-reduction reactions; and laboratory techniques and reporting.
Equivalent - Duplicate Degree Credit Not Granted: EVEN 4414
Requisites: Requires prerequisite courses of CHEN 1201, CHEN 1203, CHEM 1221 or CHEN 1211 or CHEM 1113 and CHEM 1133 (all minimum grade C-). Requires corequisite course of CVEN 4404. Restricted to Civil (CVEN) or Environmental (EVEN) Engineering majors only.
Additional Information: Departmental Category: Environmental

CVEN 4424 (3) Environmental Organic Chemistry
Examines the fundamental physical and chemical transformations affecting the fate and transport of organic contaminants in natural and treated waters. Emphasizes quantitative approach to solubility, vapor pressure, air-water exchange, sorption, hydrolysis and redox reactions, and photodegradation.
Equivalent - Duplicate Degree Credit Not Granted: EVEN 4424
Requisites: Requires prerequisite course of (CHEN 1211 or CHEN 1203 or CHEM 1133 or CHEM 2100) and CVEN 4404 (minimum grade C-).
Additional Information: Departmental Category: Environmental

CVEN 4434 (4) Environmental Engineering Design
Examines the design of facilities for the treatment of municipal water and wastewater, hazardous industrial waste, contaminated environmental sites and sustainable sanitation in developing countries. Economic, societal and site specific criteria impacting designs are emphasized.
Equivalent - Duplicate Degree Credit Not Granted: EVEN 4434
Requisites: Requires prerequisite course of CVEN 3414 and CVEN 4464 or CVEN 3424 (minimum grade C-).
Grading Basis: Letter Grade
Additional Information: Departmental Category: Environmental

CVEN 4464 (3) Environmental Engineering Processes
Develops and utilizes analytic solutions for environmental process models that can be used in a) reactor design for processes used in the treatment of water, wastewater and hazardous waste and b) process analysis of natural systems, such as streams and groundwater flow. Models facilitate the tracking of contaminants in engineered and natural systems.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 5464 and EVEN 4464
Requisites: Requires prerequisite courses of (CVEN 3313 or CHEN 3200 or MCEN 3021 or AREN 2120) and CVEN 3414 (all minimum grade C-).
Additional Information: Departmental Category: Environmental

CVEN 4474 (3) Hazardous and Industrial Waste Management
Evaluates processes used for treatment of wastes requiring special handling and disposal: toxic organic chemicals, heavy metals, acidic, caustic and radioactive waste material. Discusses techniques for destruction, immobilization and resource recovery and assessment of environmental impact of treatment process end products.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 5474
Requisites: Requires prerequisite course of CVEN 3414 (minimum grade C-). Restricted to College of Engineering majors only.
Additional Information: Departmental Category: Environmental

CVEN 4484 (3) Integrative Environmental and Molecular Microbiology
Surveys microbiology topics germane to modern civil and environmental engineering. Provides fundamentals needed to understand microbial processes and ecology in engineered and natural systems and reviews applications emphasizing the interface between molecular biology and classical civil engineering.
Equivalent - Duplicate Degree Credit Not Granted: EVEN 4484, CVEN 5484, and EVEN 5484
Requisites: Requires prerequisite courses of CHEN 1211 or CHEN 1201 or CHEM 1113 and CHEM 1221 and APPM 1350 or MATH 1300 (all minimum grade C-).
Additional Information: Departmental Category: Environmental

CVEN 4511 (3) Introduction to Finite Element Analysis
Covers systematic formulation of finite element approximation and isoparametric interpolation (weighted residual and energy methods, triangular and quadrilateral elements). Includes computation applications to the solution of one- and two-dimensional stress-deformation problems and steady and transient heat conduction.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 5511
Requisites: Requires prerequisite courses of CVEN 3161, CVEN 3525 and (APPM 2360 or (MATH 2130 and 3430)) (all minimum grade C-).
Additional Information: Departmental Category: Mechanics

CVEN 4525 (3) Computational Structural Analysis 1
Covers the principles and formulations of the direct stiffness method and its transition to the finite element method with the computational modelling and analysis of framed structures in 2D plane and 3D space. The dynamic analysis and the introduction to the nonlinear structural problems are provided. Familiarity with the modern computing and programming environments is increased to address the needs in the structural engineering and mechanics area. Computer programming is applied to the solution of problems in structural analysis.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 5525
Requisites: Requires prerequisite course of CVEN 3525 (minimum grade C-).
Additional Information: Departmental Category: Structures

CVEN 4537 (3) Numerical Methods in Civil Engineering
Introduces the use of numerical methods in the solution of civil engineering problems, emphasizing obtaining solutions with high-speed electronic computers. Applies methods to all types of civil engineering problems.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 5537
Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Engineering majors only.
Additional Information: Departmental Category: Miscellaneous

CVEN 4545 (3) Steel Design
Applies basic principles of structural engineering and mechanics to design of steel structures; design of tension members, columns, beams, open-web joists, steel decks, bolts, bolted connections, welding processes, and welded connections.
Requisites: Requires prerequisite course of CVEN 3525 (minimum grade C-).
Additional Information: Departmental Category: Structures

CVEN 4554 (3) Fundamentals of Air Quality Management
Introduces engineering methods for the study of air quality. Topics include: indoor air quality, greenhouse gases, dispersion modeling, source apportionment modeling, chemistry of combustion, pollution sources and controls, human exposure to air pollutants. A focus on Engineering for Developing Communities runs throughout. Elective for the EVEN air quality track or an environmental concentration course for CVEN.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 5554
Requisites: Requires prerequisite courses of APPM 2360 or MATH 2130 and MATH 3430 and CVEN 3313 or CHEN 3200 or MCEN 3021 (all minimum grade C-).
Additional Information: Departmental Category: Environmental

CVEN 4555 (3) Reinforced Concrete Design
Applies basic principles of structural engineering and mechanics to the design of reinforced concrete structures, including design of beams, columns, slabs, and footings; continuous beams and frames; cast-in-place buildings.
Requisites: Requires prerequisite course of CVEN 3525 (minimum grade C-).
Additional Information: Departmental Category: Structures

CVEN 4565 (3) Design of Wood Structures
Applies basic principles of structural engineering and mechanics to the design of wood structures, including the design and analysis of columns, trusses, beams and connections using dimensional lumber, glulam and cross-laminated timber.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 5565
Requisites: Requires prerequisite course of CVEN 3525 (minimum grade C-).
Additional Information: Departmental Category: Structures

CVEN 4594 (3) Water Reuse and Reclamation
Explores development of a safe, reliable and acceptable program for reusing impaired waters. As fresh water becomes scarcer around the world, communities are looking for security through development of new water resources. Reuse of impaired water is one solution to the growing water crisis. Focus is on advanced treatment technologies with emphasis on public perception, economics and regulations.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 5594
Requisites: Requires prerequisite course of CVEN 3414 (minimum grade C-). Restricted to College of Engineering students with 57-180 credits (Juniors or Seniors).
Recommended: Prerequisite CVEN 3424.
Additional Information: Departmental Category: Environmental

CVEN 4718 (3) Mechanics and Dynamics of Glaciers
Develops a quantitative physical basis for understanding the functions of snow, ice and glaciers in the environment, with emphasis on developing an understanding of continuum mechanics and thermodynamics and their application to Earth systems.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 5718
Requisites: Requires prereq course of (APPM 2350 or MATH 2400) and (APPM 2360 or (MATH 2130 and 3430)) and (AREN 2110 or GEEN 3852 or MCEN 3012 or ASEN 2002) and (CHEN 1310 or CSCI 1200 or CSCI 1300 or ASEN 1320 or ECEN 1310) (all min. grade C-).
Additional Information: Departmental Category: Geotechnical

CVEN 4728 (3) Foundation Engineering
Focuses on geotechnical design of shallow and deep foundations, including spread footings, mats, driven piles and drilled piers. Coverage includes bearing capacity, settlement, group effects and lateral load capacity of the various foundation types. The application of lower and upper bound plasticity analyses for the structural and geotechnical design of foundation systems, and how these relate to design codes, is additionally covered.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 5728
Requisites: Requires prerequisite course of CVEN 3718 (minimum grade C-).
Additional Information: Departmental Category: Geotechnical

CVEN 4833 (1-3) Special Topics
Repeatable: Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.
Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 4834 (1-3) Special Topics
Department consent required.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.
Additional Information: Departmental Category: Environmental

CVEN 4835 (1-3) Special Topics
Supervised study of special topics of interest to students under instructor guidance.
Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to students in College of Engineering and Applied Science (ENGR) only.
Additional Information: Departmental Category: Structures

CVEN 4836 (1-3) Special Topics
Offers a supervised study of special topics, under instructor guidance.
Repeatable: Repeatable for up to 3.00 total credit hours.
Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

CVEN 4837 (1-3) Special Topics
Supervised study of special topics of interest to students under instructor guidance.
Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to students with 57-180 credits (Junior or Senior) CVEN, AREN, or EVEN students only.
Additional Information: Departmental Category: Miscellaneous

CVEN 4838 (1-3) Special Topics
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.
Additional Information: Departmental Category: Geotechnical

CVEN 4839 (3-6) Special Topics for Seniors
Offers a supervised study of special topics, under instructor guidance. Department consent required.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Special Topics

CVEN 4849 (1-3) Independent Study
Involves an independent, in-depth study, research, or design in a selected area of civil or environmental engineering. Offerings are coordinated with individual faculty. Students should consult the Department of Civil, Environmental, and Architectural Engineering.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Special Topics

CVEN 4897 (2) Professional Issues in Civil Engineering
Educates students about the knowledge and skills required for professional civil engineers. Students learn about the path to a professional license, prepare for the FE exam, analyze a situation involving multiple conflicting ethical interests, identify aspects of sustainability in civil engineering projects, and understand the role of project management, public policy, business and public administration, and leadership in civil engineering.
Requisites: Restricted to students with 87-180 credits (Seniors) Civil (CVEN), Environmental (EVEN), or Architectural Engineering (AREN) majors only.
Additional Information: Departmental Category: Miscellaneous

CVEN 4899 (4) Civil Engineering Senior Project Design
Provides a simulated real world design and construction planning experience where teams integrate across multiple civil engineering sub-disciplines to create a solution that satisfies multiple constraints, including design, client requirements, budget, schedule, technical, regulatory, and societal. Final deliverables include: detailed design drawings, specifications, cost estimate, project schedule, construction plan, oral and written presentation.
Requisites: Restricted to students with 87-180 credits (Senior) Civil (CVEN) or Integrated Design (IDEN) engineering majors only.
Additional Information: Departmental Category: Special Topics

CVEN 4969 (3) Water and Sanitation in Developing Countries
Studies the design and fundamentals behind effective treatment processes and engineering solutions targeted for developing countries. Approaches to clean water and sanitation in lesser industrialized countries often demand alternative solutions to those developed for industrialized societies. Explores issues and solutions developed to tackle these problems.
Equivalent - Duplicate Degree Credit Not Granted: EVEN 4969
Requisites: Requires prerequisite course of CVEN 3414 (minimum grade C-). Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Departmental Category: Environmental

Engineering for Developing Communities

EDEN 4147 (3) A Systems Approach to Global Engineering
Introduces engineering students to the global context in which engineers are asked to operate in the 21st century using system dynamics tools and other decision-making tools (network analysis, agent based modeling, etc.) necessary to analyze the uncertainty and complexity inherent in global projects.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 4157, CVEN 5157 and EDEN 5147

EDEN 5001 (1-3) Special Topics in Global Engineering
At the graduate level, covers topics of interest in global engineering. Content varies by section and from semester to semester.
Repeatable: Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.

EDEN 5147 (3) A Systems Approach to Global Engineering
Introduces engineering students to the global context in which engineers are asked to operate in the 21st century using system dynamics tools and other decision-making tools (network analysis, agent based modeling, etc.) necessary to analyze the uncertainty and complexity inherent in global projects.
Equivalent - Duplicate Degree Credit Not Granted: EDEN 4147, CVEN 4157 and CVEN 5157

Environmental Engineering

EVEN 1000 (1) Introduction to Environmental Engineering
Introduces first-year students to the environmental engineering program from an academic and a career perspective. Covers air quality, applied ecology, chemical processing, energy, engineering for developing communities, environmental remediation, and water resources and treatment. Includes reading and writing on the history of environmental engineering, major environmental issues, and professional ethics.
Requisites: Restricted to students with 0-60 units completed. Restricted to Environmental Engineering (EVEN) and Open Option Engineering (XXEN) majors only.

EVEN 1001 (3) Environmental Engineering 101: An Introduction to Pollution Science
Surveys the science and engineering needed to understand the environmental and energy challenges which face urbanizing society: air and water pollution, climate change, and mining. Introduces how environmental engineers leverage basic science concepts to reduce pollution and optimize energy use. Analyzes how the mainstream media presents the environmental science of climate change and modern environmental disasters.

EVEN 2840 (1-3) Independent Study: General Topics
General topics relating to environmental engineering. One-on-one assistance with an instructor.

EVEN 2909 (3) Introduction to Global Sustainability
This course introduces engineering and non-engineering students to basic definitions and principles of sustainability (i.e., environment, economy, society) and the historical context regarding modern social and technical sustainability challenges as they pertain to population growth and climate change. The course places an emphasis on identifying the drivers, determinants and solutions favoring equitable access to water, sanitation, energy, food, transportation and shelter. Topics include technology development and validation, data collection and impact evaluation.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 2909
Recommended: for engineering students.

EVEN 3012 (3) Thermodynamics for Environmental Science and Engineering
Introduces students to fundamentals of thermodynamics. Includes focused coverage of the laws of thermodynamics, system energy balances, state properties (internal energy, enthalpy, entropy, etc.) and property estimation for ideal gases and steam. Additionally, this course will introduce the following concepts: thermodynamic cycles, chemical reaction thermodynamics, psychrometrics, process devices (pumps, heat exchangers, etc.) and reversibility.
Requisites: Requires prerequisite of PHYS 1110 and (APPM 1360 or MATH 2300) and (CHEN 1201 or CHEN 1211 or CHEM 1113) (all minimum grade C-).

EVEN 3414 (3) Fundamentals of Environmental Engineering
Emphasizes chemical, ecological and hydrological fundamentals and importance of mass and energy balances in solving environmental engineering problems related to water quality, water and wastewater treatment, air pollution, solid and hazardous waste management, sustainability and risk assessment.
Requisites: Requires prereq courses CHEN 1201 or CHEN 1211 or CHEM 1113 or MCEN 1024 and APPM 1360 or MATH 2300 (all min grade C-). Restricted to CVEN, AREN, EVEN, MCEN, CHEN, IDEN or AMEN majors only.

EVEN 3550 (3) Sustainability Principles for Engineers
An introduction to sustainability principles in the field of environmental engineering. Students will apply these principles to engineering problems in order to evaluate the environmental, economic and social implications of engineering and design decisions. Topics include definitions of sustainability, main engineering sustainability challenges (e.g., water, climate and materials), pollution generation and prevention and sustainability assessment tools.
Requisites: Requires a corequisite course of CVEN / EVEN 3414. Restricted to Environmental Engineering (EVEN) majors only.

EVEN 3650 (3) Sustainable Energy Systems Analysis
This course introduces students to the fundamentals of technology utilized in sustainable energy systems. Students will learn performance modeling, environmental life cycle assessment, and economic viability evaluation with a focus on the following: sensitivity analysis of cost-performance models, uncertainty and risk assessment, multi-criteria decision making and sustainability assessment. This course highlights the limits and obstacles facing the integration.
Requisites: Requires prerequisite courses of (MCEN 3012 or GEEN 3852 or AREN 2110 or EVEN 3012) AND PHYS 1120 AND (EVEN 3550 or MCEN 3032) (minimum grade D-).

EVEN 3830 (1-3) Special Topics
Study of technical topics within the field of environmental engineering. Subject matter to be selected from topics of current interest.
Repeatable: Repeatable for up to 9.00 total credit hours.

EVEN 4100 (3) Environmental Sampling and Analysis
Introduces students to techniques for characterization of surface water, subsurface water, soils and sediments, and air and planning of sampling and analysis efforts. Laboratories include stream sampling, drilling, monitoring well installation, water level, slug tests, air sampling.
Requisites: Requires prerequisite courses of CVEN 4404 and CVEN 4424 (all minimum grade C-). Restricted to Environmental Engineering (EVEN) majors only.

EVEN 4131 (3) Air Pollution Control Engineering
Introduces air quality regulations, meteorology and modeling. Examines methods for controlling major classes of air pollutants, including particulate matter and oxides of sulfur and nitrogen, as well as control technology for industrial sources and motor vehicles. Requires interdisciplinary design projects.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 4131 and MCEN 5131 and EVEN 5131
Requisites: Requires prerequisite courses of (MCEN 3021 or CHEN 3200 or CVEN 3313) and (MCEN 3012 or GEEN 3852 or AREN 2110 or EVEN 3012) (all minimum grade C-). Restricted to Mechanical Engineering or Environmental Engineering majors with 57+ credits only.

EVEN 4141 (3) Indoor Air Pollution
Describes the impact of indoor air pollutants on human health, including an introduction to key pollutants and their sources. Students will estimate emission factors, calculate generation/ventilation rates, quantify the impact of deposition and chemical reactions and explore relevant control technology. Current issues will also be addressed, including climate change, green building design, economic concerns and relevance to the developing world.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 4141, MCEN 5141, and EVEN 5141
Requisites: Requires prerequisite courses of (MCEN 3022 or CHEN 3210) (minimum grade C-). Restricted to Mechanical and Environmental Engineering majors with 57+ credits only.

EVEN 4404 (3) Water Chemistry
Introduces chemical fundamentals of inorganic aqueous compounds and contaminants in lecture and laboratory. Lecture topics include thermodynamics and kinetics of acids and base reactions, carbonate chemistry, air-water exchange, precipitation, dissolution, complexation, oxidation-reduction and sorption.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 4404
Requisites: Requires prerequisite course of (CHEN 1203 or CHEN 1211 or CHEM 1133) and (CHEM 1221 or CHEM 1134) (all minimum grade C-). Requires corequisite course of CVEN 3414. Restricted to Civil (CVEN) or Environmental (EVEN) Engineering majors only.

EVEN 4414 (1) Water Chemistry Laboratory
Reinforces chemical fundamentals of inorganic aqueous compounds and contaminants from CVEN/EVEN 4404 in laboratory experiments and reports. Topics include acids and bases, carbonate chemistry (alkalinity) and other water chemistry characteristics (hardness, dissolved oxygen); precipitation, complexation and oxidation-reduction reactions; and laboratory techniques and reporting.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 4414
Requisites: Requires prerequisite courses of CHEN 1201, CHEN 1203, CHEM 1221 or CHEN 1211 or CHEM 1113 and CHEM 1133 (all minimum grade C-). Requires corequisite course of CVEN 4404. Restricted to Civil (CVEN) or Environmental (EVEN) Engineering majors only.

EVEN 4424 (3) Environmental Organic Chemistry
Examines the fundamental physical and chemical transformations affecting the fate and transport of organic contaminants in natural and treated waters. Emphasizes quantitative approach to solubility, vapor pressure, air-water exchange, sorption, hydrolysis and redox reactions, and photodegradation.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 4424
Requisites: Requires prereq course (CHEN 1211 or CHEN 1203 or CHEM 1133 or CHEM 2100) and EVEN 4404 (min grade C-).

EVEN 4434 (4) Environmental Engineering Design
Examines the design of facilities for the treatment of municipal water and wastewater, hazardous industrial waste, contaminated environmental sites and sustainable sanitation in developing countries. Economic, societal and site specific criteria impacting designs are emphasized.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 4434
Requisites: Requires prerequisite course of CVEN 3414 and EVEN 4464 or CVEN 3424 (minimum grade C-).
Grading Basis: Letter Grade

EVEN 4464 (3) Environmental Engineering Processes
Develops and utilizes analytic solutions for environmental process models that can be used in a) reactor design for processes used in the treatment of water, wastewater and hazardous waste and b) process analysis of natural systems, such as streams and groundwater flow. Models facilitate the tracking of contaminants in engineered and natural systems.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 5464 and CVEN 4464
Requisites: Requires prerequisite courses of (CVEN 3313 or CHEN 3200 or MCEN 3021 or AREN 2120) and CVEN 3414 (all minimum grade C-).

EVEN 4484 (3) Integrative Environmental and Molecular Microbiology
Surveys microbiology topics germane to modern civil and environmental engineering. Provides fundamentals needed to understand microbial processes and ecology in engineered and natural systems and reviews applications emphasizing the interface between molecular biology and classical civil engineering.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 4484, CVEN 5484, and EVEN 5484
Requisites: Requires prerequisite courses of (CHEN 1211 or CHEN 1201 or CHEM 1113) and (CHEN 1221 or CHEM 1114) and (APPM 1350 or MATH 1300) (all minimum grade C-).

EVEN 4494 (3) Contaminant Fate and Transport
The course requires students to design and conduct experiments, analyze, interpret data, and write technical engineering reports. This lab-based course gives students an understanding of processes that govern the behavior of pollutants in the environment. The subject includes aspects of intermedia contaminant transport, surface and groundwater hydrology, air pollution modeling, degradation processes and remediation, human exposure pathways and risk analysis.
Requisites: Requires prerequisite courses of CVEN 4404 or EVEN 4404 (minimum grade D-). Requires corequisite courses of CVEN 4424 or EVEN 4424.
Recommended: Prerequisite or corequisite EVEN 4464 (Environmental Engineering Processes).

EVEN 4544 (3) Solid Waste Management and Resource Recovery
Covers the scope of the nonhazardous solid waste problem and regulations that drive its management; discussions of nonengineering factors that impact waste management and recycling; design of incinerators, composting facilities, and landfills used to treat and dispose of solid waste. Formerly EVEN 4444.
Equivalent - Duplicate Degree Credit Not Granted: EVEN 5544 and CVEN 5544
Requisites: Requires prereq courses (CHEN 1201 or CHEN 1211 or CHEM 1113 or MCEN 1024) and (APPM 1350 or MATH 1300) (all min grade C-). Restricted to CVEN, AREN, EVEN, MCEN, CHEN, IDEN or AMEN majors only.
Recommended: Prerequisite CVEN 3414.

EVEN 4830 (3) Special Topics
Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

EVEN 4840 (1-3) Independent Study: General Topics
General topics relating to environmental engineering. One-on-one assistance with an instructor.
Repeatable: Repeatable for up to 6.00 total credit hours.

EVEN 4959 (3) International Environmental Impact Assessment
Provide elements needed to develop Environmental Impact Assessments (EIA) in countries around the world. Familiarizes students with terms and definitions used in environmental practice. Explains the application of methodologies/tools used globally in EIA studies, taking into consideration the cause-effect relationships between project activities and the environment. Overview of World Bank and regional evaluation criteria driven by local ecosystems, society, and regulations. Case studies focus on the application of tools/methodologies and criteria in various international scenarios.
Equivalent - Duplicate Degree Credit Not Granted: EVEN 5959
Requisites: Requires prerequisite or corequisite course of EVEN 3414 (minimum grade C-).
Recommended: Prerequisite or corequisite EVEN 3550.

EVEN 4969 (3) Water and Sanitation in Developing Countries
Studies the design and fundamentals behind effective treatment processes and engineering solutions targeted for developing countries. Approaches to clean water and sanitation in lesser industrialized countries often demand alternative solutions to those developed for industrialized societies. Explores issues and solutions developed to tackle these problems.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 4969
Requisites: Requires prerequisite course of CVEN 3414 (minimum grade C-). Restricted to students with 57-180 credits (Juniors or Seniors).

EVEN 4980 (3) Senior Thesis 1
Provides faculty-supervised independent research in environmental engineering for students planning to complete a senior thesis. To be taken prior to EVEN 4990, during the final year before graduation. Department consent required.
Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Environmental Engineering (EVEN) majors only.

EVEN 4990 (3) Senior Thesis 2
Continuation of EVEN 4980. Consists of final phase of faculty-supervised research, the preparation of a written thesis, and an oral defense of the research to
Requisites: Requires prerequisite course of EVEN 4980 (minimum grade C-).

Architectural Engineering - Bachelor of Science (BSARE)

Architectural engineering is the application of engineering principles and technology to building design and construction. Architectural engineering combines aspects of electrical, mechanical, and civil engineering to design integrated systems for buildings. Building systems include heating, ventilating and air conditioning (HVAC) systems; illumination and electrical systems; materials and structural systems; and construction methods applied to buildings.

The Bachelor of Science degree program is administered by the Department of Civil, Environmental and Architectural Engineering. Students also take a course in architectural history and theory from the Environmental Design (ENVD) Program.

Requirements

Program Requirements

To earn a bachelor's degree in architectural engineering, students must complete the curriculum in the undergraduate major program as outlined below. For up-to-date program requirements, visit the Bachelor of Science in Architectural Engineering (https://www.colorado.edu/ceae/current-students/undergraduate-studies/architectural-engineering/) webpage. *Note*: Some variations may be possible; see an architectural engineering academic advisor.

In addition, students must meet the general undergraduate degree requirements of the College of Engineering and Applied Science (https://www.colorado.edu/engineering-advising/get-your-degree/graduation-requirements/) and all graduation requirements specified on the CEAE Department website.

Students may earn a Bachelor of Science in Architectural Engineering and a Bachelor of Science in Integrated Design Engineering with an architectural engineering emphasis.

Prerequisites and Passing Grades

The minimum passing grade for a course that is a prerequisite or corequisite for another required course is C-. The minimum passing grade for a course that is not specifically a prerequisite or corequisite for another required course is D-.

It is the student's responsibility to communicate with the department if summer coursework and/or transfer credit will be used to meet a prerequisite requirement.

Required Courses and Credits

Code	Title	Credit Hours
Required Courses		
AREN 1027	Engineering Drawing	3
AREN 1316	Introduction to Architectural Engineering	1
or ASEN 1000	Introduction to Aerospace Engineering Sciences	
or BMEN 1000	Exploring Biomedical Engineering	
or CHEN 1300	Introduction to Chemical and Biological Engineering	
or CSCI 1000	Computer Science as a Field of Work and Study	
or CVEN 1317	Introduction to Civil and Environmental Engineering	
or ECEN 1100	Exploring ECE	
or EVEN 1000	Introduction to Environmental Engineering	
AREN 2050	Building Materials and Systems	3
AREN 2110	Thermodynamics	3
or ASEN 2702	Introduction to Thermodynamics and Aerodynamics	
or EVEN 3012	Thermodynamics for Environmental Science and Engineering	
or GEEN 3852	Thermodynamics for Engineers	
or MCEN 3012	Thermodynamics	
AREN 2120	Fluid Mechanics and Heat Transfer	3
or CVEN 3313 & AREN 2121	Theoretical Fluid Mechanics and Heat Transfer	
AREN 3010	Energy Efficient Buildings	3
AREN 3040	Circuits for Architectural Engineers	3
AREN 3080	Architectural Design Studio 1	3
AREN 3540	Illumination I	3
AREN 4110	Building Energy Systems Engineering	3
AREN 4318	Architectural Engineering Design 1	5
AREN 4319	Architectural Engineering Design 2	2

AREN 4506	Pre-construction Estimating and Scheduling	3
AREN 4550	Illumination 2	3
AREN 4570	Building Electrical Systems Design 1	3
CSCI 1200	Introduction to Computational Thinking	3
or ASEN 1320		
or CHEN 1310	Introduction to Engineering Computing	
or CSCI 1300	Computer Science 1: Starting Computing	
or ECEN 1310	Introduction to C Programming	
or MCEN 1030	Introduction to Engineering Computing	
CVEN 2017	Excel Python R Primer	1
CVEN 2121	Analytical Mechanics 1	3
or ASEN 2401	Statics	
or ASEN 2701	Introduction to Statics, Structures, and Materials	
or GEEN 2851	Statics for Engineers	
or MCEN 2023	Statics and Structures	
CVEN 3161	Mechanics of Materials 1	3
or MCEN 2063	Mechanics of Solids	
CVEN 3246	Introduction to Construction	3
CVEN 3525	Structural Analysis	3
CVEN 4545	Steel Design	3
or CVEN 4555	Reinforced Concrete Design	
GEEN 1400	Engineering Projects [1]	3
or ASEN 1400	Gateway to Space	
or ASEN 1403	Introduction to Rocket Engineering	
or CHEN 1400	Drugs, Driving and Dynamic Processes	
or ECEN 1400	Introduction to Digital and Analog Electronics	
Technical Electives		**12**
At least two technical electives must be selected from the specialization lists below. The remaining technical electives may be any upper-division AREN or CVEN course or any course on the approved Technical Elective List. [2]		
Construction Engineering & Management		
AREN 4315	Design of Masonry Structures	
AREN 4606	Construction Project Execution and Control (strongly recommended)	
CVEN 3256	Construction Equipment and Methods (strongly recommended)	
CVEN 3708	Geotechnical Engineering 1	
CVEN 3718	Geotechnical Engineering 2	
CVEN 4565	Design of Wood Structures	
Lighting Systems		
AREN 4130	Optical Design for Illumination and Solid State Lighting	
AREN 4560	Luminous Radiative Transfer	
AREN 4580	Daylighting	
AREN 4620	Adaptive Lighting Systems	
AREN 4630	Advanced Lighting Design	
Electrical Systems		
AREN 4061	Distributed Electricity Generation	
AREN 4040	Building Energy Audits	
Mechanical Systems		
AREN 4010	Energy System Modeling and Control	
AREN 4040	Building Energy Audits	
AREN 4890	Sustainable Building Design	
AREN 4990	Compu Fluid Dynamics (CFD) Analysis for Built/Natural Envmnts	
AREN 5080	Computer Simulation of Building Energy Systems	
Structural Systems		
AREN 4315	Design of Masonry Structures	
AREN 5660	Embodied Carbon in Buildings	
CVEN 4161	Mechanics of Materials 2	
CVEN 4545	Steel Design [3]	
or CVEN 4555	Reinforced Concrete Design	
CVEN 4565	Design of Wood Structures	
CVEN 4728	Foundation Engineering	
Required Mathematics Courses		
APPM 1350	Calculus 1 for Engineers	4
or MATH 1300	Calculus 1	
or APPM 1345	Calculus 1 with Algebra, Part B	
APPM 1360	Calculus 2 for Engineers	4
or MATH 2300	Calculus 2	
APPM 2350	Calculus 3 for Engineers	4
or MATH 2400	Calculus 3	
APPM 2360	Introduction to Differential Equations with Linear Algebra	4
or MATH 2130 & MATH 3430	Introduction to Linear Algebra for Non-Mathematics Majors and Ordinary Differential Equations	
or MATH 2135 & MATH 3430	Introduction to Linear Algebra for Mathematics Majors and Ordinary Differential Equations	
Required Science Courses		
CHEM 1114	Laboratory in General Chemistry 1	1
or CHEM 1221	Engineering General Chemistry Lab	
or PHYS 1140	Experimental Physics 1	
CHEN 1201	General Chemistry for Engineers 1	4
or ASEN 1022	Materials Science for Aerospace Engineers	
or CHEN 1211	Accelerated Chemistry for Engineers	
or CHEM 1113	General Chemistry 1	
or MCEN 1024	Chemistry for Energy and Materials Science	
PHYS 1110	General Physics 1	4
or PHYS 1115	General Physics 1 for Majors	
PHYS 1120	General Physics 2	4
or PHYS 1125	General Physics 2 for Majors	
Humanities, Social Sciences and Writing		
Writing		*3*
College-approved writing course. [4]		
Humanities & Social Sciences		*15*
ARCH 3214	History and Theory of Architecture 2	
Other approved Humanities & Social Sciences Electives. At least 6 credits (including ARCH 3214) must be at the upper-division level (3000 level or higher). [4]		
Free Electives		**3**
Total Credit Hours		**128**

1 Students who do not take a first-year projects course may substitute a basic engineering elective: any 3-credit technical course offered in ASEN, AREN, APPM, CHEN, COEN, CVEN, CSCI, ECEN, EMEN, EVEN, GEEN, MCEN, or other course approved by the CEAE Curriculum Committee. Remedial courses (such as precalculus) or courses approved as Humanities & Social Sciences electives may not be used.

2 The approved Technical Elective List can be found on the CEAE Department website (https://www.colorado.edu/ceae/current-students/undergraduate-studies/architectural-engineering/).

3 Either CVEN 4545 or CVEN 4555 may be taken as a technical elective—whichever course is *not* used to fulfill the required structural design course.

4 Refer to the College's approved list of courses that fulfill the Humanities, Social Sciences and Writing Requirement (https://www.colorado.edu/engineering-advising/get-your-degree/degree-requirements/humanities-social-sciences-and-writing-requirements/).

Sample Four-Year Plan of Study

Year One

Fall Semester		**Credit Hours**
APPM 1350	Calculus 1 for Engineers	4
AREN 1316	Introduction to Architectural Engineering	1
CHEM 1114 or PHYS 1140	Laboratory in General Chemistry 1 [3] or Experimental Physics 1	1
CHEN 1201	General Chemistry for Engineers 1	4
CSCI 1200	Introduction to Computational Thinking	3
COEN 1500	CEAS First Year Seminar	1
Humanities & Social Sciences elective [1]		2
	Credit Hours	**16**
Spring Semester		
APPM 1360	Calculus 2 for Engineers	4
AREN 1027	Engineering Drawing	3
PHYS 1110	General Physics 1	4
First-Year Projects course or Basic Engineering Elective		3
College Approved Writing Course [2]		3
	Credit Hours	**17**

Year Two

Fall Semester		
APPM 2350	Calculus 3 for Engineers	4
AREN 2050	Building Materials and Systems	3
AREN 2110	Thermodynamics	3
CVEN 2121	Analytical Mechanics 1	3
PHYS 1120	General Physics 2	4
	Credit Hours	**17**
Spring Semester		
APPM 2360	Introduction to Differential Equations with Linear Algebra	4
AREN 2120	Fluid Mechanics and Heat Transfer	3
AREN 3080	Architectural Design Studio 1	3
CVEN 2017	Excel Python R Primer	1
CVEN 3161	Mechanics of Materials 1	3
ARCH 3214	History and Theory of Architecture 2	3
	Credit Hours	**17**

Year Three

Fall Semester		
AREN 3010	Energy Efficient Buildings	3
CVEN 3246	Introduction to Construction	3
CVEN 3525	Structural Analysis	3
AREN 3040	Circuits for Architectural Engineers	3
AREN 3540	Illumination I	3
	Credit Hours	**15**
Spring Semester		
AREN 4110	Building Energy Systems Engineering	3
AREN 4550	Illumination 2	3
AREN 4506	Pre-construction Estimating and Scheduling	3
CVEN 4545 or CVEN 4555	Steel Design or Reinforced Concrete Design	3
AREN 4570	Building Electrical Systems Design 1	3
	Credit Hours	**15**

Year Four

Fall Semester		
AREN 4318	Architectural Engineering Design 1	5
Humanities & Social Sciences elective [1]		3
Technical elective		3
Technical elective		3
Humanities & Social Sciences elective [1]		3
	Credit Hours	**17**
Spring Semester		
AREN 4319	Architectural Engineering Design 2	2
Free elective		3
Humanities & Social Sciences elective [1]		3
Technical elective		3
Technical elective		3
	Credit Hours	**14**
	Total Credit Hours	**128**

1 Students may choose courses from the list of college-approved humanities and social sciences (HSS) electives (http://www.colorado.edu/engineering/academics/policies/hss/).

2 Students may choose a course from the list of college-approved writing courses (http://www.colorado.edu/engineering/academics/policies/hss/).

3 Students who choose PHYS 1140 will take it in Year Two or later (with or after PHYS 1120)

AREN Electives and Opportunities for Specialization

Upon consultation with their advisors, students select technical elective courses applicable to their areas of interest and specialization. The areas of specialization are construction engineering and management, mechanical systems, structural systems, and lighting and electrical systems.

Courses may be chosen from any emphasis area. At least two technical electives must be selected from this list. Some technical electives are offered intermittently and are not guaranteed to be offered every year.

Code	Title	Credit Hours
Construction Engineering & Management		
AREN 4315	Design of Masonry Structures	3
AREN 4606	Construction Project Execution and Control	3
CVEN 3256	Construction Equipment and Methods	3
CVEN 3708	Geotechnical Engineering 1	3
CVEN 3718	Geotechnical Engineering 2	3
CVEN 4565	Design of Wood Structures	3
Students with an interest in construction are also encouraged to take CVEN 2012 as a Basic Engineering Elective or Free Elective		
Mechanical Systems		
AREN 4010	Energy System Modeling and Control	3
AREN 4040	Building Energy Audits	3
AREN 4890	Sustainable Building Design	3
AREN 4990	Compu Fluid Dynamics (CFD) Analysis for Built/Natural Envmnts	3
AREN 5080	Computer Simulation of Building Energy Systems	3
Structural Systems		
AREN 4315	Design of Masonry Structures	3
AREN 5660	Embodied Carbon in Buildings	3
CVEN 4161	Mechanics of Materials 2	3
CVEN 4545	Steel Design [1]	3
or CVEN 4555	Reinforced Concrete Design	
CVEN 4565	Design of Wood Structures	3
CVEN 4728	Foundation Engineering	3
Lighting Systems		
AREN 4130	Optical Design for Illumination and Solid State Lighting	3
AREN 4560	Luminous Radiative Transfer	3
AREN 4580	Daylighting	3
AREN 4620	Adaptive Lighting Systems	3
AREN 4630	Advanced Lighting Design	3
Electrical Systems		
AREN 4061	Distributed Electricity Generation	3
AREN 4040	Building Energy Audits	3

[1] CVEN 4545 or CVEN 4555, whichever course is ***not*** used to fulfill the required course in spring semester of year 3, may be taken as a technical elective.

Learning Outcomes

Program Educational Objectives

The educational objectives of the architectural engineering bachelor of science degree program are to produce graduates capable of reaching the following career goals within five years:

- Our alumni will build on the educational foundation gained through our program by establishing themselves in engineering, science or other professional careers.
- Our alumni will begin advancing the state-of-the-art of their profession including one of five core disciplines of the building industry: electrical systems, lighting systems, heating, ventilating and air conditioning (HVAC) systems, materials and structural systems, construction engineering and management.
- Our alumni will exercise leadership in their field.
- Our alumni will enhance the sustainability of the built environment.

Student Outcomes

The outcomes that students are expected to have attained upon graduation with the bachelor of science degree in Architectural Engineering are:

1. An ability to identify, formulate and solve complex engineering problems by applying principles of engineering, science and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety and welfare, as well as global, cultural, social, environmental and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Areas of Knowledge

The areas of knowledge that define these objectives include both technical and non-technical areas.

Technical areas are:

- Elementary: The fundamentals for architectural engineering, including basic science and mathematics, building design and construction processes, overview of building systems, elementary principles and processes of architecture, and laboratory measurement and data analysis.
- Intermediate: Introduction to building systems and their components, with corresponding analysis of electrical, HVAC and lighting systems, as well as structural elements and components.
- Proficiency: Design, integration and advanced analysis of electrical, HVAC, lighting and structural systems, as well as the standards, codes and recommended practices that govern these building systems.
- Specialization: Advanced design, coupled with industry experience via internships, for building lighting and electrical system design, building HVAC systems design, building structural system design, and construction engineering and management.

Non-technical areas include:

- Professional life, including methods of time and resource management and professional ethics.
- Processes and requirements of written and oral communication.

- Broad areas in the humanities and social sciences, including architectural history and language.

Bachelor's–Accelerated Master's Degree Program(s)

The bachelor's–accelerated master's (BAM) degree program options offer currently enrolled CU Boulder undergraduate students the opportunity to receive a bachelor's and master's degree in a shorter period of time. Students receive the bachelor's degree first but begin taking graduate coursework as undergraduates (typically in their senior year).

Because some courses are allowed to double count for both the bachelor's and the master's degrees, students receive a master's degree in less time and at a lower cost than if they were to enroll in a stand-alone master's degree program after completion of their baccalaureate degree. In addition, staying at CU Boulder to pursue a bachelor's–accelerated master's program enables students to continue working with their established faculty mentors.

BS in Architectural Engineering, MS in Architectural Engineering or Civil Engineering

Admissions Requirements

In order to gain admission to the BAM programs named above, a student must meet the following criteria:

- Have a cumulative GPA of 3.000 or higher.
- Completion of all MAPS requirements and no deficiencies remaining (students admitted to CU Boulder prior to Summer 2023 only).
- Have at least junior status within the bachelor's degree program.

Program Requirements

Students may take up to and including 12 hours while in the undergraduate program which can later be used toward the master's degree. However, only 6 credits may be double counted toward the bachelor's degree and the master's degree. Students must apply to graduate with the bachelor's degree, and apply to continue with the master's degree, early in the semester in which the undergraduate requirements will be completed.

Please see the BAM degree program (https://www.colorado.edu/ceae/current-students/undergraduate-studies/bsms-program/) webpage for more information.

Civil Engineering - Bachelor of Science (BSCV)

The curriculum in civil engineering within the Department of Civil, Environmental and Architectural Engineering has been designed to prepare students for entry-level positions in professional practice or for graduate study in the following subdisciplines of civil engineering:

- construction engineering and management.
- environmental engineering.
- geotechnical engineering and geomechanics.
- structural engineering and structural mechanics.
- water resource engineering and management.

For undergraduates who want additional preparation for graduate study and careers in research and development within civil engineering, a theoretically-based engineering science track is also available.

Colorado Mesa University/University of Colorado Boulder Partnership Program

Colorado Mesa University (CMU) (http://www.coloradomesa.edu/engineering/) and CU Boulder have created a partnership to deliver specific engineering baccalaureate programs **in their entirety in Grand Junction**, Colorado. The first two years of coursework are taught by CMU faculty and the second two years of coursework are taught by CU Boulder faculty located in Grand Junction. Students completing the programs will be awarded a Bachelor of Science from CU Boulder.

Degrees are offered in civil engineering, electrical & computer engineering, and mechanical engineering, with additional details on the engineering partnership program website (https://www.coloradomesa.edu/engineering/partnership-program/).

Coursework requirements and plans of study specific to this partnership can be found on the Colorado Mesa University civil engineering partnership website (https://www.coloradomesa.edu/engineering/degrees/civil-egineering.html). Learn more about this program on the CU Boulder partnership website (https://www.colorado.edu/academics/cmu-cu-bs-civil-engineering/).

Program Requirements

To earn a bachelor's degree in civil engineering, students must complete the curriculum in the undergraduate major program, as outlined below. For up-to-date program requirements, visit the Bachelor of Science in Civil Engineering (https://www.colorado.edu/ceae/current-students/undergraduate-studies/civil-engineering/)webpage. **Note:** Some variations may be possible; see a civil engineering academic advisor.

In addition, students must meet the general undergraduate degree requirements of the College of Engineering and Applied Science (https://www.colorado.edu/engineering-advising/get-your-degree/graduation-requirements/) and all graduation requirements specified on the CEAE Department website (https://www.colorado.edu/ceae/current-students/undergraduate-studies/graduation-requirements-advising-guide/).

Students are allowed to earn a BS in civil engineering + BS in integrated design engineering with a civil engineering emphasis.

Civil engineering is also offered in partnership with Colorado Mesa University (https://www.coloradomesa.edu/engineering/partnership-program/) in Grand Junction, Colorado. Specific coursework requirements and plans of study can be found on the partnership website (https://www.coloradomesa.edu/engineering/partnership-program/).

Prerequisites and Passing Grades

The minimum passing grade for a course that is a prerequisite or corequisite for another required course is C-. The minimum passing grade for a course that is not specifically a prerequisite or corequisite for another required course is D-.

It is the student's responsibility to communicate with the department if summer coursework and/or transfer credit will be used to meet a prerequisite requirement.

	Total Credit Hours	**128**

1. Students may choose courses from the list of college-approved humanities and social sciences (HSS) electives (http://www.colorado.edu/engineering/academics/policies/hss/).
2. Students may choose a course from the list of college-approved writing courses (http://www.colorado.edu/engineering/academics/policies/hss/).
3. See approved Technical Electives list on the CEAE website (https://www.colorado.edu/ceae/current-students/undergraduate-studies/civil-engineering/).

Learning Outcomes

Program Educational Objectives

The program objectives for the bachelor of science degree in civil engineering are that within five years:

- Graduates will be successfully employed in engineering, science or technology careers.
- Graduates will be assuming management or leadership roles.

- Graduates will engage in continual learning by pursuing advanced degrees or additional educational opportunities through coursework, professional conferences and training and/or participation in professional societies.
- Graduates will pursue professional registration or other appropriate certifications.
- Graduates will be engaged in activities that provide benefit to communities.

Student Outcomes

The outcomes that students are expected to have attained upon graduation with a bachelor of science degree in civil engineering are:

- An ability to identify, formulate and solve complex engineering problems by applying principles of engineering, science and mathematics.
- An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety and welfare, as well as global, cultural, social, environmental and economic factors.
- An ability to communicate effectively with a range of audiences.
- An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental and societal contexts.
- An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks and meet objectives.
- An ability to develop and conduct appropriate experimentation, analyze and interpret data and use engineering judgment to draw conclusions.
- An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Before their graduation, students in civil and environmental engineering will take a capstone design course in addition to training in structural and foundation design, civil engineering systems, construction, engineering geology, engineering materials, geotechnical engineering, soil mechanics, water quality, environmental engineering, fluid mechanics, computer-aided and manual engineering drawing, mechanics and dynamics, computer modeling, professional practice and ethics seminars, structural analysis and design, surveying and transportation systems via required and elective courses.

Bachelor's–Accelerated Master's Degree Program(s)

The bachelor's–accelerated master's (BAM) degree program options offer currently enrolled CU Boulder undergraduate students the opportunity to receive a bachelor's and master's degree in a shorter period of time. Students receive the bachelor's degree first but begin taking graduate coursework as undergraduates (typically in their senior year).

Because some courses are allowed to double count for both the bachelor's and the master's degrees, students receive a master's degree in less time and at a lower cost than if they were to enroll in a stand-alone master's degree program after completion of their baccalaureate degree. In addition, staying at CU Boulder to pursue a bachelor's–accelerated master's program enables students to continue working with their established faculty mentors.

BS in Civil Engineering, MS in Civil Engineering or Architectural Engineering

Admissions Requirements

In order to gain admission to the BAM programs named above, a student must meet the following criteria:

- Have a cumulative GPA of 3.000 or higher.
- Completion of all MAPS requirements and no deficiencies remaining (students admitted to CU Boulder prior to Summer 2023 only).
- Have at least junior status within the bachelor's degree program.

Program Requirements

Students may take up to and including 12 hours while in the undergraduate program which can later be used toward the master's degree. However, only six credits may be double counted toward the bachelor's degree and the master's degree. Students must apply to graduate with the bachelor's degree, and apply to continue with the master's degree, early in the semester in which the undergraduate requirements will be completed.

Please see the BAM degree program (https://www.colorado.edu/ceae/current-students/undergraduate-studies/bsms-program/) web page for more information.

Environmental Engineering - Bachelor of Science (BSEV)

Environmental engineers play a vital role in maintaining the quality of both public health and the natural environment. Environmental engineering encompasses the scientific assessment and development of engineering solutions to environmental problems impacting the biosphere, land, water and air quality. Environmental issues affect almost all municipal, commercial and industrial sectors, and are a central concern for the public, for all levels of government, and in international relations. These issues include safe drinking water, wastewater processing, solid and hazardous waste disposal, outdoor and indoor air pollution, human health and ecological risk management, prevention of pollution through alternative product or process design, and renewable and sustainable energy sources.

To address these challenges, environmental engineers often encounter challenging problems that must be solved in data-poor situations as members of multidisciplinary teams. Environmental problems require creative solutions blended with contributions from scientists, lawyers, business people and the public. Good communication skills, as well as technical proficiency, are essential for success in this arena. In addition, technology designed to address environmental problems is marketed globally, opening up increasing opportunities for international work in the environmental engineering field.

Mission

The mission of the Environmental Engineering Program (http://www.colorado.edu/even/) is to provide a multidisciplinary undergraduate environmental engineering education that emphasizes mastery of principles and practices, inspires service for the global public good, endows a desire for lifelong learning and prepares students for broad and dynamic career paths in environmental engineering.

Faculty

The faculty of the Environmental Engineering (EVEN) Program (http://www.colorado.edu/even/people/) are drawn from the Departments of Civil, Environmental, and Architectural Engineering; Mechanical Engineering; Chemical and Biological Engineering; and Aerospace Engineering Sciences. The EVEN faculty, its Professional Advisory Board (representing prospective employers of its graduates) and EVEN alumni and current students have contributed to the creation of the program's mission and the educational objectives of the BS in environmental engineering degree.

Requirements

To earn a bachelor's degree in environmental engineering, students must complete the curriculum in the undergraduate major program, as outlined below. For up-to-date program requirements, visit Bachelor of Science in Environmental Engineering (https://www.colorado.edu/even/current-students/undergraduate-studies/) webpage. In addition, students must meet the general undergraduate degree requirements of the College of Engineering and Applied Science (https://www.colorado.edu/engineering-advising/get-your-degree/graduation-requirements/).

Note: This major cannot be combined with a BS in integrated design engineering with an environmental engineering emphasis.

Some variations may be possible; see undergraduate advisor to work on approval.

Required Courses and Credits

Code	Title	Credit Hours
Required Courses		
CHEN 1310	Introduction to Engineering Computing	3
CVEN 2121	Analytical Mechanics 1	3
or MCEN 2023	Statics and Structures	
or GEEN 2851	Statics for Engineers	
CVEN 3227	Probability, Statistics and Decision	3
or STAT 4000	Statistical Methods and Application I	
CVEN 3246	Introduction to Construction	3

EVEN 4414	Water Chemistry Laboratory	1
EVEN 3550	Sustainability Principles for Engineers	3
Select one of the following in Engineering Economics:		3
CVEN 3246	Introduction to Construction	
EMEN 4100	Engineering Economics	
Select one of the following in Thermodynamics:		3
EVEN 3012	Thermodynamics for Environmental Science and Engineering	
AREN 2110	Thermodynamics	
MCEN 3012	Thermodynamics	
CHEN 3320	Chemical Engineering Thermodynamics 1	
GEEN 3852	Thermodynamics for Engineers	
College-approved writing course [3]		3
	Credit Hours	**16**
Spring Semester		
EVEN 4424	Environmental Organic Chemistry	3
EVEN 4484	Integrative Environmental and Molecular Microbiology	3
Engineering Fundamental Course		3
MCEN 3022	Heat Transfer	
CVEN 3424	Water and Wastewater Treatment	
CVEN 3323	Hydraulic Engineering	
Select one of the following in Probability and Statistics:		3
CVEN 3227	Probability, Statistics and Decision	
STAT 4000	Statistical Methods and Application I	
CHEN 3010	Applied Data Analysis	
Environmental engineering design/technical elective I [4]		3
	Credit Hours	**15**

Year Four		
Fall Semester		
EVEN 4464	Environmental Engineering Processes	3
EVEN 4494	Contaminant Fate and Transport	3
MCEN 4131	Air Pollution Control Engineering	3
Environmental engineering design/technical elective II [4]		3
Select one of the following:		3
Technical elective II [2]		
Senior Thesis [5]		
Environmental engineering design/technical elective III [4]		
Humanities and social science elective [1]		3
	Credit Hours	**18**
Spring Semester		
CVEN 4333	Engineering Hydrology	3
EVEN 4434	Environmental Engineering Design	4
Select one of the following:		3
Environmental engineering design/technical elective III [4]		
Technical Elective II [2]		
Select one of the following:		3
Technical elective III [2]		
Senior Thesis [5]		
Free elective		3
	Credit Hours	**16**
	Total Credit Hours	**128**

1. Students may choose courses from the list of college-approved humanities and social sciences (HSS) electives (http://www.colorado.edu/engineering/academics/policies/hss/).
2. A total of 9 credit hours of technical electives is required. Three technical elective credit hours may be lower-division (1000–2000-level). Three technical elective credit hours must be in the earth sciences, either lower or upper division. Remaining technical elective credit hours must be upper division in engineering, mathematics or sciences. Independent study (EVEN 4840) or senior thesis (EVEN 4980 and EVEN 4990) may be completed as technical electives for up to 6 credits hours.
3. Students may choose a course from the list of college-approved writing courses (http://www.colorado.edu/engineering/academics/policies/hss/).
4. A nine-credit-hour (three-course) sequence in environmental engineering – one environmental engineering design course and two environmental engineering technical electives.
5. A senior thesis can be completed on a single research topic, with faculty approval and direction, and can apply toward technical elective requirements.

Learning Outcomes

Program Educational Objectives

The educational objective of the Environmental Engineering Bachelor of Science degree is to produce graduates who are capable of reaching the following career goals three to five years after graduation:

1. Graduates will be employed in engineering, science or other professional careers.
2. Graduates will respond to the needs of society by pursuing professional registration or other appropriate certifications.
3. Graduates will be engaged in continual learning and advancing knowledge by pursuing advanced degrees or additional educational opportunities through coursework, professional conferences and training, and/or participation in professional societies.
4. Graduates will apply critical thinking and creativity as they develop solutions that provide benefits to communities, the environment and/or public health.
5. Graduates will conduct themselves ethically and professionally, while demonstrating that they value diversity and inclusion in work interactions and engagement with the public.

Student Outcomes

Upon graduation, students are expected to be able to:

- Identify, formulate and solve complex engineering problems by applying principles of engineering, science and mathematics.
- Apply engineering design to produce solutions that meet specified needs with consideration of public health, safety and welfare, as well as global, cultural, social, environmental and economic factors.
- Communicate effectively with a range of audiences.
- Recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental and societal contexts.
- Function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks and meet objectives.
- Develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
- Acquire and apply new knowledge as needed, using appropriate learning strategies.

Bachelor's–Accelerated Master's Degree Program(s)

The bachelor's–accelerated master's (BAM) degree program options offer currently enrolled CU Boulder undergraduate students the opportunity to receive a bachelor's and master's degree in a shorter period of time. Students receive the bachelor's degree first but begin taking graduate coursework as undergraduates (typically in their senior year).

Because some courses are allowed to double count for both the bachelor's and the master's degrees, students receive a master's degree in less time and at a lower cost than if they were to enroll in a stand-alone master's degree program after completion of their baccalaureate degree. In addition, staying at CU Boulder to pursue a bachelor's–accelerated master's program enables students to continue working with their established faculty mentors.

BS in Environmental Engineering, MS in Environmental Engineering, Civil Engineering or Mechanical Engineering

Admissions Requirements

In order to gain admission to the BAM program named above, a student must meet the following criteria:

- Have a cumulative GPA of 3.000 to earn either the EVEN or CVEN MS or a 3.25 GPA to earn the MCEN MS.

- Completion of all MAPS requirements and no deficiencies remaining (students admitted to CU Boulder prior to Summer 2023 only).
- Have at least junior status within the bachelor's degree program.

Program Requirements

Students may take up to and including 12 hours while in the undergraduate program which can later be used toward the master's degree. However, only six credits may be double counted toward the bachelor's degree and the master's degree. Students must apply to graduate with the bachelor's degree, and apply to continue with the master's degree, early in the semester in which the undergraduate requirements will be completed.

Please see the BAM degree program (https://www.colorado.edu/even/current-students/undergraduate-studies/5-year-bsms/) web page for more information.

Architectural Engineering - Minor

The undergraduate minor in architectural engineering serves CU Boulder students who are interested in building science, engineering and systems design.

Architectural engineering is the application of engineering principles and technology to building design and construction. Architectural engineering combines aspects of electrical, mechanical and civil engineering to design integrated systems for buildings. Building systems include heating, ventilating and air conditioning (HVAC) lighting systems; electrical systems; materials and structural systems; and construction engineering and management.

Requirements

Admission Requirements

A cumulative GPA of 2.750 or higher is required to be admitted to the minor.

The minor is not open to students pursuing the Bachelor of Science in Architectural Engineering or the Bachelor of Science in Integrated Design Engineering with an architectural engineering disciplinary emphasis. In addition, the structural systems and construction engineering and management tracks (shown below) are not open to students pursuing the Bachelor of Science in Civil Engineering or the Bachelor of Science in Integrated Design Engineering with a civil engineering disciplinary emphasis.

Prerequisites

The following prerequisite courses are required, with a grade of C- or higher in each. A student may be accepted into the minor with no more than two of these courses as deficiencies. All deficiencies must be completed before the minor is awarded.

- Calculus 1 (APPM 1350, MATH 1300 or APPM 1345)
- Calculus 2 (APPM 1360 or MATH 2300)
- Calculus 3 (APPM 2350 or MATH 2400)
- Differential Equations and Linear Algebra (APPM 2360 , or MATH 2130 and MATH 3430)
- Two semesters of calculus-based physics (PHYS 1110 or PHYS 1115, and PHYS 1120 or PHYS 1125)
- Statics (CVEN 2121 , ASEN 2701 , GEEN 2851 or MCEN 2023)

Program Requirements

Grade Requirements

A cumulative GPA of 2.000 is required in the courses used to satisfy the minor requirements, with no individual grade lower than C-.

Residency

The minor requires 18 credit hours, at least nine of which must be AREN/CVEN courses completed on the CU Boulder campus. The minor is composed of three required courses, two courses in a single track, plus one elective course.

Course Requirements

Code	Title	Credit Hours
Required Core Courses		
AREN 2050	Building Materials and Systems	3
CVEN 3246	Introduction to Construction	3
CVEN 3161	Mechanics of Materials 1	3
or MCEN 2063	Mechanics of Solids	
Tracks		**6**
Choose one:		
Mechanical Systems Track		
AREN 3010	Energy Efficient Buildings	
AREN 4110	Building Energy Systems Engineering	
Structural Systems Track [1]		
CVEN 3525	Structural Analysis	
CVEN 4545	Steel Design	
or CVEN 4555	Reinforced Concrete Design	
or CVEN 4565	Design of Wood Structures	
Electrical Systems Track		
AREN 3040	Circuits for Architectural Engineers	
or ECEN 2250	Introduction to Circuits and Electronics	
or ECEN 3010	Circuits and Electronics for Mechanical Engineers	
or GEEN 3010	Circuits for Engineers	
AREN 4570	Building Electrical Systems Design 1	
Lighting Track		
AREN 3540	Illumination I	
AREN 4550	Illumination 2	
Construction Engineering & Management Track [1]		
AREN 4506	Pre-construction Estimating and Scheduling	
AREN 4606	Construction Project Execution and Control	
Elective		**3**
ARCH 3214	History and Theory of Architecture 2	
AREN 1027	Engineering Drawing	
CVEN 1027	Civil Engineering Drawing	
ENVD 2352	Special Topics: Beginning Digital Applications [2]	
AREN 4010	Energy System Modeling and Control	
AREN 4130	Optical Design for Illumination and Solid State Lighting	
AREN 4315	Design of Masonry Structures	
AREN 4560	Luminous Radiative Transfer	
AREN 4580	Daylighting	

AREN 4620	Adaptive Lighting Systems
AREN 4630	Advanced Lighting Design
AREN 4830	Special Topics for Seniors/Grads (Sustainable Lighting Workshop, Computer Simulation of Building Systems, or Forensic Engineering)
AREN 4890	Sustainable Building Design
AREN 4990	Compu Fluid Dynamics (CFD) Analysis for Built/Natural Envmnts
CVEN 5830	Special Topics for Seniors/Grads (Distributed Generation Systems, Color Theory/Light Source, or Applied Data Analysis & Modeling.) [3]
AREN 5660	Embodied Carbon in Buildings [3]
AREN 4040	Building Energy Audits
AREN 5090	Optimizing Grid Connected Systems [3]
Total Credit Hours	**18**

1 Not open to students pursuing the Bachelor of Science in Civil Engineering or the Bachelor of Science in Integrated Design Engineering with a civil engineering disciplinary emphasis.

2 Only the Intro 3-D Modeling (RHINO) and INTRO BIM (Revit) sections are approved as an elective.

3 Enrollment by instructor permission only.

Civil Engineering - Minor

The undergraduate minor in civil engineering serves CU Boulder students interested in an introductory exposure to the broad discipline of civil engineering. The minor is intended to expose students to five sub-disciplines of civil engineering.

Requirements

Admission Requirements

A cumulative GPA of 2.750 or higher is required to be admitted to the minor.

The minor is not open to students pursuing the Bachelor of Science in Civil Engineering or the Bachelor of Science in Integrated Design Engineering with a civil engineering disciplinary emphasis.

Prerequisites

The following prerequisite courses are required, with a grade of C- or higher in each. A student may be accepted into the minor with no more than two of these courses as deficiencies. All deficiencies must be completed before the minor is awarded.

- Calculus 1 (APPM 1350 or MATH 1300 or APPM 1345)
- Calculus 2 (APPM 1360 or MATH 2300)
- Calculus 3 (APPM 2350 or MATH 2400)
- Differential Equations and Linear Algebra (APPM 2360, or MATH 2130 and MATH 3430)
- Two semesters of calculus-based physics (PHYS 1110 or PHYS 1115, and PHYS 1120 or PHYS 1125)
- Statics (CVEN 2121, ASEN 2701, GEEN 2851 or MCEN 2023)
- Fluid Mechanics (CVEN 3313, AREN 2120, MCEN 3021, or GEEN 3853)
- Mechanics of Materials (CVEN 3161 or MCEN 2063)

Program Requirements

Grade Requirements

A cumulative GPA of 2.000 is required in the courses used to satisfy the minor requirements, with no individual grade lower than C-.

Residency

The minor requires 18 credit hours, at least nine of which must be CVEN courses completed on the CU Boulder campus. The minor is composed of five required courses plus one additional proficiency or advanced course.

Course Requirements

Code	Title	Credit Hours
Required Core Courses		
CVEN 3246	Introduction to Construction	3
CVEN 3323	Hydraulic Engineering	3
CVEN 3414	Fundamentals of Environmental Engineering	3
CVEN 3525	Structural Analysis	3
CVEN 3708	Geotechnical Engineering 1	3
Additional Courses		
One additional proficiency or advanced course in one of the following sub-disciplines:		3
Construction Engineering and Management		
CVEN 3256	Construction Equipment and Methods	
AREN 4506	Pre-construction Estimating and Scheduling	
Environmental Engineering		
CVEN 3424	Water and Wastewater Treatment	
CVEN 4404	Water Chemistry	
CVEN 3434	Introduction to Applied Ecology	
CVEN 4474	Hazardous and Industrial Waste Management	
CVEN 4484	Integrative Environmental and Molecular Microbiology	
Geotechnical Engineering		
CVEN 3718	Geotechnical Engineering 2	
Structural Engineering		
CVEN 4545	Steel Design	
CVEN 4555	Reinforced Concrete Design	
Water Resource Engineering		
CVEN 4333	Engineering Hydrology	
CVEN 4353	Groundwater Engineering	
Civil Systems		
CVEN 4147	Civil Engineering Systems	
Total Credit Hours		**18**

Sustainability Engineering - Minor

The undergraduate minor in sustainability engineering serves all CU Boulder students who are interested in obtaining a strong foundation in sustainability principles. The minor exposes students to the drivers, determinants and solutions to modern sustainability problems facing our planet.

Requirements

The minor requires 15 credit hours, at least nine of which must be courses completed on the CU Boulder campus. Students must take six (6) credits of foundational, required coursework and an additional nine (9) credits of approved sustainability-related coursework (electives) offered by several departments, programs and colleges across campus. A cumulative GPA of 2.000 is required in the courses used to satisfy the minor requirements.

Code	Title	Credit Hours
Required Courses		**6**
CVEN 2909	Introduction to Global Sustainability	
CVEN 2919	Sustainability in Action	
Elective Courses		**9**
Students may select any combination of three (3) approved elective courses to satisfy the minor requirement. Electives are listed in the following four categories. Students do not have to take all electives in one category. Students should review the prerequisites of each course before registration.		
Science and Engineering		
AREN 3010	Energy Efficient Buildings	
AREN 4890	Sustainable Building Design	
ATOC 4770	Renewable Energy Meteorology	
CHEM 3251	Sustainable Energy from a Chemistry Perspective	
CHEM 4141	Environmental Water and Soil Chemistry	
CHEN 4480	Solar Cells and Optical Devices for Sustainable Buildings	
COEN 3210	Climate Change and Engineering	
CVEN 3414	Fundamentals of Environmental Engineering	
CVEN 4565	Design of Wood Structures	
CVEN 4834	Special Topics (Solid Waste Management and Resource Recovery)	
CVEN 4969	Water and Sanitation in Developing Countries	
ENVS 1000	Introduction to Environmental Studies	
ENVS 2000	Applied Ecology for Environmental Studies	
ENVS 3033	Governing the Environment	
ENVS 3070	Energy and the Environment	
ENVS 3140	Environmental Ethics	
ENVS 3525	Intermediate Environmental Problem Analysis: Topical Cornerstones	
ENVS 3555	Sustainable Economies	
ENVS 4800	Capstone: Critical Thinking in Environmental Studies	
EVEN 3550	Sustainability Principles for Engineers	
EVEN 3650	Sustainable Energy Systems Analysis	
EVEN 4434	Environmental Engineering Design	
EVEN 4544	Solid Waste Management and Resource Recovery	
EVEN 4969	Water and Sanitation in Developing Countries	
GEOG 2271	Introduction to the Arctic Environment	
GEOG 3402	Natural Hazards	
GEOG 3601	Principles of Climate	
GEOL 1150	Water, Energy and Environment: An Introduction to Earth Resources	
MCEN 4032	Sustainable Energy	
Business, Economics, and Policy		
BUSM 3060	Environmental Sustainability in a Globalized World	
CESR 4130	Sustainable Operations	
CESR 4850	The Sustainable Firm: Strategies and Practice

Total Credit Hours		**15**

Learning Outcomes

By the completion of the program, students will:

- Introduce the historical causes and present conditions of global climate change, and identify the opportunities and limitations of professional sustainability engagement.
- Identify and promote the relevance and role of engineers in supporting global sustainability and increasing prosperity.
- Introduce and identify technological, policy, social and practical solutions to global sustainability challenges.

Global Engineering - Minor

The undergraduate minor in global engineering will expand your understanding of how to operate within an international context from an engineering perspective. Advances in engineering and applied science offer immense promise to solving some of the most challenging global issues of our time, making exposure to other cultures and contexts crucial for a well-rounded engineering education. This minor will prepare students for international practice in multiple ways:

- It will reveal the profession's global impact on economies, society, and the environment.
- It will make students more sensitive to and aware of other cultures.
- It will help students recognize the issues at the core of development challenges and how to partner holistically will local communities to implement engineering solutions that improve quality of life.

Graduates with this minor will be capable of negotiating complex, uncertain and ambiguous circumstances, whether at home or abroad. Coursework includes a choice between two cornerstone courses, foreign language study through the intermediate level and students' choice of coursework that expands their understanding of:

- A particular country, region or language (e.g., CHIN 3341 Literature and Popular Culture in Modern China , FREN 3600 Business French 1 or PSCI 3082 Political Systems of Sub-Saharan Africa)
- Global topics (e.g., GEOG 3682 International Development: Economics, Power, and Place , IAFS 3850 International Conflict Resolution and Peacebuilding or PSCI 3064 Environmental Political Theory)
- Global Engineering (e.g., EMEN 4200 Engineering and Entrepreneurship for the Developing World, CVEN 5119 Introduction to Global Health for Engineers, EVEN 5979 Introduction to Humanitarian Aid or other Mortenson Center courses)

Most of these courses fit seamlessly into existing humanities and social science (H&SS) and technical elective credit requirements so that students do not have to add significant additional coursework to their major. Finally, students pursuing the minor must study, intern or volunteer abroad through an approved program--or complete an approved project through the Mortenson Center in Global Engineering & Resilience (https://www.colorado.edu/center/mortenson/).

For more information, visit the Global Engineering Minor webpage (https://www.colorado.edu/center/mortenson/global-engineering-minor-0/).

Requirements

To enroll in the global engineering minor, a student must be admitted to the College of Engineering & Applied Science and have a minimum 2.50 cumulative GPA. The minor requires a minimum completion of 18 credit hours, along with an approved global experience. A cumulative GPA of 2.000 or better is required for courses used to satisfy the requirements of this minor.

Required Courses and Credits

Foundation Course

Choose one from the following:

Code	Title	Credit Hours
ENES 2360	Gaining a Global State of Mind for Effective Engineering Practice [1]	3
ENES 3360	Gaining a Global State of Mind for Effective Engineering Practice [1]	3
GEEN 1400	Engineering Projects [2]	3
EVEN 2909	Introduction to Global Sustainability [3]	3

1 May take as upper- or lower-division.

2 Only the global sections of GEEN 1400, taught by a Mortenson Center faculty members or affiliate faculty members, will count as the foundation course.

3 EVEN 2909 will be offered next in Spring 2026.

Students may take two foundation courses and count the second course toward the regional, global or technical perspective requirements.

Foreign Language

Students must demonstrate intermediate foreign language ability through any of the following avenues:

- Completing the second semester, intermediate level of their chosen foreign language
- Testing into the 3000-level of a foreign language through CU's foreign language placement test.
- Completing "intermediate II" level of a foreign language through the ALTEC language lab. Must earn certificate of completion, which requires 80% attendance.
- Undergoing a language proficiency evaluation through ALTEC.

There is no specific credit allocation for this requirement. International students from non-English-speaking countries are exempt from this requirement but must take a total of 18 approved credits to earn the minor.

Students who do not receive academic credit for a foreign language (e.g., because they tested out of the intermediate level) must take a minimum of 18 approved credits to earn for the minor. Course options include taking an upper-division foreign language course or selecting additional credits from the regional, global or technical perspective category.

Code	Title	Credit Hours
ARAB 2120	Intermediate Arabic 2	4
HIND 2120	Intermediate Hindi 2	4
KREN 2120	Intermediate Korean 2	5
CHIN 2120	Intermediate Chinese 2	5
JPNS 2120	Intermediate Japanese 2	5
FREN 2120	Second-Year French Grammar Review and Reading 2	3
ITAL 2120	Intermediate Italian Reading, Grammar, and Composition 2	4
GRMN 2020	Intermediate German 2	4
SWED 2020	Intermediate Swedish 2 - DILS	4
HEBR 2120	Intermediate Modern Hebrew, Second Semester	4
DANE 2020	Intermediate Danish II - DILS	4
PORT 2120	Second-Year Portuguese 2	3

RUSS 2020	Second-Year Russian 2	4
TBTN 2020	Intermediate Colloquial Tibetan 2	4
SPAN 2150	Intensive Second-Year Spanish	5
SPAN 2120	Second-Year Spanish 2	3
GRMN 2030	Intensive Intermediate German	5

Regional, Global, and Technical Perspective Courses

Students may choose 12 credits of their choice (9 must be upper-division) that expand their understanding of:

- A particular country, region, or language
- Global topics
- Global Engineering

Many global and regional context courses also count toward Humanities & Social Sciences requirements, allowing students to double dip. Global engineering courses may also be eligible to double dip as technical, professional or focus-area electives in the major. Students should confirm classes they are considering with their academic advisor.

Students may submit a petition to the Managing Director of the Global Engineering Minor for consideration of courses not on this list.

International students may choose U.S. context courses to fulfill these requirements.

Global Experience

Global engineering minor students should seek global experience as part of their undergraduate studies. This can include CU-approved education abroad programs of any duration, overseas internships/practica, travel with EWB-USA or Bridge Buffs, or other relevant international experience by petition.

There is no specific credit allocation for this requirement.

Students may substitute this requirement on a case-by-case basis by completing an approved project through the Mortenson Center in Global Engineering & Resilience.

Computer Science

Computer science is an exciting and challenging field that has impact on many parts of our lives. Computer scientists craft the technologies that enable the digital devices we use every day. They develop the large-scale software that powers business and industry, advance the computational techniques and write the software that supports scientists in their study of the world around us. Many new applications of computing technology remain to be discovered. Computing will be at the heart of future revolutions in business, science and society. Students who study computer science will be at the forefront of these important advances.

Computer science offers study in the fields of computer systems, cyber security, robotics, algorithm design, artificial intelligence, software and web engineering, programming languages, database design, human–computer interaction, machine learning, data science, numerical and parallel computing, speech and language processing and theoretical computer science.

Computer science is concerned with how computers are constructed, how they store and process data, how they are used in problem-solving and how the quality of those solutions is assessed. It is about the science of creating software for a variety of users, and understanding how that software interacts with the hardware on which it is run and goes well beyond the machine to the study of how people interact with the technologies around them. Applications of computer science reach far and wide.

For more information, visit the Department of Computer Science (http://www.colorado.edu/cs/) website.

Course code for this program is CSCI.

Career Possibilities

Computer science graduates from CU Boulder are engaged in a wide variety of jobs with many different companies in locations all over the world. They produce the software and systems that touch lives every day in fields as diverse as scientific exploration, communication, finance, medicine, manufacturing, entertainment and research. Many are software developers, but others become teachers, writers, doctors, lawyers, scientists, military leaders and entrepreneurs. They work at some of the largest, most influential companies in the world, at research institutions, nonprofits and at the smallest start-ups of every type imaginable.

Facilities, Programs and Opportunities

The Department of Computer Science uses a modern computing infrastructure that supports its research and educational missions. This includes general purpose computing labs provided by the university, additional instructional labs and administrative computing resources provided by the department and specialized labs dedicated to the work of individual research groups. A wide variety of computing resources are available so that students have the opportunity to learn about and use cutting-edge equipment and software. The university research computing service maintains a supercomputer, high-speed networking and advanced computing infrastructure for the campus. The computer science educational culture emphasizes the use of individual laptop computers, including their use in courses and group work.

There are many networking opportunities available with companies offering paid internships. Boulder's tech start-up community, tech companies and research labs provide students with many employment opportunities while earning their degrees. There are also extensive opportunities for undergraduate students to participate in research projects across the campus.

Bachelor's Degree

- Computer Science - Bachelor of Science (BSCS) (p. 941)
- Computer Science - Bachelor of Arts (BA) (p. 937)
- Applied Computer Science - Post-Baccalaureate Bachelor of Science (BSACS) (p. 945)

Minors

- Computational Biology - Minor (p. 947)
- Computer Science - Minor (p. 948)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Acuna, Daniel (https://experts.colorado.edu/display/fisid_172426/)
Associate Professor; PhD, University of Minnesota Twin Cities

Agocs, Fruzsina
Assistant Professor; PhD, University of Cambridge

Ahmed, Nisar R. (https://experts.colorado.edu/display/fisid_153237/)
Associate Professor; PhD, Cornell University

Alistar, Mirela (https://experts.colorado.edu/display/fisid_164177/)
Assistant Professor; PhD, Technical University of Denmark

Anderson, Kenneth M. (https://experts.colorado.edu/display/fisid_113566/)
Chair, Professor; PhD, University of California, Irvine

Antoniak, Maria
Visiting Assistant Professor; Ph.D., Cornell University

Ashraf, Asa
Associate Teaching Professor; MS, South Dakota State University

Ayanzadeh, Ramen
Assistant Professor; PhD, University of Maryland

Banic, Amy
Visiting Associate Professor

Bastias, Alfonso (https://experts.colorado.edu/display/fisid_143688/)
Assistant Teaching Professor; PhD, University of Colorado Boulder

Bennett, Huck (https://experts.colorado.edu/display/fisid_174352/)
Assistant Professor; PhD, New York University

Black, John (https://experts.colorado.edu/display/fisid_126540/)
Associate Professor; PhD, University of California, Davis

Bortz, David Matthew (https://experts.colorado.edu/display/fisid_143348/)
Associate Professor; PhD, North Carolina State University

Bradley, Elizabeth (https://experts.colorado.edu/display/fisid_100546/)
Professor; PhD, Massachusetts Institute of Technology

Brown, Jed (https://experts.colorado.edu/display/fisid_153965/)
Associate Professor; DSc, ETH Zürich (Switzerland)

Brubaker, Jed Richards (https://experts.colorado.edu/display/fisid_156193/)
Assistant Professor; PhD, University of California, Irvine

Burke, Robin D. (https://experts.colorado.edu/display/fisid_165005/)
Professor; PhD, Northwestern University

Cai, Xiao-Chuan (https://experts.colorado.edu/display/fisid_100636/)
Professor Emeritus; PhD, New York University

Chang, Bor-Yuh Evan (https://experts.colorado.edu/display/fisid_146087/)
Associate Chair, Associate Professor; PhD, University of California, Berkeley

Chaspari, Theodora (https://experts.colorado.edu/display/fisid_173681/)
Associate Professor; PhD, University of Southern California

Chen, Lijun (https://experts.colorado.edu/display/fisid_149472/)
Associate Professor; PhD, California Institute of Technology

Chen, Yueqi (https://experts.colorado.edu/display/fisid_171984/)
Assistant Professor; PhD, Pennsylvania State University

Clauset, Aaron (https://experts.colorado.edu/display/fisid_147554/)
Professor; PhD, University of New Mexico

Colunga, Eliana (https://experts.colorado.edu/display/fisid_129477/)
Associate Professor; PhD, Indiana University Bloomington

Correll, Nikolaus J. (https://experts.colorado.edu/display/fisid_147555/)
Associate Professor; PhD, Ecole Polytech Federale de Lausanne (Switzerland)

Cox, Murray William (https://experts.colorado.edu/display/fisid_153192/)
Associate Teaching Professor; PhD, Texas A&M University

D'Mello, Sidney (https://experts.colorado.edu/display/fisid_159117/)
Professor; PhD, University of Memphis

Devendorf, Laura (https://experts.colorado.edu/display/fisid_158564/)
Assistant Professor; PhD, University of California, Berkeley

Do, Ellen Yi-Luen (https://experts.colorado.edu/display/fisid_159925/)
Professor; PhD, Georgia Institute of Technology

Dowell, Robin D. (https://experts.colorado.edu/display/fisid_147779/)
Associate Professor; DSc, Washington University

Dykes Jim (https://experts.colorado.edu/display/fisid_156791/)
Assistant Teaching Professor; MS, University of Colorado Boulder

Eichen, Elliot
Research Professor; PhD, University of Arizona

El Helbawy, Mona
Associate Faculty Director, Associate Teaching Professor; PhD, University of Colorado Boulder

Fiesler, Casey Lynn (https://experts.colorado.edu/display/fisid_155950/)
Associate Professor; PhD, Georgia Institute of Technology

Frew, Eric W. (https://experts.colorado.edu/display/fisid_134685/)
Professor; PhD, Stanford University

Frongillo, Rafael M. (https://experts.colorado.edu/display/fisid_156416/)
Associate Professor; PhD, University of California, Berkeley

Gifford, Kevin K. (https://experts.colorado.edu/display/fisid_104361/)
Faculty Director, Research Professor; PhD, University of Colorado Boulder

Godley Christopher (https://experts.colorado.edu/display/fisid_172491/)

Velasquez, Alvara (https://experts.colorado.edu/display/fisid_172313/)
Visiting Assistant Professor; PhD, University of Central Florida

Vernerey, Divya E. (https://experts.colorado.edu/display/fisid_145131/)
Teaching Professor; PhD, Northwestern University

Voida, Amy Kathryn Mitchell (https://experts.colorado.edu/display/fisid_155855/)
Associate Professor; PhD, Georgia Institute of Technology

Voida, Stephen A. (https://experts.colorado.edu/display/fisid_155856/)
Associate Professor; PhD, Georgia Institute of Technology

von der Wense, Katharina (https://experts.colorado.edu/display/fisid_166417/)
Assistant Professor; PhD, University of Munich (Germany)

Waggoner, Bo (https://experts.colorado.edu/individual/fisid_164188/)
Assistant Professor; PhD, Harvard University

Ward, Wayne Hinson (https://experts.colorado.edu/display/fisid_114680/)
Research Professor; PhD, University of Colorado Boulder

Wright, William
Assistant Teaching Professor; MS, Stanford University

Wustrow, Eric A. (https://experts.colorado.edu/display/fisid_156419/)
Assistant Professor; BE, University of Michigan Ann Arbor

Yeh, Tom (https://experts.colorado.edu/display/fisid_151584/)
Associate Professor; PhD, Massachusetts Institute of Technology

Yuan, Lei (https://experts.colorado.edu/individual/fisid_167699/)
Assistant Professor; PhD, Northwestern University

Zagrodzki, Maciej
Associate Chair, Associate Teaching Professor; MSc, Colorado School of Mines

Zamani, Majid (https://experts.colorado.edu/individual/fisid_164967/)
Associate Professor; PhD, University of California, Los Angeles

Courses

CSCI 1000 (1) Computer Science as a Field of Work and Study
Introduces curriculum, learning techniques, time management and career opportunities in Computer Science. Includes presentations from alumni and others with relevant educational and professional experience.
Equivalent - Duplicate Degree Credit Not Granted: CSPB 1000
Requisites: Restricted to students with 0-26 credits (Freshmen) Computer Science (CSEN-BSCS or CSEN-BA) or Engineering Open Option (XXEN) majors only.
Additional Information: Departmental Category: General Computer Science

CSCI 1200 (3) Introduction to Computational Thinking
Teaches computational thinking and techniques for writing computer programs using the Python programming language. Intended for students who realize that computational skills are beneficial to all fields of study, but who have little or no experience in programming or are not Computer Science majors. Students will be expected to create computer programs to solve problems in a range of disciplines. Does not count as Computer Science credit for the Computer Science BA, BS, or minor.
Equivalent - Duplicate Degree Credit Not Granted: LING 1200 or INFO 1701

CSCI 1300 (4) Computer Science 1: Starting Computing
Teaches techniques for writing computer programs in higher level programming languages to solve problems of interest in a range of application domains. Appropriate for students with little to no experience in computing or programming.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 1310 CSPB 1300
Requisites: Requires a prerequisite or corequisite course of APPM 1235 or APPM 1340 or APPM 1345 or APPM 1350 or MATH 1150 or MATH 1300 or MATH 1310 (all minimum grade C-).

CSCI 2270 (4) Computer Science 2: Data Structures
Studies data abstractions (e.g., stacks, queues, lists, trees, graphs, heaps, hash tables, priority queues) and their representation techniques (e.g., linking, arrays). Introduces concepts used in algorithm design and analysis including criteria for selecting data structures to fit their applications. Knowledge of C++ is highly recommended.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 2275 CSPB 2270
Requisites: Requires prerequisite course of ((CSCI 1300 or CSCI 1320 or ECEN 1310 minimum grade C-) or (ASEN 1320 minimum grade B-)) and prerequisite or corequisite course of (MATH 1300 or MATH 1310 or APPM 1345 or APPM 1350 minimum grade C-).
Additional Information: Departmental Category: General Computer Science

CSCI 2275 (4) Programming and Data Structures
Combines the content in CSCI 1300 and CSCI 2270 and is intended for students with experience with at least one object oriented programming language. Assumes knowledge of programming constructs- data types, conditionals, loops and classes. Students must pass a programming competency exam administered by the computer science department to take this class. The course includes an expedited instruction in the C++ programming language and then primarily focuses on the content in CSCI 2270: data abstractions (e.g., stacks, queues, lists, trees, graphs, heaps, hash tables, priority queues) and their representation techniques (e.g., linking, arrays). Introduces concepts used in algorithm design and analysis including criteria for selecting data structures to fit their applications.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 2270 or CSPB 2270
Requisites: Requires prerequisite or co-requisite of MATH 1300 or MATH 1310 or APPM 1345 or APPM 1350 (all minimum grade C-).

CSCI 2400 (4) Computer Systems
Covers how programs are represented and executed by modern computers, including low-level machine representations of programs and data, an understanding of how computer components and the memory hierarchy influence performance.
Equivalent - Duplicate Degree Credit Not Granted: CSPB 2400
Requisites: Requires prerequisite of CSCI 2270 or CSCI 2275 (minimum grade C-).
Additional Information: Departmental Category: General Computer Science

CSCI 2750 (3) Computing, Ethics and Society
Satisfies the ethics requirement for computer science BA and BS majors. This course is intended to provide students with perspectives which help them deal with ethical and societal implications in their careers as computing professionals. Examines ethical ramifications of current and future computing systems and technologies and reflects upon the broad implications of computing upon our society. Student work consists of reading, participation in class discussions and presentations, essays, and a final project. Students from outside computer science also are welcome. Necessary background is basic familiarity with computing. Does not count as Computer Science elective credit for the Computer Science BA, BS, or minor.
Recommended: Sophomore standing or beyond, and a basic familiarity with computing.

CSCI 2820 (3) Linear Algebra with Computer Science Applications
Introduces the fundamentals of linear algebra in the context of computer science applications. Includes vector spaces, matrices, linear systems, and eigenvalues. Includes the basics of floating point computation and numerical linear algebra.
Equivalent - Duplicate Degree Credit Not Granted: CSPB 2820
Requisites: Requires prerequisite courses of (CSCI 2270 or CSCI 2275) and (APPM 1360 or MATH 2300) (all minimum grade C-).
Additional Information: Departmental Category: General Computer Science

CSCI 2824 (3) Discrete Structures
Covers foundational materials for computer science that is often assumed in advanced courses. Topics include set theory, Boolean algebra, functions and relations, graphs, propositional and predicate calculus, proofs, mathematical induction, recurrence relations, combinatorics, discrete probability. Focuses on examples based on diverse applications of computer science.
Equivalent - Duplicate Degree Credit Not Granted: CSPB 2824
Requisites: Requires prerequisite courses of (ASEN 1320 or CSCI 1200 or CSCI 1300 or CSCI 1320 or CSCI 2275 or ECEN 1310 or MCEN 1030) and (APPM 1345 or APPM 1350 or MATH 1300 or MATH 1310) (all minimum grade C-).
Recommended: Prerequisite Calc 2 (APPM 1360 or MATH 2300) is strongly recommended.
Additional Information: Departmental Category: Theory of Computation

CSCI 2830 (1-4) Special Topics in Computer Science
Covers topics of interest in computer science at the sophomore level. Content varies from semester to semester. Does not count as Computer Science credit for the Computer Science BA, BS or minor.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: General Computer Science

CSCI 2834 (1) Discrete Structures Workgroup
Provides additional problem-solving practice and guidance for students enrolled in CSCI 2824. Students work in a collaborative environment to further develop their problem-solving skills with the assistance of facilitators. Does not count as Computer Science credit for the Computer Science BA, BS, or minor.
Repeatable: Repeatable for up to 3.00 total credit hours.
Requisites: Requires corequisite course of CSCI 2824.

CSCI 2897 (3) Calculating Biological Quantities
Master practical mathematical techniques for representing and analyzing biological quantities of different kinds. Develop mathematical intuition about biological calculations. Learn to model and solve simple feedback processes. Learn to model and solve simple accumulation processes. Learn to model and decompose simple vector spaces. Learn standard approximation and optimization strategies. Adapt and combine methods to solve real-world problems. Background in biology not required. This course is intended for students who are interested in Computational Biology, but will not take Differential Equations (APPM 2360/MATH 3430) as part of their degree plan. Does not count as Computer Science credit for for the Computer Science BA, BS or minor.
Requisites: Requires prerequisite course of APPM 1345 or APPM 1350 or MATH 1300 or MATH 1310 (minimum grade C-)

CSCI 2900 (1-3) Lower Division, Undergraduate Level Independent Study
Offers selected topics at the elementary level for students with little or no previous computing experience. Does not count as Computer Science credit for the Computer Science BA, BS or minor.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: General Computer Science

CSCI 3002 (4) Fundamentals of Human Computer Interaction
Introduces the practice and research of human-computer interaction, including its history, theories, the techniques of user-centered design, and the development of interactive technologies. Covers computing in society at large with respect to domains such as health, education, assistive technology, ethics, environment, and more.
Requisites: Requires prerequisite course of CSCI 2270 or CSCI 2275 (both minimum grade C-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors).
Additional Information: Departmental Category: Artificial Intelligence

CSCI 3010 (3) Intensive Programming Workshop
Explores concepts and techniques for design and construction of larger, reliable, and maintainable software systems in the context of object-oriented programming. Covers various topics including: object-oriented programming paradigms, scope, inheritance, program structure and design, practical use of version control, working with established code bases, and building graphical user interfaces. Emphasizes coding individually and in pairs and includes in class lab work, smaller coding assignments, and multiple weeks-long projects. Not intended for students in their final year of the Computer Science BA or BS degree. Formerly offered as a special topics course.
Requisites: Requires a prerequisite course of (CSCI 2270 or CSCI 2275) and a prerequisite or co-requisite course of CSCI 3308 (all minimum grade C-).

CSCI 3022 (3) Introduction to Data Science with Probability and Statistics
Introduces students to the tools, methods and theory behind extracting insights from data. Covers algorithms of cleaning and munging data, probability theory and common distributions, statistical simulation, drawing inferences from data, and basic statistical modeling.
Equivalent - Duplicate Degree Credit Not Granted: CSPB 3022
Requisites: Requires prerequisite course of (CSCI 2270 or CSCI 2275) and (APPM 1360 or MATH 2300) and (CSCI 2824 or ECEN 2703 or APPM 3170 or MATH 2001) (all minimum grade C-).
Additional Information: Departmental Category: Artificial Intelligence

CSCI 3090 (3) Introduction to Quantum Computing
Covers the basics of quantum computation, including the basics of quantum information; axioms of quantum mechanics; quantum circuits and universality; the relationship between quantum and classical complexity classes; simple quantum algorithms such as the quantum Fourier transform; Shor factoring algorithm; Grover search algorithm; physical implementation of quantum computation; error correction and fault tolerance.
Equivalent - Duplicate Degree Credit Not Granted: PHYS 3090 and ECEN 3090
Requisites: Requires prerequisite course of APPM 2360 or APPM 3310 or CSCI 2820 or MATH 2130 or MATH 2135 (minimum grade C-).

CSCI 3100 (1) Software and Society
Provides students with an understanding of the professional, ethical, legal and social issues and responsibilities of software developers, as well as providing them with the ability to analyze the local and global impacts of computing on individuals, organizations and society. Required for, and restricted to, Computer Science majors completing a Senior Thesis. Department consent required.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 4308 and CSCI 4328 and CSCI 4338 and CSCI 4348
Requisites: Restricted to Computer Science majors only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: General Computer Science

CSCI 3104 (4) Algorithms
Covers the fundamentals of algorithms and various algorithmic strategies, including time and space complexity, sorting algorithms, recurrence relations, divide and conquer algorithms, greedy algorithms, dynamic programming, linear programming, graph algorithms, problems in P and NP, and approximation algorithms.
Equivalent - Duplicate Degree Credit Not Granted: CSPB 3104
Requisites: Requires prerequisite courses of (CSCI 2270 or CSCI 2275) and (APPM 1360 or MATH 2300) and (one of the following: CSCI 2824 or ECEN 2703 or APPM 3170 or MATH 2001) (all minimum grade C-).
Additional Information: Departmental Category: Theory of Computation

CSCI 3112 (1) Professional Development in Computer Science
Supports students in developing professional skills and practices in computing, including: preparing for technical and behavioral interviews, professional networking, mastering new technologies not addressed in the curriculum, presenting work, the role of graduate study, and exploring career and research directions.
Requisites: Requires prerequisite course of CSCI 2270 or CSCI 2275 (minimum grade C-). Restricted to Computer Science majors, Computer Science minors, and Computational Biology minors.
Additional Information: Departmental Category: Artificial Intelligence

CSCI 3150 (3) Universal Design for Digital Media
Focusing on the concepts of universal design and Web Standards, this course will address issues that occur at the nexus of web standards, Universal Design and the needs of persons with disabilities. Students will gain the expertise and skills to create media and web sites which are accessible, usable and effective for all users and device platforms.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 3150
Requisites: Requires prerequisite course of CSCI 1300 (minimum grade C-).
Recommended: Prerequisite some knowledge of creating web pages with either direct HTML coding or with web design software.

CSCI 3155 (4) Principles of Programming Languages
Studies principles governing the design and analysis of programming languages and their underlying execution models. Explores values, scoping, recursion, higher-order functions, type systems, control structures, and objects. Introduces formal semantics as a framework for understanding programming features. Introduces advanced programming concepts such as functional programming, higher-order functions, immutable values and structures, inductive types, functors, continuation-passing; and object-oriented programming using inheritance, generics and covariance/contravariance in a functional programming language such as Scala.
Equivalent - Duplicate Degree Credit Not Granted: CSPB 3155
Requisites: Requires prerequisite courses of (CSCI 2270 or CSCI 2275) and (CSCI 2400 or ECEN 2360 or ECEN 3350) and (CSCI 2824 or ECEN 2703 or APPM 3170 or MATH 2001) (all minimum grade C-).
Additional Information: Departmental Category: Programming Languages

CSCI 3202 (3) Introduction to Artificial Intelligence
Surveys artificial intelligence techniques of search, knowledge representation and reasoning, probabilistic inference, machine learning, and natural language. Knowledge of Python is strongly recommended.
Equivalent - Duplicate Degree Credit Not Granted: CSPB 3202
Requisites: Requires prereqs (CSCI 2270 or CSCI 2275) (APPM 3170 or CSCI 2824 or ECEN 2703 or MATH 2001) (APPM 3570 or CHEN 3010 or CSCI 3022 or CVEN 3227 or ECEN 3810 or ECON 3818 or MATH 3510 or MATH 4510 or STAT 3100 or STAT 4000) (all min grade C-).
Additional Information: Departmental Category: Artificial Intelligence

CSCI 3287 (3) Design and Analysis of Database Systems
Introduces the fundamental concepts of database requirements analysis, database design, and database implementation with emphasis on the relational model and the SQL programming language. Introduces the concepts of Big Data and NoSQL systems.
Equivalent - Duplicate Degree Credit Not Granted: CSPB 3287
Requisites: Requires prerequisite course of CSCI 2270 or CSCI 2275 (minimum grade C-).
Additional Information: Departmental Category: Database Systems

CSCI 3302 (3) Introduction to Robotics
Introduces students to fundamental concepts in autonomous robotics: mechanisms, locomotion, kinematics, control, perception and planning. Consists of lectures and lab sessions that are geared toward developing a complete navigation stack on a miniature mobile robotic platform.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 3303 and CSPB 3302
Requisites: Requires prerequisite courses of (CSCI 2270 or CSCI 2275) and (APPM 3170 or CSCI 2824 or ECEN 2703 or MATH 2001) and (APPM 2360 or APPM 3310 or CSCI 2820 or MATH 2130 or MATH 2135) (all minimum grade C-).
Additional Information: Departmental Category: Artificial Intelligence

CSCI 3308 (3) Software Development Methods and Tools
Covers tools and techniques for successful software development with a strong focus on best practices used in industry. Students work in small teams to complete a semester-long application development project. Students learn front-end design and construction using HTML & CSS, back-end database design and construction, and full-stack integration. Students gain exposure to agile methodologies, web services, distributed version control, requirements definition, automated integration testing, and cloud-based application deployment.
Equivalent - Duplicate Degree Credit Not Granted: CSPB 3308
Requisites: Requires prerequisite course of CSCI 2270 or CSCI 2275 (both minimum grade C-).
Additional Information: Departmental Category: Software Engineering

CSCI 3352 (3) Biological Networks
This course examines the computational representation and analysis of biological phenomena through the structure and dynamics of networks, from molecules to species. Attention focuses on algorithms for clustering network structures, predicting missing information, modeling flows, regulation, and spreading-process dynamics, examining the evolution of network structure, and developing intuition for how network structure and dynamics relate to biological phenomena.
Requisites: Prereqs(1 of APPM3650/CSCI2270/2275/INFO2201/PHYS2600) (1 of APPM1345/1350/MATH1300/1310) (1 of APPM3570/CHEN3010/CSCI3022/CVEN3227/EBIO4410/ECEN3810/ECON3818/IPHY3280/MATH3510/4510/4520/MCDB3450/MCEN3047/PSYC2111/STAT2600/3100/4000/4520)(min C-)

CSCI 3403 (4) Introduction to CyberSecurity for a Converged World
Introduces core concepts in cybersecurity including confidentiality, integrity, authentication, risk management, and adversarial thinking. The concepts will be applied to both traditional information technology (IT) systems and cyber physical systems (CPS). At the conclusion of the course students should have a solid foundation in cybersecurity and hands-on experience.
Equivalent - Duplicate Degree Credit Not Granted: CSPB 3403
Requisites: Requires prerequisite course of CSCI 2400 or ECEN 2360 or ECEN 3350 (minimum grade C-).
Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 3434 (3) Theory of Computation
Introduces the foundations of formal language theory, computability, and complexity. Shows relationship between automata and various classes of languages. Addresses the issue of which problems can be solved by computational means, and studies complexity of solutions.
Requisites: Requires prerequisite course of CSCI 3104 (minimum grade C-).
Additional Information: Departmental Category: Theory of Computation

CSCI 3593 (3) Computer Organization
Studies computer design at the microarchitecture level. Discusses instruction set architecture design, arithmetic and logic unit design, control logic, memory design and caches, simple pipelining, I/O and peripheral devices. Briefly covers aspects of modern computer architecture, such as multicore processors and hardware security.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 3593 ECEN 5590
Requisites: Requires prerequisite course of ECEN 2360 or ECEN 3350 or CSCI 2400 (minimum grade C-).
Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 3656 (3) Numerical Computation
Covers development, computer implementation, and analysis of numerical methods for applied mathematical problems. Explores topics such as floating point arithmetic, numerical solution of linear systems of equations, root finding, numerical interpolation, differentiation, and integration.
Requisites: Requires prerequisite courses of (ASEN 1320 or CSCI 1300 or CSCI 1320 or CSCI 2275 or ECEN 1310) and (APPM 1360 or MATH 2300) and (APPM 2360 or APPM 3310 or CSCI 2820 or MATH 2130 or MATH 2135) (all min. grade C-).
Additional Information: Departmental Category: Numerical Computation

CSCI 3702 (3) Cognitive Science
Introduces cognitive science, drawing from psychology, philosophy, artificial intelligence, neuroscience, and linguistics. Studies the linguistic relativity hypothesis, consciousness, categorization, linguistic rules, the mind-body problem, nature versus nurture, conceptual structure and metaphor, logic/problem solving and judgment. Emphasizes the nature, implications and limitations of the computational model of mind.
Equivalent - Duplicate Degree Credit Not Granted: INFO 3702 and LING 3005 and PHIL 3310 and PSYC 3005 and SLHS 3003 and CSPB 3702
Recommended: Prerequisites two of the following CSCI 1300 or CSCI 2275 or LING 2000 or PHIL 2440 or PSYC 2145.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Distribution-Natural Sciences
Arts Sci Gen Ed: Distribution-Social Sciences

CSCI 3753 (4) Design and Analysis of Operating Systems
Analyzes the software that extends hardware to provide a computing environment, including the role of linkers, file systems, resource sharing, security and networking. Studies the history of operating system organization and design and their influence on security, functionality and reliability.
Equivalent - Duplicate Degree Credit Not Granted: CSPB 3753
Requisites: Requires prerequisite courses of (CSCI 2270 or CSCI 2275) and (CSCI 2400 or ECEN 2360 or ECEN 3350) (all minimum grade C-).
Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 3832 (3) Natural Language Processing
Explores the theoretical and practical issues that arise in getting computers to perform useful and interesting tasks with human languages. Topics include information extraction, dialog systems and machine translation. Focus is on the use of language data and machine learning algorithms to build robust systems.
Equivalent - Duplicate Degree Credit Not Granted: CSPB 3832
Requisites: Requires prerequisite courses of (CSCI 2270 or CSCI 2275) and (CSCI 2824 or MATH 2001 or ECEN 2703 or APPM 3170) (all minimum grade C-).
Additional Information: Departmental Category: Artificial Intelligence

CSCI 4022 (3) Advanced Data Science
Introduces students to advanced tools, methods, and theory for extracting insights from data. Covers computational tools for storing and working with large data sets and computational techniques for common big data scenarios like graph data, recommender systems, and dimensionality reduction. Emphasizes both the efficient implementation of algorithms as well as the mathematical foundations behind techniques.
Requisites: Prereqs of (APPM 3310 or CSCI 2820 or MATH 2130 or MATH 2135) (CSCI 3022 or APPM 3570 or CHEN 3010 or CVEN 3227 or MATH 3510 or MATH 4510 or ECEN 3810 or ECON 3818 or STAT 3100 or STAT 4000 or 4520) CSCI 3104 (all min grade C-).
Additional Information: Departmental Category: Artificial Intelligence

CSCI 4113 (3) Linux System Administration
Introduces Linux Unix system administration and related topics. Includes hardware and software installation, storage management, configuration of user accounts and system services, development of automation and monitoring tools, and the provisioning of common network services. This laboratory-focused course will provide significant exposure to the network security concerns of Internet connected hosts. Students will build a network of Linux servers from the ground up using provided computing resources and must maintain and secure these servers themselves.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5113 and CYBR 5113 CSCI 5030 and CYBR 5030
Requisites: Requires prerequisite course of CSCI 3753 (minimum grade C-).
Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 4114 (3) Practical Algorithmic Complexity
When coming across an algorithmic problem, how do we think about how hard it is? Beyond just how much time or memory it takes, computational complexity offers a plethora of concepts for understanding this fundamental question. This leads to the appropriate choice of algorithm for the job, the development of new algorithms, and understanding the role of algorithmic complexity in natural settings such as biology and physics.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5114
Requisites: Requires a prerequisite course of CSCI 3104 (minimum grade C-).

CSCI 4118 (3) Software Engineering for Scientists
Learn the core principles of software engineering to develop scientific software that is robust and reproducible. This class targets quantitative scientists in any discipline who have programming skills (any language) and want to use software to further their research. The course covers version control, testing, benchmarking, data structures, algorithms, and pipelines. Instructor approval is required for CS majors and CS minors.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 6118
Requisites: Restricted to non-Computer Science majors and non-Computer Science minors only.
Recommended: Prerequisites ASEN 1320 or CSCI 1200 or CSCI 1300 or CSCI 2275 or ECEN 1310 or INFO 1201 and knowledge of a programming language, preferably Python.

CSCI 4122 (3) Information Visualization
Studies interactive visualization techniques that help people analyze data. This course introduces design, development, and validation approaches for interactive visualizations with applications in various domains, including the analysis of text collections, software visualization, network analytics, and the biomedical sciences. It covers underlying principles, provides an overview of existing techniques, and teaches the background necessary to design innovative visualizations.
Requisites: Requires prerequisite courses (CSCI 2270 or CSCI 2275) and (CSCI 2824 or ECEN 2703 or APPM 3170) (all minimum grade C-).

CSCI 4133 (3) Fundamentals of Computer Security
Practice thinking like an attacker by exploring several modern computer security attacks and defenses through hands-on programming projects. Topics include applied cryptography (encryption, authentication), web security (XSS, CSRF, SQL Injection), network security (TLS, MITM attacks), application security (shell injection, buffer overflows), and other current events and trends (government surveillance, botnets, cryptocurrencies).
Equivalent - Duplicate Degree Credit Not Granted: ECEN 4133
Requisites: Requires prerequisites: (CSCI 2270 or CSCI 2275) and (CSCI 2400 or ECEN 2360 or ECEN 3350) (all minimum grade C-).
Recommended: Corequisite CSCI 4593 (soon to be CSCI 3593).
Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 4200 (3) Introduction to Wireless Systems
Overviews the distinctive characteristics of the wireless communications medium. Topics covered include: Analog signals, Antennas and Propagation, Digital Signals, Sampling, Quadrature Signals, Digital Modulation, SNR and SINR Concepts, Channel Models, Channel Statistics, and Link Budgets. The course includes an introduction to MIMO and beam-forming as implemented in modern communication systems. Software Defined Radio (SDR) is introduced to facilitate student hands-on learning of radio operation. Recommended: Familiarity with basic programming, statistics, and computer networking concepts. Formerly CYBR 4200.
Equivalent - Duplicate Degree Credit Not Granted: CYBR 5200 and CSCI 5200
Requisites: Requires prerequisites (CSCI 2400 or ECEN 2360 or ECEN 3350) and (APPM 3570 or CHEN 3010 or CSCI 3022 or CVEN 3227 or ECEN 3810 or ECON 3818 or MATH 3510 or MATH 4510 or MCEN 3047 or STAT 3100 or STAT 4000 or STAT 4520) and PHYS 1120 (all min grade C-).

CSCI 4214 (3) Big Data Architecture
Provides students with a comprehensive survey of technologies used today in the collection, storage, processing, analytics and display of big data. Focuses on cultivating real world skills with students working on semester long projects to execute on a group project.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 5214, CSCI 5214, and ATLS 4214
Requisites: Requires prerequisite course of CSCI 2270 or CSCI 2275 (minimum grade C-).

CSCI 4229 (3) Computer Graphics
Studies design, analysis and implementation of computer graphics techniques. Topics include interactive techniques, 3D viewing and models, clipping, transformations, projection, removal of hidden surfaces, lighting, textures and shadows. Knowledge of basic linear algebra is required.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5229
Requisites: Requires prerequisite course of CSCI 2270 or CSCI 2275 (minimum grade C-).
Additional Information: Departmental Category: Graphics

CSCI 4239 (3) Advanced Computer Graphics
Studies design, analysis and implementation of advanced computer graphics techniques. Topics include shaders, using the GPU for high performance computing, graphics programming on embedded devices such as mobile phones; advanced graphics techniques such as ray tracing.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5239
Requisites: Requires prerequisite course of CSCI 4229 (minimum grade C-).
Additional Information: Departmental Category: Graphics

CSCI 4240 (3) Introduction to Blockchain
Examines an emerging technology known as blockchain. Blockchain refers to the distributed and decentralized database technology behind popular cryptocurrencies such as Bitcoin and Ethereum. However, it can be used to record and transfer any digital asset, not just currency. This course explores the fundamentals of blockchain technology and its application from three key perspectives: policy and governance, technology, and application. Students gain an understanding of key concepts and how to apply them in the industry.
Equivalent - Duplicate Degree Credit Not Granted: CYBR 5240 and CSCI 5240
Requisites: Requires prerequisite courses of (CSCI 2270 or CSCI 2275) and (CSCI 2824 or ECEN 2703 or APPM 3170 or MATH 2001) (all minimum grade C-).

CSCI 4250 (3) History of Computing
Explores the multifaceted histories of computing as punctuated by "great works" of computer science within the context of historical and social changes influencing and influenced by computing. We will consider people, institutions, and innovations starting with mechanical calculation and mathematical frameworks such as by Lovelace, Pascal, and Turing; early computers such as ABC and ENIAC; the pivotal role of military funding; the founding and development of fields transforming our lives such as artificial intelligence and the internet; and ways other fields, from engineering to cognitive science, interweave in the evolution of computing. Does not count as CS credit for the Computer Science BA, BS or minor.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Departmental Category: General Computer Science

CSCI 4253 (3) Datacenter Scale Computing - Methods, Systems and Techniques
Covers the primary problem solving strategies, methods and tools needed for data-intensive programs using large collections of computers typically called "warehouse scale" or "data-center scale" computers. Examines methods and algorithms for processing data-intensive applications, methods for deploying and managing large collections of computers in an on-demand infrastructure and issues of large-scale computer system design.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5253
Requisites: Requires prerequisite course of CSCI 3753 (minimum grade C-).
Recommended: Prerequisite CSCI 4273.
Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 4273 (3) Network Systems
Focuses on design and implementation of network programs and systems, including topics in network protocols, file transfer, client-server computing, remote procedure call and other contemporary network system design and programming techniques. Familiarity with C and Unix or Linux is required.
Requisites: Requires prerequisite course of CSCI 3753 (minimum grade C-).
Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 4302 (3) Advanced Robotics
An intensive exploration of major challenges in robotics, providing a hands-on review of current research topics in the context of a "robotics grand challenge" problem. Topics include online planning and control, state estimation, simultaneous localization and mapping, and operating under partial observability.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5302
Requisites: Requires prerequisite course of CSCI 3302 (minimum grade C-).
Additional Information: Departmental Category: Artificial Intelligence

CSCI 4303 (1) Cybersecurity Club Companion Course
Gives students hands-on experience applying practical security skills and adversarial thinking to real-world problems. Students will work in small teams on internal challenges, lab development, open source contributions, and will represent the university in larger teams for external challenges at the national and global level, such as those hosted by Collegiate Cyber Defense Competition (CCDC), Wicked6, DOE CyberForce, etc. Students will be expected to participate in both internal and external challenges, attend meetings, and present short presentations to the group when appropriate. Previously offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: CYBR 5303 and CSCI 5303
Repeatable: Repeatable for up to 3.00 total credit hours.
Requisites: Requires prerequisite course of CSCI 3403 (minimum grade C-).

CSCI 4308 (4) Software Engineering Project 1
Senior capstone course in which students design, implement, document and test software systems for use in industry, non-profits, government and research institutions. Also offers extensive experience in oral and written communication throughout the development process. Department consent required. Department-enforced prerequisites differ for BS and BA degrees. Contact academic advisor for details. Senior Capstone courses are optional for BA students. BA students interested in taking this course should contact their advisor early in their major. Students must take this course and CSCI 4318 contiguously as the project spans the entire academic year. Duplicate degree
Equivalent - Duplicate Degree Credit Not Granted: CSCI 4328
Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Computer Science (CSEN) majors only.
Additional Information: Departmental Category: Software Engineering

CSCI 4313 (3) Concurrent Programming
Introduces the theory and practice of multicore programming. The first part of the course presents foundations of concurrent programming: mutual exclusion, wait-free and lock-free synchronization, spin locks, monitors, memory consistency models. The second part presents a sequence of concurrent data structures and techniques used in their implementations (coarse-grained, fine-grained, optimistic and lock-free synchronization).
Equivalent - Duplicate Degree Credit Not Granted: ECEN 4313 and ECEN 5313 and CSCI 5313
Requisites: Requires prerequisite course of CSCI 2400 (minimum grade C-).
Recommended: Prerequisite ECEN 3593 or CSCI 3593.

CSCI 4314 (3) Dynamic Models in Biology
Surveys computational and mathematical modeling to illuminate biological processes. Students work together to learn to build and analyze models using a variety of numerical tools, tackle meaningful biological problems, and communicate effectively across disciplines. Specific topics: Langevin dynamics of protein folding, agent-based models, finite difference models of organismal growth, stochastic and deterministic cellular automata game of life, models of behavior.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5314
Requisites: Requires prerequisite of APPM 3650 or ASTR 2600 or CSCI 2270 or CSCI 2275 or INFO 2201 or PHYS 2600 (minimum grade C-).
Recommended: Prerequisite Linear Algebra (CSCI 2820 or CSCI 2897 or MATH 2130 or MATH 2135 or APPM 2360 or APPM 3310), and intended for students in their third or fourth years of Computing or other majors.
Additional Information: Departmental Category: Theory of Computation

CSCI 4318 (4) Software Engineering Project 2
Second semester of a senior capstone course in computer science. Students must take this course and CSCI 4308 or 4328 contiguously as the project spans the entire academic year.
Requisites: Requires prerequisite course of CSCI 4308 or CSCI 4328 (minimum grade C-).
Additional Information: Departmental Category: Software Engineering

CSCI 4328 (4) Software Project Management and Mentoring
Review software project management and discuss the latest approaches, methodologies and standards of software development. Learn to develop software quality, documentation, testing and prototype goals. Study project risk management and cost estimation approaches. Students will mentor other Senior Software Project Teams. Intended for students with professional software development experience. Department consent required, see Senior Project Director for permission.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 4308
Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Computer Science (CSEN) majors only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Software Engineering

CSCI 4338 (2) Software Project Management
Intended for double majors doing interdisciplinary projects in other departments. Not intended for students who will be enrolling in CSCI 4368. Review software project management and discuss the latest approaches, methodologies and standards of software development. Learn to develop software quality, documentation, testing, and prototype goals. Study project risk management and cost estimation approaches. Department consent required, see Senior Project Director for permission.
Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Computer Science (CSEN) majors only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Software Engineering

CSCI 4348 (4) Startup Essentials: Entrepreneurial Projects in Computing
Provide students with the tools to be successful technical co-founders of their own startups. Explores the initial stages of founding a startup, including team formation, idea validation, pivoting and pitching, while employing an iterative methodology. Student teams will develop a minimum viable product, pitch their final startup concept, and be evaluated on product/market fit. Department consent required. Department-enforced prerequisites differ for BS and BA degrees. Contact academic advisor for details. Senior Capstone courses are optional for BA students. BA students interested in taking this course should contact their advisor(s) early in their major. Students must take this course and CSCI 4358 contiguously as the project spans the entire academic year.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5340
Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Computer Science (CSEN) majors only.
Additional Information: Departmental Category: General Computer Science

CSCI 4358 (4) Entrepreneurial Projects II
Follows CSCI 4348. In the second semester of this entrepreneurial project capstone, student teams will seek to find market traction for a high-fidelity Minimum Viable Product (MVP), software and/or hardware, that they will develop as part of their startup project. Teams will further learn to incorporate principles of marketing, business finance and legal issues into the business model for their startup concept. Students must take this course and CSCI 4348 contiguously as the project spans the entire academic year.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5350
Requisites: Requires a prerequisite course of CSCI 4348 (minimum grade C-).
Additional Information: Departmental Category: General Computer Science

CSCI 4368 (4) Multidisciplinary Design Project 1
Design, develop, test, and deploy software that is integrated into a mechanical system. Participate as a member of a multi-disciplinary team that could include students from computer science, mechanical, and electrical disciplines. Develop project management and communication skills as they pertain to a multi-disciplinary team. Support the project team through self-directed study. First semester of a senior capstone course. Students must take this course and CSCI 4378 contiguously as the project spans the entire academic year. Department-enforced prerequisites differ for BS and BA degrees. Contact academic advisor for details. Senior Capstone courses are optional for BA students. BA students interested in taking this course should contact their advisor(s) early in their major.
Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Computer Science (CSEN) majors only.

CSCI 4378 (4) Multidisciplinary Design Project 2
Design, develop, test, and deploy software that is integrated into a mechanical system. Participate as a member of a multi-disciplinary team that could include students from computer science, mechanical, and electrical disciplines. Develop project management and communication skills as they pertain to a multi-disciplinary team. Support the project team through self-directed study. Second semester of a senior capstone course. Students must take this course and CSCI 4368 contiguously as the project spans the entire academic year.
Requisites: Requires prerequisite course of CSCI 4368 (minimum grade C-).

CSCI 4413 (3) Computer Security and Ethical Hacking
Teaches basic exploit design and development through hands-on experimentation and testing. Uses a controlled environment to give students a "playground" in which to test penetration skills that are normally not allowed on live networks.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5413
Requisites: Requires prerequisite course of CSCI 4273 (minimum grade C-).
Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 4444 (3) Algorithms and Data Structures for Analyzing DNA
Covers the basic concepts of genetics and genomics and how DNA analysis problems translate into computational problems. Covers core algorithms such as genome assembly, string matching, string indexing, and string set comparisons. Covers core data structures such as suffix trees and tries, FM index, and Bloom Filters.
Requisites: Requires prerequisite courses: (one of APPM 3650 or ASTR 2600 or CSCI 2270 or CSCI 2275 or INFO 2201 or PHYS 2600) and ((one of APPM 1350 or MATH 1300 or MATH 1310) or (APPM 1340 and APPM 1345)) (all minimum grade C-).

CSCI 4446 (3) Chaotic Dynamics
Explores chaotic dynamics theoretically and through computer simulations. Covers the standard computational and analytical tools used in nonlinear dynamics and concludes with an overview of leading-edge chaos research. Topics include time and phase-space dynamics, surfaces of section, bifurcation diagrams, fractal dimension and Lyapunov exponents.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5446 and ECEN 4423 and ECEN 5423
Requisites: Requires prerequisite course of (ASEN 1320 or CSCI 1300 or CSCI 1320 or CSCI 2275 or ECEN 1310) and (APPM 2350 or MATH 2400) (all minimum grade C-).
Recommended: Prerequisites PHYS 1120 and CSCI 3656 and (APPM 3310 or CSCI 2820 or MATH 2130 or MATH 2135 or MATH 3130 or MATH 3135).
Additional Information: Departmental Category: Numerical Computation

CSCI 4448 (3) Object-Oriented Analysis and Design
An applied analysis and design class that addresses the use of object-oriented techniques. Topics include domain modeling, use cases, architectural design and modeling notations. Students apply the techniques in analysis and design projects.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5448
Requisites: Requires prerequisite course of CSCI 3308 (minimum grade C-).
Additional Information: Departmental Category: Software Engineering

CSCI 4502 (3) Data Mining
Introduces basic data mining concepts and techniques for discovering interesting patterns hidden in large-scale data sets, focusing on issues relating to effectiveness and efficiency. Topics covered include data preprocessing, data warehouse, association, classification, clustering, and mining specific data types such as time-series, social networks, multimedia, and Web data.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5502 and CSPB 4502
Requisites: Requires prerequisite course of CSCI 2270 or CSCI 2275 (minimum grade C-).
Additional Information: Departmental Category: Artificial Intelligence

CSCI 4550 (3) Designing for Defense 1
Designing for Defense/Hacking for Defense is a national service program running at leading research universities across the country. Interdisciplinary teams¿chosen by competitive selection¿work on real-world national security challenges, in close contact with national security agencies. Teams employ the Lean Launchpad entrepreneurship methodology to develop engineering and business concepts to solve real-world challenges for special operations forces, the intelligence community, and other government agencies. Winning teams are eligible for real-world capital investment. The first semester of a two-course sequence. Students take CSCI 4550 in the fall and CSCI 4580 contiguously in the spring as the sequence spans the academic year.
Recommended: D4D is open to students from any discipline or major; Enrollment is limited; Application and one Info Session required; See Class Notes for course website and application link.

CSCI 4555 (3) Compiler Construction
Introduces the principles and techniques for compiling high-level programming languages to assembly code. Topics include parsing, instruction selection, register allocation, and compiling high-level features such as polymorphism, first-class functions, and objects. Students build a complete compiler for a simple language.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 5523 and ECEN 4553 and CSCI 5525
Requisites: Requires prerequisite course of CSCI 3155 (minimum grade C-).
Additional Information: Departmental Category: Programming Languages

CSCI 4576 (4) High-Performance Scientific Computing
Introduces computing systems, software and methods used to solve large-scale problems in science and engineering. Students use high-performance workstations and a supercomputer.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5576
Recommended: Prerequisite APPM 4600 or APPM 4650 or CSCI 3656 or MATH 4650 or MCEN 3030.
Additional Information: Departmental Category: Numerical Computation

CSCI 4580 (3) Designing for Defense 2
This course allows teams to continue their D4D journey from semester one (CSCI 4550), guiding students in launching a business entity that will deploy agile development tools to refine and enhance their first semester MVP, seek funding for that development work, deliver a functioning solution to their sponsor, and extract real value for the members of the business unit. The second semester of a two-course sequence. Students take CSCI 4550 in the fall and CSCI 4580 contiguously in the spring as the sequence spans the academic year.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5580 and CYBR 5580 and ASEN 5580
Requisites: Prerequisite of CSCI 4550 (minimum grade B).

CSCI 4616 (3) Introduction to Virtual Reality
Introduces students to the field of virtual reality (VR). Covers the historical development of virtual reality technologies and virtual reality as a research field, the mathematics of 3D coordinate systems, fundamental principles, algorithms, and design patterns in developing interactive virtual environments, the perceptual science behind mixed reality technologies, and libraries and tools for creating VR experiences.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 4616
Requisites: Requires prerequisite course of CSCI 2270 or CSCI 2275 (minimum grade C-).

CSCI 4622 (3) Machine Learning
Introduces students to tools, methods, and theory to construct predictive and inferential models that learn from data. Focuses on supervised machine learning techniques including practical and theoretical understanding of the most widely used algorithms (decision trees, support vector machines, ensemble methods, and neural networks). Emphasizes both efficient implementation of algorithms and understanding of mathematical foundations.
Equivalent - Duplicate Degree Credit Not Granted: CSPB 4622
Requisites: Requires prereqs (CSCI2270 or 2275) (1 of APPM2360/3310,CSCI2820,MATH2130/2135) (1 of CSCI2824,ECEN2703,APPM3170,MATH2001) (1 of APPM3570,CHEN3010,CSCI 3022,CVEN 3227,ECEN 3810,ECON 3818,MATH 3510/45 (all min C-)
Additional Information: Departmental Category: Artificial Intelligence

CSCI 4722 (3) Computer Vision
Explores algorithms that can extract information about the world from images or sequences of images. Topics covered include: imaging models and camera calibration, early vision (filters, edges, texture, stereo, optical flow), mid-level vision (segmentation, tracking), vision-based control and object recognition.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5722
Requisites: Requires prerequisite courses of (APPM 2360 or APPM 3310 or CSCI 2820 or MATH 2130 or MATH 2135) and CSCI 3104 (all minimum grade C-).
Recommended: Prerequisite CSCI 3022 or APPM 3570 or STAT 4520 or STAT 4000 or CHEN 3010 or CVEN 3227 or MATH 3510 or MATH 4510 or ECEN 3810 or ECON 3818.

CSCI 4753 (3) Computer Performance Modeling
Presents a broad range of system measurement and modeling techniques, emphasizing applications to computer systems. Covers topics including system measurement, workload characterization and analysis of data; design of experiments; queuing theory and queuing network models; and simulation.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5753 and ECEN 4753 and ECEN 5753
Requisites: Requires prerequisites of (APPM 1360 or MATH 2300) and CSCI 3753 (all minimum grade C-).
Recommended: Prerequisite a course in statistics.
Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 4802 (1) Data Science Team Companion Course
Gives students hands-on experience applying data science techniques and machine learning algorithms to real-world problems. Students work in small teams on internal challenges, many of which will be sponsored by local companies and organizations and will represent the university in larger teams for external challenges at the national and global level, such as those hosted by Kaggle. Students will be expected to participate in both internal and external challenges, attend meetings and present short presentations to the group when appropriate.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5802
Repeatable: Repeatable for up to 3.00 total credit hours.
Requisites: Requires a prerequisite course of (APPM 3310, CSCI 2820, MATH 2130, MATH 2135) OR (APPM 3570, CHEN 3010, CSCI 3022, CVEN 3227, ECEN 3810, ECON 3818, MATH 3510, MATH 4510, MCEN 3047, STAT 3100, STAT 4000, STAT 4520) (min grade C-).
Additional Information: Departmental Category: Artificial Intelligence

CSCI 4809 (3) Computer Animation
Develops a firm understanding of the general principles of computer animation. Lectures cover the creation of models, materials, textures, surfaces, and lighting. Path and key frame animation, particle dynamics, and rendering are introduced. Students are assigned a number of animation tutorials to carry out.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 5809 and ATLS 4809 and CSCI 5809
Additional Information: Departmental Category: Graphics

CSCI 4830 (1-4) Special Topics in Computer Science
Covers topics of interest in computer science at the senior undergraduate level. Content varies from semester to semester. Only 9 credit hours from CSCI 4830 and/or CSCI 4831 can count toward Computer Science BS or BA.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Requires prerequisite course of CSCI 2400 or ECEN 2360 or ECEN 3350 (minimum grade C-).
Additional Information: Departmental Category: General Computer Science

CSCI 4831 (1-4) Special Topics in Algorithms
Covers topics of interest in computer science at the upper-division undergraduate level. Content varies from semester to semester. Only 9 credit hours from CSCI 4830 and/or CSCI 4831 can count toward Computer Science BS or BA.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Requires prerequisite courses of CSCI 3104 and (APPM 3310 or CSCI 2820 or MATH 2130 or MATH 2135) (all minimum grade C-).
Additional Information: Departmental Category: General Computer Science

CSCI 4849 (3) Input, Interaction, and Accessibility
Explores input and interaction techniques with an emphasis on universal design and alternative interfaces. Students explore traditional input methods such as keyboard and mouse input, and alternative techniques such as voice and eye gaze. Students conduct performance evaluations of existing techniques, and prototype new interaction methods. Students design technologies to support people with varying abilities and disabilities.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5849
Requisites: Requires prerequisite of CSCI 3002 (minimum grade C-).

CSCI 4897 (3) Computational and Mathematical Modeling of Infectious Diseases
Explores the ways we model infectious diseases using math and computing, from the dynamic spread of infectious diseases between humans, to a pathogen's growth within the body. Learning goals include (i) gaining a mastery of both classic and modern infectious disease models (ii) learning about a variety of infectious diseases, and (iii) engaging with the ethics of infectious disease modeling. Requires beginner or advanced-beginner skill in Python or R.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5897
Requisites: Prereqs:(One of MATH1300/1310/APPM1345/50) (One of APPM3650/CSCI2270/2275/INFO2201) (One of APPM3570/CHEN3010/CSCI3022/CVEN3227/EBIO4410/ECEN3810/ECON3818/IPHY3280/MATH3510/4510/4520/MCDB3450/MCEN3047/PSYC2111/STAT2600/3100/4000/4520) min C-
Recommended: Prerequisites Calculus 2 and Intermediate skill in Python or R.

CSCI 4900 (1-3) Upper Division, Undergraduate Level Independent Study
Provides opportunities for independent study at the upper-division undergraduate level. Students work on a small research problem. Department consent required.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Requires prerequisite course of ASEN 1320 or CSCI 1300 or CSCI 1320 or CSCI 2275 (all minimum grade C-).
Additional Information: Departmental Category: General Computer Science

CSCI 4950 (2-4) Senior Thesis
Provides an opportunity for senior computer science majors to conduct exploratory research in computer science as an option for the capstone requirement. Department enforced prerequisites: 35 hours of Computer Science coursework including Foundation courses, Upper-Division writing, CS GPA 3.0. Department consent required, contact academic advisor for details. Senior Capstone courses are optional for BA students. BA students interested in taking this course should contact their advisor early in their major.
Repeatable: Repeatable for up to 8.00 total credit hours.
Requisites: Requires a prerequisite or corequisite course of CSCI 3100 (minimum grade C-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior).
Additional Information: Departmental Category: General Computer Science

CSCI 4960 (2-4) Computer Science Honors Thesis
Provides an opportunity for senior Computer Science BA majors to conduct exploratory research in computer science and complete an Honors Thesis as part of the Arts and Sciences Honors Program. Department-enforced prerequisites: 35 hours of Computer Science coursework including Foundation courses, Upper-Division writing, CS GPA 3.0. Department consent required, contact academic advisor for details.
Repeatable: Repeatable for up to 8.00 total credit hours.
Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior).
Additional Information: Departmental Category: General Computer Science

CSPB 1000 (1) Computer Science as a Field of Work and Study
Introduces curriculum, learning techniques, time management and career opportunities in Computer Science. Includes presentations from alumni and others with relevant educational and professional experience.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 1000
Requisites: Restricted to students in the Applied Computer Science Post-baccalaureate program (CSAP) only.

CSPB 1300 (4) Computer Science 1: Starting Computing
Teaches techniques for writing computer programs in higher level programming languages to solve problems of interest in a range of application domains. Appropriate for students with little to no experience in computing or programming.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 1310 CSCI 1300
Requisites: Restricted to students in the Applied Computer Science Post-baccalaureate program (CSAP) only.

CSPB 2270 (4) Computer Science 2: Data Structures
Studies data abstractions (e.g., stacks, queues, lists, trees, graphs, heaps, hash tables, priority queues) and their representation techniques (e.g., linking, arrays). Introduces concepts used in algorithm design and analysis including criteria for selecting data structures to fit their applications. Knowledge of C++ is highly recommended.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 2275 CSCI 2270
Requisites: Requires prerequisite course of (ASEN 1320 minimum grade B-) or (CSCI 1300 or CSCI 1310 or CSPB 1300 or ECEN 1310 (minimum grade C-). Restricted to students in the Applied Computer Science Post-baccalaureate program (CSAP) only.

CSPB 2400 (4) Computer Systems
Covers how programs are represented and executed by modern computers, including low-level machine representations of programs and data, an understanding of how computer components and the memory hierarchy influence performance.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 2400
Requisites: Requires corequisite course of CSPB 2270 or CSCI 2270 or CSCI 2275. Restricted to students in the Applied Computer Science Post-baccalaureate program (CSAP) only.

CSPB 2820 (3) Linear Algebra with Computer Science Applications
Introduces the fundamentals of linear algebra in the context of computer science applications. Includes vector spaces, matrices, linear systems, and eigenvalues. Includes the basics of floating point computation and numerical linear algebra.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 2820
Requisites: Requires prerequisite courses of CSPB 2824 or CSCI 2824 or APPM 1345 or APPM 1350 or MATH 1300 or MATH 1310 (all minimum grade C-). Restricted to students in the Applied Computer Science Post-baccalaureate program (CSAP) only.

CSPB 2824 (3) Discrete Structures
Covers foundational materials for computer science that is often assumed in advanced courses. Topics include set theory, Boolean algebra, functions and relations, graphs, propositional and predicate calculus, proofs, mathematical induction, recurrence relations, combinatorics, discrete probability. Focuses on examples based on diverse applications of computer science.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 2824
Requisites: Requires prerequisite or corequisite course of ASEN 1320 or CSCI 1300 or CSPB 1300 or ECEN 1310 (all minimum grade C-). Restricted to students in the Applied Computer Science Post-baccalaureate program (CSAP) only.

CSPB 3022 (3) Introduction to Data Science with Probability and Statistics
Introduces students to the tools, methods and theory behind extracting insights from data. Covers algorithms of cleaning and munging data, probability theory and common distributions, statistical simulation, drawing inferences from data, and basic statistical modeling.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 3022
Requisites: Requires prereq or coreq of (ASEN 1320 or CSCI 1300 or CSPB 1300 or ECEN 1310) (APPM 3170 or CSCI 2824 or CSPB 2824 or ECEN 2703 or MATH 2001) (min grade C-). Restricted to students in the Applied Computer Science Post-baccalaureate program (CSAP) onl

CSPB 3104 (4) Algorithms
Covers the fundamentals of algorithms and various algorithmic strategies, including time and space complexity, sorting algorithms, recurrence relations, divide and conquer algorithms, greedy algorithms, dynamic programming, linear programming, graph algorithms, problems in P and NP, and approximation algorithms.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 3104
Requisites: Requires prereq course (APPM 3170 or CSCI 2824 or CSPB 2824 or ECEN 2703 or MATH 2001) prereq or coreq course of (CSCI 2270 or CSPB 2270) (all min grade C-). Restricted to students in the Applied Computer Science Post-baccalaureate program (CSAP) only

CSPB 3112 (1) Professional Development in Computer Science
Supports students in developing professional skills and practices in computing, including: preparing for technical and behavioral interviews, professional networking, mastering new technologies not addressed in the curriculum, presenting work, the role of graduate study, and exploring career and research directions.
Repeatable: Repeatable for up to 2.00 total credit hours.
Requisites: Requires prerequisite course of CSPB 2270 or CSCI 2270 or CSCI 2275 (minimum grade C-). Restricted to students in the Applied Computer Science Post-baccalaureate program (CSAP) only.

CSPB 3155 (4) Principles of Programming Languages
Studies principles governing the design and analysis of programming languages and their underlying execution models. Explores values, scoping, recursion, higher-order functions, type systems, control structures, and objects. Introduces formal semantics as a framework for understanding programming features. Introduces advanced programming concepts such as functional programming, higher-order functions, immutable values and structures, inductive types, functors, continuation-passing; and object-oriented programming using inheritance, generics and covariance/contravariance in a functional programming language such as Scala.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 3155
Requisites: Requires prerequisite courses of (CSCI 2270 or CSPB 2270 or CSCI 2275) and (APPM 3170 or CSCI 2824 or CSPB 2824 or ECEN 2703 or MATH 2001) (all min grade C-). Restricted to students in the Applied Computer Science Post-baccalaureate program (CSAP) only.

CSPB 3202 (3) Introduction to Artificial Intelligence
Surveys artificial intelligence techniques of search, knowledge representation and reasoning, probabilistic inference, machine learning, and natural language. Knowledge of Python is strongly recommended.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 3202
Requisites: Req. prereq of (CSPB/CSCI2270 or CSCI2275) (APPM3170 or CSPB/CSCI2824 or ECEN2703 or MATH2001) one of: (APPM3570/4570/CHEN3010/CSCI3022/CSPB3022/CVEN3227/ECEN3810/ECON3818/MATH3510/4510/STAT4520) (all min C-). Rstr to AppCompSci post-bac(CSAP).

CSPB 3287 (3) Design and Analysis of Database Systems
Introduces the fundamental concepts of database requirements analysis, database design, and database implementation with emphasis on the relational model and the SQL programming language. Introduces the concepts of Big Data and NoSQL systems.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 3287
Requisites: Requires prerequisite course of CSCI 2270 or CSCI 2275 or CSPB 2270 (minimum grade C-). Restricted to students in the Applied Computer Science Post-baccalaureate program (CSAP) only.

CSPB 3302 (3) Introduction to Robotics
Introduces students to fundamental concepts in autonomous robotics: mechanisms, locomotion, kinematics, control, perception and planning. Consists of lectures and lab sessions that are geared toward developing a complete navigation stack on a miniature mobile robotic platform.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 3303 and CSCI 3302
Requisites: Requires prereqs of (CSCI 2270 or CSPB 2270 or CSCI 2275) (APPM 3170 or CSCI 2824 or CSPB 2824 or ECEN 2703 or MATH 2001) (CSCI 2820 or CSPB 2820)(all min grade C-). Restricted to students in the Applied Computer Science Post-bac program(CSAP) only

CSPB 3308 (3) Software Development Methods and Tools
Covers tools and techniques for successful software development with a strong focus on best practices used in industry. Students work in small teams to complete a semester-long application development project. Students learn front-end design and construction using HTML & CSS, back-end database design and construction, and full-stack integration. Students gain exposure to agile methodologies, web services, distributed version control, requirements definition, automated integration testing, and cloud-based application deployment.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 3308
Requisites: Requires prerequisite or corequisite course of CSPB 2270 or CSCI 2270 or CSCI 2275 (minimum grade C-). Restricted to students in the Applied Computer Science Post-baccalaureate program (CSAP) only.

CSPB 3403 (4) Introduction to CyberSecurity for a Converged World
Introduces core concepts in cybersecurity including confidentiality, integrity, authentication, risk management, and adversarial thinking. The concepts will be applied to both traditional information technology (IT) systems and cyber physical systems (CPS). At the conclusion of the course students should have a solid foundation in cybersecurity and hands-on experience.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 3403
Requisites: Requires prerequisite course of CSCI 2400 or ECEN 2360 or ECEN 3350 (minimum grade C-).

CSPB 3702 (3) Cognitive Science
Introduces cognitive science, drawing from psychology, philosophy, artificial intelligence, neuroscience, and linguistics. Studies the linguistic relativity hypothesis, consciousness, categorization, linguistic rules, the mind-body problem, nature versus nurture, conceptual structure and metaphor, logic/problem solving and judgment. Emphasizes the nature, implications and limitations of the computational model of mind.
Equivalent - Duplicate Degree Credit Not Granted: INFO 3702 and LING 3005 and PHIL 3310 and PSYC 3005 and SLHS 3003 and CSCI 3702
Requisites: Requires prerequisite or corequiste of ASEN 1320 or CSCI 1300 or CSCI 2275 or CSPB 1300 or ECEN 1310 (minimum grade C-). Restricted to students in the Applied Computer Science Post-baccalaureate program (CSAP) only.
Recommended: Prerequisites LING 2000 or PHIL 2440 or PSYC 2145.

CSPB 3753 (4) Design and Analysis of Operating Systems
Analyzes the software that extends hardware to provide a computing environment, including the role of linkers, file systems, resource sharing, security and networking. Studies the history of operating system organization and design and their influence on security, functionality and reliability.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 3753
Requisites: Requires prerequisite courses of (CSCI 2270 or CSPB 2270 or CSCI 2275) and (CSCI 2400 or CSPB 2400 or ECEN 3350) (all minimum grade C-). Restricted to students in the Applied Computer Science Post-baccalaureate program (CSAP) only.

CSPB 3832 (3) Natural Language Processing
Explores the theoretical and practical issues that arise in getting computers to perform useful and interesting tasks with human languages. Topics include information extraction, dialog systems and machine translation. Focus is on the use of language data and machine learning algorithms to build robust systems.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 3832
Requisites: Requires prerequisite courses of (CSPB 2270 or CSCI 2270 or CSCI 2275) and (CSPB 2824 or CSCI 2824 or MATH 2001 or ECEN 2703 or APPM 3170) (all minimum grade C-). Restricted to students in the Applied Computer Science Post-bacc program (CSAP) only.

CSPB 4122 (3) Information Visualization
Studies interactive visualization techniques that help people analyze data. This course introduces design, development, and validation approaches for interactive visualizations with applications in various domains, including the analysis of text collections, software visualization, network analytics, and the biomedical sciences. It covers underlying principles, provides an overview of existing techniques, and teaches the background necessary to design innovative visualizations.
Requisites: Requires prerequisite or corequisite courses CSCI 1300 or CSPB 1300 and CSCI 2824 or CSPB 2824 (all minimum grade C-). Restricted to students in the Applied Computer Science Post-baccalaureate program (CSAP) only.

CSPB 4502 (3) Data Mining
Introduces basic data mining concepts and techniques for discovering interesting patterns hidden in large-scale data sets, focusing on issues relating to effectiveness and efficiency. Topics covered include data preprocessing, data warehouse, association, classification, clustering, and mining specific data types such as time-series, social networks, multimedia, and Web data.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5502 and CSCI 4502
Requisites: Requires prerequisite course of CSPB 2270 or CSCI 2270 or CSCI 2275 (minimum grade C-). Restricted to students in the Applied Computer Science Post-baccalaureate program (CSAP) only.

CSPB 4622 (3) Machine Learning
Introduces students to tools, methods, and theory to construct predictive and inferential models that learn from data. Focuses on supervised machine learning techniques including practical and theoretical understanding of the most widely used algorithms (decision trees, support vector machines, ensemble methods, and neural networks). Emphasizes both efficient implementation of algorithms and understanding of mathematical foundations.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 4622
Requisites: Prereqs: (CSCI/CSPB2270 or CSCI2275)(1 of APPM3310,CSCI/CSPB2820,MATH2130/2135)(1 of CSCI2824,CSPB2824,ECEN2703,APPM3170,MATH2001) (1 of APPM3570,CSCI/CSPB3022,CVEN3227,ECEN3810,ECON3818,MATH3510,MCEN3047,STAT3100/4000 (all min C-). CSAP students only

CSPB 4830 (1-4) Special Topics in Applied Computer Science
Covers topics of interest in applied computer science at the undergraduate level. Content varies from semester to semester.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to students in the Applied Computer Science Post-baccalaureate program (CSAP) only.

CSPB 4900 (1-3) Upper Division, Undergraduate Level Independent Study
Provides opportunities for independent study at the upper-division undergraduate level. Students work on a small research problem or tutor lower-division computer science students. Department consent required.
Repeatable: Repeatable for up to 3.00 total credit hours.
Requisites: Requires prerequisite course of CSPB 1300 or CSCI 1300 (minimum grade C-).

Computer Science - Bachelor of Arts (BA)

Computer science is an exciting and challenging field that has impact on many parts of our lives. Computer scientists craft the technologies that enable the digital devices we use every day. They develop the large-scale software that powers business and industry, and they advance the computational techniques and write the software that supports scientists in their study of the world around us. They create the software that social scientists use to identify and analyze patterns in the behavior of social groups and human behavior in social networks and the applications that humanists and linguists use to research language development. Many new applications of computing technology remain to be discovered. Indeed, computing will be at the heart of future revolutions in business, science and society. Students who study computer science now will be at the forefront of those important advances.

Computer science offers study in the fields of computer systems, cyber security, robotics, algorithm design, artificial intelligence, software and web engineering, programming languages, database design, human-computer interaction, machine learning, data science, numerical and parallel computing, speech and language processing and theoretical computer science.

Computer science is concerned with how computers are constructed, how they store and process data, how they are used in problem solving and how the quality of those solutions is assessed. It is about the science of creating software for a variety of users. It is about understanding how that software interacts with the hardware on which it is run. Computer science goes well beyond the machine to the study of how people interact with the technologies around them. Applications of computer science reach far and wide.

For more information, visit the department's BA Degree (https://www.colorado.edu/cs/academics/undergraduate-programs/bachelor-arts/bachelor-arts-degree-requirements/) webpage.

A student may not earn both the BS and BA in computer science. A student may not earn both a bachelor's degree in computer science and the minor in computer science from CU Boulder.

Requirements

The degree provides considerable freedom in the selection of specific courses to fulfill major requirements, allowing students to tailor the degree to their individual needs and interests.

For more information, visit the department's BA Degree (https://www.colorado.edu/cs/academics/undergraduate-programs/bachelor-arts/bachelor-arts-degree-requirements/) webpage.

Students earning a BA in Computer Science from the College of Engineering and Applied Science must meet the graduation requirements (https://www.colorado.edu/engineering-advising/get-your-degree/graduation-requirements/) as laid out by the College of Engineering and Applied Science. A student may not earn both a BA degree in computer science and a BS degree in computer science from CU Boulder. A student may not earn a bachelor's degree in computer science and a minor in computer science from CU Boulder.

Note: Prior to the 2020–2021 academic year, this program was offered by the College of Arts & Sciences. **Students who declared this program prior to the 2020–2021 academic year** should refer to the requirements as defined during the academic year the major was declared (see the University Catalog archive (p. 2834)).

Required Courses and Credits

General Education: Students must complete General Education course work which totals about 42–48 credit hours. These credits are in addition to the required courses for the CS major listed below. Students will complete one lower division and one upper division writing course, 12 credit hours of Arts & Humanities, 12 credit hours of Social Sciences, 12 credit hours of Natural Science, 3 credit hours of Diversity with U.S. Perspective, and 3 credit hours of Diversity with Global Perspective. The courses that fulfill the Diversity requirement are allowed to double count with other areas of General Education as appropriate by the assigned course attributes. Writing courses approved by the College of Engineering and Applied Science can be counted for the lower and upper-division writing requirements in the General Education writing categories. Students can use courses from their General Education to also count for their additional area of study or major requirements.

Students are required to pursue an Additional Area of Study as part of earning a BA in computer science. The additional area can be any available minor or certificate from any of CU Boulder's colleges and schools (Arts & Sciences, Business, EAS, CMDI, Education, Music). Students completing a dual degree (by pursuing another major) fulfill the Additional Area of Study requirement with those plans.

Any Additional Area of Study that is not part of a dual degree must be at least 15 credit hours. Programs that do not meet this requirement will be considered by petition and students will be required to add additional coursework.

The minimum required hours to complete the CSEN-BA degree is 120 total credit hours.

Code	Title	Credit Hours
Foundations Courses		**23**
CSCI 1300	Computer Science 1: Starting Computing	4
CSCI 2270	Computer Science 2: Data Structures	4
or CSCI 2275	Programming and Data Structures	
CSCI 2400	Computer Systems	4
CSCI 3104	Algorithms	4
CSCI 3155	Principles of Programming Languages	4

Additional Area of Study		
Approved minor, certificate or dual degree program at CU Boulder		15

Recommended Four-Year Plan of Study

This four-year plan of study is based on students starting at the Calculus 1 level. This plan is flexible and CSCI course substitutions in year two based on starting MATH or other requirements should be discussed with an academic advisor.

General Education Distribution and Diversity requirements (https://www.colorado.edu/artsandsciences/undergraduate/degree-requirements/general-education-requirements/) can be met with courses for the Additional Area of Study. Some additional areas of study may exceed 120 total credit hours.

For more information on required courses including all options for Calculus, additional MATH, PHIL and CSEN-BA Core and Upper Division electives, see the Requirements tab. Detailed information is also available on the BA Degree Requirements (https://www.colorado.edu/cs/current-students/undergraduate-students/ba-degree/ba-degree-requirements/) webpage.

Year One

Fall Semester		Credit Hours
CSCI 1300	Computer Science 1: Starting Computing	4
MATH 1300 or APPM 1350	Calculus 1 or Calculus 1 for Engineers	4-5
Logic or Ethics Course (Logic recommended prior to Discrete Structures, also counts toward Gen Ed)		3
General Education Distribution Course (example: Social Science or Arts & Humanities)		3 - 4
COEN 1500	CEAS First Year Seminar (free elective)	1
	Credit Hours	**15-17**
Spring Semester		
CSCI 2270 or CSCI 2275	Computer Science 2: Data Structures or Programming and Data Structures	4
MATH 2300 or APPM 1360	Calculus 2 or Calculus 2 for Engineers	4-5
Logic or Ethics Course (Logic recommended prior to Discrete Structures, also counts toward Gen Ed)		3

General Education Skills course (example: Lower-division Written Communication)		3
	Credit Hours	**14-15**
Year Two		
Fall Semester		
CSCI 2400	Computer Systems	4
CSCI 2824	Discrete Structures	3
General Education Distribution course (example: Arts & Humanities)		3
Additional Area of Study Course		3
General Education Distribution course (example: Natural Science)		3 - 4
	Credit Hours	**16-17**
Spring Semester		
CSCI 3104	Algorithms	4
CSCI 3308	Software Development Methods and Tools	3
Linear Algebra, Probability or Statistics course		3-4
Additional Area of Study		3
Additional Area of Study		3
	Credit Hours	**16-17**
Year Three		
Fall Semester		
CSCI 3155	Principles of Programming Languages	4
CSCI Core course or CSCI Upper-division Elective		3-4
Additional Area of Study		3
Upper-divison General Education Skills course (example: Upper-division Written Communication)		3
General Education Distribution course (example: Natural Sciences with or without lab)		3-5
	Credit Hours	**16-19**
Spring Semester		
CSCI Core course or CSCI Upper-division Elective		3-4
CSCI Core course or CSCI Upper-division Elective		3-4
Additional Area of Study		3
General Education Distribution/Diversity course (example: Social Sciences/Global Perspective)		3
Free Elective		4
	Credit Hours	**16-18**
Year Four		
Fall Semester		
CSCI Core course or CSCI Upper-division Elective		3-4
CSCI Upper-division Elective or Capstone-1		3-4
Additional Area of Study or General Education Distribution course		3
Additional Area of Study or General Education Distribution course		3
General Education Distribution course		3
	Credit Hours	**15-17**
Spring Semester		
CSCI Upper-division Elective		3-4
CSCI Upper-division Elective or Capstone-2		3-4
Additional Area of Study or General Education Distribution course		3
Additional Area of Study or General Education Distribution/ Diversity course (example: Social Sciences/US Perspective)		3
	Credit Hours	**12-14**
	Total Credit Hours	**120-134**

Learning Outcomes

By the completion of the program, students will be able to:

- Analyze a complex computing problem and to apply principles of computing and other relevant disciplines to identify solutions.
- Design, implement and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline.
- Communicate effectively in a variety of professional contexts.
- Recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles.
- Function effectively as a member or leader of a team engaged in activities appropriate to the program's discipline.
- Apply computer science theory and software development fundamentals to produce computing-based solutions.

Program Educational Objectives

Within 3–5 years after graduating with a Bachelor of Arts degree in computer science, our graduates will be:

- *Broadly educated and versatile*. Able to draw upon foundational knowledge, learn, adapt and successfully bring to bear analytical and computational approaches on changing societal and technological challenges.
- *Inspiring and collaborative*. Are leaders and responsible citizens whose strengths come from an ability to draw on and contribute to diverse teams, expertise and experiences.
- *Innovative*. Drive scientific and societal advancement through technological innovation and entrepreneurship.
- *Engaged*. Are engaged with the University of Colorado, the state of Colorado and technical and scientific professional communities.

Bachelor's–Accelerated Master's Degree Program(s)

The bachelor's–accelerated master's (BAM) degree program options offer currently enrolled CU Boulder undergraduate students the opportunity to receive a bachelor's and master's degree in a shorter period of time. Students receive the bachelor's degree first but begin taking graduate coursework as undergraduates (typically in their senior year).

Because some courses are allowed to double count for both the bachelor's and the master's degrees, students receive a master's degree in less time and at a lower cost than if they were to enroll in a stand-alone master's degree program after completion of their baccalaureate degree. In addition, staying at CU Boulder to pursue a bachelor's–accelerated master's program enables students to continue working with their established faculty mentors.

Admissions Requirements

BA and MS in Computer Science

In order to gain admission to the BAM program named above, a student must meet the following criteria:

- Have a cumulative GPA of 3.50 or higher.
- Have completed all prerequisite courses with grades of B or better:

Code	Title	Credit Hours
CSCI 1300	Computer Science 1: Starting Computing	4
CSCI 2270	Computer Science 2: Data Structures	4
CSCI 2400	Computer Systems	4
CSCI 3104	Algorithms	4
CSCI 3155	Principles of Programming Languages (or CSCI 3753 Design and Analysis of Operating Systems)	4

- Students who do not meet the first two criteria, must have one letter of reference from a faculty member or your undergraduate academic advisor outlining why you should be considered. Your letter-writer should send their letter directly to gradadms@cs.colorado.edu.
- Have at least junior status within the bachelor's degree program.
- Students may submit their intent to apply during the term they are completing their final class from the list of prerequisites.

BA in Computer Science, MS in Computational Linguistics, Analytics, Search and Informatics

In order to gain admission to the BAM program named above, a student must meet the following criteria:

- Have a cumulative GPA of 3.50 or higher.
- Have completed all prerequisite courses with grades of B or better:

Code	Title	Credit Hours
CSCI 1300	Computer Science 1: Starting Computing	4
CSCI 2270	Computer Science 2: Data Structures	4
CSCI 3104	Algorithms	4
or CSCI 3022	Introduction to Data Science with Probability and Statistics	
LING 2000	Introduction to Linguistics	3
CSCI 3832/5832	Natural Language Processing	3
or CSCI 3202	Introduction to Artificial Intelligence	
or CSCI 4622	Machine Learning	
One of the following courses during the semester the student applies:		
LING 5430	Semantics and Pragmatics	
LING 5420	Morphology and Syntax	
LING 5030	Linguistic Phonetics	

- Have at least junior status within the bachelor's degree program.
- Provide two letters of reference, one written by the course instructor of the LING 5XXX course they are taking during the semester they apply, the other by the instructor from an upper-division course in computer science. Letters should be sent directly to the CLASIC Program Coordinator.

BA in Computer Science, MS in Data Science

In order to gain admission to the BAM program named above, a student must meet the following criteria:

- Have a cumulative GPA of 3.25 or higher.
- Have completed all prerequisite courses with grades of B or better:

Code	Title	Credit Hours
CSCI 1300	Computer Science 1: Starting Computing	4
CSCI 2270	Computer Science 2: Data Structures	4
CSCI 2400	Computer Systems	4
CSCI 3022	Introduction to Data Science with Probability and Statistics	3
CSCI 3308	Software Development Methods and Tools	3

- Have at least junior status within the bachelor's degree program.
- Students may submit their intent to apply during the term they are completing their final class from the list of prerequisites.

BA in Computer Science, MS in Network Engineering

In order to gain admission to the BAM program named above, a student must meet the following criteria:

- Have a cumulative GPA of 3.30 or higher
- Have completed the following prerequisite courses with a B or better. (If a student has transfer credit for one of the following courses, or has taken a commonly accepted course substitution for one of the above courses, their grade in that alternate course can be used to determine their eligibility for this BAM program.)

Code	Title	Credit Hours
CSCI 1300	Computer Science 1: Starting Computing	4
CSCI 2270	Computer Science 2: Data Structures	4
CSCI 2400	Computer Systems	4
CSCI 3308	Software Development Methods and Tools	3
CSCI 3753	Design and Analysis of Operating Systems	4

- Have at least junior status within the bachelor's degree program.
- Students may submit their intent to apply during the term they are completing their final class from the list of prerequisites.

Program Requirements

Students may take up to and including 12 hours while in the undergraduate program which can later be used toward the master's degree. However, only 6 credits may be double-counted toward the bachelor's degree and the master's master's degree. The remaining 6 credits must be reserved for the graduate degree only and not count toward the bachelor's degree requirements.

Students must apply to graduate with the bachelor's degree, and apply to continue with the master's degree, early in the semester in which the undergraduate requirements will be completed.

Please see the computer science accelerated master's webpage (https://www.colorado.edu/cs/academics/undergraduate-programs/accelerated-

masters-programs/computer-science-accelerated-masters/) for more information.

Computer Science - Bachelor of Science (BSCS)

The goal of the Department of Computer Science is to prepare students for an intriguing and satisfying career in computer science in industry, research or academia. The huge number of technical jobs and the continuing shortage of people to fill them mean that opportunities are great for today's computer science graduates when seeking career options or continuing on to graduate school.

The BS degree program in computer science emphasizes knowledge and awareness of computing at all levels, from circuits and computer architecture through operating systems and programming languages to large application systems; the theoretical and mathematical aspects of computing; the interdependence of hardware and software; and the challenge of large-scale software production and the engineering principles used to meet that challenge. Students may choose to take classes that touch on a wide variety of computing topics, or may select classes that focus on a particular specialization.

For more information, visit the department's BS Degree (https://www.colorado.edu/cs/academics/undergraduate-programs/bachelor-science/bachelor-science-degree-requirements/) webpage.

Requirements

Requirements for the BS degree in computer science include coursework in computer science, mathematics, natural science and the humanities and social sciences, as well as free elective coursework. Students must meet the graduation requirements of earning the BS degree as laid out by the College of Engineering and Applied Science (https://www.colorado.edu/engineering-advising/get-your-degree/graduation-requirements/).

The degree provides considerable freedom in the selection of specific courses to fulfill these requirements, allowing students to tailor the degree to their individual needs and interests.

A student may not earn both a BS degree in computer science and a BA degree in computer science (https://catalog.colorado.edu/undergraduate/colleges-schools/arts-sciences/programs-study/computer-science/computer-science-bachelor-arts-ba/) from CU Boulder. A student may not earn a bachelor's degree in computer science and a minor in computer science from CU Boulder.

For more information, visit the department's BS Degree (http://www.colorado.edu/cs/current-students/undergraduate-students/bs-degree/) webpage.

Course Requirements

Natural Science Electives		**8-9**
Additional natural science electives to reach 17 credits, number of credits needed may vary based on natural science sequence completed. See department website for list of approved courses.		
Free Electives		**13**
Additional coursework to bring cumulative total credit hours to at least 128, number of credits needed may vary based on options selected to complete other requirements.		
Total Credit Hours		**128-134**

1 For list of approved courses, see department website (https://www.colorado.edu/cs/academics/undergraduate-programs/bachelor-science/bachelor-science-degree-requirements/#Electives).

2 Complete the College's Humanities, Social Sciences and Writing (https://www.colorado.edu/engineering-advising/get-your-degree/degree-requirements/humanities-social-sciences-and-writing-requirements/) requirements (18 credits total) as specified.

Recommended Four-Year Plan of Study

First Year

Fall Semester		**Credit Hours**
APPM 1350	Calculus 1 for Engineers	4
CSCI 1000	Computer Science as a Field of Work and Study	1
CSCI 1300	Computer Science 1: Starting Computing	4
Natural Science Elective		3
Humanities and social sciences elective [1]		2
COEN 1500	CEAS First Year Seminar	1
	Credit Hours	**15**
Spring Semester		
APPM 1360	Calculus 2 for Engineers	4
CSCI 2270	Computer Science 2: Data Structures	4
PHYS 1110	General Physics 1	4
Logic		3
	Credit Hours	**15**

Second Year

Fall Semester		
CSCI 2400	Computer Systems	4
CSCI 2824	Discrete Structures (or other approved course)	3

CSCI 3308	Software Development Methods and Tools	3
Natural science elective		3
Ethics		3
	Credit Hours	**16**
Spring Semester		
CSCI 3104	Algorithms	4
CSCI Core course (1 of 5)		3
CSCI 2820	Linear Algebra with Computer Science Applications (or other approved course)	3
Natural science elective		3
Humanities and social sciences elective [1]		3
	Credit Hours	**16**
Third Year		
Fall Semester		
CSCI 3155	Principles of Programming Languages	4
CSCI Core course (2 of 5)		3
Computer Science Elective		3
CSCI 3022	Introduction to Data Science with Probability and Statistics (or other approved course)	3
College-approved writing course [2]		3
	Credit Hours	**16**
Spring Semester		
CSCI Core course (3 of 5)		4
Computer Science Elective		3
Natural science sequence option		5
Humanities and social sciences elective [1]		3
Free Elective		3
	Credit Hours	**18**
Fourth Year		
Fall Semester		
CSCI Senior Capstone I		4
CSCI Core course (4 of 5) [3]		3
Computer Science Elective		3
Humanities and social sciences elective [1]		3
Free elective		3
	Credit Hours	**16**
Spring Semester		
CSCI Senior Capstone II		4
CSCI Core course (5 of 5)		3
Computer Science Elective		3
Humanities and social sciences elective [1]		3
Free elective		3
	Credit Hours	**16**
	Total Credit Hours	**128**

1 Students may choose courses from the list of college-approved humanities and social sciences (HSS) electives (https://www.colorado.edu/engineering-advising/get-your-degree/degree-requirements/humanities-social-sciences-and-writing-requirements/).

2 Students may choose a course from the list of college-approved writing courses (https://www.colorado.edu/engineering-advising/get-your-degree/degree-requirements/humanities-social-sciences-and-writing-requirements/).

3 See department website (https://www.colorado.edu/cs/academics/undergraduate-programs/bachelor-science/bachelor-science-degree-requirements/#Electives) for Computer Science Electives

Learning Outcomes

By the completion of the program, students will be able to:

- Analyze a complex computing problem and to apply principles of computing and other relevant disciplines to identify solutions.
- Design, implement and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline.
- Communicate effectively in a variety of professional contexts.
- Recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles.
- Function effectively as a member or leader of a team engaged in activities appropriate to the program's discipline.
- Apply computer science theory and software development fundamentals to produce computing-based solutions.

Program Educational Objectives

Within 3–5 years after graduating with a Bachelor of Science degree in computer science, our graduates will be:

- *Broadly educated and versatile*. Able to draw upon foundational knowledge, learn, adapt and successfully bring to bear analytical and computational approaches on changing societal and technological challenges.
- *Inspiring and collaborative*. Are leaders and responsible citizens whose strengths come from an ability to draw on and contribute to diverse teams, expertise and experiences.
- *Innovative*. Drive scientific and societal advancement through technological innovation and entrepreneurship.
- *Engaged*. Are engaged with the University of Colorado, the state of Colorado and technical and scientific professional communities.

Bachelor's–Accelerated Master's Degree Program(s)

The bachelor's–accelerated master's (BAM) degree program options offer currently enrolled CU Boulder undergraduate students the opportunity to receive a bachelor's and master's degree in a shorter period of time. Students receive the bachelor's degree first but begin taking graduate coursework as undergraduates (typically in their senior year).

Because some courses are allowed to double count for both the bachelor's and the master's degrees, students receive a master's degree in less time and at a lower cost than if they were to enroll in a stand-alone master's degree program after completion of their baccalaureate degree. In addition, staying at CU Boulder to pursue a bachelor's–accelerated master's program enables students to continue working with their established faculty mentors.

The following BAM programs are available with the BS in computer science:

- BS and MS in Computer Science
- BS in Computer Science, MS in Computational Linguistics, Analytics, Search and Informatics
- BS in Computer Science, MS in Data Science
- BS in Computer Science, MS in Network Engineering

Admissions Requirements

BS and MS in Computer Science

In order to gain admission to the BAM program named above, a student must meet the following criteria:

- Have a cumulative GPA of 3.50 or higher.
- Have completed all prerequisite courses with grades of B or better:

Code	Title	Credit Hours
CSCI 1300	Computer Science 1: Starting Computing	4
CSCI 2270	Computer Science 2: Data Structures	4
CSCI 2400	Computer Systems	4
CSCI 3104	Algorithms	4
or CSCI 3434	Theory of Computation	
CSCI 3155	Principles of Programming Languages	4
or CSCI 3753	Design and Analysis of Operating Systems	

- Students who do not meet the first two criteria, must have one letter of reference from a faculty member or their undergraduate academic advisor outlining why they should be considered. The letter-writer should send their letter directly to gradadms@cs.colorado.edu.
- Have at least junior status within the bachelor's degree program.

BS in Computer Science, MS in Computational Linguistics, Analytics, Search and Informatics

In order to gain admission to the BAM program named above, a student must meet the following criteria:

- Have a cumulative GPA of 3.50 or higher.
- Have completed all prerequisites with grades of B or better:

Code	Title	Credit Hours
CSCI 1300	Computer Science 1: Starting Computing	4
CSCI 2270	Computer Science 2: Data Structures	4
CSCI 3104	Algorithms	4
or CSCI 3022	Introduction to Data Science with Probability and Statistics	
LING 2000	Introduction to Linguistics	3
CSCI 3832/5832	Natural Language Processing	3
or CSCI 3202/4622	Introduction to Artificial Intelligence	
One of the following during the semester the student applies:		
LING 5430	Semantics and Pragmatics	
LING 5420	Morphology and Syntax	
LING 5030	Linguistic Phonetics	

- Have at least junior status within the bachelor's degree program.
- Provide two letters of reference, one from the instructor of the LING 5XXX course they are taking during the semester they apply, the other from an instructor from an upper-division course in Computer Science. Letters should be sent directly to the CLASIC Program Coordinator.

BS in Computer Science, MS in Data Science

In order to gain admission to the BAM program named above, a student must meet the following criteria:

- Have a cumulative GPA of 3.250 or higher.
- Have completed all prerequisite courses with grades of B or better:

Code	Title	Credit Hours
CSCI 1300	Computer Science 1: Starting Computing	4
CSCI 2270	Computer Science 2: Data Structures	4
CSCI 2400	Computer Systems	4
CSCI 3022	Introduction to Data Science with Probability and Statistics	3
CSCI 3308	Software Development Methods and Tools	3

- Have at least junior status within the bachelor's degree program.
- Students may submit their intent to apply during the term they are completing their final class from the list of prerequisites.

BS in Computer Science, MS in Network Engineering

In order to gain admission to the BAM program named above, a student must meet the following criteria:

- Have a cumulative GPA of 3.300 or higher
- Have completed the following prerequisite courses with a B or better. (If a student has transfer credit for one of the following courses, or has taken a commonly accepted course substitution for one of the above courses, their grade in that alternate course can be used to determine their eligibility for this BAM program.)

Code	Title	Credit Hours
CSCI 1300	Computer Science 1: Starting Computing	4
CSCI 2270	Computer Science 2: Data Structures	4
CSCI 2400	Computer Systems	4
CSCI 3403	Introduction to CyberSecurity for a Converged World	4
CSCI 3753	Design and Analysis of Operating Systems	4

- Have at least junior status within the bachelor's degree program.
- Students may submit their intent to apply during the term they are completing their final class from the list of prerequisites.
- If a student not have at least a 3.3 cumulative GPA or required prerequisite courses, they must have one letter of reference from a faculty member or their academic advisor outlining why they should be considered. The letter-writer should send their letter directly to nteng@colorado.edu.

Program Requirements

Students may take up to and including 12 hours while in the undergraduate program which can later be used toward the master's

degree. However, only 6 credits may be double-counted toward the bachelor's degree and the master's degree. Students must maintain a 3.000 GPA while in the BAM program.

Students must apply to graduate with the bachelor's degree, and apply to continue with the master's degree, early in the semester in which the undergraduate requirements will be completed.

Please see the computer science accelerated master's webpage (https://www.colorado.edu/cs/academics/undergraduate-programs/accelerated-masters-programs/computer-science-accelerated-masters/) for more information.

Applied Computer Science - Post-Baccalaureate Bachelor of Science (BSACS)

The Applied Computer Science Program (CSPB) in the Department of Computer Science at CU Boulder is a unique academic program designed for adult students to obtain a second bachelor's degree in computer science. This post-baccalaureate program is an *online-only* degree for professionals with a prior non-computer science bachelor's degree.

Students who do not have a previous bachelor's degree from an accredited university or college should apply to one of the on-campus programs: the Computer Science - Bachelor of Arts (BA) (p. 937) or the Computer Science - Bachelor of Science (BS) (https://catalog.colorado.edu/undergraduate/colleges-schools/engineering-applied-science/programs-study/computer-science/computer-science-bachelor-science-bs/). Only the latter degree program is accredited by the Computing Accreditation Commission of ABET (http://www.abet.org/).

The second post-baccalaureate degree in computer science consists of 45 credit hours of computer science courses. Students can start any term—spring, summer or fall—and can study from anywhere in the world with an internet connection at any time of day.

For more information, visit the department's CS Online website (https://www.colorado.edu/cs/academics/online-programs/).

Course code for this program is CSPB.

Requirements

Program Requirements

Current curricular requirements may be found on the department's Applied Computer Science BS Degree Requirements (https://www.colorado.edu/cs/cs-online/cs-online-future-students/cs-online-curriculum/) website.

Students must complete 26 credits of required computer science courses, as well as a minimum of 19 credits of elective computer science courses. Currently, the courses below are offered online, with additional courses to be added in the future.

Note: The course prefix used for post-baccalaureate courses is **CSPB**. However, please be aware these courses are equivalent to the corresponding **CSCI** courses.

Required Courses and Credits

Code	Title	Credit Hours
Required Courses		
CSPB 1300	Computer Science 1: Starting Computing	4
CSPB 2270	Computer Science 2: Data Structures	4
CSPB 2400	Computer Systems	4
CSPB 2824	Discrete Structures	3
CSPB 3104	Algorithms	4
CSPB 3155	Principles of Programming Languages	4
CSPB 3308	Software Development Methods and Tools	3
Elective Courses		
CSPB 1000	Computer Science as a Field of Work and Study	1
CSPB 2820	Linear Algebra with Computer Science Applications	3
CSPB 3022	Introduction to Data Science with Probability and Statistics	3
CSPB 3112	Professional Development in Computer Science	1-3
CSPB 3202	Introduction to Artificial Intelligence	3
CSPB 3287	Design and Analysis of Database Systems	3
CSPB 3302	Introduction to Robotics	3
CSPB 3403	Introduction to CyberSecurity for a Converged World	4
CSPB 3702	Cognitive Science	3
CSPB 3753	Design and Analysis of Operating Systems	4
CSPB 4122	Information Visualization	3
CSPB 4253	Datacenter Scale Computing - Methods, Systems and Techniques	3
CSPB 4502	Data Mining	3
CSPB 4622	Machine Learning	3
CSPB 4830	Special Topics in Applied Computer Science	1-4
CSPB 4900	Upper Division, Undergraduate Level Independent Study	1-3

Program Residency and Transfer Credits

Students are required to complete a minimum of 45 credit hours of computer science courses in order to graduate. The residency requirement for the program is that at least 30 credit hours must be taken from CU Boulder courses in the program (online courses) after the student has matriculated in the program as an Applied Computer Science student.

Students who have taken on-campus computer science courses at CU Boulder can receive credit for a maximum of 15 credit hours before matriculating into the program. Due to the degree residency requirement transfer credit cannot be accepted after a student has begun the program.

Students who have taken computer science courses from other universities can transfer a maximum of 9 credit hours to the program assuming that the courses are equivalent to the courses in the program.

Courses that have been taken over 10 years ago may not be transferred to the program. These courses are evaluated on a case by case basis.

Plans of Study

Students may begin this program in the spring, summer or fall term and have the freedom to customize their pathway to completion.

The program recommends working students follow a 2–3 year plan. Post-baccalaureate students may petition to pursue an accelerated pathways. However, they require *significant* time commitments, and program approval. Once accepted into the program, students are encouraged to speak with their advisor to discuss options and whether an accelerated pathway is right for them.

Visit the Post-Baccalaureate website (https://www.colorado.edu/cs/cs-online/cs-online-future-students/pathways-completion/) to learn more about pathways to completion.

Learning Outcomes

Program Educational Objectives

The post-baccalaureate BS program aims to produce alumni that, within three to five years after graduation:

- Are prepared to be valued individual contributors in a software-oriented organization, to be programmers and designers in an entrepreneurial pursuit, to lead small projects and generally begin preparation for a management career, or to succeed in rigorous postgraduate programs.
- Are able to focus their careers on pure computer science technology or to bring computer science expertise to a companion discipline.
- Are prepared, where appropriate, to specialize in a broad spectrum of computer science sub-disciplines, ranging across formal computer science (e.g., computational science, bioinformatics and theory), cognitive science (e.g., human/machine learning, human-computer interaction, collaborative work and human language technologies) and core computing (e.g., systems, networks and software engineering).

Student Outcomes

The post-baccalaureate BS degree program has as its primary educational outcome the production of students who have strong skills in computing and information technology that can be applied within a variety of business or research contexts, skills that allow these students to achieve rewarding careers in a variety of disciplines.

By the completion of the program, the post-baccalaureate BS degree program aims to produce students who will be able to:

- Analyze a complex computing problem and to apply principles of computing and other relevant disciplines to identify solutions.
- Design, implement and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline.
- Communicate effectively in a variety of professional contexts.
- Recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles.
- Function effectively as a member or leader of a team engaged in activities appropriate to the program's discipline.
- Apply computer science theory and software development fundamentals to produce computing-based solutions.

Post-baccalaureate Accelerated Master's Degree Program(s)

The post-baccalaureate–accelerated master's (PBAM) degree program options offer currently enrolled CU Boulder undergraduate students the opportunity to receive a bachelor's and master's degree in a shorter period of time. Students receive the post-bacc degree first, but begin taking graduate coursework as undergraduates (typically two to three semesters before graduation). Because some courses are allowed to double count for both the bachelor's and the master's degrees, students receive a master's degree in less time and at a lower cost than if they were to enroll in a stand-alone master's degree program after completion of their baccalaureate degree. Post-bacc students should discuss the requirements of the program carefully with their advisor, as there are both financial and relocation impacts to being accepted to the PBAM program.

The following PBAM programs are available with the BS in Applied Computer Science:

- BS in Applied Computer Science, MS in Computational Linguistics, Analytics, Search and Informatics
- BS in Applied Computer Science, MS in Computer Science
- BS in Applied Computer Science, MS in Data Science
- BS in Applied Computer Science, MS in Network Engineering

Admissions Requirements

BS in Applied Computer Science, MS in Computational Linguistics, Analytics, Search and Informatics

- Have a cumulative GPA of 3.50 or higher.
- Have completed all prerequisite courses with grades of B or better: CSPB 1300, CSPB 2270, CSPB 3104 (or CSPB 3022), LING 2000, CSCI 3832/CSCI 5832 (or CSPB 3202 or CSCI 4622) and one of the following during the semester they apply: LING 5430, LING 5420 or LING 5030.
- Have completed at least 15 credits in CSPB courses at CU Boulder.
- Provide two letters of reference, one written by the course instructor of the LING 5XXX course they are taking during the semester they apply, the other by the instructor from an upper division course in Computer Science. Letters should be sent directly to the CLASIC Program Coordinator.

BS in Applied Computer Science, MS in Computer Science

In order to gain admission to the PBAM program named above, a student must meet the following criteria:

- Have a cumulative GPA of 3.50 or higher.
- Have completed all prerequisite courses with grades of B or better: CSPB 1300, CSPB 2270, CSPB 2400, CSPB 3104 and CSPB 3155 (or CSCI 3753)
- Students who do not meet the first two criteria, must have one letter of reference from a faculty member or their undergraduate academic advisor outlining why they should be considered. The letter-writer should send their letter directly to gradadms@cs.colorado.edu (p. 16).
- Have three semesters remaining in the bachelor's degree program.
- Students who are interested in applying to the **research-based MS option**, must provide a letter of support from the faculty with whom

they wish to do their research. (Upload that letter with the department application.)
- Graduate work is expected to be completed on the Boulder campus.

BS in Applied Computer Science, MS in Data Science

In order to gain admission to the PBAM program named above, a student must meet the following criteria:

- Have a cumulative GPA of 3.50 or higher.
- Have completed all prerequisite courses with grades of B or better: CSPB 1300, CSPB 2270, CSPB 2400, CSPB 3022 and CSPB 3308.
- Have at least three semesters remaining in the bachelor's degree program
- Graduate work is expected to be completed on the Boulder campus.

BS in Applied Computer Science, MS in Network Engineering

In order to gain admission to the PBAM program named above, a student must meet the following criteria:

- Have a cumulative GPA of 3.300 or higher.
- Have completed the following prerequisite courses with a B or better: CSPB 1300, CSPB 2270, CSPB 2400, CSPB 3308 and CSPB 3753. (If a student has transfer credit for one of the following courses or has taken a commonly accepted course substitution for one of the above courses, their grade in that alternate course can be used to determine their eligibility for this BAM program.)
- Students who do not meet the first two criteria, must have one letter of reference from a faculty member or their undergraduate academic advisor outlining why they should be considered. The letter-writer should send their letter directly to neteng@colorado.edu.
- Have at least three semesters remaining in the bachelor's degree program.
- Graduate work is expected to be completed on the Boulder campus.

Program Requirements

Students may take up to and including 12 hours while in the undergraduate program that can later be used toward the master's degree. However, only 6 credits may be double-counted toward the post-baccalaureate degree and the master's degree. Students must maintain a 3.000 cumulative GPA once accepted to the PBAM program. Students must apply to graduate with the post-baccalaureate degree, and apply to continue with the master's degree, early in the semester in which the undergraduate requirements will be completed.

Please see the computer science accelerated master's (https://www.colorado.edu/cs/academics/undergraduate-programs/accelerated-masters-programs/computer-science-accelerated-masters/) webpage for more information.

Computational Biology - Minor

Computational biology is an interdisciplinary field that develops and applies computational methods to understand biological systems and address societal challenges.

The computational biology minor is a cross-college minor that welcomes students from a diversity of majors. Students come together from disciplines in biology, math, computer science and engineering in interdisciplinary learning settings. The minor curriculum is intentionally designed to provide students overlap with their respective computational and biological expertise while challenging students to integrate core concepts and skills.

The minor teaches students to combine computational thinking and algorithms to tackle complex biological systems and topics like epidemiology, biotechnology, precision medicine & human health, genetics & genomics, environmental systems and scientific research. Students learn:

- Computational biology core concepts and experimental techniques.
- Representing and understanding biological data and patterns.
- Biologically relevant skills in applied math, data science and statistics, and computing.
- Modeling and predicting biological processes and dynamics.
- Biological phenomena under uncertainty with probabilistic and statistical analyses.

Visit the Computational Biology Minor webpage (https://www.colorado.edu/biofrontiers/cbiominor/) for the most recent information.

Requirements

A prerequisite is Calculus I or equivalent with a C- or better such as provided by MATH 1300/MATH 1310/APPM 1345/APPM 1350. Students must have a minimum cumulative GPA of 2.500 to declare this minor. Students interested in declaring should visit the Computational Biology Minor webpage (https://www.colorado.edu/biofrontiers/cbiominor/) and submit an interest form. A cumulative GPA of 2.000 or better is required in the courses that are used to satisfy the minor. Each individual course that is used to satisfy the minor must be passed with a C- or better.

Required Courses and Credits

The minor is divided into three course areas: Skills, BioElectives, and Data & Structure + Bioprocesses. The common pathways through the minor are: a computing or math background, which fulfills most Skills coursework, or a biology background, which fulfills BioElective coursework. Data & Structure + Bioprocesses course offerings emphasize the integration of Skills and BioElective core concepts. Completion of 8 courses from the three course areas is required for the minor; courses may not double count to satisfy multiple minor requirements. Relevant coursework can be petitioned. Course lists are maintained on the Computational Biology Minor webpage (https://www.colorado.edu/biofrontiers/cbiominor/).

Code	Title	Credit Hours
Skills		
Mathematical Biology		*3-4*
Choose one:		
CSCI 2897	Calculating Biological Quantities	
APPM 2360	Introduction to Differential Equations with Linear Algebra	
MATH 3430	Ordinary Differential Equations	
Data Science & Statistics		*3-4*
Choose one:		
MCDB 3450	Biological Data Science (recommended)	
CSCI 3022	Introduction to Data Science with Probability and Statistics (recommended)	

CHEN 3010	Applied Data Analysis
EBIO 4410	Biological Statistics
IPHY 3280	Intro to Data Science and Biostatistics
MATH 3510	Introduction to Probability and Statistics
PSYC 2111	Psychological Science I: Statistics
STAT 2600	Introduction to Data Science
STAT 4000	Statistical Methods and Application I
Computing	*6-8*
Choose one, two-course sequence:	
APPM 1650 & APPM 3650	Python for Math and Data Science Applications and Algorithms and Data Structures in Python
CSCI 1300 & CSCI 2270	Computer Science 1: Starting Computing and Computer Science 2: Data Structures
or CSCI 2275	Programming and Data Structures
CSCI 1200 & INFO 2201	Introduction to Computational Thinking and Programming for Information Science 2
INFO 1701 & INFO 2201	Programming for Information Science 1 and Programming for Information Science 2
BioElectives	**3-4**
Choose one (from any biological area): [1]	
Biochemistry	
BCHM 4611	Principles of Biochemistry
BCHM 4720	Metabolic Pathways and Human Disease
BCHM 4740	Biochemistry of Gene Transmission, Expression and Regulation
Biomedical Engineering	
BMEN 4117	Anatomy and Physiology for Biomedical Engineering
Ecology & Evolutionary Biology	
Petition any upper-division EBIO course focused in biological knowledge and theory, e.g.:	
EBIO 3040	Conservation Biology
EBIO 3080	Evolutionary Biology
EBIO 3400	Microbiology
Environmental Studies	
ENVS 3040	Conservation Biology
ENVS 4185	Geomicrobiology
Integrative Physiology	
IPHY 3410	Human Anatomy
IPHY 3430	Human Physiology
Molecular & Cellular Biology	
MCDB 3135	Molecular Biology
MCDB 3145	Cell Biology
MCDB 3150	Biology of the Cancer Cell
MCDB 3160	Infectious Disease
MCDB 3501	Structural Methods for Biological Macromolecules
MCDB 3650	The Brain - From Molecules to Behavior
Data & Structure + Bioprocesses	**9-10**
Choose three (with at least one course from each list below) to explore biological data and modeling:	
Data & Structure	
CSCI 3352	Biological Networks
CSCI 4444	Algorithms and Data Structures for Analyzing DNA
MCDB 4520	Bioinformatics and Genomics
Bioprocesses	
CSCI 4118	Software Engineering for Scientists
CSCI 4314	Dynamic Models in Biology
CSCI 4897	Computational and Mathematical Modeling of Infectious Diseases
APPM 4370	Computational Neuroscience
APPM 4390	Modeling in Mathematical Biology
BCHM 4631	Computational Genomics Lab
EBIO 4290	Phylogenetics and Comparative Biology
EBIO 4420	Computational Biology
EBIO 4700	Quantitative Genetics
MCDB 4312	Quantitative Optical Imaging
PHYS 4560	Introduction to Biophysics
Total Credit Hours	**24-30**

[1] BioElectives have prerequisite lectures or labs prior to enrollment, and we list the approximate number of them for students on the Computational Biology Minor webpage (https://www.colorado.edu/biofrontiers/cbiominor/). If a biological area of interest is not (fully) represented above, please contact CBIOminor@colorado.edu to petition BioElectives.

Learning Outcomes

By the completion of the program, students will be able to:

- Effectively identify and communicate Computational Biology topics and applications to specialists and non-specialists.
- Reframe and evaluate biological research questions in the context of computational theory and techniques.
- Contextualize data and modeling problems based on biological principles and the scientific discovery process.
- Collect and access biological data sources to study Computational Biology challenges.
- Evaluate methods of biological data collection, validation, extension, and reproducibility.
- Use and/or build computer-based systems, programs, and algorithms based in software design principles.
- Model structured biological data and systems using computational techniques.
- Predict and interpret biological phenomena under uncertainty with probabilistic and statistical analyses.

Computer Science - Minor

The department offers a minor in computer science that is available to CU Boulder undergraduates. The minor offers a basic introduction to the field of computer science.

A student may not earn both a bachelor's degree in computer science (or applied computer science) and the minor in computer science from CU Boulder.

For more information, visit the department's Minor in Computer Science (http://www.colorado.edu/cs/current-students/undergraduate-students/minor/) webpage.

Requirements

A minimum of 18 credit hours of computer science coursework is required for the minor. A minor in computer science can be earned in conjunction with any CU Boulder major degree, except for the BA and BS in computer science and applied computer science majors. For more information, visit the department's Minor in Computer Science (http://www.colorado.edu/cs/current-students/undergraduate-students/minor/) webpage.

Prerequisites/Corequisites

Calculus and Starting Computing courses do not count toward the 18 credit hours required for the computer science minor. Certain computer science courses may have additional prerequisites that are not otherwise required for or counted toward the minor.

Students should complete the following before declaring the minor:

- Calculus 1 (MATH 1300, MATH 1310, APPM 1350 or APPM 1345)
- Calculus 2 (MATH 2300 or APPM 1360)
- CSCI 1300 Computer Science 1: Starting Computing

Required Courses and Credits

Code	Title	Credit Hours
Required Courses		
CSCI 2270	Computer Science 2: Data Structures [1]	4
or CSCI 2275	Programming and Data Structures	
CSCI 2824	Discrete Structures	3
or APPM 3170	Discrete Applied Mathematics	
or ECEN 2703	Discrete Mathematics for Computer Engineers	
or MATH 2001	Introduction to Discrete Mathematics	
CSCI 2400	Computer Systems	4
At least one of the following is required.		4
CSCI 3104	Algorithms	
CSCI 3155	Principles of Programming Languages	
CSCI 3753	Design and Analysis of Operating Systems	
Additional approved upper-division Computer Science elective to reach minimum 18 credit hours, see CS Minor website for list of approved classes. A minimum of 4 out of 5 classes for the minor must be from CSCI.		3
Total Credit Hours		**18**

[1] CSCI 1300 must be completed before declaring the minor.

Time to Complete

Students should allow at least six semesters to complete the computer science minor and are advised to start the minor no later than the first semester of their sophomore year. Otherwise, students should plan to complete summer courses or delay graduation.

Residency Requirements

At least three computer science classes must be taken on the CU Boulder campus. At least two of these three must be upper-division courses (3000-level or higher).

Grade Requirements

A GPA of 2.000 or better is required in the courses used to complete this minor.

A grade of C- or better is required for all prerequisites and required core courses for the minor. A grade of D- or better is acceptable for computer science elective.

Creative Technology and Design

Degrees in creative technology and design are conferred by the College of Engineering and Applied Science and administered by the ATLAS Institute (https://www.colorado.edu/atlas/), a center for radical creativity and invention fostering interdisciplinary research, learning and innovation. With strong ties to the technology sector in Colorado and beyond, ATLAS is a vibrant and growing community of researchers, instructors and students interested in the creative application of diverse technologies.

Created to equip students with new and adaptable skill sets for the expanding digital landscape, the undergraduate program offers a bachelor of science, as well as a minor. Through its core curriculum and electives, students choose from a wide range of learning opportunities in subjects such as programming, physical computing, virtual reality, mobile application design/development, web design/development, user-interface/user-experience, history of technology, big data, robotics, wearable technology and game design/development.

Course code for this program is ATLS.

Centers and Labs

ATLAS Institute degrees are offered through the College of Engineering and Applied Science. With a strong emphasis on design, research, project-based learning and creative production, the institute includes a range of research labs, creative studios and learning facilities:

Brain Music Lab (https://www.colorado.edu/atlas/brain-music-lab/)

The Brain Music Lab pursues research and develops creative practices to promote health and wellbeing by combining new music technologies with EEG (brainwave data) and other physiological measurement techniques.

Unstable Design Lab (https://www.colorado.edu/atlas/unstable-design-lab/)

A research lab that studies technology and culture through the design and development of technologies that embrace chance and uncertainty.

Laboratory for Emergent Nanomaterials (https://www.colorado.edu/atlas/laboratory-emergent-nanomaterials/)

A research lab that manipulates matter on the smallest of scales to create materials with emergent properties, characterized by novel and sometimes surprising features arising from the interactions of multiple bodies.

ACME Lab (https://www.colorado.edu/atlas/acme-lab/)

The ACME Creativity Machine Environment (ACME) research lab explores computational tools for design, creativity, cognition, tangible and embedded interaction, and computing for health and wellness.

Programmable Reality Lab (https://www.colorado.edu/atlas/programmable-reality-lab/)

The Programmable Reality Lab is a research lab dedicated to make our whole living environment dynamic, interactive and programmable to transform our living space into a dynamic medium.

Living Matter Lab (https://www.colorado.edu/atlas/living-matter-lab/)

The Living Matter Lab is a research lab that pioneers new technologies empowering individuals by making information about their own biology and biome more accessible.

Utility Research Lab (https://www.colorado.edu/atlas/utility-research-lab/)

The Utility Research Lab invents and investigates digital fabrication technology, tools and techniques that empower us to create things that positively impact people, society and the environment.

TYPO Lab (https://www.colorado.edu/atlas/typo-lab/)

TYPO Lab is an experimental studio for creative work and research related to the technologies of language. It empowers faculty and students to explore and appreciate the media and methods of words.

BTU Lab (https://www.colorado.edu/atlas/blow-things-btu-lab-0/)

A dynamic teaching facility, creative studio and hackerspace that provides a range of physical computing, electronics and fabrication technologies, including a laser cutter, 3D printers and computers.

Whaaat!? Lab (https://www.colorado.edu/atlas/whaaat-lab/)

A game-focused learning lab that provides a range of emerging technologies for the exploration, project development and creative application of games and experimental interactions.

Helio Lab (https://www.colorado.edu/atlas/helio-lab/)

The Helio Lab is a learning lab that supports students' exploration of technologies that capture, edit and display imagery and light-based media which emphasizes storytelling through photography, animation, video, projection, AR/VR, 3D and 360 experiences and more.

B2 Center for Media, Arts and Performance (https://www.colorado.edu/atlas/labscenters/center-media-arts-and-performance-cmap/center-media-arts-and-performance-cmap/)

Centered around the ATLAS Black Box Experimental Studio, where creativity and engineering blend with the performing arts, B2 is an incubator for the novel and experimental use of technology in music, dance, visual art, theater, film and new media.

Bachelor's Degree

- Creative Technology and Design - Bachelor of Science (BSTM) (p. 956)

Minor

- Creative Technology and Design - Minor (p. 958)

Certificates

- Design Technologies - Certificate (p. 959)
- User Experience - Certificate (p. 959)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Alistar, Mirela (https://experts.colorado.edu/display/fisid_164177/)
Assistant Professor; PhD, Technical University of Denmark

Bruns, Carson J. (https://experts.colorado.edu/display/fisid_159851/)
Assistant Professor; PhD, Northwestern University

Chopra, Aidan
Lecturer; MArch, Rice University

Cohen, Ruscha (https://experts.colorado.edu/display/fisid_149781/)
Scholar in Residence, Director; MS, University of Colorado Denver

Devendorf, Laura (https://experts.colorado.edu/display/fisid_158564/)
Assistant Professor; PhD, University of California, Berkeley

Do, Ellen Yi-Luen (https://experts.colorado.edu/display/fisid_159925/)
Professor; PhD, Georgia Institute of Technology

Gross, Mark D. (https://experts.colorado.edu/display/fisid_100095/)
Professor, Institute Director; PhD, Massachusetts Institute of Technology

Johnson, Gabriel
Lecturer; PhD, Carnegie Mellon University

Leslie, Grace (https://experts.colorado.edu/display/fisid_172297/)
Assistant Professor; PhD, University of California San Diego

Margaret, Annie (https://experts.colorado.edu/display/fisid_159961/)
Associate Teaching Professor; PhD, Northwestern University

Pinter, Anthony (https://experts.colorado.edu/display/fisid_171867/)
Assistant Teaching Professor; Ph.D., University of Colorado Boulder

Rankin, Daniel (https://experts.colorado.edu/display/fisid_156453/)
Associate Teaching Professor, Associate Director; MS, University of Colorado Boulder

Rezvani, Sheiva
Associate Teaching Professor, Faculty Director; MA, New York University

Rivera, Michael (https://experts.colorado.edu/display/fisid_169859/)
Assistant Professor; PhD, Carnegie Mellon University

Schaal, David A. (https://experts.colorado.edu/display/fisid_114824/)
Associate Teaching Professor; MFA, University of Colorado Boulder

Suzuki, Ryo (https://experts.colorado.edu/display/fisid_167629/)
Assistant Professor; PhD, University of Colorado Boulder

Swanson, Joel E. (https://experts.colorado.edu/display/fisid_134311/)
Associate Professor; MFA, University of California, San Diego

Weaver, Zachary (https://experts.colorado.edu/display/fisid_166757/)
Assistant Teaching Professor; MArch, Carnegie Mellon University

Zamore, Shaz (https://experts.colorado.edu/display/fisid_166083/)
Assistant Teaching Professor; PhD, University of Washington

Courses

ATLS 1100 (3) Design Foundations
Introduces foundational principles, practices and methods of design. Emphasizes design as an expressive and creative problem solving tool. This course engages with design from a broad perspective including visual, computational, physical and auditory design practices. Through lectures, discussions and creative projects, students will gain a familiarity with the diverse applications of creative technology through design.

ATLS 1300 (4) Computational Foundations 1
Explores computation as a powerful tool for creative design and expression in a project-based studio environment. Students learn the fundamentals of creative coding, computational thinking, and object-oriented programming. Hands-on topics include generative art and design, interactivity, animation, and visualization.
Requisites: Restricted to Creative Technology and Design majors (TMEN) and (MTAM) minors and IUT On Track applicants.

ATLS 1350 (3) Computational Foundations for Non-Majors
Explores computation as a powerful tool for creative design and expression in a project-based studio environment. Students learn the fundamentals of creative coding, computational thinking, and object-oriented programming. Hands-on topics include generative art and design, interactivity, animation, and visualization.

ATLS 2000 (3) The Meaning of Information Technology
A survey of the mutual influence of technology, media, and society. Equips students with an understanding of technological transformations in interpersonal, organizational, and mass communication. Emphasis is on the technological, social and political changes that underlie the movement toward a digital society. As such, the class acts as a survey of various technologies and their relationship to socio-political issues. We not only address ¿how does it work¿ and ¿where does this come from¿ but ¿why is it here¿ and ¿how does it impact us as individuals and as a society¿.

ATLS 2001 (3) Design Technologies: Toolkit
Introduces students to the fundamentals of creative design through digital media production. Throughout the semester, students explore a number of disciplines related to digital media including imaging, web development, animation, video production, and more. Class sessions are in lecture format and are aimed at helping students attain a strong conceptual and technical understanding of creative design.
Requisites: Requires prerequisite or corequisite course of ATLS 2000 (minimum grade C-). Restricted to PATL students.
Grading Basis: Letter Grade

ATLS 2002 (3) Design Technologies: Process
Introduces foundational principles, practices and methods relating to the process of creative design. Emphasis on the pre-production process as a creative problem-solving tool in order to produce innovative and interesting creative work. Through lectures, discussion and creative projects, students will gain a familiarity with diverse applications and practices related to creative technology and design
Requisites: Requires prerequisite or corequisite courses of ATLS 2000. Restricted to PATL students.

ATLS 2036 (3) Introduction to Media Studies in the Humanities
Serves as an introduction to media studies specifically from a humanities perspective. Studies both histories and theories of media from the 20th and 21st centuries. Touches on methodologies for undertaking media studies (including distant ready and media archaeology). Objects of study may include such topics as film, radio, social media platforms and games, as well as digital art and literature.
Equivalent - Duplicate Degree Credit Not Granted: ENGL 2036 and AHUM 2036
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to Creative Technology Design (TMEN) majors and (MTAM) minors, or the ATLAS (PATL) student group only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

ATLS 2100 (3) Image
Introduces techniques, technologies and concepts of digital image making and manipulation through lectures, projects and critiques. Focuses on digital photography, digital animation and digital video as a means to formal and expressive ends. This course also contextualizes practices and methodologies of digital imaging with historical and critical perspectives.
Requisites: Requires prereq courses of ATLS 1100. Requires prereq or coreq of ATLS 1300 or ATLS 1350 or INFO 1701 or CSCI 1300, and ATLS 2000 or ENES 2020 (all min grade C-).
Grading Basis: Letter Grade

ATLS 2200 (3) Web
Introduces techniques, technologies and concepts of web design and development through lectures, projects and critiques. Focuses technically on HTML, CSS and JavaScript as the primary web technologies. Contextualizes the technical and societal implications of the Internet through historical and critical perspectives.
Requisites: Requires prereq courses ATLS 1100 ATLS 1300 or ATLS 1350 or INFO 1701 or CSCI 1300 (all min grade C-). Requires prereq or coreq course ATLS 2000 or ENES 2020.

ATLS 2270 (4) Computational Foundations 2
Builds on the fundamental programming concepts introduced in ATLS 1300. Students will learn to write sophisticated programs that employ efficient means of representing and manipulating information. They will learn to analyze algorithms in terms of complexity, gain an understanding of fundamental data structures (lists, stacks, queues, trees), and acquire practical experience implementing algorithms to solve common problems (sorting, graph traversal).
Requisites: Requires prerequisite courses of ATLS 1300 or CSCI 1300 or INFO 1701 or ASEN 1320 (all minimum grade C-). Requires prerequisite or corequisite course ATLS 2000 or ENES 2020.

ATLS 2300 (3) Text
Introduces technologies, terminology and histories related to the design of text within digital and analogue media. Students will learn the fundamentals of design, typography and layout through lectures, projects and critiques. The curriculum surveys significant theoretical perspectives, historical periods and significant practitioners that influence the practice of typographic design.
Requisites: Requires prereq of ATLS 1100. Requires prereq or coreq ATLS 1300, ATLS 1350, INFO 1701 or CSCI 1300. Requires prereq or coreq ATLS 2000 or ENES 2020 (all min grade C-).

ATLS 2519 (1-4) Special Topics in Creative Technology and Design
Analyzes special interest areas of creative technology and design research and practice.
Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Creative Technology Design (TMEN) majors and (MTAM) minors, or the ATLAS (PATL) student group only.
Grading Basis: Letter Grade

ATLS 3040 (3) Introduction to Games and Play
Introduces students to foundational concepts, culture, history, and creation of games and playful experiences. Through readings, playing games, and completing design exercises, students will learn to analyze how various formal elements of play function to make successful games.
Requisites: Requires prerequisite or corequisite course of ATLS 1100 (minimum grade C-).

ATLS 3100 (3) Form
Teaches the fundamentals of 3D modeling, 3D animation and 3D printing / rapid prototyping from a conceptual and sculptural perspective. Through topical lectures, technical demonstrations and creative projects the course will introduce students to the potentials of thinking and working within 3-dimensional spaces.
Requisites: Requires prereq course of ATLS 1100. Requires prereq or coreq of courses ATLS 1300 or ATLS 1350 or INFO 1701 or CSCI 1200 or CSCI 1300 or CSCI 1320, and ATLS 2000 or ENES 2020 (all min grade C-).

ATLS 3110 (3) Motion Design
An animation-based projects course that advances student understanding of motion design in today's culture. Through active production and critical analysis, students will create new media projects and critically examine the history, social implications, and impacts of these forms of mass media.
Requisites: Requires prerequisite course of ATLS 2100 (minimum grade C-).

ATLS 3120 (3) Creative Web Development
An Internet-based projects course that advances student understanding of Internet culture. Through active production and critical analysis, students will explore their individual roles in the digital landscape and critically examine the social implications and impacts of digital communities.
Requisites: Requires prerequisite courses of ATLS 2000 and ATLS 2200 (all minimum grade C-). Restricted to Creative Technology and Design (TMEN) majors and (MTAM) minors.

ATLS 3150 (3) Universal Design for Digital Media
Focusing on the concepts of universal design and Web Standards, this course will address issues that occur at the nexus of web standards, Universal Design and the needs of persons with disabilities. Students will gain the expertise and skills to create media and web sites which are accessible, usable and effective for all users and device platforms.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 3150
Requisites: Requires prerequisite course of ATLS 1300 or CSCI 1300 (minimum grade C-).
Recommended: Prerequisite some knowledge of creating web pages with either direct HTML coding or with web design software.

ATLS 3173 (3) Creative Climate Communication
We generate multimodal compositions on the subject of climate change and engage with various dimensions of issues associated with sustainability. We work to deepen our understanding of how issues associated with climate change are or can be communicated, by analyzing previously created expressions from a variety of media (interactive theatre, film, fine art, television programming, blogs, performance art, for example) and then be creating our own work.
Equivalent - Duplicate Degree Credit Not Granted: ENVS 3173 and THTR 4173
Recommended: Prerequisite ENVS 1000.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Arts Sci Gen Ed: Distribution-Social Sciences

ATLS 3200 (3) Sound
Introduces techniques, technologies and concepts of digital sound through lectures, projects and critiques. Focuses technically on digital sound creation, production, synthesis and interactivity. Explores various approaches to digital sound production through historical and conceptual perspectives.
Requisites: Requires prereq course of ATLS 1100. Requires prereq or coreq course of (ATLS 2000 or ENES 2020) and (ATLS 1300 or ATLS 1350 or INFO 1701 or CSCI 1200 or CSCI 1300 or CSCI 1320) (all min grade C-).

ATLS 3300 (3) Object
Introduces the fundamentals of physical computing. This class is an exploration of computing that starts from the perspective that humans are fundamentally physical beings. Students will design projects that interact with humans and the physical world and will learn to integrate sensors, motors, and simple electronics into creative projects. Projects will include interactive installations, art projects, games, and audio controllers.
Requisites: Requires prereq courses of ATLS 1100 ATLS 1300 or (ATLS 1350 or INFO 1701 or CSCI 1200 or CSCI 1300 or CSCI 1320 or ASEN 1320) (all min grade C-). Requires prereq or coreq course of ATLS 2000 or ENES 2020 (all min grade C-).
Grading Basis: Letter Grade

ATLS 3500 (1-3) Client Projects in Creative Technology and Design
Allows undergraduate students to work on collaborative projects with faculty and with external organizations under faculty supervision. Focuses on teamwork, conceptual planning, technical design and development and working within real-world client environments. Critical skills include project research, planning, design, development, trouble-shooting and presentation.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Requires prerequisite course of ATLS 2000 or HUEN 2020 or ENES 2020 (all min grade C-).

ATLS 3519 (1-3) Special Topics
Analyzes special interest areas of multidisciplinary creative technology and design research and practice.
Repeatable: Repeatable for up to 21.00 total credit hours. Allows multiple enrollment in term.

ATLS 3523 (3) The Art and Strategy of Science Communication: Branding Climate Change
Integrating the science of climate change and science communication with the research, strategy and execution practices of strategic communication (e.g., advertising and public relations).
Equivalent - Duplicate Degree Credit Not Granted: EBIO 3523
Grading Basis: Letter Grade

ATLS 3529 (1-3) Critical Topics
Analyzes critical perspectives in creative technology and design. Within these courses, students will develop vocabularies, theoretical perspectives and critical approaches relevant to technology and its effects on culture and society.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

ATLS 3539 (1-3) Topics: How-to
Analyzes special interest areas of multidisciplinary creative technology and design research and practice.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

ATLS 3710 (3) Material Studies and Practice
Surveys the broad array of physical materials used in design and practically applies this knowledge via hands-on projects that introduce basic tools and techniques for fabrication in the domains of woods, plastics, ceramics, concrete, fibers and metals. Practical work is complemented with inquiry into the social, aesthetic, and ecological significance of materials used in design.
Requisites: Requires prerequisite course of ATLS 1100 (minimum grade C-).

ATLS 4000 (3) Research Methods and Professional Practice
Research Methods and Professional Practice lays the foundation for students to produce culminating work in their major. In this course, students will engage in domain exploration, learn to define a research problem, utilize tools and methods for professional design research, refine presentation skills, and engage in iterative and collaborative work. This course is focused on domain research, idea validation, and prototyping in order to prepare students for a culminating semester-long Capstone project based on this research. Formerly offered as a special topics course.
Requisites: Requires prerequisite courses of ATLS 3100 and ATLS 3300 (all min grade C-). Restricted to Creative Technology and Design (TMEN) majors.

ATLS 4010 (4) Capstone Projects
Focuses on the development of an individual thesis project. Specific class sessions will feature a combination of lectures, demonstrations, guest speakers, lab sessions, and critiques. This course also entails group work, portfolio development, critical theoretical readings, and a significant written component.
Repeatable: Repeatable for up to 8.00 total credit hours.
Requisites: Requires prerequisite course of ATLS 4000 (minimum grade C-). Restricted to Creative Technology and Design (TMEN) majors only.

ATLS 4040 (3) Game Design
Introduces students to game design, development, history, theory and culture through readings, discussion, game analysis and the iterative design process of non-digital games.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 5040
Requisites: Requires prerequisite course of ATLS 1100 (minimum grade C-).

ATLS 4050 (3) Alt Arcade Interfaces
In this project-based studio course, students will move beyond conventional button and joystick interfaces into the design of bespoke interfaces for game control, with an emphasis on games designed for public exhibition. Students will, both individually and in groups, design and develop multiple games, and build custom control interfaces for them.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 5050
Requisites: Requires prerequisite ATLS 1300 or ATLS 1350 or CSCI 1300 (all minimum grade C-).
Recommended: Prerequisite ATLS 3300 (Object), and ATLS 4050 (Game Development).

ATLS 4060 (3) Tiny Games
Guides students into fluency across a suite of technical tools (Bitsy, PuzzleScript, Pico-8, and others) to construct tiny games: short games with tight technical constraints, created in relatively brief amounts of time, and built around singular ideas.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 5060
Recommended: Prerequisite ATLS 1100 (Design Foundations) and ATLS 1300 (Computational Foundations), or ATLS 1350, or CSCI 1300.

ATLS 4112 (3) Neurohacking
Explores psychotechnologies for developing high level metacognition and individual sovereignty. We investigate the optimization of conscious human experience, mindfulness, and creativity through the lenses of neuroscience, cognitive science, evolutionary psychology, and philosophy. Students will learn to critique primary literature, experimental design, and be guided in developing a set of practices to enhance cognition and achieve various desired mental states.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 5112
Requisites: Requires prereq or coreq course of ATLS 2000 or HUEN 2020 or ENES 2020 (minimum grade C-).

ATLS 4120 (3) Mobile Application Development
Provides a comprehensive overview of developing mobile applications using a range of technologies including software developers' kits, object-oriented programming and human interface design principles. Students incorporate leading edge technologies with their own academic pursuits and personal interests to develop mobile applications. Explores the social and cultural effects of app and mobile-based computing.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 5120
Requisites: Requires prerequisite course of ATLS 1300 or CSCI 1300 or CSCI 1320 (minimum grade C-).

ATLS 4130 (3) Experimental Typography
This course is an advanced investigation of typography for visual communication and expression. Emphasis is placed on the analysis of meaning as conveyed through materials, technology, and design. Projects are experimental and are designed to challenge you to expand your understanding of the function of typography in communication, design, art, and culture.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 5130
Requisites: Requires prerequisites ATLS 2200 and ATLS 2300 (all minimum grade C-). Restricted to Creative Technology and Design (TMEN) majors and (MTAM) students.

ATLS 4140 (3) Game Development
Builds on concepts and processes learned in ATLS 4040/5040. Reinforces game design principles through analysis and discussion of digital games, and introduces students to key practices in the development of digital game experiences, including game flow, mechanics, 2D and 3D graphics, and artificial intelligence.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 5140
Requisites: Requires prerequisite ATLS 4040 (minimum grade C-).

ATLS 4141 (3) Color
Examines the generation and perception of colors in the context of physics, chemistry, biology, and psychology as a foundation for making. Explores the synthesis and applications of color dyes and pigments in art and design through lectures, readings, experiments, and projects.
Requisites: Requires prerequisite course of ATLS 2000 or HUEN 2020 or ENES 2020 (all min grade C-).

ATLS 4151 (3) Flow Visualization
Explores techniques for the visualization of the physics of fluid flows including seeding with dyes, particles and bubbles, and shadowgraphy and schlieren. Reviews optics and fluid physics, especially atmospheric clouds. Assignments are student-driven, to individuals and mixed teams of graduates, undergraduates, engineering majors and photography/video majors.
Equivalent - Duplicate Degree Credit Not Granted: ARTF 5200, MCEN 5151, MCEN 4151 and ATLS 5151
Requisites: Restricted to students with 57+ credits (juniors and above) only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

ATLS 4201 (3) Biodesign
This class covers basic design techniques, together with essential wetlab skills. Students will learn how to culture and work with various types of organisms, such as bacteria, algae (dynoflagellates, cyanobacteria) and fungus. These organisms will become the living media or processed biomaterials that the students will design with. This is a lab-based class.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 5201

ATLS 4202 (3) Computational Fabrication
This course will explore techniques, representations, and workflows for computational fabrication. Digital fabrication machines like 3D printers and laser-cutters bring complicated designs into physical form, and computer programming helps overcome design challenges that are difficult or nearly impossible. Blending these two tools, students will use computational fabrication techniques to design and build functional, creative objects leveraging existing computer-aided design (CAD) tools, programming languages and digital fabrication machinery.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 5202
Requisites: Required prerequisites: ATLS 1300 or CSCI 1300.
Recommended: Prerequisites Prior programming experience in Python/C ++ and ATLS 1300 (Form) or prior CAD/3D Modeling experience.

ATLS 4203 (3) Light and Perception
Traces human and camera vision in close detail. Students explore visual perception between two and three dimensions by exploring advanced experiments in designing light. Starting with different analog illustration exercises, students explore how light informs the perception of three dimensional space and objects. Students then explore techniques to play with visual perception, using advanced technologies like Augmented and Virtual Reality, Interactive Sculpture, Digital Games, and Immersive Media.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 5203
Recommended: Prerequisite ATLS 2100.

ATLS 4214 (3) Big Data Architecture
Provides students with a comprehensive survey of technologies used today in the collection, storage, processing, analytics and display of big data. Focuses on cultivating real world skills with students working on semester long projects to execute on a group project.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 5214, CSCI 5214, and CSCI 4214
Requisites: Requires prerequisite course of ATLS 2270 or CSCI 2270 or CSCI 2275 (all minimum grade C-). Restricted to Creative Technology and Design (TMEN) majors or (MTAM) minors and CSEN majors and CSCI majors.

ATLS 4221 (3) Interactive Sound
Interactive Sound explores generative coding to produce unique audio design systems that can be employed in a wide array of interactive projects. Students will learn to use Max (a visual programing tool) to combine and control sound, video, OpenGL 3D objects, and microcontrollers. Example inputs: real time video, data scraping for the sonification of natural phenomena, or environmental sensor data collected via Arduino. Example outputs: reactive audio-visual installations, immersive projection, or multichannel spatial sound systems.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 5221
Recommended: Prerequisite ATLAS 3200 Sound, or have equivalent music technology experience.

ATLS 4230 (3) Case Studies in Social Impact
Students will evaluate case studies across a range of technologies and applications. Students will learn how to match available technologies to human and environmental needs and resources, be introduced to the seminal work and leaders in the field, and discuss the future of Creative Technology Design as an emerging area of academic focus.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 5230
Requisites: Restricted to Creative Technology and Design (TMEN) majors and (MTAM) minors.

ATLS 4244 (3) Empathy and Technology
Explores how the creative integration of empathy and compassion with design and technology can benefit society. Reviews foundational neuroscience and evolution of empathy. Through readings, discussion, and reflection students will develop personal practices for fostering empathy and critically investigate: empathy as a finite resource, tribalism/polarization, the weaponization of empathy, and principles for designing social systems that promote well-being. Previously offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 5244
Requisites: Requires prerequisite course of ATLS 2000 or HUEN 2020 or ENES 2020 (all min grade C-).
Grading Basis: Letter Grade

ATLS 4279 (3) Aesthetics in Design
Focuses on aesthetic aspects of design via hands-on design-build experiences. Students individually create dynamic artifacts of their own choice with the assistance of teammates. Content includes major design movements since 1900, constructive critique practice, hand sketching techniques and other selected industrial design topics. Students publish their design work on an archival public blog which provides a professional portfolio element.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 4279 and MCEN 5279 and ATLS 5279

ATLS 4320 (3) Mobile Application Development: Advanced Topics
Explores advanced topics in mobile application design and development, including examining different approaches to information design and the various user interaction models associated with them. Understanding how data is structured, accessed, stored and flows through apps is a core theme of the course. Explores the interaction with external data sources and storage models.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 5320
Requisites: Requires a prerequisite course of ATLS 4120 (minimum grade C-). Restricted to College of Engineering (ENGRU) undergraduates only.

ATLS 4330 (3) Wearable Technologies
Introduces elements of embedding electronic and computational behaviors into clothing and accoutrements such as watches, handbags, and other wearable accessories. In weekly exercises students build, test, and demonstrate canonical wearable projects. Readings and video viewings survey past and current trends in wearable technologies, including materials, components, fashion and social acceptability. Participants design, develop, debug and document a wearable technology term project.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 5330
Requisites: Requires prerequisite course of ATLS 3300 (minimum grade C-).

ATLS 4340 (3) Experimental Textiles
Introduces students to the design and creation of soft interactive objects using textile techniques with a focus on weaving. Specifically, students are guided through exercises intended to cultivate and embodied a sense of textile structures and the mechanical and aesthetic effects they afford. Then, students learn the state of the art of integrating electronics into these soft/deformable textiles structures. With applications from sports, medicine, fashion, architecture, and soft robotics, smart/interactive textiles require a unique set of understandings and design considerations. Students learn about textile structure development, surface design, material sourcing, and electronics integration through project-based assignments.

ATLS 4519 (1-4) Advanced Special Topics
Analyzes special interest areas of multidisciplinary creative technology and design research and practice.
Repeatable: Repeatable for up to 32.00 total credit hours. Allows multiple enrollment in term.

ATLS 4529 (1-3) Adv Critical Topics
Analyzes critical perspectives in technology, art and media. Within these courses, students will develop vocabularies, theoretical perspectives and critical approaches relevant to technology and its effects on culture and society.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 5529
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Grading Basis: Letter Grade

ATLS 4539 (1-4) AdvTopics: How-to
Analyzes special interest areas of multidisciplinary creative technology and design research and practice.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

ATLS 4606 (3) Critical Technical Practice
Surveys design theory and methods that can be used to question relationships between technology, culture, and the environment. Students will discuss readings and synthesize those readings through design exercises. The course will equip students with resources for thinking more critically and creatively about design and possible future human-technology relationships.
Equivalent - Duplicate Degree Credit Not Granted: INFO 5606, INFO 4606, and ATLS 5606
Grading Basis: Letter Grade

ATLS 4616 (3) Introduction to Virtual Reality
Introduces students to the field of virtual reality (VR). Covers the historical development of virtual reality technologies and virtual reality as a research field, the mathematics of 3D coordinate systems, fundamental principles, algorithms, and design patterns in developing interactive virtual environments, the perceptual science behind mixed reality technologies, and libraries and tools for creating VR experiences.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 4616
Requisites: Requires prerequisite course of ATLS 2270 or CSCI 2270 (minimum grade C-). Restricted to Creative Technology and Design (TMEN) majors and (MTAM) minors.

ATLS 4620 (3) User-Experience Design 1
Teaches the end-to-end UX Design process. Through lectures, industry illustrations and hands-on projects students will develop a professional design portfolio piece, understand contemporary UX design methodologies, and learn how to innovate when designing at scale.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 5620
Requisites: Restricted to Creative Technology and Design (TMEN) majors and (MTAM) minors.

ATLS 4630 (3) Web Front-End Development
Explores interactivity on the web using front-end web development concepts and technologies. Students will work with a range of technologies including JavaScript, jQuery, HTML5, APIs and user interface design methods to create interactive web applications. Individual and group projects will include animations, games, interactive narratives and web applications.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 5630
Requisites: Requires prerequisite courses of ATLS 2200 and ATLS 1300 or ATLS 3000 or CSCI 1300 or CSCI 1320 (all minimum grade C-).

ATLS 4720 (3) User-Experience Design 2
Expands on techniques and opportunities presented in User-Experience Design 1 with a deeper dive into research and prototyping practices as means to insight into user desires and preference, adoption, and execution of product and branded experiences in a variety of contexts and locations within the global experience economy.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 5720
Requisites: Requires prerequisite course of ATLS 4620 (minimum grade C).

ATLS 4809 (3) Computer Animation
Develops a firm understanding of the general principles of computer animation. Lectures cover the creation of models, materials, textures, surfaces, and lighting. Path and key frame animation, particle dynamics, and rendering are introduced. Students are assigned a number of animation tutorials to carry out.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 5809 and CSCI 4809 and CSCI 5809

ATLS 4900 (1-3) Undergraduate Independent Study
Provides opportunities for independent study at the upper-division undergraduate level. Students work on research or a creative project guided by faculty. Department consent required.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Requires prerequisite courses of ATLS 1100 and ATLS 1300 (minimum grade C-).

Creative Technology and Design - Bachelor of Science (BSCTD)

The Bachelor of Science in Creative Technology and Design (https://www.colorado.edu/atlas/academics/undergraduate/) is an engineering degree like no other. Encompassing a broad, transdisciplinary course of study, the degree blends creativity and design with a rigorous engineering curriculum that emphasizes critical thinking, problem-solving and creative production. Attracting designers, technologists, makers and inventors who seek diverse and adaptable skills, the degree opens doors to a wide range of 21st-century challenges and opportunities.

Industry and Career Paths

Students graduating with a major in Creative Technology and Design and prepared to enter professional positions in the following disciplines:

- Human-computer interaction.
- Information design and data visualization.
- Web design and development.
- Video and narrative media.
- Robotics and physical computing.
- Internet of Things design.
- Graphic design and visual communication.
- Game design and development.
- User-interface and user-experience design (UI/UX)
- Experience design.
- Digital sound, audio production and electronic music.
- Mobile application design and development.

Students who complete the BS degree program are also poised to pursue graduate or advanced degrees in engineering, other technological fields and design.

Hallmarks of the Program

- Most classes are small, studio-based courses that encourage group work and collaboration.
- Most classes are greater than 50 percent female-identifying or non-binary students, a percentage well above most engineering and computing programs.
- The interdisciplinary coursework stresses knowledge, skills and expertise in technology development through both design and engineering.
- Projects use an iterative creative process from problem finding and ideation through user-testing, implementation and deployment.
- Students learn to think critically about the ethical and cultural impacts of emerging technology.
- Faculty are engineers, designers and artists from diverse fields who are experts in working with students of varied backgrounds, abilities and interests.

Unique

With a solid engineering foundation, the BS in Creative Technology and Design program caters to an emerging generation of hybrid students. Students develop skills that extend beyond traditional engineering disciplines, eagerly producing technical and creative projects that integrate both engineering and design.

Transdisciplinary

The degree program is discipline agnostic, encouraging students to pursue their interests and passions in ways that conform to, as well as transcend, traditional disciplinary fields. By helping students discover, explore and expand these interests, faculty members prepare students for rapid shifts and innovations in tomorrow's technology landscape.

Creative Production and Critical Perspectives

Students are prolific creators who learn to critically and conceptually assess the works they create. Courses are designed on the studio model that integrates faculty and peer critique at every level. Graduates of the program are savvy and resourceful engineers, equal parts creator and critic, artist and theorist.

Requirements

Course Requirements

Students must complete a total of 128 credits in order to graduate with a BS in creative technology and design. The last 45 credit hours of the 128 for the BS degree must be earned via CU Boulder coursework only and while rostered in the College of Engineering & Applied Science.

The minimum passing grade for a course that is considered a prerequisite for another course is C-. A grade of C or better is required in all terminal Foundation, Core and Capstone courses. A grade of C- or higher is required in all terminal Focus, CPT and How-to Electives.

1 Students may choose courses from the list of college-approved humanities and social sciences electives (https://www.colorado.edu/engineering-advising/get-your-degree/degree-requirements/humanities-social-sciences-and-writing-requirements/).

2 Students may choose a course from the list of college-approved writing courses (https://www.colorado.edu/engineering-advising/get-your-degree/degree-requirements/humanities-social-sciences-and-writing-requirements/).

3 Natural Science Courses (use Class Search (https://classes.colorado.edu/) and under *Advanced Search*, choose "A&S GenEd: Distribution-Natural Sciences").

4 Students may choose two courses from the list of Mathematics Electives (https://www.colorado.edu/atlas/academics/undergraduate/ctd-curriculum/#ucb-accordion-id--7-content1).

5 Students may choose two courses from the list of CPT Electives (https://www.colorado.edu/atlas/academics/undergraduate/cpt/).

6 Students may choose six courses from the list of Focus Electives (https://www.colorado.edu/atlas/bs-ctd-focus-electives/); at least 12 credits of which must be upper-division coursework; and at least 12 credits must be ATLS courses.

7 Students may choose from a list of one credit variable Special Topics: How-To courses.

Learning Outcomes

By the completion of the program, students will be able to:

- Develop work that addresses complex interdisciplinary problems, applying principles of engineering, computational thinking, and design using industry standard and emerging technologies.
- Understand the historical, cultural and psychological factors that impact the human experience of design.
- Engage in research, critical assessment and critique.
- Engage in iterative design and production to contribute novel functionalities, aesthetics or interactions.
- Collaborate on a team that effectively demonstrates task management, accountability and makes progress towards common goals.
- Recognize ethical and professional responsibilities and make informed discernments in applying creative technology solutions.
- Effectively communicate the functionality, purpose and impact of creative technology solutions in a wide range of professional contexts in a way that is thoughtful and respectful to others.

Creative Technology and Design - Minor

The minor in Creative Technology & Design compliments a host of undergraduate majors, blending design and programming skills with critical perspectives on the role of technology within the realm of human creativity.

Goals

- Take hands-on, project-based courses across a diverse array of creative domains, producing a variety of portfolio-ready work.
- Tailor a flexible curriculum to gain the technical and design skills relevant to your interests and passions.
- Critically reflect on the social, environmental and cultural implications of design and technology.
- Collaborate with the ATLAS Institute's vibrant community of engineers, designers, scientists and creative technologists to wield creativity in a rapidly-changing technological landscape.

For more information, visit the Minor (https://www.colorado.edu/atlas/ctd-minor/) webpage.

Requirements

Program Requirements

Students must have a 2.000 cumulative GPA to be admitted to the minor in creative technology and design. Students may not earn both this minor and the BS in creative technology and design.

Students must complete a minimum of 22 credit hours with 8 courses, as detailed below. Coursework used to satisfy the minor requirements cannot be taken pass/fail. A minimum of 15 credit hours must be taken on the Boulder campus. Six of the eight courses for the CTD minor must be ATLS courses.

A cumulative GPA of 2.000 or better is required for courses used to satisfy the requirements of this minor. The minimum grade for prerequisite courses in the minor is C-; all other courses must be a minimum grade of C to apply towards the minor. Failing to meet the minimum grade for any individual ATLS required course twice will result in automatic removal from the creative technology and design minor.

Courses may be taken concurrently, although some courses may have recommended and/or required prerequisites.

1 For a list of approved electives, please reference the CTD Minor Degree Audit.

2 Students may choose one course from the list of How-To electives (found in degree audit).

Design Technologies - Certificate

The certificate in design technologies provides a fundamental understanding of information technology and digital media production. Students will create work that develops their digital design skillset, all while being prompted to critically analyze the impacts of technology on society.

This certificate equips the next generation of artists, designers and media producers with the necessary technical, theoretical and historical background to become critically aware users of design technology.

Requirements

Certificate Requirements

Students must have a 2.300 cumulative GPA to be admitted to the certificate in design technologies. The certificate consists of a four-course sequence (12 credit hours) and typically takes a minimum of two semesters to complete. A grade of C or higher is required for all certificate courses.

This certificate is available to students in any CU Boulder major or minor (except for students earning a Creative Technology & Design Bachelor of Science degree or Minor). It may also be earned in addition to the ATLAS User Experience certificate.

Required Courses and Credits

Code	Title	Credit Hours

User Experience - Certificate

The certificate in user experience gives students the skills and vision to re-imagine how humans interact with technology. From crafting wireframes and prototyping to understanding user journeys and usability testing, students gain the expertise to design interfaces and experiences that delight and inspire.

This certificate is built from the suite of current user experience design courses that have been taught at ATLAS for the past six years. It allows students from a variety of academic careers to develop in-demand skills in the world of UX design.

Requirements

Certificate Requirements

Students must have a 2.300 cumulative GPA or higher to be admitted to the certificate in user experience. The certificate consists of a four-course sequence (12 credit hours) and typically takes a minimum of two semesters to complete. A grade of C or higher is requires for all certificate courses.

This certificate is available to students in any CU Boulder major or minor. It may also be earned in addition to the ATLAS Design Technologies certificate.

Electrical, Computer & Energy Engineering

Electrical engineering offers study of the basic science and technology of information and energy. Its areas of knowledge include:

- Information theory and communications systems
- Computers and digital systems
- Signal processing and instrumentation
- Feedback systems and automatic control
- Electrical and electronic devices and systems
- Power electronics and renewable energy
- Electromagnetics and microwave devices
- Optics and photonic systems
- Embedded systems engineering

Students learn how this basic knowledge is applied to such modern technologies as computers, telecommunications, biomedical systems and remote sensing. The curriculum accommodates a variety of student interests including design, production, testing, consulting services, research, teaching and management. Graduates pursue careers in a large variety of fields in the computer, telecommunications, instrumentation, biomedical, aerospace, energy, materials and semiconductors industries, as well as academia. Some go on to careers in other professions such as law or medicine.

Electrical and computer engineering offers the same curriculum as electrical engineering, except that required courses in computer hardware and software replace some upper-division electives. As with electrical engineering, it accommodates broad student interests from design to

service, and from research to management. Its graduates take positions in fields as diverse as those listed above for electrical engineering.

Course code for this program is ECEN.

Bachelor's Degree

- Electrical and Computer Engineering - Bachelor of Science (BSEC) (p. 970)
- Electrical Engineering - Bachelor of Science (BSEE) (p. 975)

Minor

- Computer Engineering - Minor (p. 978)
- Electrical Engineering - Minor (p. 979)
- Quantum Engineering - Minor (p. 980)
- Signals and Systems - Minor (p. 980)

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Assistant Professor; PhD, Cornell University

Herzfeld, Ute C. (https://experts.colorado.edu/display/fisid_106575/)
Research Professor; PhD, Johannes Gutenberg-Universität Mainz (Germany)

Hodge, Bri-Mathias (https://experts.colorado.edu/display/fisid_158358/)
Associate Professor; PhD, Purdue University

Huang, Shu-Wei (https://experts.colorado.edu/display/fisid_159847/)
Assistant Professor; PhD, MIT, Cambridge

Izraelevitz, Joe (https://experts.colorado.edu/display/fisid_166042/)
Assistant Professor; PhD, University of Rochester

Kapteyn, Henry C. (https://experts.colorado.edu/display/fisid_115334/)
Professor; PhD, University of California, Berkeley

Keller, Eric Robert (https://experts.colorado.edu/display/fisid_151647/)
Associate Professor; PhD, Princeton University

Kuester, Edward F.
Professor Emeritus

Lasser, Gregor (https://experts.colorado.edu/display/fisid_156178/)
Assistant Research Professor; PhD, Technische Universität Wien (Austria)

Le, Hanh-Phuc
Assistant Professor; PhD, University of California, Berkeley

Lehman, Tamara (https://experts.colorado.edu/display/fisid_165649/)
Assistant Professor; PhD, Duke University

Lightner, Michael R. (https://experts.colorado.edu/display/fisid_101723/)
Professor; PhD, Carnegie Mellon University

Liu, Youjian (https://experts.colorado.edu/display/fisid_126283/)
Associate Professor; PhD, Ohio State University

MacCurdy, Robert B. (https://experts.colorado.edu/display/fisid_163307/)
Assistant Professor; PhD, Cornell University

Majerfeld, Arnoldo
Professor Emeritus

Maksimovic, Dragan (https://experts.colorado.edu/display/fisid_105609/)
Professor; PhD, California Institute of Technology

Mathys, Peter (https://experts.colorado.edu/display/fisid_100084/)
Associate Professor; PhD, ETH Zürich (Switzerland)

McAuliffe, Rik
Lecturer

McClure, Linden
Professor Adjunct

McLeod, Robert R. (https://experts.colorado.edu/display/fisid_107547/)
Professor; PhD, University of Colorado Boulder

Mendelson, Jay
Lecturer

Mihran, Richard
Professor Adjunct

Mishra, Shivakant (https://experts.colorado.edu/display/fisid_118376/)
Professor; PhD, University of Arizona

Moddel, Garret (https://experts.colorado.edu/display/fisid_105440/)
Professor; PhD, Harvard University

Murnane, Margaret (https://experts.colorado.edu/display/fisid_115333/)
Distinguished Professor; PhD, University of California, Berkeley

Nicotra, Marco M. (https://experts.colorado.edu/display/fisid_164182/)
Assistant Professor; PhD, Universite Libre de Bruxelles

Palo, Scott E. (https://experts.colorado.edu/display/fisid_109033/)
Professor; PhD, University of Colorado Boulder

Pao, Lucy Y. (https://experts.colorado.edu/display/fisid_107151/)
Professor; PhD, Stanford University

Park, Won (https://experts.colorado.edu/display/fisid_122676/)
Professor, Associate Chair; PhD, Georgia Institute of Technology

Perkins, Mike
Lecturer; PhD, Stanford University

Piestun, Rafael (https://experts.colorado.edu/display/fisid_118538/)
Professor; PhD, Israel Instit of Tech (Israel)

Piket-May, Melinda J. (https://experts.colorado.edu/display/fisid_102097/)
Associate Professor; PhD, Northwestern University

Pleszkun, Andrew R.
Professor Emeritus

Popovic, Zoya (https://experts.colorado.edu/display/fisid_101494/)
Distinguished Professor; PhD, California Institute of Technology

Poveda, Jorge
Assistant Professor

Psychogiou, Dimitra (https://experts.colorado.edu/display/fisid_158311/)
Assistant Professor; PhD, ETH Zürich (Switzerland)

Sankaranarayanan, Sriram (https://experts.colorado.edu/display/fisid_147413/)
Professor; PhD, Stanford University

Scherr, Timothy (https://experts.colorado.edu/display/fisid_156259/)
Senior Instructor; MS, University of Utah

Schibli, Thomas Richard (https://experts.colorado.edu/display/fisid_143464/)
Professor; PhD, Univ of Karlsruhe (Germany)

Shaheen, Sean Eric (https://experts.colorado.edu/display/fisid_153664/)
Professor; PhD, University of Arizona

Sheafor, Steve
Lecturer; PhD, University of Illinois

Siewert, Sam
Associate Professor Adjunct

Sluiter, David
Professor Adjunct; BS, Michigan Technological University

Somenzi, Fabio (https://experts.colorado.edu/display/fisid_103969/)
Professor, Associate Chair; PhD, Politecnico Di Torino (Italy)

Spriggs, Benjamin
Lecturer, Scholar in Residence

Thayer, Jeffrey P. (https://experts.colorado.edu/display/fisid_134469/)
Professor; PhD, University of Michigan Ann Arbor

Trivedi, Ashutosh (https://experts.colorado.edu/display/fisid_156589/)
Assistant Professor; PhD, University of Warwick (UK)

Van Zeghbroeck, Bart J. (https://experts.colorado.edu/display/fisid_104113/)
Professor, Associate Chair; PhD, University of Colorado Boulder

Varanasi, Mahesh K. (https://experts.colorado.edu/display/fisid_103090/)
Professor; PhD, Rice University

Wagner, Kelvin (https://experts.colorado.edu/display/fisid_105344/)
Professor; PhD, California Institute of Technology

Walkes, Dan
Lecturer

Williamson, James A.
Lecturer

Wustrow, Eric A. (https://experts.colorado.edu/display/fisid_156419/)
Assistant Professor; BE, University of Michigan Ann Arbor

Zabotin, Nikolay
Research Professor; DSc, Russian Academy of Science

Courses

ECEN 1030 (1-4) Special Topics
Special topics class.

ECEN 1100 (1) Exploring ECE
Introduces students to areas of emphasis with the ECE department through seminars presented by faculty and outside speakers. Emphasizes career opportunities, professional ethics and practices, history of the profession, and resources for academic success. Several sessions promote team building and problem solving, and provide opportunities for first year students to meet their classmates.
Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.
Additional Information: Departmental Category: General

ECEN 1310 (4) Introduction to C Programming
This introductory programming course teaches fundamental concepts using the C programming language. The class generally meets programming requirements for majors within the engineering school and assumes no prior programming experience. Includes a weekly computer lab session. Covered topics include pointers, control flow, dynamic memory, and abstract data types.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 1300 and CSPB 1300
Recommended: Corequisite APPM 1350 or equivalent.
Additional Information: Departmental Category: General

ECEN 1400 (3) Introduction to Digital and Analog Electronics
This course introduces students to electrical and computer engineering centered around creative projects in a team based setting. Through the design and implementation of functional engineering systems, students gain an understanding of the engineering design process, using real-world design tools such as prototyping, computer-aided design (CAD), 3D printing, laser cutting, printed circuit board (PCB) manufacturing and testing. The projects-based curriculum provides students with a basis in the fundamentals of analog and digital electronics with an emphasis of developing student¿s understanding of how the electronics and software operate within an interdisciplinary context. Students gain hands-on experience with the creation of systems using sensors, actuators, programming microcontrollers, prototyping circuits using breadboards, and designing systems. No prior experience or knowledge of electronics or software is required.
Equivalent - Duplicate Degree Credit Not Granted: ASTR 2500, GEEN 1400, ASEN 1400 and ASE
Requisites: Restricted to students with 0-56 credits (Freshmen or Sophomore) College of Engineering majors only.
Additional Information: Departmental Category: General

ECEN 1500 (3) Sustainable Energy
Explores how energy is generated and used in today's society. Through collaborative discussion and hands-on data collection, students will analyze the engineering challenges, fundamental limits, and potential solutions to meeting our energy needs sustainably. Students will learn to analyze numerical data, estimate orders of magnitude, and apply mathematical methods in their own lives and in the ongoing energy debate. Basic algebra required.
Requisites: College of Engineering majors are excluded from this course.
Additional Information: Arts Sci Core Curr: Quant Reasn Mathmat Skills
Arts Sci Gen Ed: Quantitative Reasoning Math
Departmental Category: General

ECEN 1840 (1-6) Independent Study
Provides an opportunity for freshmen to do independent, creative work. Department consent required.
Repeatable: Repeatable for up to 6.00 total credit hours.
Additional Information: Departmental Category: General

ECEN 2000 (1) Electrical and Computer Engineering as a Profession
Provides an introduction to the profession of electrical and computer engineering. Specific topics addressed include career opportunities in electrical and computer engineering, internship search skills, expectations for professional behavior in the classroom and in industry, and current events/ethics topics relevant to the field. Course format may include additional evening/weekend activities.
Requisites: Restricted to students with at least 27 credits (Sophomores, Juniors or Seniors). Electrical and Computer Engineering (ECEN) majors only. Restricted to students in the CMU/CU-Boulder Engineering Partnership Program only.

ECEN 2010 (1-5) Special Topics
Examines a special topic in Electrical, Computer and Energy Engineering.
Repeatable: Repeatable for up to 6.00 total credit hours.
Additional Information: Departmental Category: General

ECEN 2020 (1-5) Special Topics
Repeatable: Repeatable for up to 6.00 total credit hours.
Additional Information: Departmental Category: General

ECEN 2050 (1-5) Special Topics
Additional Information: Departmental Category: General

ECEN 2060 (3) Special Topics
Examines a special topic in Electrical, Computer and Energy Engineering.
Repeatable: Repeatable for up to 6.00 total credit hours.
Recommended: Prerequisite or corequisite PHYS 1140.
Additional Information: Departmental Category: General

ECEN 2250 (3) Introduction to Circuits and Electronics
Introduces linear circuit analysis and design, including OP-Amps. Presents DC networks, including node and mesh analysis with controlled sources. Analysis of RL and RC circuits for both transient and sinusoidal steady-state responses using phasors.
Requisites: Requires prerequisite course of (APPM 1360 or MATH 2300) and PHYS 1120 (all minimum grade C-) and pre OR corequisite course of (APPM 2360 or MATH 3430). Restricted to College of Engineering majors or IUT On Track applicants or Electrical Eng minors.
Recommended: Prerequisites ECEN 1310 or CSCI 1300.
Additional Information: Departmental Category: General

ECEN 2260 (3) Circuits as Systems
Continues basic circuit analysis of ECEN 2250: Laplace transform techniques, transfer functions, frequency response, Bode diagrams, resonant circuits, Fourier series expansions, and convolution.
Requisites: Requires prerequisite course of ECEN 2250 and (APPM 2360 or MATH 3430) (minimum grade C-). Restricted to College of Engineering students or Electrical Engineering minors or IUT On Track applicants.
Recommended: Corequisite ECEN 2270.
Additional Information: Departmental Category: General

ECEN 2270 (3) Electronics Design Lab
Provides an introduction to analysis, modeling, design, and testing of analog electronic circuits in a practical laboratory setting. The laboratory is centered around a robot platform and includes design, SPICE simulations, prototyping and testing of circuits necessary to drive and remotely control the robot.
Requisites: Requires prerequisite course of ECEN 2260 or corequisite course of ECEN 2260. Restricted to College of Engineering majors or Electrical Engineering minors or IUT On Track applicants.
Additional Information: Departmental Category: General

ECEN 2350 (4) Digital Logic
Covers the design and applications of digital logic circuits, including both combinational and sequential logic circuits. Introduces hardware descriptive language, simulating and synthesis software, and programming of field programmable arrays (FPGAs). This course is 3 lectures and 1 lab per week.
Requisites: Requires prerequisite course of ECEN 1310 or CSCI 1300 or ASEN 1320 (minimum grade C-). Restricted to College of Engineering majors or IUT On Track applicants or Computer Engineering minors.
Additional Information: Departmental Category: General

ECEN 2360 (3) Programming Digital Systems
Explores how computers and programmable hardware in general are used to implement digital systems by looking at the capabilities of central processing units, the use and control of various input/output (I/O) devices, memory organization, and concurrency management. Topics include computer architecture, instruction sets, I/O device programming, interrupts, data transfer mechanisms, semaphores, and memory management.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 3350
Requisites: Requires prerequisite course of ECEN 2350 (minimum grade C-). Restricted to College of Engineering majors or Computer Engineering minors.

ECEN 2370 (3) Embedded Software Engineering
Introduces digital system design, including system software and hardware building blocks, and system software-hardware integration. Emphasizes hands-on system development and debugging. Uses mainstream electronic system design platforms, featuring ARM processors, embedded and mobile computing platforms, using the C programming language.
Requisites: Requires prereq courses of ECEN 1310 or CSCI 1300 and ECEN 2350 and prereq or corequisite course of ECEN 2360 or CSCI 2400 (all minimum grade C-). Restricted to College of Engineering majors or IUT On Track applicants or Computer Engineering minors.

ECEN 2410 (3) Renewable Sources and Efficient Electrical Energy Systems
Introduces electrical power generation and renewable energy, including solar, wind, micro, hydro, coal, nuclear and natural gas and some of the issues in integrating renewable energy sources in the grid.
Requisites: Requires prerequisite course of PHYS 1120 (minimum grade C-). Requires prerequisite OR corequisite course of ECEN 2250. Restricted to College of Engineering majors only.
Additional Information: Departmental Category: General

ECEN 2420 (3) Electronics for Wireless Systems
Explores fundamental principles behind the operation of a radio, including a practical introduction to circuit elements. Covers the components and operation of a radio (transmitter and receiver) with simple signals. Students learn lab exercises the operation principles behind components of a complete practical radio system.
Requisites: Requires prerequisite course of PHYS 1120 and (APPM 1360 or MATH 2300) (all minimum grade C-). Requires prerequisite course of ECEN 2250 (min grade C-). Restricted to Electrical and Computer Engineering (ECEN) or Electrical Engineering (EEEN) majors onl
Additional Information: Departmental Category: General

ECEN 2440 (3) Application of Embedded Systems
Introduces embedded systems and key computer architecture concepts through a variety of projects involving programming a microcontroller in C. Provides students hands-on projects that combine the knowledge gained in their digital and analog coursework in order to engineer hardware, firmware and application software design solutions. Includes a weekly lecture and two weekly laboratory sessions.
Requisites: Requires a prerequisite course of ECEN 1310 or CSCI 1300 or ASEN 1320 (minimum grade C-). Requires prerequisite OR corequisite course of ECEN 2250.
Additional Information: Departmental Category: General

ECEN 2450 (3) Electronic and Semiconductor Device Laboratory
Explores the operation of electronic and semiconductor devices, including: resistors, transparent conductors, capacitors, inductors, diodes and light emitting diodes, photovoltaics, photodiodes, bipolar junction and field effect transistors, organic electrochemical transistors, and various sensor devices. Laboratories will involve device characterization and implementation into simple circuits, data analysis, and function fitting. Some of the laboratories will involve partial fabrication of the devices. Previously offered as a special topics course. Recommended restriction: sophomores or juniors; seniors cannot enroll in the course.
Requisites: Requires prerequisite or corequisite course of ECEN 2250 (minimum grade C-). Restricted to College of Engineering students only.
Recommended: Prerequisite PHYS 1140.

ECEN 2703 (3) Discrete Mathematics for Computer Engineers
Emphasizes elements of discrete mathematics appropriate for computer engineering. Topics: logic, proof techniques, algorithms, complexity, relations, and graph theory.
Requisites: Requires prerequisite courses of ECEN 1310 or CSCI 1300 or ASEN 1320 and APPM 1360 or MATH 2300 (all minimum grade C-). Restricted to College of Engineering students only.
Additional Information: Departmental Category: Computer and Digital Systems

ECEN 2830 (1-5) Special Topics
Examines a special topic in Electrical, Computer and Energy Engineering.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: General

ECEN 2840 (1-6) Independent Study
Offers an opportunity for sophomores to do independent, creative work. Department consent required.
Repeatable: Repeatable for up to 6.00 total credit hours.
Additional Information: Departmental Category: General

ECEN 3002 (3) Special Topics
Examines a special topic in Electrical, Computer and Energy Engineering.
Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 3003 (3-5) Special Topics
Additional Information: Departmental Category: Computer and Digital Systems

ECEN 3004 (3-5) Special Topics
Additional Information: Departmental Category: Electromagnetics and Remote Sensing

ECEN 3010 (3) Circuits and Electronics for Mechanical Engineers
Covers analysis of electrical circuits by use of Ohm's law, network reduction, node and loop analysis, Thevenin's and Norton's theorems, DC and AC signals, transient response of simple circuits, transfer functions, basic diode and transistor circuits, and operational amplifiers. Includes introductory digital electronics and microprocessors/microcontrollers.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 3017
Requisites: Requires prereq course of PHYS 1120 and a prereq or coreq course of APPM 2360 or APPM 3310 or MATH 3430 (all min grade C-). Restricted to MCEN or EVEN or Integrated Design Engr (IDEN-BSIDE) students.
Additional Information: Departmental Category: General

ECEN 3090 (3) Introduction to Quantum Computing
Covers the basics of quantum computation, including the basics of quantum information; axioms of quantum mechanics; quantum circuits and universality; the relationship between quantum and classical complexity classes; simple quantum algorithms such as the quantum Fourier transform; Shor factoring algorithm; Grover search algorithm; physical implementation of quantum computation; error correction and fault tolerance.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 3090 and PHYS 3090
Requisites: Requires prerequisite course of APPM 2360 or APPM 3310 or CSCI 2820 or MATH 2130 or MATH 2135 (minimum grade C-).

ECEN 3103 (3) Automation of Industrial Processes
Introduces students to Programmable Logic Controller (PLC) architecture, ladder logic programming, and programming Human Machine Interfaces (HMI). Students learn how to automate manufacturing processes and applications of PID control.
Requisites: Requires prerequisite course of ECEN 2250 (minimum grade D-). Restricted to students in the CMU/CU-Boulder Engineering Partnership Program only.

ECEN 3170 (3) Electromagnetic Energy Conversion 1
Real and reactive power in single phase circuits, power triangle, balanced three-phase circuits, wye and delta connections, introduction to electromagnetic machines, transformers (single and three-phase) and their equivalent circuits, AC-machinery fundamentals, synchronous generator from a magnetic field point of view, synchronous motors and condensers, three-phase induction motors, DC machinery fundamentals, DC motors, single phase motors. Matlab/Simulink will be used.
Requisites: Requires prerequisite courses of ECEN 2260 and PHYS 1120 (minimum grade C-). Restricted to College of Engineering majors only.
Additional Information: Departmental Category: Power

ECEN 3250 (3) Microelectronics
Develops a basic understanding of active semiconductor devices. Focuses on building an understanding of BJT and CMOS devices in both digital and analog applications.
Requisites: Requires prerequisite course of ECEN 2250 (minimum grade C-). Restricted to College of Engineering students or Electrical Engineering minors.
Additional Information: Departmental Category: General

ECEN 3300 (3) Linear Systems
Characterization of linear time-invariant systems in time and frequency domains. Continuous time systems are analyzed using differential equations and Laplace and Fourier transforms. Discrete time systems are analyzed using difference equations, Z-transforms and discrete time Fourier transforms. Sampling and reconstruction of signals using the sampling theorem. Applications of linear systems include communications, signal processing, and control systems.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 3301
Requisites: Requires prerequisite course of ECEN 2260 (minimum grade C-). Restricted to College of Engineering majors only.
Additional Information: Departmental Category: General

ECEN 3301 (3) Biomedical Signals and Systems
Introduces theory and methods to characterize and process biological signals from a variety of sources and engineering applications in the time and frequency domains. This course covers mathematical and computational tools for signal analysis with emphasis on discrete time signals and digital processing. Topics include noise, sampling, Fourier transforms, filter design, LTI systems, and image processing with exercises in MATLAB.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 3300
Requisites: Requires prerequisite course of ECEN 2260 (minimum grade C-).
Recommended: Prerequisite BMEN 3030.

ECEN 3303 (3) Introduction to Robotics
Introduces students to fundamental concepts in autonomous robotics: mechanisms, locomotion, kinematics, control, perception and planning. Consists of lectures and lab sessions that are geared toward developing a complete navigation stack on a miniature mobile robotic platform.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 3302 and CSPB 3302
Requisites: Requires prerequisite courses of (CSCI 2270 or CSCI 2275) and (APPM 3170 or CSCI 2824 or ECEN 2703 or MATH 2001) and (APPM 2360 or APPM 3310 or CSCI 2820 or MATH 2130 or MATH 2135) (all minimum grade C-).
Additional Information: Departmental Category: Computer and Digital Systems

ECEN 3320 (3) Semiconductor Devices
Highlights the fundamentals of semiconductor materials and devices. Topics include the electrical and optical properties of semiconductors, the theory of Pn junctions, bipolar and field-effect transistors, and optoelectronic devices.
Requisites: Requires prerequisite course of ECEN 2250 (minimum grade C-). Restricted to College of Engineering students or Electrical Engineering minors.
Additional Information: Departmental Category: General

ECEN 3350 (3) Programming Digital Systems
Explores how computers and programmable hardware in general are used to implement digital systems by looking at the capabilities of central processing units, the use and control of various input/output (I/O) devices, memory organization, and concurrency management. Topics include computer architecture, instruction sets, I/O device programming, interrupts, data transfer mechanisms, semaphores, and memory management.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 2360
Requisites: Requires prerequisite course of ECEN 2350 (minimum grade C-). Restricted to College of Engineering majors only.
Additional Information: Departmental Category: Computer and Digital Systems

ECEN 3400 (3) Electromagnetic Fields and Waves
Electromagnetic fields are covered at an introductory level, starting with electrostatics and continuing with DC current, magnetostatics, time-varying magnetic fields, waves on transmission lines, Maxwell's equations and the basics of plane waves. The use of fields in inductors, capacitors, resistors, transformers, and energy and power concepts are studied.
Requisites: Requires prerequisites (APPM 2350 or MATH 2400) and (APPM 2360 or MATH 3430) and PHYS 1120 and ECEN 2250 (all minimum grade C-). Restricted to College of Engineering majors or Electrical Engineering minors.
Additional Information: Departmental Category: General

ECEN 3410 (3) Electromagnetic Waves and Transmission
Covers reflected and transmitted plane waves in layered media, Poynting's theorem of electromagnetic power, two-conductor transmission line theory and practice, Smith chart usage and impedance matching, waveguides, and elements of antenna theory.
Requisites: Requires prerequisite course ECEN 3400 (minimum grade C-). Restricted to College of Engineering majors or Electrical Engineering minors.
Additional Information: Departmental Category: Electromagnetics and Remote Sensing

ECEN 3593 (3) Computer Organization
Studies computer design at the microarchitecture level. Discusses instruction set architecture design, arithmetic and logic unit design, control logic, memory design and caches, simple pipelining, I/O and peripheral devices. Briefly covers aspects of modern computer architecture, such as multicore processors and hardware security.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 3593 ECEN 5590
Requisites: Requires prerequisite course of ECEN 2360 or ECEN 3350 or CSCI 2400 (minimum grade C-). Restricted to College of Engineering majors only.
Additional Information: Departmental Category: Computer and Digital Systems

ECEN 3730 (3) Practical Printed Circuit Board Design and Manufacture
This course prepares students with all skills needed to convert a back-of-the-napkin circuit sketch into a working widget with first time success. Students will master the seven steps in every board project: planning, selecting components, schematic entry, layout, assembly, bring up and debug, and documentation. This process will be exercised with three different board design projects with increasing challenge. A commercial EDA tool widely used in the electronics industry will be used for all projects. Previously offered as a special topics course. Formerly ECEN 4730.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 4720 or ECEN 5720 or ECEN 5730
Requisites: Requires prerequisite courses of ECEN 2250 and ECEN 2260 and ECEN 2270 (all minimum grade C-).

ECEN 3753 (3) Real-Time Operating Systems
Today's electronic systems require real-time management and scheduling of hardware resources alongside complex multi-threaded software applications. This course covers what is an Operating Systems, the development of multi-threaded applications, and satisfying real-time system obligations. Real-Time profiling tools will be used to learn and visualize how the operating system is scheduling the software tasks and hardware resources to meet resource constraint embedded system applications. Formerly offered as a special topics course.
Requisites: Requires prerequisite course (ECEN 2370 or ECEN 3360) and CSCI 2270 (all minimum grade C-). Restricted to College of Engineering students only.

ECEN 3763 (3) FPGA Design and HDL
Build upon the foundations of Digital Logic to learn the theory of FPGA architectures, design practices, and design processes. The emphasis is to architect and design complex FPGA based projects demonstrating overall project organization and creation of milestones, testing requirements, proper use of physical and design constraints, and successful implementation and demonstration. Previously offered as a special topics course.
Requisites: Requires prerequisite courses of ECEN 2350 and (ECEN 1310 or CSCI 1300 or ASEN 1320) (minimum grade C-). Restricted to College of Engineering students only.
Recommended: Prerequisites ECEN 2360 and ECEN 2370.

ECEN 3810 (3) Introduction to Probability Theory
Covers the fundamentals of probability theory, and treats the random variables and random processes of greatest importance in electrical engineering. Provides a foundation for study of communication theory, control theory, reliability theory, and optics.
Equivalent - Duplicate Degree Credit Not Granted: MATH 4510 or APPM 3570
Requisites: Requires prerequisite course of APPM 2350 or MATH 2400 (minimum grade C-). Restricted to College of Engineering majors only.
Additional Information: Departmental Category: General

ECEN 3840 (1-6) Independent Study
Offers an opportunity for juniors to do independent, creative work. Department consent required.
Repeatable: Repeatable for up to 6.00 total credit hours.
Additional Information: Departmental Category: General

ECEN 3841 (1-6) Independent Study
Offers an opportunity for juniors to do independent, creative work.
Repeatable: Repeatable for up to 6.00 total credit hours.
Additional Information: Departmental Category: General

ECEN 3915 (3) Foundations of Quantum Engineering
Introduces engineers to quantum theory. In this course you will learn how to describe many different physical systems (such as atoms, electrons, light, mechanical oscillators, and tops) mathematically. It also explores different notions of quantumness such as entanglement and non-contextuality. The foundations obtained in this course are important for further study of quantum hardware (sensors), communication, and computing. Formerly ECEN 4915.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 5915
Requisites: Requires prerequisite courses of (ASEN 1320 OR ECEN 1310 OR ECEN 2310 OR CSCI 1300 OR APPM 3050 OR PHYS 2600) (MATH 3135 OR MATH 2130 OR MATH 2135 OR APPM 2360 OR APPM 3310 OR CSCI 2820) all minimum grade C-.
Recommended: Prerequisite MATH 3430 or APPM 2360.

ECEN 4000 (1-3) Special Topics
Examines a special topic in Electrical, Computer and Energy Engineering.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: General

ECEN 4001 (1-4) Special Topics
Examines a special topic in Electrical, Computer and Energy Engineering.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Bioengineering

ECEN 4002 (1-4) Special Topics
Credit and subject matter to be arranged. Department enforced prerequisite: varies
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 4003 (1-4) Special Topics
Credit and subject matter to be arranged. Department enforced prerequisite: varies
Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

ECEN 4004 (1-4) Special Topics
Examines a special topic in Electrical, Computer and Energy Engineering.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

ECEN 4005 (3) Special Topics
Examines a special topic in Electrical, Computer and Energy Engineering.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

ECEN 4006 (3) Special Topics
Examines a special topic in Electrical, Computer and Energy Engineering.
Repeatable: Repeatable for up to 9.00 total credit hours.
Additional Information: Departmental Category: Optics

ECEN 4007 (1-4) Special Topics
Examines a special topic in Electrical, Computer and Energy Engineering.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

ECEN 4009 (1-4) Special Topics
Examines a special topic in Electrical, Computer and Energy Engineering.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: VLSI CAD Methods

ECEN 4011 (1-4) Special Topics
Examines a special topic in Electrical, Computer and Energy Engineering.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 5011
Repeatable: Repeatable for up to 9.00 total credit hours.
Additional Information: Departmental Category: Bioengineering

ECEN 4012 (1-4) Special Topics
Examines a special topic in Electrical, Computer and Energy Engineering.
Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 4013 (3) Special Topics
Examines a special topic in Electrical, Computer and Energy Engineering.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Computer and Digital Systems

ECEN 4016 (1-4) Special Topics
Examines a special topic in Electrical, Computer and Energy Engineering.
Additional Information: Departmental Category: Optics

ECEN 4017 (1-4) Special Topics
Examines a special topic in Electrical, Computer and Energy Engineering.
Additional Information: Departmental Category: Power

ECEN 4018 (1-4) Special Topics
Examines a special topic in Electrical, Computer and Energy Engineering.
Additional Information: Departmental Category: Dynamical Systems and Control

ECEN 4021 (1-4) Special Topics
Examines a special topic in Electrical, Computer and Energy Engineering.
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Engineering majors only.
Additional Information: Departmental Category: Bioengineering

ECEN 4024 (1-4) Special Topics
Examines a special topic in Electrical, Computer and Energy Engineering.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 5024
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Electromagnetics and Remote Sensing

ECEN 4028 (1-4) Special Topics
Examines a special topic in Electrical, Computer and Energy Engineering.
Additional Information: Departmental Category: Dynamical Systems and Control

ECEN 4031 (1-4) Special Topics
Examines a special topic in Electrical, Computer and Energy Engineering.

ECEN 4033 (3) Special Topics
Examines a special topic in Electrical, Computer and Energy Engineering.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

ECEN 4043 (1-4) Special Topics
Examines a special topic in Electrical, Computer and Energy Engineering.

ECEN 4053 (1-4) Special Topics
Special topics course.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 5053
Repeatable: Repeatable for up to 4.00 total credit hours.
Additional Information: Departmental Category: Computer and Digital Systems

ECEN 4111 (3) Engineering Applications in Biomedicine: Cardiovascular Devices and Systems
Application of engineering in medicine has grown dramatically in recent years. Engineers enter the clinical and experimental medical arenas with many new devices and procedures emerging as alternatives to conventional surgical and pharmacological treatments. This course, presents general principles of biomedical engineering as applied to the development of a variety of specific devices and techniques for therapy and diagnosis, with a focus on devices and systems for the cardiovascular system. This class will present relevant anatomy and physiology as part of the class discussion, which will be supplemented by a physiology reference text. Questions, exchanges of ideas, and active classroom discussion are encouraged. Biomedical engineering is an emerging field which is highly interdisciplinary- engineers and scientists from all fields are invited and encouraged to participate in this course. There are no formal prerequisites.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 5111
Recommended: Prerequisite ECEN 2250 or equivalent circuits course.

ECEN 4114 (3) Automation of Industrial Processes
Introduces students to Programmable Logic Controller (PLC) architecture, ladder logic programming, and programming Human Machine Interfaces (HMI). Students learn how to automate manufacturing processes and applications of PID control.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 4114
Requisites: Prerequisite MCEN 3017 Circuits and Electronics for Mechanical Engineers.

ECEN 4121 (3) Design of Implantable Medical Devices: Neuromodulation
Application of engineering in medicine has grown dramatically in recent years. Engineers enter the clinical and experimental medical arenas with many new devices and procedures emerging as alternatives to conventional surgical and pharmacological treatments. This course, presents general principles of biomedical engineering as they are applied to the development of a variety of specific implantable devices.It will present relevant anatomy and physiology as part of the class discussion, which will be supplemented by a physiology reference text. Questions, exchanges of ideas, and active classroom discussion are encouraged throughout the course. Biomedical engineering is an emerging field which is highly interdisciplinary- engineers and scientists from all fields are invited and encouraged to participate in this course.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 5121
Recommended: Prerequisite ECEN 2250 or equivalent circuits course.

ECEN 4133 (3) Fundamentals of Computer Security
Practice thinking like an attacker by exploring several modern computer security attacks and defenses through hands-on programming projects. Topics include applied cryptography (encryption, authentication), web security (XSS, CSRF, SQL Injection), network security (TLS, MITM attacks), application security (shell injection, buffer overflows), and other current events and trends (government surveillance, botnets, cryptocurrencies).
Equivalent - Duplicate Degree Credit Not Granted: CSCI 4133
Requisites: Requires prerequisite courses of CSCI 2270 and ECEN 2360 or CSCI 2400 or ECEN 3350 (all minimum grade C-).
Recommended: Corequisite ECEN 3593 (Computer Organization).

ECEN 4138 (3) Control Systems Analysis
Analysis and design of continuous time control systems using classical and state space methods. Laplace transforms, transfer functions and block diagrams. Stability, dynamic response, and steady-state analysis. Analysis and design of control systems using root locus and frequency response methods. Computer aided design and analysis. Department enforced prerequisite: background in Laplace transforms, linear algebra,and ordinary differential equations.
Equivalent - Duplicate Degree Credit Not Granted: ASEN 4114 and ASEN 5114 ECEN 5138 and MCEN 4138 and MCEN 5138
Requisites: Requires prerequisite course of ECEN 3300 or MCEN 4043 (minimum grade C-). Restricted to College of Engineering majors only.
Additional Information: Departmental Category: Dynamical Systems and Control

ECEN 4224 (3) High Speed Digital Design
Covers fundamentals of high-speed properties of logic gates, measurement techniques, transmission lines, ground planes and layer stacking, terminations, vias, power systems, connectors, ribbon cables, clock distribution and clock oscillators.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 5224
Requisites: Requires prerequisites of ECEN 2260 and ECEN 3400 (minimum grade C-). Restricted to College of Engineering students only.
Additional Information: Departmental Category: Electromagnetics and Remote Sensing

ECEN 4242 (3) Communication Theory
Covers modern digital and analog communication systems. Analysis and design of communication signals, transmitters, channels, and receivers. Amplitude and angle modulation and demodulation are treated as well as theory and application of digital data transmission. Emphasis is also placed on the analysis and mitigation of the effects of noise through signal design at the transmitter and signal processing at the receiver.
Requisites: Requires prerequisite course of (ECEN 3300 or ECEN 3301) and (ECEN 3810 or APPM 3570 or MATH 4510 or STAT 3100) (all minimum grade C-). Restricted to College of Engineering majors only.
Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 4295 (3) Foundations of Quantum Hardware
Introduces students to the principles and operation of quantum hardware. In this course you will learn how to describe many different physical systems (trapped Ions, superconducting circuits, and optical systems) mathematically. This will allow you to model quantum sensors, communication systems and computing hardware.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 5295

ECEN 4313 (3) Concurrent Programming
Introduces the theory and practice of multicore programming. The first part of the course presents foundations of concurrent programming: mutual exclusion, wait-free and lock-free synchronization, spin locks, monitors, memory consistency models. The second part presents a sequence of concurrent data structures and techniques used in their implementations (coarse-grained, fine-grained, optimistic and lock-free synchronization).
Equivalent - Duplicate Degree Credit Not Granted: CSCI 4313 and ECEN 5313 and CSCI 5313
Requisites: Requires prerequisite courses of CSCI 2270 and (ECEN 2360 or ECEN 3350 or CSCI 2400) (minimum grade C-). Restricted to College of Engineering students only.
Recommended: Prerequisite ECEN 3593 or CSCI 3593.

ECEN 4322 (3) Data and Network Science
The course covers the theory and design of algorithms that are used to model, analyze, and extract information from large scale datasets and networks. The course includes a project.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 5322
Requisites: Prereq of(APPM 2350 or MATH 2400) (APPM 2360 or MATH 3430) (CSCI 1200 or CSCI 1300 or CSCI 1320 or ECEN 1310 or ASEN 1320 or INFO 1201 or ATLS 1300 or CHEN 1310) (ECEN 2703 or CSCI 2824 or APPM 3170 or MATH 2001)(min grade C-).Restricted to ENGR mjrs

ECEN 4341 (3) Bioelectromagnetics
Effects of electric and magnetic fields on biological systems are described with applications to therapy and safety. The complexity of biological systems is described to provide a better understanding of the distribution of fields inside the body. Risk analysis is also introduced.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 5341
Requisites: Requires prerequisite courses of ECEN 3400 and (ECEN 3810 or APPM 3570 or MATH 4510 or STAT 3100) (all minimum grade C-). Restricted to College of Engineering students only.
Additional Information: Departmental Category: Bioengineering

ECEN 4395 (3) Organic Electronic Materials and Devices
Covers the materials and physics principles of organic electronic devices, including organic light emitting diodes (OLEDs), photovoltaics (OPVs), field effect transistors (OFETs), electrochemical transistors (OECTs), and bioelectronic and neuromorphic devices. The molecular, structural, and electronic properties of organic semiconductors are introduced, and the architectures and operating principles of the devices are then taught. Assignments will require computational solutions and simulations. Previously offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 5395
Recommended: Prerequisite ECEN 5345.

ECEN 4423 (3) Chaotic Dynamics
Explores chaotic dynamics theoretically and through computer simulations. Covers the standard computational and analytical tools used in nonlinear dynamics and concludes with an overview of leading-edge chaos research. Topics include time and phase-space dynamics, surfaces of section, bifurcation diagrams, fractal dimension and Lyapunov exponents.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5446 and CSCI 4446 and ECEN 5423
Requisites: Requires prerequisite courses of (APPM 1360 or MATH 2300) and (ECEN 1310 or CSCI 1300 or ASEN 1320) and PHYS 1110 (all minimum grade C-). Restricted to College of Engineering students only.
Recommended: Prerequisites PHYS 1120 and CSCI 3656 and (APPM 3310 or CSCI 2820 or MATH 2130 or MATH 2135 or MATH 3130 or MATH 3135).
Additional Information: Departmental Category: Computer and Digital Systems

ECEN 4517 (3) Power Electronics and Photovoltaic Power Systems Laboratory
Focuses on analysis, modeling, design and testing of electrical energy processing systems in a practical laboratory setting. Studies power electronics converters for efficient utilization of available energy sources, including solar panels and utility. Experimental projects involve design, fabrication and testing of a solar power system.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 5517
Requisites: Requires prerequisite course of ECEN 4797 (minimum grade C-). Restricted to College of Engineering majors only.
Additional Information: Departmental Category: Power

ECEN 4532 (3) Digital Signal Processing Laboratory
Develops experience in code development, debugging and testing of real-time digital signal processing algorithms using dedicated hardware. Applications include filtering, signal synthesis, audio special effects and frequency domain techniques based on the Fast Fourier Transform.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 5532
Requisites: Requires prerequisite course of ECEN 4632 (minimum grade C-). Restricted to College of Engineering majors only.
Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 4553 (3) Compiler Construction
Introduces the principles and techniques for compiling high-level programming languages to assembly code. Topics include parsing, instruction selection, register allocation, and compiling high-level features such as polymorphism, first-class functions, and objects. Students build a complete compiler for a simple language.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 5523 and CSCI 4555 and CSCI 5525
Requisites: Requires prerequisite courses of (ECEN 2703 or APPM 3170 or CSCI 2824 or MATH 2001) and (ECEN 2360 or ECEN 3350 or CSCI 2400) (all minimum grade C-). Restricted to College of Engineering students or Computer Engineering minors.
Additional Information: Departmental Category: Computer and Digital Systems

ECEN 4555 (3) Principles of Energy Systems and Devices
Develops principles underlying electronic, optical and thermal devices, materials and nanostructures for renewable energy. Provides a foundation in statistical thermodynamics and uses it to analyze the operation and efficiency limits of devices for photovoltaics, energy storage (batteries & ultra-capacitors), chemical conversion (fuel cells and engines), solid state lighting, heat pumps, cooling and potentially harvesting zero-point energy from the vacuum.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 5555
Requisites: Requires prerequisite courses of (ECEN 3810 or APPM 3570 or MATH 4510 or STAT 3100) and (PHYS 2130 or PHYS 2170) (all minimum grade C-). Restricted to College of Engineering students only.
Additional Information: Departmental Category: Nanostructures and Devices

ECEN 4606 (3) Undergraduate Optics Laboratory
Introduces fundamental concepts, techniques, and technology of modern optical and photonic systems. Individual labs cover particular fields of optical technology, including light sources such as lasers and Leds, interferometers, fiber-optic communications, photodetection, spectrometers, and holography. Practical skills such as how to align an optical system will also be emphasized.
Requisites: Requires prerequisite course of ECEN 3400 (minimum grade C-). Restricted to College of Engineering majors only.
Additional Information: Departmental Category: Optics

ECEN 4610 (3) Capstone Laboratory Part 1
Hands-on laboratory experience utilizing teams in the systematic proposal, design, integration, and testing of an electronic/computer based system. Results will be the prototype of a stand-alone analog/digital system. Must have completed all required Advanced Analog Core courses for major, except one course may be taken concurrently by petition. Must take ECEN 4620 to complete the sequence. Minimum required grade for this course and ECEN 4620 is C-. IDEN majors follow different requisites and should work with their advisor for requisite planning and enrollment assistance.
Requisites: PrereqsECEN 2270,2370(ECEN 2360orCSCI 2400) (ECEN 3250 3300)or(ECEN 3250 3400)or(ECEN 3300 3400)or(ECEN 3753 3250)or(ECEN 3753 3300)or(ECEN 3753 3400)orIDEN-ELE prereq ECEN 2260,2270,GEEN 2400,3400 3 of: ECEN 2360,2370,3250,3300,3400 min grade C
Additional Information: Departmental Category: General

ECEN 4616 (3) Optoelectronic System Design
Examines optical components and electro-optic devices with the goal of integrating into well design optoelectronic systems. Sample systems include optical storage, zoom lenses and telescopes.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 5616
Requisites: Requires prerequisite course of ECEN 3400 (minimum grade C-).
Additional Information: Departmental Category: Optics

ECEN 4620 (3) Capstone Lab, Part 2
Hands-on laboratory experience for teams in the systematic proposal, design, build integration, test and documentation of an electronic/computer based system. Results will be a reliably operating, stand-alone analog/digital system, with publication quality technical documentation. Department enforced prerequisite: advanced analog core courses.
Requisites: Requires prerequisite course of ECEN 4610 (minimum grade C-).
Additional Information: Departmental Category: General

ECEN 4632 (3) Introduction to Digital Filtering
Covers both the analysis and design of FIR and IIR digital filters. Discusses implementations in both software and hardware. Emphasizes use of the FFT as an analysis tool. Includes examples in speech processing, noise canceling, and communications.
Requisites: Requires prerequisite course of ECEN 3300 (minimum grade C-). Restricted to College of Engineering majors only.
Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 4634 (3) Microwave and RF Laboratory
This course is a hands-on introduction to RF and microwave topics, from fundamentals including vector network analyzer (VNA) calibration and operation, power measurements, and antenna characterization, to system-level topics such as RADAR systems and superheterodyne links. Students work in small groups on weekly experiments based on both coaxial and waveguide setups. An understanding of electromagnetic waves (such as covered in ECEN 3400 and ECEN 3410) is assumed. The graduate version of the course (ECEN 5634) includes additional homework and exam problems and extended laboratory exercises compared to ECEN 4634.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 5634
Requisites: Requires prerequisite course of ECEN 3410 (minimum grade C-). Restricted to College of Engineering majors only.
Additional Information: Departmental Category: Electromagnetics and Remote Sensing

ECEN 4638 (3) Control Systems Laboratory
Provides experience in control system design and analysis, using both real hardware and computer simulation. Covers the entire control system design cycle: modeling the system, synthesizing a controller, conducting simulations, analyzing the design to suggest modifications and improvements, and implementing the design for actual testing.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 5638, MCEN 4638, and MCEN 5638
Requisites: Requires prerequisite course of ECEN 4138 (minimum grade C-). Restricted to College of Engineering majors only.
Additional Information: Departmental Category: Dynamical Systems and Control

ECEN 4693 (3) Advanced Computer Architecture
Provides a broad-scope treatment of important concepts in the design and implementation of high-performance computer systems. Discusses important issues in the pipelining of a processor, out-of-order instruction issue and superscalar designs, design of cache memory systems for such systems, and architectural features required for multicore processor designs. Also studies current and historically important computer architectures.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 5593 and CSCI 5593
Requisites: Requires prerequisite course of ECEN 3593 or CSCI 3593 (minimum grade C-). Restricted to ECEN or EEEN majors and Computer Engineering minors.
Recommended: Prerequisite knowledge of C/C++ and Assembly programming languages, and computer organization and experience using a Linux system for programming and its associated capabilities of compilation and debugging.

ECEN 4720 (1) Practical Printed Circuit Board Design Accelerator
This course introduces students to the most important skills needed to convert a back-of-the-napkin circuit sketch into a working widget with first time success. Students will learn the seven steps in every board project: planning, selecting components, schematic entry, layout, assembly, bring up and debug, and documentation. This process will be exercised with a custom board design project. A commercial EDA tool widely used in the electronics industry will be used for the project. Previously offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 5720 ECEN 3730 or ECEN 5730
Requisites: Requires prerequisite courses of ECEN 2250 and ECEN 2260 and ECEN 2270 (all minimum grade C-).

ECEN 4732 (3) Deep Learning and Its Connections to Information Theory
Provides a hands-on introduction to deep learning using Python and explores related concepts in information theory to guide the design of neural networks. Covers basic and advanced mechanisms and architectures of neural networks such as Transformers, an introduction to related concepts in information theory, and information theory-guided neural network design and optimization.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 5732
Requisites: Prerequisite or corequisite of ECEN 3810 Introduction to Probability Theory.

ECEN 4752 (3) Communication Laboratory
Analysis and design of realistic communication signals in a modern digital signal processing environment. Covers both analog and digital communication signals with and without noise and distortion. Pulse amplitude modulation is used initially at baseband and then combined with amplitude and phase/frequency modulation to produce the kind of bandpass signals that are used in cell phones and wireless data networks. Formerly ECEN 4652.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 5752
Requisites: Requires prerequisite course of ECEN 4242 (minimum grade C-). Restricted to College of Engineering majors only.
Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 4753 (3) Computer Performance Modeling
Presents a broad range of system measurement and modeling techniques, emphasizing applications to computer systems. Covers topics including system measurement, workload characterization and analysis of data; design of experiments; queuing theory and queuing network models; and simulation.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5753 and CSCI 4753 and ECEN 5753
Requisites: Requires prerequisite course of CSCI 3753 or ECEN 3753 (minimum grade C-). Restricted to College of Engineering students only.
Recommended: Prerequisite a course in statistics.
Additional Information: Departmental Category: Computer and Digital Systems

ECEN 4763 (3) Embedded Software Algorithms
Embedded Systems are defined by resource restrictions that could include computational performance, energy, memory space, and cost. These algorithms need to be evaluated against the targeted end-system constraints. Applications in many areas of real-time decision-making are discussed, from hybrid vehicle battery usage to queue management systems in real-time-priced tollways, aircraft holding patterns, and hard disk drive performance optimization. This is a programming course.
Requisites: Requires prerequisite courses of (ECEN 2370 or ECEN 3360) and CSCI 2270 (all minimum grade C-). Restricted to College of Engineering students only.

ECEN 4797 (3) Introduction to Power Electronics
An introduction to switched-mode converters. Includes steady-state converter modeling and analysis, switch realization, discontinuous conduction mode and transformer-isolated converters. Ac modeling of converters using averaged methods, small-signal transfer functions, feedback loop design and transformer design.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 5797
Requisites: Requires prerequisite course of ECEN 3250 (minimum grade C-). Restricted to College of Engineering majors only.
Additional Information: Departmental Category: Power

ECEN 4827 (3) Analog IC Design
Covers the fundamentals of transistor-level analog integrated circuit design. Starting with motivations from application circuits, the course develops principles of dc biasing, device models, amplifier stages, frequency response analysis and feedback and compensation techniques for multi-stage operational amplifiers.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 5827
Requisites: Requires prerequisite course of ECEN 3250 (minimum grade C-). Restricted to College of Engineering majors only.
Additional Information: Departmental Category: Power

ECEN 4840 (1-6) Independent Study
Offers an opportunity for seniors to do independent, creative work. Department consent required.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: General

ECEN 4841 (1-6) Independent Study
Offers an opportunity for seniors to do independent, creative work.
Repeatable: Repeatable for up to 6.00 total credit hours.

ECEN 4925 (3) Foundations of Quantum Hardware
Introduces students to the principles and operation of quantum hardware. In this course you will learn how to describe many different physical systems (trapped Ions, superconducting circuits, and optical systems) mathematically. This will allow you to model quantum sensors, communication systems and computing hardware.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 5295
Requisites: Requires prerequisite courses of ECEN 3915 OR (pre-req PHYS 3220 AND co-Req PHYS 4410) (all minimum grade C-). Restricted to College of Engineering students or Quantum Engineering minors.

ECEN 4933 (3) Engineering Genetic Circuits
Presents recent research into methods and software tools for the modeling, analysis, and design of genetic circuits that are enabling the new field of synthetic biology. Teaches both biological and engineering principles in order to enable collaborations between engineers and biologists working in the field of synthetic biology.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 5933
Recommended: Prerequisite some familiarity with genetics, cell biology, molecular biology or biochemistry or familiarity with engineering methods for modeling, analysis and design, but students are not expected to have knowledge in both.

Electrical and Computer Engineering - Bachelor of Science (BSEC)

A degree in electrical and computer engineering provides graduates the opportunity to enter the profession of engineering and to engage in work as a design, production, testing, consulting, research, teaching, or management professional in a wide variety of careers in the computer industry, embedded systems, telecommunications, instruments, the power and renewable energy industry, the biomedical industry, aerospace and academia. Some graduates also go on to develop careers in other professions like law and medicine.

Examples of career opportunities include development of new electrical or electronic devices, instruments or products; design of equipment or systems; production and quality control of electrical products for private industry or government; sales or management for a private firm or government; and teaching and research in a university.

Colorado Mesa University/University of Colorado Boulder Partnership Program (Electrical & Computer Engineering)

Colorado Mesa University (CMU) (http://www.coloradomesa.edu/engineering/) and CU Boulder have created a partnership to deliver specific engineering baccalaureate programs **in their entirety in Grand Junction**, Colorado. The first two years of coursework are taught by CMU faculty and the second two years of coursework are taught by CU Boulder

faculty located in Grand Junction. Students completing the programs will be awarded a Bachelor of Science from CU Boulder.

Degrees are offered in civil engineering, electrical & computer engineering, and mechanical engineering, with additional details on the engineering partnership program website (https://www.coloradomesa.edu/engineering/partnership-program/).

Coursework requirements and plans of study specific to this partnership can be found on the Colorado Mesa University electrical and computer engineering partnership website (https://www.coloradomesa.edu/engineering/degrees/electrical-computer-engineering.html). Learn more about this program on the CU Boulder partnership website (https://www.colorado.edu/academics/cmu-cu-bs-electrical-computer-engineering/).

Requirements

Required courses in engineering, physical science and mathematics are interwoven throughout the curriculum to provide a balanced education in the fundamentals of the electrical engineering profession. The core courses are complemented by technical electives, humanities and social sciences electives (http://www.colorado.edu/engineering/academics/policies/hss/), free electives and a writing course (http://www.colorado.edu/engineering/academics/policies/hss/) for a total of 128 credits required for the degree. Electrical and Computer Engineering is also offered in partnership with Colorado Mesa University (https://www.coloradomesa.edu/engineering/partnership-program/) in Grand Junction, Colorado. Specific coursework requirements and plans of study can be found on the partnership website (https://www.coloradomesa.edu/engineering/degrees/electrical_computer-engineering-partnership.html).

A BS in Electrical & Computer Engineering *cannot* be earned in combination with a BS in Electrical Engineering or Integrated Design Engineering, Electrical Emphasis. A BS in Electrical & Computer Engineering also cannot be completed alongside any of the following minors: electrical engineering, computer engineering and signals & systems engineering.

Prerequisites and Passing Grades

All courses must be taken for a letter grade. The minimum passing grade for a course that is a prerequisite or corequisite for another required course is C-. If a grade of D+ or lower is received in a course which is a prerequisite to another, the student may not register for the subsequent course until the first grade has been raised to a C- or higher. If a grade of D+ or lower is received in a course which is a corequisite to another, the course must be repeated until a grade of C- or higher is achieved. ECEN 4610 Capstone Laboratory Part 1 and ECEN 4620 Capstone Lab, Part 2 both require a grade of C- or higher for graduation.

The minimum passing grade for a course that is not specifically a prerequisite or corequisite for another required course is D-.

The Electrical, Computer and Energy Engineering Department reserves the right to drop students enrolled in ECEN courses who have not met the minimum prerequisite requirements. It is the student's responsibility to communicate with the department if summer coursework and/or transfer credit will be used to meet the prerequisite requirement.

Required Courses and Credits

Code	Title	Credit Hours
Humanities, Social Sciences and Writing		
Writing [1]		3
Humanities & Social Sciences - at least 6 credits must be upper-division (3000-level or higher) [1]		15
Math and Science		
APPM 1350	Calculus 1 for Engineers	4
or MATH 1300	Calculus 1	
or APPM 1345	Calculus 1 with Algebra, Part B	
APPM 1360	Calculus 2 for Engineers	4
or MATH 2300	Calculus 2	
APPM 2350	Calculus 3 for Engineers	4
or MATH 2400	Calculus 3	
APPM 2360	Introduction to Differential Equations with Linear Algebra	4
or MATH 2130 & MATH 3430	Introduction to Linear Algebra for Non-Mathematics Majors and Ordinary Differential Equations	
or MATH 2135 & MATH 3430	Introduction to Linear Algebra for Mathematics Majors and Ordinary Differential Equations	
ECEN 3810	Introduction to Probability Theory	3
or APPM 3570	Applied Probability	
or STAT 3100	Applied Probability	
or MATH 4510	Introduction to Probability Theory	
PHYS 1110	General Physics 1	4
or PHYS 1115	General Physics 1 for Majors	
PHYS 1120	General Physics 2	4
or PHYS 1125	General Physics 2 for Majors	
PHYS 1140	Experimental Physics 1	1
General Science Elective [2]		3
Electrical & Computer Engineering		
ECEN 1100	Exploring ECE	1
or AREN 1316	Introduction to Architectural Engineering	
or BMEN 1000	Exploring Biomedical Engineering	
or CHEN 1300	Introduction to Chemical and Biological Engineering	
or CSCI 1000	Computer Science as a Field of Work and Study	
or CVEN 1317	Introduction to Civil and Environmental Engineering	
or EVEN 1000	Introduction to Environmental Engineering	
ECEN 1400	Introduction to Digital and Analog Electronics	3
or GEEN 1400	Engineering Projects	
or ASEN 1400	Gateway to Space	
or ASEN 1403	Introduction to Rocket Engineering	
or GEEN 2400	Engineering Projects for the Community	
ECEN 1310	Introduction to C Programming	4
or CSCI 1300	Computer Science 1: Starting Computing	
ECEN 2703	Discrete Mathematics for Computer Engineers	3
or APPM 3170	Discrete Applied Mathematics	

or CSCI 2824	Discrete Structures	
or MATH 2001	Introduction to Discrete Mathematics	
CSCI 2270	Computer Science 2: Data Structures	4
or CSCI 2275	Programming and Data Structures	
ECEN 2250	Introduction to Circuits and Electronics	3
ECEN 2260	Circuits as Systems	3
ECEN 2270	Electronics Design Lab	3
ECEN 2350	Digital Logic	4
ECEN 2360	Programming Digital Systems	3
or CSCI 2400	Computer Systems	
ECEN 2370	Embedded Software Engineering	3
ECEN 3753	Real-Time Operating Systems	3
or CSCI 3753	Design and Analysis of Operating Systems	
ECEN/CSCI 3593	Computer Organization	3
ECEN 4610	Capstone Laboratory Part 1	3
ECEN 4620	Capstone Lab, Part 2	3
Sophomore Elective		*3*
Choose one from:		
ECEN 2410	Renewable Sources and Efficient Electrical Energy Systems	
ECEN 2420	Electronics for Wireless Systems	
ECEN 2440	Application of Embedded Systems	
ECEN 2450	Electronic and Semiconductor Device Laboratory

ECEN 3400	Electromagnetic Fields and Waves	
Additional Electives		
Software Elective		*3*
Choose one from:		
ECEN 3303/ CSCI 3302	Introduction to Robotics	
ECEN 4133	Fundamentals of Computer Security	
ECEN 4313	Concurrent Programming	
ECEN 4322	Data and Network Science	
ECEN 4553	Compiler Construction	
CSCI 3002	Fundamentals of Human Computer Interaction	
CSCI 3104	Algorithms	
CSCI 3202	Introduction to Artificial Intelligence	
CSCI 3287	Design and Analysis of Database Systems	
CSCI 3308	Software Development Methods and Tools	
CSCI 4113	Linux System Administration	
CSCI 4253	Datacenter Scale Computing - Methods, Systems and Techniques	
CSCI 4273	Network Systems	
CSCI 4413	Computer Security and Ethical Hacking	
CSCI 4446	Chaotic Dynamics	
Advanced Concentration Electives (ACE)		*6*
Complete 6 credits of Advanced Concentration Elective coursework - at least 3 credits must be 4000-level or higher [3]		
Technical Electives		*12*
Complete 12 credits of Technical Elective coursework - at least 9 credits must be upper-division (3000-level or higher) [4]		
Free Electives		*6*
Complete 6 credits of Free Electives to meet the minimum 128 credit hours required for the BS degree.		
Total Credit Hours		**128**

1. Refer to the College's Humanities, Social Sciences and Writing requirements (https://www.colorado.edu/engineering-advising/get-your-degree/degree-requirements/humanities-social-sciences-and-writing-requirements/) webpage.
2. Refer to ECEE's General Science Electives webpage (https://www.colorado.edu/ecee/students/undergraduate-students/advising/general-science-electives/).
3. Refer to ECEE's Advanced Concentration Electives (https://www.colorado.edu/ecee/students/undergraduate-students/advising/advanced-concentration-electives-ace/) webpage.
4. Refer to ECEE's Technical Electives (https://www.colorado.edu/ecee/students/undergraduate-students/advising/technical-electives/)webpage.

Recommended Four-Year Plan of Study

The following information represents a sample eight-semester sequence of study only. Up-to-date curricular information and policies can be found on the ECEE Advising website. (https://www.colorado.edu/ecee/undergraduate-program/advising/)

Year One		
Fall Semester		**Credit Hours**
APPM 1350	Calculus 1 for Engineers	4
ECEN 1100	Exploring ECE	1
ECEN 1400	Introduction to Digital and Analog Electronics	3
PHYS 1110	General Physics 1	4
COEN 1500	CEAS First Year Seminar	1
Humanities & Social Sciences Elective [1]		3
	Credit Hours	**16**
Spring Semester		
APPM 1360	Calculus 2 for Engineers	4
PHYS 1120	General Physics 2	4
PHYS 1140	Experimental Physics 1	1
ECEN 1310	Introduction to C Programming	4
Humanities & Social Sciences Elective [1]		2
	Credit Hours	**15**
Year Two		
Fall Semester		
APPM 2360	Introduction to Differential Equations with Linear Algebra	4
ECEN 2250	Introduction to Circuits and Electronics	3
ECEN 2350	Digital Logic	4
CSCI 2270	Computer Science 2: Data Structures	4

Humanities & Social Sciences Elective [1]		3
	Credit Hours	**18**
Spring Semester		
APPM 2350	Calculus 3 for Engineers	4
ECEN 2260	Circuits as Systems	3
ECEN 2270	Electronics Design Lab	3
ECEN 2360	Programming Digital Systems	3
ECEN 24XX	Sophomore Elective [2]	3
	Credit Hours	**16**
Year Three		
Fall Semester		
ECEN 2370	Embedded Software Engineering	3
ECEN 2703	Discrete Mathematics for Computer Engineers	3
ECEN 3810	Introduction to Probability Theory	3
ECEN 3XXX	Advanced Analog Core [3]	3
General Science Elective [4]		3
	Credit Hours	**15**
Spring Semester		
ECEN 3593	Computer Organization	3
ECEN 3753	Real-Time Operating Systems	3
Software Elective [5]		3
Technical Elective [6]		3
College-Approved Writing Course [1]		3
Free Elective		3
	Credit Hours	**18**
Year Four		
Fall Semester		
ECEN 4610	Capstone Laboratory Part 1	3
Advanced Concentration Elective [7]		3
Technical Elective [6]		3
Free Elective		3
Humanities & Social Sciences Elective [1]		3
	Credit Hours	**15**
Spring Semester

7. Refer to ECEE's Advanced Concentration Electives (https://www.colorado.edu/ecee/students/undergraduate-students/advising/advanced-concentration-electives-ace/) webpage.

Program Educational Objectives

The following set of program objectives for the Electrical and Computer Engineering program was developed by our faculty and our other stakeholders.

During the first several years after completion of their baccalaureate studies,

- ECE-1: Graduates will be situated in growing careers involving the design, development or support of electrical, electronic, and computer hardware and software systems, software engineering, devices, instruments, or products, or will be successfully pursuing an advanced degree.
- ECE-2: Graduates will have advanced in professional standing based on their technical accomplishments and will have accumulated additional technical expertise to remain globally competitive.
- ECE-3: Graduates will have demonstrated professional and personal leadership and growth.

The EE curriculum is designed to prepare our graduates to meet these objectives as follows:

- ECE-1: Graduates will be situated in growing careers involving the design, development or support of electrical, electronic, and computer hardware and software systems, software engineering, devices, instruments, or products, or will be successfully pursuing an advanced degree.

  Graduates attaining the ECE degree will have comprehensive knowledge and experience in the concepts and design of electrical, electronic, and computer devices, circuits, and systems. Besides emphasizing computer hardware and software, the ECE curriculum also emphasizes design, integration, and application of computer systems, as well as experience in software development. This is achieved through a sequence of required courses in these areas, culminating in a major design project incorporating realistic engineering constraints. The curriculum also provides opportunities for specialization in areas such as compiler design, embedded systems, software engineering, and VLSI design, as well as in the electrical engineering specialities.

  ECE graduates will have attained other professional skills that will be useful throughout their careers, including verbal and written communication and the ability to function on multi-disciplinary teams.

  The ECE curriculum is rich in laboratory work. ECE graduates will have achieved extensive practical experience in the laboratory

techniques, tools, and skills that provide a bridge between theory and practice.

- ECE-2: Graduates will have advanced in professional standing based on their technical accomplishments and will have accumulated additional technical expertise to remain globally competitive.

  ECE graduates experience a curriculum that contains a broad core of classes focused on mathematical and physical principles that are fundamental to the fields of electrical and computer engineering. Hence, they understand the physical and mathematical principles underlying electrical and electronic technology and computer systems and are able to analyze and solve electrical and computer engineering problems using this knowledge. In addition to basic classes in mathematics, science, and computing, the ECE curriculum includes a sequence of courses in analog and digital electronic circuits and systems, and electromagnetic fields, probability, computer software, and computer design and architecture.

- ECE-3: Graduates will have demonstrated professional and personal leadership and growth.

  To lay the foundation for a long career in a rapidly changing field, a broad background of fundamental knowledge is required. This is achieved in the ECE curriculum through a sequence of required classes in mathematics, physics, and the ECE core. In addition, the graduate must be capable of lifelong learning; this is taught through assignments and projects that require independent research and study.

  The curriculum includes a significant component of electives in the humanities and social sciences. ECE graduates will have knowledge of the broader contemporary issues that impact engineering solutions in a global and societal context. They will have the verbal and written communications skills necessary for a successful career in industry or academia. Graduates also understand the meaning and importance of professional and ethical responsibility.

Student Outcomes

The ECE curriculum is designed to prepare our graduates to meet these as follows:

- An ability to identify, formulate and solve complex engineering problems by applying principles of engineering, science and mathematics.
- An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety and welfare, as well as global, cultural, social, environmental and economic factors.
- An ability to communicate effectively with a range of audiences.
- An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental and societal contexts.
- An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks and meet objectives.
- An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
- An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Bachelor's–Accelerated Master's Degree Program(s)

The bachelor's–accelerated master's (BAM) degree program options offer currently enrolled CU Boulder undergraduate students the opportunity to receive a bachelor's and master's degree in a shorter period of time. Students receive the bachelor's degree first but begin taking graduate coursework as undergraduates (typically in their senior year).

Because some courses are allowed to double count for both the bachelor's and the master's degrees, students receive a master's degree in less time and at a lower cost than if they were to enroll in a stand-alone master's degree program after completion of their baccalaureate degree. In addition, staying at CU Boulder to pursue a bachelor's–accelerated master's program enables students to continue working with their established faculty mentors.

Admissions Requirements

BS in Electrical and Computer Engineering, MS in Electrical Engineering

In order to gain admission to the BAM program named above, a student must meet the following criteria:

- Have a cumulative GPA of 3.000 or higher.
- Complete all prerequisite courses with a minimum grade of solid B for 5000-level coursework taken as an undergraduate student; minimum of solid C for undergraduate coursework.
- Have completed 9-10 core ECEN courses (see BAM degree (https://www.colorado.edu/ecee/academics/undergraduate-programs/bachelors-accelerated-masters/) website for more information).
- Have at least junior class standing.

BS in Electrical and Computer Engineering, Professional ME in Engineering Management

In order to gain admission to the BAM program named above, a student must meet the following criteria:

- Have a cumulative GPA of 3.000 or higher.
- Have at least junior class standing.

Program Requirements

For all programs above, students may take up to and including 12 hours while in the undergraduate program which can later be used toward the master's degree. However, only 6 credits of coursework may be double counted toward the bachelor's degree and the master's degree. Students must apply to graduate with the bachelor's degree, and apply to continue with the master's degree, early in the semester in which the undergraduate requirements will be completed.

Students can refer to the Electrical & Computer Engineering/Electrical Engineering BAM (https://www.colorado.edu/ecee/academics/undergraduate-programs/bachelors-accelerated-masters/) and Engineering Management BAM (https://www.colorado.edu/emp/graduate-programs/bachelors-accelerated-masters-bam/) webpages for more information.

Electrical Engineering - Bachelor of Science (BSEE)

A degree in electrical engineering provides graduates the opportunity to enter the profession of engineering and to engage in work as a design, production, testing, consulting, research, teaching or management professional in a wide variety of careers in the computer industry, embedded systems, telecommunications, instruments, the power and renewable energy industry, the biomedical industry, aerospace and academia. Some graduates also go on to develop careers in other professions like law and medicine.

Examples of career opportunities include development of new electrical or electronic devices, instruments or products; design of equipment or systems; production and quality control of electrical products for private industry or government; sales or management for a private firm or government; and teaching and research in a university.

Requirements

Required courses in engineering, physical science and mathematics are interwoven throughout the curriculum to provide a balanced education in the fundamentals of the electrical engineering profession. The core courses are complemented by technical electives, humanities and social sciences electives (http://www.colorado.edu/engineering/academics/policies/hss/), free electives and a writing course (http://www.colorado.edu/engineering/academics/policies/hss/) for a total of 128 credits required for the degree.

A Bachelor's of Science in Electrical Engineering cannot be earned in combination with a BS in Electrical & Computer Engineering or Integrated Design Engineering-Electrical Emphasis. A BS in Electrical Engineering also cannot be completed alongside any of the following minors: electrical engineering, computer engineering and signals & systems engineering.

Prerequisites and Passing Grades

All courses must be taken for a letter grade. The minimum passing grade for a course that is a prerequisite or corequisite for another required course is C-. If a grade of D+ or lower is received in a course which is a prerequisite to another, the student may not register for the subsequent course until the first grade has been raised to a C- or higher. If a grade of D+ or lower is received in a course which is a corequisite to another, the course must be repeated until a grade of C- or higher is achieved. ECEN 4610 Capstone Laboratory Part 1 and ECEN 4620 Capstone Lab, Part 2 both require a grade of C- or higher for graduation.

The minimum passing grade for a course that is not specifically a prerequisite or corequisite for another required course is D-.

The Electrical, Computer and Energy Engineering Department reserves the right to drop students enrolled in ECEN courses who have not met the minimum prerequisite requirements. It is the student's responsibility to communicate with the department if summer coursework and/or transfer credit will be used to meet the prerequisite requirement.

Required Courses

Code	Title	Credit Hours
Humanities, Social Sciences and Writing		
Writing [1]		3
Humanities & Social Sciences - at least 6 credits must be upper-division (3000-level or higher) [1]		15
Math and Science		
APPM 1350	Calculus 1 for Engineers	4
or MATH 1300	Calculus 1	
or APPM 1345	Calculus 1 with Algebra, Part B

Learning Outcomes

During the first several years after completion of their baccalaureate studies:

- Graduates will be situated in growing careers involving the design, development or support of electrical or electronic systems, devices, instruments, or products, or will be successfully pursuing an advanced degree.
- Graduates will have advanced in professional standing based on their technical accomplishments and will have accumulated additional technical expertise to remain globally competitive.
- Graduates will have demonstrated professional and personal leadership and growth.

The electrical engineering curriculum is designed to prepare graduates to meet these objectives as follows:

- Graduates will be situated in growing careers involving the design, development or support of electrical or electronic systems, devices, instruments, or products, or will be successfully pursuing an advanced degree.
  - Graduates attaining the electrical engineering degree will have comprehensive knowledge and experience in the concepts and design of electrical and electronic devices, circuits and systems. This is achieved through a sequence of required courses in these areas, culminating in a major design project incorporating realistic engineering constraints. Moreover, graduates will have advanced, specialized knowledge and skills in elective areas such as communications and digital signal processing, control systems, analog and digital integrated circuit design, semiconductor devices and optoelectronics, electromagnetics and wireless systems, power electronics and renewable energy, bioelectronics and digital systems.
  - Electrical engineering graduates will have attained other professional skills that will be useful throughout their careers, including verbal and written communication and the ability to function on multi-disciplinary teams.
  - The electrical engineering curriculum is rich in laboratory work. Graduates will have achieved extensive practical experience in the laboratory techniques, tools and skills that provide a bridge between theory and practice.
- Graduates will have advanced in professional standing based on their technical accomplishments and will have accumulated additional technical expertise to remain globally competitive.
  - Electrical engineering graduates experience a curriculum that contains a broad core of classes focused on mathematical and physical principles that are fundamental to the field of electrical engineering. Hence, they understand the physical and mathematical principles underlying electrical and electronic technology, and are able to analyze and solve electrical engineering problems using this knowledge. In addition to basic classes in mathematics, science and computing, the electrical engineering curriculum includes a sequence of courses in analog and digital electronic circuits and systems and electromagnetic fields.
- Graduates will have demonstrated professional and personal leadership and growth.
  - To lay the foundation for a long career in a rapidly changing field, a broad background of fundamental knowledge is required. This is achieved in the electrical engineering curriculum through a sequence of required classes in mathematics, physics, and the electrical engineering core. In addition, the graduate must be capable of lifelong learning; this is taught through assignments and projects that require independent research and study.
  - The curriculum includes a significant component of electives in the humanities and social sciences. EE graduates will have knowledge of the broader contemporary issues that impact engineering solutions in a global and societal context. They will have the verbal and written communications skills necessary for a successful career in industry or academia. Graduates also understand the meaning and importance of professional and ethical responsibility.

Student Outcomes

By the completion of the program, students will be able to:

- Identify, formulate and solve complex engineering problems by applying principles of engineering, science and mathematics.
- Apply engineering design to produce solutions that meet specified needs with consideration of public health, safety and welfare, as well as global, cultural, social, environmental and economic factors.
- Communicate effectively with a range of audiences.
- Recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental and societal contexts.
- Function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks and meet objectives.
- Develop and conduct appropriate experimentation, analyze and interpret data and use engineering judgment to draw conclusions.

- Acquire and apply new knowledge as needed, using appropriate learning strategies.

Bachelor's–Accelerated Master's Degree Program(s)

The bachelor's–accelerated master's (BAM) degree program options offer currently enrolled CU Boulder undergraduate students the opportunity to receive a bachelor's and master's degree in a shorter period of time. Students receive the bachelor's degree first but begin taking graduate coursework as undergraduates (typically in their senior year).

Because some courses are allowed to double count for both the bachelor's and the master's degrees, students receive a master's degree in less time and at a lower cost than if they were to enroll in a stand-alone master's degree program after completion of their baccalaureate degree. In addition, staying at CU Boulder to pursue a bachelor's–accelerated master's program enables students to continue working with their established faculty mentors.

Admissions Requirements

BS and MS in Electrical Engineering

In order to gain admission to the BAM program named above, a student must meet the following criteria:

- Have a cumulative GPA of 3.000 or higher.
- Complete all prerequisite courses with a minimum grade of solid B for 5000-level coursework taken as an undergraduate student; minimum of solid C for undergraduate coursework.
- Have completed 9-10 core ECEN courses (see BAM degree (https://www.colorado.edu/ecee/academics/undergraduate-programs/bachelors-accelerated-masters/) website for more information).
- Have at least junior class standing.

BS in Electrical Engineering, Professional ME in Engineering Management

In order to gain admission to the BAM program named above, a student must meet the following criteria:

- Have a cumulative GPA of 3.000 or higher.
- Have at least junior class standing.

Program Requirements

For all programs above, students may take up to and including 12 hours while in the undergraduate program which can later be used toward the master's degree. However, only six credits of coursework may be double counted toward the bachelor's degree and the master's degree. Students must apply to graduate with the bachelor's degree, and apply to continue with the master's degree, early in the semester in which the undergraduate requirements will be completed.

Students can refer to the Electrical & Computer Engineering/Electrical Engineering BAM (https://www.colorado.edu/ecee/academics/undergraduate-programs/bachelors-accelerated-masters/) and Engineering Management BAMwebpages for more information.

Computer Engineering - Minor

The minor in computer engineering provides training in computer engineering beyond the training usually received by science and mathematics majors. It can also broaden the training of students majoring in other engineering and applied science fields to provide more depth in computer engineering. The goal is to introduce students to the fundamentals of computer engineering and introduce them to a more advanced field. Such skills are important to students who expect to participate in real world situations that increasingly involve computer engineering solutions.

Requirements

The computer engineering minor requires a minimum of 20 credit hours.

A minor in computer engineering can be earned in conjunction with any CU Boulder major, except for BS degrees in electrical engineering, electrical & computer engineering and integrated design engineering-electrical emphasis. The computer engineering minor cannot be completed alongside the following minors: computer science, electrical engineering and signals & systems engineering.

Prerequisites

Students must be currently enrolled or have already completed one of these computing courses with a C- or higher before declaring the minor: ECEN 1310, CSCI 1300, APPM 3050, PHYS 2600 or similar.

Grade Requirements

A minimum cumulative GPA of 2.000 is required in the courses used to satisfy the minor requirements. Each individual course that is counted toward this minor must be passed with a grade of D- or higher (note that a minimum grade of C- is required in all prerequisite courses).

Residency Requirements

At least 9 credit hours for the minor must be taken on the CU Boulder campus.

Total Credit Hours	**20**

Electrical Engineering - Minor

The minor in electrical engineering provides training in electrical engineering beyond the training usually received by science, mathematics and applied mathematics majors. It can also broaden the training of students majoring in other engineering fields to provide more depth in electrical engineering. The goal is to teach students the fundamentals of electrical engineering and introduce them to at least one of its many advanced application areas. Such skills are important to students who expect to participate in real world situations that increasingly involve electrical engineering applications.

Requirements

The electrical engineering minor requires a minimum of 18 credit hours.

A minor in electrical engineering can be earned in conjunction with any CU Boulder major, except for BS degrees in electrical engineering, electrical & computer engineering and integrated design engineering-electrical emphasis. The electrical engineering minor cannot be completed alongside any of the following minors: computer engineering and signals & systems engineering.

Prerequisites

Students must complete these courses with a C- or higher before declaring the minor:

- Calculus 1
- Calculus 2
- APPM 2360 Introduction to Differential Equations with Linear Algebra or MATH 2130 Introduction to Linear Algebra for Non-Mathematics Majors & MATH 3430 Ordinary Differential Equations

(Students who have completed all above course requirements are encouraged to apply for the minor. Additionally, students who have completed all but one of the above course requirements, with the last required course currently in-progress, are also eligible to apply for the minor.)

Grade Requirements

A minimum cumulative GPA of 2.000 is required in the courses used to satisfy the minor requirements. Each individual course that is counted toward this minor must be passed with a grade of D- or higher (note that a minimum grade of C- is required in all prerequisite courses).

Residency Requirements

At least 9 credit hours for the minor must be taken on the CU Boulder campus.

Required Courses and Credits

Code	Title	Credit Hours
Required Courses		
ECEN 2250	Introduction to Circuits and Electronics	3
or GEEN 3010	Circuits for Engineers	
or MCEN 3017	Circuits and Electronics for Mechanical Engineers	
or ECEN 3010	Circuits and Electronics for Mechanical Engineers	
ECEN 2260	Circuits as Systems	3
ECEN 2270	Electronics Design Lab	3
Emphasis Areas		
Complete 9 credits, chosen from the following:		9
ECEN 2350	Digital Logic	
ECEN 2360	Programming Digital Systems	
or CSCI 2400	Computer Systems	
ECEN 2370	Embedded Software Engineering	
ECEN 3170	Electromagnetic Energy Conversion 1	
ECEN 3250	Microelectronics	
ECEN 3300	Linear Systems	
or ECEN 3301	Biomedical Signals and Systems	
ECEN 3320	Semiconductor Devices	
ECEN 3400	Electromagnetic Fields and Waves	
ECEN 3410	Electromagnetic Waves and Transmission	
ECEN 3730	Practical Printed Circuit Board Design and Manufacture	
ECEN 3753	Real-Time Operating Systems	
or CSCI 3753	Design and Analysis of Operating Systems	
ECEN 4111	Engineering Applications in Biomedicine: Cardiovascular Devices and Systems	
ECEN 4121	Design of Implantable Medical Devices: Neuromodulation	
ECEN 4138	Control Systems Analysis	
ECEN 4242	Communication Theory	
ECEN 4341	Bioelectromagnetics	
ECEN 4395	Organic Electronic Materials and Devices	

ECEN 4517	Power Electronics and Photovoltaic Power Systems Laboratory
ECEN 4555	Principles of Energy Systems and Devices
ECEN 4606	Undergraduate Optics Laboratory
ECEN 4616	Optoelectronic System Design
ECEN 4632	Introduction to Digital Filtering
ECEN 4634	Microwave and RF Laboratory
ECEN 4638	Control Systems Laboratory
ECEN 4752	Communication Laboratory
ECEN 4797	Introduction to Power Electronics
ECEN 4827	Analog IC Design
ECEN 4925	Foundations of Quantum Hardware
ASEN 3300	Aerospace Electronics and Communications
BMEN 3030	Bioinstrumentation
Total Credit Hours	**18**

Quantum Engineering - Minor

The minor in quantum engineering provides training and a solid foundation in quantum technologies. Quantum technologies have applications in quantum-enhanced sensors, quantum communications and quantum computing. The goal is to introduce students to the fundamentals of quantum theory and explore all of the major hardware platforms. This will allow graduates to easily adapt to the variety of technologies seen in industry. The skills obtained in this minor are important to students who expect to participate in real-world situations that increasingly involve quantum technologies.

Requirements

The quantum engineering minor requires a minimum of 18 credit hours.

A minor in quantum engineering can be earned in conjunction with any CU Boulder major. The quantum engineering minor can be completed alongside no more than one of the following minors: computer engineering, electrical engineering and signals & systems engineering.

Prerequisites

- **Programming**: ECEN 1310, CSCI 1200, CSCI 1300, APPM 3050, PHYS 2600, ASTR 2600, MCEN 1030 or similar (C- or higher)
- **Calculus 2** (minimum): APPM 1360 or MATH 2300 (C- or higher)
- **Linear Algebra**: APPM 2360, MATH 2130, MATH 2135, MATH 3135, APPM 3310 or CSCI 2820 (C- or higher)

Additionally, it is recommended that students have taken Calculus 3 (APPM 2350 or MATH 2400), Probability (APPM 3570, STAT 3100, MATH 3510, ECEN 3810 or similar) and PHYS 2130 as preparatory subjects for the minor.

Students who have completed all above courses are encouraged to apply for the minor. Additionally, students who have completed all but one of the above courses, with the last required course currently in-progress, are also eligible to apply for the minor.

Grade Requirements

A minimum cumulative GPA of 2.000 is required in the courses used to satisfy the minor requirements. Each individual course that is counted toward this minor must be passed with a grade of D- or higher (note that a minimum grade of C- is required in all prerequisite courses).

Residency Requirements

At least 9 credit hours for the minor must be taken on the CU Boulder campus.

Required Courses and Credits

The Quantum Engineering minor consists of a set of required core courses and a selection of electives, as follows.

Code	Title	Credit Hours
Foundations Courses		
ECEN 3915	Foundations of Quantum Engineering	3-6
or PHYS 3220 & PHYS 4410	Quantum Mechanics 1 and Quantum Mechanics 2	
ECEN 4925	Foundations of Quantum Hardware	3
CSCI/PHYS/ECEN 3090	Introduction to Quantum Computing	3
Electives		
Choose 9 credit hours of approved upper-division technical coursework. [1]		9
Total Credit Hours		**18-21**

[1] Refer to the course options listed on the ECEE Quantum Engineering Minor (https://www.colorado.edu/ecee/academics/undergraduate-programs/minor-programs/#quantum_engineering-545)webpage.

Signals and Systems - Minor

The minor provides training in control systems, digital signal processing or communications beyond the training usually received by science, mathematics and applied mathematics majors. It can also broaden the training of students majoring in other engineering fields to provide depth in signals and systems. The goal is to teach students the fundamentals of signals and systems and introduce them to laboratory applications.

Requirements

The signals & systems minor requires a minimum of 18 credit hours.

A minor in signals & systems can be earned in conjunction with any CU Boulder major, except for BS degrees in electrical engineering, electrical & computer engineering and integrated design engineering-electrical emphasis. This minor cannot be completed alongside any of the following minors: computer engineering and electrical engineering

Prerequisites

Students must meet these requirements before declaring the minor.

- PHYS 1120 General Physics 2 or PHYS 1125 General Physics 2 for Majors, with a minimum grade of C-. *May be completed or currently in progress to be eligible to apply for the minor.*
- Solid mathematics background in Fourier series, Laplace transforms, transfer functions and sinusoidal response.

Some courses require a probability prerequisite, which may be met with ECEN 3810, APPM 3570, MATH 4510, STAT 3100 or an equivalent transfer course. A grade of C- or better is required in all prerequisite courses.

Grade Requirements

A minimum cumulative GPA of 2.000 is required in the courses used to satisfy the minor requirements. Each individual course that is counted toward this minor must be passed with a grade of D- or higher (note that a minimum grade of C- is required in all prerequisite courses).

Residency Requirements

At least 9 credit hours for the minor must be taken on the CU Boulder campus.

Required Courses and Credits

Code	Title	Credit Hours
Required Courses		
ECEN 2250	Introduction to Circuits and Electronics	3
ECEN 2260	Circuits as Systems	3
ECEN 3300	Linear Systems	3
or ECEN 3301	Biomedical Signals and Systems	
Electives		
Choose the remaining 9 credits from any combination of the following theory and lab courses: [1]		9
ECEN 2360	Programming Digital Systems	
or CSCI 2400	Computer Systems	
ECEN 4138	Control Systems Analysis	
ECEN 4638	Control Systems Laboratory	
ECEN 4242	Communication Theory	
ECEN 4752	Communication Laboratory	
ECEN 4632	Introduction to Digital Filtering	
Total Credit Hours		**18**

[1] Students may petition to replace one of these courses with a 3-credit 5000-level ECEN course in digital signal processing, communications or controls.

Engineering and Applied Science

Interdisciplinary programs managed by the College (http://www.colorado.edu/engineering/) are included here. The listing of courses includes college-sponsored courses as well as those offered by the Engineering Honors Program (http://www.cuhonorsengineering.com/) and Engineering Leadership Program (https://www.colorado.edu/engineering/academics/engineering-leadership-program/).

Certificates

- Engineering Leadership - Certificate (p. 984)
- Lighting Design - Certificate (p. 985)

Courses

COEN 1015 (3) Everyday Excel
Microsoft Excel is one of the most popular software tools worldwide, used in industries such as project management, office administration, engineering, science, business, finance, and data analysis. In this unique, thought-provoking course, you will learn how to create and manage Excel spreadsheets, sort and filter data, present and interpret data in graphical format, and perform a variety of mathematical, logical, and statistical calculations. A laptop computer with Microsoft Excel is mandatory.

COEN 1500 (1) CEAS First Year Seminar
The CEAS First Year Seminar is a small, discussion-based course designed to provide incoming first-year students a foundation to thrive as university scholars, meeting with them from their first day of classes through getting back the results of their first round of midterms. The seminar is a combination of a common curriculum (40%) exploring texts concerning creating an engineering identity, the purpose of an engineering education and the larger values of the college community (mattering, belonging, agency, ownership, inclusivity and service) and a unique curriculum (60%) in which faculty members cultivate these values through their own areas of expertise and interest. This seminar represents the commitment of dedicated faculty to help incoming first-year students become an active and contributing part of the intellectual, inclusive, healthy, inquisitive, diverse, sustainable and socially engaged culture of the College of Engineering.
Requisites: Restricted to Fall incoming first year students living in Engineering Connections from College of Engineering Applied Science.

COEN 1510 (1) Self Management and Leadership Principles 1
Prepares first-year students for personal and academic success in their transition to college. Focuses on academic success strategies, time and stress management, study skills, S.M.A.R.T. goal setting and developing self-awareness. Students identify their strengths and participate in peer-to-peer interaction to foster collaboration and community. Students will also explore leadership capabilities, professional development, and insights into career interests. Speakers provide students with unique insights into academic and engineering experiences.
Requisites: Restricted to Engineering Goldshirt (PENG) students only.

COEN 1515 (1) Essential Strategies for Engineering Success
This course will support students in developing financial knowledge and skills related to financial wellness, academic success, and personal well-being, as CU Engineering students. In learning about financial wellness, students will explore, share, and discuss experiences and beliefs that have shaped their attitudes and behaviors related to money, and they will develop financial goals for the future while learning and practicing financial wellness skills. In addition to financial wellness, students will learn about resources and practice skills and strategies they can use to support their academic success and personal well-being in and beyond their academic experience. Students will learn and work toward achieving the course outcomes through interactive discussion, activities, and personal reflection, where students¿ own experiences, knowledge, skills, and goals are critically important to the learning process.

COEN 1520 (1) Self Management and Leadership Principles 2
Continuation of COEN 1510. Self-management and student development is reiterated. Includes time and stress management, study skills and S.M.A.R.T. goal setting. Leadership skills are explored through group projects. Students complete professional development activities and assignments geared toward preparing students for engineering internships and research opportunities.
Requisites: Requires prerequisite course of COEN 1510 (minimum grade C-). Restricted to Engineering Goldshirt (PENG) students only.

COEN 1550 (1) Fundamentals of Undergraduate Research (FUTURE)
Exposes first or second year undergraduate students to engineering research careers through a partner program (Fundamentals of Undergraduate Research), panel discussions with researchers in academics and industry, and exposure to research labs. Department consent required.

COEN 1830 (1-3) Special Topics
Explores topics of interest in engineering. Content varies by instructor and semester.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

COEN 2830 (1-3) Special Topics
Explores topics of interest in engineering. Content varies by instructor and semester.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

COEN 2850 (1-3) Independent Study
Provides opportunities for independent study at the lower-division undergraduate level. Subject and/or project agreed upon by the student and the instructor to fit the needs of the student.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

COEN 2880 (1) Fresh Start for Success
Fresh Start is a class for students in the College of Engineering who want to work toward a Fresh Start! This course focuses on learning the mindsets and skills necessary to achieve academic and personal change goals. Topics include the science of learning (metacognition) and the use of metacognition in everyday life, including strategies supporting mastery of the material in engineering, effective study planning and test-taking, maintaining balance throughout the semester, and the science and creation of sustainable change through habits, support, and resiliency. This class focuses on the actions necessary to reflect deeply and develop awareness and skills to help create change. Enrolled students must engage in the class and commit to applying knowledge and skills acquired during lessons and reflection to their other classes and aspects of their student experience. This course is best suited for students looking for support in the pursuit of success in achieving academic goals.
Repeatable: Repeatable for up to 2.00 total credit hours.
Requisites: Restricted to Engineering Fresh Start (PEEA) students only.

COEN 3051 (2) Leadership Seminar 1: Launching the Leadership Experience
Practicing needs assessment, decision-making and planning skills, students take this seminar to prepare for their Leadership Experience (required for completion of the Engineering Leadership Certificate). Students work in collaboration with each other, their Engineering Leadership Program mentors and campus/community organizations and leaders to lay the foundation for and launch their individually unique Leadership Experiences.
Requisites: Requires a prerequisite course of COEN 2050 (minimum grade C-). Restricted to Engineering Leadership Program (PENL) students only.

COEN 3053 (2) Leadership Seminar 3: ELP Synthesis and Final ePortfolio
Progressing through this course, students complete the ePortfolio that demonstrates fulfillment of the requirements of the Engineering Leadership Certificate, reflecting upon synthesizing and discerning practical applications of the leadership experiences tackled throughout throughout their time at CU.
Requisites: Restricted to Engineering Leadership Program (PENL) students only.

COEN 3100 (1) Engineering Transfer Student Success Seminar
Designed to aid in a successful transition to CU Engineering for students transferring from another two- or four-year institution. Through this course students will learn about college, campus and academic resources, evaluate their skills, explore relevant engineering transfer student issues, build on their strengths and education related to overall career goals, and establish a supportive transfer student community.
Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

COEN 3210 (3) Climate Change and Engineering
Explores the fundamentals of climate change science, but from an engineering perspective. After learning the fundamentals, the relationship between climate change and different engineering disciplines will be discussed. Topics covered include geoengineering, renewable energy, sustainable engineering, coastal engineering, building design, etc. Career options and entrepreneurial opportunities will also be discussed.
Requisites: Requires prerequisite courses of PHYS 1110 and APPM 1350 (minimum grade D-).

COEN 3930 (1-6) Engineering Internship/Co-op
Students enrolled in this course participate in a pre-approved internship or cooperative education program with an employer that allows them to explore the relationship between theory and practice and demonstrate evidence of significant learning (e.g., academic assignments and employer/sponsor evaluations). Credits may apply towards BS or BA degree program in CEAS, please check with the department for specifics (even if student has multiple enrollments in this course and/or COEN 4950).
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to College of Engineering (ENGRU) undergraduates only (minimum GPA 2.0).

COEN 4000 (1-3) Global Intensive Studies
Provides a hands-on exploration of a particular engineering/applied science subject area in an overseas setting. Serves as a complement to an existing engineering or applied science course taught at CU. Topic areas will vary.
Equivalent - Duplicate Degree Credit Not Granted: ENES 3844 COEN 5000
Repeatable: Repeatable for up to 6.00 total credit hours.

COEN 4830 (1-3) Special Topics
Explores topics of interest in engineering. Content varies by instructor and semester.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

COEN 4850 (1-3) Independent Study
Provides opportunities for independent study at the upper-division undergraduate level. Subject and/or project agreed upon by the student and the instructor to fit the needs of the student.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

COEN 4934 (3) Art, Design, and Engineering: Thinking and Making
Examines the aesthetics, design, and engineering of sculpture, installation, and public art. Through research presentations, readings, and field trips, students learn about the process of making art. In addition to classroom learning, students engage in internships with artists and art fabricators. Highlights national and international hybrid art, design, and engineering advanced degree programs and additional art-related internships and job opportunities. Previously offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 5934 and ARTS 4934
Grading Basis: Letter Grade

COEN 4950 (1-6) Global Engineering Internship
Students enrolled in this course participate in a pre-approved global internship with an employer that allows them to explore the relationship between theory and practice and demonstrate evidence of significant learning (e.g., academic assignments and employer/sponsor evaluations). Up to 3 credits may apply towards BS degree program's Free Electives (even if student has multiple enrollments in this course and/or COEN 3930). Students may also earn COEN 4950 credit for international internship facilitated through CU-approved providers that contract with CU's Education Abroad Office. These placements must be pre-approved by the student's department/program to be eligible for credit.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to College of Engineering (ENGRU) undergraduates only (minimum GPA 2.0).

COEN 5000 (1-3) Global Intensive Studies
Provides a hands-on exploration of a particular engineering/applied science subject area in an overseas setting. Serves as a complement to an existing engineering or applied science course taught at CU. Topic areas will vary.
Equivalent - Duplicate Degree Credit Not Granted: ENES 3844 COEN 4000
Repeatable: Repeatable for up to 6.00 total credit hours.

COEN 5830 (1-6) Special Topics
Explores topics of interest in engineering. Content varies by instructor and semester. May be repeated for up to 9 total credit hours.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to College of Engineering graduate students only.
Grading Basis: Letter Grade

COEN 5850 (1-6) Independent Study
Provides opportunities for independent study at the graduate level. Subject and/or project agreed upon by the student and the instructor to fit the needs of the student.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to College of Engineering graduate students only.

EHON 1151 (3) Critical Encounters
Explores critical, literary and philosophical approaches to the following related problems: 1) how we organize knowledge and construct meaning, and 2) how we locate a sense of self as both individuals and members of various groups amidst the resources and demands of competing interpretations, traditions challenges and circumstances. Department restriction, honors standing or instructor consent required.
Requisites: Restricted to Engineering Honors Program (PEHN) students only.

EHON 1500 (1) Honors Reading Group
Faculty led reading seminars, focusing on specific test or texts chosen by the faculty. Special attention will be paid to group formation and the process of collaborative learning.
Requisites: Restricted to Engineering Honors Program (PEHN) students only.
Additional Information: Engineering Honors Course

EHON 3843 (3) Special Topics
Explores different important themes relative to the Engineering Honors Program. Check with department for specific semester topics.
Repeatable: Repeatable for up to 3.00 total credit hours.
Requisites: Restricted to Engineering Honors Program (PEHN) students only.
Additional Information: Engineering Honors Course

EHON 4051 (1) Dimensions of Leadership
Explores the many dimensions of leadership that exceed technical knowledge: the ethical, societal, cultural, interpersonal, and personal. Through seminars, workshops and exposure to leaders, students will reflect upon their engineering education in light of the multifaceted demands of effective leadership and their own personal career goals. Students will take an active role in shaping the course. Department restriction, honors standing or instructor consent required.
Repeatable: Repeatable for up to 3.00 total credit hours.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

EHON 4151 (3) Critical Encounters 2
Fosters critical reflection on students¿ college experience and rigorous philosophical analysis of personal and professional goals after graduation. Critical Encounters 2 uses literature and philosophy to look both backwards and forwards at the following questions: Who am I and who do I want to be? How do I intentionally cultivate personal and professional values? How am I shaped by tradition and culture? How can I actively shape various cultures to which I belong?
Requisites: Requires prerequisite course of EHON 1151 (minimum grade D-). Restricted to Engineering Honors (PEHN) students only. Restricted to Seniors only.

ENLP 2000 (3) Leadership, Fame and Failure
Examines the ambition, moral character, prudence and grit required for effective leadership. Common causes of leadership failure are also considered. A wide variety of ancient and modern leaders are studied in the disciplines of science and technology, politics, business and military affairs using primary source readings in history, philosophy and literature. Also explores whether leadership is a teachable art.
Requisites: Restricted to students with 0-56 credits (Freshmen or Sophomore) College of Engineering majors only.

ENLP 3000 (3) Intelligent Leadership
Investigates what it means to be a "smart" leader. In small, discussion-based classes, explores science fiction texts and social science research that generate fundamental questions about the dimensions, manifestations and value of intelligence in contexts related to leadership. Students explore social science research about how course themes are reflected in present-day, "real-life" technologies, policies and cultural phenomena.
Requisites: Restricted to College of Engineering undergraduate students only.

ENLP 3052 (2) Leadership Seminar 2: Leadership Experience
Tackling a leadership experience of their own design, students undertake a key component of the Engineering Leadership Program experience and a requirement for the completion of the Engineering Leadership Certificate. Guides students through a process of planning, executing and evaluating their leadership experience and progress toward personalized leadership development goals. Coursework involves working with a mentor, collaborating with peers and conducting research. Formerly COEN 3052.
Requisites: Requires a prerequisite course of COEN 2050 (minimum grade D-). Restricted to Engineering Leadership Program (PENL) students only.

ENLP 3060 (3) Our Sustainable Future CU-in-DC Seminar
Taught in Washington, D.C., this seminar combines traditional classroom learning with diverse site visits with sustainability practitioners, analysts, regulators, and business and community leaders. Students will engage complex and interdependent problems of regional and global sustainability, they will critically explore what role business and science should have in creating environmental policies, and they will learn how stakeholders across the private, non-profit, and public sectors can work collaboratively to achieve a more socially-equitable and environmentally-sustainable world.
Equivalent - Duplicate Degree Credit Not Granted: CESR 3060
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors).
Recommended: preference will be given to Engineering and Business majors.

ENLP 3100 (3-4) Complex Leadership Challenges
Approaches leadership as a process of inquiry, empathy, and action, cultivating skills leaders need to understand, communicate about, and generate innovative approaches to complex issues. Each student conducts extensive, principled research about a complex social issue of their choice, investigating its multidimensionality by applying different analytic lenses. Instructor consent required for students not in Engineering Leadership. Formerly COEN 3050.
Requisites: Requires prerequisite course of ENLP 2000 or ENLP 3000 (minimum grade C).

ENLP 3843 (3) Special Topics
Explores different important themes in leadership; check with department for specific semester topics.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to students in College of Engineering and Applied Science (ENGR) only.

ENLP 4000 (3) The Empire of Modern Science
Examines science and technology's rise to the status of political, cultural and economic leader of the modern world. Also considers the ambitions and limits of the modern scientific enterprise, and investigates whether scientists are adequately equipped to lead humanity's political, spiritual and evolutionary future. Readings are drawn from primary sources in history, economics politics, philosophy and literature. Recommended restriction: this course is recommended for Sophomores, Juniors, and Seniors.
Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.
Recommended: Prerequisite ENLP 2000 or ENLP 3000.

Engineering Leadership - Certificate

The Engineering Leadership Program (ENLP) confronts leadership challenges in applied science using liberal arts pedagogy. The program aims to cultivate engineering leaders of curiosity and character who combine technical expertise with moral principles and political literacy to address society's most pressing scientific and technological problems.

ENLP offers a wide variety of courses on the thought and practice of leadership, many of which utilize primary source texts in history, the philosophy of science, moral philosophy, political science and anthropology. The program's courses count for humanities and social sciences credit in the College of Engineering and Applied Science and most courses are discussion-based seminars. Students with a deep interest in ENLP's curriculum are encouraged to pursue the Engineering Leadership Certificate and develop long-term relationships with faculty. Such students may also wish to take courses in the Herbst Program for Engineering, Ethics & Society, many of which count for credit toward the certificate.

In addition to introducing students to the intellectual complexities of leadership, the program also addresses contemporary concerns in engineering practice. CU Boulder's engineering alumni and established leaders from engineering industry, business and politics frequently visit ENLP classes to give guest lectures, hold interview sessions and converse with students over informal lunches. The Engineering Leadership Program has also partnered with the Engineering Management Program to offer coursework for ENLP students interested in engineering project management, engineering entrepreneurship and engineering economics.

Requirements

Courses offered by the Engineering Leadership Program are open to all students in the College of Engineering and Applied Science. *All ENLP courses count for humanities and social sciences credit.* Students interested in ENLP are advised (but not required) to begin their course of study with ENLP 2000, the program's introductory course.

The certificate requires 12 credit hours of coursework to be completed prior to graduation. All 12 credit hours must be earned with CU Boulder coursework only. Graduating students who have completed their certificate requirements must fill out the Certificate Completion Form on the ENLP website (https://cuboulder.qualtrics.com/jfe/form/SV_9oZdz8yfUnARmwm/) to receive certificate status on their transcripts.

Students may take any ENLP course to sample the program's offerings, or they may choose to take multiple courses and pursue the Engineering Leadership Certificate. The certificate is designed for students who are deeply curious about leadership and its manifold relationship with science, technology, humanity and political society.

Most ENLP courses are discussion-based seminars focused on primary source readings spanning a wide variety of scientific, humanistic, and social scientific disciplines. ENLP courses also offer opportunities to attend guest lectures, travel abroad, network with CU alumni and meet leaders from the public and private sectors.

Required Courses and Credits

Students are required to take any four courses from the list of core requirements *or* any three courses from the list of core requirements and one approved elective.

A list of approved electives is also available on the ENLP website (https://www.colorado.edu/engineeringleadershipprogram/). Students may petition the Engineering Leadership Program Director to consider other

electives, including transfer credits from other universities, not listed below.

Code	Title	Credit Hours
Core Requirements		
ENLP 2000	Leadership, Fame and Failure	3
ENLP 3000	Intelligent Leadership	3
ENLP 3100	Complex Leadership Challenges	3-4
ENLP 4000	The Empire of Modern Science	3
Approved Electives		
ASEN 3046	Introduction to Humans in Aviation	3
ASIA 4500	Urban Asia: Tradition, Modernity, Challenges	3
ASTR 4800	Space Science: Practice and Policy	3
ATLS 2000	The Meaning of Information Technology	3
EHON 1151	Critical Encounters	3
EMEN 4030	Project Management Systems	3
EMEN 4100	Engineering Economics	3

Lighting Design - Certificate

Our sense of sight is responsible for much of our perception of the world around us. Through the proper application of light, whether indoors or outdoors, we can shape a viewer's understanding of architecture and influence the outcome of our architectural designs.

The undergraduate certificate in Lighting Design (http://www.colorado.edu/lightingprogram/lighting-design-certificate/) is offered to non-engineering students, in particular those majoring in environmental design, theater and film, to expose them to the basics of architectural interior, exterior and landscape lighting design. Topics include:

- Metrics of light
- Vision and color vision
- Proper use of light sources, lighting fixtures and controls
- Lighting effects on perception of architecture and how it fits into the architectural design process
- Lighting design techniques and specification
- Quantification of light to ensure visual comfort and limit energy use
- Light at night and its correct application in exterior architecture and landscape

The certificate prepares students for entry-level jobs in lighting design firms. A combination of lighting design with architecture, landscape architecture or design studies could also open doors in architecture and interior design firms.

Requirements

Admission Requirements

A cumulative GPA of 2.500 or higher is required to enroll. This certificate is not open to students rostered in the College of Engineering & Applied Science. First-year students are not eligible to take certificate courses - students may sign up for the certificate in the spring of their freshman year and start taking classes in their sophomore year.

To enroll, students should complete the Lighting Certificate Declaration Form (http://bit.ly/LightingCertificate/).

Program Requirements

Grade Requirements

A cumulative GPA of 2.500 for all certificate courses is required. A grade of C or higher is required for AREN 4440 Lighting Design Capstone. For all other certificate courses, a grade of C- or higher is required. A course not passed with the minimum grade may be repeated one time.

Course Requirements

The certificate is achieved through completion of four lighting courses: two required courses, one technical elective, and a capstone course. Courses listed below represent current offerings and are subject to change.

Code	Title	Credit Hours
Required Courses		
AREN 3430	Architectural (Interior) Lighting Design	3
AREN 4540	Architectural Exterior and Landscape Lighting Design	3
Technical Elective		
Choose one:		3
AREN 4620	Adaptive Lighting Systems	
AREN 4630	Advanced Lighting Design	
THTR 3055	Stage Lighting Design 1	
Capstone		
AREN 4440	Lighting Design Capstone	3
Total Credit Hours		**12**

Learning Outcomes

By the completion of the program, students will be able to:

- Demonstrate a mastery of the fundamentals of lighting.
- Design and analyze lighting solutions that address vision and perception, architecture and compliance.
- Communicate lighting solutions through effective use of lighting design tools and techniques.

Engineering Management

The Lockheed Martin Engineering Management Program (EMP) (http://www.colorado.edu/emp/) is a management and leadership program that prepares students in the technical and engineering fields for early to mid-career positions. It is designed for students who are looking to advance in management, successfully contribute to the overall business or venture and develop their leadership skills.

The program offers an engineering entrepreneurship minor, engineering management minor and various courses for undergraduate students in the College of Engineering and Applied Science. The minors and courses are designed for junior- and senior-level engineering students who seek to develop business and industry acumen to complement their engineering majors. Courses are offered on campus, remote and online.

Course code for this program is EMEN.

Minors

- Engineering Entrepreneurship - Minor (p. 988)
- Engineering Management - Minor (p. 988)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Angel, George
Lecturer; BS, University of Albuquerque

Bouvier, Claudia
Lecturer; ME, University of Colorado Boulder

Bozic, Christy L. (https://experts.colorado.edu/display/fisid_155482/)
Instructor Adjunct; PhD, Purdue University

Crofton, Karen (https://experts.colorado.edu/display/fisid_164479/)
Scholar in Residence; MBA, Rice University

Dietrich, Alex
Lecturer; MBA, George Washington University

Duren, Ron G. Jr. (https://experts.colorado.edu/display/fisid_157263/)
Teaching Associate Professor; ME, University of Colorado Boulder

Egan, Kristen
Lecturer; ME, University of Colorado Boulder

Gazarik, Michael
Scholar in Residence, Director; PhD, Georgia Institute of Technology

Katz, Tami
Lecturer; PhD, Colorado State University

Kirschling, Wayne (https://experts.colorado.edu/display/fisid_123149/)
Professor Emeritus; DBA, University of Colorado Boulder

Kramer, Amy
Lecturer; JD, University of Colorado Boulder

Leeker, Eric
Lecturer; MBA, Purdue University

Leeker, Jessica Rush (https://experts.colorado.edu/display/fisid_167166/)
Instructor Adjunct; PhD, Purdue University

Martin, Wendy Lynn (https://experts.colorado.edu/display/fisid_154942/)
Teaching Associate Professor; ME, University of Colorado Boulder

McCluskey, Alyssa
Lecturer; PhD, University of Colorado Boulder

Moorer, Daniel F. Jr. (https://experts.colorado.edu/display/fisid_151590/)
Scholar in Residence; PhD, University of Colorado Boulder

Murray, Seth (https://experts.colorado.edu/display/fisid_148038/)
Teaching Assistant Professor; ME, University of Colorado Boulder

Readey, Michael J. (https://experts.colorado.edu/display/fisid_157363/)
Instructor Adjunct; PhD, Case Western Reserve University

Songer, Anthony
Lecturer; PhD, University of California Berkeley

Svoboda, John D. (https://experts.colorado.edu/display/fisid_154884/)
Lecturer; MBA, University of California-Los Angeles

Thomas, John (https://experts.colorado.edu/display/fisid_167167/)
Scholar in Residence; PhD, Arizona State University

Tobey, Kathryn
Scholar in Residence; ME, University of Colorado Boulder

Van Atten, Bill
Lecturer; MS, Johns Hopkins University

Courses

EMEN 3100 (3) Introduction to Engineering Management
Examines topics important to the management of engineering activities within organizations. Topics include the relationship of engineering to business and management disciplines, the functions of an engineering manager, principles and techniques for managing financial resource and business ownership. Explores best practices in global engineering management, process management, legal issues, ethics, organizational behavior and communications.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) College of Engineering students only.

EMEN 4030 (3) Project Management Systems
A practical approach is used to help students learn about project management to help develop the skills needed to be successful in this dynamic profession. This course is designed for students with various experience levels and provides lessons learned examples from real-world projects in different industries. The course covers project management in both theory and practice by introducing globally recognized processes, tools, techniques, and methods used to effectively manage projects through their life cycle.
Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

EMEN 4050 (3) Leadership and Professional Skills
Accelerate your personal and professional growth with the essential skills required to become an effective leader/manager. Conduct personal development through exercises in communication and leadership effectiveness. Explore leadership styles, managing commitments, change management, negotiation, conflict resolution, organizational culture, emotional intelligence, team dynamics and business ethics.
Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

EMEN 4055 (3) Designing for Diversity, Equity and Inclusion in Engineering
Students will focus on the historical narrative of institutions and structures that have shaped instances of inclusion and exclusion in engineering, how their own identity and background shape their thoughts and actions, how transformational leadership is enacted for diversity, equity, and inclusion (DEI), and how involving DEI in the strategic planning process of designing can create additional innovations and opportunities.
Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

EMEN 4100 (3) Engineering Economics
Introduces engineering cost concepts, financial statements and the corporate economic environment. Includes concepts and methods of analysis of the time value of money, project cost estimation, cash flow analysis, replacement analysis, risk management and financial case statements.
Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

EMEN 4110 (3) Supply Chain Management
Explores the key issues related to the design and management of supply chains. Covers the efficient integration of suppliers, production facilities, warehouses, and stores so that the right products in the right quantity reach customers at the right time. Focuses on the minimization of the total supply chair cost subject to service requirements imposed by a variety of industries.
Equivalent - Duplicate Degree Credit Not Granted: MGMT 4110
Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

EMEN 4120 (3) Managing Business Processes
Covers the concepts and tools to design and manage business processes. Emphasizes modeling an analysis, information technology support for process activities, and management of process flows. Graphical simulation software is used to create dynamic models of business processes and predict the effect of changes. Prepares students for a strong management or consulting career path in business processes.
Equivalent - Duplicate Degree Credit Not Granted: MGMT 4120 and MGMT 5120
Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

EMEN 4200 (3) Engineering and Entrepreneurship for the Developing World
Use your engineering and problem solving skills, combined with market/industry research, customer interviews, design for manufacturability, stakeholder management and financial modeling to promote entrepreneurship and sustainable change in the developing world. Explore alternative energy, medical devices, phones, internet, recycling, cook stoves, clean water, sanitation and infrastructure.
Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

EMEN 4400 (3) Quality Management
Examine the concepts, tools, and techniques used in managing and measuring quality and productivity in business. Topics include foundational concepts of quality, customers, the workforce, and processes. Apply the tools and techniques associated with the quality sciences, including statistical methods, design quality, measurement, control, process improvement, six sigma. Discover the basics of performance excellence management, Baldrige Award criteria, strategic planning, leadership, and daily management. Specific examples, case studies from modern companies will be studied.
Equivalent - Duplicate Degree Credit Not Granted: MGMT 4400
Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

EMEN 4405 (3) Systems Engineering
Examines the disciplined process of designing a complex system to meet a specified customer need. We begin with identifying the needed capability through operational and functional analysis, then progress through defining requirements that articulate operational and environmental capabilities that address reliability, maintainability, and producibility considerations across the system lifecycle. The course also introduces technical management tasks to include risk management, technology readiness assessment, and program controls using real-world, current aerospace industry examples.
Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

EMEN 4800 (3) Entrepreneurship and Marketing
Offers an in-depth exploration of entrepreneurship through the lens of "The Lean Startup" methodology. You'll gain a comprehensive understanding of key startup concepts like Minimum Viable Product (MVP), venture capital, and the dynamics of early-stage companies. The curriculum combines lectures, workshops, and hands-on projects to equip you with the critical thinking skills and practical experience needed to identify and seize business opportunities in the world. Guest speakers from leading companies will occasionally enrich the classroom, providing industry insights.
Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

EMEN 4820 (3) Entrepreneurial Product Development
Organizations are increasingly looking for employees with training and experience in design thinking and innovation. This course will look at product development through a design thinking lens. In addition, this course will be teamwork-oriented, but you will also complete readings and independent activities that will support the group work and ensure your depth of knowledge.
Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

EMEN 4825 (3) New Venture Creation
Relevant to students seeking to acquire an entrepreneurial toolkit of knowledge and skills for working in the startup world or launching a new venture. Covers the techniques for evaluating the probability of success for a new venture and develops a methodology for entrepreneurial thinking that provides benefits for big and small ventures. The final deliverable is a professional pitch to a group of seasoned investors and the submission of a complete business plan.
Equivalent - Duplicate Degree Credit Not Granted: ESBM 4830
Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

EMEN 4830 (1-3) Special Topics
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

EMEN 4840 (1-3) Independent Study Project
Available only through approval of Engineering Management Program. Subjects arranged to fit the needs of the particular student.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

EMEN 4850 (3) Entrepreneurial Leadership
Investigate the importance of entrepreneurship, value creation, and the entrepreneurial leader's role in driving innovation and growth. Explore and discuss building a culture of practical, ethical, and empowered leaders, developing a shared purpose, understanding the meaning of values in an organizational setting, and identifying potential negative issues in different roles within an entrepreneurial team. Essential skills learned will facilitate the development of capabilities to adapt leadership approaches/practices in various business and organizational contexts.
Repeatable: Repeatable for up to 6.00 total credit hours.

EMEN 4875 (3) Entrepreneurial Finance
Teaches the importance of company formation, what metrics are important to investors, types of investments and their pros and cons, company valuation as well as when and how to fundraise.

Engineering Entrepreneurship - Minor

The undergraduate engineering entrepreneurship minor prepares students with the knowledge, understanding and skills essential to entrepreneurship in a start-up venture or within a larger corporation. This minor develops entrepreneurial and leadership skills, while introducing students to the multiple facets of entrepreneurship, innovation, creative development and the overall entrepreneurial process. After completion of the requirements, the undergraduate minor in engineering entrepreneurship will be listed on the student's transcript at the time of graduation along with the student's bachelor's degree.

For more information, visit the program's Undergraduate Engineering Entrepreneurship Minor (https://www.colorado.edu/emp/undergraduate-programs/engineering-entrepreneurship-minor/) webpage.

Requirements

Eligibility

The engineering entrepreneurship minor is open to all undergraduate students in the College of Engineering and Applied Science who are in good academic standing (https://www.colorado.edu/engineering-advising/academic-standing/) within the college. Please see the Engineering Management minor website (https://www.colorado.edu/emp/undergraduate-programs/undergraduate-minors/) for the application process.

Program Requirements

The minor requires 12 credit hours consisting of two required courses and two elective courses.

To be awarded the minor, the students must successfully complete the 12 credit hour program requirements. A cumulative GPA of 2.000 or better is required for courses used to satisfy the requirements of this minor.

Each individual course that is counted towards these degree requirements must be passed with a D- or better (note, however, a C- or better is required in all prerequisite courses to move on to a subsequent course). Prior coursework may be transferred from other institutions with approval.

To meet the minor's residency requirement, at least three courses need to be taken at CU Boulder (in person or online).

Code	Title	Credit Hours
Required Courses		
EMEN 4800	Entrepreneurship and Marketing	3
EMEN 4820	Entrepreneurial Product Development	3
Electives (choose two)		**6**
EMEN 4055	Designing for Diversity, Equity and Inclusion in Engineering	
EMEN 4200	Engineering and Entrepreneurship for the Developing World	
EMEN 4825	New Venture Creation	
EMEN 4850	Entrepreneurial Leadership	
EMEN 4875	Entrepreneurial Finance	
Total Credit Hours		**12**

Engineering Management - Minor

The engineering management minor complements the technical knowledge of a baccalaureate engineering degree by introducing business skills engineers need to succeed in today's job market. After completion of the requirements, the undergraduate minor in engineering management will be listed on the student's transcript at the time of graduation along with the student's bachelor's degree.

For more information, visit the program's Undergraduate Engineering Management Minor (https://www.colorado.edu/emp/undergraduate-programs/engineering-management-minor/) webpage.

Requirements

Eligibility

The engineering management minor is open to undergraduate students rostered in the College of Engineering and Applied Science. Please see the engineering management minor website (https://www.colorado.edu/emp/undergraduate-programs/undergraduate-minors/) for the application process.

Program Requirements

Students must complete 12 credit hours: two required courses totaling 6 credit hours, plus an additional 6 credit hours of electives.

A cumulative GPA of 2.000 or better is required for courses used to satisfy the requirements of this minor. Each course requires a minimum grade of D- or better (note, however, that a C- or better is required in all prerequisite courses to qualify to take a subsequent course).

To meet the minor's residency requirement, at least three courses need to be taken at CU Boulder (in person or online).

Code	Title	Credit Hours

Engineering Physics

Engineering physics provides students with a broad exposure to the basic physical theories and mathematical techniques underlying engineering. The program may be specialized to meet the student's interests through engineering electives. Most students become involved in laboratory research, and graduates find opportunities in optics, electronics, magnetics and other hardware-based job markets. The program also provides excellent preparation for graduate study in physics, applied physics and other areas of the natural sciences and engineering.

The engineering physics program focuses on the foundations of modern technology. The program prepares students for research, development and entrepreneurial careers in many frontier areas of engineering, including quantum devices, ultra fast lasers, adaptive optics, cryogenic electronics, computer simulation of physical systems, solar cells, magnetic storage technology, micro-mechanical systems and molecular electronics. All students study the core theoretical subjects of mechanics, electricity and magnetism, thermal physics and quantum mechanics, supplemented by courses in mathematics, computation and laboratory technique. The program can be tailored to a student's interests through electives in engineering, physics or other sciences.

Note: Students may not earn a bachelor's degree in physics from the College of Arts & Sciences as well as a bachelor's degree in engineering physics from the College of Engineering & Applied Science. Furthermore, the physics minor may not be earned with either of these two baccalaureate programs.

Course code for this program is PHYS.

Bachelor's Degree

- Engineering Physics - Bachelor of Science (BSEP) (p. 994)

Courses

PHYS 1000 (3) Preparatory Physics
Introduces basic physics, emphasizing an analytical approach to prepare for PHYS 1110 and PHYS 1120, the engineering majors sequence. Does not satisfy any MAPS deficiency in either the sciences or math. Department enforced prerequisite: 1 year high school algebra.
Additional Information: Arts Sci Core Curr: MAPS Course

PHYS 1010 (3) Physics of Everyday Life 1
Intended primarily for nonscientists, this course covers physics encountered in everyday life. Topics include balls, scales, balloons, stoves, insulation, light bulbs, clocks, nuclear weapons, basics of flashlights, and microwave ovens. Department enforced prereq., high school algebra or equivalent. This course should not be taken if the student has a MAPS deficiency in math.
Additional Information: GT Pathways: GT-SC2 -Natural Physicl Sci:Lec Crse w/o Req Lab
Arts Sci Core Curr: Quant Reasn Mathmat Skills
Arts Sci Core Curr: Natural Science Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences
Arts Sci Gen Ed: Quantitative Reasoning Math
MAPS Course: Chemistry
MAPS Course: Physics

PHYS 1110 (4) General Physics 1
First semester of three-semester sequence for science and engineering students. Covers kinematics, dynamics, momentum of particles and rigid bodies, work and energy, gravitation, and simple harmonic motion.
Equivalent - Duplicate Degree Credit Not Granted: PHYS 1115
Requisites: Requires prerequisite course of GEEN 3830 (minimum grade C-) or prerequisite or corequisite course of APPM 1345 or APPM 1350 or MATH 1300 or MATH 1310 (minimum grade C-).
Additional Information: GT Pathways: GT-SC2 -Natural Physicl Sci:Lec Crse w/o Req Lab
Arts Sci Core Curr: Natural Science Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences

PHYS 1115 (4) General Physics 1 for Majors
First semester of three semester sequence for physics, engineering physics and astronomy majors. Covers kinematics, dynamics momentum of particles and rigid bodies, work and energy, gravitation, and simple harmonic motion.
Equivalent - Duplicate Degree Credit Not Granted: PHYS 1110
Requisites: Requires prerequisite course of GEEN 3830 or prerequisite or corequisite course of APPM 1345 or APPM 1350 or MATH 1300 or MATH 1310 (minimum grade C-). Restricted to Physics (PHYS-BA) or Engineering Physics (EPEN-BS) or Astronomy (ASTR-BA) majors only.
Grading Basis: Letter Grade
Additional Information: Arts Sci Core Curr: Natural Science Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences

PHYS 1120 (4) General Physics 2
Three lect., one rec. per week, plus three evening exams in the fall and spring semesters. Second semester of three-semester introductory sequence for science and engineering students. Covers electricity and magnetism, wave motion and optics. Normally is taken concurrently with PHYS 1140.
Equivalent - Duplicate Degree Credit Not Granted: PHYS 1125
Requisites: Requires prerequsite courses of PHYS 1110 or PHYS 1115 and a prerequisite or corequisite course of APPM 1360 or MATH 2300 (all minimum grade of C-).
Additional Information: GT Pathways: GT-SC2 -Natural Physicl Sci:Lec Crse w/o Req Lab
Arts Sci Core Curr: Natural Science Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences

PHYS 1125 (4) General Physics 2 for Majors
Three lect., one rec per week, plus three evening exams in the fall and spring semesters. Second semester of three semester introductory sequence for physics, engineering and astronomy majors. Covers electricity and magnetism, wave motion and optics. Normally is taken concurrently with PHYS 1140.
Equivalent - Duplicate Degree Credit Not Granted: PHYS 1120
Requisites: Requires a prerequisite course of PHYS 1110 or PHYS 1115. Requires a prerequisite or corequisite course of APPM 1360 or MATH 2300 (all minimum grade C-). Restricted to Physics (BA), Engineering Physics (BS) and Astronomy (BA) students only.
Additional Information: Arts Sci Core Curr: Natural Science Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences

PHYS 1140 (1) Experimental Physics 1
Introduces experimental physics through laboratory observation of a wide range of phenomena. Covers experiments on physical measurements, including mechanics, electricity & magnetism, and optics, with the mathematical analysis of physical errors associated with the experimental process.
Requisites: Requires a prerequisite or corequisite course of PHYS 1120 or PHYS 1125 (minimum grade C-).
Additional Information: GT Pathways: GT-SC1 - Natural Physcal Sci:Lec Crse w/ Req Lab
Arts Sci Core Curr: Natural Science Lab
Arts Sci Gen Ed: Distribution-Natural Sci Lab
Arts Sci Gen Ed: Distribution-Natural Sciences

PHYS 1230 (3) Light and Color for Nonscientists
Discusses light, color, vision, and perception. Covers reflection, refraction, lenses, and applications to photography and other methods of light sensing. Other topics include lasers and holography. Course is geared toward nonscience majors. Department enforced prereq., high school algebra or equivalent. Should not be taken by students with a math MAPS deficiency.
Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences
MAPS Course: Chemistry
MAPS Course: Natural Science
MAPS Course: Physics

PHYS 1240 (3) Sound and Music
Explores the physical processes that underlie the diversity of sound and musical phenomena. Topics covered include the physical nature of sound, the perception of sound, the perception of pitch and harmony, musical instruments, synthesizers and samplers, and room acoustics. Geared toward nonscience majors. Department enforced prereq., high school algebra or equivalent. Should not be taken by students with a math MAPS deficiency.
Additional Information: GT Pathways: GT-SC2 -Natural Physicl Sci:Lec Crse w/o Req Lab
Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences
MAPS Course: Chemistry
MAPS Course: Natural Science
MAPS Course: Physics

PHYS 1400 (1) Fundamentals of Scientific Inquiry
Engages students in discussions and experimentation to uncover the aspects of physics that won't be found in a textbook, centered around how to do scientific research and be a part of the greater scientific community. Topics include model-building, metacognition, failure in science, and presentation skills. Students will have the opportunity to interact with real scientists through panels, lab tours, and direct mentorship as they engage in a hands-on group research project culminating in a poster presentation session. Geared toward first-year and transfer physics and engineering physics students. Does not count toward the PHYS-BA major requirements. For more information, please visit: http://www.cuprime.org/class.

PHYS 1580 (3) Energy and Interactions
Engages non-physics majors in hands-on, minds-on activities and labs to investigate the physical world, the nature of science, and how science knowledge is constructed. This introductory course is especially relevant for future elementary and middle school teachers although it will meet the needs of most non-physics and non-science majors. Physical content focuses on interactions and energy.
Equivalent - Duplicate Degree Credit Not Granted: EDUC 1580
Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences
MAPS Course: Chemistry
MAPS Course: Natural Science
MAPS Course: Physics

PHYS 2010 (5) General Physics 1
Includes three lectures, one two-hour laboratory/recitation per week, plus three evening exams in the fall and spring semesters. Covers mechanics, heat and sound. Thorough presentation of fundamental facts and principles of physics using algebra and trigonometry. Designed for life science majors, including premed students. Natural science majors with a knowledge of calculus and others taking calculus are urged to take the calculus-based courses PHYS 1110, PHYS 1120, PHYS 1140 and PHYS 2130, rather than PHYS 2010 and PHYS 2020. Department enforced prerequisites: ability to use high school algebra and trigonometry.
Additional Information: GT Pathways: GT-SC1 - Natural Physcal Sci:Lec Crse w/ Req Lab
Arts Sci Core Curr: Natural Science Sequence
Arts Sci Core Curr: Natural Science Lab
Arts Sci Gen Ed: Distribution-Natural Sci Lab
Arts Sci Gen Ed: Distribution-Natural Sciences
MAPS Course: Natural Science

PHYS 2020 (5) General Physics 2
Includes three lectures, one two-hour laboratory/recitation per week, plus three evening exams in the fall and spring semesters. Covers electricity and magnetism, light and modern physics. Designed for life science majors, including premed students. Natural science majors with a knowledge of calculus and others taking calculus are urged to take the calculus-based courses PHYS 1110, PHYS 1120, PHYS 1140 and PHYS 2130, rather than PHYS 2010 and PHYS 2020.
Requisites: Requires a prerequisite course of PHYS 1110 or PHYS 2010 (minimum grade C-).
Additional Information: GT Pathways: GT-SC1 - Natural Physcal Sci:Lec Crse w/ Req Lab
Arts Sci Core Curr: Natural Science Sequence
Arts Sci Core Curr: Natural Science Lab
Arts Sci Gen Ed: Distribution-Natural Sci Lab
Arts Sci Gen Ed: Distribution-Natural Sciences

PHYS 2130 (3) Introduction to Quantum Mechanics and Its Applications
Learn about a leading edge of physics and engineering along with its applications to much of modern technology. Topics include quantum theory, atomic physics, solid state and nuclear physics. Applications discussed may include special relatively, lasers, diodes/transistors, nuclear energy, quantum computing and encryption. Third semester of introductory sequence for science and engineering students. Physics majors should take PHYS 2170 instead of this course. May be taken concurrently with PHYS 2150.
Requisites: Requires a prerequisite course of PHYS 1120 or PHYS 1125, and a prerequisite or corequisite course of MATH 2400 or APPM 2350 (all minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

PHYS 2150 (1) Experimental Physics 2
One lect., one 2-hour lab per week. Includes many experiments of modern physics, including atomic physics, solid state physics, electron diffraction, radioactivity and quantum effects. Normally taken concurrently with PHYS 2130 or PHYS 2170, this course may be taken after PHYS 2130 or PHYS 2170.
Requisites: Requires a prerequisite course of PHYS 1140 and a prerequisite or corequisite course of PHYS 2130 or PHYS 2170 (all minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sci Lab
Arts Sci Gen Ed: Distribution-Natural Sciences

PHYS 2170 (3) Foundations of Modern Physics
Covers special relativity, quantum mechanics and atomic structure. Completes the three-semester sequence of general physics for physics and engineering physics majors. Normally taken with the laboratory PHYS 2150.
Equivalent - Duplicate Degree Credit Not Granted: PHYS 2130
Requisites: Requires a prerequisite course of PHYS 1120 or PHYS 1125, and a prerequisite or corequisite course of MATH 2400 or APPM 2350 (all minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

PHYS 2210 (3) Classical Mechanics and Mathematical Methods 1
Theoretical Newtonian mechanics, including position and velocity dependent forces, oscillation, stability, non-inertial frames and gravitation from extended bodies. Ordinary differential equations, vector algebra, curvilinear coordinates, complex numbers, and Fourier series will be introduced in the context of the mechanics.
Requisites: Requires a prerequisite course of PHYS 2130 or PHYS 2170 and a prerequisite or corequisite course of APPM 2350 or MATH 2400 and a prerequisite or corequisite course of APPM 2360 or MATH 3430 (all minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

PHYS 2600 (3) Introduction to Programming and Scientific Computing
Covers basic concepts in programming and scientific computing, including numerical integration and simulation of physical systems. Students will learn the programming language Python and associated graphics libraries. Programming examples will be drawn from classical physical systems that can only be solved numerically, such as projectile motion with drag and N-body problems.
Equivalent - Duplicate Degree Credit Not Granted: ASTR 2600
Requisites: Requires prerequisite course of PHYS 1120 (minimum grade C-). Requires prerequisite or corequisite course of PHYS 2170 or PHYS 2130 (minimum grade C-).

PHYS 2840 (1-3) Independent Study
Selected topics for undergraduate independent study. Subject matter to be arranged.
Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

PHYS 3000 (3) Science and Public Policy
For nonscience majors. Reading, discussions, debates and lectures are used to study how science affects society economically, intellectually, and in terms of health and national security. Another focus is how government fosters and funds scientific activities. Department enforced prerequisite: completion of core science requirement.
Equivalent - Duplicate Degree Credit Not Granted: ARSC 3200

PHYS 3050 (3) Writing in Physics: Problem-Solving and Rhetoric
Teaches strategies used in scientific writing with an emphasis on argument, reviews and reinforces essential writing skills, provides experience in writing both academic and professional communications in a style appropriate to the literature of physics. Department enforced prerequisite: lower-division core writing requirement. Does not count toward the PHYS-BA major requirements or major GPA.
Requisites: Requires a prerequisite course of PHYS 2130 or PHYS 2170 (minimum grade C-). Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Core Curr: Written Communication
Arts Sci Gen Ed: Written Communication-Upper

PHYS 3070 (3) Energy and the Environment
Contemporary issues in energy consumption and its environmental impact, including fossil fuel use and depletion; nuclear energy and waste disposal; solar, wind, hydroelectric, and other renewable sources; home heating; energy storage; fuel cells; and alternative transportation vehicles. Included are some basic physical concepts and principles that often constrain choices. No background in physics is required.
Equivalent - Duplicate Degree Credit Not Granted: ENVS 3070
Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences

PHYS 3090 (3) Introduction to Quantum Computing
Covers the basics of quantum computation, including the basics of quantum information; axioms of quantum mechanics; quantum circuits and universality; the relationship between quantum and classical complexity classes; simple quantum algorithms such as the quantum Fourier transform; Shor factoring algorithm; Grover search algorithm; physical implementation of quantum computation; error correction and fault tolerance.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 3090 and ECEN 3090
Requisites: Requires prerequisite course of APPM 2360 or APPM 3310 or CSCI 2820 or MATH 2130 or MATH 2135 (minimum grade C-).

PHYS 3210 (3) Classical Mechanics and Mathematical Methods 2
Lagrangian and Hamiltonian treatment of theoretical mechanics, including coupled oscillations, waves in continuous media, central force motion, rigid body motion and fluid dynamics. The calculus of variations, linear algebra, tensor algebra, vector calculus, and partial differential equations will be introduced in the context of the mechanics.
Requisites: Requires a prerequisite course of PHYS 2210 and a prerequisite course of APPM 2350 or MATH 2400 and a prerequisite course of MATH 3430 or APPM 2360 (all minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

PHYS 3220 (3) Quantum Mechanics 1
Introduces quantum mechanics with wave, operator and matrix computational techniques. Investigates solutions for harmonic oscillator, potential well and systems with angular momentum. Develops a quantitative description of one-electron atoms in lowest order.
Requisites: Requires a prerequisite course of PHYS 3210 (minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

PHYS 3221 (1) Tutorial Practicum for Quantum Mechanics 1
Uses interactive group work to aid student learning in corequisite course PHYS 3220. In this tutorial, students will work in small groups to practice how to solve challenging problems and their underlying conceptual basis, as well as using hands-on activities, demonstrations, and other techniques to help learn content.
Requisites: Requires a corequisite course of PHYS 3220.

PHYS 3310 (3) Principles of Electricity and Magnetism 1
Covers mathematical theory of electricity and magnetism, including electrostatics, magnetostatics, and polarized media, and provides an introduction to electromagnetic fields, waves, and special relativity.
Requisites: Requires a prerequisite course of PHYS 2210 and a prerequisite course of APPM 2350 or MATH 2400 and a prerequisite course of MATH 3430 or APPM 2360 (all minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

PHYS 3311 (1) Tutorial Practicum for Electricity & Magnetism 1
Uses interactive group work to aid student learning in corequisite course PHYS 3310. In this tutorial, students will work in small groups to practice how to solve challenging problems and their underlying conceptual basis, as well as using hands-on activities, demonstrations, and other techniques to help learn content.
Requisites: Requires a corequisite course of PHYS 3310.

PHYS 3320 (3) Principles of Electricity and Magnetism 2
Continuation of PHYS 3310. Electromagnetic induction; magnetic energy; microscopic theory of magnetic properties; Ac circuits; Maxwell's Equations; planewaves; waveguides and transmission lines; radiation from electric and magnetic dipoles and from an accelerated charge.
Requisites: Requires a prerequisite course of PHYS 3310 (minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

PHYS 3330 (2) Electronics for the Physical Sciences
Introduces laboratory electronics for physical science students. Includes basic electronic instruments, dc bridge circuits, operational amplifiers, bipolar transistors, field-effect transistors, photodiodes, noise in electronic circuits, digital logic and microcontrollers. Students gain hands-on experience in designing, building and debugging circuits. Two lectures and one three hour laboratory per week. Concludes with a three-week project in which students design and build an experiment of their choice and present a seminar on the results.
Requisites: Requires prerequisite courses of PHYS 2150 and PHYS 2130 or PHYS 2170 (all minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sci Lab Arts Sci Gen Ed: Distribution-Natural Sciences

PHYS 4130 (3) Biological Electron Microscopy: Principles and Recent Advances
Covers basic mechanisms for imaging and recent advances used in current biological research, elements of electron optics, image optimization, resolution, radiation damage, various imaging modes (TEM, HVEM, Sem, Stem, Stm), specimen quantitation and reconstruction (stereo and 3-D), microanalysis and electron diffraction. Specimen preparation treated only incidentally.
Equivalent - Duplicate Degree Credit Not Granted: PHYS 5130
Requisites: Requires a prerequisite course of EBIO 1220 or MCDB 1150 or MCDB 4550 or MCDB 5550 or PHYS 1120 or PHYS 2020 (minimum grade D-).

PHYS 4150 (3) Plasma Physics
Discusses the fundamentals of plasma physics, including particle motion in electromagnetic fields, wave propagation, collisions, diffusion, and resistivity. Presents examples from space plasmas, astrophysical plasmas, laboratory fusion plasmas, and plasmas in accelerators.
Requisites: Requires a prerequsite course of PHYS 3310 and a prerequisite or corequisite course of PHYS 3320 (all minimum grade of C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

PHYS 4230 (3) Thermodynamics and Statistical Mechanics
Statistical mechanics applied to macroscopic physical systems; statistical thermodynamics, classical thermodynamics systems; applications to simple systems. Examines relationship of statistical to thermodynamic points of view.
Requisites: Requires a prerequisite course of PHYS 2210 and a prerequisite or corequisite course of PHYS 3220 (all minimum grade of C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

PHYS 4340 (3) Introduction to Solid State Physics
Discusses crystal structure, lattice dynamics, band theory, semiconductors and ferromagnetism.
Requisites: Requires a prerequsite course of PHYS 3220 (minimum grade of C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

PHYS 4410 (3) Quantum Mechanics 2
Extends quantum mechanics to include perturbation theory and its applications to atomic fine structure, multi-particle systems, interactions with external forces, the periodic table and dynamical processes including electromagnetic transition rates.
Requisites: Requires prerequisite courses of PHYS 3220 and PHYS 3310 (all minimum grade of C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

PHYS 4420 (3) Nuclear and Particle Physics
Introduces structure of the atomic nucleus, spectroscopy of subnuclear particles, scattering, reactions, radioactive decay, fundamental interactions of quarks and leptons.
Requisites: Requires prerequsite courses of PHYS 3320 and PHYS 4410 (all minimum grade of C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

PHYS 4430 (3) Advanced Laboratory
Two lectures, one lab per week. Experiments introduce students to realities of the experimental physics so they gain a better understanding of theory and an appreciation of the vast amount of experimental work done in the physical sciences today.
Equivalent - Duplicate Degree Credit Not Granted: PHYS 5430
Requisites: Requires a prerequsite course of PHYS 3330 (minimum grade of C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sci Lab
Arts Sci Gen Ed: Distribution-Natural Sciences

PHYS 4450 (3) History and Philosophy of Physics
Discusses the epistemic question of what characterizes good physics research as well as the metaphysical question of what our best physics research tells us about the world. Topics may include case studies of physics experiments, theory choice, and scientific methodology in physics, as well as foundational metaphysical questions in statistical mechanics, quantum mechanics, special and general relativity, chance and probability, and the laws of nature.
Equivalent - Duplicate Degree Credit Not Granted: PHIL 5450 and PHIL 4450 and PHYS 5450
Requisites: Requires a prerequisite course of PHYS 1020 or PHYS 1120 or PHYS 1125 or PHYS 2020 (minimum grade of C-).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Distribution-Natural Sciences

PHYS 4460 (3) Teaching and Learning Physics
Learn how people understand key concepts in physics. Through examination of physics content, pedagogy and problems, through teaching, and through research in physics education, students will explore the meaning and means of teaching physics. Students will gain a deeper understanding of how education research is done and how people learn. Useful for all students, especially for those in interested in physics, teaching and education research.
Equivalent - Duplicate Degree Credit Not Granted: PHYS 5460 and EDUC 4460 and EDUC 5460
Requisites: Requires prerequisite courses of PHYS 3210 and PHYS 3310 (all minimum grade of C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

PHYS 4510 (3) Optics
Basic electromagnetic theory of light, using Maxwell's equations. Examples in geometrical optics; extensive applications in physical optics including diffraction and polarization. Spectra, including Zeeman effect and fluorescence. Recent advances in experimental techniques: microwaves, lasers, image converters.
Requisites: Requires a prerequisite course of PHYS 3320 (minimum grade of C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

PHYS 4550 (3) Cells, Molecules and Tissues: A Biophysical Approach
Focuses on the biophysics governing the structure/function of enzymes, cells, extracellular matrix and tissue. Synthesizes ideas from molecular biology, physics, and biochemistry, emphasizing how low Reynolds number physics, not Newtonian physics, is relevant to life inside a cell. Fulfills MCDB scientific reasoning requirement.
Equivalent - Duplicate Degree Credit Not Granted: MCDB 5550 and MCDB 4550 and PHYS 5550
Recommended: Prerequisites MCDB 3135 and MCDB 3145 and PHYS 2010 and PHYS 2020 and CHEM 1133 or MATH 1300 and/or CHEM 3311 (minimum grade C-) or instructor consent required.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

PHYS 4560 (3) Introduction to Biophysics
Covers an introduction to the physics of living systems. Focuses on how living systems are able to generate order, with both physical principles and biological examples. Covers the development of quantitative models for biological systems, including estimates. Taught from a physics perspective, with biology background introduced as needed.
Equivalent - Duplicate Degree Credit Not Granted: PHYS 5560 and MCDB 4560 and MCDB 5560
Requisites: Requires a prerequisites course of PHYS 2210 (minimum grade C-).
Recommended: Prerequisite PHYS 4230.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

PHYS 4610 (2) Physics Honors
Students are matched with a faculty member and work independently on a research topic. Typically, the honors program lasts three semesters. A senior thesis and an oral presentation of the work are required. See also PHYS 4620 and PHYS 4630. Department enforced prerequisite: mininimum 3.00 GPA. Registration by special arrangement with the Department of Physics.
Additional Information: Arts Sciences Honors Course

PHYS 4620 (2) Physics Honors
Students are matched with a faculty member and work independently on a research topic. Typically, the honors program lasts three semesters. A senior thesis and an oral presentation of the work are required. See also PHYS 4610 and PHYS 4630. Department enforced prerequisite: mininimum 3.00 GPA. Registration by special arrangement with the Department of Physics.
Additional Information: Arts Sciences Honors Course

PHYS 4630 (2) Physics Honors
Students are matched with a faculty member and work independently on a research topic. Typically, the honors program lasts three semesters. A senior thesis and an oral presentation of the work are required. See also PHYS 4610 and PHYS 4620. Department enforced prerequisite: mininimum 3.00 GPA. Registration by special arrangement with the Department of Physics.
Additional Information: Arts Sciences Honors Course

PHYS 4700 (3) Quantum Forge I
Provides junior- and senior-level engineering and physical science students an opportunity to gain professional and technical quantum science skills and experience through participation in real-world projects in collaboration with industry leaders and academic investigators. Alongside project activity, students will engage in skill- and concept-focused modules to ensure proficiency in the skills necessary to participate in the quantum workforce. This capstone experience is intended for students who do not intend to continue on to graduate study in physics or engineering, but rather to enter the workforce directly.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 4700
Requisites: Requires prerequisite course of PHYS 3330 (minimum grade C-).
Recommended: Prerequisite or corequisite PHYS 4410.

PHYS 4710 (3) Quantum Forge II
Continuation of PHYS 4700, Quantum Forge I. The Quantum Forge provides junior- and senior-level engineering and physical science students an opportunity to gain professional and technical quantum science skills and experience through participation in real-world projects in collaboration with industry leaders and academic investigators. In the second semester, students will expand upon the knowledge and skills gained through the first-semester to bring projects to a point of completion and readiness for deployment in the industry context. As with Quantum Forge I, this capstone experience is intended for students who do not intend to continue on to graduate study in physics or engineering, but rather to enter the workforce directly.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 4710
Requisites: Requires prerequisite course of PHYS 4700 or MCEN 4700 (minimum grade C-).

PHYS 4810 (1-3) Special Topics in Physics
Various topics not normally covered in the curriculum. Offered intermittently depending on student demand and availability of instructors.
Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

PHYS 4840 (1-3) Independent Study
Selected topics for undergraduate independent study. Subject matter to be arranged. See also PHYS 4850.
Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

PHYS 4850 (1-3) Independent Study
Selected topics for undergraduate independent study. Subject matter to be arranged. See also PHYS 4840.
Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

PHYS 4970 (3) Seminar on Physical Methods in Biology
Covers basic mechanisms and applications of physical methods used in current biological research, microprobe analysis, Eels, elementary electron and x-ray crystallography, biomedical imaging (NMR, MRI, Pet, Cat), Fourier analysis, synchrotron radiation, Exafs, neutron scattering and novel ultramicroscopy techniques. Includes lectures, student presentations, occasional demonstrations. Emphasis depends on student interest.
Equivalent - Duplicate Degree Credit Not Granted: PHYS 5970
Requisites: Requires a prerequisite course of PHYS 1120 or PHYS 2020 and MCDB 1150 or EBIO 1220 (all minimum grade D-).

Engineering Physics - Bachelor of Science (BSEP)

During the freshman and sophomore years, students receive a broad introduction to physics, chemistry, applied mathematics and mathematical methods in physics. Starting in the sophomore year, students take electrodynamics, quantum mechanics, classical mechanics, mathematical methods, thermodynamics and statistical mechanics, and advanced mathematics. In addition, there is a core of four laboratory courses that students take. Laboratory courses emphasize student-developed and student-designed independent projects in which students use the knowledge acquired to build apparatus of their own choosing. One of the capstone lab courses, PHYS 4430 , provides students with hands-on experience with optical spectroscopy, nuclear magnetic resonance, scanning tunneling microscopy, and laser cooling and trapping of atoms, among other experiments. The other capstone course, PHYS 4700, provides students an opportunity to gain professional and technical quantum science skills and experience through participation in real-world projects in collaboration with industry leaders and academic investigators.

The program encourages the formation of student research collaborations with faculty in the pursuit of senior thesis projects. Recent projects include research in pulsed laser deposition of high-temperature superconductors, electron diffraction studies of protein structure, and lattice distortion theory of colossal magnetoresistance materials.

Students who plan to become registered professional engineers should check the requirements for registration in their state before choosing their engineering major.

Note: Students may not earn a bachelor's degree in physics from the College of Arts & Sciences as well as a bachelor's degree in engineering physics from the College of Engineering & Applied Science. Furthermore, the physics minor may not be earned with either of these two baccalaureate programs.

Requirements

Program Requirements

In order to earn a bachelor's degree in engineering physics, students must complete the curriculum in the undergraduate major program, as outlined below. For up-to-date program requirements, visit the Bachelor of Science in Engineering Physics (https://www.colorado.edu/physics/academics/undergraduate-students/bachelor-science-engineering-physics/) webpage.

Students may not earn a BS in Engineering Physics + BA in Physics or a minor in physics.

Note: Some variations may be possible; students are advised to see their engineering physics academic advisor.

In addition, students must meet the general undergraduate degree requirements of the College of Engineering and Applied Science (https://www.colorado.edu/engineering-advising/get-your-degree/graduation-requirements/).

Required Courses and Credits

Code	Title	Credit Hours
Required Courses		
PHYS 1115	General Physics 1 for Majors	4
or PHYS 1110	General Physics 1	
PHYS 1125	General Physics 2 for Majors	4
or PHYS 1120	General Physics 2	
PHYS 1140	Experimental Physics 1	1
PHYS 2150	Experimental Physics 2	1
PHYS 2170	Foundations of Modern Physics	3
or PHYS 2130	Introduction to Quantum Mechanics and Its Applications	
PHYS 2210	Classical Mechanics and Mathematical Methods 1	3
PHYS 3210	Classical Mechanics and Mathematical Methods 2	3
PHYS 3220	Quantum Mechanics 1	3
PHYS 3310	Principles of Electricity and Magnetism 1	3
PHYS 3320	Principles of Electricity and Magnetism 2	3
PHYS 3330	Electronics for the Physical Sciences	2
PHYS 4230	Thermodynamics and Statistical Mechanics	3
PHYS 4410	Quantum Mechanics 2	3
Upper-Division Physics Electives		
Complete one of the three options listed in the next table.		9
Required Chemistry & Natural Science Courses		
CHEM 1113	General Chemistry 1	4
or CHEN 1201	General Chemistry for Engineers 1	
or CHEN 1211	Accelerated Chemistry for Engineers	
CHEM 1114	Laboratory in General Chemistry 1	1
or CHEM 1221	Engineering General Chemistry Lab	
Natural Science Electives [1]		5
Required Mathematics Courses		
APPM 1350	Calculus 1 for Engineers	4
or MATH 1300	Calculus 1	
or APPM 1345	Calculus 1 with Algebra, Part B	
APPM 1360	Calculus 2 for Engineers	4
or MATH 2300	Calculus 2	
APPM 2350	Calculus 3 for Engineers	4
or MATH 2400	Calculus 3	
APPM 2360	Introduction to Differential Equations with Linear Algebra	4
or MATH 2130 & MATH 3430	Introduction to Linear Algebra for Non-Mathematics Majors and Ordinary Differential Equations	
Upper-division APPM, MATH, or STAT course. [2]		3
Required Engineering and Computing Courses		**25**
Choose two of the following computing options		
PHYS 2600	Introduction to Programming and Scientific Computing	
or APPM 1650	Python for Math and Data Science Applications	
CSCI 1300	Computer Science 1: Starting Computing	
ECEN 1310	Introduction to C Programming	
AREN 1027	Engineering Drawing	
or MCEN 1025	Computer-Aided Design and Fabrication	
CSCI 3+ credit course at the 2000 level or above.		
Choose engineering courses to reach a minimum of 25 credits in addition to computing and other degree requirements. Must be offered by CEAS departments. [3]		
Humanities, Social Sciences and Writing		
Complete the College's Humanities, Social Sciences and Writing requirements. [4]		18
Free Electives		
Choose at least 11 credit hours of free electives to meet the minimum 128 credit hours required for the BS degree.		11
Total Credit Hours		**128**

1. Students may choose courses from the list of Engineering Physics approved natural science electives.
2. Excludes MATH 3430 and courses that are approved to count for the CEAS Humanities and Social Science requirement.
3. Choose from the following subject codes: APPM, AREN, ASEN, ATLS, BIEN, BMEN, CHEN, COEN, CSCI, CVEN, ECEN, EMEN, ENEN, EVEN, GEEN, IDEN, MCEN or STAT. Excluded: ASEN 3036, ASEN 3046, CHEN 1201, CHEN 1211 and any other courses otherwise approved for the CEAS Humanities and Social Sciences requirement.
4. Students may choose courses from the list of college-approved humanities and social sciences (HSS) electives.

Upper-Division Physics Electives

The selection of course offerings changes each semester. See the Engineering Physics Advising Guide (https://www.colorado.edu/physics/academics/undergraduate-students/bachelor-science-engineering-physics/) for an up-to-date selection.

Code	Title	Credit Hours
Research/Lab Electives [1,2]		**3-6**
PHYS 4430	Advanced Laboratory	
or PHYS 5430	Advanced Laboratory	
PHYS 4610	Physics Honors [2]	
PHYS 4620	Physics Honors [2]	
PHYS 4630	Physics Honors [2]	
PHYS 4700	Quantum Forge I	
PHYS 4710	Quantum Forge II	
PHYS 4840	Independent Study [2]	
Other Upper-Division Physics Electives		**3-6**
PHYS 3070	Energy and the Environment	
PHYS 3090	Introduction to Quantum Computing	
PHYS 4150	Plasma Physics	
PHYS 4340	Introduction to Solid State Physics	
PHYS 4420	Nuclear and Particle Physics	
PHYS 4450	History and Philosophy of Physics	
PHYS 4460	Teaching and Learning Physics	
PHYS 4510	Optics	
PHYS 4550	Cells, Molecules and Tissues: A Biophysical Approach	

PHYS 4560	Introduction to Biophysics	
PHYS 4810	Special Topics in Physics	
Any PHYS graduate-level courses (5000 level or above), with permission of instructor.		
Total Credit Hours		**9**

1 Students may satisfy the research/lab electives with documentation of accomplishments as an intern with a research group in the Physics Department or suitable cognate department. Approval by an Engineering Physics faculty mentor is required and should be obtained in advance. Students pursuing this option must take 9 credit hours of upper-division physics electives.

2 Students may count a maximum of 6 credit hours from a combination of PHYS 4610/PHYS 4620/PHYS 4630 and PHYS 4840 as physics electives.

Sample Four-Year Plan of Study

Below is a suggested schedule only. For a complete description of the engineering physics course requirements, visit the Department of Physics (http://www.colorado.edu/physics/) website.

Year One		
Fall Semester		**Credit Hours**
APPM 1350	Calculus 1 for Engineers	4
First Computing Course [1]		4
PHYS 1115 or PHYS 1110	General Physics 1 for Majors or General Physics 1	4
COEN 1500	CEAS First Year Seminar	1
Humanities or Social Science Elective [2]		2
	Credit Hours	**15**
Spring Semester		
APPM 1360	Calculus 2 for Engineers	4
Second Computing Course [1]		3
PHYS 1125 or PHYS 1120	General Physics 2 for Majors or General Physics 2	4
PHYS 1140	Experimental Physics 1	1
Humanities or Social Science Elective [2]		3
	Credit Hours	**15**
Year Two		
Fall Semester		
APPM 2350	Calculus 3 for Engineers	4
CHEM 1113	General Chemistry 1	4
CHEM 1114	Laboratory in General Chemistry 1	1
PHYS 2150	Experimental Physics 2	1
PHYS 2170 or PHYS 2130	Foundations of Modern Physics or Introduction to Quantum Mechanics and Its Applications	3
Engineering Electives [1]		4
	Credit Hours	**17**
Spring Semester		
APPM 2360	Introduction to Differential Equations with Linear Algebra	4
PHYS 2210	Classical Mechanics and Mathematical Methods 1	3
Engineering Electives [1]		4
CHEM 1133	General Chemistry 2 [3]	4
CHEM 1134	Laboratory in General Chemistry 2 [3]	1
	Credit Hours	**16**
Year Three		
Fall Semester		
PHYS 3210	Classical Mechanics and Mathematical Methods 2	3
PHYS 3310	Principles of Electricity and Magnetism 1	3
PHYS 3330	Electronics for the Physical Sciences	2
Engineering Elective [1]		3
Humanities or Social Science Elective [2]		3
Free Electives		2
	Credit Hours	**16**
Spring Semester		
PHYS 3220	Quantum Mechanics 1	3
PHYS 3320	Principles of Electricity and Magnetism 2	3
PHYS 4230	Thermodynamics and Statistical Mechanics	3
Upper Division Math or Applied Math elective		3
Physics Electives [1]		3
Humanities or Social Science Elective [2]		3
	Credit Hours	**18**
Year Four		
Fall Semester		
PHYS 4410	Quantum Mechanics 2	3
Engineering Electives [1]		3
Physics Electives [1]		3
College-Approved Writing Course [4]		3
Free Electives		3
	Credit Hours	**15**
Spring Semester		
Engineering Electives [1]		4
Physics Electives [1]		3
Humanities or Social Science Elective [2]		3
Free Electives		6
	Credit Hours	**16**
	Total Credit Hours	**128**

1 For additional information, course options, and planning advice, consult the Engineering Physics Advising Guide on the Engineering Physics Major Website (https://www.colorado.edu/physics/academics/undergraduate-students/bachelor-science-engineering-physics/).

2 Students may choose courses from the list of college-approved humanities and social sciences (HSS) electives (http://www.colorado.edu/engineering/academics/policies/hss/).

3 Students may choose courses from the list of Engineering Physics approved natural science electives.

4 Students may choose a course from the list of college-approved writing courses.

Learning Outcomes

By the completion of the program, students will be able to:

- Have the knowledge of the basic subfields of physics (classical mechanics, electricity and magnetism, quantum mechanics, statistical mechanics and thermodynamics), as well as at least one specialty area of application (e.g., condensed matter physics or optics).
- Apply major principles of physics towards solving problems in various subfields of physics, including the use of mathematical and computational tools as appropriate.
- Use skills in assembling and using experimental apparatus to conduct and analyze measurements of physical phenomena.
- Have the knowledge of the role of systematic and random experimental errors, along with methods used to analyze experimental uncertainty and compare experiment with theory.
- Use skills in collaborating effectively and communicating results of scientific inquiries verbally and in writing.

Bachelor's–Accelerated Master's Degree Program(s)

The bachelor's–accelerated master's (BAM) degree program options offer currently enrolled CU Boulder undergraduate students the opportunity to receive a bachelor's and master's degree in a shorter period of time. Students receive the bachelor's degree first but begin taking graduate coursework as undergraduates (typically in their senior year).

Because some courses are allowed to double count for both the bachelor's and the master's degrees, students receive a master's degree in less time and at a lower cost than if they were to enroll in a stand-alone master's degree program after completion of their baccalaureate degree. In addition, staying at CU Boulder to pursue a bachelor's–accelerated master's program enables students to continue working with their established faculty mentors.

BS in Engineering Physics, MS in Physics

The BAM program in engineering physics aims to provide new opportunities for undergraduate engineering physics majors. The program is specifically addressed to engineering physics majors in the Department of Physics. The engineering physics major gives students a thorough grounding in theoretical physics, applied mathematics and broad exposure to engineering topics, so that they are well prepared either to proceed with graduate work or with professional employment in either basic science or in applied fields.

For students interested in graduate studies, the BAM program in engineering physics allows for participation in graduate coursework and research in a broad range of areas. For students interested in immediate professional employment, this program would serve as a terminal degree program that qualifies students for a higher level of employment.

Admissions Requirements

In order to gain admission to the BAM program named above, a student must meet the following criteria:

- Have a cumulative GPA of 3.30 or higher and a physics major GPA of 3.30 or higher.
- Have completed a minimum of 80 credit hours of coursework.
- Completion of all MAPS requirements and no deficiencies remaining (students admitted to CU Boulder prior to Summer 2023 only).
- Transfer students must have completed a minimum of 24 credit hours at CU Boulder.
- Have a letter of support from a faculty advisor to complete master's level research.

Program Requirements

Students may take up to and including 12 hours while in the undergraduate program which can later be used toward the master's degree. However, only six hours may be double counted toward the bachelor's degree and the master's degree. Students must apply to graduate with the bachelor's degree, and apply to continue with the master's degree, early in the semester in which the undergraduate requirements will be completed.

If you are interested in the BAM degree program, please contact the Engineering Physics Faculty Director for more information.

Engineering, Ethics & Society

Since 1989, the Herbst Program for Engineering, Ethics and Society has engaged engineering students in the weighty questions of human existence and in linking these to the ethical practice of engineering. As our students discuss great works, they hone their skills at critical thinking and clear communication—essential skills for future engineers. Courses use foundational works from different eras and cultures to address the complexities where these three fields overlap:

- Engineering, as an educational process and a profession
- Ethics, or personal responsibility
- Society, as the rich socio-cultural world in which we live

All Herbst courses count toward Humanities and Social Sciences requirements in the College of Engineering and Applied Science.

Course code for this program is ENES.

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Ambler, Catherine
Assistant Teaching Professor; PhD, Columbia University

Ambler, Wayne (https://experts.colorado.edu/display/fisid_127519/)
Associate Professor Emeritus; PhD, Boston College

Byrne, James
Teaching Assistant Professor; PhD, Princeton University

de Alwis, Lisa (https://experts.colorado.edu/display/fisid_152569/)
Teaching Assistant Professor; PhD, University of Southern California

Diduch, Paul Jordan (https://experts.colorado.edu/display/fisid_154510/)
Teaching Associate Professor; PhD, University of Dallas

Douglass, Scot Ray (https://experts.colorado.edu/display/fisid_102347/)
Professor; PhD, University of Colorado Boulder

Fredricksmeyer, Hardy (https://experts.colorado.edu/display/fisid_115446/)
Teaching Professor; PhD, University of Texas at Austin

Giovannelli, Leland (https://experts.colorado.edu/display/fisid_100755/)
Teaching Professor Emerita; PhD, University of Chicago

Kowalchuk, Andrea (https://experts.colorado.edu/display/fisid_154509/)
Teaching Associate Professor; PhD, University of Dallas

Lange, Anja K. (https://experts.colorado.edu/display/fisid_104576/)
Teaching Professor, Faculty Director; PhD, University of Colorado Boulder

Sieber, Diane E. (https://experts.colorado.edu/display/fisid_101394/)
Associate Professor; PhD, Princeton University

Stanford-McIntyre, Sarah (https://experts.colorado.edu/display/fisid_163315/)
Assistant Professor; PhD, University of Wyoming

Swanson, Joel E. (https://experts.colorado.edu/display/fisid_134311/)
Associate Professor; MFA, University of California, San Diego

Sylvester, Roshanna (https://experts.colorado.edu/display/fisid_164037/)
Associate Professor; PhD, Yale University

Thieman Dino, Angela Lea (https://experts.colorado.edu/display/fisid_145591/)
Teaching Professor; PhD, University of Colorado Boulder

Turner, A. Kane
Lecturer; PhD, University of Dallas

Courses

ENES 1010 (3) Humanity in a Technological Age
This seminar considers what it means to be human in an increasingly technological age. Designed for engineering students, it also looks at the role of technology designers and creators in shaping the human environment. Students focus on sharpening their written and oral communication skills through a series of iterative assignments and projects. Fulfills College of Engineering writing requirement for first-year students only.
Requisites: Restricted to students with 0-26 (Freshmen) College of Engineering majors only.

ENES 1843 (3) Special Topics
Explores different important themes in engineering, ethics, and society; check with the department for specific semester topics. Formerly HUEN 1843.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to students with 0-56 credits (Freshmen or Sophomore) College of Engineering majors only.

ENES 1850 (3) Engineering in History: The Social Impact of Technology
Investigates how technology and engineering have both shaped our modern world and been shaped by it. Inquiry-based projects examine the history of technology through historical sources and provide opportunities for critical reflection on how historical thinking can inform engineering practice. Alongside an overview of modern engineering and technology, we investigate questions such as whether new technologies made household labor easier in the 20th century and how the needs of end-users shaped the development of computing. Formerly HUEN 1850.
Requisites: Restricted to students with 0-56 (Freshmen or Sophomore) College of Engineering majors only.

ENES 2010 (3) Tradition and Identity
Explores the place and possibility of personal identity both within and against the influence of tradition, including family, culture, language, and social, political and economic institutions. Via literature and film, wrestles with the nature of freedom, self-determination, and belonging. Formerly HUEN 2010.
Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

ENES 2020 (3) The Meaning of Information Technology
A survey of the mutual influence of technology, media, and society. Equips students with an understanding of technological transformations in interpersonal, organizational, and mass communication. Emphasis is on the technological, social and political changes that underlie the movement toward a digital society. As such, the class acts as a survey of various technologies and their relationship to socio-political issues. We not only address ¿how does it work¿ and ¿where does this come from¿ but ¿why is it here¿ and ¿how does it impact us as individuals and as a society¿.
Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

ENES 2100 (3) History of Science and Technology to Newton
Spans invention and discovery from the Stone Age to the age of Newton, raising questions about culture, history, and personal expectation; studies Pyramids, odometers, cathedrals , Galileo, etc., on the way. Formerly HUEN 2100.
Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

ENES 2120 (3) History of Modern Science from Newton to Einstein
Surveys the great discoveries and theoretical disputes from Newtonian celestial mechanics to the theory of relativity. Includes physics, astronomy, chemistry, geology, and biology; closely examines scientific method, evolution, light and quantum theory. Uses original sources by Newton, Faraday, Lavoisier, Darwin, etc., for immediate contact with the great minds in science. Formerly HUEN 2120.
Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

ENES 2130 (3) History of Modern Technology from 1750 to the Atomic Bomb
Surveys the great innovations from the Steam Age to the Atomic Age: transportation, modern construction, communications, internal combustion, etc. Supplements textbook accounts with drawings, patents, and original selections by Edison, Carnegie, Tesla, Bell, etc. Studies the sociological impact of social change via contemporary sources in literature, philosophy, painting and film. Formerly HUEN 2130.
Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

ENES 2160 (3) Energy, Society, and the Climate Question
Examines the social, political, and cultural dynamics of energy production and consumption with a focus on the ¿green¿ energy transition. Analyzes historic and contemporary efforts to address climate change in the US and around the globe and contextualizes technical and infrastructural developments; students collectively identify barriers and develop possible solutions.
Equivalent - Duplicate Degree Credit Not Granted: ENES 3160
Requisites: Restricted to students in College of Engineering and Applied Science (ENGR) only.

ENES 2210 (3) Modern Science and Technological Society
Explores challenges that engineering and science pose for society plus the ways that societies shape or impede science and engineering. Case studies range from contemporary issues (global warming, nuclear weapons, and genetic engineering) to classic cases (the execution of Socrates). Core texts in the Western Tradition supplement contemporary articles and films. Formerly HUEN 2210.
Equivalent - Duplicate Degree Credit Not Granted: ENES 3210
Requisites: Restricted to College of Engineering majors only.

ENES 2346 (3) Women and Engineering
Explores the role of women as shaping and shaped by engineering, from the past into the future. Texts from history, women¿s studies, philosophy, film, and literature shed light on how gender has contributed to the forging of our identities, both personal and professional. Engineering professors guest-lecture, sharing their life stories and their research.
Equivalent - Duplicate Degree Credit Not Granted: ENES 3346
Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.
Grading Basis: Letter Grade

ENES 2360 (3) Gaining a Global State of Mind for Effective Engineering Practice
Ranges across cultures and centuries to reveal many dimensions of globalization; shows how cultural awareness enhances effectiveness in the increasingly global profession of engineering. This highly interactive course uses history, philosophy, geography, religion, economics, the arts, etc., to illustrate the complexity of global engineering¿s cultural context. Concurrently, it encourages new insights into culture and identity, both at home and abroad. Formerly HUEN 2360.
Equivalent - Duplicate Degree Credit Not Granted: ENES 3360
Recommended: restricted to students in the College of Engineering and Applied Science.

ENES 2840 (1-3) Lower Division: Independent Study
Offers opportunity for lower-division Engineering students to do independent study work in humanities, appropriate to their academic level. Subject determined, with a Herbst instructor, to fit the needs of the student. Department and faculty consent required. Formerly HUEN 2840.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.
Grading Basis: Letter Grade

ENES 2843 (3) Special Topics
Explores different important themes in engineering, ethics, and society; check with the department for specific semester topics. Formerly HUEN 2843.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

ENES 3100 (3) Ethical Awareness for Engineers
This seminar introduces engineering students to a variety of essential texts and works drawn from literature, history, philosophy, and the arts. Through class discussions and a variety of writing assignments, students reflect on their personal values, goals, commitments, and responsibilities, and how these align with the ethical challenges of engineering. Fulfills the College of Engineering and Applied Science writing requirement.
Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

ENES 3160 (3) Energy, Society, and the Climate Question
Examines the social, political, and cultural dynamics of energy production and consumption with a focus on the ¿green¿ energy transition. Analyzes historic and contemporary efforts to address climate change in the US and around the globe and contextualizes technical and infrastructural developments; students collectively identify barriers and develop possible solutions.
Equivalent - Duplicate Degree Credit Not Granted: ENES 2160
Requisites: Restricted to students in College of Engineering and Applied Science (ENGR) only.

ENES 3210 (3) Modern Science and the Technological Society
Explores challenges that engineering and science pose for society as well as the ways that societies shape or impede science and engineering. Case studies range from contemporary issues (global warming, nuclear weapons, and genetic engineering) to classic cases (the execution of Socrates). Core texts in the Western Tradition supplement contemporary articles and films.
Equivalent - Duplicate Degree Credit Not Granted: ENES 2210
Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

ENES 3280 (3) Science and Religion
Explores relationship between science and religion from multiple contrasting stances, including Western and non-Western culture; ancient and modern viewpoints; pro and counter Enlightenment arguments. The course uses history, philosophy, psychology, cognitive science, biology, poetry, theology, sociology, political theory, literature, film, and social media to show the pervasiveness and complexity of the relation between science and religion. The course also promotes sympathetic treatment of perspectives, cutting widely across the political, cultural, and belief spectrums. Previously offered as a special topics course.
Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.
Grading Basis: Letter Grade

ENES 3320 (3) Don Quixote's Spain
Examines the first modern novel in the context of modern society¿s preoccupation with fake news and the difficulty of separating fictions from truth. As a global intensive, focuses on the origins of modern Spain, the rise of Madrid at its center, and the continuing presence of Don Quixote and Sancho Panza in the popular imagination. Interrogates the virtuality of our own perceptions and the role that imagination plays in our construction of self and other.
Recommended: Spanish language experience; fluency not required.

ENES 3330 (3) Science Fiction and Philosophy
Examines significant philosophical concepts through global science fiction novels, stories and films. Relates these concepts to the life, choices and professional career of the future engineer.
Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

ENES 3340 (3) Leonardo da Vinci's World
Examines Leonardo da Vinci¿s notebooks, his art and his socio-historical context while interrogating his various engineering roles, his creativity, and his synthesis of science, technology, and art.
Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

ENES 3346 (3) Women and Engineering
Explores the role of women as shaping and shaped by engineering, from the past into the future. Texts from history, women¿s studies, philosophy, film, and literature shed light on how gender has contributed to the forging of our identities, both personal and professional. Engineering professors guest-lecture, sharing their life stories and their research.
Equivalent - Duplicate Degree Credit Not Granted: ENES 2346
Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.
Grading Basis: Letter Grade

ENES 3350 (3) Gods, Heroes and Engineers: The Western Quest for Excellence
Investigates the intensely competitive quest of the ancient Greeks for excellence in everything from art and literature to science and war and also the odyssey of the mind generated by this quest, culminating in our modern world. Formerly HUEN 3350.
Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

ENES 3360 (3) Gaining a Global State of Mind for Effective Engineering Practice
Ranges across cultures and centuries to reveal many dimensions of globalization; shows how cultural awareness enhances effectiveness in the increasingly global profession of engineering. This highly interactive course uses history, philosophy, geography, religion, economics, the arts, etc., to illustrate the complexity global engineering¿s cultural context. Concurrently, it encourages new insights into culture and identity, both at home and abroad. Formerly HUEN 3360.
Equivalent - Duplicate Degree Credit Not Granted: ENES 2360
Requisites: Restricted to students in College of Engineering and Applied Science (ENGR) only.

ENES 3370 (3) Harry Potter and the Conflict of Being
Addressing the idea of conflict from a wide variety of perspectives: personal identity, class, race, morality, education, age, ambition, leadership and friendship, this course will explore how these themes are worked out both within this extended coming of age narrative and against the classical background that J.K. Rowling so freely appropriates. Through a close reading of the texts, themselves, we will map out their philosophical/existential significance and how this is related to their popularity. Formerly offered as a special topics course.
Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

ENES 3430 (3) Ethics of Genetic Engineering: A Multidisciplinary Approach
Investigates the metaphorical, ideological and scientific constructs that inform debates over the genetic modification of humans, animals and plants. Begins with a close reading of Shelley's Frankenstein, proceeds to a consideration of philosophical arguments for and against human modification and concludes with a consideration of the scientific and political contexts that inform the regulation of genetically modified foods. Formerly HUEN 3430.
Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

ENES 3450 (3) Narrative Medicine
Explores the foundations of a narrative practice of medicine through rigorous engagement with various texts, guided writing, and class conversation. Medicine here is defined broadly as engagement with illness and healing, including the practices of doctors, nurses, social workers, researchers, and caregivers. Special attention is given to the role of artists and craftspeople and how such practices might be integrated with an increasingly specialized and technical medical system.
Recommended: Prerequisite a minimum of 30 credit hours.

ENES 3543 (3) History of Western Medicine
Introduces the intriguing and appalling history of western medicine, from prehistory to the present. Includes grave-robbers, leeches and the Black Death. This course links past to present, in discussion of evidence, innovation, ethics and standards of medical education and practice. Based on original sources, textbook accounts and modern scholarship, and featuring student presentations on the Disease of the Week. Formerly HUEN 3543.
Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.
Grading Basis: Letter Grade

ENES 3700 (3) Culture Wars in Rome
Investigates in Rome, Italy (during Maymester), the cultural contrasts among three different cities: ancient, pagan, aristocratic Rome; medieval, Christian, theocratic Rome; and modern, secular, democratic Rome. Draws on evidence from Roman literature, politics, art and architecture. Must have completed a minimum of 26 credit hours by start of course. Requires some preparatory work in Boulder. Formerly HUEN 3700.

ENES 3720 (3) Voices of Vienna: Freud, Wittgenstien, Mozart
Study and visit Vienna, a city famous for Mozart's music, Freud's psychology and Wittgenstein's philosophy. As the seat of the Habsburg Empire, Vienna was a rich cultural and political center; it was a crossroads for international trade and exciting new ideas. As the lively capital of present-day Austria, it remains in the forefront of social change. Formerly HUEN 3720.

ENES 3750 (3) Xi'an, China: Self-Awareness and Images of the Other
Explores Chinese culture abroad, focusing on ideas of self and other within special historical, social, political, and economical circumstances. Chinese and American concepts of self and society, and of individual, collective, and national identities will be analyzed. Held on the campus of Xi'an Jiaotong University, China. Formerly HUEN 3750.
Recommended: Prerequisite completion of lower-division Humanities course.
Additional Information: Departmental Category: Asia Content

ENES 3840 (1-3) Independent Study
Offers an opportunity for students to do independent work in the humanities. Subject arranged to fit the needs of the student. Department consent required. Formerly HUEN 3840.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) College of Engineering students only.

ENES 3843 (3) Special Topics
Explores different important themes in engineering, ethics, and society; check with department for specific semester topics. Formerly HUEN 3843.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

ENES 3844 (3) Special Topics Global Intensive
Explores different important themes in the humanities and includes a Global component; check with department for specific semester topics.
Equivalent - Duplicate Degree Credit Not Granted: COEN 4000 or COEN 5000
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to students in College of Engineering and Applied Science (ENGR) only.

ENES 4800 (1) Leadership & Ethics in the Real World
Formerly HUEN 4800.

ENES 4830 (3) Special Topics
Explores different important themes in engineering, ethics, and society; check with department for specific semester topics. Formerly HUEN 4830.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Requires prerequisite course of ENES 1010 or ENES 3100. Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

Certificate Program

- Engineering, Ethics and Society - Certificate (p. 1001)

Engineering, Ethics and Society - Certificate

The Certificate in Engineering, Ethics & Society (EES) leads students to courses that help them understand engineering in different contexts. Students select courses in consultation with the co-directors and engage with contemporary debates, themes, and issues related to engineering and applied science.

Through participation in the certificate, students will pair broad, complex questions with more specific inquiry. For example:

- What role should engineers play in policy-making?
- How can engineers help build workable relationships between scientific advancements and contemporary society?
- What are the likely benefits and risks of biomedical advancements, especially genetic engineering?
- How can engineers help offset worldwide environmental degradation?
- What is the appropriate role of AI in the workplace? In our daily lives?

Students will meet with one of the certificate's co-directors to identify four 3-credit courses (12 hrs total) that will help them explore questions that are relevant to their own particular interests.

The list of possible courses is open-ended, but might include:

- Courses that view engineering in social, economic and legal contexts.
- Courses that study science and technology in the past, thereby illuminating their influence in the present.
- Courses that explore the environmental impact of STEM innovation.
- Courses that explore the arts and humanities as they relate to engineering design.

Requirements

Eligibility

To begin the certificate, students must be in good academic standing (https://www.colorado.edu/registrar/students/your-information-records/academic-standing/) at CU Boulder and must complete a certificate of enrollment with Dr. Sarah Stanford-McIntyre of the Herbst Program for Engineering, Ethics & Society.

To complete the certificate, students must submit a certificate completion form to Dr. Stanford-McIntyre.

Program Requirements

Students must complete 12 credits, including four courses (at least one upper-division) with a minimum grade in each course of C+.

Code	Title	Credit Hours
Required Courses		
Great Books Seminar		
Choose one:		3
ENES 1010	Humanity in a Technological Age	
ENES 3100	Ethical Awareness for Engineers	
EHON 1151	Critical Encounters	
STEM & H&SS Intersection		
Choose one:		3
ENES 1850	Engineering in History: The Social Impact of Technology	
ENES 2020	The Meaning of Information Technology	
ENES 2120	History of Modern Science from Newton to Einstein	
ENES 2130	History of Modern Technology from 1750 to the Atomic Bomb	
ENES 2210	Modern Science and Technological Society	
ENES 2360	Gaining a Global State of Mind for Effective Engineering Practice	
ENES 3360	Gaining a Global State of Mind for Effective Engineering Practice	
ENES 3430	Ethics of Genetic Engineering: A Multidisciplinary Approach	
ENLP 2000	Leadership, Fame and Failure	
ENLP 4000	The Empire of Modern Science	
INFO 3101	History of Computing and Information	
Additional coursework		
Additional Herbst or EHON (Engineering Honors) course [1]		3
Course in Humanities or Social Science from the College of Arts & Sciences linked to EES (Engineering, Ethics & Society) themes [2]		3
Total Credit Hours		**12**

1. This could be an additional course from the list above, or it could include Herbst or EHON Special Topics courses, Herbst Global Seminars or Global Intensives, or other Herbst courses.
2. Students must confer with the EES Certificate Director to determine the suitability of a particular course.

Integrated Design Engineering

Integrated design is a process defined by its use of highly collaborative, multidisciplinary teamwork and consideration of all aspects of an engineering project. The Integrated Design Engineering (https://www.colorado.edu/program/ide/) program provides students with a solid grounding in the fundamentals of engineering, and both instills and is structured by integrated design. Our majors customize their degree plans through their choice of one of six engineering emphases (selected from aerospace, architectural, civil, electrical, environmental or mechanical engineering) and a concentration in an approved second area such as business, engineering management, environmental planning, pre-medical or STEM education. At the core of our program are three hands-on iterative design project courses that explore and reinforce engineering principles, and which jointly form a continuous experiential thread uniting the four-year IDE curriculum. These team-based projects showcase individual students' growing multidisciplinary knowledge and expertise toward developing vital skills in communication, innovation and leadership, as well as reinforce engineering methodologies required by the emphasis area capstone design experience. Our students graduate with the knowledge, skills and confidence required for success in a diverse and changing world.

Integrated design engineering is an approach that favors creativity, diversity and collaboration across disciplines in creating practical and innovative solutions in the service of humanity. Graduates from our program find enriching careers in engineering and related professional fields, establish and support new enterprises, teach secondary-level STEM education and enroll in graduate and professional degree programs.

For more information, visit the program (https://www.colorado.edu/program/ide/) website.

Course code for this program is GEEN.

Bachelor's Degree

- Integrated Design Engineering - Bachelor of Science (BSIDE) (p. 1003)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Bielefeldt, Angela R. (https://experts.colorado.edu/display/fisid_110322/)
Affiliate Professor; PhD, University of Washington; P.E.

Godrick, Daniel (https://experts.colorado.edu/display/fisid_154955/)
Assistant Teaching Professor; MS, University of Colorado Boulder; P.E.

Soltys, Michael A. (https://experts.colorado.edu/display/fisid_152021/)
Teaching Professor, Associate Faculty Director; PhD, University of Colorado Boulder

Stites, Nick
Assistant Teaching Professor Adjoint; PhD, Purdue University

Tisdale, Joany (https://experts.colorado.edu/display/fisid_172327/)
Assistant Teaching Professor; PhD, University of Colorado Boulder

Zarske, Malinda Schaefer (https://experts.colorado.edu/display/fisid_120823/)
Faculty Director, Teaching Professor; PhD, University of Colorado Boulder

Courses

GEEN 1010 (4) Engineering Explorations Through Physics
Explore the world of engineering through understanding physics concepts, engaging in active learning assignments, and conducting hands-on labs and experiments. Students will analyze product designs and engineering decisions based on the physics surrounding the situation. Formerly COEN 1010.
Requisites: Restricted to College of Engineering majors with 75 or less cumulative hours.

GEEN 1017 (3) Engineering Drawing
Introduces CAD software; relevant concepts, including orthographic projection, sections, engineering drawing, geometric dimensioning and tolerancing; and rapid manufacturing methods. Final design project involves rapid prototyping. Not recommended for AREN majors.

GEEN 1400 (3) Engineering Projects
First-year students solve real-world engineering design problems in interdisciplinary teams. Design projects vary by section. Curriculum focuses on iterative design process, teamwork and team dynamics, supporting design with testing and analysis, and technical writing. Completed projects are exhibited at an end-of-semester design expo. Students responsible for contributing towards their design project budget (approximately $75).
Equivalent - Duplicate Degree Credit Not Granted: ASTR 2500, ASEN 1400, ASEN 1403 and ECEN 1400
Requisites: Restricted to College of Engineering majors with 75 or less cumulative hours or IUT On Track applicants only.

GEEN 1830 (1-4) Special Topics in Engineering
Explores topics of interest in engineering. Content varies by instructor and semester.
Repeatable: Repeatable for up to 6.00 total credit hours.

GEEN 2010 (3) Engineering Tools and Analysis
Taught by engineering faculty, this course utilizes active learning pedagogies to connect math content to engineering problems (across multiple disciplines) by using real engineering tools. Students are introduced to circuits, multimeters, oscilloscopes, sensors and more. They learn to program in MATLAB (no previous programming experience necessary). Students work collaboratively with other students to collect and analyze experimental data. There is one lecture, one mixed lecture/hands-on problem session, and one lab period each week.

GEEN 2400 (3) Engineering Projects for the Community
Design engineering products for local community clients, with emphasis on humanitarian engineering and integrated systems with electrical, mechanical, and software components. Students are challenged to take design projects to a higher level by requiring an additional iteration through design cycle and more engaged user-testing, in order to infuse student projects with robustness necessary for public-use products. Students responsible for contributing towards their design project budget, workshop, and expo costs (approximately $100). Cannot be taken concurrently with GEEN 3400.
Requisites: Restricted to students with 45-180 credits (Sophomores, Juniors or Seniors) or requires prerequisite course of GEEN 1400 or COEN 1400 or ASEN 1400 or ECEN 1400 (minimum grade C-). Must be College of Engineering majors or IUT On Track applicants only.

GEEN 2830 (1-4) Special Topics
Explores topics of interest in engineering. Content varies by instructor and semester.
Repeatable: Repeatable for up to 9.00 total credit hours.

GEEN 2851 (3) Statics for Engineers
Examines vector treatment of force systems and their resultants; equilibrium of frames and machines, including internal forces and three-dimensional configurations; static friction; properties of surfaces, including first and second moments; hydrostatics; and minimum potential energy and stability.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 2121 and MCEN 2023
Requisites: Requires prerequisite course of PHYS 1110 and APPM 1360 or MATH 2300 (all minimum grade C-). Restricted to College of Engineering majors or IUT On Track applicants only.

GEEN 3010 (3) Circuits for Engineers
Examines basic concepts of electricity, digital systems, circuit analysis, and circuit design. Specific topics covered include analysis of electric circuits by use of Ohm's law, network reduction, node and loop analysis, Thevenin and Norton theorems, DC and AC signals, transient response of simple circuits, basic diode and transistor circuits, operational amplifiers, and microcontrollers. Students are challenged to integrate their knowledge in a final design project.
Requisites: Requires a prerequisite course of PHYS 1140 and a prerequisite or corequisite course of (APPM 2360 or MATH 2130 and MATH 3430) (all minimum grade C-). Restricted to College of Engineering undergraduate majors only.

GEEN 3024 (3) Materials Science for Engineers
Examines structure, properties, processing and uses of metallic, polymeric, ceramic and composite materials. Specific topics covered include perfect and imperfect solids, phase equilibria, transformation kinetics, mechanical and electrical behavior and failure modes. Approach incorporates both materials science and materials engineering applications. Formerly GEEN 2024.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 2024
Requisites: Requires a prerequisite course of PHYS 1110 (minimum grade C-). Restricted to College of Engineering students only.
Grading Basis: Letter Grade

GEEN 3400 (3) Invention and Innovation
Introduction to business development and product innovation with a hands-on approach. Students explore invention process, hone their engineering design skills, and explore initial stages of entrepreneurship (patenting, intellectual property, marketing research, and raising capital). Student teams design, create, and test a commercial product, and exhibit at an end-of-semester design expo. Students are responsible for contributing towards their design project budget, workshop, and expo costs (approximately $100). Cannot be taken concurrently with GEEN 2400.
Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

GEEN 3830 (1-4) Special Topics
Explores topics of interest in engineering. Content varies by instructor and semester.
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to College of Engineering undergraduate students only.

GEEN 3852 (3) Thermodynamics for Engineers
Explores fundamental concepts and basic theory, including first and second laws of thermodynamics, properties, states, thermodynamic functions and cycles. Links theory and application with labs and a design project involving a functioning thermodynamic process.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 3012 or AREN 2110
Requisites: Requires prerequisite course of PHYS 1110 (minimum grade C-). Restricted to College of Engineering majors only.

GEEN 3853 (4) Data Analysis for Engineers
Learn to design and execute experiments and analyze the results. Topics covered include measurement fundamentals, design of experiments, probability, descriptive statistics, linear regression, propagation of uncertainty, and hypothesis testing (t-tests and ANOVA).
Equivalent - Duplicate Degree Credit Not Granted: MCEN 3047
Requisites: Requires prereqs PHYS 1140 (APPM 1360 or MATH 2300) (ASEN 1320 or CHEN/ECEN 1310 or CSCI 1200 or 1300 or 1310 or 1320). Requires prereq or coreqs (ECEN/GEEN 3010 or MCEN 3017) (WRTG 3030 or 3035 or ENES 1010 or 3100 or ENLP 3100) (all min grade C-

GEEN 4400 (3) Teaching Design
Examines teaching engineering design to a variety of audiences including secondary schools, project teams, and other communities. Students examine the process of teaching hands-on design including scoping, stages of team evolution, and iteration. Students also explore different design methods, the development of engineering identity, and the interface between engineering and society. Students practice integrating design thinking into local schools and companies, develop ready-to-use tools and resources, and explore the design education literature.
Requisites: Requires prerequisite courses of GEEN 1400 and GEEN 2400 and prerequisite or corequisite course of GEEN 3400 (all minimum grade B).

GEEN 4848 (1-3) Independent Study
Subjects arranged in consultation with instructor and undergraduate advisor. Instructor and program consent required.
Repeatable: Repeatable for up to 3.00 total credit hours.
Requisites: Restricted to Integrated Design Engineering (IDEN-BSIDE) students with a minimum of 60 credit hours.
Grading Basis: Letter Grade

Integrated Design Engineering - Bachelor of Science (BSIDE)

Integrated design is a process defined by its use of highly collaborative, multidisciplinary teamwork and consideration of all aspects of an engineering project. The Integrated design engineering program provides students with a solid grounding in the fundamentals of engineering and both instills and is structured by integrated design. Our majors customize their degree plans through their choice of one of six engineering emphases (selected from aerospace, architectural, civil, electrical, environmental or mechanical engineering) and a concentration in an approved second area such as engineering leadership, entrepreneurship, environmental planning or pre-medical. At the core of our program are three hands-on iterative design project courses that explore and reinforce engineering principles, which jointly form a continuous experiential thread uniting the four-year IDE curriculum. These team-based projects showcase individual students' growing multidisciplinary knowledge and expertise toward developing vital skills in communication, innovation and leadership, as well as reinforce engineering methodologies required by the emphasis area capstone design experience. Our students graduate

with the knowledge, skills and confidence required for success in a diverse and changing world.

Integrated design engineering is an approach that favors creativity, diversity and collaboration across disciplines in creating practical and innovative solutions in the service of humanity. Graduates from our program find enriching careers in engineering and related professional fields, establish and support new enterprises, teach secondary-level STEM education and enroll in graduate and professional degree programs.

For more information, visit the program (https://www.colorado.edu/program/ide/) website.

Requirements

Program Requirements

In order to earn a Bachelor of Science degree in Integrated Design Engineering (IDE), students must complete the curriculum in the undergraduate major program as outlined below. For up-to-date program information, visit the Integrated Design Engineering (https://www.colorado.edu/program/ide/) webpage. Required courses in engineering, mathematics and physical science are interwoven throughout the curriculum to provide a multifaceted education. The degree requires coursework in math and science (a minimum of 30 credits), a core of project-based integrated design-focused engineering courses taught by IDE faculty, a disciplinary emphasis (which includes engineering and design content), a selected concentration (https://www.colorado.edu/program/ide/academics/concentrations/) (12 or more credits), humanities and social sciences electives (https://www.colorado.edu/engineering-advising/get-your-degree/degree-requirements/humanities-social-sciences-and-writing-requirements/), a writing course (https://www.colorado.edu/engineering-advising/get-your-degree/degree-requirements/humanities-social-sciences-and-writing-requirements/) and free electives, for a total of 128 credits required for the degree.

Disciplinary Emphases

Integrated design engineering majors select one disciplinary emphasis (i.e., aerospace, architectural, civil, electrical, environmental or mechanical engineering), and then complete requirements associated with developing competency in that area. To meet graduation requirements, the combination of engineering core and disciplinary emphasis coursework must sum to 52 credits or more. All engineering core and disciplinary emphasis courses require a minimum grade of C-. All integrated design engineering students, regardless of emphasis, are required to take the Fundamentals of Engineering (FE) exam prior to graduation. With the exception of architectural engineering or civil engineering, students are not permitted to double major in a degree program in the same disciplinary area as their IDE emphasis. Students are not permitted to declare a minor in the same disciplinary area as their IDE emphasis.

- Aerospace Emphasis
- Architectural Emphasis
- Civil Emphasis
- Electrical Emphasis
- Environmental Emphasis
- Mechanical Emphasis

Concentration

The integrated design engineering concentration (minimum 12 credits) allows students to select additional coursework in a chosen field of study, either within or outside of engineering. The concentration course sequence must be a series of courses with increasing specificity or depth within a field, typically culminating in senior-level courses. Most concentrations will consist of at least four 3-credit courses. Every concentration *must* be pre-approved by the Integrated Design Engineering academic advisor *prior* to the commencement of the coursework. All concentration courses require a minimum grade of C-. All IDE majors must declare one approved concentration by the end of their fourth semester and students who transfer into the program after their fourth semester must declare an approved concentration by the end of their first semester in the major. No one is permitted to declare more than one concentration. Visit the program website for the current concentration requirements. (https://www.colorado.edu/program/ide/academics/concentrations/)

The Integrated Design Engineering degree is built around student choice and flexibility. The combinations of engineering emphases and approved concentrations allow for over 100 possible pathways. The sample curriculum represents only a general idea of what is possible with integrated design engineering. Students are encouraged to visit the Integrated Design Engineering **(**https://www.colorado.edu/program/ide/academics/**)** website or an advisor for more specifics in planning their own unique pathway and to ensure that all degree requirements are met.

Prerequisites and Passing Grades

The minimum passing grade for a course that is a prerequisite or corequisite for another required course is a C-. If a grade of D+ or lower is received in a course which is a prerequisite to another, the student may not register for the subsequent course until the first grade has been raised to a C- or higher. If a grade of D+ or lower is received in a course which is a corequisite to another, the course must be repeated until a grade of C- or higher is achieved.

The minimum passing grade for all required engineering core, disciplinary emphasis and concentration courses is a C-. The minimum passing grade for a course that is not specifically a prerequisite or corequisite for another required course is D-, if not otherwise noted above.

Additional Graduation Requirements

- **FE Exam**: All integrated design engineering students, regardless of emphasis, are required to take the Fundamentals of Engineering (FE) exam prior to graduation.
- **Senior Survey:** All integrated design engineering students, regardless of emphasis, are required to take the Senior Survey prior to graduation.

CHEM 1221	Engineering General Chemistry Lab	1
or CHEM 1134	Laboratory in General Chemistry 2	
PHYS 1110	General Physics 1	4
or PHYS 1115	General Physics 1 for Majors	
PHYS 1120	General Physics 2	4
PHYS 1140	Experimental Physics 1	1
Math or Science Electives [3]		
Humanities, Social Sciences, and Writing		
Complete the College's Humanities, Social Sciences, and Writing requirements. [4]		18
Free Electives		**16**
Fundamentals of Engineering (FE) Exam		
Senior Survey		
Total Credit Hours		**128**

[1] IDE students must meet the following requisites to enroll in EVEN 4434: GEEN 2400, GEEN 3400, and EVEN 4464 OR CVEN 3424.

[2] Select from current list of Concentrations (https://www.colorado.edu/program/ide/academics/concentrations/) on the IDE website.

[3] Math and Science Requirements met by listed Environmental Emphasis courses.

[4] View the College's Humanities, Social Sciences and Writing requirements (https://www.colorado.edu/engineering-advising/get-your-degree/degree-requirements/humanities-social-sciences-and-writing-requirements/)webpage for more information.

Mechanical Emphasis

Code	Title	Credit Hours
Engineering Requirement		
MCEN 1030	Introduction to Engineering Computing	4
or CSCI 1300	Computer Science 1: Starting Computing	
or CHEN 1310	Introduction to Engineering Computing	
or ECEN 1310	Introduction to C Programming	
GEEN 1017	Engineering Drawing	3
or MCEN 1025	Computer-Aided Design and Fabrication	
or BMEN 1025	Computer-Aided Design & Fabrication	
GEEN 1400	Engineering Projects	3
or ASEN 1400	Gateway to Space	
or ASEN 1403	Introduction to Rocket Engineering	
or ECEN 1400	Introduction to Digital and Analog Electronics	
GEEN 2400	Engineering Projects for the Community	3
GEEN 3400	Invention and Innovation	3
GEEN 2851	Statics for Engineers	3
or MCEN 2023	Statics and Structures	
or CVEN 2121	Analytical Mechanics 1	
or ASEN 2701	Introduction to Statics, Structures, and Materials	
or ASEN 2401	Statics	
GEEN 3010	Circuits for Engineers	3
or AREN 3040	Circuits for Architectural Engineers	
or ASEN 3503	Aerospace Electronics	
or ECEN 3010	Circuits and Electronics for Mechanical Engineers	
or MCEN 3017	Circuits and Electronics for Mechanical Engineers	
Mechanical Requirement		
GEEN 3024	Materials Science for Engineers	3
or MCEN 2024	Materials Science	
or ASEN 1022	Materials Science for Aerospace Engineers	
GEEN 3852	Thermodynamics for Engineers	3
or MCEN 3012	Thermodynamics	
or AREN 2110	Thermodynamics	
or ASEN 2402	Thermodynamics	
or EVEN 3012	Thermodynamics for Environmental Science and Engineering	
GEEN 3853	Data Analysis for Engineers	4
or MCEN 3047	Data Analysis and Experimental Methods	
MCEN 2043	Dynamics	3
or CVEN 3111	Analytical Mechanics 2	
or ASEN 2703	Introduction to Dynamics and Systems	
or ASEN 2403	Dynamics	
or PHYS 3210	Classical Mechanics and Mathematical Methods 2	
MCEN 2063	Mechanics of Solids	3
or ASEN 3401	Aerospace Structures	
or CVEN 3161	Mechanics of Materials 1	
MCEN 3021	Fluid Mechanics	3
or CHEN 3200	Chemical Engineering Fluid Mechanics	
or CVEN 3313	Theoretical Fluid Mechanics	
MCEN 3025	Component Design	3
MCEN 4043	System Dynamics	3
or ECEN 3300 & ECEN 4138	Linear Systems and Control Systems Analysis	
MCEN 4045	Mechanical Engineering Design Project 1 [1]	3
MCEN 4085	Mechanical Engineering Senior Design Project 2	3
Concentration Requirement [2]		**12**
Math and Science Requirement		
APPM 1350	Calculus 1 for Engineers	4
or MATH 1300	Calculus 1	
or APPM 1345	Calculus 1 with Algebra, Part B	
APPM 1360	Calculus 2 for Engineers	4
or MATH 2300	Calculus 2	
APPM 2350	Calculus 3 for Engineers	4
or MATH 2400	Calculus 3	
APPM 2360	Introduction to Differential Equations with Linear Algebra	4
or MATH 2130 & MATH 3430	Introduction to Linear Algebra for Non-Mathematics Majors and Ordinary Differential Equations	
or MATH 2135 & MATH 3430	Introduction to Linear Algebra for Mathematics Majors and Ordinary Differential Equations	
PHYS 1110	General Physics 1	4
or PHYS 1115	General Physics 1 for Majors	
PHYS 1120	General Physics 2	4
or PHYS 1125	General Physics 2 for Majors	
PHYS 1140	Experimental Physics 1	1
MCEN 1024	Chemistry for Energy and Materials Science	3
or CHEN 1201	General Chemistry for Engineers 1	
or CHEN 1211	Accelerated Chemistry for Engineers	
or CHEM 1113	General Chemistry 1	
Math or Science Electives [3]		**2**
Humanities, Social Sciences, and Writing		
Complete the College's Humanities, Social Sciences and Writing requirements. [4]		18
Free Electives		**15**
FE Exam		
Senior Survey		
Total Credit Hours		**128**

Note: The BS in Integrated Design Engineering with a mechanical engineering emphasis cannot be earned in combination with the BS in Mechanical Engineering.

1 IDE students must meet the following requisites to enroll in MCEN 4045: GEEN 2400, GEEN 3400, GEEN 3010, GEEN 3852, MCEN 3021, MCEN 3025, one of: GEEN 3853 or MCEN 4043. Co-requisites: One of: GEEN 3853 or MCEN 4043, Writing Requirement.

2 Select from current list of Concentrations (https://www.colorado.edu/program/ide/academics/concentrations/) on the IDE website.

3 View the IDE Advising (https://www.colorado.edu/program/ide/academics/advising/) webpage for math or science elective options.

4 View the College's Humanities, Social Sciences and Writing requirements (https://www.colorado.edu/engineering-advising/get-your-degree/degree-requirements/humanities-social-sciences-and-writing-requirements/)webpage for more information.

Sample Four-Year Plans of Study

Aerospace Emphasis

First Year

Fall Semester		**Credit Hours**
APPM 1350	Calculus 1 for Engineers	4
ASEN 1030	Introduction to Computing for Aerospace Engineering	3
COEN 1500	CEAS First Year Seminar	1
GEEN 1400	Engineering Projects	3
PHYS 1110	General Physics 1	4
	Credit Hours	**15**
Spring Semester		
APPM 1360	Calculus 2 for Engineers	4
MCEN 1024	Chemistry for Energy and Materials Science	3
PHYS 1120	General Physics 2	4
PHYS 1140	Experimental Physics 1	1
Humanities or Social Sciences Elective [1]		3
	Credit Hours	**15**

Second Year

Fall Semester		
APPM 2360	Introduction to Differential Equations with Linear Algebra	4
ASEN 2501	Introduction to Astronautics	3
GEEN 2851	Statics for Engineers	3
GEEN 3852	Thermodynamics for Engineers	3
Humanities or Social Sciences Elective [1]		2
	Credit Hours	**15**
Spring Semester		
APPM 2350	Calculus 3 for Engineers	4
ASEN 2403	Dynamics	3
ASEN 2502	Introduction to Aeronautics	3
GEEN 2400	Engineering Projects for the Community	3
Humanities or Social Sciences Elective [1]		3
	Credit Hours	**16**

Third Year

Fall Semester		
ASEN 3404	Aerospace Dynamics and Control	3
GEEN 3400	Invention and Innovation	3
Emphasis Elective #1		3
Concentration Course [2]		3
College-Approved Writing Course [1]		3
Math or Science Elective [4]		3
	Credit Hours	**18**
Spring Semester		
Emphasis Elective #1		3
Emphasis Elective #2		3
Concentration Course [2]		3
Upper Division Humanities or Social Science Elective [1]		3
Free Elective		3
Free Elective		3
	Credit Hours	**18**

Fourth Year

Fall Semester		
ASEN 4018	Senior Projects 1: Design Synthesis [3]	4
Emphasis Elective #3		3
Concentration Course [2]		3
Free Elective		3
Free Elective		3
	Credit Hours	**16**
Spring Semester		
ASEN 4028	Senior Projects 2: Design Practicum	4
Concentration Course [2]		3
Upper Division Humanities or Social Sciences Elective [1]		3
Free Elective		3
Free Elective		2
	Credit Hours	**15**
	Total Credit Hours	**128**

1 View the College's Humanities, Social Sciences and Writing requirements (https://www.colorado.edu/engineering-advising/get-your-degree/degree-requirements/ humanities-social-sciences-and-writing-requirements/) webpage for more information.

2 Select from current list of Concentrations (https://www.colorado.edu/program/ide/academics/concentrations/) on the IDE website.

3 IDE students must meet the following prerequisites to enroll in ASEN 4018: GEEN 2400, GEEN 3400, ASEN 3404, ASEN 3501 or 3502, and two of the following emphasis electives: ASEN 3401, ASEN 3402, ASEN 3403, ASEN 3503.

4 View the IDE Advising (https://www.colorado.edu/program/ide/academics/advising/) webpage for math or science elective.

Architectural Emphasis

First Year

Fall Semester		**Credit Hours**
APPM 1350	Calculus 1 for Engineers	4
COEN 1500	CEAS First Year Seminar	1
GEEN 1400	Engineering Projects	3
PHYS 1110	General Physics 1	4
Humanities or Social Science elective [1]		2
	Credit Hours	**14**

Spring Semester		
APPM 1360	Calculus 2 for Engineers	4
AREN 1027	Engineering Drawing	3
PHYS 1120	General Physics 2	4
PHYS 1140	Experimental Physics 1	1
Approved Writing Course [1]		3
	Credit Hours	**15**
Second Year		
Fall Semester		
APPM 2350	Calculus 3 for Engineers	4
AREN 2050	Building Materials and Systems	3
CSCI 1200	Introduction to Computational Thinking	3
GEEN 2851	Statics for Engineers	3
Humanities or Social Science Elective [2]		3
	Credit Hours	**16**
Spring Semester		
APPM 2360	Introduction to Differential Equations with Linear Algebra	4
CHEN 1201	General Chemistry for Engineers 1	4
CVEN 3161	Mechanics of Materials 1	3
GEEN 2400	Engineering Projects for the Community	3
Humanities or Social Science Elective [1]		3
	Credit Hours	**17**
Third Year		
Fall Semester		
GEEN 3010	Circuits for Engineers	3
GEEN 3852	Thermodynamics for Engineers	3
Focus Area Course		3
Concentration Course [2]		3
Upper Division Humanities or Social Science Elective [1]		3
Free Elective		3
	Credit Hours	**18**
Spring Semester		
GEEN 3400	Invention and Innovation	3
Focus Area Course		3
Emphasis Elective		3
Math or Science Elective [3]		1
Concentration Course		3
Free Elective		3
	Credit Hours	**16**
Fourth Year		
Fall Semester		
AREN 4318	Architectural Engineering Design 1 [4]	5
Concentration Course		3
Upper Division Humanities or Social Science Elective [1]		3
Free Elective		3
Free Elective		3
	Credit Hours	**17**
Spring Semester		
AREN 4319	Architectural Engineering Design 2	2
GEEN 3853	Data Analysis for Engineers	4
Emphasis Elective		3
Concentration Course [2]		3
Free Elective		3
	Credit Hours	**15**
	Total Credit Hours	**128**

1. View the College's Humanities, Social Sciences and Writing requirements (https://www.colorado.edu/engineering-advising/get-your-degree/degree-requirements/humanities-social-sciences-and-writing-requirements/)webpage for more information.
2. Select from current list of Concentrations (https://www.colorado.edu/program/ide/academics/concentrations/) on the IDE website.
3. View the IDE Advising (https://www.colorado.edu/program/ide/academics/advising/)webpage for math or science elective options.
4. IDE students must meet the following prerequisites to enroll in AREN 4318: GEEN 2400 and GEEN 3400 and all required courses from a Focus Area listed above and one of: CVEN 3246 or AREN 3540 or AREN 4570 or AREN 3010 or CVEN 3525.

Civil Emphasis

First Year		
Fall Semester		**Credit Hours**
APPM 1350	Calculus 1 for Engineers	4
COEN 1500	CEAS First Year Seminar	1
GEEN 1400	Engineering Projects	3
PHYS 1110	General Physics 1	4
Humanities or Social Sciences Elective [1]		2
	Credit Hours	**14**
Spring Semester		
APPM 1360	Calculus 2 for Engineers	4
AREN 1027	Engineering Drawing	3
PHYS 1120	General Physics 2	4
PHYS 1140	Experimental Physics 1	1
College-Approved Writing Course [1]		3
	Credit Hours	**15**
Second Year		
Fall Semester		
APPM 2350	Calculus 3 for Engineers	4
CSCI 1200	Introduction to Computational Thinking	3
GEEN 2400	Engineering Projects for the Community	3
GEEN 2851	Statics for Engineers	3
Humanities or Social Science Elective [1]		3
	Credit Hours	**16**
Spring Semester		
APPM 2360	Introduction to Differential Equations with Linear Algebra	4
CHEN 1201	General Chemistry for Engineers 1	4
CHEM 1114	Laboratory in General Chemistry 1	1
CVEN 3161	Mechanics of Materials 1	3
CVEN 3313	Theoretical Fluid Mechanics	3
Concentration Course [2]		3
	Credit Hours	**18**

Third Year

Fall Semester

GEEN 3010	Circuits for Engineers	3
GEEN 3852	Thermodynamics for Engineers	3
Choose One:		3
CVEN 3323 or CVEN 3708	Hydraulic Engineering or Geotechnical Engineering 1	
Emphasis Elective		3
Humanities or Social Sciences Elective [1]		3
	Credit Hours	**15**

Spring Semester

GEEN 3400	Invention and Innovation	3
GEEN 3853	Data Analysis for Engineers	4
Focus Area Course		3
Emphasis Elective		3
Concentration Course [2]		3
	Credit Hours	**16**

Fourth Year

Fall Semester

Focus Area Course		3
Concentration Course [2]		3
Humanities or Social Science Elective [1]		3
Free Elective		3
Free Elective		3
Free Elective		3
	Credit Hours	**18**

Spring Semester

CVEN 4899	Civil Engineering Senior Project Design [3]	4
Concentration Course [2]		3
Humanities or Social Science Elective [1]		3
Free Elective		3
Free Elective		3
	Credit Hours	**16**
	Total Credit Hours	**128**

1. View the College's Humanities, Social Sciences and Writing requirements (https://www.colorado.edu/engineering-advising/get-your-degree/degree-requirements/humanities-social-sciences-and-writing-requirements/)webpage for more information.
2. Select from current list of Concentrations (https://www.colorado.edu/program/ide/academics/concentrations/) on the IDE website.
3. IDE students must meet the following requisites to enroll in CVEN 4899: GEEN 2400 and GEEN 3400 and one set of requisites from the following focus areas: Construction: prerequisites CVEN 3256 and AREN 4506; Environmental: prerequisite CVEN 3424 and pre- or co-requisite CVEN 4474 or CVEN 3434 or CVEN 4404 or CVEN 4484; Geotechnical: prerequisite CVEN 3718 and pre- or co-requisite CVEN 4728; Structures: prerequisite CVEN 4555 and pre- or co-requisite CVEN 4545; Water Resources: pre- or co-requisite CVEN 4333 and CVEN 4353.

Electrical Emphasis

First Year

Fall Semester

		Credit Hours
APPM 1350	Calculus 1 for Engineers	4
COEN 1500	CEAS First Year Seminar	1
GEEN 1400	Engineering Projects	3
PHYS 1110	General Physics 1	4
Humanities or Social Sciences Elective [1]		2
	Credit Hours	**14**

Spring Semester

APPM 1360	Calculus 2 for Engineers	4
ECEN 1310	Introduction to C Programming	4
PHYS 1120	General Physics 2	4
PHYS 1140	Experimental Physics 1	1
Approved Writing Course [1]		3
	Credit Hours	**16**

Second Year

Fall Semester

APPM 2360	Introduction to Differential Equations with Linear Algebra	4
GEEN 2400	Engineering Projects for the Community	3
GEEN 2851	Statics for Engineers	3
Math or Science Elective [2]		5
Humanities or Social Sciences Elective [1]		3
	Credit Hours	**18**

Spring Semester

APPM 2350	Calculus 3 for Engineers	4
ECEN 2250	Introduction to Circuits and Electronics	3
ECEN 2350	Digital Logic	4
GEEN 3024	Materials Science for Engineers (Or Materials course in emphasis)	3
Humanities or Social Sciences Elective [1]		3
	Credit Hours	**17**

Third Year

Fall Semester

ECEN 2260	Circuits as Systems	3
ECEN 2270	Electronics Design Lab	3
GEEN 3852	Thermodynamics for Engineers	3
Emphasis Elective		3
Concentration Course [3]		3
Free Elective		2
	Credit Hours	**17**

Spring Semester

GEEN 3400	Invention and Innovation	3
GEEN 3853	Data Analysis for Engineers	4
Emphasis Elective		3
Emphasis Elective		3
Concentration Course		3
	Credit Hours	**16**

Fourth Year		
Fall Semester		
ECEN 4610	Capstone Laboratory Part 1 [4]	3
Concentration Course		3
Humanities or Social Sciences Elective [1]		3
Free Elective		3
Free Elective		3
	Credit Hours	**15**
Spring Semester		
ECEN 4620	Capstone Lab, Part 2	3
Concentration Course		3
Humanities or Social Sciences Elective [1]		3
Free Elective		3
Free Elective		3
	Credit Hours	**15**
	Total Credit Hours	**128**

1 View the College's Humanities, Social Sciences and Writing requirements (https://www.colorado.edu/engineering-advising/get-your-degree/degree-requirements/humanities-social-sciences-and-writing-requirements/)webpage for more information.

2 View the IDE Advising (https://www.colorado.edu/program/ide/academics/advising/) webpage for math or science elective options.

3 Select from current list of concentrations (https://www.colorado.edu/program/ide/academics/concentrations/) on the IDE website.

4 IDE students must meet the following requisites to enroll in ECEN 4610: ECEN 2260 and ECEN 2270 and GEEN 2400 and GEEN 3400 and the three chosen emphasis electives from the list of five above.

Environmental Emphasis

First Year		
Fall Semester		**Credit Hours**
APPM 1350	Calculus 1 for Engineers	4
COEN 1500	CEAS First Year Seminar	1
GEEN 1400	Engineering Projects	3
PHYS 1110	General Physics 1	4
Humanities or Social Sciences Elective [1]		2
	Credit Hours	**14**
Spring Semester		
APPM 1360	Calculus 2 for Engineers	4
CHEN 1310	Introduction to Engineering Computing	3
PHYS 1120	General Physics 2	4
PHYS 1140	Experimental Physics 1	1
College-Approved Writing Course [1]		3
	Credit Hours	**15**
Second Year		
Fall Semester		
APPM 2350	Calculus 3 for Engineers	4
CHEN 1201	General Chemistry for Engineers 1	4
GEEN 2400	Engineering Projects for the Community	3
GEEN 2851	Statics for Engineers	3
Humanities or Social Science Elective [1]		3
	Credit Hours	**17**
Spring Semester		
APPM 2360	Introduction to Differential Equations with Linear Algebra	4
CHEM 1221	Engineering General Chemistry Lab	1
CHEN 1203	General Chemistry for Engineers 2	2
CVEN 3313	Theoretical Fluid Mechanics	3
GEEN 3024	Materials Science for Engineers	3
Free Elective		3
	Credit Hours	**16**
Third Year		
Fall Semester		
CVEN 3323	Hydraulic Engineering	3
CVEN 3414	Fundamentals of Environmental Engineering	3
GEEN 3010	Circuits for Engineers	3
GEEN 3852	Thermodynamics for Engineers	3
Concentration Course [1]		3
Humanities or Social Science Elective [1]		3
	Credit Hours	**18**
Spring Semester		
GEEN 3400	Invention and Innovation	3
GEEN 3853	Data Analysis for Engineers	4
Emphasis Elective		3
Concentration Course [2]		3
Free Elective		3
	Credit Hours	**16**
Fourth Year		
Fall Semester		
EVEN 4464 or CVEN 4464	Environmental Engineering Processes or Environmental Engineering Processes	3
Emphasis Elective		3
Concentration Course [2]		3
Humanities or Social Science Elective [1]		3
Free Elective		3
Free Elective		1
	Credit Hours	**16**
Spring Semester		
EVEN 4434	Environmental Engineering Design	4
Concentration Course [2]		3
Humanities or Social Sciences Elective [1]		3
Free Elective		3
Free Elective		3
	Credit Hours	**16**
	Total Credit Hours	**128**

1 View the College's Humanities, Social Sciences and Writing requirements (https://www.colorado.edu/engineering-advising/get-your-degree/degree-requirements/humanities-social-sciences-and-writing-requirements/)webpage for more information.

2 View the IDE Advising (https://www.colorado.edu/program/ide/academics/advising/) webpage for math or science elective options.

3 Select from current list of Concentrations (https://www.colorado.edu/program/ide/academics/concentrations/) on the IDE website.

4 IDE students must meet the following requisites to enroll in MCEN 4045: GEEN 2400, GEEN 3400, GEEN 3010, GEEN 3852, MCEN 3021, MCEN 3025, one of: GEEN 3853 or MCEN 4043. Co-requisites: One of: GEEN 3853 or MCEN 4043, Writing Requirement.

Additional Information

Students who select the CU Teach Engineering Math or Science Concentration will have a ninth semester student teaching experience. There is financial assistance available for these students.

Mission Statement

The mission of the Integrated Design Engineering program is to prepare students to be innovators in a wide range of careers, tackling complex global challenges ethically and creatively by integrating technical engineering knowledge with integrated design thinking and multidisciplinary collaboration skills.

Learning Outcomes

Program Educational Objectives

Within a few years after graduation, graduates of the Integrated Design Engineering program will have:

- Achieved one or more of the following:
  - established themselves in engineering careers or in a professional field in which they apply their engineering mindset;
  - established themselves as STEM educators; and/or
  - earned or be enrolled in a graduate or professional degree program
- Brought an integrated design mindset to the projects, problems and/or systems they worked on.
- Integrated themselves into teams where they champion inclusive practices and diverse thinking.
- Demonstrated professional and personal leadership through continued learning and growth.
- Advanced in professional standing based on their accomplishments and accumulated additional expertise.
- Contributed to the betterment of society.

Student Outcomes

By the completion of the program, students will be able to:

- Identify, formulate and solve complex engineering problems by applying principles of engineering, science and mathematics.
- Apply engineering design to produce solutions that meet specified needs with consideration of public health, safety and welfare, as well as global, cultural, social, environmental and economic factors.
- Communicate effectively with a range of audiences.
- Recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental and societal contexts.
- Function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks and meet objectives.
- Develop and conduct appropriate experimentation, analyze and interpret data and use engineering judgment to draw conclusions.
- Acquire and apply new knowledge as needed, using appropriate learning strategies.

Bachelor's–Accelerated Master's Degree Program(s)

The bachelor's–accelerated master's (BAM) degree program options offer currently enrolled CU Boulder undergraduate students the opportunity to receive a bachelor's and master's degree in a shorter period of time. Students receive the bachelor's degree first but begin taking graduate coursework as undergraduates (typically in their senior year).

Because some courses are allowed to double count for both the bachelor's and the master's degrees, students receive a master's degree in less time and at a lower cost than if they were to enroll in a stand-alone master's degree program after completion of their baccalaureate degree. In addition, staying at CU Boulder to pursue a bachelor's–accelerated master's program enables students to continue working with their established faculty mentors.

Admissions Requirements

BS in Integrated Design Engineering, Professional MS in Mechanical Engineering

In order to gain admission to the BAM program named above, a student must meet the following criteria:

- Be a current Integrated Design Engineering major with an emphasis in Mechanical Engineering
- Have submitted the BAM intent application (https://fedauth.colorado.edu/idp/profile/SAML2/POST/SSO/?execution=e1s2), typically in the spring of the junior year
- Have a cumulative GPA of 3.250 or higher
- Have at least junior standing and a minimum of 60 credit hours of completed coursework
- Have no Minimum Academic Preparation Standards (MAPS) deficiencies. (Students who matriculated in Summer 2023 or later will not need to meet MAPS as a part of BAM admission requirements.)
- Have completed courses from the three following categories with a grade of C (2.00) or higher at the time of admission:

Code	Title	Credit Hours
Mathematics (one of the following):		
APPM 2360	Introduction to Differential Equations with Linear Algebra	4
MATH 2130 & MATH 3430	Introduction to Linear Algebra for Non-Mathematics Majors and Ordinary Differential Equations	6
MATH 2135 & MATH 3430	Introduction to Linear Algebra for Mathematics Majors and Ordinary Differential Equations	6
Fluid Mechanics (one of the following):		
MCEN 3021	Fluid Mechanics	3
CVEN 3313	Theoretical Fluid Mechanics	3
CHEN 3200	Chemical Engineering Fluid Mechanics	3
Thermodynamics (one of the following):		
GEEN 3852	Thermodynamics for Engineers	3
MCEN 3012	Thermodynamics	3
CHEN 3320	Chemical Engineering Thermodynamics	3
EVEN 3012	Thermodynamics for Environmental Science and Engineering	3

Program Requirements

Students may take up to and including 12 credits of graduate coursework while in the undergraduate program which can later be used toward the master's degree. However, only six credits may be double counted toward the bachelor's degree and the master's degree. Students must apply to graduate with the bachelor's degree in Integrated Design Engineering, and also apply to continue with the professional master's degree in Mechanical Engineering, early in the semester in which the undergraduate requirements will be completed.

There are no specific constraints regarding the selection of 5000-level MCEN courses, as long as the student fulfills the required prerequisites. To determine the most suitable courses, students should consult with the Mechanical Engineering graduate advisor.

Students can refer to the **Integrated Design Engineering BAM degree programs** webpage for more information.

Admissions Requirements

BS in Integrated Design Engineering, Professional MS in Environmental Engineering

In order to gain admission to the BAM program named above, a student must meet the following criteria:

- Be a current Integrated Design Engineering major with an emphasis in Environmental Engineering
- Have submitted the BAM intent application (https://fedauth.colorado.edu/idp/profile/SAML2/POST/SSO/?execution=e1s2), typically in the spring of the junior year
- Have a cumulative GPA of 3.250 or higher
- Have at least junior standing and a minimum of 60 credit hours of completed coursework
- Have no Minimum Academic Preparation Standards (MAPS) deficiencies. (Students who matriculated in Summer 2023 or later will not need to meet MAPS as a part of BAM admission requirements.)
- Have completed the two following environmental emphasis courses with a grade of C (2.00) or higher at the time of admission:

Code	Title	Credit Hours
CVEN 3414	Fundamentals of Environmental Engineering	3
CVEN 3313	Theoretical Fluid Mechanics	3
or MCEN 3021	Fluid Mechanics	

Program Requirements

Students may take up to and including 12 credits of graduate coursework while in the undergraduate program which can later be used toward the master's degree. However, only six credits may be double counted toward the bachelor's degree and the master's degree. Students must apply to graduate with the bachelor's degree in Integrated Design Engineering, and also apply to continue with the professional master's degree in Environmental Engineering, early in the semester in which the undergraduate requirements will be completed.

Up to 6 credits of courses required for the IDE environmental emphasis or used as EVEN electives with both a 4000- and 5000-level version may be double counted between the undergraduate and graduate degrees. These include:

Code	Title	Credit Hours
CVEN 4464/5464	Environmental Engineering Processes	3
CVEN 4404/5404	Water Chemistry	3
EVEN 4484/ CVEN 5484	Integrative Environmental and Molecular Microbiology	3
MCEN 4131/5131	Air Pollution Control Engineering	3

There are no specific constraints regarding the selection of the 5000-level EVEN or CVEN courses, as long as the student fulfills the required prerequisites. To determine the most suitable courses, students should consult with the Environmental Engineering graduate advisor.

Students can refer to the **Integrated Design Engineering BAM degree programs** webpage for more information.

Materials Science & Engineering

Materials science and engineering is an interdisciplinary field that lies at the interface of chemistry, engineering and physics. The minor is for undergraduate students who are majoring in the natural sciences and engineering and who have an interest in materials science and engineering.

Minor

- Materials Science & Engineering - Minor (p. 1017)

Materials Science & Engineering - Minor

Materials science and engineering is an interdisciplinary field that lies at the interface of chemistry, engineering and physics. The minor is for undergraduate students who are majoring in the natural sciences and engineering and who have an interest in materials science and engineering.

Requirements

Requirements for the minor are met by completing the required courses for 6 credit hours and 12 technical elective credit hours. Visit the Materials Science & Engineering webpage (https://www.colorado.edu/mse/academics/materials-science-engineering-undergraduate-minor/) for more information and a list of approved technical electives (https://www.colorado.edu/mse/academics/undergraduate-minor/mse-minor-technical-electives/). At least 12 of the 18 credit hours must be upper-division (3000 or higher level). At least 3 credit hours beyond the required courses must be taken in engineering courses (9 credits total). 5000-level courses are allowed where undergraduate students are eligible to enroll. Prior coursework may be transferred from other institutions with approval.

A GPA of 2.000 or better is required in the courses that are used to satisfy the requirements for this minor. Each individual course that is counted towards these degree requirements must be passed with a D- or better. Note, however, that a C- or better is required in all prerequisite courses to move on to a subsequent course.

Completion of 18 credit hours is required for the minor, distributed as follows.

Code	Title	Credit Hours
Required Course		
MSEN 2000	Materials in Technology [1]	3
Fundamentals of Materials Science		
Select one of the following:		
ASEN 1022	Materials Science for Aerospace Engineers	3
or MCEN 2024	Materials Science	
or GEEN 3024	Materials Science for Engineers	
or CHEN 4440	Chemical Engineering Materials	
Technical Electives		**12**
Total Credit Hours		**18**

[1] Open to non-CEAS students.

Learning Outcomes

By the completion of the program, students will be able to:

- Identify the different classes of materials, the chemical properties of different materials and the structure-function relationship of materials.

- Solve complex engineering problems that involve materials by applying principles of engineering, science and mathematics.
- Apply materials science and engineering principles to solve technical challenges in society.
- Work in a team environment to solve complex engineering problems that require materials solutions.
- Recognize ethical and professional responsibilities when designing materials to address solutions that impact public health, safety and welfare.

Mechanical Engineering

Mechanical engineering prepares students for careers in a variety of industrial sectors including transportation, energy, manufacturing, aerospace, biomedical and environmental. Career opportunities include work in basic and applied research and development, design, manufacturing, project management, consulting and teaching. Mechanical engineers are employed by a wide variety of industrial, governmental and educational organizations. A mechanical engineering background also provides a firm foundation for other professional careers such as engineering management, law and medicine.

A mechanical engineering education from CU Boulder will prepare students for a future in a broad range of fields in science and technology. Students receive a hands-on education that breaks out of the classroom to give them real experience in industry. They learn from and work with a diverse faculty conducting groundbreaking research that is shaping the future of our world.

Course code for this program is MCEN.

Bachelor's Degree

- Mechanical Engineering - Bachelor of Science (BSME) (p. 1029)

Minor

- Energy Engineering - Minor (p. 1033)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Affrunti, Andrew J. (https://experts.colorado.edu/display/fisid_149937/)
Instructor; MSEE, University of Illinois at Urbana–Champaign

Ahmed, Alaa A. (https://experts.colorado.edu/display/fisid_144736/)
Professor; PhD, University of Michigan

Ban, Chunmei (https://experts.colorado.edu/display/fisid_165780/)
Associate Professor; PhD, SUNY at Binghamton

Barthelat, Francois (https://experts.colorado.edu/display/fisid_164866/)
Professor; PhD, Northwestern University

Bates, Kelvin (https://experts.colorado.edu/display/fisid_173937/)
Assistant Professor; PhD, California Institute of Technology

Blacklock, Jenifer L. (https://experts.colorado.edu/individual/fisid_159680/)
Faculty Director, Senior Instructor, Visiting Instructor; PhD, Wayne State University

Borden, Mark A. (https://experts.colorado.edu/display/fisid_148514/)
Professor; PhD, University of California, Davis

Bottenus, Nick (https://experts.colorado.edu/individual/fisid_165371/)
Assistant Professor; PhD, Duke University

Branch, Melvyn C.
Professor Emeritus

Bright, Victor Mark (https://experts.colorado.edu/display/fisid_112696/)
Professor; PhD, Georgia Institute of Technology

Bruns, Carson J. (https://experts.colorado.edu/display/fisid_159851/)
Assistant Professor; PhD, Northwestern University

Burleson, Grace
Visiting Assistant Professor; PhD, University of Michigan

Calve, Sarah (https://experts.colorado.edu/individual/fisid_165779/)
Assistant Professor; PhD, University of Michigan

Carlson, Lawrence E.
Professor Emeritus; D.Eng, University of California Berkeley

Castro, Francisco (https://experts.colorado.edu/display/fisid_147992/)
Senior Instructor; PhD, University of Colorado Boulder

Cui, Longji (https://experts.colorado.edu/display/fisid_164283/)
Assistant Professor; ME, Beihang University (China)

Daily, John W. (https://experts.colorado.edu/display/fisid_100131/)
Research Professor; PhD, Stanford University

Datta, Subhendu K.
Professor Emeritus

Ding, Xiaoyun (https://experts.colorado.edu/display/fisid_158563/)
Professor; PhD, Pennsylvania State University

Ding, Yifu (https://experts.colorado.edu/display/fisid_146088/)
Professor; PhD, University of Akron

Ferguson, Virginia L. (https://experts.colorado.edu/display/fisid_110131/)
Professor; PhD, University of Colorado Boulder

Geers, Thomas L.
Professor Emeritus

Greenberg, Alan R.
Professor Emeritus

Gupta, Mohit
Instructor Adjunct

Hamlington, Peter Edward (https://experts.colorado.edu/display/fisid_149800/)
Associate Professor, Chair, Faculty Fellow; PhD, University of Michigan Ann Arbor

Hampson, Gregory (https://experts.colorado.edu/display/fisid_166888/)
Scholar in Residence; PhD, University of Wisconsin–Madison

Hannigan, Michael P. (https://experts.colorado.edu/display/fisid_122655/)
Professor, Endowed Chair; PhD, California Institute of Technology

Henze, Daven K. (https://experts.colorado.edu/display/fisid_144858/)
Professor, Associate Chair; PhD, California Institute of Technology

Hertzberg, Jean R. (https://experts.colorado.edu/display/fisid_105315/)
Professor; PhD, University of California, Berkeley

Humbert, J. Sean (https://experts.colorado.edu/display/fisid_156202/)
Professor, Associate Chair; PhD, California Institute of Technology

Jayaram, Kaushik (https://experts.colorado.edu/display/fisid_165370/)
Assistant Professor; PhD, University of California-Berkeley

Kassoy, David R.
Professor Emeritus

Knappe, Svenja A. (https://experts.colorado.edu/display/fisid_139588/)
Associate Research Professor; PhD, Rheinische Friedrich-Wilhelms-Universität (Germany)

Knight, Daniel
Associate Research Professor; PhD, University of Tennessee

Knutsen, Jeffrey S. (https://experts.colorado.edu/display/fisid_145534/)
Associate Teaching Professor; PhD, University of Colorado Boulder

Koch, Jeremy (https://experts.colorado.edu/display/fisid_166589/)
Assistant Teaching Professor; PhD, University of Illinois

Kotys-Schwartz, Daria (https://experts.colorado.edu/display/fisid_144738/)
Teaching Professor; PhD, University of Colorado Boulder

Labbe, Nicole J. (https://experts.colorado.edu/display/fisid_157742/)
Assistant Professor; PhD, University of Massachusetts, Amherst

Lee, Sehee (https://experts.colorado.edu/display/fisid_144739/)
Professor; PhD, Seoul National University (South Korea)

Lee, Yung-Cheng (https://experts.colorado.edu/display/fisid_103170/)
Professor Emeritus

Long, Rong (https://experts.colorado.edu/display/fisid_151301/)
Associate Professor; PhD, Cornell University

Lynch, Maureen Ellen (https://experts.colorado.edu/display/fisid_163404/)
Assistant Professor; PhD, Cornell University

MacCurdy, Robert B. (https://experts.colorado.edu/display/fisid_163307/)
Assistant Professor; PhD, Cornell University

McConnell, Katherine (https://experts.colorado.edu/display/fisid_147567/)
Scholar in Residence; EdD, University of Colorado Denver

McNeill, Nathan John (https://experts.colorado.edu/display/fisid_151518/)
Associate Teaching Professor; PhD, Purdue University

Michelsen, Hope (https://experts.colorado.edu/individual/fisid_165261/)
Associate Professor; PhD, Stanford University

Milford, Jana B. (https://experts.colorado.edu/display/fisid_103268/)
Professor Emerita

Miller, Shelly L. (https://experts.colorado.edu/display/fisid_110394/)
Professor; PhD, University of California, Berkeley

Mitrano, Peter P. (https://experts.colorado.edu/display/fisid_155075/)
Assistant Teaching Professor; PhD, University of Colorado, Boulder

Mizzi, Arthur
Assistant Research Professor; PhD, University of Colorado Boulder

Mukherjee, Debanjan (https://experts.colorado.edu/individual/fisid_164181/)
Assistant Professor; PhD, University of California, Berkeley

Murray, Todd W. (https://experts.colorado.edu/display/fisid_146549/)
Professor, Associate Chair; PhD, Johns Hopkins University

Neu, Corey P. (https://experts.colorado.edu/display/fisid_156210/)
Professor; PhD, University of California, Davis

Norris, Jan Adam (https://experts.colorado.edu/display/fisid_101412/)
Instructor Adjunct; PhD, University of Colorado Boulder

Pacheco, Carmen Consuelo (https://experts.colorado.edu/display/fisid_148773/)
Scholar in Residence; MS, University of Arizona

Pellegrino, John (https://experts.colorado.edu/display/fisid_130902/)
Research Professor; PhD, University of Colorado Boulder

Raj, Rishi (https://experts.colorado.edu/display/fisid_108413/)
Professor; PhD, Harvard University

Reamon, Derek T. (https://experts.colorado.edu/display/fisid_120538/)
Teaching Professor; PhD, Stanford University

Rentschler, Mark E. (https://experts.colorado.edu/display/fisid_146091/)
Professor; PhD, University of Nebraska-Lincoln

Rieker, Gregory Brian (https://experts.colorado.edu/display/fisid_151727/)
Associate Professor, Faculty Fellow; PhD, Stanford University

Riffell, Daniel J. (https://experts.colorado.edu/display/fisid_154141/)
Associate Professor, Lecturer; MS, University of Colorado Boulder

Ruben, Shalom D. (https://experts.colorado.edu/display/fisid_149492/)
Associate Teaching Professor; PhD, University of California, Los Angeles

Saccone, Max (https://experts.colorado.edu/display/fisid_175898/)
Assistant Professor; PhD, California Institute of Technology

Segil, Jacob Lionel (https://experts.colorado.edu/display/fisid_155128/)
Research Professor; PhD, University of Colorado Boulder

Singh, Chahat (https://experts.colorado.edu/display/fisid_175890/)
Assistant Professor; PhD, University of Maryland

Steinbrenner, Julie E. (https://experts.colorado.edu/display/fisid_152041/)
Associate Teaching Professor, Associate Chair; PhD, Stanford University

Stoldt, Conrad R. (https://experts.colorado.edu/display/fisid_126290/)
Professor Emeritus; PhD, Iowa State University

Tan, Wei (https://experts.colorado.edu/display/fisid_141464/)
Associate Professor; PhD, University of Illinois at Chicago

Tsai, Janet Yi-Jen (https://experts.colorado.edu/display/fisid_156447/)
Associate Teaching Professor, Associate Chair; PhD, University of Colorado Boulder

Vance, Marina E. (https://experts.colorado.edu/display/fisid_158217/)
Assistant Professor; PhD, Virginia Polytechnic Institute and State University

Vanderbeek, Greg (https://experts.colorado.edu/display/fisid_159741/)
Assistant Teaching Professor; MS, Colorado School of Mines

Vernerey, Franck J. (https://experts.colorado.edu/display/fisid_144760/)
Professor; PhD, Northwestern University

Vriend, Nathalie Maria (https://experts.colorado.edu/display/fisid_165036/)
Associate Professor; PhD, California Institute of Technology

Walker, Michael Edward (https://experts.colorado.edu/display/fisid_155103/)
Associate Teaching Professor; PhD, Illinois Institute of Technology

Weidman, Patrick D.
Professor Emeritus

Welker, Cara (https://experts.colorado.edu/display/fisid_168549/)
Assistant Professor; Ph.D., Stanford University

Whiting, Gregory L. (https://experts.colorado.edu/display/fisid_159727/)
Associate Professor; PhD, University of Cambridge (England)

Wiedinmeyer, Christine
Research Professor; PhD, University of Texas at Austin

Xiao, Jianliang (https://experts.colorado.edu/display/fisid_149777/)
Associate Professor; PhD, Northwestern University

Xu, Nicole (https://experts.colorado.edu/display/fisid_172095/)
Assistant Professor; PhD, Stanford University

Zable, Jack L.
Professor Emeritus

Courses

ENEN 2820 (1-6) Special Topics
Explores topics related to energy engineering. Content will vary by semester and instructor.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

ENEN 4321 (3) Oil and Gas Processing
Provides a foundation in the fundamentals of oil and gas processing, including discovery, extraction and refining. Due to the importance of oil and gas in the current energy infrastructure, this course provides a broad understanding of the industry to students interested in energy engineering.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

ENEN 4600 (3) Interdisciplinary Energy Engineering Projects
Prepares students to analyze energy systems from technical, economic, and policy perspectives with project topics varying by semester. Provides historical and contemporary context of the energy landscape. Emphasizes application of engineering fundamentals for the design and evaluation of real world energy systems. Projects will be completed by working in interdisciplinary teams.
Requisites: Restricted to Energy Engineering Minor (ENMR-MIN) students with 87-180 credits (Seniors).

ENEN 4840 (1-6) Special Topics
Explores topics related to energy engineering. Content will vary by semester and instructor.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

MCEN 1024 (3) Chemistry for Energy and Materials Science
Covers the basic physical and chemical fundamentals underlying the disciplines of energy and materials, with a focus on topics relevant to your mechanical engineering education. These fundamentals include atomic structure, stoichiometry, the periodic table, chemical bonding, states of matter, thermochemistry and chemical reactions.
Equivalent - Duplicate Degree Credit Not Granted: CHEM 1113, CHEM 1400, CHEN 1201, and CHEN 1211
Requisites: Restricted to Mechanical Engineering (MCEN), Aerospace (ASEN), or Integrated Design Engineering (IDEN-BSIDE) students with a sub-plan of Mechanical (MEC) or Aerospace (AER).
Recommended: Prerequisite one year of high school chemistry.
Additional Information: Departmental Category: Materials

MCEN 1025 (4) Computer-Aided Design and Fabrication
Introduces CAD software and relevant concepts, including orthographic projection, sections, engineering drawing, geometric dimensioning and tolerancing, and an introduction to manufacturing methods. Lab work includes an introduction to fabrication techniques. Final design project involves reverse engineering of a physical product.
Requisites: Restricted to Mechanical Engineering (MCEN) or Engineering Physics (EPEN) majors only.
Additional Information: Departmental Category: Design

MCEN 1030 (4) Introduction to Engineering Computing
Introduces concepts and methods of computer programming with emphasis on applications to mechanical engineering. Includes vector/array manipulation, for/if/else/while loops, function definition, problem solving with programming. Covers MATLAB/Python with no previous experience expected.
Requisites: Requires a prerequisite or corequisite course of APPM 1235 or APPM 1340 or APPM 1345 or APPM 1350 or MATH 1150 or MATH 1300 or MATH 1310 (all minimum grade C-). Restricted to MCEN majors.

MCEN 1208 (1-4) Special Topics in Mechanical Engineering
Subject matter to be selected from topics of current interest. Credit to be arranged.
Requisites: Restricted to students with 0-26 units (Freshmen) Mechanical Engineering (MCEN) majors only.
Additional Information: Departmental Category: Special Topics

MCEN 2000 (1) Mechanical Engineering as a Profession
Provides an introduction to the profession of mechanical engineering. Specific topics addressed include career fields and roles relevant to mechanical engineering, internship search skills, professional communication, workplace culture, and current events/ethics topics relevant to the field. Course format may include additional evening/ weekend activities.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) Mechanical Engineering (MCEN) majors, and IUT On Track applicants only.
Additional Information: Departmental Category: Miscellaneous

MCEN 2023 (3) Statics and Structures
Covers statics of particles, equivalent force systems, rigid bodies, equilibrium of rigid bodies in two and three dimensions, analysis of truss and frame structures, uniaxially-loaded members, distributed force systems and friction.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 2121 or GEEN 2851
Requisites: Requires prereq courses of (APPM 1360 or MATH 2300) PHYS 1110 (all min grade C-).Restricted to Mech (MCEN) or Enviro (EVEN) or Biomedical (BMEN) or Integrated Design Eng (IDEN-BSIDE) students w a sub-plan of Mechanical (MEC) or IUT On Track applicants
Additional Information: Departmental Category: Solids

MCEN 2024 (3) Materials Science
Provides an overview of the structure, properties and processing of metallic, polymeric and ceramic materials. Specific topics include perfect and imperfect solids, phase equilibria, transformation kinetics, mechanical behavior and material degradation. Approach incorporates both materials science and materials engineering components.
Equivalent - Duplicate Degree Credit Not Granted: GEEN 3024
Requisites: Requires prereqs (MCEN 1024 or CHEN 1211 or CHEM 1113 or CHEN 1201) PHYS 1110 (min grade C-). Restricted to Mechanical (MCEN) or Integrated Design (IDEN-BSIDE) students w/ sub-plan of MEC or Materials Sci minors (MTEN-MIN) or IUT On Track applicants.
Additional Information: Departmental Category: Materials

MCEN 2043 (3) Dynamics
Covers dynamic behavior of particle systems and rigid bodies. Topics include 2-D and 3-D kinematics and kinetics, impulse, momentum, potential and kinetic energy, and work and collision.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 3111
Requisites: Requires prerequisite courses of (MCEN 2023 or CVEN 2121 or GEEN 2851or ASEN 2701) and (APPM 1360 or MATH 2300) (all minimum grade C-). Restricted to MCEN or Integrated Design Engineering (IDEN-BSIDE) students with a sub-plan of Mechanical (MEC).
Additional Information: Departmental Category: Solids

MCEN 2063 (3) Mechanics of Solids
Covers axial forces, transverse forces, bending moments and torque on beams, shafts, columns and tensile members. Calculations of stresses from each of these loads, stresses in pressure vessels, stress concentrations. Stress transformation, principal stresses and maximum shear stress using Mohr¿s circle, combined load, failure criteria. Hooke¿s law, deflection and statically indeterminate structures, thermoelasticity.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 3161
Requisites: Requires prereq of (MCEN 2023 or CVEN 2121 or GEEN 2851 or ASEN 2001 or ASEN 2701) and (APPM 1360 or MATH 2300) (all minimum grade C-). Restricted to Mechanical (MCEN) or Biomed (BMEN) or Integrated Design Engr (IDEN-BSIDE) students w/ sub-plan of MEC.
Additional Information: Departmental Category: Solids

MCEN 3012 (3) Thermodynamics
Explores fundamental concepts and basic theory, including first and second laws of thermodynamics, properties, states, thermodynamic functions and cycles.
Equivalent - Duplicate Degree Credit Not Granted: GEEN 3852 or AREN 2110
Requisites: Requires prereq course of APPM 1360 or MATH 2300 (min grade C-). Restricted to Mechanical (MCEN) or Environmental (EVEN) or Integrated Design (IDEN-BSID) students w/ sub-plan Mechanical (MEC) or Civil (CVEN) students w/ sub-plan of CMU partnership `1MSC
Additional Information: Departmental Category: Thermal

MCEN 3017 (3) Circuits and Electronics for Mechanical Engineers
Covers analysis of electrical circuits by use of Ohm's law, network reduction, node and loop analysis, Thevenin's and Norton's theorems, DC and AC signals, transient response of simple circuits, transfer functions, basic diode and transistor circuits, and operational amplifiers. Includes introductory digital electronics and microprocessors/microcontrollers.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 3010
Requisites: Requires prereq course of PHYS 1120 and a prereq or coreq course of APPM 2360 or APPM 3310 or MATH 3430 (all min grade C-). Restricted to MCEN or EVEN or Integrated Design Engr (IDEN-BSIDE) students.
Additional Information: Departmental Category: Miscellaneous

MCEN 3021 (3) Fluid Mechanics
Examines fundamentals of fluid flow with application to engineering problems. Topics covered include fluid statics and kinematics, Bernoulli equations, laminar and turbulent viscous boundary layers, laminar and turbulent pipe flow, and conservation equations for mass, momentum and energy.
Equivalent - Duplicate Degree Credit Not Granted: CHEN 3200 and CVEN 3313
Requisites: Requires prereqs (MCEN 2023 or CVEN 2121 or GEEN 2851 or ASEN 2001 or ASEN 2701 or CHEN 2120) (APPM 2350 or MATH 2400) (all min grade C-). Restricted to MCEN, EVEN, and IDEN-BSIDE students w/ sub-plan of MEC.
Additional Information: Departmental Category: Fluids

MCEN 3022 (3) Heat Transfer
Studies fundamentals of heat transfer by conduction, convection, and radiation. Emphasizes problem formulation and selection of appropriate solution techniques. Provides applications to modern engineering systems, which may include energy, biological, environmental, and materials engineering problems.
Requisites: Requires prereq (MCEN 3021 or CVEN 3313), (MCEN 3012 or AREN 2110 or GEEN 3852 or EVEN 3012), (APPM 2360 or APPM 3310 or MATH 3430) (min grade C-). Restricted to Mech Engineering or Enviro Engineering or Integrated Design Engr w/sub-plan of MEC
Additional Information: Departmental Category: Thermal

MCEN 3025 (3) Component Design
Application of mechanics and materials science to the detailed design of various machine elements including shafts, bearings, gears, brakes, springs, and fasteners. Emphasizes application and open-ended design problems.
Requisites: Requires prerequisite courses of MCEN 1025 and (MCEN 2024 or GEEN 3024 or ASEN 1022), and (MCEN 2063 or CVEN 3161) (all minimum grade C-). Restricted to Mechanical (MCEN) or Integrated Design Eng (IDEN-BSIDE) students with a sub-plan of Mechanical (MEC)
Additional Information: Departmental Category: Design

MCEN 3030 (3) Computational Methods
Studies fundamental numerical techniques for the solution of commonly encountered engineering problems. Includes methods for linear and nonlinear algebraic equations, data analysis, numerical differentiation and integration, ordinary and partial differential equations.
Requisites: Requires prerequisite courses of (APPM 2360 or MATH 3430 or APPM 3310) and (MCEN 1030 or CSCI 1300 or CSCI 1310 or CSCI 1320 or ECEN 1310 or ASEN 1320) (all min grade C-). Restricted to Mechanical Engineering (MCEN) majors only.
Additional Information: Departmental Category: Math

MCEN 3032 (3) Thermodynamics 2
Offers advanced topics and applications for thermal system design and analysis. Topics include thermodynamics of state, entropy, thermodynamic cycles and reacting and nonreacting mixtures. Provides application to power generation, refrigeration and HVAC with conventional and advanced technologies. Most assignments are design oriented.
Requisites: Requires prereq of (MCEN 3021 or CHEN 3200 or CVEN 3313) (MCEN 3012 or GEEN 3852 or AREN 2110 or EVEN 3012 or CHEN 2120) (APPM 2360 or MATH 3430 or APPM 3310) (all min grade C-). Restricted to Mech Engineering or Enviro Engineering majors.
Additional Information: Departmental Category: Thermal

MCEN 3047 (4) Data Analysis and Experimental Methods
Learn to plan and carry out experiments and analyze the results. Topics covered include measurement fundamentals, design of experiments, elementary statistics and uncertainty analysis. Topics in statistics include probability, error propagation, confidence intervals, hypothesis testing, linear regression, one- and two-factor ANOVA and time series analysis. Formerly MCEN 3037.
Equivalent - Duplicate Degree Credit Not Granted: GEEN 3853
Requisites: Prereq PHYS 1140 (min grade C-). Coreqs 1 of:(WRTG 3030,3035,ENES 1010,3100,PHYS 3050,COEN 3050,ENLP 3100), 1 of:(ECEN 3010,2270,GEEN 3010,MCEN 3017), 1of:(MCEN 3030,APPM 4650,APPM 4600,CSCI 3656).Restricted to MCEN or IDEN w/MEC, 57+ credits only
Additional Information: Departmental Category: Miscellaneous

MCEN 3208 (1-4) Special Topics in Mechanical Engineering
Subject matter to be selected from topics of current interest.
Repeatable: Repeatable for up to 15.00 total credit hours.
Requisites: Requires prereq courses of APPM 2360 PHYS 1140 and prereq or coreq courses of ECEN 3010 and WRTG 3030 or WRTG 3035 or HUEN 1010 or 3100 (all min grade C). Restricted to students with 57-180 credits (Jrs/Srs) Mechanical Engineering (MCEN) majors only.
Additional Information: Departmental Category: Special Topics

MCEN 3930 (6) Mechanical Engineering Cooperative Education
Students enrolled in this course participate in a previously arranged, department-sponsored education program with a university, government agency, or industry. This course is offered only through Continuing Education.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: At least a 2.75 cumulative GPA is required. Restricted to Mechanical Engineering or students with a plan of Mechanical Engineering Concurrent Degree or Integrated Design Engineering students with a MCEN subplan.
Recommended: Prerequisite 3.00 GPA or higher.
Additional Information: Departmental Category: Math

MCEN 4010 (3) Microsystems Integration
A microsystem consists of microelectronic, optoelectronic, microwave, microelectromechanical and energy components interconnected. Thermal, electrical, fabrication and assembly issues for microsystems represented by iPhone series will be studied. The packaging and interconnection technologies used to establish the design and manufacturing infrastructure of microsystems will be reviewed. Other optoelectronic, MEMS and batter components for microsystems will also be studied.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 5010
Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical Engineering (MCEN) majors only.

MCEN 4012 (3) Renewable Fuels, Fuel Cells and Internal Combustion Engines
With the accelerated availability of carbon-free and renewable fuels, we will explore high-efficiency, low-emissions fuel cell and internal combustion engine energy conversion technologies, preparing students to enter the rapidly changing fields of power and propulsion on the path to net-zero greenhouse gas emissions. Through thermodynamic modeling, systems engineering, and requirements flow-down, students will apply the fundamentals of thermodynamics, fluids and heat transfer, combustion and electrochemistry for fuel cells and IC engines.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 5012
Requisites: Requires corequisite course of MCEN 3032. Restricted to College of Engineering and Applied Sciences students.
Recommended: Prerequisites MCEN 4152/5152 or MCEN 4194/5194.

MCEN 4026 (3) Manufacturing Processes and Systems
Examines manufacturing processes for metals and polymers, as well as manufacturing systems that integrate these processes. Lecture topics include shape forming, machining, joining, assembling, casting, process integration, statistical process control, total quality management, geometric dimensioning and tolerancing, and electronic packaging. Examines real-world manufacturing operations and applications through guest speakers and examples.
Requisites: Requires prerequisite course of MCEN 2024 or GEEN 3024 or ASEN 1022 (minimum grade C-). Restricted to Mechanical Engineering (MCEN) majors only.
Additional Information: Departmental Category: Manufacturing and Systems

MCEN 4032 (3) Sustainable Energy
Examines sustainability of our current energy systems, including transportation, using environmental and economic indicators. Uses systems analysis that addresses energy supply and demand. Explores the science and technology as well as environmental and economic feasibility of efficiency measures and renewable energy technologies. Additional emphasis is given to the global nature of the challenges and the potential for locally optimal solutions.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 5032
Requisites: Requires prerequisite or corequisite course of (MCEN 3022 or CHEN 3210 or AREN 2120 or ASEN 3402 or MCEN 3032) (minimum grade C-).
Additional Information: Departmental Category: Thermal

MCEN 4036 (3) Lean Six-Sigma in Manufacturing
Focuses on Lean Principles and Six-Sigma methodologies for defining, measuring, analyzing, improving, and controlling (DMAIC) manufacturing processes to establish more efficient processes. Incorporates statistical process control methodologies. Teaches students to streamline industry and manufacturing processes and use data to make better informed decisions. Includes lectures, in-class activities, Minitab workshops, industry focused projects, and three exams based on the DMAIC process along with three projects focused on industry tours.
Requisites: Restricted to students with 57-180 credits (Jrs/Srs) Mechanical Engineering (MCEN) majors only.

MCEN 4043 (3) System Dynamics
Covers linear dynamic systems and mathematical tools for understanding them. Topics include Laplace transform, multi-domain system modeling, input-output relationships, time-domain response, Fourier series, frequency-domain response, and introduction to feedback control.
Requisites: Requires prereqs (MCEN 2043 or CVEN 3111), (ECEN 3010 or 2270 or GEEN 3010 or MCEN 3017), coreq (MCEN 3030 or APPM 4650 or APPM 4600 or CSCI 3656) all min grade C-. Restricted to MCEN or IDEN-BSIDE students w/ sub-plan of MEC.
Additional Information: Departmental Category: Solids

MCEN 4045 (3) Mechanical Engineering Design Project 1
First part of a two-course capstone design experience in mechanical engineering. Covers problem definition, determining design requirements, alternative design concepts, engineering analysis, proof-of-concept prototype and CAD drawings. Students make several oral design reviews, a final design presentation, and prepare a written report. IDEN-BSIDE students are not required to complete MCEN 2000, MCEN 3022, MCEN 3030 or MCEN 4026 but have additional prerequisites of GEEN 1400, 2400 and 3400.
Requisites: Restricted to MCEN or IDEN mjrs w/ prereqs (GEEN 1400, 2400, OR 3400) and MCEN 2000, 3012, 3021, 3025, 3030, AND (3022 or 4043 or 3047). Coreqs MCEN 4026, 3022, 4043, 3047, AND (WRTG 3030 or 3035 or ENES 1010 or 3100) (all min grade C-).
Additional Information: Departmental Category: Design

MCEN 4057 (3) Environmental Modeling
Enables students to develop and evaluate pollutant transport, fate, exposure, and risk models for air, water, and multi-media systems, with a special emphasis on air. Emphasizes the fundamental physics and chemistry that govern contaminant fate and transport and the basic mathematical equations and numerical approaches for describing these processes.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 5057
Requisites: Requires prerequisite courses of CHEN 1211 or CHEM 1113 or MCEN 1024 and CSCI 1300 or CSCI 1320 (all minimum grade C).
Additional Information: Departmental Category: Miscellaneous

MCEN 4064 (3) Soft Machines
Introduces soft machines as a new paradigm of engineering that starts to impact healthcare, consumer electronics, renewable energy and collaborative robotics. Prepares students to participate in research on soft machines by starting with fundamentals of soft materials and by covering soft robotics, stretchable electronics, energy harvesting and functional polymers. Includes guest lectures, a literature review and a hands-on lab project.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 5046 and MSEN 5046
Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical Engineering (MCEN) majors only.

MCEN 4085 (3) Mechanical Engineering Senior Design Project 2
Second part of a two-course capstone design experience in mechanical engineering. Includes refinement of prototype, design optimization, fabrication, testing, and evaluation. Students orally present the final design and prepare a written report and operation manual for the product. GEEN-BS and GEEN-BSEPL students are not required to complete MCEN 4026.
Requisites: Requires prerequisite course of MCEN 4045 (minimum grade C-).
Additional Information: Departmental Category: Design

MCEN 4086 (1) Writing for Design Projects
Communicate professionally in writing to the technical and nontechnical audience. Develop skills to analyze rhetorical situations and compose documents, such as reports, technical manuals and user guides, that achieve a specific purpose and meet the needs of a particular audience. Writing with clarity, conciseness and correctness will be emphasized.
Requisites: Requires prerequisite or corequisite course of MCEN 4045 (minimum grade C-).
Additional Information: Departmental Category: Manufacturing and Systems

MCEN 4110 (3) Regenerative Biology and Tissue Repair
Presents the regenerative biology behind tissue systems, along with the regenerative medicine of that tissue with an emphasis on engineering principles, using the assigned reading as a guideline. Follows lectures with class discussions of current papers on the regenerative biology of the same tissue system. In the final 1 ¿ 2 classes assigned to this topic, individual graduate students give 20 min presentations on a relevant regenerative medicine/engineering-focused paper.
Equivalent - Duplicate Degree Credit Not Granted: BMEN 4110, BMEN 5110, and MCEN 5110
Requisites: Restricted to Mechanical Engineering (MCEN), Biomedical Engineering (BMEN), and Chemical Engineering (CHEN or BIEN) majors with 57+ credits only.

MCEN 4111 (3) Introduction to Microfluidics
Microfluidics deals with the behavior of fluids in small scale. It is a highly multidisciplinary field at the intersection of engineering, physics, chemistry, biology, medicine, nanotechnology, and biotechnology. This course covers the fundamentals and fabrication of microfluidic devices and their applications, particularly in lab-on-a-chip. Includes lectures, literature discussion, team presentations, and possibly one lab on microfluidic devices. Enhances your understanding of microfluidic technologies and their broad applications.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 5111 and BMEN 4111 and BMEN 5111
Requisites: Requires prerequisite course of MCEN 3021 or CHEN 3200 or CVEN 3313 (all minimum grade C-). Restricted to Mechanical Engineering majors only.

MCEN 4112 (3) Introduction to Nanoscale Transport
Introduces the basic concepts, theoretical methods, and experimental techniques related to nanoscience and nanoengineering that are ubiquitous in microelectronics, renewable energy technology, heat transfer, nano-optics, MEMS/NEMS, and emerging quantum technologies. Discusses microscopic pictures and theories of various energy transport and conversion phenomena and real-world examples and demonstrations.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 5112
Requisites: Requires prerequisite courses of PHYS 1110 and (APPM 2360 or MATH 3430) (all minimum C-). Restricted to Mechanical Engineering (MCEN) majors with 57+ credits only.

MCEN 4113 (3) Mechanics of Cancer
Cancer is considered to be an organ or an ecosystem, in which a critical component of the tumor microenvironment is mechanical forces. This course will cover the role of mechanics in cancer and cancer-related processes, with a focus on solid mechanics and fluid mechanics. In this course, you will apply engineering principles to come away with an appreciation of how mechanics influence cancer and its etiology as well as the development of future treatments.
Equivalent - Duplicate Degree Credit Not Granted: BMEN 4113 and MCEN 5113 and BMEN 5113
Requisites: Requires prerequisite course of MCEN 3021 or CHEN 3200 or CVEN 3313 or MCEN 2063 or CVEN 3161 (all minimum grade C-). Restricted to Mechanical and Biomedical Engineering majors with 57+ credits only.

MCEN 4114 (3) Automation of Industrial Processes
Introduces students to Programmable Logic Controller (PLC) architecture, ladder logic programming, and programming Human Machine Interfaces (HMI). Students learn how to automate manufacturing processes and applications of PID control.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 4114
Requisites: Prerequisite MCEN 3017 Circuits and Electronics for Mechanical Engineers.

MCEN 4115 (3-4) Mechatronics and Robotics I
Focuses on design and construction of microprocessor-controlled electro-mechanical systems. Lectures review critical circuit topics, introduce microprocessor architecture and programming, discuss sensor and actuator component selection, robotic systems and design strategies for complex, multi-system devices. Lab work reinforces lectures and allows hands-on experience with robotic design. Students must design and build an autonomous robotic device. Project expenses may be incurred ($50 maximum).
Equivalent - Duplicate Degree Credit Not Granted: MCEN 5115
Requisites: Requires prerequisite courses of (MCEN 3017 or ECEN 3010 or 2250 or GEEN 3010) and (MCEN 1030 or ECEN 1310 or CSCI 1300 or CSCI 1320 or ASEN 1320) (all min grade C-). Restricted to Mechanical Engineering majors only.
Additional Information: Departmental Category: Design

MCEN 4116 (3) Heating, Ventilation, and Air Conditioning Design
Analysis and design of buildings and their systems to satisfy the requirements for a comfortable and healthy indoor environment. Covers psychometrics, thermal comfort, building heating and cooling loads, fluid flow basics, and HVAC components and systems.
Requisites: Prerequisite: MCEN 3012 Thermodynamics.

MCEN 4117 (3) Anatomy and Physiology for Engineers
Explores human physiological function from an engineering, specifically mechanical engineering, viewpoint. Provides an introduction to human anatomy and physiology with a focus on learning fundamental concepts and applying engineering (mass transfer, fluid dynamics, mechanics, modeling) analysis.
Equivalent - Duplicate Degree Credit Not Granted: BMEN 4117 and BMEN 5117 MCEN 5117
Requisites: Restricted to Mechanical or Biomedical Engineering majors with 57+ credits only.
Additional Information: Departmental Category: Miscellaneous

MCEN 4118 (3) Mechanics of Snow
This course covers the composition, structure and mechanics of ice and snow, from plasticity of ice at the atomic scale, to snowflakes and snow metamorphism, to fracture mechanics and avalanches in large snow slabs. Experiments and models (micromechanics, fracture mechanics) applied to ice and snow are reviewed. Fundamental knowledge is applied to predicting the mechanical strength and reliability of different types of snow. Assessment is largely based on in-class activities, and on a final project.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 5118
Requisites: Requires prerequisite course of MCEN 2063 Mechanics of Solids, minimum grad C-. Restricted to Mechanical Engineering majors with 57+ credits only.

MCEN 4123 (3) Vibration Analysis
Highlights free and forced vibration of discrete and continuous systems. Examines Lagrange's equation, Fourier series, Laplace transforms, and matrix and computational methods. Applies knowledge to practical engineering problems.
Equivalent - Duplicate Degree Credit Not Granted: ASEN 4123
Requisites: Requires prerequisite course of (MCEN 3030 or APPM 4650 or APPM 4600 or CSCI 3656 or ASEN 3112) (minimum grade C). Restricted to Mechanical Engineering majors with 57+ credits only.
Additional Information: Departmental Category: Solids

MCEN 4124 (3) Mechanical Behavior of Materials
Addresses the relationship between material structure and the fundamental processes of deformation, yield, and fracture. Examines elements of elasticity theory, introduction to plasticity, and formulation of failure criteria. Studies basic deformation processes in terms of dislocation mechanics and macroscopic mechanical behavior. Takes into consideration the influence of compositional and processing strengthening mechanisms on mechanical properties.
Requisites: Requires prerequisite courses of (MCEN 2024 or GEEN 3024 or ASEN 1022) and (MCEN 2063 or CVEN 3161) (all minimum grade C). Restricted to Mechanical Engineering majors with 57+ credits only.
Additional Information: Departmental Category: Materials

MCEN 4125 (3) Optimal Design
Focuses on linear optimization and will introduce non-linear optimization. Formulating Engineering applications as optimization problems that can be solved using industry known solvers will be learned. Some of these applications will include minimum cost mechanical design, wind farm power maximization, minimum energy control, production control, and more. Previous programming experience required.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 5125
Requisites: Requires prerequisite course of (MCEN 3030 or APPM 4650 or APPM 4600 or CSCI 3656) (minimum grade C-). Restricted to Mechanical Engineering majors with 57+ credits only.
Additional Information: Departmental Category: Design

MCEN 4127 (3) Biomedical Ultrasound
Covers the design of ultrasound systems for medical imaging and therapy, including the physics of wave propagation, transducers, pulse-echo imaging, flow, tissue characterization, and microbubble contrast, with an emphasis on current topics in biomedical ultrasound. Includes lectures on theory, practice and special topics; a laboratory on wave propagation; oral presentations on current literature; signal processing exercises; and a team project. Some experience with MATLAB is strongly encouraged for exercises throughout the course.
Equivalent - Duplicate Degree Credit Not Granted: BMEN 4127 and BMEN 5127 and MCEN 5127
Requisites: Requires prerequisite course of ECEN 3300 or ECEN 3301 or MCEN 4043. Restricted to Mechanical Engineering (MCEN), Biomedical Engineering (BMEN), and Environmental Engineering (ECEN) majors with 57+ credits only.
Additional Information: Departmental Category: Miscellaneous

MCEN 4131 (3) Air Pollution Control Engineering
Introduces air quality regulations, meteorology and modeling. Examines methods for controlling major classes of air pollutants, including particulate matter and oxides of sulfur and nitrogen, as well as control technology for industrial sources and motor vehicles. Requires interdisciplinary design projects.
Equivalent - Duplicate Degree Credit Not Granted: EVEN 4131 and MCEN 5131 and EVEN 5131
Requisites: Requires prerequisite courses of (MCEN 3021 or CHEN 3200 or CVEN 3313) and (MCEN 3012 or GEEN 3852 or AREN 2110 or EVEN 3012) (all minimum grade C-). Restricted to Mechanical Engineering or Environmental Engineering majors with 57+ credits only.
Additional Information: Departmental Category: Fluids

MCEN 4133 (3) Intro to Tissue Biomechanics
Focuses on developing an understanding of the fundamental mechanical principles that govern the response of hard and soft biological tissue to mechanical loading. Specifically, covers mechanical behavior of biological materials/tissues, classical biomechanics problems in various tissues, the relationship between molecular, cellular and physiological processes and tissue biomechanics and critical analysis of related journal articles.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 5133 and BMEN 5133
Requisites: Requires prerequisite courses of (MCEN 2024 or GEEN 3024 or ASEN 1022 or BMEN 2010) and MCEN 2063 (both minimum grade C-). Restricted to MCEN and BMEN majors with 57+ credits.
Additional Information: Departmental Category: Materials

MCEN 4135 (3) Wind Energy and Wind Turbine Design
Focuses on understanding and applying principles related to current wind energy technologies. Students will apply technical coursework from throughout the engineering curriculum (environmental, fluids, statics, dynamics, power, economics, etc.) to the process of designing wind turbines and wind farms. Practical, real world examples will be integrated into the lessons and problems.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 5135
Requisites: Requires prerequisite courses of (MCEN 3021 or CHEN 3200 or CVEN 3313 or AREN 2120) and (MCEN 3017 or ECEN 3010 or GEEN 3010 or ECEN 2270 or AREN 3040) (all minimum grade C-). Restricted to Mech or Environmental Engineering majors with 57+ credits only.
Additional Information: Departmental Category: Design

MCEN 4137 (3) Anatomy and Physiology 2
Provides in-depth understandings of anatomy and physiology as well as introductions to transport phenomena, flow mechanics and solid mechanics in several organ systems: the cardiovascular, pulmonary, kidney, endocrine and digestive systems. Introduces artificial physiological systems to replace or assist physiological functions and introduce the concepts of physiological barriers that prevent diagnosis or effective therapeutics.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 5137
Requisites: Requires prerequisite course of MCEN 4117 (minimum grade C). Restricted to students with 57-180 credits (juniors/seniors).
Grading Basis: Letter Grade
Additional Information: Departmental Category: Miscellaneous

MCEN 4138 (3) Control Systems Analysis
Analysis and design of continuous time control systems using classical and state space methods. Laplace transforms, transfer functions and block diagrams. Stability, dynamic response, and steady-state analysis. Analysis and design of control systems using root locus and frequency response methods. Computer aided design and analysis. Department enforced prerequisite: background in Laplace transforms, linear algebra,and ordinary differential equations.
Equivalent - Duplicate Degree Credit Not Granted: ASEN 4114 and ASEN 5114 ECEN 5138 and ECEN 4138 and MCEN 5138
Requisites: Requires prerequisite of MCEN 4043 or ECEN 3300 (minimum grade C-). Restricted to students with 57+ credits (Senior, Fifth Year Senior) Mechanical Engineering majors only.

MCEN 4141 (3) Indoor Air Pollution
Describes the impact of indoor air pollutants on human health, including an introduction to key pollutants and their sources. Students will estimate emission factors, calculate generation/ventilation rates, quantify the impact of deposition and chemical reactions and explore relevant control technology. Current issues will also be addressed, including climate change, green building design, economic concerns and relevance to the developing world.
Equivalent - Duplicate Degree Credit Not Granted: EVEN 4141, MCEN 5141, and EVEN 5141
Requisites: Requires prerequisite courses of (MCEN 3022 or CHEN 3210) (minimum grade C-). Restricted to Mechanical and Environmental Engineering majors with 57+ credits only.
Additional Information: Departmental Category: Fluids

MCEN 4151 (3) Flow Visualization
Explores techniques for the visualization of the physics of fluid flows including seeding with dyes, particles and bubbles, and shadowgraphy and schlieren. Reviews optics and fluid physics, especially atmospheric clouds. Assignments are student-driven, to individuals and mixed teams of graduates, undergraduates, engineering majors and photography/video majors.
Equivalent - Duplicate Degree Credit Not Granted: ARTF 5200, MCEN 5151, ATLS 4151 and ATLS 5151
Requisites: Restricted to College of Engineering and Applied Science students with 57+ credits only.
Recommended: Prerequisite MCEN 3021.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Fluids

MCEN 4152 (3) Introduction to Combustion
Focuses on the mechanisms by which fuel and oxidizers are converted into combustion products. Application to practical combustion devices such as Otto, Diesel, gas turbine and power plant combustion systems. Consideration of combustion-generated air pollution, fire safety and combustion efficiency.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 5152
Requisites: Requires prerequisite course of MCEN 3012 (minimum grade C-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical Engineering majors only.
Recommended: Prerequisites MCEN 3021 and MCEN 3022.
Additional Information: Departmental Category: Thermal

MCEN 4154 (3) Biocolloids and Biomembranes
Covers the thermodynamics and mechanics of biological membranes and biomedical colloids. Considers intermolecular and surface forces, self-assembly and colloidal stability. Addresses structure-property relationships and design principles for biomedical applications. Focuses on monolayers, bilayers, micelles, filomicelles, liposomes, polymersomes, emulsions, microbubbles, polyplexes and polyelectrolyte multilayer capsules.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 5154
Requisites: Requires prerequisite courses of (APPM 2360 or MATH 3130 or MATH 3135 or APPM 3310) and (PHYS 1120 or PHYS 1125) (all minimum grade C). Restricted to Mechanical Engineering students with 57+ credits only
Additional Information: Departmental Category: Materials

MCEN 4155 (3) Automated Mechanical Design Synthesis
Introduces computational approaches to automatically generate complex multimaterial mechanical designs that satisfy predefined high-level specifications, discusses algorithms to solve design as a constrained non-convex multi-objective optimization problem. Topics: expert-driven design process; computational analysis tools based on mechanical simulation (finite element methods, mesh-free methods); topological optimization; compositional design; multi-objective optimization; evolutionary design; design for manufacturing with additives (FDM, SLA, Inkjet). Students design a part to specifications, fabricate using advanced (3D printing, laser cutting, CNC, etc) tools.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 5155
Requisites: Requires prerequisite course of MCEN 3030 or APPM 4650 or APPM 4600 or CSCI 3656 (all minimum grade C-). Restricted to Mechanical Engineering majors with 87+ credits only.
Recommended: Prerequisite students should be comfortable with MATLAB, PDEs, linear algebra, free body diagrams, mechanical modeling/design; exposure to finite-element modeling and state-space representations.

MCEN 4157 (3) Modeling of Human Movement
Human movement analysis is used in physical rehabilitation, sport training, human-robot interaction, animation, and more. Course provides a systematic overview of human movement on multiple levels of analysis, with an emphasis on the phenomenology amenable to computational modeling. Covers muscle physiology, movement-related brain areas, musculoskeletal mechanics, forward and inverse dynamics, optimal control and Bayesian inference, learning and adaptation. Inspires students to see and appreciate the complexities of movement control in all aspects of daily life.
Equivalent - Duplicate Degree Credit Not Granted: BMEN 4157 and MCEN 5157 and BMEN 5157
Requisites: Requires prerequisite of (MCEN2043 or GEEN 3024 or ASEN 1022) and (APPM2360 or MATH2130 or MATH3130) all minimum grade C-. Restricted to students with 57-180 credits (Jrs/Srs) Mechanical Engineering (MCEN) and Biomedical Engineering (BMEN) majors only.

MCEN 4162 (3) Energy Conversion
Examines common energy-conversion methods and devices. Topics include power-cycle thermodynamics, turbocompressor and expander processes, combustion systems, and applications and limitations of direct energy-conversion systems.
Requisites: Requires prerequisite course of (MCEN 3012 or GEEN 3852 or AREN 2110 or EVEN 3012 or CHEN 3320) (minimum grade C). Restricted to Mechanical Engineering majors with 57+ credits only.
Additional Information: Departmental Category: Thermal

MCEN 4171 (3) Biofluids on the Micro Scale
Introduces fundamental physical concepts and basic mechanisms of biological fluids in microscale. Elaborates on the application of fluid mechanics principles to major biological systems, including human organ systems and animal locomotion in microscale. Covers physiologically relevant fluid flow phenomena on the cellular level and the underlying physical mechanisms from an engineering perspective. Related state-of-art technologies such as organ-on-a-chip and micro/nano fabrication will be emphasized. Will enhance your understanding of organ-on-a-chip technologies and their broad applications.
Equivalent - Duplicate Degree Credit Not Granted: BMEN 4171 and MCEN 5171 and BMEN 5171
Requisites: Restricted to Mechanical Engineering and Biomedical Engineering majors with 57+ credits.
Recommended: Prerequisites MCEN 3021 or CHEN 3200 or CVEN 3313 or BMEN 3010.

MCEN 4173 (3) Finite Element Analysis
Introduces the theory behind and applications of the finite element method as a general and powerful tool to model a variety of phenomena in mechanical engineering. Applications include structural mechanics, mechanics of elastic continua and heat conduction.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 5173
Requisites: Requires prerequisite course of (MCEN 2063 or CVEN 3161) (minimum grade C-). Restricted to Mechanical Engineering majors with 57+ credits only.
Additional Information: Departmental Category: Solids

MCEN 4174 (3) Failure of Engineering Materials
Examines the fundamental concepts regarding the failure of engineering materials. Case studies are used to integrate a basic understanding of material failure mechanisms with analysis techniques and tools. Topics include the elastic properties (isotropic and anisotropic materials) and the origin of elastic behavior, viscoelasticity, plasticity (dislocation mechanisms, yielding criteria, strengthening mechanisms), creep, fracture and fatigue.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 5174
Requisites: Requires prerequisite courses of (MCEN 2024 or GEEN 3024 or ASEN 1022) and (MCEN 2063 or CVEN 3161) (all minimum grade C-). Restricted to Mechanical Engineering majors with 57+ credits only.
Additional Information: Departmental Category: Materials

MCEN 4183 (3) Mechanics of Composite Materials
Introduces various kinds of composite materials, composite fabrication techniques, the physical and mechanical behavior of composites, and analytical and experimental methodologies.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 5183
Requisites: Requires prerequisite courses of (MCEN 2024 or GEEN 3024 or ASEN 1022) and (MCEN 2063 or CVEN 3161) (all minimum grade C-). Restricted to Mechanical Engineering majors with 57+ credits only.
Additional Information: Departmental Category: Solids

MCEN 4193 (3) Design of Coffee
Serves as an introduction to how engineers use their disciplinary training to approach and solve problems outside of the traditional confines of their discipline, as illustrated by the roasting and brewing of coffee. In addition to focusing on the science, engineering and craftsmanship of making a cup of coffee from bean to cup, we will also study the global sourcing and sustainability aspects of coffee.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 5193
Requisites: Requires prerequisite course of MCEN 3022 and (MCEN 3021 or CHEN 3200 or CVEN 3313) (minimum grade C-). Restricted to Mechanical Engineering majors with 57+ credits only.
Recommended: Prerequisite MCEN 3047.

MCEN 4194 (3) Electrochemical Energy Conversion and Storage
Presents the fundamentals, principles and experimental techniques of electrochemistry, the background of ionic or electronic conduction of metal, semiconductor, inorganic and polymer materials and applications in the areas of batteries, fuel cells, electrochemical double layer capacitors, electrochemical photonics, sensors and semiconductor electrochemistry.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 5194
Requisites: Requires prereq course of (MCEN 2024 or GEEN 3024 or ASEN 1022) and coreq course of MCEN 3032 (all min grade C-). Restricted to Mechanical Engineering majors only.
Additional Information: Departmental Category: Materials

MCEN 4195 (3) Bioinspired Robotics
Bioinspired design views the process of how we learn from nature as an innovation strategy translating principles of function, performance, and aesthetics, from biology to human technology. The creative design process is driven by interdisciplinary exchange among engineering, biology, medicine, art, architecture and business. Diverse teams of students will collaborate on, create, and present original bioinspired design projects in the ITLL.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 5195, BMEN 5195 and BMEN 4195
Requisites: Requires prerequisite courses of MCEN 3017 and MCEN 3025 (minimum grade C-). Restricted to students with 57+ credits (Jrs/Srs) Mechanical Engineering (MCEN) majors only.

MCEN 4215 (3) Design for Inclusion
Examines the ways technologies like apps, products, public infrastructures and educational systems have excluded the needs of certain user groups while optimizing for others. Explores design approaches including universal design, humanitarian engineering, and culturally responsive design through multiple hands-on projects with the goal of equipping all to become more capable designers for inclusion rather than exclusion.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 5215
Requisites: Restricted to Mechanical Engineering majors with 87+ credits only.

MCEN 4225 (3) Product Development and Definition
Student teams work with project clients to provide a thorough solution to an overarching problem the client or market wants answered. Development focuses on advancing product development through an iterative prototyping and testing cycle. Includes design and development of rigorous product tests to collect critical data on performance criteria. Definition focuses on advancing CAD skills along with print production and definition using advanced GD&T. Skills are applied to the students¿ designed product and testing experiments.
Requisites: Corequisite of MCEN 3025.
Recommended: Prerequisites ENGR 161 and 162.

MCEN 4228 (1-4) Special Topics in Mechanical Engineering
Subject matter to be selected from topics of current interest.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 5228
Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to students with 57+ credits (Jrs/Srs) Mechanical Engineering (MCEN) majors only.
Additional Information: Departmental Category: Miscellaneous

MCEN 4231 (3) Computational Fluid Dynamics
This course is an in-depth introduction to the basic principles and applications of computational fluid dynamics (CFD). Students learn about fundamental CFD concepts such as discretization, meshing, error and accuracy; and focus on computational solutions of flow and transport problems using the finite element method. Students conduct multiple hands-on simulation-based activities and exercises on canonical and realistic engineering flow/transport problems. Final project for the course culminates in a mini-conference/symposium where students present their work.
Equivalent - Duplicate Degree Credit Not Granted: BMEN 4231 and MCEN 5231 and BMEN 5231
Requisites: Requires prerequisite courses of MCEN 3021 or CHEN 3200 or CVEN 3313 and MCEN 3030 or APPM 4650 or CSCI 3656 (all minimum grade C-). Restricted to Mechanical Engineering majors only.

MCEN 4238 (3) Design for Community
Design for Community (D4C) will provide engineering students with practical experience in consulting while offering valuable engineering services to University and industry clients. Focuses on preparing students for the practice of engineering by acting as a consultancy for clients' engineering-related design and fabrication needs. Students may be expected to work in teams or individually under the supervision of project directors, depending on project scope. Each student or team will assist several clients during the semester. The D4C will pursue the following goals for its students: provide a practical just-in-time learning experience for students interested in engineering consulting; prepare students for the practice of engineering design with underspecified real-world problem sets; prepare students for the professionalism needed to interact with clients; provide outreach that connects communities outside the Department of Mechanical Engineering and serves clients that would not have access to engineering
Requisites: Restricted to students with 57-180 credits (Jrs/Srs) Mechanical Engineering (MCEN) majors only.

MCEN 4279 (3) Aesthetics in Design
Focuses on aesthetic aspects of design via hands-on design-build experiences. Students individually create dynamic artifacts of their own choice with the assistance of teammates. Content includes major design movements since 1900, constructive critique practice, hand sketching techniques and other selected industrial design topics. Students publish their design work on an archival public blog which provides a professional portfolio element.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 4279 and MCEN 5279 and ATLS 5279
Requisites: Restricted to students with 57-180 credits (Jrs/Srs) Mechanical Engineering (MCEN) majors only.

MCEN 4291 (1-2) Project Based Learning in Rural Schools
Focuses on the use of low cost air quality monitoring tools, dubbed Pods, to implement PBL curriculum in high school environmental science classes in rural communities in Colorado. Each student will be paired with a high school class and will serve as curriculum and technology advisors as well as science experts. During the fall semester, students will be trained to effectively work in those roles and will also travel to their schools to be introduced. During the spring semester, students will support high school teachers in implementing an existing PBL air quality curriculum with the Pods. This will include monthly visits to schools in the spring and reporting back to the class. Enrollment during Fall is required for enrollment during Spring. Previously offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 5291
Repeatable: Repeatable for up to 4.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to students with 57+ credits (juniors and above) only.

MCEN 4292 (3) Materials and Devices in Medicine
The main objective of this multidisciplinary course is to provide students with a broad survey of biomaterials and their use in medical devices for restoring or replacing the functions of injured, diseased, or aged human tissues and organs. The topics to be covered include: evolution in the medical device industry, a broad introduction to the materials used in medicine and their chemical, physical, and biological properties, discovery of medical problems, potential impacts of treatment innovations, existing devices and design considerations for several major physiological systems (cardiovascular, neuromuscular, skeletal, pulmonary, renal, dermal), materials interaction with the human body, basic mechanisms of wound healing, biocompatibility issues, testing methods and techniques in accordance with standards and relevant regulations, biofunctionalities required for specific applications, as well as state-of-the-art approaches for the development of new regenerative materials targeting cellular mechanisms. Sam
Requisites: Requires prerequisite courses of MCEN 2024 and MCEN 4117 or MCEN 5117 (all minimum grade C-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical Engineering majors only.

MCEN 4293 (3) Mechanics of Soft Matter
Provides a general overview of fundamental concepts behind the mechanical behavior of soft matter. The term soft matter (which includes polymers, colloids, liquid crystals and surfactants, to name a few) is typically used to describe classes of materials whose structural unit is much larger than atoms, making their response more complex and often richer that of traditional solids. The objective of this class is to understand how chemical and mechanical forces between these small units yield macroscopic behaviors that one can observe in everyday life. Key engineering applications will also be discussed.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 5293
Requisites: Requires prerequisite course of MCEN 2063 or CVEN 3161 (minimum grade C). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical Engineering majors only.

MCEN 4298 (3) Introduction to Polymers
Polymers represent a major class of engineering materials that are used by mechanical engineers. In this class, we will discuss the most fundamental concepts regarding polymeric materials. Topics include synthesis/manufacturing and chemical properties of polymers, statistical properties of polymer chains, multiphase polymers including polymer solutions and polymer blends, crystallization and glass transition of polymers, and viscoelastic properties of polymers.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 5298
Requisites: Requires prerequisite course of MCEN 2024 (minimum grade C). Restricted to students with 57+ credits (Junior, Senior) Mechanical Engineering majors only.

MCEN 4299 (3) Household Energy Systems
Cooking, heating and lighting in the developing world often involves inefficient and incomplete combustion of solid or liquid fuels. The Global Burden of Disease Study in 2010, ranked this combustion as the 4th largest risk factor, causing 4 million premature deaths per year. There is a strong societal need to tackle this problem. Students leaving this course will be able to meet this need as they will have the skills to assess existing and new technology used in the developing world for cooking, heating and lighting. The course will cover (1) food conversion chemistry with the focus on increasing useable calories, (2) combustion and heat transfer as related to cooking, heating and lighting, and (3) combustion emissions and stove use assessment. There will be case studies interlaced throughout the content and the bulk of the workload will be homeworks and projects.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 5299
Requisites: Requires prerequisite or corequisite course of MCEN 3022 (minimum grade C). Restricted to students with 57+ credits (Junior, Senior) Mechanical Engineering or Environmental Engineering majors only.

MCEN 4638 (3) Control Systems Laboratory
Provides experience in control system design and analysis, using both real hardware and computer simulation. Covers the entire control system design cycle: modeling the system, synthesizing a controller, conducting simulations, analyzing the design to suggest modifications and improvements, and implementing the design for actual testing.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 5638, ECEN 4638, and MCEN 5638
Requisites: Requires prerequisite course of MCEN 4138 (minimum grade C-). Restricted to College of Engineering majors only.

MCEN 4700 (3) Quantum Forge I
Provides junior- and senior-level engineering and physical science students an opportunity to gain professional and technical quantum science skills and experience through participation in real-world projects in collaboration with industry leaders and academic investigators. Alongside project activity, students will engage in skill- and concept-focused modules to ensure proficiency in the skills necessary to participate in the quantum workforce. This capstone experience is intended for students who do not intend to continue on to graduate study in physics or engineering, but rather to enter the workforce directly.
Equivalent - Duplicate Degree Credit Not Granted: PHYS 4700
Requisites: Requires prerequisite course of PHYS 3330 (minimum grade C-).
Recommended: Prerequisite or corequisite PHYS 4410.

MCEN 4710 (3) Quantum Forge II
Continuation of PHYS 4700, Quantum Forge I. The Quantum Forge provides junior- and senior-level engineering and physical science students an opportunity to gain professional and technical quantum science skills and experience through participation in real-world projects in collaboration with industry leaders and academic investigators. In the second semester, students will expand upon the knowledge and skills gained through the first-semester to bring projects to a point of completion and readiness for deployment in the industry context. As with Quantum Forge I, this capstone experience is intended for students who do not intend to continue on to graduate study in physics or engineering, but rather to enter the workforce directly.
Equivalent - Duplicate Degree Credit Not Granted: PHYS 4710
Requisites: Requires prerequisite course of PHYS 4700 or MCEN 4700 (minimum grade C-).

MCEN 4848 (1-6) Independent Study
Subjects arranged in consultation with instructor and undergraduate advisor. Department consent required.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical Engineering majors only.
Additional Information: Departmental Category: Miscellaneous

Mechanical Engineering - Bachelor of Science (BSME)

Mechanical engineering is a broad engineering discipline that incorporates skills and expertise in the areas of design, manufacturing, mechanics and thermal sciences that are essential to most sectors of industry.

Program Educational Objectives

The Mechanical Engineering Program seeks to educate creative engineers who are prepared to contribute positively to society. Within three years of graduation, our alumni will:

- Build on the educational foundation gained through our program by establishing themselves in professional careers and/or pursuing a graduate degree.
- Apply their problem-solving, critical thinking, and communication skills to a professional field of practice within or beyond engineering.
- Exercise leadership, collaboration and communication in their careers.

Colorado Mesa University/University of Colorado Boulder Partnership Program

Colorado Mesa University (CMU) (http://www.coloradomesa.edu/engineering/) and CU Boulder have created a partnership to deliver specific engineering baccalaureate programs **in their entirety in Grand Junction**, Colorado. The first two years of coursework are taught by CMU faculty and the second two years of coursework are taught by CU Boulder faculty located in Grand Junction. Students completing the programs will be awarded a Bachelor of Science from CU Boulder.

Degrees are offered in civil engineering, electrical & computer engineering, and mechanical engineering, with additional details on the engineering partnership program website (https://www.coloradomesa.edu/engineering/partnership-program/).

Coursework requirements and plans of study specific to this partnership can be found on the Colorado Mesa University mechanical engineering partnership website (https://www.coloradomesa.edu/engineering/degrees/mechanical-engineering.html). Learn more about this program on the CU Boulder partnership website (https://www.colorado.edu/academics/cmu-cu-bs-mechanical-engineering/).

Western Colorado University/University of Colorado Boulder Partnership Program

Western Colorado University (Western) (https://western.edu/school/paul-m-rady-school-of-computer-science-engineering/) and CU Boulder have created a partnership to deliver specific engineering baccalaureate programs **in their entirety in Gunnison, Colorado.** The first two years of

coursework are taught by Western faculty and the second two years of coursework are taught by CU Boulder faculty located in Gunnison. Students completing the programs will be awarded a Bachelor of Science from CU Boulder.

Degrees are offered in biomedical engineering and mechanical engineering. Additional details can be found on the CU Boulder/Western Engineering Partnership Program website. (https://western.edu/school/paul-m-rady-school-of-computer-science-engineering/)

Coursework requirements and plans of study specific to this partnership can be found on the Western Colorado University mechanical engineering partnership website (https://western.edu/program/mechanical-engineering-university-colorado-partnership/). Learn more about this program on the CU Boulder partnership website (https://www.colorado.edu/academics/western-cu-boulder-bs-mechanical-engineering/).

Requirements

Program Requirements

In order to earn a bachelor's degree in mechanical engineering, students must complete the curriculum in the undergraduate major program, as outlined below. For up-to-date program requirements, visit the Bachelor of Science in Mechanical Engineering (https://www.colorado.edu/mechanical/academics/undergraduate-program/) (https://www.colorado.edu/mechanical/academics/undergraduate-program/curriculum/)webpage.

Required courses in engineering, physical science and mathematics are interwoven throughout the curriculum to provide a balanced education in the fundamentals of the mechanical engineering profession. The core courses are complemented by technical electives (https://www.colorado.edu/mechanical/academics/undergraduate-program/curriculum/general-technical-electives/), (http://www.colorado.edu/engineering/academics/policies/hss/)humanities and social sciences electives (https://www.colorado.edu/engineering-advising/get-your-degree/degree-requirements/humanities-social-sciences-and-writing-requirements/), free electives, and a writing course (https://www.colorado.edu/engineering-advising/get-your-degree/degree-requirements/humanities-social-sciences-and-writing-requirements/) for a total of 128 credits required for the degree.

Required Courses and Credits

Code	Title	Credit Hours
Required Courses		
MCEN 1025	Computer-Aided Design and Fabrication	4
MCEN 2000	Mechanical Engineering as a Profession	1
MCEN 2023	Statics and Structures	3
or GEEN 2851	Statics for Engineers	
or CVEN 2121	Analytical Mechanics 1	
or ASEN 2701	Introduction to Statics, Structures, and Materials	
or ASEN 2401	Statics	
MCEN 2024	Materials Science	3
or GEEN 3024	Materials Science for Engineers	
or ASEN 1022	Materials Science for Aerospace Engineers	
MCEN 2043	Dynamics	3
or CVEN 3111	Analytical Mechanics 2	
or PHYS 3210	Classical Mechanics and Mathematical Methods 2	
or ASEN 2703	Introduction to Dynamics and Systems	
or ASEN 2403	Dynamics	
MCEN 2063	Mechanics of Solids	3
or CVEN 3161	Mechanics of Materials 1	
or ASEN 3401	Aerospace Structures	
MCEN 3012	Thermodynamics	3
or GEEN 3852	Thermodynamics for Engineers	
or AREN 2110	Thermodynamics	
or EVEN 3012	Thermodynamics for Environmental Science and Engineering	
or ASEN 2402	Thermodynamics	
MCEN 3017	Circuits and Electronics for Mechanical Engineers	3
or ECEN 3010	Circuits and Electronics for Mechanical Engineers	
or GEEN 3010	Circuits for Engineers	
or ASEN 3503	Aerospace Electronics	
MCEN 3021	Fluid Mechanics	3
or CHEN 3200	Chemical Engineering Fluid Mechanics	
or CVEN 3313	Theoretical Fluid Mechanics	
or AREN 2120	Fluid Mechanics and Heat Transfer	
MCEN 3022	Heat Transfer	3
or CHEN 3210	Chemical Engineering Heat and Mass Transfer	
or ASEN 3402	Aerospace Heat Transfer	
MCEN 3025	Component Design	3
MCEN 3030	Computational Methods	3
or APPM 4600	Numerical Methods and Scientific Computing	
or CSCI 3656	Numerical Computation	
or ASEN 3502	Aerospace Computational Methods	
MCEN 3032	Thermodynamics 2	3
MCEN 3047	Data Analysis and Experimental Methods	4
or GEEN 3853	Data Analysis for Engineers	
MCEN 4026	Manufacturing Processes and Systems	3

Prerequisites and Passing Grades

The minimum passing grade for a course that is a prerequisite or corequisite for another required course is C-. If a grade of D+ or lower is received in a course which is a prerequisite to another, the student may not register for the subsequent course until the first grade has been raised to a C- or higher. If a grade of D+ or lower is received in a course which is a corequisite to another, the course must be repeated until a grade of C- or higher is achieved.

The minimum passing grade for a course that is not specifically a prerequisite or corequisite for another required course is D-.

The Mechanical Engineering Department reserves the right to drop students enrolled in MCEN courses who have not met the minimum prerequisite requirements. It is the student's responsibility to communicate with the department if summer coursework and/or transfer credit will be used to meet the prerequisite requirement.

Professional Exam

Completion of a professional exam is required for graduation. Most mechanical engineering students take the Fundamentals of Engineering (FE) Exam. The GRE, MCAT, LSAT and GMAT are also approved options. Students interested in completing an exam not on the approved list may submit a petition for consideration.

Senior Survey

Graduating students are also required to complete the Senior Survey, administered by the College of Engineering & Applied Science, in their final semester.

Sample Four-Year Plan of Study

Year One

Fall Semester		**Credit Hours**
APPM 1350	Calculus 1 for Engineers	4
MCEN 1030	Introduction to Engineering Computing	4
PHYS 1110	General Physics 1	4
GEEN 1400	Engineering Projects	3
COEN 1500	CEAS First Year Seminar	1
	Credit Hours	**16**
Spring Semester		
APPM 1360	Calculus 2 for Engineers	4
MCEN 1024	Chemistry for Energy and Materials Science	3
MCEN 1025	Computer-Aided Design and Fabrication	4
PHYS 1120	General Physics 2	4
PHYS 1140	Experimental Physics 1	1
	Credit Hours	**16**

Year Two

Fall Semester		
APPM 2350	Calculus 3 for Engineers	4

4. Refer to the course options listed on the ME Technical Electives (https://www.colorado.edu/mechanical/academics/undergraduate-program/curriculum/me-technical-electives/) webpage.

Learning Outcomes

By the completion of the program, students will be able to:

- Identify, formulate and solve complex engineering problems by applying principles of engineering, science and mathematics.
- Apply engineering design to produce solutions that meet specified needs with consideration of public health, safety and welfare, as well as global, cultural, social, environmental and economic factors.
- Communicate effectively with a range of audiences.
- Recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental and societal contexts.
- Function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks and meet objectives.
- Develop and conduct appropriate experimentation, analyze and interpret data and use engineering judgment to draw conclusions.
- Acquire and apply new knowledge as needed, using appropriate learning strategies.

Bachelor's–Accelerated Master's Degree Program(s)

The bachelor's–accelerated master's (BAM) degree program options offer currently enrolled CU Boulder undergraduate students the opportunity to receive a bachelor's and master's degree in a shorter period of time. Students receive the bachelor's degree first but begin taking graduate coursework as undergraduates (typically in their senior year).

Because some courses are allowed to double count for both the bachelor's and the master's degrees, students receive a master's degree in less time and at a lower cost than if they were to enroll in a stand-alone master's degree program after completion of their baccalaureate degree. In addition, staying at CU Boulder to pursue a bachelor's–accelerated master's program enables students to continue working with their established faculty mentors.

BS and MS in Mechanical Engineering

Admissions Requirements

In order to gain admission to the BAM program named above, a student must meet the following criteria:

- Have a cumulative GPA of 3.250 or higher
- Have completed a minimum of 60 credit hours of coursework
- Have completed at least four of the following six courses with a grade of C or higher: MCEN 3012, MCEN 3021, MCEN 3022, MCEN 3025, MCEN 3030 and MCE

Program Requirements

Students may take up to and including 12 hours while in the undergraduate program which can later be used toward the master's degree. However, only six credits may be double counted toward the bachelor's degree and the master's degree. Students must apply to graduate with the bachelor's degree, and apply to continue with the

master's degree, early in the semester in which the undergraduate requirements will be completed.

Students can refer to the Mechanical Engineering BAM degree program (https://www.colorado.edu/mechanical/academics/ms-programs/bachelors-accelerated-masters/) webpage for more information.

BS in Mechanical Engineering, Professional MS in Materials Science

Admissions Requirements

In order to gain admission to the BAM program named above, a student must meet the following criteria:

- Have a cumulative GPA of 3.25 or higher
  - Students with a GPA below 3.25 (but above 3.0, the university minimum standard) may submit a petition with a letter of recommendation from a professor and a one-page statement of purpose. The statement should briefly describe the student's past work in the field, including any non-course educational experiences or other relevant employment, and the student's plans for graduate study and a professional career.
- Have completed at least four of the following six courses with a grade of C or higher: MCEN 3012, MCEN 3021, MCEN 3022, MCEN 3025, MCEN 3030 and MCEN 3032

Program Requirements

Students must declare a track in which to specialize. Students may take up to and including 12 hours while in the undergraduate program that satisfy the specialized track courses and/or the breadth elective courses, which can later be used toward the master's degree. However, only six credit hours may be double counted toward the bachelor's degree and the master's degree. Students must apply to graduate with the bachelor's degree, and apply to continue with the master's degree, early in the semester in which the undergraduate requirements will be completed.

Students can refer to the Materials Science & Engineering Program BAM (https://www.colorado.edu/mse/academics/bachelors-accelerated-masters/) webpage for more information.

BS in Mechanical Engineering, Professional ME in Engineering Management

Admission Requirements

In order to gain admission to the BAM program named above, a student must meet the following criteria:

- Have a cumulative GPA of 3.000 or higher
- Have at least junior class standing

Program Requirements

Students may take up to and including 12 hours while in the undergraduate program which can later be used toward the master's degree. However, only six credits may be double counted toward the bachelor's degree and the master's degree. Students must apply to graduate with the bachelor's degree, and apply to continue with the master's degree, early in the semester in which the undergraduate requirements will be completed.

Students can refer to the Engineering Management BAM (https://www.colorado.edu/emp/graduate-programs/bachelors-accelerated-masters-bam/) webpage for more information.

Energy Engineering - Minor

The energy engineering minor provides energy-minded students with a foundational understanding of energy technologies and the energy industry, including technological, policy and economic considerations related to conventional and renewable energy systems.

Required courses include a fundamentals-based energy course, an energy policy/society focused course and 12 credits of energy-focused technical elective courses. Elective courses, selected from across the CU campus, allow students to specialize according to their specific interest in the energy field.

For more information, visit the Mechanical Engineering Department's Energy Engineering Minor (https://www.colorado.edu/mechanical/academics/undergraduate-program/energy-engineering-minor/) webpage.

Requirements

The energy engineering minor requires completion of a minimum of 18 credit hours.

A minor in energy engineering is open to undergraduate students rostered in the College of Engineering and Applied Science.

Grade Requirements

A minimum cumulative GPA of 2.000 is required in the courses used to satisfy the minor requirements. Each individual course that is counted toward this minor must be passed with a grade of D- or higher (note that a minimum grade of C- is required in all prerequisite courses).

Residency Requirements

At least 9 credit hours for the minor must be taken through CU Boulder.

Required Courses and Credits

Code	Title	Credit Hours
Fundamentals Course		**3**
Choose one of the following:		
AREN 3010	Energy Efficient Buildings	
CHEN 2120	Chemical Engineering Material and Energy Balances	
ECEN 3170	Electromagnetic Energy Conversion 1	
MCEN 3032	Thermodynamics 2	
Policy Course		**3**
Choose one of the following:		
MCEN 4032/5032	Sustainable Energy	
ENVS 3621	Energy Policy and Society	
ENVS 3070	Energy and the Environment	
Electives		**12**
Choose four of the following: [1,2]		
AREN 3040	Circuits for Architectural Engineers	
AREN 4010	Energy System Modeling and Control	
AREN 4890/5890	Sustainable Building Design	
ASEN 3402	Aerospace Heat Transfer	
ASEN 3503	Aerospace Electronics	
BIEN 4803	Metabolic Engineering	

CHEN 3210	Chemical Engineering Heat and Mass Transfer
CHEN 3660	Energy Fundamentals
CHEN 4480/5480	Solar Cells and Optical Devices for Sustainable Buildings
CHEN 4490/5490	Electrochemical Engineering
CHEN 4520	Chemical Process Design
CHEN 5360	Catalysis and Kinetics
CVEN 3246	Introduction to Construction
CVEN 3698	Engineering Geology
ECEN 2250	Introduction to Circuits and Electronics
ECEN 2410	Renewable Sources and Efficient Electrical Energy Systems
ECEN 4517	Power Electronics and Photovoltaic Power Systems Laboratory
ECEN 4555	Principles of Energy Systems and Devices
ECEN 4797	Introduction to Power Electronics
ECEN 5407	Renewable Energy and the Future Power Grid
EMEN 4100	Engineering Economics
ENEN 4321	Oil and Gas Processing
ENEN 4600	Interdisciplinary Energy Engineering Projects
ENEN 4840	Special Topics
GEEN 3010	Circuits for Engineers
GEOL 3010	Introduction to Mineralogy
GEOL 3020	Petrology
GEOL 3320	Introduction to Geochemistry
GEOL 3540	Introduction to Petroleum Geology
MCEN 3017	Circuits and Electronics for Mechanical Engineers
MCEN 3022	Heat Transfer
MCEN 4012/5012	Renewable Fuels, Fuel Cells and Internal Combustion Engines
MCEN 4135/5135	Wind Energy and Wind Turbine Design
MCEN 4152/5152	Introduction to Combustion
MCEN 4194/5194	Electrochemical Energy Conversion and Storage
Total Credit Hours	**18**

1 There may be special topics or other elective courses offered that are suitable for the requirements of this minor. For an up-to-date listing of elective courses, visit the Energy Engineering Minor Technical Electives (https://www.colorado.edu/mechanical/academics/undergraduate-program/energy-engineering-minor/energy-engineering-minor-technical/) webpage. Contact the energy engineering minor faculty director (https://www.colorado.edu/mechanical/academics/undergraduate-program/energy-engineering-minor/) for additional course considerations.

2 Additional courses completed from the Fundamentals and Policy course lists above also satisfy as electives for the energy engineering minor.

Exploratory Studies

The Program in Exploratory Studies (https://www.colorado.edu/exploratorystudies/) is an independent program under the Dean and Vice Provost for Undergraduate Education, serving first-year and transfer students who want to explore the many offerings at CU Boulder before deciding on a specific academic path. In addition, students who apply to a competitive-admission college or school may be offered admission to the program in exploratory studies, where they will work with advisors either to pursue that initial area of interest or identify related and complementary options on campus.

Students in the program eventually transfer to one of the seven degree-granting colleges, schools and programs on the Boulder campus. Advisors and coaches in the University Exploration & Advising Center (https://www.colorado.edu/exploratorystudies/advising/) work with students to develop academic pathways and explore related career options for more than 70 majors.

Admissions Requirements

Incoming First-Year and Transfer Applicants

Students applying to CU Boulder who are interested in exploring all academic options available on campus can select the program in exploratory studies as part of their application process.

Current Students and Intra-University Transfer

Current CU Boulder students interested in exploratory studies can join the program through the Intra-University Transfer (p. 1036) (IUT) process.

Guaranteed Admission

Undergraduate students enrolled on the Boulder campus with fewer than 30 credit-hours earned and who are in good academic standing may apply to transfer to the program in exploratory studies. Good academic standing includes students in their first semester on campus who have not yet earned a CU Boulder GPA and students who have completed at least one semester on campus and have earned a cumulative GPA of 2.000 or higher. Students who are ineligible for an IUT into Exploratory Studies are encouraged to attend select PES drop-in advising hours (https://www.colorado.edu/exploratorystudies/) for an exploratory conversation to discuss campus majors, minors and certificates.

Policies and Guidelines

Several policies and guidelines are of particular importance to students in the Program in Exploratory Studies. For details, visit the program's academic policies webpage (https://www.colorado.edu/exploratorystudies/policies-and-forms/).

Intra-University Transfer

Exploratory studies students work closely with academic advisors throughout their first two to four semesters to establish a degree plan and move into a degree-granting program. This is accomplished through the Intra-University Transfer (p. 1036) (IUT) process and generally takes place after the second or third semester. Requirements vary by college/school.

Recognition of Academic Achievement

Students in the program in exploratory studies are part of the intellectual community on the Boulder campus. The program holds academic rigor and quality in the highest esteem and encourages students to be curious

and ambitious. In recognition of high academic achievement, the Dean grants scholarly honors each term.

Students achieving a grade point average of 3.600 or higher in any given term are recognized by a letter from the Dean and receive a notation on their transcript. Honors are based on at least 12 credit-hours of coursework completed for a letter grade at CU Boulder. Once in a degree-granting program, students from the Program in Exploratory Studies are encouraged to pursue honors that are recognized by each college at commencement.

Credit Limitations and Guidelines

Declaration of Major

Exploratory studies students in good standing must IUT to a degree-granting program once they have completed four semesters of coursework. Students who have not met the requirements to IUT to a competitive program will work closely with advisors to identify programs for which they are eligible to apply.

Students who entered exploratory studies with 30 credit-hours or more as transfer students must IUT within three semesters.

Repetition of Courses

If a student takes a course for credit more than once, the course credit hours only count toward graduation once, unless a course description specifically states that it can be taken more than once for credit.

Students may also retake a course for grade replacement (p. 52) under the grade replacement policy. When a student retakes a course for grade replacement, the grade earned in the most recent prior attempt will still appear on the transcript, but their cumulative GPA and credit totals on the transcript will only include the grade from the latest attempt.

Consecutive Withdrawals

Students in the program in exploratory studies who withdraw from all of their registered courses two semesters in a row may have a hold placed on their account, prohibiting them from further registration until they meet with their advisor to assess degree progress.

GPA Requirements, Academic Alert, Academic Warning and Scholastic Suspension

Students who fail to meet the minimum cumulative grade point requirement of 2.00 may be permitted to continue their studies on a provisional basis. See the Program in Exploratory Studies policy page or the Academic Standards section (p. 28) of the catalog.

Students on Academic Alert or Academic Warning are encouraged to work with an academic advisor to develop an academic improvement plan.

Academic records of students are evaluated at the end of the probationary semester and students are notified of their academic status (e.g., alert, warning, suspension) through official CU email.

Focus on Exploration

The program in exploratory studies helps students explore their interests across all six colleges and schools on the Boulder campus. In addition to identifying a primary major of interest, exploratory studies encourages students to explore certificates and minors available on campus in order to create a well-rounded and personalized academic experience.

Pathways within Exploratory Studies

There are two plans of study within Exploratory Studies:

- Exploratory Studies (XXES)
- Pre-Business (PREB)

The pre-business program is by invitation only; students in PREB are advised by the Leeds School of Business.

Degree-Granting Options and Intra-University Transfer

The program in exploratory studies does not confer degrees. Therefore, students must transfer into a degree-granting program at CU Boulder via the Intra-University Transfer (IUT) process, generally after the second or third semester.

For more information, view the Intra-University Transfer (p. 1036) tab.

Courses

The Office of Undergraduate Education hosts several academic course offerings that are particularly appropriate for students in exploratory studies:

FYSM 1000 First Year Seminar (3) – Have you ever wondered about the origins of the universe? Or what exactly "fake news" means? Or wanted to write a fairy tale? First-Year Seminars tackle these and many other topics by approaching critical thinking and academic curriculum on a completely new level. We asked our inventive professors to develop courses that focus on unusual and thought-provoking topics (e.g., political dialogue, toxic chemicals, morality, and Batman), and then to structure the topics to meet our rigorous academic standards. The First-Year Seminar courses are small, interactive classes that are a great way to explore intriguing topics and establish connections with a faculty member and other students who share similar interests. Most First-Year Seminars are offered in the fall semester with several topics from which to choose.

FYXP 1000 Academic Exploration & Critical Decision Making (1) – Taught by advisors in the University Exploration & Advising Center (https://www.colorado.edu/exploratorystudies/advising-coaching/), the Academic Exploration Seminar is a one-credit course designed for first-year students in the Program in Exploratory Studies. Students will work through the major exploration process in a guided and intentional way and be introduced to a variety of college success strategies as they critically evaluate their strengths, interests, and goals. Students can expect to leave the course well-equipped to declare a major of interest in a timely fashion and to make a plan for supplementing their degree with opportunities for education abroad, undergraduate research or other co-curricular experiences that best match their interests, skills and abilities.

FYXP 1100 Academic Success Seminar (1) – The Academic Success Seminar is a one-credit course designed for students in the Program in Exploratory Studies and is taught by highly experienced academic advisors in the University Exploration & Advising Center (https://www.colorado.edu/exploratorystudies/advising-coaching/). In this seminar, students develop the skills needed to succeed in college. The class focuses on developing learning strategies, improving executive functioning (time management, organization, self-monitoring, etc.), and setting SMART goals. Students will identify their strengths and participate in peer-to-peer interaction to foster collaboration and positive outcomes.

FYXP 1500 **First Year Success Seminar (1)** - The First Year Success Seminar is designed to assist first-year students with their successful transition to the University of Colorado Boulder. This course is required of all new first-year students and provides a supportive environment for new students to engage with peers, staff, and faculty to support the first eight weeks of the transition to college.

FYXP 2200 **Design Thinking Seminar (1)** - The Design Thinking Seminar introduces students to the principles of the design thinking framework and its application toward solution development and personal brand building. This course is required of all students participating in the Design Your Path Living Learning Community (p. 1097) and provides a shared space for students to develop tools to craft their own path at CU and beyond.

FYXP 3000 **Transfer Success Seminar (1)** - The Transfer Success Seminar is designed to assist first-semester transfer students with their transition to the University of Colorado Boulder. Students learn about various campus and academic resources applicable to an upper-division student; evaluate their skills, interests, strengths and education as they relate to overall career goals; and establish an encouraging transfer student community.

General Education Requirements

Each college/school on the Boulder campus has a different set of general education requirements. Students in exploratory studies run degree audits (https://www.colorado.edu/registrar/students/degree-planning/audit/run/) by clicking on the "Select a Different Program" option and then running an audit from the degree program they select. Students with interests that span multiple colleges work closely with advisors in the University Exploration & Advising Center (https://www.colorado.edu/exploratorystudies/advising-coaching/) to select courses that meet requirements for multiple degree pathways.

Intra-University Transfer

Moving from the program in exploratory studies into one of the six degree-granting programs at CU Boulder generally requires completion of specific prerequisite coursework, attainment of a specific GPA and submission of IUT requirements (varies by college/school).

For more information about the IUT process, view the Intra-University Transfer (https://www.colorado.edu/office-undergraduate-education/intra-university-transfer/) webpage.

To filter through all of the majors, minors and certificates offered at CU Boulder, see the undergraduate Programs A-Z (https://catalog.colorado.edu/programs-a-z/#filter=filter_19&filter_20&filter_21) section, or search by the related college/school sections of the catalog:

- College of Arts & Sciences (p. 73): includes majors in the natural sciences, social sciences, and arts and humanities.
- Leeds School of Business (p. 663): includes areas of emphasis in accounting, finance, management and marketing.
- School of Education (p. 773): includes majors in elementary education or leadership & community engagement as well as teacher licensure at all levels.
- College of Engineering & Applied Science (p. 831): includes majors in various engineering fields, computer science, creative technology and design, and applied sciences.
- College of Communication, Media, Design and Information (https://catalog.colorado.edu/undergraduate/colleges-schools/media-communication-information/): includes majors in advertising, PR and media design, communication, critical media practices, information science, intermedia art, writing & performance, journalism and media studies.
- College of Music (p. 1038): includes majors in various areas of music education and performance.

Music

The CU Boulder College of Music inspires artistry and discovery, together.

The College of Music provides specialized training designed to prepare students for a variety of careers in music. The college offers seven undergraduate and graduate degrees in 24 fields of study, along with an array of interdisciplinary opportunities, including certificates in music technology and entrepreneurship.

Established by the Regents of the University of Colorado in 1920, the College of Music is a fully accredited member of the National Association of Schools of Music.

The widely varied functions of music in the world today present many challenging and interesting opportunities for teachers, performers, creative artists, technicians and commercial personnel. While these different pursuits require specialized emphases, the faculty of the College of Music recognize the musical and educational experiences that are common to all. Therefore, each curriculum of the College of Music is designed to present music as an integrated whole. Solo performance and technique, ensemble performance, historical and theoretical studies, concert and recital opportunities and elective courses both inside and outside the college are intended to give students a balanced approach to musical understanding and musicianship.

The college maintains a ratio of approximately one tenure-track faculty member for every eight students. This close interaction inspires and equips students to develop their talents, refine their passions and ultimately succeed in their professional endeavors.

In addition to training in the various professions of music, the college provides general music studies and activities for the non-major; broad cultural programs (concerts, recitals, lectures) for the university and Boulder communities; favorable conditions for research in music; and service activities to the state and nation.

The Bachelor of Arts in Music, Bachelor of Music and Bachelor of Music Education degrees are granted by the university, upon recommendation of the faculty of the College of Music, to those who have successfully completed prescribed requirements.

Students must complete an online graduation application and schedule a final checkout appointment by December 15 for May/August graduation and by October 1 for December graduation.

Entrepreneurship Center

The Entrepreneurship Center for Music (ECM) is a national leader in professional development for musicians. The ECM equips today's music students with the skills and tools they need to create sustainable careers in the arts. ECM students are encouraged to develop entrepreneurial skills to explore the vast opportunities inherent in a changing marketplace, and to develop plans to implement career-enhancing ventures across the artistic spectrum. Offerings include courses for credit, an undergraduate

certificate in music entrepreneurship, workshops and internships with a wide range of arts organizations and businesses nationwide.

Facilities

The College of Music has several beautiful performance halls, including the 2,000-seat Macky Auditorium, the 500-seat Grusin Music Hall, the 270-seat Music Theatre and the 111-seat Recital Hall. The college is located primarily in the Warner Imig Music Building, a large complex of practice rooms, faculty studios, offices, ensemble rehearsal areas, seminar facilities and classrooms. An addition to the east side of the building features a 4,300 square foot rehearsal space with a 35-foot ceiling and acoustical draping. Additional rehearsal and classroom facilities are located in Macky Auditorium.

The college's outstanding Howard B. Waltz Music Library is considered to be among the nation's most comprehensive. The library contains over 150,000 volumes, scores, recordings and periodicals. Computerized facilities are provided for listening to recordings and work stations are available for computer-based reference searching.

The college also features extensive facilities for music technology and electronic music study. The Computer-Assisted Music Laboratories (I and II) are multi-purpose labs designed primarily for classroom instruction. They feature numerous workstations, each with a Musical Instrument Digital Interface, sampling keyboard and a computer. The CRUNCH Lab is a fully-featured electronic music project studio. This lab is optimized for computer music research (including live interactive performance systems), as well as sound recording and editing projects and audio/video production. The Class Piano Laboratory is equipped with 12 digital pianos.

Performances

Each year the College of Music presents over 400 concerts by students, faculty and guests. In addition to individual musical pursuits, students at all levels have the opportunity to perform in a variety of outstanding ensembles including orchestras, choirs, bands, world music ensembles, chamber and early music groups, jazz ensembles and combos, opera productions and musicals. Many of these groups have been invited to perform at prestigious national and international events. Recitals by students and faculty are supplemented by visits from world-class guest artists, all of which provide the Boulder community with the chance to hear some of the finest music being performed today. The vast majority of these excellent performances are free and open to the public.

Other music programs presented by CU Presents include:

- Artist Series
- Eklund Opera Program
- Takács Quartet Series
- Holiday Festival

For a schedule of all College of Music performances, visit the college's Events (http://www.colorado.edu/music/events/) webpage.

Student Organizations

The student body of the College of Music has its own government, represented by the College of Music Student Government. Honorary music fraternities are Sigma Alpha Iota, Mu Phi Epsilon and Kappa Kappa Psi. Pi Kappa Lambda, a national music honor society, and the Music Teachers National Association both have active chapters within the College of Music. Music education majors are eligible for membership in student chapters of the National Association for Music Educators, the American Choral Directors Association and the American String Teachers Association. Additional organizations include CU Trombone Society, CU Trumpet Alliance and Diverse Musicians Alliance.

Additional organizations include CU Trombone Society, CU Trumpet Alliance and Diverse Musicians Alliance.

Major Fields & Degrees

Undergraduate degrees include the Bachelor of Music (BM), the Bachelor of Arts in Music (BA) and the Bachelor of Music Education (BME). Students may also elect to earn a certificate in music technology or music entrepreneurship in conjunction with their degree. In addition to a substantial core of studies in music, the BA in music program allows a wide choice of study in areas outside of music. BM areas of concentration include: composition, musicology, performance and jazz studies. The major emphasis areas in the BME program are: choral, choral-general, instrumental and instrumental-general.

Incoming freshmen and transfer students in the College of Music are declared as music majors at the beginning of their first semester. The music minor may be declared when an active student has a CU Boulder GPA (as early as second semester, freshman year).

Students may pursue double degrees in music and an outside field such as engineering, business, etc. Questions may be directed to the Academic Services office, College of Music, 303-492-0037, or ugradmus@colorado.edu.

Policies & Requirements

Academic Excellence

Honors at Graduation

Students achieving a cumulative GPA of 3.70–3.79 graduate with honors, 3.80–3.89 with high honors and 3.90–4.00 with highest honors. These students are recognized at commencement.

Scholarships and Awards

A number of scholarships and awards are designed specifically for students in the College of Music. Undergraduate music majors are eligible for scholarships or renewal of their scholarships as long as they make satisfactory degree progress by:

1. demonstrating adequate performance in weekly applied lessons, ensemble and scholarship auditions, applied proficiencies/juries, and recitals/previews;
2. maintaining at least a 3.0 cumulative grade point average in those classes that count toward the music degree; and
3. successfully completing at least two-thirds of the credit hours attempted while a music major at CU Boulder.

Academic Standards

Academic Ethics

Students are expected to conduct themselves in accordance with the highest standards of honesty and integrity. Cheating, plagiarism, illegitimate possession and disposition of examinations, alteration, forgery or falsification of official records, and similar acts or the attempt to engage in such acts are grounds for suspension or expulsion from the university.

In particular, students are advised that plagiarism consists of any act involving the offering of the work of someone else as their own. It is recommended that students consult with their instructors as to the proper preparation of reports, papers, etc., in order to avoid this and similar offenses. Students are expected to be acquainted with and abide by provisions of the CU Boulder Honor Code (see the Academic Integrity (p. 24) section).

Scholastic Requirements

To remain in good academic standing, a student must maintain at least a 2.00 cumulative grade point average (GPA) and make satisfactory progress toward the degree as defined by the College of Music and area faculty. Please refer to campus Academic Standing policies (p. 28) for details.

Undergraduate music majors are eligible for scholarships or renewal of their scholarships as long as they make satisfactory progress in their major (as determined by the faculty), demonstrate satisfactory proficiency in jury exams and auditions, enroll in ensemble and maintain a minimum cumulative GPA of 3.00. Students who have a cumulative GPA below 3.00 will be placed on scholarship probation for one semester. Students on scholarship probation who do not earn a cumulative GPA of 3.00 or higher by the end of the probationary period will have their scholarships revoked. A maximum of two semesters may be granted with approval from the Associate Dean for Undergraduate Studies.

Appeals

Students have the right to appeal decisions of academic dishonesty and to petition for exceptions to the academic policies stated in this catalog. Appeals should be directed to the Associate Dean for Undergraduate Studies. College of Music policies are in addition to the campus policies.

Credit and Enrollment

Admission Requirements

In addition to the entrance requirements of the university outlined in Undergraduate Admission in the General Information section, freshman and transfer students must meet College of Music entrance requirements. Successful College of Music applicants have extensive prior experience in music (including private study), the ability to read and sight-read music notation, an understanding of music fundamentals or basic music theory and elementary piano skills. Students with appropriate skill in piano sight reading and keyboard harmony may be able to test out of all or part of the keyboard musicianship requirement included in their degree plan. Students with an AP Music Theory test score of 4 are credited with one semester of music theory and aural skills, and those with a test score of 5 are credited with two semesters.

Auditions

An audition is required for all prospective undergraduate music majors. Undergraduate auditions are held in Boulder on selected Saturdays in February. Alternate audition dates may also be scheduled if necessary. If travel distance is prohibitive, prospective students may substitute a high-quality recording. Applicants should identify themselves by name and list selections and titles at the beginning of the recording. In order for students to be fully considered for financial assistance, live auditions should be completed during the general audition weekends in February or recordings should be received by Feb. 15. Students should prepare a 10–20 minute audition program in accordance with the audition requirements listed on the college's Auditions (http://www.colorado.edu/music/admissions/prospective-undergraduates/auditions/) webpage.

Contact the undergraduate office at 303-492-8468 or undergraduate.music@colorado.edu for more information.

Admissions decisions for music composition applicants are based on a review of scores and sound recordings for at least three contrasting works. If the portfolio of scores and recordings is considered acceptable for admission to the music composition program, applicants are then invited to schedule an instrumental/voice audition.

Admissions decisions for music education applicants are based on academic qualifications, audition results and an interview conducted by two or more music education faculty members. Interviews address written and verbal communication skills, motivation and goals related to music teaching, prior music teaching experiences and affective characteristics associated with effective music teachers. For more information about music education interviews, visit the college's Music Education (http://www.colorado.edu/music/departments/music-education/) webpage and contact the music education chair.

Transfer Students

Transfer students from within the university and from other universities must meet the general requirements of the university and the specific requirements of the College of Music, including the audition. A minimum GPA of 2.0 for students transferring from within the university and 2.75 for students transferring from other universities is required. See the undergraduate Admissions (p. 29) section for specific requirements.

Attendance Requirements

Successful work in the College of Music is dependent on regular attendance in all classes. At the beginning of each semester, instructors will inform students of policies governing grading and attendance in each class. Students are expected to attend classes and comply with the attendance requirements specified by their instructors. For ensembles and other performance classes, attendance at dress rehearsals, major concerts and other approved/sanctioned performances, as listed in the course syllabus, also is required.

Ensembles

All undergraduate students enrolled in applied music must participate in a university ensemble appropriate to and required by their degree program. Voice performance majors are not required to be in ensembles during the semester of their senior recital, and bachelor of music education students are exempt from ensemble participation during the student teaching semester. Any student who studies applied music beyond degree requirements must participate concurrently in a university ensemble. Double majors need be in only one ensemble at a time.

Sophomore Proficiency

Students must pass a variety of jury tests and proficiency exams during their degree work. Each applied area has different requirements, so students need to consult the chair of their area and/or studio professor. However, all students must pass a sophomore proficiency exam. Students who cannot pass this exam receive an incomplete grade and cannot progress to the junior level of applied study until the proficiency is achieved. Studio professors provide students with proficiency and repertoire requirements.

Course Load

The normal academic load for an undergraduate student in the College of Music is 15–17 credit hours. Schedules of fewer than 12 or more than 19

credit hours must have approval of the associate dean for undergraduate studies of the College of Music.

Dropping a Course

Students should adhere to the deadlines posted on the Office of the Registrar website for dropping a course each semester. After a certain date each semester, a special action form signed by the instructor and associate dean for undergraduate studies is required to drop a course.

Pass/Fail Option

The pass/fail option for 12 credit hours is open only to Bachelor of Music and Bachelor of Arts in Music students. Music education students may only use the pass/fail option for student teaching. Pass/fail credit hours are to be selected from non-music courses and are in addition to those that may be taken in honors. Courses so elected are taken according to the pass/fail policies of the college or school concerned.

Pass/fail credit hours that transfer students can apply toward degree requirements from departments within the university are limited to 1 in every 8 credit hours earned in the College of Music.

Residence Requirement

Of the credit hours required for an undergraduate degree, the last 56 credit hours must be completed in residence in the College of Music. This may be reduced by the associate dean for undergraduate studies for excellent work done in this university and for high scholarship exhibited at previous institutions attended. In no case shall the minimum be fewer than 40 credit hours distributed over three semesters. At least 9 credit hours in applied music (private instruction) must be earned in this college for the degrees bachelor of music and bachelor of music education, and 6 credit hours for the bachelor of arts in music.

Student Recital Recordings

Any recital required for graduation is recorded. Arrangements are to be made through the College of Music Operations Office, and a recording fee is charged. The original recording is placed in the Music Library.

Programs of Study

Music

Undergraduate degrees include the Bachelor of Music (BMus) and the Bachelor of Arts in music (BAMus). Students may also elect to earn a certificate in music entrepreneurship, music technology or music theory in conjunction with their degree.

In addition to a substantial core of studies in music, the BAMus program allows a wide choice of study in areas outside of music.

BMus areas of concentration include: composition, musicology, performance and jazz studies.

Bachelor's Degrees

- Music - Bachelor of Music (BMus) (p. 1055)
- Music - Bachelor of Arts in Music (BAMus) (p. 1052)

Minor

- Music - Minor (p. 1067)

Certificates

- Music Entrepreneurship - Certificate (p. 1067)
- Music Technology - Certificate (p. 1068)
- Music Theory - Certificate (p. 1069)
- Singing Health Specialist - Certificate (p. 1069)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Associate Professor; BA, Guildhall School of Music, London (England)

Chang, Philip C. (https://experts.colorado.edu/display/fisid_143541/)
Senior Instructor; PhD, University of Rochester

Chellis, Matthew Wren (https://experts.colorado.edu/display/fisid_154415/)
Associate Professor; MM, Manhattan School of Music

Conlon, Joan Catoni
Professor Emerita

Cooper, Peter W. (https://experts.colorado.edu/display/fisid_134522/)
Senior Instructor; BM, Northwestern University

Cooperstock, Andrew B. (https://experts.colorado.edu/display/fisid_115393/)
Professor; DMA, Peabody Institute of Johns Hopkins University

Cremaschi, Alejandro M. (https://experts.colorado.edu/display/fisid_134168/)
Professor; DMA, University of Minnesota Twin Cities

Davis, John S. (https://experts.colorado.edu/display/fisid_115443/)
Professor, Dean; DMA, University of Northern Colorado

Dockendorf, Matthew Paul (https://experts.colorado.edu/display/fisid_154511/)
Assistant Professor, Faculty Director; DMA, Michigan State University

Drumheller, John E. (https://experts.colorado.edu/display/fisid_103707/)
Senior Instructor; DMA, University of Colorado Boulder

Dunn, James M. (https://experts.colorado.edu/display/fisid_140593/)
Associate Professor; MM, Arizona State University

Dusinberre, Edward (https://experts.colorado.edu/display/fisid_101358/)
Faculty Fellow, Artist in Residence; Diploma, The Juilliard School

Eakin, Charles
Professor Emeritus

Eckert, Erika L. (https://experts.colorado.edu/display/fisid_101844/)
Associate Professor; BM, University of Rochester

Ellsworth, Oliver
Professor Emeritus

Erhard, Paul M. (https://experts.colorado.edu/display/fisid_100493/)
Professor; DMA, The Juilliard School

Farr, Elizabeth G. (https://experts.colorado.edu/display/fisid_101732/)
Professor Emerita; DMA, University of Michigan Ann Arbor

Fejer, Andras (https://experts.colorado.edu/display/fisid_103923/)
Faculty Fellow, Artist in Residence; Diploma, Franz Liszt Academy of Music

Fink, Robert
Professor Emeritus

Galm, John
Professor Emeritus

Gardner, Ryan (https://experts.colorado.edu/individual/fisid_165331/)
Associate Professor; DMA, Manhattan School of Music

Garland, Andrew B (https://experts.colorado.edu/display/fisid_159725/)
Assistant Professor; MM, University of Cincinnati

Gentry, Gregory R.
Associate Professor, Faculty Director, Faculty Fellow; DMA, University of Missouri–Kansas City

Goode, Bradley M. (https://experts.colorado.edu/display/fisid_134686/)
Associate Professor; MM, DePaul University

Graham, Larry
Professor Emeritus

Gunther, John G. (https://experts.colorado.edu/display/fisid_141165/)
Professor, Faculty Director; PhD, New York University

Hata, Kuniaki
Professor Emeritus

Hayes, Deborah
Professor Emerita

Hayghe, Jennifer C. (https://experts.colorado.edu/display/fisid_155969/)
Associate Professor; DMA, The Juilliard School

Heil, Leila (https://experts.colorado.edu/display/fisid_149780/)
Associate Professor; PhD, University of Colorado Boulder

Hill, Robert Stephen (https://experts.colorado.edu/display/fisid_163943/)
Professor, Endowed Chair; PhD, Harvard University

Holman-Johnson, Leigh (https://experts.colorado.edu/display/fisid_141980/)
Associate Professor; DMA, University of Colorado Boulder

Ishikawa, Yoshiyuki (https://experts.colorado.edu/display/fisid_102125/)
Professor; DMA, University of Michigan Ann Arbor

Jackson, Dennis
Professor Emeritus

Jenkins, Jeff (https://experts.colorado.edu/individual/fisid_146511/)
Instructor; Studied, Univeristy of North Texas

Jennings, Christina A. (https://experts.colorado.edu/display/fisid_143545/)
Professor; MM, The Juilliard School

Kearns, William
Professor Emeritus

Keister, Jay (https://experts.colorado.edu/display/fisid_115734/)
Associate Professor; PhD, University of California, Los Angeles

Kim, Suyeon (https://experts.colorado.edu/display/fisid_153470/)
Instructor; DMA, University of Texas at Austin

Korevaar, David J. (https://experts.colorado.edu/display/fisid_118374/)
Distinguished Professor, Faculty Fellow; DMA, The Juilliard School

Lehnert, Doris Pridonoff
Professor Emerita

Lehnert, Oswald
Professor Emeritus

Leong, Daphne (https://experts.colorado.edu/display/fisid_115747/)
Professor; PhD, University of Rochester

Lewis, Gary J. (https://experts.colorado.edu/display/fisid_145854/)
Professor, Endowed Chair; MM, Texas Tech University

Lin, Hsiao-Ling (https://experts.colorado.edu/display/fisid_149958/)
Instructor; DMA, Northwestern University

Malin, Jonathan (https://experts.colorado.edu/display/fisid_151714/)
Associate Professor; PhD, University of Chicago

Maloy, Rebecca (https://experts.colorado.edu/display/fisid_125582/)
Professor, Faculty Fellow, Endowed/Named Professor; PhD, University of Cincinnati

Mason, Patrick C. (https://experts.colorado.edu/display/fisid_101840/)
Professor Emeritus; MM, University of Nebraska-Lincoln

McCarthy, Kevin
Professor Emeritus

McDonald, Margaret M. (https://experts.colorado.edu/display/fisid_134703/)
Associate Professor; DMA, University of California, Santa Barbara

McKee, Paul (https://experts.colorado.edu/display/fisid_154465/)
Associate Professor; MM, University of Texas at Austin

McKinney, Donald J.
Professor, Faculty Director; DMA, University of Michigan Ann Arbor

McMurray, Allan
Professor Emeritus

Meneghini-Stalker, Tamara L. (https://experts.colorado.edu/display/fisid_146090/)
Associate Professor; MFA, Northern Illinois University

Miranda, Martina L. (https://experts.colorado.edu/display/fisid_140091/)
Associate Professor; DMA, Arizona State University; PhD, Arizona State University

Moteki, Mutsumi (https://experts.colorado.edu/display/fisid_100992/)
Professor, Faculty Fellow; DMA, University of Michigan Ann Arbor

Myer, Tom R. (https://experts.colorado.edu/display/fisid_100922/)
Associate Professor; MM, East Texas State University

Nguyen, Alexandra (https://experts.colorado.edu/display/fisid_145847/)
Associate Professor; DMA, University of Rochester

Nims, Abigail Andrews (https://experts.colorado.edu/display/fisid_152977/)
Associate Professor; MM, Westminster Choir College

Nytch, Jeffrey C. (https://experts.colorado.edu/display/fisid_147341/)
Associate Professor, Faculty Director; DMA, Rice University

Okigbo, Austin Chinagorom (https://experts.colorado.edu/display/fisid_151507/)
Associate Professor; PhD, Indiana University Bloomington

Pann, Carter N. (https://experts.colorado.edu/display/fisid_141461/)
Professor, Faculty Fellow; DMA, University of Michigan Ann Arbor

Peterson, Patti H.
Professor Emerita

Pinkow, David
Professor Emeritus

Reger, Jeremy J. (https://experts.colorado.edu/display/fisid_156224/)
Assistant Professor, Faculty Director; DMA, University of Michigan Ann Arbor

Requiro, David (https://experts.colorado.edu/display/fisid_155785/)
Assistant Professor; MM, University of Michigan Ann Arbor

Rhodes, Harumi B. (https://experts.colorado.edu/display/fisid_155971/)
Associate Professor, Faculty Fellow, Artist in Residence; MM, New England Conservatory of Music

Riis, Thomas L.
Professor Emeritus

Roeder, Matthew J. (https://experts.colorado.edu/display/fisid_120180/)
Associate Professor, Associate Dean; DMA, University of Colorado Boulder

Romero, Brenda M. (https://experts.colorado.edu/display/fisid_106117/)
Professor Emerita; PhD, University of California-Los Angeles

Sable, Barbara Kinsey
Professor Emeritus

Sampsel, Laurie (https://experts.colorado.edu/display/fisid_101802/)
Professor; PhD, University of Pittsburgh

Sawchuk, Terry M.
Associate Professor Emeritus; MM, University of Michigan Ann Arbor

Schranz, Karoly
Senior Instructor; Diploma, Franz Liszt Academy of Music

Schut, Joel
Instructor; DMA, Michigan State University

Scott, F. Wayne
Professor Emeritus

Seesholtz, John (https://experts.colorado.edu/display/fisid_163908/)
Associate Professor, Faculty Director; DMA, University of North Texas

Shay, Robert S. (https://experts.colorado.edu/display/fisid_154671/)
Dean, Professor; PhD, University of North Carolina Chapel Hill

Sher, Daniel (https://experts.colorado.edu/individual/fisid_100194/)
Professor, Dean Emeritus; EdD, Columbia University

Silver, Daniel S. (https://experts.colorado.edu/display/fisid_115564/)
Professor; MM, University of Michigan Ann Arbor

Sim, Claude
Assistant Professor; BM, Oberlin Conservatory

Smith, Jeremy L. (https://experts.colorado.edu/display/fisid_118265/)
Professor; PhD, University of California, Santa Barbara

Spera, Nicolo Ruggero Ferruccio (https://experts.colorado.edu/display/fisid_148406/)
Associate Professor; DMA, University of Colorado Boulder

Spillman, Robert
Professor Emeritus

Stanley, William J. (https://experts.colorado.edu/display/fisid_103616/)
Associate Professor; DMA, University of Illinois at Urbana–Champaign

Steinmetz, Branden (https://experts.colorado.edu/display/fisid_165415/)
Instructor, Faculty Director; DMA, Michigan State University

Swadener, Marc
Professor Emeritus

Swanson, Elizabeth (https://experts.colorado.edu/display/fisid_159726/)
Assistant Professor, Faculty Director; DMA, Northwestern University

Teitelbaum, Benjamin Raphael (https://experts.colorado.edu/display/fisid_151338/)
Associate Professor; PhD, Brown University

Theodore, Michael (https://experts.colorado.edu/display/fisid_113318/)
Associate Professor; PhD, University of California, San Diego

Thomas, Susan
Professor, Faculty Director; PhD, Brandeis University

Thornton, Michael Robert (https://experts.colorado.edu/display/fisid_116318/)
Professor; BM, Temple University

Walter, Douglas W. (https://experts.colorado.edu/display/fisid_101811/)
Professor; DMA, Temple University

Waters, Keith John (https://experts.colorado.edu/display/fisid_107518/)
Professor; PhD, University of Rochester

Weiss, Meta (https://experts.colorado.edu/display/fisid_164484/)
Senior Instructor; DMA, The Juilliard School

Wetherbee, Charles Tyler
Associate Professor; BM, Curtis Institute of Music

Wolzien, Charles
Professor Emeritus

Courses

MUSC 1051 (2) Basics of Songwriting
Introduces students to the art and craft of songwriting. Activities center on creative self-expression through song, developing the fundamental tools and components of songwriting, both conventional and unconventional song forms, developing a personal musical style, developing critical listening/writing/thinking skills, performance, and the study of songs past and present. Examination of melody, harmony, rhythm, lyric writing, style and ensemble presentation.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

MUSC 1081 (3) Intensive Music Theory
Introduces diatonic harmony and voice leading with intensive work on fundamentals (keys, intervals, triads, seventh chords and four-voice writing). The study of theoretical concepts is closely coordinated with aural skills. Feeds into the intensive section of MUSC 1111. Offered fall only.
Requisites: Requires corequisite course of MUSC 1121. Restricted to College of Music (MUSCU) majors or graduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 1101 (2) Semester 1 Theory
Introduces the fundamentals of diatonic harmony and voice leading, focusing on model composition (including one-, two- and four-voice writing) and analysis of excerpts from music literature. Offered fall only.
Requisites: Restricted to College of Music (MUSC) majors or graduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 1103 (1) Becoming a Music Teacher
Provides an introduction to basic principles and practices of the music education profession. Explores contexts and methods of public school music teaching through class discussions, practice teaching and directed observations. Offered fall only.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Grading Basis: Letter Grade

MUSC 1111 (2) Semester 2 Theory
Continuation of MUSC 1101. Explores principles of harmony, voice leading and form. Continues emphasis on both model composition and analysis. Introduces chromatic elements (such as applied dominants and modulation), harmonic syntax and structural analysis of excerpts from music literature. Offered spring only.
Requisites: Requires prerequisite course of MUSC 1101 or MUSC 1081 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 1121 (1) Aural Skills Lab, Semester 1
Focuses on sight singing, rhythm and dictation of diatonic melodies in major and minor keys (treble, alto and bass clefs). Covers identification of scale types, intervals, triads and dominant seventh chords. Includes individual and group improvisation. Offered fall only.
Requisites: Restricted to College of Music (MUSC) majors or graduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 1131 (1) Aural Skills Lab, Semester 2
Continuation of MUSC 1121. Focuses on sight singing, rhythm and dictation of diatonic melodies; adds chromatic elements, more complex rhythms and two-part dictation. Includes harmonic dictation using vocabulary from MUSC 1111. Includes individual and group improvisation within harmonic contexts. Offered spring only.
Requisites: Requires prerequisite course of MUSC 1121 (minimum grade D-). Restricted to College of Music undergraduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 1325 (1) Piano Sight Reading
Studies techniques for improving sight-reading skills at the keyboard, with practical work in solo, ensemble and choral literature. Also covers score reading and transposition. Restricted to piano majors or instructor consent required. Offered fall only.
Requisites: Restricted to College of Music (MUSC) majors or graduate students only.
Additional Information: Departmental Category: Keyboard

MUSC 1326 (2) Guitar Musicianship and Accompanying
Survey of accompanying repertoire for guitar with solo instruments (flute, violin, voice, etc.), including introductory work in basso continuo. Activities in sight-reading, fretboard harmony and comprehension of harmony and texture. Some work will be tied to the repertoire being studied in studio lessons. Open only to guitar performance majors.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Choral and Instrumental Music

MUSC 1544 (1) Italian Diction
Designed for the understanding of lyric Italian diction, the international phonetic alphabet, and its application to classical singing. Required for freshmen BM voice majors. Offered fall only.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Voice

MUSC 1554 (1) English Diction
Designed for the understanding of lyric English diction, the international phonetic alphabet, and its application to classical singing as well as various musical styles of English classical voice literature. Required for Freshmen BM voice majors.
Requisites: Requires prerequisite course of MUSC 1544 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Voice

MUSC 1802 (3) Introduction to Musical Styles and Ideas
Introduces the study of musical traditions of the world; equips students with requisite skills for understanding and analyzing music as an art in historical and cultural contexts using an integrative approach that includes selected styles and genres, critical reading and writing skills and mastery of conceptual issues related to the discipline of music. Satisfies the World Music requirement for undergraduate students in the College of Music.
Requisites: Restricted to College of Music (MUSC) majors or graduate students only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Musicology

MUSC 2041 (1) Applications of Music Technology (5-week segment)
Explores the use of technology, software, applications, and tools in a variety of creative, performance, pedagogical, and entrepreneurial contexts. Addresses the opportunities and challenges posed by evolving technologies. Emphasizes project-oriented learning.
Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Grading Basis: Letter Grade

MUSC 2061 (3) Introduction to Music Technology
Surveys the various tools and techniques in the field of music technology. Topics include an introduction to basic synthesis, digital signal processing, MIDI and audio sequencing, music notation and a historical perspective on electronic music.
Equivalent - Duplicate Degree Credit Not Granted: MUEL 2061
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 2081 (2) Prepared for the Soundcheck
Provides an overview of the recording process from the performer's perspective from soundcheck through final mastering. Uses recorded material from in-class sessions. Examines differing approaches to recording as well as current technologies.
Equivalent - Duplicate Degree Credit Not Granted: CMDP 2860
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 2091 (2) Recording Techniques
Provides hands-on training in various audio recording techniques, acoustics and sound reinforcement, studio maintenance and troubleshooting. Real-world experience is gained through individual recording projects and College of Music events.
Requisites: Requires prerequisite course of MUSC 2081 or MUEL 2071 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 2101 (2) Semester 3 Theory
Continuation of MUSC 1111. Reviews harmonic and formal concepts from MUSC 1111. Introduces advanced chromatic concepts such as modal mixture, seventh chords with added dissonance, Neapolitan sixth chord and augmented-sixth chords. Explores in-depth structural analysis of musical works. Offered fall only.
Requisites: Requires prerequisite course of MUSC 1111 (minimum grade D-). Restricted to College of Music (MUSC) majors or graduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 2103 (2) Introduction to Music Education
Introduces students to the broad range of skills and responsibilities inherent to the music education profession. Explores current topics in public school music teaching while developing teaching skills through supervised field experience. Offered fall only.
Requisites: Requires a prerequisite course of MUSC 1103 (minimum grade C-). Restricted to College of Music (MUSC) undergraduate students only.
Additional Information: Departmental Category: Music Education

MUSC 2111 (2) Semester 4 Theory
Continuation of MUSC 2101. Builds on and synthesizes harmonic, melodic and formal concepts from semesters 1-3. Includes writing about musical structure and analyzing relationships of musical structure to extramusical elements (such as text, performance technique, dance, staging, etc.). Introduces 20th century compositional techniques. Offered spring only.
Requisites: Requires prerequisite course of MUSC 2101 (minimum grade D-). Restricted to College of Music (MUSC) majors only.
Additional Information: Departmental Category: Theory and Composition

MUSC 2121 (1) Aural Skills Lab, Semester 3
Continuation of MUSC 1131. Applies concepts from MUSC 2101 in performance (prepared, from sight and improvised) and analytical listening (transcription, diction and aural analysis). Offered fall only.
Requisites: Requires prerequisite course of MUSC 1131 (minimum grade D-). Restricted to College of Music (MUSC) majors or graduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 2131 (1) Aural Skills Lab, Semester 4
Continuation of MUSC 2121. Applies concepts from MUSC 2111 in performance (prepared, from sight and improvised) and analytical listening (transcription, dictation and aural analysis. Offered spring only.
Requisites: Requires prerequisite course of MUSC 2121 (minimum grade D-). Restricted to College of Music (MUSC) majors only.
Additional Information: Departmental Category: Theory and Composition

MUSC 2325 (2) Applied Harmony for the Keyboard
Provides an intensive study and application of the harmonic structure of music in a variety of keyboard skills: figured bass realization, chord progressions, harmonization, improvisation, transposition, on-sight harmonic analysis and playing by ear. Offered spring only.
Requisites: Requires prerequisite courses of MUSC 1111 and MUSC 1131 and MUSC 1325 (all minimum grade D-). Restricted to College of Music (MUSC) majors or graduate students only.
Additional Information: Departmental Category: Keyboard

MUSC 2365 (2) Introduction to Accompanying
An overall study in the art of working with instrumentalists and singers including repertoire and orchestral reductions. Requires performance with a student instrumentalist or singer to be critiqued and coached by class and instructor. Offered spring only.
Requisites: Requires prerequisite course of MUSC 1325 (minimum grade D-). Restricted to College of Music (MUSC) undergraduate students only.
Additional Information: Departmental Category: Keyboard

MUSC 2608 (1) Wellness for Musicians 1
Explores strategies that help musicians maintain health while achieving peak performance. Investigate and employ powerful somatic methodologies including Alexander Technique and Body Mapping that improve physical functioning and prevent injury. Incorporates a variety of wellness aspects such as performance psychology, mental health, effective exercise, nutrition, breathing, hearing and vocal health.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Interdepartmental Courses

MUSC 2772 (3) World Musics: Asia and Oceania
Highlights music in Asia and Oceania using current ethnomusicological materials.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Arts Sci Gen Ed: Diversity-Global Perspective
Departmental Category: Musicology

MUSC 2782 (3) World Musics: Africa, Europe, and the Americas
Use current ethnomusicological materials and methods in the study of music outside the Western art tradition. Usually taught in the spring, focuses on music cultures of Africa, Europe and the Americas.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Arts Sci Gen Ed: Diversity-Global Perspective
Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Musicology

MUSC 2918 (2) Building Your Music Career
Develop a broad range of tools needed for a professional career in music. Topics include networking, development and use of promotional materials, funding, social media and the internet and financial management, among others - all taught through an entrepreneurial lens. A range of career opportunities is explored, using the entrepreneurial process to assess and explore a variety of paths and opportunities.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Music Entrepreneurship

MUSC 2988 (1) Introduction to Music Research
Introduces music research tools and basic writing skills to provide information fluency and skills necessary for successful composition of formal music research papers. Applies curricular goals to specific topics of students' choice.
Repeatable: Repeatable for up to 12.00 total credit hours.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Interdepartmental Courses

MUSC 2997 (1) Sophomore Proficiency
To be completed by the second semester of the sophomore year.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Theses and Recitals

MUSC 3013 (1) String Class
For music education majors with choral/general emphasis. Develops basic performance skills on two or more string instruments. Addresses teaching strategies and other specialized topics related to string instruction. Offered fall only.
Requisites: Restricted to College of Music (MUSC) majors or graduate students only.
Additional Information: Departmental Category: Music Education

MUSC 3023 (1) Woodwind Class
For music education majors with choral or choral/general emphasis. Develops basic performance skills on two or more woodwind instruments. Addresses teaching strategies and other specialized topics related to beginning and intermediate woodwind instruction. Offered spring only.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Music Education

MUSC 3033 (1) Brass Class
For music education majors with choral or choral/general emphasis. Develops basic performance skills on two or more brass instruments. Addresses teaching strategies and other specialized topics related to beginning and intermediate brass instruction. Offered spring only.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Music Education

MUSC 3041 (2) Instrumentation and Arranging
Learn to create professional arrangements for a diverse combination of instruments and/or voices. The course will work through instrumentation, score and part preparation, and issues of orchestration to prepare music student to create successful arrangements for a wide range of concert music settings. Final arranging projects will be geared towards individual interests.
Requisites: Requires prerequisite course of MUSC 2101 and MUSC 2121 (all minimum grade C). Restricted to College of Music (MUSC) students only.

MUSC 3043 (1) Percussion Class
Provides an introduction to playing techniques and pedagogical principles necessary for music educators to teach young students, including general understanding of the techniques used in playing and teaching percussion instruments in the school music program. Required of all string, voice, choral and instrumental general track music education students. Offered fall only.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Grading Basis: Letter Grade

MUSC 3051 (2) Beginning Composition
Covers issues relating to the craft of musical composition with analysis and writing in various styles. This introductory course is designed for music majors who are not composition majors. Some of the assignments will be read in class. Offered spring term of even-numbered years.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 3061 (2) Jazz Improvisation I
Develops skills in jazz improvisation through practical application of harmonic concepts, melodic construction, rhythmic awareness, transcription, repertoire and analysis. Open to all instruments. Offered fall only.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Recommended: Prerequisite for non-jazz majors MUSC 2111.
Additional Information: Departmental Category: Theory and Composition

MUSC 3071 (2) Jazz Improvisation II
Continues and expands upon the material presented in MUSC 3061. Reinforcement of ability to create an improvised melody in a range of harmonic contexts including blues, bebop, modal jazz, free jazz, and other styles. Offered spring only.
Requisites: Requires prerequisite course of MUSC 3061 (minimum grade D-). Restricted to College of Music (MUSC) undergraduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 3081 (3) Jazz Theory and Aural Foundations 1
Presents the grammar and syntax of jazz. Helps to gain a greater understanding of the inner workings and application of chord progressions as they relate to the jazz idiom including major key harmony, secondary dominants, modal interchange and modulation. Students will demonstrate their understanding of these components through written assignments, singing, aural recognition, transcription and keyboard demonstration.
Requisites: Requires prerequisite courses of MUSC 1111 and MUSC 1131 and MUSC 3071 (all minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 3091 (3) Jazz Theory and Aural Foundations 2
Presents the grammar and syntax of jazz and is the second course of the sequence. Units of study include elements of form, harmonic substitution, reharmonization, non-standard forms and harmonic progressions. Post-tonal concepts as they relate to jazz are introduced as well as foundational studies in jazz rhythm. Aural studies of all theoretical material is integrated throughout the semester.
Requisites: Requires prerequisite course of MUSC 3081 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.

MUSC 3133 (2) Teaching General Music I
Provides an overview of general music teaching with emphasis on developmentally appropriate strategies and materials. Required for all music education majors as partial fulfillment of course work leading to K-12 music licensure. Offered spring only.
Requisites: Requires prerequisite course of MUSC 2103 (minimum grade C-). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Music Education

MUSC 3153 (2) Teaching Woodwind Instruments
For music education majors with instrumental or instrumental/general emphasis. Develops basic performance skills on three or more woodwind instruments. Addresses teaching strategies and other specialized topics related to beginning and intermediate woodwind instruction. Offered spring only.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Music Education

MUSC 3163 (2) Teaching String Instruments
For music education majors with instrumental or instrumental/general emphasis. Develops basic performance skills on three or more string instruments. Addresses teaching strategies and other specialized topics related to beginning and intermediate string instruction. Offered fall only.
Requisites: Restricted to College of Music (MUSC) majors or graduate students only.
Additional Information: Departmental Category: Music Education

MUSC 3176 (2) Conducting 1
Introduces conducting and rehearsal techniques. Offered fall only.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Choral and Instrumental Music

MUSC 3186 (2) Conducting II
Introduces conducting and rehearsal techniques. Offered spring only.
Requisites: Requires prerequisite course of MUSC 3176 (minimum grade D-). Restricted to College of Music (MUSC) undergraduate students only.
Additional Information: Departmental Category: Choral and Instrumental Music

MUSC 3191 (2) Studio Recording Techniques
Introduces various aspects of studio recording techniques and explores the technical side of audio recording in the studio setting. Expands upon knowledge and skills learned in Recording Techniques (MUSC 2091).
Requisites: Prerequisite of Recording Techniques MUSC 2091. Restricted to College of Music (MUSCU) undergraduate students only.
Grading Basis: Letter Grade

MUSC 3193 (2) Vocal Pedagogy and Literature for Young Voices
Provides an overview of vocal anatomy/function, care of the voice, vocal repertoire, teaching strategies,and other specialized topics related to singing instruction in both private studio and public school choral settings. Fall section for instrumentalists; spring section for vocalists.
Requisites: Restricted to College of Music (MUSC) majors or graduate students only.
Additional Information: Departmental Category: Music Education

MUSC 3223 (2) Teaching Brass Instruments
For music education majors with instrumental or instrumental/general emphasis. Develops basic performance skills on three or more brass instruments. Addresses teaching strategies and other specialized topics related to beginning and intermediate brass instruction. Offered spring only.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Music Education

MUSC 3226 (1) Percussion Literature and Pedagogy for Undergraduate Percussion Majors
Explores, examines and analyzes percussion music, performance techniques and how to teach them through readings, discussion, analysis, extensive listening, and score study. The course is designed to meet the specific needs and requirements of the individual student.
Repeatable: Repeatable for up to 3.00 total credit hours.
Requisites: Requires prerequisite course of MUSC 2997 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.
Grading Basis: Letter Grade

MUSC 3243 (2) Teaching Percussion Instruments
Provides an introduction to playing techniques and pedagogical principles necessary for music educators to teach young students, including general understanding of the techniques used in playing and teaching percussion instruments in the school music program. Required of all instrumental band and instrumental band-jazz track music education students. Offered fall only.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Grading Basis: Letter Grade

MUSC 3253 (2) Jazz Techniques for the Music Educator
Prepares the music educator for successful experiences teaching jazz at the secondary level. Students gain insights into performance and rehearsal techniques for the instrumental jazz ensemble. Explores approaches for teaching jazz theory, improvisation, and selecting literature for young students. Own instrument required for certain classes. Offered spring only.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Recommended: Prerequisites MUSC 1111 and MUSC 2103.
Additional Information: Departmental Category: Music Education

MUSC 3256 (2) Guitar Pedagogy
Survey and develop appropriate teaching materials and techniques; learn how to identify and address the most common technical problems experienced by guitar students; create strategies for how to avoid the development of problems in guitar beginners.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Grading Basis: Letter Grade

MUSC 3273 (2) String Pedagogy and Literature
Examines instructional methods/materials and pedagogical approaches appropriate for beginning to advanced string students in private studio, small ensemble, or large ensemble contexts. Topics may include group teaching strategies, as well as contemporary approaches including Rolland and Suzuki. Offered spring only.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Recommended: Prerequisites MUSC 2103 and MUSC 3163.
Additional Information: Departmental Category: Music Education

MUSC 3345 (2) Piano Pedagogy 1
Discusses teaching philosophies, objectives, and procedures. Examines and evaluates methods and materials. Studies practical aspects with which the private teacher is concerned. Offered fall of even-numbered years.
Repeatable: Repeatable for up to 12.00 total credit hours.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Keyboard

MUSC 3355 (2) Piano Pedagogy 2
Materials and techniques for teaching piano with a focus on the intermediate level student. Offered only in spring of odd-numbered years.
Repeatable: Repeatable for up to 12.00 total credit hours.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Keyboard

MUSC 3363 (2) Marching Band Techniques
Helps develop the skills needed to administer and teach all aspects of a contemporary high school marching band. Includes drill conception and design, instruction, organization, and administration. Offered fall only.
Requisites: Requires prerequisite course of MUSC 2103 and EMUS 1287 or EMUS 3287 (all minimum grade D-). Restricted to College of Music (MUSCU) majors or graduate students only.
Additional Information: Departmental Category: Music Education

MUSC 3444 (1) French Diction
Designed for the understanding of lyric French diction, the international phonetic alphabet, and its application to classical singing, as well as various musical styles of French classical vocal literature. Required of Junior BM voice majors.
Requisites: Requires prerequisite course of MUSC 1554 (minimum grade D-). Restricted to College of Music (MUSCU) majors or graduate students only.
Recommended: Prerequisite MUSC 3464.
Additional Information: Departmental Category: Voice

MUSC 3464 (1) German Diction
Designed for the understanding of lyric German diction, the international phonetic alphabet, and its application to classical singing, as well as various musical styles of German classical vocal literature. Required of sophomore BM voice majors.
Requisites: Requires prerequisite course of MUSC 1554 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Voice

MUSC 3642 (3) History of Jazz 1
Utilizing musical examples and analysis, this course studies the distinctly American art form of jazz music from its origins up to the 1950's, including the various traditions, practices, historical events and people most important to its evolution. Offered fall only.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Musicology

MUSC 3652 (3) History of Jazz 2
Utilizing musical examples and analysis, this course studies the distinctly American art form of jazz music from the 1950's to the present, including the various traditions, practices, historical events and people most important to its evolution. Offered spring only.
Requisites: Requires a prerequisite course of MUSC 3642 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.
Grading Basis: Letter Grade

MUSC 3772 (3) West African Music and Culture in Ghana
Provides hands-on and experiential enrichment for students to interact at several levels with a local community in Ghana. Classroom lectures will be combined with direct participation in drumming and dancing, field trips to participate in festivals and court ceremonies, field trips to kente weaving village, adinkra cloth making, wood carving villages, and museums.
Equivalent - Duplicate Degree Credit Not Granted: MUEL 3772
Requisites: Requires prerequisite courses of MUSC 2782 and MUEL 2772 (all minimum grade D-). Restricted to students with 27-56 credits (Sophomore) non-College of Music majors only.
Additional Information: Departmental Category: Musicology

MUSC 3802 (3) History of Western Music 1
Surveys Western art music with stylistic analysis of representative works from all major periods through the Baroque. See also MUSC 3812.
Requisites: Requires prerequisite course of MUSC 1111 or MUSC 3091 (minimum grade D-). Restricted to College of Music (MUSC) undergraduate students only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Musicology

MUSC 3812 (3) History of Western Music 2
Surveys Western art music with stylistic analysis of representative works from all major periods after the Baroque. See also MUSC 3802.
Requisites: Requires prerequisite course of MUSC 1111 (minimum grade D-). Restricted to College of Music (MUSC) undergraduate students only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Musicology

MUSC 3997 (1) Junior Recital
To be completed by the second semester of the junior year.
Repeatable: Repeatable for up to 12.00 total credit hours.
Requisites: Requires prerequisite course of MUSC 2997. Restricted to College of Music (MUSC) undergraduate students only.
Additional Information: Departmental Category: Theses and Recitals

MUSC 4001 (2) New Musical Styles and Practices
Explores a variety of music from the 20th and 21st centuries beginning with Stravinsky and moving through current trends. Involves a mix an analysis/exploration of this music with short composition assignments imitating the different styles. Offered spring of odd-numbered years.
Requisites: Requires prerequisite courses of MUSC 2111 and MUSC 2131 (all minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 4011 (2) 16th Century Counterpoint
Provides a stylistic study of the main contrapuntal genres of the period including free, two- and three-part imitative counterpoint in the style of Palestrina. Provides a foundation in species counterpoint, working towards free counterpoint; stresses composing in 16th century styles. Offered fall of even-numbered years.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5011
Requisites: Requires prerequisite courses of MUSC 2111 and MUSC 2131 (all minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 4012 (3) African Music
Studies music cultures of Africa and the Black Diaspora, including folk and art music traditions, religious and popular music genres. Specific course topics could cover any or all of these styles, including exploring interconnections of musical stylistics of Africa and the Black Diaspora.
Equivalent - Duplicate Degree Credit Not Granted: MUEL 4012 and MUSC 5012
Requisites: Requires prerequisite course of MUSC 1802 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.
Additional Information: Departmental Category: Musicology

MUSC 4021 (2) 18th Century Counterpoint
Provides a stylistic study of main contrapuntal genres of the period including inventions, suite movements and fugues. Provides a foundation in species counterpoint; stresses analysis and composing in the style. Offered fall only.
Requisites: Requires prerequisite courses of MUSC 2111 and MUSC 2131 (all minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 4031 (2) Jazz Arranging 1
Study of notation, score layout, transpositions, basic harmonic and melodic analysis, basic chord voicings, and composition for a small and large jazz ensemble. Use of notation software such as Finale or Sibelius. Offered fall semester only.
Requisites: Requires prerequisite course of MUSC 3091 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 4034 (3) Musical Theatre History 1 - Antecedents through Musical Comedy
Introduces musical theatre using historical and cultural contexts. Topics cover the social and historical elements inherent in the development of the Broadway Musical Theatre. Students will evaluate and compare a variety of musicals and their antecedents from the 19th Century to the era of Musical Comedy, including minstrel shows, vaudeville, operetta, burlesque, variety shows and musical revues.
Requisites: Restricted to BFA Musical Theatre and BM Musical Theatre students only.
Grading Basis: Letter Grade

MUSC 4041 (2) Orchestration
Studies advanced orchestration techniques through score analysis and student projects. Offered fall of odd-numbered years.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 4044 (3) American Musical Theatre History 2 - Golden Age to Contemporary
Continues to investigate Musical Theatre within its historical and cultural contexts, analyzing the cultural influence it has had on society. Students will evaluate and compare musicals from the start of the Golden Age to the modern era including Rock, Popsical, Jukebox, and Contemporary styles. This course is a continuation of Musical Theatre History 1.
Requisites: Restricted to Musical Theatre (MMTH-BMUS) students only.
Grading Basis: Letter Grade

MUSC 4061 (2) Tonal Analysis
Surveys tonal analytical techniques and forms of tonal music, including binary forms, ternary forms, rondo (and others) through study of selected works. Offered spring only.
Requisites: Requires prerequisite courses of MUSC 2111 and MUSC 2131 (all minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 4071 (2) Post-Tonal Theory and Analysis
Focuses on theory and analysis of post-tonal literature pre-1945. Offered fall of odd-numbered years.
Requisites: Requires prerequisite courses of MUSC 2111 and MUSC 2131 (all minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 4078 (1) Piano Technician for Pianists
Familiarizes pianists with the development of the modern grand piano, its construction and the proper terminology of parts and specifications. Trains pianists in minor repairs and adjustments of the grand piano action and in minor tuning tasks.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5078
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Recommended: Prerequisite piano majors.
Additional Information: Departmental Category: Interdepartmental Courses

MUSC 4091 (2) Jazz Arranging 2
Continuation and expansion of studies in MUSC 4031. Survey and analysis of major composers and arrangers of the idiom. Course focuses on creating several arranging projects for a jazz ensembles. Offered spring of odd-numbered years.
Requisites: Requires prerequisite course of MUSC 4031 (minimum grade D-). Restricted to College of Music undergraduate students only.
Recommended: Prerequisite MUSC 3081.
Additional Information: Departmental Category: Theory and Composition

MUSC 4101 (1-3) Theory and Aural Skills Review
Reviews tonal harmony, voice leading, and essential aural skills. Prepares graduate students for more advanced work in music theory. Students may register for aural skills only (1 credit), theory only (2 credits) or both theory and aural skills (3 credits). May not be taken pass/fail. Aural skills section offered fall and spring. Theory section offered spring.
Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 4103 (1) Introduction to Student Teaching
Represents the first half of the professional internship year. Familiarizes students with the schools and music programs in which they plan to student teach. Music placements may consist of elementary and high school, elementary and middle school, or middle school and high school.
Requisites: Requires a prerequisite course of MUSC 4113 or MUSC 4313 or MUSC 4443 (minimum grade C-). Restricted to College of Music undergraduate students only.
Additional Information: Departmental Category: Music Education

MUSC 4106 (2) Guitar Literature
An analytical and historical survey of the repertory of the guitar and its antecedents from the renaissance to the present day.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5106
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Choral and Instrumental Music

MUSC 4111 (2) Composing at the Computer
Discover strategies and techniques for generating and manipulating sound at the computer. Student projects will include compositions, soundscapes, ambient environments and soundtracks for multimedia. Available to students without prior experience with computer music or composition. Offered fall of odd-numbered years.
Requisites: Requires prerequisite course of MUSC 2061 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 4112 (3) Ethnomusicology
Examines the definition, scope, and methods of ethnomusicology, the discipline that focuses on approaches to the study of music theory, history, and performance practices of world cultures.
Requisites: Requires prerequisite course of MUSC 1802 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.
Additional Information: Departmental Category: Musicology

MUSC 4113 (3) Teaching General Music 2
Provides an in-depth examination of teaching and learning processes in the elementary general music classroom, based on the integration of child development and musical development theories with content and delivery skills appropriate for K-5 general music classrooms. Students implement and evaluate music instruction, design curricular projects, and build a repertoire of vocal, instrumental and speech-based arrangements. Offered fall of odd-numbered years.
Requisites: Requires prerequisite course of MUSC 2103 (minimum grade C-). Restricted to College of Music (MUSC) undergraduate students only.
Additional Information: Departmental Category: Music Education

MUSC 4121 (3) Topics in Music Technology
Exploration of issues, techniques, and tools of music technology. Topics vary from term to term and may include: interactive systems for performance; teaching and learning; computer music instrument design; digital synthesis and signal processing; music in intermedia, sound design and analysis. Lectures on work sessions will support student projects.
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Requires prerequisite course of MUSC 2061 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 4122 (3) Music in Jewish Culture
Introduces students to a wide range of musical styles, traditions, genres, performers, composers, events and works that are part of Jewish culture, focusing on the twentieth and twenty-first centuries. Provides tools for understanding music on its own and in connection with issues of identity, diaspora, memory and liturgy. Includes opportunities for creative and critical engagement with Jewish music.
Equivalent - Duplicate Degree Credit Not Granted: JWST 4122
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Musicology

MUSC 4133 (3) Student Teaching Practicum
Offers practice teaching under the guidance of a master music teacher.
Requisites: Requires prerequisite course of MUSC 4103 (minimum grade C-). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Music Education

MUSC 4141 (2) Instrument Design Lab: Sound, Perception & Creativity
Explores fundamental physical concepts of sound and music in a hands-on laboratory environment. Surveys a number of topics such as tuning, temperament, harmony and timbre through the construction of PVC overtone flutes, an investigation in the timbral intention of Dolly Parton's vocal technique, physical modeling through the testing of 3D-printed vowel flutes, the construction of a "Long String Instrument," and more. The course culminates in each student inventing, designing, and demonstrating their own new instrument.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5141
Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.
Grading Basis: Letter Grade

MUSC 4142 (3) American Indian Music
Examines Native North American musical cultures, emphasizing music as an integral part of religious expression and community life.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5142
Requisites: Requires prerequisite course of MUSC 1802 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.
Additional Information: Departmental Category: Musicology

MUSC 4143 (2) Topics in Choral Music Education
Prepares students to teach, conduct and facilitate music making in various choral ensembles. Examines skills, teaching techniques and administrative procedures necessary for developing and maintaining various choirs at the elementary through high school levels. Includes discussion of current topics in choral music education and community choral field experiences. Offered fall terms, every two years.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5143
Requisites: Requires prerequisite course of MUSC 2103 (minimum grade C-). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Music Education

MUSC 4151 (2) Topics in Music Analysis
Examines critically a specific topic or repertory, such as Song Analysis or Music of Brahms. Uses readings and analyses, with grades to be determined from reading responses, analytical assignments and writing. Offered fall of even-numbered years.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Requires prerequisite courses of MUSC 2111 and MUSC 2131
Grading Basis: Letter Grade
Additional Information: Departmental Category: Theory and Composition

MUSC 4152 (3) East Asian Music
Surveys the development of music in Japan, China and Korea through the in-depth study of particular styles of traditional music. The course emphasizes the study of music and culture, particularly music's relationship to religion, politics, language, literature, dance and theatre.
Requisites: Requires prerequisite course of MUSC 1802 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.
Additional Information: Departmental Category: Musicology
Departmental Category: Asia Content

MUSC 4153 (1) Percussion Class and Pedagogy
Required of all music education majors. Presents knowledge and skills necessary for music educators to teach young students, including a general understanding of the techniques used in playing and teaching percussion instruments in the school music program. Offered fall only.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Music Education

MUSC 4161 (2) Advanced Jazz Composition and Analysis
Provides in depth listening, score study, and analysis, exploring major composers in jazz and their innovations in composition. "Foundational" topics concerning melody, form, and orchestration are studied to provide a framework for further analysis. Influences of western art music, American folk and popular music considered. Final projects to be performed and recorded by a CU jazz ensemble.
Requisites: Requires prerequisite of MUSC 3091 and MUSC 3081 (all minimum grade D-). Restricted to College of Music (MUSC) undergraduate students only.
Grading Basis: Letter Grade

MUSC 4163 (2) Choral Literature for School Ensembles
Examination of literature, materials, and methods appropriate for teaching choral music in secondary schools. Offered fall of odd-numbered years.
Requisites: Requires prerequisite course of MUSC 2103 (minimum grade C-). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Music Education

MUSC 4168 (3) World Music Theories
Examines music rules, concepts or music theories and sociocultural elements that musicians use in creating musical sound, with emphasis on music practices from a variety of world traditions; observing shared and diverging principles, making cross-cultural comparisons and developing a new pedagogy that supports the substantive study of global musics.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5168
Requisites: Requires prerequisite course of MUSC 1802 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.
Recommended: Prerequisite MUSC 1802 or MUSC 2772 or MUSC 2782 or MUSC 4112.
Additional Information: Departmental Category: Theory and Composition

MUSC 4171 (2) Advanced Jazz Improvisation and Analysis
Surveys important jazz improvisers and their historical context. Students engage in multiple methods of transcription and analysis. Listening plays a central role throughout the course and class discussions will foster the ability to engage in critical analysis of performances. The final project is an in-depth transcription of analysis of an improvisation.
Repeatable: Repeatable for up to 12.00 total credit hours.
Requisites: Requires prerequisite of MUSC 3081 and MUSC 3091 (all minimum grade D-). Restricted to College of Music (MUSC) undergraduate students only.
Grading Basis: Letter Grade

MUSC 4176 (2) Conducting 3
This is a study in advanced conducting techniques. Demonstration of advanced score study techniques as well as the application to gesture and rehearsal techniques linked with conducting will be explored. Participation fully in discussion readings and contribute to the learning of all is expected.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5176
Repeatable: Repeatable for up to 4.00 total credit hours. Allows multiple enrollment in term.
Requisites: Requires prerequisite course of MUSC 3186 (minimum grade B-). Restricted to College of Music undergraduates majoring in Music Education (MUSE) only.
Grading Basis: Letter Grade

MUSC 4191 (2) Advanced Recording
Study of advanced recording techniques and concepts beyond those covered in MUSC 2091 involving multiplemicrophones for ensemble concerts and recording sessions within and outside of the College of Music. Offered spring of even-numbered years.
Requisites: Requires prerequisite course of MUSC 2091 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 4193 (1) Student Teaching Seminar
Required for all music student teachers. Addresses topics of concern to beginning teachers including classroom management, interpersonal skills, legal issues, job search strategies and capstone project development.
Requisites: Requires prerequisite course of MUSC 4103 (minimum grade C-). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Music Education

MUSC 4202 (3) Special Topic in Musicology: Current and Critical Issues
Examination of a specific topic of current or critical interest within areas of music history, ethnomusicology, critical theoryand practice across the spectrum of Western, Popular and World Music traditions. Designed as a capstone course for music majors who have completed a full complement of musicology courses. Topics vary from term to term. Instructor consent is required for non-music majors.
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Requires prerequisite course of MUSC 1802 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Musicology

MUSC 4203 (1) Music Methods Practicum
Provides students with opportunities to observe and practice the use of various teaching techniques and relate them to concepts presented in the methods course. Students consult with the instructor to determine appropriate placements in schools.
Requisites: Requires prerequisite course of MUSC 2103 (minimum grade C-). Requires corequisite course of MUSC 4313 or MUSC 4443. Restricted to College of Music (MUSC) undergraduate students only.
Additional Information: Departmental Category: Music Education

MUSC 4223 (2) Secondary Music Teaching Approaches
Prepares students to teach and facilitate musical learning in non-performance secondary music classes. Includes units on music technology, music theory, music appreciation and class guitar. Connects experiential components to strategies for teaching and project design for middle and high school classrooms. Offered fall only.
Requisites: Requires a prerequisite course of MUSC 2103 (minimum grade D-).
Grading Basis: Letter Grade

MUSC 4313 (3) Teaching Choral Music
Examines choral music curricula, instructional materials and teaching techniques appropriate for secondary choral settings. Also addresses administrative strategies for choral music programs. Offered spring only.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5313
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Recommended: Prerequisite MUSC 2103.
Additional Information: Departmental Category: Music Education

MUSC 4323 (3) Differentiating Instruction in K-8 Music Classrooms
Designed to focus on differentiating and individualizing instruction for K-8 music students representing diverse cultural, linguistic, and ability backgrounds. Includes developmental and practical orientations to pedagogical issues including planning, instruction and assessment. Emphasizes evidence-based teaching practices and programmatic interventions that support student learning and engagement in music instruction.
Requisites: Requires a prerequisite course of MUSC 2103 (minimum grade D-). Restricted to College of Music (MUSC) majors or graduate students only.
Grading Basis: Letter Grade

MUSC 4325 (2) Keyboard Literature 1
Surveys keyboard music from 1600 to 1830. Offered fall semester of even-numbered years.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Keyboard

MUSC 4335 (2) Keyboard Literature 2
Surveys keyboard music from 1830 to the present. Offered spring semester of even-numbered years.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Keyboard

MUSC 4336 (2) Brass Pedagogy
Analyzes pedagogical techniques and philosophies of teaching brass instruments, and examines materials. Offered every other spring terms.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5336
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Grading Basis: Letter Grade

MUSC 4346 (2) Woodwind Pedagogy
Analyzes pedagogical techniques and philosophies of teaching wind instruments, and examines materials. Offered every other spring term.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5346
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Grading Basis: Letter Grade

MUSC 4405 (2) Basso-Continuo Accompaniment
Studies the history, theory and practice of Basso-continuo accompaniment. Provides practical instruction in realizing harmony from a given bass line (figured or unfigured), projecting affect and creating dynamics at the harpsichord. Emphasizes individual cognition and creativity.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5405
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Keyboard

MUSC 4415 (2) Advanced Basso Continuo
Explores advanced basso continuo, serving as more in depth study for those who have completed or tested out of Basso-Continuo Accompaniment (MUSC 4405).
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5415
Requisites: Prerequisite of MUSC 4405. Restricted to College of Music (MUSCU) undergraduate students.

MUSC 4443 (3) Teaching Instrumental Music
Examines instrumental music curricula, instructional materials and teaching techniques appropriate for rehearsal, class, and lesson settings. Also addresses administration strategies for instrumental music programs. Offered spring only.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5443
Requisites: Requires prerequisite course of MUSC 2103 (minimum grade C-). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Music Education

MUSC 4608 (1) Wellness for Musicians 2
Develops and further integrates material covered in Wellness for Musicians 1. Deeper exploration of somatic and wide-ranging wellness strategies, including FM Alexander¿s conception of Inhibition and other approaches for proactive self-care and improvement. Consideration of how to integrate methodologies in teaching, pedagogy, and practice. Students will complete several projects related to their specific musical pursuits and interests.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5808
Repeatable: Repeatable for up to 2.00 total credit hours.
Requisites: Requires prerequisite course of MUSC 2608 (minimum grade C-). Restricted to College of Music undergraduate students only.
Additional Information: Departmental Category: Interdepartmental Courses

MUSC 4666 (3) Chamber Music Lit WW/Prc
Repeatable: Repeatable for up to 12.00 total credit hours.
Additional Information: Departmental Category: Choral and Instrumental Music

MUSC 4712 (3) Renaissance Music
Provides a repertory and analysis of polyphonic music, 1400-1600.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5712
Requisites: Requires prerequisite courses of MUSC 1802 and MUSC 3802 (all minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.
Additional Information: Departmental Category: Musicology

MUSC 4752 (3) Women in Music
Examines the role of women as creators and performers of Western Music. Explores related issues in musicology, including canon formation, reception history and feminist aesthetics.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5752
Requisites: Requires prerequisite course of MUSC 1802 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.
Additional Information: Departmental Category: Musicology

MUSC 4772 (3) History of Opera
Examines representative operas from the 17th through the 21st centuries. Emphasizes both cultural and analytical aspects and surveys related musicological literature.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5772
Requisites: Requires prerequisite courses of MUSC 1802 and MUSC 3802 or MUSC 3812 (all minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.
Additional Information: Departmental Category: Musicology

MUSC 4802 (3) Studies in 20th Century Music
Offers intensified work in history of music in the 20th century. Topics vary from year to year.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5802
Requisites: Requires prerequisite courses of MUSC 1802 and MUSC 3812 (all minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.
Additional Information: Departmental Category: Musicology

MUSC 4808 (1-3) Internship in Music Industry
Provides an opportunity for music majors to gain real world experience in a professional music organization outside of the CU Boulder academic environment and to engage with music industry organizations in the community (for profit or non-profit) while pursuing specific tasks or projects relevant to the student's career goals.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

MUSC 4852 (3) 17th and Early 18th Century Music
Examines music and writings about music from the Baroque era. Emphasizes cultural and musical analysis and surveys current musicological literature.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5852
Requisites: Requires prerequisite courses of MUSC 1802 and MUSC 3802 (all minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.
Additional Information: Departmental Category: Musicology

MUSC 4862 (3) African American Music
Examines the sacred and secular genres of Black American music from folk spirituals to contemporary gospel and hip-hop in their cultural and historical contexts. Examines individual composers and performers in specific historical contexts in order to understand the meanings behind certain Black musical stylistics, sound ideals and aesthetic preferences. Formerly MUSC 2802.
Requisites: Requires prerequisite course of MUSC 1802 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.
Additional Information: Departmental Category: Musicology

MUSC 4872 (3) Late 18th and 19th Century Music
Studies European and American music from the last developments of the styles through romanticism and its later 19th century reverberations.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5872
Requisites: Requires prerequisite courses of MUSC 1802 and MUSC 3812 (all minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.
Additional Information: Departmental Category: Musicology

MUSC 4892 (3) Latin American Music
Explores music of cultures of the Americas south of the United States and in the diaspora, emphasizing the relationships of music and culture in folk, popular and arts styles.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5892
Requisites: Requires prerequisite course of MUSC 1802 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.
Additional Information: Departmental Category: Musicology

MUSC 4908 (1-3) Arts Administration Internship
Engage with music/music business organizations in the community (for profit or non-profit) to pursue specific tasks or projects relevant to the student's career goals. A minimum of 48 hours is required per semester for one credit.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5908
Repeatable: Repeatable for up to 3.00 total credit hours.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Music Entrepreneurship

MUSC 4957 (1-4) Senior Thesis
Repeatable: Repeatable for up to 12.00 total credit hours.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Theses and Recitals

MUSC 4958 (2) Community Performances
Explore the real-world issues of planning and presenting concerts. Learn to program music for all types of audiences, gain confidence speaking about your music and handle the logistics of concert production. Discuss the role of concerts in the 21st century and examine new styles of presentation, audience engagement and outreach. Course culminates in a concert presented in a local venue.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5958
Requisites: Requires prerequisite course of MUSC 2918 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Music Entrepreneurship

MUSC 4968 (3) Management and Leadership in the Arts
Focus on management, leadership, and communication strategies and their application to arts organizations. Concepts and approaches for leaders of small, medium, and large arts organizations in both the for-profit and nonprofit sectors, including human resource management, problem solving, and effective communication will be examined. Students will practice and refine their written communication skills by writing clearly and concisely throughout the course.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5938
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Grading Basis: Letter Grade

MUSC 4978 (3) Introduction to Arts Administration
Introduce students to current trends in arts administration, explore the fundamentals of managing arts organizations and develop concrete tools for managing boards, volunteers and staff, effective fund raising, strategic planning and program development. Current issues, the role of the arts and arts advocacy will be discussed.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5978
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Music Entrepreneurship

MUSC 4988 (3) The Entrepreneurial Artist
Learn the core principles of entrepreneurship, such as idea formation, venture models, opportunity assessment, market analysis and strategies for launching a venture and apply them to entrepreneurial ideas. Lectures, projects, entrepreneur interviews and case studies will culminate in a feasibility study for an original entrepreneurial concept.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5988
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Recommended: Prerequisite MUSC 2918.
Additional Information: Departmental Category: Music Entrepreneurship

MUSC 4997 (1) Senior Recital
To be completed by the second semester of the senior year.
Repeatable: Repeatable for up to 12.00 total credit hours.
Requisites: Requires prerequisite class of MUSC 3997 (minimum grade D-). Restricted to College of Music undergraduate students only.
Additional Information: Departmental Category: Theses and Recitals

MUSC 4998 (1) Music Entrepreneurship Certificate Capstone
Completes the Certificate in Music Entrepreneurship. Students will develop an art-based entrepreneurial concept, engage in customer discovery, refine their business model, create a marketing plan, research relevant intellectual property issues, and complete a business model canvas for their venture.
Requisites: Requires prerequisite courses of MUSC 2918, 4988, BUSM 2001 and BUSM 4001 (min. grade D-). Restricted to senior (90-180 credits) College of Music (MUSCU) majors.
Grading Basis: Letter Grade

Music - Bachelor of Arts in Music (BAMus)

The Bachelor of Arts in Music program provides a broad education in music within a liberal arts context. Although students may elect to pursue special interests, the primary emphasis is on the development of basic musicianship, an ability to perform music and a broad knowledge of the foundations and principles of music as an art. The BA in music may be completed with an emphasis in jazz, music production, musicology and world music, or music technology and media studies. The BA in music degree is ideal for students who desire working on a second major outside of the College of Music.

Requirements

General Requirements

A minimum of 120 credit hours with an overall GPA of 2.00 must be earned for the BA in music degree. Of these credit hours, at least 68 (66 for musicology or music technology emphases) must be in non-music courses. Thirty must be at the 3000 or 4000 level. A minimum of 44 credit hours (51 for musicology or music technology emphases) is required in music courses.

In addition to the general requirements listed above, the following specific general education requirements must be met:

- Six credit hours of Written Communication
- Three credit hours of Quantitative Reasoning
- Twelve credit hours of Social Sciences (to include United States Perspective and Global Perspective)
- Twelve credit hours of Natural Sciences
- Basic proficiency in one foreign language equal to three semesters at the university level. This requirement also may be fulfilled by three years of study in high school in one language or by passing a university proficiency examination.
- Non-music requirements to fulfill the minimum requirement of credit hours outside of music.

The normal pattern for private applied instruction in this degree is one 25-minute lesson per week for 2 credit hours. Not more than 16 credit hours (9 for musicology emphasis, 11 for music technology emphasis) in private instruction may be used toward the degree.

Students registered for applied music must participate in an ensemble as recommended by their applied faculty. A maximum of 4 credit hours (6 for musicology emphasis) in ensemble can apply to the BA in music degree.

Recommended Four-Year Plans of Study

General Program (No Emphasis)

Year One		Credit Hours
MUSC 1101 & MUSC 1111	Semester 1 Theory and Semester 2 Theory	4
MUSC 1121 & MUSC 1131	Aural Skills Lab, Semester 1 and Aural Skills Lab, Semester 2	2
MUSC 1802	Introduction to Musical Styles and Ideas	3
PMUS 1105 & PMUS 1205	Keyboard Musicianship 1 and Keyboard-Musicianship 2	2
PMUS 1XXX	Applied Instruction	4
Ensemble		2
Foreign language		3
Written communication		6
Non-music requirements		6
	Credit Hours	**32**
Year Two		
MUSC 2101 & MUSC 2111	Semester 3 Theory and Semester 4 Theory	4
MUSC 2121 & MUSC 2131	Aural Skills Lab, Semester 3 and Aural Skills Lab, Semester 4	2
MUSC 2997	Sophomore Proficiency	1
PMUS 2XXX	Applied Instruction	4
Ensemble		2
Non-music requirements		18
	Credit Hours	**31**
Year Three		
MUSC 3802 & MUSC 3812	History of Western Music 1 and History of Western Music 2	6
Upper-division music theory elective: MUSC 3081, MUSC 4001, MUSC 4011, MUSC 4021, MUSC 4061, MUSC 4071, MUSC 4111, MUSC 4121, MUSC 4141 or MUSC 4151.		2
Non-music requirements		17
Free electives		4
	Credit Hours	**29**
Year Four		
4000 level electives in Musicology		6
Non-music requirements		18

4000-level elective in musicology		6
Non-music requirements		18
	Credit Hours	**27**
	Total Credit Hours	**120**

Learning Outcomes

By the completion of the program, students will be able to:

- Develop basic musicianship.
- Analyze and think critically about music.
- Broaden knowledge of the foundations and principles of music as an art.
- Demonstrate an understanding of theoretical studies, including sight-reading and ear training.
- Demonstrate an understanding of historical studies including the analysis of stylistic periods and music of non-Western cultures.

Music - Bachelor of Music (BMus)

The undergraduate degrees in music emphasize knowledge and awareness of:

- Solo performance and technique, including the various musical styles used in compositions for students' musical instruments or voice;
- Each composition performed, notation and editorial signs used in the compositions performed, and repertoire for the students' performance medium;
- Ensemble performance, including familiarity with major composers in the student's performance medium and the techniques necessary to blend a number of individual musicians into an ensemble;
- Concert and recital opportunities, including literature composed for different performance forces;
- Theoretical studies, including tonal harmony, counterpoint, voice-leading and notation; formal principles and analytical techniques for tonal music; and instruments in score, including the concert pitch of transposing instruments and nomenclature used in scores; and
- Historical studies, including representative works in the canon of musical literature from chant to the present, the general outlines of the history of music from the Middle Ages to the present, music in the United States and musical cultures other than those of Europe.

Concentration Areas

The four-year professional curriculum leading to the Bachelor of Music degree emphasizes creative skill, academic achievement and artistic performance in music. Concentration areas are offered in performance, composition, musicology and jazz studies.

Requirements

Program Requirements

A half recital in the junior year and a full recital in the senior year are required of students in the performance concentration areas, except musical theatre. Students should check with their advisor about preview policies.

A senior thesis is required of students in musicology. Music composition students must complete a senior project. Musical theatre students produce a senior showcase. Student advisors must approve senior thesis, senior project, and senior showcase plans.

Ensemble and chamber music requirements are specified in the degree plan for each concentration as approved by applied area faculty. Exceptions to these requirements must be approved by the major advisor and associate dean in consultation with area chairs and ensemble conductors.

Students pursuing the Bachelor of Music degree will be required to take one 3-credit-hour course in Written Communication through the Program for Writing and Rhetoric or the English department. Courses such as First-Year Writing and Rhetoric (WRTG 1150), Writing, Reading, Culture (ENGL 1001) or Introduction to Creative Writing (ENGL 1191) fulfill the requirement. The credit hours are applied in the liberal arts electives category. Students are strongly encouraged to complete this requirement by the end of their freshman year.

Concentration Areas

See the Plans of Study (p. 1055) tab for concentration-specific recommended plans of study.

Four-Year Plans of Study

Brass Performance Concentration Area

Year One		**Credit Hours**
MUSC 1101 & MUSC 1111	Semester 1 Theory and Semester 2 Theory	4
MUSC 1121 & MUSC 1131	Aural Skills Lab, Semester 1 and Aural Skills Lab, Semester 2	2
MUSC 1802	Introduction to Musical Styles and Ideas	3
PMUS 1XXX	Applied Instruction	6
PMUS 1105 & PMUS 1205	Keyboard Musicianship 1 and Keyboard-Musicianship 2	2

Musical Theatre Concentration Area

Students pursuing the musical theatre concentration area must register for an appropriate ensemble each semester that they are enrolled in applied instruction. These may include choral, opera, or musical theatre ensembles. Major role in musical theatre or opera in junior and senior year with approval of Voice/MT/Opera faculty. Senior showcase performance excuses student from ensemble in final semester.

Acting and dance courses offered by Theatre and Dance are encouraged to be a large part of the non-music elective credit hours.

Elective music courses (MUEL) cannot fulfill non-music requirements.

Year One

Fall Semester		**Credit Hours**
Applied Instruction		3
University Ensemble		1
MUSC 1101	Semester 1 Theory	2
MUSC 1121	Aural Skills Lab, Semester 1	1
MUSC 1802	Introduction to Musical Styles and Ideas	3
PMUS 1105	Keyboard Musicianship 1	1
MUSC 1554	English Diction	1
PMUS 1117	Musical Theatre Studio I	2
Dance elective		1
	Credit Hours	**15**
Spring Semester		
Applied Instruction		3
University Ensemble		1
MUSC 1111	Semester 2 Theory	2

	Total Credit Hours	**119**

Elective music courses (MUEL) cannot fulfill non-music requirements. Students with MAPS deficiencies are required to complete at least one course each semester until all deficiencies have been addressed.

Learning Outcomes

By the completion of the program, students will be able to:

- Perform solo and ensemble repertoire demonstrating musical artistry, technical proficiency and stylistic understanding.
- Demonstrate an understanding of theoretical studies, including sight-reading and ear training.
- Demonstrate an understanding of historical studies including the analysis of stylistic periods and music of non-Western cultures.

Dual Degree Programs

Double Major in Music Performance

Eligible students in the College of Music, with approval of faculty in the relevant areas or departments, may complete a double major in music performance. Normally, such programs take at least five years to complete. Students pursuing a double major in music performance must complete at least 15 additional credit hours beyond the 120 credit hours required for a single performance major. Requirements pertaining to applied study, chamber music, sophomore proficiency, junior recital and senior recital must be fulfilled separately for each degree; up to four credit hours of university ensemble can be applied to both majors when appropriate and with faculty/advisor approval. Students completing all requirements are awarded a single bachelor of music degree with two majors.

The decision to earn more than one degree or major in the College of Music should be carefully weighed, as it may be more advantageous for a student to complete a single degree/major and then begin work on a graduate degree in music.

BMus/BMusEd in Music Performance and Music Education

Qualified music majors who have been approved by the relevant major departments may elect to complete a dual degree in music performance

(woodwinds, brass and percussion, strings, or voice) and music education (instrumental or choral tracks). Requirements for these dual degree programs range in total credit hours, and typically include a minimum of 10 semesters of study (including one semester of full-time student teaching) to complete all requirements.

Double Degree in Music and an Outside Major

Students may complete requirements in two fields and receive two degrees from the university. Approximately 20-25 percent of music majors are studying a second major outside of music.

Music - Minor

The College of Music offers a 19-credit music minor for students across the CU Boulder campus. Students who wish to declare the music minor must be in good standing with the university with a minimum GPA of 2.00. The music minor is open to all students who have a sincere interest in making music a part of their university education, regardless of prior experience levels or backgrounds.

Students pursuing the music minor are required to complete a basic music theory course and participate in at least one music ensemble. Beyond that, students may choose from a variety of course options focused on creating or making music, as well as appreciating and thinking about music in relation to historical or sociocultural issues. Many elective course options for the music minor have been approved for the Arts & Sciences General Education Requirements.

For questions about the music minor, please send a message to the program advisor at music.minor@colorado.edu.

Requirements

Students who wish to declare their interest in the music minor must submit the Declaration Form (https://www.colorado.edu/music/minor-declaration-form/). A minimum GPA of 2.00 is required for the minor.

Grades in courses applied to the music minor must be a C- or higher. To start planning for the minor, students are encouraged to view the degree checklist (https://www.colorado.edu/music/sites/default/files/attached-files/music_minor_23-24.pdf).

Music Entrepreneurship - Certificate

The Certificate in Music Entrepreneurship is an innovative program administered by the Entrepreneurship Center for Music (ECM) in partnership with the Leeds School of Business.

The certificate, open to music majors only, will include a minor in business plus academic and experiential credits within the College of Music. This robust curriculum positions the College of Music among the nation's leading programs in arts entrepreneurship.

For more information, contact Jeff Nytch at jeff.nytch@colorado.edu.

Requirements

The undergraduate certificate in music entrepreneurship requires a minor in business (12 credit hours), plus six academic and experiential credit hours within the College of Music.

To qualify for the certificate, MUSC 2918 Building Your Music Career (5-week segment) must be successfully completed or in-progress.

Interested students should elect participation in the certificate program by no later than the end of the sophomore year.

Music Technology - Certificate

The College of Music offers a certificate in music technology which requires a total of 18 credits to complete.

The curriculum consists of a variety of courses designed to provide a strong background in using technology to compose and produce music. The courses range from an introductory survey of music software and hardware to in depth studies of DSP, synthesis, algorithmic composition, recording and post-production techniques, film scoring, and many other topics. The software used in many of the classes includes Logic Pro, ProTools, Abelton Live, Finale, Lilypond, MAX, PD, SuperCollider, CSound, Final Cut Pro, Audacity, SoundHack and Spear.

For more information, contact John Drumheller at drumhell@colorado.edu.

Requirements

This certificate requires 18 credit hours, including five music technology courses.

The certificate program is available to all undergraduates in good standing with the university with a minimum GPA of 2.00. Music majors should enroll under the MUSC heading and non-majors should use the MUEL heading. For those courses that do not have an MUEL prefix, non-majors will need instructor permission to enroll in the class.

To qualify for the certificate, the 2061 introductory course must be successfully completed or in-progress.

Music Theory - Certificate

The certificate in music theory provides students the opportunity to take more varied upper-level courses and develop independent projects under faculty mentorship. The certificate provides students with a formal acknowledgement of their work in music theory, potentially serving as a stepping-stone to graduate school, private teaching, theory teaching in primary or secondary schools or work in music-related media and technology.

Requirements

Admission Requirements

Students need a minimum average grade of B+ or higher for freshman and sophomore music theory and aural skills classes to qualify for the certificate.

Application for the certificate takes place either sophomore or junior year. In order to apply, students must submit a statement of purpose. Applications can be sent directly to the chair of Music Theory area, currently Yonatan Malin (yonatan.malin@colorado.edu).

Required Courses and Credits

The curriculum consists of 18 credit hours. Students will typically take between one or two required courses per semester. Students need to maintain a minimum average grade of B+ or higher.

Code	Title	Credit Hours
Core Courses		
MUSC 2101 & MUSC 2121 & MUSC 2111 & MUSC 2131	Semester 3 Theory and Aural Skills Lab, Semester 3 and Semester 4 Theory and Aural Skills Lab, Semester 4	6

Singing Health Specialist - Certificate

The Singing Health Specialist certificate includes courses in speech, language and hearing sciences; vocal pedagogy; and musicians' wellness. The certificate can be completed by both music majors with a focus in vocal music and speech-language pathology majors. The certificate creates an interdisciplinary bridge while also providing specialized training in an area of importance for both fields—vocal health and wellness.

Requirements

Admission Requirements

Both music majors with a focus in vocal music (i.e., performance, education or choral conducting) and speech-language pathology majors are eligible to pursue the certificate.

Students will need to have earned a minimum cumulative grade point average of 3.0 or higher to qualify at the time of application. Application of certificate declaration typically takes place at the start of the sophomore year but will be accepted in the second semester of the freshman year after a CU GPA has been established. Applications will be submitted to the Director of Vocal Pedagogy.

Required Courses and Credits

The singing health specialist certificate is comprised of 14 credits of undergraduate coursework in music and speech, language and hearing sciences. It also includes voice therapy or singing voice lessons observations.

Music Education

Music education faculty teach courses and supervise field experiences designed to prepare students for careers in preK-12 music education. The comprehensive curriculum and program standards have combined to produce a near 100 percent job placement rate for music education graduates.

Because of the varying challenges and opportunities associated with teaching music in K–12 school contexts, the undergraduate music education curriculum strikes a balance between specialization and generalization. BME students must demonstrate a sufficiently broad knowledge of the entire music program/curriculum, but also possess the specialized skills necessary to be a successful general music, choir, orchestra or band instructor.

Admission to the Teacher Education Program

Teacher education is a campuswide function at the University of Colorado. Admission to the music education program in the College of Music does not constitute admission to the teacher education program. Students must apply to the School of Education through the music education chair no later than the second semester of the junior year or by the time 65 credit hours have been completed toward the BMusEd degree (including approved transfer credits). Students may not register for certain education courses and student teaching until they are admitted to the teacher education program.

Requirements for recommended admission to the teacher education program:

- Minimum GPA of 3.00 in music and music education, and a minimum cumulative GPA of 2.75
- Minimum grade of C- in MUSC 2103
- Twenty-five hours of documented, supervised field experience
- Satisfactory functional piano ability as demonstrated by passing the proficiency examination or completing prescribed course work
- Satisfactory performance ability as demonstrated by meeting the sophomore proficiency requirements in an applied area of study
- Recommendation by the music education faculty; an interview with each student is held by the members of the music education faculty during the first semester of the sophomore year to review the student's progress and qualifications for admission to the teacher education program.

For further information, please refer to the *Handbook for Undergraduate Studies in Music Education*.

Student Teaching

Students wishing to receive a student teaching assignment must complete an application and submit it to the School of Education through the chair of the music education faculty early in the semester preceding the student teaching semester. Prerequisites for student teaching:

- Admission to the teacher education program
- A minimum GPA of 3.00 in music and music education, and a minimum cumulative GPA of 2.75
- Completion of all required music education and education courses in the music education curriculum
- Satisfactory performance ability as demonstrated by passing the junior recital
- Passing score on the PRAXIS II Music Assessment
- Recommendation by the music education faculty

Bachelor's Degree

- Bachelor of Music Education (BMusEd) (p. 1081)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Courses

MUSC 1051 (2) Basics of Songwriting
Introduces students to the art and craft of songwriting. Activities center on creative self-expression through song, developing the fundamental tools and components of songwriting, both conventional and unconventional song forms, developing a personal musical style, developing critical listening/writing/thinking skills, performance, and the study of songs past and present. Examination of melody, harmony, rhythm, lyric writing, style and ensemble presentation.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

MUSC 1081 (3) Intensive Music Theory
Introduces diatonic harmony and voice leading with intensive work on fundamentals (keys, intervals, triads, seventh chords and four-voice writing). The study of theoretical concepts is closely coordinated with aural skills. Feeds into the intensive section of MUSC 1111. Offered fall only.
Requisites: Requires corequisite course of MUSC 1121. Restricted to College of Music (MUSCU) majors or graduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 1101 (2) Semester 1 Theory
Introduces the fundamentals of diatonic harmony and voice leading, focusing on model composition (including one-, two- and four-voice writing) and analysis of excerpts from music literature. Offered fall only.
Requisites: Restricted to College of Music (MUSC) majors or graduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 1103 (1) Becoming a Music Teacher
Provides an introduction to basic principles and practices of the music education profession. Explores contexts and methods of public school music teaching through class discussions, practice teaching and directed observations. Offered fall only.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Grading Basis: Letter Grade

MUSC 1111 (2) Semester 2 Theory
Continuation of MUSC 1101. Explores principles of harmony, voice leading and form. Continues emphasis on both model composition and analysis. Introduces chromatic elements (such as applied dominants and modulation), harmonic syntax and structural analysis of excerpts from music literature. Offered spring only.
Requisites: Requires prerequisite course of MUSC 1101 or MUSC 1081 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 1121 (1) Aural Skills Lab, Semester 1
Focuses on sight singing, rhythm and dictation of diatonic melodies in major and minor keys (treble, alto and bass clefs). Covers identification of scale types, intervals, triads and dominant seventh chords. Includes individual and group improvisation. Offered fall only.
Requisites: Restricted to College of Music (MUSC) majors or graduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 1131 (1) Aural Skills Lab, Semester 2
Continuation of MUSC 1121. Focuses on sight singing, rhythm and dictation of diatonic melodies; adds chromatic elements, more complex rhythms and two-part dictation. Includes harmonic dictation using vocabulary from MUSC 1111. Includes individual and group improvisation within harmonic contexts. Offered spring only.
Requisites: Requires prerequisite course of MUSC 1121 (minimum grade D-). Restricted to College of Music undergraduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 1325 (1) Piano Sight Reading
Studies techniques for improving sight-reading skills at the keyboard, with practical work in solo, ensemble and choral literature. Also covers score reading and transposition. Restricted to piano majors or instructor consent required. Offered fall only.
Requisites: Restricted to College of Music (MUSC) majors or graduate students only.
Additional Information: Departmental Category: Keyboard

MUSC 1326 (2) Guitar Musicianship and Accompanying
Survey of accompanying repertoire for guitar with solo instruments (flute, violin, voice, etc.), including introductory work in basso continuo. Activities in sight-reading, fretboard harmony and comprehension of harmony and texture. Some work will be tied to the repertoire being studied in studio lessons. Open only to guitar performance majors.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Choral and Instrumental Music

MUSC 1544 (1) Italian Diction
Designed for the understanding of lyric Italian diction, the international phonetic alphabet, and its application to classical singing. Required for freshmen BM voice majors. Offered fall only.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Voice

MUSC 1554 (1) English Diction
Designed for the understanding of lyric English diction, the international phonetic alphabet, and its application to classical singing as well as various musical styles of English classical voice literature. Required for Freshmen BM voice majors.
Requisites: Requires prerequisite course of MUSC 1544 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Voice

MUSC 1802 (3) Introduction to Musical Styles and Ideas
Introduces the study of musical traditions of the world; equips students with requisite skills for understanding and analyzing music as an art in historical and cultural contexts using an integrative approach that includes selected styles and genres, critical reading and writing skills and mastery of conceptual issues related to the discipline of music. Satisfies the World Music requirement for undergraduate students in the College of Music.
Requisites: Restricted to College of Music (MUSC) majors or graduate students only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Musicology

MUSC 2041 (1) Applications of Music Technology (5-week segment)
Explores the use of technology, software, applications, and tools in a variety of creative, performance, pedagogical, and entrepreneurial contexts. Addresses the opportunities and challenges posed by evolving technologies. Emphasizes project-oriented learning.
Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Grading Basis: Letter Grade

MUSC 2061 (3) Introduction to Music Technology
Surveys the various tools and techniques in the field of music technology. Topics include an introduction to basic synthesis, digital signal processing, MIDI and audio sequencing, music notation and a historical perspective on electronic music.
Equivalent - Duplicate Degree Credit Not Granted: MUEL 2061
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 2081 (2) Prepared for the Soundcheck
Provides an overview of the recording process from the performer's perspective from soundcheck through final mastering. Uses recorded material from in-class sessions. Examines differing approaches to recording as well as current technologies.
Equivalent - Duplicate Degree Credit Not Granted: CMDP 2860
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 2091 (2) Recording Techniques
Provides hands-on training in various audio recording techniques, acoustics and sound reinforcement, studio maintenance and troubleshooting. Real-world experience is gained through individual recording projects and College of Music events.
Requisites: Requires prerequisite course of MUSC 2081 or MUEL 2071 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 2101 (2) Semester 3 Theory
Continuation of MUSC 1111. Reviews harmonic and formal concepts from MUSC 1111. Introduces advanced chromatic concepts such as modal mixture, seventh chords with added dissonance, Neapolitan sixth chord and augmented-sixth chords. Explores in-depth structural analysis of musical works. Offered fall only.
Requisites: Requires prerequisite course of MUSC 1111 (minimum grade D-). Restricted to College of Music (MUSC) majors or graduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 2103 (2) Introduction to Music Education
Introduces students to the broad range of skills and responsibilities inherent to the music education profession. Explores current topics in public school music teaching while developing teaching skills through supervised field experience. Offered fall only.
Requisites: Requires a prerequisite course of MUSC 1103 (minimum grade C-). Restricted to College of Music (MUSC) undergraduate students only.
Additional Information: Departmental Category: Music Education

MUSC 2111 (2) Semester 4 Theory
Continuation of MUSC 2101. Builds on and synthesizes harmonic, melodic and formal concepts from semesters 1-3. Includes writing about musical structure and analyzing relationships of musical structure to extramusical elements (such as text, performance technique, dance, staging, etc.). Introduces 20th century compositional techniques. Offered spring only.
Requisites: Requires prerequisite course of MUSC 2101 (minimum grade D-). Restricted to College of Music (MUSC) majors only.
Additional Information: Departmental Category: Theory and Composition

MUSC 2121 (1) Aural Skills Lab, Semester 3
Continuation of MUSC 1131. Applies concepts from MUSC 2101 in performance (prepared, from sight and improvised) and analytical listening (transcription, diction and aural analysis). Offered fall only.
Requisites: Requires prerequisite course of MUSC 1131 (minimum grade D-). Restricted to College of Music (MUSC) majors or graduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 2131 (1) Aural Skills Lab, Semester 4
Continuation of MUSC 2121. Applies concepts from MUSC 2111 in performance (prepared, from sight and improvised) and analytical listening (transcription, dictation and aural analysis. Offered spring only.
Requisites: Requires prerequisite course of MUSC 2121 (minimum grade D-). Restricted to College of Music (MUSC) majors only.
Additional Information: Departmental Category: Theory and Composition

MUSC 2325 (2) Applied Harmony for the Keyboard
Provides an intensive study and application of the harmonic structure of music in a variety of keyboard skills: figured bass realization, chord progressions, harmonization, improvisation, transposition, on-sight harmonic analysis and playing by ear. Offered spring only.
Requisites: Requires prerequisite courses of MUSC 1111 and MUSC 1131 and MUSC 1325 (all minimum grade D-). Restricted to College of Music (MUSC) majors or graduate students only.
Additional Information: Departmental Category: Keyboard

MUSC 2365 (2) Introduction to Accompanying
An overall study in the art of working with instrumentalists and singers including repertoire and orchestral reductions. Requires performance with a student instrumentalist or singer to be critiqued and coached by class and instructor. Offered spring only.
Requisites: Requires prerequisite course of MUSC 1325 (minimum grade D-). Restricted to College of Music (MUSC) undergraduate students only.
Additional Information: Departmental Category: Keyboard

MUSC 2608 (1) Wellness for Musicians 1
Explores strategies that help musicians maintain health while achieving peak performance. Investigate and employ powerful somatic methodologies including Alexander Technique and Body Mapping that improve physical functioning and prevent injury. Incorporates a variety of wellness aspects such as performance psychology, mental health, effective exercise, nutrition, breathing, hearing and vocal health.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Interdepartmental Courses

MUSC 2772 (3) World Musics: Asia and Oceania
Highlights music in Asia and Oceania using current ethnomusicological materials.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Arts Sci Gen Ed: Diversity-Global Perspective
Departmental Category: Musicology

MUSC 2782 (3) World Musics: Africa, Europe, and the Americas
Use current ethnomusicological materials and methods in the study of music outside the Western art tradition. Usually taught in the spring, focuses on music cultures of Africa, Europe and the Americas.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Arts Sci Gen Ed: Diversity-Global Perspective
Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Musicology

MUSC 2918 (2) Building Your Music Career
Develop a broad range of tools needed for a professional career in music. Topics include networking, development and use of promotional materials, funding, social media and the internet and financial management, among others - all taught through an entrepreneurial lens. A range of career opportunities is explored, using the entrepreneurial process to assess and explore a variety of paths and opportunities.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Music Entrepreneurship

MUSC 2988 (1) Introduction to Music Research
Introduces music research tools and basic writing skills to provide information fluency and skills necessary for successful composition of formal music research papers. Applies curricular goals to specific topics of students' choice.
Repeatable: Repeatable for up to 12.00 total credit hours.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Interdepartmental Courses

MUSC 2997 (1) Sophomore Proficiency
To be completed by the second semester of the sophomore year.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Theses and Recitals

MUSC 3013 (1) String Class
For music education majors with choral/general emphasis. Develops basic performance skills on two or more string instruments. Addresses teaching strategies and other specialized topics related to string instruction. Offered fall only.
Requisites: Restricted to College of Music (MUSC) majors or graduate students only.
Additional Information: Departmental Category: Music Education

MUSC 3023 (1) Woodwind Class
For music education majors with choral or choral/general emphasis. Develops basic performance skills on two or more woodwind instruments. Addresses teaching strategies and other specialized topics related to beginning and intermediate woodwind instruction. Offered spring only.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Music Education

MUSC 3033 (1) Brass Class
For music education majors with choral or choral/general emphasis. Develops basic performance skills on two or more brass instruments. Addresses teaching strategies and other specialized topics related to beginning and intermediate brass instruction. Offered spring only.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Music Education

MUSC 3041 (2) Instrumentation and Arranging
Learn to create professional arrangements for a diverse combination of instruments and/or voices. The course will work through instrumentation, score and part preparation, and issues of orchestration to prepare music student to create successful arrangements for a wide range of concert music settings. Final arranging projects will be geared towards individual interests.
Requisites: Requires prerequisite course of MUSC 2101 and MUSC 2121 (all minimum grade C). Restricted to College of Music (MUSC) students only.

MUSC 3043 (1) Percussion Class
Provides an introduction to playing techniques and pedagogical principles necessary for music educators to teach young students, including general understanding of the techniques used in playing and teaching percussion instruments in the school music program. Required of all string, voice, choral and instrumental general track music education students. Offered fall only.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Grading Basis: Letter Grade

MUSC 3051 (2) Beginning Composition
Covers issues relating to the craft of musical composition with analysis and writing in various styles. This introductory course is designed for music majors who are not composition majors. Some of the assignments will be read in class. Offered spring term of even-numbered years.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 3061 (2) Jazz Improvisation I
Develops skills in jazz improvisation through practical application of harmonic concepts, melodic construction, rhythmic awareness, transcription, repertoire and analysis. Open to all instruments. Offered fall only.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Recommended: Prerequisite for non-jazz majors MUSC 2111.
Additional Information: Departmental Category: Theory and Composition

MUSC 3071 (2) Jazz Improvisation II
Continues and expands upon the material presented in MUSC 3061. Reinforcement of ability to create an improvised melody in a range of harmonic contexts including blues, bebop, modal jazz, free jazz, and other styles. Offered spring only.
Requisites: Requires prerequisite course of MUSC 3061 (minimum grade D-). Restricted to College of Music (MUSC) undergraduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 3081 (3) Jazz Theory and Aural Foundations 1
Presents the grammar and syntax of jazz. Helps to gain a greater understanding of the inner workings and application of chord progressions as they relate to the jazz idiom including major key harmony, secondary dominants, modal interchange and modulation. Students will demonstrate their understanding of these components through written assignments, singing, aural recognition, transcription and keyboard demonstration.
Requisites: Requires prerequisite courses of MUSC 1111 and MUSC 1131 and MUSC 3071 (all minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 3091 (3) Jazz Theory and Aural Foundations 2
Presents the grammar and syntax of jazz and is the second course of the sequence. Units of study include elements of form, harmonic substitution, reharmonization, non-standard forms and harmonic progressions. Post-tonal concepts as they relate to jazz are introduced as well as foundational studies in jazz rhythm. Aural studies of all theoretical material is integrated throughout the semester.
Requisites: Requires prerequisite course of MUSC 3081 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.

MUSC 3133 (2) Teaching General Music I
Provides an overview of general music teaching with emphasis on developmentally appropriate strategies and materials. Required for all music education majors as partial fulfillment of course work leading to K-12 music licensure. Offered spring only.
Requisites: Requires prerequisite course of MUSC 2103 (minimum grade C-). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Music Education

MUSC 3153 (2) Teaching Woodwind Instruments
For music education majors with instrumental or instrumental/general emphasis. Develops basic performance skills on three or more woodwind instruments. Addresses teaching strategies and other specialized topics related to beginning and intermediate woodwind instruction. Offered spring only.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Music Education

MUSC 3163 (2) Teaching String Instruments
For music education majors with instrumental or instrumental/general emphasis. Develops basic performance skills on three or more string instruments. Addresses teaching strategies and other specialized topics related to beginning and intermediate string instruction. Offered fall only.
Requisites: Restricted to College of Music (MUSC) majors or graduate students only.
Additional Information: Departmental Category: Music Education

MUSC 3176 (2) Conducting 1
Introduces conducting and rehearsal techniques. Offered fall only.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Choral and Instrumental Music

MUSC 3186 (2) Conducting II
Introduces conducting and rehearsal techniques. Offered spring only.
Requisites: Requires prerequisite course of MUSC 3176 (minimum grade D-). Restricted to College of Music (MUSC) undergraduate students only.
Additional Information: Departmental Category: Choral and Instrumental Music

MUSC 3191 (2) Studio Recording Techniques
Introduces various aspects of studio recording techniques and explores the technical side of audio recording in the studio setting. Expands upon knowledge and skills learned in Recording Techniques (MUSC 2091).
Requisites: Prerequisite of Recording Techniques MUSC 2091. Restricted to College of Music (MUSCU) undergraduate students only.
Grading Basis: Letter Grade

MUSC 3193 (2) Vocal Pedagogy and Literature for Young Voices
Provides an overview of vocal anatomy/function, care of the voice, vocal repertoire, teaching strategies,and other specialized topics related to singing instruction in both private studio and public school choral settings. Fall section for instrumentalists; spring section for vocalists.
Requisites: Restricted to College of Music (MUSC) majors or graduate students only.
Additional Information: Departmental Category: Music Education

MUSC 3223 (2) Teaching Brass Instruments
For music education majors with instrumental or instrumental/general emphasis. Develops basic performance skills on three or more brass instruments. Addresses teaching strategies and other specialized topics related to beginning and intermediate brass instruction. Offered spring only.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Music Education

MUSC 3226 (1) Percussion Literature and Pedagogy for Undergraduate Percussion Majors
Explores, examines and analyzes percussion music, performance techniques and how to teach them through readings, discussion, analysis, extensive listening, and score study. The course is designed to meet the specific needs and requirements of the individual student.
Repeatable: Repeatable for up to 3.00 total credit hours.
Requisites: Requires prerequisite course of MUSC 2997 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.
Grading Basis: Letter Grade

MUSC 3243 (2) Teaching Percussion Instruments
Provides an introduction to playing techniques and pedagogical principles necessary for music educators to teach young students, including general understanding of the techniques used in playing and teaching percussion instruments in the school music program. Required of all instrumental band and instrumental band-jazz track music education students. Offered fall only.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Grading Basis: Letter Grade

MUSC 3253 (2) Jazz Techniques for the Music Educator
Prepares the music educator for successful experiences teaching jazz at the secondary level. Students gain insights into performance and rehearsal techniques for the instrumental jazz ensemble. Explores approaches for teaching jazz theory, improvisation, and selecting literature for young students. Own instrument required for certain classes. Offered spring only.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Recommended: Prerequisites MUSC 1111 and MUSC 2103.
Additional Information: Departmental Category: Music Education

MUSC 3256 (2) Guitar Pedagogy
Survey and develop appropriate teaching materials and techniques; learn how to identify and address the most common technical problems experienced by guitar students; create strategies for how to avoid the development of problems in guitar beginners.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Grading Basis: Letter Grade

MUSC 3273 (2) String Pedagogy and Literature
Examines instructional methods/materials and pedagogical approaches appropriate for beginning to advanced string students in private studio, small ensemble, or large ensemble contexts. Topics may include group teaching strategies, as well as contemporary approaches including Rolland and Suzuki. Offered spring only.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Recommended: Prerequisites MUSC 2103 and MUSC 3163.
Additional Information: Departmental Category: Music Education

MUSC 3345 (2) Piano Pedagogy 1
Discusses teaching philosophies, objectives, and procedures. Examines and evaluates methods and materials. Studies practical aspects with which the private teacher is concerned. Offered fall of even-numbered years.
Repeatable: Repeatable for up to 12.00 total credit hours.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Keyboard

MUSC 3355 (2) Piano Pedagogy 2
Materials and techniques for teaching piano with a focus on the intermediate level student. Offered only in spring of odd-numbered years.
Repeatable: Repeatable for up to 12.00 total credit hours.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Keyboard

MUSC 3363 (2) Marching Band Techniques
Helps develop the skills needed to administer and teach all aspects of a contemporary high school marching band. Includes drill conception and design, instruction, organization, and administration. Offered fall only.
Requisites: Requires prerequisite course of MUSC 2103 and EMUS 1287 or EMUS 3287 (all minimum grade D-). Restricted to College of Music (MUSCU) majors or graduate students only.
Additional Information: Departmental Category: Music Education

MUSC 3444 (1) French Diction
Designed for the understanding of lyric French diction, the international phonetic alphabet, and its application to classical singing, as well as various musical styles of French classical vocal literature. Required of Junior BM voice majors.
Requisites: Requires prerequisite course of MUSC 1554 (minimum grade D-). Restricted to College of Music (MUSCU) majors or graduate students only.
Recommended: Prerequisite MUSC 3464.
Additional Information: Departmental Category: Voice

MUSC 3464 (1) German Diction
Designed for the understanding of lyric German diction, the international phonetic alphabet, and its application to classical singing, as well as various musical styles of German classical vocal literature. Required of sophomore BM voice majors.
Requisites: Requires prerequisite course of MUSC 1554 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Voice

MUSC 3642 (3) History of Jazz 1
Utilizing musical examples and analysis, this course studies the distinctly American art form of jazz music from its origins up to the 1950's, including the various traditions, practices, historical events and people most important to its evolution. Offered fall only.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Musicology

MUSC 3652 (3) History of Jazz 2
Utilizing musical examples and analysis, this course studies the distinctly American art form of jazz music from the 1950's to the present, including the various traditions, practices, historical events and people most important to its evolution. Offered spring only.
Requisites: Requires a prerequisite course of MUSC 3642 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.
Grading Basis: Letter Grade

MUSC 3772 (3) West African Music and Culture in Ghana
Provides hands-on and experiential enrichment for students to interact at several levels with a local community in Ghana. Classroom lectures will be combined with direct participation in drumming and dancing, field trips to participate in festivals and court ceremonies, field trips to kente weaving village, adinkra cloth making, wood carving villages, and museums.
Equivalent - Duplicate Degree Credit Not Granted: MUEL 3772
Requisites: Requires prerequisite courses of MUSC 2782 and MUEL 2772 (all minimum grade D-). Restricted to students with 27-56 credits (Sophomore) non-College of Music majors only.
Additional Information: Departmental Category: Musicology

MUSC 3802 (3) History of Western Music 1
Surveys Western art music with stylistic analysis of representative works from all major periods through the Baroque. See also MUSC 3812.
Requisites: Requires prerequisite course of MUSC 1111 or MUSC 3091 (minimum grade D-). Restricted to College of Music (MUSC) undergraduate students only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Musicology

MUSC 3812 (3) History of Western Music 2
Surveys Western art music with stylistic analysis of representative works from all major periods after the Baroque. See also MUSC 3802.
Requisites: Requires prerequisite course of MUSC 1111 (minimum grade D-). Restricted to College of Music (MUSC) undergraduate students only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Musicology

MUSC 3997 (1) Junior Recital
To be completed by the second semester of the junior year.
Repeatable: Repeatable for up to 12.00 total credit hours.
Requisites: Requires prerequisite course of MUSC 2997. Restricted to College of Music (MUSC) undergraduate students only.
Additional Information: Departmental Category: Theses and Recitals

MUSC 4001 (2) New Musical Styles and Practices
Explores a variety of music from the 20th and 21st centuries beginning with Stravinsky and moving through current trends. Involves a mix an analysis/exploration of this music with short composition assignments imitating the different styles. Offered spring of odd-numbered years.
Requisites: Requires prerequisite courses of MUSC 2111 and MUSC 2131 (all minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 4011 (2) 16th Century Counterpoint
Provides a stylistic study of the main contrapuntal genres of the period including free, two- and three-part imitative counterpoint in the style of Palestrina. Provides a foundation in species counterpoint, working towards free counterpoint; stresses composing in 16th century styles. Offered fall of even-numbered years.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5011
Requisites: Requires prerequisite courses of MUSC 2111 and MUSC 2131 (all minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 4012 (3) African Music
Studies music cultures of Africa and the Black Diaspora, including folk and art music traditions, religious and popular music genres. Specific course topics could cover any or all of these styles, including exploring interconnections of musical stylistics of Africa and the Black Diaspora.
Equivalent - Duplicate Degree Credit Not Granted: MUEL 4012 and MUSC 5012
Requisites: Requires prerequisite course of MUSC 1802 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.
Additional Information: Departmental Category: Musicology

MUSC 4021 (2) 18th Century Counterpoint
Provides a stylistic study of main contrapuntal genres of the period including inventions, suite movements and fugues. Provides a foundation in species counterpoint; stresses analysis and composing in the style. Offered fall only.
Requisites: Requires prerequisite courses of MUSC 2111 and MUSC 2131 (all minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 4031 (2) Jazz Arranging 1
Study of notation, score layout, transpositions, basic harmonic and melodic analysis, basic chord voicings, and composition for a small and large jazz ensemble. Use of notation software such as Finale or Sibelius. Offered fall semester only.
Requisites: Requires prerequisite course of MUSC 3091 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 4034 (3) Musical Theatre History 1 - Antecedents through Musical Comedy
Introduces musical theatre using historical and cultural contexts. Topics cover the social and historical elements inherent in the development of the Broadway Musical Theatre. Students will evaluate and compare a variety of musicals and their antecedents from the 19th Century to the era of Musical Comedy, including minstrel shows, vaudeville, operetta, burlesque, variety shows and musical revues.
Requisites: Restricted to BFA Musical Theatre and BM Musical Theatre students only.
Grading Basis: Letter Grade

MUSC 4041 (2) Orchestration
Studies advanced orchestration techniques through score analysis and student projects. Offered fall of odd-numbered years.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 4044 (3) American Musical Theatre History 2 - Golden Age to Contemporary
Continues to investigate Musical Theatre within its historical and cultural contexts, analyzing the cultural influence it has had on society. Students will evaluate and compare musicals from the start of the Golden Age to the modern era including Rock, Popsical, Jukebox, and Contemporary styles. This course is a continuation of Musical Theatre History 1.
Requisites: Restricted to Musical Theatre (MMTH-BMUS) students only.
Grading Basis: Letter Grade

MUSC 4061 (2) Tonal Analysis
Surveys tonal analytical techniques and forms of tonal music, including binary forms, ternary forms, rondo (and others) through study of selected works. Offered spring only.
Requisites: Requires prerequisite courses of MUSC 2111 and MUSC 2131 (all minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 4071 (2) Post-Tonal Theory and Analysis
Focuses on theory and analysis of post-tonal literature pre-1945. Offered fall of odd-numbered years.
Requisites: Requires prerequisite courses of MUSC 2111 and MUSC 2131 (all minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 4078 (1) Piano Technician for Pianists
Familiarizes pianists with the development of the modern grand piano, its construction and the proper terminology of parts and specifications. Trains pianists in minor repairs and adjustments of the grand piano action and in minor tuning tasks.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5078
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Recommended: Prerequisite piano majors.
Additional Information: Departmental Category: Interdepartmental Courses

MUSC 4091 (2) Jazz Arranging 2
Continuation and expansion of studies in MUSC 4031. Survey and analysis of major composers and arrangers of the idiom. Course focuses on creating several arranging projects for a jazz ensembles. Offered spring of odd-numbered years.
Requisites: Requires prerequisite course of MUSC 4031 (minimum grade D-). Restricted to College of Music undergraduate students only.
Recommended: Prerequisite MUSC 3081.
Additional Information: Departmental Category: Theory and Composition

MUSC 4101 (1-3) Theory and Aural Skills Review
Reviews tonal harmony, voice leading, and essential aural skills. Prepares graduate students for more advanced work in music theory. Students may register for aural skills only (1 credit), theory only (2 credits) or both theory and aural skills (3 credits). May not be taken pass/fail. Aural skills section offered fall and spring. Theory section offered spring.
Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 4103 (1) Introduction to Student Teaching
Represents the first half of the professional internship year. Familiarizes students with the schools and music programs in which they plan to student teach. Music placements may consist of elementary and high school, elementary and middle school, or middle school and high school.
Requisites: Requires a prerequisite course of MUSC 4113 or MUSC 4313 or MUSC 4443 (minimum grade C-). Restricted to College of Music undergraduate students only.
Additional Information: Departmental Category: Music Education

MUSC 4106 (2) Guitar Literature
An analytical and historical survey of the repertory of the guitar and its antecedents from the renaissance to the present day.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5106
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Choral and Instrumental Music

MUSC 4111 (2) Composing at the Computer
Discover strategies and techniques for generating and manipulating sound at the computer. Student projects will include compositions, soundscapes, ambient environments and soundtracks for multimedia. Available to students without prior experience with computer music or composition. Offered fall of odd-numbered years.
Requisites: Requires prerequisite course of MUSC 2061 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 4112 (3) Ethnomusicology
Examines the definition, scope, and methods of ethnomusicology, the discipline that focuses on approaches to the study of music theory, history, and performance practices of world cultures.
Requisites: Requires prerequisite course of MUSC 1802 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.
Additional Information: Departmental Category: Musicology

MUSC 4113 (3) Teaching General Music 2
Provides an in-depth examination of teaching and learning processes in the elementary general music classroom, based on the integration of child development and musical development theories with content and delivery skills appropriate for K-5 general music classrooms. Students implement and evaluate music instruction, design curricular projects, and build a repertoire of vocal, instrumental and speech-based arrangements. Offered fall of odd-numbered years.
Requisites: Requires prerequisite course of MUSC 2103 (minimum grade C-). Restricted to College of Music (MUSC) undergraduate students only.
Additional Information: Departmental Category: Music Education

MUSC 4121 (3) Topics in Music Technology
Exploration of issues, techniques, and tools of music technology. Topics vary from term to term and may include: interactive systems for performance; teaching and learning; computer music instrument design; digital synthesis and signal processing; music in intermedia, sound design and analysis. Lectures on work sessions will support student projects.
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Requires prerequisite course of MUSC 2061 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 4122 (3) Music in Jewish Culture
Introduces students to a wide range of musical styles, traditions, genres, performers, composers, events and works that are part of Jewish culture, focusing on the twentieth and twenty-first centuries. Provides tools for understanding music on its own and in connection with issues of identity, diaspora, memory and liturgy. Includes opportunities for creative and critical engagement with Jewish music.
Equivalent - Duplicate Degree Credit Not Granted: JWST 4122
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Musicology

MUSC 4133 (3) Student Teaching Practicum
Offers practice teaching under the guidance of a master music teacher.
Requisites: Requires prerequisite course of MUSC 4103 (minimum grade C-). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Music Education

MUSC 4141 (2) Instrument Design Lab: Sound, Perception & Creativity
Explores fundamental physical concepts of sound and music in a hands-on laboratory environment. Surveys a number of topics such as tuning, temperament, harmony and timbre through the construction of PVC overtone flutes, an investigation in the timbral intention of Dolly Parton's vocal technique, physical modeling through the testing of 3D-printed vowel flutes, the construction of a "Long String Instrument," and more. The course culminates in each student inventing, designing, and demonstrating their own new instrument.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5141
Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.
Grading Basis: Letter Grade

MUSC 4142 (3) American Indian Music
Examines Native North American musical cultures, emphasizing music as an integral part of religious expression and community life.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5142
Requisites: Requires prerequisite course of MUSC 1802 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.
Additional Information: Departmental Category: Musicology

MUSC 4143 (2) Topics in Choral Music Education
Prepares students to teach, conduct and facilitate music making in various choral ensembles. Examines skills, teaching techniques and administrative procedures necessary for developing and maintaining various choirs at the elementary through high school levels. Includes discussion of current topics in choral music education and community choral field experiences. Offered fall terms, every two years.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5143
Requisites: Requires prerequisite course of MUSC 2103 (minimum grade C-). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Music Education

MUSC 4151 (2) Topics in Music Analysis
Examines critically a specific topic or repertory, such as Song Analysis or Music of Brahms. Uses readings and analyses, with grades to be determined from reading responses, analytical assignments and writing. Offered fall of even-numbered years.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Requires prerequisite courses of MUSC 2111 and MUSC 2131
Grading Basis: Letter Grade
Additional Information: Departmental Category: Theory and Composition

MUSC 4152 (3) East Asian Music
Surveys the development of music in Japan, China and Korea through the in-depth study of particular styles of traditional music. The course emphasizes the study of music and culture, particularly music's relationship to religion, politics, language, literature, dance and theatre.
Requisites: Requires prerequisite course of MUSC 1802 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.
Additional Information: Departmental Category: Musicology Departmental Category: Asia Content

MUSC 4153 (1) Percussion Class and Pedagogy
Required of all music education majors. Presents knowledge and skills necessary for music educators to teach young students, including a general understanding of the techniques used in playing and teaching percussion instruments in the school music program. Offered fall only.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Music Education

MUSC 4161 (2) Advanced Jazz Composition and Analysis
Provides in depth listening, score study, and analysis, exploring major composers in jazz and their innovations in composition. "Foundational" topics concerning melody, form, and orchestration are studied to provide a framework for further analysis. Influences of western art music, American folk and popular music considered. Final projects to be performed and recorded by a CU jazz ensemble.
Requisites: Requires prerequisite of MUSC 3091 and MUSC 3081 (all minimum grade D-). Restricted to College of Music (MUSC) undergraduate students only.
Grading Basis: Letter Grade

MUSC 4163 (2) Choral Literature for School Ensembles
Examination of literature, materials, and methods appropriate for teaching choral music in secondary schools. Offered fall of odd-numbered years.
Requisites: Requires prerequisite course of MUSC 2103 (minimum grade C-). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Music Education

MUSC 4168 (3) World Music Theories
Examines music rules, concepts or music theories and sociocultural elements that musicians use in creating musical sound, with emphasis on music practices from a variety of world traditions; observing shared and diverging principles, making cross-cultural comparisons and developing a new pedagogy that supports the substantive study of global musics.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5168
Requisites: Requires prerequisite course of MUSC 1802 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.
Recommended: Prerequisite MUSC 1802 or MUSC 2772 or MUSC 2782 or MUSC 4112.
Additional Information: Departmental Category: Theory and Composition

MUSC 4171 (2) Advanced Jazz Improvisation and Analysis
Surveys important jazz improvisers and their historical context. Students engage in multiple methods of transcription and analysis. Listening plays a central role throughout the course and class discussions will foster the ability to engage in critical analysis of performances. The final project is an in-depth transcription of analysis of an improvisation.
Repeatable: Repeatable for up to 12.00 total credit hours.
Requisites: Requires prerequisite of MUSC 3081 and MUSC 3091 (all minimum grade D-). Restricted to College of Music (MUSC) undergraduate students only.
Grading Basis: Letter Grade

MUSC 4176 (2) Conducting 3
This is a study in advanced conducting techniques. Demonstration of advanced score study techniques as well as the application to gesture and rehearsal techniques linked with conducting will be explored. Participation fully in discussion readings and contribute to the learning of all is expected.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5176
Repeatable: Repeatable for up to 4.00 total credit hours. Allows multiple enrollment in term.
Requisites: Requires prerequisite course of MUSC 3186 (minimum grade B-). Restricted to College of Music undergraduates majoring in Music Education (MUSE) only.
Grading Basis: Letter Grade

MUSC 4191 (2) Advanced Recording
Study of advanced recording techniques and concepts beyond those covered in MUSC 2091 involving multiplemicrophones for ensemble concerts and recording sessions within and outside of the College of Music. Offered spring of even-numbered years.
Requisites: Requires prerequisite course of MUSC 2091 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 4193 (1) Student Teaching Seminar
Required for all music student teachers. Addresses topics of concern to beginning teachers including classroom management, interpersonal skills, legal issues, job search strategies and capstone project development.
Requisites: Requires prerequisite course of MUSC 4103 (minimum grade C-). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Music Education

MUSC 4202 (3) Special Topic in Musicology: Current and Critical Issues
Examination of a specific topic of current or critical interest within areas of music history, ethnomusicology, critical theoryand practice across the spectrum of Western, Popular and World Music traditions. Designed as a capstone course for music majors who have completed a full complement of musicology courses. Topics vary from term to term. Instructor consent is required for non-music majors.
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Requires prerequisite course of MUSC 1802 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Musicology

MUSC 4203 (1) Music Methods Practicum
Provides students with opportunities to observe and practice the use of various teaching techniques and relate them to concepts presented in the methods course. Students consult with the instructor to determine appropriate placements in schools.
Requisites: Requires prerequisite course of MUSC 2103 (minimum grade C-). Requires corequisite course of MUSC 4313 or MUSC 4443. Restricted to College of Music (MUSC) undergraduate students only.
Additional Information: Departmental Category: Music Education

MUSC 4223 (2) Secondary Music Teaching Approaches
Prepares students to teach and facilitate musical learning in non-performance secondary music classes. Includes units on music technology, music theory, music appreciation and class guitar. Connects experiential components to strategies for teaching and project design for middle and high school classrooms. Offered fall only.
Requisites: Requires a prerequisite course of MUSC 2103 (minimum grade D-).
Grading Basis: Letter Grade

MUSC 4313 (3) Teaching Choral Music
Examines choral music curricula, instructional materials and teaching techniques appropriate for secondary choral settings. Also addresses administrative strategies for choral music programs. Offered spring only.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5313
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Recommended: Prerequisite MUSC 2103.
Additional Information: Departmental Category: Music Education

MUSC 4323 (3) Differentiating Instruction in K-8 Music Classrooms
Designed to focus on differentiating and individualizing instruction for K-8 music students representing diverse cultural, linguistic, and ability backgrounds. Includes developmental and practical orientations to pedagogical issues including planning, instruction and assessment. Emphasizes evidence-based teaching practices and programmatic interventions that support student learning and engagement in music instruction.
Requisites: Requires a prerequisite course of MUSC 2103 (minimum grade D-). Restricted to College of Music (MUSC) majors or graduate students only.
Grading Basis: Letter Grade

MUSC 4325 (2) Keyboard Literature 1
Surveys keyboard music from 1600 to 1830. Offered fall semester of even-numbered years.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Keyboard

MUSC 4335 (2) Keyboard Literature 2
Surveys keyboard music from 1830 to the present. Offered spring semester of even-numbered years.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Keyboard

MUSC 4336 (2) Brass Pedagogy
Analyzes pedagogical techniques and philosophies of teaching brass instruments, and examines materials. Offered every other spring terms.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5336
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Grading Basis: Letter Grade

MUSC 4346 (2) Woodwind Pedagogy
Analyzes pedagogical techniques and philosophies of teaching wind instruments, and examines materials. Offered every other spring term.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5346
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Grading Basis: Letter Grade

MUSC 4405 (2) Basso-Continuo Accompaniment
Studies the history, theory and practice of Basso-continuo accompaniment. Provides practical instruction in realizing harmony from a given bass line (figured or unfigured), projecting affect and creating dynamics at the harpsichord. Emphasizes individual cognition and creativity.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5405
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Keyboard

MUSC 4415 (2) Advanced Basso Continuo
Explores advanced basso continuo, serving as more in depth study for those who have completed or tested out of Basso-Continuo Accompaniment (MUSC 4405).
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5415
Requisites: Prerequisite of MUSC 4405. Restricted to College of Music (MUSCU) undergraduate students.

MUSC 4443 (3) Teaching Instrumental Music
Examines instrumental music curricula, instructional materials and teaching techniques appropriate for rehearsal, class, and lesson settings. Also addresses administration strategies for instrumental music programs. Offered spring only.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5443
Requisites: Requires prerequisite course of MUSC 2103 (minimum grade C-). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Music Education

MUSC 4608 (1) Wellness for Musicians 2
Develops and further integrates material covered in Wellness for Musicians 1. Deeper exploration of somatic and wide-ranging wellness strategies, including FM Alexander¿s conception of Inhibition and other approaches for proactive self-care and improvement. Consideration of how to integrate methodologies in teaching, pedagogy, and practice. Students will complete several projects related to their specific musical pursuits and interests.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5808
Repeatable: Repeatable for up to 2.00 total credit hours.
Requisites: Requires prerequisite course of MUSC 2608 (minimum grade C-). Restricted to College of Music undergraduate students only.
Additional Information: Departmental Category: Interdepartmental Courses

MUSC 4666 (3) Chamber Music Lit WW/Prc
Repeatable: Repeatable for up to 12.00 total credit hours.
Additional Information: Departmental Category: Choral and Instrumental Music

MUSC 4712 (3) Renaissance Music
Provides a repertory and analysis of polyphonic music, 1400-1600.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5712
Requisites: Requires prerequisite courses of MUSC 1802 and MUSC 3802 (all minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.
Additional Information: Departmental Category: Musicology

MUSC 4752 (3) Women in Music
Examines the role of women as creators and performers of Western Music. Explores related issues in musicology, including canon formation, reception history and feminist aesthetics.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5752
Requisites: Requires prerequisite course of MUSC 1802 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.
Additional Information: Departmental Category: Musicology

MUSC 4772 (3) History of Opera
Examines representative operas from the 17th through the 21st centuries. Emphasizes both cultural and analytical aspects and surveys related musicological literature.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5772
Requisites: Requires prerequisite courses of MUSC 1802 and MUSC 3802 or MUSC 3812 (all minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.
Additional Information: Departmental Category: Musicology

MUSC 4802 (3) Studies in 20th Century Music
Offers intensified work in history of music in the 20th century. Topics vary from year to year.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5802
Requisites: Requires prerequisite courses of MUSC 1802 and MUSC 3812 (all minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.
Additional Information: Departmental Category: Musicology

MUSC 4808 (1-3) Internship in Music Industry
Provides an opportunity for music majors to gain real world experience in a professional music organization outside of the CU Boulder academic environment and to engage with music industry organizations in the community (for profit or non-profit) while pursuing specific tasks or projects relevant to the student's career goals.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

MUSC 4852 (3) 17th and Early 18th Century Music
Examines music and writings about music from the Baroque era. Emphasizes cultural and musical analysis and surveys current musicological literature.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5852
Requisites: Requires prerequisite courses of MUSC 1802 and MUSC 3802 (all minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.
Additional Information: Departmental Category: Musicology

MUSC 4862 (3) African American Music
Examines the sacred and secular genres of Black American music from folk spirituals to contemporary gospel and hip-hop in their cultural and historical contexts. Examines individual composers and performers in specific historical contexts in order to understand the meanings behind certain Black musical stylistics, sound ideals and aesthetic preferences. Formerly MUSC 2802.
Requisites: Requires prerequisite course of MUSC 1802 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.
Additional Information: Departmental Category: Musicology

MUSC 4872 (3) Late 18th and 19th Century Music
Studies European and American music from the last developments of the styles through romanticism and its later 19th century reverberations.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5872
Requisites: Requires prerequisite courses of MUSC 1802 and MUSC 3812 (all minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.
Additional Information: Departmental Category: Musicology

MUSC 4892 (3) Latin American Music
Explores music of cultures of the Americas south of the United States and in the diaspora, emphasizing the relationships of music and culture in folk, popular and arts styles.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5892
Requisites: Requires prerequisite course of MUSC 1802 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.
Additional Information: Departmental Category: Musicology

MUSC 4908 (1-3) Arts Administration Internship
Engage with music/music business organizations in the community (for profit or non-profit) to pursue specific tasks or projects relevant to the student's career goals. A minimum of 48 hours is required per semester for one credit.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5908
Repeatable: Repeatable for up to 3.00 total credit hours.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Music Entrepreneurship

MUSC 4957 (1-4) Senior Thesis
Repeatable: Repeatable for up to 12.00 total credit hours.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Theses and Recitals

MUSC 4958 (2) Community Performances
Explore the real-world issues of planning and presenting concerts. Learn to program music for all types of audiences, gain confidence speaking about your music and handle the logistics of concert production. Discuss the role of concerts in the 21st century and examine new styles of presentation, audience engagement and outreach. Course culminates in a concert presented in a local venue.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5958
Requisites: Requires prerequisite course of MUSC 2918 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Music Entrepreneurship

MUSC 4968 (3) Management and Leadership in the Arts
Focus on management, leadership, and communication strategies and their application to arts organizations. Concepts and approaches for leaders of small, medium, and large arts organizations in both the for-profit and nonprofit sectors, including human resource management, problem solving, and effective communication will be examined. Students will practice and refine their written communication skills by writing clearly and concisely throughout the course.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5938
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Grading Basis: Letter Grade

MUSC 4978 (3) Introduction to Arts Administration
Introduce students to current trends in arts administration, explore the fundamentals of managing arts organizations and develop concrete tools for managing boards, volunteers and staff, effective fund raising, strategic planning and program development. Current issues, the role of the arts and arts advocacy will be discussed.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5978
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Music Entrepreneurship

MUSC 4988 (3) The Entrepreneurial Artist
Learn the core principles of entrepreneurship, such as idea formation, venture models, opportunity assessment, market analysis and strategies for launching a venture and apply them to entrepreneurial ideas. Lectures, projects, entrepreneur interviews and case studies will culminate in a feasibility study for an original entrepreneurial concept.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5988
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Recommended: Prerequisite MUSC 2918.
Additional Information: Departmental Category: Music Entrepreneurship

MUSC 4997 (1) Senior Recital
To be completed by the second semester of the senior year.
Repeatable: Repeatable for up to 12.00 total credit hours.
Requisites: Requires prerequisite class of MUSC 3997 (minimum grade D-). Restricted to College of Music undergraduate students only.
Additional Information: Departmental Category: Theses and Recitals

MUSC 4998 (1) Music Entrepreneurship Certificate Capstone
Completes the Certificate in Music Entrepreneurship. Students will develop an art-based entrepreneurial concept, engage in customer discovery, refine their business model, create a marketing plan, research relevant intellectual property issues, and complete a business model canvas for their venture.
Requisites: Requires prerequisite courses of MUSC 2918, 4988, BUSM 2001 and BUSM 4001 (min. grade D-). Restricted to senior (90-180 credits) College of Music (MUSCU) majors.
Grading Basis: Letter Grade

NCMU 1172 (0.3-3) Body Mapping for Musicians
Repeatable: Repeatable for up to 3.00 total credit hours.

NCMU 1177 (0.3-3) Kabuki: A Musical Theater
Repeatable: Repeatable for up to 3.00 total credit hours.

NCMU 1178 (0.3-3) Getting Inside the Music of the Colorado Music Festival
Repeatable: Repeatable for up to 3.00 total credit hours.

NCMU 4101 (0.3-3) Theory and Aural Skills Review
Reviews tonal harmony, voice leading, and essential aural skills. Prepares graduate students for more advanced work in music theory.
Repeatable: Repeatable for up to 3.00 total credit hours.

Music Education - Bachelor of Music Education (BMusEd)

The Music Education Department's experienced music teacher educators aim to prepare students for successful careers in K–12 music education. Courses focused on learning principles and teaching methods, field experiences in elementary and secondary schools, and opportunities for involvement and leadership in special programs and organizations (e.g., Middle School Ensemble Program, Summer Music Academy, Collegiate Chapter of the National Association for Music Education) provide students with the knowledge base, skills and practical experience needed to teach music effectively. Over the past 20 years, there has been a near 100 percent job placement rate for graduates of the music education program.

Because of the varying challenges and opportunities associated with teaching music in K–12 school contexts, the undergraduate music education curriculum strikes a balance between specialization and comprehensive preparation. BME students must demonstrate a sufficiently broad knowledge of the entire music program/curriculum, but also possess the specialized skills necessary to be a successful general music, choir, orchestra or band instructor.

Program Emphases

Five basic curricular options are provided for students pursuing the Bachelor of Music Education degree:

- choral
- choral–general
- instrumental
- instrumental–general
- instrumental–jazz

The choral–general and instrumental–general emphases include a larger concentration of coursework and field experiences related to elementary general music teaching, while the choral, instrumental and instrumental–jazz emphases involve more specialized coursework and field experiences related to the teaching of choir, orchestra or band classes at the secondary level. Within each degree emphasis, students have a limited number of elective credits that may be used to further customize degree work according to their interests and needs.

As first-year students, BME students primarily complete core studies in music and liberal arts, but also enroll in their first music education course (Becoming a Music Teacher). The first early field experiences are completed during the sophomore year. During the junior year, students enroll in capstone methods courses and specialized electives that allow for more detailed and sustained study of curricular models, instructional materials and teaching methods. Internships and full-time student teaching provide culminating experiences during the senior year, as students work in partnership with experienced public school teachers and assume the role and responsibilities of a professional music educator. Internship and student teaching placements are chosen in consultation with faculty advisors and the music education chair.

Requirements

A minimum of 126 credit hours with a cumulative GPA of 2.75 must be earned for the BME degree, with no grade below C- in a course.

In addition to teacher education coursework and 150 clock hours of early field experience, music education majors complete 24 credit hours in liberal arts disciplines (English composition, arts and humanities, mathematics, social sciences, natural sciences) and coursework in music (music theory and aural skills, musicology and ethnomusicology, applied study, ensemble, keyboard and voice, and conducting).

General education requirements in the liberal arts and core requirements in music are designated by the music education faculty and approved by the College of Music curriculum committee.

Four-Year Plans of Study

Choral Music Emphasis

Students must take keyboard or voice as the primary applied area, or petition the music education faculty for an exception. A minimum of five of the seven semesters of required ensemble registration must be in a conducted choral ensemble (Chamber Singers, University Choir, Festival Chorus or Treble Chorus). For keyboard majors, two semesters of independent accompanying may be applied to the ensemble requirement.

Year One		Credit Hours
PMUS 1XXX	Applied Instruction	6
Ensemble		2
MUSC 1101 & MUSC 1111	Semester 1 Theory and Semester 2 Theory	4
MUSC 1121 & MUSC 1131	Aural Skills Lab, Semester 1 and Aural Skills Lab, Semester 2	2
MUSC 1802	Introduction to Musical Styles and Ideas	3
PMUS 1105 & PMUS 1205 (voice majors) OR PMUS 1184 & PMUS 2184 (piano majors)		2
MUSC 1554	English Diction	1
MUSC 1103	Becoming a Music Teacher	1
Written communication		3
Non-music core requirements		6
Non-music electives		3

Instrumental—General Music Emphasis

Students must take keyboard, strings or wind/brass/percussion as the primary applied area or petition the music education faculty for an exception.

For keyboard majors, a minimum of four of the seven semesters of required ensemble registration must be in a conducted instrumental ensemble (Symphony Orchestra, Philharmonia, Campus Orchestra, Wind Symphony, Symphonic Band, Concert Band or Campus Band), one semester must be in a conducted choral ensemble, and one semester must be in a world music ensemble. One semester of independent accompanying may be applied to the ensemble requirement.

For string majors, a minimum of five of the seven semesters of required ensemble registration must be in a conducted instrumental ensemble, one semester must be in a conducted choral ensemble, and one semester must be in a world music ensemble.

For woodwind, brass and percussion majors, a minimum of four of the seven semesters of required ensemble participation must be in a conducted instrumental ensemble, one semester must be in marching band, one semester must be in a conducted choral ensemble, and one semester must be in a world music ensemble.

Freshmen are strongly encouraged to be in Marching Band (EMUS 1287) their first semester.

Dual Degree Program

BMus/BMusEd in Music Performance and Music Education

Qualified music majors who have been approved by the relevant major departments may elect to complete a dual degree in music performance (woodwinds, brass and percussion, strings or voice) and music education (instrumental or choral tracks). Requirements for these dual degree programs range in total credit hours and typically include a minimum of 10 semesters of study (including one semester of full-time student teaching) to complete all requirements.

Learning Outcomes

- Perform solo and ensemble repertoire demonstrating musical artistry, technical proficiency and stylistic understanding.
- Demonstrate an understanding of theoretical studies, including sight-reading and ear training.
- Demonstrate an understanding of historical studies including the analysis of stylistic periods and music of non-Western cultures.
- Demonstrate a sufficiently broad knowledge of the entire K-12 music program/curriculum.
- Develop specialized pedagogical skills necessary to be a successful general music, choir, orchestra or band director.

Academic Enrichment Programs Education Abroad

CU Boulder Education Abroad offers more than 350 approved programs in over 65 countries around the world. Program options exist for every major and are offered for every term including winter break and summer break, with numerous options of varying lengths and credit amounts. Planning to go abroad varies by major, but it is recommended that students have an initial planning conversation with an academic advisor as early as possible.

A growing list of over 10,000 pre-approved courses provides approved courses abroad for various degree requirements. Program costs vary, and include over 30 programs that are comparable to semester costs for in-state students. Students can use existing financial aid and institutional scholarships for a semester/year abroad, and additional scholarship opportunities exist.

Please see the following links for additional information and resources:

- Search for programs by major (http://abroad.colorado.edu/?FuseAction=Programs.AdvancedSearch), location, term, program type, cost and more.
- View a list of summer/winter break faculty-led Global Seminar (https://abroad.colorado.edu/?FuseAction=Programs.AdvancedSearch) courses.
- View study abroad guides (http://abroad.colorado.edu/?FuseAction=Abroad.ViewLink&Parent_ID=0&Link_ID=B207274A-0059-71AF-E694D487757CFC7C) for various majors and pre-approved course lists.

Library Research

Several courses in information access and library research methods are offered to students who wish to explore the structure, organization, retrieval and evaluation of information for their study and career needs.

Course code for this program is LIBR.

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Courses

LIBR 2000 (3) Introduction to Information Literacy
This course will introduce information practices and the integrated literacies for discovering information, exploring how information is produced, and for participating in collaborative creation of new knowledge. Topics include an introduction to the research process, information ethics, and critical analysis of sources. The course will prepare students for both university level research and information practices after graduation.
Requisites: Restricted to students with 0-56 credits (Freshmen or Sophomore) only.

LIBR 3010 (3) Information Landscapes and Literacies
Through sustained inquiry into information literacy topics, students will examine the ways that our critical understanding of the world are shaped by information. Students will explore information practices and cultivate the capacity to draw meaning from and to contribute to information landscapes. Emphasizes information literacy, critical thinking, and research.

LIBR 3030 (1) Civic Engagement in a Changing Information Landscape
With a 24 hour news cycle, political use of social media, and the growth of disinformation, being an informed citizen has become increasingly more important and difficult. With a practical approach on participation in government, students will research and discuss the United States political system, examine the current political climate, what it means to be a good digital citizen, and engage in opposing views.
Grading Basis: Letter Grade

LIBR 3900 (1-3) Independent Library Research
In-depth library research project for upper-division students. Instructor consent required.

LIBR 4029 (1) Art History Research Methods
In this class we will investigate how art scholarship is formed and organized; learn to expertly navigate the vast array of art research resources; and explore advanced techniques for searching both online and offline sources of art information. We will work to develop a critical understanding of our own research processes and reflect on the tools and techniques that lead to both expert research and successful participation in art discourse.
Equivalent - Duplicate Degree Credit Not Granted: ARTH 4029 and ARTH 5029
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

LIBR 4900 (1-3) Independent Library Research
In-depth library research project for upper-division students. Instructor consent required.

Preprofessional Programs

Preprofessional advising resources have been developed at CU Boulder to help undergraduate students, and previously graduated students, prepare for further study at professional schools. CU Boulder does not offer preprofessional undergraduate majors or degrees. Completion of preprofessional prerequisites does not guarantee admission to a professional school. However, preprofessional advisors are well-equipped to provide information about professional schools within Colorado, and beyond, and can help students to prepare well for further professional study.

Health Professions

Students can prepare to enter the undergraduate professional health science program in nursing at the Anschutz Medical Campus of the University of Colorado by taking courses on the Boulder campus.

Students whose goals include entering the medical, dentistry, physical therapy, physician assistant, pharmacy or public health programs and schools at the Anschutz Medical Campus, or the veterinary medicine or occupational therapy programs at Colorado State University in Fort Collins, can complete any undergraduate major at CU Boulder. In most cases, these students are required to complete a baccalaureate degree before entering professional school. In fact, a baccalaureate degree is recommended for most health professions.

At the time of application to a professional school, students are judged on several factors, including performance in undergraduate courses. For this reason, no required course may be taken on a pass/fail basis. Some fields require specific preprofessional examinations before application. For most fields, interviews are an essential part of the application process.

In all cases, admission committees are concerned with students' compassion, coping and decision-making abilities, intellectual capabilities, realistic self-appraisal, sensitivity in interpersonal relations and staying power (physical and motivational). In addition to formal coursework, students should have experience in people-related activities (especially those related to their field of choice), so that they can be more certain of their motivation for health careers. Also, health-related activities expose premed and other health science hopefuls to various patients and illnesses. The health professions require, or strongly recommend, such experience.

Some of the professional programs at the Anschutz Medical Campus give preference to Colorado residents and residents of WICHE (Western Interstate Commission on Higher Education) states; interested students should check with individual programs for specific policies. Students from other states usually can obtain at CU Boulder the preprofessional courses required by their state schools, but should check with those schools in advance. Students are encouraged to apply to their state school, as well as to other public and private professional schools, to increase their chances of gaining acceptance to the professional program of their choice.

During the preprofessional years, personal intellectual development leads many students to change professional goals. Since there are usually more applicants for these programs than there are spaces available, many students need to pursue alternative goals. Therefore, students should plan college programs to give themselves the greatest flexibility in considering other vocations.

Advising for preprofessional study in the health sciences is conducted through the Preprofessional Advising Office in the University Club. Check the pre-health advising (https://www.colorado.edu/programs/prehealth-advising/) website for information on prerequisite courses, events, volunteer opportunities, student pre-health organizations, applications and many other useful resources. Students should attend a pre-health advising session at orientation, then begin to follow the Pre-Health Pathway sequence of meetings early in their undergraduate careers to help plan coursework and extracurricular experience in preparation for applying to programs of their choice. Current students and alumni may schedule pre-health meetings through Buff Portal Advising (https://www.colorado.edu/buffportaladvising/). The Preprofessional Advising Office offers an extensive array of workshops and informational meetings, as well as a spring Health Professions Information Day.

Pre-Law

Students who plan to apply to law school upon completing their baccalaureate degree do not have to complete any specific course requirements for admission to law school. Instead, they should major in the discipline that best suits their intellectual interests and talents. Pre-law students should seek a rigorous and broad-based education that will ensure them a fundamental understanding of American society and its institutions. Students should become familiar with mathematical analysis and scientific reasoning, and develop excellent oral and written communication skills.

Pre-law advising is available in the Preprofessional Advising Office. In addition, the Preprofessional Advising Office sponsors a fall Law Fair, spring Law Day and a year-long speaker series. Contact the Preprofessional Advising Office in University Club 111 for more information. Check the pre-law advising (https://www.colorado.edu/career/pre-law/) webpage for information on events, the student pre-law organization, applications and many other useful resources. Current students and alumni may schedule pre-law advising appointments through Buff Portal Advising (https://www.colorado.edu/buffportaladvising/).

Presidents Leadership Class

The Presidents Leadership Class (PLC) is a scholar community with academic and experiential curricula with focus on leadership development based on program pillars and values. Skills are developed in interdisciplinary, academic, experiential and service environments and through exposure to key social issues and complex problems. PLC students are enrolled in all the schools and/or colleges across campus

and participate in the PLC curriculum as a complement to their regular coursework.

The PLC is a program of CU Boulder and has a Board of Advocates representing Colorado business, educational, nonprofit and government communities.

Admission and Enrollment

Admission to the PLC is part of being welcomed onto campus and a feeling of belonging for incoming CU Boulder students. Most PLC students are admitted prior to the beginning of their first year at CU Boulder; however, limited spots are reserved for qualified rising sophomores through a second point-of-entry application. Selection criteria include academic performance, mindset, a willingness to challenge oneself, and displays of empathy, humility and resiliency. Each year, 35-40 first-year students are enrolled, comprising both Colorado residents and non-residents. Instructions on how to apply to PLC are available on the PLC website (http://www.colorado.edu/plc/). The application is part of the CU Boulder Scholarship Application through the Office of Financial Aid and Scholarship Services. The application is due by **February 15**. To access the application, visit the Apply Now (http://www.colorado.edu/plc/apply-now/) webpage.

PLC students receive credit for the General Education requirements for Social Sciences for PRLC 1810 and PRLC 1820 in their first year of PLC. Students are required to take three additional PLC courses (PRLC) with a few exceptions: PRLC 2820, PRLC 3810 or PRLC 3800 and PRLC 2930 (the complement course for the ALE experiential requirement).

Academic Program

The PLC provides students with unique academic courses, purposeful experiential education and real-life experiences that support:

- Academic rigor and professional readiness.
- Growth in critical thinking, research, analytical and synthesizing capabilities.
- Development of innovative and practical creativity in problem solving.
- Opportunities to apply new abilities of thoughtful implementation of sustainable solutions.
- Cultivation and understanding of moral reasoning and ethical decision making.
- Development of an appreciation for a community to which students want to impact and contribute to.

PLC provides opportunities by uniting the support of the university, local, statewide and national leaders. The academic curriculum is supplemented by a substantial experiential learning curriculum and professional development opportunities.

For more information on the PLC Curriculum Strategy and the research behind it, visit the Presidents Leadership Class (http://www.colorado.edu/plc/) website.

Required Courses and Credits

PLC students tend to declare and complete the Leadership Studies Minor (LSM) (p. 809), however, **it is not a requirement of the PLC program**. Courses in addition to the courses listed below have been added to the list of courses accepted to complete PLC. Information about the other courses and many academic/experiential opportunities available is on the PLC website. (https://www.colorado.edu/plc/current-students/courses/)

The capstone course, LEAD 4000 is not required for PLC students but is required for the Leadership Studies Minor.

Code	Title	Credit Hours
PRLC 1810	Leadership Foundations and Applications I	3
PRLC 1820	Leadership Foundations & Applications II	3
PRLC 2820	Multilevel Issues in Leadership	3
PRLC 3810	Global Issues in Leadership	3
PRLC 2930	Leadership Internship	1-3
LEAD 4000	Leadership in Context and Emerging Challenges: A Capstone [1]	4

[1] Required for the minor in leadership studies only.

Scholarship Programs and Opportunities

The PLC offers many scholarships to fully participating students over the course of their undergraduate careers. The first-year award is a merit award of $1,000 that is awarded upon selection into the program. The first-year scholarship is **non-renewable** and **not awarded automatically after the first year.** PLC students have the opportunity **to apply or be nominated** for a number of other scholarships to substantially help fund their undergraduate education upon their second semester in the program. Below is a list of available scholarships primary to PLC students. All PLC-allocated scholarships are dispersed through the Office of Financial Aid and are calculated directly against the cost of attendance.

- William A. Douglas Endowment
- FirstBank Scholars
- Dr. Larry Allen Endowment
- Flanagan & Walker Scholarships
- Hoelscher Memorial Scholarship
- Annabelle K. Lutz Voss Scholars
- Tim Pestotnik Scholarship
- Leo Hill Endowment
- The Ruyle Family Scholarship
- PLC Enrichment Fund Scholarship
- PLC Student Staff Fellowship

Courses

PRLC 1810 (3) Leadership Foundations and Applications I
Introduces fundamental principles of leadership and ethics. Emphasizes application of the principles for self-development and organizational effectiveness.
Requisites: Restricted to students in the Presidents Leadership Class (PPLC) only.
Grading Basis: Letter Grade
Additional Information: Arts Sci Core Curr: Ideals and Values
Arts Sci Gen Ed: Distribution-Social Sciences

PRLC 1820 (3) Leadership Foundations & Applications II
Explores challenges to leadership at the community level such as drug abuse, poverty, decline of infrastructure, care of the aged, etc. Gives particular attention to the development of effective leadership responses to community difficulties at university, city, state, and national levels.
Requisites: Restricted to students in the Presidents Leadership Class (PPLC) only.
Grading Basis: Letter Grade
Additional Information: GT Pathways: GT-SS3 -Soc Behav Sci:Hmn Behav, Cult, Soc Frame
Arts Sci Core Curr: Contemporary Societies
Arts Sci Gen Ed: Distribution-Social Sciences

PRLC 2820 (3) Multilevel Issues in Leadership
Studies multilevel issues that originate in organizational settings but carry community and global implications. Encourages students to fully explore the complexity and interrelatedness of issues with a special emphasis on leadership and ethical implications.
Requisites: Restricted to students in the Presidents Leadership Class (PPLC) only.

PRLC 2930 (1-3) Leadership Internship
Students analyze the leadership styles within a host organization, examine how successfully an organization fulfills its mission and further refine their own theories of what constitutes effective leadership. Students also complete a meaningful project over the course of the internship. Department enforced prerequisites: PRLC 1810 and PRLC 1820 and PRLC 2820.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

PRLC 3800 (3-4) Global Inquiry for 21st Century Leadership
Introduces students to the ways in which leadership and sustainable development theory converge, challenges students to examine these issues in specific contexts around the world, and provides them with practical training in cross-cultural competency and leadership skills.
Requisites: Requires prerequisites PRLC 1810 (minimum grade C). Restricted to Presidents Leadership Class members.
Recommended: Prerequisites PRLC 1820, PRLC 2820 or ENLP 3100.
Grading Basis: Letter Grade

PRLC 3810 (3) Global Issues in Leadership
Examines the challenges to leadership posed by major global issues. Problems in the areas of human rights, hunger, disease, large-scale collective violence and environmental deterioration are explored with a special emphasis on the development of effective, long-term leadership strategies. Department enforced prerequisites: PRLC 1810 and PRLC 1820 and PRLC 2820.

PRLC 4010 (3-4) 21st Century Leadership
An advanced course that focuses on critical analysis of leadership principles and techniques. Designed to provide theoretical and hands-on experience for individuals who wish to function in leadership roles at high levels of competence in the workplace and in the civic arena.
Requisites: Requires prerequisite courses of PRLC 1810 and PRLC 1820 (all minimum grade C). Restricted to students in the Presidents Leadership Class (PPLC) only.

PRLC 4081 (3) Icons of the American Republic
Examines the founding period of the United States through the events, political concepts and individuals depicted in the art exhibited in the U.S. Capitol Building in Washington, D.C. The course includes a visit to the U.S. Capitol Building, the floor of the U.S. House of Representatives, the floor of the U.S. Senate, and an exploration of the legislative process.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Recommended: Prerequisite PSCI 1101 or PSCI 2012 or PSCI 2223 or PSCI 2004.
Additional Information: Departmental Category: American

Reserve Officers Training Corps (ROTC)

Enrollment in Reserve Officers Training Corps (ROTC) programs is open to both men and women, and ROTC lower-level leadership courses are open to all students whether or not they contract with ROTC.

All services provide undergraduate and selected graduate students with the opportunity to combine academic study with a military officer's educational program. The three services conduct courses in their respective areas leading to a regular or reserve commission upon graduation.

Military Programs

- Air Force Aerospace Studies (U.S. Air Force) (p. 1091)
- Military Science (U.S. Army) (p. 1092)
- Naval Science (U.S. Navy & U.S. Marine Corps) (p. 1094)

Air Force Aerospace Studies (U.S. Air Force)

The Air Force ROTC curriculum encompasses exclusive classes and leadership workshops that help prepare students for their future careers. The curriculum has three central components: academic classes, leadership laboratory (LLAB) and physical training (PT).

For more information visit the Air Force ROTC website.

Requirements

All cadets must complete Aerospace Studies Courses (https://www.colorado.edu/afrotc/how-we-make-officer/academics/) with a grade of C- or above. Additionally, cadets must enroll in Leadership Lab (https://www.colorado.edu/afrotc/how-we-make-officer/academics/) every semester.

Cadets on scholarship must maintain a minimum 2.5 cumulative GPA and be enrolled as a full-time student.

For more information on program requirements visit the Air Force ROTC website (https://www.colorado.edu/afrotc/how-we-make-officer/academics/).

Faculty

Brown, Ethan
Captain, Assistant Professor; MS, Eastern Michigan University

Lange, Rebecca
Colonel, Chair, Professor; MPA, University of Oklahoma

Riester, Melissa
Major, Assistant Professor; MA, St. Mary's University

Rutkovitz, Jared
Major, Assistant Professor; MBA, Naval Postgraduate School

Skrla, Eric
Captain, Assistant Professor; MA, University of Colorado Boulder

Somers, Nichelle
Lieutenant Colonel, Assistant Professor; MA, University of Colorado, Colorado Springs

Courses

AIRR 1010 (1) Heritage and Values I
This course provides an introduction to the Air & Space Forces, encourages students to pursue an AF career or seek additional information to be better informed about the role of the USAF. The course allows students to examine general aspects of the Department of the Air Force, AF Leadership, Air Force benefits, and opportunities for AF officers. The course also lays the foundation for becoming an Airman by outlining our heritage and values.
Additional Information: Departmental Category: Air Force Aerospace Studies

AIRR 1020 (1) Heritages and Values II
A continuation of AIRR 1010. This course provides a historical perspective including lessons on war and the US military, AF operations, principles of war, and airpower. This course also provides students with an understanding for the employment of air and space power, from an institutional, doctrinal, and historical perspective. The students are introduced to the Air Force way of life and gain knowledge on what it means to be an Airman.
Additional Information: Departmental Category: Air Force Aerospace Studies

AIRR 1947 (0) Air Force ROTC Leadership Laboratory
All AFROTC cadets must attend leadership lab (two hours per week). The laboratory involves a study of Air Force customs and courtesies, drill and ceremonies, career opportunities and the life and work of an Air Force junior officer. Students (cadets) seeking a commission must take this lab in conjunction with their AIRR lecture/course. "Special Students" NOT seeking a commission, are not required or allowed to attend LLAB (Leadership Lab).

AIRR 2010 (1) Team and Leadership Fundamentals 1
This course is designed to provide a fundamental understanding of both leadership and team building. This course teaches students that there are many layers to leadership, including aspects that are not always obvious. Such things include listening, understanding themselves, being a good follower, and problem solving efficiently.
Additional Information: Departmental Category: Air Force Aerospace Studies

AIRR 2020 (1) Team and Leadership Fundamentals 2
A continuation of AIRR 2010. This course is designed to discuss different leadership perspectives when completing team building activities and discussing things like conflict management. This course also provides students with the ability of demonstrating their basic verbal and written communication skills. Active cadets will apply these lessons at Field Training, which follows the AS200 level.
Additional Information: Departmental Category: Air Force Aerospace Studies

AIRR 3010 (3) Leading People and Effective Communication 1
This course is designed to build on the leadership fundamentals taught in the AS200 level. The cadets will have the opportunity to utilize their skills as they begin a broader leadership role in the detachment. The goal is for cadets and students to have a more in-depth understanding of how to effectively lead people and provide them with the tools to use throughout their detachment leadership roles.
Additional Information: Departmental Category: Air Force Aerospace Studies

AIRR 3020 (3) Leading People and Effective Communication 2
A continuation of AIRR 3010. This course is designed to help cadets hone their writing and briefing skills. The course continues into advanced skills and ethics training that will prepare them for becoming an officer and a supervisor.
Additional Information: Departmental Category: Air Force Aerospace Studies

AIRR 4010 (3) National Security, Leadership Responsibilities/ Commissioning Preparation 1
This course is designed to address the basic elements of national security policy and process. The cadet will comprehend the air and space power operations as well as understand selected roles of the military in society and current domestic and international issues affecting the military profession.
Additional Information: Departmental Category: Air Force Aerospace Studies

AIRR 4020 (3) National Security/Leadership Responsibilities/ Commissioning Preparation 2
A continuation of AIRR 4010. This course is designed to prepare cadets for life as a second lieutenant. Cadets should comprehend the responsibility, authority, and functions of an Air Force commander and selected provisions of the military justice system.
Additional Information: Departmental Category: Air Force Aerospace Studies

Military Science (U.S. Army)

The Department of Military Science is a leadership program leading to an officer's commission in the Active Army, Army Reserve or National Guard in conjunction with an undergraduate or graduate degree. Military science courses supplement a regular degree program and offer practical leadership and management experience. Scholarships are available for those that qualify. Additionally, financial benefits may be available for enlisted soldiers.

The course code for this program is MILR.

Scholarship Programs

College freshmen, sophomores and juniors may be eligible for four-, three- and two-year scholarships, regardless of academic major. Interested

students must enroll in Army ROTC and meet eligibility requirements, including an army physical fitness test.

High school scholarship applicants may be eligible for four- and three-year college scholarships. High school students can apply during their junior year and before January 10 of their senior year.

All scholarship recipients receive full tuition and fees, a $1,200 book allowance and a stipend of $300–500 per month during the academic year. Students interested in scholarships should contact the enrollment and scholarship officer at armyrotc@colorado.edu, 303-492-3549 or 303-492-6495.

Simultaneous Membership Program

College sophomore and juniors who want additional leadership training, may participate with an Army Reserve or Army National Guard unit as an officer trainee. Students participating in this program earn approximately $240 in monthly drill pay, plus a monthly ROTC stipend of $300–500. Additionally, SMP participants receive Army National Guard or reserve tuition benefits of up to $4,500 per year. Enlisted and prior service students retain their authorized GI benefits.

Army ROTC Course Credit

ROTC is an elective credit in most departments. Individual academic advisors verify if ROTC classes count toward the student's degree.

Registration

Army ROTC classes begin with MILR prefix. Register for classes through the normal course registration process. For more information, visit the the Army ROTC (http://www.colorado.edu/arotc/) website or contact the enrollment and scholarship officer at CU Boulder at armyrotc@colorado.edu, 303-492-3549 or 303-492-6495.

Requirements

Four-Year Program

For college freshmen, the four-year program consists of two phases: the basic course (freshman and sophomore years) and the advanced course (junior and senior years).

Basic Courses (MSI & MSII)

Basic courses (MSI & MSII) cover Army history and organization, as well as military leadership and management. Labs provide the opportunity to develop leadership experience while learning basic military skills. Participating in the basic courses incur no military obligation, except for those receiving an Army scholarship.

Advanced Courses (MSIII & MSIV)

Advanced courses (MSIII & MSIV) cover leadership, tactics and unit operations, training techniques, military law and professional ethics. Additionally, a four-week summer leadership camp at Fort Knox, Kentucky, is a requirement between the junior and senior year, and is a prerequisite for commissioning. Students enrolled in the advanced courses must have completed the basic courses (or the equivalent) and obtain permission from the Professor of Military Science (PMS).

Two-Year Program

College students entering as a sophomore, junior or senior with four semesters of college remaining (including Grad School), can attend the two-year Basic Camp, which is a 4-week course conducted at Fort Knox, Kentucky, where students learn the same skills and fundamentals of military science, leadership, values and ethics taught in the basic course classes. Then students are ready to begin the advanced course when they return to college. Basic Camp is a paid internship and the academic equivalent to the MSI/MSII basic courses.

Prior service and enlisted soldiers who have completed basic training may be eligible to enroll in the advanced course without attending Basic Camp or completing the ROTC basic courses. Enlisted soldiers pursuing advanced placement must obtain permission from the PMS.

Major, Assistant Professor; MS, Webster University

Courses

MILR 1011 (2) Adventures in Leadership 1
Introduces fundamentals of leadership and the United States Army. Examines its organization, customs, and history as well as its current relevance and purpose. Students also investigate basic leadership and management skills necessary to be successful in both military and civilian settings. Includes fundamentals of Army leadership doctrine, team-building concepts, time and stress management, an introduction to cartography and land navigation, marksmanship, briefing techniques, and some basic military tactics.
Additional Information: Departmental Category: Military Science (U.S. Army)

MILR 1021 (2) Adventures in Leadership 2
Continues the investigation of leadership in small organizations. Covers selected topics such as basic troop leading procedures, military first aid and casualty evacuation concepts, creating ethical work climates, an introduction to Army organizations and installations, and a further examination of basic military tactics. Introduces students to effective military writing styles.
Additional Information: Departmental Category: Military Science (U.S. Army)

MILR 2031 (3) Methods of Leadership and Management 1
Comprehensively reviews advanced leadership and management concepts including motivation, attitudes, communication skills, problem solving, human needs and behavior, and leadership self development. Students continue to refine effective written and oral communications skills and to explore topics such as the basic branches of the Army, and officer and NCO duties. Students conduct classroom and practical exercises in small unit light infantry tactics and are prepared to perform as midlevel leaders in the cadet organization.
Additional Information: Departmental Category: Military Science (U.S. Army)

MILR 2041 (3) Methods of Leadership and Management 2
Focuses on leadership and management functions in military and corporate environments. Studies various components of Army leadership doctrine to include the four elements of leadership, leadership principles, risk management and planning theory, the be-know-do framework, and the Army leadership evaluation program. Continue to refine communication skills.
Additional Information: Departmental Category: Military Science (U.S. Army)

MILR 3052 (3) Military Operations and Training 1
Further explores the theory of managing and leading small military units with an emphasis on practical applications at the squad and platoon levels. Students examine various leadership styles and techniques as they relate to advanced small unit tactics. Familiarizes students with a variety of topics such as cartography, land navigation, field craft and weapons systems. Involves multiple, evaluated leadership opportunities in field settings and hands-on experience with actual military equipment. Students are given maximum leadership opportunities in weekly labs.
Recommended: Prerequisite instructor consent.
Additional Information: Departmental Category: Military Science (U.S. Army)

MILR 3062 (3) Military Operations and Training 2
Studies theoretical and practical applications of small unit leadership principles. Focuses on managing personnel and resources, the military decision making process, the operations order and oral communications. Exposes the student to tactical unit leadership in a variety of environments with a focus on preparation for the summer advance camp experience.
Recommended: Prerequisite instructor consent.
Additional Information: Departmental Category: Military Science (U.S. Army)

MILR 3090 (1) Military Theory and Tactical Leadership
Application of military domain knowledge, small until leadership skills and education on various subjects germane to military operations. Examination of military tactics, techniques and procedures to better understand how to successfully accomplish multiple military requirements. Instructor consent required. MSV students do not need to be enrolled in a MILR corequisite.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Requires a corequisite course of MILR 1011 or 1021 or 2031 or 2041 or 3052 or 3062 or 4072 or 4082.
Additional Information: Departmental Category: Military Science (U.S. Army)

MILR 4072 (3) Leadership 1: Adaptive Leadership
Develops leaders of character that will excel in a complex, ambiguous and dynamic future operating environment: discusses personal growth, effective communication, critical thinking, problem solving and ethical leadership.
Recommended: Prerequisite instructor consent.
Additional Information: Departmental Category: Military Science (U.S. Army)

MILR 4082 (3) Leadership 2: Leadership in a Complex World
Develops leaders of character that will excel in a complex, ambiguous and dynamic future operating environment: develops universal leadership attributes such as critical thinking and problem solving, understanding the contemporary operating environment and improved inter-personal dynamics/team building skills.
Recommended: Prerequisite instructor consent.
Additional Information: Departmental Category: Military Science (U.S. Army)

MILR 4840 (1-3) Independent Study
Additional Information: Departmental Category: Military Science (U.S. Army)

Naval Science (U.S. Navy & U.S. Marine Corps)

Scholarship Programs

Scholarships

NROTC offers two-, three- and four-year scholarships for those desiring to commission in the Navy or Marine Corps. Scholarships may be earned while students are enrolled in the college program. Scholarship students receive tuition and fees, a $375 book allowance per semester and a $250 per month subsistence allowance. This subsistence allowance gradually rises to $400 by the student's senior year.

Advanced Standing

Students who are not awarded a scholarship may be placed in advanced standing. Advanced standing students receive a $350 per month subsistence allowance their junior year and $400 per month subsistence allowance their senior year in the program.

Naval science (Navy option) scholarship students must complete one year of calculus, physics and English as well as one semester of American military history or national security policy, and a cultural course.

Commissioned Service

Opportunities to commission in the U.S. Navy are presently available in the following unrestricted line (URL) communities: surface, subsurface, aviation, special warfare and special operations.

Opportunities to commission in the U.S. Marine Corps are available in ground and aviation specialties.

Students interested in other programs leading to commissions in either the U.S. Navy or U.S. Marine Corps are encouraged to contact the NROTC unit on campus. All commissioning programs require that the student be working toward, and receive, a college degree.

The course code for this program is NAVR.

Requirements

The number of NROTC credit hours that may count toward degree requirements is determined by the individual colleges. Students should therefore consider their college's policy when formulating their degree plan.

Naval science coursework is offered in the fall and spring semesters only.

Required Courses and Credits

Code	Title	Credit Hours
Required Courses		
NAVR 1010	Introduction to Naval Science	2
NAVR 2020	Seapower and Maritime Affairs	3
NAVR 4010	Leadership and Management	3
NAVR 4020	Leadership and Ethics	3
U.S. Navy Courses		
NAVR 3020	Naval Operations and Seamanship	3
NAVR 3030	Naval Engineering Systems	3
NAVR 3040	Weapons and Systems Analysis	3
NAVR 4030	Navigation	3
U.S. Marine Corps Courses		
NAVR 3101	Evolution of Warfare	3
NAVR 3201	Fundamentals of Maneuver Warfare	3
Total Credit Hours		**29**

For additional information, visit the Naval Reserve Officers Training Corps (http://www.colorado.edu/nrotc/) website.

Faculty

Bodisch, J. Robert
Colonel, Professor; M.A., Webster University; M.A., Naval War College

Cook, Lance
Lieutenant, Assistant Professor

Hinton, J. Kai
Lieutenant, Assistant Professor

Keziah, Brandon W.
Gunnery Sergeant, Assistant Instructor

MacVarish, Brendan F.
Captain, Instructor

Pembleton, Gary
Commander, Executive Officer, Associate Professor

Robbins, M. Mikaela
Lieutenant, Assistant Professor; B.S., U.S. Naval Academy

Courses

NAVR 1010 (2) Introduction to Naval Science
Introduction to the naval profession. Instruction emphasizes the mission, organization and warfare components of the Navy and Marine Corps. Included is an overview of officer and enlisted ranks and rates, training, education, Naval customs and courtesies, military justice, leadership and nomenclature. Exposes the student to the professional competencies required to become a Naval/Marine Corps officer.
Additional Information: Departmental Category: Naval Science

NAVR 1020 (3) Naval Ship Systems
Naval Ship Systems
Requisites: Requires prerequisite course of NAVR 1010 (minimum grade D-).

NAVR 2020 (3) Seapower and Maritime Affairs
Surveys international maritime history and provides a review of American maritime history and policy. Examines American naval involvement in regional and global conflicts, evolution in technology and management, the role of the navies in foreign policy, and the influence of seapower on history.
Requisites: Requires prerequisite course of NAVR 1010 (minimum grade D-).
Additional Information: Departmental Category: Naval Science

NAVR 3020 (3) Naval Operations and Seamanship
Examines the Inland and International Rules of the Nautical Road, including court interpretations, principles of relative motion and vector analysis with the maneuvering board, ship handling procedures, weather, communications, tactical operations, and maritime law.
Requisites: Requires prerequisite course of NAVR 1010 (minimum grade D-).
Additional Information: Departmental Category: Naval Science

NAVR 3030 (3) Naval Engineering Systems
Studies in detail ship propulsion and related auxiliary systems. Emphasizes fossil fuel and nuclear steam and gas turbine systems. Stresses design constraints imposed by unique marine environment.
Requisites: Requires prerequisite course of NAVR 1010 (minimum grade D-).
Additional Information: Departmental Category: Naval Science

NAVR 3040 (3) Weapons and Systems Analysis
Introduces theoretical concepts upon which modern naval weapons systems are designed and constructed. Specific areas of study include physics of underwater sound propagation, pulse radar theory, automatic tracking principles, and fundamentals of missile guidance.
Requisites: Requires prerequisite course of NAVR 1010 (minimum grade D-).
Additional Information: Departmental Category: Naval Science

NAVR 3101 (3) Evolution of Warfare
Traces the development of warfare, focusing on the impact of military theorists and technical developments. Assists students to acquire a sense of strategy, develop an understanding of military alternatives, and see the impact of historical precedent on military actions.
Requisites: Requires prerequisite course of NAVR 1010 (minimum grade D-).
Additional Information: Departmental Category: Naval Science

NAVR 3201 (3) Fundamentals of Maneuver Warfare
Prepares future military officers and other leaders for service by studying modern tactical principles, current military developments and other aspects of warfare and their interactions with and influences on maneuver warfare doctrine.
Requisites: Requires prerequisite course of NAVR 1010 (minimum grade D-).
Grading Basis: Letter Grade
Additional Information: Departmental Category: Naval Science

NAVR 4010 (3) Leadership and Management
Comprehensively studies organizational leadership. Emphasizes motivation, communication, empowerment, and needs of subordinates. Studies the role of professional and personal ethics in organizational leadership.
Additional Information: Departmental Category: Naval Science

NAVR 4020 (3) Leadership and Ethics
Studies the ethics and laws of armed conflict analyzing the leadership responsibilities of officers both in peace and in war. The curriculum focuses first on various moral, ethical and leadership philosophies followed by extensive use of case studies to reinforce the use of ethical decision-making tools. Defines the responsibilities of junior officers within the context of ethical leadership and decision making.
Additional Information: Departmental Category: Naval Science

NAVR 4021 (3) Leadership and Ethics Online
Studies the ethics and laws of armed conflict analyzing the leadership responsibilities of officers both in peace and in war. The curriculum focuses first on various moral, ethical and leadership philosophies followed by extensive use of case studies to reinforce the use of ethical decision-making tools. Defines the responsibilities of junior officers within the context of ethical leadership and decision making.

NAVR 4030 (3) Navigation
Offers theory and practical application in the art of navigation: charts, publications, piloting, dead reckoning, navigation aids and instruments, time, electronic fixing, global positioning system, and voyage planning.
Requisites: Requires prerequisite course of NAVR 1010 (minimum grade D-).
Additional Information: Departmental Category: Naval Science

Undergraduate Residential Programs

Residential Academic Programs (RAPs)

A number of the residence halls are home to residential academic programs (RAPs), whereby students live in and take special classes in their hall that meet core curriculum and/or other course requirements. All of these programs charge additional $425 fees per academic year. For detailed information about each RAP, see the Residential Academic Programs (https://catalog.colorado.edu/undergraduate/colleges-schools/academic-enrichment-programs/undergraduate-residential-programs/) website.

- CMDI/Communication RAP (https://www.colorado.edu/living/housing/explore-apartment-style-and-residence-hall-living/living-experiences/cmci-communication-and/) offers 200 first- and second-year students a program to explore many different areas of communication, ranging from processes of face-to-face interaction to the impact of media and technology on daily life.
- Creative Minds RAP (https://www.colorado.edu/living/housing/explore-apartment-style-and-residence-hall-living/living-experiences/creative-minds-rap/) (CMRAP) is a living and learning community that unites several arts disciplines and core requirement options in one program. Our mission is to foster the skills students need to develop into creative leaders of tomorrow. Our guiding principles are creativity, curriculum and community.
- Engineering Honors RAP (https://www.colorado.edu/living/housing/explore-apartment-style-and-residence-hall-living/living-experiences/honors-engineering-rap/) provides educational experiences that match the abilities and ambitions of some the very best students at CU.
- Environment and Natural Science RAP (https://www.colorado.edu/bakerrap/) is designed for freshmen and sophomores in the College of Arts and Sciences or Program in Exploratory Studies interested in the natural sciences and environmental studies.
- Global Engineering RAP (https://www.colorado.edu/living/housing/explore-apartment-style-and-residence-hall-living/living-experiences/global-engineering-rap/) prepares engineering students for the new global conditions of the engineering professions through experiencing international culture, mastering a second language and gaining confidence with IT-driven international communication and collaboration.
- Global Studies RAP (https://www.colorado.edu/globalstudiesrap/) promotes the recognition of global interdependence, encourages the study of foreign languages and international affairs and emphasizes the value of international education. This year-long program connects participants with a peer group of students who have similar interests and goals. The staff is knowledgeable about CU Boulder's many international resources, and the faculty incorporate international work into their teaching and research.
- Health Professions RAP (https://www.colorado.edu/hprap/) accommodates approximately 270 first and second-year students. This community is ideal for students interested in exploring coursework and career options in the health professions such as clinical practitioners, researchers or policymakers. Courses offered include a rich mix of science courses well suited for IPHY, MCDB and NRSC majors, and other interested in the life sciences, supplemented by select general education courses.
- Honors RAP (https://www.colorado.edu/hrap/) is the residential component of the Honors Program of the College of Arts and Sciences. It promotes and sustains academic excellence within a lively community setting. First-year students take one, onsite, seminar-style three-credit-hour course each semester. Beyond the classroom, Honors RAP offers a variety of co-curricular and student-led activities that enhance the learning experience. It is open to

approximately 335 first-year and continuing honors-qualified students in the College of Arts and Sciences.

- Leeds Business RAP (https://www.colorado.edu/business/leeds-first-year-experience/leeds-residential-academic-program/) (Leeds RAP) is a targeted community that is comprised exclusively of students who are business majors. Leeds RAP seeks to build individuals who are well-rounded, prepared, engaged and equipped to succeed in 21st century workplaces and take roles as global leaders. Students in the program develop supportive relationships with faculty and staff, including an in-house academic advisor, as well as with peer mentors.
- Pre-Business RAP (https://www.colorado.edu/living/housing/explore-apartment-style-and-residence-hall-living/living-experiences/pre-business-rap/) is a community of first-year students pursuing a business degree, but have not yet been directly admitted into the Leeds School of Business. The program provides a supportive and preparatory path for students to transfer into Leeds their sophomore year.
- Stories and Societies RAP (https://www.colorado.edu/srap/) is a program for first- and second-year students enrolled in the College of Arts and Sciences or Program in Exploratory Studies who have an interest in the study of history, education, and society, or are considering a career in the teaching professions. The program offers small classes taught in Sewall Hall, co-curricular activities that support the RAP's theme and help build community, and personalized attention from faculty and staff dedicated to student success.

Living and Learning Communities

Living and Learning Communities (LLCs) (https://www.colorado.edu/living/housing/undergraduate-housing/living-experiences/#anchor2) enhance the learning environment by building communities of students connected by their passions for specific topics or themes. Some LLCs offer academic classes, while others build co-curricular activities into the residential experience.

- Black Students and Allies LLC (https://www.colorado.edu/living/housing/undergraduate-housing/living-experiences/identity-based-llcs/black-students-and-allies-llc/) provides a supportive, social and communal space for black-identified students and their community allies. Students gain access to artifacts, critical conversation and educational programming that create an inclusive and productive atmosphere within the residence hall.
- Design Your Path LLC (https://www.colorado.edu/exploratorystudies/design-your-path-llc/) provides opportunities for students within the program in exploratory studies to explore personal, academic and career interests while building community in Farrand Hall. This program strives to empower students to take pride in designing the best path for themselves through a life design model with support from campus offices and academic staff.
- Engineering Connections (https://www.colorado.edu/living/housing/undergraduate-housing/living-experiences/engineering-connections/) is a vibrant, supportive community for first-year students accepted into the College of Engineering and Applied Sciences. It provides enhanced academic, co-curricular, social and wellness opportunities to students living in Williams Village North, Williams Village East and Stearns East.
- The Environmental Design (ENVD) LLC (https://www.colorado.edu/living/housing/undergraduate-housing/living-experiences/environmental-design-llc/) is a unique community where students accepted into the Environmental Design program live together in Willard Hall and participate in First-Year Experience (FYE) programming. Students create meaningful connections with their cohort, engage in social and academic events and gain the tools to continue their design education in confidence beyond the first year.
- Healthy Buffs LLC (https://www.colorado.edu/living/housing/undergraduate-housing/living-experiences/healthy-buffs-llc/) is a connected and caring community that embraces a culture of wellness. This program is designed to connect you with other students living in Stearns West who share a passion for health and wellbeing, provide you with individualized health and wellness services, and help you develop strategies to support you throughout your journey at CU and beyond. Students have access to free yoga and fitness classes, wellness workshops, weekly mindfulness sessions, acupuncture, nutrition counseling and much more.
- Leeds Scholars & Honors LLC (https://www.colorado.edu/living/housing/undergraduate-housing/living-experiences/leeds-scholars-honors-llc/) is an opportunity for high-achieving first-year students at Leeds to build connections with peers, faculty and staff through in-house business courses, workshops and events, deep-dive discussions and informal social gatherings. This community is composed of students in the Leeds Honors and/or Scholars programs who live in Kittredge Central.
- LGBTQIA and Allies LLC (https://www.colorado.edu/living/housing/undergraduate-housing/explore-housing/hallett-living-learning-communities/lgbtqia-and-allies/), part of the Multicultural and Latinx LLC, offers a variety of social and educational activities including leadership opportunities. LGBTQIA and Allies LLC is designed to provide a supportive place for individuals of all sexual identities including gay, lesbian, bisexual, transgender and queer people and their allies. The living area has gender-neutral bathrooms.
- Multicultural and Latinx LLC (https://www.colorado.edu/living/housing/undergraduate-housing/explore-housing/hallett-living-learning-communities/multicultural-and/) is a community that provides a safe space for students to talk and learn more about social justice issues through conferences, events and dialogue. This program partners with the LGBTQIA and Allies Living and Learning Community.
- Music Buffs LLC (https://www.colorado.edu/living/housing/undergraduate-housing/living-experiences/music-buffs-llc/) in Willard Hall is a community that brings together students who are passionate about the art of music and music-making. This community of aspiring music performers, teachers, creators and scholars consists of music majors from all undergraduate degree programs in the CU College of Music, those in the music minor program at CU and those with an interest in musical collaboration and creativity. Students living within our community can express and explore their creative interests and artistic skills while learning and discovering the power of music.
- Service and Social Action LLC (https://www.colorado.edu/living/housing/undergraduate-housing/living-experiences/service-and-social-action-llc/) welcomes first-year students from all colleges and majors. This program seeks to develop leaders and propel them into a life dedicated to equity-based social action through purpose-driven service, education and reflection.
- Transfer Buffs LLC (https://www.colorado.edu/living/housing/undergraduate-housing/living-experiences/transfer-buffs-llc/) offers incoming transfer students the unique opportunity to live on campus and connect with students who have similar experiences. Students living in Weber Hall participate in programming to help them maximize their academic and co-curricular experience at CU Boulder and integrate into the Transfer Buffs and CU Boulder communities. Transfer Peer Mentors provide incoming students

with valuable resources and will facilitate community-building opportunities and events.

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Cross-College Programs

International Media - Certificate

This undergraduate certificate program is designed exclusively for undergraduate students enrolled in the College of Communication, Media, Design and Information (CMDI), and in the International Affairs major (IAFS) in the College of Arts and Sciences. This certificate allows students majoring in international affairs to explore careers in international reporting, advertising and entertainment, while CMDI majors

will acquire the context and perspective necessary to work in global and international jobs.

Requirements

The certificate requires 18 to 19 credit hours (depending on the lower-division courses chosen), 15 of which must be upper-division courses.

Students majoring in international affairs are eligible to apply for admission to the certificate program if they have completed 30 credit hours (at least 6 of which must be in their major) with a GPA of 2.75 or better.

For more information, visit the International Media Certificate page of the CMCI website (https://www.colorado.edu/cmci/academics/journalism/international-media-cert/).

Native American and Indigenous Studies - Certificate

The Center for Native American and Indigenous Studies (CNAIS) offers both a graduate and undergraduate certificate in Native American and Indigenous Studies (NAIS). The certificate program offers a unique interdisciplinary curriculum for CU Boulder students interested in studying the history, cultures, languages, arts, policies and rights of Indigenous peoples from the Americas and around the globe. CNAIS encourages interdisciplinary and intersectional study that develops students' awareness of the diversity and complexity of Indigenous peoples, cultures and nations. It also encourages students to link their academic study of Indigeneity with community outreach and service learning.

A founding principle of CNAIS is to value and expand upon the connections and interdisciplinary nature of Native American & Indigenous scholarly work. The issues facing Native American and Indigenous peoples today require expertise from multiple disciplines and draw from scholarship in a number of fields, including art & art history, anthropology, ethnic studies, environmental studies, gender studies, geography, history, law, linguistics, literature and religion. CU Boulder has recruited an unprecedented number of faculty working in a wide array of areas related to NAIS, and already enjoys a high national and international reputation in several of these areas. In pursuing the NAIS certificate, students join a vibrant and growing community at CU Boulder, including graduate and undergraduate students and more than 40 professors.

For more information, visit the Center for Native American and Indigenous Studies (http://www.colorado.edu/cnais/) website.

Requirements

Students pursuing this certificate must complete an undergraduate degree in any of the academic areas offered by CU Boulder, and complete a total of 18 credits of acceptable coursework from the certificate program list.

At least 6 of the 12 credit hours of elective courses must be upper division, and students may choose to apply up to 3 credits of independent study/internship toward the credit requirement. Any independent study must be undertaken with a CNAIS core faculty member, and may be done when a student wishes to pursue an individualized course of study not normally offered in the NAIS course offers. Independent study is typically reserved for third- and fourth-year students.

Only nine credits from the student's major or minor may be counted toward the certificate, students must maintain a C average (2.0) or better, and students must earn a grade of C or better in all courses that count toward the certificate.

RLST 2700	Native American and Indigenous Religious Traditions
Total Credit Hours	**18**

[1] Elective courses not taught by CNAIS core or affiliate faculty must be approved by the CNAIS director.

Space - Minor

The space minor is part of the larger campus-wide Grand Challenge initiative and is *open to all CU Boulder students* regardless of major. The space minor is designed to provide all students enrolled in the minor with an over-arching background in all aspects of space through the required Pathway to Space (https://www.colorado.edu/p1dfb9ae7d4d/) course. Course topics include:

- Space science and exploration
- Human spaceflight and life sciences
- Aeronautics and near space
- Launch and spacecraft systems
- Climate and environment
- Space business, policy and politics
- Space arts, media and history

Visit the Grand Challenge Space Minor (http://www.colorado.edu/spaceminor/) website for more information.

Requirements

Completion of 15 credit hours (5 courses) is required for the minor, distributed as indicated in the course list below. There may be restrictions on how many and/or which specific courses/credits can apply towards this minor as well as towards the student's degree program.

Three of the four elective courses must be completed at the CU Boulder campus. One elective course may be transferred from another institution with approval. A grade point average (GPA) of 2.000 or better is required for all courses used to satisfy the requirements for this minor. Each individual course that is counted towards these degree requirements must be passed with a D- or better. Note, however, that a C- or better is required in all prerequisite courses to move on to a subsequent course.

Code	Title	Credit Hours
Required Courses		
ASEN 1969	Pathway to Space	3
Electives		
Choose four approved elective courses, including those provided in the following partial list: [1]		12
ASEN 3519	Special Topics (The Politics of Space)	
ASEN 4519	Special Topics (Space: Environment and Effects)	
CMCI 3000	Special Topics in CMDI (Space Crazy! Kids, Media, and Information in the Early Space Age)	
COEN 3210	Climate Change and Engineering	
COMM 3620	Advanced Teamwork and Collaboration	
ENVD 4363	Special Topics: Physical Factors in Environmental Design (How to Build in Space)	
FYSM 1000	First Year Seminar (Astronauts & Astropolitics: Topics in Space Exploration From the Cold War)	
RUSS 3221		
ATLS 4519	Advanced Special Topics (Studio Space)	
CINE 2001	Space Odysseys: Astrophys/Astronomy via Cinema/Arts	
ENGL 1240	Planetarity	
MUEL 3892	Music and Space	
RUSS/ITAL 2271		
SPAN 3900	Cosmos Latinos: Hispanic Science Fiction and New Worlds	
WRTG 3020	Topics in Writing (Writing about Space)	
Total Credit Hours		**15**

[1] See full list of approved electives on the Space Minor (http://www.colorado.edu/spaceminor/space-minor-course-list/) website.

GRADUATE CATALOG

The Graduate School at the University of Colorado Boulder facilitates and enriches the educational experiences of all graduate students, regardless of discipline, ensuring a consistent standard of quality across over 125 master's and doctoral degree programs.

In collaboration with the graduate faculty, the Graduate School is responsible for the planning, implementation and evaluation of graduate programs and policies. These efforts align with the Graduate School's rules and the laws and policies of the Board of Regents. The Graduate School Executive Advisory Council, composed of graduate faculty members, provides guidance to the dean and vice provost for graduate affairs (who reports to the provost) on matters related to Graduate School policies and programs.

Additionally, the Graduate School manages a variety of interdisciplinary centers and programs that span multiple colleges. These include the Center for Humanities and the Arts, the Center for Native American and Indigenous Studies, the Center for Critical Thought and the Center for African & African American Studies.

.

Academic Calendar & Exams

Academic Calendar

CU Boulder operates with standard fall and spring semesters of 15 weeks. In addition to a winter session offered in between fall and spring semesters (considered part of spring semester), classes may be offered during special sessions that run for five or seven weeks. Because of their length, special sessions have shortened add, drop and withdrawal deadlines.

The campus also offers a summer term that includes two three-week sessions (Maymester and Augmester), two five-week sessions, an eight-week session and a 10-week session. Summer sessions also have shortened deadlines (add, drop and withdrawal).

For a complete calendar of academic and financial dates and deadlines, visit the Office of the Registrar's academic calendar webpage (http://www.colorado.edu/registrar/students/academic-calendar/). (http://colorado.edu/registrar/)

The University of Colorado Boulder has a legal and moral obligation to accommodate all students who must be absent from classes or miss scheduled exams in order to observe religious holidays; and takes care to not inhibit or penalize these students for exercising their rights to religious observance. For further information, see the university policy on the observance of religious holidays and absences from classes and/or exams (http://www.colorado.edu/policies/observance-religious-holidays-and-absences-classes-andor-exams/).

Summer 2025

May 12 (Mon.)	Classes begin for Session M (Maymester)
May 26 (Mon.)	**Memorial Day holiday**; campus closed
May 30 (Fri.)	Last day of classes and final exams for Session M (Maymester)
June 2 (Mon.)	Classes begin for Sessions A, C and D
June 19 (Thurs.)	**Juneteenth holiday**; campus closed
July 3 (Thurs.)	Last day of classes and final exams for Session A (first five-week session)
July 4 (Fri.)	**Independence Day holiday**; campus closed
July 8 (Tues.)	Classes begin for Session B (second five-week session)
July 25 (Fri.)	Last day of classes and final exams for Session C (eight-week session)
Aug. 4 (Mon.)	Classes begin for Session G (Augmester)
Aug. 8 (Fri.)	Last day of classes and final exams for Sessions B and D (second five-week session, 10-week session)
Aug. 20 (Weds.)	Last day of classes and final exams for Session G (Augmester)
Aug. 20 (Weds.)	Degree conferral date (no campuswide ceremony)

Fall 2025

Aug. 21 (Thurs.)	Classes begin
Sept. 1 (Mon.)	**Labor Day holiday**; campus closed
Oct. 9 (Thurs.)	Midterm reading day
Nov. 24–28 (Mon.–Fri.)	Fall break; no classes
Nov. 27–28 (Thurs.–Fri.)	**Thanksgiving holiday**; campus closed
Dec. 5 (Fri.)	Last day of classes
Dec. 6–7 (Sat.–Sun.)	End of term reading days
Dec. 8–12 (Mon.–Fri.)	Final exams
Dec. 12 (Fri.)	Degree conferral date (no campuswide ceremony)

Spring 2026

Jan. 8 (Thurs.)	Classes begin
Jan. 19 (Mon.)	**Martin Luther King Jr. holiday**; campus closed
Feb. 26 (Thurs.)	Midterm reading day
March 16–20 (Mon.–Fri.)	Spring break (campus closed Friday, March 20)
April 24 (Fri.)	Last day of classes
April 25–26 (Sat.–Sun.)	End of term reading days
April 27–May 1 (Mon.–Fri.)	Final exams
May 2 (Sat.)	Degree conferral date (commencement ceremony)

Summer 2026

May 4 (Mon.)	Classes begin for Session M (Maymester)
May 21 (Thurs.)	Last day of classes and final exams for Session M (Maymester)
May 25 (Mon.)	**Memorial Day holiday**; campus closed

May 26 (Tues.)	Classes begin for Sessions A, C and D
June 19 (Fri.)	**Juneteenth holiday**; campus closed
June 26 (Fri.)	Last day of classes and final exams for Session A (first five-week session)
Jun 30 (Tues.)	Classes begin for Session B (second five-week session)
July 3 (Fri.)	**Independence Day holiday (observed)**; campus closed
July 17 (Fri.)	Last day of classes and final exams for Session C (eight-week session)
July 27 (Mon.)	Classes begin for Session G (Augmester)
July 31 (Fri.)	Last day of classes and final exams for Sessions B and D (second five-week session, 10-week session)
Aug. 13 (Thurs.)	Last day of classes and final exams for Session G (Augmester)
Aug. 13 (Thurs.)	Degree conferral date (no campuswide ceremony)

Final Examinations

It is the policy of the University of Colorado Boulder to adhere to the final examination schedule as published by the Office of the Registrar each semester. Unless notified otherwise in writing during the first week of classes, students enrolled in undergraduate courses should assume that an examination will be given. While it may be appropriate not to give a final in some undergraduate courses, such as independent studies, laboratory courses, seminars, project-based courses and colloquia, final examinations are integral parts of the instructional program and should be given in all other undergraduate courses. Graduating seniors are not exempt from final examinations. Students enrolled in graduate courses should consult with their instructors on whether final examinations will be administered.

1. The final examination in a course should be given as scheduled by the Office of the Registrar and not at other times, even if the instructor and all students in a course agree to such a change. An instructor may allow individual students to take the final examination at an earlier or later time if the instructor is satisfied that an exception is based on good and sufficient reasons and if such an exception is unlikely to materially advantage or disadvantage the interests of other students in the course.
2. Students should consult with their instructors and course syllabi for final examination information for courses that are scheduled at non-standard times and are not included in the published final examination schedule.
3. Final examinations in summer courses and in courses offered during special (variable length) sessions in fall and spring semesters are typically administered on the last regular meeting day of the course. No Common Exams for multiple sections of a single course may be scheduled for special session courses.
4. The week of classes preceding the scheduled final examination period should be used primarily for continued instruction and may include the introduction of new material. For courses in sessions of ten weeks or longer, no examinations may be given during the week of classes preceding the start of the campus's final examination period; however, assignments listed in the syllabus such as papers, lab practicums, presentations, portfolios and projects may be due during that week.
5. Class sessions or graded assignments of any kind, including papers, lab practicums, presentations, portfolios and projects, may not take place or be due on a day designated in the academic calendar as a Reading Day.
6. When students have three or more final examinations on the same day, they are entitled to arrange an alternative examination time for the last exam or exams scheduled on that day. When students have two final examinations scheduled to meet at the same time, they are entitled to arrange an alternative examination time for the course that meets later in the week during the term or, if the two courses meet on the same day during the term, the course that meets later in the day. Students must make arrangements with the instructor of the affected course(s) by the standard deadline to drop a course in that term and are expected to provide supporting written information of these situations to qualify for exceptions.
7. The submission deadline for grades each semester or special session is 96 hours after the conclusion of the final examination, excluding designated university holidays.
8. The Provost (or designee), in consultation with the Senior Vice Chancellor (or designee), may either reschedule or cancel final examinations in response to inclement weather or other emergencies that result in a campus closure during the final examination period. The administration's determination of whether to reschedule or to cancel final examinations is based on the number of exam periods affected by the closure and the timing of the closure.

Rescheduled Exams

A final examination may be rescheduled within the final examination period. Students who do not participate in a rescheduled final examination are not guaranteed any make-up examination or alternative assignment, and in such cases students will be assigned course grades based on tests, assignments and other graded work completed up to the end of the term.

Canceled Exams

If a final examination is canceled, course grades will be assigned based on tests, assignments and other graded work completed up to the end of the term. Faculty may also offer a make-up examination and/or allow for an alternative assignment to be submitted after the final examination period. However, such opportunities must be made available to all students enrolled in the course, all final work must be received and graded no later than the end of the first week of the subsequent term (inclusive of summer session), and faculty must then submit change of record information for students whose course grades change due to their work on make-up examinations or alternative assignments.

For information about final exams, including the final exam schedules, visit the Office of the Registrar's Final Exam Schedules (https://www.colorado.edu/registrar/students/calendar/finals/) webpage.

Academic Integrity

Why Do We Have a Student Honor Code?

Mission

The mission of the Honor Code at the University of Colorado Boulder is to secure an environment where academic integrity can flourish.

Values

The Honor Code recognizes the importance of honesty, trust, fairness, respect, and responsibility and aims to instill these principles as essential features of the University of Colorado Boulder campus. The Honor Code allows all students to have responsibility for, and the ability to attain, appropriate recognition for their academic and personal achievements.

What is a Violation?

Academic Misconduct includes any act in which a student gains or provides, or attempts to gain or provide, an unfair academic advantage over other students. These acts include, but are not limited to the following and also include any attempts to engage in the following:

1. **Cheating:**
   a. Use of prohibited notes, study aids, or other explicitly prohibited course materials;
   b. Allowing another party to do one's work/exam and turning in that work/exam as one's own;
   c. Copying coursework from another student or from an unauthorized source (including but not limited to internet sources);
   d. Collaborating on coursework when prohibited;
   e. Failing to abide by the specific written course instructions including, but not limited to,
      i. the extent artificial intelligence is permitted,
      ii. exams, homework assignments, and syllabi;
   f. Clicker Fraud. Using, or having someone else use, clicker technology improperly in an effort to receive academic credit.
2. **Plagiarism.** This includes, but is not limited to:
   a. Portrayal of another's work or ideas as one's own;
   b. Improper citation of another's work;
   c. Improper citation of one's own previous work;
   d. Use of paper writing services or technology (such as essay bots or other artificial intelligence) whether paid or unpaid.
3. **Resubmission.** Submitting the same or similar work for credit, including, but not limited to, homework more than once without permission from all course faculty involved.
4. **Fabrication.** Falsification or creation of data, research, or resources, or altering graded work without the prior consent of the course faculty.
5. **Lying.** Deliberate falsification with the intent to deceive as it relates to an academic submission.
6. **Bribery.** Providing, offering, or taking rewards in exchange for a grade, an assignment, or in the aiding of Academic Misconduct.
   a. Rewards include, but are not limited to: currency, tangible items, services, or recompense.
7. **Threat.** Acting to intimidate a student, staff, or faculty member for the purpose of affecting a grade or in an effort to prevent the reporting of an Honor Code allegation, or in connection with any other form of Academic Misconduct.
   a. **Retaliation.** Retaliating against or discouraging, directly or through third parties, an individual from participating in the Honor Code process. To be considered retaliation, there must be a causal connection between a materially adverse action and the act of reporting a violation or participating in an Honor Code process. A materially adverse action is one that would dissuade a reasonable person from reporting a violation, and includes, but is not limited to, intimidation, 5 threats, or coercion. A determination of whether an action is materially adverse is a fact-dependent inquiry made on a case-by-case basis by Student Conduct and Conflict Resolution (SCCR) staff.
8. **Unauthorized Access.** Gaining access to, giving access to, or use of, protected academic information including, but not limited to: CU-SIS; a faculty, student, or staff member's computer, files, and/or physical space; and/or secure information on an online server.
9. **Aiding Academic Misconduct.** Facilitating any act which may help a student to gain an unfair academic advantage including, but not limited to, any of the aforementioned acts.
   a. **Sharing course materials,** including but not limited to, personal notes, in an unauthorized online bank or forum, or crowdsourcing site whether for profit or for free, is strongly discouraged and may result in a referral to the Honor Code process.
   b. **Sharing personal authentication credentials/login information** to third party sites is strongly discouraged and may result in a referral to the Honor Code process.

Resolution Processes

SCCR resolves alleged academic misconduct through the informal resolution process or the formal resolution process. Resolution specialists have the authority and sole discretion to determine the type of resolution process without Honor Code Advisory Board (HCAB) consultation.

Informal Resolution

This process may generally include, but is not limited to, a meeting with a resolution specialist, completion of the assigned resolution outcomes and/or participation in the CU Restorative Justice process.

During the meeting, if the resolution specialist determines that the informal resolution process may be appropriate, the resolution specialist will offer it as an option to the responding student and address any questions the responding student may have about the process. If the responding student accepts responsibility for the alleged academic misconduct, agrees to, and completes the agreement developed during the meeting, then SCCR will consider the matter to be resolved informally. In some cases, the HCAB will also review the referrals before a final determination is made.

Formal Resolution

This process generally includes: i. written notice of the factual allegations and alleged academic misconduct; ii. the opportunity to meet with the resolution specialist to address the allegations and provide information to the resolution specialist; iii. the resolution specialist reviewing the allegations and making factual and violation determinations based on preponderance of the evidence; and iv. written notice to the responding student of the resolution specialist's determinations.

The resolution specialist will consider the following in making this determination: i. the allegations in the Resolution Meeting Notice and the student's response to those allegations; ii. all documents and/or information that the resolution specialist finds relevant, including, without limitation, relevant documents presented by the responding student, reporting party, or any other interested party; iii. the oral or written statements of any witnesses with relevant information, as presented by the responding student, any reporting party, or other interested party, as it appears in a referral, and/or as requested by the resolution specialist; and iv. the recommendations of HCAB regarding responsibility and Resolution Outcomes related to the incident or precedent.

Questions regarding academic integrity should be directed to Student Conduct & Conflict Resolution, studentconduct@colorado.edu, 10 UCB Boulder, CO 80309, phone 303-492-5550.

The full Student Honor Code can also be viewed on the Student Conduct & Conflict Resolution (https://www.colorado.edu/sccr/) website.

Academic Offerings

Degrees

Graduate Degrees

The Graduate School of the University of Colorado Boulder offers instruction leading to the following advanced degrees:

- Master of Arts (MA)
- Master of Business Administration (MBA) (through Leeds School of Business)
- Master of Engineering (ME)
- Master of the Environment (MENV)
- Master of Fine Arts (MFA)
- Master of Music (MMus)
- Master of Music Education (MMEd)
- Master of Science (MS)
  - Professional Master of Science in Aerospace Engineering Sciences (MSAES)
  - Professional Master of Science in Civil Engineering (MSCVE)
  - Professional Master of Science in Computer Science (MSCPS)
  - Professional Master of Science in Electrical Engineering (MSEE)
  - Professional Master of Science in Environmental Engineering (MSENV)
  - Professional Master of Science in Mechanical Engineering (MSME)
- Master of Studies in Law (MSL) (through School of Law)
- Doctor of Audiology (AudD)
- Doctor of Musical Arts (DMA)
- Doctor of Philosophy (PhD)
- Juris Doctorate (JD) (through School of Law)

Bachelor's–Accelerated Master's Degrees

Bachelor's–accelerated master's (BAM) degree programs are offered in several departments. These programs allow a student to receive both a bachelor's and master's degree in a shorter period of time without compromising the academic integrity of either degree.

BAM programs are open only to highly qualified CU Boulder undergraduates. Students are typically admitted during the junior year with an intent application reviewed by their program. BAM students must apply online to graduate with their bachelor's degree for the semester in which degree requirements are complete, and must also apply at that time to be formally admitted to continue with the accelerated master's program. Students wishing to continue studying toward a doctorate must formally apply for admission to the Graduate School.

Students interested in a BAM program should inquire with their program of interest for information regarding admissions and detailed program guidelines and requirements.

Please see below for currently approved BAM degree programs offered, listed by college and school. Or, explore BAM program options in the Programs A-Z section (https://catalog.colorado.edu/programs-a-z/#filter=filter_53) of the catalog.

College of Arts and Sciences

- Art and Art History
- Chinese/Asian Languages and Civilizations
- Cinema Studies/Art and Art History
- Classics
- Ecology and Evolutionary Biology
- Ethnic Studies/Education
- French
- German Studies/German
- Integrative Physiology
- Japanese/Asian Languages and Civilizations
- Linguistics/Linguistics or Computational Linguistics, Analytics, Search and Informatics
- Mathematics
- Mathematics/Applied Mathematics
- Philosophy
- Physics
- Religious Studies
- Russian, East European and Eurasian Studies
- Statistics and Data Science/Applied Mathematics
- Theatre

Leeds School of Business

- Accounting/Accounting or Accounting Taxation
- Finance/Accounting or Accounting Taxation
- Real Estate

School of Education

- Ethnic Studies/Education

College of Engineering and Applied Science

- Aerospace Engineering
- Applied Mathematics
- Architectural Engineering/Architectural Engineering or Civil Engineering
- Biomedical Engineering
- Chemical Engineering or Chemical and Biological Engineering/Chemical Engineering or Materials Science and Engineering
- Civil Engineering/Architectural Engineering or Civil Engineering
- Computer Science/Computer Science, Computational Linguistics, Analytics, Search and Informatics, Data Science or Network Engineering
- Electrical Engineering or Electrical and Computer Engineering/Electrical Engineering
- Engineering Physics/Physics
- Environmental Engineering/Civil Engineering, Environmental Engineering, or Mechanical Engineering
- Integrated Design Engineering/Environmental Engineering or Mechanical Engineering
- Mechanical Engineering/Mechanical Engineering or Materials Science and Engineering

College of Media, Communication and Information

- Information Science

Post Baccalaureate-Accelerated Master's Degrees

Post Baccaulaureate Accelerated Master's (PBAM) programs in engineering offer an integrated degree plan for post-bacc students. A list of PBAM programs is below.

College of Engineering and Applied Science

- Applied Computer Science/Computer Science, Data Science, Network Engineering, or Computational Linguistics, Analytics, Search and Informatics

Dual Degrees

In an environment where there is a rapidly increasing desire for interdisciplinary and professional skills, receiving two master's degrees in complementary fields can be a real asset. Contact the individual departments for details.

Combinations within the Graduate School

- Audiology/Speech, Language and Hearing Sciences (both through the Department of SLHS)
- Engineering Management/Aerospace Engineering
- Engineering Management/Computer Science
- Engineering Management/Electrical Engineering
- Engineering Management/Mechanical Engineering
- Music (two areas)
- Religious Studies/Asian Languages/History (any two)

Combinations with MBA

- Anthropology/MBA
- Art and Art History/MBA
- Business Analytics/MBA
- Computer Science/MBA
- Environmental Studies/MBA
- German Studies/MBA
- Master of the Environment/MBA
- Supply Chain Management/MBA
- Theatre/MBA

Combinations with Law

- Business Administration/Law
- Environmental Studies/Law
- Juris Doctor/Bachelor of Laws with the University of Alberta faculty of Law, Canada
- Medicine/Law
- Public Administration/Law
- Urban and Regional Planning/Law

Certificates

Graduate students may pursue formal certificates in a variety of academic or interdisciplinary subjects. Each certificate program has unique requirements. Degree-seeking students who have been verified with completed certificate requirements will have the certificate(s) posted to their academic records at the time of graduation.

Non-degree students who are approved to pursue select certificate programs must be admitted through Continuing Education. Where applicable, students may enroll in graduate certificates in Specialized Programs (https://catalog.colorado.edu/specialized-programs/) as either non-degree or degree-seeking students.

Academic Records

Diplomas

A diploma is issued for each different degree type earned at the University of Colorado Boulder. A diploma will list degree, and dependent on the college, a student's major(s). Diplomas will not list any minors earned or a specific track or option. Undergraduate diplomas will list Latin or academic honors earned based on eligible GPA or successful participation in a honors program. Graduate students are not awarded Latin or academic honors based on GPA. Minors and eligible certificates earned will appear on the official transcript. Diplomas are mailed to all graduating students approximately eight weeks after the close of the semester in which degree requirements were completed and the student applied for graduation. Delivery windows are posted to the graduation and diplomas calendar (https://www.colorado.edu/registrar/students/calendar/graduation/) webpage. *Note:* International students must resolve all financial obligations with CU before a diploma is issued.

CU Boulder also offers a certified electronic diploma (CeDiploma) (http://www.colorado.edu/registrar/students/graduation/cediploma/) for students who complete a university-approved degree from Fall 2015 and onwards.

Graduating students with Federal Perkins/NDSL loans must complete a loan exit interview and clear all outstanding financial balances before leaving the university. Failure to do so results in a hold on the student's record. The hold prevents registration for future terms. Students can complete a loan exit interview by contacting Heartland ECSI at 1-888-549-3274 or via the Heartland ECSI (http://www.heartlandecsi.com/)website. Questions may be directed to University Student Loans & Debt Management in the Bursar's Office at 303-492-5571, toll free at 800-925-9844.

Display diplomas or replacement diplomas may be ordered online after graduation. For more information, visit the Office of the Registrar's diplomas (http://www.colorado.edu/registrar/alumni/diplomas/)webpage.

Enrollment & Degree Certification

Through Buff Portal (https://buffportal.colorado.edu/), students may print an official enrollment certification at no charge. Advanced registration enrollment verifications (https://www.colorado.edu/registrar/students/records/info/verifications/#after_you_039_ve_registered_amp_before_the_first_day_of_classes-1771) are available three weeks prior to the term start, and will remain available until the day before the first day of classes, to students enrolled in at least a half-time enrollment status for an upcoming term. Official certification of enrollment is available after the third week of classes of a semester. This certification may be for car insurance, loan deferments, medical coverage, scholarship purposes, etc. The Office of the Registrar can provide written confirmation of registration, enrollment or degree status upon request by current or former students.

CU Boulder has authorized the National Student Clearinghouse (NSC) to act as its agent for purposes of third party enrollment and degree verification. The NSC verifies degrees and enrollment for students who have not placed a privacy restriction on their academic record. The student's name when enrolled, social security number or student ID, and date of birth will be required for identification purposes for enrollment or degree verification. All third parties should contact the National Student

Clearinghouse by phone or visit its web site for current enrollment and degree verification information, instructions and fees.

University policy determines the *academic* enrollment status and federal regulation determines the *financial aid* enrollment status. CU Boulder is required to report enrollment based on the financial aid enrollment status to the NSC. Please refer to the Office of the Registrar's enrollment status grid on the Check Your Enrollment Status (https://www.colorado.edu/registrar/students/registration/register/status/) webpage to determine your academic/financial aid enrollment status.

Students are considered to generally be in good standing with the university if they are eligible to enroll or enrolled in classes in a given term. This status applies to participation in club sports and other student organizations, unless club or association rules specify different standards for eligibility.

Students may also obtain verification of degree by ordering an official transcript or requesting an official degree certification through the Office of the Registrar.

Transcripts

Official Transcripts

Current and former students may order transcripts online (https://exchange.parchment.com/send/adds/?main_page=login&s_id=7i3anAeWu6K3ErXO); no IdentiKey is required. Official transcripts are available in electronic PDF or paper format. Transcripts may be ordered as either a complete academic record of courses taken at all University of Colorado campuses or as a select career (undergraduate, graduate, law or noncredit) for coursework taken after 1988.

In certain circumstances, transcripts can be withheld for ongoing financial obligations to the university or for disciplinary actions.

Official transcripts bear the signature of the registrar and the official seal of the university (not applicable to noncredit transcripts).

Unofficial Transcripts

Currently enrolled students and alumni who have access to the student portal may view and print unofficial transcripts free of charge through Buff Portal (https://buffportal.colorado.edu/). Unofficial transcripts display the complete academic record of courses taken at the University of Colorado. However, academic institutions and potential employers generally do not accept the unofficial transcript as evidence of a student's career at CU Boulder, as this transcript does not carry the registrar's signature, the seal of the university or other security features. Unofficial transcripts are primarily used for advising and counseling in offices at University of Colorado campuses.

Educational Record Changes

Students whose degrees have been conferred are not eligible for retroactive changes to their educational record.

Graduate Course Load

For graduate students, enrollment status depends on a student's level (doctoral or master's), the type of classes they are taking and (for doctoral students) candidacy status. The status is also based on university policy and state and federal regulations. University policy determines the *academic* enrollment status and federal regulation determines the *financial aid* enrollment status. CU Boulder is required to report enrollment based on the financial aid enrollment status to the National Student Clearinghouse.

For academic purposes, full-time status is determined by university policy. For requirements for your academic load and status, visit the Graduate School Rules (Section 8: Full-time Status and Minimum Registration Requirements) (https://www.colorado.edu/graduateschool/faculty-staff/policies-procedures/rules/).

Typically in the fall and spring semesters, full time academic status is one of the following:

- 5 credit hours of graduate coursework.
- 8 credit hours of combined graduate/undergraduate coursework.
- 12 credit hours of undergraduate coursework or a varying number of thesis/dissertation credit hours, depending upon the student's status.

Summer course load requirements vary.

For financial aid full time and half time course-load requirements, graduate students should consult the financial aid load columns of the enrollment status grid (https://www.colorado.edu/registrar/sites/default/files/attached-files/enrollmentstatusgrid.pdf) and the Office of Financial Aid (https://www.colorado.edu/financialaid/aid-graduate-professional-students/) website. Students may also refer to Office of the Registrar's enrollment status (https://www.colorado.edu/registrar/students/registration/register/status/) webpage to determine your academic and financial aid enrollment status.

Graduate students may register for a maximum of 15 credit hours per semester toward a degree during the fall and spring semesters.

Academic Standards & Advising

Academic Standards

Grade Point Average

A student is required to maintain at least a B (3.00) average in all work attempted while enrolled in the Graduate School, and must have at least a 3.00 cumulative average to receive a graduate degree.

Nonacceptable Grades

1. A student who receives a grade of C+ or below in a course may retake the course under the grade replacement policy (https://www.colorado.edu/registrar/students/degree-planning/grade-replacement/), if eligibility standards are met.
2. Courses in which grades below B- (2.70) are received are not accepted for doctoral programs.
3. Courses in which grades below C (2.00) are received are not accepted for master's degree programs or for the removal of academic deficiencies.
4. Courses taken toward the fulfillment of requirements for graduate degrees may not be taken pass/fail or satisfactory/unsatisfactory.

Student Ethics

Academic Dishonesty

The University of Colorado Boulder is dedicated to maintaining the highest standards of intellectual honesty. Commitment to these standards is the responsibility of every student, faculty and staff member. The Honor Code (https://www.colorado.edu/sccr/students/honor-code-and-student-code-conduct/) was designed to uphold CU Boulder's standards of academic integrity and intellectual honesty, as

well as to provide quick resolution of to reports of student academic misconduct. The Honor Code process is supported by the Boulder Faculty Assembly.

All students of the University of Colorado Boulder are subject to the Honor Code for academic matters. Students must sign a statement agreeing to abide by all university policies, including the Honor Code, as a condition of admission to the university. Students who violate may be subject to discipline as set forth by the Honor Code.

Research Integrity
All research and scholarly/creative work must comply with requirements regarding research integrity. Allegations of plagiarism, fabrication, falsification, and other forms of research misconduct will be investigated by the Standing Committee on Research Misconduct. The Office of Research Integrity (https://www.colorado.edu/researchinnovation/rcr/research-misconduct/) provides further information and clarification on related issues and processes. Students should also review the university policy (https://www.cu.edu/ope/aps/1007/) on Misconduct in Research, Scholarship, and Creative Activities.

Academic Standing and Dismissal

Students are subject to academic requirements and standards for adequate progress placed both by the Graduate School and by their graduate program.

A student whose cumulative GPA falls below 3.00 is placed on academic warning. The student generally has two semesters in which to raise the cumulative GPA to 3.00 or above. If the student's cumulative GPA is at or below 2.50, a dean's administrative stop is placed on the student's record, and the student may be withdrawn from coursework for upcoming semesters. If there are extenuating circumstances, the department chair/program director may petition the Dean of the Graduate School showing compelling reasons for the student to be granted a chance to continue.

If a student does not earn a 3.0 GPA in all courses taken in the first of two academic warning semesters, or if after the two-semester academic warning period the student's cumulative GPA is still below 3.00 (or if other conditions placed by the major department or Graduate School are not met) a dean's administrative stop will be placed on the student's record and they may be subject to dismissal.

Students are also subject to academic requirements and standards for adequate progress placed by their graduate program. Based upon Regent Law and Regent Policy, an academic dismissal decision is made by the dean of the Graduate School upon the program's recommendation. Should the student be dismissed from the program, a dean's administrative stop is placed on the student's record and the student is withdrawn from classes for any future semesters.

Graduate School Advising

Graduate students receive degree-specific advising from their academic department/program. Faculty advisors are assigned to students according to departmental policies.

The Graduate School provides academic student services and fosters connection to campus partners and resources. Staff members offer expert guidance related to Graduate School and campus policies and procedures. Specific areas of expertise include registration requirements and requests, committee and general examination requirements, general academic standards, degree requirements which apply to all students and exceptions to general requirements.

The Graduate Student Services office also assists in the navigation of thesis/dissertation and graduation process, including associated requirements, deadlines and degree conferral. Staff can assist in a number of additional areas at the dean's office level.

For general inquiries, contact Graduate Student Services at gradinfo@colorado.edu or call 303-492-8220.

Admissions

Graduate School admission is handled by individual academic departments; see the specific college, school and program sections for details. For more information, visit Graduate School Admissions (http://www.colorado.edu/graduateschool/admissions/).

Application Procedures

Students seeking admission to a CU Boulder master's or doctoral program apply directly to the appropriate department. An applicant for admission must present complete application materials, including:

- The graduate application, available online at Graduate School Admissions (http://www.colorado.edu/graduateschool/admissions/),
- Unofficial transcripts for all academic work completed to date,
- A non-refundable application fee (currently $60 for domestic applicants and $80 for international applicants),
- Three or four letters of recommendation (please check with your program to obtain the required number of recommendations needed) and
- Test scores and other materials as required by specific departments.

A completed application must be submitted by the published deadline for the term for which admission is sought. Most departments have an application deadline that is several months before the start of the desired admission term.

Admission Requirements

Regular Degree Students

Qualified students may be recommended for admission to regular degree status by approved programs of the Graduate School provided they meet the following criteria:

- They hold a baccalaureate degree from an accredited college or university or have done work equivalent to that required for such a degree.
- They show promise of ability to pursue advanced study and research, as judged by their scholastic record.
- They have had adequate preparation to enter graduate study in the chosen field.
- They have at least a 2.75 (on a 4.00 scale) undergraduate GPA (for engineering, 3.00). (Note: Applicants who cannot meet criterion 4 may still secure regular admission if they have completed 9 credit hours of relevant graduate coursework with at least a 3.25 average.)
- They meet additional requirements for admission established by the major department.

Provisional Degree Students

Students who do not meet the requirements for admission as regular degree students may be recommended for provisional degree status by their major department. With the concurrence of the dean of the Graduate School, these students are admitted for a probationary term

of either one or two semesters of full-time study (or the equivalent for part-time students). At the end of the specified probationary period, provisional degree students must be either admitted to regular degree status or dismissed from the graduate program. Provisional students are subject to the same standards of performance required of regular degree students, plus any other requirements imposed by the program faculty as conditions of admission.

Credit hours earned by persons in provisional degree status may count toward a degree at CU Boulder.

To meet the standard terms of provisional admission, the student must generally complete 12 credit hours in two semesters (or equivalent for part-time students) with a 3.00 cumulative GPA. Program faculty may recommend additional or alternative conditions as appropriate.

Bachelor's–Accelerated Master's Degree Programs

A number of CU Boulder departments offer bachelor's–accelerated master's (BAM) degree programs, which enable CU undergraduate students to pursue undergraduate and graduate programs simultaneously and to receive both degrees in a shorter time period than it would take to pursue them separately.

Highly qualified undergraduate students may be recommended for admission to a BAM degree program at the end of their sophomore year or the beginning of their junior year. Such students are not formally admitted to the Graduate School. Standards for admission as well as eligibility to remain in the program are specified by each department.

Dual Degree Programs

The Graduate School, in conjunction with the faculty of each department and the deans of schools and colleges where appropriate, approves dual degree programs that combine previously approved graduate degree programs in two areas or departments.

Qualified graduate students may be recommended for admission to an approved dual degree program upon meeting the qualifications of each graduate program and any special qualifications as outlined by each program's approved guidelines. Minimum standards and qualifications for admission and continuation are specified by each department. Students wishing to complete degrees in more than one department that have no approved dual degree program or interdisciplinary major combination must complete all the requirements for both degrees with no shared or overlapping coursework.

Nondegree Students to Regular Degree Status

Students with nondegree status applying to a graduate degree program should talk to the academic department about specific resident requirements before applying to the program. The maximum amount of work that may be transferred to CU Boulder depends upon the graduate degree sought; individual departments may have more restrictive limits. Learn more about transfer of credit on the Graduate School's admissions page (https://www.colorado.edu/graduateschool/admissions/).

Former and Suspended Students

Students who were previously admitted to a graduate degree program but who did not complete that degree and who have not been continuously registered at CU Boulder must complete the following steps before being readmitted:

1. Clarify their status with the department to determine their eligibility to return and pursue the same degree.
2. Submit a Graduate Readmit application to the department (departmental approval is required) before enrollment levels are met or deadlines passed for the term in which they expect to return to CU Boulder.

A regular degree student who is dismissed for failure to maintain a 3.00 GPA is eligible to apply for readmission after one year. Approval or rejection of this application rests jointly with the student's major department and the dean of the Graduate School. The final decision will be made by the dean based on the recommendations of the department.

Students Transferring from Other CU Campuses

Students transferring from another CU campus to CU Boulder must apply to and be accepted by the Boulder campus.

Students Changing Major Departments

Students who want to change major departments must apply to and be accepted by the new department. When adding a second major in an approved interdisciplinary major combination, students should contact their home department for instructions on this process.

Credits & Grading

Grading System

The following grading system is standardized for all colleges and schools of the university. Each instructor is responsible for determining the requirements for a class, determining the grading scale used, and for assigning grades on the basis of those requirements and grading scale by the grade submission deadline each term.

Standard Grade Points per Hour of Credit

A	superior/excellent, 4.0
A-	3.7
B+	3.3
B	good/better than average, 3.0
B-	2.7
C+	2.3
C	competent/average, 2.0
C-	1.7
D+	1.3
D	1.0
D-	minimum passing, 0.7
F	failing, 0.0

Other Grade Symbols

CR	Credit. Excluded from GPA.
I	Incomplete; changed to F if not completed within one year
IP	In progress; thesis at the graduate level or specified graduate-level courses
NC	No credit
NR	Class grades were not reported when final grades were processed

P	Passing; effective spring 2020, under pass/fail option, grades of D +, D or D- convert to P. Law School requires a grade of 72 or above to Pass. Excluded from GPA.
P+	Passing; effective spring 2020, under pass/fail option, grades of C- and above convert to P+. Excluded from GPA.
S	Satisfactory (effective fall 2022; formerly pass/fail only). Excluded from GPA.
U	Unsatisfactory (effective fall 2022; formerly pass/fail only). Excluded from GPA.
W	Withdrew
***	Student is currently enrolled in a class; in progress

Incomplete (I) Grades

An incomplete (I) grade indicates that the student did not complete the requirements for the class by the end of the grading period for that semester. Requests for incomplete grades must be initiated by the student and only when, for reasons beyond their control, the student is unable to complete the class requirements within the semester of enrollment. A substantial amount of work (at least two-thirds) must have been satisfactorily completed before approval for such an incomplete grade is given.

If an instructor grants a request for an incomplete, the instructor sets the conditions under which the coursework can be completed and the time limit for its completion or if the class should be retaken. Incomplete grades, along with a last date of attendance (for financial aid purposes) must be submitted by the grading deadline of the term.

If the student does not complete the class requirements within one year from the end of the semester in which the Incomplete was assigned, the I grade is converted to a failing (F) grade.

If an incomplete-graded class is retaken, it must be completed on the Boulder campus or through Boulder Continuing Education coursework, and the student must re-register for the course and pay the appropriate tuition. The initial grade of I is not removed from the transcript if the course is completed within one year of the end of the term of the previous enrollment. When a final grade has been assigned, the transcript states, "Originally graded as Incomplete."

For graduating students, I grades assigned in courses required for a degree must be resolved before degrees may be posted. Unresolved I grades in required coursework will result in graduation being postponed. Students must reapply for graduation in a subsequent term. I grades assigned in courses not required for their degree must be resolved no later than the grading deadline of the term of graduation. If left unresolved, I grades become permanent and subsequent grade changes are not honored.

Not Reported (NR) and In Progress (IP)

Similar to Incomplete grades, graduating students who have either NR or IP status in courses required for a degree must have them resolved and converted to an official grade before degrees will be posted. Unresolved NR and IP status grades in required coursework will result in graduation being postponed. Students must reapply for graduation in a subsequent term. NR and IP status grades assigned in courses not required for a degree must be resolved by the last regular class day of the term of graduation. If left unresolved, NR and IP grades become permanent and subsequent grade change requests are not honored.

Grade Changes

Students who believe a grade was assigned in error must request a grade change by the published deadline of their home college or school. However, grade changes for graduating students must be submitted and processed prior to degrees being posted to academic records. Grade changes will not be processed to an academic record with a conferred degree.

It is left to the discretion of the faculty member to determine if a grade change is warranted. This policy does not apply to grading grievances. See Student Appeals, Complaints & Grievances (https://www.colorado.edu/policies/student-appeals-complaints-grievances-brief-guide/).

Grade Point Average

The overall University of Colorado grade point average (GPA) is computed as follows: the credit hours and credit points are totaled for all courses and across all campuses within the same career (UGRD, GRAD or LAW); then the total credit points are divided by the total credit hours. Courses with grade symbols of P, P+, NC, *** (grade not yet entered), W, I and IP are excluded from calculations. All standard letter grades (A-F) are included in the GPA, including grades of F earned for courses graded on a pass/fail basis. Grades of I that are not completed within one year are converted to F grades and calculated in the GPA at the end of the one-year grace period. Below is an example GPA calculation for a hypothetical semester:

Grade Earned: A;	Credit Points per Hour: 4.0; x Credit Hours: 4.0 = Credit Points in Course: 16.0
Grade Earned: A-;	Credit Points per Hour: 3.7; x Credit Hours: 4.0 = Credit Points in Course: 14.8
Grade Earned: B+;	Credit Points per Hour: 3.3; x Credit Hours: 4.0 = Credit Points in Course: 13.2
Grade Earned: P or P+;	Credit Points per Hour: —; x Credit Hours: 3.0 = Credit Points in Course: — (excluded)
Grade Earned: F;	Credit Points per Hour: 0; x Credit Hours: 3.0 = Credit Points in Course: 0
	Total of 15 credit hours with 44 credit points, so 44/15 = 2.93 GPA

For individual GPA calculations related to graduation requirements for a college or school, students should refer to their academic dean's office.

Numeric GPAs displayed on the transcript are carried out to three decimal points and are not rounded up to the nearest whole number.

Credit Policies

No Credit

Coursework to be applied toward an advanced degree may not be taken for no credit (NC). Courses taken for no credit cannot be used toward the minimum credit load requirement for full-time or half-time status, and are

not eligible for tuition remission coverage. Graduate students also cannot use the no-credit class(es) towards their TA/RA appointment.

Pass/Fail

No coursework to be applied toward an advanced degree may be taken pass/fail or satisfactory/unsatisfactory.

Transfer Credit

Transfer credits from accredited institutions are accepted by CU Boulder only after approval by the department chair/program director and the dean of the Graduate School, and under conditions outlined below. Transfer credit is defined as any credit earned at another accredited institution, credits earned on another campus of the CU system or credits earned as a nondegree student within the CU system. Students seeking a degree from CU Boulder must complete the majority of their coursework while enrolled as degree-seeking students.

With the approval of the Graduate School and at the discretion of the unit, students may transfer up to and including 24 hours from a CU Boulder graduate certificate program, taken as a CU Boulder non-degree student, toward a graduate degree.

The following rules apply to transferring credit to CU Boulder graduate programs:

- The maximum amount of work that may be transferred to CU Boulder depends upon the graduate degree sought (see below; individual departments may have more restrictive limits).
- Work already applied toward a graduate degree received from CU Boulder or another institution cannot be accepted for transfer toward another graduate degree of the same level at CU Boulder. In addition, work completed for a doctoral degree may not be applied toward a subsequent master's degree. Courses applied toward an undergraduate degree may not be transferred to the CU Boulder Graduate School.
- All courses accepted for transfer must be graduate-level courses. A course in which a grade of B- or lower was received will not be accepted for transfer. Transfer coursework that is to be applied to a graduate degree at CU Boulder and was completed more than five years prior to being accepted to the program will be evaluated by the major department as to current relevance and applicability to the degree requirements. At the discretion of the department, a student may be asked to validate transfer credits prior to approval.
- Credit may not be transferred until the student has completed 6 credit hours of graduate coursework as a regular, degree-seeking student at the Boulder campus with a 3.00 GPA. Transferred credits do not reduce the minimum registration requirement, but may reduce the amount of work to be done in formal courses.

Maximum Transfer Credits Accepted (By Degree)

Code	Title	Credit Hours
Master's (except MFA)		9
MFA		18
Doctoral		21

Graduate Credit for CU Boulder Seniors

With the exception of students enrolled in a bachelor's-accelerated master's (BAM) program, seniors at CU Boulder may earn graduate credit for a limited amount of graduate-level work (up to 9 credit hours), provided such work is completed with a grade of B or above in coursework at CU Boulder, comes within the five-year course time limit, has not been applied toward another degree and is recommended for transfer by the department concerned, and such transfer is approved by the dean of the Graduate School.

Credit for Prior Learning

CU Boulder recognizes that learning may be acquired outside of traditional learning environments and will consider the award of credit for such learning in one of three ways. These include standardized examinations, individual course challenges, and assessments of learning experiences out of of institutions of higher education.

See the university's Credit for Prior Learning policy or the Office of the Registrar site for more detailed information on requirements, eligibility and procedures.

Course Challenge

Course challenge is a process by which students may seek to demonstrate knowledge and competencies in a specific CU Boulder course through an approved assessment in order to earn academic credit for that course. Per Colorado law, course challenge is available for GT Pathways courses. For non-GT Pathways CU Boulder undergraduate courses, an academic unit determines if a particular course is suitable for course challenge.

Successful course challenges are recorded as resident credit with a grade of CR (credit earned) within the term the challenge was completed, and are calculated in credit totals, but not in GPAs. Unsuccessful challenge exams are recorded on academic transcripts with a grade of U (Unsuccessful). U grades are not calculated in credit totals or in GPA calculations. CU Boulder assesses a per-credit administrative surcharge for Course Challenges.

Credit from Learning Experiences Outside of Higher Education

Prior learning may occur in settings outside of institutions of higher learning, such as in the workplace, business or industry, or the community, and CU Boulder academic units may give programmatic credit for prior learning for relevant work-related experience. Prior learning arrangements for specific academic programs must be approved by the respective dean(s), must clearly define expected learning outcomes and must have an associated assessment plan to monitor achievement of the learning objectives.

Earned credit for learning experiences outside of accredited institutions of higher learning is awarded as a block of external Credit for Prior Learning. It is calculated in credit totals, but not in GPAs. CU Boulder may assess a surcharge for CPL for external learning experiences.

Credit through Standardized Exam

Nationally recognized exams such as CLEP, AP, IB and DANTES allow students to earn college credit by achieving specific scores in select subject areas.

See the Office of Admissions' Credit by Examination page for information about earning credit through standardized exams.

Grade Replacement

CU Boulder students (excluding Law students) who previously earned a low grade in an eligible course may repeat that course in a later term and be eligible for grade replacement. Grade replacement affords students the opportunity to improve their cumulative GPA.

Grade replacement is applied automatically at the end of each term to eligible courses and students.

Under grade replacement, the grade earned in the most recent prior attempt of a course will still appear on the transcript, but it will be replaced in cumulative GPA and credit totals as long as the latest grade earned is the same or better. If a lower grade is earned in the latest attempt, grade replacement is not applied and the grades from both attempts will be used in computing cumulative and major grade point averages, total credits and academic standing.

When students repeat courses that are not eligible for grade replacement, the grade and credits earned in each attempt are included in student credit and GPA totals and calculations.

Some academic programs have limits on the number of course repeats allowed for specific courses or the number of attempts for degree applicability.

General Eligibility

Course Requirements

Only courses offered by and taken through CU Boulder are eligible for grade replacement. To qualify for grade replacement, the course also must:

- Be taken at CU Boulder for a letter grade (i.e., not taken pass/fail, satisfactory/unsatisfactory or for no credit).
- Not be a special topics course or any other course designated in the catalog as repeatable for credit (e.g., independent study, field experience, dissertation hours). *Exceptions*: Topics courses WRTG 1100, WRTG 1150, WRTG 1160, WRTG 1250, WRTG 3020, WRTG 3030, WRTG 3035 and WRTG 3040 are eligible for grade replacement regardless of topic.

Student Requirements

To quality for grade replacement, students must:

- Be an active student at CU Boulder (law students are not eligible). Students who have graduated cannot use grade replacement for a course taken in a completed academic career.
- Have earned a C- or lower (undergraduate students), or a C+ or lower (graduate students) in the most recent prior attempt of a course.

Opting Out of Grade Replacement

Students may repeat courses at any point in their academic career without invoking grade replacement by submitting an opt-out request to Office of the Registrar by the last day of classes of the term. In those cases, the grade and credits earned in each attempt are included in student credit and GPA totals and calculations.

Additional Information

For more information on grade replacement, visit the Office of the Registrar website (https://www.colorado.edu/registrar/students/degree-planning/grade-replacement/) or view the grade replacement policy in full (https://www.colorado.edu/registrar/students/degree-planning/grade-replacement/policy/).

Degree Requirements

Master's Degree Requirements

A student enrolled in a master's program must satisfy the degree requirements of both the Graduate School and the major department. The requirements listed below are campus-wide minimum standards of the Graduate School; additional requirements are set forth by the major department.

A graduate student is responsible for becoming informed about and observing all regulations and procedures required by the graduate program pursued. Ignorance of a rule does not constitute a basis for waiving that rule. Any exceptions to the policies stated in this catalog must be approved by the dean of the Graduate School.

Minimum Registration Requirement

For purposes of deciding full-time registration status, a student must meet one of the following criteria:

Master's Students

- One who is carrying a minimum of 5 credits of graduate-level coursework (pass/fail or for a grade), 8 credits of combined undergraduate and graduate coursework or 12 hours of undergraduate-level coursework
- At least 1 master's thesis hour
- At least 1 hour of "Master's Candidate for Degree"

Additional full-time and part-time registration requirements may exist for international students or students receiving or deferring financial aid, though degree requirements remain the same. Affected students should consult with International Student and Scholar Services or the Office of Financial Aid for more information.

Master's degree minimum registration requirements can be met only by registering full-time at CU Boulder for at least two semesters, part-time for at least four semesters, or full-time for at least one semester and part-time for at least two semesters.

Degree Requirements

The minimum requirement for the master's degree is 30 credit hours. A student may complete a Plan I (thesis) option, or a Plan II (coursework) option. At least 24 credit hours must be completed at the 5000 level or above; these 24 credit hours must include a minimum of 4, but not more than 6, thesis credit hours for those students completing a Plan I degree. A maximum of 6 credit hours may be completed at the 3000 or 4000 level at the discretion of the academic department.

Independent study coursework cannot exceed 25 percent (rounded to the nearest whole number) of the coursework required for the master's degree.

Language Requirement

There is no campuswide foreign language requirement for the master's degree. The decision regarding the foreign language requirement for each graduate degree is the responsibility of the graduate program.

Admission to Candidacy

To be granted a master's degree, a student must formally apply for admission to candidacy using the process provided by the Graduate School no later than the posted graduation deadlines during the semester in which he or she plans to have the degree conferred.

Graduation

Students must meet all posted graduation deadlines in order to receive a degree in any given semester.

Time Limit

Master's degree students have four years (six years for students pursuing an ME) from the semester in which they are admitted and begin coursework to complete all degree requirements. The phrase "all degree requirements" includes the filing of the thesis with the Graduate School if Plan I is followed. Students who fail to complete the degree in this four-year period may be dismissed from their program with the concurrence of the major advisor and/or appropriate departmental personnel. To continue, the student must file a petition for an extension of the time limit with the dean of the Graduate School. Such petitions must be endorsed by the student's major advisor and/or other appropriate departmental personnel and may be granted for up to one year.

Students who have not completed the degree within their time limit, and who have received approval for an extension, must have any coursework completed more than five years prior to the completion of the degree requirements evaluated by their department for relevance and applicability. At the discretion of the department the student may be required to validate these courses as part of the completion of their degree requirements.

Students who need to leave CU Boulder for a period of time may apply for a graduate leave of absence for up to one year. Taking a leave of absence does not extend the student's time limit, but may be used as a reason to request an extension.

Students whose registration at CU Boulder is interrupted by military service may apply to the dean of the Graduate School for an extension.

Final Examination/Thesis Defense

Each candidate for a master's degree is required to complete a comprehensive final examination/thesis defense after the other requirements for the degree have been substantially completed. In some programs, non-thesis students are instead required to present an approved degree plan which meets the requirements of the field and represents an intellectually coherent graduate education as determined by the major department and will not complete a final examination.

The examination/defense may be given near the end of the student's last semester while the candidate is still taking required courses for the degree, provided satisfactory progress is being made in those courses. The following rules apply to the comprehensive-final examination/thesis defense:

1. A student must be registered on the Boulder campus as a regular degree-seeking student during the semester the examination is passed.

2. Notice of the examination/defense must be filed by the major department in the Graduate School at least two weeks prior to the examination. The examination/defense must be scheduled not later than the posted deadline for the semester in which the degree is to be conferred.

3. The examination/defense is given by a committee composed of three Graduate Faculty members appointed by the department with approval of the dean of the Graduate School. The chair of the committee must have a regular Graduate Faculty appointment. Other committee members must have either a regular or special Graduate Faculty appointment.

4. The examination/defense, which may be oral, written, or both, must cover the thesis (if applicable), which should be essentially complete, other work completed in courses and seminars in the major field, and all work presented for the degree.

5. A student must have an affirmative vote from the majority of the committee members to pass. A student who fails the comprehensive-final examination/thesis defense may attempt it once more after a period of time determined by the examining committee.

Thesis Requirements

A thesis, which may be research or expository, critical, or creative work, is required of every master's degree candidate pursuing a thesis plan (Plan I).

1. Every thesis presented in partial fulfillment of the requirements for an advanced degree must represent the equivalent of 4 to 6 semester hours of work (9 hours for the CRWR MFA degree.)
2. The thesis must comply in mechanical features with the specifications for theses and dissertations available in the Graduate School.
3. After the thesis defense, the student is responsible for submitting the thesis and Thesis Approval Form (TAF) signature page on or before the posted deadline during the semester in which the master's degree is to be conferred.

The final grade is withheld until the thesis is completed. In progress (IP) grades are assigned during each semester until the defense is successfully completed and the final copy of the thesis is accepted by the examination committee, at which time the final grade for all thesis hours is submitted to the Graduate School

Graduate Faculty Appointments for Courses and Exams

All courses, 5000 level or above, completed to fulfill graduate degree requirements must be taught by members of the graduate faculty. In addition, any faculty member serving on a master's or doctoral examination/defense committee must hold a current graduate faculty appointment. Membership on the university faculty does not automatically constitute an appointment to the graduate faculty. Contact your departmental graduate program assistant for questions concerning these appointments.

Doctoral Degree Requirements

The Doctor of Philosophy (PhD), Doctor of Musical Arts (DMA) and Doctor of Audiology (AuD) are the highest academic degrees conferred by CU Boulder. The requirements stated below are campuswide minimum requirements for all candidates for the PhD degree; additional requirements are found in department announcements. Additional requirements for the Doctor of Musical Arts (p. 1821) are available from the College of Music. Additional requirements for the Doctor of Audiology

(p. 1411) are available from the Department of Speech, Language and Hearing Sciences.

A graduate student is responsible for becoming informed about and observing all regulations and procedures required by the graduate program pursued. Ignorance of a rule does not constitute a basis for waiving that rule. Any exceptions to the policies stated in this catalog must be approved by the dean of the Graduate School.

Admission

If a student is admitted to a master's program and wants to continue on to a doctoral program in the same department, they should consult their home department on the proper procedure.

Minimum Registration Requirement

For purposes of deciding full-time registration status, a student must meet one of the following criteria:

PhD students

- one who is carrying a minimum of 5 credits (pass/fail or for a grade) of graduate-level coursework, 8 credits of combined undergraduate and graduate coursework, or 12 credits of undergraduate-level coursework prior to passing the comprehensive exam
- at least one doctoral dissertation credit prior to passing the comprehensive exam
- a minimum of 5 dissertation hours after passing the comprehensive exam

DMA students

- one who is carrying a minimum of 5 credits (pass/fail or for a grade) of graduate-level coursework, 8 credits of combined undergraduate and graduate coursework, or 12 credits of undergraduate-level coursework prior to passing the comprehensive exam
- at least one hour of coursework numbered TMUS 8200-8399 or "precandidate for Doctor of Musical Arts" before the comprehensive examination
- at least one hour of coursework numbered TMUS 8200-8399 or "candidate for Doctor of Musical Arts" after the comprehensive examination

AuD students

- one who is carrying a minimum of 5 credits (pass/fail or for a grade) of graduate-level coursework, 8 credits of combined undergraduate and graduate coursework, or 12 credits of undergraduate-level coursework.

Additional full-time and part-time registration requirements may exist for international students or students receiving or deferring financial aid, though degree requirements remain the same. Affected students should consult with International Student and Scholar Services or the Office of Financial Aid for more information.

The minimum registration requirement for doctoral students is full-time registration for six semesters of graduate degree credit beyond the attainment of an acceptable bachelor's degree. Two semesters of minimum registration credit may be allowed for a master's degree from another accredited institution; however, at least four semesters of minimum registration credit, two of which must be consecutive in one academic year, must be earned for work completed at CU Boulder.

Degree Requirements

The minimum requirements for the PhD or DMA degree are 30 credit hours of coursework at the 5000 level or above. Those students pursuing the PhD shall complete a minimum of 30 credit hours of dissertation work beyond the minimum coursework requirement. The minimum requirements for the AuD degree are 89 credit hours of coursework at the 5000 level or above.

Unless otherwise specified by departmental requirements, all applicable courses taken at the 5000 level or above that were taken for the master's degree at CU Boulder may be applied toward the PhD degree. Coursework taken in pursuit of a doctoral degree cannot be applied toward a subsequent master's degree.

Preliminary Examination

Each department determines for itself (by examination or other means) that students who wish to study for the doctoral degree are qualified. The means by which each department makes this evaluation are specified in departmental requirements. Students who are thus evaluated are notified immediately of the results.

Language Requirement

There is no campuswide foreign language requirement for the doctoral degree. The decision regarding the foreign language requirement for each graduate degree is the responsibility of the graduate program.

Dissertation Credit-Hour Requirement

To complete the requirements for the PhD a student must register for a minimum of 30 dissertation credit hours. A student may not register for more than 10 dissertation credit hours in any one semester, including summer.

Comprehensive Examination

Before admission to candidacy for the doctoral degree, students must pass a comprehensive examination in the field of concentration and related fields.

The following rules apply to the doctoral comprehensive examination.

1. Students must be registered (P/F or for credit) on the Boulder campus as regular degree-seeking students when they pass the comprehensive examination.
2. Notice of the examination must be filed by the major department with the Graduate School at least two weeks prior to the examination.
3. The examination is conducted by an examining board appointed by the chair of the major department and approved by the Dean of the Graduate School. The board shall consist of the major advisor and additional members as necessary to a minimum of five. The chair must have a regular Graduate Faculty appointment. Other committee members must have regular or special Graduate Faculty appointments. Successful candidates must receive affirmative votes from a majority of the members of their examination board. A candidate who fails the examination may attempt it once more after a period of time determined by the examination board.
4. The examination, which may be oral, written or both, tests mastery of a broad field of knowledge, not merely formal coursework.

Admission to Candidacy

A student must formally apply for admission to candidacy for the doctoral degree using the process provided by the Graduate School upon passing the comprehensive examination. Before being admitted to candidacy a student must earn at least three semesters toward the minimum registration requirement, and pass the comprehensive examination.

Graduation

Students must meet all posted graduation deadlines in order to receive a degree in any given semester.

Continuous Registration Requirement

A PhD student is required to register continuously as a full-time student, for a minimum of five dissertation hours in the fall and spring semesters of each year, beginning with the semester following the passing of the comprehensive examination and extending through the semester in which the dissertation is successfully defended (final examination). A student not being required to maintain full-time status and not using campus facilities may claim off-campus status, which allows registration for three rather than the minimum of five dissertation credit hours. Off-campus status (3 credits of dissertation hours) is considered part-time. All university considerations for part-time status apply.

DMA students who have passed their comprehensive exams must maintain continuous registration by registering for a minimum of one credit hour of DMA dissertation credits (TMUS 8100–8399) or TMUS 8029 in the fall and spring semesters of each year, beginning with the semester following the passing of the comprehensive examination and extending through the semester in which the final examination is passed.

AuD students who have passed their comprehensive exams must maintain continuous registration by registering for four or five hours of graduate-level coursework each semester as required by the audiology program, with five hours being taken during the semester in which the final examination is passed.

Additional full-time and part-time registration requirements may exist for international students or students receiving or deferring financial aid, though degree requirements remain the same. Affected students should consult with International Student and Scholar Services or the Office of Financial Aid for more information.

A student who fails to register continuously for required hours after passing the comprehensive examination must retake and pass the examination, to regain status as a student in good standing in the Graduate School. The department may require that the student validate coursework more than five years old. At its discretion, the department may petition the Dean of the Graduate School for a time limit for completion of all degree requirements of up to one year after the retaking of the comprehensive exam. The department must petition the Dean of the Graduate School to waive the requirement to retake the comprehensive exam.

PhD students must be registered for a minimum of five dissertation hours the semester (including summer semester) in which the dissertation defense is held. DMA students must be registered for a minimum of one credit hour of DMA dissertation credits (TMUS 8100–8399) or TMUS 8029 during the semester in which the final examination is passed. AuD students must be registered full-time for a minimum of five credit hours of graduate-level coursework during the semester in which the final examination is passed.

Time Limit

Doctoral degree students are expected to complete all degree requirements within six years from the semester in which they are admitted and begin coursework in the doctoral program. The phrase "all degree requirements" includes the filing of the dissertation and all accompanying forms with the Graduate School. Students who fail to complete the degree in this six-year period may be dismissed from their program with the concurrence of the major advisor and/or appropriate departmental personnel. To continue, the student must file a petition for an extension of the time limit with the dean of the Graduate School. Such petitions must be endorsed by the student's major advisor and/or other appropriate departmental personnel and may be granted for up to one year. If the dean of the Graduate School and the department chair/program director cannot agree on whether a student should continue, the Graduate School's executive advisory council makes the final decision.

Students who need to leave CU Boulder for a period of time may apply for a graduate leave of absence for up to one year. Doctoral students who are required to maintain continuous registration may petition for an exception in order to take a leave of absence due to extenuating circumstances. Requests for leave of absence for parental leave do not require a petition. Taking a leave of absence does not extend the student's time limit, but may be used as a reason if applying for an extension.

Students whose registration at CU Boulder is interrupted by military service may apply to the dean of the Graduate School for an extension of time.

Dissertation Defense/Final Exam

After the PhD dissertation has been accepted for defense by the student's committee, a final examination on the dissertation and related topics is conducted. The following rules apply to the PhD dissertation defense/non-PhD doctoral final examination:

1. PhD students must be registered as full time, regular degree-seeking students at CU Boulder, for a minimum of 5 dissertation hours during the semester in which they pass the final examination. DMA students must be registered, full-time for DMA dissertation credits (courses 8200–8399) or TMUS 8029 during the semester in which they pass the final examination. AuD students must be registered full time with at least 5 hours of graduate level coursework. (Graduate School Rules, 18)

2. Students must notify the Graduate School of their final oral examination at least two weeks before their scheduled examination date. The examination must be scheduled not later than the posted deadline for the semester in which the degree is to be conferred.

3. This examination is wholly or partly oral, the oral part being open to anyone.

4. The examination is conducted by a committee appointed by the chair of the major department and approved by the dean of the Graduate School, which consists of at least five persons, one of whom must be from outside the student's major department. Three of the members must be CU Boulder Graduate Faculty. The chair and outside member of the committee must have regular Graduate Faculty appointments. The other committee members must have either regular or special Graduate Faculty appointments. The outside member must either have a regular

Graduate Faculty appointment in a different department at CU Boulder or hold a special Graduate Faculty appointment with approval to serve as outside member. More than one dissenting vote disqualifies the candidate in the final examination. The chair and all committee members must participate in the examination, with the mode of participation (e.g. in person, remotely) defined by the committee and approved by the department.

5. A student who fails the examination may attempt it once more after a period of time determined by the examining committee.

Dissertation Requirements

A PhD student must write a dissertation based upon original investigation, showing mature scholarship and critical judgment, as well as familiarity with tools and methods of research. The subject must be approved by the student's major department.

1. Every dissertation presented in partial fulfillment of the requirements for an advanced degree must represent the equivalent of at least 30 credit hours of work.
2. The student is responsible for notifying the Graduate School of the exact title of the dissertation on or before the posted deadlines during the semester in which the doctoral degree is to be conferred.
3. The dissertation must comply in mechanical features with the specifications for theses and dissertations available in the Graduate School.
4. After the dissertation defense, the student is responsible for submitting the dissertation and Thesis Approval Form (TAF) on or before the posted deadline during the semester in which the doctoral degree is to be conferred.

The final grade is withheld until the dissertation is completed. In progress (IP) grades are assigned during each semester until the defense is successfully completed and the final copy of the dissertation is accepted by the examination committee, at which time the final grade for all dissertation credit hours is submitted to the Graduate School.

Embargo of Theses or Dissertations

Theses and dissertations approved by the departments and the Graduate School are released to ProQuest/UMI and preserved electronically through the University Libraries.

Occasionally, the primary academic advisor, after consultation with the student, may find it necessary to embargo the student's thesis to protect university rights to intellectual property. The university accepts the obligation to protect potentially publishable creative works and potentially patentable subject matter from premature public disclosure so as to preserve entitlement to patent protection while the technology is being evaluated. This embargo should take place only when it is absolutely required and only for the minimum time necessary.

With just cause, the student may request that an embargo be placed on the publication/sale of the thesis for a reasonable amount of time. This request is made upon the electronic submission of the document.

Graduate Faculty Appointments for Courses and Exams

All courses, 5000 level or above, completed to fulfill graduate degree requirements must be taught by members of the graduate faculty. In addition, any faculty member serving on a master's or doctoral examination/defense committee must hold a current graduate faculty appointment. Membership on the university faculty does not automatically constitute an appointment to the graduate faculty. Contact the departmental graduate program assistant for questions concerning these appointments.

Distance Education

Distance Education

The University of Colorado Boulder offers master's degrees, graduate certificates, and individual graduate courses online in several disciplines.

Students may enroll in a single course, in a graduate certificate, or in a full master's degree program at CU Boulder. Students applying for admission to a degree program may enroll in courses as non-degree students before being accepted, but should typically apply for admission before finishing a third course. Courses taken before admission are considered transfer credit. A maximum of nine hours of transfer credit will be accepted toward graduate degree requirements once a student is admitted into that program. With Graduate School and unit approval, a maximum of 24 hours can be transferred toward a graduate degree if the hours were part of a graduate certificate program and were taken as a CU Boulder non-degree student.

For more information, visit the Graduate School website (https://www.colorado.edu/graduateschool/admissions/prepare-apply/program-information-deadlines/) and contact the individual graduate program of interest directly.

Graduation

Graduation

Students are eligible to graduate at the close of the term in which they successfully complete all requirements for their degree program. Degrees and certificates are typically conferred at the close of fall semester, spring semester and summer session. Credentials in select programs may be conferred mid-semester.

Students must apply for graduation through Buff Portal by the published deadline for the term in which they complete degree requirements. Instructions for applying and important dates and deadlines are available on the Office of the Registrar's Graduation & Commencement (http://www.colorado.edu/registrar/students/graduation/) webpage. Individual colleges and schools may require additional processes for students completing their degrees.

Commencement

A general commencement ceremony is held in May for all students who have graduated or anticipate to graduate in a given academic year (fall, spring and summer). This ceremony is open to the public and no tickets are required. Many departments, colleges and schools hold recognition ceremonies in both fall and spring semesters. For dates and details about the ceremony, visit CU Boulder's Commencement (http://www.colorado.edu/commencement/) website.

Diplomas

Please see the Academic Records (p. 1107) section.

Health & Wellness

Health and Wellness Services

Health and Wellness Services is a part of CU Boulder Strategic Resources and Support. As part of Strategic Resources and Support, we are collectively committed to the success and wellbeing of all our students as well as the faculty and staff we serve.

All CU Boulder undergraduate and graduate students have access to a full range of on-campus health and wellness services in addition to a variety of virtual offerings.

To learn more, visit Health and Wellness Services (http://www.colorado.edu/health/).

Administrative Services

The Administrative Services team oversees all aspects of medical insurance, billing and medical records at CU Boulder. To learn more, visit Administrative Services (https://www.colorado.edu/healthcenter/insurance-billing-medical-records/).

Counseling and Psychiatric Services

Counseling and Psychiatric Services (CAPS) offers confidential, on-campus short-term mental health and psychiatric services for all fee-paying students. CAPS addresses a variety of concerns such as academics, anxiety, body image, depression, relationships, substance use and more. To learn more, visit CAPS (http://www.colorado.edu/health/counseling/).

Center for Disability and Access

The Center for Disability and Access is dedicated to providing students with disabilities an equal opportunity to participate in university programs, courses and activities through reasonable accommodations and services. Our office is here to support students, staff and faculty with accommodation requests, implementation, guidance and general information. To learn more, visit the Center for Disability and Access (https://www.colorado.edu/disabilityservices/).

Health Promotion

Health Promotion provides outreach and education on a variety of health topics to help students make informed decisions about their health and wellbeing. Health Promotion collaborates with student groups and campus departments to provide programs and services that positively influence student health. To learn more, visit Health Promotion (https://www.colorado.edu/health/promotion/).

Medical Services

Medical Services is the primary healthcare resource for CU Boulder students. Through comprehensive care and education we strive to give students the skills and knowledge they need to develop healthy life-long habits. To learn more, visit Medical Services (https://www.colorado.edu/healthcenter/). (https://www.colorado.edu/healthcenter/)

Recovery Community

The CU Collegiate Recovery Community (CUCRC) provides community, support and connection for students, faculty and staff in recovery or seeking recovery from a wide range of behaviors. Our mission is to help develop peer-to-peer connections, support resiliency and contribute to their overall wellbeing through a welcoming and supportive community. To learn more, visit Recovery Center (https://www.colorado.edu/recoverycenter/).

The Office of Victim Assistance

The Office of Victim Assistance (OVA) provides free and confidential information, consultation, support, advocacy and short term counseling services to University of Colorado Boulder students, graduate students, faculty and staff who have experienced a traumatic, disturbing or life-disruptive event. Call 303-492-8855 to connect with an OVA counselor or to receive after-hours support. To learn more, visit The Office of Victim Assistance (https://www.colorado.edu/ova/).

CU Boulder Student Health Insurance Plan (SHIP)

All students are required to carry a comprehensive medical insurance plan while attending CU Boulder. CU Boulder would like students to have financial protection should they suffer a serious illness or injury during their time here. Our hope is that an insurance plan will help them through these times so that they can continue with their educational endeavors.

Students may elect health insurance coverage through:

- Anthem Gold Student Health Insurance Plan (SHIP) - A plan exclusively for CU students.
- Private or personal insurance (an individual health insurance plan through a family member, employer or government-sponsored)

Students must meet this requirement their first semester at CU Boulder and at the beginning of each academic year. Those taking six (6) or more undergraduate credit hours or one (1) or more graduate credit hours are required to complete the health insurance requirement process. Once a student is registered for their semester credits, the student will begin receiving email communications from Academic HealthPlans. These emails explain the insurance requirement and outline the process of enrolling or waiving the Anthem Gold SHIP.

All fee-paying students, regardless of their insurance plan, have full access to the services provided by Health and Wellness Services.

For more information, visit the Health Insurance Requirement (http://www.colorado.edu/health/insurance/health-insurance/)webpage.

Note: Plans available through the health insurance marketplace meet CU's health insurance requirement. Colorado students may sign up through the Connect for Health Colorado (http://connectforhealthco.com/)website. Nonresident students may sign up through their home state health exchange or through the national HealthCare.gov (https://www.healthcare.gov/)website.

New Student & Family Programs

New Student & Family Programs (NSFP) supports new students and families throughout their transition and involvement at the University of Colorado Boulder.

In order to aid in the transition to CU Boulder, all incoming graduate students have the opportunity to participate in Graduate Student Orientation (https://www.colorado.edu/orientation/graduate-students/). This optional program is critical to the graduate experience as it helps new students learn more about CU Boulder while providing an opportunity to connect with program advisors, faculty, current students and student support services. New graduate students should check their CU Boulder email account for more information about engagement opportunities and other important next steps.

New Student & Family Programs also collaborates with campus partners, including the Graduate School, to plan fall and spring welcome events surrounding the first day of classes. Students participate in programs and have opportunities to connect with current students, faculty and staff to create a healthy and positive transition to CU Boulder.

For more information, visit the New Student & Family Programs website.

Registration & Enrollment

Registration

Visit the Office of the Registrar's Academic Calendar (http://www.colorado.edu/registrar/students/academic-calendar/) webpage for specific academic and financial dates and deadlines. Students should also consult individual college and school sections of this catalog and their dean's office for additional information on special requirements and deadlines. The following registration policies are intended to serve as general guidelines.

Students who require accommodations because of a disability should visit the Disability Services (http://www.colorado.edu/disabilityservices/) website or call 303-492-8671.

Confirmation Deposit

All new degree students pay a one-time $200 confirmation deposit when they confirm their intent to enroll at CU Boulder. Students are not permitted to complete the New Student Welcome Experience or register for classes if the university has not received the deposit.

Confirmation deposits are non-refundable except upon graduation from CU Boulder. All refunds are reduced by any outstanding financial obligations. Interest earned from confirmation deposits is used for student financial aid.

Questions regarding the confirmation deposit policy should be directed to the Office of Admissions, 303-492-6301.

Buff Portal

Student registration and other important information and services are available through Buff Portal (https://buffportal.colorado.edu/). Students access the portal using a secure CU login name and IdentiKey password and Duo Multi-Factor Authentication. For more information and registration instructions, visit the Registration (http://www.colorado.edu/registrar/students/registration/) webpage.

Registering for Classes

Students enroll in (or register for) classes using CU Boulder Class Search, which may be accessed through Buff Portal. In Buff Portal, students may also check their assigned enrollment dates, view any holds that may prevent registration (see "Holds"), see to-do lists and obtain their advisor's name and contact information.

New incoming students and transfer undergraduate students receive their registration instructions and information as part of the New Student Welcome Experience. Continuing students may consult the academic calendar or view their registration dates in Buff Portal; they are also notified by email each semester of upcoming registration periods.

If a student misses their assigned enrollment date, they must wait until open enrollment to register for classes.

Registration instructions are also available on the Enroll in Classes (http://www.colorado.edu/registrar/students/registration/enroll/) webpage.

Enrollment Dates

Each term, students are assigned enrollment dates based on the number of credits they have completed. Accessible in Buff Portal, the enrollment assignment indicates the dates and times during which the student may enroll, as well as the maximum number of credits they can take. Students who miss their assigned enrollment window must wait until the open enrollment period to register for classes.

Priority registration has been formally approved for specific populations of students who have unique scheduling needs. Priority registration does not override university or departmental policies, holds, permissions, etc., nor does it guarantee the provision of classes at specific times. Student populations with priority registration, which often occurs within the enrollment period specified for their class (i.e., freshmen, sophomores), may include students with disabilities, military veterans and student athletes.

Holds

A hold may be placed on a student's record for a number of reasons, including but not limited to financial, advising, scholastic, conduct and health. A hold may prevent a student from registering, receiving a housing assignment, returning to school, or obtaining an official transcript. Students should resolve holds as quickly as possible by contacting the appropriate campus office identified in the hold details in Buff Portal.

Special Registration

Intercampus Enrollment Program

CU Boulder students enrolled in at least one Boulder main campus class may be allowed to register for up to two classes totaling no more than six credit hours on another University of Colorado campus.

Classes taken at other CU campuses must be required for graduation or unavailable on the Boulder campus in a given term, or the classes must conflict with another required class in which the student is enrolled.

Boulder students exercising this option pay tuition for their total credit hours at Boulder campus rates. Intercampus Enrollment forms and instructions are available on the Registration Programs (http://www.colorado.edu/registrar/students/registration/registration-programs/) webpage.

Students receiving VA educational benefits are not eligible to receive funding for intercampus enrollment. Contact your campus's veteran and military affairs office for more information.

Intercampus students are registered in host campus classes after continuing home students have had the chance to enroll. Students must adhere to the add/drop deadlines of the host campus when making changes to their intercampus enrollment.

Boulder campus students who wish to take coursework on another campus of the University of Colorado, but not through the Intercampus Enrollment program, may be able to register on that campus independent of Boulder-campus registration. However, they must apply for admission to and follow the registration procedures established by the other campus. Students should check with their dean's office for approval and course applicability to their degree program. Students who want

to complete degrees or certificates at another University of Colorado campus must apply to that program on the non-Boulder campus.

Graduate students should check with the Graduate School for exceptions to the home-campus registration requirement and limitations on credit hours at the host campus. The coursework must be required for their degree program; they must have their dean's permission; they must be enrolled for at least one course on the Boulder campus; and enrollment levels must not have been reached on the other campus. Contact the Office of the Registrar for additional information.

Late Registration

We recommend students register for classes as soon as their registration period begins. For more information, visit the Add a Class (https://www.colorado.edu/registrar/students/registration/register/add/) webpage. Please note that late registration may prevent the timely review of financial aid eligibility, may result in a graduate program being discontinued, limit the number of open classes and more. As of Spring 2025, there is no longer a late registration fee.

University Employees and Dependents

CU Boulder offers a tuition assistance benefit to eligible employees and their dependents. For current benefit information, visit Employee Services' Tuition Assistance (https://www.cu.edu/employee-services/employee-tuition-benefit/) website.

Continuing Education Auditors Program

Community members aged 18 and older, who are not registered students but wish to listen in on regularly scheduled lectures, are eligible to audit courses during the fall, spring and summer semesters. Community members may do so by obtaining auditor status.

The university's primary commitment is to degree-seeking and credit-seeking students. Auditors' course requests will be processed after these groups have registered. Auditors must receive permission and obtain a signature from course instructors to be added to the roster.

Audited courses will not appear on any transcript, formal or informal, as no credit is awarded. Registered auditors receive class instruction, learning management system access and library privileges. Being an auditor at the University of Colorado Boulder does not guarantee eligibility for regular degree or nondegree status.

Note: Admitted degree students, either enrolled or suspended, are not permitted to audit courses. If an admitted degree student is interested in participating in a class without receiving credit, the student must enroll in the course and request to take the course as no-credit (https://www.colorado.edu/registrar/students/registration/register/edit/#what_it_is-1719). A course must be offered with the student option grading basis to be eligible for no-credit. Courses taken for no credit are assessed the same tuition rate as courses taken for credit. Contact ceregistration@colorado.edu or call 303-492-5148 for more information.

The Senior Auditors program, formerly offered by the CU Boulder Alumni Association, along with the Community Auditors program previously offered by Continuing Education, have been incorporated into the new Continuing Education Auditors program. Please refer to the Auditors enrollment page (https://ce.colorado.edu/programs/auditors/) (https://ce.colorado.edu/resources/topics/enrollment-auditors/)for information on how to register for courses and current auditor restrictions.

Dropping & Adding Classes

Procedures

Students can add or drop classes in Buff Portal. For more information, visit the Enroll in Classes (http://www.colorado.edu/registrar/students/registration/enroll/) webpage.

Deadlines

For specific drop and add deadlines for both the regular full-semester and special fall and spring sessions, visit the Academic Calendar (http://www.colorado.edu/registrar/students/academic-calendar/) and Special Session Calendars (https://www.colorado.edu/registrar/students/calendar/sessions/) webpages. For summer deadlines, visit the Summer Session Calendars (http://www.colorado.edu/summer/resources/calendars/) webpage.

Add a Class

- Students may add classes in Buff Portal during designated registration periods each term.
- After this time period, students must contact the instructor or the instructor's department and request to be added to a class. Their request may be denied based on lack of attendance, fire code capacity being met, lack of pre-requisites, etc. If a student is added to a class after their designated registration period, then the university cannot guarantee timely review of the student's financial aid or processing of the tuition and fee bill. Students who are added late and then decide to drop will be subject to the normal tuition adjustment and course withdrawal deadlines.

Drop a Class

- **Class drop (without a W grade)**: Students may drop individual classes with a refund (if applicable) and no record (no W grades) through the three-week class drop deadline of a regular full-semester fall/spring session and through the equivalent class drop deadline of any special session (dates vary).
- **Class withdrawal**: After the class drop (without a W grade) deadline of a full-semester fall/spring session or the equivalent drop deadline of any special session, students may continue to withdrawal from classes without instructor/advisor approval through the class withdrawal deadline of a full-semester fall/spring session or the equivalent class withdrawal deadline of any special session (dates vary). However, tuition and fees are assessed and grades of W appear on the transcript.
- **Late class withdrawal**: After the 10-week class withdrawal deadline, or equivalent special session class withdrawal deadline, approval via a petition with extenuating circumstances is required. Students should contact their advisor to discuss their options. If approved, tuition and fees are assessed and grades of W appear on the transcript.

Students dropping all of their classes should see the Withdrawal section.

Withdrawing from the Semester

A withdrawal from a Main Campus semester occurs if the student:

- Never registers for classes in a fall or spring semester
- Drops all classes for a semester
- Submits a withdrawal request to the Office of the Registrar

A student who desires to withdraw from the university and drop all Main Campus classes should visit the Office of the Registrar's Withdraw from the Semester (https://www.colorado.edu/registrar/students/

withdraw/) webpage and review the current term's withdrawal calendar and the withdrawal checklist to understand the potential impacts of withdrawing. Failure to withdraw properly may result in failing grades recorded for every class and liability for the full amount of tuition and fees for that term.

Rules for withdrawing may vary with each college and school. Students anticipating a withdrawal should consult their advisor to understand the potential impacts to their degree requirements.

Withdrawing students (including students applying for a graduate leave of absence) with Federal Perkins/NDSL loans must complete a loan exit interview and clear all outstanding financial balances before leaving the university. Failure to do so results in a hold on the student's record. This hold prevents registration for future terms. Students can complete a loan exit interview by contacting University Student Loans & Debt Management in the Bursar's Office at 303-492-5571, toll free at 800-925-9844 or TTY 303-492-3528.

Undergraduate students who withdraw and then wish to return to the university have two semesters (plus summer) from their last graded semester to return to the university without having to reapply for admission. Graduate students can apply for an approved leave of absence.

Details are available on the Withdraw from the Semester (https://www.colorado.edu/registrar/students/withdraw/) webpage. For more information, contact the Office of the Registrar at 303-492-6970 or withdraw@colorado.edu. For information about tuition and fee obligations for withdrawing students, see either the Undergraduate Tuition and Fee Policies (p. 67) or the Graduate Tuition and Fee Policies (p. 1126) sections.

Active Duty

Students who are military personnel, fire fighters and police officers called to active duty and/or to help with disasters may request to go on a leave of absence. These students should contact the Office of the Registrar. For more information, visit the Withdraw from the Semester (https://www.colorado.edu/registrar/students/withdraw/) webpage.

Graduate Leave of Absence

Graduate and MBA students who do not maintain continuous enrollment (summer excluded) *must* apply for a leave of absence or be discontinued from the university. Graduate students who wish to take a leave of absence from the university must submit an application by the published deadline in a given term and get approval from their department and their school, college or program to avoid having to reapply.

Graduate students taking an approved leave of absence are allowed two inactive semesters (plus summer), and are guaranteed a place in their current college or school and in their current major when they return to the university. Students must not have any disciplinary holds and must be in good academic standing with the university. Students registered for the semester in which they plan to begin their leave of absence must formally withdraw. See the section on withdrawal procedures above.

For an application and more information, visit the Leave of Absence (https://www.colorado.edu/registrar/students/withdraw/leave-of-absence/) webpage.

Student Affairs

Housing

Off-Campus Housing

Off-Campus Housing & Neighborhood Relations (a service of CUSG) maintains listings of apartments, houses and rooms for rent in the Boulder area. Currently enrolled students may view listings and connect with potential roommates on Ralphie's List, CU's rental database, on the Off-Campus Housing & Neighborhood Relations (http://offcampushousing.colorado.edu/) website. The office also maintains a detailed list of apartments and property management companies available for download or pickup in the office.

The department has a staff attorney available on Tuesdays and Fridays to advise students about leases, security deposits, maintenance issues and roommate and landlord conflicts. Office assistants will help students locate properties and answer questions about the surrounding neighborhoods.

During the academic year, the office sponsors several off-campus housing fairs where landlords, property managers and related businesses offer their services to students in a trade-show format.

For additional information, visit the Off-Campus Housing & Neighborhood Relations (http://offcampushousing.colorado.edu/) website or call 303-492-7053. Office hours are 9 a.m.–5 p.m., Monday–Friday. Summer hours are 7:30 a.m.–4:30 p.m.

Graduate & Family Housing

The University of Colorado Children's Center provides childcare for the children of students, staff, faculty and Graduate & Family Housing residents.

Graduate & Family Housing offers an affordable, convenient and comfortable living environment that serves the needs of a diverse population of students at CU Boulder. We are home to residents from over 70 nations and offer a variety of apartment types and sizes, flexible leases and community-building programs and events. To learn more, visit the Housing and Dining (https://living.colorado.edu) website or call, write or email the Graduate & Family Housing Office at the address provided.

Graduate & Family Housing Office
1350 20th Street, #A10
University of Colorado Boulder
Boulder, CO 80302

graduatefamilyhousing@colorado.edu

Student Conduct & Colorado Creed

Student Conduct & Conflict Resolution

What We Believe

Student Conduct & Conflict Resolution (SCCR) strives to provide students with individualized responses to support community standards and conflict resolution that emphasize accountability and growth by:

- Fostering reflection on the impact of their behaviors;
- Promoting responsible community membership and repairing harm; and
- Cultivating the wellbeing and safety of the CU Boulder community.

What Is Important to Us

1. The student will understand the impact of their behavior on others.
2. The student will demonstrate ethical development, will comply with institutional policy and will engage in no further violations of policy.
3. The student will gain an understanding of the institutional values reflected in institutional policies.
4. The student will gain a better understanding of the importance of personal integrity.
5. Through SCCR processes, the student will be asked to reflect on their beliefs, ethics and values.
    a. The student will be able to articulate their personal ethics and values, will act in congruence with those ethics and values, and will make decisions that reflect their beliefs.
6. The student will contribute positively to the CU Boulder community and beyond.
7. The student will gain a better understanding of the consequences and potential consequences of their personal actions and will learn the purposes of institutional policies.
8. The student will employ critical thinking in problem solving and ultimately obtain a degree.

Why Do We Have a Student Code of Conduct? (Authority)

Article 7, Part B, of the Laws of the Regents of the University of Colorado requires each campus to develop a student code of conduct. Student Conduct & Conflict Resolution (SCCR) is authorized to establish and administer this policy. Any questions regarding interpretation of this code or any of its provisions should be directed to the Dean of Students or their designee for final determination.

Questions regarding student behavior should be directed to Student Conduct & Conflict Resolution, studentconduct@colorado.edu, Center for Community, S485, 10 UCB Boulder, CO 80309, phone 303-492-5550.

When and Where Does the Student Code of Conduct Apply? (Jurisdiction)

1. The Student Code of Conduct applies to:
    a. Student conduct that occurs on, or as it relates to, CU Boulder property or at official functions and CU Boulder sponsored programs conducted away from the campus.
    b. Student conduct that occurs off CU Boulder property is subject to this policy if it:
        i. Adversely affects the health, safety or security of any member of the CU Boulder community, including the student alleged to have violated CU Boulder policy or the mission of CU Boulder; or
        ii. Involves any records or documents of CU Boulder;
        iii. Involves conduct that may be a violation of federal, state or local law, as determined by SCCR.
    c. For this policy's purposes, CU Boulder's mission is broadly defined to include its academic goals and the importance of developing civic responsibility in our students.
2. Recognized Student Organizations and Recognized Social Greek Organizations:
    a. Wherever the Student Code of Conduct refers to "responding student," the same also applies to Recognized Student Organizations (RSOs) and Recognized Social Greek Organizations (RSGOs). RSOs, as described in the Student Organization Handbook (https://www.colorado.edu/involvement/), are general student organizations recognized by the Center for Student Involvement (CSI) and CU Boulder. Recognized Social Greek Organizations are recognized by Fraternity & Sorority Life (FSL) and CU Boulder.
        i. RSOs and RSGOs, as well as their members and other students, may be held collectively and/or individually responsible for violations.
        ii. The RSO and RSGO officers, leaders, signers or individuals currently listed in an official position in the Center for Student Involvement records or Fraternity & Sorority Life records may be held collectively and/or individually responsible for violations when such violations are committed by persons associated with the organization who have received consent or encouragement from the organization's officers or leaders, if those officers or leaders knew, or reasonably should have known, that such violations were being or would be committed.
        iii. The officers or leaders of a student organization may be directed by CU Boulder officials to take action designed to prevent or end violations by the organization or by any persons associated with the organization. Failure to comply with a directive may be considered a violation of the Student Code of Conduct, both by the officers or leaders of the organization and by the organization.
3. Actions taken under a resolution process are separate and apart from any law enforcement or other court process or proceeding, such as a civil lawsuit or criminal prosecution, that may relate to the same underlying factual incident. SCCR's jurisdiction does not depend on whether a responding student is criminally charged through the criminal justice system. A resolution process is not postponed while criminal or civil proceedings are pending unless otherwise determined by the resolution specialist. Dismissal of criminal charges or acquittal in a criminal case does not prevent SCCR from investigating and resolving an incident.
4. The unexcused failure of a responding student to appear and/or respond to a resolution process does not prevent CU Boulder from proceeding with or completing a resolution process.
5. For jurisdictional information related to sexual misconduct (including sexual assault, sexual harassment, intimate partner violence and gender/sex-based stalking), protected class discrimination, harassment and any related retaliation, see Section M of the Student Code of Conduct.
6. For jurisdictional information pertaining to academic misconduct, see Section M of the Student Code of Conduct.
7. Questions or concerns regarding policy and procedures for students charged or convicted of a crime that occurred prior to being admitted should be directed to SCCR.

Student Resolution Processes

SCCR resolves alleged prohibited conduct through the informal resolution process, the formal resolution process or the restorative justice process. Resolution specialists have the authority and sole discretion to determine the type of resolution process. This decision is primarily based on, but not limited to, the following factors:

- If the responding student admits or otherwise takes responsibility for the alleged prohibited conduct;
- The responding student's prior conduct record;

- The nature and severity of the alleged prohibited conduct;
- The alleged impact and/or harm caused to another person or community;
- Whether the alleged conduct would violate the Student Code of Conduct; and/or
- Any other factors that the resolution specialist finds relevant to the specific allegations.

The formal resolution process is an adjudication of the alleged prohibited conduct, considered an educational and disciplinary process, and may result in resolution outcomes and a disciplinary conduct record. The informal resolution process and restorative justice process are intended as forms of alternative dispute resolution, are voluntary, primarily educational in nature, not an adjudication of the allegations, not considered a disciplinary process and instead will result in a written agreement with the responding student. Because SCCR does not consider the informal resolution process or restorative justice process to be disciplinary processes, they do not result in a disciplinary conduct record or file. Informal resolutions and restorative justice will never result in resolution outcomes such as suspension or expulsion.

The first step in each resolution process is initiated by the resolution specialist issuing a written Resolution Meeting Notice to the responding student, which prompts the responding student to attend a scheduled meeting with the resolution specialist as outlined in the notice.

Informal Resolution

This process may generally include, but is not limited to, a meeting with a resolution specialist, completion of the assigned resolution outcomes and/or participation in the restorative justice process.

During the meeting, if the resolution specialist determines that the informal resolution process may be appropriate, the resolution specialist will offer it as an option to the responding student and address any questions the responding student may have about the process. If the responding student accepts responsibility for the alleged prohibited conduct and completes educational resolution outcomes assigned by the resolution specialist, then SCCR will consider the matter to be resolved informally.

Formal Resolution

This process generally includes:

1. Written notice of the factual allegations and alleged violations of the Student Code of Conduct;
2. The opportunity to meet with the resolution specialist to address the allegations and provide information to the resolution specialist;
3. The resolution specialist reviewing the allegations and making factual and violation determinations based on preponderance of the evidence; and
4. Written notice to the responding student of the resolution specialist's determinations.

The resolution specialist will consider the following in making this determination:

1. The allegations in the Resolution Meeting Notice and the responding student's response to those allegations;
2. Any documents or information that the resolution specialist finds relevant, including without limitation, relevant documents presented by the responding student, complainant or any other interested party; and/or
3. The oral or written statements of any witnesses with relevant information, as presented by the responding student, any alleged victim or other interested party, as appears in a report, or as requested by the resolution specialist.

All students residing in Housing & Dining Services facilities are subject to Residential Handbook policies and any policy properly communicated through Housing & Dining Services staff. For more information, visit the Housing & Dining Policies (https://www.colorado.edu/living/housing/policies-forms-and-accommodations/) webpage.

Cases involving sexual misconduct (including sex assault, sexual harassment, sexual exploitation, intimate partner violence and gender/sex-based stalking), protected class discrimination and harassment, and any related retaliation are subject to the Office of Institutional Equity and Compliance (OIEC) process and procedures (https://www.colorado.edu/oiec/policies/). For more information about these policies and procedures, contact the OIEC at (303) 492- 2127 or visit the OIEC (https://www.colorado.edu/oiec/) website.

Excerpts from the Colorado Revised Statutes regarding hazing, ethnic intimidation and riots are also presented. Colorado law prohibits persons convicted of rioting from enrolling in state-supported universities/colleges for 12 months following the date of a conviction.

For information about student classroom and course-related behavior, visit the policies (https://www.colorado.edu/compliance/policies/student-classroom-course-related-behavior/) webpage.

Colorado Creed

The Colorado Creed, developed by students in 2003, is a social code of conduct and a lifestyle by which students at CU Boulder live. The text of the creed is:

As a member of the Boulder community and the University of Colorado, I agree to:

- Act with honor, integrity and accountability in my interactions with students, faculty, staff and neighbors.
- Respect the rights of others and accept our differences.
- Contribute to the greater good of this community.

I will strive to uphold these principles in all aspects of my collegiate experience and beyond.

For more information, visit the Colorado Creed (http://www.colorado.edu/creed/) website.

Student Resources

The Division of Student Affairs (http://www.colorado.edu/studentaffairs/) offers many on-campus resources for our students. Visit our offices to learn more.

Student Life & Involvement

- Center for Inclusion and Social Change (https://www.colorado.edu/cisc/): Explore identity and inclusivity, participate in educational programs, attend events and build community with others.
- Center for Student Involvement (https://www.colorado.edu/involvement/): Be involved! Find your community by connecting with student organizations, campus-wide events and leadership opportunities.

- CU Student Government (https://www.colorado.edu/cusg/): Make a difference! Get involved with your student government representatives, elected by students, for students. CUSG is your voice on campus.
- Environmental Center (https://www.colorado.edu/ecenter/): Help CU Boulder become a global leader in sustainability through recycling, student bus pass, bicycle and educational programs.
- Fraternity & Sorority Life (https://www.colorado.edu/greeks/): Find opportunities for friendship, leadership and growth in CU's vibrant and diverse Greek community.
- Housing & Dining (https://www.colorado.edu/living/): Explore information about on-campus life including residence halls, meal plans and dining options!
- New Student & Family Programs (https://www.colorado.edu/orientation/): The campus resource for new students and families as they begin their journey at CU Boulder. Ask questions and be sure to join for welcome events throughout the year.
- Off-Campus Housing & Neighborhood Relations (https://www.colorado.edu/offcampus/): Explore off-campus rentals on Ralphie's List, register your party and learn about the legal aspects of off-campus living.
- Recreation Services (https://www.colorado.edu/recreation/): Get moving with all that The Rec has to offer, including intramural sports, fitness classes, nutritional services and Outdoor Pursuits.
- Residence Life (https://www.colorado.edu/living/): Explore the opportunities that residence life provides, from on-campus housing and employment to student resources like free tutoring.
- University Memorial Center (https://www.colorado.edu/umc/): Visit the CU Book Store, student services and student organization offices, as well as plenty of entertainment, dining and hangout options.

Student Support & Development

- Basic Needs Center (https://www.colorado.edu/support/basicneeds/): Get connected to essential resources when you need them most. Access the Buff Pantry and other assistance with food, housing and other on-campus and community services.
- Career Services (https://www.colorado.edu/career/): Become more employable and find meaningful work through learning how to fine-tune your resume, develop your skills, land an internship and make connections with employers.
- Student Conduct & Conflict Resolution (https://www.colorado.edu/sccr/): Get support for resolving conflicts and learn more about the Student Code of Conduct and the Honor Code.
- Student Legal Services (https://www.colorado.edu/studentlegal/): Access low-cost legal advice and education regarding your rights and responsibilities, and how to navigate the legal system.
- Student Support & Case Management (https://www.colorado.edu/studentaffairs/sscm/): Find individual support for students and advocates for their needs in all aspects of campus life.
- Veteran and Military Affairs (https://www.colorado.edu/veterans/): Prospective and current student veterans and veteran dependents: find program information, policies, pay and support services.
- Volunteer Resource Center (https://www.colorado.edu/volunteer/): Explore volunteer and leadership opportunities on campus and throughout the greater Boulder community.

Student Data Privacy

Annual Notice to Students

As a CU Boulder student, it's important to understand your rights regarding access to and disclosure of information in your education record. The Family Educational Rights and Privacy Act (https://www.colorado.edu/registrar/students/records/ferpa/) (FERPA) affords you the right to:

- Inspect and review your education record
- Request amendment of your education record
- Consent to disclosure of personally identifiable information in your education record
- File a complaint with the U.S. Department of Education (Family Policy Compliance Office, U.S. Department of Education, 400 Maryland Avenue, SW, Washington, DC 20202)

To review or request an amendment to your record, contact the Office of the Registrar or the university office that maintains the record. This does not apply to grade changes, which are at faculty discretion.

Under FERPA, the university may release education record information if the disclosure is:

- To CU Boulder officials who have a legitimate educational interest (https://www.colorado.edu/registrar/students/records/ferpa/glossary/)
- To officials of another institution at which you seek or intend to enroll
- To authorized representatives of federal, state or local educational authorities
- To connection with financial aid you've applied for or received
- To an organization conducting studies for or on behalf of the university
- To your parents or guardians (if you are a dependent student for tax purposes)
- To an accrediting organization
- To comply with a judicial order or lawfully issued subpoena
- In connection with a health or safety emergency or other exception under FERPA (https://www.colorado.edu/registrar/students/records/ferpa/exceptions/)
- To fulfill a request for data that CU Boulder defines as directory information (https://www.colorado.edu/registrar/students/records/ferpa/directory-info/)

Student data that is *not* directory information may only be released with your documented consent.

To authorize third-party access to your non-directory information, see CU Guest Access (https://www.colorado.edu/registrar/students/records/privacy/guest-access/) and FERPA Consent to Release (https://www.colorado.edu/registrar/students/records/privacy/consent/). You may restrict the release of directory information by placing full privacy (https://www.colorado.edu/registrar/students/records/privacy/full/) on your record.

Questions may be directed to the Office of the Registrar.

Directory Information

The following items of student information have been designated by the University of Colorado Boulder as public or "directory" information:

- student name[1]
- hometown (city, state)
- campus email address[2]
- dates of attendance
- previous educational institutions attended
- school/college or division of enrollment
- majors, minors and fields of study
- classification level (e.g., first-year, sophomore, etc.)
- university-recognized honors and awards
- degree status (e.g., expected graduation date and/or conferral dates/terms)
- enrollment status
- employment related to student status (e.g., teaching assistant, resident assistant or work-study) and dates for positions held
- participation in officially recognized activities/sports, including height and weight of athletes.
- photos and videos taken or maintained by the university

Directory information shall not be provided to anyone outside of the CU community (except to vendors/organizations with which the university has contracted in order to provide goods or services to students). The university retains the discretion to refuse disclosure of directory information if it believes such disclosure would be an infringement on student privacy rights. In an effort to protect student privacy, CU directories may only contain a student's name, email address, class and major field of study.

1 If a student provides a preferred name, the university uses it when communicating directly with the student and in campus systems, rosters, etc., unless there is a documented business or legal reason to use a student's primary name. When communicating with outside third parties, including parents, the university generally uses a student's primary (legal) name. Students may also select a diploma name (https://www.colorado.edu/registrar/students/graduation/) for graduation and commencement materials.

2 Campus email addresses may not be used for solicitation.

Withholding Directory Information (Full Privacy)

Students have the right to request full privacy which withholds directory information from being released to inquirers. To request full privacy and restrict the release of directory information, students must bring a photo ID to the Office of the Registrar during business hours to complete a privacy form.

Student Consent for Release of Non-directory (Confidential) Information

Students may authorize the university to release educational records to parents, spouses or other third parties by granting consent in their student portal. The Privacy Settings (http://www.colorado.edu/registrar/students/records/privacy/) webpage has more information about various options for granting and restricting access to student records.

Release of Disciplinary Information

Provisions of the Family Educational Rights and Privacy Act of 1974, as amended by the Higher Education Amendments of 1998, govern access to a student's academic transcript or conduct file. The student and/or those university officials who demonstrate a legitimate educational need for disciplinary information may have access to the student's conduct file.

Parent(s) who provide proof that a student is a dependent as defined in Section 152 of the Internal Revenue Code of 1954 (i.e., a copy of the last federal income tax return listing the student as a dependent) may have access to the student's conduct file without written consent of the student. In this case, parents may have access to a conduct file, even if the student has requested otherwise.

In addition, parent(s) may be notified if a student under 21 is found responsible for a violation involving use or possession of alcohol and controlled substances. All other inquiries, including but not limited to inquiries from employers, government agencies, news media, family, friends or police agencies, require a written release from the student before access to university conduct files is granted. Exception: information may be released pursuant to a lawfully issued subpoena and as provided by the Campus Security Act as amended by the Higher Education Amendments of 1992.

The Campus Security Act permits higher education institutions to disclose to alleged victims of any crime of violence (e.g., murder, robbery, aggravated assault, burglary, motor vehicle theft, arson) the results of the conduct proceedings conducted by the institution against an alleged perpetrator with respect to such crime. The Campus Security Act also requires that both the accused and the accuser be informed of campus conduct proceedings involving a sexual assault.

Student Finances

Costs

Confirmation Deposit

All new students (residents, nonresidents and international) must confirm their intent to enroll and pay the $200 confirmation deposit. The deposit is nontransferable, nonrefundable in most cases and must be paid by all students regardless of financial aid awards. Students who have paid the deposit and who decide not to attend CU Boulder forfeit their deposit.

The confirmation deposit is not applied to the tuition bill. It is refunded after graduation or official withdrawal within established dates and guidelines, and after paying any outstanding university obligations.

Estimated Costs

Costs for students attending CU Boulder vary depending on college, school or program; residency classification, personal needs and individual interests. Visit the Bursar's Office (https://www.colorado.edu/bursar/) website to view cost information. Tuition and fees are approved annually by the Board of Regents in accordance with the level of cash fund appropriations set for the university by the Colorado General Assembly. Next year's rates are usually published on the Bursar's Office website by June 1. Tuition and fees are just one part of the overall cost to attend CU Boulder. The full cost of attendance for an academic year could also include expenses such as housing and food, transportation, books and supplies, and personal expenses. Please visit Understand Your Cost of Attendance (https://www.colorado.edu/understand-your-cost-attendance/) for a full description of costs.

Notes:

- Residency classification (http://www.colorado.edu/registrar/students/state-residency/) for tuition is determined by Colorado law.
- These estimates do not include a one-time new student fee (https://www.colorado.edu/bursar/costs/other-charges/new-student-fee/) of $62-$145 or the Student Health Insurance Plan ($2,420 per semester based on 2024–25 rates). All students attending CU Boulder must have comprehensive health insurance every semester. Students can choose health insurance coverage through an individual plan *or* the plan of a family member, employer or government sponsor *or* CU's Anthem Gold Student Health Insurance Plan (SHIP) (https://www.colorado.edu/health/cu-gold-ship/). Information about selecting or waiving university health insurance coverage (https://www.colorado.edu/health/insurance/faqs/#how_do_i_submit_a_waiver_application_or_confirm_enrollment_in_ship_-291) is on the Health and Wellness Services (https://www.colorado.edu/health/) website. Requirements for exchange students in J-1 status may be different, see International Student and Scholar Services Health Insurance & Immunizations (https://www.colorado.edu/isss/students/new-students/health-insurance-immunizations/) for more information.
- Students planning to attend summer session can visit the Bursar's Office (https://www.colorado.edu/bursar/) website for summer rates.
- Tuition for no-credit (NC) courses (p. 1111) is the same as for courses taken for credit.
- Students simultaneously enrolled in programs leading to two different degrees or two different majors will be assessed tuition for the area of study with the higher tuition rate.

Bills & Payments

Online Bills

The university bill includes tuition, fees, student health insurance (see health insurance requirement (https://www.colorado.edu/health/insurance/)) and other direct costs. Costs are billed one semester at a time. Textbooks, digital course materials and supplies up to $1,500 from the CU Book Store can be charged to the student bill. Adjustments made throughout the semester will appear on the student account (e.g. tuition remission, health insurance waiver, dropping or adding courses, etc.).

Bills for fall are available in mid-August. Spring bills are available in mid-January. Emails are sent to students' colorado.edu addresses and to authorized payers when bills are available online. New and unpaid charges are billed each subsequent month. Failure to check email or receive an email notification of the bill does not relieve any student of responsibility for payment by the published deadline. Students can log in to Buff Portal (https://buffportal.colorado.edu) and authorized payers can log in to CUBill&Pay (https://quikpayasp.com/cu/boulder/tuition/authorized.do) at any time to view the bill.

Any student who completes registration agrees to pay CU Boulder according to the payment terms in the Tuition and Fee Agreement and Disclosure (https://www.colorado.edu/bursar/payments/payment-agreement/).

Authorized Payers

Family members do not automatically have access to view and pay the tuition bill because of federal privacy laws (http://www.colorado.edu/registrar/students/records/ferpa/). If they are helping pay the bill on the student's behalf, students must give them access to CUBill&Pay by authorizing them as payers (https://www.colorado.edu/bursar/billing/#accessbill). Students can authorize payers in Buff Portal (https://buffportal.colorado.edu). Students are ultimately responsible for payment of the bill.

Authorized Payer access is separate and distinct from CU Guest Access (https://www.colorado.edu/registrar/students/records/privacy/guest-access/) and FERPA Consent to Release (https://www.colorado.edu/registrar/students/records/privacy/consent/). If a family member is helping pay tuition and fees on a student's behalf, we recommend giving them authorized payer access and CU Guest Access.

If a third, non-related party is helping pay the bill (e.g., military, countries sponsoring international students), please see 3rd Party Sponsorships (https://www.colorado.edu/bursar/payments/payment-options/3rd-party-sponsorships/).

Payments

Payment due dates are the 5th of the month. Primary payment deadlines are Sept. 5 for fall semester and Feb. 5 for spring semester. Dates may be subject to change.

Payment Methods

Payments can be made online from a traditional U.S. checking or savings account via electronic check (eCheck). No fees are associated with this payment method making it the most cost-effective option.

We also accept American Express, Mastercard, Visa and Discover. A nonrefundable 2.85% fee (charged by NelNet Campus Commerce) applies to all credit and debit card transactions. We encourage payment from a checking or savings account to save money and avoid paying the service fee.

We have partnered with Flywire to accept payments from international students worldwide. Students and families can easily and securely make education payments in their own currency, using local payment methods from their home. Flywire offers real-time tracking, 24x7 multilingual support and a best price guarantee on exchange rates.

Learn about other Payment Options (https://www.colorado.edu/bursar/payments/payment-options/) on the Bursar's Office website.

Payment Plans

Payment plans are available for students and authorized payers to pay tuition and fees in monthly installments over the course of the semester. For more information, visit the Payment Plans (https://www.colorado.edu/bursar/payments/payment-plans/) webpage.

Also see the Policies (p. 1126) section.

Tuition and Fee Policies

Add/Drop Tuition Adjustment

Adjustment of tuition and fees is made accordingly based on dates in the Add/Drop Calendar (https://www.colorado.edu/registrar/students/calendar/).

Bachelor's-Accelerated Master's Degree Programs

Bachelor's–accelerated master's (BAM) degree programs are offered in several departments. The BAM program structure applies to students admitted on July 1, 2019 *or later*. Students admitted to programs before July 1 fall under the concurrent bachelor's/master's degree program structure, and should review the information in the 2018-19 University Catalog's Student Finances section (https://catalog.colorado.edu/archive/2018-19/graduate/student-finances/#policiestext). Students

should work with their program to review the full academic guidelines which apply to their situation.

1. Students are admitted to the BAM program around the junior year with an intent application, and will complete their undergraduate work at undergraduate status. A program-specific number of credits to be used toward the graduate degree can be taken while at undergraduate status.
2. Students must apply to graduate when undergraduate requirements are complete, will receive the bachelor's degree along the way. They must also apply to continue with the accelerated master's program. They will complete the remainder of the master's degree requirements at graduate status.
3. Prior to completing the baccalaureate degree, students are assessed undergraduate tuition rates. Once admitted to the master's program and at graduate status, students are assessed graduate tuition rates. (In-state graduate students are assessed resident graduate tuition, but do not receive COF.)
4. Undergraduate and graduate students are considered for different types and amounts of financial aid, with graduate students primarily being offered student loans (https://www.colorado.edu/financialaid/aid-graduate-professional-students/). Financial aid will automatically adjust when students change to graduate status.

Credit and Debit Card Service Fee

A nonrefundable 2.85% service fee charged by NelNet Campus Commerce applies to all credit and debit card transactions. To avoid paying this fee, we encourage payment from a U.S. checking or savings account via electronic check (eCheck).

Appeal Rights

To appeal tuition and mandatory fee charges, students must make a formal request to the Bursar's Office by the last day of finals of the semester immediately following the one being appealed. Appeals will only be considered under extenuating circumstances, such as university error, recent medical condition, immediate family emergency, recent unanticipated financial problems and verified nonattendance. Official documentation must be provided to substantiate the circumstances. Learn more about the process, complete the tuition appeal form and submit the documentation online on the Tuition Appeals webpage (https://www.colorado.edu/bursar/billing/tuition-appeals/). If you disagree with the charges and fail to avail yourself of the appeal process by the deadline, you will have waived your right to appeal the charges.

Failure to Make Payment

Failure to make the required payment in accordance with the scheduled payment deadline may result in any or all of the actions described below.

A financial hold may be placed on the student record and remain until the balance is paid in full. The hold may prevent students from being able to:

- Adjust their current schedule (drop or add classes).
- Register for future classes.
- Receive a diploma or certification materials.
- Be re-admitted.

A late payment charge is assessed once per semester based on the amount due.

Balance Due and Late Charges

Balance Due	Late Charge
$10–99.99	$5
$100–299.99	$10
$300–499.99	$20
$500–699.99	$30
$700–899.99	$40
$900 and over	$50

In addition, finance charges of one percent (1%) per month are assessed on the unpaid principal balance. Finance charges are calculated by applying the periodic rate of one percent (1%) per month (annual percentage rate of twelve percent) to the unpaid principal balance less any payments or credits made.

Past due accounts are referred to the university's Student Debt Management department for collection. Students will have an opportunity to establish a university-approved repayment arrangement. Establishing a repayment arrangement does not result in release of financial holds.

If the balance is not paid or a university-approved repayment agreement does not exist after six months, Colorado law requires the university to place all delinquent accounts with a private collection agency at which time the delinquency is reported to national credit bureaus.

Student accounts referred to an outside collection agency may incur collection agency costs, expenses and fees. Such collection costs, expenses and fees may include percentage-based fees charged to the university by the collection agency, including percentage-based fees of up to 30% of the debt collected. Any collection costs stated above are charged in addition to the principal, fees and interest due on the student's account. Students may be responsible for reasonable attorneys' fees and court costs associated with collecting or enforcing payment on the past due account as allowed under Colorado law. Pursuant to Colorado Revised Statutes § 23-5-115, in the event the student defaults on the amount owed to the university, the university may certify information to the Colorado Department of Revenue as required for the recovery of past due debt.

Nondegree Students

Nondegree students enrolled in undergraduate courses are assessed tuition at the Arts & Sciences rate or undergraduate Base Rate (effective Fall 2022 and later). Nondegree students enrolled in graduate courses are assessed tuition at the Arts & Sciences graduate rate. Nondegree students in both graduate and undergraduate courses are assessed tuition at the undergraduate rate. See the Continuing Education (https://ce.colorado.edu/resources/topics/tuition-access/) site for further information.

Returned Payments

A $20 fee is charged for all payments (regardless of the amount) returned due to insufficient funds, closed account, payment stopped, or for other reasons. A $35 fee is charged by NelNet Campus Commerce for returned payment plan payments. In addition, late and finance charges may be assessed and certified funds may be required when payment is made. An additional financial hold may be placed on the student's account and students may be liable for collection costs and attorneys' fees as allowed by Colorado laws.

Students Registered on More than One Campus

Students registering for courses on more than one campus during a single semester pay tuition and fees to each campus at the rate appropriate to the number of credit hours for which they are registered on that campus. Students may be eligible to use the intercampus enrollment program (https://www.colorado.edu/registrar/students/registration/registration-programs/), in which case they pay the tuition rate of their home campus for the total hours enrolled at all campuses.

Tuition and Fee Agreement and Disclosure

Any student who completes registration agrees to pay CU Boulder according to the payment terms in the Tuition and Fee Agreement and Disclosure (https://www.colorado.edu/bursar/payments/payment-agreement/).

Tuition Classification

Students are classified as residents, nonresidents or international nonresidents for tuition purposes on the basis of answers provided on their application for admission and other relevant information. For more information, go to Tuition Classification (http://www.colorado.edu/registrar/students/state-residency/).

Withdrawal Policy Regarding Tuition and Fees

Students who pay the $200 confirmation deposit and register for classes for any given semester are obligated to pay full tuition and fees for that semester, unless they officially withdraw from the university by published deadlines.

Tuition and fee obligations for students withdrawing from fall or spring semesters:

- Continuing students: Students who withdraw during the full-refund periods will have their confirmation deposit refunded unless there are any outstanding charges.
- New and readmitted students: New, readmitted and new transfer students are not eligible for a refund of the confirmation deposit.

Deadlines to withdraw with no financial penalty vary by session and semester. For the current refund and assessment schedule, visit the Withdraw from the Semester (https://www.colorado.edu/registrar/students/withdraw/) webpage.

For students withdrawing from all full-semester classes after the deadline to drop without a W grade, (the first drop deadline), there are three additional assessment periods:

- For two weeks after the last day to drop without a W grade, students will be charged 40 percent of total tuition (not including the portion of tuition paid by College Opportunity Fund (COF) for in-state undergraduate students) and mandatory fees (CUSG student fees and the athletic fee). COF credit hours are expended and not refunded for withdrawals after the published deadline.
- For two weeks after the 40 percent assessment deadline, students will be charged 60 percent of total tuition (not including the portion of tuition paid by COF for in-state undergraduate students) and mandatory fees (CUSG student fees and the athletic fee).
- After the 60 percent assessment deadline, tuition will not be adjusted. In the case of extenuating circumstances (university error, recent medical condition, immediate family emergency, recent unanticipated financial problems or verification of non-attendance), students may appeal tuition and mandatory fee charges through the Bursar's Office through the last day of finals.

Special session withdrawals only have the 100 percent and 0 percent adjustment periods. See Session Withdrawals (https://www.colorado.edu/registrar/students/withdraw/#ucb-accordion-id--7-content7).

To comply with federal financial aid regulations, financial aid recipients' loan and scholarship awards may be adjusted.

Visit the Withdraw from the Semester (https://www.colorado.edu/registrar/students/withdraw/) webpage for current information. The Board of Regents reserves the right to revise this schedule at any time. Refer to the Summer Session (http://www.colorado.edu/summer/) website for information on the withdrawal policy and refund schedule for summer terms.

Students who do not pay the full amount due to the university at the time of withdrawal must make arrangements for payment with the Bursar's Office. Withdrawals are handled through the Office of the Registrar.

Funding for Graduate School

Financial Aid

The first step in applying for financial aid is to submit the Free Application for Federal Student Aid (FAFSA) (https://studentaid.gov/h/apply-for-aid/fafsa/) each academic year. The FAFSA determines your eligibility for grants, loans, work-study and need-based scholarships. For full financial aid consideration your FAFSA must be on file with the financial aid office by March 1. Get details about the financial aid process (https://www.colorado.edu/financialaid/apply-aid/fafsa/). Graduate students are primarily offered student loans, but there may be additional funding available through specific graduate departments.

Colorado residents may be eligible for the Colorado Graduate Grant (https://www.colorado.edu/financialaid/types-aid/grantsassistantships-graduate-students/) program through the Office of Financial Aid.

Loans

Graduate students may also be eligible for two federal loan programs: Federal Direct Unsubsidized Loans (https://www.colorado.edu/financialaid/types-aid/graduate-loans/direct-loans-graduate-students/) The University of Colorado Boulder participates in the Federal Direct Loan program. The lender is the U.S. Department of Education rather than a bank or other financial institution. Students are automatically considered for a Direct Loan after submitting their FAFSA. Students must enroll at least half-time (3 credit hours).

Federal Graduate PLUS Loans (https://www.colorado.edu/financialaid/types-aid/graduate-loans/federal-graduate-plus-loans/)
The Federal Graduate PLUS Loan is available to students enrolled at least half-time (3 credit hours) in a graduate or professional program and who meet all of the other general eligibility requirements for the federal student aid programs. This loan requires a credit check.

Students can also choose to use private loans (https://www.colorado.edu/financialaid/private-loans/) from banks and other financial institutions.

Departmental Funding

The majority of graduate student funding is awarded through the departments. The main sources of student support are often in the form of either graduate assistantships or training grants.

Graduate Assistantships

Departments may fund students with a graduate assistant appointment (e.g. Research Assistants, Teaching Assistants, Graduate Assistants, and Graduate Part-Time Instructors). These appointments provide a monthly salary, tuition coverage, fee remission, dental insurance and partial coverage of the Student Gold Health Insurance. Students should contact their department (https://www.colorado.edu/graduateschool/admissions/prepare-apply/program-information-deadlines/) with any questions regarding the availability of these types of funding.

Students may review the Graduate Student Appointment Information (https://www.colorado.edu/graduateschool/funding/departmental-funding/graduate-student-appointment-information/) available on the Graduate School site for further details on these types of appointments.

Training Grants

Departments may provide students with funding through training grants, providing graduate students the opportunity to work closely and collaboratively with mentors and other graduate students on specific long-term projects. Primarily science, engineering and social science departments offer this type of grant. The primary focus is on completion of the PhD. Students should consult directly with their home department to find out what opportunities are available in this area.

Program-Specific Grants

Graduate students may also apply directly for CU Boulder and regional grants. For more information, visit the Graduate Student Awards and Grants (https://www.colorado.edu/graduateschool/funding/awards-grants/) webpage.

Other Funding Opportunities

Graduate Students are encouraged to seek funding by applying for fellowships. While there are a number of fellowships and grants that are funded through the university, the majority are provided by government agencies, private foundations and corporations. The Graduate School has compiled a partial list of private and national fellowships opportunities (https://www.colorado.edu/graduateschool/funding/national-fellowship-opportunities/) to explore.

Tuition Classification

In-State and Out-of-State Tuition Classification

Tuition classification is governed by state law and by judicial decisions that apply to all public institutions of higher education in Colorado. Since tuition classification is governed by state law (https://www.colorado.edu/registrar/students/state-residency/guidelines/), the University of Colorado cannot alter or waive the eligibility criteria for any reason, including financial hardship or academic excellence.

New students are classified as Colorado residents (in-state) or nonresidents (out-of-state) for tuition purposes based on information provided on their admission application and other relevant information. Applicants may be required to submit evidence substantiating their claim of in-state eligibility.

Current nonresident students who believe they have become eligible for a change to resident classification must submit a petition with documentation to have their eligibility reviewed. The petition requirements, deadlines for submission, explanation of Colorado tuition classification statutes, specific legal residency exceptions and Office of the Registrar contact information are available on the Tuition Classification (http://www.colorado.edu/registrar/students/state-residency/) webpage.

- For undergraduate students who are not yet 23 years old when a term begins, classification is based upon the domicile of a biological parent or court-appointed legal guardian.
- In order for a student to qualify for resident classification through their own domicile information, they must be one of the following: at least 23 years old on the first day of the term, or married for at least one year before the first day of the term, or entering the second year of a graduate program.
- There are rare individuals who may qualify for resident classification as an emancipated minor (under the age of 23) if they are able to prove that they are totally financially and residentially independent.

Basic Requirements for Establishing Colorado Residency

To become eligible for resident classification, a person must establish legal residence in Colorado. Legal residence, or "domicile," is defined as a person's true, fixed, and permanent home and place of habitation. No person may establish domicile in Colorado solely for the purpose of obtaining in-state tuition benefits.

The qualifying person must demonstrate at least 12 consecutive months of Colorado domicile immediately preceding the beginning of the term for which the student is seeking resident classification. Domicile includes both physical presence and evidence of intent to stay, which is demonstrated by establishing legal ties to Colorado.

To be eligible to *begin* the 12-month period to establish Colorado domicile, an individual must be at least one of the following:

- 22 years of age or older
- Married
- A graduate student
- An emancipated student
- The parent of a student under the age of 23

Unemancipated Minors

Students under age 23 who depend on their parents for support may qualify for in-state tuition if either of their parents, regardless of custody, has been domiciled in Colorado for 12 consecutive months preceding the first day of class in a given semester, even if the student resides elsewhere. In certain circumstances, students may qualify through their parents up to age 23.

Emancipation

An emancipated minor is an individual under age 23 who demonstrates total financial and residential independence. This means the student's parents and all others have entirely surrendered the right to the student's care, custody and earnings, and make no provision for support of any kind. Emancipation is very rare; undergraduates under age 23 who do not have a parent domiciled in Colorado are highly unlikely to be classified as a Colorado resident student.

Students who provide false information to evade payment of out-of-state tuition or who fail to provide timely notice of their loss of in-state eligibility as an emancipated minor are subject to retroactive assessment of out-of-state tuition, as well as disciplinary and legal actions.

Evidence of Domicile

Establishing Colorado domicile includes actions that would be expected of any permanent resident. Pursuant to Colorado law, the following are actions that may be considered evidence of domicile:

- Filing a tax return in Colorado and, if applicable, payment of Colorado state income tax.
- Colorado driver's license or Colorado ID card within 120 days of move to Colorado.
- Colorado vehicle registration within 180 days of move to Colorado.
- Voter registration in Colorado.
- Graduation from a Colorado high school.
- Lease or deed showing permanent occupancy of residential real property in Colorado.
- Continued residence in Colorado while not enrolled as a student and during semester breaks.
- Permanent employment or acceptance of future employment in Colorado
- Any other factor particular to the individual that tends to establish the necessary intent to make Colorado a permanent home.

No single factor constitutes proof of domicile. All evidence, both positive and negative, is considered. Not all of the listed items are necessary, however individuals should take action on all factors that are applicable to their circumstances. For more information on all requirements, see the Tuition Classification (http://www.colorado.edu/registrar/students/state-residency/) webpage.

Domicile Exceptions

Colorado tuition law provides the following rare exceptions to the one-year domicile requirement in certain circumstances:

- Colorado National Guard members
- Members of American Indian Tribes with Historical Ties to Colorado
- Active duty military stationed in Colorado and their dependents
- Honorably discharged members of the U.S. Armed Forces and their dependents
- Returning active-duty military members
- Canadian military stationed in Colorado
- ASSET law qualified students with one year Colorado High School attendance (must have attended a Colorado high school for at least one year preceding the date of graduation; also requires Colorado high school graduation/Colorado GED ***and*** 12 consecutive months of physical presence in Colorado prior to enrolling at the institution)
- Children of new faculty members at Colorado state colleges and universities
- Employees of companies moving to Colorado receiving government economic incentives
- Western Regional Graduate Program enrollees in specific major fields of study
- Olympic athletes training in Colorado
- Others (see Residency Exceptions for Domicile (http://www.colorado.edu/registrar/students/state-residency/domicile-exceptions/) webpage)

Requirements, including spouse and child eligibility, and a list of qualifying tribes are detailed on the Residency Exceptions for Domicile (http://www.colorado.edu/registrar/students/state-residency/domicile-exceptions/) webpage.

University Policies

Alcohol and Other Drugs

In order to create the best possible environment for teaching and learning, the University of Colorado Boulder affirms its support for a responsible campus policy that addresses the inappropriate use of alcohol and other drugs.

In compliance with the federal Drug Free Schools and Communities Act, the University of Colorado Boulder prohibits the unlawful manufacture, possession, use or distribution of a controlled substance (illicit drugs and alcohol) of any kind and in any amount. These prohibitions cover any individual's actions that are part of any university activities, including those occurring while on university property or in the conduct of university business away from the campus.

Information on policies, penalties, health effects and resources available to students and staff regarding alcohol and other drugs can be found on the Alcohol & Other Drugs Information (http://www.colorado.edu/aod/) website.

These policies are also described by various university offices in several publications:

- **Campus housing:** See the Residential Handbook (https://www.colorado.edu/living/housing/policies-forms-and-accommodations/#residential_handbook-1317) webpage.
- **Student Code of Conduct:** See the Student Code of Conduct (https://www.colorado.edu/sccr/).
- **Safety:** Annual Security and Fire Safety Report (https://www.colorado.edu/clery/annual-security-fire-safety-report-asfsr/).

Individual and group counseling for students with substance abuse concerns is available through Counseling and Psychiatric Services. For more information, visit the Counseling and Psychiatric Services (https://www.colorado.edu/counseling/services/substance-use-services/) webpage or call 303-492-2277.

Smoking

For student health and the health of our community, smoking is prohibited in all campus buildings and on all campus grounds.

At this time, the use of smoking products of any sort shall be prohibited on all university-owned and operated campus grounds both indoors and outdoors. This smoking ban does not apply to public rights-of-way (sidewalks, streets) on the perimeter of the campus.

"Smoking," as used in this policy, means smoking any substance, including but not limited to, tobacco, cloves or marijuana. "Smoking products" include, but are not limited to, all cigarette products (cigarettes, bidis, kreteks, e-cigarettes, etc.) and all smoke-producing products (cigars, pipes, hookahs, etc.). University-owned and operated campus grounds include, but are not limited to: all outdoor common and educational areas; all university buildings; university-owned on-campus housing; campus sidewalks; campus parking lots; recreational areas; outdoor stadiums; and university-owned and leased vehicles (regardless of location). In keeping with university policy, the sale, distribution and sampling of all tobacco products and tobacco-related merchandise is prohibited on all university-owned and operated property and at

university-sponsored events. Littering campus with remains of smoking products is prohibited.

This policy applies to all employees, students, visitors, contractors and externally affiliated individuals or companies renting university-owned space on university-owned and operated property campus grounds.

Campus Safety

Personal Safety on Campus

While the University of Colorado Boulder is a relatively safe place to be, the campus is not a haven from community problems. Through the joint effort of various organizations on campus, CU is committed to providing ample safety resources for faculty, staff and students.

Specific efforts to promote safety on campus include the provision of adequate lighting, police protection, educational programs and special prevention programs, such as the CU NightRide escort services and laptop and bicycle registration programs.

In compliance with the federal Clery Act, students and employees receive information on campus security policies and programs, including crime statistics, in an Annual Security and Fire Safety Report (https://www.colorado.edu/clery/annual-security-fire-safety-report-asfsr/). This report will be sent to CU Boulder affiliates by Oct. 1 of each year. In any emergency or life-threatening situation, always call 9-1-1.

Members of the university community are encouraged to report any incident of threatening or harmful behavior to the CU Boulder Police by calling 9-1-1 in an emergency or the non-emergency line, 303-492-6666. Visit Don't Ignore It (http://www.colorado.edu/dontignoreit/) for more information about the wide range of campus and community resources and reporting options available.

Additional safety information can be found on the CU Police Department (http://www.colorado.edu/police/) website. For information on crime alerts, trends and safety tips, follow the CU Police Department on Twitter (@ (https://twitter.com/cuboulderpolice/)CUBoulderPolice) and Facebook (CUBoulderPolice (https://www.facebook.com/CUBoulderPolice/)).

Communication

Student Email

All CU students receive an email account from the university, which is an official means of sending information to students. Students are responsible for maintaining this CU email address. The official email address can be used by professors to contact students and provide course-related information. Administrative offices, such as the Office of the Registrar, use official email addresses to contact students and provide important information. Students are responsible for frequently checking their official CU email address. For more information on the student email policy, visit the Student E-mail Policy (http://www.colorado.edu/policies/student-e-mail-policy/) webpage, call the IT Service Center at 303-735-HELP or email HELP@colorado.edu. To learn more about student email accounts, visit the Office of Information Technology's Messaging and Collaboration webpage (https://oit.colorado.edu/node/237/).

Copyright & Fair Use

The University of Colorado Boulder community respects the intellectual property of others, regardless of the medium by which it is transmitted. This is a cornerstone of academic integrity. We prohibit the use of unauthorized distribution of copyrighted material, which is subject to both civil and criminal penalties as well as university procedures.

Distributing copyrighted materials using peer-to-peer or file-sharing programs is illegal and the university uses technological solutions to deter this activity. Still, the university regularly receives notices of copyright violations and is required by law to take action. Common consequences include loss of network access and referral to the Office of Judicial Affairs. Guidance on campus fair use and copyright issues is provided on the University Libraries (http://www.colorado.edu/libraries/copyright-information/) website.

Diversity & Nondiscrimination

Commitment to Diversity

The Division of Student Affairs supports and contributes to creating and sustaining a diverse, multicultural, socially just and inclusive campus climate by learning about, recognizing and honoring the diverse backgrounds, histories, identities and life experiences of all our students, faculty and staff. Our goal is to create an environment in which all campus community members can thrive while feeling welcomed, safe and at home.

At the University of Colorado Boulder, we are committed to building a campus community in which diversity is a fundamental value. People are different and the differences among us are what we call diversity—a natural and enriching hallmark of life. Diversity includes, but is not limited to, ethnicity, race, gender, age, class, sexual orientation, religion, disability, veteran status, gender identity/expression, veteran status, political affiliation or political philosophy, and health status. A climate of healthy diversity is one in which people value individual and group differences, respect the perspectives of others and communicate openly.

"Diversity is a key to inclusive excellence in education. A diverse learning environment better prepares all students for the world that awaits them. CU Boulder is committed to enriching the lives of our students, faculty and staff by providing a diverse campus where the exchange of ideas, knowledge and perspectives is an active part of learning."—from the Guidelines for Diversity Planning (https://www.colorado.edu/odece/diversity-plan/).

Nondiscrimination Statement

The University of Colorado Boulder does not discriminate on the basis of race, color, national origin, sex, pregnancy, age, disability, creed, religion, sexual orientation, gender identity, gender expression, veteran status, political affiliation or political philosophy in admission and access to, and treatment and employment in, its educational programs and activities. The university takes affirmative action to increase ethnic, cultural, and gender diversity; to employ qualified disabled individuals; and to provide equal access and opportunity to all students and employees.

Equity & Compliance

The University of Colorado Boulder is committed to maintaining a positive learning, working, and living environment free from discrimination and harassment. The Office of Institutional Equity and Compliance (OIEC) (http://www.colorado.edu/oiec/) addresses all claims of sexual misconduct, harassment and/or discrimination, or related retaliation by students, staff and faculty under the University of Colorado Sexual Misconduct, Intimate Partner Violence and Stalking Policy, the University of Colorado Boulder Policy on Protected-Class Discrimination and Harassment, and the University of Colorado Policy on Conflict of Interest

in Cases of Amorous Relationships. The university is committed to addressing concerns and taking appropriate action against those found in violation of these policies.

In response to a report, OIEC determines what immediate and long-term support and safety measures are needed to minimize disruptions to education or employment and to help keep the involved parties and the campus safe. OIEC also provides education and assessment to identify areas in need of improvement to foster a more welcoming and inclusive culture.

To learn more about university policy or the role and programs offered by OIEC, please visit the Office of Institutional Equity and Compliance (https://www.colorado.edu/oiec/) website or call 303-492-2127.

Colleges & Schools

Arts & Sciences

The College of Arts & Sciences is the liberal arts college at CU Boulder. Its mission is to provide an outstanding liberal arts education for its undergraduates, cutting-edge graduate education and world-class research, scholarship and creative work. In addition to gaining the knowledge and skills of their areas of study, students learn how new information is acquired and can participate in original research and creative work with individual faculty members.

Advanced degrees are offered by nearly every academic department in the college, and the PhD is offered in approximately 30 different disciplines. In addition, an increasing number of departments offer combined bachelor's/master's degrees that can be earned in five years. Graduate training focuses on teaching and research careers as well as on professional careers in the public and private sector.

As the liberal arts college of CU Boulder, the College of Arts and Sciences has several goals in the education of its students:

- Educate students for careers and a productive life. Arts and sciences students gain the most current knowledge and skills in their major fields of study. In addition, they learn how to acquire new skills to contend with—and lead—the changes that will occur in the decades to come. Education for a productive life also requires that students learn how to analyze situations, solve problems and speak and write effectively.
- Provide students with a well-rounded education. Arts and sciences students acquire a broad knowledge and an integrated understanding of art and music, great literary works, philosophy, history and politics, the social world, science and technology. They learn how to critically evaluate and think about morals, ethics and values. The core curriculum and breadth requirements give students a broad, liberal-arts education that develops the whole person, not just the specialist.
- Educate citizens who can think for themselves, understand the rapidly changing world and make wise choices within a democratic system.
- Impart a love of learning so that students can continue to grow throughout life.
- Teach ways of thinking about and approaching new problems. For some students, this will enable them to further advance knowledge and scholarship in the academy. For all students, this is important for enriching their lives.
- Prepare students to help enrich the lives of others. Arts and sciences graduates become lifelong resources for their families, neighbors, friends and coworkers.

The college is also dedicated to outstanding undergraduate education, with nearly 50 undergraduate majors. The environment and advantages of a small liberal arts college are created through "academic neighborhoods" in which students can meet and interact with other students and faculty in small group settings. In addition, more than 60 percent of undergraduate classes are small, with 25 or fewer students.

The strength of the College of Arts and Sciences comes from its outstanding faculty. In addition to being dedicated teachers, they are active scholars in disciplines throughout the arts and humanities, social and behavioral sciences, biological sciences and physical and mathematical sciences. They are the recipients of numerous national awards and honors for their research, scholarship and creative work. Faculty and staff of the College of Arts and Sciences join together to create an intellectual community of students and scholars to discover, critically examine, integrate, preserve and transmit knowledge, wisdom and values.

Programs of Study

Anthropology

The Department of Anthropology offers graduate programs leading to the Master of Arts and Doctor of Philosophy degrees with specializations in the subdisciplines of archaeology, biological anthropology and cultural anthropology. Students who acquire an advanced degree are equipped to transmit to others the knowledge, central principles, theories and research methods that have been developed in the discipline of anthropology.

Successful candidates will have a reasonable knowledge of the historical development of general anthropological concepts and theory and of directly relevant concepts and knowledge from related disciplines. In addition, successful candidates for the doctoral degree are expected to carry out and report original anthropological research within a circumscribed area of specialization. They are also expected to be capable of teaching the precepts of their specialty and of guiding future candidates for the doctoral degree through a program of research training.

Course code for this program is ANTH.

Master's Degree

- Anthropology - Master of Arts (MA) (p. 1138)

Doctoral Degree

- Anthropology - Doctor of Philosophy (PhD) (p. 1140)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Bamforth, Douglas (https://experts.colorado.edu/display/fisid_101027/) Professor; PhD, University of California, Santa Barbara

Bernstein, Robin Miriam (https://experts.colorado.edu/display/fisid_152968/)
Associate Professor; PhD, University of Illinois at Urbana–Champaign

Cameron, Catherine M.
Professor Emerita

Cool, Alison Collier (https://experts.colorado.edu/display/fisid_154599/)
Assistant Professor; PhD, New York University

Covert, Herbert
Professor Emeritus; PhD, Duke University

DeWitte, Sharon
Professor; PhD, Pennsylvania State University

Drybread, Kristen (https://experts.colorado.edu/display/fisid_156523/)
Lecturer

Dufour, Darna L. (https://experts.colorado.edu/display/fisid_100213/)
Professor Emerita; PhD, SUNY at Binghamton

Fischer, Kate (https://experts.colorado.edu/display/fisid_155474/)
Lecturer; PhD, University of Colorado Boulder

Goldfarb, Kathryn Elissa (https://experts.colorado.edu/display/fisid_156471/)
Associate Professor; PhD, University of Chicago

Goldstein, Donna M. (https://experts.colorado.edu/display/fisid_100448/)
Professor; PhD, University of California, Berkeley

Greene, David Lee
Professor Emeritus

Gutierrez, Gerardo (https://experts.colorado.edu/display/fisid_146867/)
Professor; PhD, Pennsylvania State University

Hammons, Christian Stanford (https://experts.colorado.edu/display/fisid_152915/)
Teaching Professor; PhD, University of Southern California

Hosek, Lauren (https://experts.colorado.edu/display/fisid_167102/)
Assistant Professor; PhD, Syracuse University

Jacka, Jerry Keith (https://experts.colorado.edu/display/fisid_156067/)
Associate Professor; PhD, University of Oregon

Jones, Carla Mae (https://experts.colorado.edu/display/fisid_134172/)
Professor; PhD, University of North Carolina, Chapel Hill

Jones, Eric
Associate Professor; PhD, Pennsylvnia State University

Joyce, Arthur A. (https://experts.colorado.edu/display/fisid_115421/)
Professor; PhD, Rutgers University–New Brunswick

Kaschube, Dorothea V.
Professor Emerita

Kurnick, Sarah (https://experts.colorado.edu/display/fisid_155915/)
Associate Professor; PhD, University of Pennsylvania

Leigh, Steven Robert (https://experts.colorado.edu/display/fisid_151706/)
Professor; PhD, Northwestern University

Lekson, Steve
Professor Emeritus

Lyons, Colleen Scanlan (https://experts.colorado.edu/display/fisid_148419/)
Assistant Professor Adjunct; PhD, University of Colorado Boulder

McCabe, J Terrence
Professor; PhD, SUNY at Binghamton

McGilvray, Dennis B.
Professor Emeritus

McGoodwin, James Russell
Professor Emeritus

McGranahan, Carole Ann (https://experts.colorado.edu/display/fisid_122673/)
Professor, Chair; PhD, University of Michigan Ann Arbor

O'Brien, Jonathan (https://experts.colorado.edu/display/fisid_152072/)
Assistant Teaching Professor; PhD, University of Colorado Boulder

Ortman, Scott Graham (https://experts.colorado.edu/display/fisid_152978/)
Associate Professor; PhD, Arizona State University

Sauther, Michelle Linda (https://experts.colorado.edu/display/fisid_107236/)
Professor; PhD, Washington University

Shankman, Paul
Professor Emeritus

Shannon, Jennifer A. (https://experts.colorado.edu/display/fisid_147612/)
Associate Professor; PhD, Cornell University

Sponheimer, Matthew James (https://experts.colorado.edu/display/fisid_129957/)
Professor; PhD, Rutgers University New Brunswick

Stevens, Nancy
Professor; PhD, Stonybrook University

Taylor, William T. (https://experts.colorado.edu/display/fisid_165652/)
Assistant Professor, Museum Associate Curator; PhD, University of New Mexico

Van Gerven, Dennis P.
Professor Emeritus

Villanea, Fernando (https://experts.colorado.edu/individual/fisid_168227/)
Assistant Professor; PhD, Washington State University

Walker, Deward E. Jr
Professor Emeritus

Courses

ANTH 5000 (3) Quantitative Methods in Anthropology
Surveys ways of deriving meaning from anthropological data by numerical means, including but not confined to basic statistical procedures.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4000
Requisites: Restricted to graduate students only.

ANTH 5020 (3) Explorations in Anthropology
Special topics in cultural and physical anthropology, as well as archaeology. Check with the department for semester offerings.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4020
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

ANTH 5045 (3) Introduction to Museum Anthropology
Traces the development of Anthropology and museums in America from late 19th century to present day. Students are encouraged to: explore museum theory and practice; think critically about the history of relations among Native Americans, Anthropology, and museums; consider the legacy of collecting and challenges of representing others; and, examine the interplay of Anthropology, material culture, and colonialism.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4045 and MUSM 5045
Requisites: Restricted to graduate students only.

ANTH 5060 (3) Nutrition and Anthropology
Overview of the evolution of human diet and ecological and cultural factors shaping modern diets. Introduces fundamentals of nutrition and analysis of nutritional status. Analyzes ecological, social, and cultural factors leading to hunger and undernutrition, as well as biological and behavioral consequences of undernutrition.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4060
Requisites: Restricted to graduate students only.

ANTH 5070 (3) Methods in Biological Anthropology
Provides laboratory-based research experience in selected areas of biological anthropology. Research designs, methods and applications will be used to develop research skills. Students will read original research papers and carry out a research project of their own design. Area of emphasis within biological anthropology will depend on instructor.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4070
Repeatable: Repeatable for up to 6.00 total credit hours.

ANTH 5080 (3) Anthropological Genetics
Considers data and theory of human genetics. Emphasizes analytical techniques relating to a genetic analysis of individual, family, and populations.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4080
Requisites: Restricted to graduate students only.

ANTH 5110 (3) Human Evolutionary Biology
Detailed consideration of the fossil evidence for human evolution. Covers the discovery of important fossils and interpretations; descriptive information about the fossils; and data and theory from Pleistocene studies relating to ecology, ecological and behavioral data on modern apes and molecular studies that have bearing on the study of human evolution.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4110

ANTH 5120 (3) Advanced Biological Anthropology
Selected topics in physical anthropology emphasizing faculty specialties. Topics may include population genetics and its application to understanding modern human diversity, human population biology, and primate ecology and evolution. Check with department for semester offerings.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4120
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.

ANTH 5125 (3) Evolution and the Human Life Cycle: A Primate Life History Perspective
Surveys primate biology, behavior and ecology using a life history approach. Using a comparative approach, explores life history as mammals, as primates and as humans by focusing on evolutionary decisions that occur during different life stages.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4125
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

ANTH 5129 (3) Aegean Art and Archaeology
Detailed study of the cultures of prehistoric Greece, the Cycladic Islands and Crete, their art and archaeology and their history within the broader context of the eastern Mediterranean, from earliest human settlement to the collapse of the Bronze Age at about 1100 B.C.E. Emphasis is on palace states.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4129 and ARTH 4129 and CLAS 4129 and CLAS 5129

ANTH 5130 (3) Advanced Osteology
Detailed study of the human skeleton with special attention to health and demographic conditions in prehistoric cultures and the evaluation of physical characteristics and genetic relationships of prehistoric populations.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4130

ANTH 5135 (3) Skeletons in the Closet: Curation and Care of Human Remains
This project-based course will examine how human skeletal collections are curated universities, including here at CU Boulder. We will also explore politics and practices of care surrounding human remains, both historically and as new generations inherit responsibility for these collections. We will discuss the roles of marginalization, racism, colonialism, and structural violence in the formation of many of these collections, and possible futures of repatriation, descendant community involvement, respectful use, and purposeful care.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4135
Requisites: Restricted to graduate students only.
Recommended: Prerequisites ANTH 4130/5130 Advanced Osteology.
Grading Basis: Letter Grade

ANTH 5150 (3) Human Ecology: Biological Aspects
Discusses role of human populations in local ecosystems, factors affecting population growth, and human adaptability to environmental stress. Detailed consideration of case studies of small-scale societies in different ecosystems.

ANTH 5160 (3) Early Hominin Paleoecology
Explores current thinking about the diets, environments and lives of early human ancestors and their close kin. Strong emphasis on the methods used to construct such knowledge.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4160
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

ANTH 5170 (3) Primate Evolutionary Biology
Focuses on the fossil record of primates excluding the Hominini). Special emphasis is placed on delineating the origins of the order Primates, the origins of the primate suborders Strepsirhini and Haplorhini and the adaptations of extinct primates in light of our understanding of the modern primate adaptive radiations.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4170

ANTH 5210 (3) Southwestern Archaeology
Explores the prehistory of the American Southwest from the earliest entry of humans into the area to the Spanish entrada. Focuses on important themes in cultural development: the adoption of agricultural strategies, sedentism, population aggregation, population movement, and social complexity.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4210

ANTH 5220 (3) From Olmec to Aztec: The Archaeology of Mexico
Examines the archaeology of Mexico from the initial peopling of the Americas to the Spanish conquest of the Aztec empire. Studies origins of complex societies; ancient Mexican cities, states and empires; religion and politics; trade and interaction; ecology and economy; and social organization.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4220
Requisites: Restricted to graduate students only.

ANTH 5224 (3) Archaeology of the Maya and Their Neighbors
Begins with the environment and describes the earliest inhabitants and the Olmec civilization, then shifts to the earliest Maya and the emergence and collapse of classic Maya civilization. Compares and contrasts the societies of lower Central America.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4224
Requisites: Restricted to graduate students only.

ANTH 5240 (3) Geoarchaeology
Applies geological principles and instruments to help solve archaeological problems. Focuses on site formation processes, soils, stratigraphy, environments, dating, remote sensing and geophysical exploration. Environmental and ethical considerations are included.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4240
Requisites: Restricted to graduate students only.

ANTH 5245 (3) Ceramics in Archaeology
Examines how archaeologists use ceramics to reconstruct the past. Topics include: the relationship between form and function; typology and classification; chronology and seriation; compositional analysis; production and exchange; social, cognitive and ideological aspects of style; and ethnoarchaeological studies of pottery use in contemporary societies. Includes two hours of lecture and two-hours of hands-on laboratory practicum per week.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4245

ANTH 5270 (3) Plains Archaeology
Archaeological evidence for Native American ways of life on the North American Great Plains from the initial peopling of the region into the 19th century.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4270

ANTH 5330 (3) Human Ecology: Archaeological Aspects
Surveys archaeological approaches to ecology, economy and landscape: glaciation, geomorphology and other physical processes creating and affecting sites and regions; environmental reconstruction; theories of human-environment interaction; landscape formation by forager, agricultural and complex societies; and ideologically structured landscapes.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4330
Requisites: Restricted to graduate students only.

ANTH 5345 (3) Archaeological Theory
Provides an advanced introduction to the history of archaeological theory from the late 19th century to the present. Topics include culture history, cultural evolution, systems ecology, behavioral archaeology, analogy and middle range theory, collective action, ecology, agency, practice, gender, identity, landscape, epistemology, materiality and memory.
Requisites: Restricted to graduate students only.

ANTH 5350 (2-6) Archaeological Field and Laboratory Research
Students participate in archaeological field research or conduct laboratory analysis of archaeological materials and data. Students work with faculty on archaeological research projects with a field or lab focus, depending on the project undertaken.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4350
Repeatable: Repeatable for up to 6.00 total credit hours.

ANTH 5380 (3) Lithic Analysis and Replication
Uses diversity of approaches to the analysis of ancient stone tools, including fracture mechanics, lithic technology, materials, heat treatment and functional analysis. Percussion and pressure-flaking experiments are performed.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4380
Requisites: Restricted to graduate students only.

ANTH 5390 (3) Research Methods in Archaeology I
Method and theory of archaeology, emphasizing the interpretation of materials and data and the relationship of archaeology to other disciplines.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4390
Requisites: Restricted to graduate students only.

ANTH 5400 (3) Research Methods in Archaeology 2
Focuses on the design of research including constructing empirical arguments and testing them, data gathering, site formation processes, field strategies (archival resources, mapping, field survey, surface collecting/recording, excavation and preliminary analysis) and artifact analysis as it relates to research design.

ANTH 5455 (3) Epistemology in Archaeology
Examines the logic of scientific inference in general and important issues in inference in archaeology specifically. It focuses on the fundamental problem of arguing from evidence based on the things people left behind to the lives those people led, the fundamental problem in archaeology. We examine general topics to start, including analytic bias, constructing and borrowing theory, and the development of archaeological interpretation over time, using recent and older literature. We then turn to analysis of published case studies and finish with cases from specific research topics the students are working on. Previously offered as a special topics course.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

ANTH 5460 (3) Archaeology and Contemporary Society
Explores the intellectual climate in which archaeology is practiced and how it influences archaeological research and reconstruction, laws, regulations, and ethical issues. Explores public use of and engagement with archaeology.
Requisites: Restricted to graduate students only.

ANTH 5470 (3) Collections Research Practicum in Cultural Anthropology
Designed as a practicum, introduces students to research and practice in museum anthropology, utilizing the extensive anthropology collections at CU-Boulder Museum. Students will gain skills in primary and secondary research, collections and object research and narrative story development for the exhibition of anthropological material culture.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4470 and MUSM 4912 and MUSM 5912
Repeatable: Repeatable for up to 6.00 total credit hours.
Grading Basis: Letter Grade

ANTH 5500 (3) Cross-Cultural Aspects of Socioeconomic Development
Examines goals of international agencies that support development in underdeveloped countries. Anthropological perspective is provided for such issues as urban planning, health care and delivery, population control, rural development and land reform.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4500
Requisites: Restricted to graduate students only.

ANTH 5530 (3) Theoretical Foundations of Sociocultural Anthropology
Critically examines the pivotal schools of 20th century social theory that have shaped modern sociocultural anthropology, including the ideas of cultural evolutionism, Marxism, Durkheim, Weber, Freud, structuralism, postmodernism and contemporary anthropological approaches. Includes primary readings and seminar-style discussion.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4530
Requisites: Restricted to graduate students only.

ANTH 5570 (3) Anthropology of Fishing
Examines fishing methods, peoples, societies and cultures, emphasizing anthropology's role in shaping fisheries management and development policy.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4570
Requisites: Restricted to graduate students only.

ANTH 5605 (3) Anthropology of Neuroscience
Examines the connections between the production and social uptake of neuroscientific knowledge, and explores how transformations in neuroscience shape understandings of human nature. Focusing on anthropological, philosophical, and popular literature, this course addresses the following themes through a cultural and anthropological lens: subjectivity and neuroimaging, "disability" and "neurodiversity," child development, gender, "risk" and neoliberal governance, and the production of scientific expertise.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4605
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

ANTH 5610 (3) Medical Anthropology
Examines health, illness, disease and treatment across a diversity of cases, all of which involve political economic inequalities, individual and collective experiences of medical systems and the historical and contemporary treatment of distinct populations. A demanding upper-level cultural anthropology course in the field of Medical Anthropology, a subfield of cultural anthropology, designed for advanced undergraduate students and early graduate students with an emphasis on the intersections of science, medicine and populations.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4610

ANTH 5630 (3) Nomadic Peoples of East Africa
Examines the issues of current concern in the study of East African pastoral peoples. First half of the course is devoted to historical perspectives and the second half explores the transition from subsistence to market oriented economies.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4630
Requisites: Restricted to graduate students only.

ANTH 5700 (3) Practicing Anthropology
Learn ethnographic methods in the classroom and implement these skills in placements with community organizations, where students pursue an applied research project. This course teaches students how to use anthropological theory and methods to investigate social problems, and to consider how ethnographic research techniques can be applied to positively impact society.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4700
Requisites: Restricted to Anthropology (ANTH) graduate students only.
Grading Basis: Letter Grade

ANTH 5730 (3) Latin American Politics and Culture through Film and Text
Introduces students to the political cultures and societies of Latin America. Through historical and ethnographic text and documentary and non-documentary cinema, this course will explore class relations, ideology and resistance from the conquest to the present.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4730

ANTH 5735 (3) Contemporary Cuban Culture: Race, Gender and Power
Ground students' understanding of contemporary Cuba within the global context. How do those outside the island imagine Cuba and why? What are the realities? In a world of U.S. dominated globalization, only recently have we relaxed a forceful economical blockade on the island: what does the U.S. mean in the Cuban imaginary, both in the past and present? To attend to global processes as they affect local (Cuban) experience, texts from anthropology, history, policy, literature, film and music will be drawn upon. Students will learn how long-standing patterns regarding race, color, class and gender relations have evolved into the socialist and now the "post-socialist" context.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4735
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

ANTH 5745 (3) Science, Technology and Society
Explores the cultural work of science and technology in contemporary societies. The course will focus on anthropological studies of technoscientific works ranging from high-energy particle physics and marine biology to hackathons and space exploration. Discussion topics include the relationship between science, technology and political power; scientific controversies; paradigm shifts and scientific revolutions; and ideas of objectivity, representation and abstraction.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4745
Grading Basis: Letter Grade

ANTH 5750 (3) Culture and Society in South Asia
Intensive analysis of major issues in anthropological research on South Asia (India, Pakistan, Bangladesh, Nepal and Sri Lanka), including kinship, gender, marriage, caste system, religion and ritual, ethnic conflict and social change.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4750
Additional Information: Departmental Category: Asia Content

ANTH 5755 (3) Cultures of Expertise: Science, Power and Knowledge
Examines the expertise as a cultural category. Students will consider the historical and cultural contexts of various forms of expertise and the social roles of experts from car mechanics to civil engineers, doctors and scientists. Students will be given opportunities to reflect analytically on their own experiences with increasingly specialized education as they develop "professional vision" in their chosen fields.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4755
Grading Basis: Letter Grade

ANTH 5760 (3) Ethnography of Southeast Asia and Indonesia
Introduces the historical, political, and cultural dimensions of Southeast Asia, focusing primarily on Malaysia, the Philippines, Singapore and Indonesia, with some coverage of mainland Southeast Asia.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4760
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Asia Content

ANTH 5770 (3) Core Course---Archaeology
Provides a graduate-level overview of analytic issues relevant to all phases of archaeological research and of the diversity of theoretical perspectives within the field as a whole. Course is required for all first-year graduate students in anthropology.
Requisites: Restricted to Anthropology (ANTH) graduate students only.

ANTH 5780 (3) Core Course-Cultural Anthropology
Provides an intense, graduate-level introduction to the discipline of cultural anthropology, with an emphasis upon critically assessing those methods, theories, and works that have shaped the field from the 19th century to the present time. Required of all first-year graduate students in anthropology.
Requisites: Restricted to Anthropology (ANTH) graduate students only.

ANTH 5785 (3) Advanced Seminar in Cultural Anthropology
Details the history of theory and practice in contemporary cultural anthropology, considering the development of major theoretical schools of thought and the integration of general social theory within anthropology. Required of masters students in cultural anthropology.
Requisites: Restricted to Anthropology (ANTH) graduate students only.

ANTH 5790 (3) Core Course---Biological Anthropology
Discusses how biological anthropologists use evidence and concepts from evolutionary theory, human biology, and ecology to understand the evolution, diversification, and adaptation of human populations. Required of all first-year graduate students in anthropology.
Requisites: Restricted to Anthropology (ANTH) graduate students only.

ANTH 5795 (3) Proseminar in Anthropology
Introduces incoming first-year graduate students to the history and current state of scholarship in anthropology from across the subdisciplines, through introduction to the research of individual faculty in the department. Required of all incoming graduate students.
Requisites: Restricted to graduate students only.

ANTH 5840 (1-6) Guided Study
Directed individual research based on a specific area of specialization.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

ANTH 5919 (3) Collections Research Practicum: Archaeology
Focuses on Museum collections management from archaeological sites mainly in the American Southwest and Mongolia. The course involves readings, discussion, and collections analysis and archival documentation. Extra time outside of class is required for the practicum aspect of this course. Each student will need to schedule with the professor an additional 3 hours each week when they will focus on an aspect of their project, to be discussed below under grading criteria. Formerly offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4919 and MUSM 5919
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

ANTH 5930 (1-6) Anthropology Internship
Provides academically supervised opportunities graduate students to work in public and private sectors on projects related to students' career goals. Relates classroom theory to practice. Requires at least 48 hours on the job per credit hour and evidence (paper, employer evaluation, work journal) of significant learning.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4930
Repeatable: Repeatable for up to 9.00 total credit hours.

ANTH 6320 (3) Linguistic Anthropology
Serves as an advanced introduction to the empirical and theoretical foundations of contemporary linguistic anthropology, with special emphasis on the ways in which culture and society emerge semiotically through language and discourse.
Equivalent - Duplicate Degree Credit Not Granted: LING 6320
Requisites: Restricted to graduate students only.

ANTH 6500 (3) Issues in Indigenous Languages
Addresses socio-cultural issues concerning indigenous languages, including human rights, intellectual property, language endangerment and maintenance, identity, linguistic relativity, sense of place.
Equivalent - Duplicate Degree Credit Not Granted: LING 6500
Grading Basis: Letter Grade

ANTH 6940 (1) Master's Candidate for Degree
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

ANTH 6950 (1-6) Master's Thesis
Repeatable: Repeatable for up to 6.00 total credit hours.

ANTH 7000 (3) Seminar: Current Research Topics in Cultural Anthropology
Discusses current research and theoretical issues in the field of cultural anthropology.
Repeatable: Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

ANTH 7010 (3) Seminar: Contemporary Theory in Cultural Anthropology
Addresses current theoretical perspectives in cultural anthropology and controversies surrounding them. Discusses science, history, interpretation, and postmodernism. Includes the relationship between theory and method as well as the production of ethnography.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

ANTH 7015 (3) Kinship: Being and Belonging
Explores interpersonal relationships as foundational objects of analysis. This course takes a comparative approach to examine both large-scale social movements and intimate practices, examining how the ideologies and practices of relatedness intersect with and are shaped by gender and sexuality, national identity and state building, race and ethnicity, embodiment, ways of understanding signs in the world (semiotics), the law, and economic relationships. Previously offered as a special topics course.
Requisites: Restricted to graduate students only.

ANTH 7020 (3) Seminar: Biological Anthropology
In-depth discussion of selected topics in physical anthropology with emphasis on recent research.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

ANTH 7030 (3) Seminar: Archaeology
Intensive examination of selected theoretical or methodological topics in archaeology. Topics vary with current research emphasis.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.

ANTH 7140 (3) Seminar: Archaeology of Selected Areas
Considers archaeology of a specified area, either geographical or topical. Areas selected in accordance with current research interests. May be repeated upto 9 total credit hours.
Repeatable: Repeatable for up to 9.00 total credit hours.

ANTH 7200 (3) Bridging Seminar
Addresses important topics with current theoretical perspectives from at least two anthropological subdisciplines. This provides an interdisciplinary approach across the sub-disciplines of Anthropology: Archaeology, Biological, and Cultural enabling students to better understand and appreciate a holistic approach to anthropological inquiry. Graduate students from other departments may be allowed to take the course if room permits and they have an appropriate background by instructor's permission.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Anthropology (ANTH) graduate students only.
Grading Basis: Letter Grade

ANTH 7300 (3) Seminar: Research Methods in Cultural Anthropology
Repeatable: Repeatable for up to 6.00 total credit hours.

ANTH 7500 (3) Anthropological Ethics
As the AAA Statement on Ethics notes, ¿Anthropology¿that most humanistic of sciences and scientific of humanities¿is an irreducibly social enterprise.¿ Anthropologists confront an array of ethical issues as they engage in research, requiring a synthesis of both professional and personal ethics. In this course, we will examine our responsibilities to people and animals with whom we work and whose lives we study as well as our obligations to the broader discipline, the public, and the environment. We will also explore the history and origins of our discipline and how these legacies have shaped the ethical landscapes of our field.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

ANTH 7600 (3) Human Ecology: Cultural Aspects
Reviews and critically examines the major theoretical perspectives for understanding the relationship between human social behavior and the environment developed in the social sciences, especially anthropology, over the last 100 years. Formerly ANTH 5600.

ANTH 7620 (3) Seminar: Ethnography and Cultural Theory
Explores how ethnographic writing has evolved over the past century to incorporate different forms of cross-cultural representation and to accommodate new theoretical paradigms. Includes ethnographic authority and reflexivity, as well as embedded theories and blurred genres of cultural research.

ANTH 7840 (1-6) Independent Research
Research aimed at developing a solution to an originally conceived research problem.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

ANTH 8990 (1-10) Doctoral Dissertation
All doctoral students must register for no fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the graduate school section.
Repeatable: Repeatable for up to 30.00 total credit hours.

Anthropology - Master of Arts (MA)

Departmental Subdisciplines

Anthropology in the United States is traditionally divided into four subdisciplines: archaeology, biological, cultural and linguistic. CU Boulder offers terminal MA degrees in two subdisciplines: Archaeology and Cultural Anthropology.

Archaeology

The archaeology subdiscipline provides continuous geographic coverage of ancient societies from the Plains of North America through the Southwest and Mesoamerica to the Intermediate Area. The native societies range from egalitarian hunter-gatherers through middle range societies to city-states and empires. The faculty's theoretical and topical interests include human ecology, ethnoarchaeology, agency and social theory, lithic and ceramic analyses, remote sensing and geophysical applications in archaeology.

Archaeology relates to cultural anthropology in significant ways, since much archaeological theory is derived from cultural theory. Given the vast diachronic interests of archaeology, significant archaeological theory is also derived independently from ethnography. Ethnoarchaeology spans the two subdisciplines, as archaeologists study the material culture of functioning contemporary societies to learn how better to make inferences about past behavior. Both archaeology and cultural anthropology study ethnic and political groups in contact with each other, including topics of ethnohistory, migration, acculturation, trade and tribute, conquest, information sharing, elite emulation and the rise of multiethnic powers.

Cultural Anthropology

Cultural anthropologists study the cultural patterns and social institutions that shape how people think and behave in human communities across the globe, including their own society. While their findings are frequently comparative or cross-cultural in scope, cultural anthropologists undertake ethnographic studies through intensive participant-observation in particular cultures, subcultures, communities and regions. The insights of cultural anthropology are derived from ethnographic methods, including long-term fieldwork, interviews, participant-observation and other qualitative research techniques. Among the topical interests of the cultural faculty are gender and sexuality, human ecology, environmental anthropology, medical

anthropology, science and technology studies, nationalism and ethnic identity, capitalism and markets, tourism, and history and memory. Areas of regional expertise in the department include Latin America, Native America, Atlantic Canada, South Asia, Southeast Asia, Tibet, East Africa, the Caribbean, Polynesia and Western Europe, as well as their respective diasporas around the world. To learn more about the expertise and current research of the cultural anthropology faculty, please visit the department website (https://www.colorado.edu/anthropology/people/faculty/), where you will find up-to-date and detailed profiles of each faculty member.

Dual Degree Program - Anthropology (MA/MBA)

Learn more on the dual degree(s) tab (p. 1139).

Requirements

Prerequisites

To be considered for admission as a regular degree student, applicants for the terminal MA degree should have a minimum undergraduate grade point average of 3.00 (4.00 = A). Letters of recommendation and evidence of previous anthropologically oriented experience and work are carefully considered. Graduate Record Examination scores for verbal and quantitative aptitude tests are not required.

Application Requirements

Inquiries about application procedures, processes and administration should be directed to the main departmental office via email at anthgrad@colorado.edu. Students who hope to work with specific faculty members can contact them individually with questions about advising or research expertise. Applications must be completed and submitted no later than December 1 for international students and December 15 for all other applicants.

Course Requirements

Additional information about other specific areas of specialization and other requirements for the degree may be obtained by consulting the Department of Anthropology Graduate Handbook and referencing the Master's Degree Requirements section. Information can also be obtained by contacting the Department of Anthropology directly anthro@colorado.edu

Archaeology Subdiscipline

The terminal MA track in archaeology is for students intending to earn only an MA degree who enter the program with BA, BS or non-anthropology MA or PhD degrees. The degree is designed for students who wish to pursue careers outside of academia (e.g., Cultural Resource Management, government service, etc.). The terminal MA is a non-thesis degree, but does require that students take a 3- credit independent research course (ANTH 7840) that will include the completion of a publishable paper and an oral defense of that paper by their MA committee.

Code	Title	Credit Hours
Core Requirements		
One graduate-level anthropology seminar not in the student's subdiscipline (any non-split-level graduate seminar, including bridging seminars ANTH 7200)		3
ANTH 5000	Quantitative Methods in Anthropology	3
Other Required Courses		
ANTH 5345	Archaeological Theory	3
One 5000-level archaeology course that requires analysis of archaeological materials using laboratory methods. Examples include: ANTH 5245, ANTH 5380, ANTH 5919		3
ANTH 5400	Research Methods in Archaeology 2 (Epistemology, Proposal Writing)	3
ANTH 5460	Archaeology and Contemporary Society	3
ANTH 7840	Independent Research (Publishable Paper)	3
Three elective graduate courses chosen with advisor, one of which must be a 7000-level seminar in archaeology		9
Total Credit Hours		**30**

Biological Anthropology Subdiscipline

Biological anthropology students will apply directly to the PhD program in biological anthropology (p. 1140).

Cultural Anthropology Subdiscipline

The terminal MA track in cultural anthropology is for students intending to earn only an MA degree and who enter the program with an undergraduate degree or with graduate training in an unrelated area. The terminal MA is a non-thesis degree, but does require that students take ANTH 7840, a 3-credit independent research course (in the semester in which they will complete 30 credits of coursework) that will include the completion and defense of an approximately 30-page paper , which will be evaluated by the student's committee.

Code	Title	Credit Hours
Required Coursework		
ANTH 5780	Core Course-Cultural Anthropology (Core 1)	3
ANTH 5785	Advanced Seminar in Cultural Anthropology (Core 2)	3
ANTH 7300	Seminar: Research Methods in Cultural Anthropology	3
One graduate-level anthropology seminar not in the student's subdiscipline (any non-split-level graduate seminar, including bridging seminars ANTH 7200).		3
ANTH 7840	Independent Research (30-page paper)	3
Two additional graduate courses at 5000-level or above, to be selected in consultation with advisor, including ANTH 5840 guided study/directed readings [1]		6
Three 7000-level seminars in cultural anthropology. (Examples: ANTH 7000, ANTH 7010, ANTH 7015, ANTH 7600 or ANTH 7620.)		9
Total Credit Hours		**30**

[1] Please note: 6 maximum credit hours for ANTH 5840 guided study/directed readings.

Dual Degree Program

Anthropology (MA/MBA)

The MBA/MA in anthropology dual-degree program enables students to earn an MBA and an MA in anthropology simultaneously over three or four years depending on the student's subdiscipline in anthropology. Students in this MBA/MA program pursue careers in managing the business aspects of archaeological projects, working in the growing

field of corporate cultural anthropology and ethnography or museum management.

Learning Outcomes

By completion of the graduate program, students will be able to:

- Demonstrate a mastery of the theoretical knowledge base, including core concepts, history of anthropological thought and theory.
- Demonstrate proficiency in research design and methods.
- Demonstrate strong critical thinking, analysis, and communication.
- Achieve a high level of professionalization, including a foundation in ethics, effective teaching and strong preparation for the job market.
- Demonstrate an appreciation for and ability to apply intercultural and global perspectives.

Anthropology - Doctor of Philosophy (PhD)

Departmental Subdisciplines

Anthropology in the United States is traditionally divided into four subdisciplines: archaeology, biological, cultural and linguistic. Of these, the first three are major curricular options available to graduate students in anthropology at CU Boulder.

Archaeology

The archaeology subdiscipline provides continuous geographic coverage of ancient societies from the Plains of North America through the Southwest and Mesoamerica to the Intermediate Area. The native societies range from egalitarian hunter-gatherers through middle range societies to city-states and empires. The faculty's theoretical and topical interests include human ecology, ethnoarchaeology, community archaeology, agency and social theory, lithic and ceramic analyses, remote sensing and geophysical applications in archaeology.

Archaeology links with biological anthropology in a number of ways. For instance, archaeologists encountering burials frequently turn to biological anthropologists for analyses of stature, health and other topics. Many archaeologists and biological anthropologists share a deep interest in human ecology, the ways people have adapted to their environments and have affected those environments.

Archaeology also relates to cultural anthropology in significant ways, since much archaeological theory is derived from cultural theory. Given the vast diachronic interests of archaeology, significant archaeological theory is also derived independently from ethnography. Ethnoarchaeology spans the two subdisciplines, as archaeologists study the material culture of functioning contemporary societies to learn how better to make inferences about past behavior. Both archaeology and cultural anthropology study ethnic and political groups in contact with each other, including topics of ethnohistory, migration, acculturation, trade and tribute, conquest, information sharing, elite emulation and the rise of multiethnic powers.

Biological Anthropology

Biological anthropology encompasses genetics (the study of gene structure, processes and patterns of inheritance), paleoanthropology (the study of human and primate evolution in the fossil record), osteology (the study of the skeleton), paleopathology (the study of evidence of disease and trauma in skeletal and fossil remains), primatology (the study of the behavior and ecology of nonhuman primates) and human biology (biocultural study of biological variation in living human populations).

The biological anthropology faculty at CU have interests and research strengths that cross sub-disciplinary boundaries and foster collaboration with faculty and graduate students in other disciplines and subdisciplines. We share an interest in human ecology, the broad integrative area of anthropology that focuses on the interactions of culture, biology and the environment. We also share an interest in the processes of globalization, which are rapidly changing many aspects of the modern world. As biological anthropologists, we are well positioned to analyze the impact of globalization on the interaction between biology and behavior, and to analyze human and primate adaptations to changing environments and declining biodiversity.

The department offers training in several different aspects of ecology: general ecology, early hominin paleoecology, nutritional, community and evolutionary ecology. Our research foci also include anthropogenic and climatic effects on primate behavior and biology; conservation biology; primate evolution; feeding biology of humans and non-human primates; biogeochemical techniques for studying the diets and habitats of modern and fossil fauna; life history; endocrinology; growth and development; and maternal and infant health.

We carry out research and offer training and research opportunities at a wide range of international sites, including: Beza Mahafaly, Madagascar; Lajuma Research Centre and the Mokopane Conservation Centre, South Africa; The Cradle of Humankind World Heritage Site, South Africa; 12 museums in South Africa, Kenya and Ethiopia; Keneba, The Gambia; Ta Kou Nature Reserve, Kien Luong Karst area and Khau Ca Forest area, Vietnam. Our laboratories offer analytical capabilities and training in a broad range of methods, from measurement of human energy expenditure, to immunoassay and mid-infrared spectroscopy, to plant nutritional analysis. Our field sites offer training and research on primate health, community ecology, plant-animal interactions, forest ecology, nutritional ecology, conservation biology, dental ecology and paleoecology.

Please note that we do not train students specifically in forensics.

Cultural Anthropology

Cultural anthropologists study the cultural patterns and social institutions that shape how people think and behave in human communities across the globe, including their own society. While their findings are frequently comparative or cross-cultural in scope, cultural anthropologists undertake ethnographic studies through intensive participant-observation in particular cultures, subcultures, communities and regions. The insights of cultural anthropology are derived from ethnographic methods, including long-term fieldwork, interviews, participant-observation and other qualitative research techniques. Among the topical interests of the cultural faculty are gender and sexuality, human ecology, environmental anthropology, medical anthropology, science and technology studies, nationalism and ethnic identity, capitalism and markets, tourism, and history and memory. Areas of regional expertise in the department include Latin America, Native America, Atlantic Canada, South Asia, Southeast Asia, Tibet, East Africa, the Caribbean, Polynesia and Western Europe, as well as their respective diasporas around the world. To learn more about the expertise and current research of the cultural anthropology faculty, please visit the department website, where you will find up-to-date and detailed profiles of each faculty member (https://www.colorado.edu/anthropology/people/faculty/).

Requirements

Prerequisites

To be considered for admission to one of the anthropology PhD programs, applicants should have a minimum undergraduate grade point average of 3.00 (4.00 = A) and/or a MA in anthropology or a closely related topic. Letters of recommendation and evidence of previous anthropologically oriented experience and work are carefully considered. Graduate Record Examination scores for verbal and quantitative aptitude tests are not required.

Admission Requirements

Inquiries about application procedures, processes and administration should be directed to the main departmental office. Students who hope to work with specific faculty members can contact them with questions about advising or research expertise. Applications must be completed and submitted no later than December 1 for international students and December 15 for all other applicants.

Students with no previous graduate work may apply for entrance into the terminal MA program in archaeology or cultural anthropology. Students with no previous graduate work may also apply directly into the PhD program in archaeology, biological anthropology or cultural anthropology. Students who have or will have completed an MA degree in anthropology or an MA or MS in a closely related discipline by the time of their admission may be eligible for transfer credits on a case by case basis.

Course Requirements

Coursework beyond the MA must include a minimum of 12 credit hours and 30 dissertation credit hours.

Archaeology Subdiscipline

The PhD track is for students wishing to earn a PhD who enter the program with a BA, BS, or non-anthropology MA or PhD degrees. The degree requires at least 42 credits of coursework with up to 21 transferable from previous graduate work along with 30 credits of dissertation research. Students entering with a BA, BS, or non-anthropology MA or PhD degrees are required to take ANTH 7840 by their third semester, which will include the completion of a publishable paper and an oral defense of that paper by their PhD committee. Students entering with an MA are exempt from ANTH 7840. Students entering with an MA in Anthropology from CU Boulder can transfer up to 30 credits including any of the required courses listed below.

Foreign Language Requirement

Students who will require language training for the successful completion of their dissertation research are expected to identify and begin study of that language, preferably in their first year.

Required Courses and Credits

Code	Title	Credit Hours
Core Courses		
Two graduate-level anthropology courses not in the student's sub-discipline (any non-split-level graduate seminar, including ANTH 7200 Bridging Seminar)		6
ANTH 5000	Quantitative Methods in Anthropology	3
Additional Coursework		
ANTH 5345	Archaeological Theory	3
ANTH 5400	Research Methods in Archaeology 2	3
ANTH 5460	Archaeology and Contemporary Society	3
One 5000-level archaeology course that requires analysis of archaeological materials using laboratory methods. Examples include:		3
ANTH 5245	Ceramics in Archaeology	
ANTH 5380	Lithic Analysis and Replication	
ANTH 5919	Collections Research Practicum: Archaeology	
At least three 7000-level seminars in archaeology. Examples include:		9
ANTH 7030	Seminar: Archaeology	
ANTH 7140	Seminar: Archaeology of Selected Areas	
ANTH 7840	Independent Research (publishable paper)	3
Other courses determined with advisor (5000 level or above)		9
ANTH 8990	Doctoral Dissertation	30
Total Credit Hours		**72**

Any transfer credit or other proposed substitutions for required coursework should be addressed by petition to the Graduate Committee.

Recommended Coursework

The faculty strongly recommends students take one or more additional classes beyond the required minimum, particularly classes in regional culture histories, general anthropology and relevant topics in other departments (such as geology and geography). Other classes can include any relevant to a student's program of study, including archaeological area and topical classes, ethnographic theory and area classes, and classes in related departments (such as geology, geography, biology, etc.). Elective classes should be chosen in consultation with each student's advisor.

Biological Anthropology Subdiscipline

Students entering the PhD program with an MA from another institution must complete one 5000-level graduate class in Biological Anthropology (see Core Requirements in MA section for suggestions) within the first two years. They must also take Quantitative Methods in Anthropology (ANTH 5000) within the first four semesters if they do not have equivalent training on their record.

The Department of Anthropology offers graduate training at the PhD level in the area of biological anthropology. Biological anthropology students holding a bachelor's degree are eligible for direct admission to the PhD program. Students holding a master's degree (or other advanced degree such as MS or MD) are also eligible for the program. Student pathways differ depending on the degree they hold upon admission. Degree plans will be individualized according to students' prior training and professional activities. The goal of the program is to train students to pursue academic and allied careers with an emphasis on research.

The degree requires at least 42 hours of coursework, along with a minimum of 30 hours of dissertation research hours. Applicants holding an advanced degree may transfer up to 21 hours of previous coursework credits, to be determined on a case-by-case basis.

Foreign Language Requirement

Students who will require language training for the successful completion of their dissertation research are expected to identify and begin study of that language, preferably in their first year.

Required Courses and Credits
Students with a Bachelor's Degree

Code	Title	Credit Hours
ANTH 5000	Quantitative Methods in Anthropology	3
3-4 designated 5000-level courses. Examples include:		12
ANTH 5060	Nutrition and Anthropology	
ANTH 5070	Methods in Biological Anthropology	
ANTH 5120	Advanced Biological Anthropology	
ANTH 5125	Evolution and the Human Life Cycle: A Primate Life History Perspective	
ANTH 5160	Early Hominin Paleoecology	
ANTH 5170	Primate Evolutionary Biology	
Other electives at 5000 level or above, along with 7000-level seminar credits		27
ANTH 8990	Doctoral Dissertation	30
Total Credit Hours		**72**

Students with a Graduate Degree and 21 Hours of Approved Transfer Credit

Code	Title	Credit Hours
ANTH 5000	Quantitative Methods in Anthropology	3
2-3 designated 5000-level courses. Examples include:		9
ANTH 5060	Nutrition and Anthropology	
ANTH 5070	Methods in Biological Anthropology	
ANTH 5120	Advanced Biological Anthropology	
ANTH 5125	Evolution and the Human Life Cycle: A Primate Life History Perspective	
ANTH 5160	Early Hominin Paleoecology	
ANTH 5170	Primate Evolutionary Biology	
Other electives at 5000 level or above, along with 7000-level seminar credits		9
ANTH 8990	Doctoral Dissertation	30
Approved Transfer Credit [1]		21
Total Credit Hours		**72**

[1] Any transfer credit or other proposed substitutions for required coursework should be addressed by petition to the Graduate Committee.

Cultural Anthropology Subdiscipline

The PhD program in cultural anthropology is open to applicants with undergraduate degrees or graduate degrees. Applicants with an MA in anthropology or an MA or MS in a closely related field who are accepted into the PhD program are eligible for transferring up to 21 coursework credits, to be determined on a case by-case basis.

The PhD degree requires at least 42 credits of coursework along with 30 credits of dissertation research. Students entering the program without previous graduate work in anthropology or a closely related field are required to take an independent study with their advisors in their fourth semester, which will include the completion of an approximately 30-page paper that will be evaluated by their committee. After the successful completion of 30 credits of coursework and a passing evaluation of the fourth-semester paper, students can earn an MA degree as part of their progress in the PhD program.

Foreign Language Requirement

Students who will require language training for the successful completion of their dissertation research are expected to identify and begin study of that language, preferably in their first year.

Required Courses and Credits

Code	Title	Credit Hours
Requirements		
ANTH 5780	Core Course-Cultural Anthropology	3
ANTH 5785	Advanced Seminar in Cultural Anthropology	3
ANTH 7300	Seminar: Research Methods in Cultural Anthropology	3
ANTH 7840	Independent Research	3
Cross-disciplinary seminar		3
One non-split level graduate anthropology seminar not in the student's subdiscipline, or a bridging seminar ANTH 7200		
Five 7000-level seminars in Cultural Anthropology. Examples include:		15
ANTH 7000	Seminar: Current Research Topics in Cultural Anthropology	
ANTH 7010	Seminar: Contemporary Theory in Cultural Anthropology	
ANTH 7015	Kinship: Being and Belonging	
ANTH 7600	Human Ecology: Cultural Aspects	
ANTH 7620	Seminar: Ethnography and Cultural Theory	
Four or more graduate courses at 5000-level or above, to be selected in consultation with advisor, including ANTH 5840 guided study/directed readings [1]		12
ANTH 8990	Doctoral Dissertation	30
Total Credit Hours		**72**

[1] A maximum of 6 credit hours for ANTH 5840 Guided Study.
