**John Stevenson, dean**  
26 UCB • phone: 303-492-7401 • fax: 303-492-5777  
school website: [www.colorado.edu/graduateschool](http://www.colorado.edu/graduateschool)

GRADUATE WORK at the University of Colorado began on a small scale in 1892. Following years of development, the Graduate School was organized in 1909 with a separate faculty. Each of the three campuses of the University of Colorado system now offers graduate degree programs, and a dean is in residence on each campus. The Graduate School at CU-Boulder is governed by its own set of [Graduate School Rules](#).

## Funding for Graduate Study

CU-Boulder administers various forms of financial assistance for graduate students: fellowships, traineeships, scholarships, research and teaching assistantships, and awards from outside agencies.

### *Financial Aid for Graduate Study*

The University of Colorado offers several types of financial assistance for graduate students who demonstrate financial need. Students apply for assistance by submitting a financial aid application (the FAFSA) as soon as possible after January 1.

The Colorado Graduate Grant Program is open to graduate students who are Colorado residents. Nonresidents are eligible for student fee grants. To receive assistance, students must be nominated by their departments.

Graduate students may apply for long-term loans through the Stafford Loan (formerly GSL) program or the Perkins Loan program (formerly the National Direct Student Loan) and for part-time jobs through the college work-study program.

### *Graduate Part-Time Instructors and Teaching Assistants*

Many departments employ graduate students as graduate part-time instructors (GPTIs) or as teaching assistants (TAs). GPTIs must possess a master's degree or the equivalent and have demonstrated competence in classroom teaching. Teaching assistants are not required to have previous teaching experience. In order to be eligible to be a GPTI or a TA, one must be a fully

enrolled graduate student, with a cumulative GPA of at least 3.000. Compensation is based on the percentage of time worked, and includes a tuition waiver and partial insurance benefit.

### *Research Assistants*

In many departments, research activities provide opportunities for graduate students to work part time as research assistants. All research assistants must maintain a cumulative GPA of at least 3.00 and be full-time regularly enrolled graduate students. Compensation is based on percentage of time worked and includes a tuition waiver and partial insurance benefit.

### *Scholarships and Fellowships*

**The Chancellor's Graduate Fellowship Program**, instituted in 1984–85, attracts outstanding students for graduate study at the University of Colorado. Selected students receive a stipend of \$25,000 for two academic years and a full waiver of all tuition, fees, and insurance. Recipients must be entering master's or doctoral degree students and be nominated by their department.

Additional fellowships are available from private sources. Fellowships, traineeships, and scholarships are also offered by some departments. Applications for financial support are due in the departments by the announced deadlines; most departments must receive applications by January 15.

Information on other funding opportunities is available on the Graduate School website at [www.colorado.edu/graduateschool/funding](http://www.colorado.edu/graduateschool/funding).

# Requirements for Advanced Degrees

## On This Page:

- [Graduate Faculty Appointments for Courses and Exams](#)
- [Master's Degrees](#)
- [Doctor of Philosophy, Doctor of Musical Arts, and Doctor of Audiology](#)

A graduate student is responsible for becoming informed about and observing all regulations and procedures required by the graduate program pursued. Ignorance of a rule does not constitute a basis for waiving that rule. Any exceptions to the policies stated in this catalog must be approved by the dean of the Graduate School.

Additionally, all research must comply with campus and federal research regulations. See the research administration website at [www.colorado.edu/VCResearch/integrity](http://www.colorado.edu/VCResearch/integrity).

## Graduate Faculty Appointments for Courses and Exams

All courses, 5000-level or above, completed to fulfill graduate degree requirements must be taught by members of the graduate faculty. In addition, any faculty member serving on a master's or doctoral examination/defense committee must hold a current graduate faculty appointment. Membership on the university faculty does not automatically constitute an appointment to the graduate faculty. Contact your departmental graduate program assistant for questions concerning these appointments.

## Master's Degrees

A student enrolled in a master's program must satisfy the degree requirements of both the Graduate School and the major department. The requirements listed below are the minimum standards of the Graduate School; additional requirements are set forth by the major department.

### *Minimum Requirements*

The minimum requirement for the master's degree is 30 credit hours. A student may complete a Plan I (thesis) option, or a Plan II (course work) option. At least 24 hours must be completed at the 5000 level or above; these 24 hours must include a minimum of 4, but not more than 6, thesis hours for those students completing a Plan I degree. A maximum of 6 credit hours may be completed at the 3000 or 4000 level at the discretion of the academic department.

Independent study course work cannot exceed 25 percent of the course work required for the master's degree.

### *Master's Thesis*

A thesis, which may be research or expository, critical, or creative work, is required of every master's degree candidate under Plan I. Every thesis presented in partial fulfillment of the requirements for an

## Colleges & Schools

> [Other Academic Programs](#)

---

advanced degree must accomplish the following:

- represent the equivalent of 4–6 semester hours of work, and
- comply in mechanical features with the specifications for theses and dissertations available in the Graduate School.

The final grade is withheld until the thesis is completed; if the thesis is not finished at the end of the term in which the student is registered, an in-progress (*IP*) grade is reported.

### *Language Requirement*

There is no campuswide foreign language requirement for the master's degree. The decision regarding the foreign language requirement for each graduate degree is the responsibility of the graduate program.

### *Time Limit*

Master's degree students have four years (six years for students pursuing an ME) from the semester in which they are admitted and begin course work to complete all degree requirements. The phrase "all degree requirements" includes the filing of the thesis with the Graduate School if Plan I is followed. Students who fail to complete the degree in this four-year period may be dismissed from their program with the concurrence of the major advisor and/or appropriate departmental personnel. To continue, the student must file a petition for an extension of the time limit with the dean of the Graduate School. Such petitions must be endorsed by the student's major advisor and/or other appropriate departmental personnel and may be granted for up to one year.

Students who have not completed the degree within their time limit, and who have received approval for an extension, must have any course work completed more than five years prior to the completion of the degree requirements evaluated by their department for relevance and applicability. At the discretion of the department the student may be required to validate these courses as part of the completion of their degree requirements.

Students who need to leave CU-Boulder for a period of time may apply to the Time Off Program for up to one year. Participation in the Time Off Program does not extend the student's time limit, but may be used as a reason to request an extension.

Students whose registration at CU-Boulder is interrupted by military service may apply to the dean of the Graduate School for an extension.

### *Minimum Registration Requirement*

Master's degree minimum registration requirements can be met only by full-time registration at CU-Boulder for at least two semesters, at least three summer sessions, or a combination of at least one semester and two summer sessions/part-time semesters.

For purposes of deciding minimum registration credit toward a graduate degree, a student must be registered as a full-time student. One semester of minimum registration credit may be earned for full-time registration during the fall or spring semesters or two summer semesters/part-time semesters.

To be a full-time master's student, a student must carry one of the following course loads: a minimum of 5 credits of graduate course work, 8 credits of combined undergraduate and graduate course work, 12 hours of undergraduate course work, at least 1 master's thesis hour, or at least 1 hour of "Master's Candidate for Degree." Full- and half-time standards may be different for students receiving federal or state financial aid. Students should contact the Office of Financial Aid to see if these standards apply. These different standards are for financial aid purposes only.

### *Candidacy and Graduation*

---

To be granted a master's degree, a student must become a candidate for that degree by filing an Application for Admission to Candidacy with the Graduate School no later than the posted graduation deadlines during the semester in which he or she plans to have the degree conferred. Students must meet all posted graduation deadlines in order to receive a degree in any given semester.

### *Comprehensive-Final Examination*

Each candidate for a master's degree is required to take a comprehensive-final examination/thesis defense after the requirements for the degree have been substantially completed or to present an approved degree plan which meets the requirements of the field and represents an intellectually coherent graduate education as determined by the major department. The examination/defense may be given near the end of the student's last semester while the candidate is still taking required courses for the degree, provided satisfactory progress is being made in those courses. The approved degree plan must be approved by the department chair, graduate director, and major advisor on the Degree Plan Approval Form. The Degree Plan Approval option is available only in select departments.

The following rules apply to the comprehensive-final examination:

1. A student must be registered on the Boulder campus as a regular degree-seeking student during the semester the examination is passed.
2. Notice of the examination/defense must be filed by the major department in the Graduate School at least two weeks prior to the examination/defense. The examination/defense must be scheduled no later than the posted deadline for the semester in which the degree is to be conferred.
3. The exam is given by a committee of three graduate faculty members appointed by the department with approval of the dean of the Graduate School. The chair of the committee must have a regular or tenured graduate faculty appointment.
4. The examination, which may be oral, written, or both, must cover the thesis (which should be essentially complete), other work completed in courses and seminars in the major field, and all work presented for the degree.
5. A student must have an affirmative vote from the majority of the committee members to pass. A student who fails the comprehensive-final examination may attempt it once more after a period of time determined by the examining committee.

## Doctor of Philosophy, Doctor of Musical Arts, and Doctor of Audiology

The doctor of philosophy (PhD), the doctor of musical arts (DMusA), and the doctor of audiology (AuD) are the highest academic degrees conferred by CU-Boulder. The requirements stated below are minimal requirements for all candidates for the PhD degree; additional conditions are found in department announcements. Additional requirements for the doctor of musical arts are available from the College of Music. Additional requirements for the doctor of audiology are available from the Department of Speech, Language, and Hearing Sciences.

### *Admission*

A student admitted to the Graduate School for the master's program must reapply for admission for the doctoral program.

### *Minimum Course Requirement*

The minimum requirements for the PhD or DMusA degree are 30 credit hours of course work at the 5000 level or above. Those students pursuing the PhD shall complete a minimum of 30 credit hours

of dissertation work beyond the minimum course work requirement. The minimum transfer requirements for the AuD degree are 108 credit hours of course work at the 5000 level or above.

Unless otherwise specified by departmental requirements, all courses taken at the 5000 level or above that were taken for the master's degree at CU-Boulder may be applied toward the PhD degree. Course work taken in pursuit of a doctoral degree cannot be applied toward a subsequent master's degree.

### *Dissertation Credit-Hour Requirement*

To complete the requirements for the PhD degree, a student must register for a minimum of 30 dissertation credit hours. Distribution of those hours is as follows:

1. A student may not register for more than 10 dissertation credit hours in any one semester.
2. Not more than 10 dissertation credit hours taken in semesters prior to the semester in which the comprehensive examination is passed may be counted in the 30 dissertation hours required for the degree.
3. Not more than 10 dissertation hours of credit taken the semester in which the comprehensive examination is passed may be included in the 30 dissertation credit hours required for the degree.

### *Minimum Registration Requirement*

The minimum registration requirement for doctoral students is six semesters beyond the attainment of an acceptable bachelor's degree. Two semesters of minimum registration credit may be allowed for a master's degree from an accredited institution; however, at least four semesters of minimum registration credit, two of which must be consecutive in one academic year, must be earned for work taken at CU-Boulder.

For purposes of deciding minimum registration credit toward a graduate degree, a student must be registered as a full-time student. One semester of minimum registration credit may be earned for full-time registration during the fall or spring semester or during two summer semesters. Doctoral students who have not passed the comprehensive examination are considered full time during the spring and fall semesters if they are enrolled for at least 5 credit hours of course work at the graduate level, 8 credit hours of combined undergraduate and graduate hours, 12 credit hours of course work at the undergraduate level, or at least 1 doctoral dissertation hour. DMA students who have not passed their comprehensive exam may also be considered full time if they are taking 1 hour of course work numbered 8200–8399 or TMUS 8019. Doctoral students who have passed the comprehensive examination must register for at least 5 doctoral dissertation hours to be considered full-time students. DMA students who have passed their comprehensive examination must register for 1 hour of course work numbered 8200–8399 or TMUS 8029 to be considered full time. Doctor of audiology students are considered full-time students if they are enrolled for at least 5 credit hours of course work at the graduate level, 8 hours of course work of combined undergraduate and graduate hours, or 12 credit hours of course work at the undergraduate level. Full- and half-time standards may be different for students receiving federal or state financial aid. Students should contact the Office of Financial Aid to see if these standards apply. These different standards are for financial aid purposes only.

### *Preliminary Examination*

Each department determines for itself (by examination or other means) that students who wish to study for the doctoral degree are qualified. The means by which each department makes this evaluation are specified in departmental requirements. Students who are thus evaluated are notified immediately of the results.

### *Language Requirement*

---

There is no campuswide foreign language requirement for the doctoral degree. The decision regarding the foreign language requirement for each graduate degree is the responsibility of the graduate program.

## *Comprehensive Examination*

Before admission to candidacy for the doctoral degree, students must pass a comprehensive examination in the field of concentration and related fields.

The following rules apply to the doctoral comprehensive examination.

1. Students must be registered (pass/fail or credit) on the Boulder campus as regular degree-seeking students when they pass the comprehensive examination.
2. Notice of the examination must be filed by the major department with the Graduate School at least two weeks before the examination.
3. The examination is conducted by an examining board appointed by the chair of the major department and approved by the dean of the Graduate School. The board consists of the major advisor and additional members as necessary to a minimum of five. The chair must have a regular or tenured graduate faculty appointment. Successful candidates must receive affirmative votes from a majority of the members of their examination board. A candidate who fails the examination may attempt it once more after a period of time determined by the examination board.
4. The examination, which may be oral, written, or both, tests mastery of a broad field of knowledge, not merely formal course work. The oral part is open to members of the graduate faculty.

## *Admission to Candidacy*

A student must formally apply for admission to candidacy for the doctoral degree on forms supplied by the Graduate School at least two weeks before attempting the comprehensive examination. Before being admitted to candidacy a student must earn at least three semesters toward the minimum registration requirement, and pass the comprehensive examination.

## *Continuous Registration Requirement*

A PhD student is required to register continuously for a minimum of 5 dissertation hours in the fall and spring semesters of each year, beginning with the semester following the passing of the comprehensive examination and extending through the semester in which the dissertation is successfully defended (final examination). DMusA students must maintain continuous registration for at least 1 credit of course work numbered 8200–8399 (or TMUS 8029). AuD students must maintain continuous registration for appropriate course work in the fall and spring semesters of each year through the semester in which the final exam is passed.

1. A student not required to maintain full-time status and not using campus facilities may claim off-campus status, which allows registration for 3 rather than the minimum of 5 dissertation credit hours. Off-campus status (3 credits of dissertation hours) is considered part-time. All CU-Boulder considerations for part-time status apply.
2. A student who fails to register continuously for dissertation credit hours after passing the comprehensive examination must retake and pass the comprehensive examination in order to regain status as a student in good standing in the Graduate School. The department may require that the student validate course work more than five years old. At its discretion, the department may petition the dean of the Graduate School for a time limit for completion of all degree requirements of up to one year after the retaking of the comprehensive exam. The department must petition the dean of the Graduate School to waive the requirement to retake the comprehensive exam.

3. A PhD student must be registered full time for a minimum of 5 dissertation hours during the semester (including summer session) in which the dissertation defense is passed. DMusA students must be registered full time in course work numbered 8200–8399 ( or TMUS 8029) during the semester in which the dissertation defense is passed. AuD students must be registered full time for 5 hours of graduate level course work or 8 hours of combined undergraduate and graduate hours during the semester in which the final exam is passed.

### *Dissertation Requirements*

A PhD student must write a dissertation based upon original investigation, showing mature scholarship and critical judgment, as well as familiarity with tools and methods of research. The subject must be approved by the student's major department.

1. Every dissertation presented in partial fulfillment of the requirements for an advanced degree must represent the equivalent of at least 30 semester hours of work.
2. The student is responsible for notifying the Graduate School of the exact title of the dissertation on or before the posted deadlines during the semester in which the doctoral degree is to be conferred.
3. The dissertation must comply in mechanical features with the specifications for theses and dissertations available in the Graduate School.
4. After the dissertation defense, the student is responsible for submitting the dissertation and signature page on or before the posted deadline during the semester in which the doctoral degree is to be conferred.

The final grade is withheld until the dissertation is completed. In progress (*IP*) grades are assigned during each semester until the defense is successfully completed and the final copy of the dissertation is accepted by the examination committee, at which time the final grade for all dissertation hours is submitted to the Graduate School.

### *Dissertation Defense/Final Exam*

After the dissertation has been accepted for defense by the student's committee, a final examination on the dissertation and related topics is conducted. For AuD students, a final examination is conducted in place of the dissertation defense.

The following rules apply to the dissertation defense.

1. A student must be registered as a full-time, regular degree-seeking student at CU-Boulder, for a minimum of 5 dissertation hours during the semester in which the final examination is passed. DMusA students must be registered full time in course work numbered 8200–8399 ( or TMUS 8029) during the semester in which the dissertation defense is passed. Doctor of audiology students should be registered during the final exam for 5 credit hours of course work at the graduate level or 8 hours of combined undergraduate and graduate hours.
2. Students must notify the Graduate School of their final oral examination at least two weeks before their scheduled examination date.
3. This examination is wholly or partly oral, the oral part being open to anyone.
4. The examination is conducted by a committee appointed by the chair of the major department and approved by the dean of the Graduate School, which consists of at least five persons, one of whom must be from outside the student's major department. Three of the members must be CU-Boulder graduate faculty. The chair and outside member of the committee must have regular or tenured graduate faculty appointments. The other committee members must have either regular or special graduate faculty appointments. The chair and a majority of the committee must be present on the Boulder campus for the examination. More than one dissenting vote disqualifies the candidate in the final examination.

5. A student who fails the examination may attempt it once more after a period of time determined by the examining committee.

### *Time Limit*

Doctoral degree students are expected to complete all degree requirements within six years from the semester in which they are admitted and begin course work in the doctoral program. The phrase “all degree requirements” includes the filing of the dissertation and all accompanying forms with the Graduate School. Students who fail to complete the degree in this six-year period may be dismissed from their program with the concurrence of the major advisor and/or appropriate departmental personnel. To continue, the student must file a petition for an extension of the time limit with the dean of the Graduate School. Such petitions must be endorsed by the student’s major advisor and/or other appropriate departmental personnel and may be granted for up to one year. If the dean of the Graduate School and the department chair/program director cannot agree on whether a student should continue, the Graduate School’s executive advisory council makes the final decision.

Students who need to leave CU-Boulder for a period of time may apply to the Time Off Program for up to one year. Doctoral students who are required to maintain continuous registration may petition for an exception in order to participate in the Time Off Program for parental leave or other extenuating circumstances. Participation in the Time Off Program does not extend the student’s time limit, but may be used as a reason if applying for an extension.

Students whose registration at CU-Boulder is interrupted by military service may apply to the dean of the Graduate School for an extension of time.

### *Graduation*

Students must meet all posted graduation deadlines in order to receive a degree in any given semester.

### *Sequestration of Dissertations*

Dissertations approved by the departments and the Graduate School are released to ProQuest/UMI and kept on file electronically at Norlin Library.

Occasionally, the primary academic advisor, after consultation with the student, may find it necessary to sequester the student’s dissertation to protect university rights to intellectual property. The university accepts the obligation to protect potentially publishable creative works and potentially patentable subject matter from premature public disclosure so as to preserve entitlement to patent protection while the technology is being evaluated. This sequestration should take place only when it is absolutely required and only for the minimum time necessary.

With just cause, the student may request that an embargo be placed on the publication/sale of the thesis for a reasonable amount of time. This request is made upon the electronic submission of the document.

# Academic Standards

## Grade Point Average

A student is required to maintain at least a *B* (3.00) average in all work attempted while enrolled in the Graduate School, and must have at least a 3.00 cumulative average to receive a graduate degree.

## Nonacceptable Grades

1. A student who receives a grade of *C* or below in a course may petition to repeat that course once, provided the course has not been previously applied toward a degree.
2. Courses in which grades below *B-* (2.700) are received are not accepted for doctoral programs.
3. Courses in which grades below *C* (2.000) are received are not accepted for master's degree programs or for the removal of academic deficiencies.
4. Courses taken toward the fulfillment of requirements for graduate degrees may not be taken *pass/fail*.

## Probation

A student whose cumulative GPA falls below 3.000 is placed on academic probation. The student has two semesters in which to raise the cumulative GPA to 3.000 or above. If the student's cumulative GPA is at or below 2.500, a dean's administrative stop is placed on the student's record, and the student may be withdrawn from course work for upcoming semesters.

If, after the two-semester probationary period, the student's cumulative GPA is still below 3.000 or if other conditions placed by the major department or Graduate School are not met, a dean's administrative stop will be placed on the student's record and he or she may be subject to dismissal.

A provisionally admitted student whose GPA falls below 3.000 has a dean's administrative stop placed on his or her record pending a review by the major department and the Graduate School.

## No Credit

Course work to be applied toward an advanced degree may not be taken for *no credit (NC)*. Courses taken for *no credit* cannot be used toward the minimum credit load requirement for full-time or half-time status.

## Pass/Fail

No course work to be applied toward an advanced degree may be taken *pass/fail*.

## Colleges & Schools

> [Music](#)

> [Other Academic Programs](#)

# Student Ethics

Students are expected to adhere to the highest codes of personal and professional ethics. Students who do not adhere to written guidelines regarding academic honesty and/or academic or research ethics may be dealt with according to the appropriate policy documents. Students found guilty of misconduct in any of these areas may have sanctions imposed, or may be dismissed from CU-Boulder.

# Admission & Enrollment Policies

## On This Page:

- [Application Procedures](#)
- [Admission Requirements](#)
- [Credit Policies](#)
- [Registration](#)

## Application Procedures

Students seeking admission to a CU-Boulder master's or doctoral program apply directly to the appropriate department, not the Graduate School. An applicant for admission must present complete application materials that include:

1. Complete the graduate application, available online at [admissions.colorado.edu/graduate](http://admissions.colorado.edu/graduate).
2. One official transcript of all academic work completed to date.
3. A \$50 nonrefundable application fee (check or money order). No application will be processed unless this fee is paid. The application fee for international students is \$70.
4. Three or four letters of recommendation. Please check with your program to obtain the required number of recommendations needed.
5. Test scores and other materials as required by specific departments.

A completed application must be in the major department by the published deadline for the term for which admission is sought. Most departments have an application deadline that is several months before the start of the desired admission term. Qualified applicants may find that their application cannot be processed for a specific term if enrollment levels have been reached.

## Admission Requirements

A graduate student may be admitted to CU-Boulder as either a regular degree student or a provisional degree student.

### *Regular Degree Students*

Qualified students may be recommended for admission to regular degree status by approved programs of the Graduate School provided they meet the following criteria:

1. They hold a baccalaureate degree from an accredited college or university or have done work equivalent to that required for such a degree.
2. They show promise of ability to pursue advanced study and research, as judged by their scholastic record.
3. They have had adequate preparation to enter graduate study in the chosen field.

## Colleges & Schools

- > [Architecture & Planning](#)
- > [Arts & Sciences](#)
- > [Business](#)
- > [Education](#)
- > [Engineering & Applied Science](#)
- > [Graduate School](#)
- > [Policies & Requirements](#)

- > **Admission & Enrollment Policies**
- > [Programs of Study](#)
- > [Journalism & Mass Communication Program](#)
- > [Law](#)
- > [Music](#)
- > [Other Academic Programs](#)

- 
4. They have at least a 2.750 (on a 4.000 scale) undergraduate GPA (for engineering, 3.000).  
(Note: Applicants who cannot meet criterion 4 may still secure regular admission if they have completed 9 semester hours of relevant graduate course work with at least a 3.250 average.)
  5. They meet additional requirements for admission established by the major department.

### *Provisional Degree Students*

Students who do not meet the requirements for admission as regular degree students may be recommended for provisional degree status by their major department. With the concurrence of the dean of the Graduate School, these students are admitted for a probationary term of either one or two semesters of full-time study (or the equivalent for part-time students). At the end of the specified probationary period, provisional degree students must be either admitted to regular degree status or dismissed from the graduate program. Provisional students are subject to the same standards of performance required of regular degree students, plus any other requirements imposed by the program faculty as conditions of admission.

Credit earned by persons in provisional degree status may count toward a degree at CU-Boulder.

To meet the standard terms of provisional admission, the student must generally complete 12 hours in two semesters (or equivalent for part-time students) with a 3.000 cumulative GPA. Program faculty may recommend additional or alternative conditions as appropriate.

### *Admission to a Concurrent Bachelor's/Master's Degree Program*

A number of CU-Boulder departments offer concurrent bachelor's/master's degrees, which enable CU undergraduate students to pursue undergraduate and graduate programs simultaneously and to receive both degrees in a shorter time period than it would take to pursue them separately.

Highly qualified undergraduate students may be recommended for admission to a concurrent bachelor's/master's degree program at the end of their sophomore year or the beginning of their junior year. Such students are not formally admitted to the Graduate School. Standards for admission as well as eligibility to remain in the program are specified in each department's program guide.

### *Admission to a Dual Degree Program*

The Graduate School, in conjunction with the faculty of each department and the deans of schools and colleges where appropriate, approves dual degree programs that combine previously approved graduate degree programs in two areas or departments.

Qualified graduate students may be recommended for admission to an approved dual degree program upon meeting the qualifications of each graduate program and any special qualifications as outlined by each program's approved guidelines. Minimum standards and qualifications for admission and continuation may be found in each department's approved program guide. Students wishing to complete degrees in more than one department that have no approved dual degree program or interdisciplinary major combination must complete all the requirements for both degrees with no shared or overlapping course work.

### *Admission of Seniors*

A CU-Boulder senior who is not pursuing the concurrent bachelor's/master's degree, but who has satisfied the undergraduate residence requirement and does not need more than 6 semester hours of advanced subjects to meet the requirements for a bachelor's degree, may be admitted to the Graduate School. Students who just wish to take a graduate-level class will need the instructor's signature in a "special action form" obtained from the department.

### *Admission of Nondegree Students to Regular Degree Status*

Students with nondegree status who wish to apply for regular student status must complete their

---

application for admission before completing 9 semester hours as nondegree students at CU-Boulder.

### *Admission of Former and Suspended Students*

Students who were previously admitted to a graduate degree program but who did not complete that degree and who have not been continuously registered at CU-Boulder must complete the following steps before being readmitted:

1. Clarify their status with the department to determine their eligibility to return and pursue the same degree.
2. Submit an application to the department (departmental approval is required) before enrollment levels are met or deadlines passed for the term in which they expect to return to CU-Boulder.

A regular degree student who is dismissed for failure to maintain a 3.000 grade point average is eligible to apply for readmission after one year. Approval or rejection of this application rests jointly with the student's major department and the dean of the Graduate School. The final decision will be made by the dean based on the recommendations of the department.

### *Students Transferring from Other CU Campuses*

Students transferring from another CU campus to CU-Boulder must apply to and be accepted by the Boulder campus.

### *Students Changing Major Departments*

Students who want to change major departments must apply to and be accepted by the new department. When adding a second major in an approved interdisciplinary major combination, this must be noted on the application.

### *Admission of Faculty Members*

No member of the faculty above the rank of instructor may be working toward an advanced degree from CU-Boulder.

## Credit Policies

### *Transfer Credit*

Transfer credits from accredited institutions are accepted by CU-Boulder only after approval by the department chair/program director and the dean of the Graduate School, and under conditions outlined below. Transfer credit is defined as any credit earned at another accredited institution, credits earned on another campus of the CU system, or credits earned as a nondegree student within the CU system. Students seeking a degree from CU-Boulder must complete the majority of their course work while enrolled as degree-seeking students.

The following rules apply to transferring credit to CU-Boulder graduate programs:

- The maximum amount of work that may be transferred to CU-Boulder depends upon the graduate degree sought (individual departments may have more restrictive limits).

### *Degree and Semester Credit Hours*

MA, ME, MS, MMus, MMusEd, or DMA—9

MFA—18

PhD or AuD—21

AuD students with MA and audiology certification—30

---

Work already applied toward a graduate degree received from CU-Boulder or another institution cannot be accepted for transfer toward another graduate degree of the same level at CU-Boulder. In addition, work completed for a doctoral degree may not be applied toward a subsequent master's degree. Extension work completed at another institution cannot be transferred, and correspondence work, except to make up deficiencies, is not recognized.

- All courses accepted for transfer must be graduate-level courses. A course in which a grade of *B-* or lower was received will not be accepted for transfer. Transfer course work that is to be applied to a graduate degree at CU-Boulder and was completed more than five years prior to being accepted to the program will be evaluated by the major department as to current relevance and applicability to the degree requirements. At the discretion of the department, a student may be asked to validate transfer credits prior to approval.
- Credit may not be transferred until the student has completed 6 credits of graduate course work as a regular, degree-seeking student at the Boulder campus with a 3.000 GPA. Transferred credits do not reduce the minimum registration requirement, but may reduce the amount of work to be done in formal courses.
- Excess undergraduate credits from another institution may not be transferred to the CU-Boulder Graduate School.

### *Graduate Credit for CU-Boulder Seniors*

With the exception of students enrolled in a concurrent bachelor's/master's degree program, seniors at CU-Boulder may earn graduate credit for a limited amount of graduate-level work (up to 9 semester hours), provided such work is completed with a grade of *B* or above in course work at CU-Boulder; comes within the five-year course time limit; has not been applied toward another degree; and is recommended for transfer by the department concerned, and such transfer is approved by the dean of the Graduate School.

## Registration

Registration procedures are sent to new graduate students when they confirm their intent to enroll. Please refer to Registration in the General Information section for further information.

Late registration is held only if enrollment levels have not been reached. Graduate students (including candidates for degrees and students taking only thesis hours) who fail to complete registration and pay fees during regular registration may be charged a late registration fee.

### *Concurrent Registration*

Boulder campus students unable to obtain courses required for their degree program on the Boulder campus may register for up to two courses or 6 credit hours, whichever is greater, on another University of Colorado campus. The course work must be required for their degree program; they must have their dean's permission; they must be enrolled for at least one course on the Boulder campus; and enrollment levels must not have been reached on the other campus. Contact the Office of the Registrar for additional information.

### *Reciprocal Exchange Agreement Program*

Reciprocal registration enables University of Colorado graduate students to attend classes at other Colorado institutions, including Colorado School of Mines, Colorado State University, and the University of Northern Colorado. For more information, contact the Office of the Registrar.

### *Withdrawal*

A graduate student who desires to withdraw from the university should go to Regent Administrative Center 125 for a withdrawal interview. A student who discontinues attendance in a course without officially withdrawing is marked as having failed that course. Except under extreme circumstances, graduate students are not permitted to withdraw after the last day of classes.

## Programs of Study

The Graduate School currently oversees 100 graduate and professional programs. The school works to guarantee a standard of quality and cohesion across all disciplines, ensuring the continuing integrity and value of a CU-Boulder graduate degree. The Graduate School also helps make possible the many connections between the campus and outside constituencies, in the state, the nation, and the world.

# Graduate Degree Programs Overview

## Degrees

The Graduate School of the University of Colorado Boulder offers instruction leading to the following advanced degrees:

- Master of Arts (MA)
- Master of Business Administration (MBA) (through Leeds School of Business)
- Master of Engineering (ME)
- Master of Fine Arts (MFA)
- Master of Music (MMus)
- Master of Music Education (MMusEd)
- Master of Science (MS)
- Doctor of Audiology (AuD)
- Doctor of Musical Arts (DMusA)
- Doctor of Philosophy (PhD)

## Programs

### *MA programs in:*

- [Anthropology](#)
- [Art History](#)
- [Asian Languages and Civilizations](#)
- [Classics](#)
- [Communication](#)
- [Comparative Literature](#)

Inquiries regarding admission to graduate programs should be addressed to the graduate department in which the applicant wishes to study (see the *University of Colorado Boulder Directory* for campus addresses or see [www.colorado.edu](http://www.colorado.edu)).

### *Concurrent Bachelor's/Master's Program*

## Concurrent Bachelor's/Master's Degree Programs

Concurrent BS/MS and BA/MA degree programs are offered in several departments at CU-Boulder. These programs allow a student to receive both a bachelor's and master's degree in five years of study without compromising the academic integrity of either degree.

Currently approved concurrent degree programs in arts and sciences include:

- applied mathematics
- art history
- Asian languages and cultures
- classics

- cognitive psychology
- ecology and evolutionary biology
- engineering physics/physics
- film/art history
- French
- Germanic studies
- integrative physiology
- linguistics
- physics/engineering physics
- mathematics
- religious studies

Currently approved concurrent degree programs in business include:

- accounting/accounting
- finance/accounting
- information systems/accounting
- information systems/telecommunications
- all departments in engineering.

These concurrent degree programs are open only to highly qualified CU-Boulder undergraduates. Students are formally admitted at the end of their sophomore year or the beginning of their junior year. They are admitted through the admission procedure of their department and do not go through the normal process of admission to Graduate School. When students have completed the program requirements, they receive both a bachelor's and a master's degree simultaneously. Students wishing to continue studying toward a doctorate must formally apply for admission to the Graduate School.

Students interested in a concurrent bachelor's/master's program should inquire in the department.

## *Dual Degree Programs*

### Dual Degree Programs

In an environment where there is a rapidly increasing desire for interdisciplinary and professional skills, receiving two master's degrees in complementary fields can be a real asset. Contact the individual departments for details.

## *Combinations with MBA*

- Art and Art History/MBA
- Anthropology/MBA
- Computer Science/MBA
- Environmental Studies/MBA
- German/MBA
- Juris Doctor/MBA
- Telecommunications/MBA
- Theatre and Dance/MBA

## *Combination within the Graduate School*

- Applied Math/MCD Biology

- Audiology/Speech, Language, and Hearing Sciences (both through the Department of SLHS)
- Engineering Management/Telecommunications
- Music (two areas)
- Religious Studies/Asian Languages/History (any two)

### *Combination with Law*

- Environmental Studies/Law
- Telecommunications/Law

# Biotechnology

The graduate certificate program in biotechnology provides integrated, interdisciplinary training that encompasses both modern biological sciences and biochemical engineering. The goal of the program is to help students acquire the skills and credentials to undertake crossdisciplinary research in modern industrial, academic, and government biotechnology research laboratories and the perspective to serve as leaders in the advancement of beneficial applications of modern biotechnology.

The graduate biotechnology program is offered cooperatively by the Departments of Chemical and Biological Engineering, Chemistry and Biochemistry, and Molecular, Cellular, and Developmental Biology. The program awards a certificate, not a separate degree; each student enrolls in a participating department and meets the degree requirements for that department.

A student must take 6 semester credit hours of graduate biotechnology courses, including CHEN 5830 Introduction to Modern Biotechnology *and* CHEN 5831 Biotechnology Case Studies. For the remaining credits, bioscience graduate students choose from bioengineering courses, and bioengineering students choose from bioscience courses.

During their first year, students take laboratory rotations in participating faculty laboratories. At least one laboratory rotation must be outside the student's home department. Students receive up to 7 semester credit hours of independent study or laboratory-methods credit for these rotations.

All students are expected to undertake internships with local biotechnology companies. These internships usually take place during the summer after the first year of graduate study.

For more information on the biotechnology certificate program, contact Professor Ryan Gill, Department of Chemical and Biological Engineering, University of Colorado Boulder, 424 UCB, Boulder, CO 80309-0424; **303-492-2627**.

# Cognitive Science

## *Graduate Degree Program(s)*

### Doctoral Degree in Cognitive Science

The cognitive science academic program includes a combined PhD degree between cognitive science and a core discipline, as well as a combined PhD plan of study tailored for students interested in cognitive neuroscience. In addition, there are two certificates at the graduate level of study. The first of these is a certificate in general issues in cognitive science that can be tailored to the individual student's area of interest. The cognitive science curriculum for this certificate is designed to provide broad as well as in-depth training in the cognitive sciences. The second graduate certificate is in Human Language Technology (HLT) and is specifically designed to provide interested graduate students with a rich and broad background in computational tools for human language processing. These programs are administered by the Institute of Cognitive Science (ICS) of the University of Colorado Boulder. Graduate students in cognitive science are admitted to graduate programs in participating departments that have cognitive science faculty and must meet the requirements for admission and degree completion in their home department.

Students wishing to attain a degree or certificate in cognitive science must formally apply to the director of Academic Programs of ICS. To be admitted they must be a student affiliate of ICS, which requires being a graduate student in good standing in a member department, and they must be sponsored by an ICS faculty member. Students who enter the Graduate School without a master's degree may be admitted to the program upon completion of their first year of study; students with a master's degree may be admitted during their first year.

The degree and certificate programs in cognitive science require students to demonstrate acceptable performance in interdisciplinary course work and courses outside their home department. The courses must be offered by the departments of computer science; education; linguistics; philosophy; psychology; speech/language/hearing sciences; architecture, planning, and design; or another department in which there is an ICS faculty member. Details about requirements for the degree and certificate programs can be obtained through the Director of Academic Programs for ICS, or by contacting the ICS main office.

For further information contact the University of Colorado Boulder, Institute of Cognitive Science, 344 UCB, Boulder CO 80309-0344; **303-492-5063**.

# Distance Learning & Professional Development

## Center for Advanced Engineering and Technology Education (CAETE)

The Center for Advanced Engineering and Technology Education (CAETE) is the distance learning and professional studies arm of the College of Engineering and Applied Science. CAETE provides convenient and flexible education for working professionals. Courses are delivered in the campus classroom and via the Internet to students across the country and abroad.

Academic course sequences may lead to a graduate certificate or master's degree in the following areas:

### *Certificates*

- Computer and Network Security
- Embedded Systems (classroom only)
- Engineering Management
- Engineering Entrepreneurship
- Leadership and Ethical Decision Making
- Managing Applied Research in Technology
- Managing Research and Development
- Performance Excellence in Technology Management
- Power Electronics
- Project Management
- Quality Systems for Product and Process Engineering
- Six Sigma
- Software Engineering
- Technology Ventures and Product Management
- Wireless Networks and Technologies

### *Degrees*

- Aerospace Engineering, MS
- Computer Science, ME
- Electrical, Computer, and Energy Engineering, ME and MS
- Engineering Management, ME
- Telecommunications, ME and MS

# Hydrologic Sciences

The CU-Boulder Hydrologic Sciences Graduate Program focuses on quantitative studies of water in the environment including its role in geologic and biogeochemical processes, ecosystem functions, and global elemental cycling. The program is interdisciplinary and interdepartmental. It is intended for science and engineering graduate students, both currently enrolled and prospective. It allows students to obtain recognition for their accomplishments in hydrologic sciences and demonstrates the quantitative multidisciplinary education desired by many prospective employers.

Students can choose to enroll for a full Hydrologic Sciences PhD degree or obtain a hydrologic sciences graduate certificate while concurrently obtaining a master's or doctoral degree in an associated academic department. Prerequisites and course requirements are identical for the PhD degree and graduate certificate.

Students are members of the broader CU-Boulder Geophysical Sciences Program, which has two specialization options: solid-Earth geophysics and hydrologic sciences. All hydrologic sciences students are admitted through one of the participating departments: civil, environmental, and architectural engineering; ecology and evolutionary biology; environmental studies; geography; or geological sciences.

Students may apply for admission either concurrently with their application to one of the participating departments or after admission by a department. The program is designed to encourage students with a variety of undergraduate backgrounds to enter the field. Nevertheless, all students in the program must have a substantial background in math and physics, including fluid dynamics. At the time of acceptance, the student will be informed of any undergraduate deficiencies that they will need to address within the first year in the program.

Most hydrologic sciences students conduct research with participating departments, research institutes, and centers (e.g., INSTAAR), or partner government agency labs in the Boulder area (e.g., USGS and NOAA). Primary supervision of the student's research may be provided by any faculty member approved by the department.

Additional information is available at [hydrosciences.colorado.edu/about/index.php](http://hydrosciences.colorado.edu/about/index.php), or by contacting the Graduate Coordinator, Hydrologic Sciences Graduate Program, University of Colorado Boulder, 450 UCB, Boulder, CO 80309-0450, [hydrgrd@colorado.edu](mailto:hydrgrd@colorado.edu).

# Women and Gender Studies

## *Certificate Program*

### Women and Gender Studies Certificate

The graduate certificate in women and gender studies offers a graduate-level education in the systematic approach to the study of gender from an interdisciplinary perspective. It provides an intellectual context in which students study feminist theory and methodology at an advanced level. At the same time, the certificate program bridges the gap between discipline-centered studies and the interdisciplinary foundations of women and gender studies, thereby enhancing the student's ability to conduct gender-based research.

Students wishing to take part in the women and gender studies certificate program must be currently enrolled in a graduate disciplinary degree or professional degree program at CU-Boulder. Requirements for the certificate are 9 credit hours of course work in women and gender studies and one additional course equaling 3 credit hours to be approved by the women and gender studies graduate advisor, for a total of 12 credit hours. For details about the certificate program, visit [wgst.colorado.edu/graduate](http://wgst.colorado.edu/graduate).

# Museum and Field Studies

The interdisciplinary museum and field studies program leading to a master of science degree is administered by the University Museum, in conjunction with the departments of anthropology; history; art history; ecology and evolutionary biology; and geological sciences; as well as other departments. The program provides a strong background in a chosen field as well as theoretical and practical grounding in museology.

Internships are offered at a variety of museums in the region, including natural history, history, and art museums. Students completing the MS are trained as collection managers, curatorial assistants, registrars, museum educators, exhibit technicians, and administrators.

**Program Tracks.** Two tracks are available: a collection/field track and an administrative/public track.

- The **collection/field track** offers training for students interested in the curatorial and research aspects of museum work, such as floristic or faunistic studies of the past and present, material culture of the past and present, and biological inventory. The curriculum gives students academic training as well as experience in all areas of museum work. Field experience is offered through the curatorial and field practica.
- The **administrative/public track** offers education for students interested in the public aspects of the museum such as program development and evaluation, exhibition planning and design, education, and the organization and management of museums. The curriculum offers both academic training in a discipline and hands-on experience with all aspects of the public museum.

## Graduate Degree Program(s)

Master's Degree in Museum and Field Studies

**Admission.** Students must meet all university requirements for admission to graduate school and have a baccalaureate degree and at least a B (3.00) grade-point average in previous academic work. The baccalaureate degree should be in anthropology, biology, geology, geography, history (including archival studies), classics, fine arts, or education, although other majors will be considered. Acceptance to the program is decided by the admissions committee of the University Museum in consultation with the student's department. The student must be accepted by an advisor in his or her discipline.

**Requirements.** The degree in museum and field studies is a two-year program requiring a total of 32 credit hours. Students may choose either the thesis or nonthesis plan. Depending on the track and plan, students complete from 9 to 15 credit hours in a department and from 13 to 22 credit hours in museology courses. One hundred fifty work hours of internship are required. The thesis plan requires the completion and successful defense of a thesis; the nonthesis plan requires the completion of a paper or a project.

For current course information, consult the Museum section under the College of Arts and Sciences. For new course or admissions information, write the Museum and Field Studies Program, University Museum, University of Colorado Boulder, 218 UCB, Boulder, CO 80309-0218; call **303-492-5437**; e-mail [mfsinfo@colorado.edu](mailto:mfsinfo@colorado.edu); or visit [cumuseum.colorado.edu/MFS](http://cumuseum.colorado.edu/MFS).

## Certificate Program

### Museology Professional Certificate

The professional certificate in museology provides professional museum training for CU-Boulder graduate students and for museum professionals who seek to upgrade their skills and credentials. The museology certificate serves a range of disciplines in the arts and sciences, education, and engineering, as well as the Colorado museum community.

The curriculum for the professional certificate consists of the core museology sequence for the Museum and Field Studies degree program:

- MUSM 5011 Introduction to Museum Studies
- Three of the following five courses:
  - MUSM 5030 Museum Education
  - MUSM 5031 Exhibit Development
  - MUSM 5041 Museum Administration
  - MUSM 5051 Collections Management
  - MUSM 6110 Seminar in Museum Issues

This 12-credit curriculum is supplemented by a 75-hour internship (which may be waived for comparable professional experience).

# Journalism & Mass Communication Program

*Christopher Braider, director*

478 UCB • phone: 303-492-5007 • fax: 303-492-0969

website: [journalism.colorado.edu](http://journalism.colorado.edu)

THE JOURNALISM AND MASS COMMUNICATION PROGRAM (JMC) offers a next-generation media education that prepares its graduates to collaborate within the professional world, engage the public, and produce positive social change.

JMC uses innovative teaching technologies, empowering strategies for responsible democratic engagement, and an integrated curriculum to foster excellence among its students. Students are trained for successful careers in advertising, broadcast, print and online media, photojournalism, public relations, and media analysis.

By encouraging students to apply civic responsibility in their media work, the Journalism and Mass Communication Program seeks to empower audiences through honesty, integrity, and a commitment to social progress. Students learn the significance of their role as media professionals, gaining an appreciation of the profound interactions between mass communication and society in order to approach their work with respect, openness, and a broader cultural perspective. Included in a broad array of professional and conceptual courses are offerings in global media. A large percentage of the program's students study abroad.

JMC is also home to two internationally recognized centers: the Center for Media, Religion and Culture; and the Center for Environmental Journalism.

## Director's List

Students in the Journalism and Mass Communication Program who have completed at least 12 credit hours of CU-Boulder course work for a letter grade in any single semester with a term grade point average of 3.750 or better are included on the dean's list and receive a notation on their transcript and a letter from the director.

## Honors

Journalism and Mass Communication Program students may graduate with general honors and/or JMC honors. Students interested in general honors must consult the Honors Program office. JMC may award the bachelor's degree with honors to students who have a 3.500 cumulative GPA and a 3.500 GPA in journalism and mass communication courses, complete an independent study in journalism and mass communication involving scholarly research, and demonstrate a high degree of professional skill. Application for JMC honors must be made to the student's advisor the semester prior to the one in which the honors project would be done. Transfer students must complete at least 60 hours in residence. Complete information on honors requirements is available at the main office.

Students who achieve a 3.750 overall GPA will graduate with distinction. Students whose academic records rank in the upper 10 percent are eligible for election to Kappa Tau Alpha in recognition of outstanding scholastic achievement.

## School Awards and Scholarships

Alumni and friends of JMC have made it possible to provide more than three dozen annual scholarships and awards to officially admitted students in the Journalism and Mass Communication Program sequences. The deadline for application is February 20.

- A. Gayle Waldrop Award
- Arthur B. Levis Scholarship
- Barrie Hartman News Editorial Scholarship
- Boulder Press Club
- Bob and Gloria Palmer Scholarship
- Brian Hostetler Memorial Scholarship
- Chris M. & Chris J. Burns Memorial Scholarship
- Colorado Broadcasters Association
- Colorado Press Women Scholarship
- Courtney Erin Klee Memorial Scholarship
- Denver Woman's Press Club Scholarship
- Dan Creedon Sports Scholarship

# Academic Standards

## Scholastic Suspension

Journalism students, both majors and pre-majors, are subject to suspension if they do not maintain a cumulative university GPA of 2.250 and a cumulative journalism and mass communication GPA of 2.500.

Students whose GPAs fall below either of these levels are normally placed on probation for one semester, during which they have an opportunity to raise their averages to the required levels. Students whose averages continue below the required levels are subject to suspension from the Journalism and Mass Communication Program and will be notified in writing.

Scholastic records will be reviewed as soon as possible after each semester, and students will be informed in writing if they are to be placed on probation or suspension.

The normal period of suspension is two regular semesters (one academic year, excluding summer sessions). The period of suspension will be stated in the suspension notice to the student. A student suspended a second time will be reinstated only on the basis of unusual circumstances, which the student should state in a petition to the assistant dean of JMC.

## Academic Dishonesty

The Journalism and Mass Communication Program maintains the highest standards of intellectual honesty. Acts of academic dishonesty are referred to the Honor Council. The policies and procedures governing acts of academic dishonesty can be found on the Web at [www.colorado.edu/academics/honorcode](http://www.colorado.edu/academics/honorcode).

## Policy on Grade Appeals

The following shall be the official policy of the Journalism and Mass Communication Program regarding grade appeals.

When a student believes that a grade has been improperly assigned, and discussions between the instructor and the student have not led to any resolution of the problem, then:

1. The student shall have the option of making a formal written appeal to the assistant dean of JMC. The appeal must specify the remedy desired by the student, and it must be submitted within 45 days of the end of the academic term in which the course was taken.
2. The assistant dean will meet with the student and with the faculty member who taught the course. The instructor will be asked to submit a formal, written response to the student's written appeal. If the assistant dean is unable to broker a solution mutually acceptable to both student and instructor, then:
  - a. The director shall appoint an ad hoc Student Ethics committee, which will review the dispute.

> [Faculty: Journalism & Mass Communication Program](#)

> [Law](#)

> [Music](#)

> [Other Academic Programs](#)

The committee shall consist of two impartial faculty members competent in the subject matter of the course in question. The assistant dean will chair the committee and provide the committee with the student's written appeal and the written response from the faculty member.

3. Within 45 days, the committee will submit a report and recommendation to the director, and the director will recommend to the instructor either 1) that the originally assigned grade stand; or 2) that a new grade be assigned.
4. In cases where a change of grade is recommended and the instructor does not wish to accept the recommendation of his/her colleagues, the director shall make the final decision.

# Admission & Enrollment Policies

## On This Page:

- [Requirements for Admission](#)
- [Withdrawal](#)
- [Double-Degree Programs](#)
- [Attendance Regulations](#)
- [Residence Requirement](#)
- [Advising](#)
- [Credit Policies](#)
- [Senior Requirement](#)
- [Requirements for Graduation](#)

## Requirements for Admission

Students will apply to Journalism and Mass Communication in one of five sequences or to Journalism and Mass Communication open option. Students who are not eligible for admission directly into the major or journalism open option will be placed in either Journalism and Mass Communication pre-journalism or College of Arts and Sciences open option

### *Prejournalism and Mass Communication*

Students in prejournalism and mass communication students are enrolled in JMC but must apply to one of the five sequences through a competitive application/admit process during their second semester of freshman year or their sophomore year. They must have completed or be working toward completing 30 semester hours with a GPA of at least 2.250, based on a minimum of 12 credit hours. These students should consult with advisors in the school.

Before they can apply for admission to the sequences, prejournalism and mass communication majors must make satisfactory progress in courses that meet the core areas of study requirements in the College of Arts and Sciences. Students must also complete or have in progress two journalism prerequisite classes (JOUR 1001 and either JOUR 2403 or 2601, depending on the sequence) with a GPA of at least 2.500. Students will also be expected to have been making progress toward their additional field of study

Students wishing to apply to the Journalism and Mass Communication Program must fill out an application packet by October 1 for spring admission and February 20 for fall admission. Students must apply to the specific sequence. Meeting these minimum requirements does not guarantee a student admission to JMC. A student will be permitted to apply to the JMC program a maximum of three times.

### *Transfer Students*

Students applying to transfer into the Journalism and Mass Communication Program from another institution must have 30 semester hours of college credit and must have completed the equivalent of the two introductory courses in journalism with a GPA of at least 3.000, both overall and in journalism courses, before they apply. Students without 30 hours of credit should apply to the JMC's prejournalism major. See the Undergraduate Admission section of the catalog for [transfer student admission standards](#).

---

## Attendance Regulations

Students are expected to attend classes regularly and to comply with the attendance regulations specified by their instructors at the beginning of each semester. A student who does not attend any of the first week's sessions of a class during a term may be dropped from the class.

## Credit Policies

### *Pass/Fail*

In addition to the university's general policies, majors in the Journalism and Mass Communication Program may not take any MAPS, arts and sciences core requirements, certificate or minor courses, business, additional field of study, or journalism and mass communication courses *pass/fail*, but any other course may be taken *pass/fail*. Up to 6 hours may be taken *pass/fail*, except for transfer students, for whom the limit is one hour in every eight attempted at the University of Colorado. Only 6 hours of *pass/fail* may be taken in any one semester.

### *Transfer Credits*

Credit in subjects transferred from other institutions to the University of Colorado is limited to the amount of credit given for similar work at the University of Colorado. Transfer credits in journalism and mass communication courses are limited to 12 semester credits from four-year institutions and 6 semester credits from two-year institutions. All transfer credit is subject to approval of the assistant dean of JMC. For additional information on transfer of credit policies, please see the Transfer of College-Level Credit section.

## Residence Requirement

A candidate for a degree from the Journalism and Mass Communication Program must earn the last 30 hours in residence at the University of Colorado. This may include courses taken on the Boulder, Denver, or Colorado Springs campus.

## Senior Requirement

Seniors must file to graduate with both a written form and an online form by October 15 for May and August graduation and March 1 for December graduation. Graduation packets are available at the Journalism and Mass Communication Program office. These students must also meet with the assistant dean or the coordinator of student services the semester prior to graduation to complete the graduation check-out form.

## Withdrawal

Students may withdraw at any time prior to the start of the final examination period. Students are encouraged to participate in the Stay Connected program through the Registrar's office when their withdrawal from the university is temporary.

## Advising

Majors and pre-majors are encouraged to consult an advisor each registration period. Advising is available from faculty and staff throughout the academic year, and major advising sheets are provided for each sequence. However, students are ultimately responsible for fulfilling all degree requirements.

## Requirements for Graduation

A total of 120 credit hours with a minimum of 28 hours in journalism and 80 nonjournalism hours, which includes the additional field of study, is required for graduation. Sixty-five of the 80 nonjournalism hours must be in arts and sciences course work, which may also include all the arts and sciences core except the upper-division written core. Forty-five of the 120 credit hours must be upper-division.

## Double-Degree Programs

Students may complete requirements in two fields and receive two degrees from the university. Such double-degree programs are available combining journalism and mass communication with business, music, or disciplines in the College of Arts and Sciences. The double degree between the Journalism and Mass Communication Program and the College of Arts and Sciences requires 145 hours. All other double degrees require 150 hours. Students must make application for a double-degree program in both JMC and the Leeds School of Business, the College of Arts and Sciences, or the College of Music. Any other combined program must be arranged by consulting both programs.

# Overview of the JMC Program

## On This Page:

- [Diversity](#)
- [Accreditation](#)
- [Careers](#)
- [Media Opportunities](#)
- [Student Activities](#)
- [Centers](#)
- [Facilities and Equipment](#)
- [Internships](#)
- [Study Abroad Programs](#)

## Diversity

JMC is actively committed to helping media organizations reflect the diversity of the communities they serve. It does this through focused recruitment and retention efforts aimed at preparing underrepresented students with the skills and support to excel as media professionals.

## Media Opportunities

JMC takes full advantage of its proximity to Denver, a major media market. Distinguished media professionals regularly serve as adjunct faculty. Hundreds of Denver and Boulder media organizations provide wide-ranging internship and career opportunities. Students consistently are offered highly competitive internships at leading Denver television and radio stations, newspapers, advertising agencies, public relations firms, and government, nonprofit, and corporate public information offices. Competitive internships are available locally and nationally to students at award-winning newspapers, magazines, advertising and public relations firms, government and social service agencies, radio and television stations, cable television systems, video production houses, online media, and other operations, including *USA TODAY*, *The Wall Street Journal*, *The Washington Post*, *National Geographic*, *Sports Illustrated*, *Newsweek*, ABC, MTV, NewLine Cinema, National Public Radio, Leo Burnett, TBWA\Chiat\Day, CBS, NBC, CNN, Bloomberg, C-SPAN, and Discovery Channel.

## Facilities and Equipment

Technology is changing the way information is delivered, and the Journalism and Mass Communication Program is at the forefront of this shift, incorporating new technologies into its curriculum to make newsgathering, broadcasting, public relations, and advertising more accessible to audiences. Students use technology to create new media possibilities, renewing audience trust by collaborating with them to communicate important information. All lab courses—reporting, editing, advertising, public relations, radio, television, new media, and photojournalism—contain no more than 20 students. Broadcast students use a state-of-the-art digital broadcast studio in CU's ATLAS center with its 1,000-square-foot studio furnished with the latest equipment.

## Accreditation

The Journalism and Mass Communication Program is accredited by the Accrediting Council on

> [Other Academic Programs](#)

Education for Journalism and Mass Communications. It is a fundamental principal of the ACEJMC that education for journalism be broadly based. Undergraduate students take about two-thirds of their college course work outside of the school and approximately one-third in the school.

## Student Activities

Many successful alumni proudly trace their careers back to student-run media and professional organizations here. *CU Sports Magazine* is a weekly televised program that follows collegiate athletics. KVCU, the university's 24-hour radio station, broadcasts to the Denver area. *Cultural Currents* is a newsletter that focuses on issues of diversity in media coverage and personnel. *NewsTeam Boulder* is a twice-weekly cable news show produced by students in the advanced broadcast classes. The *CU Independent* is a student-run online news source for the campus, at [www.cuindependent.com/](http://www.cuindependent.com/).

All news-editorial students complete internships at local daily newspapers and magazines as reporters, copy editors, online editors, or photographers. Students participate in chapters of the Advertising Club, Society of Professional Journalists, the Multi-ethnic Media Organization (MEMO), Association for Women in Communication, and Journalism Board, the student government organization.

## Internships

An ambitious year-round program helps students locate quality internships suited to their specific career goals. Many students complete two or more internships by graduation. Students perform internships at magazines, weekly and daily newspapers, advertising and public relations firms, businesses, and at government and nonprofit agencies. Others do broadcast and cable television internships in Denver. Opportunities for multimedia internships abound.

Students regularly obtain nationally competitive internships through the Politics Journalism Semester in Washington, D.C., the Dow Jones Newspaper Fund, American Society of Magazine Editors, the Advertising Club of New York, and the Chips Quinn Scholars.

In recent years students have served as interns *The Wall Street Journal*, *USA TODAY*, *Skiing*, *Backpacker*, *Sports Illustrated*, *The Today Show*, High Noon Entertainment, MTV, Fox Sports, NBC, ABC, CBS, CNN, The Children's Hospital, and IBM and top ad agencies throughout the United States. These include Crispin Porter + Bogusky, Goodby, Silverstein & Partners, DDB, BBDO, TBWA\Chiat\Day, Young & Rubicam, Saatchi & Saatchi, Leo Burnett, Publicis, and Arnold Worldwide.

Internships are also available in communities throughout the state, including Colorado's mountain resort areas.

## Careers

Graduates of the Journalism and Mass Communication Program hold key positions throughout the United States in advertising, news, entertainment, government, education, business, and law. Many participate in the alumni Career Network to help new graduates get started in their field by providing advice and contacts. The Student Resource Center fields local and national job opportunities through its contacts with employers and hosts on-campus interviews with a wide variety of employers. With the student Journalism Board, it sponsors major career and internship events each year. The center also assists students and graduates by offering individual counseling and a regular series of workshops on résumé preparation, interviewing, and career planning specifically for media careers. The center maintains a library of media directories and career planning resources and offers students extensive lists of websites related to media jobs.

## Centers

Through the **Center for Environmental Journalism**, JMC seeks to enrich and elevate the quality, range, and significance of media coverage of environmental issues. The CEJ is home to the prestigious Ted Scripps Fellowships in Environmental Journalism, which provide working journalists with a one-year opportunity to deepen their understanding of environmental science, policy, law, and journalism.

**The Resource Center for Media, Religion, and Culture** is a clearinghouse of information for those interested in exploring the intersection of religious and media-related practices in the everyday lives of contemporary adults and their families.

## Study Abroad Programs

Journalism and Mass Communication, in conjunction with the Office of International Education, encourages students to participate in the university's study abroad programs. Study abroad usually is undertaken during the junior year. Since an additional semester may be necessary to meet graduation requirements, prospective majors are urged to plan early and seek advising from the journalism and mass communication assistant dean or coordinator of student services. Programs are offered in more than 70 countries worldwide. Information and application forms are available at the Office of International Education, University of Colorado Boulder, 123 UCB, Boulder, CO 80309-0123, or [studyabroad.colorado.edu](http://studyabroad.colorado.edu).

# Journalism and Mass Communication

Course code for this program is JOUR.

## *Bachelor's Degree Program(s)*

### Undergraduate Study in Journalism and Mass Communication

The Journalism and Mass Communication Program (JMC) enrolls 650 students in five sequences. Students begin with a broad education in the liberal arts through the College of Arts and Sciences core requirements and finish with a robust additional field of study and superior professional preparation and media studies instruction. The field of study will be a concentration in content area outside of JMC such as political science, philosophy, history, economics, and so forth. It will consist of a minimum of 30-36 semester hours, depending on the field selected. Students should start their additional field of study during their freshman year.

In addition to the required courses, JMC offers all students a wide range of classes in many aspects of media practice including photojournalism, electronic and digital journalism, advertising creative development, consumer behavior, publication design, magazine article writing, public relations principles and projects, and communication law.

Media criticism and analysis are also broadly represented in the curriculum through courses such as media institutions and economics, media ethics, mass communication history, media culture and globalization, and special-topics offerings.

Students who intend to apply to JMC complete their freshman year of undergraduate work (a minimum of 30 semester hours) typically in JMC as prejournalism and mass communication majors.

Upon completion of their studies, students receive a bachelor of science degree in journalism from one of five sequences:

- Advertising
- Broadcast News
- Broadcast Production
- Media Studies
- News-Editorial

and an emphasis in an additional field of study.

## Sequences

### *Advertising*

The advertising major prepares students through a holistic approach that is rooted in theory and grounded in practice. Students examine approaches to creative thinking, branding, and consumer engagement and explore the rapidly evolving digital landscape and its impact on business and

## Colleges & Schools

culture. Then they draw on that base of knowledge to solve real-world problems for both commercial clients and non-profit organizations.

The major offers courses in such areas as creative concepts, art direction, branding, media, and consumer insight, and students regularly intern at Colorado agencies and global agencies such as Ogilvy & Mather, JWT, and BBDO. The program's focus, however, is not on technical skills but on ideas and creative problem solving in the broadest sense. That is why graduates have been able to launch successful careers in everything from advertising and arts management to health policy and law. Those choosing to pursue advertising careers have taken positions at a variety of Colorado firms and at such national agencies as Goodby, Silverstein & Partners, Wieden & Kennedy, BBH, Crispin, Porter + Bogusky, Leo Burnett, and BBDO.

The advertising program was named one of the country's "renowned advertising programs" by the American Association of Advertising Agencies. Students in the creative track have also consistently taken home more awards than those at any other four-year university in the international One Show College Competition, the premier creative competition sponsored by New York's One Club.

### **Course Requirements for Advertising Majors**

A total of 120 credit hours with a minimum of 28 hours in journalism and 80 nonjournalism hours are required for graduation. Sixty-five of the 80 nonjournalism hours must be in arts and sciences course work. Forty-five of the 120 credit hours must be upper-division. Within the 80 credit hours of nonjournalism course work, 30-36 credit hours must be in the additional field of study. The last 30 hours toward the degree must be taken after admission to the school.

#### **Journalism Core Requirements (12 hours)**

- JOUR 1001 Contemporary Mass Media—3
- JOUR 2403 Principles of Advertising—3
- JOUR 4651 Mass Communication Law (junior standing prerequisite)—3
- One upper-division conceptual course—3

#### **Advertising Requirements (16 hours)**

- MKTG 3250 Buyer Behavior—3

#### **Additional Field of Study (30-36)**

### *Broadcast News*

The broadcast news sequence prepares students for careers as news producers, reporters, photographers, editors, and writers for radio and television news organizations and cable TV

---

systems. The curriculum covers several aspects of broadcast journalism, including broadcast news writing, videography and editing, television reporting, and producing and mass communication law. Students produce and anchor live newscasts twice a week and have won regional Emmys for their work. Many students intern at major market network affiliates. Students regularly win nationally competitive internships, and some have recently interned at ABC, CBS, CNBC, CNN, Fox Sports, MTV, NBC, MSNBC, PBS, and for *Inside Edition* and Bloomberg.

### **Course Requirements for Broadcast News Majors**

A total of 120 credit hours with a minimum of 28 hours in journalism and 80 nonjournalism hours are required for graduation. Sixty-five of the 80 nonjournalism hours must be in arts and sciences course work. Forty-five of the 120 credit hours must be upper-division. Within the 80 credit hours of nonjournalism course work, 30-36 credit hours must be in the additional field of study. The last 30 hours toward the degree must be taken after admission to the school.

#### **Journalism Core Requirements (12 hours)**

#### **Additional Field of Study (30-36)**

### *Broadcast Production*

The broadcast production sequence prepares students for production careers in radio, television, cable, private industry, and independent firms, including positions in programming, advertising, promotion, and management. The curriculum includes broadcast news writing, broadcast production principles, mass communication law, and advanced television production. Students direct and handle production duties for a live newscast twice a week and broadcast a weekly sports magazine. Many intern at Denver network affiliates and production facilities, including those of local professional sports teams. Students cover many collegiate sporting events on campus, where they produce, direct, and host programs, for which they have won numerous local and regional Emmy awards. Students intern at national news and entertainment organizations including Warren Miller Entertainment in Boulder, High Noon Entertainment in Denver, ESPN, Fox Sports, MTV, Sony Pictures Television, and *Entertainment Tonight*.

### **Course Requirements for Broadcast Production Majors**

A total of 120 credit hours with a minimum of 28 hours in journalism and 80 nonjournalism hours are required for graduation. Sixty-five of the 80 nonjournalism hours must be in arts and sciences course work. Forty-five of the 120 credit hours must be upper-division. Within the 80 credit hours of nonjournalism course work, 30-36 credit hours must be in the additional field of study. The last 30 hours toward the degree must be taken after admission to the school.

### **Journalism Core Requirements (12 hours)**

- JOUR 1001-3 Contemporary Mass Media—3
- JOUR 2601-3 Principles of Journalism—3
- JOUR 4651-3 Mass Communication Law (junior standing)—3
- One upper-division conceptual course—3

### **Broadcast Production Requirements (12 hours)**

- JOUR 3604 Radio and Television News (JOUR 2601, junior standing prerequisites)—3
- JOUR 3644 Principles of Production (JOUR 2601, junior standing prerequisites)—3
- JOUR 3674 TV Production 2 (JOUR 3644 prerequisite)—3
- Plus an additional upper-division conceptual course—3

### **Journalism Electives and Internships (4–16 hours)**

- JOUR 4931 Internship (JOUR 3644 prerequisite)—1-3

### **Additional Field of Study (30-36)**

## *Media Studies*

The media studies major prepares students for careers as analysts, evaluators, and producers of media messages and policies in government and private industry and for graduate education in the social sciences, humanities, and law. The curriculum covers courses in media, history, law, policy, institutions, industries, and culture. Students may gain practical experience by taking media practice courses and at campus media such as KVCU-AM, the *CU Sports Magazine* weekly television broadcast, as well as through internships. In recent years, media studies majors have interned at the Discovery Channel, Bravo, *Late Night with Conan O'Brien*, *The Financial Times*, Rocky Mountain Planned Parenthood, Kenney Marketing and Advertising, Ogilvy Public Relations Worldwide, *Aspen Magazine*, Boulder County AIDS Project, and KCNC-TV Community Affairs.

### **Course Requirements for Media Studies**

A total of 120 credit hours with a minimum of 30 hours in journalism and 80 nonjournalism hours are required for graduation. Sixty-five of the 80 nonjournalism hours must be in arts and sciences course work. Forty-five of the 120 credit hours must be upper-division. Within the 80 credit hours of nonjournalism course work, 30-36 credit hours must be in the additional field of study. The last 30 hours toward the degree must be taken after admission to the school.

### **Journalism Core Requirements (12 hours)**

- JOUR 1001 Contemporary Mass Media—3
- JOUR 2403 Principles of Advertising or 2601 Principles of Journalism—3
- JOUR 4651 Media Communication Law—3
- One upper-division conceptual course—3

### **Media Studies Core Requirements (6 hours)**

- JOUR 4301 Media Ethics—3
- JOUR 4321 Media Institutions and Economics—3
- Media Theory Requirements (6–9 hours)
- JOUR 2403 Principles of Advertising—3
- JOUR 3771 Mass Media History—3

- JOUR 4201 International Mass Communication—3
- JOUR 4331 Women and Popular Culture—3
- JOUR 4453 Advertising and Society—3
- JOUR 4711 Mass Communication and Culture—3
- JOUR 4874 The Meaning of IT (Information Technology)—3
- JOUR 4871 Special Topics (conceptual only)—3

### **Media Practice (0–3 hours)**

Students are strongly encouraged to take ONE of the following:

- JOUR 3102 Press Photography—3
- JOUR 3453-3 Advertising Copy and Layout (JOUR 2403 prerequisite and instructor permission)—3
- JOUR 3473 Advertising Research (JOUR 2403 prerequisite and instructor permission)—3
- JOUR 3614 Radio Programming and Production—3
- JOUR 4102 Advanced Photography (JOUR 3102 prerequisite)—3
- JOUR 4272 Public Relations—3
- JOUR 4282 Public Relations Programs (JOUR 4272 prerequisite)—3
- JOUR 4562 Electronic Journalism—3
- JOUR 4802 Editorial and Opinion Writing (instructor permission prerequisite)—3
- JOUR 4802 Magazine Writing (instructor permission prerequisite)—3
- JOUR 4831 Publication Design and Production—3
- JOUR 4872 Digital Newsroom—3
- JOUR 4873 Motion Design (instructor permission prerequisite)—3
- JOUR 4873 Experience Design Workshop (instructor permission prerequisite)—3

### **Journalism Electives and Internships (1–13 hours)**

Any JOUR course, including those listed above under Media Theory and Media Practice will fulfill the elective category. Media Studies majors who wish to gain practical experience are also strongly encouraged to do an internship (JOUR 4931, 1-3 hours) and/or to work for a semester or more for one of the campus media: *CUIdependent* (instructor permission prerequisite); KVCU radio; *Sports Mag*; or *Cultural Currents*. For internships offered through news-editorial, broadcast, or advertising, students will need to take additional prerequisites (see major sheet for each sequence's requirements).

### **Additional Field of Study (30-36)**

#### *News-Editorial*

The news-editorial major prepares students for careers as reporters, editors, and photographers for newspapers, websites, news services, magazines, trade and technical publications, company publications, the government, and public relations firms. Beyond required courses in the principles of journalism, reporting, editing, and media law, students may choose electives ranging from photography and magazine writing to the digital newsroom and legislative reporting. Photo students have repeatedly placed nationally in the Hearst Journalism Awards Program. News-editorial students regularly obtain internships through national programs including the Dow Jones Newspaper Fund, the Politics & Journalism Semester in Washington, D.C., the Scripps Howard Foundation, and the Chips Quinn Scholars minority internship program. Others recently interned at The Associated Press, *USA TODAY*, *Huffington Post*, *Smithsonian Magazine*, *MLB.com*, *People* magazine, *Rolling Stone*, *The New York Times*, *The Wall Street Journal*, *National Geographic*, and *Sports Illustrated*. Students

intern year-round at Boulder outdoor recreation and healthy lifestyle magazines including *SKI*, *Skiing*, *Freeskier*, *Backpacker*, *VeloNews*, *Climbing*, and *Women's Adventure*.

## Course Requirements for News-Editorial Majors

A total of 120 credit hours with a minimum of 28 hours in journalism and 80 nonjournalism hours are required for graduation. Sixty-five of the 80 nonjournalism hours must be in arts and sciences course work. Forty-five of the 120 credit hours must be upper-division. Within the 80 credit hours of nonjournalism course work, 30-36 credit hours must be in the additional field of study. The last 30 hours toward the degree must be taken after admission to the school.

### Journalism Core Requirements (12 hours)

- JOUR 1001 Contemporary Mass Media—3
- JOUR 2601 Principles of Journalism—3
- JOUR 4651 Mass Communication Law (junior standing)—3
- One upper-division conceptual course—3

### News-Editorial Requirements (12 hours)

- JOUR 3001 Public Affairs Reporting (JOUR 2601 prerequisite)—3
- JOUR 3552 News Editing (JOUR 3001 prerequisite)—3
- JOUR 4002 Reporting 2 (JOUR 3001 prerequisite)—3
- JOUR 4502 Reporting 3 (JOUR 3552, JOUR 4002 prerequisites)—3

### Journalism Electives and Internships (4–16 hours)

- JOUR 4931 Internship (JOUR 3001, JOUR 3552 prerequisites)—1-3

### Additional Field of Study (30-36)

## Graduate Degree Program(s)

### Master's Degrees in Journalism

More than 70 students are earning master of arts degrees with the Journalism and Mass Communication Program in two degree programs: newsgathering and mass communication research.

### Master's Degree in Newsgathering

The newsgathering option is designed for students with limited academic or professional experience in news reporting and writing. It prepares students to work in a wide variety of professional settings including newspapers and magazines, broadcast and cable media outlets, online publishing, and corporate communications. Students in the newsgathering program select an emphasis in print, broadcast, or a combination. Newsgathering students complete internships at radio, television, and award-winning daily newspapers along Colorado's Front Range. The program culminates with a professional project. Students complete a minimum of 36 graduate semester hours and should be able to finish the degree in two years

### Master's Degree in Mass Communication Research

The mass communication research option offers an opportunity for critical reflection on contemporary media structures, performance, policy, and practice. It provides graduate-level study in communication theory, research methods and relevant realms of culture, law, history, politics, and ethics. The research track is designed for students interested in an in-depth study of media or for those who wish to enhance an undergraduate or professional media background. The program is

especially recommended for students desiring to continue their studies toward a PhD and for professionals seeking to teach at the college level or develop an area of reporting specialization.

Total required hours: 33.

**Prerequisites:** None, unless students wish to update their knowledge in specific areas or lack background in the course of study they choose to pursue.

**Deadlines for Master's Programs:** The domestic application deadline is February 1. International applications must be submitted by December 1. Applications received after February 1 will be considered on a space-available basis.

## Doctoral Degree in Communication

The PhD in communication offered by the Journalism and Mass Communication Program is dedicated to interdisciplinary inquiry into the social, political, economic, and cultural dimensions of media, nationally and internationally, historically and in contemporary societies.

Because of the centrality of communication and media in social and individual life, media theory and research draw from a wide range of fields and disciplines, including political science, sociology, cultural studies, philosophy, history, linguistics, economics, anthropology, business, psychology, literature, law and public policy. The interdisciplinary nature of media studies is reflected in the research interests of the graduate faculty and in the curriculum, in which students take a significant portion of their course work outside JMC and receive training in both qualitative and quantitative research methods. In general, the curriculum within JMC focuses on the following areas: the range of theories, disciplines, and methodological approaches that have contributed centrally to the field of media studies; the institutional and cultural sources of meaning; the history and development of media industries and systems; and the relationship of media to other social institutions.

Doctoral students in the media studies program must take 42 hours of course work, pass the written and oral comprehensive examinations at the conclusion of course work, and prepare and defend a dissertation. The course work includes a two-semester Proseminar (6 hours), which is required of all first-year doctoral students in the program; 15–18 hours of electives within JMC; 12–15 hours of electives taken outside JMC; and 6 hours of methods (the qualitative and quantitative methods courses offered within JMC).

Applicants to the PhD program in media studies are expected to hold the master's degree or equivalent graduate work. In exceptional cases, applicants without a master's degree may be considered for admittance.

**Deadlines for Doctoral Programs:** The domestic application deadline is January 1. International applications must be submitted by December 1. Applications received by JMC after January 1 will not be considered.

## Financial Support for Graduate Study

**Master's Degree:** A few graduate assistantships are available. Applicants who wish to be considered should submit a resume and letter that includes detailed professional or academic qualifications by February 1 to the director of graduate studies at the School of Journalism and Mass Communication. Applicants are chosen based on experience and the specific skills needed for available assistantships each semester.

**Doctoral Degree:** Admitted PhD students are awarded graduate assistantships including a tuition waiver and stipend.

### *Certificate Program*

## The International Media Certificate

The International Media Certificate is designed for high-achieving majors in international affairs (IAFS) and journalism and mass communication (JOUR) at CU-Boulder. This certificate will open doors to international and world-area specializations for students in the Journalism and Mass Communication Program and will introduce international affairs students to careers in communication media. For more information, visit [www.colorado.edu/Journalism/globalmedia/imc/index.htm](http://www.colorado.edu/Journalism/globalmedia/imc/index.htm).

## Interdisciplinary Graduate Certificate Program in Environmental Policy

In collaboration with the university's Interdisciplinary Graduate Certificate Program in Environmental Policy, JMC offers students the opportunity to earn both the master's degree in journalism, with an emphasis in environmental journalism, and the Certificate in Environmental Policy. The time to complete the degree and the certificate is estimated to be about two years.

## School of Law

*Philip J. Weiser, dean*

401 UCB • phone: 303-492-8047 • fax: 303-492-1757

school website: [www.colorado.edu/law](http://www.colorado.edu/law)

THE UNIVERSITY OF COLORADO LAW SCHOOL, established in 1892, has a long and proud history as a top public law school. The first students of color entered in 1898. The school became a charter member of the Association of American Law Schools organized in 1901. The first woman graduated in 1908. And, the school has been on the American Bar Association's list of accredited law schools since its first publication in 1923.

Today, Colorado Law, housed in the beautiful new "green" Wolf Law Building with one of the largest law libraries in the country, is also one of the most technologically advanced law schools in the country. Most importantly, it provides one of the best comprehensive legal educations in the nation, featuring:

- 530 students, selected from the nation's statistically best applicants with diverse backgrounds and representing 100 undergraduate institutions
- A favorable faculty-student ratio (1:12.5) that produces class sizes that encourage discussion
- 60 highly published resident faculty dedicated to interacting with students inside and outside the classroom
- First-year students who are placed in small sections for more class participation opportunities and to build relationships with classmates and professors
- Full-time, three-year Juris Doctor degree, one-year Master of Law degree, eight dual degrees, four certificates, four centers, and three journals
- An Experiential Learning Program that integrates lawyering activities, including nine legal clinics, externships, public service pledge, and trial and court competitions
- Comprehensive program to prepare students for any career; a quarter of graduates obtain judicial clerkships
- Impressively high first-time bar passage rate, especially compared to the state average

## Law School Vision

A supportive and diverse community of scholars and students in a place that inspires vigorous pursuit of ideas, critical analysis, and civic engagement in order to advance the rule of law in an open,

sustainable society.

## *Our Mission*

- **Teaching:** To employ robust theoretical inquiry, doctrinal and policy analysis, and professional skills.
- **Scholarship:** To explore and discuss ideas, to develop and test new ideas and approaches, to challenge the status quo, and to convey the school's research and ideas to lawyers, academics, policymakers, and the world.
- **Public Service:** To instill in students an awareness of a lawyer's civic responsibilities and opportunities to serve and lead.

## Academics

Colorado Law's three-year, full-time Juris Doctor (JD) degree provides a strong, well-rounded legal education with a rich mixture of theory, policy, doctrinal analysis, and professional skills. Students have broad flexibility to meet their individual interests and needs.

### Areas of Academic Strength

**Environmental, Energy, and Natural Resources Law.** Ranked consistently among the very best in the country, environmental and natural resources law has been a key focus of the Colorado Law curriculum for more than half a century, and is one of the strongest and deepest programs of its kind.

**Technology, Entrepreneurial, and Intellectual Property Law.** Boulder is the heart of one of the nation's premier telecommunications and technology hubs, and boasts a vibrant entrepreneurial community, ranking it No. 1 by Federal Reserve Bank of Boston researchers as the highest performing small city for venture capital investment.

**American Indian Law.** With more than 30,000 American Indians living within a 30-mile radius of the CU-Boulder campus, Colorado Law is in the "Hub of Indian Country," which is why Boulder is home to the Native American Rights Fund.

**Juvenile and Family Law Program.** With U.S. state trial courts reporting nearly 5 million cases involving domestic relations, there is an increased demand for trained lawyers and advocates who have acquired an interdisciplinary specialization in resolving family issues.

### Academic Support

From the student's first day, Colorado Law invests in her or his academic success. Through the Rothgerber Academic Assistance Program, upper-division law students tutor first-year students in any of their courses, except Legal Writing and Advocacy. The program is open to all first year students, and more than 50 percent of the class participates in this free opportunity.

### Study Abroad and Summer Session

While Colorado Law offers exciting but limited summer courses, it offers a variety of legal study abroad opportunities in Europe, Russia, Israel, and Canada. Study abroad allows students to learn about other nations' system of laws, participate in international and comparative legal studies, and approach legal systems and subjects from a non-U.S. perspective. This is a great opportunity to study with law students from other countries in the areas of international business, comparative law, European Union law, and international law.

### Legal Research and Writing

Colorado Law's Legal Research and Writing Program ensures that its graduates are proficient in legal

# Experiential Learning

## On This Page:

- [Legal Clinics](#)
- [Public Service Pledge Program](#)
- [Trial Advocacy and Moot Court](#)
- [Externships](#)

Experiential education encompasses lawyering activities in which students receive experience outside the classroom—clinics, externships, appellate and trial competitions, and voluntary public service work. Colorado Law’s Experiential Learning Program gives greater coherence to our entire curriculum and builds linkages with faculty involved in experiential education and those involved in traditional classroom teaching.

## Legal Clinics

Colorado Law’s Clinical Education Program started in 1948 and now serves almost 900 clients each year. Clinics are courses that provide practical learning experiences for our students, much-needed assistance to those less fortunate in our community, and invaluable service to the public good. By handling actual cases, students make the transition from legal theory to legal practice, enabling them to take classroom knowledge and turn it into real-world understanding. Under the supervision of expert clinical faculty, student practitioners take primary responsibility for understanding the goals of their clients, and working to represent those clients’ interests persuasively and competently. Clinics are available to all interested students.

- American Indian Law Clinic
- Appellate Advocacy Clinic
- Civil Practice Clinic
- Criminal Defense Clinic
- Entrepreneurial Law Clinic
- Family Law Clinic
- Juvenile Law Clinic
- Natural Resources Litigation Clinic
- Technology Law and Policy Clinic

## Public Service Pledge Program

Colorado Law is a public institution with a public spirit. The faculty and the students have a passion and deep appreciation of a lawyer’s civic responsibilities to serve the underprivileged and the community. Students who complete a voluntary pledge of at least 50 hours of law-related public service work, not for credit or other compensation, receive recognition on their transcripts. Such service provides students with valuable skills and values, such as legal research and writing, client

interviewing, and legal argument development. Students can perform pro bono work for any government agency engaged in legal work (administrative agencies, public defenders, district attorney offices, and judiciary), nonprofit that provides legal services, public interest law firm, or private firm with pro bono projects.

## Trial Advocacy and Moot Court

Appellate advocacy, mock trials, and moot court competitions help to develop skills in appellate brief writing and oral argument, and gain valuable trial practice experience. Colorado Law teams have consistently been extremely competitive and participate in and host more competitions each year. Coaching and support come from an experienced group of faculty, fellow students, alumni who recently competed, and judges and lawyers in the community. Students may earn academic credit for their participation.

- Constance Baker Motley National Moot Court Competition
- Emory Civil Rights and Liberties Competition
- Hispanic National Bar Association Moot Court
- Jessup International Law Moot Court Competition
- Jim R. Carrigan Trial Advocacy Competition
- Mardi Gras National Moot Court Competition
- National Moot Court Competition

- Native American Law Students Association Moot Court Competition
- Pace National Environmental Law Moot Court Competition
- Philip C. Jessup International Law Moot Court Competition:
- The Rothgerber Moot Court Competition
- Saul Lefkowitz National Moot Court Competition

## Externships

Students may gain academic credit for performing substantive legal work with government agencies, public interest institutions, private non-profits, and other private-sector employers such as a law firms. Students develop professional lawyering skills, gain insight into various aspects of the legal system and profession, and cultivate a sense of professional responsibility. While uncompensated, students receive credit hours (1 credit hour per 50 hours of work) toward their degrees.

# Career Development

## On This Page:

- [Services and Programs](#)
- [Job Opportunities](#)
- [Employment during Law School](#)

Colorado Law prepares students for a wide variety of careers. The Office of Career Development offers students and alumni individualized career counseling and professional development advice to help them identify and achieve their career goals. The office has career counselors with JDs who have more than 30 years of law practice experience. It maintains state-of-the-art career development and job search resources and helps students prepare for and pursue job opportunities during and after law school.

## Services and Programs

- **Career Counseling:** Each first-year student meets with a career counselor who helps with résumés and job search action plans.
- **Employer Outreach:** Counselors conduct extensive employer outreach in- and out-of-state.
- **Career Fairs/Symposia:** The office organizes employer networking opportunities on and off campus.
- **On-Campus Interviews:** Each year, nearly 70 employers come on campus to interview students for summer clerkships, internships, and associate attorney positions with law firms and government agencies.
- **Résumé Collections:** Resumes from interested students are sent to in- and out-of-state employers.
- **Brown Bag Speaker Series:** Practicing attorneys from the local and national legal community are regularly invited to speak to students during weekly lunch-hour informational sessions about what it's like to work in a variety of legal areas.
- **Job Postings:** Through a secure web-based system, students and alumni can review current job listings and an online resources library.
- **Mock Interviews:** Counselors set up appointments with students for practice interviews with the counselors or with volunteer attorneys. Students receive tips and feedback to help them improve.
- **Referrals:** Counselors help students connect with alumni and other legal professionals as resources for information about a field or practice area of law in Colorado or any other part of the country or world.
- **Mentoring and Community Involvement:** The office regularly helps students get involved in the legal community by referring them to mentor programs (including the Student Alumni Mentoring Program), bar associations, Inns of Court, and other law-related organizations.

## Job Opportunities

Colorado Law helps students pursue numerous job opportunities and helps connect them to valuable part-time and permanent legal positions, including:

- **Externships** are for students working unpaid in the legal community for academic credit, under the supervision of a field and faculty supervisor.
- **Internships** are paid or voluntary student positions with law firms, corporations, government agencies, judges, and public interest organizations.
- **Honors programs** are prestigious programs for students and graduates to work within federal government agencies.
- **Judicial clerkships** are prestigious paid positions for new graduates working for judges in federal, state, and appellate trial courts.
- **Summer law clerks** are paid part-time or full-time for first- or second-year students in law firms and other organizations.
- **Fellowships** provide funding for law students and graduates to work with public service organizations or academic programs.

## Employment during Law School

The study of law is demanding and requires the highest level of concentration. Most students devote 50–70 hours a week to class time and study. Therefore, it is Colorado Law's policy that students may not accept employment during the critical first two semesters. After that, students may be employed for no more than 20 hours per week when enrolled in more than 12 credit hours, in accordance with ABA Rule 304(f).

## Research Centers

Colorado Law's centers have earned national prominence for their research, publications, and leading conferences that debate legal and policy issues, foster practical solutions and innovative ideas, facilitate networking, and produce scholarship. Students are an integral part of the centers. Students may work as volunteers, externs, or research assistants on research projects, reports, newsletters, and events. In addition, students will have unique access to national and local policymakers, researchers, scientists, entrepreneurs, and legal practitioners in many areas of the law.

### Byron R. White Center for the Study of American Constitutional Law

Named in honor of the retired Supreme Court Justice and CU alumnus, the center was founded in 1990 to enhance the study and teaching of Constitutional law and stimulate public debate and understanding of our Constitutional system. Each year, the center gathers politicians, academics, and practitioners for the Ira C. Rothgerber, Jr. Conference. Recent topics have included home rule, reapportioning Colorado, state initiatives, academic freedom, and conscience and the free exercise of religion.

### Center for Energy and Environmental Security

As a nonpartisan forum, this center develops innovative ideas dealing with energy and environmental security issues through interdisciplinary research and policy. It moves beyond research to create practical real-world strategies and solutions that address local, state, national, and international issues. Major projects include EnergyPledges (a global watchdog for international sustainable energy commitments), President's Climate Action Plan, Colorado Energy Profile, Energy Justice Fuel for Life addressing indoor pollution from burning biomass for cooking and heating and new technologies, and Capital Solutions for a Sustainable Future, which is an interactive legal information website to facilitate clean-energy technology exchange between the United States and India.

### Natural Resources Law Center

Founded in 1982, the center promotes intellectual discourse over critical natural resources law and policy problems to foster practical and effective solutions. Research projects bring an academic focus to real-life issues and typically lead to publications that inform and influence policy-makers to promote better decisions. Major projects include The Western Water Policy Program to assure adequate water supplies, The Red Lodge Clearinghouse website for information to solve natural resources law and policy problems, The Public Comment Project that has students draft comments and participate in public meetings and hearings, and Best Management Practices for Oil and Gas Surface Use.

# Entrepreneurship

The center is nationally recognized as a telecommunications law powerhouse. It hosts leading technology policy conferences with legal, technical, regulatory, and business experts to elevate the debate around technology policy issues, facilitate networking, and develop “human capital” in the Colorado technology community. Students assist on major research projects including the Software Regulation Clearing House and help organize 15–20 events a year on topics such as digital broadband migration, entrepreneurial law and startups, new technology, business plan competition, private equity, software patents, and regulatory law and economics.

# Wolf Law Building

The five-story Wolf Law Building was completed in 2006 and was only possible through the financing of alumni, friends, law firms, and 61 percent by students.

- Top “green” certification, from construction to operation, including 88 percent renewable energy and electricity, 40 percent water use reduction, and 59 percent regionally manufactured materials
- Technologically advanced wireless networking, video conferencing, videotaping capabilities for distance learning, and digital kiosks
- All classrooms have electrical outlets for each student and complete audio-visual equipment (LCD projectors, DVD, VHS, cable) with built-in touch-screen control systems
- Student commons with café and patio, study and interview rooms, individual lockers and mailboxes, law bookstore, and courtyard with barbeque
- Suites and offices for centers, clinics, student organizations, journals, and all faculty offices
- 250-seat main courtroom with judge’s chambers, 30-seat teaching courtroom with jury box and witness stand, and a mock trial practice room for competition and clinic training

The three-story William A. Wise Law Library is housed in the Wolf Law Building.

- Most comprehensive law library in the 12-state Rocky Mountain region, one of the largest in the country, serving as a selective federal government depository
- 40 instructional student lab computers, five group study rooms, 445 seats, distributed computing stations
- 25,000 visitors served per year
- 720,000 volumes and microform equivalents

# JD Admissions & Financial Aid

## On This Page:

- [Admission Standards](#)
- [Application Process](#)
- [International Students](#)
- [Transfer Students](#)
- [Visiting Students](#)
- [Financial Aid](#)
- [Scholarships, Fellowships, and Awards](#)
- [Family Educational Rights and Privacy Act](#)

## Admission Standards

Above all, Colorado Law values leadership, character, diversity, and commitment to service in its students. The small size of the Law School—about 170 in each entering class—and the large number of applicants require a very selective admissions process. Admissions decisions are based on many factors, including undergraduate grade point average (GPA) and the Law School Admissions Test (LSAT) score, and take into account other indicators of ability, motivation, and achievement as well. In the faculty's judgment, a diverse student body improves the educational experience of all students.

## Application Process

The **Early Decision** application process is for prospective law students who know that Colorado Law is the school they wish to attend. Candidates who apply under this option are expected to enroll at Colorado Law if offered admission. Early Decision applications are accepted starting October 1, and all materials must be received by November 15 for the application to be reviewed for early decision. Early Decision applicants will receive a decision in early January. Those students who are not admitted through this process will automatically be considered again as part of the regular admission process.

**Regular admission** applications with all required materials should be submitted starting October 1 and no later than March 15. Find complete application instructions at [www.lsac.org](http://www.lsac.org) and on the Colorado Law website. The Admissions Committee considers regular decision applications beginning in December. Applicants are notified by letter of decisions from mid-January until the class is filled in May. Admission from the waitlist, which is not ranked, can occur as late as July and the number of offers varies from year to year.

## International Students

International applicants have additional requirements as explained on the school's website, including transcripts showing completion of the equivalent of an American bachelor's degree, foreign degree verification, and transcript translation, if applicable. The TOEFL is required of all students whose native language is not English, as a thorough and excellent command of written and spoken English is crucial to success in law school. After admissions, international students must submit a financial affidavit stating that they have the financial resources to support themselves while attending school in

## Colleges & Schools

> [Other Academic Programs](#)

the United States, since the Colorado Law cannot offer loan assistance to international students.

## Transfer Students

Students who have completed at least one full year of study (approximately 30 semester credits) at a law school accredited by the American Bar Association may apply for fall transfer admission to Colorado Law. Applications for fall enrollment are accepted after May 1 and must be received by July 1. The number of transfer students admitted varies each year, and only those who have done very well in their law studies elsewhere have a substantial chance of admission.

## Visiting Students

Colorado Law admits some students who are receiving their law degree from another law school to study here for the fall or spring semester. Admission as a visiting student is available to applicants who have completed one or two years of high-quality work at another law school and have demonstrated a compelling need to attend Colorado Law. Financial aid for visiting students is usually handled by a consortium agreement between Colorado Law and the degree-granting institution.

## Financial Aid

All admission decisions are made without regard to students' financial need. Every attempt is made to provide full financial assistance through federal and private educational loans, grants, work-study, and scholarships. Students applying for financial aid, private law scholarships, or grants based on financial need must complete the Free Application for Federal Student Aid (FAFSA, [www.fafsa.ed.gov](http://www.fafsa.ed.gov)) and submit it to the processor as soon as possible after January 1. The priority FAFSA filing deadline is April 1. Eligible students are awarded Federal Direct Stafford/Ford Loans up to a maximum of \$20,500 per year. Graduate PLUS loans are available to students when financial need exceeds Stafford loan limits. Graduate PLUS loans are federally guaranteed, but unlike Stafford loans, they have good credit requirements for borrowers. Private alternative law loan programs have interest rates and fees that vary according to the lender, the credit rating of the student, and whether there is a co-signer. Both loan fees and interest rates may be higher than those of the Stafford Direct loans and there is no cap in interest rates.

## Scholarships, Fellowships, and Awards

A number of scholarships, fellowships, and awards are given annually on a competitive basis for academic and financial considerations. All admitted first-year students are considered for scholarships, as recipients are selected by the Admissions and Financial Aid Committee after an offer of admission has been made. It is possible for scholarships to be awarded through August. Colorado Law also offers scholarship money to second-year and third-year students each spring. These scholarships are awarded based on academic performance and other criteria, such as economic need and demonstration of assistance in advancing the diversity of the student body.

## Family Educational Rights and Privacy Act

The Family Educational Rights and Privacy Act (FERPA) affords certain rights with respect to a student's education records. Copies of the policy are available in the Wise Law Library and the Rules of the Law School on the website.

# Student Life

## On This Page:

- [Commitment to Diversity](#)
- [Honor System](#)
- [Journals](#)
- [Student Organizations](#)

Students who choose the University of Colorado Law School generally seek the very best all-around legal education combined with a great location, a supportive community, top specialties, interdisciplinary study, dedicated faculty, a public service tradition, and so much more. Colorado Law is distinguished by the extraordinary quality of its students. As a competitively selective school, its students rank in the top tier, represent a rich blend of geographic and ethnic backgrounds, and bring experiences of leadership, career achievement, and community service. Although competitiveness among students with such elite qualifications is typical, our students have a proud history of putting collegiality first.

## Commitment to Diversity

Colorado Law is proud to have been one of the earliest law schools in the nation to graduate lawyers of color. The first students of color entered the University of Colorado Law School in 1898 and the first woman graduated in 1908. Colorado Law's commitment to diversity is evident throughout the Law School. We seek students with not only the academic credentials to excel in a rigorous legal education program, but also a desire to join a diverse community of future lawyers committed to the service of others. Student organizations offer support and networking opportunities. For first-year students, the Office of Career Development developed a diversity mentor program and supports the Colorado Pledge to Diversity Summer Clerkship Program for summer associate positions.

## Journals

Colorado Law is home to three nationally respected student-led law journals. These journals provide legal research, writing, editorial, and publishing experience to competitively chosen second- and third-year law students, with a select number of third-year students serving as prestigious Editorial Board members. Subscribers include government agencies, judicial courts, law school and government libraries, judges, attorneys, faculty, and alumni.

- *University of Colorado Law Review* (founded in 1928)
- *Colorado Journal of International Environmental Law and Policy*
- *Journal on Telecommunications & High Technology Law*

## Student Organizations

Colorado Law's student organizations reflect the diverse interests and concerns of its active student body. Students increase their knowledge in specific areas, gain leadership experience, and work

## Honor System

Members of the legal profession are held to the highest standards of ethical and professional conduct, and Law School faculty and students are expected to maintain the same level of professional competence and integrity in their work. The Colorado Law School Honor Code, subscribed to by all students, is a system of rules administered by student officers and demands the highest ethical conduct. Law students have considerable individual freedom and responsibilities, such as being able to take unproctored exams.

# Law

The course code for this school is LAWS.

## Graduate Degree Program(s)

### Master of Laws (LLM)

Colorado Law offers one-year, full-time LLM degrees in three specialty areas:

- Entrepreneurial Law
- Information Technology and Intellectual Property Law
- Natural Resources Law

### Juris Doctor of Laws (JD)

#### First Year

First-year courses lay the foundation and all JD candidates take these courses to learn to “think like a lawyer.” Common law courses taught in the Socratic Method allow students to develop legal reasoning and critical thinking skills. All first-year students are assigned to a small cohort to help build strong relationships and study groups with classmates.

#### Fall Semester

- **Civil Procedure:** Rules governing pleading, joinder of parties, discovery, jurisdiction of courts, right to jury trial, appeals, and res judicata and collateral estoppel, with emphasis on the Federal and State Rules of Civil Procedure
- **Contracts:** Contract liability, offer and acceptance, consideration, frauds statute, contract remedies, the parol evidence rule, contract performance, conditions, changed circumstances
- **Legal Writing:** Legal analysis and document preparation, objective legal analysis techniques, legal rule synthesis, authority use to explain rules, and rule application to case facts
- **Legislation and Regulation:** Statutory interpretation, architecture of the administrative state, and interpretation and review of regulation.
- **Torts:** Nonconsensual allocation of losses for civil wrongs, focusing on negligence and strict liability

#### Spring Semester

- **Appellate Court Advocacy:** Appellate brief and document preparation, oral arguments before a three-judge mock court, techniques of persuading a court to accept a client’s view of the law and facts, professional judgments within ethical boundaries, and lawyer credibility
- **Constitutional Law:** Constitutional structure, including judicial review, federalism, separation of powers, and constitutional rights of due process and equal protection
- **Criminal Law:** Statutory and common law of crimes and defenses, the procedures by which the law makes judgments as to criminality of conduct, constitutional limits
- **Property:** Personal property, estates and interests in land, landlord–tenant, basic land conveyancing, and private land use controls

## *Second and Third Years*

The elective program in the second and third years builds upon the foundation laid in the first-year curriculum. Students must take Evidence and Legal Ethics and Professionalism courses and a seminar course. Colorado Law encourages a balance between experiential learning and classroom studies, graded courses and non-graded courses, and study within and outside the law school.

### **Elective Courses**

#### ***Business***

- Accounting Issues for Lawyers
- Advanced Contracts: Commercial Transactions
- Agency, Partnership, and the LLC
- Antitrust
- Bankruptcy
- Business Planning
- Business Transactions
- Corporate Finance
- Corporations
- Creditors' Remedies and Debtors' Protection
- Deals
- Humanizing Contracts
- Government Regulation of Business
- Law Practice Management
- Mergers, Acquisitions, and Reorganizations
- Payment Systems
- Secured Transactions
- Securities Regulation
- Sports Law
- Venture Capital and Private Equity

#### ***Criminal***

- Capital Punishment in America
- Comparative Criminal Procedure
- Criminal Procedure: Investigative Phase
- Criminal Procedure: Adjudicative Process
- White Collar Crime

#### ***Family, Gender, and Health***

- Domestic Relations
- Domestic Violence
- Family Law
- Gender, Law, and Public Policy
- Health Law I: Finance, Administration and Organization of Health Care
- Health Law II: Medical Malpractice Litigation
- Juvenile Justice

- 
- Legal Rights of Children
  - Parent, Child, and State
  - Sexuality and the Law

### ***Government and Public Interest***

- Administrative Law
- Advanced Torts
- Civil Liberties Legislation
- Civil Rights Legislation
- Conflict of Laws
- Education Law
- Election Law
- Employment Discrimination
- Employment Law
- Federal Courts
- First Amendment
- Labor Law
- Lawyers for Social Change
- Legislation
- Local Government
- Poverty Law
- Race and American Law
- Remedies
- Supreme Court Decision Making

### ***Intellectual Property, Technology, and Telecommunications***

- Computer Crimes
- Copyright
- Introduction to Intellectual Property Law
- IP and Technology Contracting
- Patent Law
- Patent Litigation
- Privacy and Security in the Digital Age
- Quantitative Methods
- Standards and Standardization Wars
- Telecommunications Law and Policy
- Trademark and Unfair Competition

### ***International***

- Comparative Employment Law
- Comparative Law
- Immigration and Citizenship Law
- International Business Transactions
- International Criminal Law: Theory and Practice
- International Dispute Settlement

- 
- International Environmental Law
  - International Human Rights
  - International Law
  - International Legal Order: History and Foundations
  - Introduction to Islamic Law
  - Introduction to Jewish/Israeli Law
  - Refugee and Asylum Law

#### ***Jurisprudence and Perspective***

- Economic Analysis of Law
- Jurisprudence
- Law and the Biology of Human Nature

#### ***Litigation***

- Advanced Appellate Advocacy
- Complex Civil Litigation
- Jury Selection and History
- Litigation Drafting

#### ***Natural Resources and the Environment***

- American Indian Law I
- American Indian Law II
- Climate Change Law and Policy
- Energy Insecurity and Sustainable Law
- Energy Law and Regulation
- Environmental Enforcement
- Environmental Law
- Environmental Litigation
- Foundations of Natural Resources Law and Policy
- Jurisdiction in Indian Country
- Land Conservation Law
- Mining and Energy Law
- Oil and Gas
- Public Land Law
- Toxic and Hazardous Waste
- Water Law
- Wildlife and the Law

#### ***Practice—Clinical***

- American Indian Law Clinic
- Appellate Advocacy Clinic
- Civil Practice Clinic
- Criminal Defense Clinic
- Entrepreneurial Law Clinic
- Extern Program

- 
- Family Law Clinic
  - Juvenile Law Clinic
  - Natural Resources Litigation Clinic
  - Technology Law and Policy Clinic

***Practice—Simulation***

- Advanced Trial Advocacy
- Alternative Dispute Resolution
- Appellate Advocacy Competition
- Arbitration
- International Moot Court Competition
- Legal Negotiation
- Mediation
- Motions Advocacy
- Rothgerber Moot Court Competition
- Trial Advocacy
- Trial Competition

***Property***

- Construction Law
- Land Conservation Law
- Land Use Planning
- Real Estate Planning
- Real Estate Transactions
- Real Property Security
- Wills and Trusts

***Research and Writing***

- Advanced Legal Research
- Advanced Legal Writing
- Creative Writing for Lawyers
- Independent Legal Research: Journal of International Environmental Law and Policy
- Independent Legal Research: Journal on Telecommunications & High Technology Law
- Independent Legal Research: Law Review
- Judicial Opinion Writing

***Taxation***

- Corporate Taxation
- Estate Planning
- Federal Estate and Gift Tax
- Federal Tax Politics
- Income Taxation
- International Taxation
- Taxation of Conduit Entities

***Seminars***

- 
- Advanced American Indian Law
  - Advanced Constitutional Law Equality and Privacy
  - Advanced Constitutional Law, Theory, and Practice of Free Speech in the United States
  - Advanced Criminal Procedure
  - Advanced Natural Resources Law
  - Advanced Topics in Federalism
  - Advanced Topics in Health Law and Policy
  - Advanced Torts
  - Affordable Housing
  - Antidiscrimination and First Amendment
  - Bioethics and Law
  - Cities, Suburbs, and the Law
  - Civil Liberties Litigation
  - Class and Law
  - Comparative Constitutional Law
  - Comparative Public Health Law and Ethics
  - Computers and the Law
  - Constitutional Foundations: Core Ideas
  - Constitutional Theory
  - Consumer Empowerment
  - Counseling Families in Business
  - Gender Law
  - Higher Education and the Law
  - Information Privacy
  - International Crimes and Punishment
  - Jurisprudence
  - Law and Economics of Utility Regulation
  - Law and Literature
  - Media, Popular Culture, and Law
  - Modern Legal Theory
  - Oil and International Relations
  - Power, Ethics, and Professionalism
  - Public Health Law and Ethics
  - Securities Litigation and Enforcement
  - Separation of Powers
  - Tax Policy
  - Theory of Punishment

*Note: Not all courses are offered each semester. This is a composite list of the last three years of course offerings.*

## *Dual Degree Programs*

### Dual Degree Programs in Law

Colorado Law students take advantage of an array of rich opportunities for interdisciplinary study through other CU schools and colleges, in addition to the University of Alberta. The schools work in

cooperation to select courses for the programs that allow students to earn the dual degrees in less time than it takes to earn each degree separately. Students apply separately to and are admitted by the two schools under their respective admissions requirements. Only credits earned after law school enrollment count toward the JD degree, and the first year of the JD curriculum must be taken exclusively at Colorado Law.

- **Juris Doctor/Master of Business Administration (JD/MBA)** with CU-Boulder's Leeds School of Business
- **Juris Doctor/Master in Environmental Studies (JD/ENVS)** with CU-Boulder's Environmental Studies Program
- **Juris Doctor/Doctorate in Environmental Studies (JD/PhD)** with CU-Boulder's Environmental Studies Program
- **Juris Doctor/Doctor of Medicine (JD/MD)** with UC Denver's School of Medicine on the Anschutz Medical Campus in Aurora
- **Juris Doctor/Master of Public Administration (JD/MPA)** with UC Denver's School of Public Affairs
- **Juris Doctor/Master of Science, Telecommunications (JD/MST)** with CU-Boulder's Interdisciplinary Telecommunications Program
- **Juris Doctor/Master of Urban and Regional Planning (JD/MURP)** with CU-Boulder's College of Architecture and Planning
- **Juris Doctor/Bachelor of Laws (JD/LLB)** with the University of Alberta Faculty of Law, Canada

# College of Music

**Daniel P. Sher, dean**

301 UCB • phone: 303-492-6352 • fax: 303-492-5619

college website: [music.colorado.edu](http://music.colorado.edu)

THE COLLEGE OF MUSIC provides specialized training designed to prepare students for a variety of careers in music. The college offers three undergraduate degrees, two certificate programs, and four graduate degrees; numerous performance opportunities are also available.

Established by the Regents of the University of Colorado in 1920, the College of Music is a fully accredited member of the National Association of Schools of Music.

## Mission

The mission of the College of Music at CU-Boulder is to promote excellence in music through distinguished instruction in performance, composition, musicology, theory and teacher preparation, and to provide opportunities for performance, creative activities, research and scholarship, and teaching.

The college is dedicated to:

- providing music majors the opportunity to develop their knowledge, understanding, and ability in the various aspects of music;
- preparing students for careers as performers, composers, scholars, teachers, administrators, and other professionals in the field of music;
- broadening and deepening the knowledge and understanding of music through research, teaching, creative activities, and publication; and
- enriching the lives of students and faculty as well as the community, state, nation, and the world with a variety of performances and publications.

The College of Music is an academic community committed to maintaining a climate of mutual respect and collegiality showing appreciation for a diversity of musical cultures and individual backgrounds.

> [Faculty: Music](#)

> [Other Academic Programs](#)

---

The widely varied functions of music in the world today present many challenging and interesting opportunities for teachers, performers, creative artists, technicians, and commercial personnel. While these different pursuits require specialized emphases, the faculty of the College of Music recognize the musical and educational experiences that are common to all. Therefore, each curriculum of the College of Music is designed to present music as an integrated whole. Solo performance and technique, ensemble performance, historical and theoretical studies, concert and recital opportunities, and elective courses both inside and outside the college are intended to give students a balanced approach to musical understanding and musicianship.

The college maintains a ratio of approximately one faculty member for every 10 students. This enables students to benefit from dynamic, personal interaction with their professors. The college also offers students regular academic advising to ensure that they complete their degrees without unnecessary delay.

In addition to training in the various professions of music, the college provides general music studies and activities for the non-major; broad cultural programs (concerts, recitals, lectures) for the university and Boulder communities; favorable conditions for research in music; and service activities to the state and nation.

The degrees bachelor of arts in music, bachelor of music, and bachelor of music education are granted by the university, upon recommendation of the faculty of the College of Music, to those who have successfully completed prescribed requirements.

Students must complete graduation forms and schedule a final checkout appointment by December 15 for May/August graduation and by October 1 for December graduation.

## Undergraduate Education in Music

The undergraduate degrees in music emphasize knowledge and awareness of:

- solo performance and technique, including the various musical styles used in compositions for students' musical instruments or voice;
- each composition performed, notation and editorial signs used in the compositions performed, and repertoire for the students' performance medium;
- ensemble performance, including familiarity with major composers in the student's performance medium and the techniques necessary to blend a number of individual musicians into an ensemble;
- concert and recital opportunities, including literature composed for different performance forces;
- theoretical studies, including tonal harmony, counterpoint, voice-leading, and notation; formal principles and analytical techniques for tonal music; and instruments in score, including the concert pitch of transposing instruments and nomenclature used in scores; and
- historical studies, including representative works in the canon of musical literature from chant to the present, the general outlines of the history of music from the Middle Ages to the present, music in the United States, and musical cultures other than those of Europe.

In addition, students completing any of the degrees in music are expected to acquire the ability to:

- perform solo and ensemble repertoire demonstrating musical artistry, technical proficiency, and stylistic understanding;
- demonstrate an understanding of theoretical studies, including sight-reading and ear training; and
- demonstrate an understanding of historical studies including the analysis of stylistic periods and music of non-Western cultures.

# Graduate Degree in Music

All graduate degrees in music are granted by the Graduate School of the University of Colorado upon the recommendation of the faculty of the College of Music and approval by the administrative officers of the Graduate School. The information supplied here is supplemental to and must be read in conjunction with the information contained in the Graduate School section. Other information regarding rules applying to graduate degree students in music may be found online at [music.colorado.edu/students/graduate/degrees](http://music.colorado.edu/students/graduate/degrees).

## Major Fields & Degrees

**Undergraduate degrees** include the bachelor of music (BM), the bachelor of arts in music (BA), and the bachelor of music education (BME). Students may also elect to earn a certificate in jazz studies or music technology in conjunction with their degree. In addition to a substantial core of studies in music, the BA in music program allows a wide choice of study in areas outside of music. BM areas of concentration include: composition, musicology, performance, and jazz studies. The major emphasis areas in the BME program are: choral, choral-general, instrumental, and instrumental-general.

Incoming freshmen and transfer students in the College of Music are normally declared as music majors before or at the beginning of their first semester. There is no minor in music.

Qualified students may receive both the bachelor of music and bachelor of music education degrees by taking the required extra work (approximately 30 additional semester credit hours). Intent to be admitted to candidacy for both degrees should be indicated as soon as possible, preferably by the end of the sophomore year. Students may also pursue double degrees in music and an outside field such as engineering, business, etc. Questions may be directed to the associate dean for undergraduate studies, College of Music, **303-735-2283**, or [ugradmus@colorado.edu](mailto:ugradmus@colorado.edu).

**Graduate degrees** include the master of music (MM), the master of music education (MME), doctor of musical arts (DMA), and doctor of philosophy (PhD). Major fields in the master of music and doctor of musical arts degrees are conducting, composition, music theory (MM only), jazz studies, pedagogy, and performance. The master of music education degree is designed to provide advanced instruction for teachers in the elementary and secondary schools. The PhD is a research degree for the fields of musicology and music education.

Graduate degrees are offered through the Graduate School and additional information can be found in the Graduate School section as well as in the curricula listed for the college. Correspondence regarding details not included in this publication should be directed to the associate dean for graduate studies, **303-492-2207** or [gradmusic@colorado.edu](mailto:gradmusic@colorado.edu).

# Facilities

The College of Music has several beautiful performance halls, including the 2,000-seat **Macky Auditorium**, the 500-seat **Grusin Music Hall**, the 270-seat **Music Theatre**, and the 120-seat **Chamber Hall**. The college is located primarily in the Warner Imig Music Building, a large complex of practice rooms, faculty studios, offices, ensemble rehearsal areas, seminar facilities, and classrooms. An addition to the east side of the building features a 4,300 square foot rehearsal space with a 35-foot ceiling and acoustical draping. Additional rehearsal and classroom facilities are located in Macky.

The college's outstanding **Howard B. Waltz Music Library** is considered to be among the nation's most comprehensive. The library contains over 150,000 volumes, scores, recordings, and periodicals. Computerized facilities are provided for listening to recordings and work stations are available for computer-based reference searching. The Music Library also includes the **American Music Research Center**, a unique facility dedicated to the discovery of new information about American music. The center sponsors concerts and scholarly activities and serves as an archive for several extensive collections of American music.

The college also features extensive facilities for music technology and electronic music study. The **Computer-Assisted Music Laboratories** (I and II) are multi-purpose labs designed primarily for classroom instruction. They feature numerous workstations, each with a Musical Instrument Digital Interface, sampling keyboard, and a computer. The **CRUNCH lab** is a fully-featured electronic music project studio. This lab is optimized for computer music research (including live interactive performance systems), as well as sound recording and editing projects and audio/video production. The Class Piano laboratory is equipped with 12 digital pianos.

## Performances

Each year the College of Music presents over 400 concerts by students, faculty, and guests. In addition to individual musical pursuits, students at all levels have the opportunity to perform in a variety of outstanding ensembles including orchestras, choirs, bands, world music ensembles, chamber and early music groups, jazz ensembles and combos, opera productions, and musicals. Many of these groups have been invited to perform at prestigious national and international events. Recitals by students and faculty are supplemented by visits from world-class guest artists, all of which provide the Boulder community with the chance to hear some of the finest music being performed today. The vast majority of these excellent performances are free and open to the public. Other programs presented by CU Presents include: the Artist Series, CU Opera, Takács Encore Series, and the Holiday Festival. For a schedule of all College of Music performances, call **303-492-8008** or visit [cupresents.org](http://cupresents.org).

# Student Organizations

The student body of the College of Music has its own government, represented by the College of Music Student Government and the Graduate Music Student Council. Honorary music fraternities are Sigma Alpha Iota and Kappa Kappa Psi. Pi Kappa Lambda, the national scholastic honorary music fraternity, is also an active organization on campus. Music education majors are eligible for membership in student chapters of the National Association for Music Education (MENC), the American Choral Directors Association, and the American String Teachers Association.

# Entrepreneurship Center

The Entrepreneurship Center for Music helps students think creatively about using their talents and interests in the music industry. The traditional job choices for music students—teaching and performing—are only two of the hundreds of employment options in the \$40 billion global music industry. The center helps students develop an entrepreneurial spirit through specialized courses, guest speakers, workshops, and individual appointments to discuss career options. The internship program provides valuable experience outside of the classroom in arts organizations around the country. More information about the center is available at [music.colorado.edu/departments/ecm](http://music.colorado.edu/departments/ecm).

# Academic Excellence

## Dean's Honor Roll

A full-time undergraduate student in the College of Music who has completed at least 24 credit hours of course work by the end of the spring semester on the Boulder campus (excluding continuing education), and who earned a semester grade point average of at least 3.700, will be included in the college dean's honor roll for that semester. Notation of the "Dean's Honor Roll" is also listed in the Honors Convocation Program.

## Honors at Graduation

Students achieving a cumulative GPA of 3.700–3.790 (honors), 3.800–3.890 (high honors), and 3.900–4.000 (highest honors) are recognized at commencement.

## Scholarships and Awards

A number of scholarships and awards are designed specifically for students in the College of Music (see below). Undergraduate music majors are eligible for scholarships or renewal of their scholarships as long as they make satisfactory musical progress in their major as determined by the faculty in jury exams and auditions, and maintain a minimum cumulative GPA of 3.000.

Graduate students must enroll as full-time students, maintaining a 3.000 GPA, and make adequate progress toward their degrees. The college offers approximately 70 graduate assistantships as well as graduate fellowships, and a variety of endowed scholarships for graduate students (included below.)

- Nancy and Ted Anderson Music Awards
- Beckie Reeder Arnold Piano Scholarship
- Joyce Mata Ashley Scholarship Fund in Music Education
- Asian Performing Arts of Colorado Sponsorship
- The Bagley Prize
- Frank W. Baird Trumpet Scholarship
- John W. (Jack) Bartram Memorial Scholarship
- Bettina Baruch Foundation Scholarship for Winds
- Virginia Blake Becker Flute Scholarship
- Darrell and Lauren Boyle Music Theatre Scholarship
- Dewitt and Billie Brennan Music Fund
- Charles Byers Choral Music Education Scholarship
- Rebecca Beardmore Chavez Scholarship Fund
- Herbert T. Clark Memorial Scholarship

- Paula Marie and H. Rolan Zick Endowment

# Academic Standards

## Academic Ethics

Students are expected to conduct themselves in accordance with the highest standards of honesty and integrity. Cheating, plagiarism, illegitimate possession and disposition of examinations, alteration, forgery, or falsification of official records, and similar acts or the attempt to engage in such acts are grounds for suspension or expulsion from the university.

In particular, students are advised that plagiarism consists of any act involving the offering of the work of someone else as their own. It is recommended that students consult with their instructors as to the proper preparation of reports, papers, etc., in order to avoid this and similar offenses. Students are expected to be acquainted with and abide by provisions of the University of Colorado Boulder Honor Code.

## Scholastic Requirements

To remain in good academic standing, a student must maintain at least a 2.000 cumulative grade point average (GPA) and make satisfactory progress toward the degree as defined by the College of Music and area faculty.

Academic probation is an official warning that a student's grades are unsatisfactory. Any undergraduate student who has a cumulative or semester grade point average below 2.000 is automatically placed on probation for the following three semesters. (Cumulative grade point average is calculated on grades earned at this university.) If a probationary student's grade point averages (semester and cumulative) at the end of any probationary semester and the cumulative probationary period are not 2.000 or above, automatic suspension results. Any undergraduate student who has a cumulative or semester grade point average below 1.000 also is automatically suspended without a probationary period.

While on suspension, students may not register for regular day classes during the fall or spring semester on any CU campus and are not considered eligible for graduation. To regain good academic standing, suspended students must earn a semester GPA of 2.000 or higher and raise their cumulative GPA to 2.000 or above during the following term by successfully completing at least 12 credits (with no withdrawals, no incomplete grades, and no courses taken *pass/fail*) through continuing education or summer session classes. The Division of Continuing Education and Professional Studies (303-492-5148) should be contacted for more information.

Courses taken at other campuses or institutions will not be used for purposes of reinstatement, but credits earned may be transferred according to normal procedures and policies after reinstatement and readmission. Suspended students who raise their cumulative GPA to 2.000 or above may then petition for readmission and receive a personal hearing before the associate dean. Suspended students who do not raise their cumulative GPA to 2.000 or above are dismissed from the college and university. Students who have been dismissed must reapply for admission to the university after being reinstated by the college.

> [Other Academic Programs](#)

Undergraduate music majors are eligible for scholarships or renewal of their scholarships as long as they make satisfactory progress in their major (as determined by the faculty), demonstrate satisfactory proficiency in jury exams and auditions, enroll in ensemble, and maintain a minimum cumulative GPA of 3.000. Students who have a cumulative GPA below 3.000 will be placed on scholarship probation for a maximum of two semesters (consecutive or cumulative), provided the GPA improves each semester. Students on scholarship probation who do not earn a cumulative GPA of 3.000 or higher by the end of the probationary period will have their scholarships revoked.

## Appeals

Students have the right to appeal decisions of academic dishonesty and to petition for exceptions to the academic policies stated in this catalog. Appeals should be directed to the Office of the Dean. College of Music policies are in addition to the campus policies.

- [Residence Requirement](#)
- [Student Work](#)
- [Stay Connected Program/Withdrawal](#)

## Admission Requirements

In addition to the entrance requirements of the university outlined in Undergraduate Admission in the General Information section, freshman and transfer students must meet College of Music entrance requirements. Successful College of Music applicants have extensive prior experience in music (including private study), the ability to read and sight-read music notation, an understanding of music fundamentals or basic music theory, and elementary piano skills. Students with appropriate skill in piano sight reading and keyboard harmony may be able to test out of all or part of the keyboard musicianship requirement included in their degree plan.

### *Auditions*

An audition is required for all prospective undergraduate music majors. Undergraduate auditions are held in Boulder on selected Saturdays in January and February. Alternate audition dates may also be scheduled if necessary. If travel distance is prohibitive, prospective students may substitute a high-quality recording. Applicants should identify themselves by name and list selections and titles at the beginning of the recording. In order for students to be fully considered for financial assistance, live auditions should be completed and recordings should be received by February 15. Students should prepare a 10–20 minute audition program in accordance with the audition requirements that are listed on the College of Music website: [music.colorado.edu/apply/undergraduate/audition-information](http://music.colorado.edu/apply/undergraduate/audition-information).

Contact the Undergraduate Office at **303-735-2283** or [ugradmus@colorado.edu](mailto:ugradmus@colorado.edu) for more information.

Admissions decisions for music education applicants are based on academic qualifications, audition results, and an interview conducted by two or more music education faculty members. Interviews address written and verbal communication skills, motivation and goals related to music teaching, prior music teaching experiences, and affective characteristics associated with effective music teachers. For information about music education interviews, contact Martina Miranda, music education chair, at **303-735-5498** or [martina.miranda@colorado.edu](mailto:martina.miranda@colorado.edu).

### *Provisional Admission*

Applicants who meet all admission requirements except the minimum academic preparation standards (MAPS) may petition the associate dean for undergraduate studies for admission as a

### **Undergraduate**

> **[Admissions & Enrollment Policies](#)**

> [Graduate Admissions & Enrollment Policies](#)

> [Programs of Study](#)

> [Faculty: Music](#)

> [Other Academic Programs](#)

provisional student.

## *Transfer Students*

Transfer students from within the university and from other universities must meet the general requirements of the university and the specific requirements of the College of Music, including the audition. See Undergraduate Admission in the General Information section for specific requirements.

## *Nondegree Students*

With the written permission of the instructor and on a space available basis, nondegree students may take any class offered by the College of Music except private applied instruction.

## Attendance Requirements

Successful work in the College of Music is dependent on regular attendance in all classes. At the beginning of each semester, instructors will inform students of policies governing grading and attendance in each class. Students are expected to attend classes and comply with the attendance requirements specified by their instructors. For ensembles and other performance classes, attendance at dress rehearsals, major concerts, and other approved/sanctioned performances, as listed in the course syllabus, also is required.

## *Convocations and Recitals*

All degree students are required to pass Music Convocation (CONV 1990) for a minimum of six semesters. Transfer students normally do four semesters. Graduation is not permitted until this requirement is met. If necessary, students may register for two convocations in one semester (CONV 1990 and 2990.) Discrepancies concerning convocation credit should be resolved within one year of the semester in question.

Each semester, students are given a list of convocations and recitals from which a minimum of seven must be attended to receive a passing grade. Events in which the student participates do not count toward this requirement. Monitors are present at each event to take attendance. Students are encouraged to keep track of the convocation events they attend.

## *Ensembles*

All undergraduate students enrolled in applied music must participate in a university ensemble appropriate to and required by their

degree program. (Students enrolled in Conducting courses must concurrently be enrolled in a conducted ensemble.) Voice performance majors are not required to be in ensembles during the semester of their senior recital, and bachelor of music education students are exempt from ensemble participation during the student teaching semester. Any student who studies applied music beyond degree requirements must participate concurrently in a university ensemble. Double majors need be in only one ensemble at a time.

## Sophomore Proficiency

Students must pass a variety of jury tests and proficiency exams during their degree work. Each applied area has different requirements, so students need to consult the chair of their area and/or studio professor. However, all students must pass a sophomore proficiency exam. Students who cannot pass this exam receive an incomplete grade and cannot progress to the junior level of applied study until the proficiency is achieved. Studio professors provide students with proficiency and repertoire requirements.

## Course Load

The normal academic load for an undergraduate student in the College of Music is 15–17 semester hours. Schedules of fewer than 12 or more than 19 hours must have approval of the associate dean for undergraduate studies of the College of Music.

See limitations on registration under the Graduate School section for graduate student course load stipulations.

## Dropping a Course

Students should adhere to the deadlines for dropping a course in the registration handbook distributed each semester. After a certain date each semester, a special action form signed by the instructor and associate dean for undergraduate studies is required to drop a course.

## *Pass/Fail* Option

The *pass/fail* option for 12 credits is open only to undergraduate students. Music education students may only use the *pass/fail* option for student teaching. *Pass/fail* hours are to be selected from nonmusic courses and are in addition to those that may be taken in honors. Courses so elected are taken according to the *pass/fail* policies of the college or school concerned.

*Pass/fail* hours that transfer students can apply toward degree requirements from departments within the university are limited to 1 in every 8 semester hours earned in the College of Music.

## Residence Requirement

Of the hours required for an undergraduate degree, the last 56 credits must be completed in residence in the College of Music. This may be reduced by the faculty for excellent work done in this university and for high scholarship exhibited at previous institutions attended. In no case shall the minimum be fewer than 40 hours distributed over three semesters. At least 9 hours in applied music (private instruction) must be earned in this college for the degrees bachelor of music and bachelor of music education, and 6 hours for the bachelor of arts in music.

## Student Work

A copy of all scholarly student papers that generate credit (dissertations, theses, projects, lecture recitals, and other document-producing activities), whether undergraduate or graduate, is placed in the Music Library. More than one copy may be required in individual degree programs. To ensure that degree requirements have been met and the document is appropriate for placement in the Music Library, all faculty-approved documents must be presented to the appropriate associate dean's office at least two weeks before the graduation date.

Any recital required for graduation is recorded. Arrangements are to be made through the College of Music Concerts Office, and a recording fee is charged. The original recording is placed in the Music Library.

## Stay Connected Program/Withdrawal

The online Schedule of Courses indicates the deadlines for withdrawal from the university and the financial penalties incurred with each. Students wishing to withdraw or apply to the Stay Connected Program should follow appropriate university guidelines (contact the office of the registrar or the associate dean of music). Those who stop attending class without officially withdrawing will receive *F*s in each of their courses.

# Graduate Degree Programs Admissions & Enrollment Policies

## On This Page:

- [Admission Requirements](#)
- [Financial Aid](#)
- [Preliminary Examinations](#)
- [English Language Requirements](#)
- [College Teaching Area](#)
- [Graduate Auditions](#)

## Admission Requirements

Admission requirements for specific degree programs that supplement the Graduate School requirements are discussed in the degree program descriptions that follow. Students are urged to take the general (verbal, quantitative, analytical) portions of the Graduate Record Examination (GRE). GRE scores are required as part of the application to the PhD programs, and are recommended for the DMA, MM in music theory, and Master of Music Education degrees.

## Preliminary Examinations

Just before the beginning of their first semester of work toward a master's or doctoral degree, students are given preliminary exams covering the major field, several areas of music theory, and music history. Specific requirements vary with the student's degree and program. Students pursuing the master's and doctoral degrees in voice also must pass proficiency requirements in piano and diction (English, French, German, and Italian).

Any deficiencies demonstrated by the preliminary examination scores must be removed early in the degree program. Application for candidacy and required examinations cannot be approved until deficiencies are removed. Thesis and dissertation projects may not be completed while preliminary examination deficiencies remain.

Results from the major-field examination serve as one basis for recommending specific course work in the program. The major-field examination in musicology includes essay questions, score analysis, and identification of terms. Conducting majors should be knowledgeable in areas of repertoire, score analysis, and conducting techniques. Performance majors are examined in the areas of technique, repertoire, stylistically informed performance, and pedagogy. Students enrolled in the master's degree in Jazz Performance and Pedagogy must demonstrate knowledge of jazz theory and history, and jazz keyboard proficiency.

## College Teaching Area

For graduate students in music who intend to teach at the college level and who have had no prior college teaching experience, a teaching module of at least 6 hours of courses is recommended. This

module can consist of professional education courses, music education courses, teaching-skills courses, or teaching practica. The teaching-area module is not normally used toward the minimum 30-hour course requirement for master's or DMA programs. Workshops, videotaping of students' teaching, observation, and consultation services are available through CU's excellent Graduate Teacher Program. Students who participate in this program are eligible to receive a graduate teacher certificate. For more information, visit [www.colorado.edu/gtp](http://www.colorado.edu/gtp).

## Financial Aid

In addition to the opportunities for financial aid described in the Graduate School section, the College of Music grants teaching assistantships and part-time instructorships to numerous graduate students each year. The assistantships and instructorships, which are usually one-quarter time, include both a stipend and the waiver of 5 or 6 credit hours of tuition each semester. There are also scholarships offered by the individual departments, grants-in-aid given for various college-related responsibilities, and fellowships awarded through the Graduate School. All prospective students who have completed their applications by December 1 will automatically be considered for available scholarships, fellowships, and assistantships.

## English Language Requirements

A student who is noticeably deficient in the use of the English language may not obtain an advanced degree from the University of Colorado. Satisfaction of this requirement depends not so much upon ability to pass formal tests, although these may be required, as upon the consistent use of good English in all oral and written work.

## Graduate Auditions

Auditions are required for all performance and performance/pedagogy programs. A personal audition is strongly preferred, but students may be accepted into most programs by submitting a recorded audition. Note that some studios require a preliminary, recorded audition before a student may be invited to schedule an audition on campus. For specific information and audition dates, refer to the website ([music.colorado.edu/apply/graduate/auditions-major-field-requirements](http://music.colorado.edu/apply/graduate/auditions-major-field-requirements)) or contact the office of the associate dean for graduate studies at **303-492-2207** or [gradmusc@colorado.edu](mailto:gradmusc@colorado.edu).

## Programs of Study & Degrees

The College of Music provides specialized training designed to prepare students for a variety of careers in music. The college offers three undergraduate degrees, two certificate programs, four graduate degrees and three professional certificates.

Undergraduate degree programs include the:

- [Bachelor of music \(BM\)](#)
- [Bachelor of arts \(BA\)](#)
- [Bachelor of music education \(BME\)](#)
- [Dual degrees in music](#)
- [Dual degree in music performance and music education](#)

In addition, the college of music offers undergraduate certificate programs in:

- [Certificate in jazz studies](#)
- [Certificate in music technology](#)

Graduate degrees include:

- [Master of music \(MM\)](#)
- [Master of music education \(MME\)](#)
- [Dual master's degree in music](#)
- [Doctor of musical arts \(DMA\)](#)
- [Doctor of philosophy \(PhD\)](#)

In addition, the college of music offers the following professional certificates:

- [Professional certificate in string quartet performance](#)
- [Professional certificate in opera and solo vocal performance](#)
- [Professional certificate in woodwind performance](#)

The course codes for these programs are MUEL, MUSC, PMUS, and TMUS.

# Music Education

## *Bachelor's Degree Program(s)*

### Bachelor of Music Education (BME)

The purpose of the four-year professional program leading to the bachelor of music education (BME) degree is to prepare students to teach music in elementary and secondary schools. Students completing this degree program qualify for a Colorado K–12 music teaching license. Students also may apply for teaching licenses in other states that have reciprocity agreements with Colorado.

Because of the varying challenges and opportunities associated with teaching music in K–12 school contexts, the undergraduate music education curriculum strikes a balance between specialization and generalization. BME students must demonstrate a sufficiently broad knowledge of the entire music program/curriculum, but also possess the specialized skills necessary to be a successful general music, choir, orchestra, or band instructor.

### *Courses and Curricula*

Four basic curricular options are provided for students pursuing the bachelor of music education degree: **choral**, **choral-general**, **instrumental**, and **instrumental-general** emphases. The choral-general and instrumental-general emphases include a larger concentration of course work and field experiences related to elementary general music teaching, while the choral and instrumental emphases involve more specialized course work and field experiences related to the teaching of choir, orchestra, or band classes at the secondary level. Within each degree emphasis, students have a limited number of elective credits that may be used to further customize degree work according to their interests and needs.

As first-year students, BME students complete core studies in music and liberal arts. The first music education courses and early field experiences are completed during the sophomore year. During the junior year, students enroll in capstone methods courses and specialized electives that allow for more detailed and sustained study of curricular models, instructional materials, and teaching methods. Internships and full-time student teaching provide culminating experiences during the senior year, as students work in partnership with experienced public school teachers and assume the role and responsibilities of a professional music educator. Internship and student teaching placements are chosen in consultation with faculty advisors and the music education chair.

### *Degree Requirements*

A minimum of 126 semester hours with a cumulative GPA of 2.750 must be earned for the BME degree, with no grade below C- in a course. In addition to 40 semester hours of teacher education course work and 150 clock hours of early field experience, music education majors complete 24 semester hours in liberal arts disciplines (English composition, literature and arts, mathematics, social sciences, natural sciences) and 62 hours in music (music theory and aural skills, musicology and ethnomusicology, applied study, ensemble, keyboard and voice, and conducting). Core requirements in liberal arts and music are designated by the College of Music curriculum committee.

### *Admission to the Teacher Education Program*

---

Teacher education is a campuswide function at the University of Colorado. Admission to the music education program in the College of Music does not constitute admission to the teacher education program. Students must apply to the School of Education through the music education chair no later than the second semester of the junior year or by the time 65 credits have been completed toward the BME degree (including approved transfer credits). Students may not register for certain education courses and student teaching until they are admitted to the teacher education program.

Requirements for recommended admission to the teacher education program are:

- Minimum GPA of 3.000 in music and music education, and a minimum cumulative GPA of 2.750.
- Minimum grade of C- in MUSC 2103.
- Twenty-five hours of documented, supervised field experience.
- Satisfactory functional piano ability as demonstrated by passing the proficiency examination or completing prescribed course work.
- Satisfactory performance ability as demonstrated by meeting the sophomore proficiency requirements in an applied area of study.
- Recommendation by the music education faculty. An interview with each student is held by the members of the music education faculty during the first semester of the sophomore year to review the student's progress and qualifications for admission to the teacher education program.

For further information, please refer to the *Handbook for Undergraduate Studies in Music Education*, which can be obtained at the music education website at [music.colorado.edu/departments/music-education](http://music.colorado.edu/departments/music-education).

## *Student Teaching*

Students wishing to receive a student teaching assignment must complete an application and submit it to the School of Education through the chair of the music education faculty early in the semester preceding the student teaching semester. Prerequisites for student teaching are:

- Admission to the teacher education program.
- A minimum GPA of 3.000 in music and music education, and a minimum cumulative GPA of 2.750.
- Completion of all required music education and education courses in the music education curriculum.
- Satisfactory performance ability as demonstrated by passing the junior recital.
- Passing score on the PLACE Music Assessment.
- Recommendation by the music education faculty.

## *Choral Music Emphasis*

Students must take keyboard or voice as the primary applied area, or petition the music education faculty for an exception. A minimum of five of the seven semesters of required ensemble registration must be in a conducted choral ensemble (University Singers, University Choir, Collegiate Chorale, or Women's Chorus). For keyboard majors, two semesters of independent accompanying may be applied to the ensemble requirement. Students must be enrolled in a conducted choral ensemble when concurrently enrolled for Conducting.

## *Graduate Degree Program(s)*

### Master of Music Education (MME)

The master of music education (MME) program addresses the professional development needs of music teachers in the field. Master of music education students are challenged to develop a greater understanding and mastery of music teaching-learning processes, to improve personal musicianship, and to become committed leaders within the music education profession.

**Prerequisites.** Applicants are expected to provide evidence of undergraduate preparation equivalent to that required for the bachelor of music education degree at this university. Applicants also must possess a music teaching certificate/license or agree to work toward a Colorado music teaching license. GRE scores are not required for admission, but can be helpful in determining merit-based financial aid. Individuals who wish to pursue music performance or conducting as their minor field must demonstrate at least senior-level proficiency on their particular medium, through an audition.

**Program of Study.** Students earning the MME degree must complete a minimum of 30 hours of course work, including 12 hours in music education, 12 hours in music, and 6 hours of electives in a specialization area or other areas of interest. Of the 12 hours in music, a two-hour course in bibliography and research is required as well as six hours of study in a minor area, which includes musicology, music theory, or performance (including conducting and jazz studies).

The music component of the degree should assist students in developing their musical knowledge and skills. One member of the student's graduate advisory committee should be from the minor area, and it is assumed that at least some part of the student's study is with that faculty member. All music studies must be at the 5000-level or above. Under special circumstances, up to 6 credit hours at the 4000-level may be applied to the open electives portion of the degree.

As a master of music education degree candidate, each student must produce a culminating paper that focuses on a topic of vital interest or importance. This paper may be developed as part of the requirements for a music education course or may take the form of a master's thesis. Culminating papers or theses are defended during final oral examinations.

Students typically complete the degree in two academic years, or one academic year plus two summers. Degree work must be completed within four years of the semester in which the student is accepted into a degree program and begins studies. Because most master's-level music education courses are offered in late afternoons, students who live within commuting distance can earn a significant portion of credit toward the degree while continuing to work full time.

### Doctor of Philosophy: Music Education (DME)

The doctor of philosophy degree in music, with music education as a field of specialization, is offered

through the Graduate School for students who demonstrate both superior commitment to the music education profession as well as scholarly potential. This degree program requires that individuals think abstractly, generalize knowledge, apply research results to areas of specialization, and communicate effectively in both oral and written forms. Course work emphasizes the study of historical, philosophical, psychological, and sociological foundations of music education; the theoretical and pedagogical principles of music teaching and learning; curriculum development; testing and assessment; and research techniques. Graduates typically pursue careers in music education at the college level or supervisory positions in elementary and secondary schools.

**Course Work.** A minimum of 45 semester hours of courses numbered 5000-level or above (15 of which may be transferred from the master's degree) and a minimum of 30 hours of doctoral dissertation credit are required for the PhD degree.

**Dissertation Requirements.** A dissertation based on original investigation, demonstrating mature scholarship, must be completed by each candidate. Following the successful completion of the comprehensive examination, the student designates a dissertation committee, develops a dissertation prospectus, and presents it to the committee for approval. After the dissertation has been accepted, a final oral examination on the dissertation and related topics is conducted by the student's dissertation committee.

### *Dual Degree Programs*

## Dual Degree in Music Performance and Music Education

Qualified music majors who have been approved by the relevant major departments may elect to complete a dual major in music performance (woodwinds, brass and percussion, strings, voice, or jazz emphasis) and music education (instrumental or choral tracks). Requirements for these dual degrees programs range from 144 to 148 credit hours, and a minimum of 10 semesters of study (including one semester of full-time student teaching) is typically necessary to complete all requirements.

# Musical Arts

## Doctor of Musical Arts (DMA)

The doctor of musical arts (DMA) is a professional degree for creative and performing students who possess the talent as well as the breadth of knowledge, background, outlook, and scholarly capacity requisite to a doctoral program. Fields of study are composition, instrumental conducting and literature, literature and performance of choral music, performance, and performance/pedagogy. Performance and/or performance/pedagogy concentration areas are brass instruments, guitar, harpsichord, organ, percussion, piano, string instruments, voice, and woodwind instruments. Outlines of specific programs may be obtained online at [music.colorado.edu/students/graduate/degrees](http://music.colorado.edu/students/graduate/degrees) and from the office of the associate dean for graduate studies.

**Prerequisites.** Entrance requirements include a master's degree in music or demonstrated background comparable to that of the master of music degree at this university. All graduate applicants must complete an audition, interview, or some other demonstration of their ability in the major field. If at all possible, a visit to the campus is strongly encouraged. As part of the application, composition majors should submit representative scores and recordings (CD format), and a list of completed compositions. Performance majors should submit a repertoire list and arrange for a personal audition and interview, if at all possible. (Some areas require applicants to send a pre-audition screening recording of their performance.) Conducting majors must submit a DVD of their performance. All DMA applicants must also submit a scholarly writing sample that demonstrates ability in critical thinking, appropriate research techniques, and skill in the cogent use of English. Full details concerning audition and application requirements may be found online at [music.colorado.edu/apply/graduate](http://music.colorado.edu/apply/graduate).

**Program Requirements.** The following program description supplements the requirements applying to all graduate students found in the Graduate School section and in the introductory section on Graduate Degree Programs in this College of Music section. Information on quality of work, credit by transfer, application for admission to candidacy, comprehensive examination, and final examination found under the PhD description is applicable to the DMA degree. DMA degree work must be completed within six years of first registration.

- **Advisory Committee.** Each DMA program is directed by a five-member advisory committee headed by the major advisor, who is usually the student's main studio teacher. At least one member must hold the PhD degree.
- **Residence Requirements.** The minimum residence requirement is six semesters of work beyond the attainment of an acceptable bachelor's degree. Two semesters of residence credit may be allowed for a master's degree from another institution of approved standing, but at least four semesters of residence credit, two of which must be consecutive in one academic year, must be earned for course work and/or dissertation work taken at this university.
- Not more than one-half semester of residence credit may be earned in a summer session. Students must be registered full-time to earn residence credit. For employed students, only those with one-fourth time or less in work that does not contribute directly to their degree program may earn full residence credit.

## Colleges & Schools

> [Architecture & Planning](#)

> [Arts & Sciences](#)

> [Business](#)

> [Education](#)

> [Engineering & Applied Science](#)

> [Graduate School](#)

> [Journalism & Mass Communication Program](#)

> [Law](#)

> [Policies & Requirements](#)

> [Programs of Study](#)

> [Music](#)

> [Music Education](#)

> **[Musical Arts](#)**

> [Faculty: Music](#)

> [Other Academic Programs](#)

- **Continuous Registration.** After the residence requirements for the doctor of musical arts program have been satisfied, a student must enroll for fall and spring semesters of each year until attaining the degree. If a student has enrolled in all required dissertation courses but has still to complete the work, he or she should enroll in TMUS 8019 Precandidate for Doctor of Musical Arts Degree, or TMUS 8029 Candidate for Doctor of Musical Arts Degree, until the degree is completed.
- **Degree Plan.** A degree plan approved by the advisory committee will be presented to the associate dean for graduate studies no later than the second semester of residence. The student's major professor is responsible for helping the student formulate this plan. The plan should include designated members of the student's doctoral committee, projected remedial and supporting course work, proposed dissertation projects, and tentative dates for the comprehensive and final examinations.
- **Language Requirement.** Each DMA student must satisfy a foreign language requirement, and the one foreign language used to satisfy the requirement must be approved by the student's advisory committee. Additional language work is required for voice students. Advanced competence in music technology may be approved as an alternative to the foreign language requirement. Appropriate courses and projects are prescribed by the college's music technology faculty. International students whose native language is not English are exempt from the requirement.
- **Course Requirements.** Students must take a minimum of 30 hours of course work, of which at least 18 hours are dissertation projects. Students take two doctoral topic classes (at the 6000 level), one each in musicology and music theory; prerequisites are stipulated by the theory and musicology faculties. Some areas require specific course work prior to or in conjunction with work on dissertation projects. In other instances students may be advised to take course work in preparation for the comprehensive examination. Applied music instruction may be elected for the duration of the residency requirement.
- **Dissertation.** The DMA dissertation consists of a specified number of performances, projects, and documents. The student's permanent advisory committee must approve all dissertation projects.

## ENVD-3122 (3) Research Issues and Methods in Design and Planning

Explores topics of current interest in planning. Looks at the development and social consequences of the neighborhood movement, forms of municipal and regional governments, regional settlement patterns, and new communities. Introduces selected methods from the social sciences used by planners and urban designers. Prereqs., ENVD 1102, 1104, 2003. Coreqs., ENVD 2120, 3124. Prerequisites: Requires prerequisite courses of ENVD 1102, ENVD 1104, and ENVD 2003. Restricted to College of Architecture and Planning majors only.

[College of Architecture & Planning](#)
[Environmental Design](#)
[Methods and Techniques](#)

## ENVD-3124 (3) Issues in Planning History

Broadly introduces physical environmental planning in the U.S., examining both historical roots and recent trends in American planning concepts and implementation. Emphasizes an analytical and critical approach to historical and contemporary planning issues, mechanisms, and cases. Prereqs., ENVD 1102, 1104, 2003. Coreqs., ENVD 2120, 3122. Prerequisites: Requires prerequisite courses of ENVD 1102, ENVD 1104, and ENVD 2003. Restricted to College of Architecture and Planning majors only.

[College of Architecture & Planning](#)
[Environmental Design](#)
[History and Theory](#)

## ENVD-3152 (3) Introduction to Computer Graphics Applications

Explores principles and uses of computer graphics in design. Topics include creation and modification of complex two- and three-dimensional objects; orthographic and perspective views; use of color; input using mouse and digitizer; output using screen, plotter, matrix printer, and slides; automated aids for form generation and manipulation; and analysis of current and future trends of computer usage for design. May be repeated up to 12 total credit hours. Prereq., ENVD 1052, 1102. Prerequisites: Restricted to College of Architecture and Planning majors only.

[College of Architecture & Planning](#)
[Environmental Design](#)
[Methods and Techniques](#)

---

## ENVD-3212 (3) Color Theory

Illustrates color media techniques for the preparation, composition, and presentation of landscape and built environment drawings. Prereq., ENVD 2130. Prerequisites: Restricted to College of Architecture and Planning majors only.

College of Architecture & Planning Environmental Design Methods and Techniques

---

## ARCH-3214 (3) History and Theories of Architecture 2

Surveys architecture, landscape architecture, and urban design from A.D. 1400 to the present, emphasizing developments in the Western world. Open to nonmajors on a space available basis. Prerequisites: Restricted to College of Architecture and Planning or College of Engineering and Applied Sciences majors only.

College of Architecture & Planning Architecture

---

## ENVD-3220 (6) Planning Studio 2

See ENVD 2120. Prereq., ENVD 2120. Restricted to PLAN majors. Prerequisites: Restricted to College of Architecture and Planning majors only.

College of Architecture & Planning Environmental Design Studios

---

## ENVD-3252 (3) Computer Graphic Programming

Provides an introductory computer programming course designed to teach the capabilities of a computer in providing graphic representations of environments, including buildings. Open to nonmajors.

College of Architecture & Planning Environmental Design Methods and Techniques

---

## ENVD-3300 (3-6) Special Topics: Intermediate Design Lab

Design lab exploring new and emerging themes in environmental design. May be repeated up to 18 total credit hours. Prereqs., ARCH 3114, ENVD 3100, 3115. Prerequisites: Restricted to College of Architecture and Planning majors only.

College of Architecture & Planning Environmental Design Studios

---

## ENVD-3310 (6) Architecture Studio 2

The second of the four upper-division studios focuses on concepts of medium-scale building design, siting, and climate. Through a number of design exercises, students learn how these factors help shape buildings. Prereq., ENVD 3110. Formerly ENVD 3210. Prerequisites: Restricted to College of Architecture and Planning majors only.

College of Architecture & Planning Environmental Design Studios

---

---

---

## ENVD-3320 (2) Planning Practicum

Supervised practicum in some aspect of urban or regional planning. Prereq., ENVD 3220.

College of Architecture & Planning Environmental Design Studios

---

---

## ENVD-3352 (3) Architectural Computer Media

Introduces the integration of computing and the architectural design process and related representational tasks. Studies common computer-aided design programs, emphasizing two- and three-dimensional and animation techniques. Prerequisites: Restricted to College of Architecture and Planning majors only.

College of Architecture & Planning Environmental Design Methods and Techniques

---

---

## ENVD-3909 (1-6) Independent Study

By special arrangement with instructor. Prereq., ENVD 3100 and a 3.00 GPA.

College of Architecture & Planning Environmental Design Miscellaneous

---

---

## ENVD-3919 (1-6) Teaching Assistant

By special arrangement with instructor. Prereq., junior standing and 3.00 GPA. Available for pass/fail credit only.

College of Architecture & Planning Environmental Design Miscellaneous

---

---

## ENVD-4005 (3) Design and Planning Law

Teaches students how to research the various codes and to draft and pass laws. Covers environmental, water quality, property, zoning, and building codes and laws. Prereq., ENVD 2130.

College of Architecture & Planning Environmental Design Technology and Practice

---

---

## ARCH-4010 (3) Architectural Appreciation and Design

Introduces basic processes and principles of architectural design. Provides a basis for understanding and evaluating architecture. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) Architectural Engineering (AREN) majors only.

College of Architecture & Planning Architecture

---

---

## ENVD-4012 (3) Imagination and Creativity

Offers a seminar on imagination and creativity in environmental design. Students research and prepare a class presentation and paper on a topic of interest. Open to nonmajors at all levels.

College of Architecture & Planning | Environmental Design | Methods and Techniques

---

---

## ENVD-4023 (3) Environmental Impact Assessment

Provides a field-oriented seminar in current environmental impact controversies. Gives attention to history, theory, and application of impact analysis at state levels for designers, land-use planners, and others involved in resource decision making. Prereq., instructor consent. Open to nonmajors on a space available basis, by instructor consent. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Architecture and Planning majors only.

College of Architecture & Planning | Environmental Design | Physical Factors

---

---

## ENVD-4031 (3) Thinking Like a Mountain: A New Land Ethic

Critically reviews and analyzes land use policies, the ethics and economics of air and water pollution, regional sustainability, and resource management. Includes critical evaluation of empirical methodologies, and criteria of cultural and social equity. Prereq., junior or senior standing in the college.

College of Architecture & Planning | Environmental Design | Social Factors

---

---

## ENVD-4035 (3) Solar and Sustainable Design

Introduces aspects of solar technology relevant to the environmental design professions. Includes readings and lectures on the nature of energy limitations, energy needs, and the potential role of solar energy in meeting these needs. Prereq., ENVD 2130.

College of Architecture & Planning | Environmental Design | Technology and Practice

---

---

## ENVD-4052 (3) Digital Presentation and Portfolio

Introductory course creating interactive web sites. Covers use of Hypertext Markup Language (HTML) and Flash to create linked pages containing text, images animations, menus, and buttons. Covers principles of site navigation, page layout, and graphic design for designers and planners. Credit not granted for this course and ENVD 2352. Prerequisites: Restricted to College of Architecture and Planning majors only.

College of Architecture & Planning | Environmental Design | Methods and Techniques

---

---

---

## ENVD-4092 (3) Improving Imaging Ability

Offers an advanced course dealing with theories of imaging and methods of improving imaging in the design process. Open to nonmajors.

[College of Architecture & Planning](#) [Environmental Design](#) [Methods and Techniques](#)

---

---

## ENVD-4100 (3-6) Advanced Design Lab 1

Design lab exploring new and emerging themes in design. May be repeated up to 18 total credit hours. Prereq., ENVD 3300.

[College of Architecture & Planning](#) [Environmental Design](#) [Studios](#)

---

---

## ENVD-4112 (3) Architectural Graphics 1

Illustrates techniques of graphics communication and presentation for architectural design. Includes advanced delineation and use of color. Prereq., ENVD 2130.

[College of Architecture & Planning](#) [Environmental Design](#) [Methods and Techniques](#)

---

---

## ENVD-4114 (3) History of American Architecture and Urbanism

Surveys architecture, landscape architecture, urban design, and planning in the U.S. from ca. 1600 to the present. Prereq., ENVD 2130.

[College of Architecture & Planning](#) [Environmental Design](#) [History and Theory](#)

---

---

## ENVD-4122 (3) Advanced Technical Photography

Focuses on working with a variety of alternative photographic processes intended to give students an array of photographic techniques to incorporate into studio course presentations and portfolio work. Processes include hand-applied color to black and white images, using two or more negatives to produce black and white combination prints, shooting color slides to produce graphic arts, high-contrast black and white prints, and documentary photography of Colorado architecture and urban landscapes using color slide film. Students must provide their own 35mm SLR camera. Prereq., ENVD 3022 or ARTS 2191 or instructor consent.

## ENVD-4152 (3) Computer Graphic Applications

Introduces the mechanics of entering 2-D images and 3-D objects into the computer. Once entered, graphics are interactively rotated in space, walked through, and displayed in perspective from any position. Also covers the mechanics of other computer programs allowing additional manipulation of images and objects. Prereq., ENVD 2130.

[College of Architecture & Planning](#) [Environmental Design](#) [Methods and Techniques](#)

## ENVD-4192 (3) Improving Imaging Ability 2

Offers an advanced course dealing with theories of imaging and methods of improving imaging in the design process. Open to nonmajors.

[College of Architecture & Planning](#) [Environmental Design](#) [Methods and Techniques](#)

## ENVD-4212 (3) Architectural Graphics 2

Covers development of an architectural set of construction documents combined with job administration, field observation, and guest speakers from related construction and architectural disciplines. Prereq., ENVD 2130. Prerequisites: Restricted to College of Architecture and Planning majors only.

[College of Architecture & Planning](#) [Environmental Design](#) [Methods and Techniques](#)

---

## ENVD-4233 (3) Environmental Aesthetics

Explores the interdisciplinary field of environmental aesthetics, examining the history of landscape tastes, theoretical approaches to the study of aesthetic responses, and contemporary attempts to incorporate matters of aesthetics in American planning. Emphasizes developing analytical and critical approaches to aesthetics in the public realm.

College of Architecture & Planning Environmental Design Physical Factors

---

## ENVD-4300 (3-6) Advanced Design Lab 2

Design lab exploring new and emerging themes in design. May be repeated up to 12 total credit hours. Prereq., ENVD 4100. Prerequisites: Restricted to College of Architecture and Planning majors only.

College of Architecture & Planning Environmental Design Studios

---

## ENVD-4311 (3) Housing Policies and Practices

A seminar providing students with a descriptive knowledge and analytical understanding of the use and development of residential settings in different political economies, globally divided into advanced capitalist nations, collectivist economies, and the third world. Prereq., ENVD 2130.

College of Architecture & Planning Environmental Design Social Factors

---

## ENVD-4314 (3) Architectural Theory

Surveys, through lectures and readings, the major historical developments and contemporary directions in architectural theory. Prereqs., ARCH 3114 and ARCH 3214. Prerequisites: Restricted to College of Architecture and Planning majors only.

College of Architecture & Planning Environmental Design History and Theory

---

## ENVD-4320 (6) Planning Studio 3

See ENVD 2120. Prereq., ENVD 3300.

College of Architecture & Planning Environmental Design Studios

---

## ENVD-4322 (1-6) Special Topics: Graphics

Provides an advanced seminar on special issues in design communications. May be repeated for credit by petition. Prereq., ENVD 2130. Prerequisites: Restricted to College of Architecture and Planning majors only.

College of Architecture & Planning Environmental Design Methods and Techniques

---

---

## ENVD-4340 (4-6) Landscape Design Studio

Studio in landscape design. Prereq., ENVD 3300. Prerequisites: Restricted to College of Architecture and Planning majors only.

College of Architecture & Planning | Environmental Design | Studios

---

## ENVD-4352 (1-6) Special Topics: Computer Methods

Topics include animation and environmental simulation, computational methods of technical evaluation and optimization, and computational mapping and analysis. May be repeated for credit by petition. Prereq., ENVD 2130. Prerequisites: Restricted to College of Architecture and Planning majors only.

College of Architecture & Planning | Environmental Design | Methods and Techniques

---

## ENVD-4360 (4-6) Historic Preservation Studio

A design studio exploring emerging issues and practices in historic preservation. Prereq., ENVD 3300. Prerequisites: Restricted to College of Architecture and Planning majors only.

College of Architecture & Planning | Environmental Design | Studios

---

## ENVD-4361 (1-6) Special Topics: Social Factors in Design

Addresses variable topics in the relationship of human experience and behavior to the built environment, e.g., social research methods in environmental design. Prereq., ENVD 2130. Prerequisites: Restricted to College of Architecture and Planning majors only.

College of Architecture & Planning | Environmental Design | Social Factors

---

## ENVD-4363 (1-6) Special Topics: Physical Factors in Environmental Design

Includes such topics as appropriate technology, public policy and natural hazards, organization of the designing and building process, and physical elements of urban development. Prereq., ENVD 2130. Prerequisites: Restricted to College of Architecture and Planning majors only.

College of Architecture & Planning | Environmental Design | Physical Factors

---

## ENVD-4364 (1-6) Special Topics: History and Historiography of Environmental Design

Provides an advanced seminar on history and historiography of environmental design, e.g., American dwellings. May be repeated for credit by petition. Prereq., ENVD 2130.

---

## ENVD-4365 (1-6) Special Topics: Technology and Practice

Provides an advanced seminar on new technologies and issues of professional practice in the environmental design professions. Prereq., ENVD 3100. Prerequisites: Restricted to College of Architecture and Planning majors only.

## ENVD-4420 (3) Senior Capstone Seminar

Advanced seminar focuses on theoretical concerns and practical issues inherent in environmental design and planning. Views concerns and issues in terms of setting, processes, and planning and design outcomes. Provides a critical synthesis of the inherently interdisciplinary nature of planning and design education. Open to planning and design studies seniors only, or by instructor consent. Prerequisites: Restricted to College of Architecture and Planning majors only.

## ENVD-4440 (6) Landscape Design Studio 2

A preprofessional studio in landscape architecture. Prereq., ENVD 4340.

## ENVD-4510 (6) Architecture Studio 3

The third of the four upper-division studios focuses on concepts of program, architectural meaning and human behavior in buildings. Through a number of design exercises, students learn how these factors help shape buildings. Prereq., ENVD 3310. Formerly ENVD 4310. Prerequisites: Restricted to College of Architecture and Planning majors only.

## ENVD-4550 (4-6) Urban Design Studio

A studio exploring emerging issues and practices Prereq., ENVD 3300. Prerequisites: Restricted to College of Architecture and Planning majors only.

## ENVD-4710 (6) Architecture Studio 4

The last of the four upper-division studios focuses on concepts of building technology, context and environmental sustainability. Prereq.,

ENVD 4510. Formerly ENVD 4410. Prerequisites: Restricted to College of Architecture and Planning majors only.

[College of Architecture & Planning](#) [Environmental Design](#) [Studios](#)

---

## ENVD-4764 (1-6) Special Topics: Theory and Criticism in Environmental Design

Provides an advanced seminar on theory and criticism in environmental design, e.g., architecture now and introduction to design theory and criticism. May be repeated for credit by petition. Prereq., ENVD 2130. Prerequisites: Restricted to College of Architecture and Planning majors only.

[College of Architecture & Planning](#) [Environmental Design](#) [History and Theory](#)

---

## ENVD-4794 (3) History of Urban Design and Planning

Examines history of European and American planning and urban design in the late 19th and 20th centuries. Prereq., ENVD 2130. Prerequisites: Restricted to College of Architecture and Planning majors only.

[College of Architecture & Planning](#) [Environmental Design](#) [History and Theory](#)

---

## ENVD-4909 (1-6) Independent Study

By special arrangement with instructor. Prereq., ENVD 3100 and a 3.00 GPA.

The mission of the Division of Continuing Education and Professional Studies is to provide quality, innovative, lifelong learning opportunities to a diverse student population by extending the educational resources of the University of Colorado Boulder. A variety of credit courses, noncredit programs, certificate programs, and seminars is offered through Continuing Education, which also administers CU-Boulder's Summer Session. Only university-approved faculty teach in Continuing Education programs.

The office is located at 1505 University Avenue in Boulder, **303-492-5148** (or **1-800-331-2801**). The fax number is **303-492-5335**, and the website is [conted.colorado.edu](http://conted.colorado.edu).

## Boulder Evening Credit Program

Offered in conjunction with CU-Boulder's academic departments, the Boulder Evening Program provides credit courses in the evening on the Boulder campus. These affordable, smaller-sized classes are provided through various departments including anthropology, communication, economics, English, film studies, art and art history, geography, mathematics, philosophy, psychology, sociology, Spanish, theatre, and more.

## Independent Learning Program

The Independent Learning Program offers online and print correspondence courses representing and approved by more than 20 departments on campus. Term-based courses follow a traditional semester schedule and allow for rich interaction with the instructor and other classmates. Self-paced courses offer students the flexibility of progressing through the course at their own pace, and to finish in less than a full semester or take up to a full year.

---

## Applied Music Program

The Applied Music Program offers students the opportunity to earn CU credit for beginning or continuing music lessons on guitar, piano, voice, organ, winds, brass, drums, percussion, or strings. Instruction is available in individual or group sessions depending on instrument.

## Individualized Instruction

Individualized Instruction provides an opportunity for students to receive credit for university courses by meeting with faculty members outside the regular classroom setting. This option may be used when the student cannot reasonably be expected to enroll in the main campus course.

## Center for Advanced Engineering and Technology Education (CAETE)

CAETE, a partnership between the College of Engineering and Applied Science and the Division of Continuing Education and Professional Studies, serves as the distance learning and professional studies arm of the college. CAETE provides graduate engineering and technical education and professional development for practicing engineers and managers of technology. Course sequences may lead to a master's degree in aerospace engineering, computer science, electrical and computer engineering, engineering management, or telecommunications. Elective courses are also offered in civil/environmental and mechanical engineering. Graduate certificates and short courses are available in some fields. CAETE also provides ongoing access to over 100 pre-recorded courses via its virtual library. These courses are available for academic course work, rental, or purchase by companies for in-house training.

## ACCESS and High School Concurrent Programs

In conjunction with CU-Boulder academic departments, ACCESS (Available Credit Courses for Eligible Special Students) enables nondegree students to enroll in Boulder main campus undergraduate and graduate credit courses after most degree-seeking students have registered. Colorado high school juniors and seniors interested in the challenge of university course work may enroll in ACCESS as part of the High School Concurrent Program. In addition to earning college credit, students may also earn credit toward high school graduation requirements.

## Extraordinary and Contract Credit Programs

Through Continuing Education, academic departments can offer special courses that target audiences both on and off campus and provide academic credit for those offerings. Once a course proposal is submitted, Continuing Education coordinates the approval process and provides administrative support to the course initiator. Programs initiated from outside the university community are also considered for approval as well as noncredit and certificate programs.

## CU Complete

The goal of CU Complete is to assist former students in the completion of degrees they began at CU in the past. Advisors work with each student individually and offer a degree analysis, recommendations, resources, and assistance in completing remaining requirements.

## Science Discovery

Science Discovery is a hands-on science, mathematics, and technology outreach program that serves over 1,500 teachers and 25,000 K–12 students each year. Its mission is to stimulate scientific

interest, understanding, and literacy through the use of university resources and academic expertise. Core programs include over 500 annual classroom presentations throughout Colorado; approximately 200 summer and after-school classes for ages 4–14; a series of statewide professional development workshops for teachers; and various outdoor environmental education classes.

## International English Center

The International English Center (IEC) offers language learning, cultural adjustment, and academic preparation programs for international students planning to matriculate at universities and for members of the campus and local community with limited English proficiency. The IEC also contracts with corporate groups to provide language training and professional development courses.

## Outreach: Reaching Off Campus and into Communities

Extending educational opportunities to the citizens of Colorado is a vital part of the university as well as the mission of the Division of Continuing Education and Professional Studies. CU-Boulder faculty and students provide a wide variety of outreach programs to communities across Colorado. These programs extend the scholarship of the faculty and the educational resources of the university and serve various educational, social, economic, and cultural needs. The division annually supports these efforts by designating funds for the CU-Boulder Outreach Committee along with contributions from the offices of the chancellor and the provost. The committee awards funding to faculty projects designed specifically for external audiences that highlight faculty research, creative work, and teaching. Projects feature an extensive range of disciplines, including everything from history, dance, and musical arts to physics, math, and engineering. Visit [outreach.colorado.edu](http://outreach.colorado.edu).

## Summer Session and Maymester at CU-Boulder

Summer Session offers over 500 campus courses and enrolls about 8,000 students in a relaxed, comfortable learning environment. Online and on-campus courses are available. Courses are available to students who wish to enhance or accelerate their academic progress. Courses are also open to students visiting from other colleges, teachers, high school students, or others interested in pursuing their professional development or enrichment.

Maymester is a special three-week Summer Session term immediately following the end of spring semester. It provides intense, accelerated courses for those who need academic credits in an abbreviated time period.

# Leadership, Certificate in the Study and Practice of

The certificate program in leadership development seeks to expand a students' capacity to be effective in leadership roles and opportunities during their time at CU and in their future professions. The program enhances a student's self-awareness, systemic thinking, creativity, and problem-solving skills. This development unfolds over a student's undergraduate career and is maximized by a variety of courses and experiences that challenge, support, and provide students with increased understanding of what they are learning and how it fits into the larger world. The Certificate in the Study and Practice of Leadership integrates the variety of experiences into a context that is likely to be useful when undertaking new leadership roles and responsibilities. Faculty and staff skilled at weaving those experiences and courses in connected and meaningful ways facilitate this developmental process.

A leadership certificate can enhance the undergraduate experience and better prepare students both as citizens and leaders in whatever profession they might seek to enter. The program recognizes the need for individuals to take leadership roles in all professions and sectors of society. It is the belief of the program that leadership can be learned in formal classes, community-based leadership opportunities, mentoring and internship settings, as well as through a range of collaborative leadership activities.

For more information about the Certificate in the Study and Practice of Leadership, see [leadershipRAP.colorado.edu/certificate-study-and-practice-leadership](http://leadershipRAP.colorado.edu/certificate-study-and-practice-leadership).

## Program Requirements

This certificate program has an 18-credit-hour requirement comprised of lower- and upper-division courses. Undergraduate students working toward this certificate are usually affiliated with one of the following academic programs:

- Leadership Residential Academic Program at Williams Village
- Presidents Leadership Class (PLC)
- INVST Community Studies (INVST)
- ROTC programs

Each of these programs has defined particular academic courses within their programs to be certificate requirements. Students may also apply elective courses from other disciplines on campus toward the total credits required for the certificate. Students in the leadership programs at PLC, INVST, and the Leadership RAP programs are required to do an internship that is overseen by one of the program directors. Students in all four programs participate in either a 4-credit-hour capstone course during their senior year or a capstone project mentored by their academic program director. To qualify for the certificate, students must maintain a 3.000 GPA in the required course work.

## *Leadership Residential Academic Program at Williams Village*

For certificate requirements, see [The Leadership RAP Program at Williams Village](#).

## Colleges & Schools

- > [Architecture & Planning](#)
- > [Arts & Sciences](#)
- > [Business](#)
- > [Education](#)
- > [Engineering & Applied Science](#)
- > [Graduate School](#)
- > [Journalism & Mass Communication Program](#)
- > [Law](#)
- > [Music](#)
- > [Other Academic Programs](#)
- > [Continuing Education and Professional Studies](#)
- Leadership, Certificate in the Study and Practice of**
- > [The Leadership Residential Academic Program at Williams Village](#)
- > [Norlin Scholars Program](#)
- > [Preprofessional Programs](#)
- > [Presidents Leadership Class](#)
- > [Reserve Officer Training Corps](#)
- > [Technology, Arts, and Media Program](#)

## *Presidents Leadership Class*

PLC certificate requirements are listed under the [Presidents Leadership Class](#).

## *INVST Community Studies*

- Selection criteria govern admissions.
- Four required theory courses plus community based service-learning experiences (18–24 credits).
- Minimum of 15 hours of upper-division courses.
- INVS 4932 Senior Capstone Course and/or Project.
- Minimum total credit hours: 18 with a 3.000 GPA

## *Reserve Officer Training Corps Programs*

- Admission to CU-Boulder and ROTC required. (Some courses are open to all CU-Boulder students.)
- Required summer field training program(s).
- 4–8 required courses in ROTC (12–22 hours).
- Minimum of 15 hours of upper-division courses.
- Additional courses from Recommended Leadership Courses to complete the 18-hour requirement.
- Senior Capstone Course and/or Project (4 hours).
- Minimum total credit hours: 18 with a 3.000 GPA.

## *The Capstone Course and Project*

The capstone project is designed to synthesize the leadership work students have completed during their undergraduate studies. Together with the program's faculty, students design a format that demonstrates their cumulative learning and development and reflects their leadership abilities. Like oral examinations at the graduate level, these projects are an opportunity for students to present a body of work that demonstrates what they have learned as they address some of the critical questions associated with leadership development and their role as a leader in the 21st century.

In the capstone course, Critical Issues in Leadership, LDSP 4010 or PRLC 4010, students explore leadership issues across disciplines. Leadership education is multi-disciplinary and students need to know how to assess research and writing from different perspectives. Students read, discuss, and write critical evaluations of contemporary leadership theory from ethical, military, community building, and business perspectives.

## *Internships*

Internships are an agreed-upon experience in a work setting that is driven by intentional learning goals and accompanied by sustained reflection. The internship provides students with an opportunity to apply the skills and knowledge gained through their leadership studies. During the semester students use the concepts and theories learned in the classroom to analyze and understand the host organization. In addition, students are asked to reflect on the complexities of leadership and the personal challenges that they face in practicing and refining their own leadership skills.

# The Leadership Residential Academic Program at Williams Village

The Leadership Residential Academic Program at Williams Village houses two academic programs for students with an interest in leadership studies: the **Ethnic Living and Learning Community Leadership Studies Program (ELLC)** and the **Chancellor’s Leadership Studies Program (CLSP)**.

**Admission and Enrollment.** Students select one of the leadership programs in the Leadership RAP during the housing application process prior to beginning their freshman year. When students choose their residence hall they are given the option to enroll in one of these programs. Most participants reside at Williams Village. More information about these programs can be found at [LeadershipRAP.colorado.edu](http://LeadershipRAP.colorado.edu).

## The Ethnic Living and Learning Community Leadership Studies Program

The Ethnic Living and Learning Community Leadership Studies Program (ELLC) offers students a multicultural living and learning experience and the opportunity to study leadership from a multicultural and global perspective. Students are required to take a 3-credit-hour leadership course and the ELLC Practicum each semester of their freshman year. In these courses, students explore their roles and responsibilities in society including the moral and ethical dimensions of leadership. Students also learn about contemporary issues related to leadership and take part in activities that develop teamwork, ethical decision making, and problem solving. Credits earned from these courses may be applied toward graduation as well as a Certificate in the Study and Practice of Leadership.

### *ELLC Curriculum and Semester Credit Hours*

- LDSP 1000 The Foundations of 21st Century Leadership (fall)—3
- LDSP 2400 Understanding Privilege and Oppression in Contemporary Society (spring)—3
- LDSP 2910 Field Practicum (1 credit each semester of freshman year)—1
- LDSP 3100 Multicultural Leadership: Theories, Principles and Practices—3
- LDSP 4010 Critical Issues in Leadership—4

### **Fees and Scholarship Opportunities**

There is a \$850 program participation fee. Some scholarships to cover the fee are available for students with financial need. A LEAD Alliance scholarship of \$1,500 per year is also available to qualifying ELLC students.

## The Chancellor’s Leadership Studies Program

### Colleges & Schools

> [Reserve Officer Training Corps](#)

> [Technology, Arts, and Media Program](#)

---

The Chancellor's Leadership Studies Program (CLSP) examines the academic foundations of leadership and engages students in practical applications of leadership through simulations and class projects. Utilizing an experiential learning model, students learn the basics of decision making, problem solving, dialogue skills, ethical reflection, and an understanding of how institutions and communities solve problems. Students take a required 3-credit-hour leadership course fall semester and must take at least one CLSP course in the spring. Credits earned from these courses may be applied toward graduation as well as a Certificate in the Study and Practice of Leadership.

### ***CLSP Curriculum Semester Credit Hours***

- LDSP 1000 The Foundations of 21st Century Leadership (fall)—3
- LDSP 1571 Topics in Leadership—1
- LDSP 2400 Understanding Privilege and Oppression in Contemporary Society (spring)—3
- LDSP 2910 Field Practicum—1
- LDSP 3100 Multicultural Leadership: Theories, Principles and Practices —3
- LDSP 4010 Critical Issues in Leadership—4

### **Fees and Scholarship Opportunities**

There is a \$850 program participation fee.

## ***Certificate Program***

### **Certificate in the Study and Practice of Leadership**

ELLC and CLSP students who complete 10 credits of approved lower-division courses and 8 credit hours of approved upper-division courses with a 3.000 GPA as well as a pre-approved supervised internship are eligible to earn a Certificate in the Study and Practice of Leadership. The certificate is comparable to a minor in leadership studies and is noted on a student's transcript at graduation.

### ***Required Courses and Semester Credit Hours***

#### **Freshman Year**

- LDSP 1000 The Foundations of 21st Century Leadership—3
- LDSP 2400 Understanding Privilege and Oppression in Contemporary Society —3
- Students must take 2 credits from the following courses. These classes are repeatable for credit:
  - LDSP 1561 Compassionate Leadership and Mindfulness—1
  - LDSP 1571 Topics in Leadership—1
  - LDSP 2910 Field Practicum—1

#### **Sophomore Year**

- One approved lower-division elective—3

#### **Junior Year**

- LDSP 3100 Multicultural Leadership: Theories, Principles, and Practices— 3
- One approved upper-division elective—1-3
- Internship—can be completed during academic year or during the summer.

#### **Senior Year**

# Norlin Scholars Program

Norlin Scholars is an interdisciplinary intellectual community in which students receive an education personally tailored to fit their interests and goals in any of CU-Boulder's undergraduate colleges or schools. Geared toward students seeking a liberal education or preparing for graduate or professional schools, the program offers academic challenge, breadth of experience, and close work with faculty.

Benefits of being a Norlin Scholar include:

- \$4,000 scholarship per academic year
- additional funding for enrichment activities like research or study abroad
- small, invigorating core and elective courses
- research or creative projects with faculty
- access to top scholarship advising and guidance
- opportunities for professional training and development
- a stimulating, interdisciplinary peer group

## Financial Information

Each Norlin Scholar receives a merit-based award of \$4,000 per year with the possibility of additional funds for enrichment projects. Students who enter the program as freshmen receive a four-year award, contingent upon academic progress; students who enter as rising juniors receive a two-year award, contingent upon academic progress. Students who need additional financial assistance should complete the FAFSA (Free Application for Federal Student Aid).

## Applying to the Program

A flexible selection system ensures that students with many different interests and talents are accepted as Norlin Scholars. Students may apply either as high school seniors (to enter the program as incoming first-year students) or as second-semester sophomores in college (to enter the program as juniors). Colorado residents as well as out-of-state and international students are eligible. Applicants should demonstrate excellent academic and/or creative ability and must have already applied to the university for admission in order to apply for the scholarship. More information and application details can be found at [enrichment.colorado.edu/norlinscholars](http://enrichment.colorado.edu/norlinscholars) or call 303-735-6802.

The course code for this program is NRLN.

## Preprofessional Programs

Preprofessional advising resources have been developed at CU-Boulder to help undergraduate students and previously graduated students prepare for later study at professional schools. Except for prejournalism, CU-Boulder does not offer preprofessional undergraduate majors or degrees. Completion of preprofessional prerequisites does not guarantee later admission to a professional school. However, preprofessional advisors are well-equipped to provide information about professional schools within Colorado and beyond, and can help students to prepare well for later professional study.

## Prehealth Programs

Students can prepare to enter the undergraduate professional health science program at the Anschutz Medical Campus of University of Colorado Denver in the area of nursing by taking courses on the Boulder campus.

Students whose goals include entering the medical, dentistry, physical therapy, physician assistant, pharmacy, or public health programs and schools at the University of Colorado Denver, or the veterinary medicine or occupational therapy programs at Colorado State University in Fort Collins, can complete any undergraduate major at CU-Boulder. In most cases, these students are required to complete a baccalaureate degree before entering professional school. In fact, a baccalaureate degree is recommended for most health professions.

At the time of application to a professional school, students are judged on several factors, including performance in undergraduate courses. For this reason, no required course may be taken on a *pass/fail* basis. Some fields require specific preprofessional examinations before application. For most fields, interviews are an essential part of the application process.

In all cases, admission committees are concerned with students' compassion, coping, and decision-making abilities, intellectual capabilities, realistic self-appraisal, sensitivity in interpersonal relations, and staying power (physical and motivational). In addition to formal course work, students should have experience in people-related activities (especially those related to their field of choice), so they can be more certain of their motivation for health careers. Also, health-related activities expose premed and other health science hopefuls to various patients and illnesses. The health professions require, or strongly recommend, such experience.

Some of the professional programs at the Anschutz Medical Campus give preference to Colorado residents and residents of WICHE (Western Interstate Commission on Higher Education) states; interested students should check with individual programs for specific policies. Students from other states usually can obtain at CU-Boulder the preprofessional courses required by their state schools, but should check with those schools in advance. Students are encouraged to apply to their state school, as well as to other public and private professional schools, to increase their chances of gaining acceptance to the professional program of their choice.

During the preprofessional years, personal intellectual development leads many students to change professional goals. Since there are usually more applicants for these programs than there are spaces

## Colleges & Schools

> [Architecture & Planning](#)

> [Arts & Sciences](#)

> [Business](#)

> [Education](#)

> [Engineering & Applied Science](#)

> [Graduate School](#)

> [Journalism & Mass Communication Program](#)

> [Law](#)

> [Music](#)

> [Other Academic Programs](#)

> [Continuing Education and Professional Studies](#)

> [Leadership, Certificate in the Study and Practice of](#)

[The Leadership Residential Academic Program at Williams Village](#)

> [Norlin Scholars Program](#)

> [Preprofessional Programs](#)

> [Presidents Leadership Class](#)

> [Reserve Officer Training Corps](#)

> [Technology, Arts, and Media Program](#)

available, many students need to pursue alternative goals. Under these circumstances, students should plan college programs to give themselves the greatest flexibility in considering other vocations.

Advising for preprofessional study in the health sciences is conducted through the Preprofessional Advising Office in the University Club. Check the prehealth advising website at [www.colorado.edu/aac/prehealth.html](http://www.colorado.edu/aac/prehealth.html) for information on prerequisite courses, events, volunteer opportunities, student prehealth organizations, applications, and many other useful resources. Students should attend a prehealth advising session at orientation and then schedule an appointment with a prehealth advisor ([aac.colorado.edu](http://aac.colorado.edu)) early in their undergraduate careers to help plan course work and extracurricular experience in preparation for applying to programs of their choice. CU-Boulder also offers an extensive array of workshops and informational meetings, practice interviews, a fall speaker series, and a spring Health Professions Information Day.

## Prejournalism

A specific prejournalism and mass communication option is offered at CU-Boulder in the College of Arts and Sciences. Students complete two prerequisite courses while working toward arts and sciences core curriculum requirements. See the School of Journalism and Mass Communication at [journalism.colorado.edu](http://journalism.colorado.edu) for more information.

## Prelaw

Students who plan to apply to law school upon completing their baccalaureate degree do not have to complete any specific requirements for admission to law school. Instead, they should major in the discipline that best suits their intellectual interests and talents. Prelaw students should seek a rigorous and broad-based education that will ensure them a fundamental understanding of American society and its institutions. Students should become familiar with mathematical analysis and scientific reasoning, and develop excellent oral and written communication skills.

Prelaw advising is available in the Preprofessional Advising Center. In addition, there are faculty members who have special interest and expertise in the theoretical and practical aspects of the law and judicial systems. These faculty advisors are available for consultation with students on the CU-Boulder campus. Contact the Preprofessional Advising Center in Old Main 1B-90 for more information.

# Presidents Leadership Class

The Presidents Leadership Class (PLC) is a specially designed academic curriculum that focuses on leadership development, personal development, and community service initiatives. Skills are developed in an interdisciplinary, experiential environment through exposure to government, education, the humanities, business, and science. Students from all of the schools and colleges participate in the Presidents Leadership Class curriculum as a part of their regular course work.

The Presidents Leadership Class is a program of CU-Boulder and the Presidents Leadership Institute, and is overseen by a Board of Trustees representing Colorado business, educational, nonprofit, and government communities.

## Admission and Enrollment

Admission to the Presidents Leadership Class is considered one of the highest honors awarded to incoming University of Colorado Boulder students. Presidents Leadership Class students are admitted prior to the beginning of their first year. Selection criteria include academic excellence, demonstrated commitment outside of self, demonstrated leadership potential, and uniqueness of contribution. Each year, 50 first-year students are enrolled, comprising both Colorado residents and nonresidents. A separate admission application must be obtained from the PLC office and returned prior to February 15. Applications may be obtained by visiting the website at [www.presidentsleadershipclass.org](http://www.presidentsleadershipclass.org) or by calling the PLC office at **303-492-4PLC**.

Only students who are accepted into the Presidents Leadership Class are eligible to enroll in PLC courses. Students receive arts and sciences core credit in ideals and values for PRLC 1810 Leadership and Ethics; and core credit in contemporary societies for PRLC 1820 Community Issues in Leadership.

## Academic Program

Although there are many unique aspects of each leadership situation, leaders generally follow three basic steps when faced with a leadership situation: 1) try to get a read on the existing situation, 2) set a strategy to achieve a desired outcome, and 3) execute the strategy.

This fundamental human process—read, set, execute—has strong roots in basic psychological processes (i.e., stimulus, thought, response), but the steps can happen with varying degrees of quality. Because PLC's mission is to develop extraordinary leaders, research was done on the differences in quality between the read-set-execute process that ordinary leaders use and the read-set-execute process that extraordinary leaders use. The research determined that the routes to ordinary leadership are different than those to extraordinary leadership.

Extraordinary leaders need to read situations with insight, generate incisive strategy, and then execute with stunning results. The PLC Strategic Academic Plan is built upon developing six core leadership skills: information literacy, critical thinking, applied quantitative ability, writing, oratory, and group process. The six skills executed in an integrative manner provide the key fundamentals for

students to read, set, and execute in an extraordinary manner.

For more information on the PLC Academic Plan and the research behind it, go to [www.presidentsleadershipclass.org](http://www.presidentsleadershipclass.org).

## *Required Courses*

- PRLC 1810 Ethical Leadership
- PRLC 1820 Community Leadership
- PRLC 2820 Multilevel Leadership
- PRLC 3810 Global Leadership
- LDSP 4010 Leadership Capstone (only required for Leadership Certificate)

## Scholarship Programs and Opportunities

PLC students receive a merit-based scholarship of \$1,000 to over \$12,000 (dependent upon participation). Students must enroll in PRLC course work to maintain their scholarship.

Scholars are also eligible to be selected for a variety of other merit-based scholarships only available to PLC students, including the FirstBank Colorado Scholarship Fund (base scholarship of \$6,000 plus additional funding depending on endowment earnings), the Alvin G. Flanigan Scholarship Fund (annual \$1,000 minimum awards), the Walker Family Scholarship Fund (annual \$500 minimum awards), the Michael Lee Hoelscher Memorial Scholarship (annual \$2,000 award), and additional scholarships available only to the Presidents Leadership Class scholars.

The course code for this program is PRLC.

## *Certificate Program*

### University of Colorado Boulder Leadership Certificate

The University of Colorado Boulder offers a certificate in the Study and Practice of Leadership. The certificate is comparable to a minor in leadership studies and is permanently marked on the student's transcript to certify that he or she has completed a focus in leadership studies at the undergraduate level.

Certificate requirements are as follows:

- Complete a minimum of 12 credit hours of PRLC courses during year one and two of the program: PRLC 1810, PRLC 1820, PRLC 2820, PRLC 3810.
- Complete a minimum of 4 credit hours of upper-division PRLC course work: LDSP 4010.
- Complete 3 additional credit hours of approved upper-division course work outside of PLC. Approved courses are listed at [www.colorado.edu/chancellorsrap/lcelectives.html](http://www.colorado.edu/chancellorsrap/lcelectives.html) and a student may also petition to have an unlisted course accepted.
- Participation in practica and/or internships. These may be built into courses or conducted outside of courses.
- Receive an overall 3.000 average GPA for all required Leadership Certificate courses.

[General Information](#)

[Programs of Study](#)

[Colleges & Schools](#)

[Undergraduate Admission](#)

[Graduate Admission](#)

[Courses](#)

## Reserve Officer Training Corps

Enrollment in Reserve Officer Training Corps (ROTC) programs is open to both men and women, and ROTC lower-level leadership courses are open to all students whether or not they contract with ROTC.

All services provide undergraduate and selected graduate students with the opportunity to combine academic study with a military officer's educational program. The three services conduct courses in their respective areas leading to a regular or reserve commission upon graduation. The Navy also offers a program leading to a regular commission in the Marine Corps.

The course codes for these programs are AIRR, MILR, and NAVL.

## Air Force Aerospace Studies

U.S. Air Force ROTC offers several programs leading to a commission in the U.S. Air Force upon receipt of at least a baccalaureate degree.

### *Standard Four-Year Program*

This standard program is designed for incoming freshmen, or any student with four years remaining until degree completion. It consists of three parts: the general military course (GMC) for lower-division (normally freshman and sophomore) students; the professional officer course (POC) for upper-division students (normally juniors and seniors); and the leadership laboratory (LLAB) attended by all cadets. Completion of a four-week summer field training program is required prior to commissioning.

### *Modified Four-Year Program*

Certain undergraduate and graduate students may be eligible for this program. It is offered to full-time, regularly enrolled degree students and requires at least five semesters of full-time college work (undergraduate or graduate level, or a combination). May only be available to students pursuing academic majors in demand. Those selected for this program must complete the field training program during the summer months as a prerequisite for entry into the professional officer course the following fall semester.

### *Leadership Lab*

All AFROTC cadets must attend leadership lab (two hours per week). The laboratory involves a study of Air Force customs and courtesies, drill and ceremonies, career opportunities, and the life and work of an Air Force junior officer.

### *Other Air Force ROTC Programs*

Other programs are frequently available based on current Air Force needs. Any AFROTC staff member in Boulder (303-492-8351) can discuss the best alternatives. Interested students should make initial contact as early as possible to create the best selection opportunity, as selection is on a competitive basis. There is no obligation until a formal contract is entered.

[Norlin Scholars Program](#)

[Preprofessional Programs](#)

[Presidents Leadership Class](#)

[Reserve Officer Training Corps](#)

[Technology, Arts, and Media Program](#)

## *Air Force College Scholarship Program*

Normally a scholarship board is held at the end of each semester for students who have at least one semester of full-time college credit. Prior participation in AFROTC may not be required to compete for these scholarships. Students can compete for scholarships in most academic majors. Students selected for this program receive scholarships that pay up to \$18,000 in tuition, a book allowance, nonrefundable educational fees, and subsistence each month, tax-free. These scholarships are available in all academic disciplines and are two to three years in length.

## *USAF Medical Programs*

Qualified nursing students can compete for nursing scholarships. These scholarships can lead to a career as an Air Force officer, serving as a nurse. Students may also compete for a prehealth designator. If selected, they would receive a scholarship for medical school.

## *Air Force ROTC Course Credit*

AFROTC credit for graduation varies with each college. Students should contact the appropriate college for credit determination.

## *Registration*

CU-Boulder students who wish to register for AFROTC classes sign up for them through the normal course registration process.

## **Military Science (U.S. Army)**

The Department of Military Science is a leadership program leading to an officer's commission in the Active Army, Army Reserve, or National Guard in conjunction with an undergraduate or graduate degree. Military science courses supplement a regular degree program and offer practical leadership and management experience. Scholarships are available for those that qualify. Additionally, financial benefits may be available for enlisted soldiers.

## *Four-Year Program*

For college freshmen, the four-year program consists of two phases: the basic course (freshman and sophomore years) and the advanced course (junior and senior years).

**Basic courses (MSI & MSII)** cover Army history and organization as well as military leadership and management. Labs provide the opportunity to develop leadership experience while learning basic military skills. Participating in the basic courses incur no military obligation, except for those receiving an Army scholarship.

**Advanced courses (MSIII & MSIV)** cover leadership, tactics and unit operations, training techniques, military law, and professional ethics. Additionally, a four-week summer leadership camp at Fort Lewis, Washington, is a requirement between the Junior and Senior year, and is a prerequisite for commissioning. Students enrolled in the advanced courses must have completed the basic courses (or the equivalent) and obtain permission from the professor of military science (PMS).

## *Two-Year Program*

For college students entering as a sophomore, the two-year program consists of the advanced courses, preceded by a four-week summer ROTC leadership training course (LTC) at Ft. Knox, Kentucky. Inquiries into LTC should be directed to the Department of Military Science prior to completing the sophomore year. LTC is a paid internship and the academic equivalent to the MS1/MSII basic courses.

Prior service and enlisted soldiers who have completed basic training may be eligible to enroll in the advanced course without attending LTC or completion of the ROTC basic courses. Enlisted soldiers

pursuing advanced placement must obtain permission from the PMS.

### *Scholarship Programs*

College freshmen, sophomores, and juniors may be eligible for four-, three-, and two-year scholarships, regardless of academic major. Interested students must enroll in Army ROTC and meet eligibility requirements, including an army physical fitness test.

High school scholarship applicants may be eligible for four- and three-year college scholarships. High school students can apply during their junior year and before January 10 of their senior year,

All scholarship recipients receive tuition and fees, a \$1,200 book allowance, and a stipend of \$300–500 per month during the academic year. Students interested in scholarships should contact the enrollment and scholarship officer at [armyrotc@colorado.edu](mailto:armyrotc@colorado.edu), **303-492-3549**, or **303-492-6495**.

### *Simultaneous Membership Program*

College sophomore and juniors who want additional leadership training, may participate with an Army Reserve or Army National Guard unit as an officer trainee. Students participating in this program earn approximately \$240 in monthly drill pay, plus a monthly ROTC stipend of \$300–500. Additionally, SMP participants receive Army National Guard or reserve tuition benefits of up to \$4,500 per year. Enlisted and prior service students retain their authorized GI benefits.

### *Army ROTC Course Credit*

ROTC is an elective credit in most departments. Individual academic advisors verify if ROTC classes count toward the student's degree.

### *Registration*

Amy ROTC classes begin with MILR prefix. Register for classes through the normal course registration process. For more information, contact the enrollment and scholarship officer at CU-Boulder at [armyrotc@colorado.edu](mailto:armyrotc@colorado.edu), **303-492-3459**, or **303-492-6495**. See also the AROTC website at [www.colorado.edu/arotc](http://www.colorado.edu/arotc).

## Naval Science

Naval science course work is offered in the fall and spring semesters only. All naval science students enroll in NAVR 1010, 2020, 4010, and 4020. Those desiring commissions in the U.S. Navy enroll in NAVR 3020, 3030, 3040, and 4030 for upper-division work. Those desiring commissions in the U.S. Marine Corps enroll in NAVR 3101 and 4101 for upper-division work.

### *Scholarship Programs*

NROTC offers two-, three-, and four-year scholarship programs, and two-year and four-year college (non-scholarship) programs. Navy scholarships may be earned while students are enrolled in the college program. Scholarship students receive tuition and fees, a \$375 book allowance per semester, and a \$250 per month subsistence allowance. This subsistence allowance gradually rises to \$400 by the student's senior year. College program students receive a \$350 per month subsistence allowance their junior year and \$400 per month subsistence allowance their senior year in the program.

Naval science (Navy option) students must complete one year of calculus, physics, and English, and one semester of American military history or national security policy, and a cultural course. Students should check with their naval science instructor to determine specific course offerings that fulfill the above requirements.

### *Degree Credits*

The number of NROTC semester hours of credit that may count toward degree requirements is determined by the individual colleges. Students should therefore consider their college's policy when formulating their degree plan.

### *Commissioned Service*

Opportunities for commissioned service are presently available in the unrestricted line (surface, subsurface, aviation, special warfare, and special operations) and staff corps (nursing) in the U.S. Navy. Opportunities in ground and aviation specialties are available in the U.S. Marine Corps. Students interested in other programs leading to commissions in either the U.S. Navy or U.S. Marine Corps are encouraged to contact the NROTC unit on campus. All commissioning programs require that the student be working toward, and receive, a college degree.

# Technology, Arts, and Media Program

The ever-expanding landscape of the networked age requires new and adaptable skill-sets, within both academic and commercial paradigms. In order to address this need, the Technology, Arts, and Media Program, based within the ATLAS Institute, offers two undergraduate programs: a minor in Technology, Arts, and Media (MTAM) and a smaller Certificate in Digital Media (CDM). The minor is intended for students who wish to pursue research and careers related to digital media, whereas the certificate is intended for students who are interested in the fundamentals of digital media production.

The course code for this program is ATLS.

## Minor in Technology, Arts, and Media (MTAM)

The minor in Technology, Arts, and Media (MTAM) provides a broad multidisciplinary perspective that integrates technological skills with a critical, theoretical, and historical understanding of technology, media, and the arts. The MTAM curriculum includes creative production courses, as well as classes that impart foundational knowledge and critical perspectives on the role of technology in society. Students from a wide range of majors receive instruction in digital media production, design, art criticism, computer programming, information technology, data visualization, media and societal analysis, and project development.

### Minor Goals

- to prepare the next generation of artists, designers, and media producers for the networked age
- to give students the necessary technical, theoretical, and historical backgrounds so they can contribute to the development of new functionalities and aesthetics for computer media
- to facilitate the exploration of the intersection of technology and other specific disciplines
- to produce active and critically aware participants and producers of technology

### Minor Requirements

- A minimum of **21** credit hours:
  - ATLS 2000 The Meaning of Information Technology
  - ATLS 3010 Digital Media 1
  - ATLS 3020 Digital Media 2
  - ATLS 3030 Fundamentals of Digital Design
  - Critical thinking in technology elective\*
  - Invention and practice elective\*
  - ATLS 4010 Capstone
- Students must maintain a 2.000 GPA within all MTAM courses.
- Students must earn a minimum grade of C in all courses counted for the minor.

## Colleges & Schools

> [Presidents Leadership Class](#)

> [Reserve Officer Training Corps](#)

> [Technology, Arts, and Media Program](#)

- Students may not take more than one elective course from a single department (this does not apply to ATLS courses).
- Course work used to satisfy MTAM requirements cannot be taken *pass/fail*.
- ATLS core courses cannot be substituted (ATLS 2000, ATLS 3010, ATLS 3020, ATLS 3030, ATLS 4010).
- A minimum of 15 credit hours must be taken on the Boulder campus.
- Failing to meet the minimum grade for any individual ATLS core course twice will result in automatic removal from the MTAM program.

\*See [tam.colorado.edu](http://tam.colorado.edu) for a current listing of approved elective courses.

## Course Substitutions

- Course work not on the approved elective list (including course work from another University of Colorado campus, another institution, Study Abroad, or Semester at Sea) must be approved by the MTAM Faculty committee. Students must complete a Course Substitution Petition Request Form and attach supporting documentation (syllabus).
- Substitution requests will not be considered if the student has already satisfied the requirement with an approved elective course.

## Certificate Program

### Certificate in Digital Media (CDM)

The Certificate in Digital Media (CDM) provides a fundamental understanding of information technology and digital media production. The program will motivate students to think critically about technology and its impacts upon society.

### Certificate Goals

- to equip students with a basic digital media skill-set
- to transform students from passive users of technology into active producers of technology

### Certificate Requirements

- A minimum of 12 credit hours:
  - ATLS 2000 The Meaning of Information Technology
  - ATLS 3010 Digital Media 1
  - Critical thinking in technology elective\*
  - Invention and practice elective\*
- Student must maintain a 2.000 GPA within all CDM courses.
- Students must earn a minimum grade of *C* in all courses counted for the certificate.
- Course work used to satisfy CDM requirements cannot be taken *pass/fail*.
- Core ATLS courses cannot be substituted (ATLS 2000, ATLS 3010).

\*See [tam.colorado.edu](http://tam.colorado.edu) for a current listing of approved elective courses.

# Undergraduate Admission

THE OFFICE OF ADMISSIONS WELCOMES inquiries from prospective students regarding undergraduate admission. Through the admission process, the university seeks to identify applicants who will successfully complete a collegiate academic program. Admission is based on many criteria, including high school GPA or GED test scores, high school rank, the quality of course work, college entrance test scores, personal essays, and the extent to which the [minimum academic preparation standards \(MAPS\)](#) have been met.

Inquiries relating to undergraduate admission to the University of Colorado Boulder may be addressed to:

**Office of Admissions**, Regent Administrative Center 125, University of Colorado Boulder,  
552 UCB, Boulder, CO 80309-0552  
**303-492-6301** • TTY 303-492-5998 (for hard of hearing persons)

To find admission information online, go to [admissions.colorado.edu/undergraduate](http://admissions.colorado.edu/undergraduate).

For admission requirements to graduate degree programs, see the [Graduate School](#) section and individual college and school sections.

## Undergraduate Admission

> [Visiting the Campus](#)

> [General Admission Information](#)

> [Freshman Applicants](#)

> [Transfer Applicants](#)

> [Minimum Academic Preparation Standards \(MAPS\) Table](#)

> [Advanced Placement \(AP\) Table](#)

> [International Baccalaureate \(IB\) Table](#)

> [How to Apply](#)

> [Other Applicants](#)

## Visiting the Campus

Prospective students and their families are welcome to visit the Office of Admissions in Regent Administrative Center 125 between 9:00 a.m. and 5:00 p.m. (summer hours are 8:30 a.m. to 4:30 p.m.), Monday through Friday, except on holidays. Daily information sessions, walking tours of the campus, and special all-day visit programs are offered. Although interviews are not used in the decision-making process, you are invited to visit the campus.

The best time to see the campus is when classes are in session (September through mid-December and mid-January to early May, with the exception of spring break); see the [academic calendar](#) for specific dates. There are dates when information sessions, campus tours, and visit programs are not held due to holidays or university closures. It is important to check our website for the most current information.

## Reservations

Reservations are required for all information sessions, tours, and visit programs and can be made through your MyCUBoulder ([mycuboulder.colorado.edu](http://mycuboulder.colorado.edu)) account. For complete visit program descriptions, dates, reservation forms, and campus maps, go to [www.colorado.edu/visit](http://www.colorado.edu/visit), or call **303-492-6301**. Visit program dates for future academic years are added to the website as they become available (usually in August each year).

## Daily Information Sessions and Campus Tours

Information sessions with an admission counselor are held Monday through Friday at 9:30 a.m. and 1:30 p.m. Following the information sessions are walking tours of the campus led by student guides, beginning at 10:30 a.m. and 2:30 p.m. Combined information sessions and tours are also held at 10:30 a.m. most Saturdays.

## Campus Visit Programs

An excellent way to become acquainted with the campus is to participate in one of the campus visit programs specially designed for prospective students and parents.

These programs, offered on selected Fridays and Saturdays throughout the year, provide prospective students and their families the chance to participate in information sessions, take a campus tour, learn more about residence hall life, talk with student and parent panels, and meet with campus representatives, as well as attend classes or listen to a sample lecture. To make reservations for any or all of these visit programs, go to [www.colorado.edu/visit](http://www.colorado.edu/visit) or call the Office of Admissions at **303-492-6301**.

# General Admission Information

## Choosing a Program of Study

When applying for admission, students need to choose a major in one of CU-Boulder's colleges or schools. Applicants who have not decided on a major can select an "open option" major. This allows students to explore different options during their first and/or second year of study. After this time, they will decide on a specific major for their remaining years. Students can also change their area of study, but this can result in additional course requirements that may add to the number of semesters necessary to complete a degree.

Although applicants can apply to only one CU-Boulder college or school, after enrollment they can apply for transfer to another Boulder college or school through the Intrauniversity Transfer (IUT) process. Criteria for transferring from one college or school to another are competitive, and each college or school establishes its own standards.

## Double Degrees, Double Majors, Minors, and Certificate Programs

There are several programs that allow students to include additional areas of academic concentration beyond their chosen major. Two different degrees, either from the same college or school, or degrees from different colleges or schools, may be earned, providing certain conditions are met. Students are admitted to one major and degree program initially but may pursue a second degree during their first semester of enrollment. Minor programs are offered in a number of undergraduate departments and programs in the College of Arts and Sciences, the Leeds School of Business, and the College of Engineering and Applied Science. Certificate programs in arts and sciences, business, engineering, and music fields are also available.

## Preprofessional Study

Preprofessional advisors are available to help students interested in medicine, dentistry, physical therapy, veterinary medicine, nursing, pharmacy, physician assistant, other allied health sciences, or law. Students interested in these fields may apply to any of the majors open to new undergraduates, including the open option major in the College of Arts and Sciences. Students interested in one of the undergraduate or graduate health sciences programs offered at the University of Colorado Anschutz Medical Campus may complete preprofessional work on the Boulder campus. Admission is competitive, but preference to all health sciences programs is given to Colorado residents.

For more information, visit [www.colorado.edu/aac](http://www.colorado.edu/aac) or see Preprofessional Programs in the Other Academic Programs section.

## Music Applicants

## Undergraduate Admission

> [Visiting the Campus](#)

> **General Admission Information**

> [Freshman Applicants](#)

> [Transfer Applicants](#)

> [Minimum Academic Preparation Standards \(MAPS\) Table](#)

> [Advanced Placement \(AP\) Table](#)

> [International Baccalaureate \(IP\) Table](#)

> [How to Apply](#)

> [Other Applicants](#)

---

Prospective music majors must submit both an Undergraduate Application for Admission to the Office of Admissions, and a College of Music Admission Application.

All music applicants are initially considered for admission to the College of Arts and Sciences open option major. Admission to a College of Music degree program (bachelor of arts in music, bachelor of music education, bachelor of music) is determined after the music audition and application evaluation process has been completed. Students who are admitted to the College of Arts and Sciences but not the College of Music will be able to keep their place in the College of Arts and Sciences.

Live auditions, which are preferred unless travel distance is prohibitive, are scheduled for selected Saturdays in January and February. Other live audition times may be arranged; high quality recordings also may be submitted in lieu of a live audition.

College of Music scholarships are awarded to music majors only. High school and college transfer students are automatically considered for merit-based music scholarships upon completion of the application process, including the audition. Transfer students who are receiving a scholarship from their current institution must submit a scholarship release form before they can be awarded a music scholarship. To be assured of full consideration for scholarship awards, the audition should be completed by February 15.

The College of Music Admission Application Form, as well as more detailed information about audition requirements, faculty, and degree programs, may be found at [music.colorado.edu](http://music.colorado.edu).

## Teacher Education Applicants

Through the School of Education, students interested in elementary or secondary school teaching may take programs approved for Colorado licensure in connection with Colorado Commission on Higher Education (CCHE) approved majors offered at CU-Boulder.

Elementary teacher education includes kindergarten through sixth grade licensure. Secondary teacher education includes seventh through 12th grades with licensure in English, mathematics, science, social studies, and the following foreign languages: French, German, Italian, Japanese, Latin, Russian, and Spanish. Teacher education programs are also available in music education for kindergarten through 12th grade.

Teacher education program applicants who have completed a four-year undergraduate degree program should apply directly to the School of Education. Those who have not received a bachelor's degree must apply to another CU-Boulder undergraduate degree program and submit their application and credentials to the Office of Admissions. Undergraduate students who plan to pursue teacher education should declare this intent to the school's Office of Student Services as soon as possible after enrolling at CU-Boulder.

Refer to the School of Education section for more information about teacher education. Interested students may also visit [www.colorado.edu/education](http://www.colorado.edu/education), e-mail [EdAdvise@colorado.edu](mailto:EdAdvise@colorado.edu), or write to the School of Education, Office of Student Services, University of Colorado Boulder, 249 UCB, Boulder, CO 80309-0249, for application and deadline information.

## College Readiness in English and Mathematics

The State of Colorado mandates that all undergraduate students entering public institutions of higher education in Colorado be screened for college readiness in reading, writing, and mathematics. To pass the screening requirements, students must present minimum test scores.

Students who have successfully completed four years each of college preparatory English and college preparatory math courses are deemed to have met the respective requirements regardless of

the test score.

Students who do not meet CU-Boulder's criteria for college readiness will be required to demonstrate readiness through an additional examination or to enroll in preparatory courses prior to completing the first 30 semester hours of course work on the Boulder campus. Students who have not demonstrated reading, writing, and/or mathematics readiness will receive additional details after they confirm their intent to enroll at CU-Boulder.

# Freshman Applicants

## On This Page:

- [Admission Criteria](#)
- [College Entrance Tests](#)
- [Minimum Academic Preparation Standards \(MAPS\)](#)
- [Policies Concerning MAPS Deficiencies](#)
- [Advanced Placement](#)
- [International Baccalaureate](#)
- [Guaranteed Admission for Colorado Resident Freshmen](#)
- [Freshman Applicants Not Granted Admission](#)

Students are freshman applicants if they are currently enrolled in high school, or if they have earned a high school diploma or its equivalent and have not enrolled in a college or university since graduation.

## Admission Criteria

Many factors are considered in evaluating students' applications for admission to CU-Boulder. Although academic performance in high school (high school GPA and the quality of course work) is the most important indicator of success, other factors are also considered. These include students' college entrance test scores (either the SAT or ACT), the trend in their grades, the extent to which the minimum academic preparation standards (MAPS) are met, their personal essays, and the potential contributions they may make to the campus community. For information on MAPS, see [MAPS table](#) in this section.

Applicants whose records reflect nontraditional grading systems, unusual curricula, or high school equivalency through the GED test will receive individual consideration and are urged to apply.

## College Entrance Tests

Applicants should take a college entrance test late in their junior year or early in their senior year of high school. CU-Boulder requires either the SAT or the ACT for admission consideration. The ACT Writing Test is not required for CU-Boulder admission consideration. The highest scores are used in the admission decision. If the same test is taken more than once, the scores are combined on each subsection to give the highest overall score. SAT subject test scores are not required. For more information, see the How to Apply for Undergraduate Admission section.

## Minimum Academic Preparation Standards (MAPS)

Students who graduated from high school in spring 1988 or later are expected to have completed courses that meet certain minimum academic preparation standards (MAPS) before enrolling at CU-Boulder. Any MAPS deficiency will be considered during the admission review process. The MAPS for

## Undergraduate Admission

> [Visiting the Campus](#)

> [General Admission Information](#)

> **[Freshman Applicants](#)**

> [Transfer Applicants](#)

> [Minimum Academic Preparation Standards \(MAPS\) Table](#)

> [Advanced Placement \(AP\) Table](#)

> [International Baccalaureate \(IP\) Table](#)

> [How to Apply](#)

> [Other Applicants](#)

---

specific CU-Boulder colleges and schools are listed in this section.

Students may be admitted to CU-Boulder even though they have not met all the MAPS requirements. If that is the case, they are required to complete the appropriate MAPS courses once enrolled, and the credits may be applied toward graduation. *All MAPS deficiencies must be completed prior to graduation from CU-Boulder.* Students may also complete missing MAPS course work at other colleges or universities, through approved credit-by-examination programs, or by testing out through the appropriate foreign language department.

## Policies Concerning MAPS Deficiencies

The policies of the Boulder campus with respect to completing MAPS course work after enrollment are as follows.

1. Appropriate missing MAPS course work is included in the hours for graduation.
2. All course work toward fulfillment of the MAPS must be taken for a letter grade.
3. It is strongly recommended that students enroll in and complete at least one MAPS course each term, beginning in the first term of enrollment, until such time as all MAPS are completed. This policy applies to new freshmen, transfer students, and students transferring from other academic units on the Boulder campus and from other campuses of the university. Some colleges or schools may impose a sanction if the student does not complete one course per semester toward meeting MAPS deficiencies.
4. All students who first enroll in one academic unit at CU-Boulder and subsequently transfer to another unit are required to meet the MAPS specified for the new unit, irrespective of their completion of MAPS units in their previous college or school.
5. Students in double-degree programs must meet MAPS requirements of both degree-granting units.
6. Students must consult with a CU-Boulder academic advisor (or read their college or school's academic publications) to determine which specific courses may be used to meet a MAPS requirement.
7. Students who complete 50 percent or more of their secondary schooling in a non-U.S. system are exempt from MAPS.

Also review the [MAPS table](#).

## Advanced Placement

CU-Boulder participates in the Advanced Placement program of the College Board. Over one-third of Boulder's entering freshmen submit Advanced Placement (AP) test scores each year. Official scores must be sent to the admissions office directly from the College Board for both first-year students and transfer students. *For a guide to specific equivalencies, refer to the [AP table](#).* For more information, write or call:

**AP Exams**, P.O. Box 6671, Princeton, NJ 08541-6671

**609-771-7300** or toll free **888-225-5427**

[www.collegeboard.com](http://www.collegeboard.com)

## International Baccalaureate

The International Baccalaureate (IB) Diploma programs provide preuniversity study. IB examinations, whether leading to a full IB diploma or to an IB certificate often qualify students for advanced

standing at CU-Boulder. In general, credit is granted for approved IB examinations at the higher level with a score of 4 or better.

Students admitted to the University of Colorado Boulder after June 30, 2003, who have graduated from high school having successfully completed an International Baccalaureate Diploma program shall be granted 24 semester hours of college credit. Students should check with their college or school to determine if or how the earned college credit applies toward degree requirements. No CU-Boulder tuition shall be charged for these credits. These credits shall be granted, however, only if the student receives a score of 4 or better on an examination administered as part of the IB Diploma program. If the student scores less than 4 on any IB subject test, the credit hours granted shall be reduced accordingly.

An official copy of the diploma with test scores must be sent to the admissions office directly from the IB organization. For a guide to specific equivalencies *refer to the table below*. For more information on test administration, write or call:

**International Baccalaureate Organization**, 475 Riverside Drive, 16th floor, New York, NY 10115  
**212-696-4464**  
[www.ibo.org](http://www.ibo.org)

For the most current information on how CU-Boulder evaluates IB credit, visit [admissions.colorado.edu/undergraduate/apply/freshman/credit](http://admissions.colorado.edu/undergraduate/apply/freshman/credit). Also review the *IB table*.

## Guaranteed Admission for Colorado Resident Freshmen

The University of Colorado Boulder guarantees admission to first-time Colorado resident freshmen who meet specific criteria. For a copy of the guaranteed admission guidelines, visit [admissions.colorado.edu/undergraduate/apply/freshman/guarantee](http://admissions.colorado.edu/undergraduate/apply/freshman/guarantee), write to **Office of Admissions**, University of Colorado Boulder, 552 UCB, Boulder, CO 80309-0552, or call **303-492-6301**. Guaranteed admission information is also available in all Colorado high school guidance offices.

## Freshman Applicants Not Granted Admission

Students who are not granted admission as entering freshmen may consider transferring to CU-Boulder after successful study elsewhere. Students are encouraged to complete at least one full year of transferable college or university course work, including any courses outlined in the minimum academic preparation standards (MAPS) chart that were not met in high school.

# Transfer Applicants

## On This Page:

- [Competitive Admission Criteria](#)
- [College Entrance Tests](#)
- [Minimum Academic Preparation Standards \(MAPS\)](#)
- [Opportunities for Colorado Transfer Students](#)

Applicants are considered transfer students if they have attempted or enrolled in any college-level course work (at another college or university, or other campus of the University of Colorado), full time or part time, since graduating from high school. Applicants are not considered transfer students if the only college-level classes they have taken were while enrolled in high school. To be considered for admission, transfer students must report all previous college work and have a high school diploma or its equivalent.

## Competitive Admission Criteria

Transfer applicants are considered for admission on the basis of transfer as well as freshman criteria, including minimum academic preparation standards (MAPS). All transfer applicants who graduated from high school in spring 1988 or later are expected to have completed MAPS requirements before enrolling at CU-Boulder.

A number of factors are considered when the transfer application is evaluated. The types of courses taken are as important as the grade point average. Only courses completed at the time the application is reviewed are considered in computing the cumulative, or overall, GPA. Complete personal essays are required.

Competitive criteria may vary from term to term depending on the overall quality of the applicant group and the number of transfer spaces available for a given college or school. Successful completion of prerequisite or recommended courses is also considered in the admission decision (see specific college and school sections below). For more information on competitive transfer admission guidelines, visit [admissions.colorado.edu/undergraduate/apply/transfer](http://admissions.colorado.edu/undergraduate/apply/transfer).

### *College of Architecture and Planning*

A college GPA of 2.750 or higher is required. Admission preference is given to students who have taken college-level courses in the areas of architecture, planning, or environmental studies. Completion of courses in related fields of social science, natural science, fine arts, or humanities is also considered in the admission review.

### *College of Arts and Sciences*

A cumulative college GPA of 2.500 or better in appropriate general education courses is required. Students who complete 60 semester hours of transfer-level work with a cumulative GPA of 2.500 at a

## Undergraduate Admission

> [General Admission Information](#)

> [Freshman Applicants](#)

> **Transfer Applicants**

> [Minimum Academic Preparation Standards \(MAPS\) Table](#)

> [Advanced Placement \(AP\) Table](#)

> [International Baccalaureate \(IP\) Table](#)

> [How to Apply](#)

> [Other Applicants](#)

Colorado community college and who apply by the equal consideration deadline are assured admission to the College of Arts and Sciences. Students must complete all of the Minimum Academic Preparation Standards (MAPS) to be guaranteed admission.

\*This information applies to students who entered college after spring 1988. For those students who entered college prior to summer 1988, contact the Office of Admissions.

### *Leeds School of Business*

A cumulative college GPA of 3.000 or higher is required. Preference is given to students who have completed finite math (or college algebra), calculus, microeconomics, and macroeconomics with competitive letter grades.

### *School of Education*

Students who have completed a bachelor's degree may apply for admission directly to the School of Education. All other undergraduate students must be admitted to another college or school before applying to a CU-Boulder teacher education program.

Visit [www.colorado.edu/education/prospective/undergrad.html](http://www.colorado.edu/education/prospective/undergrad.html) for additional information.

### *College of Engineering and Applied Science*

A college GPA of 2.900 or higher for four-year institutions; 3.100 or higher for community college and junior colleges is required. Transfer applicants must have taken courses relevant to an engineering curriculum, including at least two semesters of college-level calculus, along with two semesters of calculus-based physics and/or college-level chemistry. Chemical engineering and chemical and biological engineering applicants should have completed two semesters of college chemistry. Grades in math, science, and engineering courses should be B or higher. *(Exception: Students [resident or non-resident] who apply for admission for a semester that occurs within 18 months of their high school graduation date may also be competitive without having taken the above course work, as long as the high school academic record meets the current Guaranteed Admission for Colorado Freshmen criteria. In addition, if any college-level work has been completed, the overall GPA should be 3.100 or higher.)*

The college guarantees admission to any of its baccalaureate degree programs to students transferring from Colorado public institutions of higher education who meet the [College of Engineering and Applied Science Guaranteed Admission Criteria for Colorado Transfers](#). Visit [admissions.colorado.edu/undergraduate/sites/default/files/Guaranteed\\_Admission\\_CO\\_Transfer\\_CEAS.pdf](http://admissions.colorado.edu/undergraduate/sites/default/files/Guaranteed_Admission_CO_Transfer_CEAS.pdf) for more information.

### *Journalism and Mass Communication Program*

Admission to the Journalism and Mass Communication program requires a transfer student to have a minimum of 30 semester hours of appropriate college-level course work completed or in progress and an overall GPA of 3.000 as well as a 3.000 average GPA in journalism course prerequisites (Contemporary Mass Media class and either Principles of Journalism or Principles of Advertising at CU-Boulder, or their equivalents at another institution). Transfer students will be contacted after submitting their admission application with more detailed information about the Journalism and Mass Communication Program.

### *College of Music*

A college GPA of 2.750 or higher and an audition of all applicants is required. More information may be found in the [Undergraduate Admission](#) and [College of Music](#) sections.

## College Entrance Tests

Transfer students are required to submit SAT or ACT scores, except those who have completed 24 or more semester hours of transferable college-level work at the time they apply.

Students' highest scores are used in the admission decision. If the same test is taken more than once, the scores on each subsection are combined to give the highest overall score. SAT subject test scores are not required. For more information, see the How to Apply for Undergraduate Admission section.

## Minimum Academic Preparation Standards (MAPS)

Effective with students who graduated from high school in spring 1988 or later, CU expects all transfer students to have completed courses that meet certain minimum academic preparation standards (MAPS). The MAPS requirements for specific CU-Boulder colleges and schools are listed [here](#).

MAPS requirements not met in high school may be met through equivalent college-level course work before or after transfer to CU-Boulder. A semester course completed at the college level substitutes for a year of work in high school.

## Opportunities for Colorado Transfer Students

A list of transferable state-guaranteed general education courses has been established for students pursuing arts and sciences majors. Contact your current Colorado school, the CU-Boulder Office of Admissions, or visit our website for more information.

Course equivalency guides are available online at [admissions.colorado.edu/undergraduate/admissions/transfer/courseequivalencyguides](http://admissions.colorado.edu/undergraduate/admissions/transfer/courseequivalencyguides), and also in Colorado community college advising offices. These guides provide information on CU-Boulder admission requirements, graduation requirements, and course equivalencies.

Students transferring to a program outside of the College of Arts and Sciences need to work with community college advisors and use the transfer guide to assure that appropriate courses are taken prior to transfer. Students wishing to enter the College of Architecture and Planning or the College of Engineering and Applied Science should be aware that because of the structure of the curriculum, they are encouraged to transfer as early as the beginning of the sophomore year. *Academic programs vary in terms of the maximum number of hours that may be transferred from a community or junior college.*

\* There is no guarantee that all AP credit will apply to a specific degree program. The dean's office of each college and school makes the final determination on how AP credits apply toward degree requirements.

a Engineering students will need to gain experience with C or C++ before taking further computer science courses.

b Students who want to continue taking Spanish courses beyond their AP credit level must take the Spanish department placement test. If the results of this test place them below their AP level, the Spanish department strongly recommends enrolling at the lower of the two levels.

c Three lower-division credits meeting the historical context core requirement in the College of Arts and Sciences and the Leeds School of Business.

d Specific credit awarded may depend on major. Check with academic advisor in major department.

e Students taking the Calculus BC exam automatically receive an AB subscore.

f Does not apply toward degree requirements for students in the College of Engineering and Applied Science.

NOTE: This table was prepared based on spring 2011 exams. Credit awarded is subject to change based on faculty review of spring 2012 exams.

## Application Priority Dates and Admission Notification

Applications for degree candidates may be submitted beginning in August for the following spring, summer, and fall terms.

The university reserves the right to deny admission to applicants whose total credentials reflect an inability to assume those obligations of performance and behavior deemed essential by the university and relevant to any of its lawful missions, processes, and functions as an educational institution.

## Spring Freshman Applicants

Spring applications are processed on a rolling basis. The Office of Admissions begins notifying applicants about admission decisions in October. Decisions are made approximately four to six weeks after an application is complete. Full consideration is given to applications that are complete (including the application fee and all required credentials) by the October 1 deadline.

## Summer and Fall Freshman Applicants

There are two admission notification periods for fall and summer 2012 candidates.

### *Non-Binding Early Notification*

Freshman applicants who complete their file by **December 1, 2011**, are guaranteed early notification and will receive an admission decision on or before **January 15, 2012**. Students meeting the non-binding, early notification deadline may be admitted, postponed, or denied admission. Postponed students will receive an additional review and are strongly encouraged to submit additional academic information to strengthen their applications. Students who are postponed do not typically receive an admission decision until **April 1, 2012**. Early notification students are not required to enroll at the University of Colorado Boulder, but must, if they choose to attend, confirm their intent to enroll by **May 1, 2012**.

---

## *Freshman Application Deadline*

The freshman application deadline is **January 15, 2012**. Students may begin applying and completing their files in August. All applicants with completed files by **January 15, 2012**, will be notified of their admission decision no later than **April 1, 2012**. Students must, if they choose to attend, confirm their intent to enroll by **May 1, 2012**.

## Transfer Applicants

Transfer applications are processed on a rolling basis. Full consideration is given to transfer applications completed by the **October 1** deadline for spring admission, or the **April 1** deadline for summer and fall admission. From the time a transfer application is complete, it takes a minimum of four to six weeks for it to be reviewed.

## Complete an Online Application

Applicants should use the online application through their MyCUBoulder account at [mycuboulder.colorado.edu](http://mycuboulder.colorado.edu).

For a student to be considered for admission, the Office of Admissions must receive a completed application, the application fee, and all required credentials. Processing of an application will be delayed until all required information is received.

## Application Fee

The \$50 application fee (\$70 U.S. for international students) is nonrefundable. If paying by check or money order it should be made payable to the University of Colorado. Important: The applicant's name and date of birth must appear on the check or money order.

Some students may be faced with financial constraints in paying the application fee. Therefore, waivers are granted to those students with documented hardships who submit fee-waiver forms available in high schools, from the CU-Boulder Office of Admissions, or at [admissions.colorado.edu/undergraduate/apply/forms](http://admissions.colorado.edu/undergraduate/apply/forms).

Students currently enrolled in an undergraduate degree program at another University of Colorado campus, who are applying to an undergraduate degree program on the Boulder campus, are not required to pay the application fee.

## Required Credentials

Credentials or information sent by fax cannot be accepted as official documentation. Do not submit samples or photographs of design or artwork. A portfolio is not used for admission purposes and cannot be returned.

## *Official Transcripts*

*Official transcripts must be sent directly to the Office of Admissions from the issuing institution and must have the appropriate seals and signatures. Other transcripts are not considered official.*

Transcripts that are marked, for example, "student copy," "issued to student," or "unofficial" are not accepted as official. Unofficial transcripts cannot be used for admission or transfer credit purposes.

## *High School Transcript*

Students should request that their high school send an official transcript of all work completed, beginning with grade 9, directly to the Office of Admissions, regardless of the number of college hours

the student has completed (if any) or the date at graduation from high school. Students who have attended more than one high school and whose most recent transcript does not include the complete high school record must submit official transcripts from each school. If any part of the high school record is missing from the transcript, the processing of the application will be delayed. Students who have not graduated and do not plan to graduate from high school must request an official certificate of high school equivalency and official GED scores, plus an official transcript of any high school work (grades 9–12) completed, to be sent to the Office of Admissions.

## College Transcripts

Students should request that their official transcripts from each collegiate institution attended (except any campus of the University of Colorado) be sent directly from the issuing institution to the Office of Admissions. Be sure to include all institutions, regardless of the length of attendance, whether or not courses were completed, and whether or not the record might affect admission or transfer credit. Also include any institutions attended during summers, interim terms, and during high school. *Failure to list and submit transcripts from all institutions previously attended before enrolling at CU-Boulder is considered to be a violation of academic ethics and may result in the cancellation of admission or dismissal from the university.*

## SAT or ACT Test Scores

Boulder requires SAT or ACT scores for admission. The ACT will be accepted with or without the writing test. Students should request that the testing agency submit scores directly to the Office of Admissions. CU-Boulder's code for the SAT is 4841; the code for the ACT is 0532. Scores recorded on an official high school transcript are also acceptable. *These scores must be submitted unless 24 or more semester hours of transferable college work have been completed at the time of application.* Do not delay sending in the application and other credentials because college entrance test scores are not yet available.

Results from SAT or ACT tests taken in December or later may be received too late to be considered for summer or fall admission of the same year.

For further information, consult a high school counselor, visit the SAT website at [www.collegeboard.com](http://www.collegeboard.com), phone **609-771-7600**, or write to the College Board (SAT), P.O. Box 6200, Princeton, NJ 08541-6200. Visit the ACT website at [www.act.org](http://www.act.org), phone **319-337-1270**, or write to ACT Registration, P.O. Box 414, Iowa City, IA 52243-0414.

## Personal Essays

The University of Colorado Boulder requires applicants to submit two short personal essays. Applications without essays are considered incomplete and will not be reviewed. Personal essays are the best way for the Office of Admissions to learn about applicants as individuals and to evaluate a student's academic performance within the appropriate context. There are no "correct" answers to the questions—responses should reflect the unique aspects and experiences of the applicant. The specific essay questions are available on the application.

## Letters of Recommendation

Students may submit letters of recommendation if they wish; however, doing so is optional.

## MyCUBoulder Account

MyCUBoulder ([mycuboulder.colorado.edu](http://mycuboulder.colorado.edu)) is a personalized electronic tool that all undergraduates may use to explore the opportunities available at CU and keep track of what needs to be done before they arrive on campus. Applicants should use their MyCUBoulder account to apply for admission,

check their status, apply for scholarships and financial aid, and take care of other pre-enrollment university business.

## Where to Send the Application, Fee, and Credentials

Unless otherwise instructed, mail all application materials to: **Office of Admissions**, Regent Administrative Center 125, University of Colorado Boulder, 552 UCB, Boulder, CO 80309-0552

## Mailing Address

Applicants must keep their mailing address current at all times. It is used for mailings until the applicant arrives on campus. Notices are also sent to this address regarding admission, registration, and orientation, as well as other information. If an address changes or is no longer valid, notify the Office of Admissions immediately at **303-492-6301**.

## Application Checklist

1. Online application for admission
2. \$50 nonrefundable (\$70 U.S. for international students) application fee, payable online (if sending a check or money order, make payable to the University of Colorado; print student's name and date of birth on check)
3. Official high school transcript
4. Official college transcripts (if applicable)
5. SAT or ACT test scores (if applicable)
6. Personal essays
7. Letters of recommendation (optional)

## Confirmation Procedures

All admitted students are encouraged to confirm their intent to enroll as soon as possible after receiving their admission notification. Admission must be confirmed by official notification and the nonrefundable confirmation deposit of \$200 through your MyCUBoulder account.

Confirmations and deposits submitted by the dates listed below will be accepted. After these dates, confirmations can be accepted only if space is still available.

### *Confirmation Postmark Deadlines*

- Freshmen: fall, **May 1**; summer, **May 1**; spring, **Dec. 15**
- Transfers: **varies**; see *confirmation instructions*

If students register for classes and then decide not to attend, they may be assessed tuition depending upon the circumstances. Guidelines are given on the registrar's website ([registrar.colorado.edu](http://registrar.colorado.edu)) for spring and fall and in the summer catalog for summer terms. Close attention must be given to statements regarding policies for new, readmitted, and transfer students.

The confirmation deposits are used as registration deposits each semester as long as registration is completed by the published deadline. Once students have attended CU-Boulder, the deposit (minus any fees or other charges owed) will be returned when they graduate or officially withdraw from the university according to established deadlines.

# Other Applicants

## On This Page:

- [International Students](#)
- [Second Undergraduate Degree Applicants](#)
- [Readmit Students](#)
- [Students from Other CU Campuses](#)
- [Nondegree Students](#)
- [Transfer of College-Level Credit](#)

## International Students

The university invites applications from qualified international students. International applicants are those who already have, or will be applying for, a temporary U.S. visa such as F-1 and J-1. Applicants who are United States citizens, permanent residents, asylees, or refugees are not considered international. These students should follow application and admission procedures for undergraduates or graduates as described elsewhere in this catalog.

Over 1,000 international students from more than 100 countries study at CU-Boulder. Applications for admission are processed by the Office of Admissions. Assistance after admission is provided by International Student and Scholar Services, located in the Office of International Education. Boulder offers a full range of services to international students, including a host family program, orientation, special programs and activities for international students, and personal attention to individual needs.

Intensive English instruction is also offered by the International English Center. For information, go to [www.colorado.edu/iec](http://www.colorado.edu/iec) or write or call the International English Center, University of Colorado Boulder, 63 UCB, Boulder, CO 80309-0063, **303-492-5547**.

International students who wish to pursue a full-time program of study at the undergraduate or graduate level should go to the international student website at [www.colorado.edu/prospective/international](http://www.colorado.edu/prospective/international) for admission information and online application forms.

Prospective graduate students should go to the website at [www.colorado.edu/prospective/graduate](http://www.colorado.edu/prospective/graduate) for information and application forms specific to the academic department in which they are interested. Prospective graduate students can also call the campus telephone operator at **303-492-1411** and ask to have the call transferred to the department of interest or write to the specific department, University of Colorado Boulder, Boulder, CO 80309.

## *International Nondegree Students*

The University of Colorado Boulder welcomes visiting (nondegree) students from around the world. International students who are requesting a form I-20 (for an F-1 visa) are required to enroll full time (6 credits in the summer and 12 in the fall and spring semesters). Students are not allowed to drop below that limit and maintain their visa status. Students on a tourist visa may be eligible to take one class. An individual who holds a temporary nonimmigrant visa or temporary immigration status may register as a nondegree student after demonstrating English proficiency through the approval to register process administered by the International English Center, and only if the individual also

## Readmit Students

Former CU-Boulder undergraduate degree students who have not attended the Boulder campus for three semesters must submit the Application for Readmission for undergraduate degree students. No application fee is required. Students who have attended any college or university since their last attendance at CU-Boulder will need to submit official transcripts directly from the issuing institution(s) to the Office of Admissions.

If the student is changing from a previous college or school, the change should be noted on the application. Otherwise, it is assumed that the student is returning to the same field of study, if eligible to do so. If a college or school change is requested for which the student is not eligible, the student will need to request reconsideration for his or her previous program.

Former arts and sciences students wishing to return to arts and sciences must apply to their previous major. Students who wish to pursue a second undergraduate degree must apply to a major different from the one in which they received their degree. Students may not apply for a second bachelor's degree in the Leeds School of Business or the Journalism and Mass Communication Program.

Beginning with the fall 2010 semester, continuing undergraduate degree-seeking students who temporarily withdraw will be automatically eligible to return within a given time period without having to readmit. Review the "Return Chart" located at [registrar.colorado.edu/students/withdrawal.html](http://registrar.colorado.edu/students/withdrawal.html). (Degree-seeking students who are taking classes only through the Division of Continuing Education and Professional Studies are considered enrolled students.)

During the semesters of non-enrollment, students' CU-Boulder e-mail and portal accounts remain open. To return, students need to register for classes during the regular enrollment period for the returning term. If the student's confirmation deposit was refunded, they must repay it when returning.

The above policy is not applicable to graduate students but these students may be eligible for the Time Off Program if they wish to take a leave of absence. Graduate students not eligible for the Time Off Program will need to reapply for admission. This policy also is not applicable for new degree students (or transfer students) who enroll and then withdraw prior to the census date. For more information, see [registrar.colorado.edu](http://registrar.colorado.edu). Degree students who withdraw from CU-Boulder during summer session may not need to reapply to continue into the fall semester unless they are changing schools, colleges, or degree programs.

## Nondegree Students

Students who wish to take University of Colorado Boulder courses but are not currently admitted to a degree program at the university are classified as "nondegree students." Students apply as nondegree students through the Division of Continuing Education and Professional Studies (**303-492-5148** or [conted.colorado.edu](http://conted.colorado.edu)). Nondegree students may enroll in credit classes through the ACCESS (Available Credit Courses for Eligible Special Students) Program, the Boulder Evening Program, CAETE (Center for Advanced Engineering and Technology Education), the Independent Learning Program, Applied Music Program, and Summer Session.

If students have been denied admission to an undergraduate degree program, they may not enroll as nondegree students in the ACCESS Program for the semester for which they sought degree program admission. Nondegree student admission does not guarantee future admission to any degree program.

---

Nondegree students may also enroll for courses on a *pass/fail* basis. These courses are counted toward hours of *pass/fail* course work permitted according to the rules of the college or school to which students are admitted once they achieve degree status.

Nondegree students must maintain a 2.000 cumulative GPA. Failure to maintain the required GPA will result in academic suspension.

High school students interested in taking courses at CU-Boulder apply as nondegree students through the High School Concurrent Program administered by the division.

For more information, contact the Division of Continuing Education and Professional Studies at **303-492-5148** or visit [conted.colorado.edu](http://conted.colorado.edu).

International students who want to apply to the university as nondegree students should read the International Students section above. Students interested in teacher licensure should refer to the School of Education section.

### *Nondegree Students Transferring to a Degree Program*

Students who are currently enrolled or have been enrolled at any CU campus as non-degree students may apply for admission to an undergraduate degree program.

Students wishing to transfer to a graduate degree program should refer to the Graduate School section and individual college and school sections.

A degree-seeking applicant may transfer an unlimited number of credits taken as a nondegree student on any University of Colorado campus. However, applicability of these hours toward degree requirements is established by the colleges and schools. It is suggested that a student apply to a degree program as soon as admission requirements, including MAPS deficiencies, have been met. It is essential that former nondegree students actively seek academic advising from the appropriate dean's office once they have been accepted into a degree program.

## Second Undergraduate Degree Applicants

Students may apply for a second undergraduate degree at the University of Colorado Boulder, but should explore the various options in graduate study available at the university before doing so. Students applying for a second undergraduate degree must follow transfer admission guidelines, and those students who are admitted must keep in mind that all college and major requirements must be met in order to complete degree programs satisfactorily. Restrictions mandated by general university policies, as well as specific college and school policies, include the following:

1. Applicants may not apply to the major in which they received their first undergraduate degree.
2. Applicants must apply to a specific major; applications for an open option or undetermined major cannot be considered.
3. Second undergraduate degree applicants in the College of Architecture and Planning are encouraged to investigate graduate programs.
4. The Leeds School of Business and the Journalism and Mass Communication Program do not consider students who have already completed an undergraduate degree. These students are strongly encouraged to investigate graduate study.
5. Students who already have an undergraduate degree from the College of Engineering and Applied Science and who desire a second undergraduate degree are strongly encouraged to investigate graduate study as an option.
6. The School of Education offers graduate and teacher certification programs only.

- 
- Credit hours earned as a nondegree student at the University of Colorado may not be used toward major degree requirements for a second degree in the College of Arts and Sciences.

## Students from Other CU Campuses

Students who wish to transfer to Boulder from another University of Colorado campus (Colorado Springs or Denver), from CU Study Abroad, or from CU Continuing Education and Professional Studies should refer to the Transfer Applicants section. These students must send a high school transcript, SAT or ACT scores, and an official transcript from each college or university attended (outside the University of Colorado system) to the Office of Admissions. Currently enrolled degree students are not required to pay the application fee. Special consideration is given to applicants transferring from degree programs at other campuses of the University of Colorado. Course work completed at other campuses in the University of Colorado System will be a part of the student's cumulative university record and will not be considered as transfer credit. However, the applicability of this course work toward specific CU-Boulder degree requirements will be determined solely by CU-Boulder colleges and schools. External transfer credit presented by students to other University of Colorado campuses will be evaluated by CU-Boulder guidelines upon the student's matriculation into a degree program at CU-Boulder.

## Transfer of College-Level Credit

The Office of Admissions performs an initial evaluation of transfer credit after applicants have been admitted. A complete evaluation of transfer credit cannot be made until all official credentials have been received.

The evaluation is made using the official transcripts sent directly to the university from each one of the applicant's previous colleges. Official transcripts exhibit the official seal and signature of the registrar. Transcripts that are marked "student copy," "issued to student," or "unofficial" are not accepted as official. Faxed transcripts are not accepted.

Course work of comparable content and scope to the CU-Boulder curriculum will generally be transferred if it was completed at colleges or universities accredited by the North Central Association of Colleges and Schools, or other regional associations at the time the work was completed. For international colleges or universities, the international equivalent of regional accreditation or Ministry of Education recognition will be considered. If course work was completed at a school not regionally accredited, the student may specifically request that their course work be considered for transfer. CU-Boulder will utilize the recommendations of American Association of Collegiate Registrars and Admissions Officers (AACRAO) when making its decision.

These recommendations include but are not limited to:

- Educational quality of the sending institution
- Comparability of credit to be transferred to CU-Boulder
- Applicability of the credit in relation to the programs being offered at CU-Boulder
- Additional documentation that students may be required to provide regarding the course work for transferability

### *Exceptions to Recognition of Regional Accreditation*

Transferability is based on the practices of the leading university, as reported to AACRAO, in the state where the institution is located. CU-Boulder will make the decision on transferability based on the above criteria for institutions within the state of Colorado.

For Advanced Placement, International Baccalaureate, College Level Examination Program, or

military credit, refer to the detailed criteria in the corresponding sections.

## *Evaluation of Credit*

Only courses taken at a college or university of recognized standing with grades of C- (1.700) or better are accepted for transfer. All transferred courses are recorded on the student's academic record.

Each college and school at CU-Boulder determines:

- How transferred course semester credit hours are applied toward graduation requirements in accordance with the policies of the college or school
- The maximum number of semester credit hours that may transfer from a two-year or four-year postsecondary institution
- The minimum number of semester credit hours that must be completed on the Boulder campus in order to receive a degree
- The minimum number of semester credit hours that must be completed as a degree student in residence on the Boulder campus to receive an undergraduate degree
- The maximum number of semester credit hours earned through correspondence or in a similar format that are accepted toward a baccalaureate degree

Credit hours should have been earned no more than 10 years prior to transferring into an undergraduate degree program at the University of Colorado Boulder. Any determination of acceptance of semester credit hours toward the degree based on the content and the age of the credit is made in the college or school dean's office or by the student's major department.

College-level work taken during high school is evaluated in accordance with general guidelines for transfer credit at CU-Boulder. Official college transcripts of work taken must be received in order for transfer credit to be awarded.

## *Course Work Requiring Additional Review*

The following course work will require additional information before a decision can be made on acceptance for transfer credit.

- Independent study courses
- Internships
- Workshops
- Graduate course work
- Military credit
- Professional programs

## *Course Work Not Accepted for Transfer Credit*

The following course work will not be accepted for transfer credit and will not count toward a degree at Boulder:

- any courses in which the grade earned is below a C- (1.700)
- courses identified by CU-Boulder as remedial, such as remedial English, mathematics, science, and developmental reading
- vocational-technical courses that are offered at two-year and proprietary institutions (exceptions may be granted only by the CU-Boulder dean responsible for the student's curriculum—when exceptions appear to be warranted, appropriate department heads make recommendations to their respective deans regarding credit for such courses)
- courses in religion that constitute specialized religious training or that are doctrinal in nature

- credits earned for work experience or through a cooperative education program
- outdoor leadership education course work
- credits earned in physical education activity courses
- courses or programs identified as college orientation

## *Appeals Process*

Students who wish to appeal the transferability of course work must write a letter within the first semester after the work is posted on the University of Colorado Boulder record or after receiving notice from the Office of Admissions that the course work was not accepted for transfer credit. The letter must be addressed to the Transfer Credit Department, Office of Admissions and include:

- The name(s) of the previous institution(s) attended, the course number and title of each course for which the student was denied transfer credit, and the date(s) of enrollment in each course
- A copy of the catalog description (from the appropriate year) for each course in question
- A copy of the syllabus or course outline (from the appropriate year) for each course in question. This information can be obtained from the sending institution
- A statement indicating why the credit(s) should be accepted

The Admissions Office will re-evaluate the course(s) for which the student is requesting reconsideration in consultation with the appropriate dean or chair. A written response will be delivered to the student in a timely manner once the appropriate faculties have reviewed the course materials, past practices, and the student's specific circumstances.

## *University of Colorado Campuses*

Course work completed at other campuses in the University of Colorado system will be a part of the student's cumulative university record and will not be considered as transfer credit. However, the applicability of this course work towards specific CU-Boulder degree requirements will be determined solely by CU-Boulder colleges and schools. External transfer credit presented by students to other University of Colorado campuses will be evaluated by CU-Boulder guidelines upon the student's matriculation into a degree program at CU-Boulder.

## *Number of Credit Hours Required for Graduation*

Transfer students are held to the same residency and degree requirements as students who begin their undergraduate degree program on the Boulder campus. This assumes that transfer credit hours are in courses comparable in level and content to those required for graduation from an undergraduate degree program at the Boulder campus. College or school residency requirements, meaning the number of hours required to be taken as a degree student once admitted on the Boulder campus, are the same for transferring and nontransferring students.

## *Credit for Correspondence and Online Work*

Each college and school determines the maximum number of credits taken through correspondence and online programs that are accepted toward a baccalaureate degree.

## *College-Level Work Taken during High School*

College-level work taken during high school is evaluated in accordance with general guidelines for transfer credit at CU-Boulder. College-level work taken concurrently with a high school program may be used to satisfy MAPS requirements. Official college transcripts of work taken must be received for transfer credit to be awarded.

## *Advanced Placement Examinations*

Credit for College Board Advanced Placement examinations cannot be evaluated from college or high

---

school transcripts; score reports from the College Board must be submitted directly to the university for evaluation. For more information, and a guide to equivalencies, refer to Freshman Applicants and the chart in this section or download the PDF at [admissions.colorado.edu/undergraduate/admissions/freshman/credit](https://admissions.colorado.edu/undergraduate/admissions/freshman/credit).

### *College-Level Examination Program*

Credit for College Board subject examinations of the College-Level Examination Program (CLEP) in general biology, general chemistry, general psychology, introductory macroeconomics, introductory microeconomics, introductory sociology, and calculus may be granted for a score at or above the 67th percentile. This credit is applied toward degree requirements at the discretion of the student's dean. Refer to the appropriate dean's office for the policy of that college or school.

Credit for CLEP subject examinations cannot be evaluated from college or high school transcripts; score reports must be submitted directly from the College Board. CLEP general examinations are not accepted for credit at CU-Boulder.

### *International Baccalaureate Examinations (IB)*

In general, credit is granted for approved IB examinations at the higher level with a score of 4 or better. Credit for IB examinations cannot be evaluated from college or high school transcripts. An IB certificate or diploma must be submitted to the Office of Admissions from the IB organization for evaluation. For more information and a guide to equivalencies, refer to [Freshman Applicants](#).

### *Military Credit*

Credit for military schooling is evaluated upon receipt of Form DD 214, Service Separation Certificate, or the Sailor/Marine American Council on Edwardian Registry Transcript (SMART). Only work that has received an upper-division baccalaureate recommendation by the American Council on Education (ACE) can be awarded credit. This work, however, is transferred and recorded at the lower-division level. Foreign language credit taken through the State Department, Department of Defense, or Defense Language Institute is assigned the recommended ACE credit.

### *Credit by Examination*

This option provides limited opportunities for students to take an examination and earn credit for a course without registering for or taking the course. Specific courses must be approved for credit by examination. Students may want to exercise this option if they do not receive transfer credit for a course they have taken at a previous college. Information on participating colleges and schools, requirements, and an application for credit by examination are available at the Office of the Registrar, Regent Administrative Center 105, University of Colorado Boulder, 20 UCB, Boulder, CO 80309-0020, **303-492-6970**. Permission of the instructor, the department chair, the dean of the college or school in which the course is offered, and the student's dean (if different) is required for approval. An examination fee is charged.

### *Transfer Credit Conversion*

Many campuses operate on the quarter system, with the academic year divided into three terms. Other campuses, including CU-Boulder, operate on a two-term or semester system. Course credits from quarter system institutions must be converted from quarter hours to semester hours or credits. One quarter credit is equivalent to two-thirds of a semester credit. To convert quarter hours to semester hours, multiply the number of quarter hours by two-thirds and round off the total to the nearest tenth. For example, 4 quarter hours  $\times \frac{2}{3} = 2.67$  or 2.7 semester hours of credit, or 3 quarter hours  $\times \frac{2}{3} = 2$  semester hours of credit.

### *Intrauniversity Transfer Students*

Students wishing to change colleges or schools within the CU-Boulder campus must obtain an Intrauniversity Transfer (IUT) application from the college or school to which they wish to transfer.

For more information on recommended course work in preparation for an IUT and other criteria, students need to consult college and school sections of this catalog or talk with an academic advisor in the program to which they plan to transfer. Some colleges and schools do not accept intrauniversity transfer students during the summer. It is important to note that admission to a college through the IUT process is competitive, and not all students who apply are admitted. Decisions are based on course preparation, hours completed, grade point average, and other criteria required by the specific college or school.

### *Denied Admission as a Freshman*

Students who were not admissible to the University of Colorado Boulder based on high school academic records are encouraged to apply for transfer admission after at least 24 semester hours of transferable college-level course work are completed or in progress. This includes any minimum academic preparation standards (MAPS) requirements not met in high school.

ACCT

### ACCT-2820 (3) Introduction to Personal Financial Planning

Introduces the concepts, tools, and applications of personal financial planning. Provides the students with tools and techniques for managing their personal finances. With these skills, students gain the ability to effectively deal with their ever-changing financial environment. Restricted to students with at least 26 hours completed.

[Leeds School of Business](#) | [Accounting](#)

### ACCT-3220 (3) Corporate Financial Reporting 1

First of a two-course sequence intended to provide students with increased fluency in the language of business. Focuses on U.S. and international accounting concepts and methods that underlie financial statements and the related implications for interpreting financial accounting information. Prereqs., BCOR 2000 and BCOR 2200. Restricted to 52 hours completed. Prerequisites: Restricted to Business majors with 52-180 units completed.

[Leeds School of Business](#) | [Accounting](#)

### ACCT-3230 (3) Corporate Financial Reporting 2

Second in a two-course sequence building and extending detailed knowledge of preparation, analysis, and use of financial statements. Prereqs., ACCT 3220 and 52 hours completed. Prerequisites: Restricted to Business majors with 52-180 units completed.

[Leeds School of Business](#) | [Accounting](#)

### ACCT-3320 (3) Cost Management

Provides cost analysis for the support of management decision making. Analyzes activities, cost behavior, role of accounting in planning,

---

financial modeling, and managerial uses of cost data. Prereq., BCOR 2000 and BCOR 2200. Restricted to 52 hours completed. Prerequisites: Restricted to Business majors with 52-180 units completed.

Leeds School of Business | Accounting

---

## ACCT-4240 (3) Advanced Financial Accounting

Examines advanced financial accounting theory and practice, emphasizing U.S. and international accounting for business combinations, consolidated financial statements, and accounting for partnerships. Prereqs., ACCT 3230. Restricted to Accounting or Finance majors with 52-180 units completed. Same as ACCT 5240. Prerequisites: Restricted to Accounting or Finance majors with 52-180 units completed.

Leeds School of Business | Accounting

---

## ACCT-4250 (3) Financial Statement Analysis

Focuses on the use of U.S. and international accounting information by decision-makers external to the firm. Considers judgments made by investors, security analysts, bank lending officers, and auditors. Emphasizes equity valuation and risk analysis. Restricted to Accounting, Finance or Accounting Concurrent Degree majors only with 52-180 units completed. Prereq., ACCT 3220. Prerequisites: Restricted to Accounting, Finance or Accounting Concurrent Degree majors only with 52-180 units completed.

Leeds School of Business | Accounting

---

## ACCT-4430 (3) Personal Financial Planning

Extends the concepts, tools, and applications of personal finance and investments beyond ACCT 2820. Focuses on the development of a financial plan to achieve financial goals. Restricted to 52 hours completed.

Leeds School of Business | Accounting

---

## ACCT-4440 (3) Income Taxation of Individuals

Examines concepts and structure of the United States income tax system. Focuses on concepts affecting all taxpayers, with emphasis on individual taxation. Prereq., ACCT 3220. Same as ACCT 5440. Prerequisites: Restricted to Accounting or Accounting Concurrent Degree majors 52-180 units completed.

Leeds School of Business | Accounting

---

## ACCT-4540 (3) Accounting Information Systems

Considers the interaction of accountants with information systems and the role of accounting information systems in business processes. Focuses on the tools used by accountants and provides an understanding of accounting as an information system. Prereq., ACCT 3220. Same as ACCT 5540. Prerequisites: Restricted to Accounting or Accounting Concurrent Degree majors 52-180 units completed.

Leeds School of Business | Accounting

---

---

---

## ACCT-4620 (3) Auditing and Assurance Services

Emphasizes the value of assurance services, including the market for financial-statement audits, and the audit decision process, from obtaining a client through planning and testing, to issuance of the audit report. Focuses on making judgments and decisions under conditions of uncertainty and continually evaluating the substance of business transactions over their form. Prereq., ACCT 3230. Same as ACCT 5620. Prerequisites: Restricted to Accounting or Accounting Concurrent Degree majors 52-180 units completed.

Leeds School of Business | Accounting

---

---

## ACCT-4800 (3) Accounting for Government and Nonprofit Organizations

Reporting, planning and control of government and nonprofit organizations. Includes program budgets, responsibility accounting, and fund accounting. Restricted to Accounting or Accounting Concurrent Degree majors 52-180 units completed. Prereq., ACCT 3220. Same as ACCT 5800. Prerequisites: Restricted to Accounting or Accounting Concurrent Degree majors 52-180 units completed.

Leeds School of Business | Accounting

---

---

## ACCT-4820 (3) Topics in Business

Offered irregularly to provide opportunity for investigation of new frontiers in accounting. Prereq., ACCT 3220. Same as ACCT 5820. Prerequisites: Restricted to Accounting or Accounting Concurrent Degree majors 52-180 units completed.

Leeds School of Business | Accounting

---

---

## ACCT-4825 (3) Experimental Seminar

Offered irregularly to provide opportunity for investigation of new frontiers in Accounting. Restricted to juniors/seniors. Same as ACCT 5825.

Leeds School of Business | Accounting

---

---

## ACCT-4850 (3) Senior Seminar in Accounting

This seminar examines the nature of accounting theory and practice from perspectives of economics, law, globalization, accounting, ethics, and moral reasoning. This course also explores issues including implications of institutional factors, such as Sarbanes-Oxley, SEC, FASB, IFRS, and capital markets. Prereqs., ACCT 3230, one 4000-level ACCT course. Restricted to 102 hours completed and to graduating senior ACCT majors. Formerly BCOR 4001. Prerequisites: Restricted to Accounting majors with 102-180 units completed.

Leeds School of Business | Accounting

---

---

## ACCT-4900 (1-3) Independent Study

Requires prior consent of dean and instructor under whose direction study is taken. Intended only for exceptionally well-qualified business seniors. Departmental form required.

Leeds School of Business | Accounting

---

## ACCT-5240 (3) Advanced Financial Accounting

Examines advanced financial accounting theory and practice, emphasizing U.S. and international accounting for business combinations, consolidated financial statements, and accounting for partnerships. Prereq., ACCT 3230. Restricted to Accounting, Finance/Accounting, Information Systems/Accounting, Systems/Accounting Concurrent Degree students or Accounting, Accounting/Taxation or Business Administration graduate students only. Prerequisites: Restricted to Accounting, Finance/Accounting, Information Systems/Accounting, Systems/Accounting Concurrent Degree students or Accounting, Accounting/Taxation or Business Administration graduate students only.

Leeds School of Business | Accounting

---

## ACCT-5250 (3) Financial Statement Analysis

Restricted to Accounting, Finance/Accounting, Information Systems/Accounting, Systems/Accounting Concurrent Degree students or Accounting, Accounting/Taxation or Business Administration graduate students only. Prereq., ACCT 3220. Same as ACCT 4250. Prerequisites: Restricted to Accounting, Finance/Accounting, Information Systems/Accounting, Systems/Accounting Concurrent Degree students or Accounting, Accounting/Taxation or Business Administration graduate students only.

Leeds School of Business | Accounting

---

## ACCT-5330 (3) Advanced Cost Management

Critically analyzes advanced topics in cost management. Uses cases and current readings. Prereq., ACCT 3320. Restricted to Accounting, Finance/Accounting, Information Systems/Accounting, Systems/Accounting Concurrent Degree students or Accounting, Accounting/Taxation or Business Administration graduate students only. Prerequisites: Restricted to Accounting, Finance/Accounting, Information Systems/Accounting, Systems/Accounting Concurrent Degree students or Accounting, Accounting/Taxation or Business Administration graduate students only.

Leeds School of Business | Accounting

---

## ACCT-5440 (3) Income Taxation of Individuals

Prereq., ACCT 3220. Restricted to Accounting, Finance/Accounting, Information Systems/Accounting, Systems/Accounting Concurrent Degree students or Accounting, Accounting/Taxation or Business Administration graduate students only. Same as ACCT 4440. Prerequisites: Restricted to Accounting, Finance/Accounting, Information Systems/Accounting, Systems/Accounting Concurrent Degree students or Accounting, Accounting/Taxation or Business Administration graduate students only.

Leeds School of Business | Accounting

---

---

## ACCT-5540 (3) Accounting Information Systems

Prereq., ACCT 3220 or equivalent. Restricted to Accounting, Finance/Accounting, Information Systems/Accounting, Systems/Accounting Concurrent Degree students or Accounting, Accounting/Taxation or Business Administration graduate students only. Same as ACCT 4540. Prerequisites: Restricted to Accounting, Finance/Accounting, Information Systems/Accounting, Systems/Accounting Concurrent Degree students or Accounting, Accounting/Taxation or Business Administration graduate students only.

Leeds School of Business | Accounting

---

## ACCT-5620 (3) Auditing and Assurance Services

Emphasizes the value of assurance services, including the market for financial-statement audits, and the audit decision process, from obtaining a client through planning and testing, to issuance of the audit report. Focuses on making judgments and decisions under conditions of uncertainty and continually evaluating the substance of business transactions over their form. Prereq., ACCT 3230. Restricted to Accounting, Finance/Accounting, Information Systems/Accounting, Systems/Accounting Concurrent Degree students or Accounting, Accounting/Taxation or Business Administration graduate students only. Same as ACCT 4620. Prerequisites: Restricted to Accounting, Finance/Accounting, Information Systems/Accounting, Systems/Accounting Concurrent Degree students or Accounting, Accounting/Taxation or Business Administration graduate students only.

Leeds School of Business | Accounting

---

## ACCT-5700 (3) International Accounting

Intensive focus on international financial statement analysis, cultural and economic differences that affect financial reporting in various countries. Examples include international financial reporting standards and accounting for foreign currency transactions. Prereq., ACCT 3230. Restricted to Accounting, Finance/Accounting, Information Systems/Accounting, Systems/Accounting Concurrent Degree students or Accounting, Accounting/Taxation or Business Administration graduate students only. Same as ACCT 4700. Prerequisites: Restricted to Accounting, Finance/Accounting, Information Systems/Accounting, Systems/Accounting Concurrent Degree students or Accounting, Accounting/Taxation or Business Administration graduate students only.

Leeds School of Business | Accounting

---

## ACCT-5800 (3) Accounting for Government and Nonprofit Organizations

Reporting, planning and control of government and nonprofit organizations. Includes program budgets, responsibility accounting, and fund accounting. Restricted to Accounting, Finance/Accounting, Information Systems/Accounting, Systems/Accounting Concurrent Degree students or Accounting, Accounting/Taxation or Business Administration graduate students only. Prereq., ACCT 3220. Same as ACCT 4800. Prerequisites: Restricted to Accounting, Finance/Accounting, Information Systems/Accounting, Systems/Accounting Concurrent Degree students or Accounting, Accounting/Taxation or Business Administration graduate students only.

Leeds School of Business | Accounting

---

## ACCT-5820 (3) Topics in Business

Prereq., ACCT 3230 or equivalent. Restricted to Accounting, Finance/Accounting, Information Systems/Accounting, Systems/Accounting Concurrent Degree students or Accounting, Accounting/Taxation or Business Administration graduate students only. Same as ACCT 4820. Prerequisites: Restricted to Accounting, Finance/Accounting, Information Systems/Accounting, Systems/Accounting Concurrent Degree students or Accounting, Accounting/Taxation or Business Administration graduate students only.

## ACCT-5825 (3) Experimental Seminar

Offered irregularly to provide opportunity for investigation of new frontiers in Accounting. Prereq. ACCT 3230. Restricted to Accounting, Finance/Accounting, Information Systems/Accounting, Systems/Accounting Concurrent Degree students or Accounting, Accounting/Taxation or Business Administration graduate students only. Same as ACCT 4825. Prerequisites: Restricted to Accounting, Finance/Accounting, Information Systems/Accounting, Systems/Accounting Concurrent Degree students or Accounting, Accounting/Taxation or Business Administration graduate students only.

ACCT

### ACCT-6000 (1-4) Academic Internship in Accounting

Offers students the opportunity to gain professional work experience in an accounting or tax position while still in school. Provides academically relevant work experience that complements students' studies and enhances their career potential. Includes lectures and a course paper. Students may not preregister for this course, and they must contact the Director of the concurrent degree program in accounting for approval. Restricted to graduate students only. Prereq., ACCT 3230, at least 90 credit hours of course work and a minimum GPA of 3.00, and instructor consent. Prerequisites: Restricted to Accounting, Finance/Accounting, Information Systems/Accounting, Systems/Accounting Concurrent Degree students or Accounting, Accounting/Taxation or Business Administration graduate students only.

[Leeds School of Business](#) [Accounting](#)

### ACCT-6220 (3) Corporate Financial Reporting

Provides an in-depth study of the concepts underlying contemporary financial accounting practice. Includes preparation and analysis of financial statements and the application of concepts to selected current issues. Students with credit for ACCT 3220 and 3230 or equivalents may not receive credit for ACCT 6220. Prereq., MBAC 6020 or equivalent. Same as MBAX 6700.

[Leeds School of Business](#) [Accounting](#)

### ACCT-6250 (3) Financial Statement Analysis

Focuses on the use of accounting information by decision makers external to the firm. Considers judgments made by investors, security analysts, bank lending officers, and auditors. Emphasizes equity analysis. Prereq., MBAC 6020 or equivalent. Same as MBAX 6710.

[Leeds School of Business](#) [Accounting](#)

---

## ACCT-6260 (3) Seminar: Managerial Accounting

Explores cost management, especially as related to organizational decision making, planning, and control. Emphasizes case analysis and applications. Prereq., MBAC 6020 or equivalent, or instructor consent.

Leeds School of Business | Accounting

---

## ACCT-6270 (3) Seminar: Income Determination

Critical analysis of problems and theory of measurement and reporting of periodic net income of business organizations. Net income models, research efforts, and role of professional accounting organizations. Current issues and problems given special attention. Prereq., ACCT 3230 or equivalent, or instructor consent.

Leeds School of Business | Accounting

---

## ACCT-6350 (3) Current Issues in Professional Accounting

Examines the nature of accounting theory and practice from perspectives of economics, law, globalization, accounting, ethics, and moral reasoning. This course also explores issues including implications of institutional factors, such as Sarbanes-Oxley, SEC, FASB, IFRS, and capital markets. Counts as senior seminar for Concurrent degree students. Restricted to Accounting, Finance/Accounting, Information Systems/Accounting, Systems/Accounting Concurrent Degree students or Accounting, Accounting/Taxation or Business Administration graduate students only. Prerequisites: Restricted to Accounting, Finance/Accounting, Information Systems/Accounting, Systems/Accounting Concurrent Degree students or Accounting, Accounting/Taxation or Business Administration graduate students only.

Leeds School of Business | Accounting

---

## ACCT-6420 (3) Research and Writing in Income Taxation

Studies and applies the method used in tax research and tax planning, with the goal of developing tax research, technical writing, and tax planning skills. Topics include examining primary and secondary sources of federal tax law, evaluating the hierarchy of these sources, and developing technical writing skills using deductive legal reasoning. Prereq., ACCT 5440 or equivalent, or instructor consent. Prerequisites: Restricted to graduate students in Accounting, Finance, Mgt Sci-Information Systems, Organizational Management, Marketing, Business Administration, or Master of Business Administration.

Leeds School of Business | Accounting

---

## ACCT-6430 (3) Taxation of Partnerships

Studies federal income taxation of pass-through entities such as those used by most small businesses in the U.S. Includes creation, operation, distributions, sale of interests, and liquidation. Prereq., ACCT 5440 or equivalent, or instructor consent. Coreqs., ACCT 6420 and 6700. Restricted to Accounting, Finance/Accounting, Information Systems/Accounting, Systems/Accounting Concurrent Degree students or Accounting, Accounting/Taxation or Business Administration graduate students only. Same as LAWS 6167. Prerequisites: Restricted to Accounting, Finance/Accounting, Information Systems/Accounting, Systems/Accounting Concurrent Degree students or Accounting, Accounting/Taxation or Business Administration graduate students only.

---

Leeds School of Business | Accounting

## ACCT-6440 (2-3) Tax Policy

Offers a research seminar exploring policy issues of taxation including recent legislative proposals. Students prepare a publishable research paper on a tax policy topic agreed upon with the instructor. Prereq., ACCT 5440 or equivalent, or instructor consent. Coreqs., ACCT 6420 and 6700.

## ACCT-6450 (3) Taxation of Corporations

Studies federal income taxation related to taxable corporations, the entities through which a large part of the economic activity in the U.S. is conducted. Includes creation, operation, distributions, sale of interests, and liquidation. Prereq., ACCT 5440 or instructor consent. Coreqs., ACCT 6420 and 6700. Same as LAWS 6157. Prerequisites: Restricted to Business Administration, Accounting, Accounting-Taxation, Accounting-Information Systems, Mgt Sci-Information Systems, Finance, Marketing or Master of Business Admin graduate students only.

## ACCT-6490 (3) Taxation of Natural Resources

Concerned with tax problems encountered in acquisition, operation, and disposition of natural resource properties. Topics include depletion, lease bonuses, intangible drilling costs, depreciation, and financing arrangements. Prereqs., admission to the graduate tax program, ACCT 6700 or equivalent, or instructor consent.

## ACCT-6500 (3) Special Topics in Taxation

Covers a diverse array of issues in taxation. Highlights areas of current interest and draws on the strengths of leading outside authorities as guest lecturers in various topic areas. Prereq., ACCT 6420 and 6700.

## ACCT-6620 (3) Advanced Auditing: Business Risk and Decision Analysis

Explores contemporary issues, historical developments, and selected topics pertinent to business assurance services by independent accountants. Emphasizes improving both the decision behavior of decision makers and the quality of information, or its context, for decision makers. Prereq., ACCT 5620 or equivalent.

---

## ACCT-6700 (4) Income Taxation

Emphasizes the fundamentals of the federal income tax system and examines its impact on the individual. Prereq., ACCT 5440 or equivalent. Same as LAWS 6007. Prerequisites: Restricted to Accounting (ACCT), Accounting-Information Systems (ACIS), Accounting - Taxation (ACTX), Master of Business Admin (MBA) or Business Administration (BUAD) graduate students only.

## ACCT-6710 (3) Federal Estate and Gift Tax

Analyzes federal estate and gift taxation of inter vivos and testamentary transfers, introduces income taxation of estates and trusts, and involves elementary estate planning. Prereq., ACCT 5440 or equivalent. Coreqs., ACCT 6420 and 6700. Same as LAWS 7207. Prerequisites: Restricted to Accounting (ACCT), Accounting-Information Systems (ACIS), Accounting - Taxation (ACTX), Master of Business Admin (MBA) or Business Administration (BUAD) graduate students only.

## ACCT-6720 (2) Estate Planning

Discusses problems and solutions for owners of various-sized estates and different types of assets including jointly-held property, stock in closely-held corporations and farms, analysis of federal taxation of generation-skipping transfers in trust, postmortem estate planning, and drafting of trusts and wills. Prereq., ACCT 6710 or equivalent. Same as LAWS 7217.

## ACCT-6780 (3) International Taxation

Covers basic aspects of the United States taxation of income earned abroad by its citizens and the taxation income derived by foreign persons from U.S. sources, including the implications of income tax treaties. Restricted to Accounting, Finance/Accounting, Information Systems/Accounting, Systems/Accounting Concurrent Degree students or Accounting, Accounting/Taxation or Business Administration graduate students only. Same as LAWS 7617. Prerequisites: Restricted to Accounting, Finance/Accounting, Information Systems/Accounting, Systems/Accounting Concurrent Degree students or Accounting, Accounting/Taxation or Business Administration graduate students only.

## ACCT-6820 (1-3) Graduate Seminar

Experimental seminar offered irregularly to provide opportunity for investigation of new frontiers in accounting. Prereq. varies.

---

---

## ACCT-6900 (1-6) Independent Study

Requires prior consent of instructor under whose direction study is taken. Departmental form required. Prerequisites: Restricted to Accounting, Finance/Accounting, Information Systems/Accounting, Systems/Accounting Concurrent Degree students or Accounting, Accounting/Taxation or Business Administration graduate students only.

Leeds School of Business | Accounting

---

---

## ACCT-6940 (1) Master's Degree Candidacy

Departmental form required. Prerequisites: Restricted to Business graduate students only.

Leeds School of Business | Accounting

---

---

## ACCT-6950 (1-4) Master's Thesis

Prerequisites: Restricted to Business graduate students only.

Leeds School of Business | Accounting

---

---

## ACCT-7300 (3) Doctoral Seminar: Introduction to Accounting Research

Introduces students to seminal accounting research, covering a variety of topics and research methods. Provides students with instruction and experience in reading, critiquing and discussing accounting research. Provides a framework for understanding the financial reporting choice from both contracting and valuation perspectives.

Leeds School of Business | Accounting

---

---

## ACCT-7320 (3) Doctoral Seminar: Accounting and Capital Markets I

One semester of a two-semester course in accounting-related capital markets and research, spanning topics such as: information intermediaries; earnings management; auditing and other monitoring mechanisms; efficient versus opportunistic accounting choice related to contracts between the firm and its stakeholders; cost of capital; and market efficiency with respect to accounting information. Papers covered apply primarily economics-based archival and empirical research methods. Prereq., ACCT 7300.

Leeds School of Business | Accounting

---

---

## ACCT-7330 (3) Doctoral Seminar: Accounting and Capital Markets 2

The second semester of a two-semester course in accounting-related capital markets research. See ACCT 7320 for a description of the

course content which is allocated evenly between ACCT 7320 and 7330.

[Leeds School of Business](#) | [Accounting](#)

---

---

## ACCT-7340 (3) Doctoral Seminar: Managerial Accounting Research

Survey of managerial accounting research, emphasizing a variety of methodologies including economics-based archival empirical and experimental approaches. Topics include: management performance measurement; management incentives; non-financial performance measures; management control systems; cost behavior and cost structure; intra-firm transfer pricing; inter-firm relations and knowledge sharing; risk preferences; risk taking and risk sharing; strategic performance measurement; agency theory; and budgetary slack and performance. Prereq., Acct 7300. Prerequisites: Restricted to Graduate Students only.

ACCT

### ACCT-7800 (3) Doctoral Seminar: Accounting Theory

Follows the evolution of game-theoretic analytical research and application of analytical methods to topics including: accounting-based valuation, discretionary disclosure, stewardship role of accounting, insider trading and imperfect capital market models, signaling through accounting choice, deferred tax accounting, audit sampling, auditor rotation, and low balling. Describes implications of analytical results for primarily economics-based empirical research designs. Open only to doctoral students.

[Leeds School of Business](#) | [Accounting](#)

### ACCT-7830 (3) Doctoral Seminar: Accounting Research

Designed to assist the doctoral student in integrating courses and fields of study in order to be able to apply knowledge and skills to problems in accounting. Special attention given to the development of thesis topics.

[Leeds School of Business](#) | [Accounting](#)

### ACCT-8820 (1-6) Graduate Seminar

Provides opportunity for investigation of new frontiers in accounting through an experimental seminar. May be repeated up to 6 total credit hours. Prereq. varies. Offered irregularly.

[Leeds School of Business](#) | [Accounting](#)

### ACCT-8900 (1-3) Independent Study

Requires instructor's consent and departmental form (taught as doctoral seminar). Prerequisites: Restricted to Business graduate students only.

AIRR

## AIRR-1010 (1) Foundations of the United States Air Force 1

One 1-hour lecture and one 2-hour lab per week. Introduces students to the U.S. Air Force and the USAF officer profession. Uses instructor lectures, films and videos, and group activities to examine Air Force issues, officership qualities, and military customs and courtesies. Emphasizes the communication skills necessary for an Air Force officer.

[Cross College Programs](#)
[Reserve Office Training Corp](#)
[Air Force Aerospace Studies](#)

## AIRR-1020 (1) Foundations of the United States Air Force 2

A continuation of AIRR 1010-1. One 1-hour lecture and one 2-hour lab per week.

[Cross College Programs](#)
[Reserve Office Training Corp](#)
[Air Force Aerospace Studies](#)

## AIRR-2010 (1) The Evolution of USAF Air and Space Power 1

One 1-hour lecture and one 2-hour lab per week. Studies air power from balloons and dirigibles through the jet age and historically reviews air power employment in military and nonmilitary operations in support of national objectives. Looks at the evolution of air power concepts and doctrine and introduces the development of communicative skills.

[Cross College Programs](#)
[Reserve Office Training Corp](#)
[Air Force Aerospace Studies](#)

## AIRR-2020 (1) The Evolution of USAF Air and Space Power 2

a continuation of Airr 2010. One 1-hour lecture and one 2-hour lab per week.

---

[Cross College Programs](#) | [Reserve Office Training Corp](#) | [Air Force Aerospace Studies](#)

---

## AIRR-3010 (3) Air Force Leadership Studies I

Two 1 1/2-hour seminars plus one 2-hour lab per week. Provides an integrated management course emphasizing concepts and skills required by the successful manager and leader. Includes individual motivational and behavioral processes, leadership, communication, and group dynamics while providing foundation for the development of the junior officer's professional skills (officership). Emphasizes decision making and use of analytic aids in planning, organizing and controlling in a changing environment. Discusses organizational and personal values (ethics), management of change, organizational power, politics, managerial strategy, and tactics within the context of military organization. Uses actual Air Force case studies throughout the course to enhance the learning and communication process.

---

[Cross College Programs](#) | [Reserve Office Training Corp](#) | [Air Force Aerospace Studies](#)

---

## AIRR-3020 (3) Air Force Leadership Studies II

Two 1 1/2-hour seminars and one 2-hour lab per week. Continuation of AIRR 3010. Emphasizes basic managerial processes while employing group discussions, case studies, and role playing as learning devices. Continues to emphasize the development of communicative skills.

---

[Cross College Programs](#) | [Reserve Office Training Corp](#) | [Air Force Aerospace Studies](#)

---

## AIRR-4010 (3) National Security Affairs/Preparation for Active Duty

Two 1 1/2-hour seminars and one 2-hour lab per week. Studies U.S. national security policy which examines the formulation, organization, and implementation of national security policy; context of national security; evolution of strategy; management of conflict; and civil-military interaction. Also includes blocks of instruction on the military profession/officership, the military justice system, and communicative skills. Provides future Air Force officers with the background of U.S. national security policy so they can effectively function in today's Air Force.

---

[Cross College Programs](#) | [Reserve Office Training Corp](#) | [Air Force Aerospace Studies](#)

---

## AIRR-4020 (3) National Security Forces in Contemporary American Society 2

Two 1 1/2-hour seminars and one 2-hour lab per week. a continuation of AIRR 4010. Includes defense strategy conflict management, formulation/implementation of U.S. defense policy, and organizational factors and case studies in policy making, military law, uniform code of military justice, and communication skills.

---

ANTH

### ANTH-1030 (3) Principles of Anthropology 1

Evolution of humanity and culture from beginnings through early metal ages. Covers human evolution, race, prehistory, and rise of early civilizations. This course is taught through Continuing Education. Meets MAPS requirements for social science: general.

[College of Arts & Sciences](#) [Anthropology](#)

### ANTH-1040 (3) Principles of Anthropology 2

Surveys the world's major culture areas. Covers components of culture, such as subsistence, social organization, religion, and language. This course is taught through Continuing Education. Meets MAPS requirement for social science: general.

[College of Arts & Sciences](#) [Anthropology](#)

### ANTH-1100 (3) Exploring a Non-Western Culture: The Tamils

Surveys the social and economic patterns, ideas and values, and aesthetic achievements of the Tamils, a Hindu people who live in South India and Sri Lanka. Approved for arts and sciences core curriculum: human diversity.

[College of Arts & Sciences](#) [Anthropology](#)

### ANTH-1105 (3) Exploring a Non-Western Culture: Tibet

Introduction to Tibetan culture, history, religion, and society from an anthropological perspective, including traditional as well as contemporary dimensions. Topics will include Tibetan Buddhism, politics, nomadism, gender, refugee issues, and the global Tibetan

---

diaspora, all framed within the larger methods and concepts of cultural anthropology. Approved for arts and sciences core curriculum: human diversity.

College of Arts & Sciences Anthropology

---

## ANTH-1110 (3) Exploring a Non-Western Culture: Japan

Examines modern Japan in terms of cultural styles, social patterns, work practices, aesthetic traditions, ecological conditions, and historical events that shape it as both a non-Western culture and a modern industrial state. Approved for arts and sciences core curriculum: human diversity.

College of Arts & Sciences Anthropology

---

## ANTH-1115 (3) The Caribbean in Post-Colonial Perspective

Introduces the student to the varied peoples and cultures in the Caribbean region, emphasizing the historical, colonial, and contemporary political-economic contexts of their social structure and cultural patterns. Approved for arts and sciences core curriculum: human diversity.

College of Arts & Sciences Anthropology

---

## ANTH-1120 (3) Exploring a Non-Western Culture: Hopi and Navajo

Explores two American Indian cultures, Hopi and Navajo, and cultural interrelationships from the prehistoric through the contemporary period, using an integrated, holistic, and humanistic viewpoint. Same as ETHN 1123. Approved for arts and sciences core curriculum: human diversity.

College of Arts & Sciences Anthropology

---

## ANTH-1135 (3) Exploring a Non-Western Culture: TBA

Examines the geography, kinship, politics and religious values of a particular non-Western people in historical and contemporary context through an anthropological perspective. Approved for arts and sciences core curriculum: human diversity.

College of Arts & Sciences Anthropology

---

## ANTH-1140 (3) Exploring a Non-Western Culture: The Maya

Explores the culture of the Maya of Central America, emphasizing their material adaptations, social organizations, ideals and values, and artistic achievements in the past and the present. Approved for arts and sciences core curriculum: human diversity.

---

College of Arts & Sciences Anthropology

---

## ANTH-1145 (3) Exploring a Non-Western Culture: The Aztecs

Explores the culture of the Aztec people of Central Mexico: their subsistence, society, religion, and achievements, as well as the impact of the Aztec empire in Mesoamerica. Also reviews the clash of a non-western society with the western world with the arrival of the Spanish conquistadors. Approved for arts and sciences core curriculum: human diversity.

---

College of Arts & Sciences Anthropology

---

## ANTH-1150 (3) Exploring a Non-Western Culture: Regional Cultures of Africa

Explores a small number of cultures in a specific sub-region of Africa from an integrated holistic viewpoint, emphasizing material adaptations, social patterns, ideas and values, and aesthetic achievements. Approved for arts and sciences core curriculum: human diversity.

---

College of Arts & Sciences Anthropology

---

## ANTH-1160 (3) The Ancient Egyptian Civilization

Emphasizes the origin of the Egyptian culture, its importance, and its impact on other cultures. In addition, the different points of view of various scholars are discussed with a comparative study of the ancient Egyptian culture and modern culture of Egypt and the Middle East. Approved for arts and sciences core curriculum: human diversity.

---

College of Arts & Sciences Anthropology

---

## ANTH-1170 (3) Exploring Culture and Gender through Film

Uses films and written texts to explore the concepts of culture and gender, as well as ethnicity and race. By looking at gender, ethnicity, and race cross-culturally, students will know how these concepts are constructed in their own society, as well as in others. Approved for arts and sciences core curriculum: human diversity.

---

College of Arts & Sciences Anthropology

---

## ANTH-1180 (3) Maritime People: Fishers and Seafarers

Explores important milestones in the development of human societies and cultures that live from the sea. Emphasizes the evolution of maritime adaptations associated with fishing and seafaring from more than 10,000 years ago through the present. Approved for arts and

---

sciences core curriculum: historical context.

College of Arts & Sciences Anthropology

---

## ANTH-1190 (3) Origins of Ancient Civilizations

Examines origins of the world's first civilizations in Mesopotamia, Egypt, the Indus Valley, Mesoamerica, and the Andes. Covers archaeology of ancient cities, trade, economy, politics, warfare, religion, and ideology. Seeks insights into general processes of cultural evolution. Approved for arts and sciences CORE curriculum: historical context.

College of Arts & Sciences Anthropology

---

## ANTH-1200 (3) Culture and Power

Compares contemporary sociopolitical systems across cultures, from non-Western tribal groups to modern states. Introduces students to anthropological approaches for understanding and analyzing political forces, processes, and institutions that affect cultures such as colonialism, warfare, violence, ethnicity, migration, and globalization. Approved for arts and sciences CORE curriculum: contemporary societies.

College of Arts & Sciences Anthropology

---

## ANTH-2009 (3) Modern Issues, Ancient Times.

Considers issues of vital importance to humans, both now and in ancient times. Topics such as food, death, sex, family, literacy, or power are explored to consider how ancient societal norms and attitudes evolved, and how they relate to modern culture. Draws on material and literary evidence to develop an understanding of the complexities of ancient life. Same as CLAS 2009. Approved for arts and sciences CORE curriculum: historical context.

College of Arts & Sciences Anthropology

---

## ANTH-2010 (3) Introduction to Physical Anthropology 1

Detailed consideration of human biology, the place of humans in the animal kingdom, primate ecology, and fossil evidence for human evolution. Credit not granted for this course and ANTH 2050. Required for ANTH majors. Meets MAPS requirement for natural science: non-lab. Approved for arts and sciences core curriculum: natural science.

College of Arts & Sciences Anthropology

---

## ANTH-2020 (3) Introduction to Physical Anthropology 2

---

Continuation of ANTH 2010. Emphasizes genetics, human variation, and microevolution. Prereq., ANTH 2010. Credit not granted for this course and ANTH 2060. Approved for arts and sciences core curriculum: natural science.

College of Arts & Sciences Anthropology

---

## ANTH-2030 (1) Laboratory in Physical Anthropology 1

Lab in human osteology and musculoskeletal system emphasizing comparative primate morphology, adaptation, and the fossil record documenting the natural history of primates. Coreq., ANTH 2010. Meets MAPS requirement for natural science: lab, when taken with ANTH 2010. Approved for arts and sciences core curriculum: natural science.

College of Arts & Sciences Anthropology

---

## ANTH-2040 (1) Laboratory in Physical Anthropology 2

Experiments and hands-on exercises designed to enhance understanding of the principles and concepts presented in ANTH 2020. One two-hour class per week. Coreq., ANTH 2020. Approved for arts and sciences CORE curriculum: natural science.

College of Arts & Sciences Anthropology

---

## ANTH-2070 (3) Bones, Bodies, and Disease

Studies the human skeleton and introduces techniques used to evaluate demographic variables. Applies techniques through evaluation of photographic images of an excellently preserved mummified skeletal population from ancient Nubia to reconstruct prehistoric patterns of adaptation and biocultural evolution. Offered through Continuing Education only. Recommended prereq., ANTH 2010.

College of Arts & Sciences Anthropology

---

## ANTH-2100 (3) Frontiers of Cultural Anthropology

Covers current theories in cultural anthropology and discusses the nature of field work. Explores major schools of thought and ethnographic fieldwork in a range of cultures studied by anthropologists. Required for ANTH majors.

College of Arts & Sciences Anthropology

---

## ANTH-2200 (3) Introduction to Archaeology

Discusses history, basic concepts, techniques, and theoretical construction of archaeological field and laboratory investigations, as well as a general outline of world prehistory. Required for ANTH majors.

## ANTH-2210 (1) Laboratory Course in Archaeological Methods

Studies analytical methods in archaeological research including those employed both in the field and in the laboratory. Deals with practical exercises illustrating many of the theoretical principles covered in ANTH 2200. Coreq., ANTH 2200.

ANTH

## ANTH-3000 (3) Primate Behavior

Surveys naturalistic primate behavior. Emphasizes social behavior, behavioral ecology, and evolution as they lead to an understanding of human behavior. Restricted to students with 57-180 credits (Junior or Senior). Prereqs., ANTH 2010 or EBIO 1210. Approved for arts and sciences core curriculum: natural science. Prerequisites: Requires pre-requisite course of ANTH 2010 or EBIO 1210. Restricted to students with 57-180 credits (Junior or Senior).

[College of Arts & Sciences](#) [Anthropology](#)

## ANTH-3010 (3) The Human Animal

Identifies genetic, anatomical, physiological, social, and behavioral characteristics humans share with other mammals and primates. Explores how these characteristics are influenced by modern culture. Prereq., ANTH 2010 or equivalent. Approved for arts and sciences CORE curriculum: natural science.

[College of Arts & Sciences](#) [Anthropology](#)

## ANTH-3100 (3) Africa: Peoples and Societies in Change

Examines culture and politics in Africa through works by anthropologists and historians, as well as novels, films, and journalistic accounts. Special attention is devoted to the ways in which various African cultures have creatively and resiliently responded to the slave trade, European colonialism, and post-colonialism.

[College of Arts & Sciences](#) [Anthropology](#)

---

## ANTH-3110 (3) Ethnography of Mexico and Central America

A broad overview, focusing on Mexico and Guatemala. Major topics include ethnohistory, indigenous and mestizo peoples, and contemporary problems and issues. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

College of Arts & Sciences Anthropology

---

## ANTH-3160 (3) Peoples of the South Pacific

Surveys traditional island cultures and contemporary changes in the Pacific, focusing on how the Pacific Islands were first settled, some of the great anthropologists who studied the islanders, and how current environmental changes, such as global warming, threaten the future existence of the islands. Restricted to juniors/seniors. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

College of Arts & Sciences Anthropology

---

## ANTH-3170 (3) America: An Anthropological Perspective

Historical and contemporary aspects of American life are considered from an anthropological perspective. Approved for arts and sciences CORE curriculum: United States context.

College of Arts & Sciences Anthropology

---

## ANTH-3180 (3) Gender, Culture, and Sexuality

Focuses on gender, that is, the making of men and women, and how gender is culturally constructed in different societies. Gender describes many areas of behavior, feelings, thoughts, and fantasies that cannot be understood as primarily biologically produced. Sexuality and sexual systems are sometimes viewed as products of particular gendering practices, but recent theories suggest that sexual systems themselves constitute gender. Prereq., ANTH 2100. Similar to WMST 2080.

College of Arts & Sciences Anthropology

---

## ANTH-3218 (3) Peoples and Cultures of West Africa

Deals with the history and anthropology of selected west African societies in the period before the imposition of European colonial rule. Same as HIST 3218.

College of Arts & Sciences Anthropology

---

## ANTH-3300 (3) Elements of Religion

Explores universal components of religion, as inferred from religions of the world, ranging from smaller-scale oral to larger-scale literate traditions. Restricted to sophomores/juniors/seniors. Same as ETHN 3301. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

## ANTH-4000 (3) Quantitative Methods in Anthropology

Surveys ways of deriving meaning from anthropological data by numerical means, including but not confined to basic statistical procedures. Prereqs., ANTH 2010 and 2020. Same as ANTH 5000. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

## ANTH-4020 (3) Explorations in Anthropology

Special topics in cultural and physical anthropology, as well as archaeology. Check with the department for semester offerings. May be repeated up to 9 total credit hours. Restricted to Junior or Senior Anthropology Majors only. Same as ANTH 5020. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

## ANTH-4045 (3) Introduction to Museum Anthropology

This courses traces the development of Anthropology and museums in America from late 19th century to present day. Students are encouraged to: explore museum theory and practice; think critically about the history of relations among Native Americans, Anthropology, and museums; consider the legacy of collecting and challenges of representing others; and, examine the interplay of Anthropology, material culture, and colonialism. ANTH 4045, ANTH 5045, and MUSM 5045 are the same course. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

## ANTH-4050 (3) Anthropology of Jews and Judaism

Explores topics in Jewish anthropology. Course will use the lens of anthropological inquiry to explore, discover and analyze different concepts within Jewish culture. Topics explored will include customs, religious practices, languages, ethnic and regional subdivisions, occupations, social composition, and folklore. Courses will explore fundamental questions about the definition of Jewish identity, practices and communities. May be repeated up to 9 total credit hours. Restricted to students with 57-180 credits (Junior or Senior). ANTH 4050 and JWST 4050 are the same course. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

## ANTH-4060 (3) Nutrition and Anthropology

Overview of the evolution of human diet and ecological and cultural factors shaping modern diets. Introduces fundamentals of nutrition and analysis of nutritional status. Analyzes ecological, social, and cultural factors leading to hunger and undernutrition, as well as biological and behavioral consequences of undernutrition. Prereqs., ANTH 2010 and 2020, or EBIO 1210 and 1220, or EBIO 1030 and 1040. Same as ANTH 5060. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

---

## ANTH-4070 (3) Methods in Biological Anthropology

Provides laboratory-based research experience in selected areas of biological anthropology. Research designs, methods and applications will be used to develop research skills. Students will read original research papers and carry out a research project of their own design. Area of emphasis within biological anthropology will depend on instructor. May be repeated up to 6 total credit hours. Prereqs., ANTH 2010 and 2020. Recommended prereqs., ANTH 2030, 2040, and 4000. Restricted to juniors/seniors. Same as ANTH 5070.

## ANTH-4110 (3) Human Evolutionary Biology

Detailed consideration of the fossil evidence for human evolution. Covers the discovery of important fossils and interpretations; descriptive information about the fossils; and data and theory from Pleistocene studies relating to ecology, ecological and behavioral data on modern apes, and molecular studies that have bearing on the study of human evolution. Restricted to students with 57-180 credits (Junior or Senior). Prereqs., ANTH 2010 or 2020, or EBIO 1210 or 1220. Same as ANTH 5110. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

## ANTH-4120 (3) Advanced Physical Anthropology

Selected topics in physical anthropology emphasizing faculty specialties. Topics may include population genetics and its application to understanding modern human diversity, human population biology, and primate ecology and evolution. May be repeated up to 6 total credit hours. Prereq., ANTH 2010 or 2020, or EBIO 1210 or 1220. Same as ANTH 5120. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

## ANTH-4129 (3) Aegean Art and Archaeology

A detailed study of the cultures of prehistoric Greece, the Cycladic Islands, and Crete, their art and archaeology, and their history within the broader context of the eastern Mediterranean, from earliest human settlement to the collapse of the Bronze Age at about 1100 B.C.E. Emphasis is on palace states. Same as ARTH/CLAS 4129, ANTH 5129.

## ANTH-4130 (3) Advanced Osteology

Detailed study of the human skeleton with special attention to health and demographic conditions in prehistoric cultures and the evaluation of physical characteristics and genetic relationships of prehistoric populations. Prereqs., ANTH 2010, 2020, and 4000. Restricted to juniors and seniors. Same as ANTH 5130.

---

College of Arts & Sciences Anthropology

---

## ANTH-4150 (3) Human Ecology: Biological Aspects

Discusses role of human populations in local ecosystems, factors affecting population growth, and human adaptability to environmental stress. Detailed consideration of case studies of small-scale societies in different ecosystems. Prereqs., ANTH 2010 and 2020, or EBIO 1210 and 1220. Same as ANTH 5150.

College of Arts & Sciences Anthropology

---

## ANTH-4170 (3) Primate Evolutionary Biology

Focuses on the fossil record of nonhominoid primates. Special emphasis placed on delineating the origins of the order Primates, the origins of the primate semiorders Strepsirhini and Haplorhini, and the adaptations of extinct primates in light of our understanding of the modern primate adaptive radiations. Prereqs., ANTH 2010 or EBIO 1210. Same as ANTH 5170. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

College of Arts & Sciences Anthropology

---

## ANTH-4180 (3) Anthropological Perspectives: Contemporary Issues

Students read, discuss, and write critical evaluations of contemporary publications in anthropology. Identifies basic themes that inform major anthropological perspectives. Students then bring these perspectives to bear on issues currently facing the human species. May be repeated up to 6 total credit hours. Restricted to junior or senior Anthropology majors only. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

College of Arts & Sciences Anthropology

---

## ANTH-4210 (3) Southwestern Archaeology

Explores the prehistory of the American Southwest from the earliest entry of humans into the area to the Spanish entrada. Focuses on important themes in cultural development: the adoption of agricultural strategies, sedentism, population aggregation, population movement, and social complexity. Prereq., ANTH 2200. Same as ANTH 5210.

College of Arts & Sciences Anthropology

---

## ANTH-4220 (3) From Olmec to Aztec: The Archaeology of Mexico

Examines the archaeology of Mexico from the initial peopling of the Americas to the Spanish conquest of the Aztec empire. Studies origins of complex societies; ancient Mexican cities, states, and empires; religion and politics; trade and interaction; ecology and economy; and social organization. Prereq., ANTH 2200. Restricted to juniors or seniors. Same as ANTH 5220. Prerequisites: Restricted

to students with 57-180 credits (Junior or Senior).

[College of Arts & Sciences](#) [Anthropology](#)

---

---

## ANTH-4224 (3) Archaeology of the Maya and Their Neighbors

Begins with the environment and describes the earliest inhabitants and the Olmec civilization, then shifts to the earliest Maya and the emergence and collapse of classic Maya civilization. Compares and contrasts the societies of lower Central America. Prereq., ANTH2200. Same as ANTH 5224. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

Subject Number

ANTH

### ANTH-4240 (3) Geoarchaeology

Applies geological principles and instruments to help solve archaeological problems. The focus is on site formation processes, soils, stratigraphy, environments, dating, remote sensing, and geophysical exploration. Environmental and ethical considerations are included. Prereq., ANTH 2200. Same as ANTH 5240. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

[College of Arts & Sciences](#) [Anthropology](#)

### ANTH-4270 (3) Plains Archaeology

Archaeological evidence for Native American ways of life on the North American Great Plains from the initial peopling of the region into the 19th century. Restricted to students with 57-180 credits (Junior or Senior). Prereq., ANTH 2200. Same as ANTH 5270. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

[College of Arts & Sciences](#) [Anthropology](#)

### ANTH-4330 (3) Human Ecology: Archaeological Aspects

Surveys archaeological approaches to ecology, economy, and landscape: glaciation, geomorphology, and other physical processes creating and affecting sites and regions; environmental reconstruction; theories of human-environment interaction; landscape formation by forager, agricultural, and complex societies; and ideologically structured landscapes. Prereq., ANTH 2200. Restricted to sophomores, juniors and seniors. Same as ANTH 5330. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

[College of Arts & Sciences](#) [Anthropology](#)

### ANTH-4340 (3) Archaeological Method and Theory

Surveys archaeological theories and methods within the context of the history of archaeology. Includes archaeological approaches to data

---

recovery, analysis, and interpretation as well as an overview of cultural resources management and ethical issues in contemporary archaeology. Prereq., ANTH 2200. Restricted to juniors and seniors.

College of Arts & Sciences Anthropology

---

## ANTH-4350 (2-6) Archaeological Field and Laboratory Research

Students participate in archaeological field research or conduct laboratory analysis of archaeological materials and data. Students work with faculty on archaeological research projects with a field or lab focus, depending on the project undertaken. May be repeated up to 6 total credit hours. Prereq., ANTH 2200. Restricted to juniors/seniors. Same as ANTH 5350.

College of Arts & Sciences Anthropology

---

## ANTH-4380 (3) Lithic Analysis and Replication

Uses diversity of approaches to the analysis of ancient stone tools, including fracture mechanics, lithic technology, materials, heat treatment, and functional analysis. Percussion and pressure-flaking experiments are performed. Prereq., ANTH 2200. Same as ANTH 5380. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

College of Arts & Sciences Anthropology

---

## ANTH-4390 (3) Research Methods in Archaeology I

Method and theory of archaeology, emphasizing the interpretation of materials and data and the relationship of archaeology to other disciplines. Prereq., ANTH 2200 and instructor consent. Same as ANTH 5390. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

College of Arts & Sciences Anthropology

---

## ANTH-4420 (3) Archaeology of Ancient Egypt

Archaeology of ancient Egypt in light of recent excavations; the history of excavations of the different sites; and the art of ancient Egypt through time. Restricted to juniors and seniors. Same as ANTH 5420.

College of Arts & Sciences Anthropology

---

## ANTH-4430 (3) Biblical Archaeology

Old Testament history in the light of archaeological investigation; the Old Testament within the framework of the literature of the ancient near East. Same as ANTH 5430.

College of Arts & Sciences Anthropology

---

---

## ANTH-4440 (3) Egyptian Hieroglyphics 1

Studies the ancient Egyptian language to shed light on the history and cultures of ancient Egypt. Involves reading and translating hieroglyphics into the English language. Same as ANTH 5440.

College of Arts & Sciences Anthropology

---

---

## ANTH-4500 (3) Cross-Cultural Aspects of Socioeconomic Development

Examines goals of international agencies that support development in underdeveloped countries. Anthropological perspective is provided for such issues as urban planning, health care and delivery, population control, rural development, and land reform. Same as ANTH 5500. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

College of Arts & Sciences Anthropology

---

---

## ANTH-4505 (3) Globalization and Transnational Culture

Covers the historical foundations for contemporary global change, addressing colonialism, global outsourcing, and cultural imperialism, with a particular emphasis on gender, class, and consumerism. Prereq., ANTH 2100.

College of Arts & Sciences Anthropology

---

---

## ANTH-4510 (3) Applied Cultural Anthropology

Analysis of problems of cultural change due to contacts between people of different cultures. Restricted to senior ANTH or ETHN majors. Same as ETHN 4521 and ANTH 5510.

College of Arts & Sciences Anthropology

---

---

## ANTH-4520 (3) Symbolic Anthropology

Explores anthropological approaches to the study of symbolic systems, including cosmology, myth, religion, ritual, and art, as well as everyday patterns of metaphor and the presentation of self. Theoretical issues include semiotics, psychoanalysis, structuralism, liminality, and critical theory. Prereq., ANTH 2100 or instructor consent. Same as ANTH 5520.

College of Arts & Sciences Anthropology

---

---

---

## ANTH-4530 (3) Theoretical Foundations of Sociocultural Anthropology

Critically examines the pivotal schools of 20th century social theory that have shaped modern sociocultural anthropology, including the ideas of cultural evolutionism, Marxism, Durkheim, Weber, Freud, structuralism, postmodernism, and contemporary anthropological approaches. Includes primary readings and seminar-style discussion. Prereq., ANTH 2100 or instructor consent. Same as ANTH 5530. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

College of Arts & Sciences Anthropology

---

## ANTH-4540 (3) Hunters and Gatherers

Explores hunter-gatherer ways of life and the ways in which anthropologists have thought about those ways of life, using lectures, discussion, the professional literature, and film. Topics covered include the history of hunter-gatherer research, relations between this research and archaeological studies of the human past, critiques of classic hunter-gatherer studies, and the current status of hunting and gathering peoples. Prereqs., ANTH 2010, 2020, 2100 and 2200.

College of Arts & Sciences Anthropology

---

## ANTH-4560 (3) North American Indian Acculturation

Comprehensive survey of changes in the native cultures of America north of Mexico caused by occupation of the continent by Old World populations, including a review of processes of contact, environmental changes, changes in major institutions, the nature of federal/state administration, the reservation system, and contemporary developments. Restricted to senior ANTH or ETHN majors. Same as ETHN 4563 and ANTH 5560. Approved for arts and sciences core curriculum: human diversity.

College of Arts & Sciences Anthropology

---

## ANTH-4570 (3) Anthropology of Fishing

Examines fishing methods, peoples, societies, and cultures, emphasizing anthropology's role in shaping fisheries management and development policy. Same as ANTH 5570. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

College of Arts & Sciences Anthropology

---

## ANTH-4580 (3) The Holocaust: An Anthropological Perspective

Focuses on the Holocaust during the Third Reich, which involved the murder of millions of people, including six million Jews. Reviews the Holocaust's history, dynamics, and consequences as well as other genocides of the 20th century, using an anthropological approach. Restricted to juniors/seniors. Same as JWST 4580. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

College of Arts & Sciences Anthropology

---

## ANTH-4610 (3) Medical Anthropology

Cultural factors determine states of health and illness in both Western and non-Western societies. The transition from traditional to modern status creates new problems including population growth, aging, changing patterns of morbidity, mortality and health care, and new socioeconomic consequences. Restricted to students with 57-180 credits (Junior or Senior). Prereq., ANTH 2100. Same as ANTH 5610. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

College of Arts & Sciences Anthropology

---

## ANTH-4620 (3) Nationalism and Cultural Citizenship

Explores the nature of ethnic conflict, nationalism, and cultural citizenship in different contexts, including the United States. Is the nation-state dead? What effect do extranational and transnational organizations/institutions (e.g., European Union) have on the development of nationalism? Through the exploration of contemporary theory and case studies, this class will address these important contemporary concerns. Prereq., ANTH 2100.

College of Arts & Sciences Anthropology

---

## ANTH-4630 (3) Nomadic Peoples of East Africa

Examines the issues of current concern in the study of East African pastoral peoples. The first half of the course is devoted to historical perspectives and the second half explores the transition from subsistence to market oriented economies. Restricted to junior and senior ANTH majors. Same as ANTH 5630.

College of Arts & Sciences Anthropology

---

## ANTH-4690 (3-6) Anthropology of Tibet

Explores the culture of Tibet in both historical and thematic manners, considering the long-term development of Tibetan cultural practices and institutions as well as many of the abrupt changes introduced to Tibet in the 20th century. Topics covered include region, politics, gender, warfare, poetry and literature, and life under Chinese rule and as refugees around the world. Prereq., ANTH 2100. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) Anthropology (ANTH) majors only.

College of Arts & Sciences Anthropology

---

## ANTH-4710 (3) Departmental Honors in Anthropology 1

Course work built around theme of research design as a means of integrating previous training in the field of anthropology as well as providing an opportunity to perform creative scientific investigations. The course prepares students to write an honors thesis in ANTH 4720. Required of students doing Anthropology departmental honors. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences Anthropology

---

# ANTH-4720 (3) Departmental Honors in Anthropology 2

Continuation of ANTH 4710. Prereq., ANTH 4710.

[College of Arts & Sciences](#) [Anthropology](#)

ANTH

## ANTH-4730 (3) Latin American Politics and Culture through Film and Text

Introduces students to the political cultures and societies of Latin America. Through historical and ethnographic text, and documentary and non-documentary cinema, this course will explore class relations, ideology, and resistance from the conquest to the present.

Restricted to students with 57-180 credits (Junior or Senior). Prereq., ANTH 2100. Same as ANTH 5730. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

[College of Arts & Sciences](#) [Anthropology](#)

## ANTH-4740 (3) Peoples and Cultures of Brazil

Thematically surveys theoretical and ethnographic issues that have been important in understanding Brazil. Read and write critically about textual and visual representations of Brazil presented in the course. Prereq., ANTH 2100; three or more cultural anthropology courses recommended.

[College of Arts & Sciences](#) [Anthropology](#)

## ANTH-4750 (3) Culture and Society in South Asia

Intensive analysis of major issues in anthropological research on South Asia (India, Pakistan, Bangladesh, Nepal, and Sri Lanka), including kinship, gender, marriage, caste system, religion and ritual, ethnic conflict, and social change. Prereq., ANTH 2100 or instructor consent. Same as ANTH 5750.

[College of Arts & Sciences](#) [Anthropology](#)

## ANTH-4760 (3) Ethnography of Southeast Asia and Indonesia

Introduces the historical, political, and cultural dimensions of Southeast Asia, focusing primarily on Malaysia, the Philippines, Singapore, and Indonesia, with some coverage of mainland Southeast Asia. Prereq., ANTH 2100. Restricted to juniors or seniors. Same as ANTH 5760. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

College of Arts & Sciences Anthropology

---

---

## ANTH-4770 (3) Anthropology of Tourism

Introduces students to anthropological theories on tourism and considers those theories in the contexts of the varied sites and forms of tourism practiced around the world today. We will ask: why do people tour? Where do they go? And most centrally: How do the hosts to tourism feel about these outside visitors? Having been exposed to questions of globalization, development, belonging, race, gender, and desire, students will then be asked to reflect upon and theorize their own touristic experiences. Recommended prereq., ANTH 2100.

College of Arts & Sciences Anthropology

---

---

## ANTH-4800 (3) Language and Culture

Same as LING 4800.

College of Arts & Sciences Anthropology

---

---

## ANTH-4840 (1-6) Independent Study

For upper-division undergraduate students. May be repeated up to 6 total credit hours. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences Anthropology

---

---

## ANTH-4910 (1-3) Teaching Anthropology

Practicum by special arrangement only. Students learn to teach anthropology by serving as recitation leaders or tutors in introductory courses or as small group leaders in advanced courses. May be repeated up to 6 total credit hours. Prereq., instructor consent.

Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences Anthropology

---

---

## ANTH-4930 (1-6) Anthropology Internship

Provides academically supervised opportunities for junior and senior anthropology majors and graduate students to work in public and private sectors on projects related to students' career goals. Relates classroom theory to practice. Requires at least 48 hours on the job per credit hour and evidence (paper, employer evaluation, work journal) of significant learning. May be repeated up to 9 total credit hours. Prereqs., ANTH 2010, 2100, and 2200, junior standing, anthropology major with a minimum 3.25 GPA, and departmental consent. Same

as ANTH 5930.

College of Arts & Sciences Anthropology

---

---

## ANTH-5000 (3) Quantitative Methods in Anthropology

Same as ANTH 4000. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Anthropology

---

---

## ANTH-5020 (3) Explorations in Anthropology

Same as ANTH 4020. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Anthropology

---

---

## ANTH-5045 (3) Introduction to Museum Anthropology

This courses traces the development of Anthropology and museums in America from late 19th century to present day. Students are encouraged to: explore museum theory and practice; think critically about the history of relations among Native Americans, Anthropology, and museums; consider the legacy of collecting and challenges of representing others; and, examine the interplay of Anthropology, material culture, and colonialism. ANTH 4045, ANTH 5045, and MUSM 5045 are the same course. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Anthropology

---

---

## ANTH-5060 (3) Nutrition and Anthropology

Same as ANTH 4060. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Anthropology

---

---

## ANTH-5070 (3) Methods in Biological Anthropology

May be repeated up to 6 total credit hours. Same as ANTH 4070.

College of Arts & Sciences Anthropology

---

---

## ANTH-5110 (3) Human Evolutionary Biology

Same as ANTH 4110.

---

College of Arts & Sciences Anthropology

---

## ANTH-5120 (3) Advanced Physical Anthropology

Same as ANTH 4120. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Anthropology

---

## ANTH-5129 (3) Aegean Art and Archaeology

Same as ANTH 4129.

College of Arts & Sciences Anthropology

---

## ANTH-5130 (3) Advanced Osteology

Same as ANTH 4130.

College of Arts & Sciences Anthropology

---

## ANTH-5150 (3) Human Ecology: Biological Aspects

Same as ANTH 4150.

College of Arts & Sciences Anthropology

---

## ANTH-5170 (3) Primate Evolutionary Biology

Same as ANTH 4170.

College of Arts & Sciences Anthropology

---

## ANTH-5210 (3) Southwestern Archaeology

Same as ANTH 4210.

College of Arts & Sciences Anthropology

---

---

---

---

## ANTH-5220 (3) From Olmec to Aztec: The Archaeology of Mexico

Same as ANTH 4220. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Anthropology

---

---

## ANTH-5224 (3) Archaeology of the Maya and Their Neighbors

Same as ANTH 4224. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Anthropology

---

---

## ANTH-5240 (3) Geoarchaeology

Same as ANTH 4240. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Anthropology

---

---

## ANTH-5270 (3) Plains Archaeology

Same as ANTH 4270.

College of Arts & Sciences Anthropology

ANTH

## ANTH-5330 (3) Human Ecology: Archaeological Aspects

Same as ANTH 4330. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Anthropology

## ANTH-5345 (3) Archaeological Theory

Provides an advanced historical introduction to archaeological theory and methods. Designed to help students understand why certain issues have been and are important to the development of archaeology, especially American archaeology. Explores issues within the context of the history of anthropology and American society as a whole. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Anthropology

## ANTH-5350 (2-6) Archaeological Field and Laboratory Research

Same as ANTH 4350.

College of Arts & Sciences Anthropology

## ANTH-5380 (3) Lithic Analysis and Replication

Same as ANTH 4380. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Anthropology

---

## ANTH-5390 (3) Research Methods in Archaeology 1

Same as ANTH 4390. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Anthropology

---

## ANTH-5400 (3) Research Methods in Archaeology 2

Focuses on the design of research including constructing empirical arguments and testing them, data gathering, site formation processes, field strategies (archival resources, mapping, field survey, surface collecting/recording, excavation and preliminary analysis) and artifact analysis as it relates to research design.

College of Arts & Sciences Anthropology

---

## ANTH-5420 (3) Archaeology of Ancient Egypt

Same as ANTH 4420.

College of Arts & Sciences Anthropology

---

## ANTH-5430 (3) Biblical Archaeology

Same as ANTH 4430.

College of Arts & Sciences Anthropology

---

## ANTH-5440 (3) Egyptian Hieroglyphics 1

Same as ANTH 4440. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Anthropology

---

## ANTH-5460 (3) Archaeology and Contemporary Society

Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Anthropology

---

## ANTH-5500 (3) Cross-Cultural Aspects of Socioeconomic Development

Same as ANTH 4500. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Anthropology

---

---

## ANTH-5510 (3) Applied Cultural Anthropology

Same as ANTH 4510.

College of Arts & Sciences Anthropology

---

---

## ANTH-5520 (3) Symbolic Anthropology

Same as ANTH 4520.

College of Arts & Sciences Anthropology

---

---

## ANTH-5530 (3) Theoretical Foundations of Sociocultural Anthropology

Same as ANTH 4530. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Anthropology

---

---

## ANTH-5560 (3) North American Indian Acculturation

Same as ANTH 4560.

College of Arts & Sciences Anthropology

---

---

## ANTH-5570 (3) Anthropology of Fishing

Same as ANTH 4570. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Anthropology

---

---

## ANTH-5600 (3) Human Ecology: Cultural Aspects

Reviews and critically examines the major theoretical perspectives for understanding the relationship between human social behavior and the environment developed in the social sciences, especially anthropology, over the last 100 years.

---

College of Arts & Sciences Anthropology

---

## ANTH-5610 (3) Medical Anthropology

Same as ANTH 4610.

College of Arts & Sciences Anthropology

---

## ANTH-5630 (3) Nomadic Peoples of East Africa

Same as ANTH 4630.

College of Arts & Sciences Anthropology

---

## ANTH-5730 (3) Latin American Politics and Culture through Film and Text

Same as ANTH 4730.

College of Arts & Sciences Anthropology

---

## ANTH-5750 (3) Culture and Society in South Asia

Same as ANTH 4750.

College of Arts & Sciences Anthropology

---

## ANTH-5760 (3) Ethnography of Southeast Asia and Indonesia

Same as ANTH 4760. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Anthropology

---

## ANTH-5770 (3) Core Course---Archaeology

Provides a graduate-level overview of analytic issues relevant to all phases of archaeological research and of the diversity of theoretical perspectives within the field as a whole. Course is required for all first-year graduate students in anthropology. Prereq., graduate status in anthropology. Prerequisites: Restricted to Graduate Students only.

---

College of Arts & Sciences Anthropology

## ANTH-5780 (3) Core Course-Cultural Anthropology

Provides an intense, graduate-level introduction to the discipline of cultural anthropology, with an emphasis upon critically assessing those methods, theories, and works that have shaped the field from the 19th century to the present time. Required of all first-year graduate students in anthropology. Restricted to anthropology graduate students or instructor consent. Prerequisites: Restricted to Graduate Students only.

## ANTH-5785 (3) Advanced Seminar in Cultural Anthropology

Details the history of theory and practice in contemporary cultural anthropology, considering the development of major theoretical schools of thought and the integration of general social theory within anthropology. Required of masters students in cultural anthropology. Restricted to ANTH graduate students or instructor consent. Prerequisites: Restricted to Anthropology graduate students only.

ANTH

### ANTH-5790 (3) Core Course---Biological Anthropology

Discusses how biological anthropologists use evidence and concepts from evolutionary theory, human biology, and ecology to understand the evolution, diversification, and adaptation of human populations. Required of all first-year graduate students in anthropology. Prereq., graduate status in anthropology. Prerequisites: Restricted to Graduate Students only.

[College of Arts & Sciences](#) [Anthropology](#)

### ANTH-5795 (3) Proseminar in Anthropology

Introduces incoming first-year graduate students to the history and current state of scholarship in anthropology from across the subdisciplines, through introduction to the research of individual faculty in the department. Required of all incoming graduate students. Prerequisites: Restricted to Graduate Students only.

[College of Arts & Sciences](#) [Anthropology](#)

### ANTH-5840 (1-6) Guided Study

Directed individual research based on a specific area of specialization. May be repeated up to 6 total credit hours.

[College of Arts & Sciences](#) [Anthropology](#)

### ANTH-5930 (1-6) Anthropology Internship

Same as ANTH 4930.

College of Arts & Sciences Anthropology

---

## ANTH-6150 (3) Critical and Theoretical Issues in Museums

Investigates key problems facing museum institutions and studies the staging and representation of historical knowledge, the ethics of collecting and display, the changing nature and uses of historical evidence, and relations between curatorial practice, collecting, and field work. Critically examines different approaches to museums and museology in various disciplines, both past and present. Prereq., MUSM 5011 or instructor consent. Same as MUSM 6150, HIST 6150, and ARTH 6150. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Anthropology

---

## ANTH-6320 (3) Linguistic Anthropology

Serves as an advanced introduction to the empirical and theoretical foundations of contemporary linguistic anthropology, with special emphasis on the ways in which culture and society emerge semiotically through language and discourse. Same as LING 6320. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Anthropology

---

## ANTH-6940 (1) Master's Candidate for Degree

College of Arts & Sciences Anthropology

---

## ANTH-6950 (1-6) Master's Thesis

College of Arts & Sciences Anthropology

---

## ANTH-7000 (3) Seminar: Current Research Topics in Cultural Anthropology

Discusses current research and theoretical issues in the field of cultural anthropology. May be repeated up to 6 total credit hours. Restricted to graduate students. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Anthropology

---

## ANTH-7010 (3) Seminar: Contemporary Theory in Cultural Anthropology

Addresses current theoretical perspectives in cultural anthropology and controversies surrounding them. Discusses science, history, interpretation, and postmodernism. Includes the relationship between theory and method as well as the production of ethnography. May be repeated up to 9 total credit hours. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Anthropology

---

---

## ANTH-7020 (3) Seminar: Physical Anthropology

In-depth discussion of selected topics in physical anthropology with emphasis on recent research. May be repeated up to 6 total credit hours. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Anthropology

---

---

## ANTH-7030 (3) Seminar: Archaeology

Intensive examination of selected theoretical or methodological topics in archaeology. Topics vary with current research emphasis. May be repeated up to 6 total credit hours. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Anthropology

---

---

## ANTH-7140 (3) Seminar: Archaeology of Selected Areas

Considers archaeology of a specified area, either geographical or topical. Areas selected in accordance with current research interests. May be repeated upto 9 total credit hours.

College of Arts & Sciences Anthropology

---

---

## ANTH-7300 (3) Seminar: Research Methods in Cultural Anthropology

May be repeated up to 6 total credit hours.

College of Arts & Sciences Anthropology

---

---

## ANTH-7620 (3) Seminar: Ethnography and Cultural Theory

Explores how ethnographic writing has evolved over the past century to incorporate different forms of cross-cultural representation and to accommodate new theoretical paradigms. Includes ethnographic authority and reflexivity, as well as embedded theories and blurred genres of cultural research.

College of Arts & Sciences Anthropology

---

---

## ANTH-7840 (1-6) Independent Research

Research aimed at developing a solution to an originally conceived research problem. May be repeated up to 6 total credit hours.

---

## ANTH-8990 (1-10) Doctoral Dissertation

All doctoral students must register for no fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the graduate school section.

APPM

## APPM-1340 (3) Calculus 1 with Algebra, Part A

Studies selected topics in analytical geometry and calculus: rates of change of functions, limits, derivatives and their applications. APPM 1340-1345 together are equivalent to APPM 1350. The sequence APPM 1340-1345 is specifically designed for students whose manipulative skills in the techniques of high school algebra and precalculus may be inadequate for APPM 1350. Prereqs., 2 years high school algebra, 1 year geometry, 1 semester trigonometry. Credit not granted for this course and MATH 1150.

[College of Arts & Sciences](#) [Applied Mathematics](#)

## APPM-1345 (3) Calculus 1 with Algebra, Part B

Continuation of APPM 1340. Studies selected topics in calculus: derivatives and their applications, integration, differentiation and integration of transcendental functions. Algebraic and trigonometric topics are studied throughout, as needed. Prereq., APPM 1340. Credit not granted for this course and APPM 1350 or MATH 1300.

[College of Arts & Sciences](#) [Applied Mathematics](#)

## APPM-1350 (4) Calculus 1 for Engineers

Topics in analytical geometry and calculus including limits, rates of change of functions, derivatives and integrals of algebraic and transcendental functions, applications of differentiations and integration. Prereqs., 2 years high school algebra, 1 year geometry, and 1/2 year trigonometry; or approval by faculty advisor. Credit not granted for this course and MATH 1080, 1081, 1090, 1100, 1300, 1310, APPM 1345, or ECON 1088. Approved for arts and sciences core curriculum: quantitative reasoning and mathematical skills.

[College of Arts & Sciences](#) [Applied Mathematics](#)

---

## APPM-1360 (4) Calculus 2 for Engineers

Continuation of APPM 1350. Focuses on applications of the definite integral, methods of integration, improper integrals, Taylor's theorem, and infinite series. Prereqs., APPM 1350 or MATH 1300 (min. grade C-). Credit not granted for this course and MATH 2300.

College of Arts & Sciences Applied Mathematics

---

---

## APPM-1710 (3) Tools and Methods for Engineering Computing

Designed for students with little or no programming background. Students learn procedural and object-oriented programming through development of games, simulations, and animations using Flash/ActionScript, VB/Excel, Java, MATLAB, and real-world applications. Activities are oriented toward smaller projects that address topics in beginning science, engineering, and mathematics courses. Students gain practical, applicable skills. Same as ATLS 1710.

College of Arts & Sciences Applied Mathematics

---

---

## APPM-1720 (3) Programming and Simulation Development

Students learn to plan, develop, and test applications (games, simulations, and animations) that embody mathematical formulations of problems in areas such as transportation, nutrition, and alternative energy. Prereq., APPM 1710 or knowledge of an object-oriented programming language. Same as ATLS 1720.

College of Arts & Sciences Applied Mathematics

---

---

## APPM-2350 (4) Calculus 3 for Engineers

Covers multivariable calculus, vector analysis, and theorems of Gauss, Green, and Stokes. Prereq., APPM 1360 or MATH 2300 (min. grade C-). Credit not granted for this course and MATH 2400.

College of Arts & Sciences Applied Mathematics

---

---

## APPM-2360 (4) Introduction to Differential Equations with Linear Algebra

Introduces ordinary differential equations, systems of linear equations, matrices, determinants, vector spaces, linear transformations, and systems of linear differential equations. Prereq., APPM 1360 or MATH 2300 (min. grade C-). Credit not granted for this course and both MATH 3130 and 4430.

College of Arts & Sciences Applied Mathematics

---

## APPM-2450 (1) Calculus 3 Computer Lab

Selected topics in analytic geometry and calculus with a focus on symbolic computation using Mathematica or Matlab. Coreq., APPM 2350.

College of Arts & Sciences Applied Mathematics

---

---

## APPM-2460 (1) Differential Equations Computer Lab

Selected topics in differential equations and linear algebra with a focus on symbolic computation using Mathematica or Matlab. Coreq., APPM 2360.

College of Arts & Sciences Applied Mathematics

---

---

## APPM-2750 (4) Java: Training and Mathematical Algorithms

Preparatory course for Java programming. Provides necessary background for Java language: basic object-oriented concepts, analysis, and design. Learn to create Java applets and applications, create graphic context, and identify the key features of Java foundation classes as well as other Java-related technology. Material is taught in the context of mathematical algorithms from calculus. Prereqs., APPM 1350 and programming experience. Recommended prereq., APPM 1360.

College of Arts & Sciences Applied Mathematics

---

---

## APPM-3010 (3) An Introduction to Nonlinear Systems: Chaos

Both majors and minors in the physical sciences are introduced to classes of tools useful in the analysis of nonlinear systems. Prereqs., APPM 1360 and 2360.

College of Arts & Sciences Applied Mathematics

---

---

## APPM-3050 (3) Scientific Computing in Matlab

Topics covered include: approximations in computing, computer arithmetic, interpolation, matrix computations, nonlinear equations, optimization, and initial-value problems with emphasis on the computational cost, efficiency, and accuracy of algorithms. The problem sets are application-oriented with examples taken from orbital mechanics, physics, genetics, and fluid dynamics. Prereqs., APPM 1360 and 2360.

College of Arts & Sciences Applied Mathematics

---

---

---

## APPM-3170 (3) Discrete Applied Mathematics

Emphasizes selected applications of graph theory to computer science, engineering, operations research, social sciences, and biology. Topics include the basic properties of graphs and diagraphs, and their matrix representations. Relates graph properties to applications such as scheduling, architecture of parallel processors, gray codes, traveling salesman problems, and assignment problems. Coreq., APPM 2350 or 2360 and some knowledge of matrix algebra.

College of Arts & Sciences Applied Mathematics

---

## APPM-3310 (3) Matrix Methods and Applications

Introduces linear algebra and matrices, with an emphasis on applications, including methods to solve systems of linear algebraic and linear ordinary differential equations. Discusses vector space concepts, decomposition theorems, and eigenvalue problems. Credit not granted for this course and MATH 3130. Prereq., APPM 2350.

College of Arts & Sciences Applied Mathematics

---

## APPM-3350 (3) Advanced Engineering Calculus

Extends the treatment of engineering mathematics beyond the topics covered in Calculus 3 and differential equations. Topics include non-dimensionalization, elementary asymptotics and perturbation theory, Reynold's transport theorem and extensions of Leibnitz's rule, as applied to continuum conservation equations, Hamiltonian formulations, Legendre and Laplace transforms, special functions and their orthogonality properties. Prereq., APPM 2350 and 2360 or equivalent.

College of Arts & Sciences Applied Mathematics

---

## APPM-3570 (3) Applied Probability

Studies axioms, counting formulas, conditional probability, independence, random variables, continuous and discrete distribution, expectation, moment generating functions, law of large numbers, central limit theorem, Poisson process, and multivariate Gaussian distribution. Prereq., APPM 2350 or MATH 2400. Credit not granted for this course and ECEN 3810 or MATH 4510.

College of Arts & Sciences Applied Mathematics

---

## APPM-4120 (3) Introduction to Operations Research

Studies linear and nonlinear programming, the simplex method, duality, sensitivity, transportation and network flow problems, some constrained and unconstrained optimization theory, and the Kuhn-Tucker conditions, as time permits. Prereqs., APPM 3310 or MATH 3130. Same as APPM 5120 and MATH 4120.

College of Arts & Sciences Applied Mathematics

---

---

## APPM-4350 (3) Methods in Applied Mathematics: Fourier Series and Boundary Value Problems

Reviews ordinary differential equations, including solutions by Fourier series. Physical derivation of the classical linear partial differential equations (heat, wave, and Laplace equations). Solution of these equations via separation of variables, with Fourier series, Fourier integrals, and more general eigenfunction expansions. Prereqs., APPM 2350 and 2360 (min. grade C-). Coreq., APPM 3310. Same as APPM 5350.

College of Arts & Sciences Applied Mathematics

---

## APPM-4360 (3) Methods in Applied Mathematics: Complex Variables and Applications

Introduces methods of complex variables, contour integration, and theory of residues. Applications include solving partial differential equations by transform methods, Fourier and Laplace transforms, and Reimann-Hilbert boundary-value problems, conformal mapping to ideal fluid flow and/or electrostatics. Prereqs., APPM 2350 and 2360, or 3310 (min. grade C-) or instructor consent. Same as APPM 5360.

College of Arts & Sciences Applied Mathematics

---

## APPM-4380 (3) Modeling in Applied Mathematics

An exposition of a variety of mathematical models arising in the physical and biological sciences. Students' modeling projects are presented in class. Topics may include: GPS navigation, medical imaging, ocean waves, and computerized facial recognition. Prereqs., APPM 2350 and 2360. Recommended prereqs., APPM 3310, 4350 and 4650. Same as APPM 5380.

College of Arts & Sciences Applied Mathematics

---

## APPM-4390 (3) Modeling in Mathematical Biology

Investigates how complex systems in biology can be studied using applied mathematics. Examines several case studies which include topics from microbiology, enzyme reaction kinetics, neuroscience, ecology, epidemiology, physiology, and bioengineering. Coreq., APPM 4350 or instructor consent. Same as APPM 5390.

College of Arts & Sciences Applied Mathematics

---

## APPM-4440 (3) Undergraduate Applied Analysis 1

Provides a rigorous treatment of topics covered in Calculus 1 and 2. Topics include convergent sequences; continuous functions; differentiable functions; Darboux sums, Riemann sums, and integration; Taylor and power series and sequences of functions. Prereq., APPM 2350 and 2360 or equivalent. Coreq., APPM 3310.

## APPM-4450 (3) Undergraduate Applied Analysis 2

Continuation of APPM 4440. Study of multidimensional analysis including n-dimensional Euclidean space, continuity and uniform continuity of functions of several variables, differentiation, linear and nonlinear approximation, inverse function and implicit function theorems, and a short introduction to metric spaces. Prereqs., APPM 2350, 2360, and 4440.

## APPM-4520 (3) Introduction to Mathematical Statistics

Examines point and confidence interval estimation. Principles of maximum likelihood, sufficiency, and completeness; tests of simple and composite hypotheses, linear models, and multiple regression analysis. Analyzes variance distribution-free methods. Prereq., MATH 4510 or APPM 3570. Same as APPM 5520 and MATH 4520.

APPM

## APPM-4540 (3) Introduction to Time Series

Single and multivariable regression, forecasting using regression models, time series models, and modeling with MA, AR, ARMA, and ARIMA models, forecasting with time series models, and spectral analysis. Prereqs., APPM 3570 or MATH 4510, and APPM 4520 or MATH 4520. Same as APPM 5540 and MATH 4540.

[College of Arts & Sciences](#) [Applied Mathematics](#)

## APPM-4560 (3) Markov Processes, Queues, and Monte Carlo Simulations

Brief review of conditional probability and expectation followed by a study of Markov chains, both discrete and continuous time. Queuing theory, terminology, and single queue systems are studied with some introduction to networks of queues. Uses Monte Carlo simulation of random variables throughout the semester to gain insight into the processes under study. Prereq., APPM 3570 or equivalent. Same as APPM 5560.

[College of Arts & Sciences](#) [Applied Mathematics](#)

## APPM-4570 (3) Statistical Methods

Covers discrete and continuous probability laws, random variables; expectations; laws of large numbers and central limit theorem; estimation, testing hypothesis, analysis of variance, regression analysis, and nonparametric methods. Emphasizes applications with an introduction to packaged computer programs. Prereq., APPM 1360 or equivalent Calculus 2 course. Same as APPM 5570.

[College of Arts & Sciences](#) [Applied Mathematics](#)

## APPM-4580 (3) Statistical Applications: Software and Methods

Combines statistical methods with practical applications and computer software. Develops commonly used statistical models such as analysis of variance as well as linear and logistic regression. The statistical models are implemented and interpreted in the context of actual data sets using available statistical software. Continuation of APPM 4570. Prereq., APPM 4570 or any course in statistics. Same as APPM 5580.

College of Arts & Sciences Applied Mathematics

---

---

## APPM-4650 (3) Intermediate Numerical Analysis 1

Focuses on numerical solution of nonlinear equations, interpolation, methods in numerical integration, numerical solution of linear systems, and matrix eigenvalue problems. Stresses significant computer applications and software. Prereqs., APPM 3310 or MATH 3130, and knowledge of a programming language. Same as MATH 4650.

College of Arts & Sciences Applied Mathematics

---

---

## APPM-4660 (3) Intermediate Numerical Analysis 2

Continuation of APPM 4650. Examines numerical solution of initial-value problems and two-point boundary-value problems for ordinary differential equations. Also looks at numerical methods for solving partial differential equations. Prereq., APPM 4650 and knowledge of a programming language. Same as MATH 4660.

College of Arts & Sciences Applied Mathematics

---

---

## APPM-4720 (1-3) Open Topics in Applied Mathematics

Provides a vehicle for the development and presentation of new topics that may be incorporated into the core courses in applied mathematics. May be repeated up to 6 total credit hours. Prereqs., variable, depending on the topic. See instructor. Same as APPM 5720.

College of Arts & Sciences Applied Mathematics

---

---

## APPM-4840 (1-3) Reading and Research in Applied Mathematics

Introduces undergraduate students to the research foci of the Department of Applied Mathematics. May be repeated up to 9 total credit hours. Prereq., APPM 3310 or MATH 3130. Recommended prereq., a course in ordinary or partial differential equations.

College of Arts & Sciences Applied Mathematics

---

---

---

## APPM-4950 (1-3) Seminar in Applied Mathematics

Introduces undergraduate students to the research foci of the program in applied mathematics. It is also designed to be a capstone experience for the program's majors. May be repeated up to 6 total credit hours. Prereq., APPM 3310 or MATH 3130. Recommended prereq., course in ordinary or partial differential equations. Similar to APPM 4955.

College of Arts & Sciences Applied Mathematics

---

---

## APPM-5040 (1-2) Calculus Applications for High School Teachers

A fast-paced, intensive calculus course designed for high school mathematics teachers. Provides a deeper understanding of fundamental calculus concepts and an introduction to technological tools, including computer software used in the analysis of real-world problems. Offered through Continuing Education only. Prereqs., APPM 1350 and 1360. Recommended prereqs., APPM 2350 and 2360.

College of Arts & Sciences Applied Mathematics

---

---

## APPM-5050 (1-2) Discrete Math for K--12 Teachers

An intensive study of selected topics in discrete math, including Boolean algebra, inductive proofs, discrete probability, election theory and fair division, graph theory, and recursion. Focus on applications and technological tools to increase understanding. Offered through Continuing Education only. Prereq., one undergrad probability course. Recommended prereq., APPM 3310 or MATH 3130.

College of Arts & Sciences Applied Mathematics

---

---

## APPM-5120 (3) Introduction to Operations Research

Same as APPM 4120 and MATH 5120. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Applied Mathematics

---

---

## APPM-5350 (3) Methods in Applied Mathematics: Fourier Series and Boundary Value Problems

Restricted to graduate students. Same as APPM 4350. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Applied Mathematics

---

---

## APPM-5360 (3) Methods in Applied Mathematics: Complex Variables and Applications

Prereq., graduate status in engineering or arts and sciences, or instructor consent. Same as APPM 4360. Prerequisites: Restricted to Graduate Students only.

---

College of Arts & Sciences Applied Mathematics

---

## APPM-5380 (3) Modeling in Applied Mathematics

Same as APPM 4380. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Applied Mathematics

---

## APPM-5390 (3) Modeling in Mathematical Biology

Same as APPM 4390. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Applied Mathematics

---

## APPM-5430 (3) Methods in Applied Mathematics: Applications of Complex Variables

Reviews basic ideas of complex analysis, including solutions of ODEs and PDEs of physical interest via complex analysis; conformal mapping, including Schwarz-Christoffel transformations and generalizations; computational methods; Riemann-Hilbert problems; and topics in asymptotic methods. Prereq., APPM 4360 or 5360, or instructor consent.

College of Arts & Sciences Applied Mathematics

---

## APPM-5440 (3) Applied Analysis 1

Discusses the elements of basic real and complex analysis, Banach spaces,  $L_p$  spaces, and many relevant inequalities. Includes applications of existence and uniqueness of solutions to various types of ordinary differential equations, partial differential equations, and integral equations. Prereqs., APPM 4440 and 4450 or equivalent, or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Applied Mathematics

---

## APPM-5450 (3) Applied Analysis 2

Continuation of APPM 5440. Prereq., APPM 5440 or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Applied Mathematics

---

## APPM-5460 (3) Methods in Applied Mathematics: Dynamical Systems and

---

## Differential Equations

Introduces the theory and applications of dynamical systems through solutions to differential equations. Covers existence and uniqueness theory, local stability properties, qualitative analysis, global phase portraits, perturbation theory, and bifurcation theory. Special topics may include Melnikov methods, averaging methods, bifurcations to chaos, and Hamiltonian systems. Prereqs., undergraduate courses equivalent to APPM 2360, 3310, and 4440.

College of Arts & Sciences Applied Mathematics

---

## APPM-5470 (3) Methods of Applied Mathematics: Partial Differential and Integral Equations

Studies properties and solutions of partial differential equations. Covers methods of characteristics, well-posedness, wave, heat and Laplace equations, Green's functions, and related integral equations. Prereqs., APPM 4350 and 4360, or MATH 4430, or equivalent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Applied Mathematics

---

## APPM-5480 (3) Methods of Applied Mathematics: Approximation Methods

Covers asymptotic evaluation of integrals (stationary phase and steepest descent), perturbation methods (regular and singular methods, and inner and outer expansions), multiple scale methods, and applications to differential and integral equations. Prereq., APPM 5470 or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Applied Mathematics

---

## APPM-5520 (3) Introduction to Mathematical Statistics

Prereq., one semester calculus-based probability course, such as MATH 4510 or APPM 3570. Same as APPM 4520 and MATH 5520. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Applied Mathematics

---

## APPM-5540 (3) Introduction to Time Series

Same as APPM 4540 and MATH 5540. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Applied Mathematics

---

## APPM-5560 (3) Markov Processes, Queues, and Monte Carlo Simulations

Prereq., APPM 3570 or equivalent. Same as APPM 4560. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Applied Mathematics

---

APPM

## APPM-5570 (3) Statistical Methods

Same as APPM 4570. Prerequisites: Restricted to Graduate Students only.

[College of Arts & Sciences](#) [Applied Mathematics](#)

## APPM-5580 (3) Statistical Applications: Software and Methods

Continuation of APPM 5570. Prereq., one semester of statistics. Same as APPM 4580. Prerequisites: Restricted to Graduate Students only.

[College of Arts & Sciences](#) [Applied Mathematics](#)

## APPM-5600 (3) Numerical Analysis 1

Solution of nonlinear algebraic equations, interpolation, integration, approximation, and numerical linear algebra. Prereq., APPM 3310 or MATH 3130, and experience with a scientific programming language. Prerequisites: Restricted to Graduate Students only.

[College of Arts & Sciences](#) [Applied Mathematics](#)

## APPM-5610 (3) Numerical Analysis 2

Numerical linear algebra, eigenvalue problems, optimization problems, and ordinary and partial differential equations. Prereq., APPM 5600 or MATH 5600. Prerequisites: Restricted to Graduate Students only.

[College of Arts & Sciences](#) [Applied Mathematics](#)

---

## APPM-5720 (1-3) Open Topics in Applied Mathematics

Same as APPM 4720.

College of Arts & Sciences Applied Mathematics

---

## APPM-6470 (3) Advanced Partial Differential Equations

Continuation of APPM 5470. Advanced study of the properties and solutions of elliptic, parabolic, and hyperbolic partial differential equations. Topics include the study of Sobolev spaces and variational methods as they relate to PDEs, and other topics as time permits. Prereq., APPM 5470. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Applied Mathematics

---

## APPM-6520 (3) Mathematical Statistics

Emphasizes mathematical theory of statistics. Topics include distribution theory, estimation and testing of hypotheses, multivariate analysis, and nonparametric inference, all with emphasis on theory. Prereq., APPM 5520 or MATH 5520.

College of Arts & Sciences Applied Mathematics

---

## APPM-6550 (3) Introduction to Stochastic Processes

Systematic study of Markov chains and some of the simpler Markov processes including renewal theory, limit theorems for Markov chains, branching processes, queuing theory, birth and death processes, and Brownian motion. Applications to physical and biological sciences. Prereqs., MATH 4001, MATH 4510 or APPM 3570, or APPM 4560, or instructor consent. Same as MATH 6550.

College of Arts & Sciences Applied Mathematics

---

## APPM-6610 (3) Introduction to Numerical Partial Differential Equations

Covers finite difference, finite element, finite volume, pseudo-spectral, and spectral methods for elliptic, parabolic, and hyperbolic partial differential equations. Prereq., APPM 5600. Recommended prereq., APPM 5610 or graduate numerical linear algebra. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Applied Mathematics

---

## APPM-6640 (3) Multigrid Methods

Develops a fundamental understanding of the principles and techniques of the multigrid methodology, which is a widely used numerical approach for solving many problems in such diverse areas as aerodynamics, astrophysics, chemistry, electromagnetics, hydrology, medical imaging, meteorology/oceanography, quantum mechanics, and statistical physics.

---

College of Arts & Sciences Applied Mathematics

---

## APPM-6900 (1-6) Independent Study

Introduces graduate students to research foci of the Department of Applied Mathematics. Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Applied Mathematics

---

## APPM-6940 (1) Master's Degree Candidate

Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Applied Mathematics

---

## APPM-6950 (1-6) Master's Thesis

May be repeated up to 6 total credit hours. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Applied Mathematics

---

## APPM-7100 (3) Mathematical Methods in Dynamical Systems

Covers dynamical systems defined by mappings and differential equations. Hamiltonian mechanics, action-angle variables, results from KAM and bifurcation theory, phase plane analysis, Melnikov theory, strange attractors, chaos, etc. Prereq., APPM 5460. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Applied Mathematics

---

## APPM-7300 (3) Nonlinear Waves and Integrable Equations

Includes basic results associated with linear dispersive wave systems, first-order nonlinear wave equations, nonlinear dispersive wave equations, solitons, and the methods of the inverse scattering transform. Prereqs., APPM 5470--5480, PHYS 5210, or instructor consent.

College of Arts & Sciences Applied Mathematics

---

## APPM-7400 (1-3) Topics in Applied Mathematics

Provides a vehicle for the development and presentation of new topics with the potential of being incorporated into the core courses in applied mathematics. May be repeated up to 6 total credit hours. Prereq., instructor consent. Prerequisites: Restricted to Graduate

Students only.

College of Arts & Sciences Applied Mathematics

---

---

## APPM-7900 (1-3) Independent Study

Introduces graduate students to research foci of the Department of Applied Mathematics. Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Applied Mathematics

---

---

## APPM-8000 (1) Colloquium in Applied Mathematics

Introduces graduate students to the major research foci of the Department of Applied Mathematics. Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Applied Mathematics

---

---

## APPM-8100 (1) Seminar in Dynamical Systems

Introduces advanced topics and research in dynamical systems. Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Applied Mathematics

---

---

## APPM-8300 (1-3) PDE and Analysis Seminar

Introduces the core methods in the analysis of nonlinear partial differential and integral equations or systems to graduate students. Provides a vehicle for the development, presentation, and corporative research of new topics in PDE and analysis. Prereq., APPM 5440. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Applied Mathematics

---

---

## APPM-8600 (1) Seminar in Computational Mathematics

Introduces advanced topics and research in computational mathematics. Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Applied Mathematics

---

---

## APPM-8990 (1-10) Doctoral Dissertation

All doctoral students must register for no fewer than 30 hours of dissertation credit as part of the requirements for the degree. No more

than 10 credit hours may be taken in any one semester. Prerequisites: Restricted to Graduate Students only.

ARAB

## ARAB-1010 (5) Beginning Arabic 1

Introduces students to speaking, listening, reading, and writing skills in the standard means of communication in the Arab world. This course is proficiency-based. All activities within the course are aimed at placing the student in the context of the native-speaking environment from the very beginning.

[College of Arts & Sciences](#) [East Asian Languages & Civilizations](#) [Arabic](#)

## ARAB-1011 (3) Introduction to Arab and Islamic Civilizations

Provides an interdisciplinary overview of the cultures of the Arabic-speaking peoples of Southwest Asia and North Africa from the rise of Islam in the 7th century to the present. Readings include historical, religious, literary and cultural texts from both the medieval and modern eras. Taught in English. Approved for arts and sciences core curriculum: human diversity.

[College of Arts & Sciences](#) [East Asian Languages & Civilizations](#) [Arabic](#)

## ARAB-1020 (5) Beginning Arabic 2

Continuation of ARAB 1010. Prereq., ARAB 1010 (min grade C) or placement.

[College of Arts & Sciences](#) [East Asian Languages & Civilizations](#) [Arabic](#)

## ARAB-2110 (3) Intermediate Arabic 1

Proficiency-based course emphasizes speaking, listening, reading, and writing. Covers a variety of topics. Students give classroom

presentations and write short essays in Arabic. Speaking ability is assessed through an oral proficiency interview. Prereq., ARAB 1020 (min grade C), or placement. Meets MAPS requirement for foreign language.

College of Arts & Sciences East Asian Languages & Civilizations Arabic

---

---

## ARAB-2120 (3) Second Year Arabic 2

Continuation of ARAB 2110. Prereq., ARAB 2110 (min grade C) or placement.

College of Arts & Sciences East Asian Languages & Civilizations Arabic

---

---

## ARAB-3110 (3) Advanced Arabic I

Designed to train students further in the four language skills (writing, speaking, reading, listening/comprehension) at an advanced level. Enables students to acquire a better and broader understanding of Arabic culture and texts drawn from various genres of Arabic letters. Prereq., ARAB 2120 (min. grade C). Formerly ARAB 3010.

College of Arts & Sciences East Asian Languages & Civilizations Arabic

---

---

## ARAB-3120 (3) Advanced Arabic II: Issues in Arabic Language and Culture for Business

Continues training in the four language skills (writing, speaking, reading, listening/comprehension) at an advanced level. Enables students to acquire a better and broader understanding of Arabic culture and texts drawn from various genres of Arabic letters. Prereq., ARAB 3010 or 3110 (min. grade C). Formerly ARAB 3020.

College of Arts & Sciences East Asian Languages & Civilizations Arabic

---

---

## ARAB-3230 (3) Islamic Culture and the Iberian Peninsula

Examines Islamic, especially Arab, culture and history as it relates to the Iberian Peninsula from 92 Ah/711 Ce to the present. Taught in English. Approved for arts and sciences CORE curriculum: historical context.

College of Arts & Sciences East Asian Languages & Civilizations Arabic

---

---

## ARAB-3330 (3) The Arabic Novel

Focusing on the origins and development of the novel genre in the Arabic tradition, this course examines both the aesthetic qualities of the genre as an artistic form and the ways that it has depicted and intervened in the modern social, political, and cultural upheavals that have shaped the Arab world in the 20th century. Authors include Najib Mahfuz, Abd al Rahman Munif, Hanan al-Shaykh, and Ghassan

Kanafani. Taught in English.

College of Arts & Sciences East Asian Languages & Civilizations Arabic

## ARAB-3340 (3) Representing Islam

Explores the cultural politics of representations of the Arab and Islamic worlds both with an emphasis on literary representations of the Islamic world in travel narratives and novels from both the West and the Arab world. Examines historical, anthropological, and visual texts to consider how Islam has been narrated in colonial European imaginings about the Islamic world as well as contemporary representations.

College of Arts & Sciences East Asian Languages & Civilizations Arabic

## ARAB-4250 (3) Arabic Media

Designed to provide students with advanced Arabic language skills for use in the media. By negotiating authentic materials in Arabic, students will gain a perspective on global issues in the Arab and Islamic world and will attain a better awareness of Arab and Islamic culture. Prereq., three years of Arabic or equivalent, or instructor consent.

College of Arts & Sciences East Asian Languages & Civilizations Arabic

## ARAB-4840 (1-3) Independent Study

Departmental approval required. May be repeated up to 7 total credit hours.

College of Arts & Sciences East Asian Languages & Civilizations Arabic

ARCH

### ARCH-3114 (3) History and Theories of Architecture 1

Surveys architecture, landscape architecture, and urban design from 3000 B.C. to A.D. 1400, emphasizing developments in the Western world. Prereqs., ENVD 2130, 3003, 3004. Coreqs., ENVD 3100, 3115. Prerequisites: Restricted to College of Architecture and Planning or College of Engineering and Applied Sciences majors only.

[College of Architecture & Planning](#) [Architecture](#)

### ARCH-3214 (3) History and Theories of Architecture 2

Surveys architecture, landscape architecture, and urban design from A.D. 1400 to the present, emphasizing developments in the Western world. Open to nonmajors on a space available basis. Prerequisites: Restricted to College of Architecture and Planning or College of Engineering and Applied Sciences majors only.

[College of Architecture & Planning](#) [Architecture](#)

### ARCH-4010 (3) Architectural Appreciation and Design

Introduces basic processes and principles of architectural design. Provides a basis for understanding and evaluating architecture. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) Architectural Engineering (AREN) majors only.

[College of Architecture & Planning](#) [Architecture](#)

AREN

## AREN-1027 (3) Engineering Drawing

Introduces engineering drawing including sections and dimensioning, print readings, and computer 3D modeling. Prerequisites: Restricted to students with 0-56 credits (Freshmen or Sophomore) Engineering Physics (EPEN), Architectural Engineering (AREN) or Civil Engineering (CVEN) majors only.

[College of Engineering & Applied Science](#) [Civil Engineering](#) [Miscellaneous](#)

## AREN-1037 (3) Building Information Modeling

Learn to develop and communicate physical information using three-dimensional graphical systems including Computer-Aided Design (CAD) and Building Information Models (BIM). Learn to dimension and scale physical systems and interpret scaled drawings. Get experience with industry standard software tools (REVIT) used to produce design and construction documents, and apply BIM and CAD tools in a project producing scaled 3-D drawings.

[College of Engineering & Applied Science](#) [Civil Engineering](#) [Miscellaneous](#)

## AREN-1316 (2) Introduction to Architectural Engineering

Surveys the broad subject of architectural engineering and professional practices. Includes professional design services, design documents, methods of construction delivery, materials for construction, codes and standards, life safety, professional ethics, structural systems, mechanical systems, electrical systems, and building systems integration. Prerequisites: Restricted to students with 0-56 (Freshmen or Sophomore) College of Engineering majors only.

[College of Engineering & Applied Science](#) [Civil Engineering](#) [Miscellaneous](#)

## AREN-2050 (3) Engineering Systems for Buildings

Provides an overview of the building mechanical and electrical systems, including HVAC, plumbing, solar, power distribution, illumination, life safety, transportation, and noise control systems. Emphasizes sustainable (green) building practices. Includes a team investigation of existing commercial building. Prereqs., AREN 1027 and 2406. Prerequisites: Restricted to Architectural or Civil Engineering majors only.

[College of Engineering & Applied Science](#) [Civil Engineering](#) [Building Systems Engineering](#)

---

## AREN-2110 (3) Thermodynamics

Explores fundamental principles of thermodynamics, including first and second law of thermodynamics, thermophysical properties, power and refrigeration cycles, gas mixtures and psychrometrics. Computing in the context of engineering problems is introduced. Prereq., PHYS 1110. Coreq., APPM 1360. Prerequisites: Restricted to Architectural, Civil, or Environmental Engineering majors or Civil/Environmental Engineering Concurrent Degree majors only.

[College of Engineering & Applied Science](#) [Civil Engineering](#) [Building Systems Engineering](#)

---

## AREN-2120 (3) Fluid Mechanics and Heat Transfer

Explores fundamental principles of fluid dynamics and heat transfer. Topics include fluid statics, momentum, and energy conservation, laminar and turbulent viscous flow, convection heat transfer, conduction heat transfer, heat exchangers, and heat transfer. Prereqs., APPM 2350 and AREN 2110. Coreq., APPM 2360.

[College of Engineering & Applied Science](#) [Civil Engineering](#) [Building Systems Engineering](#)

---

## AREN-2406 (3) Introduction to Building Construction

Covers the broad subject of building materials, assembly details, and their method of construction. Includes codes and classifications, foundations, wood, steel, concrete, masonry, cladding, doors and windows, interiors, and finishes. Formerly AREN 3406. Prerequisites: Restricted to students with 0-56 credits (Freshmen or Sophomore) Architectural Engineering (AREN) majors only.

[College of Engineering & Applied Science](#) [Civil Engineering](#) [Construction](#)

---

## AREN-3010 (3) Mechanical Systems for Buildings

Lecture course on the analysis and design of buildings and their systems to satisfy the requirements for a comfortable and healthy indoor environment. Examines psychrometrics, thermal comfort, building heating and cooling loads, fluid flow basics, and HVAC components and systems. Prereqs., AREN 2120 (or MCEN 3021 & 3022) and AREN 2110 (or GEEN 3852, or MCEN 3012, or ASEN 2002) and AREN 2050. Restricted to Architectural or Civil Engineering majors only. Prerequisites: Requires pre-requisite courses of AREN 2120 (or MCEN 3021 & 3022) and AREN 2110 (or GEEN 3852, or MCEN 3012, or ASEN 2002) and AREN 2050. Restricted to Architectural or Civil Engineering majors only.

[College of Engineering & Applied Science](#) [Civil Engineering](#) [Building Systems Engineering](#)

---

## AREN-3050 (3) Environmental Systems for Buildings 1

Introduces the operation and design of building systems for climate control, water and drainage, life safety, electrical supply, illumination, transportation (elevators and escalators), and noise control. For non-engineering majors. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Architecture and Planning majors only.

College of Engineering & Applied Science   Civil Engineering   Building Systems Engineering

---

## AREN-3060 (3) Environmental Systems for Buildings 2

Continues the operation and design of building systems for climate control, water and drainage, life safety, electrical supply, illumination, transportation (elevators and escalators), and noise control. For non-engineering majors.

College of Engineering & Applied Science   Civil Engineering   Building Systems Engineering

---

## AREN-3130 (3) Building Energy Laboratory

Laboratory course offering both hands-on experience with building and renewable energy systems and exposing students to the fundamentals of measurements, instrumentation, data acquisition, and statistical data analysis. Measurements and experiments will allow evaluation of building construction material, electrical equipment, lighting systems, heating and cooling systems, and solar energy devices, among others. Prereq., AREN 3010.

College of Engineering & Applied Science   Civil Engineering   Building Systems Engineering

---

## AREN-3140 (3) Illumination Laboratory

Introduces the measurement of photometric and psychophysical quantities used in lighting. Experience is acquired in using light measurement instruments to evaluate lighting equipment and luminous environments. Prereq., AREN 3540.

College of Engineering & Applied Science   Civil Engineering   Building Systems Engineering

---

## AREN-3540 (3) Illumination I

Studies the fundamentals of architectural illumination. Introduces and applies basic principles and vocabulary to elementary problems in the lighting of environments for the performance of visual work and the proper interaction with architecture. Prereq., GEEN 1300. Prerequisites: Requires pre-requisite course of GEEN 1300 (minimum grade C-).

College of Engineering & Applied Science   Civil Engineering   Building Systems Engineering

---

## AREN-4010 (3) HVAC System Modeling and Control

Engineering course devoted to building automation and control systems. Topics include HVAC control technology and strategies, measurement and device technologies, analysis and modeling of dynamic systems, simulation of conventional and advanced control

approaches, assessment of control loop performance, and hands-on direct digital control (DDC) programming exercises as used in current building control practice. Prereq., AREN 4110. Same as CVEN 5010.

College of Engineering & Applied Science Civil Engineering Building Systems Engineering

---

## AREN-4035 (3) Architectural Structures 1

Analyzes basic structural systems. Covers principles of mechanics and mechanical properties of materials and analysis and design of trusses, arches, and cable structures. For nonengineering students; does not apply toward an engineering degree. Prereq., PHYS1110, and APPM 1350 or MATH 1300. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) College of Architecture and Planning majors only.

College of Engineering & Applied Science Civil Engineering Structures

---

## AREN-4045 (3) Architectural Structures 2

Analyzes basic structural systems. Covers principles of mechanics as applied to the design of flexural members, columns, continuous beams, and rigid frames. For nonengineering students; does not apply toward an engineering degree. Prereq., AREN 4035.

College of Engineering & Applied Science Civil Engineering Structures

---

## AREN-4110 (3) HVAC Design 1

Applies engineering principles to the design of heating, ventilating, and air conditioning (HVAC) systems for buildings. Covers HVAC systems description, load estimating, applied psychometrics, coils and heat exchangers, air and water distribution systems, and primary equipment and systems. Prereq., AREN 3010. Same as CVEN 5110.

College of Engineering & Applied Science Civil Engineering Building Systems Engineering

---

## AREN-4315 (3) Design of Masonry Structures

Covers modern masonry construction; properties and behavior of the reinforced masonry component materials, clay and concrete masonry units, mortar, grout, and steel reinforcement; vertical and lateral load types and intensities; and design of reinforced masonry walls, beams, and columns by working stress and strength design methods. Prereq., CVEN 3525.

College of Engineering & Applied Science Civil Engineering Structures

---

## AREN-4317 (4) Architectural Engineering Design

Provides a capstone experience to AREN students. Students design a modest commercial building and complete an integrated engineering design of the building systems executed for the conceptual, schematic, and design development phases. Students' teams

---

work on structural, mechanical, electrical/lighting, and construction engineering management design. Each stage produce a professional-quality design document. Faculty and industry mentors participate in the teaching and evaluation of designs. Prereqs., AREN 2406, 3010, CVEN 3246, 3525, and AREN 3540. Coreq., AREN 4570.

College of Engineering & Applied Science | Civil Engineering | Miscellaneous

---

## AREN-4420 (3) Cost Engineering

Focuses on conceptual cost estimating and evaluation techniques to support engineering design. Topics include assemblies estimating, probabilistic estimating, value engineering, constructability concepts, and life-cycle costing. Prereq., CVEN 3246.

College of Engineering & Applied Science | Civil Engineering | Construction

---

## AREN-4466 (3) Construction Planning and Scheduling

Comprehensively studies project management activities for scheduling and delivering construction projects, including the contractor's role in preconstruction and construction activities and the application of CPM/PERT techniques to the planning, scheduling, and control of a construction project. Prereq., CVEN 3246. Restricted to Architectural or Civil Engineering majors only. Prerequisites: Restricted to Architectural or Civil Engineering majors only.

College of Engineering & Applied Science | Civil Engineering | Construction

---

## AREN-4540 (3) Exterior Lighting Systems

Engages students in exploring and solving lighting problems for exterior environments. Provides an understanding of the design criteria and lighting equipment used in three primary exterior applications: parking lots and roadways, floodlighting of buildings, and sports facilities. Prereq., AREN 3540. Recommended prereqs., AREN 3140 and 4550. Same as CVEN 5540. Taught intermittently.

College of Engineering & Applied Science | Civil Engineering | Building Systems Engineering

---

## AREN-4550 (3) Illumination 2

Applies the principles studied in Illumination 1. Provides further study in architectural lighting design methods. Uses lighting studio work to develop a broad knowledge of lighting equipment, design methods, and their application in a series of practical design problems in modern buildings. Prereq., AREN 3540. Prerequisites: Requires pre-requisite course of AREN 3540 (minimum grade C-).

College of Engineering & Applied Science | Civil Engineering | Building Systems Engineering

---

## AREN-4560 (3) Luminous Radiative Transfer

Teaches fundamentals of radiative exchange as applied to illumination engineering. Describes and uses principal numerical techniques for radiative transfer analysis. Applies techniques to lighting design and analysis. Prereq., AREN 3540. Taught inermittently.

## AREN-4570 (3) Building Electrical Systems Design 1

Introduces the generation and distribution of electrical power. Focuses on understanding the loads, control, and protection of secondary electrical distribution systems in building. Applies the national electric code to residential and commercial buildings. Prereq., ECEN 3030.

AREN

## AREN-4580 (3) Daylighting

Applies the fundamental principles of illumination engineering to architectural daylighting design, exploring the quantitative methods and tools used to develop daylighting designs and evaluate their performance. Topics include solar and sky modeling, luminous radiative transfer, design methods, and controls for integration with electric lighting systems. Prereq., AREN 3540.

[College of Engineering & Applied Science](#) [Civil Engineering](#) [Building Systems Engineering](#)

## AREN-4590 (3) Computer Graphics in Lighting Engineering

Studies the numerical methods and computer implementation of computer graphics visualization for architectural lighting engineering and design. Implements finite element radiative transfer and ray-tracing in computer programs. Studies the use of computer graphics visualization in lighting analysis. Prereq., AREN 3540 and 4560.

[College of Engineering & Applied Science](#) [Civil Engineering](#) [Building Systems Engineering](#)

## AREN-4830 (1-3) Special Topics for Seniors/Grads.

Supervised study of special topics of interest to students under instructor guidance. May be repeated up to 12 total credit hours. Prereq., instructor consent required.

[College of Engineering & Applied Science](#) [Civil Engineering](#) [Special Topics](#)

## AREN-4836 (1-3) Special Topics For Seniors/Grads

Supervised study of special topics of interest to students under instructor guidance. Prereq., instructor consent.

[College of Engineering & Applied Science](#) [Civil Engineering](#) [Special Topics](#)

---

---

## AREN-4837 (3) Special Topics for Seniors/Grads

Supervised study of special topics of interest to students under instructor guidance. Prereq., instructor consent.

[College of Engineering & Applied Science](#) [Civil Engineering](#) [Special Topics](#)

---

---

## AREN-4849 (1-3) Independent Study

Offers an independent, in-depth study, research, or design in a selected area of architectural engineering. Offerings are coordinated with individual faculty. Students should consult the Department of Civil, Environmental, and Architectural Engineering. Numbered AREN 4840 through AREN 4849.

ARSC

## ARSC-1000 (3-4) Expository Writing

Develops college-level reading, writing, and thinking. Students are asked to read critically, then construct written responses that are revised and crafted into more formal essays and position papers. Offered through the Student Academic Services Center. Prereq., program coordinator consent required.

[College of Arts & Sciences](#) [Arts & Sciences Admin](#) [Writing](#)

## ARSC-1080 (4) College Writing and Research

Introduces academic and professional genres through the research and inquiry process. Students practice close reading, oral presentation, drafting, synthesis, analysis and research skills in discussion, writing workshops, and one-on-one conferences. Meets MAPS requirement for English. Approved for arts and sciences CORE curriculum: written communication.

[College of Arts & Sciences](#) [Arts & Sciences Admin](#) [Writing](#)

## ARSC-1081 (1) SASC Coseminar: College Writing and Research

One-credit seminar provides extended instruction in written composition for students enrolled in ARSC 1080. Graded assignments enrich students' understanding of genre, organization, research skills, and grammar. Coreq., ARSC 1080.

[College of Arts & Sciences](#) [Arts & Sciences Admin](#) [Writing](#)

## ARSC-1150 (3) Writing in Arts and Sciences

Emphasizes the development of effective writing skills with instruction provided in expository and analytical writing. Reviews basic elements of grammar, syntax, and composition as needed. Meets MAPS requirement for English. May be repeated up to 6 total credit hours. Approved for arts and sciences CORE curriculum: written communication.

[College of Arts & Sciences](#) [Arts & Sciences Admin](#) [Writing](#)

---

---

## ARSC-1200 (1-3) Topics in Arts and Sciences

[College of Arts & Sciences](#) [Arts & Sciences Admin](#) [Special Curricula](#)

---

---

## ARSC-1400 (1) MASP Coseminar: Chemistry 1 & 2

Supplements and strengthens student experiences in chemistry. Allows particularly gifted students an opportunity to extend their understanding of the subject and to explore possible careers in science. May be repeated up to 2 total credit hours.

[College of Arts & Sciences](#) [Arts & Sciences Admin](#) [Miramontes Arts & Sciences Pgr](#)

---

---

## ARSC-1420 (1) MASP Coseminar: Introduction to EEB

Designed to supplement and strengthen student experiences in EBIO 1210 and 1220. Allows particularly gifted students an opportunity to extend their understanding of the subject and possible careers in science. May be repeated up to 2 total credit hours.

[College of Arts & Sciences](#) [Arts & Sciences Admin](#) [Miramontes Arts & Sciences Pgr](#)

---

---

## ARSC-1432 (1) MASP Coseminar: Economics

Designed to supplement and strengthen student experiences in microeconomics. Allows particularly gifted students an opportunity to extend their understanding of the subject and to explore possible careers in social science. May be repeated up to 2 total credit hours.

[College of Arts & Sciences](#) [Arts & Sciences Admin](#) [Miramontes Arts & Sciences Pgr](#)

---

---

## ARSC-1440 (1) MASP Coseminar: Mathematics

Offers an unusual and essential opportunity for students to receive small-group enrichment and reinforcement. Supplements and strengthens student experiences in mathematics, allowing particularly gifted students an opportunity to extend their understanding of the subject in a supportive environment, and to explore possible careers in science. May be repeated up to 2 total credit hours.

---

---

## ARSC-1460 (1) MASP Coseminar: Introduction to Mcd Biology

Supplements and strengthens student experiences in MCDB 1150 and 2150. Allows particularly gifted students an opportunity to extend their understanding of the subject and to explore possible careers in science. May be repeated up to 2 total credit hours.

[College of Arts & Sciences](#) [Arts & Sciences Admin](#) [Miramontes Arts & Sciences Pgr](#)

---

## ARSC-1480 (1) MASP Seminar: Exploration of Public Discourse through the Social Sciences

Fosters an appreciation of the humanities and social sciences. Readings, discussions, cooperative learning exercises, and outside activities illustrate the interconnections between different bodies of knowledge. Emphasizes relationships between the humanities/social sciences and the real world. May be repeated up to 2 total credit hours.

[College of Arts & Sciences](#) [Arts & Sciences Admin](#) [Miramontes Arts & Sciences Pgr](#)

---

## ARSC-1490 (1) MASP Seminar: Activating the Humanities and Social Sciences

Building on ARSC 1480, enhances students' knowledge and appreciation of the humanities and social sciences. Readings, discussions, cooperative learning exercises, workshopping papers and presentation, guest speakers, and outside activities are designed to enhance both students' appreciation of the subject matter and their performance in their regular courses. Emphasis is on actively using knowledge of humanities and social sciences in a variety of ways. Prereq., ARSC 1480. May be repeated up to 2 total credit hours.

[College of Arts & Sciences](#) [Arts & Sciences Admin](#) [Miramontes Arts & Sciences Pgr](#)

---

## ARSC-1492 (1-3) MASP Research Seminar

Building on ARSP 1490, this course seeks to enhance students' knowledge and appreciation of the humanities and social sciences. Readings, discussions, cooperative learning exercises, workshopping papers and presentations, guest speakers, and outside activities are designed to enhance both students' appreciation of the subject matter and their performance in their regular courses. Emphasis is placed on actively using knowledge of humanities and social science in a variety of ways. May be repeated up to 6 total credit hours.

[College of Arts & Sciences](#) [Arts & Sciences Admin](#) [Miramontes Arts & Sciences Pgr](#)

---

## ARSC-1600 (1) The University of Colorado Experience

Provides an effective transition to the university by giving students a solid base for developing scholarship, citizenship, decision making, and involvement in their university community. Topics include academic and campus resources, safety, health, and diversity.

---

## ARSC-1710 (1) Calculus Bridge Course

Provides motivated pre-calculus students with more in-depth and more challenging coverage of material assumed in calculus. Students complete advanced problems that cannot be covered in pre-calculus courses due to time constraints. Mastery of material is emphasized. Prereq., proficiency in high school mathematics. Coreq., MATH 1001/1021.

## ARSC-1720 (1) SASC Coseminar: Calculus Work Group

This 1-credit seminar provides motivated calculus students with more in-depth and more challenging coverage of material assumed in calculus. Students complete advanced problems that cannot be covered in calculus courses due to time constraints. Mastery of material is emphasized. Prereq., proficiency in pre-calculus mathematics. Recommended prereq., A/B average in pre-calculus sequence. Coreq., MATH1300.

## ARSC-1800 (3) Methods of Inquiry

Introduces students to methodologies used in different academic disciplines, e.g., how a paleographer dates a manuscript. Course is team-taught. Students must also enroll in two of four co-requisite course sections, all in different areas of the CORE curriculum. The co-requisite course sections are listed in the online Schedule Planner.

## ARSC-1810 (1) Open Option Seminar: Academic Exploration and Critical Decision Making

Survey the major exploration process in a guided and intentional way, critically evaluate your strengths and interests, learn decision making skills, and learn academic skills necessary to succeed in a major discipline. Complete the course well equipped to declare a major of interest in a timely fashion and to supplement your degree with study abroad, undergraduate research and/or co-curricular experiences. Offered Pass/Fail only. Restricted to Arts and Sciences Open Option students only. Prerequisites: Restricted to Arts and Sciences Open Option students only.

## ARSC-2000 (3) Ways of Knowing: Constructions of Knowledge in the Academy and Beyond

---

Explores different ways of knowing from interdisciplinary, cross-cultural perspectives. Course begins with personal interrogations of students' primary learning modes. It goes on to examine cultural assumptions about schooling, learning and knowledge, juxtaposing western and eastern philosophies of knowing and looking at how gender, race, class, and other categories of identity shape and interpret concepts of knowledge. Same as NRLN 2000. Approved for arts and sciences CORE curriculum: ideals and values.

[College of Arts & Sciences](#) [Arts & Sciences Admin](#) [Special Curricula](#)

---

## ARSC-2274 (3) Peer Counseling

Introduction to basic peer education and counseling theory and techniques. Students learn experientially by practicing a variety of skills in an informal atmosphere. The material learned is valuable to students professionally (as employee or supervisor in any field or as helping professional) regardless of career path. Students increase self-awareness and apply it to their own lives. Offered Fall semesters only. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

[College of Arts & Sciences](#) [Arts & Sciences Admin](#) [Special Curricula](#)

---

## ARSC-2400 (1) MASP Coseminar: Organic Chemistry

Supplements and strengthens student experiences in organic chemistry. Allows gifted students an opportunity to extend their understanding of the subject and to explore possible careers in science. May be repeated up to 2 total credit hours.

[College of Arts & Sciences](#) [Arts & Sciences Admin](#) [Miramontes Arts & Sciences Pgr](#)

---

## ARSC-2470 (1) MASP Coseminar: Physics 1 and 2

Supplements and strengthens student experiences in physics. Allows particularly gifted students an opportunity to extend their understanding of the subjects and to explore possible careers in science. May be repeated up to 2 total credit hours.

[College of Arts & Sciences](#) [Arts & Sciences Admin](#) [Miramontes Arts & Sciences Pgr](#)

---

## ARSC-3001 (6) Social Engagement & Human Rights: The South Africa Model

Examines the concept of reconciliation from a multidimensional and multidisciplinary approach as it specifically contributes to subjects of difference, inequality, and historical legacies of intractable relations. Using an experiential approach, the study of reconciliation is situated in an international environment in which reconciliation is being practiced and later in the United States context. Recommended prereq., any course with substantive race, class, gender, difference, and inequality emphasis. Offered through Study Abroad Program. Approved for arts and sciences core curriculum: human diversity.

[College of Arts & Sciences](#) [Arts & Sciences Admin](#) [Special Curricula](#)

---

## ARSC-3100 (3) Multicultural Perspective and Academic Discourse

Teaches students how to write academic papers related to race, class, gender, sexuality, and other areas of cultural identity. Students acquire expertise on issues through readings, guided discussion, and research and practice oral presentation skills, drafting, and workshopping of papers. Prereq., lower level writing course(s) or waiver. Restricted to juniors/seniors. Approved for arts and sciences CORE curriculum: written communication. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

[College of Arts & Sciences](#) [Arts & Sciences Admin](#) [Writing](#)

## ARSC-3600 (3) Diversity Issues: Higher Education

Uses Internet dialogue, computing, and media technology to improve communication and develop research and inquiry skills and critical thinking. Race, class, gender, and sexual orientation issues are addressed to foster understanding of university codes of inquiry and modes of interaction in scholarly communities. Prereq., admission to McNair Program, junior standing, minimum GPA of 2.50, and strong interest in graduate school).

### ARSC-3650 (3) Diversity Issues in Graduate Education

Guides students through research on diversity and retention issues in graduate education. Participants use Tinto's work on academic and social integration as a conceptual framework. Further, students investigate how specific institutions support diversity goals in their graduate programs. Prereq., admission to McNair Program (minimum 2.50 GPA, three recommendation letters, personal statement, strong interest in graduate school).

[College of Arts & Sciences](#) [Arts & Sciences Admin](#) [Special Curricula](#)

### ARSC-3700 (1-5) McNair Seminar: Research Design

Multidisciplinary course guiding critical thinking as students design a formal investigation. Includes presenting and writing a prospectus. Students revise the prospectus, creating a proposal for funding the research as well as HRC proposals. May be repeated up to 6 total credit hours. Prereq., admission to McNair Program (junior standing, minimum GPA of 2.50, and a strong interest in graduate school).

[College of Arts & Sciences](#) [Arts & Sciences Admin](#) [Special Curricula](#)

### ARSC-3935 (1-6) Internship

May be repeated up to 6 total credit hours.

[College of Arts & Sciences](#) [Arts & Sciences Admin](#) [Special Curricula](#)

### ARSC-4000 (3) Multimedia Applications in Foreign/Second Language

## Education

Focuses on knowledge and skills in accessing, evaluating, and integrating technology-assisted, mediated material in the teaching and learning of foreign languages. Also focuses on hands-on design and production of instructional software for foreign languages. Recommended prereq., a language-teaching methodology course. Same as ARSC 5000.

---

## ARSC-4040 (1-3) Arts and Sciences Special Topics

Same as ARSC 5040.

[College of Arts & Sciences](#) [Arts & Sciences Admin](#) [Special Curricula](#)

---

---

## ARSC-4700 (1-5) The McNair Seminar: Research Practices and Procedures

Within the range of scholarly modes, student researchers examine discipline-specific rationales for evidence and analysis. Lecturers distinguish popular concepts of investigation from scholarly research. Students learn to take great care describing and discussing methods, findings, interpretations, assertions, and conclusions. May be repeated up to 10 total credit hours. Prereq., admission to McNair Program (junior standing, meeting TRIO guidelines, strong interest in graduate school).

[College of Arts & Sciences](#) [Arts & Sciences Admin](#) [Special Curricula](#)

---

---

## ARSC-4750 (3) Social Foundations of Professional Life in Washington DC

In this course, students will gain deep exposure to the historical, cultural, and socio-economic traditions and pressures that drive domestic and international policy making in Washington D.C. Students will read widely, prepare papers, and lead discussions on fundamental aspects of Washington's professional life. Course takes place in the nation's capital and is taken in conjunction with a professional internship.

[College of Arts & Sciences](#) [Arts & Sciences Admin](#) [Special Curricula](#)

---

---

---

## ARSC-4910 (1) McNair Practicum: Principles and Practices of University Teaching

Teaches the core principles of pedagogy at the university level and provides students guidance and feedback on constructing a teaching session in collaboration with a faculty mentor. Using the instructional practices of their discipline, students discuss issues university faculty encounter in their quest toward teaching excellence. The expertise of the Graduate Teacher Program, the Preparing Future Faculty Network and the Faculty Teaching Excellence Program will be drawn upon for supplemental resources, seminars and workshops. May be repeated up to 3 total credit hours. Prereq., ARSC 4700. Restricted to McNair Program Students.

College of Arts & Sciences Arts & Sciences Admin Special Curricula

---

## ARSC-5000 (3) Multimedia Applications in Foreign/Second Language Education

ARTF

## ARTF-5000 (3) Advanced Digital Postproduction

Class explores the advanced practices and aesthetics of computer-based moving-image art editing. Topics include how to edit and manage a postproduction cycle, how to use digital editing systems and capabilities such as compositing, digital audio, and optical effects treatments. Prereqs., FILM 1502,2000 or 2300, 2500, and 3400 or 3600, or instructor consent. Cannot be taken simultaneously with FILM 3400 or 3600. Same as FILM 4000.

[College of Arts & Sciences](#) [Art & Art History](#) [Graduate Film Courses](#)

## ARTF-5003 (3) Film and Fiction

Explores similarities and differences between literature and film as narrative arts. Studies several novels, short stories, and plays and films made from them. Examines problems in point of view, manipulation of time, tone, structure, and setting. Same as FILM 4003. COML 5003 and ARTF 5003 are the same course. Prerequisites: Restricted to Graduate Students only.

[College of Arts & Sciences](#) [Art & Art History](#) [Graduate Film Courses](#)

## ARTF-5004 (3) Topics in Film Theory

Provides topic-centered analyses of controversial areas in film theory. Students read extensive materials in the topic area, analyze and summarize arguments as presented in the literature, write "Position" papers, and make oral presentations in which they elaborate their own arguments about specific assigned topic, establishing critical dialogue with the primary materials. May be repeated up to 6 total credit hours. Prereq., FILM 3051 or instructor consent. Restricted to senior FILM, FMST, or HUMN majors. Same as FILM 4004. Prerequisites: Restricted to Graduate Students only.

[College of Arts & Sciences](#) [Art & Art History](#) [Graduate Film Courses](#)

---

## ARTF-5010 (1-3) Topics in Film Studies-Production

Prepares students for advanced Film Studies production courses. Subject matter varies each semester. May be repeated up to 9 total credit hours, provided the topics are different. Same as FILM 4010. Prerequisites: Restricted to Graduate Students only.

[College of Arts & Sciences](#) [Art & Art History](#) [Graduate Film Courses](#)

---

## ARTF-5013 (3) Film, Photography and Modernism

Provides interdisciplinary study of film, photography, and modernism, focusing on issues such as dystopia, alienation, sexuality, subjectivity, and self-referentiality. Photographs by Stieglitz, Strand, Weston, Evans, Cartier-Bresson, Kertesz, and Moholy-Nagy. Films by Dziga-Vertov, Eisenstein, Resnais, Antonioni, Bergman, Bunuel, and Bertolucci. Prereq., FILM 1502. Recommended prereq., FILM 3051. Same as FILM 4013.

[College of Arts & Sciences](#) [Art & Art History](#) [Graduate Film Courses](#)

---

## ARTF-5021 (3) Directing/Acting for the Camera

Offers an intensive workshop that provides students with experience directing dramatic material, acting before a camera, and interpreting or adopting dramatic material for film. No experience in directing or acting required. Attendance, research, and papers required. Recommended prereq., FILM 1502. Same as FILM 4021. Prerequisites: Restricted to Graduate Students only.

[College of Arts & Sciences](#) [Art & Art History](#) [Graduate Film Courses](#)

---

## ARTF-5023 (3) Topics in International Cinema

Focuses on major international filmmakers who have had a decisive impact on world cinema. Students will learn how directors create their own innovative body of work with specific formal and thematic patterns, and will also learn to place such work within multiple frameworks that will cover film history, theory, aesthetics, philosophy, and social and cultural analysis. May be repeated up to 6 total credit hours provided topics are different. Prereq., FILM 1502. Recommended prereqs., FILM 3051 and 3061. Same as FILM 4023. Prerequisites: Restricted to Graduate Students only.

[College of Arts & Sciences](#) [Art & Art History](#) [Graduate Film Courses](#)

---

## ARTF-5024 (3) Advanced Research Seminar

Focuses on a specific topic, director, or genre chosen by the professor. Research skills and critical thinking are emphasized. With faculty guidance, students determine individual projects and present them to the class. Class participation is mandatory. Each student submits a thorough and original research paper for a final grade. May be repeated up to 6 total credit hours. Prereq., FILM 1502. Recommended prereqs., FILM 3051, 3061. Same as FILM 4024. Prerequisites: Restricted to Graduate Students only.

[College of Arts & Sciences](#) [Art & Art History](#) [Graduate Film Courses](#)

---

## ARTF-5030 (3) Visiting Filmmakers Seminar

---

Examines creative issues in contemporary cinema art. Graduate and advanced undergraduate students explore filmmaking ideas with guest artists within a seminar setting. Filmmakers, videographers and programmers of national and international reputation, with an emphasis on "Experimental" practice, interact with graduate and advanced undergraduate students, and discuss their work at seminar meetings, public lectures or events. May be repeated up to 6 total credit hours. Recommended prereqs., FILM 1502 and 4453 or instructor consent. Same as FILM 4030.

College of Arts & Sciences Art & Art History Graduate Film Courses

---

## ARTF-5043 (1-3) Topics in Film Studies-Critical Studies

Prepares students for advanced Film Studies critical studies courses. Subject matter varies each semester. May be repeated up to 9 total credit hours, provided the topics are different. Same as FILM 4043. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Art & Art History Graduate Film Courses

---

## ARTF-5105 (3) Advanced Screenwriting

Introduces professional screenwriting, in the form of a creative writing workshop. Admission by portfolio (see film department). Students write scenes and scripts for short films, feature treatments, etc., and are graded on a final portfolio. Prereq., approved writing sample. Recommended prereqs., FILM 3051 and 3061. Same as FILM 4105.

College of Arts & Sciences Art & Art History Graduate Film Courses

---

## ARTF-5200 (3) Flow Visualization

Explores techniques for the visualization of the physics of fluid flows including seeding with dyes, particles and bubbles, and shadowgraphy and schlieren. Reviews optics and fluid physics, especially atmospheric clouds. Assignments are student-driven, to individuals and mixed teams of grad, undergrad, engineering majors and photography/video majors. Please see <http://flowvis.colorado.edu>. Prereq., MCEN 3021 or equivalent, or significant imaging experience (photography/video). FILM 4200 and ARTF 5200 are the same course. Same as MCEN 4151/5151.

College of Arts & Sciences Art & Art History Graduate Film Courses

---

## ARTF-5453 (3) Elective Affinities: Avant-Garde Film and the Arts

Traces the history and aesthetics of avant-garde/ experimental films in light of similar ideas found in the other arts, particularly painting, poetry, photography and music. Topics covered include Dada and the early avant-garde; surrealism and psychodramas; Brakhage and abstract expressionism; feminist arts and film since the 1980s; the idea of the sublime in painting, music, and film; landscape in painting, photography, and film; post-modernism and the cinema; queer theory, gender/identity politics, and aesthetics of recent films; and specific multiple disciplinary artists such as Andy Warhol, Michael Snow, Helen Levitt, and Gunvor Nelson. Prereq., FILM 1502. Same as FILM 4453. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Art & Art History Graduate Film Courses

---

---

## ARTF-5500 (3) Cinema Production 2

Advanced exploration of creative cinema production through short production and post-production projects. Course focuses on the tactics and strategies of independent cinema production exploring either documentary, experimental, or narrative genres. May be repeated up to 9 total credit hours. Prereq., FILM 3400. Same as FILM 4500. Prerequisites: Restricted to Graduate Students only.

[College of Arts & Sciences](#) [Art & Art History](#) [Graduate Film Courses](#)

---

## ARTF-5600 (3) Creative Digital Cinematography

Explores creative approaches to single camera digital cinematography through short projects, discussions, and screenings. Relates creative photography and poetic approaches to the digital camera cinema. May be repeated up to 9 total credit hours. Prereqs., FILM 2000, 3600, or ARTS 4246 or 5346 or instructor consent. Restricted to FILM majors. Same as FILM 4600.

[College of Arts & Sciences](#) [Art & Art History](#) [Graduate Film Courses](#)

---

## ARTF-5604 (3) Colloquium in Film Aesthetics

Seminar for the serious round table discussion and critique of film as an art form, emphasizing development of appropriate verbal and written language skills for description of film. May be repeated upto 6 total credit hours. Same as FILM 4604. Prerequisites: Restricted to Graduate Students only.

[College of Arts & Sciences](#) [Art & Art History](#) [Graduate Film Courses](#)

---

## ARTF-5610 (3) Image-makers Graduate Seminar

Explores advanced graduate studio work in a seminar setting. The course will focus on the development of ideas and activities which advance creative image making. May be repeated up to 12 total credit hours. Prerequisites: Restricted to Graduate Students only.

[College of Arts & Sciences](#) [Art & Art History](#) [Graduate Film Courses](#)

---

## ARTF-5717 (1-3) Graduate Studio Critique

May be repeated up to 6 total credit hours with any single faculty member. Prereq., graduate standing and/or instructor consent. Prerequisites: Restricted to Graduate Students only.

[College of Arts & Sciences](#) [Art & Art History](#) [Graduate Film Courses](#)

---

## ARTF-5846 (1-3) Graduate Independent Study-Video

Participate in graduate independent study. May be repeated up to 6 total credit hours. Prereq., graduate standing or instructor consent.

---

[College of Arts & Sciences](#) [Art & Art History](#) [Graduate Film Courses](#)

## ARTF-5857 (1-3) Graduate Independent Study

Participate in graduate independent study. May be repeated up to 6 total credit hours. Prereq., graduate standing or instructor consent.

Prerequisites: Restricted to Graduate Students only.

## ARTF-6959 (1-6) Master's Thesis Film

Preparation, research, writing of critical studies Master's thesis in fulfillment of concurrent BAMA in Film. Prereq., ARTF 5004. May be

repeated up to 6 total credit hours. Prerequisites: Restricted to Graduate Students only.

ARTH

## ARTH-1300 (3) History of World Art 1

Surveys major art styles from the Paleolithic period through the Renaissance, including European, Asian, and the Pre-Columbian/Islamic world. Emphasizes comparison of Western and non-Western visual expressions as evidence of differing cultural orientations. Approved for arts and sciences core curriculum: literature and the arts.

[College of Arts & Sciences](#) [Art & Art History](#) [Art History](#)

## ARTH-1400 (3) History of World Art 2

Surveys major art styles from about 1600 to the present, including Europe, Asia, the Islamic world, the Americas, and tribal arts. Emphasizes comparison of Western and non-Western visual expressions as evidence of differing cultural orientations. Credit not granted for this course and FINE 1409. Approved for arts and sciences core curriculum: literature and the arts.

[College of Arts & Sciences](#) [Art & Art History](#) [Art History](#)

## ARTH-1509 (4) Trash and Treasure, Temples and Tombs: Art and Archaeology of the Ancient World

Introduces the art and archaeology of ancient Egypt, Mesopotamia, Greece, and Rome, examining various ancient approaches to power, religion, death, and the human body. Analyzes art, architecture, and everyday trash to learn about ancient humanity. Same as CLAS 1509. Approved for arts and science core curriculum: historical context or literature and the arts.

[College of Arts & Sciences](#) [Art & Art History](#) [Art History](#)

---

## ARTH-1709 (3) Freshmem Seminar: Critical Introduction to Art History

Provides a broad introduction to understanding and appreciating art and art history within a critical lecture seminar and discussion format. The focus of this course is a selected Particularity directed to nonmajors. Formerly FINE 1709. Approved for arts and science core curriculum: literature and the arts.

College of Arts & Sciences Art & Art History Art History

---

## ARTH-2019 (3) Pompeii and the Cities of Vesuvius

Introduces the towns and villas buried by the eruption of Mt. Vesuvius in 79 C.E. Explores the layout and decoration of ancient Roman houses, the variety of artifacts uncovered as evidence for daily life and the history of the excavations. Same as CLAS 2019. Approved for arts and sciences CORE curriculum: historical context.

College of Arts & Sciences Art & Art History Art History

---

## ARTH-2409 (3) Intro to Asian Art

Designed for those having no previous experience in the study of Asian art. Traces development of sculpture, painting, architecture, and the other visual arts of South Asia, the Far East, and Southeast Asia, with a synopsis of developments from 1453 through the 18th century. Approved for arts and science core curriculum: literature and the arts.

College of Arts & Sciences Art & Art History Art History

---

## ARTH-3009 (3) Critical Thinking in Art History

Through structured discussions, selected readings, and written assignments provides an understanding of how art history has evolved as an academic discipline and how art historians evaluate complex issues of style, form, content, and theory in the visual arts. Prereqs., ARTH 1300, 1400.

College of Arts & Sciences Art & Art History Art History

---

## ARTH-3029 (3) Medieval and Early Modern Visual Culture, A.D. 400 to A.D. 1750

Introduces students to the literature, history, culture and art of Europe and the Mediterranean basin from late antiquity through the early modern period. Interdisciplinary approach to visual culture focuses on uses of sacred religious practices and lay devotion. Prereqs., ARTH 1300 and 1400.

College of Arts & Sciences Art & Art History Art History

---

---

## ARTH-3039 (3) Greek Art and Archaeology

Covers prehistoric Aegean through the fourth century B.C.E., considering architecture, pottery, painting, sculpture, and personal ornament. Societal customs such as use of space and burial patterns are considered as well as art and its uses, to help understand developments in Greek culture. Credit not granted for this course and FINE/CLAS 1009. Same as CLAS 3039. Approved for arts and sciences core curriculum: literature and the arts.

College of Arts & Sciences Art & Art History Art History

---

## ARTH-3049 (3) Introduction to Roman Art and Architecture

Introduces the monuments and sites of the ancient Roman world from the foundation of Rome (753 B.C.E.) to Constantine (306-307 C.E.). Emphasizes the relationship of art, architecture, and artifacts to the political, social, and religious institutions of Italy and the provinces. Same as CLAS 3049. Credit not granted for this course and CLAS 1019. Approved for arts and sciences core curriculum: literature and the arts.

College of Arts & Sciences Art & Art History Art History

---

## ARTH-3079 (3) Medieval Art Survey

Surveys the history of Western art from Constantine to around the year 1300, including Carolingian, Ottonian, Anglo-Saxon, Romanesque, and Gothic. Considers "Barbarian," Byzantine, and Islamic influences. Prereqs., ARTH 1300, 1400.

College of Arts & Sciences Art & Art History Art History

---

## ARTH-3109 (3) Art in Contemporary Society

Examines writings by philosophers and art critics as they address the question: What is art for? Readings focus on the 19th and 20th centuries, including current theories and some non-Western theories. Students are encouraged to develop their own responses to the question. Prereqs., ARTH 1300 and 1400. Prerequisites: Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

College of Arts & Sciences Art & Art History Art History

---

## ARTH-3209 (3) Art, Culture, and Gender Diversity, 1400--1600: Renaissance Art Out of the Canon

Studies the rising status of painting, sculpture, and architecture in Europe and how Europeans perceived non-Western art during the early modern period. Introduces history of race/ethnicity, gender, and class concerns embodied in the European category visual arts. Emphasizes new methods for interpreting history without imposing Eurocentric viewpoints. Prereqs., ARTH 1300 and 1400. Approved for arts and sciences core curriculum: human diversity. Prerequisites: Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

College of Arts & Sciences Art & Art History Art History

---

---

---

## ARTH-3210 (3) The Art of Renaissance Cities and Courts

Surveys the development and spread of humanist culture associated with the modern term "Renaissance Art" from c. 1400-1600, organized by location, artist, and patron. Presents significant works of paintings, sculpture and architecture at a number of major artistic centers including Florence, Rome, Venice, Fontainebleau, and Prague. Prereq., ARTH 1300 or 1400.

College of Arts & Sciences Art & Art History Art History

---

---

---

## ARTH-3309 (3) European Art, 1300--1800

Covers high visual culture in Europe from 1300 to 1800. Discussions of this concept with its implications for aesthetics, semiotics, and ideology form the core of the course. Prereqs., ARTH 1300 and 1400.

College of Arts & Sciences Art & Art History Art History

---

---

---

## ARTH-3419 (3) Modern Art Survey

Surveys the loss of beauty in art and discusses whether or not that loss is regrettable. Questions the function and historical meaning of modern and postmodern art: is it all hype and strategic positioning by artists for fame and fortune? Is it serious? Are the fine arts still fine? Prereq., ARTH 1300, 1400.

College of Arts & Sciences Art & Art History Art History

---

---

---

## ARTH-3509 (3) American Art

Surveys American art and material culture from the precolonial era to the present day. Considers cultural and artistic interaction, ethnic expressions, patronage, European and non-Western influences, and the struggle to develop a uniquely American artistic identity. Prereqs., ARTH 1300 and 1400. Approved for arts and sciences core curriculum: United States context.

College of Arts & Sciences Art & Art History Art History

---

---

---

## ARTH-3519 (3) Modern Architecture, 1780--1960

Introduces the major movements and developments in European and American architecture from Neoclassicism to Postmodernism. Considers the impact of exhibitions, expositions, and vernacular architecture. Prereqs., ARTH 1300, 1400.

College of Arts & Sciences Art & Art History Art History

---

---

## ARTH-3539 (3) Contemporary Art

Examines contemporary art and theory in the transition from modern to postmodern expression. Discusses painting, sculpture, installations, performance, video, photography, and architecture with attention to historical context and criticism. Considers neoexpressionist, feminist, minority, political, and public art. Prereq., one 3000-level art history course. Same as ARTH 5539. Formerly ARTH 4539.

College of Arts & Sciences Art & Art History Art History

---

## ARTH-3619 (3) The Arts of China

Surveys Chinese painting, sculpture, architecture, and other arts from neolithic to modern times. Prereqs., ARTH 1300, or 1400, or 2409, or HIST 1608.

College of Arts & Sciences Art & Art History Art History

---

## ARTH-3629 (3) The Arts of Japan

Offers an appreciation and chronological development of the arts of Japan. Emphasizes the arts of Shintoism and Buddhism as well as the particular Japanese aesthetic from prehistoric times to the present. Prereq., one 3000-level art history course.

College of Arts & Sciences Art & Art History Art History

---

## ARTH-3719 (3) History of Media Arts

Surveys the development of technological media both as sources of information and as art. Photography and related media, film, video, holography, and electronic imaging systems are surveyed as art and as technologies, emphasizing major artists, movements, exhibitions, and other productions in the 19th and 20th centuries. Prereqs., ARTH 1300 and 1400.

College of Arts & Sciences Art & Art History Art History

---

## ARTH-3729 (3) Foundations in Latin American Art

Examines Latin America's cultural pluralism and art production beginning in pre-Columbian times and following through to the present. Considers the various functions of art as well as the relationship between objects, artists, and the cultures from which they come. Provides students with a broad frame of reference for many historical periods and equips students to evaluate art objects and their cultural contexts. Prereqs., ARTH 1300 and 1400.

College of Arts & Sciences Art & Art History Art History

---

## ARTH-3929 (1-3) Special Topics in Art History

May be repeated up to 18 total credit hours when topic varies. Prereqs., ARTH 1300 and 1400.

[College of Arts & Sciences](#) [Art & Art History](#) [Art History](#)

## ARTH-4039 (3) Byzantine Art

Examines art of the East Christian Empire from the accession of Constantine to the conquest of Constantinople with a synopsis of developments from 1453 through the 18th century. Prereq., one 3000-level art history course. Same as ARTH 5039.

## ARTH-4069 (3) Medieval Manuscripts

Surveys decorated books from late antiquity to the advent of the printing press. Examines the various roles manuscripts played within different medieval communities. Prereq., ARTH1300 and 1400. Same as ARTH 5069.

[College of Arts & Sciences](#) [Art & Art History](#) [Art History](#)

## ARTH-4089 (3) Romanesque and Gothic Art

Examines major artistic trends in Europe between the years 1000 and 1300, a period that witnessed, among others, the development of gothic cathedrals and the rise of the professional artist. Particular attention will be given to exchange with other cultures. Prereqs., ARTH 1300 and 1400.

[College of Arts & Sciences](#) [Art & Art History](#) [Art History](#)

## ARTH-4109 (3) Ancient Italian Painting

Explores the problems, theories and methods for understanding the iconography, styles, topologies, contexts and techniques of fresco wall painting in ancient Italy from the 6th century B.C.E. to the 4th century C.E. Topics covered include Etruscan tomb paintings, late Republican and early imperial fresco paintings from Rome and Campania, and later Roman wall paintings, including the painted images in ancient catacombs. Previous coursework on ancient Italy or the history of pre-modern art is highly recommended. Recommended prereqs., CLAS/ARTH 1509, 3049. Same as CLAS 4109.

[College of Arts & Sciences](#) [Art & Art History](#) [Art History](#)

## ARTH-4119 (3) Roman Sculpture

Examines ancient Roman sculpture with emphasis on the display, iconography, and production of private and public monuments in the Roman Empire. Explores sculpture as evidence for historical developments, societal and gender attitudes, and state ideologies in the ancient Roman world. Recommended prereqs., ARTH 1300 or CLAS 1019. Same as CLAS 4119.

College of Arts & Sciences Art & Art History Art History

---

---

## ARTH-4129 (3) Aegean Art and Archaeology

A detailed study of the cultures of prehistoric Greece, the Cycladic Islands, and Crete, their art and archaeology, and their history within the broader context of the eastern Mediterranean, from earliest human settlement to the collapse of the Bronze Age at about 1100 B.C.E. Emphasis is on palace states. Same as ANTH/ARTH 4129, CLAS 5129.

College of Arts & Sciences Art & Art History Art History

---

---

## ARTH-4139 (3) Greek Vase Painting

A comprehensive overview of Greek vase painting, from prehistoric through the fourth century B.C.E. Emphasis is on learning the development of primary decorative styles and on refining skills of visual analysis, scholarly research, critical thinking, oral commentary, and written presentation. Same as CLAS 4139.

College of Arts & Sciences Art & Art History Art History

---

---

## ARTH-4149 (3) Greek Cities and Sanctuaries

Examines Greek architecture in context, from the ninth century B.C.E. into the Hellenistic period, considering the use of space, both in religious and in civic settings, and using texts as well as material culture. Emphasis is on developing analytical skills. Same as CLAS 4149.

College of Arts & Sciences Art & Art History Art History

---

---

## ARTH-4169 (3) Topics in Ancient and Classical Art and Archaeology

In-depth consideration of an aspect of ancient Mediterranean culture. Topics vary; they may include ancient wall painting, Greek sculpture, artists and patrons, the ancient Near East, Egyptian art and archaeology, or Etruscan art and archaeology. Maybe repeated up to 9 total credit hours providing the topics are different. Same as CLAS 4169. Prerequisites: Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

College of Arts & Sciences Art & Art History Art History

---

---

## ARTH-4189 (3) Medieval Art

Focuses on one area of medieval art. Topics vary, but may include Carolingian, Ottonian, Romanesque, or Gothic art. Emphasizes critical thinking, methods of scholarly research, and development of writing skills. Prereqs., ARTH 1300 and 1400.

College of Arts & Sciences Art & Art History Art History

---

## ARTH-4199 (3) Roman Architecture

Examines the designs, functions, and construction methods of ancient Roman towns, temples, baths, houses, and civic structures, as well as utilitarian structures including roads and aqueducts. Emphasizes Roman architectural forms and spaces as vehicles for political propaganda and empire consolidation. Same as CLAS 4199.

College of Arts & Sciences Art & Art History Art History

---

## ARTH-4209 (3) Classical Archaeological Field Methods

Offers experiential learning in theories and methods of field excavation at the Villa of Maxentius in Rome. Applies methods for stratigraphic excavation, electronic surveying with Gis, ceramic analysis, numismatic analysis, architectural construction materials and methods, artifact conservation and data processing and documentation. Offered abroad only. May be repeated up to 6 total credit hours. Coreq., ARTH 4219 for first 3 credit hours. Recommended prereqs., CLAS/ARTH 1509, 3049. Same as CLAS 4209 and 5209.

College of Arts & Sciences Art & Art History Art History

---

## ARTH-4219 (3) Maxentius and the City of Rome

Combines seminar discussion and site visits in Rome and Tivoli to understand the excavations at the Villa of Maxentius and its artifacts in the broader contexts of Roman architectural development, late Roman art, and late imperial Roman history. Offered abroad only. Must be taken concurrently with CLAS/ARTH 4209 or CLAS 5209. Recommended prereqs., CLAS/ARTH 1509, 3049. Same as CLAS 4219.

College of Arts & Sciences Art & Art History Art History

---

## ARTH-4269 (3) Art and Archaeology of the Ancient Near East

Examines civilizations of the Iran-Iraq region from the rise of urbanism in Mesopotamia through the era of the first 'world empire,' Achaemenid Persia. Emphasizes the material record of religious and state institutions of the ancient Near East, especially monuments that illustrate concepts of kingship. Explores notions of style, symbolism, visual rhetoric, text-image synthesis, patronage, creativity, and roles of artists. Recommended prereq., CLAS/ARTH 1509. Same as CLAS 4269. Approved for arts and science core curriculum: human diversity.

College of Arts & Sciences Art & Art History Art History

---

---

## ARTH-4279 (3) Michelangelo (1475--1564)

Focuses on Michelangelo's long career, marked by outstanding achievements in sculpture, painting, architecture, and poetry. Emphasizes his projects and achievements in light of 16th century artistic theory, including relationships to his contemporaries in the arts and literature. Prereq., one 3000-level art history course. Same as ARTH 5279.

College of Arts & Sciences Art & Art History Art History

---

---

## ARTH-4309 (3) Neoclassicism and Romanticism: 1760--1840

Surveys painting and sculpture in England and France from the last quarter of the 18th century through the first half of the 19th century. Prereq., one 3000-level art history course. Same as ARTH 5309.

College of Arts & Sciences Art & Art History Art History

---

---

## ARTH-4319 (3) European Art from 1830 to 1886

Surveys the major movements in painting in France and England from the Revolution of 1830 to the impressionist crisis of 1886. Emphasizes and discusses painting and major expressions in sculpture and architecture. Same as ARTH 5319.

College of Arts & Sciences Art & Art History Art History

---

---

## ARTH-4329 (3) Modern Art 1

Provides an in-depth study of the fin de siècle, stressing postimpressionism, art nouveau, and symbolism. Concludes with fauvism in France and the expressionist movement in Germany. Prereq., one 3000-level art history course. Same as ARTH 5329. Approved for arts and sciences core curriculum: literature and the arts.

College of Arts & Sciences Art & Art History Art History

---

---

## ARTH-4339 (3) Modern Art 2

Begins with early Picasso and cubism, including analytic and synthetic cubism and emphasizing the various isms of the 20th century. Also studies Italian futurism, de Stijl and the Bauhaus, dada, and surrealism. Prereq., one 3000-level art history course. Same as ARTH 5339.

College of Arts & Sciences Art & Art History Art History

---

---

## ARTH-4409 (3) Arts of Africa and Oceania

Covers native arts of non-Western peoples of Africa and Oceania, including sculpture, architecture, and minor arts for both archaeological and ethnological cultures. Emphasizes the function of art in society as well as aesthetic analysis. Prereq., one 3000-level art history course. Same as ARTH 5409.

College of Arts & Sciences Art & Art History Art History

---

---

## ARTH-4419 (3) The Arts of Colonial Mexico and Peru

Examines important works, artists, and themes that comprise the artistic production of colonial Latin America. Focuses on the intermingling, convergence, and at times the clash of European, Amerindian, and African cultures, which established the foundation of Latin America's pluralism. Prereqs., ARTH 1300 and 1400. Recommended prereq., ARTH 3729.

College of Arts & Sciences Art & Art History Art History

---

---

## ARTH-4439 (3) Native North American Art

Surveys art of North American Indian cultures, including the northwest coast, southwest, southeast, northeast, and plains, covering architecture, sculpture, and minor arts for both archaeological and ethnological cultures. Prereq., one 3000-level art history course. Same as ARTH 5439.

College of Arts & Sciences Art & Art History Art History

---

---

## ARTH-4459 (3) Precolumbian Art of Mesoamerica

Introduces students to the art, architecture, and cultures of Mesoamerica--a region that encompasses modern-day Mexico, Guatemala, Belize, and parts of El Salvador, and Honduras. Focuses on major Pre-Columbian art objects and monuments to learn about the societies and cultures from which they came. Also considers the various roles that the visual arts and architecture played in these societies. Covers Olmec through Aztec civilizations. Prereqs., ARTH 1300 and 1400. Recommended prereq., ARTH 3729.

College of Arts & Sciences Art & Art History Art History

---

---

## ARTH-4559 (3) Twentieth-Century Architecture

Examines the major movements and development in European and American architecture, 1900-1960's. Considers the major styles, as well as cultural interactions, race/ethnicity, gender and class concerns as they relate to both the practice and profession of architecture. Prereqs., ARTH 1300,1400.

College of Arts & Sciences Art & Art History Art History

---

---

## ARTH-4569 (3) United States Architecture

Examines architecture as it developed in the area now defined as the continental United States from early cultures to the present. Considers the major styles and issues of cultural interaction, race/ethnicity, gender and class concerns as they relate to the practice, theory, and profession of architecture. Prereq., ARTH 1300 and 1400.

[College of Arts & Sciences](#) [Art & Art History](#) [Art History](#)

## ARTH-4629 (3) Degas Seminar

Introduces current Degas studies and research methods by drawing upon recent books, exhibition catalogues, and scholarly journal articles. Fulfills requirement for ARTH 4919, Capstone Seminar.

### ARTH-4639 (3) Manet Seminar

Introduces current Manet studies and research methods by drawing upon recent books, exhibition catalogues, and scholarly journal articles. Fulfills requirement for ARTH 4919, Capstone Seminar.

[College of Arts & Sciences](#) [Art & Art History](#) [Art History](#)

### ARTH-4649 (3) Impressionism & Post-Impressionism

Fosters creative study of the background and foundation in modern art. Considers 19th-century European painting and, to a lesser degree, sculpture, in relation to social, cultural, and political history from 1863 to 1900. Focuses on France, but gives attention to other countries as well.

[College of Arts & Sciences](#) [Art & Art History](#) [Art History](#)

### ARTH-4669 (3) Romanticism & Realism

Fosters creative study of the background and foundation of modern art. Considers 19th-century European (and, to a lesser degree, American) painting and sculpture in relation to social, cultural, and political history from 1789 (the French Revolution) to 1863 (the Salon des refuses). Focuses on France, but gives attention to other countries as well.

[College of Arts & Sciences](#) [Art & Art History](#) [Art History](#)

### ARTH-4679 (3) Romanticism Seminar

---

Introduces current Romanticism studies and research methods by drawing upon recent books, exhibition catalogues, and scholarly journal articles.

College of Arts & Sciences Art & Art History Art History

---

## ARTH-4689 (3) Post-Impressionism Seminar

Introduces current Post-Impressionism studies and research methods by drawing upon recent books, exhibition catalogues, and scholarly journal articles.

College of Arts & Sciences Art & Art History Art History

---

## ARTH-4739 (3) The Intellectual Roots of Italian Renaissance Art

Studies critical issues raised in the literature on art, focusing on Renaissance interpretations of key historical themes such as imitation and decorum. Carefully examines the language used in primary sources (available in English). Prereq., one 3000-level art history course.

College of Arts & Sciences Art & Art History Art History

---

## ARTH-4749 (3) Italian Renaissance Art: Studies in the Exchange between Theory and Practice

Addresses how artists developed new compositional procedures, graphic techniques, and audiences, and how these procedures were theorized in an age when artists' intellectual and social status rose dramatically. Explores reception of new graphic technology. Studies specific commissions and primary texts in depth. Prereq., one 3000-level art history course. Same as ARTH 5749.

College of Arts & Sciences Art & Art History Art History

---

## ARTH-4759 (3) 17th Century Art and the Concept of the Baroque

Surveys 17th century European painting, sculpture, and architecture, along with a critical study of artistic theory, artistic institutions (such as the Academiadi San Luca and the Academie Royal), and the concept of the term baroque. Prereq., one 3000-level art history course. Same as ARTH 5759. Approved for arts and sciences core curriculum: literature and the arts.

College of Arts & Sciences Art & Art History Art History

---

## ARTH-4769 (3) Gender Studies in Early Modern Visual Culture

Examines 15th and 16th century European ideas about women from a variety of feminist perspectives. Focuses on recent contributions to history of women as they intersect with the visual arts. Prereq., one 3000-level art history course. Same as ARTH 5769 and WMST 4769.

---

Approved for arts and sciences core curriculum: human diversity.

College of Arts & Sciences Art & Art History Art History

---

## ARTH-4779 (3) Multicultural Perspectives on New Mexican Santos

Reflects upon the question: In what sense were the regional variants of European devotional images the effects of meaningful cultural interaction? Evidence considered includes oral traditions, pueblo pottery, and painting, emphasizing interpretations that respect rights of communities to maintain privacy. Prereqs., ARTH 1300, 1400, and one 3000-level art history course. Same as ARTH 5779.

College of Arts & Sciences Art & Art History Art History

---

## ARTH-4819 (3) Contemporary Chicano Art

Examines Chicano art world, focusing on contemporary scene. Lecture/discussion/dialogue explored through readings and visual presentations including: video, guest lecturers, and visits to local spaces. Prereq., any 3000-level art history course or instructor consent.

College of Arts & Sciences Art & Art History Art History

---

## ARTH-4909 (1-3) Independent Study---Art History

May be repeated up to 7 total credit hours.

College of Arts & Sciences Art & Art History Art History

---

## ARTH-4919 (3) Undergraduate Seminar: Selected Topics in Art History

Seminar course dealing with selected areas or problems within the history of art. Consult current online Schedule Planner for seminar topic. May be repeated up to 7 total credit hours. Prereq., instructor consent. Restricted to Art History Majors only. Prerequisites: Restricted to Art History (AAAH) majors only.

College of Arts & Sciences Art & Art History Art History

---

## ARTH-4929 (1-3) Special Topics in Art History

May be repeated up to 18 total credit hours when topic varies. Same as ARTH 5929.

College of Arts & Sciences Art & Art History Art History

---

---

## ARTH-4939 (3-6) Art Museum Internship

Focuses on opportunities at the Denver Art Museum, working with individual curators and master teachers in selected areas, such as audience interpretation, interpretive research files, and public school curriculums. Introduces students to the professional culture and activities of art museums. May be repeated up to 6 total credit hours. Prereqs., ARTH 1300 and 1400. Same as ARTH 5939.

College of Arts & Sciences | Art & Art History | Art History

---

## ARTH-4959 (3) Art History Honors Thesis

May be elected during the final semester. Consists of a substantial, original written thesis. Requires faculty sponsorship. Does not guarantee a student will receive honors.

College of Arts & Sciences | Art & Art History | Art History

---

## ARTH-5109 (3) Ancient Italian Painting

Same as CLAS 5109.

College of Arts & Sciences | Art & Art History | Art History

---

## ARTH-5119 (3) Roman Sculpture

Same as CLAS 5119. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Art & Art History | Art History

---

## ARTH-5139 (3) Greek Vase Painting

Same as CLAS 5139.

College of Arts & Sciences | Art & Art History | Art History

---

## ARTH-5159 (3) Hellenistic Art and Archaeology

Examines art and archaeology from the period following the death of Alexander the Great (late fourth century B.C.E.) to the conquest of Greece by the Romans (middle second century B.C.E.). Same as CLAS 5159. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Art & Art History | Art History

---

---

## ARTH-5169 (3) Topics in Ancient and Classical Art and Archaeology

Same as CLAS 5169.

College of Arts & Sciences Art & Art History Art History

---

## ARTH-5179 (3) City of Athens

Explores in detail the buildings, sculptures, pots, foreign imports, and society of Athens, considering material culture of individuals as much as civic programs. Emphasis is on ways the textual and archaeological evidence complement and/or contradict one another. The course focuses on the Periklean period, considering ways in which it developed from earlier times and influenced later ones in Athens. Same as CLAS 5179.

College of Arts & Sciences Art & Art History Art History

---

## ARTH-5189 (3) City of Rome

Explores in detail the architecture, sculptures, coins, frescos, and other material evidence alongside the political and social history of Augustan Rome. Emphasis is on ways in which the textual and archaeological evidence complement and/or contradict one another. Will explore the impact of the early imperial period on later Roman phases of urban design and image making in the capital city. Same as CLAS 5189. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Art & Art History Art History

---

## ARTH-5269 (3) Art and Archaeology of the Ancient Near East

Same as CLAS 5269.

College of Arts & Sciences Art & Art History Art History

---

## ARTH-5909 (1-3) Graduate Independent Study---Art History

May be repeated up to 9 total credit hours. Prerequisites: Restricted to Graduate Students only.

### ARTH-5939 (3-6) Art Museum Internship

May be repeated up to 6 total credit hours. Same as ARTH 4939.

[College of Arts & Sciences](#) [Art & Art History](#) [Art History](#)

### ARTH-5949 (3) Visiting Scholars Seminar

Brings speakers to campus to work with seminar students, usually four guest scholars per semester, subjects vary. Students read scholar's work and discuss methodological issues. Focuses on the research and insight of scholars who are currently shaping the field and defining research agendas. Required for all MA art history students, open to others. May be repeated up to 6 total credit hours. Prereq., graduate standing or instructor consent. Prerequisites: Restricted to Graduate Students only.

[College of Arts & Sciences](#) [Art & Art History](#) [Art History](#)

### ARTH-5959 (3) Introduction to Critical Theory for Visual Studies

Provides overview for critical theory from Marx to contemporary writers with emphasis on their relevance to visual studies. Addresses issues that underlie a wide range of academic discussion in arts and sciences. Foucault, Derrida, Said, Lacan and other authors will be subject to weekly discussions leading to research papers, presentations, and projects. Class fulfills critical theory requirement for MFA and MA students. Prerequisites: Restricted to Graduate Students only.

---

College of Arts & Sciences Art & Art History Art History

---

## ARTH-6150 (3) Critical and Theoretical Issues in Museums

Investigates key problems facing museum institutions and studies the staging and representation of historical knowledge, the ethics of collecting and display, the changing nature and uses of historical evidence, and relations between curatorial practice, collecting, and field work. Critically examines different approaches to museums and museology in various disciplines, both past and present. Prereq., MUSM 5011 or instructor consent. Same as MUSM 6150, HIST 6150, and ANTH 6150. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Art & Art History Art History

---

## ARTH-6929 (3) Seminar: Theories of Art History

Provides a systematic critical overview of the development of art history as a discipline beginning with 18th century theories of aesthetics and ending with current interdisciplinary models of critical interpretation. Weekly readings, discussions, reports, and written papers constitute the format of this seminar in methodology. Topics vary from semester to semester. May be repeated up to 6 total credit hours within a term. Required for MA (art history) students. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Art & Art History Art History

---

## ARTH-6939 (3) Graduate Seminar: Open Topics in Art History

Subjects and topics vary. May be repeated up to 9 total credit hours. Prereq., graduate standing. Prerequisites: Restricted to Graduate Students only.

ARTS

## ARTS-1002 (3) Beginning Drawing 1

In this studio course the formal visual elements are presented through a study of spatial relationships. The course is built around a series of related problems, each of which is designed to develop fluency in drawing, offer experience in handling media, foster self-confidence, and promote an understanding of the visual elements and their role in the development of pictorial space. Prereqs., ARTS 1010, 1020, and 1030.

[College of Arts & Sciences](#) [Art & Art History](#) [Painting/Drawing](#)

## ARTS-1003 (3) Printmaking for Non-Majors

Emphasizes processes involved with both nonmultiple and multiple methods, including but not limited to metal plate etching (intaglio), lithography, collagraph, woodcut, linoleum cut, Xerox transfer, and monotype. Places equal emphases on developing drawing skills and understanding design principles.

[College of Arts & Sciences](#) [Art & Art History](#) [Printmaking](#)

## ARTS-1010 (3) Introduction to Studio Art

Presents creative activity conceptually, and art history thematically, with an interdisciplinary, experimental, and multicultural focus. Fine arts majors explore visual literacy and culture through presentations and student-centered projects that emphasize individual development. Prerequisites: Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

[College of Arts & Sciences](#) [Art & Art History](#) [Foundations](#)

## ARTS-1012 (3) Drawing for Non-Majors

Explores varied drawing techniques and media. Introduces concepts relevant to the understanding of drawing and the creative process. May not be repeated.

College of Arts & Sciences Art & Art History Painting/Drawing

---

---

## ARTS-1020 (3) Introduction to Studio Art 2

Presents creative activity conceptually and art history thematically, with an interdisciplinary, experimental, and multicultural focus. Art and art history majors explore visual literacy and culture through presentations and student-centered projects that emphasize individual development. Prereq., ARTS 1010. Prerequisites: Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

College of Arts & Sciences Art & Art History Foundations

---

---

## ARTS-1030 (3) Principles of Color

Introduces the relative effects of color as used by the artist. Emphasizes the practice of color relations including basic characteristics, mixtures, illusions, optical mixture, color intervals, and color quantity. May not be repeated.

College of Arts & Sciences Art & Art History Foundations

---

---

## ARTS-1171 (3) Photography for Non-Majors

Introduces techniques and concepts of photography as art. Emphasizes photography as a means to formal and expressive ends. Students must have an adjustable camera. Credit not granted for this course and ARTS 2171.

College of Arts & Sciences Art & Art History Photography

---

---

## ARTS-1202 (3) Beginning Painting 1

The aim of this course is to develop the basic skills, techniques and processes of painting with an understanding of basic colour principles. This integration of paint application and colour principle will develop awareness that painting and colour are used, not only as mediums for representation, but also as mediums for expressive purposes. Demonstrations, lectures, group and individual critiques will be given throughout the course. Prereqs., ARTS 1010, 1020, and 1030.

College of Arts & Sciences Art & Art History Painting/Drawing

---

---

## ARTS-1212 (3) Painting for Non-Majors

Explores varied painting techniques. Introduces concepts relevant to the understanding of painting and the creative process. May not be repeated.

---

College of Arts & Sciences Art & Art History Painting/Drawing

---

## ARTS-1514 (3) Sculpture for Non-Majors

Offers an orientation involving three-dimensional form and application. Studies expressive problems based on non-objective form relationships in various sculptural materials. May not be repeated.

College of Arts & Sciences Art & Art History Sculpture

---

## ARTS-1875 (3) Ceramics for Non-Majors

Encompasses broad and fundamental uses of clay. Basic instruction and demonstration of throwing, hand building, and primitive clay forming methods. Investigates utility, function, and ceramics in the broader context of contemporary art. Slide presentations explore historical and contemporary attitudes involving ceramics.

College of Arts & Sciences Art & Art History Ceramics

---

## ARTS-2002 (3) Figure Drawing

Explores varied drawing techniques and media. Introduces concepts relevant to the understanding of drawing and the creative process. May not be repeated. Prereqs., ARTS 1010, 1020, and either ARTH 1300 or 1400. Prerequisites: Requires pre-requisite courses of ARTS 1010 & 1020. Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

College of Arts & Sciences Art & Art History Painting/Drawing

---

## ARTS-2085 (3) Ceramics 2: Handbuilding

Introduces techniques of hand-built clay forms as they relate to function and nonfunction. Various clay techniques, glazing, and firing procedures are explored. Emphasizes ceramics in the broader context of contemporary art. May not be repeated. Prereqs., ARTS 1010, 1020 and ARTH 1300 or 1400. Prerequisites: Requires pre-requisite courses of ARTS 1010 & 1020. Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

College of Arts & Sciences Art & Art History Ceramics

---

## ARTS-2095 (3) Ceramics 2: Wheelthrowing

Introduces techniques of wheel-thrown forms as they relate to function and nonfunction. Explores various glazing and firing methods. May not be repeated. Prereqs., ARTS 1010, 1020 and ARTH 1300 or 1400. Prerequisites: Requires pre-requisite courses of ARTS 1010 & 1020. Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

College of Arts & Sciences Art & Art History Ceramics

---

---

---

## ARTS-2126 (3) Digital Art 1

An introductory course in the use of the personal computer to create and process images in the visual arts. Prereq., ARTS 1010, 1020 and ARTH 1300 or 1400. Prerequisites: Requires pre-requisite courses of ARTS 1010 & 1020. Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

College of Arts & Sciences | Art & Art History | Media Arts

---

---

## ARTS-2171 (3) Photography 1

Introduces techniques and concepts of photography as art. Emphasizes photography as a means to formal and expressive ends. Students must have an adjustable camera. Prereqs., ARTS 1010, 1020, and either ARTH 1300 or 1400. Credit not granted for this course and ARTS 1171. Prerequisites: Requires pre-requisite courses of ARTS 1010 & 1020. Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

College of Arts & Sciences | Art & Art History | Photography

---

---

## ARTS-2191 (3) Photography 2

Explores more sophisticated technical and conceptual skills to the creative process. Prereq., ARTS 2171. Prerequisites: Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

College of Arts & Sciences | Art & Art History | Photography

---

---

## ARTS-2202 (3) Figure Painting

Explores varied painting techniques. Introduces concepts relevant to the understanding of painting and the creative process. May not be repeated. Prereqs., ARTS 1010, 1020, and either ARTH 1300 or 1400. Prerequisites: Requires pre-requisite courses of ARTS 1010 & 1020. Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

College of Arts & Sciences | Art & Art History | Painting/Drawing

---

---

## ARTS-2504 (3) Sculpture: Materials and Techniques

Explores a variety of materials, methods, and techniques and their application with reference to contemporary sculpture, i.e., moldmaking, welding, casting, vacuforming, photo techniques, and woodworking. Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only. Prereqs., ARTS 1010 & 1020. Prerequisites: Requires pre-requisite courses of ARTS 1010 & 1020. Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

College of Arts & Sciences | Art & Art History | Sculpture

---

---

## ARTS-2524 (3) Visual Thinking (Sculpture and Post-Studio Practice)

---

Explores ideas concerning the structure and nature of visual thinking and their relationship to the creative thought process. Also investigates form in terms of the organizing principles of three-dimensional design and its application to contemporary sculpture. Includes lecture and studio projects. Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only. Prereq., ARTS 1010 & 1020. May be repeated up to 6 total credit hours. Prerequisites: Requires pre-requisite courses of ARTS 1010 & 1020. Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

College of Arts & Sciences | Art & Art History | Sculpture

---

## ARTS-3002 (3) Drawing Alternative Process/Materials

Continuation of Drawing 2. Offers creative possibilities in drawing and related media. Emphasizes experimentation and individual expression. Content varies by semester according to instructor; contact individual instructor for more information. May be repeated once. Prereq., ARTS 2002. Prerequisites: Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

College of Arts & Sciences | Art & Art History | Painting/Drawing

---

## ARTS-3017 (1-3) Special Topics in Studio Arts

Introduces timely subjects in studio arts courses that cannot be offered on a regular basis. Information concerning the topics in any given semester is available prior to pre-registration from the department of Art and Art History. May be repeated up to 7 total credit hours. Prereqs., ARTS 1010, 1020 and ARTH 1300 or 1400. Restricted to juniors and seniors. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

College of Arts & Sciences | Art & Art History | Seminars/Special Topics

---

## ARTS-3085 (3) Ceramics 3

Deals with further exploration of techniques approached in ARTH 2085 and 2095. Students are encouraged to develop personal concentration in relation to medium. May be repeated up to 6 total credit hours. Prereqs., ARTS 2085, 2095. Prerequisites: Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

College of Arts & Sciences | Art & Art History | Ceramics

---

## ARTS-3097 (1-3) Special Topics---Non-Studio

Introduces timely subjects in fine arts that cannot be offered on a regular basis. Information concerning the topics offered in any given semester is available prior to preregistration from the Department of Art and Art History. May be repeated up to 7 total credit hours. Prereqs., ARTS 1010, 1020 and ARTH 1300 or 1400. Prerequisites: Restricted to Studio Arts (AASA) or Fine Arts-Studio (BASA and BFAS) or Fine Arts-Art History (BAAH) or Art History (AAAH) majors only.

College of Arts & Sciences | Art & Art History | Seminars/Special Topics

---

## ARTS-3191 (3) Photography 3

Continues the exploration of the possibility of individual photographic expression. Students are encouraged to discover and develop a

personal position in relation to the medium. May be repeated up to 6 total credit hours. Prereq., Arts 2191. Prerequisites: Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Subject Number

ARTS

### ARTS-3196 (3) Photo-Imaging

Introduces techniques, software, and related concepts of digital photography as art. Emphasizes digital photography as a means to formal and expressive ends. Prereq., ARTS 1171.

[College of Arts & Sciences](#) [Art & Art History](#) [Media Arts](#)

### ARTS-3202 (3) Painting Alternative Process/Materials

Continuation of Painting 2. Offers creative possibilities in painting and related media. Emphasizes experimentation and individual expression. Content varies by semester according to instructor; contact individual instructor for more information. May be repeated up to 6 total credit hours. Prereq., ARTS 2202. Prerequisites: Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

[College of Arts & Sciences](#) [Art & Art History](#) [Painting/Drawing](#)

### ARTS-3236 (3) Electronic Arts Survey

Explores the development of video as an art form through tape screenings, readings, lectures, and discussions. Prerequisite for further studies in video production.

[College of Arts & Sciences](#) [Art & Art History](#) [Media Arts](#)

### ARTS-3403 (3) Intaglio and Relief 1

Introduces the study and experimentation of intaglio and relief processes in black and white, color, and possible photo imagery. May be repeated up to 6 total credit hours. Taught with ARTS 4403/5403. Prerequisites: Restricted to students with 27-180 credits (Sophomores,

Juniors or Seniors) Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

College of Arts & Sciences Art & Art History Printmaking

---

---

## ARTS-3413 (3) Lithography 1

Introduces the study of stone and metal plate lithography, emphasizing individual creative development in black and white and further development in color printing processes. May be repeated up to 6 total credit hours. Not available to freshmen. Taught with ARTS 4413/5413. Prerequisites: Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

College of Arts & Sciences Art & Art History Printmaking

---

---

## ARTS-3423 (3) Screen Printing 1

Introduces the study of silkscreen techniques, emphasizing creativity, individual development, and experimentation in contemporary silkscreen processes. May be repeated up to 6 total credit hours. Not available to freshmen.

College of Arts & Sciences Art & Art History Printmaking

---

---

## ARTS-3504 (3) Sculpture 3: Experiments 1

Explores materials, methods, and techniques through a series of assignments emphasizing individual ideas and their relationship to contemporary aesthetics. Prereqs., ARTS 2504 and 2524. Prerequisites: Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

College of Arts & Sciences Art & Art History Sculpture

---

---

## ARTS-3514 (3) Sculpture 3: Experiments 2

Explores individual concepts and ideas and their relationship to contemporary issues and aesthetics. a series of assignments are worked out with the instructor based on individual interest. Prereq., ARTS 3504. Prerequisites: Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

College of Arts & Sciences Art & Art History Sculpture

---

---

## ARTS-3702 (3) Special Focus in Painting and Drawing

Offers varied focus and special topics in painting, drawing, and related media to explore specialized directions and creative possibilities. Emphasizes experimentation. Content varies by semester; contact individual instructor for more information. May be repeated up to 6 total credit hours. Prereq., ARTS 2002 or 2202. Recommended prereq., ARTS 3002 or 3202.

College of Arts & Sciences Art & Art History Painting/Drawing

---

---

---

## ARTS-3841 (1-3) Undergraduate Independent Study---Photography

Reserved only for special projects in photography, not offered in the curriculum. May be repeated up to 6 total credit hours. Prereq., ARTS 3191 or 4161. Requires a detailed proposal, instructor's signature, and departmental approval.

College of Arts & Sciences Art & Art History Photography

---

## ARTS-3842 (1-3) Undergraduate Independent Study---Painting

Reserved for special projects in painting not offered in the curriculum. May be repeated up to 6 total credit hours. Prereqs., ARTS 3202 and instructor consent. Requires a detailed proposal, instructor's sponsorship, and departmental approval.

College of Arts & Sciences Art & Art History Painting/Drawing

---

## ARTS-3845 (1-3) Undergraduate Independent Study---Ceramics

Reserved for special projects in ceramics not offered in the curriculum. May be repeated up to 6 total credit hours. Prereq., ARTS 3085 and instructor consent. Requires a detailed proposal, instructor's sponsorship, and departmental approval.

College of Arts & Sciences Art & Art History Ceramics

---

## ARTS-3847 (1-3) Independent Study

Reserved for special projects not offered in the curriculum. May be repeated up to 6 total credit hours. Prereq., detailed proposal, instructor sponsorship, and departmental approval.

College of Arts & Sciences Art & Art History Seminars/Special Topics

---

## ARTS-3906 (1-3) Undergraduate Independent Study---Video

Reserved for special projects in video not offered in the curriculum. May be repeated up to 6 total credit hours. Prereq., ARTS 4246 and instructor consent. Requires a detailed proposal, instructor's sponsorship, and departmental approval.

College of Arts & Sciences Art & Art History Media Arts

---

## ARTS-3937 (1-6) Internship

Gives upper-division students the opportunity to work in public or private organizations on assignments relating to their career goals, and allows them to explore the relationship between theory and practice in their major. May be repeated up to 6 total credit hours.

---

Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

College of Arts & Sciences Art & Art History Seminars/Special Topics

---

## ARTS-4002 (3) Advanced Drawing/Portfolio

Continuation of Drawing 3. Advanced studio class in drawing for creative expression and individual portfolio development. Emphasis varies by semester; contact individual instructor for more information. May be repeated up to 12 total credit hours. Prereq., ARTS 3002. Prerequisites: Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

College of Arts & Sciences Art & Art History Painting/Drawing

---

## ARTS-4017 (1-3) Special Topics in Studio Arts

Introduces timely subjects in studio art courses that cannot be offered on a regular basis. Information on topics in any given semester is available prior to pre-registration in departmental office. May be repeated up to 18 total credit hours. Prereq., ARTS 1010, 1020 and Arth 1300 or 1400. Restricted to juniors and seniors. Same as ARTS 5017. Prerequisites: Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

College of Arts & Sciences Art & Art History Seminars/Special Topics

---

## ARTS-4085 (3) Ceramics 4

Includes lectures, research, and experimentation in clay (wheel and hand construction techniques). May be repeated up to 12 total credit hours. Prereq., ARTS 3085. Prerequisites: Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

College of Arts & Sciences Art & Art History Ceramics

---

## ARTS-4087 (3) Selected Topics in Contemporary Art

Selectively studies significant areas of visual art of the last decade including major critical opinions. May be repeated up to 6 total credit hours. Prereq., 20 hours of ARTS or ARTH courses. Same as ARTS 5087.

College of Arts & Sciences Art & Art History Seminars/Special Topics

---

## ARTS-4095 (3) Special Topics in Ceramics

Designed for students majoring in ceramics. May be repeated up to 9 total credit hours. Taught with ARTS 5095. Prereq., ARTS 3085. Restricted to majors. Prerequisites: Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

College of Arts & Sciences Art & Art History Ceramics

---

---

## ARTS-4097 (1-3) Special Topics---Non-Studio

Introduces timely subjects in the visual arts that cannot be offered on a regular basis. Information concerning the topics offered in any given semester is available prior to preregistration from the fine arts department. May be repeated up to 6 total credit hours. Prereqs., ARTS 1010, 1020 and ARTH 1300 or 1400. Same as ARTS 5097. Prerequisites: Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

College of Arts & Sciences | Art & Art History | Seminars/Special Topics

---

## ARTS-4104 (3) Performance/Installation

Primarily focuses upon personal imagery as a live situation occurring in either an invented constructed reality or real environment. Work may be individual or group configuration, and may also take on the visual linguistic form of a solo performance or of a multimedia presentation. Prereqs., ARTS 1010, 1020 and ARTH 1300 or 1400. May be repeated up to 6 total credit hours with instructor consent. Same as ARTS 5104. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

College of Arts & Sciences | Art & Art History | Sculpture

---

## ARTS-4107 (1-3) Special Topics

May be repeated up to 3 total credit hours.

College of Arts & Sciences | Art & Art History | Seminars/Special Topics

---

## ARTS-4117 (3) BFA Seminar

For students intending to pursue graduate work and/or a professional career in art. Emphasizes the development of a critical overview of their work and interests and how they relate to the problems of professional activity. Restricted to Studio Arts (AASF) majors only. Prerequisites: Restricted to Studio Arts (AASF) majors only.

College of Arts & Sciences | Art & Art History | Seminars/Special Topics

---

## ARTS-4118 (3) Visiting Artist Program

Artists of national and international reputation, interacting with graduate and advanced undergraduate students, discuss their studio work at seminar meetings and at public lectures or events. Provides continuous input of significant developments and a comprehensive view of contemporary issues in the arts. May be repeated up to 6 total credit hours. Prereq., portfolio review for undergraduates and senior standing. Same as ARTS 5118. Prerequisites: Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

College of Arts & Sciences | Art & Art History | Visiting Artist Program

---

ARTS

### ARTS-4126 (3) Digital Art 2

Offers studio experience using personal computer in the generation and processing of imagery in the visual arts. Prereq., ARTS 2126. Same as ARTS 5126. Prerequisites: Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

[College of Arts & Sciences](#) [Art & Art History](#) [Media Arts](#)

### ARTS-4127 (3) Art from Nature

Provides an opportunity for advanced students to create nature based art. Studio work and/or appropriate on-site works will be generated through readings and individual and group experiences of nature. Prereq., one 4000 level studio course. Same as ARTS 5127.

[College of Arts & Sciences](#) [Art & Art History](#) [Seminars/Special Topics](#)

### ARTS-4130 (3) Integrated Media

Encourages experimentation with media and integration of traditional areas of drawing, painting, sculpture, and photography. Covers two- and three-dimensional collage/assemblage, correspondence art, artist's books, site-specific, performance, audio, and video art. Same as ARTS 5130.

[College of Arts & Sciences](#) [Art & Art History](#) [Integrated Arts](#)

### ARTS-4161 (3) Photography 4

Explores advanced techniques and concepts of photography as art. Emphasizes photography as a means to formal and expressive ends. May be repeated up to 12 total credit hours. Prereq., ARTS 3191. . Prerequisites: Restricted to Studio Arts (AASA or AASF) or Art History

---

(AAAH) majors only.

College of Arts & Sciences Art & Art History Photography

---

## ARTS-4171 (3) New Directions in Photography

Investigates the use of the photographic image in new, antique, or nonstandard ways including nonsilver, photosculpture, various color processes, photolanguage, photoinstallations, electronic media, performance, filmmaking, electrostatic art (copy machine), photobooks, photocollage, and audio/visual art. Course content changes each semester. May be repeated up to 9 total credit hours. Prereq., ARTS 3191 or equivalent. Same as ARTS 5171. Prerequisites: Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

College of Arts & Sciences Art & Art History Photography

---

## ARTS-4176 (3) New Directions in Digital Art

Investigates the use of digital art in various contexts including digital narrative, web publishing, Internet art, multimedia performance, animation, conceptual art, information art, sound art, language art, and network installations. Prereqs., ARTS 2126 and 4316/5316 or instructor consent. Same as ARTS 5176. Prerequisites: Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

College of Arts & Sciences Art & Art History Media Arts

---

## ARTS-4196 (3) Advanced Photo-Imaging

Offers an in-depth exploration of digital imaging in the context of the history, aesthetics, and tradition of photography as contemporary art. Emphasis is on digital manipulation, output, and individual growth and development. Prereq., ARTS 2191 or advanced standing in photography or media arts. Same as ARTS 5196.

College of Arts & Sciences Art & Art History Media Arts

---

## ARTS-4202 (3) Advanced Painting/Portfolio

Continuation of Painting 3. Advanced studio class in painting for creative expression and individual portfolio development. Emphasis varies by semester; contact individual instructor for more information. May be repeated up to 12 total credit hours. Prereq., ARTS 3202. Prerequisites: Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

College of Arts & Sciences Art & Art History Painting/Drawing

---

## ARTS-4226 (3) Advanced Computer Imaging

Explores advanced techniques and concepts of digital image-making. Emphasizes the creative application of computer imaging in the production of visual art through individual projects. Prereq., ARTS 4126. Restricted to junior or senior ARTS or ARTH majors. Same as ARTS 5226.

College of Arts & Sciences Art & Art History Media Arts

---

---

---

## ARTS-4236 (3) Electronic Arts Survey 2

Continuation of electronic arts survey. Explores the development of video as an art form. Prerequisite for further studies in video production. Same as ARTS 5236.

College of Arts & Sciences Art & Art History Media Arts

---

## ARTS-4246 (3) Beginning Video Production

Presents a studio course on basic single camera video production strategies and concepts. Through class screenings, projects, demonstrations, discussions, and readings, students gain an introductory familiarity with camera, lighting, sound, editing and the organization and planning involved in a video project. Explores a basic theoretical understanding of video as an art form and its relationship to television, film, art, history, culture. Prereqs., ARTS 1010, 1020 and ARTH 1300 or 1400 or instructor consent. Same as ARTS 5246 and FILM 4240. Prerequisites: Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

College of Arts & Sciences Art & Art History Media Arts

---

## ARTS-4316 (3) History and Theory of Digital Art

Explores the history and theory of digital art. Discussion topics include the emergence of Internet art, hypertext, new media theory, online exhibitions, web publishing, virtual reality, and the networked interface. Includes collaborative and individual projects. Prereq., ARTS 2126 or instructor consent. Same as ARTS 5316. Prerequisites: Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

College of Arts & Sciences Art & Art History Media Arts

---

## ARTS-4346 (3) Intermediate Video Production

Continuation of beginning video production. Extends the knowledge of single camera video production strategies and concepts. Expands the concept of montage (editing) and strategies to develop a video project through class screenings, projects, discussions, and readings. Further theoretical understanding of video as an art form. Prereq., ARTS 4246 or instructor consent. Same as ARTS 5346 and FILM 4340.

College of Arts & Sciences Art & Art History Media Arts

---

## ARTS-4403 (3) Intaglio and Relief 2

Continues the study and experimentation of intaglio and relief processes in black and white, color, digital imagery, and nontoxic processes as much as possible. May be repeated up to 12 total credit hours. Prereq., ARTS 3403. Taught with ARTS 3403/5403. Prerequisites: Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

---

---

College of Arts & Sciences Art & Art History Printmaking

---

## ARTS-4413 (3) Lithography 2

Continues the study of stone and metal plate lithography, emphasizing individual creative development in black and white, and further development in color printing processes. In addition, digital imaging and nontoxic processes are emphasized as much as possible. May be repeated up to 12 total credit hours. Prereq., ARTS 3413. Taught with ARTS 3413/5413. Prerequisites: Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

College of Arts & Sciences Art & Art History Printmaking

---

## ARTS-4423 (3) Screen Printing 2

Introduces advanced screen printing technology, emphasizing individual creativity and the ability to resolve problems of two-dimensional form. May be repeated up to 12 total credit hours. Prereq., ARTS 3423.

College of Arts & Sciences Art & Art History Printmaking

---

## ARTS-4433 (3) Alternative Printmaking (Non-Toxic)

Introduces computer-generated imaging and developing ideas as related to traditional forms of printmaking. Emphasizes original development of ideas and skills involved in learning advanced printing processes in lithography and intaglio media. May be repeated up to 12 total credit hours. Same as ARTS 5433. Prerequisites: Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

College of Arts & Sciences Art & Art History Printmaking

---

## ARTS-4446 (3) Advanced Video Production

Continuation of intermediate video production. Explores advanced technical skills to control the quality of the video image in production, postproduction, and distribution. Emphasizes self-motivated independent projects, conceptual realization of advanced student work and basic working knowledge of distribution and life as a media artist. Promotes further theoretical understanding of video as an art form. May be repeated up to 9 total credit hours. Prereq., ARTS 4346 or instructor consent. Same as ARTS 5446 & FILM 4440.

College of Arts & Sciences Art & Art History Media Arts

---

## ARTS-4453 (3) Monotype Printing

Introduces monotype printing, with the uniqueness and diversity of its methods of producing art. The process uses some of the best qualities of painting, print making, and drawing. Emphasizes creative individual development, along with processes inherent to this media. May be repeated up to 6 credit hours. Same as ARTS 5453.

College of Arts & Sciences Art & Art History Printmaking

---

---

## ARTS-4504 (3) Advanced Sculpture Studio

Individual studies in selected media. May be repeated up to 6 total credit hours. Prereqs., ARTS 3504 and 3514. Prerequisites: Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

College of Arts & Sciences Art & Art History Sculpture

---

---

## ARTS-4717 (1-3) Studio Critique

Consists of consultations with faculty on individual studio problems and projects. May be repeated up to 6 total credit hours. Prereqs., junior standing and instructor consent. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

College of Arts & Sciences Art & Art History Seminars/Special Topics

---

---

## ARTS-5017 (1-3) Special Topics in Studio Arts

May be repeated up to 6 total credit hours. Same as ARTS 4017. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Art & Art History Seminars/Special Topics

---

---

## ARTS-5075 (3) Graduate Ceramics

May be repeated up to 18 total credit hours. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Art & Art History Ceramics

---

---

## ARTS-5087 (3) Selected Topics in Contemporary Art

Same as ARTS 4087. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Art & Art History Seminars/Special Topics

---

---

## ARTS-5095 (3) Graduate Special Topics in Ceramics

Taught with ARTS 4095. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Art & Art History Ceramics

## ARTS-5104 (3) Graduate Performance/Installation

May be repeated up to 6 total credit hours with instructor consent. Same as ARTS 4104. Prerequisites: Restricted to Graduate Students only.

[College of Arts & Sciences](#) [Art & Art History](#) [Sculpture](#)

## ARTS-5107 (1-3) Special Topics

May be repeated up to 7 total credit hours.

[College of Arts & Sciences](#) [Art & Art History](#) [Seminars/Special Topics](#)

## ARTS-5117 (3) Graduate Art Seminar

Prerequisites: Restricted to Graduate Students only.

[College of Arts & Sciences](#) [Art & Art History](#) [Seminars/Special Topics](#)

## ARTS-5118 (3) Graduate Visiting Artist Program

Same as ARTS 4118. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Art & Art History | Visiting Artist Program

---

---

## ARTS-5126 (3) Graduate Digital Art 2

Same as ARTS 4126. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Art & Art History | Media Arts

---

---

## ARTS-5127 (3) Art from Nature

Same as ARTS 4127.

College of Arts & Sciences | Art & Art History | Seminars/Special Topics

---

---

## ARTS-5130 (3) Integrated Media

Same as ARTS 4130.

College of Arts & Sciences | Art & Art History | Integrated Arts

---

---

## ARTS-5140 (3) Integrated Arts Studio

Explores the creative process through a series of conceptually-based studio exercises. Students are encouraged to work across traditional media boundaries as they address themes such as identity, place, spirituality, politics, and consumerism. Includes individual and collaborative studio projects, as well as reading and writing about the course themes. May be repeated up to 9 total credit hours.

College of Arts & Sciences | Art & Art History | Integrated Arts

---

---

## ARTS-5150 (3) Graduate Integrated Arts

Investigates the conjunction of interdisciplinary concepts in the creation of art. Looks beyond traditional media to new sources for art-making. A curious intellect, combined with exceptional research skills, will be the basis for original writing and rigorous discussion.

College of Arts & Sciences | Art & Art History | Integrated Arts

---

---

---

## ARTS-5161 (3) Graduate Photography

May be repeated up to 18 total credit hours.

College of Arts & Sciences | Art & Art History | Photography

---

---

## ARTS-5171 (3) New Directions in Photography

May be repeated up to 9 total credit hours. Same as ARTS 4171. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Art & Art History | Photography

---

---

## ARTS-5176 (3) Graduate New Directions in Digital Art

Same as ARTS 4176. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Art & Art History | Media Arts

---

---

## ARTS-5191 (3) Digital Photography in Mongolia

Same as ARTS 4191.

College of Arts & Sciences | Art & Art History | Photography

---

---

## ARTS-5196 (3) Graduate Advanced Photo-Imaging

Same as ARTS 4196.

College of Arts & Sciences | Art & Art History | Media Arts

---

---

## ARTS-5202 (3) Graduate Painting

May be repeated up to 18 total credit hours. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Art & Art History | Painting/Drawing

---

---

## ARTS-5226 (3) Graduate Advanced Computer Imaging

May be repeated up to 6 total credit hours. Prereq., ARTS 5126. Same as ARTS 4226.

---

---

College of Arts & Sciences Art & Art History Media Arts

---

---

## ARTS-5236 (3) Graduate Electronic Arts Survey 2

Same as ARTS 4236.

College of Arts & Sciences Art & Art History Media Arts

---

---

## ARTS-5246 (3) Graduate Beginning Video Production

Same as ARTS 4246. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Art & Art History Media Arts

---

---

## ARTS-5316 (3) Graduate History and Theory of Digital Arts

Same as ARTS 4316. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Art & Art History Media Arts

---

---

## ARTS-5346 (3) Graduate Intermediate Video Production

Prereq., ARTS 4246/5246. Same as ARTS 4346. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Art & Art History Media Arts

---

---

## ARTS-5403 (3) Graduate Intaglio and Relief

May be repeated up to 18 total credit hours. Taught with ARTS 3403/4403. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Art & Art History Printmaking

---

---

## ARTS-5413 (3) Graduate Lithography

May be repeated up to 18 total credit hours. Taught with ARTS 3413/4413. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Art & Art History Printmaking

---

---

## ARTS-5423 (3) Graduate Screen Printing

May be repeated up to 18 total credit hours. Prerequisites: Restricted to Graduate Students only.

[College of Arts & Sciences](#) [Art & Art History](#) [Printmaking](#)

---

## ARTS-5433 (3) Graduate Alternative Printmaking (Non-Toxic)

May be repeated up to 12 total credit hours. Same as ARTS 4433. Prerequisites: Restricted to Graduate Students only.

ASEN

## ASEN-1000 (1) Introduction to Aerospace Engineering Sciences

Introduces aerospace history, curriculum, ethics, and the many areas of emphasis within aerospace engineering. Academic and industry speakers are invited to address various aerospace topics. Prerequisites: Restricted to students with 0-26 credits (Freshmen) Aerospace Engineering (ASEN) or Engineering Open Option majors only.

[College of Engineering & Applied Science](#)
[Aerospace Engineering](#)
[Aerospace Design & System Engr](#)

## ASEN-1400 (3) Gateway to Space

Introduces the basics of atmosphere and space sciences, space exploration, spacecraft design, rocketry, and orbits. Students design, build, and launch a miniature satellite on a high altitude balloon. Explores the current research in space through lectures from industry. Formerly ASEN 2500. Same as ASTR 2500. Prerequisites: Restricted to students with 0-26 credits (Freshmen) Aerospace Engineering (ASEN) majors only.

[College of Engineering & Applied Science](#)
[Aerospace Engineering](#)
[Aerospace Design & System Engr](#)

## ASEN-2001 (4) Aerospace 1: Introduction to Statics, Structures, and Materials

Introduces models and analytical/numerical methods for statics and structural analysis. Topics include force/moment equilibrium, truss analysis, beam theory, stress/strain, failure criteria, and structural design. Matlab proficiency required. Prereqs., APPM 1360, GEEN 1300 or CSCI 1300 or ECEN 1030 and PHYS 1110 (min. grade C). Coreq., ASEN 2002, 2012 or APPM 2350. Offered fall only. Prerequisites: Restricted to Aerospace Engineering majors only.

[College of Engineering & Applied Science](#)
[Aerospace Engineering](#)
[Structures, Mat, & Struc Dynam](#)

## ASEN-2002 (4) Aerospace 2: Introduction to Thermodynamics and Aerodynamics

Introduces the fundamental principals and concepts of thermodynamics and fluid dynamic systems. Emphasizes the synthesis of basic science (physics), mathematics, and experimental methods that form the basis for quantitative and qualitative analyses of general aerospace technology systems. Proficiency in Matlab required. Prereqs., APPM 1360, GEEN 1300, CSCI 1300, or ECEN 1030 and PHYS 1110 (min. grade C). Coreqs., ASEN 2001, 2012 and APPM 2350. Offered fall only. Prerequisites: Restricted to Aerospace Engineering majors only.

[College of Engineering & Applied Science](#) [Aerospace Engineering](#) [Aerodynamics & Fluid Mechanics](#)

---

## ASEN-2003 (5) Aerospace 3: Introduction to Dynamics and Systems

Introduces the principles of particle and planar rigid body dynamics, systems, and controls. Topics include kinematics, kinetics, momentum and energy methods, system modeling, and simple feedback control. Class includes experimental and design laboratory exercises for aerospace applications of dynamic principles. Prereqs., ASEN 2001 and APPM 2350 (min. grade C). Coreq., APPM 2360. Offered spring only. Prerequisites: Restricted to Aerospace Engineering majors only.

[College of Engineering & Applied Science](#) [Aerospace Engineering](#) [Systems and Control](#)

---

## ASEN-2004 (5) Aerospace 4: Aerospace Vehicle Design and Performance

Introduction to design and analysis of aircraft and spacecraft. Aircraft topics include cruise performance, wing design, propulsion, stability, control, and structures. Spacecraft topics includerocket staging, orbit selection, launch systems, and spacecraft subsystems. Includes laboratory experiments and team design exercises. Prereqs., ASEN 2001, 2002 and APPM 2350 (min. grade C). Offered spring only. Prerequisites: Restricted to Aerospace Engineering majors only.

[College of Engineering & Applied Science](#) [Aerospace Engineering](#) [Aerospace Design & System Engr](#)

---

## ASEN-2012 (2) Experimental and Computational Methods in Aerospace Engineering Sciences

Introduces statistical, experimental, and computational methods used in aerospace engineering sciences. Usage of MatLab is extensive. Coreq., ASEN 2001 and 2002. Prereq., GEEN 1300 or CSCI 1300 or ECEN 1030. Restricted to Aerospace Engineering majors only. Prerequisites: Restricted to Aerospace Engineering majors only.

[College of Engineering & Applied Science](#) [Aerospace Engineering](#) [Aerospace Design & System Engr](#)

---

## ASEN-2519 (1-6) Special Topics

Studies specialized aspects of the aerospace engineering sciences or innovative treatment of required subject matter at the lower-division level. Course content is indicated in the online SchedulePlanner. Prereq., varies. Restricted to Engineering students.

[College of Engineering & Applied Science](#) [Aerospace Engineering](#) [Specialized Courses](#)

---

---

## ASEN-2849 (1-3) Independent Study

Study of special projects agreed upon by student and instructor. May be repeated up to 9 total credit hours. Prereq., instructor consent.

College of Engineering & Applied Science Aerospace Engineering Specialized Courses

---

## ASEN-3036 (3) Introduction to Human Spaceflight

Introduces students to the challenges of human space flight. Historical and current space programs and spacecraft are discussed with emphasis on those systems specific to sustaining human crews. Other topics include space environment with respect to sustaining human life and health, physiological and psychological concerns in a space habitat, astronaut selection and training, anomalies, mission operations motivation, costs rationale for human space exploration, and future program directions. Not accepted as a technical elective for engineering majors.

College of Engineering & Applied Science Aerospace Engineering Bioastronautics & Microgravity

---

## ASEN-3046 (3) Introduction to Humans in Aviation

Investigates the history of manned aviation accomplished through a review of the history of flight, the physiological and psychological limitations facing aviators, and investigates the human related causal factors in aviation accidents. The course also looks at the social and economic impacts of aviation in modern society.

College of Engineering & Applied Science Aerospace Engineering Bioastronautics & Microgravity

---

## ASEN-3111 (4) Aerodynamics

Develops the fundamental concepts of aerodynamics and provides a working knowledge for their application to the design of aircraft and launch vehicles operating at various speeds and altitudes, as well as the atmospheric forces on satellites. Prereqs., APPM 2350, ASEN 2002 and 2004 (min. grade C). Restricted to ASEN majors. Offered fall only. Prerequisites: Restricted to Aerospace Engineering majors only.

College of Engineering & Applied Science Aerospace Engineering Aerodynamics & Fluid Mechanics

---

## ASEN-3112 (4) Structures

Teaches Mechanics of Materials methods of stress and deformation analysis applicable to the design and verification of aircraft and space structures. It offers an introduction to matrix and finite element methods for truss structures, and to mechanical vibrations. Prereq., ASEN 2001, 2003, 2004, and APPM 2360 (min. grade C). Restricted to ASEN majors. Offered fall only. Prerequisites: Restricted to Aerospace Engineering majors only.

College of Engineering & Applied Science Aerospace Engineering Structures, Mat, & Struc Dynam

---

---

## ASEN-3113 (4) Thermodynamics and Heat Transfer

Focuses on the applications of the first and second laws of thermodynamics to control volumes and teaches the fundamental concepts of different modes of energy and heat transfer. Learn to use these concepts in gas dynamics, high-speed vehicle spacecraft design, environmental systems, and energy analysis. Prereqs., APPM 2350 and ASEN 2002 (min grade C). Offered fall only. Prerequisites: Restricted to Aerospace Engineering majors only.

College of Engineering & Applied Science   Aerospace Engineering   Thermodynamics and Propulsion

---

## ASEN-3116 (3) Introduction to Biomedical Engineering

Addresses human responses to environment and physical stimuli. Makes use of engineering and physical principles in the study of human dynamics, arriving at reasonable solutions to 15 major areas of biomedical consent. Prereq., instructor consent.

College of Engineering & Applied Science   Aerospace Engineering   Bioastronautics & Microgravity

---

## ASEN-3128 (4) Aircraft Dynamics

Develops the fundamental concepts of aircraft dynamics. Covers flight mechanics, performance, dynamics and control of aircraft, and how they impact aircraft design. Prereqs., ASEN 2002, 2003, 2004, and APPM 2360 (min. grade C). Restricted to ASEN majors. Offered spring only. Prerequisites: Restricted to Aerospace Engineering majors only.

College of Engineering & Applied Science   Aerospace Engineering   Aerospace Design & System Engr

---

## ASEN-3200 (4) Orbital Mechanics/Attitude Dynamics and Control

Presents the fundamentals of orbital mechanics, 3D rigid body dynamics, and satellite attitude dynamics and controls. Prereqs., ASEN 2003, 2004, and APPM 2360 (min. grade C). Restricted to ASEN majors. Offered spring only. Prerequisites: Restricted to Aerospace Engineering majors only.

College of Engineering & Applied Science   Aerospace Engineering   Astrodynamics & Orbital Mech

---

## ASEN-3300 (4) Aerospace Electronics and Communications

Provides the fundamentals of electronics and communications widely used in aerospace engineering. Includes analog instrumentation electronics, data acquisition, digital electronics, and radio communication. Prereqs., ASEN 2003, PHYS 1120, and APPM 2360 (min grade C). Offered spring only. Prerequisites: Restricted to Aerospace Engineering majors only.

College of Engineering & Applied Science   Aerospace Engineering   Systems and Control

---

## ASEN-3519 (1-4) Special Topics

Studies specialized aspects of the aerospace engineering sciences or innovative treatment of required subject matter at the upper-division level. Course content is indicated in the online SchedulePlanner. Prereq., varies. Prerequisites: Restricted to College of

---

Engineering majors only.

[College of Engineering & Applied Science](#) [Aerospace Engineering](#) [Specialized Courses](#)

---

## ASEN-3930 (6) Aerospace Engineering Cooperative Education

Students will participate in a previously arranged, department-sponsored cooperative education program with a government agency or industry. Recommended prereq., GPA above 3.0. Restricted to juniors/seniors majors.

[College of Engineering & Applied Science](#) [Aerospace Engineering](#) [Specialized Courses](#)

---

## ASEN-4010 (3) Introduction to Space Dynamics

Includes central force fields, satellite orbits, rocket dynamics, orbital transfer, interplanetary mission analysis, and perturbation due to atmospheric drag and Earth oblateness. Prereq., ASEN 3200 or equivalent, or instructor consent required. Prerequisites: Requires pre-requisite course of ASEN 3200. Restricted to Aerospace Engineering majors only.

[College of Engineering & Applied Science](#) [Aerospace Engineering](#) [Astrodynamics & Orbital Mech](#)

---

## ASEN-4012 (3) Aerospace Materials

Studies aerospace grade aluminum, magnesium, nickel, and titanium alloys. Covers heat treatment, defect structures, failure mechanisms, corrosion and its prevention, the effect of space radiation on materials, and high and low temperature effects. Introduces composite materials with a lab design and experiment. Emphasizes the selection of materials in design with procedures for choosing materials rationally. Case studies include aerogels, carbides, composites, powder metallurgy, nanomaterials, and advanced materials manufacturing technologies. Prereq., ASEN 2001 or instructor consent. Prerequisites: Requires pre-requisite course of ASEN 2001.

[College of Engineering & Applied Science](#) [Aerospace Engineering](#) [Structures, Mat, & Struc Dynam](#)

---

## ASEN-4013 (3) Foundations of Propulsion

Describes aerothermodynamics and design of both rocket and air-breathing engines. Includes ramjets, turbojets, turbofans, and turboprop engines, as well as liquid, solid, and hybrid rockets. Prereqs., ASEN 3113 and APPM 2360 (min. grade C). Prerequisites: Restricted to College of Engineering majors only.

[College of Engineering & Applied Science](#) [Aerospace Engineering](#) [Thermodynamics and Propulsion](#)

---

## ASEN-4018 (4) Senior Projects 1: Design Synthesis

Focuses on the synthesis of technical knowledge, project management, design process, leadership, and communications within a team environment. Students progress through the design process beginning with requirements development, then preliminary design and culminating with critical design. Prereqs., ASEN 3111, 3112, 3113, 3128, 3200 and 3300 (min. grade C). Offered fall only. Prerequisites: Requires pre-requisite courses of ASEN, 3111, 3112, 3113, 3128, 3200, and 3300 (Minimum Grade C). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Aerospace Engineering (ASEN) majors only.

---

## ASEN-4028 (4) Senior Projects 2: Design Practicum

Focuses on the fabrication, integration, verification and validation of designs produced in ASEN 4018. Students work within the same teams from ASEN 4018. Prereq., ASEN 4018 (min. grade C) and instructor consent required. Restricted to ASEN majors. Offered spring only. Prerequisites: Requires pre-requisite course of ASEN 4018. Restricted to Aerospace Engineering majors only.

**Subject** **Number**

ASEN

### ASEN-4047 (3) Probability and Statistics for Aerospace Engineering Sciences

Considers probability concepts and theory for better design and control of aerospace engineering systems. Includes descriptive and inferential statistical methods for experimental analysis. Also covers discrete and continuous random variable distributions, estimators, confidence intervals, regression, analysis of variance, hypothesis testing, nonparametric statistics, random processes, and quality control, including software models of same. Prereq., junior or graduate standing or instructor consent. Same as ASEN 5047.

[College of Engineering & Applied Science](#) [Aerospace Engineering](#) [Computational & Analytic Meth](#)

### ASEN-4090 (3) Global Positioning Systems Applications

Focuses on GPS technology, software development, and applications. Lectures will cover the principal concepts used in GPS, and weekly laboratories will apply that knowledge. The course will culminate in student design projects using GPS. Prereqs., APPM 2360 and GEEN 1300 or equivalent. Recommended junior/senior standing in engineering.

[College of Engineering & Applied Science](#) [Aerospace Engineering](#) [Global Positioning Systems](#)

### ASEN-4114 (3) Automatic Control Systems

Methods of analysis and design of feedback control for dynamic systems. Covers Nyquist, Bode, and linear quadratic methods based on frequency domain and state space models. Laboratory experiments provide exposure to computation for simulation and real time control, and typical control system sensors and actuators. Prereqs., ASEN 3128 and 3200. Same as ASEN 5114. Prerequisites: Requires pre-requisite course of ASEN 3128.

[College of Engineering & Applied Science](#) [Aerospace Engineering](#) [Systems and Control](#)

---

## ASEN-4123 (3) Vibration Analysis

Highlights free and forced vibration of discrete and continuous systems. Examines Lagrange's equation, Fourier series, Laplace transforms, and matrix and computational methods. Applies knowledge to practical engineering problems. Prereq., MCEN 3030. MCEN 4123 and ASEN 4123 are the same course.

College of Engineering & Applied Science Aerospace Engineering Solids

---

## ASEN-4128 (3) Human Factors in Engineering and Design

Introduces the field of human factors engineering and investigates human psychological, physiological and performance limitations in complex systems and why it is vital for engineers to understand human operational limitations when designing complex systems. Course includes studies of real accidents caused by human error, good and bad designs, latent conditions and accident-producing designs. Goal is an understanding of how to conduct engineering design with consideration of human factors. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

College of Engineering & Applied Science Aerospace Engineering Aerospace Design & System Engr

---

## ASEN-4138 (3) Aircraft Design

Two lectures and one lab per week. Examines principles of aircraft configuration and design to meet given performance specifications, taking into account aerodynamic, stability and control, and flying quality considerations, as well as airworthiness regulations. Includes preliminary design of the major elements of an aircraft. Prereq., ASEN 3128. Restricted to ASEN majors. Prerequisites: Requires prerequisite course of ASEN 3128. Restricted to ASEN Majors only.

College of Engineering & Applied Science Aerospace Engineering Aerospace Design & System Engr

---

## ASEN-4148 (3) Spacecraft Design

Integrates the design elements and fundamental analyses necessary to complete the conceptual (Phase A) design of an unmanned spacecraft. Lecture and discussion explore mission design, propulsion, power, structure, thermal, attitude control, communication, command, and data handling and attitude control systems. The role of project management and systems engineering are examined. Resource estimating and lessons learned in satellite programs are reviewed. Restricted to senior ASEN majors or instructor consent required. Same as ASEN 5148. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Aerospace Engineering (ASEN) majors only.

College of Engineering & Applied Science Aerospace Engineering Aerospace Design & System Engr

---

## ASEN-4215 (3) Descriptive Physical Oceanography

Introduces descriptive and dynamical physical oceanography, focusing on the nature and dynamics of ocean currents and their role in the distribution of heat and other aspects of ocean physics related to the Earth's climate. Dynamical material limited to mathematical descriptions of oceanic physical systems. Restricted to seniors and graduate students. Same as ASEN 5215 and ATOC 4215. Prerequisites: Restricted to students with 87-180 credits (Seniors) or graduate students only.

College of Engineering & Applied Science Aerospace Engineering Atmospheric, Oceanic & Space S

---

---

---

## ASEN-4216 (3) Neural Signals and Functional Brain Imaging

Explores bioelectric and metabolic signals generated by the nervous system from two stand points: 1) their biophysical genesis and role in neural integration and 2) neurotechnologies such as electroencephalography, magnetoencephalography, deep brain stimulation, and functional magnetic resonance imaging. Prereqs., ECEN 2260 or 3030, ASEN 3300, or instructor consent. Same as ASEN 5216 and ECEN 4811. Prerequisites: Requires pre-requisite course of ASEN 3300 or ECEN 2260 or ECEN 3030.

College of Engineering & Applied Science | Aerospace Engineering | Bioastronautics & Microgravity

---

## ASEN-4218 (3) Large Space Structures Design

Develops the necessary structural analysis skills for conducting conceptual and preliminary designs of large space structures with a practical emphasis on structures considered by NASA over the past 20 years. Applies analysis skills to a broad range of space missions requiring large space structures, emphasizing low cost and practical design. Prereq., senior standing in ASEN or MCEN, or instructor consent. Same as ASEN 5218.

College of Engineering & Applied Science | Aerospace Engineering | Aerospace Design & System Engr

---

## ASEN-4222 (3) Materials Science for Composite Manufacturing

Studies common matrix materials and the modifications and improvements of properties which can be achieved by adding second phase reinforcements. Properties will be significantly affected by the design approach and by requirements, and by the procedure of adding reinforcements. Investigates polymer, ceramic and metallic materials. Explores manufacturing, fabrication and processing techniques. Evaluates future developments. Prereq., ASEN 3112 or equivalent, or instructor consent. Coreq., ASEN 4012 or instructor consent. Same as ASEN 5222. Prerequisites: Requires pre-requisite course of ASEN 3112 and pre-requisite or co-requisite course of ASEN 4012.

College of Engineering & Applied Science | Aerospace Engineering | Structures, Mat, & Struc Dynam

---

## ASEN-4238 (3) Computer-Aided Control Systems Design

Covers Matlab and Simulink software, and multivariable control system synthesis and analysis techniques for typical aerospace control problems. Students formulate control problems and synthesize control functions using lineage quadratic techniques. Includes numerical integration of differential equations and nonlinear simulation of orbit and attitude dynamics. Prereq., APPM 2360.

College of Engineering & Applied Science | Aerospace Engineering | Aerospace Design & System Engr

---

## ASEN-4248 (3) Computer-Aided Control System Design 2

Studies theory and engineering applications of Kalman filter techniques. Covers discrete and continuous filters, the extended Kalman filter, and their application to guidance, navigation, and control, including satellite orbit and attitude problems, inertial and control navigation, and the Global Positioning System. Prereq., ASEN 4238 or instructor consent. Prerequisites: ASEN 4248 PREREQ

---

---

## ASEN-4255 (3) Environmental Aerodynamics

a review of the properties and causes of hazards posed by the environment, ranging from atmospheric wind shear to tornadic flows. Involves a multidisciplinary approach combining analytical, numerical, scale modeling studies with extensive field measurements, wind energy, and biophysical aerodynamics. Prereq., senior standing in ASEN. Same as ASEN 5255.

## ASEN-4338 (3) Computer Analysis of Structures

Covers basic structural design concepts and finite element modeling techniques. Emphasizes use of finite element static and dynamic analysis to validate and refine an initial design. Introduces basic design optimization and tailoring. Proficiency in Matlab required. Prereq., ASEN 3112. Prerequisites: Requires pre-requisite courses of ASEN 3112

## ASEN-4426 (3) Neural Systems and Physiological Control

A biophysical exploration of human physiology from the standpoints of control systems and neural information processing. Topics include: neural control of movement and cardiovascular performance, tissue growth and repair, carcinogenesis, and physiological responses to microgravity. Prereqs., ECEN 2260 or 3030, ASEN 3300, or instructor consent. Same as ASEN 4426 and ECEN 4821/5821.

Prerequisites: Requires pre-requisite course of ASEN 3300 or ECEN 2260 or ECEN 3030

## ASEN-4436 (3) Brains, Minds, Computers

An introductory, integrative survey of brain science, cognitive science, artificial intelligence, and their interrelations. Considers central concepts and principles from each of these areas and the similarities and difference of brain, minds, computers, robots, etc. Same as ASEN 5436 and ECEN 4831/5831. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Engineering majors only.

## ASEN-4519 (1-3) Special Topics

Studies specialized aspects of the aerospace engineering sciences or innovative treatment of required subject matter at the upper-division level. Course content is indicated in the online Schedule Planner. Prereq., varies. Prerequisites: Restricted to College of Engineering majors only.

---

## ASEN-4849 (1-6) Independent Study

Special projects agreed upon by student and instructor. Instructor consent required.

College of Engineering & Applied Science Aerospace Engineering Specialized Courses

---

## ASEN-4859 (1-6) Undergraduate Research

Assigns a research problem on an individual basis. Instructor consent required.

College of Engineering & Applied Science Aerospace Engineering Specialized Courses

---

## ASEN-5007 (3) Introduction to Finite Elements

Introduces finite element methods used for solving linear problems in structural and continuum mechanics. Covers modeling, mathematical formulation, and computer implementation. Prereq., matrix algebra. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science Aerospace Engineering Structures, Mat, & Struc Dynam

---

## ASEN-5010 (3) Spacecraft Attitude Dynamics and Control

Includes rigid body kinematics and spacecraft attitude descriptions, torque-free attitude dynamics, static attitude determination, motion and stability due to gravity gradient torque and spinning craft, passive and active methods of attitude control, nonlinear regulator and attitude tracking feedback control laws. Prereq., ASEN 3200 or equivalent. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science Aerospace Engineering Astrodynamics & Orbital Mech

---

## ASEN-5012 (3) Mechanics of Aerospace Structures

Applies fundamental concepts of continuum mechanics, theory of elasticity, and energy methods to the analysis of structures. Prereqs., APPM 2360 and ASEN 2001, 2003, and 3112, or equivalent. Similar to MCEN 5023. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science Aerospace Engineering Structures, Mat, & Struc Dynam

---

## ASEN-5014 (3) Linear Control Systems

Introduces the theory of linear systems, including vector spaces, linear equations, structure of linear operators, state space descriptions of dynamic systems, and state feedback control methods. Prereq., ASEN 3200. Prerequisites: Restricted to College of Engineering

graduate students or Aerospace Engineering Concurrent Degree majors only.

[College of Engineering & Applied Science](#) [Aerospace Engineering](#) [Systems and Control](#)

## ASEN-5016 (3) Space Life Sciences

Familiarizes students with factors affecting living organisms in the reduced-gravity environment of space flight. Covers basic life support requirements, human physiological adaptations, and cellular-level gravity dependent processes with emphasis on technical writing and research proposal preparation. Prereq., graduate standing in engineering or senior with 3.25 GPA. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

ASEN

### ASEN-5018 (3) Graduate Projects I

Exposes MS and PhD students to project management and systems engineering disciplines while working a complex aerospace engineering project as part of a project team. The project team may perform some or all of the following project activities during this first semester of the two-semester course sequence: requirements, definition, design and design review, build, test, and verification.

Recommended prereqs., ASEN 4138, or 5148, or 5158.

[College of Engineering & Applied Science](#) [Aerospace Engineering](#) [Aerospace Design & System Engr](#)

### ASEN-5022 (3) Dynamics of Aerospace Structures

Applies concepts covered in undergraduate dynamics, structures, and mathematics to the dynamics of aerospace structural components, including methods of dynamic analysis, vibrational characteristics, vibration measurements, and dynamic stability. Prereqs., ASEN 5012, 5227, or equivalent. Recommended prereq., MATH 3130. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

[College of Engineering & Applied Science](#) [Aerospace Engineering](#) [Structures, Mat, & Struc Dynam](#)

### ASEN-5034 (3) Stochastic Methods for Systems Engineering

Same as ASEN 4034. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

[College of Engineering & Applied Science](#) [Aerospace Engineering](#) [Aerospace Design & System Engr](#)

### ASEN-5047 (3) Probability and Statistics for Aerospace Engineering

---

## Sciences

Same as ASEN 4047. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

[College of Engineering & Applied Science](#) [Aerospace Engineering](#) [Computational & Analytic Meth](#)

---

## ASEN-5050 (3) Space Flight Dynamics

Includes celestial mechanics, space navigation, and orbit determination; trajectory design and mission analysis trajectory requirements; and orbital transfer and rendezvous. Prereq., ASEN 3200 or instructor consent. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

[College of Engineering & Applied Science](#) [Aerospace Engineering](#) [Astrodynamics & Orbital Mech](#)

---

## ASEN-5051 (3) Fluid Mechanics

Highlights physical properties of gases and liquids; kinematics of flow fields; and equations describing viscous, heat-conducting Newtonian fluids. Emphasizes exact solutions and rational approximations for low and high speed dissipative flows, surface and internal waves, acoustics, stability, and potential flows. Prereq., instructor consent. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

[College of Engineering & Applied Science](#) [Aerospace Engineering](#) [Aerodynamics & Fluid Mechanics](#)

---

## ASEN-5053 (3) Rocket Propulsion

An in depth presentation of the theory, analysis, and design of rocket propulsion systems. Liquid and solid propellant systems are emphasized with an introduction to advanced propulsion concepts. Nozzle and fluid flow relationships are reviewed for background. Prereq., senior standing in ASEN or MCEN, or instructor consent. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

[College of Engineering & Applied Science](#) [Aerospace Engineering](#) [Thermodynamics and Propulsion](#)

---

## ASEN-5063 (3) Gas Turbine Propulsion

Designed to teach the theory, analysis and design of modern gas turbine engines used for aircraft propulsion. Will deal with cycle and performance analyses, and analysis and design of compressors, turbines, intakes, nozzles and combustors as well as component matching. Prereq., ASEN 4013 or equivalent. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

[College of Engineering & Applied Science](#) [Aerospace Engineering](#) [Thermodynamics and Propulsion](#)

---

## ASEN-5070 (3) Introduction to Statistical Orbit Determination 1

Develops the theory of batch and sequential (Kalman) filtering, including a review of necessary concepts of probability and statistics. Course work includes a term project that allows students to apply classroom theory to an actual satellite orbit determination problem.

---

Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

[College of Engineering & Applied Science](#) [Aerospace Engineering](#) [Astrodynamics & Orbital Mech](#)

---

## ASEN-5090 (3) Introduction to Global Navigation Satellite Systems

Global Navigation Satellite Systems (GNSS) are important tools for navigation, science, and engineering. Introduces GNSS hardware, signal structure, algorithms, error sources, and modeling techniques. Programming experience is required. Restricted to Engineering (ENGR) graduate students or Aerospace Engineering-Concurrent Degree (C-ASEN) students. Prerequisites: Restricted to Engineering (ENGR) graduate students or Aerospace Engineering-Concurrent Degree (C-ASEN) students.

[College of Engineering & Applied Science](#) [Aerospace Engineering](#) [Global Positioning Systems](#)

---

## ASEN-5111 (3) Introduction to Aeroelasticity

Introduces static and dynamic aeroelasticity of airfoils and wings. Covers the classical aeroelasticity theory and introduces computational methods for aeroelastic problems. Prereqs., ASEN 3111, MATH 3130, and MATH 4430, or equivalent, or instructor consent.

Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

[College of Engineering & Applied Science](#) [Aerospace Engineering](#) [Structures, Mat, & Struc Dynam](#)

---

## ASEN-5114 (3) Automatic Control Systems

Same as ASEN 4114. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

[College of Engineering & Applied Science](#) [Aerospace Engineering](#) [Systems and Control](#)

---

## ASEN-5116 (3) Spacecraft Life Support Systems

Provides a working knowledge of the systems needed to sustain human life in a spacecraft environment. Emphasis is on understanding functional requirements of a life support system; operational details of subsystem technologies; new concepts currently being considered in NASA's advanced programs; and conducting a technical trade study. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

[College of Engineering & Applied Science](#) [Aerospace Engineering](#) [Bioastronautics & Microgravity](#)

---

## ASEN-5122 (3) Control of Aerospace Structures 1

Introduces the basic problems in dynamic modeling and active control of large spacecraft and satellites. Includes system descriptions, model reduction, controller design, and closed-loop stability analysis. Prereq., ASEN 3200, graduate standing, or instructor consent.

Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

[College of Engineering & Applied Science](#) [Aerospace Engineering](#) [Structures, Mat, & Struc Dynam](#)

---

---

## ASEN-5148 (3) Spacecraft Design

Same as ASEN 4148. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Aerospace Engineering | Aerospace Design & System Engr

---

## ASEN-5151 (3) High Speed Aerodynamics

Provides aerodynamic theory applicable to the high speed flight of subsonic, transonic, and supersonic aircraft, and hypersonic vehicles. Topics include linear theory of subsonic and supersonic speeds, the nonlinear theories of transonic and hypersonic speeds, and compressible boundary layers. Prereq., graduate standing or instructor consent. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Aerospace Engineering | Aerodynamics & Fluid Mechanics

---

## ASEN-5158 (3) Space Habitat Design

Utilizes systems engineering methods for designing a spacecraft intended for human occupancy and provides a working knowledge of the technologies used to sustain life. Emphasis is placed on deriving functional requirements from stated mission objectives, developing integrated vehicle schematics, and comparing design options by trade study. Prereq., graduate standing in engineering or senior with 3.25 GPA. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Aerospace Engineering | Aerospace Design & System Engr

---

## ASEN-5168 (3) Remote Sensing Instrumentation Design

Reviews and makes a detailed analysis of satellite instrumentation techniques and systems to understand the components, limitations, and overall capabilities. Emphasis on optical systems with in-depth treatment of conventional radiometry. Introduces both passive and microwave methods. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Aerospace Engineering | Aerospace Design & System Engr

---

## ASEN-5188 (3) Space Systems Engineering

Develop an understanding and appreciation for the fundamentals and pragmatic principles of systems engineering and their application to space missions. This course establishes a working knowledge of the primary techniques systems engineers use to guide the development of complex systems, including: requirements development, system synthesis, good design practices, system optimization, exception handling, interface management and trade studies. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Aerospace Engineering | Aerospace Design & System Engr

---

---

## ASEN-5212 (3) Composite Structures and Materials

Develops the macromechanical and micromechanical theory of the elastic behavior and failure of composite laminates. Applies basic theory to a broad range of practical problems including the buckling and vibration of composite plates, columns, and shells. Prereq., senior standing in aerospace or mechanical engineering, or instructor consent. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science Aerospace Engineering Structures, Mat, & Struc Dynam

---

## ASEN-5215 (3) Descriptive Physical Oceanography

Same as ASEN 4215 and ATOC 5215. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science Aerospace Engineering Atmospheric, Oceanic & Space S

---

## ASEN-5216 (3) Neural Signals and Functional Brain Imaging

Same as ASEN 4216 and ECEN 5811. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science Aerospace Engineering Bioastronautics & Microgravity

---

## ASEN-5218 (3) Large Space Structures Design

Same as ASEN 4218. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science Aerospace Engineering Aerospace Design & System Engr

---

## ASEN-5222 (3) Materials Science for Composite Manufacturing

Prereqs., ASEN 3112 and 4012 or equivalent, or instructor consent. Same as ASEN 4222. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science Aerospace Engineering Structures, Mat, & Struc Dynam

---

## ASEN-5227 (3) Mathematics for Aerospace Engineering Sciences 1

Provides an introduction to the methods and mathematics of advanced engineering analysis tailored to aerospace engineering applications. Topics include vector and tensor calculus, ordinary differential equations, and an introduction to the calculus of variations. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science Aerospace Engineering Computational & Analytic Meth

---

ASEN

### [ASEN-5235 \(3\) Introduction to Atmospheric Radiative Transfer and Remote Sensing](#)

Examines fundamentals of radiative transfer and remote sensing with primary emphasis on the Earth's atmosphere; emission, absorption and scattering by molecules and particles; multiple scattering; polarization; radiometry and photometry; principles of inversion theory; extinction- and emission-based passive remote sensing; principles of active remote sensing; lidar and radar; additional applications such as the greenhouse effect and Earth's radiative energy budget. Same as ATOC 5235. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

[College of Engineering & Applied Science](#) [Aerospace Engineering](#) [Remote Sensing](#)

### [ASEN-5245 \(3\) Radar and Remote Sensing](#)

Examines active techniques of remote sensing, with emphasis on radar fundamentals, radar wave propagation, scattering processes, and radar measurement techniques and design. Examines specific radar systems and applications, such as synthetic aperture radar phased arrays for atmosphere, space, land, and sea applications. Restricted to seniors or graduate students in engineering. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

[College of Engineering & Applied Science](#) [Aerospace Engineering](#) [Remote Sensing](#)

### [ASEN-5255 \(3\) Environmental Aerodynamics](#)

Reviews the properties and causes of hazards posed by the environment, ranging from atmospheric wind shear to tornadic flows. Involves a multidisciplinary approach, combining analytical, numerical, and scale modeling studies with extensive field measurements, wind energy, and biophysical aerodynamics. Prereq., senior standing in aerospace engineering. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

[College of Engineering & Applied Science](#) [Aerospace Engineering](#) [Atmospheric, Oceanic & Space S](#)

---

## ASEN-5307 (3) Engineering Data Analysis Methods

Gives students broad exposure to a variety of traditional and modern statistical methods for filtering and analyzing data. Topics include estimation methods, principal component analyses and spectral analyses. Introduces these methods and provides practical experience with their use. Students carry out problem assignments. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science   Aerospace Engineering   Computational & Analytic Meth

---

## ASEN-5315 (3) Ocean Modeling

Introduces students to basic principles behind, and the current practices in, ocean modeling. Discusses different prevailing approaches. Offers students hands-on experience with the use of supercomputers and work stations for model running and pre- and post-processing. Prereqs., graduate standing or instructor consent. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science   Aerospace Engineering   Atmospheric, Oceanic & Space S

---

## ASEN-5325 (3) Small Scale Processes in Geophysical Fluids

Provides an overview of mixing and wave processes in the oceans and the atmosphere. Topics include turbulent boundary layers in the lower atmosphere and the upper ocean, air-sea interactions, and surface and internal waves. Prereq., graduate standing or instructor consent. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science   Aerospace Engineering   Atmospheric, Oceanic & Space S

---

## ASEN-5335 (3) Aerospace Environment

Examines the components of the solar-terrestrial system and their interactions to provide an understanding of the re-entry and orbital environments within which aerospace vehicles operate. Includes the sun, solar wind, magnetosphere, ionosphere, thermosphere, radiation belts, energetic particles, comparative environments (Mars, Venus, etc.), orbital debris, spacecraft charging, particle effects on systems, shielding, and satellite drag. Prereq., senior or graduate standing in engineering or related physical sciences. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science   Aerospace Engineering   Atmospheric, Oceanic & Space S

---

## ASEN-5347 (3) Math Methods in Dynamics

Two-part graduate-level course on dynamics. Covers both flexible and rigid multibody analytical dynamics and finite element method for dynamics. Emphasizes formulations that naturally lead to easy computer implementation and stability, linearization, and modern rotational kinematics. Prereqs., graduate standing and instructor consent. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science   Aerospace Engineering   Structures, Mat, & Struc Dynam

---

---

## ASEN-5417 (3) Numerical Methods for Differential Equations

Provides computational skills and basic knowledge of numerical methods for advanced courses in engineering/scientific computation using Fortran, C, or Matlab. Prereq., APPM 2360 and instructor consent. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science Aerospace Engineering Computational & Analytic Meth

---

## ASEN-5426 (3) Neural Systems and Physiological Control

Same as ASEN 4426 and ECEN 4821/5821. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science Aerospace Engineering Bioastronautics & Microgravity

---

## ASEN-5436 (3) Brains, Minds, Computers

Prereq., graduate standing. Same as ASEN 4436, ECEN 4831/5831. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science Aerospace Engineering Bioastronautics & Microgravity

---

## ASEN-5506 (1-2) Bioastronautics Seminar

Focuses on current topics related to space habitat systems design and research aimed at understanding the effects of spaceflight on living organisms ranging from humans down to microbes. Literature analysis and scientific presentations are expected. Emphasis is on biophysical mechanisms, comprehensive models, and related technology development. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science Aerospace Engineering Bioastronautics & Microgravity

---

## ASEN-5519 (1-3) Selected Topics

Reflects upon specialized aspects of aerospace engineering sciences. Course content is indicated in the online Class Search. Prereq., varies. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science Aerospace Engineering Specialized Courses

---

## ASEN-5849 (1-6) Independent Study

Study of special projects. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science Aerospace Engineering Specialized Courses

---

---

## ASEN-5940 (3-6) Engineering Research Internship

Grants credit to foreign visiting graduate students for conducting research within the Aerospace Engineering Sciences department. Credits can be transferred to the student's home institution. CU-Boulder students may also receive credit for conducting research outside of the university, either overseas or in the US. Restricted to students in final year of undergraduate work and graduate students from CU-Boulder or foreign institutions. Prerequisites: Restricted to Graduate Students only.

[College of Engineering & Applied Science](#) [Aerospace Engineering](#) [Specialized Courses](#)

---

## ASEN-6008 (3) Interplanetary Mission Design

Exploration of principles and methods related to the design and construction of trajectories for interplanetary mission design. Some topics covered include: two-and three-body motion, gravity assists, maneuver computation, navigation, numerical integration, and construction of orbits. The main focus is on simple ballistic mission designs, such as Galileo or Cassini, however, libration point trajectories will also be covered. Prereq., ASEN 5050 or instructor consent. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

[College of Engineering & Applied Science](#) [Aerospace Engineering](#) [Astrodynamics & Orbital Mech](#)

---

## ASEN-6009 (1-2) Special Topics Seminar

Presents research and developments in each department's focus areas. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

[College of Engineering & Applied Science](#) [Aerospace Engineering](#) [Specialized Courses](#)

---

## ASEN-6010 (3) Advanced Spacecraft Dynamics and Control

Studies the dynamic modeling and control of spacecraft containing multiple momentum exchange devices, and/or flexible spacecraft components. Will develop nonlinear feedback control algorithms, explore singularity avoidance strategies. The second half of the course derives analytical methods (D'Alembert's equations, Lagrange's equations, Boltzmann Hamel equations) to model a hybrid rigid/flexible spacecraft system. Restricted to Engineering (ENGR) graduate students or Aerospace Engineering-Concurrent Degree (C-ASEN) students. Prereq., ASEN 5010 or equivalent or instructor consent. Repeatable for credit up to 6 total credit hours. Prerequisites: Restricted to Engineering (ENGR) graduate students or Aerospace Engineering-Concurrent Degree (C-ASEN) students.

[College of Engineering & Applied Science](#) [Aerospace Engineering](#) [Astrodynamics & Orbital Mech](#)

---

## ASEN-6013 (3) High Speed Propulsion

Covers air-breathing and rocket propulsion cycles, their relative performance trade-offs, and how they fit within the context of a vehicle system. Specific emphasis will be placed on fundamental cycle analyses, component level design, and propulsion/airframe integration for rockets, turbojets, ramjets, scramjets, combined cycles, and other advanced propulsion concepts. Prereq., ASEN 4013 or instructor consent. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

[College of Engineering & Applied Science](#) [Aerospace Engineering](#) [Thermodynamics and Propulsion](#)

---

---

## ASEN-6014 (3) Spacecraft Formation Flying

Studies the dynamic modeling and control of spacecraft formations orbiting about a planet. Investigate linear and nonlinear relative motion descriptions, rectilinear and curvilinear coordinates, orbit element difference based descriptions, J2-invariant relative orbits, as well as Lyapunov-based relative motion control strategies. Prereq., ASEN 5050 or equivalent, or instructor consent. May be repeated up to 6 total credit hours.

College of Engineering & Applied Science Aerospace Engineering Systems and Control

---

## ASEN-6020 (3) Optimal Trajectories

Introduces the theory and practice of trajectory optimization. The general theory behind optimization and optimal control will be introduced with an emphasis on the properties of optimal trajectories. The main application will be to space trajectories, but other applications will also be considered. Prereq., ASEN 5050 or instructor consent. Recommended prereq., ASEN 5014. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science Aerospace Engineering Astrodynamics & Orbital Mech

---

## ASEN-6021 (3) Viscous Flow

Studies low Reynolds number flows, including incompressible and compressible laminar boundary layer theory; similarity theory; and separation, transition, and turbulent boundary layers. Prereq., ASEN 5051 or equivalent, or instructor consent. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science Aerospace Engineering Aerodynamics & Fluid Mechanics

---

## ASEN-6024 (3) Nonlinear Control Systems

Introduces the analysis and control design methods for nonlinear systems, including Lyapunov and Describing Function methods. Prereq., ASEN 5014. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science Aerospace Engineering Systems and Control

---

## ASEN-6028 (3) Graduate Projects II

Exposes MS and PhD students to leadership positions in project management and systems engineering while working a complex aerospace engineering project as part of a project team. The project team may perform some or all of the following project activities during this second semester of the two-semester course sequence: requirements definition, design and design review, build, test, and verification. Prereq., ASEN 5018. Recommended prereq., ASEN 4138, or 5148, or 5158. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science Aerospace Engineering Aerospace Design & System Engr

---

---

## ASEN-6037 (3) Turbulent Flows

Studies turbulent closure methods and computational procedures used to solve practical turbulent flows. Emphasizes multi-equation models used with time-averaged equations to calculate free-turbulent shear-flows and turbulent boundary layers. Employs spectral methods in direct and large-eddy simulation of turbulence. Prereq., ASEN 5051 or equivalent. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

ASEN

## ASEN-6060 (3) Advanced Astrodynamics

Covers Lagrangian and Hamiltonian formalisms for astrodynamics problems, the computation and characterization of space trajectories in highly dynamic environments, computation of periodic orbits, stability analysis of orbital motion, and development of analytical theories for dynamics. Prereq., ASEN 5050 or instructor consent. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

[College of Engineering & Applied Science](#) [Aerospace Engineering](#) [Astrodynamics & Orbital Mech](#)

## ASEN-6061 (3) Molecular Gas Dynamics and DSMC

Describes the composition and flow of gases on a microscopic level to examine the behavior of the molecules that make up a macroscopic flow system. Thermodynamic properties, transport phenomena, and the governing Boltzmann Equation are derived from molecular collision dynamics and the kinetic theory. The Direct Simulation Monte Carlo method is introduced with applications. Restricted to graduate students or instructor consent. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

[College of Engineering & Applied Science](#) [Aerospace Engineering](#) [Aerodynamics & Fluid Mechanics](#)

## ASEN-6070 (3) Satellite Geodesy

Focuses on the measurement of the Earth's gravitational field, rotational characteristics, and shape using Earth and space-based tracking of artificial satellites. Particular emphasis on satellite altimetry and satellite gravity measurements. Prereq., ASEN 3200 or instructor consent. Credit not granted for this course and ASEN 5060. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

[College of Engineering & Applied Science](#) [Aerospace Engineering](#) [Astrodynamics & Orbital Mech](#)

## ASEN-6080 (3) Introduction to Statistical Orbit Determination 2

Continuation of ASEN 5070. Emphasizes orthogonal transformation techniques such as Givens and Householder, square root filtering and smoothing, and considers covariance analysis. Also nonlinear filters and dynamic model compensation techniques. Requires term project that involves the application of many of the techniques required for precise orbit determination. Prereq., ASEN 5070. Formerly ASEN 5080. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

[College of Engineering & Applied Science](#) [Aerospace Engineering](#) [Astrodynamics & Orbital Mech](#)

---

## ASEN-6090 (3) Advanced Global Navigation Satellite Systems: Software and Applications

Focuses on high-precision applications of Global Navigation Satellite Systems (GNSS) and the software tools that are needed to achieve these precisions. Topics include precise orbital determination, reference frames, atmospheric delays, relativity, clock models, ambiguity resolution, and scientific applications. Prereq., ASEN 5090. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

[College of Engineering & Applied Science](#) [Aerospace Engineering](#) [Global Positioning Systems](#)

---

## ASEN-6091 (3) Global Navigation Satellite System (GNSS) Receiver Architecture

Investigates the overall architecture of satellite navigation receivers: including both the analog radio frequency conditioning (antenna to the analog-to-digital converter) and the various signal processing algorithms. Such treatment of the operation of the receiver will provide insight into the trade-offs that go into GNSS as well as the more broad generic spread spectrum receiver design. Recommended prereq., ASEN 5090. Prerequisites: Restricted to Graduate Students only.

[College of Engineering & Applied Science](#) [Aerospace Engineering](#) [Global Positioning Systems](#)

---

## ASEN-6107 (3) Nonlinear Finite Element Methods

Continuation of ASEN 5007. Covers the formulation and numerical solution of nonlinear static structural problems by finite element methods. Emphasizes the treatment of geometric nonlinearities and structural stability. Prereq., ASEN 5007. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

[College of Engineering & Applied Science](#) [Aerospace Engineering](#) [Specialized Courses](#)

---

## ASEN-6210 (1-3) Remote Sensing Seminar

Covers subjects pertinent to remote sensing of the Earth, including oceanography, meteorology, vegetation monitoring, and geology. Emphasizes techniques for extracting geophysical information from satellite data. Course requirement for Remote Sensing Certificate. Restricted to graduate students. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

[College of Engineering & Applied Science](#) [Aerospace Engineering](#) [Remote Sensing](#)

---

---

## ASEN-6220 (3) Topics in Remote Sensing

Covers infrared and microwave techniques for remote sensing, emphasizing oceanographic applications, fundamentals of electromagnetic radiation, remote sensing instrumentation (radars and radiometers), and conversion of sensory data to geophysical parameters, including sea surface topography, temperature, and atmospheric moisture. Prereq., graduate standing and instructor consent. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

[College of Engineering & Applied Science](#) [Aerospace Engineering](#) [Remote Sensing](#)

---

## ASEN-6327 (3) Computational Fluid Mechanics

Introduction to advanced computational methods for the solution of fluid mechanics problems on the computer with emphasis on nonlinear flow phenomena. Prereq., ASEN 5417 or instructor consent. Formerly ASEN 5327. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

[College of Engineering & Applied Science](#) [Aerospace Engineering](#) [Aerodynamics & Fluid Mechanics](#)

---

## ASEN-6337 (3) Remote Sensing Data Analysis

Reviews satellite remote sensing instrumentation and methods. Student teamwork involves real satellite data for applications in oceanography, atmospheric science, and terrestrial physics. Students develop problem-solving skills and use the internet to gather satellite and in situ data to address chosen problems. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

[College of Engineering & Applied Science](#) [Aerospace Engineering](#) [Remote Sensing](#)

---

## ASEN-6367 (3) Advanced Finite Element Methods for Plates, Shells, and Solids

Continues ASEN 5007. Covers more advanced FEM applications to linear static problems in structural and continuum mechanics. Focuses on modeling, formulation, and numerical solutions of problems modeled as plates, shells, and solids. Includes an overview of advanced variational formulations. Prereqs., introductory graduate level course in FEM and familiarity with linear algebra. Formerly ASEN 5367. Credit not granted for this course and ASEN 5367. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

[College of Engineering & Applied Science](#) [Aerospace Engineering](#) [Structures, Mat, & Struc Dynam](#)

---

## ASEN-6427 (3) Advanced Computational Fluid Dynamics

Introduces computational techniques particularly applicable to high-speed gas flows that contain shocks. Complicated numerical methods are developed from relatively simple numerical modules. Prereq., ASEN 5417 or instructor consent. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

[College of Engineering & Applied Science](#) [Aerospace Engineering](#) [Aerodynamics & Fluid Mechanics](#)

---

---

---

## ASEN-6517 (3) Computational Methods In Dynamics

Covers modeling, computational algorithms and their computer implementation for both linear and nonlinear dynamical systems. Topics covered include transient analysis, wave propagation, multiphysics analysis, and their significant engineering applications. Prereq., ASEN 5022. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science Aerospace Engineering Structures, Mat, & Struc Dynam

---

---

## ASEN-6519 (1-3) Special Topics

Reflects upon specialized aspects of aerospace engineering sciences. Course content is indicated in the online Schedule Planner. Prereq., varies. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science Aerospace Engineering Specialized Courses

---

---

## ASEN-6849 (1-6) Independent Study

Studies special projects agreed upon by student and instructor.

College of Engineering & Applied Science Aerospace Engineering Specialized Courses

---

---

## ASEN-6950 (1-6) Master's Thesis

College of Engineering & Applied Science Aerospace Engineering Specialized Courses

---

---

## ASEN-8990 (1-10) Doctoral Thesis

ASIA

### ASIA-1000 (3) Introduction to South and Southeast Asian Civilizations

Interdisciplinary survey course, emphasizing cultural developments in the Indian subcontinent that influenced Indonesia and mainland Southeast Asia. Foundation course required for the Asian Studies major. Approved for arts and sciences core curriculum: human diversity or historical context.

[College of Arts & Sciences](#) [East Asian Languages & Civilizations](#)

### ASIA-4300 (3) Open Topics in Asian Literature and Culture

Examines selected texts on a particular topic. Taught by regular or visiting faculty. Topics change each term. May be repeated up to 6 total credit hours. Prereq., instructor consent.

[College of Arts & Sciences](#) [East Asian Languages & Civilizations](#)

### ASIA-4830 (3) Senior Thesis or Project in Asian Studies

Studies an approved Asian topic, following guidelines established by the program director. Undertaken either as an independent study with an Asian studies faculty member. Required for an Asian Studies major. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) Asian Studies (ASIA) majors only.

[College of Arts & Sciences](#) [East Asian Languages & Civilizations](#)

### ASIA-4840 (1-3) Independent Study

Provides an independent study opportunity, by special arrangement with Asian Studies faculty, for students with particular Asian Studies

interests. May be repeated up to 6 total credit hours. Restricted to Asian Studies majors.

College of Arts & Sciences East Asian Languages & Civilizations

---

---

## ASIA-4930 (1-2) Engage Asia: Internship in Asian Studies

Matches students with supervised internships in which they share academic learning of topics in Asian culture, history, or language with, for example, teachers and students in the Boulder Valley School District. Students work with Center for Asian Studies research and teaching faculty to, for example, research and prepare lessons they will present in BVSD K-12 classes on world cultures, world geography, world history, and Asian languages. May be repeated up to 6 total credit hours. Recommended prereq., Asian language and culture courses.

College of Arts & Sciences East Asian Languages & Civilizations

ASTR

## ASTR-1000 (3) The Solar System

Examines principles of modern astronomy for nonscience majors, summarizing our present knowledge about the Earth, Sun, moon, planets, and the origin of life. Offers opportunities to attend nighttime observation sessions at Sommers-Bausch Observatory and Fiske Planetarium. Similar to ASTR 1010, without lab. Also similar to ASTR 1030. Formerly ASTR 1110. Students may receive credit for only one of ASTR 1000, 1110, 1010, or 1030. Meets MAPS requirement for natural science: nonlab. Approved for arts and sciences core curriculum: natural science.

[College of Arts & Sciences](#) [Astrophysical & Planetary Sciences](#)

## ASTR-1010 (4) Introductory Astronomy 1

Introduces principles of modern astronomy for nonscience majors, summarizing our present knowledge about the Earth, Sun, moon, planets, and origin of life. Requires nighttime observation sessions at Sommers-Bausch Observatory. Similar to ASTR 1000, but with additional lab experience. Also similar to ASTR 1030. Students may receive credit for only one of ASTR 1010, 1000, 1110, or 1030. Meets MAPS requirement for natural science: lab or non-lab. Approved for arts and sciences core curriculum: natural science.

[College of Arts & Sciences](#) [Astrophysical & Planetary Sciences](#)

## ASTR-1020 (4) Introductory Astronomy 2

Introduces principles of modern astronomy for nonscience majors, summarizing our present knowledge about the Sun, stars, birth and death of stars, neutron stars, black holes, galaxies, quasars, and the organization and origins of the universe. May require nighttime observation sessions at Sommers-Bausch Observatory. Similar to ASTR 1200, but with recitation and sequence link to ASTR 1010. Also similar to ASTR 1040. Students may receive credit for only one of ASTR 1020, 1200, 1120, or 1040. Prereq., ASTR 1010 or 1000. Approved for arts and sciences core curriculum: natural science.

[College of Arts & Sciences](#) [Astrophysical & Planetary Sciences](#)

---

---

## ASTR-1030 (4) Accelerated Introductory Astronomy 1

Covers principles of modern astronomy summarizing our present knowledge about the Earth, Sun, moon, planets, and origin of life. Requires nighttime observation sessions at Sommers-Bausch Observatory. Required in ASTR major/minor. Prereq. or coreq., Calculus I (MATH 1300 or APPM 1350). Students may receive credit for only one of ASTR 1030, 1010, 1000, or 1110. Similar to ASTR 1010 and 1000, but taught at a higher intellectual level, including a significant amount of quantitative analysis. Approved for arts and sciences core curriculum: natural science.

College of Arts & Sciences Astrophysical & Planetary Sciences

---

## ASTR-1040 (4) Accelerated Introductory Astronomy 2

Covers principles of modern astronomy summarizing our present knowledge about the Sun, stars, birth and death of stars, neutron stars, black holes, galaxies, quasars, and the organization and origins of the universe. May require nighttime observing sessions at Sommers-Bausch Observatory. Required in ASTR major/minor. Prereq., ASTR 1030. Prereq. or coreq., Calculus I (MATH 1300 or APPM 1350). Students may receive credit for only one of ASTR 1020, 1040, 1200, or 1120. Similar to ASTR 1020 and 1200 but taught at a higher intellectual level including a significant amount of quantitative analysis. Includes a Recitation. Approved for arts and sciences core curriculum: natural science.

College of Arts & Sciences Astrophysical & Planetary Sciences

---

## ASTR-1200 (3) Stars and Galaxies

Examines principles of modern astronomy for nonscience majors, summarizing our present knowledge about the Sun, stars, neutron stars, black holes, interstellar gas, galaxies, quasars, and the structure and origins of the universe. Offers opportunities to attend nighttime observation sessions at Sommers-Bausch Observatory. Formerly ASTR 1120. Similar to ASTR 1020, without sequence link to ASTR 1010 or recitation. Also similar to ASTR 1040. Students may receive credit for only one of ASTR 1200, 1120, 1020, or 1040. Approved for arts and sciences core curriculum: natural science.

College of Arts & Sciences Astrophysical & Planetary Sciences

---

## ASTR-2000 (3) Ancient Astronomies of the World

Documents the numerous ways in which observational astronomy and cosmology have been features of ancient cultures. Includes naked eye astronomy, archaeoastronomy, ethnoastronomy, concepts of time, calendrics, cosmogony, and cosmology. Approved for arts and sciences core curriculum: natural science or human diversity.

College of Arts & Sciences Astrophysical & Planetary Sciences

---

---

---

## ASTR-2010 (3) Modern Cosmology---Origin and Structure of the Universe

Introduces modern cosmology to nonscience majors. Covers the Big Bang; the age, size, and structure of the universe; and the origin of the elements and of stars, galaxies, the solar system, and life. Approved for arts and sciences CORE curriculum: natural science.

College of Arts & Sciences [Astrophysical & Planetary Sciences](#)

---

## ASTR-2020 (3) Introduction to Space Astronomy

Discusses reasons for making astronomical observations from space, scientific goals, practical requirements for placing instruments in space, politics of starting new programs, and selected missions. Prereq., ASTR 1010, 1020, 1000, or 1200. Approved for arts and sciences CORE curriculum: natural science.

College of Arts & Sciences [Astrophysical & Planetary Sciences](#)

---

## ASTR-2030 (3) Black Holes

Black holes are one of the most bizarre phenomena of nature. Students are introduced to the predicted properties of black holes, astronomical evidence for their existence and formation, and modern ideas about space, time, and gravity. Approved for the arts and sciences CORE curriculum: natural science.

College of Arts & Sciences [Astrophysical & Planetary Sciences](#)

---

## ASTR-2500 (3) Gateway to Space

Introduces the basics of atmospheric and space sciences, space exploration, spacecraft design, rocketry, and orbits. Students design, build, and launch a miniature satellite on a high altitude balloon. Explores the current research in space through lectures from industry. Recommended prereqs., APPM 1360 or MATH 2300 and PHYS 1120 or ASTR 1040. Same as ASEN 1400. Similar to ASEN 4500. Prerequisites: Restricted to Astronomy or Physics majors only.

College of Arts & Sciences [Astrophysical & Planetary Sciences](#)

---

## ASTR-2600 (3) Computational Techniques

Introduces practical research skills and provides orientation to computational tools commonly used in research by astrophysicists and planetary scientists, including Unix and IDL.

College of Arts & Sciences [Astrophysical & Planetary Sciences](#)

---

## ASTR-2840 (1-3) Independent Study

May be repeated up to 6 total credit hours. Prereq., instructor consent.

## ASTR-3300 (3) Extraterrestrial Life

Discusses the scientific basis for the possible existence of extraterrestrial life. Includes origin and evolution of life on Earth; possibility of life elsewhere in the solar system, including Mars; and the possibility of life on planets around other stars. Prereq., one-year sequence in a natural science. Same as GEOL 3300.

## ASTR-3510 (4) Observations and Instrumentation 1

Lab course in astronomical observation and instrumentation. Hands-on exercises include obtaining and analyzing multi-wavelength data, basic optical design and instrumentation, and statistical analysis of data, with emphasis on imaging applications. A significant number of night time observation sessions are required. Prereq. or coreq., Calculus 2 (MATH 2300 or APPM 1360), one year of college physics, and one year of college astronomy. Restricted to Astrophysics majors only. Elective for APS major and minor. Prerequisites: Restricted to Astrophysics majors only.

## ASTR-3520 (4) Observations and Instrumentation 2

Lab course in observation and instrumentation. Hands-on exercises include obtaining and analyzing multi-wavelength data, optical design and instrumentation, and statistical analysis, with emphasis on spectroscopy. A significant number of night time observation sessions are required. Prereq., ASTR 3510 or instructor consent. Restricted to Astrophysics majors only. Elective for APS major and minor. Prerequisites: Restricted to Astrophysics majors only.

## ASTR-3710 (3) Formation & Dynamics of Planetary Systems

Covers the origin of planetary systems and their dynamical evolution. Topics include the physics and chemistry of planetary formation, orbital mechanics, and extrasolar planets. ASTR 3710, 3720, and 3750 may be taken in any order. Prereqs., PHYS 1110 and 1120, and calculus (MATH 1300 and 2300, or APPM 1350 and 1360). Elective for APS major and minor.

## ASTR-3720 (3) Planets and Their Atmospheres

Explores the physics and chemistry of the atmospheres of Mars, Venus, Jupiter, Saturn, and Titan. Examines evolution of the atmospheres of Earth, Venus, and Mars; and the escape of gases from the Galilean satellites, Titan and Mars; the orbital characteristics

---

of moons, planets, and comets. Uses recent results of space exploration. Elective for APS major and minor. Prereqs., PHYS 1110 and 1120, and either MATH 1300 and 2300, or APPM 1350 and 1360. Same as ATOC 3720.

College of Arts & Sciences Astrophysical & Planetary Sciences

---

## ASTR-3730 (3) Astrophysics 1---Stellar and Interstellar

ASTR 3730 and 3830 provide a year-long introduction to physical processes, observations, and current research methods in stellar, interstellar, galactic, and extra-galactic astrophysics, with astronomical applications of gravity, radiation processes, spectroscopy, gas dynamics, and plasma physics. Prereqs. or coreqs., PHYS 2130 or 2170, and MATH 2400 or APPM 2350. Elective for APS major and minor.

College of Arts & Sciences Astrophysical & Planetary Sciences

---

## ASTR-3740 (3) Cosmology and Relativity

Special and general relativity as applied to astrophysics, cosmological models, observational cosmology, experimental relativity, and the early universe. Prereqs. or coreqs., PHYS 2130 or 2170, and MATH 2400 or APPM 2350. Elective for APS major and minor.

College of Arts & Sciences Astrophysical & Planetary Sciences

---

## ASTR-3750 (3) Planets, Moons, and Rings

Approaches the physics of planets, emphasizing their surfaces, satellites, and rings. Topics include formation and evolution of planetary surfaces, history of the terrestrial planets, and dynamics of planetary rings. Both ASTR 3720 and ASTR 3750 may be taken for credit in any order. Prereqs., PHYS 1110 and 1120, and calculus (MATH 1300 and 2300, or APPM 1350 and 1360). Elective for APS major and minor.

College of Arts & Sciences Astrophysical & Planetary Sciences

---

## ASTR-3760 (3) Solar and Space Physics

Explores the physical processes linking the Sun and planets, emphasizing solar radiative and particulate variability and the response of planetary atmospheres and magnetospheres. Topics include the solar dynamo, solar wind, coronal mass ejections, cosmic ray modulation, magnetospheres, aurora, the space environment, and climate variability. Prereqs./coreqs., PHYS 2130 or 2170 and MATH 2400 or APPM 2350. Recommended prereq., PHYS 3310. Elective for APS major and minor.

College of Arts & Sciences Astrophysical & Planetary Sciences

---

## ASTR-3800 (3) Introduction to Scientific Data Analysis and Computing

Covers analytical and numerical techniques used in scientific data analysis, including statistical analysis, error analysis, functional fitting, spectral analysis, image processing, and testing theoretical compliance. Examples are from space-based and ground-based astronomy. The computer laboratories are based on IDL which is introduced in the course. Prereqs. or coreqs., ASTR 1040 or equivalent, PHYS 1120 or equivalent, and MATH 2400 or APPM 2350.

[College of Arts & Sciences](#) [Astrophysical & Planetary Sciences](#)

## ASTR-3830 (3) Astrophysics 2---Galactic and Extragalactic

ASTR 3730 and 3830 provide a year-long introduction to physical processes, observations, and current research methods in stellar, interstellar, galactic, and extragalactic astrophysics, with astronomical applications of gravity, radiation processes, spectroscopy, gas dynamics, and plasma physics. Prereqs. or coreqs., ASTR 3730, and PHYS 2130 or 2170, and MATH 2400 or APPM 2350. Elective for APS major and minor.

[College of Arts & Sciences](#) [Astrophysical & Planetary Sciences](#)

## ASTR-4330 (3) Cosmochemistry

Investigates chemical and isotopic data to understand the composition of the solar system: emphasis on the physical conditions in various objects, time scales for change, chemical and nuclear processes leading to change, observational constraints, and various models that attempt to describe the chemical state and history of cosmological objects in general and the early solar system in particular. Prereq., upper-div undergrad or grad standing in physical science. Recommended prereq., upper-div undergrad CHEM, PHYS, or MATH. Same as ASTR 5330 and GEOL 4330.

ASTR

### [ASTR-4800 \(3\) Space Science: Practice and Policy](#)

Exposes students to current controversies in science that illustrate the scientific method and the interplay of observation, theory, and science policy. Students research and debate both sides of the issues, which include strategies and spin-offs of space exploration, funding of science, big vs. small science, and scientific heresy and fraud. Prereqs., ASTR 1200, or equivalent, or PHYS 1110 and 1120, or PHYS 2010 and 2020.

[College of Arts & Sciences](#) [Astrophysical & Planetary Sciences](#)

### [ASTR-4840 \(1-3\) Independent Study](#)

May be repeated up to 6 total credit hours. Prereq., instructor consent.

[College of Arts & Sciences](#) [Astrophysical & Planetary Sciences](#)

### [ASTR-4841 \(1-3\) Independent Study](#)

May be repeated up to 7 total credit hours.

[College of Arts & Sciences](#) [Astrophysical & Planetary Sciences](#)

### [ASTR-5110 \(4\) Atomic and Molecular Processes](#)

Explores the application of quantum physics and statistical mechanics to problems in astrophysics, space physics and planetary science, with an emphasis on radiative processes and spectroscopy of atoms and molecules. Prereq., graduate standing or instructor consent.

Prerequisites: Restricted to Graduate Students only.

[College of Arts & Sciences](#) [Astrophysical & Planetary Sciences](#)

---

## ASTR-5120 (4) Radiative and Dynamical Processes

An introduction to radiative and dynamical processes aimed at graduate students in astrophysics, space physics and planetary science. Covers transport phenomena, the macroscopic treatment of radiation fields, magnetohydrodynamics and dynamical processes associated with planetary orbits and N-body systems. Prereq., graduate standing or instructor consent. Prerequisites: Restricted to Graduate Students only.

[College of Arts & Sciences](#) [Astrophysical & Planetary Sciences](#)

---

## ASTR-5140 (3) Astrophysical and Space Plasmas

Teaches magnetohydrodynamics and a few related areas of plasma physics applied to space and astrophysical systems, including planetary magnetospheres and ionospheres, stars, and interstellar gas in galaxies. Prereq., graduate standing in APS or physics. Same as PHYS 5141. Prerequisites: Restricted to Graduate Students only.

[College of Arts & Sciences](#) [Astrophysical & Planetary Sciences](#)

---

## ASTR-5150 (3) Introductory Plasma Physics

Includes basic phenomena of ionized gases, static and dynamic shielding, linear waves, instabilities, particles in fields, collisional phenomena, fluid equations, collisionless Boltzman equations, Landau damping, scattering and absorption of radiation in plasmas, elementary nonlinear processes, WKB wave theory, controlled thermonuclear fusion concepts, astrophysical applications, and experimental plasma physics (laboratory). Same as PHYS 5150. Prerequisites: Restricted to Graduate Students only.

[College of Arts & Sciences](#) [Astrophysical & Planetary Sciences](#)

---

## ASTR-5300 (3) Introduction to Magnetospheres

Introduces solar and stellar winds, and planetary and stellar magnetospheres. Acquaints students with the guiding center theory for particle motion, magnetospheric topology, convection, radiation belts, magnetic storms and substorms, and auroras.

[College of Arts & Sciences](#) [Astrophysical & Planetary Sciences](#)

---

## ASTR-5330 (3) Cosmochemistry

Same as ASTR 4330 and GEOL 5330.

[College of Arts & Sciences](#) [Astrophysical & Planetary Sciences](#)

---

---

## ASTR-5400 (3) Introduction to Fluid Dynamics

Covers equations of fluid motion relevant to planetary atmospheres and oceans, as well as stellar atmospheres; effects of rotation and viscosity; and vorticity dynamics, boundary layers, and wave motions. Introduces instability theory, nonlinear equilibration, and computational methods in fluid dynamics. Same as ATOC 5400. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences   Astrophysical & Planetary Sciences

---

## ASTR-5410 (3) Fluid Instabilities, Waves, and Turbulence

Involves linear and nonlinear analyses of small-scale waves and instabilities in stratified fluids, with effects of rotation. Studies internal gravity and acoustic waves with terrestrial, planetary, and astrophysical applications. Also studies thermal and double-diffusive convection, homogeneous and stratified shear flow instabilities. Examines these topics from the onset of small amplitude disturbances to their nonlinear development and equilibration. Prereq., ASTR 5400 or ATOC 5060. Same as ATOC 5410.

College of Arts & Sciences   Astrophysical & Planetary Sciences

---

## ASTR-5540 (3) Mathematical Methods

Presents an applied mathematics course designed to provide the necessary analytical and numerical background for courses in astrophysics, plasma physics, fluid dynamics, electromagnetism, and radiation transfer. Topics include integration techniques, linear and nonlinear differential equations, WKB and Fourier transform methods, adiabatic invariants, partial differential equations, integral equations, and integrodifferential equations. Draws illustrative examples from the areas of physics listed above. Same as ATOC 5540. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences   Astrophysical & Planetary Sciences

---

## ASTR-5550 (3) Observations, Data Analysis and Statistics

Introduces multi-wavelength observational techniques, their limitations and effects of various noise sources. Describes basic data handling, error analysis, and statistical tests relevant to modeling. Topics include probability distributions, model-fitting algorithms, confidence intervals, correlations, sampling and convolution. Students derive physical measurements and uncertainties with hands-on analysis of real datasets. Prereq., senior level undergraduate physics or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences   Astrophysical & Planetary Sciences

---

## ASTR-5560 (3) Radiative Processes in Planetary Atmospheres

Applies radiative transfer theory to problems in planetary atmospheres, with primary emphasis on the Earth's atmosphere; principles of atomic and molecular spectroscopy; infrared band representation; absorption and emission of atmospheric gases; radiation flux and flux divergence computations; radiative transfer and fluid motions; additional applications such as the greenhouse effect; and inversion methods and climate models. Prereq. or coreq., ASTR 5110. Recommended prereq., ATOC 5235. Same as ATOC 5560. Prerequisites: Restricted to Graduate Students only.

---

College of Arts & Sciences   Astrophysical & Planetary Sciences

## ASTR-5700 (3) Stellar Structure and Evolution

Examines basic stellar astronomy: stellar classifications, kinematics, populations and distributions, and H-R diagrams. Covers principles of stellar structure, including energy generation and energy transport by radiation and convection. Includes stellar evolution theory, including compact objects. Prereq., Senior Level undergraduate physics. Prerequisites: Restricted to Graduate Students only.

## ASTR-5710 (3) High-Energy Astrophysics

Studies astrophysics of UV, x-ray, gamma-ray, and cosmic-ray sources, including fundamentals of radiative and particle processes, neutron stars, black holes, pulsars, quasars, supernovas and their remnants; stellar flares; accretion disks; binary x-ray sources; and other cosmic x-ray sources. Prereq., senior-level undergraduate physics.

## ASTR-5720 (3) Galaxies

Highlights the classification, structure, content, dynamics, and other observational properties of galaxies, active galaxies, and clusters of galaxies. Discusses Hubble's Law, the cosmic distance scale, and the intergalactic medium. Prereq., senior-level undergraduate physics. Prerequisites: Restricted to Graduate Students only.

## ASTR-5730 (3) Stellar Atmospheres and Radiative Transfer

Explores stellar atmospheres: basic stellar atmospheres, spectral line formation, interpretation of stellar spectra, and model atmospheres. Examines solar physics: the Sun as a star, solar cycle, chromospheric and coronal structure, energy balance, magnetic field, and solar wind. Prereqs., ASTR 5110 and undergraduate physics.

## ASTR-5740 (3) Interstellar Astrophysics

Highlights structure, dynamics, and ecology of the interstellar medium, stressing the physical mechanisms that govern the thermal, ionization, and dynamic state of the gas and dust; observations at all wavelengths; star formation; and relation to external galaxies. Prereq., ASTR 5110 or instructor consent. Prerequisites: Restricted to Graduate Students only.

---

## ASTR-5760 (3) Astrophysical Instrumentation

Covers the fundamentals underlying the design, construction, and use of instrumentation used for astrophysical research ranging from radio-wavelengths to gamma rays. Topics include Fourier transforms and their applications, optical design concepts, incoherent and coherent signal detection, electronics and applications, and signal acquisition and processing. Prereq., Senior Level undergraduate physics. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Astrophysical & Planetary Sciences

---

## ASTR-5770 (3) Cosmology

Studies the smooth universe, including Friedmann-Robertson-Walker metric, Friedmann equations, cosmological parameters, inflation, primordial nucleosynthesis, recombination, and cosmic microwave background. Also studies the lumpy universe, including linear growth of fluctuations, power spectra of CMB and galaxies, dark matter, and large scale flows. Covers galaxy formation and intergalactic medium. Prereq., Senior Level undergraduate physics, graduate standing, or instructor consent.

College of Arts & Sciences Astrophysical & Planetary Sciences

---

## ASTR-5800 (3) Planetary Surfaces and Interiors

Examines processes operating on the surfaces of solid planets and in their interiors. Emphasizes spacecraft observations, their interpretation, the relationship to similar processes on Earth, the relationship between planetary surfaces and interiors, and the integrated geologic histories of the terrestrial planets and satellites. Prereq., graduate standing in physical sciences or instructor consent. Same as GEOL 5800. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Astrophysical & Planetary Sciences

---

## ASTR-5810 (3) Planetary Atmospheres

Covers the structure, composition, and dynamics of planetary atmospheres. Includes the origin of planetary atmospheres, chemistry and cloud physics, greenhouse effects, climate, and the evolution of planetary atmospheres---past and future. Prereq., graduate standing in physical sciences or instructor consent. Same as ATOC 5810 and GEOL 5810.

College of Arts & Sciences Astrophysical & Planetary Sciences

---

## ASTR-5820 (3) Origin and Evolution of Planetary Systems

Considers the origin and evolution of planetary systems, including proto-planetary disks, condensation in the solar nebula, composition of meteorites, planetary accretion, comets, asteroids, planetary rings, and extrasolar planets. Applies celestial mechanics to the dynamical evolution of solar system bodies. Prereq., graduate standing in physical sciences or instructor consent. Same as GEOL/ATOC 5820. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Astrophysical & Planetary Sciences

---

---

## ASTR-5830 (3) Topics in Planetary Science

Examines current topics in planetary science, based on recent discoveries, spacecraft observations, and other developments. Focuses on a specific topic each time the course is offered, such as Mars, Venus, Galilean satellites, exobiology, comets, or extrasolar planets. May be taken twice for credit. Prereq., graduate standing in physical sciences or instructor consent. Same as ATOC 5830 and GEOL 5830.

ASTR

### [ASTR-5835 \(1\) Seminar in Planetary Science](#)

May be repeated up to 4 total credit hours to meet candidacy requirements. Prereq., graduate standing or instructor consent; Senior Level undergraduate physics. Same as ATOC/GEOL 5835. Prerequisites: Restricted to Graduate Students only.

[College of Arts & Sciences](#) [Astrophysical & Planetary Sciences](#)

### [ASTR-5920 \(1-6\) Reading and Research in Astrophysical and Planetary Sciences](#)

May be repeated up to 6 total credit hours. Prereq., instructor consent.

[College of Arts & Sciences](#) [Astrophysical & Planetary Sciences](#)

### [ASTR-6000 \(1\) Seminar in Astrophysics](#)

Studies current research and research literature on an astrophysical topic. Students and faculty give presentations. Subjects vary each semester. May be repeated for a total of 4 credit hours to meet candidacy requirements. Prereq., graduate standing or instructor consent. Prerequisites: Restricted to Graduate Students only.

[College of Arts & Sciences](#) [Astrophysical & Planetary Sciences](#)

### [ASTR-6610 \(3\) Earth and Planetary Physics 1](#)

Examines mechanics of deformable materials, with applications to earthquake processes. Introduces seismic wave theory. Other topics include inversion of seismic data for the structure, composition, and state of the interior of the Earth. Same as GEOL 6610 and PHYS 6610.

---

College of Arts & Sciences Astrophysical & Planetary Sciences

---

## ASTR-6620 (3) Earth and Planetary Physics 2

Covers space and surface geodetic techniques as well as potential theory. Other topics are the definition and geophysical interpretation of the geoid and of surface gravity anomalies; isostasy; post-glacial rebound; and tides and the rotation of the Earth. Same as GEOL 6620 and PHYS 6620. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Astrophysical & Planetary Sciences

---

## ASTR-6630 (3) Earth and Planetary Physics 3

Examines the solar system, emphasizing theories of its origin and meteorites. Highlights distribution of radioactive materials, age dating, heat flow through continents and the ocean floor, internal temperature distribution in the Earth, and mantle convection. Also covers the origin of the oceans and atmosphere. Same as GEOL 6630 and PHYS 6630.

College of Arts & Sciences Astrophysical & Planetary Sciences

---

## ASTR-6650 (1-3) Seminar in Geophysics

Advanced seminar studies in geophysical subjects for graduate students. Same as GEOL 6650 and PHYS 6650. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Astrophysical & Planetary Sciences

---

## ASTR-6940 (1) Master's Degree Candidate

College of Arts & Sciences Astrophysical & Planetary Sciences

---

## ASTR-6950 (1-6) Master's Thesis

College of Arts & Sciences Astrophysical & Planetary Sciences

---

## ASTR-7500 (1-3) Special Topics in Astrophysical and Planetary Sciences

Acquaints students with current research in astrophysical and planetary sciences. (Topics vary each semester.) May be repeated up to 9 total credit hours.

---

---

## ASTR-7920 (1-6) Reading and Research in Astrophysical and Planetary Sciences

May be repeated up to 6 total credit hours. Prereq., instructor consent.

---

---

## ASTR-8990 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

ATLS

## [ATLS-1220 \(4\) Virtual Worlds: An Introduction to Computer Science](#)

Introduces the fundamental principles of computer science using an on-line virtual world called Second Life as the "Laboratory" for the course. Students will learn how to program by creating objects of interest in Second Life. In-class and in-world discussions and readings will introduce the student to important ideas and concepts that shape the field of computer science. Same as CSCI 1220.

[College of Arts & Sciences](#) [Alliance for Technology, Learning, and Society \(ATLAS\)](#)

## [ATLS-1240 \(3\) The Computational World](#)

Introduces and explores the "Computational style of thinking" and its influence in science, mathematics, engineering and the arts. The course does not focus on the nuts and bolts of any particular programming language, but rather on the way in which computing has affected human culture and thought in the past half century. Same as CSCI 1240.

[College of Arts & Sciences](#) [Alliance for Technology, Learning, and Society \(ATLAS\)](#)

## [ATLS-1710 \(3\) Tools and Methods for Engineering Computing](#)

Designed for students with little or no programming background. Students learn procedural and object-oriented programming through development of games, simulations, and animations using Flash/Actionscript, VB/Excel, Java, MATLAB, and real-world applications. Activities are oriented toward smaller projects that address topics in beginning science, engineering, and mathematics courses. Students gain practical, applicable skills. Same as APPM 1710.

[College of Arts & Sciences](#) [Alliance for Technology, Learning, and Society \(ATLAS\)](#)

---

## ATLS-1720 (3) Programming and Simulation Development

Students learn to plan, develop, and test applications (games, simulations, and animations) that embody mathematical formulations of problems in areas such as transportation, nutrition, and alternative energy. Prereq., ATLS 1710 or knowledge of an object-oriented programming language. Same as APPM 1720.

College of Arts & Sciences Alliance for Technology, Learning, and Society (ATLAS)

---

## ATLS-2000 (3) The Meaning of Information Technology

Surveys the history of information technologies and modern techniques of information production, storage, transmission, and retrieval. Equips students with an understanding of technological transformations in interpersonal, organizational, and mass communication. Emphasis is on the technological, social and political changes that underlie the movement toward a digital society. HUEN 2020 is restricted to ENGR majors only. ATLS 2000 is restricted to TAM students. ATLS 2000 and HUEN 2020 are the same course.

College of Arts & Sciences Alliance for Technology, Learning, and Society (ATLAS)

---

## ATLS-2036 (3) Introduction to Digital Media in the Humanities

Serves as a humanities-based introduction to digital media structures such as digital archive and reading/writing software; studies theories and methodologies for undertaking digital media scholarship in the humanities; and explores digital textualities ranging from text messaging, blogging, and game to digital fiction and poetry. Same as ENGL 2036.

College of Arts & Sciences Alliance for Technology, Learning, and Society (ATLAS)

---

## ATLS-3010 (3) Digital Media 1

Introduces techniques, software, and related concepts of digital design and image making through individual and group projects. Emphasizes digital animation, digital audio, digital video and website design and development as a means to formal and expressive ends. Introduces students to critical readings and theories related to digital media practice. May be repeated up to 6 total credit hours. Prereq., ATLS 2000. Restricted to TAM students.

College of Arts & Sciences Alliance for Technology, Learning, and Society (ATLAS)

---

## ATLS-3020 (3) Digital Media 2

A continuation of Digital Media 1 (ATLS 3010), this course introduces students to advanced digital media development including interactive programming, scripting, and database functionality. Emphasizes a historical and conceptual understanding of programming and computational theories. May be repeated for a total of 6 credit hours. Prereq., ATLS 2000 and ATLS 3010. Restricted to students with minor in Technology, Arts & Media (MTAM). Prerequisites: Restricted to students with minor in Technology, Arts, and Media (MTAM).

College of Arts & Sciences Alliance for Technology, Learning, and Society (ATLAS)

---

---

## ATLS-3030 (3) Fundamentals of Digital Design

The fundamental goal of this course is to teach students how to use digital design tools effectively and compellingly. Through lectures, class discussions, projects and critiques, this course will cover the critical, theoretical, and technical skill sets necessary to become a more engaging, thoughtful, and articulate designer. Prereqs., ATLS 2000 and 3010. Restricted to students with minor in Technology, Arts & Media (MTAM). Prerequisites: Restricted to students with minor in Technology, Arts, and Media (MTAM).

College of Arts & Sciences Alliance for Technology, Learning, and Society (ATLAS)

---

## ATLS-3110 (3) Motion Design

An animation-based projects course that advances student understanding of motion design in today's culture. Through active production and critical analysis, students will create new media projects and critically examine the history, social implications, and impacts of these forms of mass media. Prereq., ATLS 2000. Recommended prereq., ATLS 3010.

College of Arts & Sciences Alliance for Technology, Learning, and Society (ATLAS)

---

## ATLS-3112 (1-3) Digital and Social Systems Professional Development

Supports students in developing professional skills and practices in human computer interaction, design of interactive systems, computer supported cooperative work, computer supported collaborative learning, educational technology, tools that support creativity, user-developed knowledge collections, and gaming. May be repeated up to 10 total credit hours. Same as CSCI 3112.

College of Arts & Sciences Alliance for Technology, Learning, and Society (ATLAS)

---

## ATLS-3120 (3) Net Presence

An Internet-based projects course that advances student understanding of Internet culture. Through active production and critical analysis, students will explore their individual roles in the digital landscape and critically examine the social implications and impacts of digital communities. Prereqs., ATLS 2000 and 3010. Recommended prereq., ATLS 3020.

College of Arts & Sciences Alliance for Technology, Learning, and Society (ATLAS)

---

## ATLS-3500 (1-3) Client Projects in Technology, Arts and Media

Allows undergraduate students to work on collaborative projects with faculty and with external organizations under faculty supervision. The course will focus on teamwork, conceptual planning, technical design and development, and working within real-world client environments. Critical skills include project research, planning, design, development, trouble-shooting, and presentation. Prereqs., ATLS 2000, 3010, or instructor consent. Recommended prereq., ATLS 3020. May be repeated up to 6 total credit hours.

College of Arts & Sciences Alliance for Technology, Learning, and Society (ATLAS)

---

---

## ATLS-3519 (1-3) Special Topics in Technology, Arts, and Media

Analyzes special interest areas of multidisciplinary technology, arts and media research and practice. May be repeated up to 12 total credit hours for different topics. Prereq., ATLS 2000. Recommended prereq., ATLS 3010. Same as ATLS 3519, 5519 and 6519.

College of Arts & Sciences Alliance for Technology, Learning, and Society (ATLAS)

---

## ATLS-4010 (3) Capstone Projects

The focus of this advanced practicum course is the development of an individual thesis project. Specific class sessions will feature a combination of lectures, demonstrations, guest speakers, lab sessions, and critiques. This course also entails group work, portfolio development, critical theoretical readings, and a significant written component. May be repeated up to 6 total credit hours. Prereqs., ATLS 2000, 3010, and 3020. Restricted to students with minor in Technology, Arts & Media (MTAM). Prerequisites: Restricted to students with minor in Technology, Arts, and Media (MTAM).

College of Arts & Sciences Alliance for Technology, Learning, and Society (ATLAS)

---

## ATLS-4519 (1-3) Advanced Special Topics in Technology, Arts, and Media

Analyzes special interest areas of multidisciplinary technology, arts and media research and practice. May be repeated up to 9 total credit hours. Prereq., instructor consent. Recommended prereqs., ATLS 2000, ATLS 3010, and ATLS 3020. Same as ATLS 3519, 5519 and 6519.

College of Arts & Sciences Alliance for Technology, Learning, and Society (ATLAS)

---

## ATLS-4809 (3) Computer Animation

Develops a firm understanding of the general principles of computer animation. Lectures cover the creation of models, materials, textures, surfaces, and lighting. Path and key frame animation, particle dynamics, and rendering are introduced. Students are assigned a number of animation tutorials to carry out. CSCI 4809/5809 and ATLS 4809/5809 are all the same course.

College of Arts & Sciences Alliance for Technology, Learning, and Society (ATLAS)

---

## ATLS-4900 (1-6) Undergraduate Independent Study

Provides opportunities for independent study at the upper-division undergraduate level. Students work on research or a creative project guided by faculty. May be repeated up to 9 total credit hours. Prereqs., ATLS 3010, 3020, and consent of instructor.

College of Arts & Sciences Alliance for Technology, Learning, and Society (ATLAS)

---

---

## ATLS-5150 (1) Managing Effectively in a Changing Telecommunications Environment

Provides students with an opportunity to join international managers and policy makers from around the world in an intensive seminar focused on the challenges of managing in a telecommunications environment in an era of technological change. Guest lecturers provide an effective overview of the cutting-edge issues managers face in telecom and technology companies around the world. TLEN 5150 and ATLS 5150 are the same course.

College of Arts & Sciences Alliance for Technology, Learning, and Society (ATLAS)

---

## ATLS-5210 (3) Global Development I

Introduces students to the theories and policy of international development. The course will examine the role of multilateral agencies, foundations, aid organizations, corporate entities and academia in development as both an industry and a research field. The course will focus on development movements and their outcomes, the inter-related nature of development and its effect on policies and programs, and critiques. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Alliance for Technology, Learning, and Society (ATLAS)

---

## ATLS-5220 (3) Global Development II

Explores the impact of economic, geographical and social/cultural conditions on development outcomes through standalone course components taught by subject matter experts in region and in residency at ATLAS. Components may include, but are not limited to, development economics, environmental sustainability, public health, climate change, globalization and migration, religion, and gender as these broad themes relate to development. Prereq., ATLS 5210. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Alliance for Technology, Learning, and Society (ATLAS)

---

## ATLS-5230 (3) Case Studies in Information and Communication Technology for Development

Serves as foundation course for MS-ICTD program. Students will evaluate case studies across a range of technologies and applications. Students will learn how to match available technologies to human and environmental needs and resources, be introduced to the seminal work and leaders in the field, and discuss the future of ICTD as an emerging area of academic focus. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Alliance for Technology, Learning, and Society (ATLAS)

---

## ATLS-5240 (3) Information and Communication Technology for Development Laboratory

Prepares students for the semester-long practicum. Students work in teams to design ICTD interventions that address unique socio-economic and environmental development issues. Teams will design a variety of ICTD interventions, including telehealth and distance education programs, communication networks, and pro-development ICTD policies. Topics will be chosen by teams and guided by program faculty and external domain experts. Prereq., ATLS 5230. Prerequisites: Restricted to Graduate Students only.

## ATLS-5250 (3) Fieldwork Methods for ICTD Practitioners

Introduces methods and models that can be employed in ICTD program development and deployment. Examines the applications of participatory research, value-centric design, program scale, cross-disciplinary work, and appropriate monitoring and evaluation. The goal of this course is to build student confidence around existing evaluation toolkits and methods, while advancing multi-method approaches to designing and analyzing ICTD initiatives. Prerequisites: Restricted to Graduate Students only.

## ATLS-5380 (3) Future of Video: Technology, Policy, and Economics

Examines the issues that have been created by the shift from analog to digital technologies, the shift from narrowband/wideband systems to broadband systems, and the shift to converged networks (i.e. networks able to convey voice, data, image and video traffic on a common platform) based upon packet switching and Internet Protocol (IP) suite. Prereq., TLEN 5210. TLEN 5380 and ATLS 5380 are the same course. Prerequisites: Restricted to Graduate Students only.

ATOC

## ATOC-1050 (3) Weather and the Atmosphere

Introduces principles of modern meteorology for nonscience majors, with emphasis on scientific and human issues associated with severe weather events. Includes description, methods of prediction, and impacts of blizzards, hurricanes, thunderstorms, tornadoes, lightning, floods, and firestorms. Meets MAPS requirement for natural science: non-lab. Approved for arts and sciences CORE curriculum: natural science.

[College of Arts & Sciences](#)
[Atmospheric & Oceanic Sciences](#)

## ATOC-1060 (3) Our Changing Environment: El Nino, Ozone, and Climate

Discusses the Earth's climate for nonscience majors, focusing on the role of the atmosphere, oceans, and land surface. Describes the water cycle, atmospheric circulations, and ocean currents, and how they influence global climate, El Nino, and the ozone hole. Discusses human impacts from climate change. Prereq., ATOC 1050. Approved for arts and sciences CORE curriculum: natural science.

[College of Arts & Sciences](#)
[Atmospheric & Oceanic Sciences](#)

## ATOC-1070 (1) Weather and the Atmosphere Laboratory

Optional laboratory for ATOC 1050. Laboratory experiments illustrate fundamentals of meteorology. Covers collection, analysis, and discussion of data related to local weather. Uses computers for retrieval and interpretation of weather data from Colorado and across the U.S. Prereq. or coreq., ATOC 1050 or instructor consent. Approved for arts and sciences CORE curriculum: natural science.

[College of Arts & Sciences](#)
[Atmospheric & Oceanic Sciences](#)

## ATOC-3070 (3) Introduction to Oceanography

Investigates the broad-scale features and dynamics of the Earth's oceans. The course is roughly divided amongst the four major, interrelated disciplines of oceanography: marine geology, marine chemistry, physical oceanography (i.e. circulation), and marine biology. Specific topics include sea floor spreading, marine sediments, salinity, biogeochemical cycles, currents, waves, tides, primary production, marine ecology, marine resources, global warming, and much more. Prereq., any two-course sequence of natural science courses. Same as GEOL 3070. Approved for arts and sciences CORE curriculum: natural science.

College of Arts & Sciences Atmospheric & Oceanic Sciences

---

## ATOC-3300 (3) Analysis of Climate and Weather Observations

Discusses instruments, techniques, and statistical methods used in atmospheric observations. Covers issues of data accuracy and analysis of weather maps. Provides application to temperature and precipitation records, weather forecasting, and climate change trends. Uses computers to access data sets and process data. Prereqs., ATOC 1050 and 1060, or ATOC 3600/GEOG 3601/ENVS 3600, or GEOG 1001 and 1-semester calculus. Same as GEOG 3301. Approved for arts and sciences CORE curriculum: natural science.

College of Arts & Sciences Atmospheric & Oceanic Sciences

---

## ATOC-3500 (3) Air Chemistry and Pollution

Examines the composition of the atmosphere, and sources of gaseous and particulate pollutants: their chemistry, transport, and removal from the atmosphere. Applies general principles to acid rain, smog, and stratospheric ozone depletion. Prereqs., two semesters of chemistry. ATOC 3500 and CHEM 3151 are the same course. CHEM 3151 was formerly CHEM 3500. Approved for arts and sciences core curriculum: natural science.

College of Arts & Sciences Atmospheric & Oceanic Sciences

---

## ATOC-3600 (3) Principles of Climate

Describes the basic components of the climate system: the atmosphere, ocean, cryosphere, and lithosphere. Investigates the basic physical processes that determine climate and link the components of the climate system. Covers the hydrological cycle and its role in climate, climate stability, and global change. Includes forecasting climate and its application and human dimensions. Prereqs., ATOC 1050 and 1060, or ATOC 3300/GEOG 3301, or GEOG 1001 and 1-semester calculus. Same as GEOG 3601/ENVS 3600. Approved for arts and sciences CORE curriculum: natural science.

College of Arts & Sciences Atmospheric & Oceanic Sciences

---

## ATOC-3720 (3) Planets and Their Atmospheres

Explores the physics and chemistry of the atmospheres of Mars, Venus, Jupiter, Saturn, and Titan. Examines evolution of the atmospheres of Earth, Venus, and Mars; and the escape of gases from the Galilean satellites, Titan and Mars; the orbital characteristics of moons, planets, and comets. Uses recent results of space exploration. Elective for APS major and minor. Prereq., PHYS 1110--1120, and either MATH 1300--2300, or APPM 1350--1360, or instructor consent. Same as ASTR 3720. Prerequisites: Restricted to students

---

with 57-180 credits (Junior or Senior) Astronomy (ASTR) or Atmospheric & Oceanic Sciences (ATOC) majors only.

College of Arts & Sciences Atmospheric & Oceanic Sciences

---

## ATOC-4215 (3) Descriptive Physical Oceanography

Introduces descriptive and dynamical physical oceanography, focusing on the nature and dynamics of ocean currents and their role in the distribution of heat and other aspects of ocean physics related to the Earth's climate. Dynamical material limited to mathematical descriptions of oceanic physical systems. Restricted to seniors. Same as ATOC 5215 and ASEN 4215. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

College of Arts & Sciences Atmospheric & Oceanic Sciences

---

## ATOC-4500 (1-3) Special Topics in Atmospheric and Oceanic Sciences

Acquaints students with current research in atmospheres, oceans, and climate. Topics may vary each semester. May be repeated for a total of 9 total credit hours within the degree. Students may register for more than one section of this course in the same semester.

College of Arts & Sciences Atmospheric & Oceanic Sciences

---

## ATOC-4700 (3) Weather Analysis & Forecasting

Utilizing a range of operational weather observations to analyze current weather conditions, providing hands-on experience interpreting observations and relating those observations to the physical principles that govern atmospheric behavior is the course emphasis. It focuses on how to read weather reports, analyze observations, and how to prepare weather maps to analyze current conditions and how to interpret numerical weather forecasts. Prereqs., ATOC 1050 or 1060. Recommended prereq., ATOC 4720. Approved for arts and sciences core curriculum: natural science.

College of Arts & Sciences Atmospheric & Oceanic Sciences

---

## ATOC-4720 (3) Introduction to Atmospheric Physics and Dynamics

Introduces the fundamental physical principles that govern the atmosphere, and provides an elementary description and interpretation of a wide range of atmospheric phenomena. Topics include atmospheric structure and composition, electromagnetic radiation, clouds, precipitation, energy balance, atmospheric motion, and climate. Prereqs., one year of calculus and one year of physics with calculus.

College of Arts & Sciences Atmospheric & Oceanic Sciences

---

## ATOC-4750 (3) Desert Meteorology and Climate

Introduces students to the dynamic causes of deserts in the context of atmospheric processes and land-surface physics. Discusses desert severe weather, desert microclimates, human impacts and desertification, inter-annual variability in aridity (drought), the effects of

deserts on global climate, and the impact of desert climate on humans. Prereq., ATOC 1050 or equivalent. Same as ATOC 5750. Approved for arts and sciences CORE curriculum: natural sciences.

College of Arts & Sciences Atmospheric & Oceanic Sciences

---

---

## ATOC-4800 (3) Policy Implications of Climate Controversies

Examines controversial issues related to the environment, including climate change. Covers scientific theories and the intersection between science and governmental policy. Includes discussion, debate, and critical reading of textual materials. Prereqs., ATOC 1060 or 3600. Credit not granted for this course and ATOC 5000.

College of Arts & Sciences Atmospheric & Oceanic Sciences

---

---

## ATOC-4900 (1-3) Independent Study

May be repeated up to 6 total credit hours. Prereq., instructor consent.

College of Arts & Sciences Atmospheric & Oceanic Sciences

---

---

## ATOC-4950 (1-3) Honors Thesis

Students work independently on a research topic under the guidance of a faculty member. A written thesis and an oral presentation of the work are required. Registration by arrangement and with consent of faculty mentor. Prereq., junior or senior standing, and minimum 3.00 GPA. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

College of Arts & Sciences Atmospheric & Oceanic Sciences

---

---

## ATOC-5000 (3) Critical Issues in Climate and the Environment

Discusses current issues such as ozone depletion, global warming, and air quality for graduate students in nonscientific fields. Provides the scientific background necessary to understand, follow scientific developments, and critically evaluate these issues. Same as ENVS 5830. Credit not granted for this course and ATOC 4800.

College of Arts & Sciences Atmospheric & Oceanic Sciences

---

---

## ATOC-5050 (3) Introduction to Atmospheric Dynamics

Covers atmospheric motion and its underlying mathematical and physical principles. Explores the dynamics of the atmosphere and the mathematical laws governing atmospheric motion. Topics include atmospheric composition and thermodynamics, conservation laws, geostrophic balance, vorticity dynamics, boundary layers, and baroclinic instability. ATOC graduate CORE course. Prerequisites: Restricted to Graduate Students only.

## ATOC-5051 (3) Introduction to Physical and Chemical Oceanography

Provides fundamental knowledge of the basic dynamics and chemical composition of the ocean. Prereq., calculus. ATOC graduate core course. Prerequisites: Restricted to Graduate Students only.

## ATOC-5060 (3) Dynamics of the Atmosphere

Examines large-scale motions in a stratified rotating atmosphere, and quasi-geostrophic flow, barotropic and baroclinic instabilities, cyclogenesis, global circulations, and boundary layer processes. Ageostrophic motions, including Kelvin waves, internal gravity waves, and the theory of frontogenesis are also considered. Prereq., ATOC 5050 or equivalent. ATOC graduate CORE course.

## ATOC-5061 (3) Dynamics of Oceans

Explores theories of the large-scale ocean, including quasigeostrophic, planetary geostrophic, and shallow water equations. Topics may vary to focus on ocean climate (e.g. thermocline, westward intensification), ocean waves (e.g. gravity, Rossby, and Kelvin), or ocean models (toy, analytic, and numerical). Maybe repeated up to 9 total credit hours. Prereqs., ATOC 5400 and ATOC 5051 or 5060 or equivalent. Prerequisites: Restricted to Graduate Students only.

## ATOC-5151 (3) Atmospheric Chemistry

Reviews basic kinetics and photochemistry of atmospheric species and stratospheric chemistry with emphasis on processes controlling ozone abundance. Tropospheric chemistry focusing on photochemical smog, acid deposition, oxidation capacity of the atmosphere, and global climate change. Prereq., graduate standing or instructor consent. ATOC graduate CORE course. Same as CHEM 5151.

## ATOC-5215 (3) Descriptive Physical Oceanography

Same as ATOC 4215 and ASEN 5215. Prerequisites: Restricted to Graduate Students only.

## ATOC-5235 (3) Introduction to Atmospheric Radiative Transfer and Remote Sensing

Examines fundamentals of radiative transfer and remote sensing with primary emphasis on the Earth's atmosphere; emission, absorption and scattering by molecules and particles; multiple scattering; polarization; radiometry and photometry; principles of inversion theory; extinction- and emission-based passive remote sensing; principles of active remote sensing; lidar and radar; additional applications such as the greenhouse effect and Earth's radiative energy budget. ATOC graduate CORE course. Same as ASEN 5235. Prerequisites: Restricted to Graduate Students only.

[College of Arts & Sciences](#) [Atmospheric & Oceanic Sciences](#)

## ATOC-5300 (3) The Global Carbon Cycle

Covers the role of the ocean, terrestrial biosphere, and atmosphere in the global carbon cycle. Specific topics include marine carbonate chemistry, biological production, terrestrial fluxes, anthropogenic emissions, and the evolution of the global carbon cycle in a changing climate. Prereq., graduate standing in a physical science or instructor consent. Prerequisites: Restricted to Graduate Students only.

ATOC

## ATOC-5400 (3) Introduction to Fluid Dynamics

Covers equations of fluid motion relevant to planetary atmospheres and oceans, and stellar atmospheres; effects of rotation and viscosity; and vorticity dynamics, boundary layers, and wave motions. Introduces instability theory, nonlinear equilibration, and computational methods in fluid dynamics. Prereq., partial differential equations or equivalent. Same as ASTR 5400. Prerequisites: Restricted to Graduate Students only.

[College of Arts & Sciences](#) [Atmospheric & Oceanic Sciences](#)

## ATOC-5410 (3) Fluid Instabilities, Waves, and Turbulence

Nonlinear waves and instabilities; wave-mean and wave-wave interactions, resonant triads; secondary instability and transition to turbulence; diagnosis, modeling, and parameterization of turbulent flows in geophysics and astrophysics. Prereq., ASTR 5120, ATOC 5060, or 5400. Same as ASTR 5410.

[College of Arts & Sciences](#) [Atmospheric & Oceanic Sciences](#)

## ATOC-5540 (3) Mathematical Methods

Applied mathematics course; provides necessary analytical background for courses in plasma physics, fluid dynamics, electromagnetism, and radiative transfer. Covers integration techniques, linear and nonlinear differential equations, WKB and Fourier transform methods, adiabatic invariants, partial differential equations, integral equations, and integrodifferential equations. Same as ASTR 5540. Prerequisites: Restricted to Graduate Students only.

[College of Arts & Sciences](#) [Atmospheric & Oceanic Sciences](#)

---

## ATOC-5560 (3) Radiative Processes in Planetary Atmospheres

Application of radiative transfer theory to problems in planetary atmospheres, with primary emphasis on the Earth's atmosphere; principles of atomic and molecular spectroscopy; infrared band representation; absorption and emission of atmospheric gases; radiation flux and flux divergence computations; radiative transfer and fluid motions; additional applications such as the greenhouse effect, inversion methods and climate models. Recommended prereq., ATOC 5235. Same as ASTR 5560.

College of Arts & Sciences Atmospheric & Oceanic Sciences

---

## ATOC-5600 (3) Physics and Chemistry of Clouds and Aerosols

Clouds and aerosols are ubiquitous in planetary atmospheres, where they impact climate, atmospheric chemistry, remote sensing, and weather. Applies basic microphysical, radiative, and chemical processes affecting particles to issues in current literature. ATOC graduate CORE course. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Atmospheric & Oceanic Sciences

---

## ATOC-5750 (3) Desert Meteorology and Climate

Same as ATOC 4750.

College of Arts & Sciences Atmospheric & Oceanic Sciences

---

## ATOC-5760 (3) Astrophysical Instrumentation

Covers the fundamentals underlying the design, construction, and use of instrumentation used for astrophysical research ranging from radio-wavelengths to gamma rays. Topics include: Fourier transforms and their applications; optical design concepts; incoherent and coherent signal detection; electronics and applications; signal acquisition and processing. Prereq., graduate standing.

College of Arts & Sciences Atmospheric & Oceanic Sciences

---

## ATOC-5810 (3) Planetary Atmospheres

Covers the structure, composition, and dynamics of planetary atmospheres. Also includes origin of planetary atmospheres, chemistry and cloud physics, greenhouse effects, climate, and the evolution of planetary atmospheres past and future. Prereq., graduate standing in a physical science, or instructor consent. Same as ASTR/GEOL 5810. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Atmospheric & Oceanic Sciences

---

## ATOC-5820 (3) Origin and Evolution of Planetary Systems

Reviews protoplanetary disks, condensation in the solar nebula, composition of meteorites, planetary accretion, comets and asteroids, planetary rings, and extrasolar planets. Applies celestial mechanics to the orbital evolution of solar system bodies. Prereq., graduate

---

standing in a physical science, or instructor consent. Same as ASTR 5820 and GEOL 5820. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Atmospheric & Oceanic Sciences

---

## ATOC-5830 (3) Topics in Planetary Science

Covers current topics in planetary science based on recent discoveries, spacecraft observations, or other developments. Focuses on a specific topic such as Mars, Venus, Galilean satellites, exobiology, comets, or extrasolar planets. May be repeated up to 6 total credit hours, provided the topics vary. Prereq., graduate standing in physical sciences, or instructor consent. Same as ASTR 5830 and GEOL 5830.

College of Arts & Sciences Atmospheric & Oceanic Sciences

---

## ATOC-5835 (1) Seminar in Planetary Science

Studies current research on a topic in planetary science. Subjects may vary each semester. May be repeated up to 4 total credit hours to meet candidacy requirements. Prereq., graduate standing or instructor consent. Same as ASTR 5835 and GEOL 5835. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Atmospheric & Oceanic Sciences

---

## ATOC-5900 (1-6) Independent Study

May be repeated up to 6 total credit hours. Students may register for more than one section of this course in the same semester. Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Atmospheric & Oceanic Sciences

---

## ATOC-6020 (1) Seminar in Atmospheric and Oceanic Sciences

Studies an area of current research in the atmospheric and oceanic sciences. Students read selected papers from the literature. Students and faculty give presentations and participate in discussions. May be repeated for a total of 6 credit hours within the degree. May be repeated for a total of 3 credit hours within a semester. Prereq., graduate standing and instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Atmospheric & Oceanic Sciences

---

## ATOC-6100 (3) Predicting Weather and Climate

Discusses background theory and procedures used in weather and climate prediction on a variety of space and time scales. Includes the forecasting of weather on time scales of days; error growth in numerical models; prediction of El Nino and monsoon variability; and prediction of the impact of anthropogenic influences on climate. Consists of lectures and a weekly laboratory. Prereq., ATOC 5060, 5061, or instructor consent.

---

---

## ATOC-6950 (1-6) Master's Thesis

---

---

## ATOC-7500 (1-3) Special Topics in Atmospheric and Oceanic Sciences

Acquaints students with current research in atmospheres, oceans, and climate. Topics may vary each semester. May be repeated up to 9 total credit hours. Students may register for more than one section of this course in the same semester. Prerequisites: Restricted to Graduate Students only.

---

---

## ATOC-8990 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

### BADM-2050 (3) Honors/Special Topics

Variable topics in business, drawing from a variety of disciplines. Prereq., 3.50 minimum cumulative GPA.

[Leeds School of Business](#) [Business Administration](#)

### BADM-2880 (3) Special Topics

Explores historical developments, contemporary issues, industry trends, and best practices pertinent to the business of sports. The course examines how sports enterprises are managed, and the impacts that such enterprises have on the economic and social fabric of communities. The course is designed to provide sufficient background for educated consumption of this literature and pursuit of further study if desired. Restricted to sophomores/juniors/seniors.

[Leeds School of Business](#) [Business Administration](#)

### BADM-3100 (1) Professional Development

Designed to provide opportunities to understand and develop professional competencies for successful careers in business. Designed to increase knowledge of job search strategies and formulate a career management plan for transitioning to the workplace. Topics such as resumes, cover letters, personal branding, job search strategies, internships, career choices, networking and social media will be covered. A Self-Marketing Plan will be developed to help focus on long-term career goals. Restricted to juniors and seniors.

---

Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

[Leeds School of Business](#) [Business Administration](#)

---

## BADM-3880 (3) Special Topics

Introduces students to the many facets of the marketing of sport and marketing through sport. Theoretical and practical applications of marketing sport are examined. The course will provide students with an understanding of current marketing concepts, and best business practices, related to sports enterprises and a foundation for pursuit of further study and work in sports and event marketing. Restricted to juniors/seniors.

[Leeds School of Business](#) [Business Administration](#)

---

## BADM-3930 (1-6) Internship

Student training and participation in government or industry environment under faculty supervision. Prereqs., BCOR 1000, 2000, 2010, 2050, GPA 2.50, junior standing and instructor consent.

[Leeds School of Business](#) [Business Administration](#)

---

## BADM-4820 (1-6) Special Topics

Variable topics in business drawing from a variety of business disciplines. Prerequisites: Restricted to Business majors with 52-180 units completed.

[Leeds School of Business](#) [Business Administration](#)

---

## BADM-4825 (3) Experimental Seminar

Offered irregularly to provide opportunity for investigation of new frontiers in Business Administration. Restricted to juniors/seniors.

[Leeds School of Business](#) [Business Administration](#)

---

## BADM-4830 (1-3) Special Topics

Various topics in business and society drawing from a variety of business disciplines. Restricted to junior/senior BU majors. Prerequisites: Restricted to College of Business majors only.

[Leeds School of Business](#) [Business Administration](#)

---

## BADM-4910 (2) VITA-Volunteer Tax Assistance

Offers students the opportunity to gain professional work experience in an accounting position while still in school. Provides academically relevant work experience that complements students' studies and enhances their career potential. Prereqs., BCOR 2000 and department consent. Prerequisites: Restricted to Business majors with 52-180 units completed.

[Leeds School of Business](#) [Business Administration](#)

---

---

## BADM-6820 (1-3) Topics in Business Administration

Offered irregularly to provide opportunity to investigate new topics in business administration.

[Leeds School of Business](#) [Business Administration](#)

---

---

## BADM-6930 (3) Commercializing Sustainable Energy Technologies

Addresses the opportunities and problems of commercializing new renewable energy technologies. Focuses on energy markets, opportunity identification, life cycle analysis, policy economics, project financing, and economic analysis as they relate to bringing renewable energy technologies to market.

BAKR

## BAKR-1500 (3) Colorado: History, Ecology, and Environment

Studies the Colorado environment from multiple aspects of history and ecology. Presents historical events in their environmental context and examines lingering environmental consequences. Presents major habitats within Colorado and relates their historical and present uses. Lecture and field trips. Approved for arts and sciences CORE curriculum: United States context.

[College of Arts & Sciences](#) [Baker Residential Academic Program](#)

## BAKR-1600 (3) Creating a Sustainable Future

Explores opportunities for moving toward a sustainable 21st century U.S. society. Evaluates socio-economic institutions, values and forces in late 20th century U.S. society that are unsustainable, given 21st century environmental, economic and social challenges. Contemplates societal progress from reflective perspectives and leading visionaries, including CU-generated documents. Explores actions you can adopt now that empower you to live a more sustainable lifestyle. Approved for arts and sciences CORE curriculum: contemporary societies.

[College of Arts & Sciences](#) [Baker Residential Academic Program](#)

## BAKR-1800 (3) Exploring Opportunities in the Natural and Environmental Sciences

Engaging students to explore and discover exciting internships, careers, and research opportunities in fields associated with natural science and environmental studies. The class will include seminars, lectures, student presentations, and the exploration of places like the Denver Zoo, natural science museums (Denver and CU campus), Mountain Research Station, Campus Greenhouse, Butterfly Pavillion and Rocky Mountain National Park.

BCOR

## BCOR-1010 (3) Introduction to Business

Provides an overview of how business works through the application and integration of the fundamental business functions of accounting, finance, management, marketing, and systems. Weekly discussion of current events will focus on entrepreneurship, international business, business and society, and career topics. Restricted to freshmen business majors. Prerequisites: Restricted to Business majors with less than 53 units.

[Leeds School of Business](#) [Business Core](#)

## BCOR-1020 (3) Business Statistics

Covers descriptive statistics, basic probability theory, statistical inference and hypothesis testing, correlation and simple linear regression analysis. Students learn decision making and solving business problems by using data. Uses statistical features of commonly used business spreadsheet software. Prereq., MATH 1071. Formerly BCOR 2010. Credit not granted for this course and MATH 2510. Prerequisites: Restricted to Business, ADVT or IAFS Majors only. Requires pre-requisite course of ECON 1078 or MATH 1071 or MATH 1001 or MATH 1011 or MATH 1150 or MATH 3130, or APPM 3310, or APPM 2360 or APPM 2380

[Leeds School of Business](#) [Business Core](#)

## BCOR-2000 (4) Accounting and Financial Analysis

Builds a basic understanding of how information regarding a firm's resources and obligations is conveyed to decision makers both outside and within the firm. Prereq., BCOR 1020 or MATH 2510 or ECON 3818. Restricted to Business, SPPR-PRO, IAFS majors, or students with a subplan of WBE only. Prerequisites: Requires pre-requisite course of BCOR 1020 or MATH 2510 or ECON 3818. Restricted to BU, SPPR-PRO, IAFS Majors, or students with a subplan of WBE only.

[Leeds School of Business](#) [Business Core](#)

## BCOR-2200 (3) Introductory Finance

Emphasizes the concepts and skills needed to make sound financial decisions. Topics include financial statement analysis, time value of money, interest rates, bond valuation and bond markets, stock valuation and stock markets, cost of capital and capital structure, capital budgeting, financial forecasting, and working capital management. Prereqs., BCOR 1020 or MATH 2510 or ECON 3818 and BCOR 2000. Restricted to Business or IAFS majors or students with a sub plan of WBE and 26-180 units completed. Formerly BCOR 2100. Prerequisites: Requires prerequisite courses of BCOR 1020 or MATH 2510 or ECON 3818 & BCOR 2000. Restricted to Business or International Affairs majors or students with a subplan of WBE and 26-180 units completed.

Leeds School of Business Business Core

---

## BCOR-2300 (3) Adding Value with Management

Focuses on how modern business firms compete in the global marketplace by adding value. Examines the value-chain of a firm and how firms use people, organizations, operations, and information systems to compete and win in world markets. Also covers contemporary issues such as total quality management, process reengineering, teams and team building, employee empowerment, and horizontal organizations. Restricted to Business, SPPR-PRO majors, or students with a subplan of WBE only and 26-180 units completed. Formerly BCOR 2150. Prerequisites: Restricted to Business, SPPR-PRO majors, or students with a subplan of WBE only and 26-180 units completed.

Leeds School of Business Business Core

---

## BCOR-2400 (3) Fundamentals of Marketing

Examines how activities in organizations provide value to the purchasers of its products and services. Includes gathering information about consumers and competitors through research and information systems, applying knowledge and technology to the design of products and services, communicating information to consumers and organizational units, and pricing and distributing products and services. Also includes issues in global marketing, ethics and diversity, relationship marketing, and integrating marketing with financial analyses. Prereq., BCOR 1020 or MATH 2510 or ECON 3818. Restricted to Business, SPPR-PRO, Advertising, IAFS majors, or students with a subplan of WBE only and 26-180 units completed. Prerequisites: Requires prerequisite course of BCOR 1020 or MATH 2510 or ECON 3818. Restricted to Business, SPPR-PRO, Advertising, International Affairs majors, or students with a subplan of WBE only and 26-180 units completed.

Leeds School of Business Business Core

---

## BCOR-2500 (3) Introduction to Operations and Information Management

Takes a systems perspective in exploring the use of information, processes, and models used by businesses to produce goods and services and to effectively manage accounting, finance, human resources, strategy, supply chains/inventory, and other activities in a business. Focuses on making better business decisions faster through better business intelligence by using the right information, at the right time, provided to the right managers. Prereq., BCOR 1020 or MATH 2510 or ECON 3818. Restricted to Business majors with 13-180 units completed. Prerequisites: Requires pre-requisite course of BCOR 1020 or MATH 2510 or ECON 3818. Restricted to Business majors with 13-180 units completed.

Leeds School of Business Business Core

---

## BCOR-3000 (3) Business Law, Ethics, and Public Policy

Surveys major topics and case studies in business law, business ethics, and government policy. Business law topics include the American legal system, constitutional law, common law, contract principles, criminal and tort law, intellectual property, employment law, and personal and real property law. Ethics topics include the philosophy of law, legal versus moral issues, and professional responsibility. Public policy topics include the roles of business and government, types of government intervention, and the nature and theory of governmental policy formulation. Restricted to Business, Spanish (SPPR), students with a subplan of WBE, or Concurrent Degree majors only and 52-180 units completed. Prerequisites: Restricted to Business, Spanish (SPPR), students with a subplan of WBE, or Concurrent Degree majors only and 52-180 units completed.

[Leeds School of Business](#) [Business Core](#)

## BCOR-3010 (3) Business Applications of Social Responsibility

Explores alternative views of the role of business in our global society through detailed case analyses, beginning with the free market view. This is a cross-functional area course that helps students to isolate and articulate their personal values that will shape business conduct. Emphasizes individual and organizational responsibility for business behavior in the broader social context. Prereq., BCOR 1010, 1020, 2000, 2200, 2300, 2400, 2500 and 59 hours completed. Prerequisites: Restricted to Business majors with 60-180 units completed.

BPOL

## BPOL-6940 (1) Master's Candidate for Degree

[Leeds School of Business](#) [Business Policy and Strategy Management](#)

## BPOL-6950 (1-6) Master's Thesis

Prerequisites: Restricted to Graduate Students only.

[Leeds School of Business](#) [Business Policy and Strategy Management](#)

## BPOL-7500 (3) Doctoral Seminar: Strategic Management 1

Provides an overview of the literature, including classic articles and books, in business strategy and policy (strategic management). Brings the student up to date on schools of thought, research issues, and practical applications in strategic management.

[Leeds School of Business](#) [Business Policy and Strategy Management](#)

## BPOL-7530 (3) Doctoral Seminar: Strategic Management 2

Continuation of BPOL 7500. Prereq., BPOL 7500. Prerequisites: Restricted to Business Administration graduate students only.

[Leeds School of Business](#) [Business Policy and Strategy Management](#)

## BPOL-7560 (3) Entrepreneurship, International Business and Technology Management

Provides doctoral students with an understanding of strategic management and entrepreneurship theory, as applied to international business and technology management literatures. Additionally, students are exposed to research methods in the strategy and entrepreneurship arenas. Prereqs., BPOL 7500 and 7530.

Leeds School of Business | Business Policy and Strategy Management

BSLW

## BSLW-4120 (3) Advanced Business Law

Continuation of BCORr 3000. Covers sales and lease transactions, negotiable instruments, creditor rights and bankruptcy, secured transactions, agency, business organizations, protection of property, and other advanced topics in legal and regulatory environments. BCOR 3000 and BSLW 4120/5120 together cover the business law topics tested on the CPA exam. Prereqs., BCOR 3000 and junior standing. Same as BSLW 5120. Prerequisites: Restricted to Business majors with 52-180 units completed.

[Leeds School of Business](#) | [Business Law](#)

## BSLW-4820 (1-3) Topics in Business Law

Experimental course offered irregularly for purpose of presenting new subject matter in business law.

[Leeds School of Business](#) | [Business Law](#)

## BSLW-4825 (3) Experimental Seminar

Offered irregularly to provide opportunity for investigation of new frontiers in Business Law. Restricted to juniors/seniors.

CAMW

### CAMW-2001 (3) The American West

Students tour the cultural, social, and natural features of the American West, based on readings and presentations by guest faculty from across disciplines. Designed as the foundation course in the Western American Studies certificate program. Restricted to students with 0-56 units (freshmen and sophomores) completed. Approved for arts and sciences core curriculum: United States context. Prerequisites: Restricted to students with 0-56 credits (Freshmen or Sophomores).

[College of Arts & Sciences](#) [Center for the American West](#)

### CAMW-3939 (1-3) Center of the American West Internship

Work for public and private organizations on projects that enhance the understanding of various Western American topics and issues (environmental, cultural, public policy, etc.), and which foster students' development as community leaders working for a sustainable West. May be repeated up to 6 total credit hours. Recommended prereq., CAMW 2001. Restricted to juniors and seniors. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

[College of Arts & Sciences](#) [Center for the American West](#)

### CAMW-4001 (3) Seminar on the American West

Interdisciplinary capstone seminar for the Western American Studies certificate program. Applies a selected natural science, social science, or humanities topic to the American West and addresses how westerners can make and sustain viable landscapes and communities. Recommended prereqs., CAMW 2001 and completion of Western American Studies certificate electives. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

[College of Arts & Sciences](#) [Center for the American West](#)

# CAMW-4840 (1-4) Independent Study: The American West

CESR

## CESR-4000 (1) Leadership Challenges I: Exercises in Moral Courage

Part one of a year-long course that focuses on values and leadership at the top level of organizations. The course is based on an interactive model that brings in six high-level executives to share their experiences and present critical business dilemmas, to which students prepare solutions for the executives to evaluate. Recommended prereq., BCOR 3010. Restricted to juniors/seniors.

Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

[Leeds School of Business](#) | [Curriculum Emphasis on Social Responsibility](#)

## CESR-4001 (2) Leadership Challenges II: Exercises in Moral Courage

Continuation of a year-long course that focuses on values and leadership at the top level of organizations. The course is based on an interactive model that brings in six high-level executives to share their experiences and present critical business dilemmas, to which students prepare solutions for the executives to evaluate. Prereq., CESR 4000. Recommended prereq., BCOR 3010. Restricted to juniors/seniors. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

[Leeds School of Business](#) | [Curriculum Emphasis on Social Responsibility](#)

## CESR-4005 (3) Business Solutions for the Developing World: Learning through Service

Provides students with practical knowledge and hands-on experience in developing sustainable business strategies to meet the real-world needs of small business entrepreneurs in developing countries. Student teams work with Peace Corps volunteers and other social entrepreneurs who are addressing social and environmental issues. Restricted to Business (BUSN) majors with 52-180 units completed. Prereq., BCOR 3010. Prerequisites: Restricted to Business (BUSN) majors with 52-180 units completed.

[Leeds School of Business](#) | [Curriculum Emphasis on Social Responsibility](#)

## CESR-4010 (3) Microfinance

In the last two decades, microfinance initiatives have provided the primary worldwide impetus to promote economic independence for the poor (1.4 billion). Microfinance seminar links the financial markets with entrepreneurship to create a platform for building a microfinance institution that facilitates financial inclusion to the poor. The students in a semester long project build a hypothetical financial institution that provides access to credit, saving, insurance and more to a segmented poor population, somewhere in the world including the U.S. Restricted to Business majors with 52-180 units completed. CESR 4010 and FNCE 4832 are the same course. Prerequisites: Restricted to Business majors with 52-180 units completed.

Leeds School of Business | Curriculum Emphasis on Social Responsibility

## CESR-4130 (3) Sustainable Operations

Operational sustainability is not just an obligation, as set of strategies or a niche market to explore, but a critical shift in mindset of how businesses function. Sustainable operations examines business strategies in response to environmental and social challenges. The course takes a pragmatic business perspective on improving operations across the supply chain. Grounded in resource efficiency, life-cycle thinking and a dose of investigative skepticism, the course assists students to thoroughly understand the scope of costs, benefits and risks associated with driving businesses toward sustainable operations. Prereqs., BCOR 2500, 3010 and 60 hours completed. MGMT 4130 and CESR 4130 are the same course. Prerequisites: Restricted to students with 60-180 units completed.

Leeds School of Business | Curriculum Emphasis on Social Responsibility

## CESR-4825 (3) Experimental Seminar

Offered irregularly to provide opportunity for investigation of new frontiers in Social Responsibility. Prereq., BCOR 3010. Restricted to BUSN majors with minimum 52 units completed. Prerequisites: Restricted to Business majors with 52-180 units completed.

Leeds School of Business | Curriculum Emphasis on Social Responsibility

## CESR-4826 (3) Exp. Sem-Social Entrepreneurship: Designing a Better World

See the future through the eyes of entrepreneurs who are addressing global and social environmental problems such as poverty and deforestation. Can the social ventures they create to solve these problems survive over time and will they achieve the impact they seek? We will meet some of these social entrepreneurs and, in teams, write case studies to tell their stories. Restricted to non-Business majors with 60-180 units completed. CESR 4826 and ESBM 4826 are the same course. Prerequisites: Restricted to non-Business majors with 60-180 units completed.

Leeds School of Business | Curriculum Emphasis on Social Responsibility

CHEM

### CHEM-1011 (3) Environmental Chemistry 1

Lect. Introduces basic principles of chemistry with applications to current environmental issues including toxic chemicals, air and water pollution, energy sources and their environmental impact, and climate change resulting from the greenhouse effect. No credit given to chemistry or biochemistry majors for CHEM 1011 if students already have credit in any college-level chemistry course numbered 1113/1114 (formerly 1111) or higher. Meets MAPS requirements for natural sciences: chemistry or physics. Approved for arts and sciences core curriculum: natural science.

[College of Arts & Sciences](#) [Chemistry](#)

### CHEM-1021 (4) Introductory Chemistry

Lect. and lab. For students with no high school chemistry or a very weak chemistry background. Remedies a deficiency in natural science MAPS requirements and prepares students for CHEM 1113/1114. No credit given to chemistry or biochemistry majors for CHEM 1021 if students already have credit in any college-level chemistry course numbered 1113/1114 (formerly 1111) or higher. Prereq., one year high school algebra or concurrent enrollment in MATH 1011. Approved for arts and sciences core curriculum: natural science.

[College of Arts & Sciences](#) [Chemistry](#)

### CHEM-1031 (4) Environmental Chemistry 2

Lect. and lab. Applications of chemical principles to current environmental issues including acid rain, stratospheric ozone depletion, the Antarctic ozone hole, solar energy conversion and fuel cells, and the environmental consequences of nuclear war. Laboratory experience is included. No credit given to chemistry or biochemistry majors for 1031 if students already have credit in any college-level chemistry course numbered 1113/1114 (formerly 1111) or higher. Prereq., CHEM 1011 with a grade of C- or higher. Approved for arts and sciences core curriculum: natural science.

[College of Arts & Sciences](#) [Chemistry](#)

---

## CHEM-1113 (4) General Chemistry 1

Lect., rec. Intended for first-semester students whose academic plans require advanced work in chemistry. Subjects: components of matter, stoichiometry, classes of reactions, gases, thermochemistry, atomic structure, electron configuration, chemical bonding, molecular shapes, covalent bonding, organic compounds, intermolecular forces, equilibrium. Prereqs., one year high school chemistry or CHEM 1021 (min grade C-); high school math through pre-calculus. Not recommended for students with grades below B- in CHEM 1021. Coreq., CHEM 1114. Not open to engineering students with exception of EPEN majors. Credit not granted for this course and CHEM 1111, 1251, 1351, or CHEM 1221/CHEN 1211. Approved for arts and sciences core curriculum: natural science. Prerequisites: AMEN, AREN, ASEN, CHEN, CSEN, CVEN, ECEN, EEEN, EVEN, MCEN, OPEN or CBEN majors are not allowed to take this class.

College of Arts & Sciences Chemistry

---

## CHEM-1114 (1) Laboratory in General Chemistry 1

Lab. Intended for first-semester students whose academic plans require advanced work in chemistry. Instruction in experimental techniques which coordinate with lecture topics in CHEM 1113. Prereqs., one year high school chemistry or CHEM 1021 (min grade C-); high school math through pre-calculus. Not recommended for students with grades below B- in CHEM 1021. Coreq., CHEM 1113. Not open to engineering students with exception of EPEN majors. Credit not granted for this course and CHEM 1111, 1251, 1351, or CHEM 1221/CHEN 1211. Approved for arts and sciences core curriculum: natural science. Prerequisites: AMEN, AREN, ASEN, CHEN, CSEN, CVEN, ECEN, EEEN, EVEN, MCEN, OPEN or CBEN majors are not allowed to take this class.

College of Arts & Sciences Chemistry

---

## CHEM-1133 (4) General Chemistry 2

Lect., rec. Intended for second-semester students whose academic plans require advanced work in chemistry. Subjects: acid-base equilibria, buffers and titrations, thermodynamics, redox reactions, electrochemistry, transition elements and their coordination compounds, solubility/solubility equilibria, crystal field theory, kinetics, nuclear chemistry. Prereq., CHEM 1113/1114 or equivalent (min grade C-). Coreq., CHEM 1134. Credit not granted for this course and CHEM 1131, 1271 or 1371. Approved for arts and sciences core curriculum: natural science. Prerequisites: Requires pre-requisite courses of CHEM 1111 or CHEM 1113/1114 or CHEM 1251 or CHEM 1351 or CHEN 1211/CHEM1221.

College of Arts & Sciences Chemistry

---

## CHEM-1134 (1) Laboratory in General Chemistry 2

Lab. Intended for second-semester students whose academic plans require advanced work in chemistry. Instruction in experimental techniques which coordinate with lecture topics in CHEM 1133. Prereq., CHEM 1113/1114 or equivalent (min grade C-). Coreq., CHEM 1133. Credit not granted for this course and CHEM 1131, 1271, or 1371. Approved for arts and sciences core curriculum: natural science. Prerequisites: Requires pre-requisite courses of CHEM 1111 or CHEM 1113/1114 or CHEM 1251 or CHEM 1351 or CHEN 1211/CHEM1221.

College of Arts & Sciences Chemistry

---

---

## CHEM-1221 (2) Engineering General Chemistry Lab

Coreq., CHEN 1211. One hour recitation in which concepts and problems are re-emphasized, homework is collected, and quizzes are given. Three hour lab in which students perform experiments designed to illustrate chemical concepts discussed in CHEN 1211. Also introduction to basic techniques in chemical measurements and synthesis. Prereq., one year high school chemistry or CHEM 1001 or 1021 (min grade C-); high school algebra. Coreq., CHEN 1211. Credit not granted for this course and CHEM 1111, 1113/1114, 1251 or 1351. Restricted to engineering students only. Prerequisites: Requires pre-requisite of course CHEM 1001 or 1021 (minimum grade C-). Requires co-requisite of course CHEN 1211. Restricted to Engineering students only.

College of Arts & Sciences Chemistry

---

## CHEM-1251 (5) General Chemistry 1 for Chemistry and Biochemistry Majors

Lect. and lab. Intended for first-semester CHEM/BCHM majors. Subjects: components of matter, stoichiometry, classes of reactions, gases, thermochemistry, atomic structure, electron configuration, chemical bonding, molecular shapes, covalent bonding, organic compounds, intermolecular forces, equilibrium. Prereqs., one year high school chemistry or CHEM 1021 (minimum grade C-); high school math through pre-calculus. Not recommended for students with grade below B- in CHEM 1021. Restricted to CHEM/BCHM majors. Credit not granted for this course and CHEM 1113/1114, CHEM 1351, or CHEN 1211/CHEM 1221. Approved for arts and sciences core curriculum: natural science. Prerequisites: Restricted to Chemistry and Biochemistry majors only.

College of Arts & Sciences Chemistry

---

## CHEM-1271 (5) General Chemistry 2 for Chemistry and Biochemistry Majors

Lect. and lab. Intended for second-semester CHEM/BCHM majors. Subjects: acid-base equilibria, buffers and titrations, thermodynamics, redox reactions, electrochemistry, transition elements and their coordination compounds, solubility/solubility equilibria, crystal field theory, kinetics, nuclear chemistry. Prereq., CHEM 1251 or equivalent (minimum grade C-). Restricted to CHEM/BCHM majors. Credit not granted for this course and CHEM 1131, 1133/1134 or 1371. Approved for arts and sciences core curriculum: natural science. Prerequisites: Requires pre-requisite course of CHEM 1251 (minimum grade C-). Restricted to Chemistry and Biochemistry majors only.

College of Arts & Sciences Chemistry

---

## CHEM-1351 (5) Honors General Chemistry 1

Lect. and lab. Principles of chemistry and their applications are covered in a comprehensive manner (honors level) in this low-enrollment freshman course. Lectures include topics not covered in CHEM 1113/1114-1133/1134. The laboratory experience is more extensive; therefore, the CHEM 1351-371 sequence is highly recommended for well-prepared students who intend to major in chemistry, chemical engineering, physics, molecular biology, or related areas. Prereqs., one year high school chemistry; four years of high school math and/or a high score on the SAT or ACT math exam and one year of high school physics. Credit not granted for this course and CHEM 1113/1114, 1221, 1251, and CHEN 1211. Approved for arts and sciences core curriculum: natural science.

College of Arts & Sciences Chemistry

---

## CHEM-1371 (5) Honors General Chemistry 2

Lect. and lab. Continuation of CHEM 1351. Prereq., CHEM 1351 (min grade C-). Credit not granted for this course and CHEM 1131, 1133/1134 or 1271. Approved for arts and sciences core curriculum: natural science. Prerequisites: Requires pre-requisite course of CHEM 1351 (minimum grade C-).

College of Arts & Sciences Chemistry

---

## CHEM-3151 (3) Air Chemistry and Pollution

Examines the composition of the atmosphere, and sources of gaseous and particulate pollutants: their chemistry, transport, and removal from the atmosphere. Applies general principles to acid rain, smog, and stratospheric ozone depletion. Prereqs., two semesters of chemistry. ATOC 3500 and CHEM 3151 are the same course. CHEM 3151 was formerly CHEM 3500. Approved for arts and sciences core curriculum: natural science.

College of Arts & Sciences Chemistry

---

## CHEM-3251 (3) Sustainable Energy from a Chemistry Perspective

Explores qualitative and quantitative chemical aspects of energy systems (production, transmission, storage, utilization) including fossil, wind, solar, nuclear and biomass energy. Applies chemical principles including composition, structure, bonding, physical properties, thermodynamics, equilibrium and kinetics to energy systems and sustainability, especially environmental implications. Describes the importance of energy to the chemical industries and society as a whole. Prereqs., CHEM 1133/1134, CHEM 1271, CHEM 1371, or CHEN 1211/CHEM 1221 (min. grade C-).

College of Arts & Sciences Chemistry

---

## CHEM-3311 (4) Organic Chemistry 1

Lect. and rec. Intended primarily for nonmajors. Topics include structure and reactions of alkanes, alkenes, alkynes, alkyl halides, and aromatic molecules; nomenclature of organic compounds; stereochemistry; reaction mechanisms and dynamics. Students may receive credit for only one of CHEM 3311 and 3351. Prereq., CHEM 1133/1134 (formerly 1131), 1271, or 1371 (min grade C-); for engineering students only: CHEN 1211/CHEM 1221 (min grade C-) or equivalent; coreq., CHEM 3321 or 3361. Prerequisites: Requires pre-requisite course of CHEM 1131 or CHEM 1133/1134 or CHEM 1271 or CHEM 1371 or CHEN 1211/CHEM 1221.

College of Arts & Sciences Chemistry

---

## CHEM-3321 (1) Laboratory in Organic Chemistry 1

Lab. Instruction in experimental techniques of modern organic chemistry emphasizing chemical separations and reactions of alkanes, alkenes, and aromatic compounds. Stereochemical modeling and the identification of organic unknowns by spectroscopic and chemical methods are also introduced. Prereqs., CHEM 1133/1134 (formerly 1131), 1271, 1371, or CHEN 1211/CHEM 1221 (min grade C-) or equivalent. Coreq., CHEM 3311 or 3351. For biochemistry and nonchemistry majors. Credit not granted for this course and CHEM 3361. Prerequisites: Requires pre-requisite course of CHEM 1131 or CHEM 1133/1134 or CHEM 1271 or CHEM 1371 or CHEN 1211/CHEM 1221.

---

## CHEM-3331 (4) Organic Chemistry 2

Lect. and rec. Intended primarily for nonmajors. Topics include structure and reactions of alkyl halides, alcohols, ethers, carboxylic acids, aldehydes, ketones, and amines; introduction to the chemistry of heterocycles, carbohydrates, and amino acids; nomenclature of organic compounds; synthesis; and reaction techniques. Prereq., CHEM 3311 or 3351 and CHEM 3321 or 3361 (all min grade C-). Coreq., CHEM 3341 or 3381. Credit not granted for this course and CHEM 3371. Prerequisites: Requires pre-requisite courses of CHEM 3311 or 3351, and CHEM 3321 or 3361 (minimum grade C- for all).

## CHEM-3341 (1) Laboratory in Organic Chemistry 2

Lab. For biochemistry and nonchemistry majors. Instruction in experimental techniques of modern organic chemistry emphasizing reactions involving alcohols, ketones, carboxylic acids, and their derivatives. Multistep syntheses are also introduced. Prereq., CHEM 3321 or 3361 (min grade C-). Coreq., CHEM 3331 or 3371. Prerequisites: Requires pre-requisite courses of CHEM 3311 or 3351, and CHEM 3321 or 3361 (minimum grade C- for all).

## CHEM-3351 (4) Organic Chemistry 1 for Chemistry and Biochemistry Majors

Lect. and rec. Topics include structure and reactions of alkanes, alkenes, alkynes, alcohols, ethers, aldehydes, ketones, and alkyl halides; nomenclature of organic compounds; stereochemistry; reaction mechanisms. Students may receive credit for only one of CHEM 3311 and 3351. Prereq., CHEM 1133/1134 (formerly 1131), 1271, or 1371 (min grade C-); coreq., CHEM 3361 or 3321. Prerequisites: Restricted to CHEM and BCHM majors. Requires pre-requisite course of CHEM 1131 or CHEM 1133/1134 or CHEM 1271 or CHEM 1371 or CHEN 1211/CHEM 1221.

## CHEM-3361 (2) Laboratory in Organic Chemistry 1 for Chemistry Majors

Lab. Required course for chemistry majors. Instruction in experimental techniques of modern organic chemistry emphasizing chemical separations and reactions of alkanes, alkenes, alcohols, ketones, and alkyl halides. Explores stereochemical modeling and the identification of organic unknowns. Prereq., CHEM 1133/1134 (formerly 1131), 1271, or 1371 (min grade C-); coreq., CHEM 3351 or 3311. Credit not granted for this course and CHEM 3321. Prerequisites: Requires pre-requisite course of CHEM 1131 or CHEM 1133/1134 or CHEM 1271 or CHEM 1371 or CHEN 1211/CHEM 1221. Restricted to Chemistry and Biochemistry majors.

## CHEM-3371 (4) Organic Chemistry 2 for Chemistry and Biochemistry

## Majors

Lect. and rec. Topics include structure and reactions of carboxylic acids and derivatives, aromatic compounds, and amines; introduction to the chemistry of heterocycles, carbohydrates, and amino acids; nomenclature of organic compounds; reaction mechanisms. Prereqs., CHEM 3351 or 3311 and CHEM 3361 or 3321 (min grade C-). Prereq. or coreq., CHEM 3381 or 3341. Credit not granted for this course and CHEM 3331. Prerequisites: Restricted to Chemistry and Biochemistry majors only.

College of Arts & Sciences Chemistry

## CHEM-3381 (2) Laboratory in Organic Chemistry 2 for Chemistry Majors

Lab. Required course for chemistry majors. Instruction in experimental techniques of modern chemistry, emphasizing reactions involving alcohols, ketones, carboxylic acids, aromatic compounds, and their derivatives. Multistep syntheses are also introduced. Prereqs., CHEM 3321 or 3361 and CHEM 3341 (min grade C-). Prereq. or coreq., CHEM 3331 or 3371. Prerequisites: Requires pre-requisite courses of CHEM 3311 or 3351, and CHEM 3321 or 3361 (minimum grade C- for all). Restricted to Chemistry and Biochemistry majors only.

College of Arts & Sciences Chemistry

## CHEM-4011 (3) Modern Inorganic Chemistry

Lect. Required course for chemistry majors. Introduces modern inorganic chemistry for undergraduates. Includes atomic structure, chemical periodicity, structure and bonding in molecules and crystals, reaction mechanisms, chemistry of selected main group and transition elements, and emphasis on catalyst, materials, bioinorganic, and organometallic systems. Prereq. or coreq., CHEM 4431, 4521, or 4531 (min grade C-).

College of Arts & Sciences Chemistry

## CHEM-4021 (3) Inorganic Laboratory

One lect. and two 3-hour labs per week. Instruction in experimental techniques of modern inorganic chemistry. Includes syntheses and spectroscopic characterizations of transition metal and main group compounds, experience in manipulation of air sensitive compounds, and techniques involving unusual conditions of pressure or temperature. Prereq., CHEM 4011 (min grade C-). Prerequisites: Requires prerequisite course of CHEM 4011 (minimum grade C-). Restricted to Chemistry and Biochemistry majors only.

College of Arts & Sciences Chemistry

## CHEM-4171 (3) Instrumental Analysis

Lect. Theory and practice of instrumental methods of chemical analysis including atomic and molecular spectroscopy, gas and liquid chromatography, mass spectrometry, and electrochemistry. Prereqs., CHEM 3331 or 3371 (min grade C-).

College of Arts & Sciences Chemistry

CHEM

### CHEM-4181 (3) Instrumental Analysis Laboratory with Environmental Emphasis

One lect. and six hours of lab per week. Instruction and experience in using instrumental methods of analysis to address problems in chemistry, biochemistry, industrial chemistry, and environmental chemistry. Prereq., CHEM 4171 (min grade C-). Prerequisites: Requires pre-requisite course of CHEM 4171 (minimum grade C-). Restricted to Chemistry and Biochemistry majors only.

College of Arts & Sciences Chemistry

### CHEM-4251 (3) Materials Chemistry and Properties

Lec. Understanding of materials from chemistry perspective including metals, oxides, semiconductors and polymers. Basic description of chemical preparation of materials. Overview of fundamental properties of materials including structural, chemical, mechanical, thermal, electrical, and optical properties. Description of behavior of materials and various applications in modern technology. Discussion of materials characterization methods. Prereqs., CHEM 3331 or 3371, and CHEM 4431, 4521, or 4531 (min. grade C-) or instructor consent. CHEM 4251 and 5251 are the same course.

College of Arts & Sciences Chemistry

### CHEM-4261 (3) Organic Materials: Structures and Functions

Overview of the preparation and functioning mechanism of novel organic materials that have recently been developed, including conductive polymers, 2-D macrocyclic structures, 3-D molecular cages, molecular machines/muscles/switches, fullerene derivatives and carbon nanotube composites. This course will emphasize the use of organic and physical chemistry as tools to develop novel materials and probe their structure-property relationship. Prereqs., CHEM 3331 or 3371, and CHEM 4431, 4521, or 4531 (min. grade C-) or instructor consent. CHEM 4261 and 5261 are the same course.

College of Arts & Sciences Chemistry

---

## CHEM-4271 (3) Chemistry of Solar Energy

Chemical principles of conversion of solar energy into electricity and fuels in molecular and semiconductor-based systems. Overview of solid-state electronic structure of materials and interfaces, light-matter interactions, principles of harvesting photoexcited currents and useful chemical species. Description of processes utilized in established and emerging solar energy technologies. Prereqs., CHEM 3331 or 3371, and CHEM 4431, 4521, or 4531 (min. grade C-) or instructor consent. CHEM 4271 and 5271 are the same course.

College of Arts & Sciences Chemistry

---

## CHEM-4411 (3) Physical Chemistry with Biochemistry Applications 1

Lect. Introduces thermodynamics and kinetics, emphasizing macromolecule and biochemical applications. Includes thermodynamics, chemical and physical equilibria, solution chemistry, transport properties, multiple site binding phenomena, and the rates of chemical and biochemical reactions. Alternative to CHEM 4511. Designed for biochemistry and biology majors. Prereqs., CHEM 3311 or 3351, PHYS 1110 or 2010, MATH 2400 or APPM 2350 (min grade C-), or instructor consent. Prereq. or coreq., PHYS 1120 or 2020. Credit not granted for this course and CHEM 4511. Same as CHEM 5411. Prerequisites: Requires pre-requisite courses CHEM 3311 or 3351, PHYS 1110 or 2010, MATH 2400 or APPM 2350 (all minimum grade C-). Requires pre-requisite or co-requisite of PHYS 1120 or 2020.

College of Arts & Sciences Chemistry

---

## CHEM-4431 (3) Physical Chemistry with Biochemistry Applications 2

Lect. Principles of physical chemistry (second semester) for students in the biological sciences. Topics include quantum mechanics, chemical bonds, principles of spectroscopy, statistical mechanics, and transport processes with application to biological systems. Mathematical background (integral and differential calculus including partial differentiation) required. Prereq., grade of C- or higher in CHEM 4411 or 4511, and MATH 2400 or APPM 2350, and PHYS 1120 or 2020, or instructor consent. Credit not granted for this course and CHEM 4531. Same as CHEM 5431. Prerequisites: Requires pre-requisite courses of CHEM 4411 or 4511, MATH 2400 or APPM 2350 and PHYS 1120 or 2020 (minimum grade of C- for all).

College of Arts & Sciences Chemistry

---

## CHEM-4511 (3) Physical Chemistry 1

Lect. Chemical thermodynamics and kinetics. Includes study of laws of thermodynamics, thermochemistry, entropy, free energy, chemical potential, chemical equilibria, and the rates and mechanisms of chemical reactions. Prereqs., CHEM 3311 or 3351, MATH 2400 or APPM 2350, and PHYS 1110 or 2020 (all min grade C-) or instructor consent. Prereq. or coreq., PHYS 1120. Credit not granted for this course and CHEM 4411/5411. Prerequisites: Requires pre-requisite of courses CHEM 3311 or 3351, MATH 2400 or APPM 2350, and PHYS 1110 or 2020 (all minimum grade C-). Requires pre-requisite or co-requisite course of PHYS 1120.

College of Arts & Sciences Chemistry

---

## CHEM-4521 (3) Physical Chemistry for Engineers

---

Lec. Covers kinetic theory of gases; chemical equilibrium; electrochemistry; chemical kinetics; quantum mechanics and atomic structure; chemical bonding; spectroscopy; statistical mechanics; the solid state; the liquid state; and surface chemistry. Prereq., CHEM 1211 and CHEM 1221, CHEM 1113/1114 (formerly 1111) and 1133/1134 (formerly 1131), 1351 or 1371, MATH 2400 or APPM 2350, and PHYS 1110 (min grade C- required in all) or instructor consent. Prereq. or coreq., PHYS 1120. Restricted to Engineering students only. Prerequisites: Restricted to College of Engineering majors only.

College of Arts & Sciences Chemistry

---

## CHEM-4531 (3) Physical Chemistry 2

Lect. Introduces the quantum theory of atoms, molecules and chemical bonding, and statistical thermodynamics. Includes principles of quantum mechanics and their application to atomic structure, molecular spectroscopy, symmetry properties, and the determination of molecular structure. Also includes principles of statistical mechanics and their applications to properties of gases, liquids, and solids. Prereqs., CHEM 4511 or 4411, and PHYS 1120 or 2020, and MATH 2400 or APPM 2350 (min grade C- required in all). Credit not granted for this course and CHEM 4431 or 5431. Prerequisites: Requires pre-requisite courses of CHEM 4511 or 4411, PHYS 1120 or 2020, and MATH 2400 or APPM 2350 (minimum grade C- for all)

College of Arts & Sciences Chemistry

---

## CHEM-4581 (1) Physical Chemistry Lab 1

One 3-hour lab per week. Instruction in experimental techniques of modern physical chemistry. Experiments illustrate the fundamental principles of thermodynamics and chemical kinetics. Illustrates the material discussed in CHEM 4511. Prereq. or coreq., CHEM 4411 or 4511 (min grade C-) or instructor consent. Restricted to CHEM and BCHM majors. Credit not granted for this course and CHEM 4561. Prerequisites: Requires pre-requisite or co-requisite course of CHEM 4411 or 4511 (minimum grade C-). Restricted to Chemistry and Biochemistry majors only.

College of Arts & Sciences Chemistry

---

## CHEM-4591 (2) Physical Chemistry Lab 2

One lect. and one 3-hour laboratory every two weeks. a continuation of CHEM 4581, but may be taken concurrently with CHEM 4531 or CHEM 4431. Experiments illustrate the principles of quantum chemistry and spectroscopy discussed in CHEM 4531. Prereq., CHEM 4411 or 4511 and 4581 (min grade C- in all) or instructor consent. Prereq. or coreq., CHEM 4431 or 4531. Restricted to CHEM and BCHM majors. Credit not granted for this course and CHEM 4561. Prerequisites: Requires pre-requisite courses of CHEM 4411 or 4511 and CHEM 4581 (minimum grade C- for all). Restricted to Chemistry and Biochemistry majors only.

College of Arts & Sciences Chemistry

---

## CHEM-4611 (3) Survey of Biochemistry

Lec. One-semester survey of the main themes of modern biochemistry: biomolecular structure/function, metabolism, biosynthesis, DNA from genome to proteome, and cellular signaling. For biology and engineering majors and others wanting a survey of biochemistry. Prereq., one semester of organic chemistry (CHEM 3311, 3351, or equivalent; min grade C-). Prerequisites: Requires pre-requisite course of CHEM 3311 or 3351 (minimum grade C-).

College of Arts & Sciences Chemistry

---

---

---

## CHEM-4621 (3) Genome Databases: Mining and Management

Lect. Develops essential skills for performing genomic analyses, with focus on developing practical research tools. Introduces human genome and microbiome projects, Python/Sql scripting, accessing and understanding genomic data, sequence alignment and search, evolutionary models, expression data, biological networks, and macromolecular structure. Prereqs., MCDB 3500, CSCI 3104, or CHEM 4711; coreq., CSCI 2270. Same as CHEM 5621. Credit not granted for this course and CSCI 4317 or MCDB 4621.

College of Arts & Sciences Chemistry

---

## CHEM-4711 (3) General Biochemistry 1

Lect. Topics include structure, conformation, and properties of proteins, nucleic acids, carbohydrates, and membranes; enzyme mechanisms, kinetics, and regulation; intermediary metabolism; energetics and metabolic control; electron transport and oxidative phosphorylation. Prereq., CHEM 3331 or 3371 (mingrade C-). Same as CHEM 5711. Prerequisites: Requires pre-requisite course of CHEM 3331 or 3371 (minimum grade C-).

College of Arts & Sciences Chemistry

---

## CHEM-4731 (3) General Biochemistry 2

Lect. Continuation of CHEM 4711. Metabolism of carbohydrates, lipids, amino acids, and nucleic acids; photosynthesis; biosynthesis and function of macromolecules including DNA, RNA, and proteins; biochemistry of subcellular systems; and special topics. Prereq., CHEM 4711 (min grade C-). Same as CHEM 5731. Prerequisites: Requires pre-requisite course of CHEM 4711 (minimum grade C-).

College of Arts & Sciences Chemistry

---

## CHEM-4751 (3) Current Topics in Biochemical Research

Lect. Covers current topics in modern biochemical research through lectures, reading recent research articles, critical thinking, and class discussion. Topics include protein and nucleic acid structure and function, biomolecular interactions, enzyme function, and cellular signaling and regulation. Prereqs., CHEM 4711 and 4731 (min grade C-) or instructor consent. Same as CHEM 5751.

College of Arts & Sciences Chemistry

---

## CHEM-4761 (4) Biochemistry Laboratory

Two 5-hour periods per week. The first hour of each period is lecture, the remainder is laboratory. Introduction to modern biochemical techniques. Topics include enzymology, spectrophotometry, electrophoresis affinity chromatography, radioisotopes, recombinant DNA, and molecular cloning. Prereq., CHEM 4711 (min grade of C-). Recommended prereq., CHEM 4731 or MCDB 3500. Restricted to CHEM or BIOCHEM majors. Prerequisites: Requires pre-requisite course of CHEM 4711 (minimum grade C-). Restricted to Chemistry & Biochemistry majors only.

College of Arts & Sciences Chemistry

---

---

## CHEM-4791 (3) Bioorganic Chemistry in Biotechnology

Lec. Explores examples of antibodies, peptides, proteins, RNA, DNA, carbohydrates and lipids. The course uses the primary literature and requires student participation. Prereq., CHEM 3331 or 3371, and CHEM 4731 or 5731 (min. grade C-). Recommended prereq., undergraduate molecular biology. Same as CHEM 5791.

College of Arts & Sciences Chemistry

---

---

---

## CHEM-4901 (1-6) Independent Study in Chemistry and Biochemistry

For undergraduate study. May be repeated up to 8 total credit hours. Prereq., instructor consent.

College of Arts & Sciences Chemistry

---

---

---

## CHEM-5011 (3) Advanced Inorganic Chemistry 1

Lect. Inorganic chemistry based on principles of bonding, structure, reaction mechanisms, and modern synthetic methods. Chemistry and general properties of representative and transition elements and their compounds. Prereqs., CHEM 4011 and 4531, or graduate standing. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Chemistry

---

---

---

## CHEM-5061 (3) Advanced Inorganic Chemistry 2

Lectures in physical inorganic chemistry with an emphasis on topics for understanding modern solar energy conversion to electricity and fuels. Includes a description of bonding and properties of coordination compounds in terms of the ligand field and molecular orbital theories. The primary research literature will be used to motivate exploration of relevant themes including spectroscopy, electron transfer, energy transfer, bioenergetic conversion, and small-molecule activation. Prereqs., CHEM 4011 and graduate standing.

College of Arts & Sciences Chemistry

---

---

---

## CHEM-5151 (3) Atmospheric Chemistry

Lect. Basic kinetics and photochemistry of atmospheric species. Stratospheric chemistry with emphasis on processes controlling ozone abundance. Tropospheric chemistry focusing on photochemical smog, acid deposition, oxidative capacity of the atmosphere, and global climate change. Prereq., graduate standing or instructor consent. Same as ATOC 5151. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Chemistry

---

---

## CHEM-5161 (3) Analytical Atmospheric Spectroscopy

Optical spectrochemical analysis, atmospheric transmittance, including atomic and molecular spectroscopy, line-by-line spectral databases such as HITRAN, absorption, emission, fluorescence, scattering processes of gases, surface enhancements, aerosols, optical spectroscopic instrument components, and techniques, and their applications to atmospheric, and environmental problems. Prereq., undergraduate physical chemistry or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Chemistry

## CHEM-5171 (3) Electroanalytical Chemistry

Lect. Establishes a background for understanding electrochemical systems through a review of the relevant thermodynamic, kinetic, and electronic principles. Compares classical and modern electrochemical methods of analysis. Several special topics are discussed in depth. Prereq., undergraduate physical chemistry or instructor consent.

College of Arts & Sciences Chemistry

## CHEM-5181 (3) Mass Spectrometry and Chromatography

Mass spectrometry, including instrumentation, ionization techniques, and interpretation of mass spectra. Theory and practice of analytical separation processes including ion mobility, capillary electrophoresis, and liquid gas chromatography. Introduction to applications in e.g. atmospheric and biological mass spectrometry. Introduction to computer simulation of instrumentation and physical processes. Prereq., undergraduate physical chemistry or instructor consent. Prerequisites: Restricted to Graduate Students only.

CHEM

### CHEM-5201 (3) Atmospheric Aerosol Discussions

Discusses recent literature concerning atmospheric aerosols and their role in atmospheric problems, including global ozone depletion, air quality, regional haze, acid rain, and global climate change. May be repeated up to 12 total credit hours. Recommended prereq., CHEM/ATOC 5151. Restricted to graduate students.

College of Arts & Sciences Chemistry

### CHEM-5251 (3) Materials Chemistry and Properties

Lec. Understanding of materials from chemistry perspective including metals, oxides, semiconductors and polymers. Basic description of chemical preparation of materials. Overview of fundamental properties of materials including structural, chemical, mechanical, thermal, electrical, and optical properties. Description of behavior of materials and various applications in modern technology. Discussion of materials characterization methods. Prereqs., CHEM 3331 or 3371, and CHEM 4431, 4521, or 4531 (min. grade C-) or instructor consent. CHEM 4251 and 5251 are the same course.

College of Arts & Sciences Chemistry

### CHEM-5261 (3) Organic Materials: Structures and Functions

Overview of the preparation and functioning mechanism of novel organic materials that have recently been developed, including conductive polymers, 2-D macrocyclic structures, 3-D molecular cages, molecular machines/muscles/switches, fullerene derivatives and carbon nanotube composites. This course will emphasize the use of organic and physical chemistry as tools to develop novel materials and probe their structure-property relationship. Prereqs., CHEM 3331 or 3371, and CHEM 4431, 4521, or 4531 (min. grade C-) or instructor consent. CHEM 4261 and 5261 are the same course.

College of Arts & Sciences Chemistry

---

## CHEM-5271 (3) Chemistry of Solar Energy

Chemical principles of conversion of solar energy into electricity and fuels in molecular and semiconductor-based systems. Overview of solid-state electronic structure of materials and interfaces, light-matter interactions, principles of harvesting photoexcited currents and useful chemical species. Description of processes utilized in established and emerging solar energy technologies. Prereqs., CHEM 3331 or 3371, and CHEM 4431, 4521, or 4531 (min. grade C-) or instructor consent. CHEM 4271 and 5271 are the same course. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Chemistry

---

## CHEM-5311 (3) Advanced Synthetic Organic Chemistry

Lect. Surveys synthetic transformations emphasizing important functional group transformations and carbon-carbon, bond-forming reactions. Required of all organic chemistry graduate students. Prereq., one year of organic chemistry. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Chemistry

---

## CHEM-5321 (3) Advanced Physical Organic Chemistry

Lect. Modern concepts of physical organic chemistry and their use in interpreting data in terms of mechanisms of organic reactions and reactivities of organic compounds. Required of all organic chemistry graduate students. Prereqs., one year of organic chemistry and one year of physical chemistry. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Chemistry

---

## CHEM-5331 (3) Advanced Spectroscopic Techniques in Organic Chemistry

Lect. Advanced spectroscopic techniques for structure and determination in organic chemistry. Emphasizes proton and carbon-13 NMR spectroscopy. Prereqs., one year of organic chemistry and one year of physical chemistry. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Chemistry

---

## CHEM-5341 (3) Chemical Biology and Drug Design

Develop knowledge base and skills in the interdisciplinary field of chemical biology, including aspects of chemistry and biology, and integrating both with respect to hierarchical levels of structure (atomic, molecular, cellular). Students will receive training that helps to develop their careers in biotech, pharmaceutical, and other research-oriented industries as well as in academia. Prereqs., introductory organic chemistry and general biochemistry.

College of Arts & Sciences Chemistry

---

---

## CHEM-5411 (3) Physical Chemistry with Biochemistry Applications 1

Lect. Introduces thermodynamics and kinetics, emphasizing macromolecules and biochemical applications. Intended for biology graduate students. Not open to students in chemistry or other physical sciences. Prereqs., three semesters of calculus, one year of physics, and instructor consent or graduate standing. Same as CHEM 4411. Credit not granted for this course and CHEM 4411 or CHEM 4511.

Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Chemistry

---

---

## CHEM-5431 (3) Physical Chemistry with Biochemistry Applications 2

Lect. Principles of physical chemistry (second semester) for graduate students in biology. Not open to students of chemistry or the physical sciences. Prereqs., graduate standing and CHEM 5411, or instructor consent. Credit not granted for this course and CHEM 4531. Same as CHEM 4531. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Chemistry

---

---

## CHEM-5501 (3) Advanced Topics in Physical Chemistry

Covers various topics in physical chemistry focusing on their mathematical and physical background. Topics include the application of classical mechanics and electrodynamics in chemistry, the classical mechanics background for the description of atoms and molecules, the use of vector spaces in wave mechanics and quantum mechanics and the classical description of spectroscopy in terms of interaction of light and matter. Prereqs., undergrad physical chemistry, graduate standing or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Chemistry

---

---

## CHEM-5531 (3) Statistical Mechanics

Lect. Fundamental concepts of quantum and classical statistical mechanics. Applications to properties of gases, liquids, solids, spin, and polymer systems. Reaction, fluctuation, nucleation, and relaxation phenomena. Prereq., undergraduate physical chemistry. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Chemistry

---

---

## CHEM-5541 (3) Chemical Dynamics

Lect. Discussion of mechanism and rate of chemical reactions from a fundamental point of view. Discusses nature of collision and develops concepts of cross section and rate constant. Theories of elementary bimolecular and decay processes are critically examined. Prereq., undergraduate physical chemistry. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Chemistry

---

## CHEM-5561 (3) Methods of Molecular Biophysics

Discusses techniques used to determine structure, function, and dynamics of macromolecules, including optical spectroscopy, magnetic resonance, diffraction, and electron microscopy. Approved for credit toward molecular biophysics certificate. Prereq., one year physical chemistry or quantum mechanics with graduate standing or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Chemistry

---

## CHEM-5571 (3) Surface Science

Lect. Principles of surface science with emphasis on fundamental surface phenomena, surface techniques, and surface chemistry. Basic description of surfaces, adsorbate-surface interactions, surface kinetics, and methods of surface analysis. Surface science of interactions, surface kinetics, and methods of surface analysis. Surface science of heterogeneous catalysis, semiconductor processing, and environmental interfaces. Prereq., undergraduate physical chemistry and graduate standing or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Chemistry

---

## CHEM-5581 (3) Introductory Quantum Chemistry

Lect. Basic principles and techniques of quantum mechanics with applications to questions of chemical interest. Quantum dynamics of atoms, molecules, and spin; electronic structure of atoms and molecules. Prereq., two semesters of physical chemistry and graduate standing, or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Chemistry

---

## CHEM-5591 (3) Advanced Molecular Spectroscopy

Lect. Rotational, vibrational, and electronic spectra of molecules, and their interpretation in terms of the quantum theory of molecular structure. Prereq., two semesters of physical chemistry and graduate standing, or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Chemistry

---

## CHEM-5621 (3) Genome Databases: Mining and Management

Same as CHEM 4621. Credit not granted for this course and CSCI 5317 or MCDB 5621.

College of Arts & Sciences Chemistry

---

## CHEM-5711 (3) General Biochemistry 1

Lect. Same lectures as CHEM 4711. Course work includes library studies and preparation of special reports. Not open to undergraduates. Prereq., one year of organic chemistry and graduate standing. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Chemistry

## CHEM-5731 (3) General Biochemistry 2

Lect. Same lectures as CHEM 4731. Course work includes library studies and report preparations. Not open to undergraduates. Prereqs., CHEM 5711 and graduate standing, or instructor consent. Prerequisites: Restricted to Graduate Students only.

## CHEM-5751 (3) Current Topics in Biochemical Research

Prereq., instructor consent required. Same as CHEM 4751.

## CHEM-5770 (3) Fundamentals of Biochemistry I

Analysis of topics in biochemistry including DNA structure and replication, RNA synthesis and processing, protein synthesis, enzyme function and mechanism, and protein structure and dynamics. Intended as a comprehensive treatment of areas central to modern biochemistry for entering graduate students. Lectures concurrent with CHEM 5771 covering the same topics except for the requirement of a written research proposal. Prereq., CHEM 4731 or equivalent, and graduate standing or instructor consent. Prerequisites: Restricted to Graduate Students only.

## CHEM-5771 (5) Advanced General Biochemistry 1

Lect. In-depth analysis of DNA structure and replication, RNA synthesis and processing, protein synthesis, enzyme function and mechanism, protein structure, protein dynamics, and physical chemistry of macromolecules. Intended as a comprehensive treatment of areas central to modern biochemistry for entering graduate students. Prereq., CHEM 4731 or equivalent, and graduate standing, or instructor consent. Prerequisites: Restricted to Graduate Students only.

## CHEM-5776 (1) Scientific Ethics and Responsible Conduct in Research

Lect. Advanced discussion of topics in scientific ethics, including requirements for responsible conduct of research, case histories of fraud, research misconduct, ethical misconduct, and development of professional values and ethical standards. Prereqs., CHEM 5771 or MCDB 5210 taken concurrently, and instructor consent. Same as MCDB 5776. Prerequisites: Restricted to Graduate Students only.

## CHEM-5780 (3) Fundamentals of Biochemistry II

Analysis of topics in biochemistry including protein structure, methods of structure determination and prediction, protein folding, and protein dynamics. Intended as a comprehensive treatment of areas central to modern biochemistry for entering graduate students. Lectures concurrent with CHEM 5781, covering the same topics except for the requirement of a written research proposal. Prereq., CHEM 5770 or instructor consent. Prerequisites: Restricted to Graduate Students only.

**Subject** **Number**

CHEM

### CHEM-5781 (5) Advanced General Biochemistry 2

Lect. Detailed consideration of contemporary topics in biochemistry, including protein structure (primary, secondary, tertiary, and quaternary), methods of structure determination and prediction, protein folding (kinetics, thermodynamics, denaturation, and renaturation), and protein dynamics (internal motions and methods of analysis). Prereq., CHEM 5771 or instructor consent. Prerequisites: Restricted to Graduate Students only.

[College of Arts & Sciences](#) [Chemistry](#)

### CHEM-5791 (3) Biorganic Chemistry in Biotechnology

Same as CHEM 4791.

[College of Arts & Sciences](#) [Chemistry](#)

### CHEM-5801 (3) Advanced Signal Transduction and Cell Cycle Regulation

Lect. Advanced discussion of current research and literature in signal transduction, including ligands, receptors, and intracellular signaling pathways, as well as control on transcription, chromatin structure, Dna replication, mitosis, and cell cycle progression. Recommended prereqs., CHEM 5771 and 5781, MCDB 5210 or MCDB 5220, and graduate standing.

[College of Arts & Sciences](#) [Chemistry](#)

### CHEM-5811 (3) Advanced Methods in Protein Sequencing and Analysis

Lect. Advanced discussion of current methods in protein sequencing, sequence analysis, and posttranslational modifications,

emphasizing techniques of mass spectrometry, use of protein databases, sequence alignment and motifs, structure prediction, and modeling of signaling pathways. Prereq., instructor consent. Recommended prereqs., CHEM 5771, CHEM 5781, MCDB 5210, and graduate standing.

College of Arts & Sciences Chemistry

---

## CHEM-5821 (1) Special Topics in Signaling and Cell Regulation

Lect. Reviews and evaluates literature on subjects of current interest in signal transduction transcription, cell cycle progression, and cell regulation. Primarily for graduate level presentation of special topics by students, faculty, and research staff. May be repeated up to 5 total credit hours. Prereqs., graduate standing and instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Chemistry

---

## CHEM-6001 (1) Seminar: Inorganic Chemistry

Student, faculty, and guest presentations and discussions of current research in inorganic chemistry and related topics (transition element and main group element compound properties, inorganic compound in biological, industrial, and materials applications). Required of all inorganic chemistry graduate students. Credit deferred until presentation of satisfactory seminar. Prereq., graduate standing or instructor consent.

College of Arts & Sciences Chemistry

---

## CHEM-6021 (1-3) Special Topics in Inorganic Chemistry

Lect. Subjects of current interest in inorganic chemistry. Primarily used for graduate-level presentations of special topics by visiting and resident faculty. Variable class schedule. May be repeated up to 7 total credit hours. Prereq., graduate standing or instructor consent.

College of Arts & Sciences Chemistry

---

## CHEM-6031 (3) Special Topics in Nanoscience

Introduces the synthesis, physical properties, and applications of nanometer-scale materials and devices. Includes synthesis of metal and semiconductor nanoparticles and nanowires, optical and electronic properties of nanoscale systems, and applications in biotechnology and energy. Prereqs., CHEM 1111, 1131, and 4431 or 4521 or 4511. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Chemistry

---

## CHEM-6101 (1) Seminar: Analytical Chemistry

Student, faculty, and guest presentations and discussions of current research in analytical chemistry. Required of all analytical chemistry graduate students. Credit deferred until presentation of satisfactory seminar. Prereq., graduate standing or instructor consent.

---

Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Chemistry

---

## CHEM-6111 (1-3) Special Topics in Analytical Chemistry

Lect. Subjects of current interest in analytical chemistry. Used for graduate-level presentations of special topics by visiting and resident faculty. Variable class schedule. May be repeated up to 7 total credit hours. Prereq., graduate standing or instructor consent.

College of Arts & Sciences Chemistry

---

## CHEM-6301 (1-3) Seminar in Organic Chemistry

Discussions principally concerned with recent literature in organic chemistry. Required of all organic chemistry graduate students. Prereq., graduate standing or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Chemistry

---

## CHEM-6311 (1-3) Special Topics in Synthetic Organic Chemistry

Lect. Selected topics in synthetic organic chemistry, encompassing both methods and/or total synthesis of complex molecules. Prereqs., CHEM 5311 and graduate standing, or instructor consent.

College of Arts & Sciences Chemistry

---

## CHEM-6321 (1-3) Special Topics in Physical Organic Chemistry

Lect. Selected topics in physical organic chemistry, which may include photochemistry, carbene chemistry, free radical chemistry, molecular orbital methods, organic materials, or gas phase ion chemistry. Prereq., CHEM 5321 and graduate standing or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Chemistry

---

## CHEM-6401 (1-3) Seminar: Physical Chemistry

Student, faculty, and guest presentations of current research in physical chemistry. Discussion of research topics related to the subject of weekly physical chemistry/chemical physics seminar and appropriate journal articles. Prereq., graduate standing or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Chemistry

---

---

## CHEM-6411 (1-3) Advanced Topics in Physical Chemistry

Lect. May be repeated up to 7 total credit hours. Prereq., graduate standing or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Chemistry

---

## CHEM-6601 (1) Biochemistry Seminar

Required of all biochemistry graduate students. Credit is deferred until presentation of satisfactory seminar. Prereq., graduate standing or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Chemistry

---

## CHEM-6621 (1) Special Topics in RNA

Reviews and evaluates recent scientific literature in the field of RNA chemistry and biology, including topics in structure, catalysis, bioinformatic approaches, and control of gene expression. Primarily for graduate level presentation of special topics by students and research staff. May be repeated up to 5 total credit hours. Prereq., graduate standing or instructor consent. Same as MCDB 6621. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Chemistry

---

## CHEM-6711 (3-6) Advanced Topics in Biochemistry

Detailed study of current literature relative to one main topic is undertaken each semester. Topics covered on a rotating basis include enzyme kinetics and mechanisms; lipids and lipoproteins; chemistry and enzymology of nucleic acids; biochemistry of nucleic acids in eukaryotic cells; and protein chemistry. Presentations include faculty lectures and student reports. May be repeated up to 12 total credit hours. Prereqs., one year of biochemistry courses, graduate standing, and instructor consent.

College of Arts & Sciences Chemistry

---

## CHEM-6731 (3-6) Advanced Topics in Biochemistry

Detailed study of current literature relative to one main topic is undertaken each semester. Topics covered on a rotating basis include enzyme kinetics and mechanisms; lipids and lipoproteins; chemistry and enzymology of nucleic acids; biochemistry of nucleic acids in eukaryotic cells; and protein chemistry. Presentations include faculty lectures and student reports. May be repeated up to 12 total credit hours. Prereqs., one year of biochemistry courses, graduate standing, and instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Chemistry

---

## CHEM-6801 (0) Departmental Research Seminar

Lectures by visiting scientists and occasionally by staff members and graduate students on topics of current research. Meets once a

week. Required for all graduate students in chemistry. Prereq., graduate standing or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Chemistry

## CHEM-6901 (1-6) Special Topics in Chemistry

Prereq., graduate standing or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Chemistry

## CHEM-6941 (1) Master's Candidate

College of Arts & Sciences Chemistry

## CHEM-6951 (1-6) Master's Thesis

Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Chemistry

## CHEM-7021 (2) Seminar: Structural Inorganic Chemistry

Current research in the area of structural inorganic chemistry. Concerns topics related to electronic and molecular structure of transition metal complexes. May be repeated up to 6 total credit hours. Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Chemistry

## CHEM-7101 (2) Seminar: Chromatography and Trace Analysis

Student and faculty discussions and reports on research advances in chromatography, trace analysis, and environmental chemistry. May be repeated up to 6 total credit hours. Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Chemistry

CHEM

### CHEM-7111 (2) Seminar: Electrochemistry

Student and faculty discussions and reports on research advances in electrochemistry. May be repeated up to 6 total credit hours. Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

[College of Arts & Sciences](#) [Chemistry](#)

### CHEM-7131 (1) Seminar in Atmospheric Aerosol Chemistry

Discusses advances in atmospheric aerosol chemistry, with emphasis on new methods for analysis and their application to laboratory and field studies. May be repeated up to 2 total credit hours. Prereq., graduate standing or instructor consent. Recommended prereqs., CHEM 5151, 5181. Prerequisites: Restricted to Graduate Students only.

[College of Arts & Sciences](#) [Chemistry](#)

### CHEM-7141 (1) Seminar: Spectroscopy at Dielectric Interfaces

Focuses on current research results and relevant literature in the areas of Raman spectroscopy, interfacial reactions/interactions, fluorescence spectroscopy, and photoacoustic spectroscopy. May be repeated up to 6 total credit hours. Prereq., instructor consent.

[College of Arts & Sciences](#) [Chemistry](#)

### CHEM-7161 (1) Seminar: Heterogeneous Atmospheric Chemistry

Topics in atmospheric chemistry emphasizing the structure and reactivity of atmospheric particulates. Presentations on current research and critical evaluations of recent literature. May be repeated up to 6 total credit hours. Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

## CHEM-7211 (1) Seminar: Topics in Synthetic Methodology and Natural Product Synthesis

Discussion of contemporary synthetic organic chemistry with a focus on new methodology and total synthesis of natural products. Prerequisites: Restricted to Graduate Students only.

## CHEM-7221 (1) Seminar: Photochemistry and Free Radical Chemistry

Current research in areas of organic free radical chemistry, photochemistry, and related topics are presented and discussed. May be repeated up to 6 total credit hours. Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

## CHEM-7231 (1) Seminar: Reactive Intermediates

Application of contemporary ideas of chemical physics to organic molecules. Special attention to structures and bonding in organic ions and radicals. May be repeated up to 6 total credit hours. Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

## CHEM-7241 (1) Seminar: Synthetic Organic Chemistry

Series of seminars on directed total synthesis. Emphasizes modern synthetic methodology and applications to total synthesis of natural products. May be repeated up to 6 total credit hours. Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

## CHEM-7251 (1) Selected Topics in Chemical Genetics

Discusses the brief history of the emerging field of chemical genetics, and focuses on the recent development of concepts, techniques, applications, and its impact on both science and human health. May be repeated up to 6 total credit hours. Prereq., graduate standing or instructor consent. Prerequisites: Restricted to Graduate Students only.

## CHEM-7271 (1) Seminar: Picosecond Dynamics of Reactions

Includes development and application of picosecond laser spectroscopy to organic and organometallic reactions. Emphasizes relationship

---

between current theoretical developments and experiments. May be repeated up to 6 total credit hours. Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Chemistry

---

## CHEM-7281 (1) Seminar: Molecular Self-Assembly

Discusses current topics and recent advances in molecular self-assembly, with emphasis on new liquid crystal designs and applications. May be repeated up to 2 total credit hours. Prereq., graduate standing or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Chemistry

---

## CHEM-7291 (1) Seminar: Physical Organic Chemistry

Modern experimental techniques and theoretical models in physical organic chemistry are discussed in relation to the development of new materials, such as molecular size tinkertoys to the development of novel photochemical systems and their spectroscopies. May be repeated up to 6 total credit hours. Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Chemistry

---

## CHEM-7301 (1) Seminar: Synthetic and Mechanistic Chemistry

Discusses particularly the synthesis of complex organic molecules and the mechanism of reagents used in organic synthesis. Includes a study of transition metal mediated organic reactions. May be repeated up to 6 total credit hours. Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Chemistry

---

## CHEM-7311 (1) Selected Topics in Organic Materials

Current research in the area of organic/materials chemistry. Concerns topics related to organic materials synthesis, carbon nanotube functionalization, artificial photosynthesis, gas storage and catalysis. May be repeated up to 6 total credit hours. Prereq., graduate standing or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Chemistry

---

## CHEM-7401 (1) Seminar in Photochemical Reaction Control

Discusses progress towards control of molecular reactivity using light, including synthetic methods for creating control subjects. Emphasizes new methods to achieve coherent control. May be repeated up to 2 total credit hours. Prereq., graduate standing or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Chemistry

---

---

## CHEM-7421 (2) Seminar: Negative Ion Chemistry

Chemistry of negative ions; experimental methods and designs; laser spectroscopy of ions; theoretical methods; reactive dynamics of ions in the gas phase. May be repeated up to 6 total credit hours. Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Chemistry

---

## CHEM-7431 (1) Seminar: Topics in Theoretical Chemical Physics

Seminars presented on a variety of topics in theoretical chemical physics. Molecular collisions and unimolecular dynamics predominantly featured. May be repeated up to 6 total credit hours. Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Chemistry

---

## CHEM-7441 (2) Research Seminar: Theoretical Chemistry

Studies theoretical description of molecular dynamics as related to rate processes. Focuses on chemical reactions in liquids, absorption-desorption on surfaces, nucleation reactions, and energy flow in molecules. May be repeated up to 6 total credit hours. Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Chemistry

---

## CHEM-7461 (1) Seminar: Gas Phase Ion Chemistry

Studies gas phase ion chemistry relevant to thermochemical measurements and atmospheric, interstellar, and biomedical applications. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Chemistry

---

## CHEM-7471 (1) Seminar in Ultrafast Spectroscopy of Proteins

Discusses advances and developments in biomolecular dynamics, and considers the connection of protein dynamics with function. Emphasizes experimental studies via ultrafast laser spectroscopy. May be repeated up to 2 total credit hours. Prereq., graduate standing or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Chemistry

---

## CHEM-7481 (2) Seminar: Molecular Spectroscopy and Photochemistry

Discussion and presentation of current research in spectroscopy and photochemistry of organic as well as organometallic systems. Reviews state of the art techniques available for the theoretical and experimental characterization of excited states. May be repeated up to 6 total credit hours. Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

---

\_\_\_\_\_

## CHEM-7491 (1) Seminar: Molecular Vibrational Dynamics

Topics pertaining to vibrational dynamics of small molecules are discussed, with particular emphasis upon IR laser spectroscopy, van der Waals' clusters, vibrationally induced dipole moments, and predissociation. Discussion of current research and recently published literature. May be repeated up to 6 total credit hours. Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

## CHEM-7501 (1) Seminar: Theoretical Molecular Dynamics

Variety of topics in theoretical chemical physics, emphasizing dynamics of molecules in dissipative environments or in radiation fields. May be repeated up to 6 total credit hours. Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

## CHEM-7511 (1) Seminar: Reaction Dynamics in Condensed Phases

Studies elementary steps in chemical reactions and their observation by ultrafast spectroscopy. May be repeated up to 6 total credit hours. Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

## CHEM-7521 (1) Seminar: Atmospheric Kinetics and Photochemistry

Discusses laboratory studies of degradation mechanisms. Applies these studies to atmospheric phenomena such as global warming and stratospheric ozone loss. May be repeated up to 6 total credit hours. Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

## Courses

Search by College, Department & Category

**College/School**

All

Search by Course Number

**Subject** **Number**

CHEM

### CHEM-7531 (1) Seminar: Surface Chemistry and Thin Film Growth

Topics in surface chemistry and thin film growth with focus on atomic layer deposition (ALD) and molecular layer deposition (MLD). Properties of thin films grown using ALD and MLD. Applications of thin films in areas including flexible displays, energy storage and catalysis. May be repeated up to 6 total credit hours. Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

[College of Arts & Sciences](#) [Chemistry](#)

### CHEM-7551 (1) Selected Topics in Ion Spectroscopy

Treats current topics in the spectroscopy of ions. Seminar lectures are given by graduate students on their research and on literature topics, and the results of both in-house and external research groups are studied. Additionally, ideas for interesting directions of research and new experiments are proposed and discussed. May be repeated up to 2 total credit hours. Prereq., graduate standing or instructor consent. Prerequisites: Restricted to Graduate Students only.

[College of Arts & Sciences](#) [Chemistry](#)

### CHEM-7601 (2) Seminar: Nucleic Acid Chemistry

Topics in various aspects of current research; emphasizes student readings and presentations. May be repeated up to 6 total credit hours. Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

[College of Arts & Sciences](#) [Chemistry](#)

### CHEM-7611 (1) Seminar: Structures and Dynamics of Biopolymers in Solution

Discussion of experimental and theoretical approaches for probing structures and dynamics of proteins, peptides, and nucleic acids; and

---

computations in molecular dynamics simulation, modeling, and geometry. May be repeated up to 6 total credit hours. Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Chemistry

---

## CHEM-7621 (1) Seminar: Biochemistry and Molecular Biology of Signal Transduction

Discusses and reviews the current literature and experimental results in signal transduction, cell cycle and tumor suppressor gene regulation. Emphasizes the understandings of molecular and biochemical mechanisms of the origin of human tumor cells. Prereq., graduate standing or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Chemistry

---

## CHEM-7651 (2) Seminar: Environmental Biochemistry

Topics in various aspects of current biochemical and environmental research. May be repeated up to 6 total credit hours. Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Chemistry

---

## CHEM-7661 (1) Structure/Function of Human Mediator Transcription Complexes

Study of the mechanisms of eukaryotic gene expression with an emphasis on the structure and function of human mediator transcription complexes. Restricted to graduate students or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Chemistry

---

## CHEM-7671 (1) Seminar: Topics in Designing Probes for Signaling Reactions

Discussion of advances and developments in biomolecular dynamics, with emphasis on experimental studies via ultrafast laser spectroscopy. The connection of protein dynamics with function will also be considered. Restricted to graduate students or instructor consent required. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Chemistry

---

## CHEM-7691 (1) Seminar: Protein Dynamics and the Mechanism of Sensory Proteins

Discusses recent results and current literature in the areas of the mechanism of sensory proteins, internal motions of proteins, and protein folding. May be repeated up to 6 total credit hours. Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

---

## CHEM-7701 (1) Seminar: Enzyme Mechanisms and Kinetics

Studies experimental approaches to understand the mechanisms of enzymic catalysis. Techniques include steady-state and pre-steady-state kinetics, isotope trapping and partitioning, inhibition by substrate analogues, and covalent modification of proteins. May be repeated up to 6 total credit hours. Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

## CHEM-7711 (1) RNA Mediated Inorganic and Organic Reactions

Discussion of advances and developments in biomolecular dynamics, with emphasis on experimental studies via ultrafast laser spectroscopy. The connection of protein dynamics with function will also be considered. Restricted to graduate students or instructor consent required. Prerequisites: Restricted to Graduate Students only.

## CHEM-7741 (1) Seminar: Signal Transduction and Protein Phosphorylation

Devoted to experimental methods for understanding mechanisms of signal transduction in mammalian cells through pathways involving regulation of protein phosphorylation. May be repeated up to 6 total credit hours. Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

## CHEM-7751 (1) Seminar: Protein Structure and Folding

Studies structure and folding of proteins and protein complexes using biophysical methods, including nuclear magnetic resonance (NMR), circular dichroism, and fluorescence spectroscopies. May be repeated up to 6 total credit hours. Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

## CHEM-7761 (1) Seminar: Eukaryotic Transcriptional Regulation

Studies the regulation of transcription by RNA Polymerase II from human promoters. May be repeated up to 6 total credit hours. Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

## CHEM-7781 (1) Seminar: Topics in Structural Biology

Discussion of advances and developments in structural biology with emphasis on new methods for protein expression, purification and crystallization; and structure solution implementation. Prereq., graduate standing or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Chemistry

## CHEM-7791 (1) Seminar: Topics in Ribonucleoprotein Assemblies

Studies aspects of the biochemical and structural analysis of ribonucleic acid (RNA) and its interactions with proteins and assemblies into functional ribonucleoprotein (RNP) enzymes. Techniques focus on x-ray crystallography, spectroscopic methods, and biochemical probing. Prereq., graduate standing or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Chemistry

## CHEM-8991 (1-10) Doctoral Dissertation

All doctoral students must register for 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section. Prerequisites: Restricted to Graduate Students only.

CHEN

### CHEN-1000 (3) Creative Technology

Lect. Introduces undergraduate arts and sciences students to the most recent concepts in technology and how these concepts impact all aspects of life, such as health, the health of the planet, and social structures. Engineering students should consult an advisor before registering for this course. Approved for arts and sciences CORE curriculum: natural science. Prerequisites: Restricted to Non-Engineering Majors only.

[College of Engineering & Applied Science](#) | [Chemical Engineering](#)

### CHEN-1211 (3) General Chemistry for Engineers

Lect. a one-semester course designed to meet the general chemistry requirement for engineering students. Topics include stoichiometry; thermodynamics; gases, liquids, and solids; equilibrium; acids and bases; bonding concepts; kinetics; reactions; and materials science. Examples and problems illustrate the application of chemistry to engineering subdisciplines. Restricted to students in the College of Engineering and Applied Science; one year of high school chemistry or CHEM 1001 or 1021 (min. grade C-); and high school algebra. Not recommended for students with grades below B- in CHEM 1001 or 1021. Coreq., CHEM 1221. Credit not granted for this course and CHEM 1111, 1113/1114, 1251, or 1351. Prerequisites: Requires co-requisite course of CHEM 1221. Restricted to College of Engineering Majors only.

[College of Engineering & Applied Science](#) | [Chemical Engineering](#)

### CHEN-1300 (1) Introduction to Chemical Engineering

Meets for one lecture per week. Introduces chemical engineering emphasizing history of the profession, curriculum, chemical industry, and industrial chemistry. Includes industry visits, oral presentations, faculty and professional meetings, and development of a goals statement.

[College of Engineering & Applied Science](#) | [Chemical Engineering](#)

---

## CHEN-2120 (3) Chemical Engineering Material and Energy Balances

Provides a basic understanding of chemical engineering calculations involving material and energy balances around simple chemical processes. Prereq., CHEN 1211 and GEEN 1300 (min. grade C-). Prerequisites: Restricted to Chemical, Chemical and Biological, Environmental, or Civil Engineering majors only.

College of Engineering & Applied Science | Chemical Engineering

---

## CHEN-2810 (3) Biology for Engineers

Develops a basic understanding of the science of biology, including an introduction to the disciplines of biochemistry, cell organization, metabolism, genetics, genomics, molecular biology, recombinant DNA technology and evolution. Provides a basic introduction to several key techniques used in biological engineering laboratories. Uses examples of complex and creative structures engineered by natural processes.

College of Engineering & Applied Science | Chemical Engineering

---

## CHEN-2840 (1-4) Independent Study

Available to sophomores with approval of Department of Chemical Engineering. Subject arranged to fit needs of student.

College of Engineering & Applied Science | Chemical Engineering

---

## CHEN-3010 (3) Applied Data Analysis

Teaches students to analyze and interpret data. Topics include engineering measurements, graphical presentation and numerical treatment of data, statistical inference, and regression analysis. Prereqs., GEEN 1300 and APPM 2360 (all min. grade C-).

College of Engineering & Applied Science | Chemical Engineering

---

## CHEN-3130 (2) Chemical Engineering Laboratory 1

One four-hour lab session per week. Investigates chemical engineering fluid flow, heat transfer, and thermodynamics. Emphasizes communication by written reports and oral presentations as well as laboratory safety. Prereq., CHEN 3010, 3200, 3320 and either CHEN 3210 or MCEN 3022 (all min. grade C-). Prerequisites: Requires pre-requisite courses of CHEN 3010 and CHEN 3200 (or MCEN 3021 or GEEN 3853) and CHEN 3320 and CHEN 3210 (or MCEN 3022)

College of Engineering & Applied Science | Chemical Engineering

---

## CHEN-3200 (3) Chemical Engineering Fluid Mechanics

---

Introduces fluid mechanics and momentum transfer, emphasizing the application of these principles to chemical engineering systems. Prereqs., APPM 2350 and either CHEN 2120 (min. grade C) or MCEN 2023 (min. grade C-). Coreq., APPM 2360. Same as GEEN 3853.

College of Engineering & Applied Science | Chemical Engineering

---

## CHEN-3210 (3) Chemical Engineering Heat Transfer

Examines conservation and transfer of thermal energy. Focuses on conduction and convection of heat in the context of chemical processes, with a special focus on heat exchangers. Also studies thermal radiation. Prereq., GEEN 1300 and either CHEN 3200 or MCEN 3021 (all min. grade C-), and CHEN 2120 (min. grade C). Prerequisites: Requires pre-requisite courses of CHEN 2120 and GEEN 1300, and either CHEN 3200 or MCEN 3021 (all minimum grade C-). Restricted to CHEN, CBEN or EVEN Majors or Civil/Environmental Engineering Concurrent Degree Majors only.

College of Engineering & Applied Science | Chemical Engineering

---

## CHEN-3220 (3) Chemical Engineering Separations and Mass Transfer

Studies separation methods including distillation, absorption, and extraction, and graphical and computer-based solutions to separation problems. Also studies mass transfer rate processes, including diffusion, microscopic material balances, and correlations for mass transfer coefficients. Applies mass transfer rate theory to packed and tray columns. Prereq., CHEN 3200, CHEN 3210 or MCEN 3022, and CHEN 3320. Prerequisites: Requires pre-requisite courses of CHEN 3200 (or MCEN 3021 or GEEN 3853) and CHEN 3320 and CHEN 3210 (or MCEN 3022)

College of Engineering & Applied Science | Chemical Engineering

---

## CHEN-3320 (3) Chemical Engineering Thermodynamics

Applies thermodynamic principles to nonideal systems, phase equilibrium, chemical equilibrium, power generation, refrigeration, and chemical processes. Prereqs., CHEN 2120 (min. grade C) and either CHEM 4511 or 4521 (min. grade C-). Prerequisites: Requires pre-requisite courses of CHEN 2120 and either CHEM 4511 or 4521 (all minimum grade C-)

College of Engineering & Applied Science | Chemical Engineering

---

## CHEN-3840 (1-4) Independent Study

Available to juniors with approval of the Department of Chemical Engineering. Subject arranged to fit needs of the student.

College of Engineering & Applied Science | Chemical Engineering

---

## CHEN-3930 (6) Chemical Engineering Cooperative Education

Students enrolled in this course participate in a previously arranged, department-sponsored cooperative education program. Prereqs., CHEN 2120 (min. grade C) and GPA higher than 2.85. GPA higher than 3.00 strongly recommended.

## CHEN-4010 (2) Chemical Engineering Senior Thesis 1

Provides an opportunity for advanced students to conduct exploratory research in chemical engineering.

## CHEN-4020 (2) Chemical Engineering Senior Thesis 2

Continuation of CHEN 4010. CHEN 4010 and 4020 can substitute for CHEN 4130.

## CHEN-4090 (1) Undergraduate Seminar

Provides chemical engineering career and professional information, facilitates contact with faculty and industry representatives, and improves communication and leadership skills. Consists of a series of seminars and field trips and requires a research project involving a written and oral report. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Chemical Engineering (CHEN) or Chemical and Biological Engineering (CBEN) majors only.

## CHEN-4130 (2) Chemical Engineering Laboratory 2

Involves planning and execution of chemical engineering experiments on mass transfer operations, separations, and chemical reactors. Interprets experimental data with theoretical principles and statistical analysis. Emphasizes communication with written memos, full reports, and oral presentations. Prereqs., CHEN 3010, 3130, 3320, and 4330 (all min. grade C-). Prerequisites: Requires pre-requisite courses of CHEN 3010, 3130, 3320, 4330 (all minimum grade C-)

## CHEN-4330 (3) Chemical Engineering Reaction Kinetics

Introduces chemical kinetics and chemical reactor design. Involves mass and energy balances for steady-state and transient reactor systems. Also covers residence time distribution, mass transfer, catalytic reactions, and multiple steady states in reactors. Prereq., CHEN 3210 or MCEN 3022 and CHEN 3320 (min. grade C-). Prerequisites: Requires pre-requisite courses of CHEN 3320 and CHEN 3210 (or MCEN 3022). This class is restricted to junior/senior Chemical Engineering majors or MS/BS CHEN concurrent degree majors.

---

## CHEN-4440 (3) Chemical Engineering Materials

Introduces materials engineering, including properties of polymers, metals, ceramics, and semiconductors, especially as related to chemical engineering processes. Prereq., CHEN 3320 and CHEM 3311 (min grade C-).

College of Engineering & Applied Science | Chemical Engineering

---

## CHEN-4450 (3) Polymer Chemistry

Introduces polymer science with a focus on polymer chemistry and polymerization reactions. Focuses on polymerization reaction engineering and how polymer properties depend on structure. Prereq., CHEN 4330 and CHEM 3311 (all min. grade C-). Same as CHEN 5450.

College of Engineering & Applied Science | Chemical Engineering

---

## CHEN-4460 (3) Polymer Engineering

Introductory polymer engineering course reviewing basic terminology and definitions; the properties and synthetic routes of important industrial polymers; and processing of polymers and their applications. Prereq., CHEM 3311 and CHEN 3320 (min. grade C-). Same as CHEN 5460. Prerequisites: Requires pre-requisite courses of CHEM 3311 and CHEN 3320

College of Engineering & Applied Science | Chemical Engineering

---

## CHEN-4520 (3) Chemical Process Synthesis

Studies applied chemical process design including equipment specification and economic evaluation. Prereqs., CHEN 3010, 3210, 3220, 3320 and 4330 or 4830 (all min. grade C-). Prerequisites: Requires pre-requisite courses of CHEN 3010, 3210, 3220, 3320 and 4330 or 4830 (all minimum grade C-).

College of Engineering & Applied Science | Chemical Engineering

---

## CHEN-4530 (2) Chemical Engineering Design Project

Provides a team-based capstone design experience for chemical engineering students. Projects are sponsored by industry and student design teams collaborate with industrial consultants. Projects consider chemical process and product design with emphasis on economic analysis. Deliverables include an oral mid-project design review, a final oral presentation and final written design report. Prereq., CHEN 4520 (min. grade C-). Prerequisites: Requires pre-requisite course of CHEN 4520

College of Engineering & Applied Science | Chemical Engineering

---

## CHEN-4570 (4) Instrumentation and Process Control

Examines principles of control theory and their application to chemical processes. Focuses on single-loop feedback and feedforward control. Laboratory sessions cover measurement fundamentals, signal transmission, dynamic testing, control system synthesis, and implementation and adjustment. Prereqs., CHEN 3220, 4330 or 4830, and APPM 2360 (all min. grade C-).

## Courses

Search by College, Department & Category

College/School

All

Search by Course Number

Subject Number

CHEN

### CHEN-4630 (1) Intellectual Property Law and Engineering

Learn the fundamentals of the various types of intellectual property, obtain the ability to search the USPTO database for patents, learn the difference between provisional patents, utility patents and foreign patents, and learn the timing requirements related to the filing of patents and public disclosure, use, and/or sale of an invention. Restricted to seniors. Same as CHEN 5630.

[College of Engineering & Applied Science](#) | [Chemical Engineering](#)

### CHEN-4650 (3) Particle Technology

Aims to identify the important physical mechanisms occurring in processes involving particles, formulate and solve mathematical descriptions of such processes, and analyze experimental and theoretical results in both a qualitative and quantitative manner. Teaches students to apply this knowledge to the design of particulate systems. Conveys the breadth and depth of natural and industrial applications involving particulates. Prereq., APPM 2360 and CHEN 3200 or MCEN 3021 (all min. grade C-). Same as CHEN 5650.

[College of Engineering & Applied Science](#) | [Chemical Engineering](#)

### CHEN-4670 (3) Environmental Separations

Lect. Covers traditional, as well as new, chemical separations processes that have environmental applications. Includes chemically benign processing (pollution prevention) as well as approaches to address existing pollution problems. Restricted to students with 87-180 credits (Senior, Fifth Year Senior) or graduate students only. Prereq., CHEN 2120 (min. grade C). Same as CHEN 5670.

[College of Engineering & Applied Science](#) | [Chemical Engineering](#)

## CHEN-4800 (3) Bioprocess Engineering

Reviews the recent developments in the fields of microbiology, molecular genetics, and genetic engineering that are of commercial value and benefit to mankind. Covers engineering implementation of such biological processes. Restricted to students with 87-180 credits (Senior, Fifth Year Senior) or graduate students in engineering. Same as CHEN 5800.

College of Engineering & Applied Science | Chemical Engineering

---

---

## CHEN-4801 (3) Pharmaceutical Biotechnology

Focuses on the engineering needed to bring therapeutic products derived from living organisms (e.g., proteins, peptides, DNA, RNA) from the production plant to the patient. Covers the challenges of keeping these products "active" as they are stored, shipped, and administered to patients. Prereq., CHEN 3320 (min. grade C-). Coreq., CHEN 4330 or 4830. Prerequisites: Requires pre-requisite courses of CHEN 3320 and pre-requisite or co-requisite courses of CHEN 4830 or CHEN 4330.

College of Engineering & Applied Science | Chemical Engineering

---

---

## CHEN-4803 (3) Metabolic Engineering

Introduces basic concepts in metabolic engineering and explores modern approaches in metabolic and strain engineering. Application areas that will be discussed will include the use of metabolic engineering approaches in biofuels and biorefining as well as biopharmaceutical production. Prereq., CHEM 4611 or 4711 and 4731, and APPM 2360. CHEN 4803 and 5803 are the same course.

College of Engineering & Applied Science | Chemical Engineering

---

---

## CHEN-4805 (3) Biomaterials

Provides an overview of biomaterials. Covers major classes of materials used in medical applications, properties, degradation mechanisms, and characterization methods, foreign body response, methods to control physiological response to biomaterial surfaces, biocompatibility, biomaterials used in soft and hard tissue replacements, drug delivery devices and tissue engineering, and design criteria for developing a material for a given biological application. Prereq., CHEM 3311 (min. grade C-). Same as CHEN 5805.

College of Engineering & Applied Science | Chemical Engineering

---

---

## CHEN-4810 (2) Biological Engineering Laboratory

Involves planning and execution of chemical engineering experiments on mass transfer operations, bioseparations, and biological reactors. Interprets experimental data with theoretical principles and statistical analysis. Emphasizes communication with written memos, full reports and oral presentations. Prereqs., CHEN 3130 and 4820.

College of Engineering & Applied Science | Chemical Engineering

---

---

## CHEN-4820 (3) Biochemical Separations

Lect. and lab. Presents purification methods, mass transfer coefficients, problems specific to biologicals, and scale-up of processes. Also covers chromatography, phase extraction, supercritical fluids, sedimentation, precipitation, electrophoresis, dialysis, affinity techniques, cell separation, application of separations to bioreactors, and comparison of batch and continuous processes. Prereq., senior standing or above in engineering or science. Same as CHEN 5820.

College of Engineering & Applied Science | Chemical Engineering

---

## CHEN-4830 (3) Chemical Engineering Biokinetics

Introduces chemical kinetics, chemical reactor design, and biological kinetics. Involves mass and energy balances for steady-state and transient reactor systems. Also covers residence time distribution, mass transfer, catalytic reactions, multiple steady states in reactors, enzyme kinetics, metabolic networks, and cell growth kinetics. Prereqs., CHEN 2810, 3210 and 3320 (all min. grade C-). Prerequisites: Requires pre-requisite courses of CHEN 3320 and CHEN 3210 (or MCEN 3022). Restricted to junior/senior CBEN majors, or MS/BS CBEN/CHEN concurrent degree majors.

College of Engineering & Applied Science | Chemical Engineering

---

## CHEN-4836 (3) Nanomaterials

Presents fundamental chemical and physical concepts that give rise to the unique optical, electronic and magnetic properties of nanoscale materials. Introduces important synthetic routes for producing nanomaterials, and interparticle forces governing colloidal behavior and self-assembly. Discusses current and potential applications in catalysis, biomedicine, renewable energy, and other fields. Restricted to students with 87-180 credits (Senior, Fifth Year Senior) or graduate students only. CHEN 4836 and 5836 are the same course. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior).

College of Engineering & Applied Science | Chemical Engineering

---

## CHEN-4838 (1-3) Special Topics in Chemical Engineering

Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

College of Engineering & Applied Science | Chemical Engineering

---

## CHEN-4840 (1-4) Independent Study

Available to seniors with approval of chemical engineering department. Subject arranged to fit needs of student.

College of Engineering & Applied Science | Chemical Engineering

---

## CHEN-5090 (1) Seminar in Chemical Engineering

Required of all chemical engineering graduate students. Includes reports on research activities and on special current topics.  
Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Chemical Engineering

---

## CHEN-5127 (3) Applied Statistics for the Manufacturing and Process Industries

Discusses the concepts and techniques of applied statistics essential to quality control and product/process improvement. Includes computer control (SQC/SPC), sampling methods and time series analysis, and methods of experimental design. Prereq., MCEN 4120. Same as CVEN 5127 and MCEN 5126.

College of Engineering & Applied Science | Chemical Engineering

---

## CHEN-5128 (3) Applied Statistics In Research and Development

Students learn current and emerging statistical methods that are appropriate to experimentation in research and development activities. Statistical design of experiments and model fitting is emphasized. Prereq., one introductory probability/statistics course. Same as MCEN 5146.

College of Engineering & Applied Science | Chemical Engineering

---

## CHEN-5210 (4) Transport Phenomena

Considers continuum mechanics, emphasizing fundamental relationships for fluid mechanics and heat transfer and their applications to engineering problems. Prereq., senior or graduate standing and undergraduate courses in fluid mechanics, heat transfer, and differential equations.

College of Engineering & Applied Science | Chemical Engineering

---

## CHEN-5220 (3) Mass Transport

Examines fundamentals of mass transport with particular attention to microscopic balances in complex systems, such as those involving multiple components, chemical reaction, simultaneous heat and mass transport, and/or high mass flux. Prereq., CHEN 5210, undergraduate mass transfer, and familiarity with vector and tensor calculus.

College of Engineering & Applied Science | Chemical Engineering

---

## CHEN-5333 (3) Research Methods and Ethics

Prepares graduate students to carry out independent research. Research ethics, laboratory skills, experimental methods, critical thinking,

---

presentations, proposal preparation and career planning are discussed. Independent research project carried out under direction of chemical engineering faculty. Prereq., graduate standing.

College of Engineering & Applied Science | Chemical Engineering

---

## CHEN-5343 (1) Research Methods and Ethics Seminar

Prepares graduate students to carry out independent research. Focuses on topics such as safety, ethics, communication skills, data analysis, intellectual property considerations, and time management. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Chemical Engineering

---

## CHEN-5360 (3) Catalysis and Kinetics

Studies principles of chemical kinetics and catalytic reactions, emphasizing heterogeneous catalysis. Coreq., CHEN 4330, or prereq., CHEM 4551 and instructor consent, or graduate standing in CHEM or CHEN.

College of Engineering & Applied Science | Chemical Engineering

---

## CHEN-5370 (3) Intermediate Chemical Engineering Thermodynamics

Reviews fundamentals of thermodynamics, application to pure fluids and mixtures, and physical equilibrium and changes of state. Examines the equation of state and computation of fluid properties for pure fluids, mixtures, and solutions. Also looks at relations between thermodynamics and statistical mechanics. Prereq., undergraduate thermodynamics (CHEN 3320 or equivalent). Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Chemical Engineering

---

## CHEN-5390 (3) Chemical Reactor Engineering

Studies ideal and nonideal chemical reactors, including unsteady state behavior, mixing effects, reactor stability, residence time distribution, and diffusion effects. Prereq., undergraduate course in chemical reactor design/kinetics.

College of Engineering & Applied Science | Chemical Engineering

---

## CHEN-5420 (3) Physical Chemistry and Fluid Mechanics of Interfaces

Covers thermodynamics of interfaces and surface tension measurement; adsorption at liquid-gas, liquid-liquid, and solid-gas interfaces; monolayers; conservation equations for a fluid interface; rheology of interfaces; surface tension driven flows; contact angle and wettability; and double layer phenomena. Prereq., CHEN 3200 or equivalent.

---

College of Engineering & Applied Science | Chemical Engineering

## CHEN-5450 (3) Polymer Chemistry

Same as CHEN 4450.

CHEN

## CHEN-5460 (3) Polymer Engineering

Same as CHEN 4460.

[College of Engineering & Applied Science](#) [Chemical Engineering](#)

## CHEN-5630 (1) Intellectual Property Law and Engineering

Restricted to graduate students. Prerequisites: Restricted to Graduate Students only.

[College of Engineering & Applied Science](#) [Chemical Engineering](#)

## CHEN-5650 (3) Particle Technology

Extra work required for graduate course. Same as CHEN 4650.

[College of Engineering & Applied Science](#) [Chemical Engineering](#)

## CHEN-5670 (3) Environmental Separations

Extra work required for graduate course. Same as CHEN 4670.

[College of Engineering & Applied Science](#) [Chemical Engineering](#)

---

## CHEN-5740 (3) Analytical Methods in Chemical Engineering

Presents applied analytical and numerical mathematical methods in the context of chemical engineering problems. Topics include modeling techniques, algebraic equations, and ordinary and partial differential equations. Prereq., senior or graduate standing; working knowledge of computing, calculus, differential equations, linear algebra, and vector operations; and undergraduate courses in physics, fluid mechanics, heat transfer, and reaction engineering. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Chemical Engineering

---

## CHEN-5750 (3) Numerical Methods in Chemical Engineering

Covers numerical methods for solving ordinary differential, partial differential, and integral equations. These principles are employed to develop, test, and assess computer programs for solving problems of interest to chemical engineers. Prereq., graduate standing or instructor consent.

College of Engineering & Applied Science | Chemical Engineering

---

## CHEN-5800 (3) Bioprocess Engineering

Same as CHEN 4800, except that a major term report is required.

College of Engineering & Applied Science | Chemical Engineering

---

## CHEN-5803 (3) Metabolic Engineering

Introduces basic concepts in metabolic engineering and explores modern approaches in metabolic and strain engineering. Application areas that will be discussed will include the use of metabolic engineering approaches in biofuels and biorefining as well as biopharmaceutical production. Prereq., CHEM 4611 or 4711 and 4731, and APPM 2360. CHEN 4803 and 5803 are the same course. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Chemical Engineering

---

## CHEN-5805 (3) Biomaterials

Same as CHEN 4805.

College of Engineering & Applied Science | Chemical Engineering

---

## CHEN-5820 (3) Biochemical Separations

Extra work required for graduate course. Same as CHEN 4820. Prerequisites: Restricted to Graduate Students only.

---

## CHEN-5830 (1) Introduction to Modern Biotechnology

Introduces students to the biotechnology enterprise. Topics include the biotechnology industry and profession, the various academic disciplines of biotechnology, intellectual property, financing, and ethics.

## CHEN-5831 (2) Biotechnology Case Studies

Capstone course required of all graduate students in the interdisciplinary graduate biotechnology certificate program. Reviews molecular genetics, product synthesis and purification, economics, intellectual property, and business planning. Working in teams, students present a biotechnology product plan. Prereq., CHEN 5830.

## CHEN-5835 (3) Colloids and Interfaces

Provides a deep exploration of the fundamental principles of colloid and interface science and of related applications. Core topics include fundamental equations of interfacial science, capillary phenomena, interfacial thermodynamics interfaces, molecular monolayers, electrical surface properties, and interfacial forces. Advanced topics include wetting phenomena, adsorption isotherms, dynamic interfacial behavior, surface modification, tribology, surfactant self-assembly, and foams/emulsions among others. Prereq., CHEN 3320 (min. grade C-).

## CHEN-5836 (3) Nanomaterials

Presents fundamental chemical and physical concepts that give rise to the unique optical, electronic and magnetic properties of nanoscale materials. Introduces important synthetic routes for producing nanomaterials, and interparticle forces governing colloidal behavior and self-assembly. Discusses current and potential applications in catalysis, biomedicine, renewable energy, and other fields. Restricted to students with 87-180 credits (Senior, Fifth Year Senior) or graduate students only. CHEN 4836 and 5836 are the same course. Prerequisites: Restricted to Graduate Students only.

## CHEN-5838 (1-3) Special Topics in Chemical Engineering

Graduate-selected topics courses offered upon demand. Prereq., graduate standing or instructor consent. Prerequisites: Restricted to Graduate Students only.

## CHEN-5840 (1-4) Independent Study

Available to MS and PHD students.

## CHEN-5900 (3) Pharmaceutical Biotechnology

Incorporates biochemistry, pharmaceutical science, and engineering for application in the pharmaceutical industry. Emphasizes microscale mechanisms affecting drug delivery, bioavailability, and stability. Specific topics include thermodynamics of macromolecular conformational stability, crystallization kinetics, interfacial phenomena, and industrial protein folding. Prereq., graduate standing.

## CHEN-6210 (3) Microhydrodynamics of Suspensions and Colloids

Focuses on fluid mechanics and colloid science of suspensions of particles, cells, and drops. Covers fundamentals, applications, and research frontiers. Prereq., CHEN 5210 or equivalent.

## CHEN-6820 (3) Biochemical Engineering Fundamentals

Covers design and operation of fermentation processes, microbial and enzyme kinetics, multiple substrate and multiple species of fermentation, regulation of enzyme activity, energetics of cellular growth, immobilized enzyme and cell reactors, and transport phenomena in microbial systems and downstream processing. Prereq., graduate standing in CHEM, CHEN, or MCDB, or instructor consent.

## CHEN-6940 (1) Master's Candidate

## CHEN-6950 (1-6) Master's Thesis

---

---

## CHEN-8990 (1-10) Doctoral Thesis

CHIN

## CHIN-1010 (5) Beginning Chinese 1

Introduces modern Chinese (Mandarin), developing all four skills (speaking, listening, reading and writing) and communicative strategies. Students learn both traditional full-form characters and the principles for converting them into simplified characters. Credit not granted for this course and CHIN 1150.

[College of Arts & Sciences](#) [East Asian Languages & Civilizations](#) [Chinese](#)

## CHIN-1012 (3-4) Introduction to Chinese Civilization

An interdisciplinary introduction from ancient to modern times. Arts, literature, politics, social relations, religion, and material culture are studied in terms of significant themes and ideas pertaining to the civilization of China. Approved for arts and sciences core curriculum: human diversity.

[College of Arts & Sciences](#) [East Asian Languages & Civilizations](#) [Chinese Courses in English](#)

## CHIN-1020 (5) Beginning Chinese 2

Continuation of CHIN 1010. Prereq., CHIN 1010 (min. grade C) or instructor consent.

[College of Arts & Sciences](#) [East Asian Languages & Civilizations](#) [Chinese](#)

## CHIN-1051 (3) Masterpieces of Chinese Literature in Translation

Surveys Chinese thought and culture through close reading and discussion of selected masterworks of Chinese literature in translation.

---

Texts include significant works of poetry, fiction, and drama, as well as philosophical and historical writings from various eras. Taught in English. Approved for arts and sciences core curriculum: literature and the arts.

College of Arts & Sciences East Asian Languages & Civilizations Chinese Courses in English

---

## CHIN-1061 (3) Boudoirs, Books, Battlefields: Voices and Images of Chinese Women

Explores narrative and visual representations of women throughout Chinese history. Emphasizes how modern values of freedom and equality have transformed women's lives and shaped their aspirations. Course materials include memoirs, novels, ethnographies, documentaries, and feature films. No knowledge of Chinese is necessary. Approved for arts and sciences core curriculum: human diversity.

College of Arts & Sciences East Asian Languages & Civilizations Chinese Courses in English

---

## CHIN-2110 (5) Intermediate Chinese 1

Emphasizes reading, speaking, and writing modern Chinese, including continued study of both full-form and simplified characters. Introduces dictionaries and principles of character formation. Prereq., CHIN 1020 (min. grade C) or instructor consent. Credit not granted for this course and CHIN 2150. Meets MAPS requirement: foreign language.

College of Arts & Sciences East Asian Languages & Civilizations Chinese

---

## CHIN-2120 (5) Intermediate Chinese 2

Continuation of CHIN 2110. Prereq., CHIN 2110 (min. grade C) or instructor consent. Credit not granted for this course and 2150.

College of Arts & Sciences East Asian Languages & Civilizations Chinese

---

## CHIN-2441 (3) Film and the Dynamics of Chinese Culture

Through studying a group of Chinese films in light of modern Chinese history and literature, students examine a series of cultural dilemmas and issues in 20th century China and develop skills in analyzing literary and filmic texts. Approved for arts and sciences CORE curriculum: literature and the arts.

College of Arts & Sciences East Asian Languages & Civilizations Chinese Courses in English

---

## CHIN-3110 (5) Advanced Chinese 1

Surveys a variety of authentic-language materials, including films, plays, newspaper articles, essays, and short stories. Emphasizes

proficiency-oriented approach to reading, writing, and oral communication. Prereq., CHIN 2120 (min. grade C) or instructor consent.

College of Arts & Sciences East Asian Languages & Civilizations Chinese

---

## CHIN-3120 (5) Advanced Chinese 2

Continuation of CHIN 3110. Prereq., CHIN 3110 (min. grade C) or instructor consent.

College of Arts & Sciences East Asian Languages & Civilizations Chinese

---

## CHIN-3200 (3) Adv Wrtg Topics on Chinese & Japanese Literature and Civilization

Provides an introduction to the academic study of Chinese and Japanese literature and culture with a focus on writing skills in English through a survey of standard academic writing conventions. Review and assessment of selected textual materials, class presentation, critique, and revision. Recommended for Chinese and Japanese majors and minors. Approved for arts and sciences core curriculum: written communication. CHIN 3200 and JPNS 3200 are the same course.

College of Arts & Sciences East Asian Languages & Civilizations Chinese

---

## CHIN-3311 (3) The Dao and the World in Medieval China

An interdisciplinary examination of role of Daoist and Buddhist philosophical and religious concepts and images in medieval Chinese civilization, including literature and the arts. Focuses on the personal aspects of this period of religious and intellectual ferment, tracing the representation of these ideas in Chinese poetry, prose, painting and the plastic arts as well as their role in philosophical and religious speculation. Taught in English. Recommended prereq., CHIN 1012 or 1051.

College of Arts & Sciences East Asian Languages & Civilizations Chinese Courses in English

---

## CHIN-3321 (3) Culture and Literature of Ancient China

Focuses on the religious, cultural, philosophical, and literary aspects of ancient Chinese civilization (1500 B.C.--A.D. 200). Special attention is paid to foundational works that influenced later developments in Chinese culture. All readings are in English. Recommended prereq., EALC 1011 or CHIN 1051. Same as HUMN 3321.

College of Arts & Sciences East Asian Languages & Civilizations Chinese Courses in English

---

## CHIN-3331 (3) Culture and Literature of Late Imperial China

The late imperial period was marked by growth of great metropolitan areas, expanded urban entertainments, and an extensive popular

culture. Focuses on the literature and artifacts of this urban culture as well as the hegemonic culture of the state and of traditional social codes and their literary manifestations. Also considers growing contacts with the West and the transition to the modern period. All readings are in English. Taught in English . Recommended prereq., CHIN 1012 or 1051.

College of Arts & Sciences East Asian Languages & Civilizations Chinese Courses in English

---

## CHIN-3334 (3) Chinese Narrative Tradition

Examines the major works of Chinese narrative tradition from the fourth to the nineteenth century. Emphasizes the reading and analysis of selected texts and understanding of the cultural and social contexts of text production and circulation. Text selections vary from year to year. All readings are in English. Recommended prereq., CHIN 1012.

College of Arts & Sciences East Asian Languages & Civilizations Chinese Courses in English

---

## CHIN-3341 (3) Literature and Popular Culture in Modern China

Surveys 20th century Chinese literature and popular culture against the historical background of rebellion, revolution, and reform. Emphasizes close and critical reading skills and an understanding of how aesthetic texts reflect and critically engage with historical and cultural experiences. Assignments include novels, essays, short stories, poems, plays, songs, films, and scholarly articles. Taught in English. Recommended prereq., CHIN 1021 or 1051. Same as HUMN 3341. Approved for arts and sciences core curriculum: literature and the arts.

College of Arts & Sciences East Asian Languages & Civilizations Chinese Courses in English

---

## CHIN-3342 (3) Literary Culture in Contemporary China

Surveys the late 20th century Chinese and Taiwanese literature and popular culture against the historical background Market Reform in China and the lifting of Martial Law in Taiwan. Emphasizes close and critical reading skills and an understanding of how aesthetic texts critically engage within historical and cultural experiences. Assignments include novels, essays, short stories, poems, plays, songs, films, and scholarly articles. Taught in English. recommended prereq., CHIN 1012 or 1051.

College of Arts & Sciences East Asian Languages & Civilizations Chinese Courses in English

---

## CHIN-3351 (3) Reality and Dream in Traditional Chinese Literature

Explores the role of dreams in pre-modern Chinese literature from the beginnings in the 2nd millennium B.C.E. to the 19th century. The source texts will range from religious, philosophical, medical and historical writings to poetry to various genres of fictional prose and drama. Taught in English. Prereq., junior standing or instructor consent. Approved for arts and sciences core curriculum: literature and the arts.

College of Arts & Sciences East Asian Languages & Civilizations Chinese Courses in English

---

---

## CHIN-3361 (3) Women and the Supernatural in Chinese Literature

Explores the relationship between the worlds of women and the supernatural in Chinese literature, from ancient to modern times. Focuses on selected significant works of classical and vernacular fiction, religious texts, and poetry. Taught in English. Prereq., junior standing or instructor consent.

College of Arts & Sciences | East Asian Languages & Civilizations | Chinese Courses in English

---

## CHIN-3371 (3) Topics in Chinese Film

Offers in-depth, critical analysis of key issues in Chinese culture as represented in Chinese film. Focuses on various topics, such as specific directors, regions, representation of gender in Chinese film, historical periods, etc. Varies from year to year. Requires no knowledge of Chinese. May be repeated up to 6 total credit hours on different topics. Prereq., junior standing or instructor consent. Recommended prereq., CHIN 1051, 2441.

College of Arts & Sciences | East Asian Languages & Civilizations | Chinese Courses in English

---

## CHIN-4110 (3) Advanced Readings in Modern Chinese 1

Surveys a wide variety of 20th- and 21st-century written materials, including texts from literature, the social sciences, religion, and cultural history. Focuses on content and style with extensive discussion and frequent written assignments in Chinese. Conducted in Chinese. Prereq., CHIN 3120 (min. grade C) or instructor consent.

College of Arts & Sciences | East Asian Languages & Civilizations | Chinese

---

## CHIN-4120 (3) Advanced Readings in Modern Chinese 2

Continuation of Chin 4110. Prereq., Chin 4110 (min. grade C) or instructor consent.

College of Arts & Sciences | East Asian Languages & Civilizations | Chinese

---

## CHIN-4210 (4) Introduction to Classical Chinese

Introduces the classical language based on texts from the pre-Han and Han periods. Stresses precise knowledge of grammatical principles and exactitude in translation--the basis for all further work in classical Chinese. Prereq., CHIN 2120 or instructor consent.

College of Arts & Sciences | East Asian Languages & Civilizations | Chinese

---

## CHIN-4220 (4) Readings in Classical Chinese

Close reading of selected texts of ancient and medieval literature. Readings in both prose and poetry. Emphasizes a disciplined, philological approach to the texts, with proper attention to diction, tone, and nuance. Prereq., CHIN 4210, or instructor consent.

[College of Arts & Sciences](#) [East Asian Languages & Civilizations](#) [Chinese](#)

## CHIN-4300 (3) Open Topics: Readings in Chinese Literature

Studies selected texts on a particular topic taught by regular or visiting faculty. Topics change each term. May be repeated up to 6 total credit hours. Prereq., junior standing or instructor consent.

CHIN

## CHIN-4750 (3) Daoism

Detailed examination of scriptures, liturgies, precept codes, and hagiographies of Daoism, China's indigenous organized religion. Focusing on origins and development, ethical teachings, ritual activities and world view. Topics include the relationship of Daoism to popular religion, practice of alchemy and self-cultivation, beliefs concerning death and afterlife, and structure of the Daoist pantheon. Prereq., RLST 3800 or instructor consent. Same as CHIN 5750 and RLST 4750.

College of Arts & Sciences    East Asian Languages & Civilizations    Chinese

## CHIN-4900 (1-3) Independent Study

May be repeated up to 6 total credit hours.

College of Arts & Sciences    East Asian Languages & Civilizations    Chinese

## CHIN-5010 (3) Sinological Methods

Provides training in research methods for graduate work in Sinology. Regular exercises require students to use standard bibliographic sources and tools, such as leishu, congshu, specialized dictionaries, dynastic histories, geographical treatises, gazetteers, and private historiography. Prereq., CHIN 4220 or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences    East Asian Languages & Civilizations    Chinese

## CHIN-5030 (3) Readings in Pre-Modern Chinese Literary Theory

Introduces the field of pre-modern Chinese literary theory and its relevance in Chinese intellectual history. Based on the close reading of

primary sources, i.e. typically on selected core texts of Chinese literary thought, as well as on the reading of secondary literature. Texts and topics vary from year to year. Restricted to graduate students or instructor consent required. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences East Asian Languages & Civilizations Chinese

---

## CHIN-5120 (3) History of Literature through the Ninth Century

Surveys, with readings in primary and secondary sources, major landmarks in various areas of ancient and medieval literature. Focuses on the classic and most influential works of the Zhou through Tang dynasties. Gives attention to matters of historical fact and actuality as well as to textual and interpretive history. Prereq., graduate standing or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences East Asian Languages & Civilizations Chinese

---

## CHIN-5210 (3) Ancient Prose

Studies selected pre-imperial and Han prose texts important in their own time and for the influence they exercised on the later development of Chinese literary history. Focuses on works such as the Lun yu, Mengzi, Zhuangzi, Huainanzi, Shiji, Hanshu, and Lunheng. May be repeated up to 9 total credit hours. Prereq., CHIN 4220 or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences East Asian Languages & Civilizations Chinese

---

## CHIN-5220 (3) Ancient Poetry

Studies selected pre-imperial and Han poetic works important in their own time and for the influence they exercised on the later development of Chinese literary history. Focuses on the Shijing and the Chu ci, as well as the fu and shi of Han writers. Texts and selections vary from year to year. May be repeated up to 9 total credit hours. Prereq., CHIN 4220 or instructor consent.

College of Arts & Sciences East Asian Languages & Civilizations Chinese

---

## CHIN-5230 (3) History of Early Chinese Thought

Introduces early Chinese philosophy, mostly "Masters' Literature" of the 5th--1st c. BCE, which is foundational for all later Chinese philosophy and political thought. Close reading of primary sources will be combined with an introduction to secondary scholarship in English and modern Chinese, both articles on individual texts/philosophers and comprehensive histories of early Chinese philosophy. Prereq., graduate standing or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences East Asian Languages & Civilizations Chinese

---

## CHIN-5280 (3) Topics in Ancient Literature

Examines a specific problem or issue in ancient Chinese literature, e.g., early views of language's relationship to reality, or the

commentary tradition and the emergence of allegorical and metaphysical approaches to interpreting texts. Topics vary from year to year. May be repeated up to 9 total credit hours. Prereq., Chin 4220 or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences East Asian Languages & Civilizations Chinese

---

## CHIN-5410 (3) Medieval Prose

Studies works of early medieval (ca. 200-600 AD) and/or late medieval (600-900) prose that played important role in development of Chinese literature. Writers and topics vary, ranging from surveys of specific genre, literary essays, proto-fiction, or historical writings, to focused studies of major figures Liu Zhiji, Han Yu, or Liu Zongyuan. May be repeated up to 9 total credit hours. Prereq., CHIN 4220 or instructor consent required.

College of Arts & Sciences East Asian Languages & Civilizations Chinese

---

## CHIN-5420 (3) Medieval Poetry

Studies works of early medieval (ca. 200-600 AD) poetry . Writers and topics vary ranging from surveys of specific genre, shi or fu, or shared subject such as religious or commemorative verse, or specific periods, to focused studies of particular major figures Cao Zhi, Tao Qian, Li Bo, or Du Fu. May be repeated up to 9 total credit hours. Prereq., CHIN 4220 or instructor consent required. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences East Asian Languages & Civilizations Chinese

---

## CHIN-5430 (3) Medieval Thought and Religion

Studies selected works of early medieval (ca. 200-600 AD) and/or late medieval (600-900) religious importance. Selections vary from fundamental texts of both literary and religious value, Daoist and Buddhist canons, the Huangting jing, Zhen gao, Miaofa lianhua jing, and Tan jing, particular topics of social or cultural importance, character assessment, arcane learning, or methods of commentary. May be repeated up to 9 total credit hours. Prereq., CHIN 4220 or instructor consent.

College of Arts & Sciences East Asian Languages & Civilizations Chinese

---

## CHIN-5480 (3) Topics in Medieval Literature

Examines a specific problem or issue in medieval literature, e.g., the role of encyclopedias and anthologies in literary training, or the place and forms of literary composition at the imperial court. Topics vary from year to year. May be repeated up to 9 total credit hours. Prereq., CHIN 4220 or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences East Asian Languages & Civilizations Chinese

---

## CHIN-5610 (3) Early Modern Prose

Studies Song, Ming, and Qing prose texts selected for their inherent literary merit and for their significance in the Chinese literary

tradition. Typically focuses on works by major authors such as Ouyang Xiu, Su Shi, and Yuan Hongdao. Texts and selections vary from year to year. May be repeated up to 9 total credit hours. Prereq., CHIN 4220 or instructor consent.

College of Arts & Sciences East Asian Languages & Civilizations Chinese

## CHIN-5620 (3) Early Modern Poetry

Studies Song, Yuan, Ming and Qing poetry. Stresses major figures, stylistic variations, various poetry schools, new directions in shi verse, and the rise and development of ci. Texts and selections vary from year to year. May be repeated up to 9 total credit hours. Prereq., CHIN 4220 or instructor consent.

College of Arts & Sciences East Asian Languages & Civilizations Chinese

## CHIN-5630 (3) Early Modern Fiction

Explores selected vernacular and classical fiction of the Ming and Qing periods. Normally focuses on long novels such as Xiyou ji, Sanguo yanyi, Shuihu zhuan, Jin Ping Mei, as well as short stories by Feng Menglong and Ling Mengchu. Texts and selections vary from year to year. May be repeated up to 9 total credit hours. Prereq., CHIN 4220 or instructor consent.

College of Arts & Sciences East Asian Languages & Civilizations Chinese

## CHIN-5680 (3) Topics in Early Modern Literature

Examines a specific problem or issue in early modern literature (e.g., the relationships among religion, folklore, and early fiction; the issue of genre and traditional fiction); the role of elite versus popular cultures in the composition of fiction; or the relationship of the state and censorship and the southern philosophical schools to the publication of fiction. Topics vary from year to year. May be repeated up to 9 total credit hours. Prereq., CHIN 4220 or instructor consent.

College of Arts & Sciences East Asian Languages & Civilizations Chinese

## CHIN-5750 (3) Daoism

Detailed examination of scriptures, liturgies, precept codes, and hagiographies of Daoism, China's indigenous organized religion. Focusing on origins and development, ethical teachings, ritual activities and world view. Topics include the relationship of Daoism to popular religion, practice of alchemy and self-cultivation, beliefs concerning death and afterlife, and structure of the Daoist pantheon. Restricted to graduate students or instructor consent required. Same as CHIN 4750 and RLST 5750. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences East Asian Languages & Civilizations Chinese

---

## CHIN-5810 (3) Modern Literature

Examines selected texts in various genres of Chinese literature from the May Fourth period (beginning 1917) to the establishment of the People's Republic of China (1949). Focuses on major and influential works produced in this fertile period of experimentation with Western, modernist types of literature. Texts and selections vary from year to year. May be repeated up to 9 total credit hours. Prereq., CHIN 4120 or instructor consent required. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences East Asian Languages & Civilizations Chinese

---

## CHIN-5820 (3) Contemporary Literature

Examines selected texts in various genres of Chinese literature from 1949 (the establishment of the People's Republic of China) to the present. Focuses on major works from the very different literary worlds of Taiwan and mainland China. Texts and selections vary from year to year. May be repeated up to 9 total credit hours. Prereq., CHIN 4120 or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences East Asian Languages & Civilizations Chinese

---

## CHIN-5830 (3) History of Chinese Film

Examines the development of narrative film in China from the early twentieth century to today, covering the major periods, styles, and themes developed in Chinese cinema. Texts and selections vary from year to year. May be repeated up to 6 total credit hours. Prereq., CHIN 4120 or instructor consent.

College of Arts & Sciences East Asian Languages & Civilizations Chinese

---

## CHIN-5880 (3) Topics in 20th Century Literature

Examines a specific problem or issue in 20th century literature, e.g., feminist fiction in China, modernism in fiction and poetry, or the role of literary criticism in modern literature. Topics vary from year to year. May be repeated up to 9 total credit hours. Prereq., CHIN 4120 or instructor consent.

College of Arts & Sciences East Asian Languages & Civilizations Chinese

---

## CHIN-5890 (3) Topics in Chinese Film

Examines a specific problem or issue in Chinese film, e.g. 5th generation filmmakers, early film, genre (martial arts, melodrama, Hong Kong action, etc.), Taiwan New Cinema, Hollywood crossover. Topics vary from year to year. May be repeated up to 6 total credit hours. Prereq., CHIN 4120 or instructor consent.

College of Arts & Sciences East Asian Languages & Civilizations Chinese

---

---

## CHIN-5900 (1-3) Independent Study

May be repeated up to 9 total credit hours.

[College of Arts & Sciences](#) [East Asian Languages & Civilizations](#) [Chinese](#)

---

---

## CHIN-6900 (1-6) Independent Study

May be repeated up to 9 total credit hours. Prerequisites: Restricted to Graduate Students only.

CLAS

## CLAS-1010 (3) The Study of Words

Study of English words of Latin and Greek origin, focusing on etymological meaning by analysis of component parts (prefixes, bases, suffixes) and on the ways in which words have changed and developed semantically. No Greek or Latin required. Same as LING 1010.

[College of Arts & Sciences](#) [Classics](#) [Literature, Culture, & Thought](#)

## CLAS-1013 (4) Beginning Classical Greek 1

For students with no previous knowledge of Greek. Introduces basic grammar and vocabulary.

[College of Arts & Sciences](#) [Classics](#) [Greek](#)

## CLAS-1014 (4) Beginning Latin 1

Introduces basic grammar and vocabulary. For students with no previous knowledge of Latin.

[College of Arts & Sciences](#) [Classics](#) [Latin](#)

## CLAS-1020 (3) Argument from Evidence: Critical Writing about the Ancient World

Introduces students to writing about the ancient world, with special attention to the possibilities and the limitations of ancient source-material. Taught as a writing workshop, with emphasis on critical thinking, analysis, argument and inquiry. While the course reads foundational ancient texts, the skills acquired will be broadly useful among humanities disciplines. Approved for arts and sciences core

curriculum: written communication.

College of Arts & Sciences Classics Literature, Culture, & Thought

---

---

## CLAS-1023 (4) Beginning Classical Greek 2

Completes the presentation of grammar and introduces reading of literature. Prereq., CLAS 1013 or equivalent.

College of Arts & Sciences Classics Greek

---

---

## CLAS-1024 (4) Beginning Latin 2

Completes the presentation of grammar, incorporates review of fundamentals, and introduces reading of literature. For students with previous experience of Latin. Prereq., CLAS 1014 or equivalent.

College of Arts & Sciences Classics Latin

---

---

## CLAS-1030 (3) Introduction to Western Philosophy: Ancient

Develops three related themes: the emergence in antiquity of a peculiarly scientific mode of thinking: the place of religious belief within this developing scientific world view and the force of ethical speculation within the culture and political climates of ancient Greece and Rome. No Greek or Latin required. Same as PHIL 1010. Approved for arts and sciences CORE curriculum: historical context.

College of Arts & Sciences Classics Literature, Culture, & Thought

---

---

## CLAS-1051 (3) The World of the Ancient Greeks

Presents a survey of the emergence, the major accomplishments, the failures, and the decline of the ancient Greeks, from the Bronze Age civilizations of the Minoans and Mycenaeans through the Hellenistic Age (2000--30 B.C.). No Greek or Latin required. Same as HIST 1051. Approved for arts and sciences CORE curriculum: historical context.

College of Arts & Sciences Classics Ancient History

---

---

## CLAS-1061 (3) The Rise and Fall of Ancient Rome

Presents a survey of the rise of ancient Rome in the eighth century B.C. to its fall in the fifth century A.D. Emphasizes political institutions, foreign policy, leading personalities, and unique cultural accomplishments. No Greek or Latin required. Same as HIST 1061. Approved for arts and sciences CORE curriculum: historical context.

---

---

\_\_\_\_\_

## CLAS-1100 (3) Greek Mythology

Covers the Greek myths as documents of early human religious experience and imagination, the source of Greek culture, and part of the fabric of Western cultural tradition. Of particular interest to students of literature and the arts, psychology, anthropology, and history. No Greek or Latin required. Approved for arts and sciences CORE curriculum: literature and the arts.

## CLAS-1110 (3) Muses and Man-eaters (1): The Literature of Ancient Greece

Surveys Greek authors whose works have most influenced Western thought: Homer, Aeschylus, Sophocles, Euripides, Aristophanes, and Plato. No Greek or Latin required. Approved for arts and sciences core curriculum: literature and the arts.

## CLAS-1115 (3) Masterpieces of Greek Literature in Translation

Students read about mythological heroes and historical individuals from Achilles to Socrates in Greek literature. Class discusses why the Greeks told stories the way they did and what those stories might have meant to them and might mean to us. Approved for arts and sciences core curriculum: literature and the arts.

## CLAS-1120 (3) Muses and Man-Eaters (2): The Literature of Ancient Rome

Surveys ideas and culture of the Romans through a study of representative literature: comedy, tragedy, history, philosophy, oratory, the novel, lyric, epic, and didactic poetry. No Greek or Latin required. Approved for arts and sciences core curriculum: literature and the arts.

## CLAS-1140 (3) Bread and Circuses: Society and Culture in the Roman World

Surveys the outstanding achievements of Roman culture and society as reflected in literature; philosophy and art; private and official religion; and legal and political thought. No Greek or Latin required. Approved for arts and sciences CORE curriculum: historical context.

---

---

## CLAS-1509 (4) Trash and Treasure, Temples and Tombs: Art and Archaeology of the Ancient World

Introduces the art and archaeology of ancient Egypt, Mesopotamia, Greece and Rome, examining various ancient approaches to power, religion, death and the human body. Analyzes art, architecture, and everyday trash to learn about ancient humanity. Same as ARTH 1509. Approved for arts and sciences core curriculum: historical context or literature and the arts.

College of Arts & Sciences Classics Art and Archaeology

---

## CLAS-2004 (3) Accelerated Latin 1

Intensive introductory course in Latin including a survey of grammar and practice reading and writing. No previous knowledge of Latin is required. Formerly CLAS 5804.

College of Arts & Sciences Classics Latin

---

## CLAS-2009 (3) Modern Issues, Ancient Times

Considers issues of vital importance to humans, both now and in ancient times. Topics such as food, death, sex, family, literacy, or power are explored to consider how ancient societal norms and attitudes evolved, and how they relate to modern culture. Draws on material and literary evidence to develop an understanding of the complexities of ancient life. Same as ANTH 2009. Approved for arts and sciences core curriculum: historical context.

College of Arts & Sciences Classics Art and Archaeology

---

## CLAS-2019 (3) Pompeii and the Cities of Vesuvius

Introduces the towns and villas buried by the eruption of Mt. Vesuvius in 79 C.E. Explores the layout and decoration of ancient Roman houses, the variety of artifacts uncovered as evidence for daily life and the history of the excavations. Same as ARTH 2019. Approved for arts and sciences core curriculum: historical context.

College of Arts & Sciences Classics Art and Archaeology

---

## CLAS-2020 (3) Science in the Ancient World

Covers the development of scientific modes of thought, theory, and research from mythological origins (e.g., Hesiod's poetry) through pre-Socratic philosophers. Culminates in theories and research of Plato and Aristotle, including the Roman Empire. Students read original sources in translation. No Greek or Latin required. Approved for arts and sciences core curriculum: natural science.

College of Arts & Sciences Classics Literature, Culture, & Thought

---

---

---

## CLAS-2041 (3) War and Society in Ancient Greece

Studies Greek warfare in its cultural, social, and economic contexts, in the light of anthropological comparisons and modern theories. No Greek or Latin required. Same as HIST 2041.

College of Arts & Sciences Classics Ancient History

---

---

## CLAS-2100 (3) Women in Ancient Greece

Examines evidence of art, archaeology, and literature of Greek antiquity from a contemporary feminist point of view. Focuses on women's roles in art, literature, and daily life. No Greek or Latin required. Same as WMST 2100. Approved for arts and sciences core curriculum: human diversity.

College of Arts & Sciences Classics Literature, Culture, & Thought

---

---

## CLAS-2110 (3) Women in Ancient Rome

Uses art, archaeology, and literature to study, from a contemporary feminist point of view, the status of women in works of Roman art and literature, the development of attitudes expressed toward them, and their daily life. No Greek or Latin required. Same as WMST 2110. Approved for arts and sciences core curriculum: human diversity.

College of Arts & Sciences Classics Literature, Culture, & Thought

---

---

## CLAS-2114 (4) Intermediate Latin 1

Readings from Caesar and/or Cicero, with review of grammar. Prereq., CLAS 1024, or equivalent. Meets MAPS requirement for foreign language.

College of Arts & Sciences Classics Latin

---

---

## CLAS-2124 (4) Intermediate Latin 2

Selections from Virgil's Aeneid with attention to literary form and context as well as advanced grammar and syntax. Prereq., CLAS 2114 or equivalent.

College of Arts & Sciences Classics Latin

---

---

## CLAS-2610 (3) Paganism to Christianity

Offers a cultural history of Greek and Roman religion. Students read ancient texts in translation and use evidence from archaeology to reconstruct the shift from paganism to Christianity in antiquity. No Greek or Latin required. Same as PHIL 2610. Approved for arts and sciences core curriculum: ideals and values.

CLAS

### CLAS-3004 (3) Accelerated Latin 2

Continuation of CLAS 2004. Reading of advanced texts: Caesar, Cicero, Ovid and others. Prereq., CLAS 2004 Formerly CLAS 5814.

[College of Arts & Sciences](#) [Classics](#) [Latin](#)

### CLAS-3013 (1) Readings in the Greek New Testament and Septuagint

Readings in ancient (koine) Greek from the New Testament and the Septuagint. Students aim to achieve fluency in reading and to enrich their knowledge of key terms and ideas borrowed from the Greek past in the early Christian tradition. May be repeated up to 4 total credit hours. Prereq., CLAS 1013 and 1023.

[College of Arts & Sciences](#) [Classics](#) [Greek](#)

### CLAS-3014 (3) Introduction to Latin Prose

Author or topic in Latin specified in the online Schedule Planner (e.g., Cicero, Livy, Pliny). May be repeated up to 9 total credit hours for different topics.

[College of Arts & Sciences](#) [Classics](#) [Latin](#)

### CLAS-3024 (3) Introduction to Latin Poetry

Author or topic in Latin specified in the online Schedule Planner (e.g., Virgil, Ovid, Catullus, Horace.) May be repeated up to 9 total credit hours for different topics.

College of Arts & Sciences Classics Latin

---

## CLAS-3039 (3) Greek Art and Archaeology

Covers prehistoric Aegean through the fourth century B.C.E., considering architecture, pottery, painting, sculpture, and personal ornament. Societal customs such as use of space and burial patterns are considered as well as art and its uses, to help understand developments in Greek culture. Credit not granted for this course and CLAS/FINE 1009. Same as ARTH 3039. Approved for arts and sciences core curriculum: literature and the arts.

College of Arts & Sciences Classics Art and Archaeology

---

## CLAS-3049 (3) Introduction to Roman Art and Architecture

Introduces the monuments and sites of the ancient Roman world from the foundation of Rome (753 B.C.E.) to Constantine (306-307 C.E.). Emphasizes the relationship of art, architecture, and artifacts to the political, social, and religious institutions of Italy and the provinces. Same as ARTH 3049. Credit not granted for this course and CLAS 1019 or FINE 1019. Approved for arts and sciences CORE curriculum: literature and the arts.

College of Arts & Sciences Classics Art and Archaeology

---

## CLAS-3113 (3) Intermediate Classical Greek 1

Reading of selected prose texts of authors in ancient Greek such as Plato, Xenophon, Lysias, and selections from the Greek New Testament. Incorporates review of grammar. May be repeated up to 6 total credit hours. Prereqs., CLAS 1013 and 1023 or equivalent. Meets MAPS requirement for foreign language.

College of Arts & Sciences Classics Greek

---

## CLAS-3123 (3) Intermediate Classical Greek 2

Reading of selections from Homer or a Greek tragedy in ancient Greek, with attention to literary form and context as well as advanced grammar and syntax. Maybe repeated up to 6 total credit hours. Prereqs., CLAS 1013, 1023 and 3113, or equivalent.

College of Arts & Sciences Classics Greek

---

## CLAS-3820 (3) Greek and Roman Antiquity in Music from 1600 to Present

Explores the influence of Greek and Roman mythology and history on various genres of music since 1600. Explains the context and meaning of ancient themes and their use by composers from the Renaissance to the present. No Greek or Latin required. Recommended

prereq., CLAS 1100. Same as HUMN 3820.

College of Arts & Sciences Classics Literature, Culture, & Thought

---

---

## CLAS-4013 (3) Topics in Greek Prose

Author or topic in ancient Greek specified in the online Schedule Planner (e.g., Thucydides, Herodotus, Plato, Aristotle, Attic Orators). May be repeated up to 6 total credit hours for different topics. Same as CLAS 5013.

College of Arts & Sciences Classics Greek

---

---

## CLAS-4014 (3) Topics in Latin Prose

Author or topic in Latin specified in the online Schedule Planner (e.g., Roman historians, Roman epistolography, Cicero, Roman novel). May be repeated up to 9 total credit hours for different topics. Prereq., CLAS 3014 and 3024, or equivalent. Same as CLAS 5014.

College of Arts & Sciences Classics Latin

---

---

## CLAS-4021 (3) Athens and Greek Democracy

Studies Greek history from 800 B.C. (the rise of the city-state) to 323 B.C. (the death of Alexander the Great). Emphasizes the development of democracy in Athens. Readings are in the primary sources. Same as CLAS 5021 and HIST 4021.

College of Arts & Sciences Classics Ancient History

---

---

## CLAS-4023 (3) Topics in Greek Poetry

Author or topic in ancient Greek specified in the online Schedule Planner (e.g., Homer, Hesiod, lyric poetry, tragedy, comedy). May be repeated up to 9 total credit hours for different topics. Same as CLAS 5023.

College of Arts & Sciences Classics Greek

---

---

## CLAS-4024 (3) Latin Prose Composition

Reviews grammar and syntax. Introduces Latin prose style and composition. Prereqs., CLAS 3014 and 3024, or equivalent. Same as CLAS 5024.

College of Arts & Sciences Classics Latin

---

---

---

## CLAS-4031 (3) Alexander the Great and the Rise of Macedonia

Covers Macedonia's rise to dominance in Greece under Philip II and the reign and conquests of Alexander the Great. Prereq., one of the following: CLAS 1509, 3039, 3113, 4051, 4139, 4149, CLAS/HIST 1051, 2041, 4021, or 4041. Same as CLAS 5031 and HIST 4031.

College of Arts & Sciences Classics Ancient History

---

## CLAS-4040 (3) Seminar in Classical Antiquity

Examines an advanced topic in classical language, literature, history, philosophy, art, or culture. Combines the techniques of philology with a critical approach to the literary and material legacy of the past. Prereq., second-year proficiency in Greek or Latin. May be repeated up to 6 total credit hours.

College of Arts & Sciences Classics Literature, Culture, & Thought

---

## CLAS-4041 (3) Classical Greek Political Thought

Studies main representatives of political philosophy in antiquity (Plato, Aristotle, Cicero) and of the most important concepts and values of ancient political thought. No Greek or Latin required. Prereq., CLAS/HIST 1051, CLAS/HIST 1061, HIST 1010, PSCI 2004, or PHIL 3000. Same as CLAS 5041, HIST 4041, and PHIL 4210.

College of Arts & Sciences Classics Ancient History

---

## CLAS-4044 (3) Topics in Latin Poetry

Author or topic specified in Latin specified in the online Schedule Planner (e.g., Roman elegy, Neronian poetry, Lucretius, Roman satire). May be repeated up to 9 total credit hours for different topics. Prereqs., CLAS 3014 and 3024, or equivalent. Same as CLAS 5044.

College of Arts & Sciences Classics Latin

---

## CLAS-4061 (3) Twilight of Antiquity

Explores the reasons for the fall of the Roman Empire in the western Mediterranean and its survival in the East as Byzantium. Emphasizes Christianity; barbarians; social, economic, and cultural differences; contemporary views of Rome; and modern scholarship. No Greek or Latin is required. Same as CLAS 5061 and HIST 4061.

College of Arts & Sciences Classics Ancient History

---

---

## CLAS-4071 (3) Seminar in Ancient Social History

Considers topics ranging from demography, disease, family structure, and the organization of daily life to ancient slavery, economics, and law. Focuses either on Persia, Greece, or Rome and includes a particular emphasis on the methodology required to reconstruct an ancient society, especially the interpretation of problematic literary and material evidence and the selective use of comparisons with better known societies. No Greek or Latin required. May be repeated up to 9 total credit hours. Same as CLAS 5071 and HIST 4071.

College of Arts & Sciences Classics Ancient History

---

---

## CLAS-4081 (3) The Roman Republic

Studies the Roman Republic from its foundation in 753 B.C. to its conclusion with the career of Augustus. Emphasizes the development of Roman Republican government. Readings are in the primary sources. No Greek or Latin required. Same as CLAS 4081 and HIST 4081.

College of Arts & Sciences Classics Ancient History

---

---

## CLAS-4084 (3) Survey of Roman Literature Part 2: Imperial

Covers Imperial Roman literary history from the mid-late Augustan Period to the start of Late Antiquity. Students read principal surviving works of Imperial Roman poetry and prose in the original Latin. Prereqs. CLAS 3014 and 3024 or equivalent. Same as CLAS 5084.

College of Arts & Sciences Classics Latin

---

---

## CLAS-4091 (3) The Roman Empire

Intense survey of Imperial Rome from the Roman revolution to the passing of centralized political authority in the western Mediterranean. Emphasizes life, letters, and personalities of the empire. No Greek or Latin required. Same as CLAS 5091 and HIST 4091.

College of Arts & Sciences Classics Ancient History

---

---

## CLAS-4093 (3) Survey of Greek Literature

Greek literary history in ancient Greek from Homer to the Hellenistic age. Prereqs., CLAS 3113 and 3123 or equivalent. Same as CLAS 5093.

College of Arts & Sciences Classics Greek

---

---

## CLAS-4094 (3) Survey of Roman Literature Part 1: Republican to Augustan

Introduces Roman literary history from its origins to the 30s BCE. Students read principal surviving works of the Roman Republican poetry and prose in the original Latin. Prereqs., CLAS 3014 and 3024 or equivalent. Same as CLAS 5094.

CLAS

## CLAS-4109 (3) Ancient Italian Painting

Explores the problems, theories and methods for understanding the iconography, styles, topologies, contexts and techniques of fresco wall painting in ancient Italy from the 6th century B.C.E. to the 4th century C.E. Topics covered include Etruscan tomb paintings, late Republican and early imperial fresco paintings from Rome and Campania, and later Roman wall paintings, including the painted images in ancient catacombs. Previous course work on ancient Italy or the history of pre-modern art is highly recommended. Recommended prereqs., CLAS/ARTH 1509, 3049. Same as CLAS 5109 and ARTH 4109.

[College of Arts & Sciences](#) [Classics](#) [Art and Archaeology](#)

## CLAS-4110 (3) Greek and Roman Epic

Students read in English translation the major epics of Graco-Roman antiquity such as the Iliad, Odyssey, Argonautica, Aeneid, and Metamorphoses. Topics discussed may include the nature of classical epic, its relation to the novel, and its legacy. No Greek or Latin required. Same as CLAS 5110 and HUMN 4110. Approved for arts and science CORE curriculum: literature and the arts.

[College of Arts & Sciences](#) [Classics](#) [Literature, Culture, & Thought](#)

## CLAS-4119 (3) Roman Sculpture

Examines ancient Roman sculpture, emphasizing the display, iconography, and production of private and public monuments in the Roman Empire. Same as CLAS 5119 and ARTH 4119.

[College of Arts & Sciences](#) [Classics](#) [Art and Archaeology](#)

---

## CLAS-4120 (3) Greek and Roman Tragedy

Intensive study of selected tragedies of Aeschylus, Sophocles, Euripides, and Seneca in English translation. No Greek or Latin required. Same as CLAS 5120 and HUMN 4120. Approved for arts and sciences CORE curriculum: literature and the arts.

College of Arts & Sciences Classics Literature, Culture, & Thought

---

## CLAS-4129 (3) Aegean Art and Archaeology

A detailed study of the cultures of prehistoric Greece, the Cycladic Islands, and Crete, their art and archaeology, and their history within the broader context of the eastern Mediterranean, from earliest human settlement to the collapse of the Bronze Age at about 1100 B.C.E. Emphasis is on palace states. Same as ANTH/ARTH 4129, CLAS 5129.

College of Arts & Sciences Classics Art and Archaeology

---

## CLAS-4130 (3) Greek and Roman Comedy

Studies Aristophanes, Plautus, and Terence in English translation. No Greek or Latin required. Same as CLAS 5130 and HUMN 4130. Approved for arts and sciences CORE curriculum: literature and the arts.

College of Arts & Sciences Classics Literature, Culture, & Thought

---

## CLAS-4139 (3) Greek Vase Painting

A comprehensive overview of Greek vase painting, from prehistoric through the fourth century B.C.E. Emphasis is on learning the development of primary decorative styles and on refining skills of visual analysis, scholarly research, critical thinking, oral commentary, and written presentation. Same as CLAS 5139 and ARTH 4139.

College of Arts & Sciences Classics Art and Archaeology

---

## CLAS-4140 (3) The Greek and Roman Novel

Studies five surviving complete Greek novels from classical antiquity, three Latin novels, and their predecessors and contemporary neighbors in the genres of Greek prose fiction. Readings in English translation. No required prerequisite, but a previous course in classical literature or myth is recommended. Same as CLAS 5140 and HUMN 4131.

College of Arts & Sciences Classics Literature, Culture, & Thought

---

## CLAS-4149 (3) Greek Cities and Sanctuaries

Examines Greek architecture in context, from the ninth century B.C.E. into the Hellenistic period, considering the use of space, both in religious and in civic settings, and using texts as well as material culture. Emphasis is on developing analytical skills. Same as CLAS 5149 and ARTH 4149.

College of Arts & Sciences Classics Art and Archaeology

---

## CLAS-4169 (3) Topics in Ancient and Classical Art and Archaeology

In-depth consideration of an aspect of ancient Mediterranean culture. Topics vary; they may include ancient wall painting, Greek sculpture, artists and patrons, the ancient Near East, Egyptian art and archaeology, or Etruscan art and archaeology. Maybe repeated up to 9 total credit hours providing the topics are different. Same as CLAS 5169 and ARTH 4169.

College of Arts & Sciences Classics Art and Archaeology

---

## CLAS-4199 (3) Roman Architecture

Examines the designs, functions, and construction methods of ancient Roman towns, temples, baths, houses, and civic structures, as well as utilitarian structures, including roads and aqueducts. Emphasizes Roman architectural forms and spaces as vehicles for political propaganda and empire consolidation. Same as CLAS 5199 and ARTH 4199.

College of Arts & Sciences Classics Art and Archaeology

---

## CLAS-4209 (3) Classical Archaeological Field Methods

Offers experiential learning in theories and methods of field excavation at the Villa of Maxentius in Rome. Applies methods for stratigraphic excavation, electronic surveying with GIS, ceramic analysis, numismatic analysis, architectural construction materials and methods, artifact conservation and data processing and documentation. Offered abroad only. May be repeated up to 6 total credit hours. Coreq., CLAS 4219 for first 3 credit hours. Recommended prereqs., CLAS/ARTH 1509, 3049. Same as CLAS 5209 and ARTH 4209.

College of Arts & Sciences Classics Art and Archaeology

---

## CLAS-4219 (3) Maxentius and the City of Rome

Combines seminar discussion and site visits in Rome and Tivoli to understand the excavations at the Villa of Maxentius and its artifacts in the broader contexts of Roman architectural development, late Roman art, and late imperial Roman history. Offered abroad only. Must be taken concurrently with CLAS/ARTH 4209 or CLAS 5209. Recommended prereqs., CLAS/ARTH 1509, 3049. Same as CLAS 5219 and ARTH 4219.

College of Arts & Sciences Classics Art and Archaeology

---

---

## CLAS-4269 (3) Art and Archaeology of the Ancient Near East

Examines civilizations of the Iran-Iraq region from the rise of urbanism in Mesopotamia through the era of the first 'world empire,' Achaemenid Persia. Emphasizes the material record of religious and state institutions of the ancient Near East, especially monuments that illustrate concepts of kingship. Explores notions of style, symbolism, visual rhetoric, text-image synthesis, patronage, creativity, and roles of artists. Recommended prereq., CLAS/ARTH 1509. Same as CLAS 5269 and ARTH 4269. Approved for arts and sciences core curriculum: human diversity.

College of Arts & Sciences Classics Art and Archaeology

---

---

## CLAS-4761 (3) Roman Law

Studies the constitutional and legal history of ancient Rome; emphasizes basic legal concepts and comparisons with American law. No Greek or Latin required. Same as CLAS 5761 and HIST 4761.

College of Arts & Sciences Classics Ancient History

---

---

## CLAS-4824 (3) Latin Teaching Methods: Open Topics

Covers specialized topics in Latin pedagogy specified in the online Schedule Planner. Same as CLAS 5824.

College of Arts & Sciences Classics Latin

---

---

## CLAS-4840 (1-4) Independent Study

No Greek or Latin required. May be repeated up to 7 total credit hours.

College of Arts & Sciences Classics Literature, Culture, & Thought

---

---

## CLAS-4843 (1-3) Independent Study

May be repeated up to 7 total credit hours.

College of Arts & Sciences Classics Greek

Same as CLAS 4169 and ARTH 4169. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Classics Art and Archaeology

---

---

## CLAS-5179 (3) City of Athens

Explores in detail the buildings, sculptures, pots, foreign imports, and society of Athens, considering material culture of individuals as much as civic programs. Emphasis is on ways the textual and archaeological evidence complement and/or contradict one another. The course focuses on the Periklean period, considering ways in which it developed from earlier times and influenced later ones in Athens. Same as ARTH 5179.

College of Arts & Sciences Classics Art and Archaeology

---

---

## CLAS-5189 (3) City of Rome

Explores in detail the architecture, sculptures, coins, frescos, and other material evidence alongside the political and social history of Augustan Rome. Emphasis is on ways in which the textual and archaeological evidence complement and/or contradict one another. Will explore the impact of the early imperial period on later Roman phases of urban design and image making in the capital city. Same as ARTH 5189. Prerequisites: Restricted to Graduate Students only.

[College of Arts & Sciences](#) [Classics](#) [Art and Archaeology](#)

CLAS

## CLAS-5209 (3) Classical Archaeological Field Methods

Same as CLAS 4209.

College of Arts & Sciences Classics Art and Archaeology

## CLAS-5219 (3) Maxentius and the City of Rome

Same as CLAS 4219.

College of Arts & Sciences Classics Art and Archaeology

## CLAS-5269 (3) Art and Archaeology of the Ancient Near East

Same as CLAS 4269/ARTH 5269.

College of Arts & Sciences Classics Art and Archaeology

## CLAS-5404 (3) Special Project: Teaching

Trains students to prepare classroom-ready materials, which are then tested in the students' own classroom. Required of master's candidates (teaching of Latin option). Prereq., fulfillment of the remaining requirements for MA (teaching of Latin) or 27 hours of graduate work in classics. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Classics Latin

---

---

## CLAS-5761 (3) Roman Law

Same as CLAS 4761.

College of Arts & Sciences Classics Ancient History

---

---

## CLAS-5824 (3) Latin Teaching Methods: Open Topics

Same as CLAS 4824.

College of Arts & Sciences Classics Latin

---

---

## CLAS-5840 (1-3) Graduate Independent Study

No Greek or Latin required. May be repeated up to 7 total credit hours.

College of Arts & Sciences Classics Literature, Culture, & Thought

---

---

## CLAS-6003 (3) Graduate Reading

Author or topic specified in the online Schedule Planner. May be repeated up to 9 total credit hours for different topics. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Classics Greek

---

---

## CLAS-6004 (3) Graduate Reading

Author or topic specified in the online Schedule Planner. May be repeated up to 9 total credit hours for different topics. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Classics Latin

---

---

## CLAS-6109 (3) Topics in Critical Theory and Ancient Art and Archaeology

Topics will vary and may focus on a particular approach to ancient material culture or on a particular time period or artifact category. Emphasis is placed on reading and using theory in considering the ancient world. May be repeated once for credit, provided the topics are different.

College of Arts & Sciences Classics Art and Archaeology

---

---

## CLAS-6119 (1-3) Graduate Independent Study in Classical Art and Archaeology

May be repeated up to 7 total credit hours. Prereq., graduate standing.

College of Arts & Sciences Classics Art and Archaeology

---

---

## CLAS-6843 (1-3) Graduate Independent Study

May be repeated up to 7 total credit hours. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Classics Greek

---

---

## CLAS-6844 (1-3) Graduate Independent Study

May be repeated up to 7 total credit hours. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Classics Latin

---

---

## CLAS-6940 (1) Master's Degree Candidate

No Greek or Latin required. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Classics Literature, Culture, & Thought

---

---

## CLAS-6952 (1-6) Master's Thesis

Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Classics Classical Philology

---

---

## CLAS-7011 (3) Seminar in Ancient History

Examines topics in ancient Greek and Roman history at an advanced seminar level. May be repeated up to 6 total credit hours. Same as HIST 7011.

College of Arts & Sciences Classics Ancient History

---

---

---

## CLAS-7012 (3) Graduate Seminar

Topic specified in online Schedule Planner. May be repeated up to 9 total credit hours for different topics. Prereq., graduate standing.

College of Arts & Sciences Classics Classical Philology

---

## CLAS-7013 (3) Graduate Seminar in Greek Literature

May be repeated up to 6 total credit hours. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Classics Greek

---

## CLAS-7014 (3) Graduate Seminar in Latin Literature

May be repeated up to 7 total credit hours. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Classics Latin

---

## CLAS-7109 (3) Graduate Seminar in Ancient and Classical Art and Archaeology

Topics vary. Emphasis is on gaining expertise in using archaeological reports in tandem with (or contradiction to) textual sources, on reading and using critical theory, on improving analytical skills and discussion, and on honing discussion leadership abilities. May be repeated up to 6 total credit hours providing the topics are different.

College of Arts & Sciences Classics Art and Archaeology

---

## CLAS-7840 (1-3) Graduate Independent Study

No Greek or Latin required. May be repeated up to 7 total credit hours. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Classics Literature, Culture, & Thought

---

## CLAS-8992 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

COML

## COML-5000 (3) Proseminar

Introduces basic issues in comparative literature and basic problems in literary history. Provides an overview of history and rationale of the discipline, traditional areas of research, and recent developments. Prereq., graduate standing or instructor consent. Prerequisites: Restricted to Graduate Students only.

[College of Arts & Sciences](#) [Comparative Literature](#)

## COML-5003 (3) Film and Fiction

Explores similarities and differences between literature and film as narrative arts. Studies several novels, short stories, and plays and films made from them. Examines problems in point of view, manipulation of time, tone, structure, and setting. Same as FILM 4003. COML 5003 and ARTF 5003 are the same course.

[College of Arts & Sciences](#) [Comparative Literature](#)

## COML-5030 (3) Foundations of Critical Theory

An introductory study of nineteenth-century German philosophy (especially Kant, Hegel, and Marx). Required course for the graduate certificate in Critical Theory. GRMN 5030 and COML 5030 are the same course.

[College of Arts & Sciences](#) [Comparative Literature](#)

## COML-5051 (3) Critical Theory of the Frankfurt School

Serves as an introduction to the "Frankfurt School" and Critical Theory with particular emphasis upon rationality, social psychology,

cultural criticism, and aesthetics. Through close readings of key texts by members of the school (Horkheimer, Benjamin, Adorno, Habermas) we will work toward a critical understanding of the analytical tools they developed and consider their validity. Taught in English. GRMN 4051, 5051 and COML 5051 are the same course.

College of Arts & Sciences Comparative Literature

---

## COML-5350 (3) Studies in Prose Narrative

Examines both short and long narrative prose fiction from a variety of periods and from diverse national literatures. Focuses on issues of defining genre and on the origins and significance of narrative prose within its cultural context. May be repeated once for credit. Prereq., graduate standing or instructor consent.

College of Arts & Sciences Comparative Literature

---

## COML-5352 (3) Russian Novel: Theory and Practice

Examines the Russian novel and its evolution as well as Western and Russian theories of the novel as they engage and reflect upon the claims of modernity. May be repeated up to 6 total credit hours. Restricted to graduate students or instructor consent required. Same as GSLL 5352. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Comparative Literature

---

## COML-5360 (3) Studies in Drama

Covers selected drama topics using a comparative approach. May be repeated once for credit. Prereq., graduate standing or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Comparative Literature

---

## COML-5370 (3) Studies in Poetry

Explores topics and problems in rhetoric and poetic practice from antiquity to the present day. May be repeated once for credit. Prereq., graduate standing or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Comparative Literature

---

## COML-5410 (3) Translation

Review of theories and practices of literary translation in their linguistic, historical, cultural, and other contexts. Translation of literary and other works from chosen foreign languages, commentaries, and analyses. Prereq., graduate standing or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Comparative Literature

---

---

## COML-5504 (3) Goethe's Faust

Systematic study of the Faust motif in Western literature, with major emphasis on Faust I and II by Goethe and Thomas Mann's Doctor Faustus. Restricted to graduate students or instructor consent required. Same as HUMN 4504 and GRMN 5504. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Comparative Literature

---

---

## COML-5540 (3) Studies in the Baroque

Explores the literary, intellectual, and aesthetic culture of the European baroque of the late 16th and 17th centuries through different topics pertinent to this period. Presents an interdisciplinary analysis of baroque literature, philosophy, science, and art. Illuminates the complex historical transition from the Renaissance to the modernity of the Enlightenment. Prereq., graduate standing or instructor consent.

College of Arts & Sciences Comparative Literature

---

---

## COML-5610 (3) Introduction to Literary Theory

Covers major trends in 20th-century critical thinking. May be repeated once for credit. Prereq., graduate standing or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Comparative Literature

---

---

## COML-5620 (3) History of Literary Criticism

Prereq., graduate standing or instructor consent.

College of Arts & Sciences Comparative Literature

---

---

## COML-5660 (3) Themes, Motifs, and Characters

May be repeated once for credit. Prereq., graduate standing or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Comparative Literature

---

---

## COML-5830 (3) Topics in Literature and History

May be repeated up to 6 total credit hours. Restricted to graduate students or instructor consent. Same as GSLL 5830. Prerequisites: Restricted to Graduate Students only.

---

---

---

College of Arts & Sciences Comparative Literature

---

## COML-5840 (1-3) Independent Study

May be repeated up to 7 total credit hours. Restricted to graduate students or instructor consent required. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Comparative Literature

---

## COML-6040 (3) Seminar: A Selected Topic

May be repeated up to 6 total credit hours. Prereq., graduate standing or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Comparative Literature

---

## COML-6940 (1) Master's Candidate for Degree

Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Comparative Literature

---

## COML-6950 (1-6) Master's Thesis

Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Comparative Literature

---

## COML-6970 (3) Colloquium in Comparative Literature

May be repeated up to 6 total credit hours.

College of Arts & Sciences Comparative Literature

---

## COML-7840 (1-3) Independent Study

May be repeated up to 7 total credit hours. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Comparative Literature

COMM

## COMM-1210 (3) Perspectives on Human Communication

Surveys communication in a variety of contexts and applications. Topics include basic concepts and general models of communication, ethics, language and nonverbal communication, personal relationships, group decision making, organizational communication, and impact of technological developments on communication. Required for COMM majors. Meets MAPS requirement for social science: general. Approved for arts and sciences core curriculum: contemporary societies.

[College of Arts & Sciences](#) [Communication](#)

## COMM-1300 (3) Public Speaking

Covers theory and skills of speaking in various public settings. Examines fundamental principles from rhetorical and communication theory and applies them to oral presentations. Required for COMM majors.

[College of Arts & Sciences](#) [Communication](#)

## COMM-1600 (3) Group Interaction

Covers basic theories, concepts, and characteristics that underlie face-to-face interactions in interpersonal, small group, and organizational settings. Activities stress the development of both task and relational skills in these settings. Required for COMM majors.

[College of Arts & Sciences](#) [Communication](#)

## COMM-2000 (3) Topics in Communication

---

Investigates select topics in communication. Does not count toward the 2000-level courses required for the major, unless explicitly stated in the course schedule. May be repeated up to 6 total credit hours on different topics. Recommended prereqs., COMM 1210 and 1600.

College of Arts & Sciences Communication

---

## COMM-2360 (3) Campaigns and Revolutions

Introduces concepts in rhetoric and argumentation that are used to explain significant social and political changes in our society. The goal is to show how social actors use rhetoric to promote some social goals and hinder others. Recommended prereqs., COMM 1210 and 1600. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences Communication

---

## COMM-2400 (3) Discourse, Culture and Identities

Examines how aspects of talk (e.g., turn-taking, speech acts, narratives, dialect, and stance indicators) link with identities (e.g., ethnic and racial, age, gender, work-related, and personal). Considers how communication is central to constructing who people are and examines social controversies related to talk and identities. Approved for arts and sciences core curriculum: human diversity.

College of Arts & Sciences Communication

---

## COMM-2500 (3) Interpersonal Communication

Focuses on basic processes in face-to-face interaction, including verbal and nonverbal messages, coordination in conversation, messages about self and others, and communication in personal relationships. Emphasizes theory and concepts rather than skills. Recommended prereqs., COMM 1210 and 1600. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences Communication

---

## COMM-2600 (3) Organizational Communication

Provides a communicatively based definition of formal organization and deals with individual-organizational relationships. Addresses topics such as organizational theory, organizational culture, power, technology, decision making, teamwork, leadership, diversity, gender, socialization, and ethics. Recommended prereqs., COMM 1210 and 1600. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences Communication

---

## COMM-3000 (3) Issues in Communication

Explores select issues in communication. May be repeated up to 6 total credit hours on different issues. Prereqs., COMM 1210 and 1600 or instructor consent. Restricted to Juniors or Seniors only. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

---

## COMM-3210 (3) Human Communication Theory

Acquaints students with general, thematic, and contextual theories of human communication. Gives attention to criteria for evaluating theories. Prereqs., COMM 1210 and 1600. Prerequisites: Requires pre-requisite courses of COMM 1210 and 1600. Restricted to students with 57-180 credits (Junior or Senior) Communication (COMM) majors only.

## COMM-3300 (3) Rhetorical Foundations of Communication

Provides the rhetorical foundations of communication through study of the humanistic traditions of rhetorical theory, with applications to social interaction and message analysis. Prereqs., COMM 1210, 1300 and 1600. Restricted to junior or senior Communication majors. Prerequisites: Requires pre-requisite courses of COMM 1210, 1300, and 1600. Restricted to students with 57-180 credits (Junior or Senior) Communication (COMM) majors only.

## COMM-3310 (3) Principles and Practices of Argumentation

Focuses on principles of argument, the process of critical decision making, and uses and limitations of logic and evidence. Contemporary issues (personal, social, political, or philosophical) are analyzed and debated. Prereq., COMM 1210 and 1600. Restricted to juniors or seniors. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

## COMM-3320 (3) Persuasion in Society

Explores how persuasion influences decision making. Focuses on different definitions and models of persuasion, ethical perspectives on persuasion, qualitative and quantitative research on persuasion, and the tools of motivation, as well as how to create effective and ethical persuasive messages. Prereqs., COMM 1210 and 1600. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) Communication (COMM) majors only.

## COMM-3340 (3) Political Communication

Provides an overview of the role of communication in contemporary political life. Topics include political communication theories, political campaign communication, media and political communication, and the role of political communication in promoting democracy and public policy. Prereqs., COMM 1210 and 1600. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) Communication (COMM) majors only.

---

## COMM-3410 (3) Intercultural Communication

Explores complex relationships between culture and communication processes from various conceptual perspectives, such as social, psychological, interpretive, and critical. Considers the important role of context (e.g., social, historical, and cultural) in intercultural interactions. Recommended prereqs., COMM 1210 and 1600. Restricted to Juniors or Seniors only. Approved for arts and sciences core curriculum: human diversity. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

College of Arts & Sciences Communication

---

## COMM-3510 (3) Family Communication

Explores communication in families from various theoretical perspectives, such as social constructionism, systems theory, and dialectical theory. Communication patterns and processes created and sustained by family members are examined, including rules, roles, stories, rituals, myths, metaphors, themes, and cycles. Prereqs., COMM 1210 and 1600. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) Communication (COMM) majors only.

College of Arts & Sciences Communication

---

## COMM-3610 (3) Communication, Technology, and Society

Presents theory, research, and exploration into computer-based technologies; studies implications for communication, interaction, and social relationships. Recommended prereqs., COMM 1210 and 1600. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

College of Arts & Sciences Communication

---

## COMM-3740 (3) Qualitative Communication Research Methods

Provides an understanding of methods associated with the study of communication in natural settings. Focuses on strategies of collecting, analyzing, and reporting qualitative data, including participant observation, in-depth interviewing, textual analysis, and ethnographic narrative. Prereqs., COMM 1210 and 1600. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) Communication (COMM) majors only.

College of Arts & Sciences Communication

---

## COMM-3750 (3) Quantitative Research Methods

Introduces empirically oriented research methods in communication, critical review of the logic of social-scientific principles in communication, and analysis of quantitative data. Prereqs., COMM 1210 and 1600. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) Communication (COMM) majors only.

College of Arts & Sciences Communication

---

---

## COMM-3760 (3) Rhetorical Criticism

Applies key concepts from rhetorical theory to the analysis of specific speeches, written texts, and social situations within the humanistic tradition. Students read a variety of types of criticism and are encouraged to develop their own strategies for critical analysis. Prereqs., COMM 1210, 1600 and 3300. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) Communication (COMM) majors only.

College of Arts & Sciences Communication

---

## COMM-4000 (3) Advanced Topics in Communication

Analyzes special interest areas of communication theory, research, and practice. Course format involves lecture, discussion, investigative analysis, and practical application. May be repeated twice for credit on different topics. Prereqs., COMM 3210 and 3300 or consent required. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) Communication (COMM) majors only.

College of Arts & Sciences Communication

---

## COMM-4100 (3) Seminar in Honors Thesis Writing and Research

Provides the opportunity for students writing an honors thesis to develop their understanding of the research process and to improve their research and writing skills. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) Communication (COMM) majors only.

College of Arts & Sciences Communication

---

## COMM-4220 (3) Senior Seminar: Functions of Communication

2Topical seminar on the functions of communication across interpersonal, group, organizational, and public contexts. Reviews current theory and research on topics such as communication and conflict, persuasion, and ethical dimensions of communication practices. May be taken twice for credit on different topics. Prereq., COMM 3210. Prerequisites: Requires pre-requisite courses of COMM 1210 and 1600. Restricted to students with 57-180 credits (Junior or Senior) Communication (COMM) majors only.

College of Arts & Sciences Communication

---

## COMM-4300 (3) Senior Seminar: Rhetoric

Reviews current theory and research on topics such as rhetoric and publics, rhetoric as an interpretive social science, and rhetoric of social movements and political campaigns. May be taken twice for credit on different topics. Prereq., COMM 3300. Prerequisites: Requires pre-requisite courses of COMM 1210, 1300, and 1600. Restricted to students with 57-180 credits (Junior or Senior) Communication (COMM) majors only.

College of Arts & Sciences Communication

---

## COMM-4510 (3) Senior Seminar: Interpersonal Communication

Reviews current theory and research on topics such as strategic interaction, relationship formation and maintenance, and identity and

self-presentation. May be taken twice for credit on different topics. Prereq., COMM 3210. Prerequisites: Requires pre-requisite courses of COMM 1210 and 1600. Restricted to students with 57-180 credits (Junior or Senior) Communication (COMM) majors only.

COMM

### COMM-4600 (3) Senior Seminar: Organizational Communication

Reviews current theory and research on topics such as communication and organizational decision making, organizational culture, gender relations, communication technology, and power and control in organizations. May be repeated up to 6 total credit hours on different topics. Prereq., COMM 3210. Prerequisites: Requires pre-requisite courses of COMM 1210 and 1600. Restricted to students with 57-180 credits (Junior or Senior) Communication (COMM) majors only.

[College of Arts & Sciences](#) [Communication](#)

### COMM-4610 (3) Communication Studies of Science and Technology

Reviews current theory and research associated with science, technology, and medicine. Topics include new communication technologies in organizations and society, discourses of scientific theory and science policy, and interaction in clinical setting. May be taken twice for credit on different topics. Prereqs., COMM 3210 and 3300 or instructor consent. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

[College of Arts & Sciences](#) [Communication](#)

### COMM-4840 (1-6) Undergraduate Independent Study

Note that the 14-hour limit in the major applies to any combination of independent study and internship credit. This course does not count toward the 33 credit hours required for the major. Recommended prereq., COMM 3250 or 3360. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) Communication (COMM) majors only.

[College of Arts & Sciences](#) [Communication](#)

### COMM-4930 (1-6) Internship

---

Studies are pursued in communication-related work experience projects that generally require 40 hours on the job per credit hour and evidence (e.g., journal, paper, and employer evaluation) of significant learning. Prereqs., COMM major status, 72 hours of overall course work, 18 hours of communication course work completed, 2.50 overall GPA, and a faculty sponsor. The 14-hour limit in the major applies to any combination of independent study and internship credit. This course does not count toward the 33 hours required for the major. Course is offered only for pass/fail credit. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) Communication (COMM) majors only.

College of Arts & Sciences Communication

---

## COMM-4950 (1-6) Senior Thesis: Honors

For exceptional communication majors who wish to graduate with department honors and receive credit for writing an honors thesis. Prereqs., COMM 4100, overall GPA of 3.35 or higher, and COMM GPA of 3.50 or higher.

College of Arts & Sciences Communication

---

## COMM-5210 (3) Readings in Communication Theory

Critical overview of leading theoretical traditions in communication studies. Gives attention to metatheoretical issues, including epistemological foundations, the structure of communication theory as a field, and reflexivity between communication theory and cultural practice. Required for doctoral students in COMM; optional for master's students. Restricted to graduate students or instructor consent.

College of Arts & Sciences Communication

---

## COMM-5220 (3) Seminar: Functions of Communication.

Prereq., graduate standing or instructor consent. Same as Comm 4220.

College of Arts & Sciences Communication

---

## COMM-5230 (3) Applied Communication

Examines application of communication concepts, theories, methods, facilitations, and other practices to address real-world issues and problems. Discusses conceptual issues framing applied communication, examines purposes and methods informing such scholarship, and provides opportunity to evaluate and propose research. Prereq., graduate standing or instructor consent.

College of Arts & Sciences Communication

---

## COMM-5300 (3) Seminar: Rhetoric

Prereq., graduate standing or instructor consent. Same as COMM 4300.

---

College of Arts & Sciences Communication

---

## COMM-5310 (3) Contemporary Rhetorical Criticism

Advanced critical analysis of rhetorical texts in terms of how they shape issues and appeal for judgment, create identities for speakers and their audiences, and construct perceptions of time, space, and the human condition. Prereq., graduate standing or instructor consent.

College of Arts & Sciences Communication

---

## COMM-5320 (3) Readings in Rhetoric

Survey of classical and contemporary readings in rhetoric. Required for doctoral students in COMM; optional for master's students. Restricted to graduate students or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Communication

---

## COMM-5420 (3) Readings in Group Interaction

Reading course examining communicative problems, practices, and outcomes in groups. Definitions of group and interaction, meta-theoretical and theoretical orientations, methodological practices for studying group interactions, including boundary development and management, interpersonal symbolic practices, deliberation, dialogue, and decision making are examined. Prereq., graduate standing or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Communication

---

## COMM-5425 (3) Readings in Discourse and Social Practices

Examines the way communicators' discourse expressions (language, talk, interactional devices, semiotic practices, written texts) reflect and construct interpersonal exchanges, societal activities, and institutional scenes, as well as how discourse expression varies across different speech communities. Prereq., graduate standing. Recommended prereq., COMM 6010. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Communication

---

## COMM-5600 (3) Seminar: Organizational Communication

Prereq., graduate standing or instructor consent. Same as Comm 4600.

College of Arts & Sciences Communication

---

---

## COMM-5610 (3) Organizational Culture and Symbolism

Focuses on relationship between ideological elements (e.g., norms, values, and beliefs) and symbolic practices (e.g., metaphor, ritual, and storytelling) of organizational culture. Analyzes topics from viewpoints of academic theory and managerial practice. Reviews interpretive methods of researching workplace culture and symbolism. Prereq., graduate standing or instructor consent.

College of Arts & Sciences Communication

---

## COMM-5620 (3) Readings in Organizational Communication

Survey of traditional and contemporary readings in organizational communication. Treats theory, research, and application from a variety of perspectives. Prereq., graduate standing or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Communication

---

## COMM-5720 (3) Readings in Communication and Technology

Survey of multidisciplinary research that examines various relationships between communication and technology. Students are encouraged to develop critical skills in perceiving assumptions and perspectives that motivate major theories in this area, and to examine how these have changed overtime. Prereq., graduate standing or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Communication

---

## COMM-6010 (3) Communication Research and Theory

Provides an integrative overview of approaches and areas of study in communication. Required for MA and PHD communication students. Prereq., graduate standing in COMM. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Communication

---

## COMM-6020 (3) Quantitative Research Methods

Introduces students to the practice of quantitative research in communication: conceptualization and critique of research projects, coding, experimental and survey approaches, reliability and validity, and statistical reasoning and methods of analysis. Restricted to graduate students or instructor consent required. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Communication

---

## COMM-6030 (3) Qualitative Research Methods

Introduction to the epistemology, methodology, and representational practices associated with qualitative studies in communication. Fieldwork methods emphasized include participant observation, interviewing, and document/artifact analysis. Restricted to graduate students or instructor consent required. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Communication

---

---

## COMM-6200 (3) Seminar: Selected Topics

Facilitates understanding of current and past theory and research on a selected topic in communication and the ability to develop new theory and research on that topic. May be repeated up to 9 total credit hours on different topics. Prereq., graduate standing or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Communication

---

---

## COMM-6310 (3) Rhetorical Criticism

Reviews current critical methods and issues related to rhetorical criticism, such as contemporary theory of rhetorical criticism, continental discourse theory, and critical theory. May be repeated up to 6 total credit hours on different topics. Prereq., graduate standing or instructor consent. Recommended prereqs., COMM 5310 and 5320.

College of Arts & Sciences Communication

---

---

## COMM-6320 (3) Rhetorical Theory

Reviews current theory and research on topics such as contemporary rhetorical theory, rhetoric and public life, rhetoric as an interpretive social science, and rhetoric of social movements and political campaigns. May be repeated up to 6 total credit hours on different topics. Prereq., graduate standing or instructor consent. Recommended prereq., COMM 5320.

College of Arts & Sciences Communication

---

---

## COMM-6330 (3) Rhetoric of Inquiry

Surveys foundational texts and contemporary research in the rhetoric of inquiry. Focuses on the role of persuasion in the production of knowledge. Analysis of distinctions between philosophical and rhetorical approaches to argument. Critical analysis of major theoretical and methodological traditions and topics with an emphasis on social dimensions of inquiry. Emphasizes critical analysis of major theoretical and methodological traditions. Prereq., graduate standing or instructor consent. Recommended prereq., COMM 5320. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Communication

---

---

## COMM-6340 (3) Rhetoric and Civic Community

Considers performances of public life as rhetorical inducements of civitas. Topics include negotiation of self-regulation among interdependent partners, rhetorical exclusions and/or counterpublics, and dialectical tensions of public/private as these contribute to and have civic consequences for publicness, community, and social will. Prereq., graduate standing or instructor consent. Recommended prereq., COMM 5320.

---

---

COMM

## COMM-6350 (3) Seminar in Argumentation

Surveys foundational texts and contemporary research in argumentation. Analysis of distinctions between philosophical and rhetorical approaches to argument. Critical analysis of major theoretical and methodological traditions and topics with an emphasis on social dimensions of argument. Prereq., graduate standing or instructor consent. Recommended prereq., COMM 5320.

[College of Arts & Sciences](#) [Communication](#)

## COMM-6360 (3) Social and Cultural Theory

Traces select traditions in social and/or cultural theory, emphasizing how these traditions affect and are affected by the field of rhetoric studies. Examines the origins and resolutions of major debates in social and/or cultural theory from a rhetorical perspective. Prereq., graduate standing or instructor consent. Recommended prereq., COMM 5320.

[College of Arts & Sciences](#) [Communication](#)

## COMM-6410 (3) Discourse Analysis

Acquaints students with the main types of discourse analysis: conversation analysis, critical discourse analysis, and rhetorically-informed discourse approaches. Teaches how to conduct discourse analysis, including transcribing, selecting excerpts, documenting inferences, and linking to scholarly controversies. Prereq., graduate standing or instructor consent. Prerequisites: Restricted to Graduate Students only.

[College of Arts & Sciences](#) [Communication](#)

## COMM-6420 (3) Interaction Analysis

Educates students in one of a selected set of methodological specializations used in the study of human interaction. May be repeated up to 6 total credit hours on different topics. Prereq., graduate standing or instructor consent.

College of Arts & Sciences Communication

---

---

## COMM-6435 (3) Interpersonal Processes in Communication

Focuses on key processes in interpersonal communication relevant to understanding interaction at the dyadic, group, and organizational levels. Examines theory and research on selected interpersonal processes such as facework/identity, support/emotional communication, relational communication, and conflict in interaction. Prereq., graduate standing or instructor consent.

College of Arts & Sciences Communication

---

---

## COMM-6440 (3) Grounded Practical Theory

Examines theory, method, and application of grounded practical theory, an approach to building normative theory through description, critique, and theoretical reconstruction of situated communication practices. Semester project involves analysis of a sample of discourse from a public or field observation setting. Prereq., graduate standing or instructor consent. Recommended prereq., COMM 5210.

College of Arts & Sciences Communication

---

---

## COMM-6450 (3) Group Interaction Facilitation and Pedagogy

Examines theory, research, and practice associated with facilitating group interaction processes (e.g., group creation, conflict communication management, conversation and discussion, task accomplishment, and team communication), including facilitation associated with teaching an introductory group interaction course. Prereq., graduate standing or instructor consent. Recommended prereq., COMM 5420. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Communication

---

---

## COMM-6470 (3) Meetings, Their Practices and Problems

Explores the history, routine communicative practices, common interactional troubles, cross-cultural differences, and expectations about "Ideal" communicative conduct for workplace and public meetings. Seminar project involves field study of a meeting group. Prereq., graduate standing or instructor consent. Recommended prereq., Comm 6030.

College of Arts & Sciences Communication

---

---

## COMM-6730 (3) Collaboration and Decision Making in Organizations

---

Explores theory and research on communication processes associated with collaboration and decision making in contemporary organizations, particularly as they are influenced by participation programs, technology, and team structures. Prereq., graduate standing or instructor consent. Recommended prereqs., COMM 5620 and 6010. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Communication

---

## COMM-6740 (3) Theory and Philosophy of Organizing and Organizations

Reviews theory and philosophy of organizations and organizing where communication processes are seen as constitutive. Focuses on discursive and material practices in the formation and change of organizational structure, culture, and operation. Prereq., graduate standing or instructor consent. Recommended prereq., COMM 5620.

College of Arts & Sciences Communication

---

## COMM-6750 (3) Communication and Organizational Change

Addresses the role of communication in cultural change efforts in organizations. Topics include the nature and function of organizational cultures, the role of leadership, ethical issues, and member involvement in change processes. Specific organizational cases are highlighted throughout. Prereq., graduate standing or instructor consent. Recommended prereq., COMM 5620.

College of Arts & Sciences Communication

---

## COMM-6780 (3) Roles, Relationships, and Identities in Interaction

Examines how social roles influence communication practices, the development of relationships, and the impact of relationships on identity. Considers these processes in contexts such as personal relationships and institutional settings. Topic varies. May be repeated up to 6 total credit hours on different topics. Prereq., graduate standing or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Communication

---

## COMM-6840 (1-3) Master's Independent Study

May be repeated up to 6 total credit hours. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Communication

---

## COMM-6940 (1) Master's Degree Candidate

College of Arts & Sciences Communication

---

---

## COMM-6950 (1-6) Master's Thesis

College of Arts & Sciences Communication

---

## COMM-8840 (1-6) Doctoral Independent Study

May be repeated up to 18 total credit hours.

College of Arts & Sciences Communication

---

## COMM-8990 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

COMR

## COMR-1000 (1) Communication and Community

Introduction to how communication builds community by creating and sharing meaning. Examination of communication practices at the interpersonal level (friends and family), the group level (teams, classrooms and organizations) and the societal level (citizenship, social change, mass media). Restricted to students in the Communication Residential Academic Program.

[College of Arts & Sciences](#) [Communication Residential Academic Program](#)

## COMR-1100 (1) RAP Community Leadership Practicum

Examines relationships between competent communication and effective leadership in the context of the Communication and Society RAP. Upon completion of the Community Leadership RAP practicum, the student will be able to identify, discuss, demonstrate, and critique effective communication skills as they apply to many different leadership opportunities within the RAP. Restricted to students in the Communication Residential Academic Program.

[College of Arts & Sciences](#) [Communication Residential Academic Program](#)

## COMR-1800 (3) Visual Literacy: Images and Ideologies

Explores the relationship between visual images and cultural values, including how we process visual information, the evolution of conventions in various media, common visual portrayals, and ethical issues. Restricted to students in the Communication Residential Academic Program. Approved for arts and sciences core curriculum: literature and the arts.

[College of Arts & Sciences](#) [Communication Residential Academic Program](#)

CSCI

### [CSCI-1000 \(1\) Computer Science as a Field of Work and Study](#)

Introduces curriculum, learning techniques, time management and career opportunities in Computer Science. Includes presentations from alumni and others with relevant educational and professional experience.

[College of Engineering & Applied Science](#) [Computer Science](#) [General Computer Science](#)

### [CSCI-1220 \(4\) Virtual Worlds: An Introduction to Computer Science](#)

Introduces the fundamental principles of computer science using an on-line virtual world called Second Life as the "Laboratory" for the course. Students will learn how to program by creating objects of interest in Second Life. In-class and in-world discussions and readings will introduce the student to important ideas and concepts that shape the field of computer science. Same as ATLS 1220.

[College of Engineering & Applied Science](#) [Computer Science](#) [General Computer Science](#)

### [CSCI-1240 \(3\) The Computational World](#)

Introduces and explores the "Computational style of thinking" and its influence in science, mathematics, engineering and the arts. The course does not focus on the nuts and bolts of any particular programming language, but rather on the way in which computing has affected human culture and thought in the past half century. Same as ATLS 1240.

[College of Engineering & Applied Science](#) [Computer Science](#) [General Computer Science](#)

### [CSCI-1300 \(4\) Computer Science 1: Programming](#)

Teaches techniques for writing computer programs in higher level programming languages to solve problems of interest in a range of application domains. Restricted to Computer Science (CSEN) undergraduate students only. Prerequisites: Restricted to Computer Science (CSEN) undergraduate students only.

[College of Engineering & Applied Science](#) [Computer Science](#) [General Computer Science](#)

---

---

## CSCI-2270 (4) Computer Science 2: Data Structures

Studies data abstractions (e.g., stacks, queues, lists, trees) and their representation techniques (e.g., linking, arrays). Introduces concepts used in algorithm design and analysis including criteria for selecting data structures to fit their applications. Prereqs., CSCI 1300, and one of APPM 1350 or MATH 1300.

[College of Engineering & Applied Science](#) [Computer Science](#) [General Computer Science](#)

---

---

## CSCI-2400 (4) Computer Systems

Covers how programs are represented and executed by modern computers, including low-level machine representations of programs and data, an understanding of how computer components influence performance and memory hierarchy. Prereq., CSCI 2270. Prerequisites: Restricted to Computer Science (CSMR) or all other College of Engineering majors only.

[College of Engineering & Applied Science](#) [Computer Science](#) [General Computer Science](#)

---

---

## CSCI-2824 (3) Discrete Structures

Covers foundational materials for computer science that is often assumed in advanced courses. Topics include set theory, Boolean algebra, functions and relations, graphs, propositional and predicate calculus, proofs, mathematical induction, recurrence relations, combinatorics, discrete probability. Focuses on examples based on diverse applications of computer science. Restricted to Computer Science (CSMR) or all other College of Engineering majors only. Prereq., CSCI 2270. Prerequisites: Restricted to Computer Science (CSMR) or all other College of Engineering majors only.

[College of Engineering & Applied Science](#) [Computer Science](#) [Theory of Computation](#)

---

---

## CSCI-2830 (1-3) Special Topics in Computer Science

Covers topics of interest in computer science at the sophomore level. Content varies from semester to semester.

[College of Engineering & Applied Science](#) [Computer Science](#) [General Computer Science](#)

---

---

## CSCI-2900 (1-3) Lower Division, Undergraduate Level Independent Study

Offers selected topics at the elementary level for students with little or no previous computing experience.

[College of Engineering & Applied Science](#) [Computer Science](#) [General Computer Science](#)

---

---

## CSCI-3002 (3) Human-Centered Computing Foundations

Introduces practice and research in human-computer interaction, design of interactive systems, computer supported cooperative work, computer supported collaborative learning, educational technology, tools that support creativity, user-developed knowledge collections, and gaming.

[College of Engineering & Applied Science](#) [Computer Science](#) [Artificial Intelligence](#)

---

## CSCI-3104 (4) Algorithms

Covers advanced data structures, computational geometry, cryptography, dynamic programming, greedy algorithms, divide-and-conquer, graph algorithms (e.g., depth-first search), network algorithms (e.g., shortest paths), approximation algorithms. Prereqs., CSCI 2824 and two semesters of calculus. Prerequisites: Restricted to Computer Science (CSMR) or all other College of Engineering majors only.

[College of Engineering & Applied Science](#) [Computer Science](#) [Theory of Computation](#)

---

## CSCI-3112 (1-3) Human-Centered Computing Professional Development

Supports students in developing professional skills and practices in human-computer interaction, design of interactive systems, computer supported cooperative work, computer supported collaborative learning, educational technology, tools that support creativity, user-developed knowledge collections, and gaming. May be repeated up to 10 total credit hours. Same as ATLS 3112.

[College of Engineering & Applied Science](#) [Computer Science](#) [Artificial Intelligence](#)

---

## CSCI-3155 (4) Principles of Programming Languages

Study fundamental concepts on which programming of languages are based, and execution models supporting them. Topics include values, variables, bindings, type systems, control structures, exceptions, concurrency, and modularity. Learn how to select a language and to adapt to a new language. Prereqs., CSCI 2270 and one of CSCI 2400 or ECEN 2120. Prerequisites: Restricted to Computer Science (CSMR) or all other College of Engineering majors only.

[College of Engineering & Applied Science](#) [Computer Science](#) [Programming Languages](#)

---

## CSCI-3202 (3) Introduction to Artificial Intelligence

Surveys artificial intelligence techniques of search, knowledge representation and reasoning, probabilistic inference, machine learning, and natural language processing. Introduces artificial intelligence programming. Restricted to Computer Science (CSMR) or all other College of Engineering majors only. Prereq., CSCI 2824. Prerequisites: Restricted to Computer Science (CSMR) or all other College of Engineering majors only.

[College of Engineering & Applied Science](#) [Computer Science](#) [Artificial Intelligence](#)

---

---

## CSCI-3287 (3) Database and Information Systems

Surveys data management, including file systems, database management systems design, physical data organizations, data models, query languages, concurrency, and database protection. Prereq., CSCI 3104.

College of Engineering & Applied Science | Computer Science | Database Systems

---

## CSCI-3302 (3) Introduction to Robotics

Introduces students to fundamental concepts in autonomous, mobile robotics: mechanisms, locomotion, kinematics, control, perception and planning. The course consists of lectures and lab sessions that are geared toward developing a complex robot controller in a realistic, physics-based multi-robot simulator. Prereqs., CSCI 2270 and 2824. CSCI 3302 and ECEN 3303 are the same course.

College of Engineering & Applied Science | Computer Science | Artificial Intelligence

---

## CSCI-3308 (3) Software Engineering Methods and Tools

Focuses on software engineering methods and tools for application development, including design and system organization; using and creating reusable libraries; building, testing, and debugging; and performance evaluation. Restricted to Computer Science (CSMR) or all other College of Engineering majors only. Prereq., CSCI 2270. Prerequisites: Restricted to Computer Science (CSMR) or all other College of Engineering majors only.

College of Engineering & Applied Science | Computer Science | Software Engineering

---

## CSCI-3434 (3) Theory of Computation

Introduces the foundations of formal language theory, computability, and complexity. Shows relationship between automata and various classes of languages. Addresses the issue of which problems can be solved by computational means, and studies complexity of solutions. Prereq., CSCI 3104 and 3155.

College of Engineering & Applied Science | Computer Science | Theory of Computation

---

## CSCI-3656 (3) Numerical Computation

Covers development, computer implementation, and analysis of numerical methods for applied mathematical problems. Topics include floating point arithmetic, numerical solution of linear systems of equations, root finding, numerical interpolation, differentiation, and integration. Prereqs., two semesters of calculus, linear algebra, and either CSCI 1200 or 1300.

College of Engineering & Applied Science | Computer Science | Numerical Computation

---

---

## CSCI-3702 (3) Cognitive Science

Introduces cognitive science, drawing from psychology, philosophy, artificial intelligence, neuroscience, and linguistics. Studies the linguistic relativity hypothesis, consciousness, categorization, linguistic rules, the mind-body problems, nature versus nurture, conceptual structure and metaphor, logic/problem solving, and judgment. Emphasizes the nature, implications, and limitations of the computational model of mind. Prereqs., two of the following: PSYC 2145, LING 2000, CSCI 1300, and PHIL 2440. Same as LING 3005, PHIL 3310, and PSYC 3005.

College of Engineering & Applied Science Computer Science Artificial Intelligence

---

## CSCI-3753 (4) Operating Systems

Examines software comprising computing systems as it builds upon hardware to provide a programming environment. Looks at structure and function of editors, compilers/assemblers, linkers, etc. Basic operating systems concepts and systems programming in high-level languages. Prereqs., CSCI 2270 and one of CSCI 2400 or ECEN 2120.

College of Engineering & Applied Science Computer Science Operating Systems and Hardware

---

## CSCI-4000 (3) Entrepreneurship in Computing

Examines the development of new venture creation from the entrepreneur's perspective. Provides an understanding of the entire process including opportunity identification, feasibility study, fundraising, organization, team creation, and exit strategies through case studies, oral and written presentations, and outside speakers. Taught by an experienced entrepreneur. Prereq., CSCI 2270. Restricted to juniors/seniors.

College of Engineering & Applied Science Computer Science General Computer Science

---

## CSCI-4113 (3) Unix System Administration

Introduces UNIX (Linux) system administration and related topics, including trouble-shooting system and network problems, hardware and software configuration and installation, basic scripting, and security aspects of Internet hosts. Students build a Linux server from the ground up, using provided computing resources, and must maintain and secure the server themselves. Prereqs., CSCI 2270 or instructor consent. Recommended prereq., CSCI 3308.

College of Engineering & Applied Science Computer Science Operating Systems and Hardware

---

## CSCI-4123 (3) Network Laboratory

Develops enterprise level design and configuration skills on local area networking via switching and routing, as well as the provisioning of remote data communications across diverse Wan technologies, using the latest available transport and security services. Prereq., CSCI 4273. Credit not granted for this course and TLEN 5460.

---

\_\_\_\_\_

## CSCI-4133 (3) Security Laboratory

Allows students to gain practical experience with network security in a simulated network environment. Topics to be covered include system hardening, firewalls, intrusion detection, vulnerability assessment, and investigation. Prereq., CSCI 4273. Credit not granted for this course and TLEN 5540.

# Courses

CSCI

## CSCI-4143 (2) Principles of Telecommunications Policy

Learn the key issues and principles that guide the decisions of policymakers with respect to the regulatory treatment of voice, video, and data communications. Engage in critical debate, and develop instincts for anticipating the likely regulatory models that may be applied to new technologies. This introductory course covers technical, economic, legal, political, and institutional considerations. Coreq., CSCI 4123 or 4133. Same as TLEN 5210

[College of Engineering & Applied Science](#) [Computer Science](#) [Operating Systems and Hardware](#)

## CSCI-4202 (3) Artificial Intelligence 2

Second course in artificial intelligence. Topics may vary, but typically cover neural networks, natural language processing, and artificial life. Prereq., CSCI 3202 or instructor consent.

[College of Engineering & Applied Science](#) [Computer Science](#) [Artificial Intelligence](#)

## CSCI-4229 (3) Computer Graphics

Studies design, analysis, and implementation of computer graphics techniques. Topics include interactive techniques, 2D and 3D viewing, clipping, segmentation, translation, rotation, and projection. Also involves removal of hidden edges, shading, and color. Restricted to Computer Science (CSMR) or all other College of Engineering majors only. Prereqs., knowledge of basic linear algebra and CSCI 2270. Same as CSCI 5229. Prerequisites: Restricted to Computer Science (CSMR) or all other College of Engineering majors only.

[College of Engineering & Applied Science](#) [Computer Science](#) [Graphics](#)

---

## CSCI-4239 (3) Advanced Computer Graphics

Studies design, analysis and implementation of advanced computer graphics techniques. Topics include shaders, using the GPU for high performance computing, graphics programming on embedded devices such as mobile phones; advanced graphics techniques such as ray tracing. Prereq., CSCI 4229 or instructor consent required. Same as CSCI 5239.

College of Engineering & Applied Science Computer Science Graphics

---

## CSCI-4273 (3) Network Systems

Focuses on design and implementation of network programs and systems, including topics in network protocols, file transfer, client-server computing, remote procedure call, and other contemporary network system design and programming techniques. Prereqs., CSCI 3753 or equivalent, and familiarity with C and Unix. Same as CSCI 5273.

College of Engineering & Applied Science Computer Science Operating Systems and Hardware

---

## CSCI-4308 (4) Software Engineering Project 1

Advanced practicum in which students design, implement, document and test software systems for use in industry, non-profits, government and research institutions. Also offers extensive experience in oral and written communication throughout the software lifecycle. Students must take CSCI 4308 and 4318 contiguously, as the project spans the entire academic year. Prereqs., successful completion of a minimum of 36 credit hours of Computer Science Foundation, Track Foundation, Track Core, Computer Science electives, and WRTG 3030. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Computer Science (CSCI) majors or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science Computer Science Software Engineering

---

## CSCI-4312 (3) Health Informatics

Teaches students essential skills necessary for developing usable assistive and performance support systems, which include consideration of the academic and professional interdisciplinary issues that govern the work. An overview of ongoing and emerging topics in medical informatics will be presented. Prereq., CSCI 2270. Recommended prereq., CSCI 3002. Same as CSCI 5312.

College of Engineering & Applied Science Computer Science Artificial Intelligence

---

## CSCI-4314 (3) Algorithms for Molecular Biology

Surveys combinatorial algorithms used to understand DNA, RNA, and proteins. Introduces students to methods used to process genomic data. Topics covered include a review of algorithms and molecular biology, sequence analysis, RNA and protein structure analysis, and comparative genomics. Students will get hands-on experience processing recent genomic data. Prereqs., CSCI 2270 and CSCI 3104, or CHEM 4711, or MCDB3500 or Iphy 4200. Same as CSCI 5314 and MCDB 4314.

College of Engineering & Applied Science Computer Science Theory of Computation

---

---

---

## CSCI-4317 (3) Genome Databases: Mining and Management

Develops essential skills for performing genomic analyses, with focus on developing practical research tools. Introduces human genome and microbiome projects, Python/SQL scripting, accessing and understanding genomic data, sequence alignment and search, evolutionary models, expression data, biological networks, and macromolecular structure. Prereqs., MCDB 3500, CSCI 3104, or CHEM 4711; coreq., CSCI 2270. Same as CSCI 5317. Credit not granted for this course and CHEM 4621 or MCDB 4621.

College of Engineering & Applied Science | Computer Science | Database Systems

---

## CSCI-4318 (4) Software Engineering Project 2

Second semester of an advanced practicum in computer science. Students must take CSCI 4308 and 4318 contiguously as the project spans the entire academic year. Prereq., CSCI 4308.

College of Engineering & Applied Science | Computer Science | Software Engineering

---

## CSCI-4342 (3) Groupware and Workflow Systems

Supports students in developing professional skills and knowledge concerning the use of computer technologies to support collaborative activities. Also covers the impact of digital collaboration technologies on users, groups, organizations and society. Students will gain practical experience with Business Process Management and the use of Workflow Management Systems. Same as CSCI 5342.

College of Engineering & Applied Science | Computer Science | Artificial Intelligence

---

## CSCI-4412 (3) Design, Creativity, and New Media

Explores the design of new media and technologies to support design and creativity. Analyzes design and creativity as human activities of fundamental importance in the networked information culture and economy. Provides theoretical and practical analysis of new media. Instructor consent required. Recommended prereq., CSCI 3002. Instructor consent required. Same as CSCI 5412.

College of Engineering & Applied Science | Computer Science | Artificial Intelligence

---

## CSCI-4446 (3) Chaotic Dynamics

Explores chaotic dynamics theoretically and through computer simulations. Covers the standard computational and analytical tools used in nonlinear dynamics and concludes with an overview of leading-edge chaos research. Topics include time and phase-space dynamics, surfaces of section, bifurcation diagrams, fractal dimension, and Lyapunov exponents. Prereqs., two semesters calculus, CSCI 1200, 1300 or equivalent, and PHYS 1110. Recommended prereqs., PHYS 1120, CSCI 3656, and MATH 3130. Same as CSCI 5446 and ECEN 4423.

College of Engineering & Applied Science | Computer Science | Numerical Computation

---

---

---

## CSCI-4448 (3) Object-Oriented Analysis and Design

An applied analysis and design class addressing the use of object-oriented techniques. Topics include domain modeling, use cases, architectural design, and modeling notations. Students apply the techniques in analysis and design projects. Restricted to Computer Science (CSMR) or all other College of Engineering majors only. Prereq., CSCI 3155 or expertise in one or more object-oriented programming languages, such as C++ or Java. Same as CSCI 5448. Prerequisites: Restricted to Computer Science (CSMR) or all other College of Engineering majors only.

[College of Engineering & Applied Science](#) [Computer Science](#) [Software Engineering](#)

---

## CSCI-4502 (3) Data Mining

Introduces basic data mining concepts and techniques for discovering interesting patterns hidden in large-scale data sets, focusing on issues relating to scalability and efficiency. Topics covered include data preprocessing, data warehouse, association, classification, clustering, and mining specific data types such as time-series, social networks, multimedia, and Web data. Prereq., CSCI 2270 or instructor consent. CSCI 4502 and 5502 are the same course.

[College of Engineering & Applied Science](#) [Computer Science](#) [Artificial Intelligence](#)

---

## CSCI-4555 (3) Compiler Construction

Introduces the basic techniques used in translating programming languages: scanning, parsing, definition table management, operator identification and coercion, code selection and register allocation, error recovery. Students build a complete compiler for a simple language. Prereqs., CSCI 2824 or ECEN 3703 and CSCI 2400 or ECEN 2120. Same as ECEN 4553 and CSCI 5525.

[College of Engineering & Applied Science](#) [Computer Science](#) [Programming Languages](#)

---

## CSCI-4576 (4) High-Performance Scientific Computing

Introduces computing systems, software, and methods used to solve large-scale problems in science and engineering. Students use high-performance workstations and a supercomputer. First course in a two-semester sequence. Recommended prereq., CSCI 3656. Same as CSCI 5576.

[College of Engineering & Applied Science](#) [Computer Science](#) [Numerical Computation](#)

---

## CSCI-4586 (4) High-Performance Scientific Computing 2

Introduces computing systems, software, and methods to solve large-scale problems in science and engineering. Students use high-performance workstations and a supercomputer. Second course in a two-semester sequence. Prereq., CSCI 4576.

---

---

## CSCI-4593 (3) Computer Organization

Studies computer design at the gate level. Discusses instruction set architecture design, arithmetic and logic unit design, control logic, memory design and caches, simple pipelining, I/O, and peripheral devices. Briefly covers aspects of modern computer architecture, such as multicore processors and cache coherence for these. Prereq., ECEN 2350, and ECEN 3350 or CSCI 2400. Same as ECEN 4593. Prerequisites: Restricted to Electrical Engineering (EEEN), Electrical and Computer Engineering (ECEN) Computer Science (CSEN), Engineering Physics (EPEN) or Applied Mathematics (APPM) majors only.

## CSCI-4753 (3) Computer Performance Modeling

Presents a broad range of system measurement and modeling techniques, emphasizing applications to computer systems. Topics include system measurement, work load characterization, and analysis of data; design of experiments; simulation; and queuing theory and queuing network models. Prereq., CSCI 3753 or equivalent, and second-semester calculus. Recommended prereq., a course in statistics. Same as CSCI 5753 and ECEN 4753/5753.

## CSCI-4809 (3) Computer Animation

Develops a firm understanding of the general principles of computer animation. Lectures cover the creation of models, materials, textures, surfaces, and lighting. Path and key frame animation, particle dynamics, and rendering are introduced. Students are assigned a number of animation tutorials to carry out. CSCI 4809/5809 and ATLS 4809/5809 are all the same course.

## CSCI-4810 (1) Seminar in Computational Biology

Provides an overview of current research topics in computational biology and health informatics, with a focus on research conducted on campus. Each week students will attend an on-campus seminar or a presentation by an on-campus research group. Prepares students to participate in a research project. Prereqs., CSCI 4312 or 4314 or 4317. CSCI 4810 and 5810 are the same course.

## CSCI-4830 (1-3) Special Topics in Computer Science

Covers topics of interest in computer science at the senior undergraduate level. Content varies from semester to semester. May be repeated up to 9 total credit hours.

## CSCI-4839 (3) User-Centered Design

Develops the skills and practices necessary to apply user-centered approaches to software requirements analysis, and the design and evaluation of computer applications. Restricted to Computer Science (CSMR) or all other College of Engineering majors only. Same as CSCI 5839. Prerequisites: Restricted to Computer Science (CSMR) or all other College of Engineering majors only.

## CSCI-4900 (1-3) Upper Division, Undergraduate Level Independent Study

Provides opportunities for independent study at the upper-division undergraduate level. Students work on a small research problem or tutor lower-division computer science students. Prereq., CSCI 1200 or 1300.

## CSCI-4950 (2-4) Senior Thesis

Provides an opportunity for senior computer science majors to conduct exploratory research in computer science. Prereqs., successful completion of a minimum of 36 credit hours of Computer Science Foundation, Track Foundation, Track Core, and Computer Science electives, and WRTG 3030. Restricted to seniors. May be repeated up to 8 total credit hours. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior).

## CSCI-5312 (3) Health Informatics

Same as CSCI 4312. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science Computer Science Artificial Intelligence

---

## CSCI-5314 (3) Algorithms for Molecular Biology

Same as CSCI 4314 and MCDB 5314. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science Computer Science Theory of Computation

---

## CSCI-5317 (3) Genome Databases: Mining and Management

Same as CSCI 4317. Credit not granted for this course and CHEM 5621 or MCDB 5621. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science Computer Science Database Systems

---

## CSCI-5342 (3) Groupware and Workflow Systems

Same as CSCI 4342. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science Computer Science Artificial Intelligence

---

## CSCI-5412 (3) Design, Creativity, and New Media

Same as CSCI 4412. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science Computer Science Artificial Intelligence

---

## CSCI-5417 (3) Information Retrieval Systems

Addresses practical issues in the design, implementation and analysis of modern information retrieval systems. The major focus is on Web-based applications including ad hoc retrieval, classification, and clustering. Introduces the use of open source retrieval systems, standard evaluation metrics and gold-standard evaluation collections. Formerly CSCI 7000. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science Computer Science Database Systems

---

---

---

## CSCI-5444 (3) Introduction to Theory of Computation

Reviews regular expressions and finite automata. Studies Turing machines and equivalent models of computation, the Chomsky hierarchy, context-free grammars, push-down automata, and computability. Prereq., graduate standing or instructor consent. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

[College of Engineering & Applied Science](#) [Computer Science](#) [Theory of Computation](#)

---

## CSCI-5446 (3) Chaotic Dynamics

Same as CSCI 4446 and ECEN 5423. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

[College of Engineering & Applied Science](#) [Computer Science](#) [Numerical Computation](#)

## CSCI-5448 (3) Object-Oriented Analysis and Design

Same as CSCI 4448. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

[College of Engineering & Applied Science](#) [Computer Science](#) [Software Engineering](#)

---

## CSCI-5454 (3) Design and Analysis of Algorithms

Techniques for algorithm design, analysis of correctness and efficiency; divide and conquer, dynamic programming, etc. Advanced data structures, algorithms in graph theory, geometry, Vlsi, linear algebra, etc. Lower bounds, Np-completeness, intractability. Prereqs., CSCI 2270 or equivalent. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

[College of Engineering & Applied Science](#) [Computer Science](#) [Theory of Computation](#)

---

## CSCI-5473 (3) Applied Operating Systems

Examines design and implementation of contemporary operating systems. Significant laboratory component applies practice with OS use, analysis, and internal design. Topics include OS organization and structure, process and thread management, memory management, file management, device management, network and distributed systems, and modern runtime systems. Prereq., two years programming and instructor consent. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

[College of Engineering & Applied Science](#) [Computer Science](#) [Operating Systems and Hardware](#)

---

## CSCI-5502 (3) Data Mining

Introduces basic data mining concepts and techniques for discovering interesting patterns hidden in large-scale data sets, focusing on issues relating to scalability and efficiency. Topics covered include data preprocessing, data warehouse, association, classification, clustering, and mining specific data types such as time-series, social networks, multimedia, and Web data. Prereq., CSCI 2270 or instructor consent. CSCI 4502 and 5502 are the same course. Prerequisites: Restricted to Graduate Students only.

[College of Engineering & Applied Science](#) [Computer Science](#) [Artificial Intelligence](#)

---

---

---

## CSCI-5525 (3) Compiler Construction

Offers practical experience using state-of-the-art CAD tools on high-performance workstations. Provides skills needed to rapidly create little languages for specific problem domains and familiarizes students with automated software development. Prereqs., CSCI 2824 or ECEN 3703 and CSCI 2400 or ECEN 2120. Same as ECEN 5523 and CSCI 4555. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science Computer Science Programming Languages

---

## CSCI-5535 (3) Fundamental Concepts of Programming Languages

Considers concepts common to a variety of programming languages--how they are described (both formally and informally) and how they are implemented. Provides a firm basis for comprehending new languages and gives insight into the relationship between languages and machines. Prereq., CSCI 3155, or instructor consent. Same as ECEN 5533. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science Computer Science Programming Languages

---

## CSCI-5548 (3) Software Engineering of Standalone Programs

Applies engineering principles to phases of software product development, project planning, requirements definition, design, implementation, validation, and maintenance. Emphasizes practical methods for communicating and verifying definitions and designs--- prototyping, inspections, and modeling. Includes relation to RTS and object-oriented programming. Prereqs., CSCI 1300, CSCI 2270, or instructor consent. Same as ECEN 5543. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science Computer Science Software Engineering

---

## CSCI-5551 (3) Parallel Processing

Examines a range of topics involved in using parallel operations to improve computational performance. Discusses parallel architectures, parallel algorithms and parallel programming languages. Architectures covered include vector computers, multiprocessors, network computers, and data flow machines. Prereq., background in computer organization, introduction to programming languages, elementary numerical analysis, ECEN 4593 and CSCI 3656, or instructor consent. Same as ECEN 5553. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science Computer Science Parallel Processing

---

## CSCI-5573 (3) Advanced Operating Systems

Intended to create a foundation for operating systems research or advanced professional practice. Examines the design and implementation of a number of research and commercial operating systems and their components, system organization and structure, threads, communication and synchronization, virtual memory, distribution, file systems, security and authentication, availability, and Internet services. Prereqs., CSCI 3753, 4593, equivalent undergraduate coursework in operating systems and computer architecture, or

instructor consent. Same as ECEN 5573. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

[College of Engineering & Applied Science](#) [Computer Science](#) [Operating Systems and Hardware](#)

## CSCI-5576 (4) High-Performance Scientific Computing

Same as CSCI 4576. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

[College of Engineering & Applied Science](#) [Computer Science](#) [Numerical Computation](#)

## CSCI-5582 (3) Artificial Intelligence

Surveys artificial intelligence methods, theories, and applications. Studies the relationship between artificial intelligence and psychology, linguistics, and philosophy. Introduces artificial intelligence programming. Prereq., CSCI 3155 or equivalent. Same as ECEN 5583.

Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

[College of Engineering & Applied Science](#) [Computer Science](#) [Artificial Intelligence](#)

## CSCI-5593 (3) Advanced Computer Architecture

Provides a broad-scope treatment of important concepts in the design and implementation of high-performance computer systems. Discusses important issues in the pipelining of a machine and the design of cache memory systems. Also studies current and historically important computer architectures. Prereq., CSCI 4593 or instructor consent. Same as ECEN 5593. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

[College of Engineering & Applied Science](#) [Computer Science](#) [Operating Systems and Hardware](#)

## CSCI-5606 (3) Principles of Numerical Computation

Highlights computer arithmetic, solution of linear systems, least-squares approximations, nonlinear algebraic equations, interpolation, and quadrature. Prereqs., CSCI 3656 and three semesters of calculus, or equivalent. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

[College of Engineering & Applied Science](#) [Computer Science](#) [Numerical Computation](#)

CSCI

## CSCI-5608 (3) Software Project Management

Presents topics and techniques critical to the management of software product development, including estimating, planning, quality, tracking, reporting, team organization, people management, and legal issues. Gives special attention to problems unique to software projects. Prereqs., ECEN 4583, CSCI 5548 and 4318, or equivalent industrial experience. Same as ECEN 5603 and EMEN 5031.

Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

[College of Engineering & Applied Science](#) [Computer Science](#) [Software Engineering](#)

## CSCI-5622 (3) Machine Learning

Trains students to build computer systems that learn from experience. Includes the three main subfields: supervised learning, reinforcement learning and unsupervised learning. Emphasizes practical and theoretical understanding of the most widely used algorithms (neural networks, decision trees, support vector machines, Q-learning). Covers connections to data mining and statistical modeling. A strong foundation in probability, statistics, multivariate calculus, and linear algebra is highly recommended. Prereq., graduate standing or instructor consent. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

[College of Engineering & Applied Science](#) [Computer Science](#) [Artificial Intelligence](#)

## CSCI-5636 (3) Numerical Solution of Partial Differential Equations

Focuses on finite difference solution for partial differential equations, methods of SoR, ADI, conjugate gradients, finite element method, nonlinear problems, and applications. Prereqs., CSCI 5606. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

[College of Engineering & Applied Science](#) [Computer Science](#) [Numerical Computation](#)

---

## CSCI-5646 (3) Numerical Linear Algebra

Offers direct and iterative solutions of linear systems. Also covers eigen value and eigenvector calculations, error analysis, and reduction by orthogonal transformation. Prereqs., CSCI 5606. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

[College of Engineering & Applied Science](#) [Computer Science](#) [Numerical Computation](#)

---

## CSCI-5654 (3) Linear Programming

Presents algorithms, simplex, and modifications. Examines theory---duality and complementary slackness. Involves network flow algorithms. Introduces integer programming. Prereq., linear algebra. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

[College of Engineering & Applied Science](#) [Computer Science](#) [Theory of Computation](#)

---

## CSCI-5673 (3) Distributed Systems

Examines systems that span multiple autonomous computers. Topics include system structuring techniques, scalability, heterogeneity, fault tolerance, load sharing, distributed file and information systems, naming, directory services, resource discovery, resource and network management, security, privacy, ethics, and social issues. Recommended prereqs., CSCI 5573 or a course in computer networks. Same as ECEN 5673. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

[College of Engineering & Applied Science](#) [Computer Science](#) [Operating Systems and Hardware](#)

---

## CSCI-5714 (3) Formal Languages

Explores context-free languages: pumping lemma and variants, closure properties, and decision properties. Involves parsing algorithms, including general and special languages, e.g., LR. Additional topics chosen by instructor. Prereq., CSCI 5444 or instructor consent. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

[College of Engineering & Applied Science](#) [Computer Science](#) [Theory of Computation](#)

---

## CSCI-5722 (3) Computer Vision

Explores algorithms that can extract information about the world from images or sequences of images. Topics covered include: imaging models and camera calibration, early vision (filters, edges, texture, stereo, optical flow), mid-level vision (segmentation, tracking), vision-based control, and object recognition. Recommended prereq., probability, multivariate calculus, and linear algebra. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

[College of Engineering & Applied Science](#) [Computer Science](#) [Artificial Intelligence](#)

---

## CSCI-5753 (3) Computer Performance Modeling

Same as CSCI 4753. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

---

\_\_\_\_\_

College of Engineering & Applied Science Computer Science Operating Systems and Hardware

---

## CSCI-5809 (3) Computer Animation

Same as CSCI 4809 and ATLS 4809/5809. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science Computer Science Graphics

---

## CSCI-5810 (1) Seminar in Computational Biology

Provides an overview of current research topics in computational biology and health informatics, with a focus on research conducted on campus. Each week students will attend an on-campus seminar or a presentation by an on-campus research group. Prepares students to participate in a research project. Prereqs., CSCI 4312 or 4314 or 4317. CSCI 4810 and 5810 are the same course.

College of Engineering & Applied Science Computer Science General Computer Science

---

## CSCI-5817 (3) Database Systems

Provides an advanced treatment of basic database concepts. Prereq., CSCI 2270. Recommended prereq., CSCI 3287 and 3753. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science Computer Science Database Systems

---

## CSCI-5828 (3) Foundations of Software Engineering

Explores techniques, languages, and tools for development and maintenance of software systems. Topics include specification languages, configuration modeling, testing techniques, process modeling, program annotations, and program proofs. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science Computer Science Software Engineering

---

## CSCI-5832 (3) Natural Language Processing

Explores the field of natural language processing as it is concerned with the theoretical and practical issues that arise in getting computers to perform useful and interesting tasks with natural language. Covers the problems of understanding complex language phenomena and building practical programs. Prereq., graduate standing or instructor consent. Same as LING 5832. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science Computer Science Artificial Intelligence

---

---

## CSCI-5839 (3) User-Centered Design

Restricted to graduate students or instructor consent. Same as CSCI 4839. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science Computer Science Graphics

---

## CSCI-5900 (1-6) Master's Level Independent Study

Provides opportunities for independent study at the master's level. Prerequisites: Restricted to Computer Science (CSEN) graduate students only or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science Computer Science General Computer Science

---

## CSCI-5919 (3) Human-Computer Interaction: Survey and Synthesis

Examines interdisciplinary field of human-computer interaction through a comprehensive content and historical survey. Considers new trajectories of inquiry and how the field merges with others. "Social computing" is emphasized as a central topic. Students across disciplines will find the course foundational for understanding human-centered technology matters, including computer scientists; social scientists; and business and media arts students. Recommended prereq., CSCI 4839 or 5839. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science Computer Science Graphics

---

## CSCI-5929 (3) Human-Computer Interaction: Survey and Synthesis 2

Studies recent advances in human-computer interaction through critical analysis of influential papers and self-guided research. Examines new paradigms in input, output, and visualization for technology design and interaction. Considers innovative methods to assess various population design and technological needs. Studies in computer-related fields, social science, business, media arts, and communications benefit learning about human-centered computing research. Recommended prereq., CSCI 5919.

College of Engineering & Applied Science Computer Science Graphics

---

## CSCI-6000 (1) Introduction to the Computer Science PhD Program

Instructs new Ph.D students in Computer Science how to obtain a Ph.D and how to become an effective member of the computer science research community. Makes students aware of formal requirements, educational objectives, and research themes. Provides evaluative criteria and guidelines for all objectives to be achieved. Restricted to new Ph.D students in Computer Science. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science Computer Science General Computer Science

---

## CSCI-6268 (3) Foundations of Computer and Network Security

Studies methods to protect information, and the ability to process and move information, from theft, misuse, tampering, destruction, and

---

unauthorized access. Introduces foundational topics of computer and network security, including security models, cryptography, and authentication protocols. Prereq., CSCI 5273. Same as TLEN 5550. Prerequisites: Restricted to Graduate Students only.

[College of Engineering & Applied Science](#) [Computer Science](#) [Software Engineering](#)

---

## CSCI-6302 (3) Speech Recognition and Synthesis

Introduction to automatic speech recognition and understanding, conversational agents, dialogue systems, and speech synthesis/text-to-speech. Topics include the noisy channel model, Hidden Markov Models, A\* and Viterbi decoding, language modeling (N-grams, entropy), concatenative synthesis, text normalization, dialogue and conversation modeling. Prereqs., CSCI 5582 or 5832, or LING 5200, and graduate standing or instructor consent. Prerequisites: Restricted to Graduate Students only.

[College of Engineering & Applied Science](#) [Computer Science](#) [Artificial Intelligence](#)

---

## CSCI-6402 (3) Issues and Methods in Cognitive Science

Interdisciplinary introduction to cognitive science, examining ideas from cognitive psychology, philosophy, education, and linguistics via computational modeling and psychological experimentation. Includes philosophy of mind; learning; categorization; vision and mental imagery; consciousness; problem solving; decision making, and game-theory; language processing; connectionism. Prereqs., graduate standing, or at least one course at the 3000-level or higher in computer science, linguistics, philosophy, or psychology. No background in computer science will be presumed. Same as EDUC 6504, LING 6200, PHIL 6310, and PSYC 6200. Prerequisites: Restricted to Graduate Students only.

[College of Engineering & Applied Science](#) [Computer Science](#) [Artificial Intelligence](#)

---

## CSCI-6454 (3) Advanced Algorithms

Topics include matching and network flows, matroids, computational geometry, parallel computation (PRAM, hypercube, mesh). Also includes Vlsi, database theory, distributed computation, cryptography, robotics, scheduling, probabilistic algorithms, approximation algorithms, average case, and amortized analysis, time permitting. Prereq., CSCI 5454. Prerequisites: Restricted to Graduate Students only.

[College of Engineering & Applied Science](#) [Computer Science](#) [Theory of Computation](#)

---

## CSCI-6622 (3) Advanced Machine Learning

Covers advanced theoretical and practical topics in machine learning and latest developments in the field. Students conduct original research, either applied or theoretical, and present their results. Prereq., CSCI 5622 or instructor consent. Prerequisites: Restricted to Graduate Students only.

[College of Engineering & Applied Science](#) [Computer Science](#) [Artificial Intelligence](#)

---

## CSCI-6676 (3) Numerical Methods for Unconstrained Optimization

Looks at modern computational methods for solution of unconstrained optimization problems, nonlinear leastsquares, and systems of

nonlinear equations. Techniques for building algorithms to solve problems with special structure. Prereq., CSCI 5606. Prerequisites: Restricted to Graduate Students only.

CSCI

### CSCI-6686 (3) Numerical Methods for Constrained Optimization

Covers computational methods for constrained optimization. Topics include basic theory, methods for quadratic programming, active set strategies for linear constraints, and penalty and successive quadratic programming methods for nonlinearly constrained problems.

Prereq., CSCI 5606. Prerequisites: Restricted to Graduate Students only.

[College of Engineering & Applied Science](#) [Computer Science](#) [Numerical Computation](#)

### CSCI-6800 (1-6) Master of Engineering Project

Students seeking the master of engineering degree must complete a creative investigation project, including a written report, supervised by a member of the graduate faculty. Prereq., completion of 21 hours towards the ME degree. Prerequisites: Restricted to graduate student Computer Sciences students only.

[College of Engineering & Applied Science](#) [Computer Science](#) [General Computer Science](#)

### CSCI-6940 (1) Master's Degree Candidacy

For students who need to be registered for the purpose of taking the master's comprehensive exam and who are not otherwise registered. Credit does not count toward degree requirements. Graded on a pass/fail basis. Prerequisites: Restricted to Computer Science (CSEN) graduate students only or Computer Science Concurrent Degree majors only.

[College of Engineering & Applied Science](#) [Computer Science](#) [General Computer Science](#)

### CSCI-6950 (1-6) Master's Thesis

Prerequisites: Restricted to Computer Science (CSEN) graduate students only or Computer Science Concurrent Degree majors only.

[College of Engineering & Applied Science](#) [Computer Science](#) [General Computer Science](#)

---

---

## CSCI-7000 (1-4) Current Topics in Computer Science

Covers research topics of current interest in computer science that do not fall into a standard subarea. May be repeated up to 8 total credit hours. Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

[College of Engineering & Applied Science](#) [Computer Science](#) [General Computer Science](#)

---

---

## CSCI-7111 (3) Topics in Parallel Processing

Content varies, but subjects include parallel machine architecture, parallel algorithms, languages for parallel computation, and applications. Takes subject matter from current research. Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

[College of Engineering & Applied Science](#) [Computer Science](#) [Parallel Processing](#)

---

---

## CSCI-7123 (3) Topics in Operating Systems

Topics selected by instructor. Possible topics are system design, measurement and evaluation, simulation, mathematical modeling, and parallelism. Prereq., CSCI 5573. Prerequisites: Restricted to Graduate Students only.

[College of Engineering & Applied Science](#) [Computer Science](#) [Operating Systems and Hardware](#)

---

---

## CSCI-7135 (3) Topics in Programming Languages

Topics selected by instructor. Possible topics are syntax, semantics, metacompilers, compiler design, and translator writing systems. Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

[College of Engineering & Applied Science](#) [Computer Science](#) [Programming Languages](#)

---

---

## CSCI-7143 (3) Topics in Computer Systems

Topics selected by instructor. Possible topics are online systems, multiprocessing, microprogramming, architecture, data communications, and computing networks. May be repeated up to 6 total credit hours. Instructor consent required. Prerequisites: Restricted to Graduate Students only.

[College of Engineering & Applied Science](#) [Computer Science](#) [Operating Systems and Hardware](#)

---

---

## CSCI-7154 (3) Topics in Theory of Computation

Selected topics of current interest in theory of computation. Prereq., CSCI 5454. Prerequisites: Restricted to Graduate Students only.

[College of Engineering & Applied Science](#) [Computer Science](#) [Theory of Computation](#)

---

## CSCI-7176 (3) Topics in Numerical Computation

Topics selected by instructor. Possible topics are numerical linear algebra, solution of differential equations, nonlinear algebra and optimization, data fitting, linear and nonlinear programming, and solution of large problems. Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

[College of Engineering & Applied Science](#) [Computer Science](#) [Numerical Computation](#)

---

## CSCI-7212 (3) Topics in Symbolic Artificial Intelligence

Topics vary from year to year. Possible topics include search; knowledge representation and natural language understanding; deduction, planning, problem solving, and automatic programming; instruction and cognitive models; vision and speech; and learning, induction, and concept formation. Prereq., CSCI 5582 or instructor consent. Prerequisites: Restricted to Graduate Students only.

[College of Engineering & Applied Science](#) [Computer Science](#) [Artificial Intelligence](#)

---

## CSCI-7222 (3) Topics in Nonsymbolic Artificial Intelligence

Topics vary from year to year. Possible topics include human and machine vision, signal and speech processing, artificial life, mathematical foundations of connectionism, and computational learning theory. Prereq., CSCI 5622 or instructor consent. Prerequisites: Restricted to Graduate Students only.

[College of Engineering & Applied Science](#) [Computer Science](#) [Artificial Intelligence](#)

---

## CSCI-7412 (2) Cognitive Science Research Practicum

Independent, interdisciplinary research project in cognitive science for graduate students pursuing a joint Ph.D in an approved core discipline and cognitive science. Projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students should obtain commitments from two mentors for their project. Prereqs., CSCI 6402 or EDUC 6504 or LING 6200 or PHIL 6310 or PSYC 6200. Recommended prereqs., CSCI7762 or EDUC 6505 or LING 7762 or PSYC 7765. Same as LING 7415, PSYC 7415, PHIL 7415, and EDUC 6506. Prerequisites: Restricted to Graduate Students only.

[College of Engineering & Applied Science](#) [Computer Science](#) [Artificial Intelligence](#)

---

## CSCI-7422 (2) Cognitive Science Research Practicum 2

Independent, interdisciplinary research project in cognitive science for advanced graduate students pursuing a joint Ph.D in an approved core discipline and cognitive science. Research projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students need commitments from two mentors for their project. Prereq., LING 7415 or PSYC 7415 or CSCI 7412 or EDUC 6506. Same as PSYC 7425, LING 7425, PHIL 7425, and EDUC 6516. Prerequisites: Restricted to Graduate Students only.

[College of Engineering & Applied Science](#) [Computer Science](#) [Artificial Intelligence](#)

---

---

## CSCI-7717 (3) Topics in Database Systems

Studies topics such as distributed databases, database interfaces, data models, database theory, and performance measurement in depth. Prereq., CSCI 5817 or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Computer Science | Database Systems

---

## CSCI-7762 (1-2) Readings and Research in Cognitive Science

Interdisciplinary reading of innovative theories and methodologies of cognitive science. Participants share interdisciplinary perspectives through in-class and online discussion and analysis of controversial texts and of their own research in cognitive science. Required for joint Ph.D in cognitive science. Prereq., graduate standing. Same as EDUC 6505, LING 7762, and PSYC 7765. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Computer Science | Artificial Intelligence

---

## CSCI-7772 (1-2) Topics in Cognitive Science

Reading of interdisciplinary innovative theories and methodologies of cognitive science. Students participate in the ICS Distinguished Speakers series that hosts internationally recognized cognitive scientists who share and discuss their current research. Session discussions include analysis of leading edge and controversial new approaches in cognitive science. Restricted to students enrolled in ICS Cognitive Science Academic Programs. Same as LING 7775, PSYC 7775, EDUC 7775, SLHS 7775, and PHIL 7810. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Computer Science | Artificial Intelligence

---

## CSCI-7782 (3) Topics in Cognitive Science

Addresses a different set of one to three topics each year. For each topic, one or two faculty members of the Institute of Cognitive Science present background material and current research. Prereq., graduate standing or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Computer Science | Artificial Intelligence

---

## CSCI-7818 (3) Topics in Software Engineering

Studies selected topics of current interest in software engineering. Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Computer Science | Software Engineering

---

## CSCI-7900 (1-6) Doctoral Level Independent Study

For doctoral students.

## CSCI-8990 (1-10) Doctoral Dissertation

Investigates some specialized field of computer science. Approved and supervised by faculty members. Prerequisites: Restricted to Graduate Students only.

## CSVC-1000 (1) Work Internship

a one credit pass/fail course, opened to students in good academic standing, whose internship employers require that they receive course credit. The student must first seek to obtain academic credit through their major department. Will not count toward degree requirements in any UCB school or college. No appeals for credit toward degrees or for letter grades in the course will be entertained.

CVEN

## CVEN-1317 (2) Introduction to Civil and Environmental Engineering

Surveys the broad subject of civil and environmental engineering and professional practice. Includes the subdisciplines of structures, water resources, geotechnics, transportation, environment, and construction. Discusses professional ethics, important skills for engineers, and the engineering design process as it fulfills multiple objectives.

[College of Engineering & Applied Science](#)
[Civil Engineering](#)
[Miscellaneous](#)

## CVEN-2012 (3) Introduction to Geomatics

Observes, analyzes, and presents basic linear, angular, area, and volume field measurements common to civil engineering endeavors with application of GPS and GIS technology. Prereq., APPM 1350 or equivalent. Prerequisites: Restricted to Architectural or Civil Engineering majors only.

[College of Engineering & Applied Science](#)
[Civil Engineering](#)
[Surveying and Transportation](#)

## CVEN-2121 (3) Analytical Mechanics 1

Covers forces acting on rigid bodies at rest. Equilibrium is the central concept that will be applied repeatedly to different situations. In each case, the object of interest will be isolated along with all the forces acting on it; a free body diagram. Equilibrium will be applied to analyze trusses, frames, machines, cables and hydrostatic forces on dams. Prereq., PHYS 1110. Prereq. or coreq., APPM 2350. Same as GEEN 3851. Restricted to freshmen or sophomore Civil, Environmental, or Architectural Engineering majors only. Prerequisites: Restricted to freshmen or sophomore Civil, Environmental, or Architectural Engineering majors only.

[College of Engineering & Applied Science](#)
[Civil Engineering](#)
[Mechanics](#)

## CVEN-3022 (3) Construction Surveying

Studies construction and highway surveying, horizontal and vertical curves, earthwork, and analysis of data. Prereq., CVEN 2012.

College of Engineering & Applied Science Civil Engineering Surveying and Transportation

---

## CVEN-3032 (3) Photogrammetry

Familiarizes students with characteristics of aerial photographs. Measures and interprets aerial photos for planimetric, topographic, hydrological, soil, and land use surveys. Analyzes and presents field measurements over extensive reaches. Prereq., instructor consent.

College of Engineering & Applied Science Civil Engineering Surveying and Transportation

---

## CVEN-3111 (3) Analytical Mechanics 2

Studies the motion (kinematics) of particles and rigid bodies, and the forces that cause the motion (kinetics). Newton's laws as well as energy methods are used to study the motion of particles and rigid bodies in two and three dimensions. Prereqs., CVEN 2121 and APPM 2360. Same as MCEN 3043.

College of Engineering & Applied Science Civil Engineering Mechanics

---

## CVEN-3161 (3) Mechanics of Materials 1

Addresses concepts of stress and strain; material properties, axial loading, torsion, simple bending, and transverse shear; analysis of stress and strain; and deflections of beams. Includes selected experimental and computational laboratories. Prereq., CVEN 2121. Coreq., APPM 2360. Restricted to Architectural or Civil Engineering majors only. Prerequisites: Restricted to Architectural or Civil Engineering majors only.

College of Engineering & Applied Science Civil Engineering Mechanics

---

## CVEN-3227 (3) Probability, Statistics and Decision

Introduces uncertainty based analysis concepts and applications in the planning and design of civil engineering systems emphasizing probabilistic, statistics, and design concepts and methods. Restricted to juniors/seniors.

College of Engineering & Applied Science Civil Engineering Miscellaneous

---

## CVEN-3246 (3) Introduction to Construction

Broad view of concerns, activities, and objectives of people involved in construction: the owner, architect/engineer, contractor, labor, and inspector. Interactive gaming situation relates these people to the construction contract, plans/specifications, estimates/bids, scheduling, law, and financial management. Restricted to junior or senior Civil or Architectural Engineering majors only. Prerequisites: Restricted to

junior or senior Civil or Architectural Engineering majors only.

College of Engineering & Applied Science Civil Engineering Construction

---

## CVEN-3256 (3) Construction Equipment and Methods

Integrated study of construction equipment, methods, and economics. Topics include equipment productivity, equipment selection, and construction engineering design within economic constraints. Examples include earthmoving, concrete formwork, and temporary construction. Recommended prereq., CVEN 3246. Restricted to Architectural or Civil Engineering majors only. Prerequisites: Restricted to Architectural or Civil Engineering majors only.

College of Engineering & Applied Science Civil Engineering Construction

---

## CVEN-3313 (3) Theoretical Fluid Mechanics

Basic principles of fluid mechanics. Covers fluid properties, hydrostatics, fluid flow concepts, including continuity, energy, momentum, dimensional analysis and similitude, and flow in closed conduits. Prereq., CVEN 2121. Prerequisites: Requires pre-requisite course of CVEN 2121 (or GEEN 3851, or ASEN 2001, or MCEN 2023).

College of Engineering & Applied Science Civil Engineering Fluid Mechanics & Water Resour

---

## CVEN-3323 (3) Hydraulic Engineering

Studies hydraulic engineering theory and applications. Topics include incompressible flow in conduits, pipe system analysis and design, open channel flow, flow measurement, analysis and design of hydraulic machinery. Prereq., CVEN 3313 (or MCEN 3021, or GEEN 3853, or AREN 2120). Restricted to Civil, Environmental, or Architectural Engineering majors only. Prerequisites: Requires pre-requisite courses of CVEN 3313 (or MCEN 3021, or GEEN 3853, or AREN 2120). Restricted to Civil, Environmental, or Architectural Engineering majors only.

College of Engineering & Applied Science Civil Engineering Fluid Mechanics & Water Resour

---

## CVEN-3414 (3) Fundamentals of Environmental Engineering

Emphasizes chemical, ecological, and hydrological fundamentals and importance of mass and energy balances in solving environmental engineering problems related to water quality, water and wastewater treatment, air pollution, solid and hazardous waste management, sustainability, and risk assessment. Prereqs., CHEN 1211 and APPM 1360. Restricted to Civil, Environmental, Architectural, Chemical, or Mechanical Engineering majors only. Others admitted space permitting--contact CEAE. Prerequisites: Restricted to Civil, Environmental, Architectural, Mechanical or Chemical Engineering majors only.

College of Engineering & Applied Science Civil Engineering Environmental

---

## CVEN-3424 (3) Water and Wastewater Treatment

Introduces design and operation of facilities for treatment of municipal water supplies and wastewater. Provides an engineering application of physical, chemical, and biological unit processes and operations for removal of impurities and pollutants. Involves an

---

integrated design of whole treatment systems combining process elements. Prereq., CVEN 3414.

College of Engineering & Applied Science Civil Engineering Environmental

---

## CVEN-3434 (3) Introduction to Applied Ecology

Emphasizes the integration of physical, chemical, and biological processes in controlling terrestrial and aquatic ecosystems. Ecosystem concepts are applied to current environmental and water quality problems. Includes field trips and a group project. Prereq., CHEM 1111 or CHEN 1211 and 1221. Restricted to junior/senior CVEN, EVEN, or AREN majors. Same as ENVS 3434. Prerequisites: Restricted to Civil, Environmental, or Architectural Engineering majors only.

College of Engineering & Applied Science Civil Engineering Environmental

---

## CVEN-3525 (3) Structural Analysis

Studies structural analysis of statically determinate and indeterminate systems, deflections, energy methods, and force method. Prereq., CVEN 3161 or MCEN 2063. Restricted to Architectural or Civil Engineering majors only. Prerequisites: Requires pre-requisite course of CVEN 3161 or MCEN 2063. Restricted to Civil, Environmental, or Architectural Engineering majors only.

College of Engineering & Applied Science Civil Engineering Structures

---

## CVEN-3602 (3) Transportation Systems

Introduces technology, operating characteristics, and relative merits of highway, airway, waterway, railroad, pipeline, and convey or transportation systems. Focuses on evaluation of urban transportation systems and recent transportation innovations. Prerequisites: Restricted to College of Engineering majors only.

College of Engineering & Applied Science Civil Engineering Surveying and Transportation

---

## CVEN-3698 (3) Engineering Geology

Highlights the role of geology in engineering minerals; rocks; surficial deposits; rocks and soils as engineering materials; distribution of rocks at and below the surface; hydrologic influences; geologic exploration of engineering sites; mapping; and geology of underground excavations, slopes, reservoirs, and dam sites. Includes field trips.

College of Engineering & Applied Science Civil Engineering Geotechnical

---

## CVEN-3708 (3) Geotechnical Engineering 1

Studies basic characteristics of geological materials; soil and rock classifications; site investigation; physical, mechanical, and hydraulic properties of geologic materials; the effective stress principle; soil and rock improvement; seepage analysis; stress distribution; and consolidation and settlement analyses. Selected experimental and computational laboratories. Prereq., CVEN 3161 or MCEN 2063. Prerequisites: Requires pre-requisite course of CVEN 3161 or MCEN 2063. Restricted to Civil, Environmental, or Architectural

Engineering majors only.

College of Engineering & Applied Science Civil Engineering Geotechnical

---

## CVEN-3718 (3) Geotechnical Engineering 2

Discusses shear strength, bearing capacity, lateral earth pressures, slope stability, and underground construction. Analyzes and looks at the design of shallow and deep foundations, retaining walls, tunnels, and other earth and rock structures. Selected experimental and computational laboratories. Prereq., CVEN 3708. Prerequisites: Restricted to College of Engineering majors only.

College of Engineering & Applied Science Civil Engineering Geotechnical

---

## CVEN-4087 (3) Construction Contract Administration

Students will develop a working understanding of the various types of contracts, key contract provisions, how to evaluate contract risk, ethical requirements, and most importantly explore effective contract administration. Construction and engineering contracts are at the core of all project relationships. Through lecture, group dialog and case studies students will develop confidence in their ability to assess, understand and deploy contract administration in a construction setting. Prereq., senior standing in civil or architectural engineering or instructor consent.

College of Engineering & Applied Science Civil Engineering Miscellaneous

---

## CVEN-4147 (3) Civil Engineering Systems

Theory and application of the principles of engineering economics, and classical and metaheuristic optimization techniques for evaluating problems in civil and environmental engineering. Same as CVEN 5147. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Engineering majors only.

College of Engineering & Applied Science Civil Engineering Miscellaneous

---

## CVEN-4161 (3) Mechanics of Materials 2

Covers advanced topics in the mechanics of solids. Some topics such as asymmetric bending of beams, torsion of non-circular cross-sections etc. are extensions of topics seen in CVEN 3161. Others like buckling and plate bending theory are new. The course presents unifying themes that underlie the study of mechanics. The course includes selected laboratory experiments. Prereq., CVEN 3161.

College of Engineering & Applied Science Civil Engineering Mechanics

---

## CVEN-4323 (3) Water Resource Engineering Design

Design of urban water supply, wastewater, and supply stormwater management system, with demand management as an option. Exploration of the feasibility of recycling and reuse of treated wastewater and stormwater. Prereqs., CVEN 3227 and 4147. Same as CVEN 5423.

## CVEN-4333 (3) Engineering Hydrology

Studies engineering applications of principles of hydrology, including hydrologic cycle, rainfall and runoff, groundwater, storm frequency and duration studies, stream hydrography, flood frequency, and flood routing. Prereqs., CVEN 3227 and 3323.

CVEN

### CVEN-4353 (3) Groundwater Engineering

Studies the occurrence, movement, extraction for use, and quantity and quality aspects of groundwater. Introduces and uses basic concepts to solve engineering and geohydrologic problems. Prereq., Cven 3313. Prerequisites: Restricted to College of Engineering majors only.

[College of Engineering & Applied Science](#) [Civil Engineering](#) [Fluid Mechanics & Water Resour](#)

### CVEN-4383 (3) Groundwater Modeling

Studies mathematical and numerical techniques needed to develop models to solve problems in water flow and chemical transport in aquifers. Emphasizes the learning of modeling techniques from fundamentals and the application of models to solve problems in groundwater engineering. Recommended prereq., CVEN 4353. Same as CVEN 5383.

[College of Engineering & Applied Science](#) [Civil Engineering](#) [Fluid Mechanics & Water Resour](#)

### CVEN-4404 (3) Water Chemistry

Introduces chemical fundamentals of inorganic aqueous compounds and contaminants in lecture and laboratory. Lecture topics include thermodynamics and kinetics of acids and base reactions, carbonate chemistry, air-water exchange, precipitation, dissolution, complexation, oxidation-reduction, and sorption. Prereqs., CHEN 1211 and CVEN 3414, or CHEM 1111 and 1131 for non-engineers. Restricted to CVEN and EVEN majors only. Formerly CVEN 3454. Prerequisites: Restricted to Civil or Environmental Engineering majors only.

[College of Engineering & Applied Science](#) [Civil Engineering](#) [Environmental](#)

---

## CVEN-4414 (1) Water Chemistry Laboratory

Reinforces chemical fundamentals of inorganic aqueous compounds and contaminants from CVEN 4404 Water Chemistry in laboratory experiments and reports. Topics include acids and bases, carbonate chemistry (alkalinity), and other water chemistry characteristics (hardness, dissolved oxygen); precipitation, complexation, and oxidation-reduction reactions; and laboratory techniques and reporting. Prereqs., CHEN 1211 and CVEN 3414 or CHEN 1111 and 1131 for non-engineers. Coreq., CVEN 4404. Restricted to CVEN or EVEN majors only. Prerequisites: Restricted to Civil or Environmental Engineering majors only.

College of Engineering & Applied Science   Civil Engineering   Environmental

---

---

## CVEN-4424 (3) Environmental Organic Chemistry

Examines the fundamental physical and chemical transformations affecting the fate and transport of organic contaminants in natural and treated waters. Emphasizes quantitative approach to solubility, vapor pressure, air-water exchange, sorption, hydrolysis and redox reactions, and photodegradation. Prereq., CHEN 1211 or equivalent.

College of Engineering & Applied Science   Civil Engineering   Environmental

---

---

## CVEN-4434 (4) Environmental Engineering Design

Examines the design of facilities for the treatment of municipal water and wastewater, hazardous industrial waste, contaminated environmental sites, and sustainable sanitation in developing countries. Economic, societal, and site specific criteria impacting designs are emphasized. Prereq., CVEN 3414. Restricted to seniors.

College of Engineering & Applied Science   Civil Engineering   Environmental

---

---

## CVEN-4474 (3) Hazardous and Industrial Waste Management

Evaluates processes used for treatment of wastes requiring special handling and disposal: toxic organic chemicals, heavy metals, and acidic, caustic, and radioactive waste material. Discusses techniques for destruction, immobilization, and resource recovery and assessment of environmental impact of treatment process end products. Prereq., CVEN 3414. Same as CVEN 5474. Prerequisites: Restricted to College of Engineering majors only.

College of Engineering & Applied Science   Civil Engineering   Environmental

---

---

## CVEN-4484 (3) Introduction to Environmental Microbiology

Surveys microbiology topics germane to modern civil and environmental engineering. Provides fundamentals needed to understand microbial processes and ecology in engineered and natural systems and reviews applications emphasizing the interface between molecular biology and classical civil engineering. Prereq., CHEM 1211, CHEN 1221, APPM 1350, 1360, and 2350.

College of Engineering & Applied Science   Civil Engineering   Environmental

---

---

---

## CVEN-4511 (3) Introduction to Finite Element Analysis

Systematic formulation of finite element approximation and isoparametric interpolation (weighted residual and energy methods, triangular and quadrilateral elements). Includes computation applications to the solution of one- and two-dimensional stress-deformation problems, steady and transient heat conduction, and viscous flow. Prereqs., CVEN 3161, 3525, and Appm 2360. Same as CVEN 5511.

College of Engineering & Applied Science   Civil Engineering   Mechanics

---

## CVEN-4525 (3) Analysis of Framed Structures

Studies matrix formulation of principles of structural analysis and development of direct stiffness and flexibility methods for analysis of frame and truss structures. Topics include support settlements, thermal loads, and energy formulations of force-displacement relationships. Prereq., CVEN 3525. Same as CVEN 5525.

College of Engineering & Applied Science   Civil Engineering   Structures

---

## CVEN-4537 (3) Numerical Methods in Civil Engineering

Introduces the use of numerical methods in the solution of civil engineering problems, emphasizing obtaining solutions with high-speed electronic computers. Applies methods to all types of civil engineering problems. Prereq., senior standing. Same as CVEN 5537.

College of Engineering & Applied Science   Civil Engineering   Miscellaneous

---

## CVEN-4545 (3) Steel Design

Applies basic principles to design of steel structures; design of tension members, columns, beams, open-web joists, steel decks, bolts, bolted connections, welding processes, and welded connections. Prereq., CVEN 3525.

College of Engineering & Applied Science   Civil Engineering   Structures

---

## CVEN-4555 (3) Reinforced Concrete Design

Focuses on applications to the design of reinforced concrete structures, including design of beams, columns, slabs, and footings; continuous beams and frames; cast-in-place buildings. Prereq., CVEN 3525.

College of Engineering & Applied Science   Civil Engineering   Structures

---

## CVEN-4565 (2) Timber Design

Applies design methods to beams, columns, trusses, and connections using timber and glued, laminated members. Prereq. or coreq.,

College of Engineering & Applied Science | Civil Engineering | Structures

---

## CVEN-4700 (3) Sustainability and the Built Environment

Introduces fundamental concepts of sustainability and sustainable development. Special emphasis on understanding the interaction of the built environment with natural systems and the role of technical and non-technical issues in engineering decisions. Open to engineering and non-engineering students. Same as CVEN 5700.

College of Engineering & Applied Science | Civil Engineering | Building Systems

---

## CVEN-4718 (3) Mechanics and Dynamics of Glaciers

Focuses on geotechnical design of shallow and deep foundations, including spread footings, mats, driven piles, and drilled piers. Coverage includes bearing capacity, settlement, group effects, and lateral load capacity of the various foundation types. Additional topics include subsurface exploration, construction of deep foundations, and analysis of pile behavior using wave equation and dynamic monitoring methods. Prereqs., CVEN 3718 or instructor consent. Same as CVEN 5728.

College of Engineering & Applied Science | Civil Engineering | Geotechnical

---

## CVEN-4728 (3) Foundation Engineering

Focuses on geotechnical design of shallow and deep foundations, including spread footings, mats, driven piles, and drilled piers. Coverage includes bearing capacity, settlement, group effects, and lateral load capacity of the various foundation types. Additional topics include subsurface exploration, construction of deep foundations, and analysis of pile behavior using wave equation and dynamic monitoring methods. Prereqs., CVEN 3718 or instructor consent. Same as CVEN 5728.

College of Engineering & Applied Science | Civil Engineering | Geotechnical

---

## CVEN-4822 (3) Geographical Information Systems for Civil and Environmental Systems

Theory and use of geographical information systems in civil engineering, environmental studies, natural resources, and other related disciplines. Topics include spatial data models, data capture, global positioning system, database linkage, use in design, analysis and implementation. Laboratory work includes applications of Arc-View and Arc-GIS software. Prereq., CVEN 2012 or instructor consent. Same as CVEN 5822.

College of Engineering & Applied Science | Civil Engineering | Surveying and Transportation

---

---

## CVEN-4834 (1-3) Special Topics

Prereq., instructor consent. May be repeated up to 6 total credit hours provided topics are different.

College of Engineering & Applied Science | Civil Engineering | Environmental

---

## CVEN-4837 (1-3) Special Topics

College of Engineering & Applied Science | Civil Engineering | Miscellaneous

---

## CVEN-4839 (3-6) Special Topics for Seniors

Offers a supervised study of special topics, under instructor guidance. May be repeated up to 6 total credit hours. Prereq., instructor consent.

College of Engineering & Applied Science | Civil Engineering | Special Topics

---

## CVEN-4878 (1-3) Independent Study

Involves an independent, in-depth study, research, or design in a selected area of civil or environmental engineering. Offerings are coordinated with individual faculty. Students should consult the Department of Civil, Environmental, and Architectural Engineering. Numbered CVEN 4840 through CVEN 4878.

College of Engineering & Applied Science | Civil Engineering | Geotechnical

---

## CVEN-4899 (4) Civil Engineering Senior Project Design

Provides a simulated real world design and construction planning experience with multiple constraints including budget, schedule, technical, regulatory, and societal. Teams integrate the multiple civil engineering sub-disciplines. Requires gathering relevant data, understanding client needs, identifying constraints, and applying applicable regulations, codes and standards. Final deliverables include: detailed design drawings, specifications, cost estimate, project schedule, construction plan, oral and written presentation. Prereq., senior standing.

College of Engineering & Applied Science | Civil Engineering | Special Topics

---

## CVEN-5010 (3) HVAC System Modeling and Control

Treats the theoretical and practical design of control systems for heating, ventilating, and air conditioning of both residential and commercial buildings. Discusses computer energy management system design. Prereq., AREN 3010 or equivalent. Same as AREN 4010.

## CVEN-5020 (3) Building Energy Audits

Analyzes and measures performance of HVAC systems, envelopes, lighting and hot water systems, and modifications to reduce energy use. Emphasizes existing buildings. Prereq., AREN 3010 or equivalent. Prerequisites: Restricted to Graduate Students only.

CVEN

## CVEN-5030 (3) Architectural Lighting Equipment Design

Covers the specification and design of nonimaging optical systems for architectural lighting equipment reflector design. Develops and uses computer software to design optics that are prototyped and tested in the laboratory. Prereq., AREN 3540 or CVEN 5830. Taught intermittently.

[College of Engineering & Applied Science](#) [Civil Engineering](#) [Building Systems](#)

## CVEN-5040 (3) Lighting Systems Engineering

Introduces architectural lighting, including vision and perception, lighting equipment and its characteristics, calculations and analysis, and the process of lighting design.

[College of Engineering & Applied Science](#) [Civil Engineering](#) [Building Systems](#)

## CVEN-5050 (3) Advanced Solar Design

Predicts performance and analyzes economics of high temperature, photovoltaic, and other innovative solar systems. Also includes performance prediction methods for solar processes. Prereqs., AREN 2120, coursework in thermodynamics, fluid mechanics and heat transfer. Prerequisites: Restricted to Graduate Students only.

[College of Engineering & Applied Science](#) [Civil Engineering](#) [Building Systems](#)

## CVEN-5070 (3) Thermal Analysis of Building

Examines response factors, conduction transfer functions, and weighting factors for dynamic analysis of building envelopes. Also studies

radiative and convective exchange in buildings, internal gains, and infiltration analysis as modeled in hourly simulations. Prereq., AREN 3010 or equivalent.

College of Engineering & Applied Science Civil Engineering Building Systems

---

## CVEN-5080 (3) Computer Simulation of Building Energy Systems

Introduces major simulation programs for analysis of building energy loads and system performance. Focuses on one hourly simulation program to develop capability for analysis of multizone structure. Prereq., AREN 4110 or CVEN 5110. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science Civil Engineering Building Systems

---

## CVEN-5110 (3) HVAC Design 1

Explores design of heating, ventilating, and air conditioning (HVAC) systems for buildings. Covers HVAC systems description, load estimating, code compliance, duct design, fan systems, applied psychrometrics, cooling and heating coils, filters, hydronic systems, piping, and pumps. Prereq., AREN 3010 or equivalent. Same as AREN 4110.

College of Engineering & Applied Science Civil Engineering Building Systems

---

## CVEN-5111 (3) Structural Dynamics

Introduces dynamic response of linear elastic single and multiple degree of freedom systems. Includes time and frequency domain analysis. Also analyzes building structures. Prereq., instructor consent.

College of Engineering & Applied Science Civil Engineering Mechanics

---

## CVEN-5131 (3) Continuum Mechanics and Elasticity

Provides foundation for advanced study of structural and material behavior and continuum theories in mechanics. Topics include Cartesian tensors, elements of continuum mechanics, constitutive laws for elastic solids, energy principles, methods of potentials, formulations of 2D and 3D elastostatic problems, and general analytical and numerical solutions.

College of Engineering & Applied Science Civil Engineering Mechanics

---

## CVEN-5147 (3) Civil Engineering Systems

Same as CVEN 4147. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science Civil Engineering Miscellaneous

---

---

## CVEN-5161 (3) Advanced Mechanics of Materials I

Covers 3-D stress and strain, failure theories, torsion of open and noncircular sections, thick-wall pressure vessels, non-symmetric bending, shell in thin-walled sections, stability of frames and beam-column behavior. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science   Civil Engineering   Mechanics

---

## CVEN-5206 (3) Design Development

Investigates the interrelationship between design decisions and building costs, and the impact of each major building system and building trade on project budgets and schedules. Gives students the opportunity to prepare technical, marketing, and financial packages for investors as well as regulatory and financial institutions. Culminates with detailed presentations of student-developed project prospectuses. Instructor consent required. Restricted to graduate student Civil Engineering (CVEN) or Civil Engineering Concurrent Degree majors only. Taught intermittently. Prerequisites: Restricted to graduate student Civil Engineering (CVEN) or Civil Engineering Concurrent Degree majors only.

College of Engineering & Applied Science   Civil Engineering   Construction

---

## CVEN-5216 (3) Applied Construction Financial Management

Interpreting commonly used financial reports in the construction engineering industry sector will be taught. Skills developed in this course will better prepare students to become competent consumers of financial information utilizing the same to influence future results the construction business. Models for financing public and private sector projects will also be explored. Taught intermittently. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science   Civil Engineering   Construction

---

## CVEN-5226 (3) Safety and Quality

Comprehensively studies quality and safety in the construction industry. Statistical techniques for quality assurance and control will be reviewed and applied. The course also extensively focuses on advanced safety management issues such as accident causation theory, economic modeling, safety risk quantification and analysis, design for safety, and emerging technologies. Skills developed in this course will prepare graduate students to be effective quality and safety managers or researchers.

College of Engineering & Applied Science   Civil Engineering   Construction

---

## CVEN-5246 (3) Legal Aspects of Construction

Applies law in engineering practice; contracts, construction contract documents, construction specification writing, agency, partnership, and property; types of construction contracts; and legal responsibilities and ethical requirements of the professional engineer. Prereq., graduate standing or instructor consent required. Same as CVEN 4087. Taught intermittently. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science   Civil Engineering   Construction

---

---

## CVEN-5276 (3) Engineering Risk and Decision Analysis

Acquaints students with the fundamental principles and techniques of risk and decision analysis. Oriented toward project-level decisions in which risk or uncertainty plays a central role. Introduces students to Monte Carlo analyses, influence diagrams, and various types of multicriteria decision analyses. Culminates in a larger term project. Recommended prereq., CVEN 3227. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science   Civil Engineering   Construction

---

---

---

## CVEN-5313 (3) Environmental Fluid Mechanics

Analysis of viscous incompressible flows, with first-principle solutions for environmental fluid flows in oceans, rivers, lakes and the atmosphere. Topics include the Navier-Stokes equations, kinematics, vorticity dynamics, geophysical fluid dynamics, and density stratification. Prereqs., APPM 2350, 2360, CVEN 3313, or equivalents. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science   Civil Engineering   Fluid Mechanics & Water Resour

---

---

---

## CVEN-5323 (3) Applied Stream Ecology

Emphasizes the integration of hydrologic, chemical, and biological processes in controlling river, stream, and reservoir ecosystems at several spatial scales. Students apply ecosystem concepts to current environmental and water quality problems and learn field methods in field trips and a team project. Prereqs., general chemistry, physics. Recommended prereqs., hydrology, ecology, or environmental chemistry. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science   Civil Engineering   Environmental

---

---

---

## CVEN-5326 (3) Construction Project Controls

Examines tools and techniques employed to control design processes and construction operations. Students apply advanced scheduling and estimating techniques, culminating in the concept of earned value project management. Introduces high tech project control tools. Recommended prereqs., AREN 4420 and 4466. Taught intermittently.

College of Engineering & Applied Science   Civil Engineering   Construction

---

---

---

## CVEN-5333 (3) Multiscale Hydrology

Observations show that peak flows in rainfall-runoff events, and the quantities of annual peak flows, have a power-law dependence on basin area. Physical basis of power laws in peak flows will be explained from mass and momentum conservation equations governing stream flows in self-similar channel networks. Potential engineering applications to predicting floods under a changing climate will be covered. Prereqs., CVEN 4333, 5454 and 5537. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science   Civil Engineering   Fluid Mechanics & Water Resour

---

---

## CVEN-5343 (3) Transport and Dispersion in Surface Water

Studies transport and dispersion of introduced contaminants in turbulent surface water flows. Emphasizes developing a physical understanding of fluid processes responsible for turbulent dispersion. Includes analytical development, numerical modeling, and experimental approaches to the problem.

College of Engineering & Applied Science | Civil Engineering | Fluid Mechanics & Water Resour

---

## CVEN-5346 (3) Managing Construction and Engineering Projects and Organizations

Explores organizational and managerial issues and concerns facing executives in engineering and construction organizations. Through readings, case studies, simulation exercises, and projects, students are introduced to and apply concepts of strategy, core competencies, vision, innovation, team dynamics, interpersonal influence, organizational design issues, and global projects to engineering and construction organizations. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Civil Engineering | Construction

---

## CVEN-5353 (3) Groundwater Hydrology

Studies the occurrence, movement, extraction for use, and quantity and quality aspects of groundwater. Introduces and uses basic concepts to solve engineering and geohydrologic problems. Prereqs., CVEN 3313 and APPM 2360, or equivalent, or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Civil Engineering | Fluid Mechanics & Water Resour

---

## CVEN-5363 (3) Modeling of Hydrologic Systems

Introduces students to the techniques used in modeling various processes in the hydrologic cycle. Helps students develop numeric models and computer programs for use in conjunction with existing simulation modes such as HEC1 and HEC2 in a design project. Prereqs., CVEN 3313 and instructor consent.

College of Engineering & Applied Science | Civil Engineering | Fluid Mechanics & Water Resour

---

## CVEN-5373 (3) Water Law, Policy, and Institutions

Discusses contemporary issues in water management based on legal doctrine. Identifies legal issues in water resources problems and discusses in close relationship with technical, economic, and political considerations. Prereq., senior or graduate standing.

College of Engineering & Applied Science | Civil Engineering | Fluid Mechanics & Water Resour

---

## CVEN-5383 (3) Applied Groundwater Modeling

Studies mathematical and numerical techniques needed to develop models to solve problems in water flow and chemical transport in the saturated and unsaturated zones of aquifers. Not only emphasizes the learning of modeling techniques from fundamentals, but also the application of models and modeling methods to solve problems in groundwater engineering, geo-environmental engineering, hazardous waste management, aquifer remediation design, and aquifer clean-up. Prereqs., CVEN 5353, 5454, or equivalent, and APPM 2360 or equivalent. Same as CVEN 4383.

CVEN

## CVEN-5393 (3) Water Resources Development and Management

Explores the principles governing water resources planning and development. Emphasizes the sciences of water (physical, engineering, chemical, biological, and social) and their interrelationships. Prereq., senior or graduate standing. Same as ECON 6555.

[College of Engineering & Applied Science](#)
[Civil Engineering](#)
[Fluid Mechanics & Water Resour](#)

## CVEN-5404 (3) Water Chemistry

Introduces chemical fundamentals governing the chemistry of natural and treated waters in lecture and laboratory. Lecture topics include thermodynamics and kinetics of acids and base reactions, carbonate chemistry, air-water exchange, precipitation, dissolution, complexation, oxidation-reduction, and sorption. Laboratory experiments emphasize lecture concepts with measurements on local waters. Prerequisites: Restricted to Graduate Students only.

[College of Engineering & Applied Science](#)
[Civil Engineering](#)
[Environmental](#)

## CVEN-5414 (3) Water Chemistry Laboratory

Uses experimental and analytical laboratory techniques to develop a better understanding of the concepts of aquatic chemistry and to investigate water chemistry in treated and natural water systems. Techniques include titration, spectrophotometry, gas chromatography, other advanced instrumentation, sampling, portable analyses, and basic statistics and experimental design. Course focuses on water chemistry of Boulder Creek and other local waters. Prereq., CVEN 5404 or GEOL 5280. Coreq., CVEN 5424.

[College of Engineering & Applied Science](#)
[Civil Engineering](#)
[Environmental](#)

## CVEN-5423 (3) Water Resource Engineering Design

Same as CVEN 4323.

College of Engineering & Applied Science Civil Engineering Fluid Mechanics & Water Resour

---

---

## CVEN-5424 (3) Environmental Organic Chemistry

Examines the fundamental physical and chemical transformations affecting the fate and transport of organic contaminants in natural and treated waters. Emphasizes solubility, vapor pressure, air-water exchange, sorption, abiotic and biotic reactions, and photodegradation.

College of Engineering & Applied Science Civil Engineering Environmental

---

---

## CVEN-5434 (3) Environmental Engineering Design

Team-based design of facilities or processes for water or wastewater or solid waste treatment or remediation under multiple real-world constraints. Prereq., instructor consent. Recommended prereq., CVEN 5524, 5534, or 5474.

College of Engineering & Applied Science Civil Engineering Environmental

---

---

## CVEN-5454 (3) Quantitative Methods

Introduces the use of digital simulation in the analysis of water resources and environmental systems. Develops computer programs for the simulation of reservoir operations, watershed runoff, stream quality, and lake quality, and uses existing software to analyze more complex problems. Prereq., instructor consent.

College of Engineering & Applied Science Civil Engineering Environmental

---

---

## CVEN-5474 (3) Hazardous and Industrial Waste Management

Same as CVEN 4474. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science Civil Engineering Environmental

---

---

## CVEN-5484 (3) Introduction to Environmental Microbiology

Same as CVEN 4484.

College of Engineering & Applied Science Civil Engineering Environmental

---

---

---

## CVEN-5494 (3) Surface Water Quality Modeling

Examines the relationships among air, water, and landpollution, water quality, and beneficial uses. Using models, develops the ability to quantify and predict the impacts of pollutants in the aquatic environment, and to develop approaches to minimize unfavorablewater quality conditions. Prereq., instructor consent.

College of Engineering & Applied Science | Civil Engineering | Environmental

---

## CVEN-5511 (3) Introduction to Finite Element Analysis

Prereq., graduate standing. Same as Cven 4511. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Civil Engineering | Mechanics

---

## CVEN-5514 (3) Bioremediation

Advanced study on biological processes used to treat toxic organic and inorganic compounds contained in contaminated water, air, and soil; design and evaluation of in situ toxic compound biotransformation; fundamentals of phytoremediation; critical reviews of current literature on bioremediation. Prereq., CVEN 4484 or 5484 or instructor consent. Recommended prereq., CVEN 5424.

College of Engineering & Applied Science | Civil Engineering | Environmental

---

## CVEN-5524 (3) Drinking Water Treatment

Provides advanced study on theory-of-treatment processes, including design and operation of municipal water supplies. Prereq., environmental engineering processes, graduate standing, or instructor consent required.

College of Engineering & Applied Science | Civil Engineering | Environmental

---

## CVEN-5525 (3) Analysis of Framed Structures

Same as CVEN 4525. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Civil Engineering | Structures

---

## CVEN-5534 (3) Wastewater Treatment

Offers an advanced analysis of wastewater treatment systems; design and operation of treatment process reactors; factors affecting performance of facilities used for physical separation; and chemical and biological conversion of wastewater compounds, including nitrogen and phosphorus. Prereq., graduate standing or instructor consent. Prerequisites: Restricted to Graduate Students only.

---

College of Engineering & Applied Science | Civil Engineering | Environmental

College of Engineering & Applied Science Civil Engineering Environmental

---

## CVEN-5537 (3) Numerical Methods in Civil Engineering

Prereq., graduate standing. Same as CVEN 4537. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science Civil Engineering Miscellaneous

---

## CVEN-5540 (3) Exterior Lighting Systems

Engages students in exploring and solving lighting problems for exterior environments. Provides an understanding of the design criteria and lighting equipment used in three primary exterior applications: parking lots and roadways, floodlighting of buildings, and sports facilities. Prereq., AREN 3540. Recommended prereqs., AREN 3140 and 4550. Same as AREN 4540. Taught intermittently.

College of Engineering & Applied Science Civil Engineering Building Systems

---

## CVEN-5544 (3) Solid Waste Management and Resource Recovery

Covers the scope of the nonhazardous solid waste problem and regulations that drive its management; discussions of nonengineering factors that impact waste management and recycling; design of incinerators, composting facilities, and landfills used to treat and dispose of solid waste. Recommended prereq., CVEN 3414.

College of Engineering & Applied Science Civil Engineering Environmental

---

## CVEN-5555 (3) Structural Reliability

Explores principles and methods of structural reliability, and formulates bases for design to insure adequate safety and performance of elements and structural systems. Prereq., CVEN 3535, 4525, or instructor consent.

College of Engineering & Applied Science Civil Engineering Structures

---

## CVEN-5565 (3) Life-Cycle Engineering of Civil Infrastructure Systems

Philosophical and analytical issues for lifetime design and operation of civil systems. Optimization tradeoffs of construction, management, and sustainability. Utility of operation and service, including present-value economic analysis. Decision-making alternatives of safety and performance, including hazards consideration. Recommended prereq., CVEN 3227 or equivalent.

College of Engineering & Applied Science Civil Engineering Structures

---

---

## CVEN-5575 (3) Advanced Topics in Steel Design

Covers steel structure design and analysis. Includes plate girders, moment connections for beams, design of multistory frames, and other topics determined by class interest. Prereq., CVEN 4545 or equivalent. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science   Civil Engineering   Structures

---

## CVEN-5585 (3) Advanced Topics in Reinforced Concrete Design

Covers design and analysis topics for prestressed concrete and/or reinforced concrete structures. Includes review of the current ACI design code, slabs, prestressed concrete, seismic design, folded plates and shells, finite element analysis, and other topics determined by class interest. Prereq., CVEN 4555 or equivalent.

College of Engineering & Applied Science   Civil Engineering   Structures

---

## CVEN-5628 (3) Seepage and Slopes

Covers fundamental principles of seepage in soils under both saturated and unsaturated conditions and limit equilibrium solution to slope stability problems. The seepage effects on slope stability are analyzed in detail and both conventional slope stability method and the finite element technique are applied to solving the engineering problems. Prereqs., CVEN 3708 and 3718 or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science   Civil Engineering   Geotechnical

---

## CVEN-5678 (3) Soil Improvement and Reinforcement

Provides students with principles and working knowledge of design and construction procedures in soil stabilization, retaining structures, geosynthetics, and soil reinforcement. Prereq., CVEN 3718 or instructor consent.

College of Engineering & Applied Science   Civil Engineering   Geotechnical

---

## CVEN-5688 (3) Environmental Geotechnics

Provides an understanding of the use of geotechnical concepts in the analysis and design of environmental systems. Focus is placed on the evaluation of waste containment facilities. Including relevant saturated, unsaturated, and multiphase flow mechanisms in cover and liner systems. Includes stability analyses for landfills and geosynthetic interface shear strength. Covers relevant aspects of mining geotechnics and remediation technologies of contaminated sites.

CVEN

## CVEN-5700 (3) Sustainability and the Built Environment

Same as CVEN 4700.

[College of Engineering & Applied Science](#) [Civil Engineering](#) [Building Systems](#)

## CVEN-5708 (3) Soil Mechanics

Offers an advanced course in principles of soil mechanics. Coverage includes topics in continuum mechanics; elasticity, viscoelasticity, and plasticity theories applied to soils; the effective stress principle; consolidation; shear strength; critical state concepts; and constitutive, numerical, and centrifuge modeling. Prereq., CVEN 3718. Prerequisites: Restricted to Graduate Students only.

[College of Engineering & Applied Science](#) [Civil Engineering](#) [Geotechnical](#)

## CVEN-5718 (3) Mechanics and Dynamics of Glaciers

Same as CVEN 4718.

[College of Engineering & Applied Science](#) [Civil Engineering](#) [Geotechnical](#)

## CVEN-5728 (3) Foundation Engineering

Same as CVEN 4728. Prerequisites: Restricted to Graduate Students only.

[College of Engineering & Applied Science](#) [Civil Engineering](#) [Geotechnical](#)

---

## CVEN-5738 (3) Applied Geotechnical Analysis

Studies applications of limiting equilibrium and limit plasticity analysis methods to stability problems in geotechnical engineering, such as slopes, lateral earth pressures on retaining structures, and bearing capacities of foundations. Also includes elastic and consolidation analysis of deformations in soil structures. Prereq., CVEN 5708 or instructor consent.

College of Engineering & Applied Science | Civil Engineering | Geotechnical

---

## CVEN-5748 (3) Design of Earth Structures

Covers theory, design, and construction of earth embankments and waste facilities, including isolation systems. Uses published data, field exploration, and laboratory tests on soils and rock in investigating foundations and construction materials. Involves principles of compaction and settlement, permeability analysis, landslide recognition and control, use of composite clay, and liner systems. Prereq., CVEN 5708 or instructor consent.

College of Engineering & Applied Science | Civil Engineering | Geotechnical

---

## CVEN-5758 (3) Flow Processes in Soils

Examines fundamental principles of flow through porous media and related engineering problems. Topics include the saturated seepage theory and flow nets; the unsaturated flow theory; suction-saturation and saturation-hydraulic conductivity relationships; nonlinear finite strain consolidation and desiccation theory; laboratory and field testing methods for determining material characteristics; and numerical models for flow-related engineering problems. Prereq., CVEN 3718 or instructor consent.

College of Engineering & Applied Science | Civil Engineering | Geotechnical

---

## CVEN-5768 (3) Introduction to Rock Mechanics

Nature of rocks and rock masses; engineering properties of rock and rock mass; rock mass classifications; planes of weakness; application of rock mechanics to design of rock slopes, underground excavations, and foundations. Prereqs., CVEN 3708 and 3718, or instructor consent.

College of Engineering & Applied Science | Civil Engineering | Geotechnical

---

## CVEN-5788 (3) Computational Modeling in Geotechnical Engineering

Introduces computational modeling for geotechnical engineering applications such as the Discrete Element Method (DEM) for granular materials, nonlinear Finite Element Analysis (FEA) of seepage, coupled soil elastoplastic consolidation, elastoplasticity models for soil and rock, and advanced computational methods for failure in soil and rock. Uses DEM, FEA, and other software programs for analysis. Prereq., CVEN 5708, or instructor consent.

---

---

College of Engineering & Applied Science | Civil Engineering | Geotechnical

---

## CVEN-5798 (3) Dynamics of Soils and Foundations

Examines the behavior of soils and foundations subjected to self-excited vibrations and earthquake ground motions. Looks at principles of wave propagation in geologic media; in situ and laboratory determination of engineering properties for dynamic analysis; and applications of these principles and properties in design and analysis of foundations and earth structures subjected to dynamic loading. Prereq., CVEN 5708 or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Civil Engineering | Geotechnical

---

## CVEN-5818 (3) Geotechnical Earthquake Engineering

Familiarizes students with the fundamentals of engineering seismology, soil and structural dynamics, and the modern practice of geotechnical earthquake engineering. Focuses on describing earthquake hazards and methods for seismic analysis and design. Recommended prereq., CVEN 5798. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Civil Engineering | Geotechnical

---

## CVEN-5822 (3) Geographical Information Systems for Civil and Environmental Systems

Same as CVEN 4822.

College of Engineering & Applied Science | Civil Engineering | Surveying and Transportation

---

## CVEN-5830 (3) Special Topics for Seniors/Grads

Prereq., instructor consent. May be repeated up to 9 total credit hours. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Civil Engineering | Building Systems

---

## CVEN-5834 (1-3) Special Topics

Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Civil Engineering | Environmental

---

## CVEN-5835 (3) Special Topics for Seniors/Grads

Supervised study of special topics of interest to students under instructor guidance. Prereq., instructor consent.

College of Engineering & Applied Science | Civil Engineering | Structures

---

## CVEN-5836 (1-3) Special Topics for Seniors/Grads

Supervised study of special topics of interest to students under instructor guidance. May be repeated up to 6 total credit hours. Prereq., Instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Civil Engineering | Construction

---

## CVEN-5837 (3) Special Topics for Seniors/Grads

Supervised study of special topics of interest to students under instructor guidance. Prereq., instructor consent.

College of Engineering & Applied Science | Civil Engineering | Miscellaneous

---

## CVEN-5849 (1-3) Independent Study

Available only through approval of graduate advisor. Subject arranged to fit needs of student. May be repeated up to 6 total credit hours.

College of Engineering & Applied Science | Civil Engineering | Special Topics

---

## CVEN-5919 (3) Sustainable Community Development 1

Focuses on the fundamental tools necessary to address sustainable community development projects in low-income communities (LICs). Topics include: human development, sustainable development, and presentation of an integrative and participatory framework for development projects in LICs. The framework consists of a combination of development and engineering project management tools. Framework is illustrated through case studies and student-driven team projects. Restricted to senior or graduate students. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Civil Engineering | Special Topics

---

## CVEN-5929 (3) Sustainable Community Development 2

Covers the principles, practices and strategies of appropriate technology as part of an integrated and systems approach to community-based development. Course content areas include technical issues in development, environmental health and communicable disease, appropriate and sustainable technologies with hands-on workshops, and global cooperation in development. Prereq., CVEN 5919. Restricted to seniors and graduate students.

College of Engineering & Applied Science | Civil Engineering | Special Topics

---

---

## CVEN-5939 (3) Sustainable Community Development Field Practicum

Provides a supervised in-field practicum experience in which the student applies theories and concepts learned in Sustainable Community Development I and II (CVEN 5919 and 5929). Prereqs., CVEN 5919 and 5929 or instructor consent. Restricted to students with EDC sub-plan. Prerequisites: Restricted to students with EDC Sub-Plan.

College of Engineering & Applied Science Civil Engineering Miscellaneous

---

## CVEN-6161 (3) Advanced Mechanics of Materials 2

Fundamentals of continuum mechanics, finite deformations, Lagrangian finite strains, Cauchy and Piola Kirchoff stress tensors, plasticity and thermo-elasticity, elements of damage mechanics, elements of fracture mechanics, rheological and viscoelastic theories, and modern experimental techniques. Recommended prereq., CVEN 5161.

College of Engineering & Applied Science Civil Engineering Mechanics

---

## CVEN-6323 (3) Urban Stormwater Infrastructure Systems

Evaluation and design of more sustainable urban stormwater infrastructure systems including street inlets, on-line and off-line surface storage and infiltration systems. Integrated design for major, minor, and micro storms to provide flood control and drainage as well as control of pollution from stormwater runoff. Simulation and optimization models will be used.

College of Engineering & Applied Science Civil Engineering Fluid Mechanics & Water Resour

---

## CVEN-6333 (3) Introduction to Multi-Scale Variability and Scaling in Hydrology

Provides a foundational physical understanding of channel networks, runoff, precipitation, and evapotranspiration at multiple spatial scales of drainage basins using modern analytical concepts for understanding non-linear phenomena, e.g., fractals, multifractals, statistical scaling, criticality, and renormalization. Prereq., CVEN 3313, 5333, 5454, and an upper-division course in probability, or equivalents.

College of Engineering & Applied Science Civil Engineering Fluid Mechanics & Water Resour

---

## CVEN-6383 (3) Flow and Transport through Porous Media

Studies basic physics of flow and transport of water, air, and other fluid mixtures through a porous medium. Course topics are relevant to applications in contaminant hydrology, contaminant transport in aquifers, hazardous waste management, geohydrology, soil physics, and geoenvironmental engineering.

College of Engineering & Applied Science Civil Engineering Fluid Mechanics & Water Resour

CVEN

## CVEN-6393 (1) Hydrologic Sciences and Water Resources Engineering Seminar

Provides a broad introduction to a variety of research topics from hydrologic sciences and water resources engineering. Offered as a one-hour weekly seminar by the departmental water faculty, graduate students, and external speakers. Restricted to graduate students in engineering. Prerequisites: Restricted to graduate student Civil Engineering (CVEN) students only.

[College of Engineering & Applied Science](#) [Civil Engineering](#) [Fluid Mechanics & Water Resour](#)

## CVEN-6404 (3) Advanced Aquatic Chemistry

Examines aquatic equilibria, corrosion, colloid and polymer chemistry, behavior of natural organic matter in engineered systems, and application of personal computers to model aquatic equilibria. Requires a term project. Prereq., CVEN 5402. Offered in the spring every other year. Prerequisites: Restricted to Graduate Students only.

[College of Engineering & Applied Science](#) [Civil Engineering](#) [Environmental](#)

## CVEN-6414 (3) Aquatic Surfaces and Particles

Examines the role of surfaces and particles in the fate and transport of contaminants in the aquatic environment. Emphasizes modeling of absorption, dissolution, precipitation, surface-catalyzed reactions, and coagulation and filtration kinetics. Prereqs., CVEN 5404 or GEOL 5280.

[College of Engineering & Applied Science](#) [Civil Engineering](#) [Environmental](#)

## CVEN-6511 (3) Nonlinear Finite Element Analysis of Solids and Porous

---

## Media

Explores fundamental principles of thermodynamics, including first and second law of thermodynamics, thermophysical properties, power and refrigeration cycles, gas mixtures and psychrometrics. Prereq., PHYS 1110. coreq., APPM1360.

College of Engineering & Applied Science | Civil Engineering | Mechanics

---

## CVEN-6525 (3) Nonlinear Analysis of Framed Structures

Motivated by Performance Based Engineering, this course provides students with the proper theoretical underpinnings of nonlinear static and dynamic analysis of framed structures along with, exposure to the corresponding programming techniques in Matlab. First part covers traditional topics related to plasticity; second part focuses on the finite element formulation ( with emphasis on flexibility based ones) for geometric and Material nonlinearities; nonlinear pushover and transient analysis of frame structures. Prereq., CVEN 4525/5525 or equivalent; proficiency in Matlab.

College of Engineering & Applied Science | Civil Engineering | Structures

---

## CVEN-6595 (3) Earthquake Engineering

Analyzes and designs structures for earthquake loadings. Gives attention to earthquake ground motions, attenuation laws, and seismic hazard analysis. Also involves numerical methods for time-domain and frequency-domain analysis, response of linear and nonlinear structures, elastic and inelastic response spectra, construction of design spectra, soil-structure interaction analysis, and seismic design methods and building code requirements. Prereq., CVEN 5111 or equivalent. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Civil Engineering | Structures

---

## CVEN-6834 (1-3) Special Topics

College of Engineering & Applied Science | Civil Engineering | Environmental

---

## CVEN-6940 (1) Master's Degree Candidate

College of Engineering & Applied Science | Civil Engineering | Building Systems

---

## CVEN-7111 (3) Advanced Structural Dynamics

Includes general vibrations of civil engineering structures and their response to various types of time-dependent loads. Prereq., CVEN 5111.

College of Engineering & Applied Science | Civil Engineering | Mechanics

---

---

---

## CVEN-7141 (3) Plates and Shells

Teaches mathematical theories of plate and shell structures and their applications. Involves numerical finite element solutions of plates and shells of various shapes under static and dynamic loadings. Prereq., CVEN 5121 or 7131.

College of Engineering & Applied Science | Civil Engineering | Mechanics

---

## CVEN-7161 (3) Fracture Mechanics

This course has three parts. The first covers fundamentals through rigorous mathematical formulations of linear and nonlinear elastic fracture mechanics. The second focuses on materials: theoretical strength, metals, granular materials, polymers, and steel. The third covers numerical (finite element) methods in fracture mechanics. Heavy emphasis is placed on project and independent work. Prereq., CVEN 5121.

College of Engineering & Applied Science | Civil Engineering | Mechanics

---

## CVEN-7206 (1) CEM PhD Seminar

Examines emerging research in construction engineering and management. Students will consider and comment on research methods and designs based on their own work and that of CU faculty and other leading researchers. Aims to make CEM Ph.D students better researchers and evaluators of research methods and processes.

College of Engineering & Applied Science | Civil Engineering | Construction

---

## CVEN-7511 (3) Computational Mechanics of Solids and Structures

Looks at finite element methodology for geometric and material nonlinearities. Involves incremental formulations and iterative solution strategies for truly finite increments and quasistatic and dynamic applications to large deformation and inelastic problems. Prereqs., CVEN 5511 or 6525.

College of Engineering & Applied Science | Civil Engineering | Mechanics

---

## CVEN-7545 (3) Structural Optimization

Studies fundamental propositions for the design of skeletal structures, automatic design of optimal structures, life-cycle cost design of deteriorating structures, problem-oriented computer languages, and linear and nonlinear programming methods for structural design. Prereq., CVEN 4525 or equivalent.

College of Engineering & Applied Science | Civil Engineering | Structures

---

---

## CVEN-7565 (3) Inelastic Theory of Structures

Examines inelastic behavior of materials, including calculation of ultimate capacity of perfectly plastic structures by use of upper- and lower-bound theorems. Looks at theories of inelastic action as applied to structural design in steel and concrete and elements of theory of plasticity with applications in ultimate analysis of plates, shells, and continuous bodies. Prereq., CVEN 3505.

College of Engineering & Applied Science | Civil Engineering | Structures

---

## CVEN-7595 (3) Earthquake Engineering

Analysis and design of structures for earthquake loadings. Earthquake ground motions, attenuation laws, and seismic hazard analysis. Numerical methods for time-domain and frequency-domain analysis response of linear and nonlinear structures. Elastic and inelastic response spectra, and construction of design spectra. Soil-structure interaction analysis. Seismic design methods and building code requirements. Prereq., CVEN 5111 or equivalent.

College of Engineering & Applied Science | Civil Engineering | Structures

---

## CVEN-7718 (3) Engineering Properties of Soils

Considers constitutive behavior of cohesive and cohesionless soils including stress-strain, strength, pore water pressure, and volume change behavior under drained and undrained loading conditions. Also includes linear and nonlinear analysis techniques and determination of constitutive properties in the laboratory. Prereq., CVEN 5708 or instructor consent.

College of Engineering & Applied Science | Civil Engineering | Geotechnical

---

## CVEN-7788 (3) Soil Behavior

Topics include soil mineralogy, formation of soils through sedimentary processes and weathering, determination of soil composition, soil water, colloidal phenomena in soils, fabric property relationships, analysis of mechanical behavior including compressibility, strength and deformation, and conduction phenomena in terms of physicochemical principles. Involves applications for stabilization and improvement of soils, and disposal of waste materials. Prereq., CVEN 3718 or instructor consent.

College of Engineering & Applied Science | Civil Engineering | Geotechnical

---

## CVEN-8990 (1-10) Doctoral Thesis

A minimum of 30 credit hours is required.

College of Engineering & Applied Science | Civil Engineering | Building Systems

---

## CWCV-2000 (3) The Western Tradition

Encourages a historical and critical investigation into the formative influences on what is often called Western culture, including religious, political, social and economic factors, and contemporary interpretations and critiques of these developments and concepts. Designed as the foundation course for the Center for Western Civilization. Approved for arts and sciences core curriculum: ideals and values.

DNCE

## DNCE-1000 (2) Beginning Technique

Introduces basic concepts and skills of various contemporary dance forms, such as Afro-modern, Release Technique, Limon-based modern, etc. Classwork develops muscle strength, flexibility, coordination, rhythm, and dynamic and spatial awareness. Lectures focus on various aspects of dance including history, composition, anatomy and criticism. Limited amount of written work is required. May be repeated up to 4 credit hours.

[College of Arts & Sciences](#) [Theater & Dance](#) [Nonmajor Technique](#)

## DNCE-1012 (2) Dance Production 1

Provides the dancer with an introduction to the types of performance venues available today, and their technical systems and equipment. It will also establish an awareness of how technical theatre design arts may be utilized by a choreographer. Restricted to dance majors. Credit not granted for this course and DNCE 2012. Prerequisites: Restricted to Dance (DNCE or DBFA) majors only.

[College of Arts & Sciences](#) [Theater & Dance](#) [Production](#)

## DNCE-1013 (2) Dance Improvisation

An opportunity for students to develop skills of dance improvisation through the exploration of structured movement problems. Students study selected contemporary dance artists whose work stresses improvisation in performance and/or as a training vehicle. Restricted to dance majors. Formerly DNCE 2013. Prerequisites: Restricted to Dance (DNCE or DBFA) majors only.

[College of Arts & Sciences](#) [Theater & Dance](#) [Creative Process](#)

## DNCE-1017 (3) Dance and Popular Culture

---

Explores and contextualizes contemporary popular culture and dance. Introduces methods of critical analysis that reveal the rich heritage hidden within and around the dances students commonly encounter at the club, on the street, on television, on the big screen and elsewhere in everyday life. Through watching, reading, and discussion, students discover new meaning in their lived cultural experience. Approved for arts and sciences core curriculum: literature and the arts.

College of Arts & Sciences Theater & Dance Dance and Cultural Studies

---

## DNCE-1020 (1) Beginning Modern Dance with Experience

Studio course that continues the work from the beginning level on basic concepts and skills in modern dance technique to increase strength, flexibility, and coordination. May be repeated up to 2 total credit hours. Prereq., DNCE 1000.

College of Arts & Sciences Theater & Dance Nonmajor Technique

---

## DNCE-1027 (3) Introduction to Dance and Culture

Explores dance's relationship to broad cultural realities such as food getting, sexuality, rites of passage, work, and religion. Topics are explored by looking at several different cultural groups and how their dance functions in relation to the specific topic. (For example, dance as a function of religion could be studied through explorations into Afro-Cuban orisha dances, Bharata Natyam, and Hopi Ghost dancing.) Formerly DNCE 1029. Approved for arts and sciences core curriculum: literature and the arts.

College of Arts & Sciences Theater & Dance Dance and Cultural Studies

---

## DNCE-1091 (1) Modern 1

Introduces basic skills of modern dance. In-class technique work increases muscle strength, flexibility, and coordination. Offered summers only at Perry-Mansfield Performing Arts Camp. May be repeated up to 2 total credit hours.

College of Arts & Sciences Theater & Dance Major Technique

---

## DNCE-1100 (1) Beginning Ballet

Ballet for beginners; no previous experience required. Stretching, basic barre, simple terre a terre, and jumping steps are learned, as well as alignment and basic extended positions such as arabesque and attitude. Mastery of simple enchainements and rhythmic patterns. May be repeated up to 2 total credit hours.

College of Arts & Sciences Theater & Dance Nonmajor Technique

---

## DNCE-1120 (1) Beginning Ballet with Experience

Extension of beginning ballet, when basic concepts of ballet have been mastered. Enchainements are of greater complication and variety. Dance vocabulary is more extensive. Pirouettes and more complex musical phrases are expected. May be repeated up to 2 total credit hours. Prereq., DNCE 1100.

College of Arts & Sciences Theater & Dance Nonmajor Technique

---

---

## DNCE-1190 (1) Ballet 1

Beginning ballet covering the basic vocabulary of classical ballet technique. Offered summers only at Perry-Mansfield Performing Arts Camp. May be repeated up to 2 total credit hours.

College of Arts & Sciences Theater & Dance Nonmajor Technique

---

---

## DNCE-1200 (1) Beginning Jazz Dance

Introduces various styles of movement unique to jazz dance. Students learn fundamental technical dance skills as well as specific jazz vocabulary. Designed for students with little or no dance experience. May be repeated up to 2 total credit hours.

College of Arts & Sciences Theater & Dance Nonmajor Technique

---

---

## DNCE-1220 (1) Beginning Jazz with Experience

Further develops work begun in Beginning Jazz. Exercises and jazz dance phrases are more complex. May be repeated up to 2 total credit hours. Prereq., DNCE 1200.

College of Arts & Sciences Theater & Dance Nonmajor Technique

---

---

## DNCE-1290 (1) Jazz 1

Introduces jazz dance, consisting of a technique warm-up, locomotion across the floor, and a series of dance phrases developed into a short dance combination. Offered summers only at Perry-Mansfield Performing Arts Camp. May be repeated up to 2 total credit hours.

College of Arts & Sciences Theater & Dance Nonmajor Technique

---

---

## DNCE-1849 (1-3) Independent Study

Involves creative or scholarly investigation of an area of interest to the student not addressed in the curriculum. Work must be arranged with and advised by a faculty member. Freshman level course. May be repeated up to 7 total credit hours. Same as DNCE 2849, 3849, 4849, 5849.

---

College of Arts & Sciences Theater & Dance Independent Study

---

## DNCE-1901 (1-3) Technique Practicum

Offers special courses in the technique series. Includes world dance and/or social dance forms. May be repeated up to 6 total credit hours.

---

College of Arts & Sciences Theater & Dance Major Technique

---

## DNCE-1908 (1) Performance Practicum

Students learn and perform a dance choreographed by a faculty member or graduate student for an informal and/or formal presentation. May be repeated up to 3 total credit hours. Prerequisites: Restricted to Dance (DNCE or DBFA) majors only.

---

College of Arts & Sciences Theater & Dance Performance

---

## DNCE-2005 (3) Movement Awareness and Injury Prevention for the Dancer

Helps dancers understand the prevention and care of common injuries associated with their art. Through various somatic methods, techniques, anatomy, and kinesiology, students learn to reduce tension, improve body usage, and enhance their performance. Prereqs., DNCE 2021, 3041, or 4061. Restricted to dance majors. Prerequisites: Restricted to Dance (DNCE or DBFA) majors only.

---

College of Arts & Sciences Theater & Dance Movement Analysis

---

## DNCE-2014 (2) Rhythmic Analysis and Accompaniment

Emphasizes elements of rhythm in relation to dance. Experiences with rhythmic drills, rhythmic notation, and percussion accompaniment for the modern dance class comprise the body of the course. Prereqs., DNCE 2021, 3041, or 4061. Restricted to dance majors. Prerequisites: Restricted to Dance (DNCE or DBFA) majors only.

---

College of Arts & Sciences Theater & Dance Music

---

## DNCE-2021 (2) Major Technique

Enrollment by audition only. May be repeated up to 16 total credit hours.

---

College of Arts & Sciences Theater & Dance Major Technique

---

## DNCE-2033 (3) Beginning Composition

Introduces the basic elements of dance composition through compositional studies evolved from readings, discussion, and improvisation.

Prereq., DNCE 1013 and DNCE 2021, 3041, or 4061. Restricted to dance majors. Prerequisites: Restricted to Dance (DNCE or DBFA) majors only.

College of Arts & Sciences Theater & Dance Creative Process

---

## DNCE-2091 (1) Modern 2

Continuation of Modern 1. a developmental sequence of modern dance technique designed to refine the technical/expressive skills required of the professional dancer. Offered summers only at Perry-Mansfield Performing Arts Camp. May be repeated up to 2 total credit hours.

College of Arts & Sciences Theater & Dance Major Technique

---

## DNCE-2098 (1) Performance/Repertory

Students learn and perform dances from the repertory of guest artists. Offered summers only. May be repeated up to 3 total credit hours.

College of Arts & Sciences Theater & Dance Performance

---

## DNCE-2101 (1) Pointe

Addresses the basic training for the art of dancing "Sur les pointes." Students will learn how to prepare technically, how to take care of the foot and ankle, and will be encouraged to address their personal alignment issues. An historical survey of the development of the pointe technique from the Romantic Age to the present will be discussed and students will be encouraged to attend local ballet performances and/or watch videos of works of both classical and contemporary ballets. May be repeated up to 4 total credit hours. Recommended prereqs., DNCE 3161 or DNCE 4181.

College of Arts & Sciences Theater & Dance Major Technique

---

## DNCE-2141 (1) Low Intermediate Ballet

All basic ballet steps should have been mastered, including pirouettes en d'hors and en dedans, knowledge of the principles and placement, and the ability to master simple enchainements. May be repeated up to 2 total credit hours. Prereq., DNCE 1120.

College of Arts & Sciences Theater & Dance Major Technique

---

## DNCE-2191 (1) Ballet 2

Intermediate ballet, covering the complete vocabulary of classical ballet technique. Enchainements are of complex structure. Offered summers only at Perry-Mansfield Performing Arts Camp. May be repeated up to 2 total credit hours.

DNCE

## DNCE-2290 (1) Jazz 2

Continuation of Jazz 1. Studies coordination, rhythm, style, and advanced body part isolation in depth. Offered summers only at Perry-Mansfield Performing Arts Camp. May be repeated up to 2 total credit hours.

[College of Arts & Sciences](#) [Theater & Dance](#) [Nonmajor Technique](#)

## DNCE-2501 (2) African Dance

Explores the technique, style, and rhythms of various African, Caribbean, and dance forms of the Americas. Music, history, anthropology, and folklore help to enhance the dance and provide a cultural experience. May be repeated up to 6 total credit hours within a term. Same as ETHN 2502.

[College of Arts & Sciences](#) [Theater & Dance](#) [Major Technique](#)

## DNCE-2701 (2) Contact Improvisation 1

Contact Improvisation is the practice of spontaneously generating movement guided by moment-to-moment physical contact and sharing of weight between two or more dancers. Fundamental skills of contact improvisation will be introduced; rolling, falling, giving and taking weight, use of momentum, and gravity. Skills are developed in both duets and larger groups. Similar to DNCE 4013.

[College of Arts & Sciences](#) [Theater & Dance](#) [Major Technique](#)

## DNCE-2849 (1-3) Independent Study

Same as DNCE 1849, at the sophomore level.

College of Arts & Sciences Theater & Dance Independent Study

---

---

## DNCE-2901 (1-3) Technique Practicum 2

Offers second level classes in the world dance forms technique series. Topics or forms of dance include world dance forms and/or social dance forms. May be repeated up to 6 total credit hours. Credit not granted for this course and DNCE 1901 or DNCE 3901.

College of Arts & Sciences Theater & Dance Major Technique

---

---

## DNCE-2909 (1-4) Special Topics

Explores topics and research in relation to areas such as technology, environment, teaching methods, performance, world dance, arts in society, and/or criticism that the normal sequence of offerings may not allow. May be repeated up to 7 total credit hours. Same as DNCE 4909 and 5909 at the sophomore level.

College of Arts & Sciences Theater & Dance Independent Study

---

---

## DNCE-3024 (2) Musical Resources for Dance

Surveys basic musical notation and terminology, elements and forms of music, and historical styles, supported by guided listening to representative works within western musical tradition. Special emphasis on 20th century techniques and on the relationship of various music to dance. Prereq., DNCE 2014. Restricted to dance majors. Prerequisites: Restricted to Dance (DBFA) majors only.

College of Arts & Sciences Theater & Dance Music

---

---

## DNCE-3040 (2) Intermediate/Advanced Modern Dance

See DNCE 1020. More in-depth study of modern dance concepts. Class technique work more advanced. May be repeated up to 4 total credit hours. Prereq., DNCE 1000 or 1020. Formerly DNCE 2040.

College of Arts & Sciences Theater & Dance Nonmajor Technique

---

---

## DNCE-3041 (2) Major Technique

Designed for dance majors. Enrollment by audition only. May be repeated up to 16 total credit hours.

College of Arts & Sciences Theater & Dance Major Technique

---

---

---

## DNCE-3043 (3) Intermediate Dance Composition

Opportunity for students to increase knowledge and understanding of dance composition elements as they relate to group forms, theme, development, and phrase manipulation. Prereqs., DNCE 2033 and DNCE 2021, 3041 or 4061. Restricted to dance majors. Prerequisites: Restricted to Dance (DNCE or DBFA) majors only.

College of Arts & Sciences Theater & Dance Creative Process

---

## DNCE-3101 (1-3) Ballet Practicum

Practical studio training in ballet at the advanced/professional level with a professional company. May be repeated up to 4 total credit hours. Prereq., DNCE 2141, 3161, or 4181. Designed for dance majors. Enrollment by audition only.

College of Arts & Sciences Theater & Dance Major Technique

---

## DNCE-3161 (1) Intermediate Ballet

Covers the general vocabulary of classical ballet technique and enchainements of medium complexity. Multiple pirouettes in all positions are required. Audition required. May be repeated up to 8 total credit hours.

College of Arts & Sciences Theater & Dance Major Technique

---

## DNCE-3241 (1) Intermediate Jazz

Designed for the experienced jazz dancer. Includes dance techniques that further improve alignment, strength, flexibility, and coordination within the jazz idiom. Greater emphasis on style and rhythm and challenging dance combinations. May be repeated up to 2 total credit hours. Prereqs., DNCE 1200 and 1220. Formerly DNCE 2241.

College of Arts & Sciences Theater & Dance Major Technique

---

## DNCE-3601 (2) Alexander Technique for Actors and Dancers

The Alexander Technique is a method for changing habits that impede the performance of movement and speech. Through class discussions, movement exploration, and individualized hands-on lessons, actors and dancers gain understanding of the technique and its benefits to performance. Restricted to theatre and dance majors. Prerequisites: Restricted to Dance (DNCE or DBFA) or Theatre (THTR or TBFA) majors only.

College of Arts & Sciences Theater & Dance Major Technique

---

---

## DNCE-3801 (2) Major Technique: Multiple Accompanists

Designed for dance majors. Encompasses range of dance forms that require multiple accompanists. Enrollment by audition only. May be repeated up to 16 total credit hours.

College of Arts & Sciences Theater & Dance Major Technique

---

## DNCE-3849 (1-3) Independent Study

Same as DNCE 1849, at the junior level.

College of Arts & Sciences Theater & Dance Independent Study

---

## DNCE-3901 (1-3) Technique Practicum

Offers special courses in the technique series. Topics or forms of dance will include world dance forms and/or social dance forms. May be repeated up to 6 total credit hours. Instructor consent required. Credit not granted for this course and DNCE 1901 or DNCE 2901.

College of Arts & Sciences Theater & Dance Major Technique

---

## DNCE-4012 (1) Concert Production

Provides practical experience in producing formal and informal dance concerts. Introduces basic familiarity with production and promotional responsibilities, backstage and front-of-house duties and procedures. Prereq., DNCE 1012 or equivalent. Restricted to DNCE and DBFA majors. Same as DNCE 5012. Prerequisites: Restricted to Dance (DNCE or DBFA) majors only.

College of Arts & Sciences Theater & Dance Major Technique

---

## DNCE-4015 (3) Movement Analysis

Introduces Rudolf Laban's theories of movement and exposes several body therapies to heighten students' awareness of movement as a multifaceted (neuromuscular/spatial/dynamic) event. Emphasizes refinement of movement, observation skills, and improvement of performance. Prereq., DNCE 2005. Restricted to dance majors. Same as DNCE 5015.

College of Arts & Sciences Theater & Dance Movement Analysis

---

## DNCE-4016 (3) Creative Dance for Children

Methods course for prospective teachers of creative dance for children. Lectures, readings, and laboratory experiences are followed by observation and teaching in primary grades. Prereqs., DNCE 1013 and 2033. Restricted to dance majors. Same as DNCE 5016. Prerequisites: Restricted to Dance (DNCE or DBFA) majors only.

---

---

College of Arts & Sciences Theater & Dance Pedagogy

---

## DNCE-4017 (3) History and Philosophy of Dance

Follows the specific history and narrative of some dance forms (including African, Ballet, Flamenco, Hip Hop, Jazz, and Modern) and traces their development over time. Gives attention to the effect of social, political, economic, and environmental conditions as well as the influence of other dance forms and the impact of specific dance artists and teachers. Restricted to juniors and seniors. Same as DNCE 5017. Approved for arts and sciences core curriculum: literature and the arts. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

College of Arts & Sciences Theater & Dance Dance and Cultural Studies

---

## DNCE-4023 (2) Performance Improvisation Techniques

Explores movement and vocal improvisational techniques to enhance creative and performance skills. Helps individuals discover and make accessible the diversity of the human instrument and develops practical tools to broaden expressive range. Same as DNCE 5023. Formerly DNCE 4018.

College of Arts & Sciences Theater & Dance Creative Process

---

## DNCE-4036 (3) Methods of Teaching Dance

Practical experience in teaching modern dance to the young adult follows theoretical grounding in specific teaching methods. Examines values and goals of dance in education and fundamental movement principles as related to the teaching of technique and improvisation. Prereqs., DNCE 1013 and 2033. Restricted to dance majors. Same as DNCE 5036. Prerequisites: Restricted to Dance (DNCE or DBFA) majors only.

College of Arts & Sciences Theater & Dance Pedagogy

---

## DNCE-4037 (3) Looking at Dance

Focuses on the development of perceptual, descriptive, and analytical skills as well as the ability to apply cultural and critical theory to 20th and 21st century concert dance. Specific pieces of choreography are looked at from a broad range of perspectives. Formerly DNCE 3027. Approved for arts and sciences core curriculum: literature and the arts. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

College of Arts & Sciences Theater & Dance Dance and Cultural Studies

---

## DNCE-4038 (1-3) Dance Repertory

Learning and performing dances from the repertory of current faculty members, artists-in-residence, and upon occasion from the repertory of historic modern dancers. Dance majors may repeat up to 9 total credit hours with different instructors. Enrollment by audition only. Same as DNCE 5038.

DNCE

### DNCE-4053 (3) Advanced Dance Composition

In-depth approach to composition emphasizing personal invention, solo and group forms; styles based on historical art forms; exploration of the evaluative process. Prereqs., DNCE 3043 and DNCE 2021, 3041, or 4061. Restricted to dance majors. Same as DNCE 5053.

Prerequisites: Restricted to Dance (DNCE or DBFA) majors only.

[College of Arts & Sciences](#) [Theater & Dance](#) [Creative Process](#)

### DNCE-4061 (2) Major Technique

Designed for dance majors. Enrollment by audition only. May be repeated up to 16 total credit hours.

[College of Arts & Sciences](#) [Theater & Dance](#) [Major Technique](#)

### DNCE-4128 (1) Pointe and Variation

For the more advanced classical ballet student. Entails working on pointe and learning dances from Classical, Romantic, and Neo-Classical ballets. Enrollment by audition only. May be repeated up to 2 total credit hours. Same as DNCE 5128.

[College of Arts & Sciences](#) [Theater & Dance](#) [Performance](#)

### DNCE-4181 (1) Advanced Ballet

Advanced professional-level classical ballet, covering the complete vocabulary. Enchainements are of complex structure. Audition is required. May be repeated up to 8 total credit hours.

---

College of Arts & Sciences	Theater & Dance	Major Technique
----------------------------	-----------------	-----------------

---

## DNCE-4261 (1) Advanced Jazz Dance Technique

Opportunity for advanced dancers who want to expand their technical skills in the jazz form. Each class includes a standing warm up, floor work for strength and flexibility, adagio combination for line and balance, and a locomotor combination for turns, leaps, rhythm, and fast footwork. Emphasis is placed on technique, musicality, style, and performance. May be repeated up to 4 total credit hours. Same as DNCE 5261.

---

College of Arts & Sciences	Theater & Dance	Major Technique
----------------------------	-----------------	-----------------

---

## DNCE-4701 (2) Contact Improvisation 2

Build upon skills introduced in Beginning Contact Improvisation as we explore the creative possibilities of interacting with the weight of a partner. Emphasis will be placed upon ease and efficiency in partnering, and integrating this work into choreography and performance. Prereq., DNCE 2701. Same as DNCE 5701.

---

College of Arts & Sciences	Theater & Dance	Major Technique
----------------------------	-----------------	-----------------

---

## DNCE-4849 (1-3) Independent Study

Same as DNCE 1849, at the senior level.

---

College of Arts & Sciences	Theater & Dance	Independent Study
----------------------------	-----------------	-------------------

---

## DNCE-4909 (1-4) Special Topics

Same as DNCE 2909 and 5909.

---

College of Arts & Sciences	Theater & Dance	Independent Study
----------------------------	-----------------	-------------------

---

## DNCE-4919 (1-3) Dance Practicum

Project in dance under supervision of senior faculty. May be repeated up to 6 total credit hours. Same as DNCE 5919.

---

College of Arts & Sciences	Theater & Dance	Independent Study
----------------------------	-----------------	-------------------

---

---

## DNCE-4939 (1-3) Dance Internship

Provides an opportunity for upper-division dance majors to serve apprenticeships in the community in work areas related to their major interests and career goals. Internships are available in areas such as arts administration, dance therapy, and technical production. Prereqs., 30 credit hours in dance.

College of Arts & Sciences Theater & Dance Independent Study

---

---

## DNCE-5001 (2) Graduate Technique

Open only to graduate dance majors. May be repeated up to 12 total credit hours. Restricted to graduate students. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Theater & Dance Major Technique

---

---

## DNCE-5012 (1) Concert Production

Same as DNCE 4012.

College of Arts & Sciences Theater & Dance Production

---

---

## DNCE-5015 (3) Movement Analysis

Restricted to graduate students. Same as DNCE 4015. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Theater & Dance Movement Analysis

---

---

## DNCE-5016 (3) Creative Dance for Children

Restricted to graduate students. Same as DNCE 4016 with addition of readings and a paper. Prerequisites: Restricted to Dance graduate students only.

College of Arts & Sciences Theater & Dance Pedagogy

---

---

## DNCE-5017 (3) History and Philosophy of Dance

Restricted to graduate students. Same as DNCE 4017 with addition of graduate papers and/or a project. Prerequisites: Restricted to Dance graduate students only.

College of Arts & Sciences Theater & Dance Dance and Cultural Studies

---

---

---

## DNCE-5023 (2) Performance Improvisation Techniques

Restricted to graduate students. Same as DNCE 4023 with the addition of written analysis and creative assignments. Formerly DNCE 5018. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Theater & Dance Creative Process

---

## DNCE-5036 (3) Methods of Teaching Dance

Restricted to graduate students in dance. Same as DNCE 4036 with addition of readings and a paper. Prerequisites: Restricted to Dance graduate students only.

College of Arts & Sciences Theater & Dance Pedagogy

---

## DNCE-5038 (1-3) Dance Repertory

Same as DNCE 4038 except graduate students are required to keep a log of the learning process involved in repertory to document and analyze each work in terms of stylistic differences, musical/sound accompaniment and trends. Dance majors may repeat up to 9 total credit hours with different instructors. Enrollment by audition only. Restricted to graduate students. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Theater & Dance Performance

---

## DNCE-5048 (1-4) Touring Dance Ensemble

May be repeated up to 8 total credit hours. Prerequisites: Restricted to Dance graduate students only.

College of Arts & Sciences Theater & Dance Performance

---

## DNCE-5052 (1-3) Studio Concert

Restricted to dance majors with 87 credit hours or more. Prerequisites: Restricted to Dance graduate students only.

College of Arts & Sciences Theater & Dance Production

---

## DNCE-5053 (3) Advanced Dance Composition

Same as DNCE 4053. Prerequisites: Restricted to Dance graduate students only.

College of Arts & Sciences Theater & Dance Creative Process

---

## DNCE-5056 (2) Graduate Teaching Seminar

Examines practical and philosophical issues in dance education. The goals and content of professional and recreational dance training

are considered and strategies for effective teaching practice are discussed. Opportunity for practical application of theoretical material is provided. Restricted to graduate students. Prerequisites: Restricted to Graduate Students only.

[College of Arts & Sciences](#) [Theater & Dance](#) [Pedagogy](#)

## DNCE-5064 (3) Music and Dance Seminar: Collaboration

Investigates selected aspects of rhythm, accompaniment, and musical resources for dance and applications to performance, choreography, and teaching. Topics may include movement analysis and rhythmic clarity, self-accompaniment, working with accompanist/composers, relationship of music to dance, and survey of 20th century compositional techniques. Prereq., dance/music experience, or instructor consent. Restricted to graduate students in dance. Prerequisites: Restricted to Dance graduate students only.

[College of Arts & Sciences](#) [Theater & Dance](#) [Music](#)

## DNCE-5101 (1) Intermediate Graduate Ballet

Open only to graduate dance majors. May be repeated up to 6 total credit hours. Restricted to graduate students. Prerequisites: Restricted to Graduate Students only.

[College of Arts & Sciences](#) [Theater & Dance](#) [Major Technique](#)

## DNCE-5128 (1) Pointe and Variation

By audition only. Students should have previous experience. Restricted to graduate students. May be repeated up to 2 total credit hours. Same as DNCE 4128.

DNCE

### DNCE-5261 (1) Advanced Jazz Dance Technique

Same as DNCE 4261. Prerequisites: Restricted to Graduate Students only.

[College of Arts & Sciences](#) [Theater & Dance](#) [Major Technique](#)

### DNCE-5601 (2) Alexander Technique for Graduate Students

Learn the principles of the Alexander Technique through class discussions, movement exploration, and individualized hands-on-lessons. Discover how to improve their overall functioning and learn to apply the technique to performance and teaching. Prerequisites: Restricted to Dance (DNCE-MFA) or Theatre (THTR or TBFA) graduate students only.

[College of Arts & Sciences](#) [Theater & Dance](#) [Major Technique](#)

### DNCE-5701 (2) Contact Improvisation 2

Same as DNCE 4701.

[College of Arts & Sciences](#) [Theater & Dance](#) [Major Technique](#)

### DNCE-5801 (2) Grad Technque: Multiple Accompanists

Open only to graduate dance majors. Encompasses range of dance forms that require multiple accompanists. May be repeated up to 12 total units. Restricted to graduate students. Prerequisites: Restricted to Graduate Students only.

[College of Arts & Sciences](#) [Theater & Dance](#) [Major Technique](#)

---

## DNCE-5849 (1-3) Independent Study

Same as DNCE 1849 and DNCE 6849, at the graduate level.

College of Arts & Sciences Theater & Dance Independent Study

---

## DNCE-5901 (1-3) Graduate Technique Practicum

Offers special topics and styles in the graduate technique curriculum. Rotating foci include a variety of traditional dance forms from around the world as well as vernacular, recreational, and social dance phenomena indigenous to the U.S. Course meets simultaneously with an undergraduate studio course, and includes both the practical movement experience and scholarly study of specially-chosen issues in dance. May be repeated up to 6 total credit hours. Prerequisites: Restricted to Dance graduate students only.

College of Arts & Sciences Theater & Dance Major Technique

---

## DNCE-5909 (1-4) Special Topics

Same as DNCE 2909 and 4909. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Theater & Dance Independent Study

---

## DNCE-5919 (1-3) Dance Practicum

Project in dance under supervision of senior faculty. May be repeated up to 6 total credit hours. Same as DNCE 4919. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Theater & Dance Independent Study

---

## DNCE-6009 (1) Research Strategies and Techniques

Restricted to graduate students. Same as THTR 6009. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Theater & Dance Independent Study

---

## DNCE-6016 (2) Teaching Lab: Modern Dance

Provides opportunity to apply principles and skills introduced in DNCE 5036. Participating students share the responsibility for teaching a lab class that meets twice a week. Focuses on analysis and evaluation of teaching skills. Restricted to graduate students.

College of Arts & Sciences Theater & Dance Pedagogy

---

---

## DNCE-6017 (3) Readings in Dance

Surveys dance literature including an opportunity for graduate students to familiarize themselves with resources, current publications, theoretical materials, and professional organizations in dance. Restricted to graduate students in dance. Formerly DNCE 6019.

Prerequisites: Restricted to Dance graduate students only.

College of Arts & Sciences Theater & Dance Dance and Cultural Studies

---

## DNCE-6047 (3) Seminar: Dance

Intensive study of selected topics related to the art of dance, dance criticism, dance aesthetics, and dance in relationship to historical, social, and cultural environments with an emphasis on contemporary American forms and their roots. Restricted to graduate students in dance.

College of Arts & Sciences Theater & Dance Dance and Cultural Studies

---

## DNCE-6056 (2) Professional Development

Examines current trends, issues, and problems of dance at colleges, in secondary education, in the community, and in professional dance. Explores curriculum development and educational dance trends along with other topics such as freelance work, grant writing, and dance advocacy. Restricted to graduate students in dance. Prerequisites: Restricted to Dance graduate students only.

College of Arts & Sciences Theater & Dance Pedagogy

---

## DNCE-6073 (3) Choreography

Covers in-depth practical and theoretical approaches to dance composition for graduate students; solo and group forms; and analysis of historical and contemporary dance works. May be repeated up to 6 total credit hours with different instructors. Restricted to graduate students in dance.

College of Arts & Sciences Theater & Dance Creative Process

---

## DNCE-6101 (1) Advanced Graduate Ballet

Open only to graduate dance majors. May be repeated up to 6 total credit hours. Restricted to graduate students.

College of Arts & Sciences Theater & Dance Major Technique

---

## DNCE-6849 (1-3) Independent Study

Involves creative or scholarly investigation of an area of interest to the student not addressed in the curriculum. Work must be arranged

with and advised by a faculty member. Graduate level course. Same as DNCE 5849.

College of Arts & Sciences Theater & Dance Independent Study

## DNCE-6919 (1-3) Directed Studies

Explores advanced topics in dance not regularly covered in the curriculum of the graduate program. May be repeated up to 6 total credit hours. Restricted to graduate students.

College of Arts & Sciences Theater & Dance Independent Study

## DNCE-6949 (1) Candidate for Degree

Prerequisites: Restricted to Dance graduate students only.

College of Arts & Sciences Theater & Dance Independent Study

## DNCE-6959 (1-6) Master's Thesis

Prerequisites: Restricted to Dance graduate students only.

College of Arts & Sciences Theater & Dance Independent Study

## DNCE-6969 (3-6) The Graduate Project

Provides the opportunity for synthesizing the graduate experience through the execution of a project related to the student's major area of interest. Project must be approved by the graduate faculty advisor. Prerequisites: Restricted to Dance graduate students only.

EALC

## EALC-4911 (3) Practicum in Asian Languages 1

Introduces elementary or intermediate East Asian language, culture, and language pedagogy. Prereq., department approval.

[College of Arts & Sciences](#) [East Asian Languages & Civilizations](#)

## EALC-4912 (3) Practicum in Asian Languages 2

Introduces elementary or intermediate East Asian language, culture, and language pedagogy. Prereq., department approval.

[College of Arts & Sciences](#) [East Asian Languages & Civilizations](#)

## EALC-4913 (3) Practicum in Asian Languages 3

Introduces elementary or intermediate East Asian language, culture, and language pedagogy. Prereq., department approval.

[College of Arts & Sciences](#) [East Asian Languages & Civilizations](#)

## EALC-4914 (3) Practicum in Asian Languages 4

Introduces elementary or intermediate East Asian language, culture, and language pedagogy. Prereq., department approval.

[College of Arts & Sciences](#) [East Asian Languages & Civilizations](#)

---

## EALC-4930 (1-6) Internship

Selected students are matched with supervised internships in business, public and private service organizations, and educational institutions. Internships focus on opportunities to apply language and cultural skills. Students meet regularly with instructor and supervisor, keep a journal, and submit a final paper. May be repeated up to 6 total credit hours. Prereq., JPNS 2120 or CHIN 2120. Recommended prereq., JPNS 3120 or CHIN 3120.

EBIO

## EBIO-1030 (3) Biology: A Human Approach 1

Lect. Studies the principles of biology and their implications. Central theme is humans and the environment, emphasizing ecology, natural resource conservation, and the interrelatedness of a growing human population. Recommended for nonscience majors. Meets Maps requirement for natural science: non-lab. Approved for arts and sciences core curriculum: natural science.

[College of Arts & Sciences](#) [Ecology & Evolutionary Biology](#)

## EBIO-1040 (3) Biology: A Human Approach 2

Lect. Continues EBIO 1030, focusing on the function of the human body, and maintenance of dynamic equilibrium in the internal environment in the face of a continually changing external environment. Discusses factors influencing these homeostatic conditions and how and why they change. Recommended for nonscience majors. Prereq., EBIO 1030. Approved for arts and sciences core curriculum: natural science.

[College of Arts & Sciences](#) [Ecology & Evolutionary Biology](#)

## EBIO-1050 (1) Biology: A Human Approach Laboratory

One two-hour lab per week. Provides experiments and exercises relating to concepts presented in EBIO 1030 and 1040. Biology: a Human Approach 1 and 2. This course uses animals and/or animal tissues. Recommended for nonscience majors. When taken with EBIO 1030, meets Maps requirement for natural science: lab. Approved for arts and sciences core curriculum: natural science.

[College of Arts & Sciences](#) [Ecology & Evolutionary Biology](#)

---

## EBIO-1210 (3) General Biology 1

Lect. Provides a concentrated introduction to molecular, cellular, genetic, and evolutionary biology. Emphasizes fundamental principles, concepts, facts, and questions. Intended for science majors. Credit not granted for this course and EPOB 2060,2660 or KAPH 2060. Meets Maps requirement for natural science. Approved for arts and sciences core curriculum: natural science.

College of Arts & Sciences Ecology & Evolutionary Biology

---

---

## EBIO-1220 (3) General Biology 2

Provides a concentrated introduction to organisms, homeostasis, development, behavior, and ecology. Emphasizes fundamental principles, concepts, facts, and questions. Intended for science majors. Prereq., EBIO 1210 or equivalent. Credit not granted for this course and EPOB 2050 or 2650. Approved for arts and sciences core curriculum: natural science.

College of Arts & Sciences Ecology & Evolutionary Biology

---

---

## EBIO-1230 (1) General Biology Laboratory 1

One 3-hour lab per week. Consists of experiments and exercises to provide an extension of basic concepts and scientific approaches presented in General Biology 1. Intended for science majors. Prereq. or coreq., EBIO 1210. Credit not granted for this course and EPOB 2060, 2660 or KAPH 2060. Meets Maps requirement for natural science. Approved for arts and sciences core curriculum: natural science.

College of Arts & Sciences Ecology & Evolutionary Biology

---

---

## EBIO-1240 (1) General Biology Laboratory 2

One 3-hour lab per week. Consists of experiments and exercises to provide an extension of basic concepts and scientific approaches presented in General Biology 2. Intended for science majors. Prereq. or coreq., EBIO 1220 or equivalent. Credit not granted for this course and EPOB 2050 or 2650. Approved for arts and sciences core curriculum: natural science.

College of Arts & Sciences Ecology & Evolutionary Biology

---

---

## EBIO-1300 (1-3) Topics in Biological Sciences

Covers special topics in biology for freshmen or nonmajors. Introduces scientific methods and principles in biology, as well as issues of current interest in biology. Does not count toward the major in EBIO.

College of Arts & Sciences Ecology & Evolutionary Biology

---

---

---

## EBIO-1840 (1-6) Independent Study (Freshman)

May be repeated up to 6 total credit hours.

College of Arts & Sciences Ecology & Evolutionary Biology

---

## EBIO-1950 (3) Introduction to Scientific and Academic Writing

Introduces students to academic writing and the associated discipline-specific conventions, styles, and qualities that are part of this type of writing. Classes lead students to think rhetorically, to understand the process of composing written text, to employ a variety of writing strategies, to conduct research, and to interpret, critique, summarize, and paraphrase scholarly texts. Approved for arts and sciences core curriculum: written communication.

College of Arts & Sciences Ecology & Evolutionary Biology

---

## EBIO-2010 (1-3) Environmental Issues and Biology

Lect. Describes how the natural environment is currently stressed by a variety of human actions. Examines the nature of these environmental problems and their impact on living organisms, both human and nonhuman species.

College of Arts & Sciences Ecology & Evolutionary Biology

---

## EBIO-2040 (4) Principles of Ecology

Lect. and lab. Introduces principles of ecology, emphasizing patterns and processes at various levels of biological organization. Scope global, but examples often from local environment. Laboratory emphasizes techniques of field biology. Uses animals and/or animal tissues. Prereqs., EBIO 1030, 1040, and 1050, or EBIO 1210, 1220, 1230, and 1240. Credit not granted for this course and EPOB 2050 or EPOB 2650 or EPOB 3020 or EBIO 2640.

College of Arts & Sciences Ecology & Evolutionary Biology

---

## EBIO-2070 (4) Genetics: Molecules to Populations

Lect. and rec. Covers principles of genetics and developmental biology at levels of molecules, cellular organelles, individuals, and populations; asexual and sexual life cycles; and heredity. Recitations allow discussion of genetics problems and implications of genetic principles, and provide demonstrations and simulations of genetic processes. Intended for sophomore majors in EBIO. Prereqs., EBIO 1210, 1220, 1230, and 1240, or EPOB 2050 and 2060. Credit not granted for this course and EBIO 2670.

College of Arts & Sciences Ecology & Evolutionary Biology

---

## EBIO-2590 (3) Plants and Society

Acquaints students with the plants that are both essential and desirable to human survival, well-being, and quality of life. Topics include plants and world cultures, food plants, commercial products (beverages, extracts, herbs, and spices, etc.), cosmetics, textiles, wood products, medicinal plants, psychoactive plants, poisonous plants, plants used in horticulture and landscape architecture, wood products, musical instruments, etc.

College of Arts & Sciences Ecology & Evolutionary Biology

---

---

## EBIO-2640 (5) Honors Principles of Ecology

Lect., lab, and rec. Introduces principles of ecology, emphasizing patterns and processes at various levels of biological organization. Scope global, but examples often from local environment. Lab emphasizes techniques of field biology. Uses animals and/or animal tissues. Prereqs., EBIO 1210, 1220, 1230, and 1240; or 1030, 1040, and 1050. Credit not granted for this course and EPOB 2050 or 2650 or 3020 or EBIO 2040.

College of Arts & Sciences Ecology & Evolutionary Biology

---

---

## EBIO-2840 (1-6) Independent Study (Sophomore)

May be repeated up to 6 total credit hours.

College of Arts & Sciences Ecology & Evolutionary Biology

---

---

## EBIO-3010 (1-2) Teaching Biology

Provides an opportunity to assist in teaching of specific laboratory section in EBIO under direct faculty supervision. Students must make arrangements with the faculty member responsible for the course in which they plan to assist. May be repeated up to 4 total credit hours. Formerly EPOB 3010.

College of Arts & Sciences Ecology & Evolutionary Biology

---

---

## EBIO-3040 (4) Conservation Biology

Applies principles of population ecology, population genetics, biogeography, animal behavior, and paleobiology to the maintenance of biodiversity and natural systems. The resulting theory is then applied to conservation policy and management techniques. Prereq., EBIO 2040 or 2640. Same as ENVS 3040.

College of Arts & Sciences Ecology & Evolutionary Biology

---

---

---

## EBIO-3080 (4) Evolutionary Biology

Lect. and lab. Emphasizes the fundamental evolutionary concepts that provide explanations for the diversification of life on Earth. Specific topics include the evidence for evolution, adaptation by natural selection, speciation, systematics, molecular and genome evolution, and macroevolutionary patterns and processes. Recitations allow students to explore specific topics in more depth and smaller groups.

Prereq., EBIO 1210 and 1220 or equivalent. Credit not granted for this course and EBIO 3680 or EPOB 2080 or 2680.

College of Arts & Sciences Ecology & Evolutionary Biology

---

## EBIO-3110 (3) Population and Community Ecology

Presents principles of ecology that relate to the niche, population growth, metapopulations, population interactions (within and between trophic levels), community structure and development, landscape ecology and species diversity. Prereq., EBIO 2040 or 2640 or equivalent.

College of Arts & Sciences Ecology & Evolutionary Biology

---

## EBIO-3170 (3-4) Arctic and Alpine Ecology

Lect. and field trips. Focuses on the biology of arctic and alpine environments, limiting physical factors (such as geomorphology and climatic history), and human interaction with cold-stressed environments, especially the arctic. Prereqs., EBIO 1210 and 1220, or EPOB 2050 and 2060.

College of Arts & Sciences Ecology & Evolutionary Biology

---

## EBIO-3175 (1) Arctic and Alpine Ecology Lab

Examines alpine ecosystems and treeline relative to global change. Weekend (one-day) field trips into the Rocky Mountains, visits to Denver Museum of Nature and Science, and to CU herbarium/plant lab for experiential learning connected to EBIO 3170. Coreq., EBIO 3170. Formerly EPOB 3175. Pass/fail only.

College of Arts & Sciences Ecology & Evolutionary Biology

---

## EBIO-3180 (3) Global Ecology

Lect. Involves study of ecological principles and problems at the biosphere level. Presents a worldwide approach to populations, biotic resources, ecologic interactions, land use, deforestation, desertification, species extinctions, pollution, environmental quality, global change, and environmental ethics. Prereqs., EBIO 1210 and 1220 or equivalent. Approved for arts and sciences core curriculum: natural science.

College of Arts & Sciences Ecology & Evolutionary Biology

---

## EBIO-3190 (3) Tropical Marine Ecology

Lect. Examines the biology and ecology of marine ecosystems, emphasizing those occurring in tropical regions such as coral reefs. Studies how these ecosystems are changing and the future impact of human stress on the marine environment. Prereqs., EBIO 1210, 1220, 1230, and 1240, or EPOB 2050 and 2060. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

[College of Arts & Sciences](#) [Ecology & Evolutionary Biology](#)

## EBIO-3240 (4) Animal Behavior

Lect. and lab. Topics include basic concepts and history, methods of study, ethical issues, neurobiology, behavior, the development of behavior, predator-prey relationships, communication, aggression and dominance, mating systems, cognitive ethology, and parental care. When possible, life-history strategies, the evolution of behavior, and behavioral ecology are stressed. Uses animals and animal tissues. Prereqs., EBIO 1210, 1220, 1230, and 1240, or EPOB 2050 and 2060. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

EBIO

## EBIO-3270 (3) Ecosystem Ecology

Integrates information from physics (e.g., energetics), chemistry (the behavior of basic elements), and biology (evolutionary traits of species, multiple photosynthetic pathways, etc.) to understand the structure and functioning of ecosystems. Provides the background and necessary information to understand controls on photosynthesis, decomposition, and nutrient cycling across diverse terrestrial and aquatic landscapes. Prereqs., EBIO 1210, 1220, 1230, 1240, and 2040, or EPOB 2050 and 2060, or EBIO 3020.

[College of Arts & Sciences](#) [Ecology & Evolutionary Biology](#)

## EBIO-3400 (4) Microbiology

Lect. and lab. Surveys distinguishing characteristics of microorganisms based on structural-functional relationships, taxonomy, growth, and physical-chemical agents of control including antibiotics, metabolism, and genetics. Introduces applied microbiology emphasizing infectious diseases, basic concepts of immunology, and microbial ecology. Uses animals and/or animal tissues. Prereqs., EBIO 1210, 1220, 1230, and 1240, or EPOB 2050 and 2060.

[College of Arts & Sciences](#) [Ecology & Evolutionary Biology](#)

## EBIO-3630 (4) Parasitology

Lect. and lab. Surveys animal parasites, including life histories; emphasizes parasites of humans. Uses animals and/or animal tissues. Prereqs., EBIO 1210, 1220, 1230, and 1240 or EPOB 2050 and 2060.

[College of Arts & Sciences](#) [Ecology & Evolutionary Biology](#)

---

## EBIO-3680 (5) Honors Evolutionary Biology

Lect., rec., and co-sem. Emphasizes the fundamental evolutionary concepts that provide explanation for the diversification of life on Earth. Specific topics include the evidence for evolution, adaptation by natural selection speciation, systematics, molecular and genome evolution, and macroevolutionary patterns and process. Recitations allow students to explore specific topics in more depth and smaller groups. Prereqs., EBIO 1210, 1220, 1230, 1240, 2070 or 2670. Credit not granted for this course and EBIO 3080 or EPOB 2080 or 2680.

College of Arts & Sciences Ecology & Evolutionary Biology

---

---

## EBIO-3770 (4) Animal Diversity: Vertebrates

Lect. and lab. Provides a broad overview of the biology of vertebrates: evolution and systematics, morphology, physiology, behavior, ecology, and biogeography. Laboratories focus on the diversity of vertebrates, including adaptations and diagnostic features of major groups. Uses animals and/or animal tissues. Prereqs., EBIO 1210, 1220, 1230, and 1240, or equivalent.

College of Arts & Sciences Ecology & Evolutionary Biology

---

---

## EBIO-3840 (1-6) Independent Study (Junior)

May be repeated up to 6 total credit hours.

College of Arts & Sciences Ecology & Evolutionary Biology

---

---

## EBIO-3850 (4) Animal Diversity: Invertebrates

Lect. and lab. Offers a broad study of the biology of the most diverse group of organisms on Earth. Areas include ecology, physiology, evolution and morphology of aquatic and terrestrial forms. This course uses animals and/or animal tissues. Prereqs., EBIO 1210, 1220, 1230, and 1240, or equivalent, or EPOB 2050 and 2060.

College of Arts & Sciences Ecology & Evolutionary Biology

---

---

## EBIO-3870 (1-6) Independent Research (Junior)

May be repeated up to 6 total credit hours.

College of Arts & Sciences Ecology & Evolutionary Biology

---

---

## EBIO-3930 (1-6) Internship

Provides an academically supervised opportunity for upper-division students to work in public or private organizations. Projects are

---

usually related to students' career goals. Each project has both academic and work components. May be repeated up to 6 total credit hours. Pass/fail only.

College of Arts & Sciences Ecology & Evolutionary Biology

---

## EBIO-3940 (3) Argument in Scientific Writing

Emphasizes argumentative strategies used in scientific writing. Reviews essential writing skills to prepare students for academic and professional communication. Restricted to juniors and seniors. No biology credit for majors in EBIO. Approved for arts and sciences core curriculum: written communication. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

College of Arts & Sciences Ecology & Evolutionary Biology

---

## EBIO-3980 (1) Seminar: Introduction to EBIO Honors

Presents an introduction to the departmental Honors program. Consists of a lecture component on Honors research, thesis, and defense, as well as a seminar component where students present the findings of their library research, conducted under guidance of a faculty mentor, and hear presentations by graduating Honors candidates on their thesis research. Prereq., 3.2 or better GPA, declared EBIO major, and approval by departmental Honors program. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

College of Arts & Sciences Ecology & Evolutionary Biology

---

## EBIO-3990 (1-3) Introduction to EBIO Honors

Provides an introduction to the departmental Honors program. Consists of individual library research on a potential Honors thesis topic under the guidance of a faculty mentor. Prereqs., 3.2 or better GPA declared EBIO major, and approval by departmental Honors committee. Prerequisites: Restricted to Ecology and Evolutionary Biology (EBIO) majors only.

College of Arts & Sciences Ecology & Evolutionary Biology

---

## EBIO-4020 (3) Stream Biology

Offers a geological, physical, chemical, and biological study of flowing water with special reference to streams and rivers as ecosystems. A laboratory course is offered (see EBIO 4150). Prereqs., EBIO 1210, 1220, 1230, 1240, and 2040, or EPOB 2050 and 2060. Same as EBIO 5020.

College of Arts & Sciences Ecology & Evolutionary Biology

---

## EBIO-4030 (3) Limnology

Examines the ecology of inland waters, including a detailed consideration of physical, chemical, and biological properties of freshwater ecosystems: origins and major characteristics of lakes and streams, survey of chemical and nutrient cycles in freshwater habitats, and survey of biotic composition of freshwater environments. Important themes in modern freshwater ecology are considered, including

energy flow, trophic structure, eutrophication, and management of freshwater ecosystems. Prereqs., EBIO 1210 and 1220. Same as EBIO 5030.

College of Arts & Sciences Ecology & Evolutionary Biology

---

## EBIO-4060 (3) Landscape Ecology

Studies distributional patterns of communities and ecosystems, ecological processes that affect those patterns, and changes in pattern and process over time. Consideration of spatial and temporal scales in ecological analyses is required to understand and predict response to broad-scale environmental change. Prereqs., EBIO 1210, 1220, 1230, 1240, and EBIO 2040 or 2640, or EPOB 2050 and 2060. Same as EBIO 5070.

College of Arts & Sciences Ecology & Evolutionary Biology

---

## EBIO-4090 (2) Coral Reef Ecology

Includes one week of lectures in Boulder and one week of field studies on one of the most complex and beautiful ecosystems in the world, the Caribbean reefs at Cozumel, Mexico. Two week, fall-semester course beginning after Christmas. Prereqs., EBIO 2040 and Scuba certification. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences Ecology & Evolutionary Biology

---

## EBIO-4100 (3) Advanced Ecology

Emphasizes specific aspects of ecology based on specialties of faculty. One or more courses are offered most semesters. Topics have included dynamics of mountain ecosystems, tundra ecology, ethnoecology, population dynamics, tropical and insular biology, ecology of fishes, quantitative plant ecology, and arctic and alpine environments. May use animals and/or animal tissues. May be repeated twice provided the topics vary. Prereqs., EBIO 1210, 1220, 1230, 1240, and EBIO 2040 or 2640, or EPOB 2050 and 2060. Same as EBIO 5100.

College of Arts & Sciences Ecology & Evolutionary Biology

---

## EBIO-4120 (2-4) Advanced Ecology

See EBIO 4100 for description. May use animals and/or animal tissues. Prereq., EBIO 1210, 1220, 1230, 1240, and EBIO 2040 or 2640, or EPOB 2050 and 2060. Same as EBIO 5120.

College of Arts & Sciences Ecology & Evolutionary Biology

---

## EBIO-4140 (3) Plant Ecology

---

Examines the relationships between plants and their physical and biological environments, encompassing physiology, competition, plant-soil and plant-animal interactions, population dynamics, diversity, and influence on ecosystem function. Prereqs., EBIO 1210, 1220, 1230, and 1240.

College of Arts & Sciences Ecology & Evolutionary Biology

---

## EBIO-4150 (1-2) Techniques in Ecology

Emphasizes application of modern ecological techniques, such as stream biology, aquatic biology, environmental measurement and control, and techniques in geocology. May be repeated up to 7 total credit hours. Prereqs., EBIO 1210, 1220, 1230, 1240, and EBIO 2040 or 2640, or EPOB 2050 and 2060. Same as EBIO 5150.

College of Arts & Sciences Ecology & Evolutionary Biology

---

## EBIO-4160 (3) Introduction to Biogeochemistry

Covers fundamentals of biogeochemical cycling, emphasizing water, carbon, and nutrient dynamics in terrestrial ecosystems; chemical interactions of atmosphere, biosphere, lithosphere, and hydrosphere; and natural and human-managed environments. Prereqs., GEOL 3320 or EBIO 3270, and CHEM 1011 or higher. Same as ENV5 4160 and GEOL 4160.

College of Arts & Sciences Ecology & Evolutionary Biology

---

## EBIO-4175 (3) The Scientific Basis for Ecosystem Management of Public Lands

An advanced field ecology course emphasizing measurements, statistical procedures, and biotic data information management relevant to land management issues. Develops concepts of adaptive ecosystem management using ongoing field studies on public land in the Colorado Front Range. Prereqs., EBIO 3270 and 3500.

College of Arts & Sciences Ecology & Evolutionary Biology

---

## EBIO-4290 (3) Molecular Systematics and Evolution

Reviews principles and theoretical foundations of molecular evolution and molecular systematics. Emphasizes hypothesis testing and using various methods of analysis for interpreting molecular variation in nature. Prereq., EBIO 3080 or instructor consent. Same as EBIO 5290.

College of Arts & Sciences Ecology & Evolutionary Biology

---

## EBIO-4350 (1-4) Biological Field Studies

Stresses broad areas of biology and employs field approaches. Uses animals and/or animal tissues. May be repeated up to 4 total credit hours. Prereqs., EBIO1210, 1220, 1230, and 1240, or E 2050 and 2060. Same as EBIO 5350.

College of Arts & Sciences Ecology & Evolutionary Biology

## EBIO-4410 (4) Biometry

Lect. and lab. Offers a demanding, problems-oriented methods course in statistical inference procedures, assumptions, limitations, and applications emphasizing techniques appropriate to realistic biological problems. Includes data file management using interactive computing techniques. Prereqs., EBIO1210, 1220, 1230, and 1240, or EPOB 2050 and 2060. Restricted to juniors/seniors. Same as EBIO 5410. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

EBIO

## EBIO-4440 (4) Animal Developmental Diversity

Surveys development in a range of vertebrate and invertebrate systems to reconstruct the common bilaterian ancestor, and elucidate the developmental genetic changes underlying animal diversification. Lab focuses on vertebrate embryos and explores key methods in evolutionary developmental biology including in situ hybridization, embryo microinjection, and transgenesis. Prereqs., EBIO 1210, 1220 and 2070, or MCDB 1150 and 2150. EBIO 4440, EBIO 5440, MCDB 4441, and MCDB 5441 are all the same course.

[College of Arts & Sciences](#) [Ecology & Evolutionary Biology](#)

## EBIO-4460 (1-5) Special Topics

Familiarizes students with specialized areas of biology. May be repeated up to 9 total credit hours. Prereqs., EBIO 1210, 1220, 1230, and 1240, or equivalent. Same as EBIO 5460.

[College of Arts & Sciences](#) [Ecology & Evolutionary Biology](#)

## EBIO-4500 (4) Plant Biodiversity and Evolution

Lect. and lab. Surveys plant types emphasizing diagnostic features of plants in general and major taxa in particular. Focuses on identity, morphology, anatomy, reproduction, ecology, geography, evolution, fossil record, and economic use of taxa. Prereqs., EBIO 1210, 1220, 1230, and 1240, or EPOB 2050 and 2060. Formerly EBIO 3500.

[College of Arts & Sciences](#) [Ecology & Evolutionary Biology](#)

---

## EBIO-4510 (4) Plant Anatomy and Development

Lect. and lab. Introduces structures of seed plants, especially angiosperms, and developmental history of these structures. Studies cell types, and their location and function in plant tissues and organs. The laboratory provides an opportunity to examine plant tissues and to prepare tissues for examination by the light microscope. Stresses role of plant structures in the living plant. Prereqs., EBIO 1210, 1220, 1230, and 1240, or EPOB 2050 and 2060. Formerly EBIO 3510 .

College of Arts & Sciences Ecology & Evolutionary Biology

---

## EBIO-4520 (4) Plant Systematics

Lect. and lab. Studies the principles and techniques of modern systematics of organisms, illustrated with examples from the plant kingdom, usually the angiosperms. Framework of course is evolutionary and ecological, as well as taxonomic. Prereq., EBIO 2070. Restricted to sophomores/juniors/seniors. Formerly EBIO 3520.

College of Arts & Sciences Ecology & Evolutionary Biology

---

## EBIO-4530 (4) Functional Plant Biology

Lect. and lab. Explores mechanisms of plant functioning and how such functioning relates to the performance of the plant under different environmental conditions. Phenomena include water relations, growth and development, and metabolic processes including photosynthesis, respiration, and responses to stress. Prereqs., EBIO 1210, 1220, 1230, and 1240, or equivalent. Restricted to sophomores/juniors/seniors. Formerly EBIO 3530.

College of Arts & Sciences Ecology & Evolutionary Biology

---

## EBIO-4550 (4) Plant Eco-Evo-Devo

Explores the fundamental principles of plant form from the perspectives of ecological function, evolutionary origin, and developmental dynamics. Students are presented with conceptual and analytical tools to interpret the vast diversity of growth form-function relationships that exist among plants. Laboratory sessions apply concepts presented in lecture and students will engage in original research using light and scanning electron microscopy. Prereqs., EBIO 1210, 1220, 1230 and 1240.

College of Arts & Sciences Ecology & Evolutionary Biology

---

## EBIO-4640 (2-4) Plant Field Studies

Includes field-oriented courses offered at irregular intervals during the academic year or during summer sessions. May be repeated up to 7 total credit hours. Prereq., EBIO 2040 and 2640 or equivalent.

College of Arts & Sciences Ecology & Evolutionary Biology

---

---

## EBIO-4660 (4) Insect Biology

Lect. and lab. Introduction to evolution, ecology, physiology, and behavior of insects. Emphasizes how insects have solved problems, such as maintaining water balance or finding food, that are shared by all animals but for which there may be unique solutions among the insects. Agricultural and human health problems relative to entomology are discussed. Uses animals and/or animal tissues. Prereqs., EBIO 1210, 1220, 1230, and 1240, or EPOB 2050 and 2060. Same as EBIO 5660.

College of Arts & Sciences Ecology & Evolutionary Biology

---

## EBIO-4740 (3) Biology of Amphibians and Reptiles

Comparative morphology, taxonomy, ecology, behavior, and geographic distribution of amphibians and reptiles. This course uses animals and animal tissue. Prereqs., EBIO 1210, 1220, 1230, and 1240, or EPOB 2050 and 2060. Same as EBIO 5740 and PSYC 4740.

College of Arts & Sciences Ecology & Evolutionary Biology

---

## EBIO-4750 (4) Ornithology

Lect., lab, and field trips. Presents origin, evolution, ecology, physical and behavioral characteristics, and taxonomy of orders and families of birds of North America; field work with local species emphasizing avian ecology. Uses animals and/or animal tissues. Prereq., EBIO 1210, 1220, 1230, and 1240, or EPOB 2050 and 2060. Same as EBIO 5750.

College of Arts & Sciences Ecology & Evolutionary Biology

---

## EBIO-4760 (4) Mammalogy

Lect., lab, and field studies. Discusses origin, evolution and adaptation, geographic distribution, ecology, and taxonomy of mammals; field and laboratory study of Colorado species. Uses animals and/or animal tissues. Prereq., EBIO 1210, 1220 and 2040 or 2640. Same as EBIO 5760.

College of Arts & Sciences Ecology & Evolutionary Biology

---

## EBIO-4795 (3) Field Methods in Zoology and Botany

Class covers research and field methods for biological disciplines associated with natural history museums: vertebrates, invertebrates, and plants. Emphasis is on field research techniques: observations, sampling, collection and preservation methods, and comparisons among elevation zones. Includes 5 field labs, 2 weekend trips, 5 lab practica, experience with several taxonomic experts, and individual research projects. Same as EBIO 5795, MUSM 4795 and ENVS 4795.

College of Arts & Sciences Ecology & Evolutionary Biology

---

---

## EBIO-4800 (3) Critical Thinking in Biology

Lect. and discussion. Explores controversial issues, historical themes, or emerging developments in biology. Consult the EBIO Undergraduate Advising Center for current listings. Different course sections on different topics may be repeated up to 12 total credit hours. Prereq., minimum of 14 hours of EBIO course work. Same as EBIO 5800. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences Ecology & Evolutionary Biology

---

## EBIO-4840 (1-6) Independent Study (Senior)

May be repeated up to 6 total credit hours. .

College of Arts & Sciences Ecology & Evolutionary Biology

---

## EBIO-4860 (1-2) Critical Thinking in Biology - Lab

College of Arts & Sciences Ecology & Evolutionary Biology

---

## EBIO-4870 (1-6) Independent Research (Senior)

May be repeated up to 6 total credit hours.

College of Arts & Sciences Ecology & Evolutionary Biology

---

## EBIO-4980 (1) Seminar: EBIO Honors Thesis

To be taken during the final academic year prior to graduation. Consists of a lecture component on honors thesis writing and defense, as well as a seminar component where honors candidates present their thesis research in a practice defense talk. Prereq., 3.30 or better GPA, declared EBIO major, and approval by departmental honors committee.

College of Arts & Sciences Ecology & Evolutionary Biology

---

## EBIO-4990 (1-3) EBIO Honors Thesis

To be taken during the final academic year prior to graduation. Consists of the final phase of honors research and thesis preparation under the guidance of a faculty mentor. Prereq., 3.30 or better GPA, declared EBIO major, and approval by departmental honors committee. Prerequisites: Restricted to Ecology and Evolutionary Biology (EBIO) majors only.

College of Arts & Sciences Ecology & Evolutionary Biology

---

---

## EBIO-5000 (1) EBIO Colloquia

All first year EBIO graduate students are required to attend the EBIO Colloquia Series. Speakers from around the world and within the department cover topics in all areas of biology. May be repeated up to 2 total credit hours.

College of Arts & Sciences Ecology & Evolutionary Biology

---

---

## EBIO-5020 (3) Stream Biology

Same as EBIO 4020.

College of Arts & Sciences Ecology & Evolutionary Biology

---

---

## EBIO-5030 (3) Limnology

Same as EBIO 4030.

College of Arts & Sciences Ecology & Evolutionary Biology

---

---

## EBIO-5060 (3) Landscape Ecology

Same as EBIO 4060. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Ecology & Evolutionary Biology

---

---

## EBIO-5100 (3) Advanced Ecology

Same as EBIO 4100. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Ecology & Evolutionary Biology

---

---

## EBIO-5120 (2-4) Advanced Ecology

Same as EBIO 4120.

College of Arts & Sciences Ecology & Evolutionary Biology

EBIO

### EBIO-5150 (1-2) Techniques in Ecology

Same as EBIO 4150.

College of Arts & Sciences Ecology & Evolutionary Biology

### EBIO-5240 (3) Advanced Topics in Animal Behavior

Covers special areas of ethology such as sociobiology, animal communication, cognitive ethology, human ethology, moral and ethical issues. Prereq., EBIO 3240.

College of Arts & Sciences Ecology & Evolutionary Biology

### EBIO-5290 (3) Molecular Systematics and Evolution

Same as EBIO 4290. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Ecology & Evolutionary Biology

### EBIO-5310 (3) Ecology and Conservation

Reviews current research activities in the various fields of environmental biology, including population, community, behavioral, ecosystem, and landscape ecology, plus conservation biology and global change. Prereq., graduate standing.

College of Arts & Sciences Ecology & Evolutionary Biology

---

---

## EBIO-5320 (3) Current Topics in Evolutionary Biology

Examines six major themes on contemporary evolutionary research: population genetics, natural selection and adaptation, molecular evolution, evolution and development, phylogenetic systematics, and macroevolution. Emphasizes recent primary literature and sophisticated mastery. Prereq., graduate standing in EBIO.

College of Arts & Sciences Ecology & Evolutionary Biology

---

---

## EBIO-5350 (1-4) Biological Field Studies

Same as EBIO 4350.

College of Arts & Sciences Ecology & Evolutionary Biology

---

---

## EBIO-5410 (4) Biometry

Same as EBIO 4410.

College of Arts & Sciences Ecology & Evolutionary Biology

---

---

## EBIO-5440 (4) Animal Developmental Diversity

Surveys development in a range of vertebrate and invertebrate systems to reconstruct the common bilaterian ancestor, and elucidate the developmental genetic changes underlying animal diversification. Lab focuses on vertebrate embryos and explores key methods in evolutionary developmental biology including in situ hybridization, embryo microinjection, and transgenesis. Prereqs., EBIO 1210, 1220 and 2070, or MCDB 1150 and 2150. EBIO 4440, EBIO 5440, MCDB 4441, and MCDB 5441 are all the same course. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Ecology & Evolutionary Biology

---

---

## EBIO-5460 (1-5) Special Topics

Same as EBIO 4460. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Ecology & Evolutionary Biology

---

---

## EBIO-5570 (3) Advanced Plant Physiology

Same as EBIO 4570.

---

College of Arts & Sciences Ecology & Evolutionary Biology

---

## EBIO-5660 (4) Insect Biology

Same as EBIO 4660. . Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Ecology & Evolutionary Biology

---

## EBIO-5740 (3) Biology of Amphibians and Reptiles

Same as EBIO 4740 and PSYC 5740.

College of Arts & Sciences Ecology & Evolutionary Biology

---

## EBIO-5750 (4) Ornithology

Same as EBIO 4750.

College of Arts & Sciences Ecology & Evolutionary Biology

---

## EBIO-5760 (4) Mammalogy

Same as EBIO 4760. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Ecology & Evolutionary Biology

---

## EBIO-5795 (3) Field Methods in Zoology and Botany

Same as EBIO 4795 and MUSM 5795. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Ecology & Evolutionary Biology

---

## EBIO-5800 (3) Critical Thinking in Biology

Same as EBIO 4800. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Ecology & Evolutionary Biology

---

## EBIO-5820 (2-3) Graduate Writing Seminar

Enhances writing proficiency, using graduate writing projects to implement the course concepts. Offers understanding of conventions and strategies used in scientific writing to prepare students for academic and professional communication. Prereqs., graduate standing and basic proficiency in English as a written language.

College of Arts & Sciences Ecology & Evolutionary Biology

---

---

## EBIO-5840 (1-6) Independent Study (Master's Level)

Instructor consent required. May be repeated up to 6 total credit hours. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Ecology & Evolutionary Biology

---

---

## EBIO-6000 (1) Seminar: Introduction to Biological Research

Discusses areas of biological research represented in EBIO. Required of all first-year graduate students in EBIO. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Ecology & Evolutionary Biology

---

---

## EBIO-6100 (1-3) Seminar in Environmental Biology

Instructor consent required. Restricted to graduate students. May be repeated up to 7 total credit hours. Same as EBIO 6120. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Ecology & Evolutionary Biology

---

---

## EBIO-6120 (1-3) Seminar in Environmental Biology

Same as EBIO 6100.

College of Arts & Sciences Ecology & Evolutionary Biology

---

---

## EBIO-6200 (1-3) Seminar in Population Biology

May be repeated up to 7 total credit hours. Same as EBIO 6210. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Ecology & Evolutionary Biology

EBIO

## EBIO-6440 (2) Remote Sensing Field Methods

Explores theory and practical field measurements for validation of airborne and spaceborne spectral image acquisition. Emphasizes radiative scattering properties of soil, vegetation, cryosphere, and atmosphere. Characterization and calibration of instrumentation used to measure these properties. Prereq., GEOL/GEOG 4093/5093. Recommended prereq., GEOL 5240. Same as GEOG 6443.

College of Arts & Sciences Ecology & Evolutionary Biology

## EBIO-6840 (1-7) Independent Research (Master's Level)

Instructor consent required. May be repeated up to 7 total credit hours. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Ecology & Evolutionary Biology

## EBIO-6940 (1) Master's Degree Candidate---Plan II

Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Ecology & Evolutionary Biology

## EBIO-6950 (1-6) Master's Thesis

May be repeated up to 7 total credit hours. Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Ecology & Evolutionary Biology

---

## EBIO-7840 (1-6) Independent Study (Doctoral Level)

May be repeated up to 6 total credit hours. Prerequisites: Restricted to Graduate Students only.

ECEN

## ECEN-1100 (1) Freshman Seminar

Introduces students to areas of emphasis with the ECE department through seminars presented by faculty and outside speakers. Emphasizes career opportunities, professional ethics and practices, history of the profession, and resources for academic success. Several sessions promote team building and problem solving, and provide opportunities for freshmen to meet their classmates. Prerequisites: Restricted to College of Engineering majors only.

[College of Engineering & Applied Science](#) | [Electrical & Computer Engineering](#) | [General](#)

## ECEN-1400 (3) Introduction to Digital and Analog Electronics

Introduces fundamental concepts in electrical and computer engineering such as Ohm's Law, capacitors, Leds and 7-segment displays, transformers and rectifiers, digital logic, Fourier decomposition, frequency analysis. Lab work exposes students to commonly used instrumentation. Includes a final project. Skills in wiring, soldering and wire-wrapping are developed. Coreq., APPM 1350.

[College of Engineering & Applied Science](#) | [Electrical & Computer Engineering](#) | [General](#)

## ECEN-1500 (3) Sustainable Energy

Explores how energy is created and used in today's society. Through collaborative discussion and hands-on data collection, students will analyze the engineering challenges, fundamental limits, and potential solutions to meeting our energy needs sustainably. Students will learn to analyze numerical data, estimate orders, of magnitude, and apply mathematical methods in their own lives and in the ongoing energy debate. Basic algebra required. Restricted to non-engineering majors. Approved for arts and sciences core curriculum: quantitative reasoning and mathematical skills.

[College of Engineering & Applied Science](#) | [Electrical & Computer Engineering](#) | [General](#)

---

## ECEN-1840 (1-6) Independent Study

Provides an opportunity for freshmen to do independent, creative work. Numbered ECEN 1840 through ECEN 1849. Prereq., instructor consent.

College of Engineering & Applied Science | Electrical & Computer Engineering | General

---

## ECEN-2010 (1-5) Special Topics

College of Engineering & Applied Science | Electrical & Computer Engineering | General

---

## ECEN-2020 (1-5) Special Topics

College of Engineering & Applied Science | Electrical & Computer Engineering | General

---

## ECEN-2050 (1-5) Special Topics

College of Engineering & Applied Science | Electrical & Computer Engineering | General

---

## ECEN-2060 (1-5) Special Topics

College of Engineering & Applied Science | Electrical & Computer Engineering | General

---

## ECEN-2250 (3) Introduction to Circuits and Electronics

Introduces linear circuit analysis and design, including extensive use of OP amps. Presents DC networks, including node and mesh analysis with controlled sources. Analysis of RL and RC circuits for both transient and sinusoidal steady-state responses using phasors. Prereq., APPM 1360. Coreq., APPM 2360. Prerequisites: Restricted to College of Engineering majors only.

College of Engineering & Applied Science | Electrical & Computer Engineering | General

---

## ECEN-2260 (3) Circuits as Systems

Continues basic circuit analysis of ECEN 2250: Laplace transform techniques, transfer functions, frequency response, Bode diagrams, resonant circuits, Fourier series expansions, and convolution. Prereq., ECEN 2250. Coreq., Electronics Design Laboratory. Prerequisites: Restricted to College of Engineering majors only.

College of Engineering & Applied Science | Electrical & Computer Engineering | General

---

---

## ECEN-2350 (3) Digital Logic

Covers the design and applications of digital logic circuits, including combinational and sequential logic circuits. Laboratory component introduces simulation and synthesis software and hands-on hardware design. Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) College of Engineering students only. Prereq., ECEN 1030 or CSCI 1300. Prerequisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) College of Engineering students only.

College of Engineering & Applied Science | Electrical & Computer Engineering | General

---

## ECEN-2420 (3) Wireless Electronics for Communication

Explores fundamental principles behind the operation of a radio, including a practical introduction to circuit elements. The course covers the components and operation of a radio (transmitter and receiver) with simple signals. Students learn through demos the practical basic properties of all needed components with an introduction to principles of operation. Prereqs., PHYS 1120, and APPM 1360 or MATH 2300. Restricted to EN majors. Prerequisites: Restricted to Electrical and Computer Engineering or Electrical Engineering majors only.

College of Engineering & Applied Science | Electrical & Computer Engineering | General

---

## ECEN-2703 (3) Discrete Mathematics for Computer Engineers

Emphasizes elements of discrete mathematics appropriate for computer engineering. Topics: logic, proof techniques, algorithms, complexity, relations, and graph theory. Prereqs., ECEN 1030/CSCI 1300 and APPM 1360.

College of Engineering & Applied Science | Electrical & Computer Engineering | Computer and Digital Systems

---

## ECEN-2830 (1-5) Special Topics

College of Engineering & Applied Science | Electrical & Computer Engineering | General

---

## ECEN-2840 (1-6) Independent Study

Offers an opportunity for sophomores to do independent, creative work. Numbered ECEN 2840 through ECEN 2849. Prereq., instructor consent.

College of Engineering & Applied Science | Electrical & Computer Engineering | General

---

## ECEN-3002 (3-5) Special Topics

---

---

## ECEN-3003 (3-5) Special Topics

## ECEN-3004 (3-5) Special Topics

## ECEN-3010 (3) Circuits and Electronics for Mechanical Engineers

Covers analysis of electrical circuits by use of Ohm's law, network reduction, node and loop analysis, Thevenin's and Norton's theorems, DC and AC signals, transient response of simple circuits, transfer functions, basic diode and transistor circuits, and operational amplifiers. Includes introductory digital electronics and microprocessors/microcontrollers. Prereqs., APPM 2360 and PHYS 1140. Same as MCEN 3017. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) Mechanical Engineering (MCEN) or Environmental Engineering (EVEN) majors.

## ECEN-3030 (3) Electrical/Electronic Circuits Non-Major

For students not majoring in electrical engineering. Covers analysis of electric circuits by use of Ohm's law; network reduction; super position; node and loop analysis; Thevenin's and Norton's theorems; sinusoidal signals; phasors; power in ac circuits; transient response of simple circuits; operational amplifiers; logic circuits; and flip-flops. Prereq., APPM 2360. Restricted to nonmajors. Same as GEEN 3854. Prerequisites: Electrical/Computer Engineering Majors, Electrical Engineering Majors or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree Majors are restricted from taking this course.

## ECEN-3070 (3) Edges of Science

Examines the evidence for paranormal phenomena, reasons for skepticism, and physical models that could account for the data. Reviews controversial scientific theories that overcame barriers to acceptance, and how worldviews shift. Considers the scientific method and ways uncontrolled factors might influence experiments. Develops skills in statistical analysis of data. Includes group projects testing for anomalous and parapsychological effects. Not accepted as a technical elective for engineering majors. Prereq., MATH 1011 or equivalent.

## ECEN-3170 (3) Energy Conversion 1

Introduces block diagrams, conventional/renewable energy sources, power electronics, magnetic circuits, transformers and power systems, forces/torques of electric machines. Employs a top-down approach to present applications first and then discuss components. Uses Pspice, Mathematica, Matlab. Prereq., PHYS 1120. Coreq., ECEN 3250. Prerequisites: Restricted to College of Engineering majors only.

College of Engineering & Applied Science Electrical & Computer Engineering General

## ECEN-3250 (3) Microelectronics

Develops a basic understanding of active semiconductor devices. Focuses on building an understanding of BJT and CMOS devices in both digital and analog application. Prereq., ECEN 2260. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

College of Engineering & Applied Science Electrical & Computer Engineering General

## ECEN-3300 (3) Linear Systems

Characterization of linear and time-invariant systems in time and frequency domains. Continuous time systems are analyzed using differential equations and Laplace and Fourier transforms. Discrete time systems, which can be implemented using a modern digital signal processing framework, use difference equations, z-transforms and discrete time Fourier transforms for their analysis and design. Applications of linear systems include communications, signal processing, and control systems. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

College of Engineering & Applied Science Electrical & Computer Engineering General

## ECEN-3303 (3) Introduction to Robotics

Introduces students to fundamental concepts in autonomous, mobile robotics: mechanisms, locomotion, kinematics, control, perception and planning. The course consists of lectures and lab sessions that are geared toward developing a complex robot controller in a realistic, physics-based multi-robot simulator. Prereqs., CSCI 2270 and 2824. CSCI 3302 and ECEN 3303 are the same course.

College of Engineering & Applied Science Electrical & Computer Engineering Artificial Intelligence

ECEN

### ECEN-3320 (3) Semiconductor Devices

Highlights the fundamentals of semiconductor materials and devices. Topics include the electrical and optical properties of semiconductors, the theory of Pn junctions, bipolar and field-effect transistors, and optoelectronic devices. Prereq., ECEN 3250.

Prerequisites: Restricted to College of Engineering majors only.

[College of Engineering & Applied Science](#) [Electrical & Computer Engineering](#) [General](#)

### ECEN-3350 (3) Programming Digital Systems

Covers computer usage in system implementation, central processor capabilities, and managing concurrency. Includes computer architecture, instruction sets, programming, input/output, interrupts, block transfers, semaphores, shared procedures, multiple processors, and memory management. Prereq., ECEN 2350. Formerly ECEN 2120. Prerequisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) College of Engineering students only.

[College of Engineering & Applied Science](#) [Electrical & Computer Engineering](#) [General](#)

### ECEN-3400 (3) Electromagnetic Fields and Waves

Electromagnetic fields are covered at an introductory level, starting with electrostatics and continuing with DC current, magnetostatics, time-varying magnetic fields, waves on transmission lines, Maxwell's equations and the basics of plane waves. The use of fields in inductors, capacitors, resistors, transformers, and energy and power concepts are studied. Prereqs., APPM 2350, PHYS 1110, and ECEN 2250. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

[College of Engineering & Applied Science](#) [Electrical & Computer Engineering](#) [General](#)

### ECEN-3410 (3) Electromagnetic Waves and Transmission

Covers reflected and transmitted plane waves in layered media, Poynting's theorem of electromagnetic power, two-conductor transmission line theory and practice, Smith chart usage and impedance matching, and elements of antenna theory. Prereq., ECEN 3400. Restricted to juniors/seniors. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

College of Engineering & Applied Science | Electrical & Computer Engineering | General

---

## ECEN-3810 (3) Introduction to Probability Theory

Covers the fundamentals of probability theory, and treats the random variables and random processes of greatest importance in electrical engineering. Provides a foundation for study of communication theory, control theory, reliability theory, optics, and portfolio analysis. Prereqs., APPM 2350 and 2360. Credit not granted for this course and MATH 4510 or APPM 3570. Prerequisites: Restricted to College of Engineering majors only.

College of Engineering & Applied Science | Electrical & Computer Engineering | General

---

## ECEN-3840 (1-6) Independent Study

Offers an opportunity for juniors to do independent, creative work. Numbered ECEN 3840-3849. Prereq., instructor consent.

College of Engineering & Applied Science | Electrical & Computer Engineering | General

---

## ECEN-3930 (6) ECE Co-op Education

Participate in a cooperative education program working with a corporate or government entity. Individual assignments are arranged between the department and the outside employer. This course is offered only through Continuing Education. May be repeated up to 24 credit hours. Prereq., ECEN 2120, 2260, minimum GPA of 2.85 required. Restricted to sophomore, junior and senior EEEN and ECEN majors.

College of Engineering & Applied Science | Electrical & Computer Engineering | General

---

## ECEN-4000 (3) Special Topics

College of Engineering & Applied Science | Electrical & Computer Engineering | General

---

## ECEN-4001 (1-4) Special Topics

Credit and subject matter to be arranged. Numbered ECEN 4001-4049. Prerequisites vary.

College of Engineering & Applied Science | Electrical & Computer Engineering | Bioengineering

---

---

## ECEN-4002 (1-4) Special Topics

College of Engineering & Applied Science | Electrical & Computer Engineering | Communications

---

## ECEN-4006 (1-4) Special Topics

College of Engineering & Applied Science | Electrical & Computer Engineering | Optics

---

## ECEN-4009 (1-4) Special Topics

College of Engineering & Applied Science | Electrical & Computer Engineering | VLSI CAD Methods

---

## ECEN-4011 (1-4) Special Topics

Same as ECEN 5011.

College of Engineering & Applied Science | Electrical & Computer Engineering | Bioengineering

---

## ECEN-4012 (1-4) Special Topics

College of Engineering & Applied Science | Electrical & Computer Engineering | Communications

---

## ECEN-4013 (1-4) Special Topics

College of Engineering & Applied Science | Electrical & Computer Engineering | Computer and Digital Systems

---

## ECEN-4016 (1-4) Special Topics

College of Engineering & Applied Science | Electrical & Computer Engineering | Optics

---

## ECEN-4017 (1-4) Special Topics

College of Engineering & Applied Science | Electrical & Computer Engineering | Power

---

---

## ECEN-4018 (1-4) Special Topics

College of Engineering & Applied Science | Electrical & Computer Engineering | Dynamical Systems and Control

---

---

## ECEN-4021 (1-4) Special Topics

Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Engineering majors only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Bioengineering

---

---

## ECEN-4023 (1-4) Special Topics

Same as ECEN 5023.

College of Engineering & Applied Science | Electrical & Computer Engineering | Computer and Digital Systems

---

---

## ECEN-4024 (1-4) Special Topics

Same as ECEN 5024.

College of Engineering & Applied Science | Electrical & Computer Engineering | Electromagnetics

---

---

## ECEN-4028 (1-4) Special Topics

College of Engineering & Applied Science | Electrical & Computer Engineering | Dynamical Systems and Control

---

---

## ECEN-4049 (1-4) Special Topics

College of Engineering & Applied Science | Electrical & Computer Engineering | VLSI CAD Methods

---

---

## ECEN-4053 (1-4) Special Topics

Same as ECEN 5053.

---

---

## ECEN-4106 (3) Photonics

Deals with the generation, transmission, modification and detection of light. Applications include fiber optics communications, data storage, sensing, and imaging. Leads to understanding of fundamental physical principles used in the analysis and design of modern photonic systems. Prereqs., ECEN 3400. Coreq., ECEN 3300. Restricted to seniors. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior).

ECEN

## ECEN-4116 (3) Introduction to Optical Communications

Given data rates, distance, reliability or bit error rates, the information required to specify the type of fiber, the source, the wave length, type of modulation, repeater or optical amplifiers, and detectors will be presented. Prereq., ECEN 3400 or equivalent. Same as TLEN 5480.

[College of Engineering & Applied Science](#) [Electrical & Computer Engineering](#) [Optics](#)

## ECEN-4120 (3) Neural Network Design

Introduces basic (artificial) neural network architectures and learning rules. Emphasizes mathematical analysis of these networks, methods of training them, and application to practical problems such as pattern recognition, signal processing, and control systems. Shows how to construct a network of "Neurons" and train them to serve a useful function. Prereqs., APPM 2360 or MATH 3130, and CSCI 1300 or equivalent. Same as ECEN 5120.

[College of Engineering & Applied Science](#) [Electrical & Computer Engineering](#) [General](#)

## ECEN-4138 (3) Control Systems Analysis

Analysis and design of continuous time control systems using classical and state space methods. Laplace transforms, transfer functions and block diagrams. Stability, dynamic response, and steady-state analysis. Analysis and design of control systems using root locus and frequency response methods. Computer aided design and analysis. Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only. Prereq., ECEN 3300, background in Laplace transforms, linear algebra, and ordinary differential equations. Same as ECEN 5138. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

[College of Engineering & Applied Science](#) [Electrical & Computer Engineering](#) [Dynamical Systems and Control](#)

---

## ECEN-4167 (3) Energy Conversion 2

Studies the derivation of the dynamic equations of motion of electromechanical systems, linear and rotary motion machines based on variational principles and basic force laws. Looks at equivalent circuits in abc and dqo coordinates for Ac and Dc machines. Discusses conditions under which an electromagnetic torque can be produced. Applies theory to the most important modes of steady-state and transient operation of electrical energy converters. Prereq., ECEN 3170.

College of Engineering & Applied Science | Electrical & Computer Engineering | Power

---

## ECEN-4224 (3) High Speed Digital Design

Covers fundamentals of high-speed properties of: logic gates, measurement techniques, transmission lines, ground planes and layer stacking, terminations, vias, power systems, connectors, ribbon cables, clock distribution and clock oscillators. Prereq., ECEN 3400. Recommended prereq., ECEN 3410. Same as ECEN 5224.

College of Engineering & Applied Science | Electrical & Computer Engineering | Electromagnetics

---

## ECEN-4242 (3) Communication Theory

Covers modern digital and analog communication systems, Fourier analysis of signals and systems, signal transmission, amplitude modulation, angle modulation, digital communication systems, and behavior of communication systems in the presence of noise, including both analog and digital systems. Prereqs., ECEN 3300 and ECEN 3810 or equivalent. Prerequisites: Restricted to College of Engineering majors only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Communications

---

## ECEN-4324 (3) Fundamentals of Microsystem Packaging

Introduction to the fundamentals of microsystems packaging. This is a seminar style course which surveys topics in microsystem packaging such as: electrical package design, design for reliability, thermal management, multichip packaging, IC Assembly, sealing and encapsulation, and board assembly. Coreq., ECEN 3410 or instructor consent. Same as ECEN 5324. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Engineering majors only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Electromagnetics

---

## ECEN-4375 (3) Microstructures Laboratory

Offers experience in monolithic silicon integrated circuit fabrication techniques, including Ic layout, pattern compiling and generation, mask making, oxidation, photolithography, diffusion, implantation, metallization, bonding, process analysis, and testing. Includes design project. Prereq., ECEN 3320. Same as ECEN 5375.

College of Engineering & Applied Science | Electrical & Computer Engineering | Nanostructures and Devices

---

---

## ECEN-4423 (3) Chaotic Dynamics

Explores chaotic dynamics theoretically and through computer simulations. Covers the standard computational and analytical tools used in nonlinear dynamics and concludes with an overview of leading-edge chaos research. Topics include time and phase-space dynamics, surfaces of section, bifurcation diagrams, fractal dimension, and Lyapunov exponents. Prereqs., two semesters calculus, ECEN 1030 or CSCI 1300 or equivalent, and PHYS 1110. Recommended prereqs., PHYS 1120, CSCI 3656, and MATH 3130. Same as CSCI 4446 and ECEN 5423.

College of Engineering & Applied Science | Electrical & Computer Engineering | Computer and Digital Systems

---

## ECEN-4517 (3) Power Electronics and Photovoltaic Power Systems Laboratory

Focuses on analysis, modeling, design, and testing of electrical energy processing systems in a practical laboratory setting. Studies power electronics converters for efficient utilization of available energy sources, including solar panels and utility. The experimental projects involve design, fabrication, and testing of a solar power system. Prereq., ECEN 4797. Restricted to seniors. Same as ECEN 5517.

College of Engineering & Applied Science | Electrical & Computer Engineering | Power

---

## ECEN-4532 (3) Digital Signal Processing Laboratory

Develops experience in code development, debugging, and testing of real-time digital signal processing algorithms using dedicated hardware. Applications include filtering, signal synthesis, audio special effects, and frequency domain techniques based on the Fast Fourier Transform. Prereq., ECEN 3300. Coreq., ECEN 4632. Same as ECEN 5532.

College of Engineering & Applied Science | Electrical & Computer Engineering | Communications

---

## ECEN-4553 (3) Compiler Construction

Introduces the principles and techniques for compiling high-level programming languages to assembly code. Topics include parsing, instruction selection, register allocation, and compiling high-level features such as polymorphism, first-class functions, and objects. Students build a complete compiler for a simple language. Prereqs., ECEN 2703 and ECEN 3350. Same as CSCI 4555 and ECEN 5523. Prerequisites: Restricted to College of Engineering majors only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Computer and Digital Systems

---

## ECEN-4555 (3) Principles of Energy Systems & Devices

Develops principles underlying electronic, optical and thermal devices, materials and nanostructures for renewable energy. Course provides a foundation in statistical thermodynamics, and uses it to analyze the operation and efficiency limits of devices for photovoltaics, energy storage (batteries & ultra-capacitors), chemical conversion (fuel cells and engines), solid state lighting, heat pumps, cooling, and potentially harvesting zero-point energy from the vacuum. Prereq., ECEN 3810. Prereq. or coreq., PHYS 2130 or 2170 or instructor

consent. Same as ECEN 5555.

College of Engineering & Applied Science | Electrical & Computer Engineering | Nanostructures and Devices

---

## ECEN-4583 (3) Software System Development

Lectures deal with techniques for product requirements definition, project planning, coding, verification, validation, performance evaluation, and maintenance of medium-scale (2-3000 line) systems. Primary emphasis is on practical application of these techniques to a specified software project. Students work in teams to produce appropriate documents for each phase and are responsible for project completion according to specification and schedule. Course project is written in C on a Unix look-alike system; prior knowledge of C or Unix is not required. Prereq., CSCI 2270 or instructor consent.

College of Engineering & Applied Science | Electrical & Computer Engineering | Computer and Digital Systems

---

## ECEN-4593 (3) Computer Organization

Studies computer design at the gate level. Discusses instruction set architecture design, arithmetic and logic unit design, control logic, memory design and caches, simple pipelining, I/O, and peripheral devices. Briefly covers aspects of modern computer architecture, such as multicore processors and cache coherence for these. Prereq., ECEN 2350, and ECEN 3350 or CSCI 2400. Same as CSCI 4593. Prerequisites: Restricted to College of Engineering majors only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Communications

---

## ECEN-4606 (3) Undergraduate Optics Laboratory

Introduces fundamental concepts, techniques, and technology of modern optical and photonic systems. Individual labs cover particular fields of optical technology, including light sources such as lasers and LEDs, interferometers, fiber-optic communications, photodetection, spectrometers, and holography. Practical skills such as how to align an optical system will also be emphasized. Prereq. ECEN 3400. Coreq. ECEN 4106 or equivalent. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Optics

---

## ECEN-4610 (2) Capstone Laboratory Part 1

Hands-on laboratory experience utilizing teams in the systematic proposal, design, integration, and testing of an electronic/computer based system. The result will be the prototype of a stand-alone analog/digital system. Must taken ECEN 4620 to complete the sequence. Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Electrical and Computer Engineering (ECEN), Electrical Engineering (EEEN) majors or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only. Prereqs., ECEN 2260, 2270, 3350, 3360 and 3810. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Electrical and Computer Engineering (ECEN), Electrical Engineering (EEEN) majors or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Electrical & Computer Engineering | General

---

---

## ECEN-4613 (3) Embedded System Design

Introduces system hardware and firmware design for embedded applications. Students independently design and develop a hardware platform encompassing a microcontroller and peripherals. Firmware is developed in C and assembly. A significant final project is designed, developed, documented, and presented. Prereqs., ECEN 2350 and 3350, or instructor consent. Recommended prereqs., ECEN 3250 and 4593. Same as ECEN 5613. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Engineering majors only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Computer and Digital Systems

---

## ECEN-4616 (3) Optoelectronic System Design

Examines optical components and electro-optic devices with the goal of integrating into well design optoelectronic systems. Sample systems include optical storage, zoom lenses, and telescopes. Prereq. ECEN 3400.

College of Engineering & Applied Science | Electrical & Computer Engineering | Optics

---

## ECEN-4623 (3) Real-Time Embedded Systems

Design and build a microprocessor-based embedded system application requiring integration of sensor/actuator devices, a real-time operating system and application firmware and software. Real-time rate monotonic theory and embedded architecture are covered. Prereq., ECEN 2350 and ECEN 3350, or instructor consent. Recommended prereq., ECEN 4613. Same as ECEN 5623. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Engineering majors only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Computer and Digital Systems

---

## ECEN-4632 (3) Introduction to Digital Filtering

Covers both the analysis and design of FIR and IIR digital filters. Discusses implementations in both software and hardware. Emphasizes use of the FFT as an analysis tool. Includes examples in speech processing, noise canceling, and communications. Prereq., ECEN 3300. Restricted to seniors.

College of Engineering & Applied Science | Electrical & Computer Engineering | Communications

---

## ECEN-4633 (3) Hybrid Embedded Systems

Introduces system hardware and design techniques for embedded and hybrid reconfigurable systems. Intended for those interested in developing projects using hardware description languages to build application-specific computing systems. Industry standards are used for design, development, and debugging. Prereqs., ECEN 2350, 3350, and 4593, or equivalent. Same as ECEN 5633. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Engineering majors only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Computer and Digital Systems

---

---

## ECEN-4634 (3) Microwave and RF Laboratory

Introduce RF and microwave measurement methods. A laboratory course whose experiments build on material learned in ECEN 3410 (Electromagnetic Waves and Transmission): electromagnetic waves, transmission lines, waveguides, time-domain reflection, frequency-domain measurement, microwave networks, impedance matching, antenna pattern measurement, radar, and simple nonlinear concepts such as harmonics, square-law detection, mixing and transmitter/receiver applications. Prereq., ECEN 3410. Same as ECEN 5634. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

[College of Engineering & Applied Science](#) [Electrical & Computer Engineering](#) [Electromagnetics](#)

---

## ECEN-4638 (2) Control Systems Laboratory

Provides experience in control system design and analysis, using both real hardware and computer simulation. Covers the entire control system design cycle: modeling the system, synthesizing a controller, conducting simulations, analyzing the design to suggest modifications and improvements, and implementing the design for actual testing. Prereq., ECEN 3300. Coreq., ECEN 4138. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

[College of Engineering & Applied Science](#) [Electrical & Computer Engineering](#) [Dynamical Systems and Control](#)

---

## ECEN-4643 (3) SW Engineering of Concurrent Systems

Addresses engineering of applications requiring multiple software processes running concurrently, sharing data, and communicating as a system in a single environment. Topics include performance analysis of architecture design; analysis of requirements, design and testing of synchronization and communication; the interplay of system design and performance with the impact of memory management, input/output, and file system support. Prereq., ECEN 4583 or 5543. ECEN 4643 and 5643 are the same course. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior).

ECEN

## ECEN-4652 (3) Communication Laboratory

Involves laboratory experiments demonstrating material taught in ECEN 4242. Uses spectrum analysis to study baseband signals and signal processors. Topics include noise, AM, FM, PM, sampling, quantizing/encoding, TDM, FDM, equalizers, and a complete communication system. Prereq. or coreq., ECEN 4242. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Engineering majors only.

[College of Engineering & Applied Science](#)
[Electrical & Computer Engineering](#)
[Communications](#)

## ECEN-4653 (3) Real-Time Digital Media

Learn how to design and build Linux-based real-time system applications for digital media encode/decode and transport. Course focus is on the process as well as fundamentals of designing, coding, and testing Linux-based real-time systems often used in industry for digital media systems. Students use POSIX kernel-mapped threads and drivers to implement real-time digital media solutions. Prereqs., ECEN 1030 or CSCI 1300, and CSCI 3753 or equivalent. Restricted to engineering students. ECEN 4653 and 5653 are the same course.

[College of Engineering & Applied Science](#)
[Electrical & Computer Engineering](#)
[Computer and Digital Systems](#)

## ECEN-4743 (3) SW Engineering of Distributed Systems

Addresses engineering of networked applications and self-contained embedded system products involving multiple processors. The fundamental concepts of software engineering are complicated by an application running simultaneously and asynchronously on multiple processors over a network. Topics: specification, analysis, design, and testing of distributed components including concerns of security, synchronization, transaction coordination, data replication, web services, and service oriented architectures. Prereq., ECEN 4583 or 5543 or CSCI 5548. Recommended prereq., ECEN 5643. ECEN 4743 and 5743 are the same course. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior).

[College of Engineering & Applied Science](#)
[Electrical & Computer Engineering](#)
[Computer and Digital Systems](#)

---

## ECEN-4753 (3) Computer Performance Modeling

Presents a broad range of system modeling techniques, emphasizing applications to computer systems. Covers stochastic processes, queuing network models, stochastic Petri nets, and simulation (including parallel processing techniques). Prereq., CSCI 3753 or equivalent and second-semester calculus. Recommended prereq., a course in statistics. Same as CSCI 4753, 5753, and ECEN 5753.

College of Engineering & Applied Science Electrical & Computer Engineering Computer and Digital Systems

---

## ECEN-4797 (3) Introduction to Power Electronics

An introduction to switched-mode converters. Includes steady-state converter modeling and analysis, switch realization, discontinuous conduction mode, and transformer-isolated converters. Ac modeling of converters using averaged methods, small-signal transfer functions, feedback loop design, and transformer design. Prereq., ECEN 3250. Same as ECEN 5797. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

College of Engineering & Applied Science Electrical & Computer Engineering Power

---

## ECEN-4811 (3) Neural Signals and Functional Brain Imaging

Explores bioelectric and metabolic signals generated by the nervous system from two standpoints: 1) their biophysical genesis and role in neural integration and 2) neurotechnologies such as electroencephalography, magnetoencephalography, deep brain stimulation, and functional magnetic resonance imaging. Prereqs., ECEN 2260 or 3030, ASEN 3300, or instructor consent. Same as ECEN 5811 and ASEN 4216.

College of Engineering & Applied Science Electrical & Computer Engineering Bioengineering

---

## ECEN-4821 (3) Neural Systems and Physiological Control

A biophysical exploration of human physiology from the standpoints of control systems and neural information processing. Topics include: neural control of movement and cardiovascular performance, tissue growth and repair, carcinogenesis, and physiological responses to microgravity. Prereqs., ECEN 2260 or 3030, ASEN 3300, or instructor consent. Same as ECEN 5821 and ASEN 4426/5426.

College of Engineering & Applied Science Electrical & Computer Engineering Bioengineering

---

## ECEN-4827 (3) Analog IC Design

Covers the fundamentals of transistor-level analog integrated circuit design. Starting with motivations from application circuits, the course develops principles of dc biasing, device models, amplifier stages, frequency response analysis and feedback and compensation techniques for multi-stage operational amplifiers. Prereq., ECEN 3250. Same as ECEN 5827. Prerequisites: Restricted to College of Engineering majors only.

College of Engineering & Applied Science Electrical & Computer Engineering Power

---

---

## ECEN-4831 (3) Brains, Minds, and Computers

Provides background for the design of artificially intelligent systems based upon our present knowledge of the human brain. Includes similarities and differences between the brain and computers, robots, and common computer models of brain and mind. Emphasizes the neuron as an information processor, and organization of natural as well as synthetic neural networks. Prereq., ECEN 2260 or 3030, or instructor consent. Same as ECEN 5831, ASEN 4436/5436.

College of Engineering & Applied Science | Electrical & Computer Engineering | Bioengineering

---

## ECEN-4840 (1-6) Independent Study

Offers an opportunity for seniors to do independent, creative work. Numbered ECEN 4840-4849. Prereq., instructor consent.

College of Engineering & Applied Science | Electrical & Computer Engineering | General

---

## ECEN-5005 (1-4) Special Topics

College of Engineering & Applied Science | Electrical & Computer Engineering | Nanostructures and Devices

---

## ECEN-5008 (1-4) Special Topics

Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Dynamical Systems and Control

---

## ECEN-5011 (1-4) Special Topics

Same as ECEN 4011. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Bioengineering

---

## ECEN-5012 (3) Special Topics

Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Communications

---

---

## ECEN-5016 (1-4) Special Topics

College of Engineering & Applied Science | Electrical & Computer Engineering | Optics

---

## ECEN-5018 (1-4) Special Topics

Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Dynamical Systems and Control

---

## ECEN-5021 (1-4) Special Topics

Prerequisites: Restricted to graduate students in Electrical Engineering (EEEN) or Electrical/Computer Engineering (ECEN) or Electrical Engineering Concurrent or Electrical/Computer Engineering Concurrent Degree students only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Bioengineering

---

## ECEN-5023 (1-4) Special Topics

Same as ECEN 4023.

College of Engineering & Applied Science | Electrical & Computer Engineering | Computer and Digital Systems

---

## ECEN-5024 (1-4) Special Topics

Same as ECEN 4024.

College of Engineering & Applied Science | Electrical & Computer Engineering | Electromagnetics

---

## ECEN-5028 (1-4) Special Topics

College of Engineering & Applied Science | Electrical & Computer Engineering | Dynamical Systems and Control

---

## ECEN-5032 (3) Special Topics

College of Engineering & Applied Science | Electrical & Computer Engineering | Bioengineering

---

## ECEN-5049 (1-4) Special Topics

College of Engineering & Applied Science | Electrical & Computer Engineering | VLSI CAD Methods

## ECEN-5053 (1-4) Special Topics

Same as ECEN 4053.

College of Engineering & Applied Science | Electrical & Computer Engineering | Computer and Digital Systems

## ECEN-5104 (3) Computer-Aided Microwave Circuit Design

Emphasizes the design of strip-line and microstrip circuits, using a CAD package. Discusses design of impedance transformers, amplifiers, switches, phase-shifters, etc. Assignments include design of typical circuits and their analysis using a microwave circuit analysis program. Laboratory includes measurements using a network analyzer facility on a typical circuit designed and fabricated by students. Prereq., ECEN 3410. Prerequisites: Restricted to graduate students in Electrical Engineering (EEEN) or Electrical/Computer Engineering (ECEN) or Electrical Engineering Concurrent or Electrical/Computer Engineering Concurrent Degree students only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Electromagnetics

## ECEN-5114 (3) Waveguides and Transmission Lines

Intermediate course dealing with guided-wave systems at HF, microwave, and optical frequencies. Modern waveguiding structures, including circular metallic waveguides, microstrip transmission lines, and optical waveguides are treated. Additional material may include waveguide losses, excitation of waveguides, microwave network theory, coupled-mode theory, resonators, and pulse propagation in waveguides. Prereq., ECEN 3410.

College of Engineering & Applied Science | Electrical & Computer Engineering | Electromagnetics

ECEN

### ECEN-5120 (3) Neural Network Design

Same as ECEN 4120.

[College of Engineering & Applied Science](#) [Electrical & Computer Engineering](#) [General](#)

### ECEN-5134 (3) Electromagnetic Radiation and Antennas

Covers elementary sources and antennas, cylindrical wire antennas, loop antennas, radiation patterns and antenna gain, aperture sources such as horns and dishes, specialized antennas such as microstrip patches, linear and circular arrays, mutual coupling and ground effects, ray and numerical formulations, transmission formulas, and antenna applications. Prereq., ECEN 3410. Prerequisites: Restricted to any graduate students or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

[College of Engineering & Applied Science](#) [Electrical & Computer Engineering](#) [Electromagnetics](#)

### ECEN-5138 (3) Control Systems Analysis

Topics covered in ECEN 4138 will be investigated in more depth, require external readings, additional homework will be assigned and the exams will be more difficult. Restricted to graduate students in Electrical Engineering (EEEN) or Electrical/Computer Engineering (ECEN) or Electrical Engineering Concurrent or Electrical/Computer Engineering Concurrent Degree students only. Prereq., ECEN 3300 or equivalent. Same as ECEN 4138. Prerequisites: Restricted to graduate students in Electrical Engineering (EEEN) or Electrical/Computer Engineering (ECEN) or Electrical Engineering Concurrent or Electrical/Computer Engineering Concurrent Degree students only.

[College of Engineering & Applied Science](#) [Electrical & Computer Engineering](#) [Dynamical Systems and Control](#)

### ECEN-5139 (3) Formal Verification of VLSI Systems

---

Covers two-level and multilevel minimization, optimization via expert systems, algebraic and Boolean decomposition, layout methodologies, state assignment, encoding and minimization, silicon compilation. Prereqs., ECEN 2703 and general proficiency in discrete mathematics and programming.

College of Engineering & Applied Science | Electrical & Computer Engineering | VLSI CAD Methods

---

## ECEN-5154 (3) Computational Electromagnetics

Provides a computational study of microwave circuits and antennas, using finite-difference, finite-element, and moment methods. Requires students to develop algorithms, write and execute programs, and prepare reports analyzing results. Circuits include waveguides, microstrip lines, and center-fed dipole antennas. Prereq., ECEN 3410.

College of Engineering & Applied Science | Electrical & Computer Engineering | Electromagnetics

---

## ECEN-5156 (3) Physical Optics

Covers the application of Maxwell's equations to optical wave propagation in free space and in media. Topics include polarization, dispersion, geometrical optics, interference, partial coherence, and diffraction. Prereq. ECEN 3410.

College of Engineering & Applied Science | Electrical & Computer Engineering | Optics

---

## ECEN-5166 (3) Guided Wave Optics

Builds up the concepts necessary to understand guided wave optical systems. Topics include slab wave-guides, semiconductor lasers, fiber optics, and integrated optics. Prereqs., ECEN 4645 or 5645, and ECEN 5156.

College of Engineering & Applied Science | Electrical & Computer Engineering | Optics

---

## ECEN-5224 (3) High Speed Digital Design

Same as ECEN 4224.

College of Engineering & Applied Science | Electrical & Computer Engineering | Electromagnetics

---

## ECEN-5254 (3) Remote Sensing Signals and Systems

Examines passive and active techniques for remote sensing with emphasis on fundamental noise and detection issues from radio to optical frequencies. Emphasis is placed on electromagnetic wave detection, statistical signal and noise analysis, remote sensing system architecture, and hardware for remote sensing systems. Systems studied include radiometers, radars (real and synthetic aperture), interferometers, and lidars. Applications to detection and surveillance, Earth remote sensing, astronomy, and imaging systems are

covered. Prereqs., ECEN 3300 and 3400, or instructor consent.

College of Engineering & Applied Science Electrical & Computer Engineering Electromagnetics

---

## ECEN-5264 (3) Electromagnetic Absorption, Scattering, and Propagation

Electromagnetic waves in communication, navigation, and remote sensing systems from radio to optical frequencies, including propagation in deterministic and random media. Topics include absorption and refraction by gases, discrete scattering by precipitation, clouds, and aerosols, continuous scattering by refractivity fluctuations, earth-space propagation and Faraday rotation in plasmas, and radiative transfer theory.

College of Engineering & Applied Science Electrical & Computer Engineering Electromagnetics

---

## ECEN-5274 (3) Radar Science and Techniques

Studies atmospheric radar fundamentals. Examines scattering by precipitation and atmospheric turbulence; long-wavelength radars and the dynamics of the middle and upper atmosphere; design of meteorological and clear-air radars; profiling tropospheric winds, temperature, and humidity by radar and radiometry; and ionospheric sounding using ionosondes and incoherent-scatter radars. Prereq., ECEN 5254 or instructor consent.

College of Engineering & Applied Science Electrical & Computer Engineering Electromagnetics

---

## ECEN-5322 (3) Search Engine & Analysis of High-dimensional Dataset

Provides students with an exposition of the most recent methods for searching and analyzing high dimensional datasets. The class includes a project: students will design and implement a content-based music information retrieval, such as the ones used by Gracenote, Shazam, or Pandora. Restricted to graduate students. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science Electrical & Computer Engineering Computer and Digital Systems

---

## ECEN-5324 (3) Fundamentals of Microsystem Packaging

Same as ECEN 4324. Prerequisites: Restricted to any graduate students or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

College of Engineering & Applied Science Electrical & Computer Engineering Electromagnetics

---

## ECEN-5345 (3) Introduction to Solid State Physics

Course provides an introduction to the electronic, photonic and phononic properties of solid state materials and devices. Covers optical constants, free electron gas, plasmons, energy bands, semiconductors and doping, excitons, quantum wells, phonons, and electrooptical effects. The course makes use of quantum mechanical methods. Prereqs., ECEN 3400 and basic quantum mechanics or instructor

consent. Prerequisites: Restricted to any graduate students or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Nanostructures and Devices

---

## ECEN-5355 (3) Principles of Electronic Devices 1

Relates performance and limitations of solid state devices to their structures and technology. Examines semiconductor physics and technology. Includes Pn-junction, Mos, and optoelectronic devices. For both advance circuit and device engineers. Prereq., ECEN 3320 or instructor consent. Prerequisites: Restricted to any graduate students or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Nanostructures and Devices

---

## ECEN-5358 (3) Optimization and Optimal Control

Introduces the theory and practice of optimization and optimal control. Topics include basic theory, nonlinear system trajectories and regulation, function space operators and derivatives, optimality conditions, barrier functionals, and Newton's method in function space. Recommended prereq., ECEN 5448. Restricted to graduate students in Electrical Engineering (EEEN) or Electrical/Computer Engineering (ECEN) or Electrical Engineering Concurrent or Electrical/Computer Engineering Concurrent Degree students only. Prerequisites: Restricted to graduate students in Electrical Engineering (EEEN) or Electrical/Computer Engineering (ECEN) or Electrical Engineering Concurrent or Electrical/Computer Engineering Concurrent Degree students only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Dynamical Systems and Control

---

## ECEN-5365 (3) Semiconductor Materials and Devices 1

Includes an introduction to time-independent quantum mechanics and perturbation theory, tunneling, application to quantum-well electronic and optical devices, electrons in a crystalline solid, Bloch's theorem, energy bands and energy gaps, the effective mass approximation, a survey of energy bands for real crystals: Si, Ge, GaAs, InP, AlGaAs, etc., band structure engineering, and the electrical and optical properties of compound semiconductors. Prereq., ECEN 3320 and 5345.

College of Engineering & Applied Science | Electrical & Computer Engineering | Nanostructures and Devices

---

## ECEN-5375 (3) Microstructures Laboratory

Same as ECEN 4375.

College of Engineering & Applied Science | Electrical & Computer Engineering | Nanostructures and Devices

---

## ECEN-5418 (3) Automatic Control Systems 1

Coverage of principles of control systems with Multiple Inputs and Multiple Outputs (MIMO). Topics include MIMO state-space theory,

---

applications of the singular value decomposition (SVD), coprime factorization methods, frequency domain topics, and an introduction to H-infinity design. Prereqs., ECEN 3300, 4138, and 5448, or equivalents.

College of Engineering & Applied Science    Electrical & Computer Engineering    Dynamical Systems and Control

---

## ECEN-5423 (3) Chaotic Dynamics

Same as ECEN 4423 and CSCI 5446.

College of Engineering & Applied Science    Electrical & Computer Engineering    Computer and Digital Systems

---

## ECEN-5438 (3) Robot Control

Provides a comprehensive treatment of the mathematical modeling of robot mechanisms and the analysis methods used to design control laws for these mechanisms. Prereqs., ECEN 4138 and PHYS 1110.

College of Engineering & Applied Science    Electrical & Computer Engineering    Dynamical Systems and Control

---

## ECEN-5448 (3) Advanced Linear Systems

Offers a state space approach to analysis and synthesis of linear systems, state transition matrix, controllability and observability, system transformation, minimal realization, and analysis and synthesis of multi-input and multi-output systems. Prereq., ECEN 3300 and 4138. Prerequisites: Restricted to any graduate students or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

College of Engineering & Applied Science    Electrical & Computer Engineering    Dynamical Systems and Control

---

## ECEN-5458 (3) Sampled Data and Digital Control Systems

Provides an analysis and synthesis of discrete-time systems. Studies sampling theorem and sampling process characterization, z-transform theory and z-transferfunction, and stability theory. Involves data converters (A/D and D/A), dead-beat design, and digital controller design. Prereqs., ECEN 3300 and 4138. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science    Electrical & Computer Engineering    Dynamical Systems and Control

---

## ECEN-5503 (3) Computer Systems Design and Architecture

Covers digital logic circuits, assembly language programming, and gate-level computer design and architecture. Also discusses computer arithmetic algorithms, I/O, peripheral device performance, networking, and the Internet. Limited to graduate students. For ECE/CS majors with nontraditional backgrounds.

College of Engineering & Applied Science    Electrical & Computer Engineering    Computer and Digital Systems

---

---

---

# ECEN-5517 (3) Power Electronics and Photovoltaic Power Systems Laboratory

Prereq., ECEN 5797. Same as ECEN 4517.

ECEN

### ECEN-5523 (3) Compiler Construction

Same as ECEN 4553 and CSCI 5525. Prerequisites: Restricted to any graduate students or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

[College of Engineering & Applied Science](#) [Electrical & Computer Engineering](#) [Computer and Digital Systems](#)

### ECEN-5532 (3) Digital Signal Processing Laboratory

Same as ECEN 4532.

[College of Engineering & Applied Science](#) [Electrical & Computer Engineering](#) [Communications](#)

### ECEN-5533 (3) Fundamental Concepts of Programming Languages

Considers concepts common to a variety of programming languages--how they are described (both formally and informally) and how they are implemented. Provides a firm basis for comprehending new languages and gives insight into the relationship between languages and machines. Prereq., CSCI 3155 or instructor consent. Same as CSCI 5535.

[College of Engineering & Applied Science](#) [Electrical & Computer Engineering](#) [Computer and Digital Systems](#)

### ECEN-5543 (3) Software Engineering of Standalone Programs

Applies engineering principles to phases of software product development, project planning, requirements definition, design, design patterns, validation, and maintenance. Emphasizes practical methods for communicating and verifying definitions and designs--- prototyping, inspections, and modeling (primarily UML). Includes relation to embedded systems and object-oriented design. Prereqs.,

ECEN 1030/CSCI 1300, CSCI 2270, or instructor consent. Same as CSCI 5548. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science Electrical & Computer Engineering Computer and Digital Systems

---

## ECEN-5553 (3) Parallel Processing

Examines a range of topics involved in using parallel operations to improve computational performance. Discusses parallel architectures, parallel algorithms and parallel programming languages. Architectures covered include vector computers, multiprocessors, network computers, and data flow machines. Prereq., background in computer organization, introduction to programming languages, elementary numerical analysis, ECEN 4593 and CSCI 3656, or instructor consent. Same as CSCI 5551.

College of Engineering & Applied Science Electrical & Computer Engineering Computer and Digital Systems

---

## ECEN-5555 (3) Principles of Energy Systems & Devices

Same as ECEN 4555. Prerequisites: Restricted to students with 57-180 credits (Juniors or Seniors) or Graduate students only.

College of Engineering & Applied Science Electrical & Computer Engineering Nanostructures and Devices

---

## ECEN-5573 (3) Advanced Operating Systems

Same as CSCI 5573.

College of Engineering & Applied Science Electrical & Computer Engineering Computer and Digital Systems

---

## ECEN-5583 (3) Artificial Intelligence

Prereq., CSCI 3245 or equivalent. Same as CSCI 5582.

College of Engineering & Applied Science Electrical & Computer Engineering Computer and Digital Systems

---

## ECEN-5593 (3) Advanced Computer Architecture

Provides a broad-scope treatment of important concepts in the design and implementation of high-performance computer systems. Discusses important issues in the pipelining of a processor, out-of-order instruction issue and superscalar designs, design of cache memory systems for such systems, and architectural features required for multicore processor designs. Also studies current and historically important computer architectures. Prereq., ECEN 4593 or instructor consent. Same as CSCI 5593. Prerequisites: Restricted to any graduate students or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

College of Engineering & Applied Science Electrical & Computer Engineering Computer and Digital Systems

---

---

## ECEN-5603 (3) Software Project Management

Presents topics and techniques critical to the management of software product development, including estimating, planning, quality, tracking, reporting, team organization, people management, and legal issues. Gives special attention to problems unique to software projects. Prereqs., ECEN 4583, 5543, and CSCI 4318, or equivalent industrial experience. Same as CSCI 5608 and EMEN 5031.

Prerequisites: Restricted to graduate students with a plan of Electrical/Computer Engineering.

College of Engineering & Applied Science | Electrical & Computer Engineering | Computer and Digital Systems

---

## ECEN-5606 (3) Optics Laboratory

Provides advanced training in experimental optics. Consists of optics experiments that introduce the techniques and devices essential to modern optics, including characterization of sources, photodetectors, modulators, use of interferometers, spectrometers, and holograms, and experimentation of fiber optics and Fourier optics. Prereq., undergraduate optics course such as PHYS 4510. Same as PHYS 5606.

College of Engineering & Applied Science | Electrical & Computer Engineering | Optics

---

## ECEN-5612 (3) Noise and Random Processes

Reviews probability theory, convergence and probability bounds, multivariable normal theory, sequences of random variables and stochastic processes, Bernoulli and Poisson processes, wide-sense stationary processes, and correlation functions and power spectra. Also includes linear systems with random inputs and Gauss-Markov processes, first- and second-order properties of Arma processes, and Markov chains. Prereqs., ECEN 3300 and 3810 or MATH 4510. Prerequisites: Restricted to any graduate students or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Communications

---

## ECEN-5613 (3) Embedded System Design

Same as ECEN 4613. Prerequisites: Restricted to any graduate students or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Computer and Digital Systems

---

## ECEN-5616 (3) Optoelectric System Design

Same as ECEN 4616. Prerequisites: Restricted to any graduate students or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Optics

---

## ECEN-5622 (3) Information Theory and Coding

Entropy rates of information sources, fundamental limits of data compression, Huffman and arithmetic codes; mutual information,

---

fundamental limits of information transmission over noisy communication channels with/without feedback. Selected topics in information storage, lossy data compression, and network information theory. Prereqs., ECEN 3810 or equivalent, or instructor consent. Prerequisites: Restricted to any graduate students or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Communications

---

## ECEN-5623 (3) Real-Time Embedded Systems

Same as ECEN 4623. Prerequisites: Restricted to any graduate students or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Computer and Digital Systems

---

## ECEN-5626 (3) Active Optical Devices

Analysis of active optical devices such as semiconductor laser, detector and flat panel display by clearly defining and interconnecting the fundamental physical mechanism, device design and operating principles and device performance. Recommended prereq., ECEN 5355.

College of Engineering & Applied Science | Electrical & Computer Engineering | Optics

---

## ECEN-5632 (3) Theory and Application of Digital Filtering

Digital signal processing and its applications are of interest to a wide variety of scientists and engineers. The course covers such topics as characterization of linear discrete-time circuits by unit pulse response, transfer functions, and difference equations, use of z-transforms and Fourier analysis, discrete Fourier transform and fast algorithms (FFT), design of finite and infinite impulse response filters, frequency transformations, study of optimized filters for deterministic signals. Prerequisites: Restricted to any graduate students or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Communications

---

## ECEN-5633 (3) Hybrid Embedded Systems

Same as ECEN 4633. Prerequisites: Restricted to any graduate students or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Computer and Digital Systems

---

## ECEN-5634 (3) Graduate Microwave and RF Laboratory

Introduce RF and microwave measurement methods. A laboratory course whose experiments build on material learned in ECEN 3410 (Electromagnetic Waves and Transmission): electromagnetic waves, transmission lines, waveguides, time-domain reflection, frequency-domain measurement, microwave networks, impedance matching, antenna pattern measurement, radar, and simple nonlinear concepts such as harmonics, square-law detection, mixing and transmitter/receiver applications. Prereq., ECEN 3410. Restricted to graduate

---

students. Same as ECEN 4634. Prerequisites: Restricted to any graduate students or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Electromagnetics

---

## ECEN-5643 (3) SW Engineering of Concurrent Systems

Addresses engineering of applications requiring multiple software processes running concurrently, sharing data, and communicating as a system in a single environment. Topics include performance analysis of architecture design; analysis of requirements, design and testing of synchronization and communication; the interplay of system design and performance with the impact of memory management, input/output, and file system support. Prereq., ECEN 4583 or 5543. ECEN 4643 and 5643 are the same course. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Computer and Digital Systems

---

## ECEN-5645 (3) Introduction to Optical Electronics

Introduces lasers, Gaussian optics, modulators, nonlinear optics, optical detectors, and other related devices. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Nanostructures and Devices

---

## ECEN-5652 (3) Detection and Extraction of Signals from Noise

Introduces detection, estimation, and time series analysis. Topics include hypothesis testing, detection of known form and random signals, least squares parameter estimation, maximum likelihood theory, minimum mean-squared error estimation, Kalman-Wiener filtering, prediction in stationary time series, and modal analysis. Applications include studies in communications, control, and experimental modeling. Prereq., ECEN 5612.

College of Engineering & Applied Science | Electrical & Computer Engineering | Communications

---

## ECEN-5653 (3) Real-Time Digital Media

Learn how to design and build Linux-based real-time system applications for digital media encode/decode and transport. Course focus is on the process as well as fundamentals of designing, coding, and testing Linux-based real-time systems often used in industry for digital media systems. Students use POSIX kernel-mapped threads and drivers to implement real-time digital media solutions. Prereqs., ECEN 1030 or CSCI 1300, and CSCI 3753 or equivalent. Restricted to engineering students. ECEN 4653 and 5653 are the same course.

College of Engineering & Applied Science | Electrical & Computer Engineering | Computer and Digital Systems

---

## ECEN-5672 (3) Digital Image Processing

Course objective is to present the fundamental techniques available for image representation and compression (e.g., wavelets), filtering

(e.g., Wiener and nonlinear filter), and segmentation (e.g., anisotropic diffusion). Prereq., ECEN 5632 or instructor consent.

ECEN

### ECEN-5673 (3) Distributed Systems

Examines systems that span multiple autonomous computers. Topics include system structuring techniques, scalability, heterogeneity, fault tolerance, load sharing, distributed file and information systems, naming, directory services, resource discovery, resource and network management, security, privacy, ethics, and social issues. Recommended prereq., CSCI 5573 or a course in computer networks. Same as CSCI 5673.

[College of Engineering & Applied Science](#) [Electrical & Computer Engineering](#) [Computer and Digital Systems](#)

### ECEN-5682 (3) Theory and Practice of Error Control Codes

Block and convolutional codes for reliable transmission of digital data over unreliable noisy channels. Algebraic and dsp characterizations of cyclic codes such as Bch/Rs codes. Decoding algorithms for block codes and the Viterbi algorithm. Graph codes and iterative decoding. Prereq., ECEN 3300.

[College of Engineering & Applied Science](#) [Electrical & Computer Engineering](#) [Communications](#)

### ECEN-5692 (3) Principles of Digital Communication

Techniques for efficient and reliable transmission of information over bandwidth and power constrained communication channels; digital modulation methods, power spectral density calculations, optimum receiver principles, error rate analysis, channel coding potential in wired/wireless media, trellis coded modulation, and equalization. Prereqs., ECEN 3300 and 5612 or equivalents. Recommended prereqs., ECEN 5622 and 5632.

[College of Engineering & Applied Science](#) [Electrical & Computer Engineering](#) [Communications](#)

---

## ECEN-5696 (3) Fourier Optics

Introduces a system level approach to the analysis and design of optical systems. Topics include holography, Fourier transform properties of lenses, two-dimensional convolution and correlation functions, spatial filtering, and optical computing techniques. Also covers coherent and incoherent imaging techniques, tomography, and synthetic aperture imaging. Prereqs., ECEN 3300 and 3410, or instructor consent. Prerequisites: Restricted to any graduate students or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Optics

---

---

## ECEN-5743 (3) SW Engineering of Distributed Systems

Addresses engineering of networked applications and self-contained embedded system products involving multiple processors. The fundamental concepts of software engineering are complicated by an application running simultaneously and asynchronously on multiple processors over a network. Topics: specification, analysis, design, and testing of distributed components including concerns of security, synchronization, transaction coordination, data replication, web services, and service oriented architectures. Prereq., ECEN 4583 or 5543 or CSCI 5548. Recommended prereq., ECEN 5643. ECEN 4743 and 5743 are the same course. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Computer and Digital Systems

---

---

## ECEN-5753 (3) Computer Performance Modeling

Same as ECEN 4753 and CSCI 4753/5753.

College of Engineering & Applied Science | Electrical & Computer Engineering | Computer and Digital Systems

---

---

## ECEN-5787 (3) Power Quality Phenomena Power Systems

Single-time and periodic disturbances of power systems and their causes and effects on sensitive (electronic) end-use devices and power system components are studied and modeled. Measurement techniques of the impact of such disturbances (power quality phenomena) on devices as well as prevention and mitigating techniques are addressed. Prereq., ECEN 3170.

College of Engineering & Applied Science | Electrical & Computer Engineering | Power

---

---

## ECEN-5797 (3) Introduction to Power Electronics

Same as ECEN 4797. Prerequisites: Restricted to any graduate students or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Power

---

---

## ECEN-5807 (3) Modeling and Control of Power Electronic Systems

Studies modeling and control topics in power electronics. Averaged switch modeling of converters, computer simulation, ac modeling of the discontinuous conduction mode, the current programmed mode, nulldouble injection techniques in linear circuits, input filter design, and low-harmonic rectifiers. Prereq., ECEN 5797.

College of Engineering & Applied Science   Electrical & Computer Engineering   Power

---

---

## ECEN-5811 (3) Neural Signals and Functional Brain Imaging

Same as ECEN 4811 and ASEN 4216

College of Engineering & Applied Science   Electrical & Computer Engineering   Bioengineering

---

---

## ECEN-5817 (3) Resonant and Soft-Switching Techniques in Power Electronics

Covers resonant converters and inverters, and soft switching; sinusoidal approximations in analysis of series, parallel, Lcc, and other resonant dc-dc and dc-ac converters; state-plane analysis of resonant circuits; switching transitions in hard-switched and soft-switched Pwm converters; zero-voltage switching techniques, including resonant, quasi resonant, zero voltage transition, and auxiliary switch circuits. Prereq., ECEN 5797 or instructor consent required.

College of Engineering & Applied Science   Electrical & Computer Engineering   Power

---

---

## ECEN-5821 (3) Neural Systems and Physiological Control

Same as ECEN 4821 and ASEN 4426/5426.

College of Engineering & Applied Science   Electrical & Computer Engineering   Bioengineering

---

---

## ECEN-5827 (3) Analog IC Design

Same as ECEN 4827. Prerequisites: Restricted to any graduate students or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

College of Engineering & Applied Science   Electrical & Computer Engineering   Power

---

---

## ECEN-5830 (3) Special Topics

College of Engineering & Applied Science   Electrical & Computer Engineering   General

---

---

## ECEN-5831 (3) Brains, Minds, and Computers

Same as ECEN 4831, and ASEN 4436/5436. Prerequisites: Restricted to any graduate students or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Bioengineering

---

## ECEN-5837 (3) Mixed-Signal IC Design Lab

Software laboratory course extends the concepts developed in ECEN 4827 to full design and layout of mixed analog and digital custom integrated circuits. Assignments explore implementation of analog to digital and digital to analog converters, and final project develops a full custom IC for a target application. Prereq., ECEN 5827.

College of Engineering & Applied Science | Electrical & Computer Engineering | Power

---

## ECEN-5840 (1-6) Independent Study

Offers an opportunity for students to do independent, creative work at the master's level. Numbered ECEN 5840-5849. Prereq., advisor consent.

College of Engineering & Applied Science | Electrical & Computer Engineering | General

---

## ECEN-6016 (1-3) Special Topics

College of Engineering & Applied Science | Electrical & Computer Engineering | Optics

---

## ECEN-6139 (3) Logic Synthesis of VLSI Systems

Studies synthesis and optimization of sequential circuits, including retiming transformations and don't care sequences. Gives attention to hardware description languages and their application to finite state systems. Also includes synthesis for testability and performance, algorithms for test generation, formal verification of sequential systems, and synthesis of asynchronous circuits. Prereqs., ECEN 5139 and CSCI 5454.

College of Engineering & Applied Science | Electrical & Computer Engineering | VLSI CAD Methods

---

## ECEN-6144 (3) Electromagnetic Boundary Problems

Provides mathematical and physical fundamentals necessary for the systematic analysis of electromagnetic fields problems. Covers basic

properties of Maxwell's equations, potentials and jump conditions; scattering and diffraction by canonical structures; Green's functions, integral equations and approximate methods. Requires some maturity in electromagnetics. Prereq., ECEN 5114 or 5134 or instructor consent. Prerequisites: Restricted to graduate students in Electrical Engineering (EEEN) or Electrical/Computer Engineering (ECEN) or Electrical Engineering Concurrent or Electrical/Computer Engineering Concurrent Degree students only.

[College of Engineering & Applied Science](#) [Electrical & Computer Engineering](#) [Electromagnetics](#)

---

## ECEN-6800 (3) Master of Engineering Report

[College of Engineering & Applied Science](#) [Electrical & Computer Engineering](#) [General](#)

---

## ECEN-6940 (1) Master's Degree Candidate

Numbered ECEN 6940-6949.

[College of Engineering & Applied Science](#) [Electrical & Computer Engineering](#) [General](#)

---

## ECEN-6950 (1-6) Master's Thesis

[College of Engineering & Applied Science](#) [Electrical & Computer Engineering](#) [General](#)

---

## ECEN-7438 (3) Theory of Nonlinear Systems

Nonlinear systems and control. Introduction to nonlinear phenomena: multiple equilibria, limit cycles, bifurcations, complex dynamical behavior. Planar dynamical systems, analysis using phase plane techniques. Input-output analysis and stability. Passivity. Lyapunov stability theory. Feedback linearization. Exploration of examples and applications. Prereq., ECEN 5448.

[College of Engineering & Applied Science](#) [Electrical & Computer Engineering](#) [Dynamical Systems and Control](#)

---

## ECEN-7840 (1-6) Independent Study

Offers an opportunity for students to do independent, creative work at the doctoral level. Numbered ECEN 7840-7849. Prereq., advisor consent.

ECON

## ECON-1078 (3) Mathematical Tools for Economists 1

Teaches mathematical skills and logical thinking for use in economics. Topics include algebra, graphs, functions, and probability. The class includes many "Real world" examples and some illustrative computer assignments. Approved for arts and sciences CORE curriculum: quantitative reasoning and mathematical skills.

[College of Arts & Sciences](#) [Economics](#) [Quantitative Economics](#)

## ECON-1088 (3) Mathematical Tools for Economists 2

Continuation of ECON 1078. Teaches mathematical skills for use in economics. Topics include derivatives, optimization, and integration. These skills are used on "Real world" problems, and illustrated with computer assignments. Prereq., ECON 1078 or instructor consent. Similar to MATH 1080, 1081, 1090, 1100, 1300, 1310, and APPM 1350.

[College of Arts & Sciences](#) [Economics](#) [Quantitative Economics](#)

## ECON-2010 (4) Principles of Microeconomics

Examines basic concepts of microeconomics, or the behavior and the interactions of individuals, firms, and government. Topics include determining economic problems, how consumers and businesses make decisions, how markets work and how they fail, and how government actions affect markets. Credit not granted for this course and ECON 1000 and 1001. Meets MAPS requirements for social sciences: general. Approved for arts and sciences CORE curriculum: contemporary societies.

[College of Arts & Sciences](#) [Economics](#) [Theory & History Economic Thgt](#)

## ECON-2020 (4) Principles of Macroeconomics

Provides an overview of the economy, examining the flows of resources and outputs and the factors determining the levels of income and prices. Explores policy problems of inflation, unemployment, and economic growth. Prereq., ECON 2010. Credit not granted for this course and ECON 1000 and 1001. Meets MAPS requirement for social sciences: general. Approved for arts and sciences CORE curriculum: contemporary societies.

College of Arts & Sciences Economics Theory & History Economic Thgt

---

## ECON-3070 (3) Intermediate Microeconomic Theory

Explores theory and application of models of consumer choice, firm and market organization, and general equilibrium. Extensions include intertemporal decisions, decisions under uncertainty, externalities, and strategic interaction. Prereqs., ECON 1000 or 2010; and either ECON 1078 and 1088, or MATH 1300, or MATH 1310, or MATH 1081, or MATH 1080, 1090, and 1100, or APPM 1350, or equivalent. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences Economics Theory & History Economic Thgt

---

## ECON-3080 (3) Intermediate Macroeconomic Theory

Introduces theories of aggregate economic activity including the determination of income, employment, and prices; economic growth; and fluctuations. Macroeconomic policies are explored in both closed and open economy models. ECON 3070 and 3080 may be taken in any order; there is no recommended sequence. Prereqs., ECON 1000 or 2020; and either ECON 1078 and 1088, or MATH 1300, or MATH 1310, or MATH 1081, or MATH 1080, 1090, and 1100, or APPM 1350, or equivalent. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences Economics Theory & History Economic Thgt

---

## ECON-3403 (3) International Economics and Policy

Examines national and supranational policies that affect the international economy, with attention to trade barriers, economic nationalism and regionalism, international political economy, exchange market intervention, and international transmission of economic perturbations. Prereqs., ECON 1000, or ECON 2010 and 2020. Restricted to nonmajors. This course may not be taken after either ECON 4413 or ECON 4423. Approved for arts and sciences core curriculum: contemporary societies. Prerequisites: Economic (ECON) majors are restricted from taking this course.

College of Arts & Sciences Economics International Trade & Finance

---

## ECON-3535 (3) Natural Resource Economics

Integrates economic analysis with life science aspects of natural resource systems to develop social policies for use of natural resources. Studies economists' approaches to resources policy analysis and applies them to energy, forestry, fisheries, mineral, and water systems. Prereq., ECON 1000 or 2010. Restricted to nonmajors. Credit not granted for this course and ECON 4535. Approved for arts and sciences core curriculum: contemporary societies. Prerequisites: Economic (ECON) majors are restricted from taking this course.

College of Arts & Sciences Economics Natural Resources & Environ

---

---

## ECON-3545 (3) Environmental Economics

Highlights causes of excessive environmental pollution and tools for controlling it through economic analysis, values of preservation, and distribution of costs and benefits from environmental protection programs. Prereq., ECON 1000 or 2010. Restricted to nonmajors. Credit not granted for this course and ECON 4545. Approved for arts and sciences CORE curriculum: contemporary societies. Prerequisites: Economic (ECON) majors are restricted from taking this course.

College of Arts & Sciences | Economics | Natural Resources & Environ

---

---

## ECON-3784 (3) Economic Development and Policy

Introductory course in Economic Development, designed for non-majors. Students are introduced to the major issues in development economics. Students will explore empirical, theoretical, and policy issues in economic development. Emphasis is placed on the controversial issues in this literature, requiring students to explore competing, and often conflicting, perspectives of these issues. Prereqs., ECON 1000 or ECON 2010 and 2020. Restricted to non-majors. Prerequisites: Economic (ECON) majors are restricted from taking this course.

College of Arts & Sciences | Economics | Economic Development

---

---

## ECON-3818 (4) Introduction to Statistics with Computer Applications

Introduces statistical methods and their applications in quantitative economic analysis. Prereqs., ECON 1000, or 2010 and 2020; and either ECON 1078 and 1088, or MATH 1300, or MATH 1310, or MATH 1081, or MATH 1080, 1090, and 1100, or APPM 1350, or equivalent.

College of Arts & Sciences | Economics | Quantitative Economics

---

---

## ECON-4070 (3) Topics in Microeconomics

Studies utility maximization under uncertainty, risk, game theory, moral hazard, and adverse selection. Applications include insurance markets and the theory of contracts. Prereqs., ECON 3070 and 4808 or equivalent, or instructor consent.

College of Arts & Sciences | Economics | Theory & History Economic Thgt

---

---

## ECON-4111 (3) Money and Banking Systems

Discusses money, financial institutions and the monetary-financial system in a modern economy. Prereq., ECON 3080.

College of Arts & Sciences | Economics | Money and Banking

---

---

---

## ECON-4211 (3) Economics of the Public Sector

Focuses on taxation and public expenditures. Topics include economic rationale for government action, economic theory of government behavior, and effects of government policies on allocation of resources and distribution of income. Prereqs., ECON 3070 and 3818.

College of Arts & Sciences Economics Public Economics

---

## ECON-4221 (3) Political and Public Choice Economics

Explores decision-making in non-traditional market settings, specifically political market settings, using economic models. We investigate policy outcomes as the product of interactions among individuals in political markets, and analyze how governmental decisions are the result of rational optimizing behavior, even if they do not lead to policies that maximize national welfare. Prereqs., ECON 3070 and 3818.

College of Arts & Sciences Economics Public Economics

---

## ECON-4231 (3) Practicum: Applied Economic Analysis and Public Policy

Applies economic analysis to current issues of public policy. Reviews basic public finance and economic justifications for government action. Examines structure and procedures of Colorado State Legislature. Chooses current legislative issues, reviews relevant economic literature and applies implications through briefing papers and testimony at legislative hearings. Explores the challenges of integrating informed economic analysis into legislative process. Prereqs., ECON 3070, 3080, and 3818.

College of Arts & Sciences Economics Public Economics

---

## ECON-4242 (3) Urban Economics: The Economics of Cities

Considers the economic forces which drive households and jobs to congregate in metropolitan areas. It then considers the forces within the city which determine how the established cities "look" - how rents vary with location, the distribution of jobs and households within a city, urban sprawl, and the sorting of households between neighborhoods. Finally it considers some government policies relating to land use and housing. Prereqs., ECON 3070 and 3818.

College of Arts & Sciences Economics Urban & Regional Economics

---

## ECON-4292 (3) Migration, Immigrant Adaptation, and Development

Examines historical and current patterns of migration with an emphasis in international movement. Looks at leading migration theories related to both origin- and destination-based explanations while critically looking at the role of development as a potential cause and consequence of population movement. Finally, covers some aspects of immigrants' social and economic adaptation to their host society. Prereq., ECON 3070. Same as GEOG 4292.

College of Arts & Sciences Economics Urban & Regional Economics

---

---

## ECON-4309 (3) Economics Honors Seminar 1

For information consult the department's director of honors. Open only to qualified seniors. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

College of Arts & Sciences | Economics | Independent Study and Other

---

## ECON-4339 (3) Economics Honors Seminar 2

For information consult the department's director of honors. This course does not count toward major requirements. Prereq., ECON 4309. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences | Economics | Independent Study and Other

---

## ECON-4413 (3) International Trade

Focuses on theories of international trade and its impacts on economic welfare. Analyzes commercial policy, including tariffs, non-tariff barriers, retaliation, regional integration, and factor migration. Prereq., ECON 3070.

College of Arts & Sciences | Economics | International Trade & Finance

---

## ECON-4423 (3) International Finance

Covers balance of payments; foreign exchange market, income, trade, and capital flows; asset markets adjustment mechanisms; stabilization policies in an open economy; and problems of international monetary systems. Prereq., ECON 3080.

College of Arts & Sciences | Economics | International Trade & Finance

---

## ECON-4504 (3) The New Institutional Economics: Institutions, Contracts and Economic Outcomes

Understand the conceptual tool kit of the New Institutional Economics. The concepts include transaction costs, property rights, credible commitment, and most importantly the roles of formal and informal institutions. We will examine the impact of institutions on contracting and organizations. The goal is to understand how the underlying institutions determine the degree to which societies improve their economic performance. Prereqs., ECON 3070, 3080 and 3818.

College of Arts & Sciences | Economics | Economic History

---

## ECON-4514 (3) Economic History of Europe

Covers evolution of modern economic growth and development in Europe, emphasizing institutional change. Prereqs., ECON 3070 or

3080. Approved for arts and sciences CORE curriculum: historical context.

[College of Arts & Sciences](#) [Economics](#) [Economic History](#)

---

---

## ECON-4524 (3) Economic History of the United States

Evolution of modern economic growth and development in the U.S. from colonial times to the present emphasizing institutional change.

Prereq., ECON 3070. Approved for arts and sciences CORE curriculum: United States context.

ECON

## ECON-4535 (3) Natural Resource Economics

Analysis of problems associated with socially optimal use of renewable and nonrenewable natural resources over time. Problems of common property resources, irreversible forms of development, and preservation of natural areas. Prereq., ECON 3070. Credit not granted for this course and ECON 3535.

[College of Arts & Sciences](#)
[Economics](#)
[Natural Resources & Environ](#)

## ECON-4545 (3) Environmental Economics

Examines the effects of economic growth on the environment; application of economic theory of external diseconomies, cost-benefit analysis, program budgeting, and welfare economics to problems of the physical environment. Prereq., ECON 3070. Credit not granted for this course and ECON 3545.

[College of Arts & Sciences](#)
[Economics](#)
[Natural Resources & Environ](#)

## ECON-4555 (3) Transportation Economics

Provides an overview of the characteristics and structure of transportation markets including aggregate demand, vehicle and mode choice, surface freight and air travel. Explores market failures in the transportation sector including market power and externalities such as pollution, congestion and accidents as well as policies aimed at addressing these issues. Prereqs., ECON 3070 and 3818.

[College of Arts & Sciences](#)
[Economics](#)
[Natural Resources & Environ](#)

---

## ECON-4616 (3) Labor Economics

Examines the influence of markets, unions, and government on labor allocation and remuneration. Analyzes human capital, discrimination, mobility and migration, productivity, unemployment, and inflation. Compares outcomes under competition with those in a world marked by shared market power and bargaining. Prereq., ECON 3070.

College of Arts & Sciences | Economics | Labor and Human Resources

---

## ECON-4626 (3) The Economics of Inequality and Discrimination

Examines the unique insights available through economic analysis regarding the causes, mechanisms, and consequences of inequality and discrimination. Examines the extent of inequality, the varieties and extents of discrimination, and explores the economic models that suggest explanations. Prereq., ECON 3070. Approved for arts and sciences core curriculum: human diversity.

College of Arts & Sciences | Economics | Labor and Human Resources

---

## ECON-4646 (3) Topics in Health Economics

Growth in health expenditures worldwide over the past three decades has led to an increase in research in health economics and its importance in public policy in developed and developing countries. The purpose of this course is to encourage students to read, think, and do research on issues in health economics. This course will cover issues that are pertinent to the US, other developed and developing countries. It will cover the basics of health economics such as health production functions and the role for government as well as touching on topical issues such as health care reform. Prereq., ECON 3070. Recommended prereq., ECON 3818.

College of Arts & Sciences | Economics | Labor and Human Resources

---

## ECON-4697 (3) Industrial Organization and Regulation

Explores neoclassical theory of the firm, the determinants of industrial structure, and the purposes and institutions of public policy to control or maintain a competitive environment. Prereq., ECON 3070. Approved for arts and sciences CORE curriculum: United States context.

College of Arts & Sciences | Economics | Industrial Organization

---

## ECON-4774 (3) Economic Reform in Developing Countries

Explores competing paradigms of economic development, emphasizing the confrontation between the structuralist/dirigiste paradigm and the neoclassical public choice paradigm. Analyzes economic reforms under way in developing countries, including stabilization policy and structural adjustment. Also explores political reforms, including the pluralist revolution and the design of a constitutional framework in developing societies. Prereqs., ECON 3070 or 3080.

College of Arts & Sciences | Economics | Economic Development

---

## ECON-4784 (3) Economic Development

Explores empirical, theoretical, and policy issues in economic development. Examines topics with reference to the developing countries: income distribution and poverty, demographic change, labor force employment and migration, human capital, physical capital, natural resources and the environment, industrial structure, international trade, and finance. Prereqs., ECON 3070 or 3080.

College of Arts & Sciences | Economics | Economic Development

---

## ECON-4794 (3) Economic Growth

Introduces theories explaining why differences in standards of living among countries are so large. Examines a variety of data on historical experiences of economic growth. Surveys recent research on why some countries are so rich and some are so poor, and why some countries grow so quickly and others grow so slowly. Prereqs., ECON 1088 or equivalent, and ECON 3070 or 3080.

College of Arts & Sciences | Economics | Economic Development

---

## ECON-4797 (3) Topics in Industrial Organization: Antitrust and Regulation

Explores two major branches of Industrial Organization--antitrust and regulation. Focus is on developing qualitative and quantitative skills for the legal-economic analysis of issues and problems across a variety of industries. Case studies are used to illustrate concepts, including mergers, collusive agreements, monopolization, and networks. Individual and group projects help develop advocacy and public speaking skills. Prereq., ECON 3070.

College of Arts & Sciences | Economics | Industrial Organization

---

## ECON-4808 (3) Introduction to Mathematical Economics

Introduces the use of mathematics in economics. Topics include vectors and matrices, differential calculus, and optimization theory, with economic applications. Prereqs., ECON 3070 and ECON 3818.

College of Arts & Sciences | Economics | Quantitative Economics

---

## ECON-4818 (3) Introduction to Econometrics

Provides undergraduate economics majors with an introduction to econometric theory and practice. Develops the multiple regression model and problems encountered in its application in lecture and individual applied projects. Prereqs., ECON 3070 and 3818.

College of Arts & Sciences | Economics | Quantitative Economics

---

---

## ECON-4838 (3) Microcomputer Applications in Economics

Teaches basic concepts in Java programming applied to economic models. Development of Web pages and dynamic modeling will be introduced. Students will gain a foundation that can be applied to creating advanced applications relating to analysis of statistical data and custom projects. Prereqs., ECON 1088 or MATH 1300, ECON 3070 and ECON 3818.

College of Arts & Sciences | Economics | Quantitative Economics

---

## ECON-4848 (3) Applied Econometrics

Introduces students to the practice of applied regression analysis. Summarizes and reviews the regression technique, explores U.S. census data sources, introduces an advanced statistical software package and provides structured exercises in regression analysis of census data. Concludes with independent research projects analyzing social and economic issues using regression analysis and census data. Prereq., ECON 3818. Recommended prereq., ECON 3070.

College of Arts & Sciences | Economics | Quantitative Economics

---

## ECON-4858 (3) Financial Econometrics

Introduces statistical models, estimation and testing procedures used in analyzing financial data for advanced undergraduates. Topics include the modeling of returns, portfolio theory, the capital asset pricing model, options pricing and fixed income securities. Prereq., ECON 3818 or equivalent. Recommended prereq., ECON 4818.

College of Arts & Sciences | Economics | Quantitative Economics

---

## ECON-4868 (3) Simulation Modeling in Microeconomics

Computer simulation modeling translates theory into computer code to examine questions numerically; for example, the effects of taxes or emissions permits on welfare and income distribution. We use GAMS (general algebraic modeling system); a version may be downloaded for free. Students must have access to a computer (not needed in the classroom). Prereq., ECON 3070.

College of Arts & Sciences | Economics | Quantitative Economics

---

## ECON-4897 (3) Economics of Organizations

Introduces students to the economic analysis of relationship between firms and incentives within firms. The first part covers classical theories of firm boundaries and contractual relationship between firms. The second part focuses on compensation and incentive issues within firms. Prereqs., ECON 3070 and 3818.

College of Arts & Sciences | Economics | Industrial Organization

---

---

## ECON-4909 (3) Independent Study

May be repeated up to 6 total credit hours, but only 3 credit hours count for economics major. Prereqs., ECON 1000 or 2010 and 2020; completion of at least 12 hours of ECON classes and instructor and department consent required. Offered only to students with a GPA of 3.00 or better.

College of Arts & Sciences | Economics | Independent Study and Other

---

## ECON-4939 (2-6) Internship/Seminar

Offers students the opportunity to integrate theoretical concepts of economics with practical experience in economics-related institutions. The theoretical portion arises from seminars and readings, the practical from activities in organizations related to the economics field. A maximum of 3 credit hours counts toward major requirements. Prereqs., ECON 3070 and 3080 and instructor consent. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) Economic (ECON) majors only.

College of Arts & Sciences | Economics | Independent Study and Other

---

## ECON-4999 (3) Economics in Action: A Capstone Course

Students read current periodicals, picking out topics in which economics plays a role in understanding events. Background reading is assigned on topics chosen. May not be taken more than once for credit. Prereqs., ECON 3070 and 3080, and junior or senior standing. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

College of Arts & Sciences | Economics | Independent Study and Other

---

## ECON-6209 (3) Research Methods in Economics

Trains graduate students in scientific methodology and research in economics. Culminates in a research project that normally leads directly to thesis work. Prereqs., ECON 6070, 6080, 6808, and 6818. Will not be offered academic year 2007--08.

College of Arts & Sciences | Economics | Independent Study and Other

---

## ECON-6555 (3) Water Resources Development and Management: Technology, Economics, Institutions

Offers a multidisciplinary exploration of the engineering, economic, and institutional principles involved in water system development and management. Provides a background in basic hydrology, economics, water law, and institutions. Prereq., ECON 3070 or equivalent. Same as CVEN 5393.

College of Arts & Sciences | Economics | Natural Resources & Environ

---

## ECON-6774 (3) Economic Reform in Developing Countries

Covers stabilization policy and structural adjustment. Specific topics include orthodox stabilization policies (fiscal, monetary, and exchange rate policies); heterodox stabilization policies (price, wage, and interest controls); trade liberalization; financial liberalization; privatization and deregulation. Prereqs., ECON 6070 and 6080.

[College of Arts & Sciences](#) [Economics](#) [Economic Development](#)

## ECON-6828 (3) Applied Time Series Analysis (Box-Jenkins) and Forecasting

Introduces first-year graduate students to time series approach of model building and forecasting. Basic topics are autoregressive integrated moving average models, nonstationarity and co-integration, vector autoregressions, and the evaluation of forecasts from such models. Emphasizes applied computer assignments. Prereqs., ECON 3818 and 4808, or equivalent.

ECON

## ECON-6949 (1) Master's Candidate

College of Arts & Sciences | Economics | Independent Study and Other

## ECON-6959 (1-6) Master's Thesis

College of Arts & Sciences | Economics | Independent Study and Other

## ECON-7010 (3) Microeconomic Theory 1

Analyzes recent and contemporary literature on fundamentals of economic theory. Considers value theory with particular emphasis on methodology, theory of demand, theory of the firm, game theory, theory of distribution, general equilibrium theory, and welfare economics. Prereqs., ECON 3070, 3080; 6808 or MATH 1300. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Economics | Theory & History Economic Thgt

## ECON-7020 (3) Macroeconomic Theory 1

Discusses behavior of consumption, investment, employment, production, and interest rates in the context of dynamic optimization models. Also considers government, economic growth, and business cycles. Prereqs., ECON 3070 and 3080. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Economics | Theory & History Economic Thgt

## ECON-7030 (3) Microeconomic Theory 2

Continuation of ECON 7010. Prereq., ECON 7010.

College of Arts & Sciences Economics Theory & History Economic Thgt

---

---

## ECON-7040 (3) Macroeconomic Theory 2

Presents the theoretical and empirical application of dynamic macro programming models. Topics include consumption, investment, labor, money, and credit theories. Covers the theory of economic fluctuations and business cycles employing dynamic general equilibrium models. Prereq., ECON 7020.

College of Arts & Sciences Economics Theory & History Economic Thgt

---

---

## ECON-7050 (3) Advanced Economic Theory

Discusses advanced topics in game theory and general equilibrium. Prereqs., ECON 7010, 7030, 7818, 7828. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Economics Theory & History Economic Thgt

---

---

## ECON-7818 (3) Mathematical Statistics for Economists

Provides the mathematical foundation for Ph.D. level statistical inference in economic research. The primary topics of the course are probability theory and mathematical statistics including hypothesis testing and classical estimation with an emphasis on the method of maximum likelihood. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Economics Quantitative Economics

---

---

## ECON-7828 (3) Econometrics

Continuation of ECON 7818. Topics include regression analysis and extensions of the linear regression model to generalized least squares, time series data, and systems of equations. Prereq., ECON 7818.

College of Arts & Sciences Economics Quantitative Economics

---

---

## ECON-8209 (3) Economics Research Methods Workshop 1

Assists students starting their doctoral thesis by discussing methodology and evaluation of economic research. Presents and discusses student research proposals. Prereqs., two ECON courses at the 8000 level. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Economics Independent Study and Other

---

---

## ECON-8211 (3) Public Economics: Fundamental Principles

Presents the fundamental principles of public goods, externalities, public choice, excess burden, optimal taxation, and tax incidence. Prereq., ECON 6211 or 7010. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Economics Public Economics

---

---

---

## ECON-8219 (3) Economics Research Methods Workshop 2

Continuation of ECON 8209. Assists students starting their doctoral thesis by discussing relevant economic research. Presents and discusses research papers. Prereq., ECON 8209.

College of Arts & Sciences Economics Independent Study and Other

---

---

---

## ECON-8221 (3) Public Economics: Topics in Public Expenditures and Taxation

Explores advanced topics in public economics such as decentralization, state and local government, program analysis, taxation, international tax issues, political economy issues, and market failure. Prereqs., ECON 6211 or 7010, and 8211.

College of Arts & Sciences Economics Public Economics

---

---

---

## ECON-8231 (3) Local Public Economics

Examines subnational governments and systems of governments, the effects of inter-governmental competition, appropriate tax and expenditure responsibilities, and variations in governing institutions. Covers congestible public goods, Tiebout mechanisms, and tax capitalization. Prereq., ECON 6211 or 7010.

College of Arts & Sciences Economics Public Economics

---

---

---

## ECON-8252 (3) Seminar: Urban and Regional Economics 1

Covers basic theories in spatial location of economic activity and land use and the survey techniques developed to analyze, measure, and predict regional and urban structure and growth, such as economic base studies, regional social accounts, and input-output analysis. Prereq., ECON 6070 or 7010.

College of Arts & Sciences Economics Urban & Regional Economics

---

---

## ECON-8262 (3) Topics in Urban and Regional Economics

Investigates various theoretical topics in urban and regional economics, focusing on policy issues. Involves student research and presentations. Prereq., ECON 6070 or 7010.

College of Arts & Sciences Economics Urban & Regional Economics

---

## ECON-8333 (3) Globalization and Democratization: An Introduction

Introduces research on globalization and democratization from an interdisciplinary perspective. Examines ongoing interdisciplinary research on the global political economy. Students learn about ongoing research, critique current efforts, and design their own research project. Prereq., graduate standing in PSCI, ECON, GEOG, or SOCY. Same as PSCI 7333, SOCY 6031, and GEOG 5332.

College of Arts & Sciences Economics International Trade & Finance

---

## ECON-8413 (3) Seminar: International Trade Theory

Covers theories of comparative advantage, including the classical, factor-proportions, fixed-factor, and noncompetitive markets models. Examines trade policy including trade barriers, market distortions, strategic policy, regional integration, political economy, and factor migration. Prereq., ECON 6413 or 7010. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Economics International Trade & Finance

---

## ECON-8423 (3) Seminar: International Finance

Highlights foreign exchange markets, past and current international monetary mechanisms, and processes of adjustment. Examines the role of international financial markets for the behavior of consumption, investment, saving, and production. Also considers international transmission of business cycles. Prereq., ECON 6423 or 7020.

College of Arts & Sciences Economics International Trade & Finance

---

## ECON-8433 (3) Seminar: Topics in Money and International Economics

Explores advanced work in various aspects of international economics, such as empirical trade analysis, public choice, and interactions between real and monetary phenomena in the world economy. Prereq., ECON 6413, 6423, 8413, or 8423. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Economics International Trade & Finance

---

## ECON-8534 (3) Economic History of North America

Examines North America's past from the perspective of economics. Topics include growth and welfare in the colonial period; staple products, agricultural development, and the emerging industrialism in the antebellum period; transformation of the North American

economy to 1914; the interwar years and the Great Depression; and economic integration since 1945. Prereqs., ECON 6070 and 6080, or ECON 7010.

College of Arts & Sciences Economics Economic History

## ECON-8535 (3) Environmental Economics I

Considers the allocation of society's scarce environmental resources and government attempts to achieve more efficient and equitable allocations. It is a course in applied welfare economics with an emphasis on market failure and valuation. Prereq., ECON 6535 and 6808; or ECON 7010. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Economics Natural Resources & Environ

## ECON-8545 (3) Environmental Economics II

Provides advanced study of recent advances in environmental economics and explores opportunities for new research. Topics vary with interests of instructor and students. Prereqs., ECON 6535 and 6808, or ECON 7010 and ECON 8535. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Economics Natural Resources & Environ

## ECON-8555 (3) Water Resources Development and Management

Offers a research seminar in joint hydrologic-economic modeling and systems analysis. Addresses problems of joint water quantity-water quality management and joint surface-ground water management. Prereq., ECON 6555.

College of Arts & Sciences Economics Natural Resources & Environ

## ECON-8666 (1-3) Economic Demography

Investigates economic determinants and consequences of demographic behavior in developing and developed countries. Issues include fertility and female labor supply interactions, the demographic transition, the effect of population growth on income distribution, family investments in children, and intergenerational mobility. Prereqs., ECON 3070 and 3080.

College of Arts & Sciences Economics Labor and Human Resources

## Courses

Search by College, Department & Category

**College/School**

All

Search by Course Number

**Subject**   **Number**

ECON

### [ECON-8676 \(3\) Seminar: Labor Economics 1](#)

Focuses on the demand side of labor markets. Topics include standard static and dynamic models of labor demand, labor market discrimination, composition of compensation, labor hierarchies within enterprises, unionization, efficient contracts, and macroeconomics of labor markets. Prereq., ECON 6070 or 7010.

[College of Arts & Sciences](#) [Economics](#) [Labor and Human Resources](#)

### [ECON-8686 \(3\) Seminar: Labor Economics 2](#)

Focuses on special topics in labor economics: dynamic theories of labor supply, employment, and unemployment; labor supply in a household framework; and labor market activity and income distribution. Explores both theoretical models and empirical tests in each area. Prereq., ECON 6070 or 7010. Prerequisites: Restricted to Graduate Students only.

[College of Arts & Sciences](#) [Economics](#) [Labor and Human Resources](#)

### [ECON-8747 \(3\) Industrial Organization Theory](#)

Highlights economics of regulation of industry and markets, industry studies, and the application of lab methods to industrial organization. Prereq., ECON 7010. Prerequisites: Restricted to Graduate Students only.

[College of Arts & Sciences](#) [Economics](#) [Industrial Organization](#)

### [ECON-8757 \(3\) Industrial Organization and Public Policy](#)

Addresses the theory of interaction of firms within markets and industries, emphasizing importance of the number, relative size of firms, market institution, firm strategies, and nature of consumer demand. Examines neoclassical and game theoretic models, empirical industry

studies, and laboratory tests of theoretical models and policies. Prereq., ECON 7010. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Economics Industrial Organization

---

## ECON-8764 (3) History of Economic Development

Covers in historical perspective the causes of economic development including why some areas develop faster than others and why development occurs more rapidly in some eras than others. Prereqs., ECON 6070 and 6080, or ECON 7010. Same as HIST 7214. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Economics Economic History

---

## ECON-8774 (3) Seminar in Transition Economies

Focuses on the problems encountered in countries evolving from planned to market economies. Emphasizes applications of new and traditional models of economic growth and analysis of problems unique to formerly planned economies. Prereq., ECON 6774 or 7010.

College of Arts & Sciences Economics Economic Development

---

## ECON-8784 (3) Economic Development

Explores empirical, theoretical, and policy issues in economic development. Examines political economy, income distribution and poverty, demographic change, labor force employment and migration, human capital, physical capital, natural resources and the environment, industrial structure, international trade and finance, stabilization policy, and structural adjustment. Prereqs., ECON 6774 or 7010. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Economics Economic Development

---

## ECON-8828 (3) Seminar: Econometrics 1

First semester of two-semester sequence in econometrics for PhD students. Studies least squares and generalized least squares estimation of linear econometric models. Asymptotic (large sample) theory of inference. Some topics in the estimation of microdata. Prereq., ECON 7818. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Economics Quantitative Economics

---

## ECON-8838 (3) Seminar: Econometrics 2

Teaches the advanced level of econometrics theory. Topics include asymptotic theory, maximum likelihood estimation, limited dependent variables analysis and other frontier areas of econometrics such as the method of moment estimation, semiparametric and nonparametric estimation procedure. Prereq., ECON 7828.

College of Arts & Sciences Economics Quantitative Economics

---

---

## ECON-8848 (3) Applied Microeconometrics

Presents a "User's guide" to conducting empirical research in applied microeconomics. Begins with a primer on an industry-standard econometric software package including programming techniques and data management. Introduces advanced econometric techniques including panel data methods, IV, matching models, regression discontinuity, and limited dependent variables models. Concludes with a research project requiring a replication and/or extension of an existing published paper. Prereqs., ECON 7818 and 7828. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Economics | Quantitative Economics

---

## ECON-8858 (3) Computational and Structural Estimation Methods

Teaches students to construct a variety of applied economic models, obtain parameter values through calibration or estimation techniques, and uses the resulting models to conduct policy simulations. Prereqs., ECON 7010 and 7818. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Economics | Quantitative Economics

---

## ECON-8909 (1-3) Independent Study

May be repeated up to 7 total credit hours. Prereq., instructor and department consent.

College of Arts & Sciences | Economics | Independent Study and Other

---

## ECON-8999 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section. Prerequisites: Economic (ECON) graduate students are restricted from taking this course.

EDUC

## EDUC-2020 (1) Step 1: Inquiry Approaches to Teaching

Invites science and mathematics students to explore teaching as a career by providing first-hand experiences teaching science/math lessons in local elementary classrooms. Introduces theory and practice necessary to design and deliver excellent instruction. Master teachers provide ongoing support and feedback. Meets weekly on CU campus (1.5 hours/week) and involves additional visits to local elementary school. Prerequisites: Restricted to AMEN, ASTR, BCHM, CHEM, EBIO, GEOL, IPHY, MATH, MCDB, PHYS, Arts and Sciences Open Option majors or College of Engineering majors only.

[School of Education](#) [Education](#) [General Education](#)

## EDUC-2030 (1) Step 2: Inquiry-Based Lesson Design

Builds on EDUC 2020 and further develops lesson design and inquiry-based teaching practice. Offers opportunity to explore teaching career and learn about middle school culture. Master teacher provides support as students design and deliver lessons in middle school classrooms. Emphasizes assessment of student learning. Meets weekly on CU campus (1.5 hours/week) and involves additional visits to local middle school. Prereq., EDUC 2020.

[School of Education](#) [Education](#) [General Education](#)

## EDUC-2040 (2) Step 1 and 2 Combination

Combines critical features of EDUC 2020 and 2030. Introduces theory and practice necessary to design and deliver inquiry-based instruction. Master teachers provide ongoing support and feedback. Emphasizes assessment of student learning. Meets weekly on CU campus (2.5 hours/week) and involves additional visits to local elementary/middle schools. Prerequisites: Restricted to Education Certification or College of Engineering students with 57-180 credits (Juniors or Seniors) or Graduate students.

[School of Education](#) [Education](#) [General Education](#)

---

## EDUC-2050 (1) Step into Humanities Teaching

Invites students in humanities and social sciences to explore teaching as a career by providing first-hand experiences teaching in local elementary and middle schools. Introduces theory and practice necessary to design and deliver excellent instruction. Students receive ongoing support and feedback from a classroom teacher. Meets weekly on CU campus (1.5 hours/week). Involves additional visits to local schools.

[School of Education](#) [Education](#) [General Education](#)

---

---

## EDUC-2100 (1-3) Educator's Toolkit

Explores role of educator and opportunities to serve as educator in a range of settings, including k-12 schools, after-school programs, tutoring centers. Offers undergraduates interested in education practical understanding of teaching and learning processes, designing educational tasks, and providing effective feedback.

[School of Education](#) [Education](#) [General Education](#)

---

---

## EDUC-2125 (3) History of American Public Education

Provides overview to evolution of American public schools by exploring major reform efforts from the common school movement to present. Considers contentious values, important players, and roots of school structures. Examines both what intellectuals were thinking about public education and how ordinary people experienced schools. Assesses how differences in race, class, ethnicity, gender, and power shape public schools.

[School of Education](#) [Education](#) [General Education](#)

---

---

## EDUC-2150 (3) Education in Film

Provides opportunities to view and analyze how facets of education are represented (or misrepresented) in film. Considers narratives constructed about education and how those stories fuel popular conceptions of and assumptions about students, teachers, and schools. Examines how issues of race, class, and gender are embedded in how films represent schools, teachers, students, and communities.

[School of Education](#) [Education](#) [General Education](#)

---

---

## EDUC-2400 (3) Cultural Diversity and Awareness

Enhances students' self-awareness in a variety of educational and cultural settings. Investigates self within a cultural context, inviting students to engage more deeply with their cultural assumptions and lenses, as well as the cultural practices and beliefs of other distinct groups. Explores themes relating to diversity through works of fiction, cultural contexts, contemplative practices, poetry, music and experiential activities.

[School of Education](#) [Education](#) [General Education](#)

---

---

## EDUC-2625 (3) Teaching English as a Second Language

Exposes students to strategies used to teach English as a second or foreign language. Covers both theoretical and applied aspects of language learning and teaching. Exposes students to techniques, activities, strategies and resources to plan instruction for students learning English as a second language. Emphasizes oral language development, literacy and content-area instruction for teaching K-12 students.

School of Education Education General Education

---

---

---

## EDUC-2800 (1-3) Special Topics

Designed to meet needs of students with topics of interest. May be repeated up to 12 credit hours.

School of Education Education General Education

---

---

---

## EDUC-2910 (1-3) Field Practicum 1

Offers supervised campus and off-campus experiences tied to course work in the Chancellor's Leadership RAP or the INVST program. See also EDUC 2920. May be repeated up to 6 total credit hours. Same as LDSP 2910.

School of Education Education General Education

---

---

---

## EDUC-2919 (3) Renewing Democracy in Communities and Schools

Examines concepts of activism, citizenship, democracy, power, and diversity through classroom discussions and participation in a local high school's Public Achievement project. Through community-based partnerships, students will develop leadership skills; dialogue with diverse groups of people; identify multiple perspectives around controversial issues; and learn to use research and writing to articulate public problems and advocate for their solutions. May be repeated up to 6 total credit hours. Same as INVS 2919.

School of Education Education General Education

---

---

---

## EDUC-2920 (1-3) Field Practicum 2

Offers supervised campus and off-campus experiences tied to course work in the Chancellor's Leadership RAP or the INVST program. See also EDUC 2910. May be repeated up to 6 total credit hours. Same as LDSP 2920.

School of Education Education General Education

---

---

## EDUC-3013 (3-4) School and Society

Introduces students - both future teachers and those simply interested in education - to pressing issues surrounding education within the United States. The course reveals the complex relationship between schools and the larger society of which they are a part. Examines issues of diversity and equity from different disciplinary lenses, including history, philosophy, sociology and anthropology. Approved for arts and sciences core curriculum: contemporary societies or human diversity. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

[School of Education](#) [Education](#) [General Education](#)

---

## EDUC-3570 (3) Learning With Technology In and Out of School

Examines ways digital media are changing the way young people learn, play, make friends, and participate in civic life. Studies widely implemented digital tools intended to support literary, math, and science learning of children ages 4-18. May involve design projects that integrate these tools to transform in either a classroom or after-school program.

[School of Education](#) [Education](#) [General Education](#)

---

## EDUC-3621 (1-3) Art for the Elementary Teacher

Introduces elementary education students to art education. Introduces many visual art techniques, art media, and processes used in art education. The class includes hands-on studio art experiences in a format that supports subjects such as literature, writing, music, and social studies. Emphasizes the role of art education and materials in supporting the artistic development and visual literacy of children. Prereq., completion of 30 hours of course work. Restricted to Education majors.

[School of Education](#) [Education](#) [Elementary Education](#)

---

## EDUC-4015 (3) International / Comparative Education

Comparatively studies education in other countries, emphasizing its role in developing nations, with an emphasis on successful models in basic literacy, primary education, secondary curriculum, and teacher education. Analyzes political, social, and economic policies and ideologies for their relevance to the development process, including the role of international organizations: World Bank, UNICEF, UNESCO, Peace corps and Volunteer Agencies. Same as EDUC 5015.

[School of Education](#) [Education](#) [General Education](#)

---

## EDUC-4023 (3-5) Differentiating Instruction in Diverse Secondary Classrooms

Focuses on teaching culturally and linguistically diverse secondary school students, special education students, and differentiation in the secondary classroom. Includes hands-on experiences in secondary school settings. Restricted to students admitted to the secondary or K-12 music teacher education program. Credit not granted for this course and EDUC 4351. Prerequisites: Restricted to EDEN, EDFR, EDGR, EDIT, EDJP, EDLT, EDMA, EDMU, EDSC, EDRU, EDSP, EDSS or MMED majors only.

School of Education Education Secondary Education

---

## EDUC-4050 (3) Knowing and Learning in Mathematics and Science

Explores essential questions relevant to teaching and learning mathematics and science. This course expands the student's understanding of current theories of learning and conceptual development. Students examine their own assumptions about learning. They critically examine the needs of a diverse student population in the classroom. Prerequisites: Restricted to AMEN, ASTR, BCHM, CHEM, EBIO, GEOL, IPHY, MATH, MCDB, PHYS, Arts and Sciences Open Option majors or College of Engineering majors only.

School of Education Education Secondary Education

---

## EDUC-4060 (3) Classroom Interactions

Students design and implement instructional activities informed by what it means to know and learn mathematics and science, and then evaluate the outcomes of those activities on the basis of classroom artifacts. Students examine how content and pedagogy combine to make effective teaching. Same as EDUC 5060. Prerequisites: Restricted to School of Education (EDUC), Mathematics-Secondary Education (EDMA) or Science-Secondary Education (EDSC) majors only.

School of Education Education Secondary Education

---

## EDUC-4112 (3) Educational Psychology and Adolescent Development

Analyzes fundamental psychological concepts underlying classroom instruction, as well as adolescent growth and development. Same as PSYC 4114. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

School of Education Education Secondary Education

---

## EDUC-4122 (2-3) Principles and Methods of Secondary Education

Presents and discusses issues in secondary school curriculum, instruction, assessment, and classroom management. Examines, analyzes, and evaluates a variety of teaching strategies, their effectiveness for students, and teacher dispositions to facilitate learning. Includes in-school experience. Restricted to students admitted to the secondary teacher education program. Prerequisites: Restricted to School of Education undergraduates only.

School of Education Education Secondary Education

---

## EDUC-4125 (3) Secondary World Language Methods

Presents and discusses issues in secondary school curriculum, instruction, and classroom management as they play out in world language classroom. Examines, analyzes, and evaluates a variety of teaching strategies, their effectiveness for students, and teacher dispositions to facilitate learning. Includes in-school experiences. Restricted to students admitted to the secondary teacher education program. Prerequisites: Restricted to EDEN, EDFR, EDGR, EDIT, EDJP, EDLT, EDMA, EDMU, EDSC, EDRO, EDSP, EDSS or MMED majors only.

School of Education Education Secondary Education

---

---

## EDUC-4135 (3) Story and Memoir

Examines the questions of "who I am", "where I come from", "what I might become" and "what I am called to do" in order to remember as well as make sense of our lives. Introduces and discusses narrative theory and selected memoirs. Students engage in reflection on their own narrative, and evaluate their practical and analytic understanding of narrative practice. EDUC 4135 and 5135 are the same course.

[School of Education](#) | [Education](#) | [Graduate Education](#)

---

---

## EDUC-4161 (1-3) Children's Literature

Addresses reading and evaluation of books, children's, interests, authors and illustrators, folk literature, multicultural literature, modern fanciful tales, and trends.

[School of Education](#) | [Education](#) | [General Education](#)

---

---

EDUC

## EDUC-4222 (3) Language Study for Educators

Focuses on the nature of linguistic development and performance. Examines works that reflect a range of scholarly approaches to language study, explores language use both in and out of school, takes up the relationships between language practices and power, and considers implications for classroom teaching. Same as EDUC 5222.

[School of Education](#)
[Education](#)
[General Education](#)

## EDUC-4232 (3) Language and Literacy across the Curriculum

Explores the relationship between language and learning with the goal of developing teaching practices that engage students in using language as a tool for understanding and constructing meaning across the curriculum. Explores how language/literacy take on different forms and functions in different social contexts and academic disciplines. Restricted to students admitted to the secondary teacher education program. Same as EDUC 5235. Prerequisites: Restricted to undergraduate Science-Secondary Education (EDSC) or Mathematics-Secondary Education (EDMA) majors only.

[School of Education](#)
[Education](#)
[Secondary Education](#)

## EDUC-4240 (3) African American and Latino Education in the United States

Explores development of schooling for African Americans in the U.S. and for Latinos in the American Southwest. Emphasizes parallels and points of intersection these groups experienced in their quest to access meaningful educational opportunities. Examines how social, economic, political, and judicial action defined and organized policy and practice for these two groups. EDUC 4240 and 6240 are identical courses. Prerequisites: Restricted to Graduate Students only.

[School of Education](#)
[Education](#)
[General Education](#)

## EDUC-4295 (3) Reading and Literacy in the Secondary Classroom

Examines ways in which adolescents develop literacy through reading, writing, speaking, viewing, and listening. Students learn to plan and organize literacy instruction based on ongoing assessment, to draw on and develop learner's linguistic skills related to reading, to support learner's reading comprehension skills, and to support their learning through oral language development. Prerequisites: Restricted to undergraduate English - Secondary Education (EDEN) or English - Secondary Education (EDSS) majors only.

School of Education | Education | Secondary Education

---

## EDUC-4311 (3) Children's Literature and Literacy Engagement in Elementary Schools

Prepares teacher education candidates for teaching children's literature in elementary schools. Participants will understand theoretical and developmental processes associated with literary learning, methods for teaching literature in a diverse society, and the integration of classroom instruction with the Colorado Academic Content Standards that foster such processes. Restricted to students admitted to the elementary education program. Prerequisites: Restricted to Elementary Education (EDEL) majors only.

School of Education | Education | Elementary Education

---

## EDUC-4312 (3) Perspectives on Science

Explores contemporary ideas and issues in the history, philosophy, and sociology of science education and science, science as a social and cultural activity, and how contemporary issues in science relate to and impact educational practice. Same as EDUC 5315.

School of Education | Education | General Education

---

## EDUC-4318 (3) The Nature of "English Language Arts"

Considers historical and ongoing controversies concerning the nature of "English" as an academic field of study and of "English Language arts" as a school subject. Integrates understandings of subject-matter specialization, of approaches to teaching this contested subject, and of the diverse learners that teachers seek to prepare for 21st century literacies. EDUC 4318 and 5318 are the same course.

School of Education | Education | General Education

---

## EDUC-4321 (4-5) Integrated Reading and Writing for Elementary Schools

Participants will understand theoretical and developmental processes associated with reading and writing, methods for teaching elementary reading and writing in a diverse society, and the integration of classroom instruction with the Colorado Academic Content Standards that foster such processes. Restricted to students admitted to the elementary teacher education program. Prerequisites: Restricted to Elementary Education (EDEL) majors only.

School of Education | Education | Elementary Education

---

---

## EDUC-4331 (3) Elementary Social Studies Methods

Prepares teacher education candidates for teaching social studies in a social context. Participants will understand theoretical and developmental processes associated with social studies learning, methods for teaching social studies in a diverse society, and the integration of classroom instruction with the Colorado Academic Content Standards. Restricted to students admitted to the elementary teacher education program. Prerequisites: Restricted to Elementary Education (EDEL) majors only.

School of Education | Education | Elementary Education

---

## EDUC-4341 (3) Elementary Reading Assessment and Instruction

Builds on knowledge and teaching practices introduced in EDUC 4321. Addresses five critical components of reading. Refines understanding of research-based practices for diagnostic assessments and intensive intervention teaching strategies for elementary age learners. Prepares candidates to deliver a comprehensive reading curriculum in the elementary grades. Prereq., EDUC 4321. Restricted to students admitted to the elementary teacher education program. Prerequisites: Restricted to Elementary Education (EDEL) majors only.

School of Education | Education | Elementary Education

---

## EDUC-4342 (3) Composition for Teachers

Fosters understandings of diverse students' writing processes and the development of a repertoire of research-based teaching practices. Emphasizes writing as a tool for both developing and communicating understandings across a range of settings. Restricted to students admitted to the English or Social Studies teacher education program. Same as EDUC 5345. Prerequisites: Restricted to undergraduate English - Secondary Education (EDEN) or English - Secondary Education (EDSS) majors only.

School of Education | Education | Secondary Education

---

## EDUC-4351 (3-5) Differentiating Instruction in Diverse Elementary Classrooms

Focuses on teaching culturally and linguistically diverse elementary school students, special education students, and differentiation in the elementary classroom. Includes hands-on experiences in elementary school settings. Restricted to students admitted to the elementary teacher education program. Coreqs., EDUC 5205 and 5215. Credit not granted for this course and EDUC 4023. Prerequisites: Restricted to Elementary (EDEL) or Music (EDMU) Education majors only.

School of Education | Education | Elementary Education

---

## EDUC-4411 (3) Educational Psychology for Elementary Schools

Integrates theories and ideas from elementary school child development and educational psychology. Explores theories of learning and child development and considers implications for teaching motivation, and academic achievement. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

School of Education | Education | General Education

---

## EDUC-4425 (3) Introduction to Bilingual/Multicultural Education

Provides a comprehensive survey of bilingual-multicultural education programs for language minority students. Includes an overview of the history and legislation related to bilingual education and English as a second language. Presents various models, philosophies, and theoretical underpinnings of bilingual education and ESL. Same as EDUC 5425.

School of Education Education General Education

---

---

## EDUC-4460 (3) Teaching and Learning Physics

Learn how people understand key concepts in physics. Through examination of physics content, pedagogy and problems, through teaching, and through research in physics education, students will explore the meaning and means of teaching physics. Students will gain a deeper understanding of how education research is done and how people learn. Useful for all students, especially for those interested in physics, teaching, and education research. Prereqs., PHYS 3210 and 3310 or instructor consent. EDUC 4460 and 5460 are the same course. Same as PHYS 4460 and 5460.

School of Education Education Graduate Education

---

---

## EDUC-4513 (2) Education and Practice

Meets during student teaching assignment. Includes topics of concern to teachers, such as classroom organization and management, lesson planning, assessment, journals, preparation of the teacher work sample, etc. Coreq., EDUC 4691, 4712, or 4722.

School of Education Education General Teacher Education

---

---

## EDUC-4580 (3) Physics and Everyday Thinking

Engages non-physics majors in hands-on, minds-on activities and labs to investigate the physical world, the nature of science, and how science knowledge is constructed. This introductory course is especially relevant for future elementary and middle school teachers although it will meet the needs of most non-physics and non-science majors. Physics content focuses on interactions and energy. Additional assignments completed at 5000-level. Same as EDUC 5580.

School of Education Education General Education

---

---

## EDUC-4610 (1-3) Math and Science Education

Introduces learning theory and teaching practices for mathematics and science learning assistants. Presents theoretical issues such as conceptual development, questioning techniques, cooperative learning, nature of math/science, and argumentation in mathematics and science. Restricted to students admitted to the Learning Assistant program.

School of Education Education General Education

---

---

---

## EDUC-4691 (10) Student Teaching: Elementary School 1

Kindergarten through sixth grades. Prereq., completion of all education and content-specific arts and sciences requirements, and passing required licensure exam. Coreq., EDUC 4513. Prerequisites: Restricted to Elementary Education (EDEL) majors only.

[School of Education](#) [Education](#) [General Teacher Education](#)

---

## EDUC-4712 (10) Student Teaching: Secondary School

Student teacher apprentices in a middle/junior or senior high school. Must be admitted to a secondary teacher education program in English, Japanese, Latin, math, Russian, science, or social studies. Prereqs., completed all education and content-specific arts and sciences courses, and passed required licensure exam. Coreq., EDUC 4513.

[School of Education](#) [Education](#) [General Teacher Education](#)

---

## EDUC-4716 (3) Basic Statistical Methods

Introduces descriptive statistics including graphic presentation of data, measures of central tendency and variability, correlation and prediction, and basic inferential statistics, including the t-test.

[School of Education](#) [Education](#) [General Education](#)

---

## EDUC-4722 (5) Student Teaching: Secondary School 2

Student teacher apprentices in a middle/junior high or senior high school. Restricted to students admitted to a secondary teacher education program in French, German, or Spanish. Prereqs., completed all education and content-specific arts and sciences courses, and passed required licensure exam. Coreq., EDUC 4513. Prerequisites: Restricted to French-Secondary Education (EDFR), German-Secondary Education (EDGR), or Spanish-Secondary Education (EDSP) majors only.

[School of Education](#) [Education](#) [General Teacher Education](#)

---

## EDUC-4732 (4-12) Student Teaching K-12

Required experience for music students seeking education at both elementary and secondary levels. Prereq., completed all education and content-specific music courses, passed required licensure exam. Coreq., MUSC 4193. Prerequisites: Restricted to Music Educ-Elem Sec or K-12 (EDMU) majors only.

[School of Education](#) [Education](#) [General Teacher Education](#)

---

## EDUC-4800 (1-9) Special Topics

Designed to meet needs of students with topics of pertinent interest. May be repeated up to 18 total hours.

School of Education Education General Education

## EDUC-4810 (1-9) Special Topics

May be repeated up to 18 total credit hours, provided the topics vary.

EDUC

### EDUC-4811 (3-4) Teaching and Learning Biology

Provides an introduction to recent research into student learning on the conceptual foundations of modern biology, together with pedagogical methods associated with effective instruction and its evaluation. Students will be involved in active research into conceptual and practical issues involved in biology education, methods to discover student preconceptions, and the design, testing and evaluation of various instructional interventions. Same as MCDB 4811 and EDUC 6811.

[School of Education](#) | [Education](#) | [Graduate Education](#)

### EDUC-4822 (3) Teaching and Learning Chemistry

Explores issues related to how people learn and teach chemistry. Reviews high school and early college chemistry concepts both from the content and pedagogical perspectives. Delves into the chemistry education research, education, psychology, and cognitive science literature. Provides an opportunity to observe and/or teach K-12 or college chemistry classes.

[School of Education](#) | [Education](#) | [General Education](#)

### EDUC-4831 (3) Advanced Peer Education

Second semester of an academic year's training for students interested in peer counseling. Expand upon what you learned in ARSC 2274. Focus on presentations, leadership, and group facilitation. Basic group leadership, facilitation theory, and technique taught. Co-create and co-lead your own small groups/presentations for other CU students. Offered only spring semesters. Prereq., ARSC 2274 or instructor consent.

[School of Education](#) | [Education](#) | [General Education](#)

---

## EDUC-4840 (1-4) Independent Study

School of Education | Education | General Education

---

## EDUC-4910 (3) Peer Counseling Practicum (previously EDUC 4830, 4840)

Controlled enrollment. Repeatable for degree credit. Credit given for peer counseling activities. Students are selected to participate in this class and act as peer counselors or TAs for the peer counseling training.

School of Education | Education | General Education

---

## EDUC-4912 (1) Practicum in Teacher Education

Provides in-school practicum experience.

School of Education | Education | General Teacher Education

---

## EDUC-5005 (3) Advanced Social Foundations of Education

Critically examines the intellectual and political forces that shape the aims, policies, and practices of K-12 education in the United States, emphasizing the period following the Brown v. The Board of Education decision in 1954. Restricted to students admitted to the secondary MA+ program. Prerequisites: Restricted to EDCl, ICCE, ICCH, ICCM or ICCS majors only.

School of Education | Education | Graduate Education

---

## EDUC-5015 (3) International / Comparative Education

Comparatively studies education in other countries, emphasizing its role in developing nations, with an emphasis on successful models in basic literacy, primary education, secondary curriculum, and teacher education. Analyzes political, social, and economic policies and ideologies for their relevance to the development process, including the role of international organizations: World Bank, UNICEF, UNESCO, Peace Corps and Volunteer Agencies. Same as EDUC 4015.

School of Education | Education | Graduate Education

---

## EDUC-5035 (3) Proseminar: Parent and Community Involvement

Focuses on models and strategies for improving parent and community involvement in the schools. Discusses administrative concerns, such as parent advisory councils, and instructional concerns, such as helping children with school assignments.

School of Education | Education | Graduate Education

---

---

---

## EDUC-5060 (3) Classroom Interactions

Same as EDUC 4060. Prerequisites: Restricted to Inst & Curr + Sec Math Lich (ICCM), Inst & Curr and Sec Sci Lich (ICCS) or Educ-Curriculum & Instruction (EDCI) majors only.

[School of Education](#) [Education](#) [Graduate Education](#)

---

---

## EDUC-5065 (3) Curriculum Theories

Examines four central curricular traditions: progressive; conservative; radical; and spiritual. Highlights the strengths and weaknesses of various writers within each tradition with attention paid to the conceptual features and the practical implications of each educational view. Encourages students to examine their own educational assumptions.

[School of Education](#) [Education](#) [Graduate Education](#)

---

---

## EDUC-5070 (3) Spirituality and Religion in Education

Examines features of religion, spirituality, and a liberal arts education, so as to further understand the constitutional, historical and cultural constraints on, and acceptable approaches to the study of religion and spirituality in American education. Specifically explores aspects of a contemplative orientation and the degree to which such an orientation should/can be pursued in K-12 public and higher education. Prerequisites: Restricted to Graduate Students only.

[School of Education](#) [Education](#) [Graduate Education](#)

---

---

## EDUC-5075 (3) Sociology in Education

In-depth analysis of theories and concepts in sociology and education. Evolution of curriculum, organization, and enrollment characteristics of American schools. Schooling, class, culture, gender, stratification, and educational reform in light of paradigmatic change in theories and concepts of sociology.

[School of Education](#) [Education](#) [Graduate Education](#)

---

---

## EDUC-5085 (3) History of American Education

Highlights social and intellectual history perspectives of American educational history, major reform movements from the 19th century to Dewey, and assessment of how differences of race, class, ethnicity, religion, power, and gender affected American education. Prerequisites: Restricted to Graduate Students only.

[School of Education](#) [Education](#) [Graduate Education](#)

---

---

---

## EDUC-5095 (3) Teachers as Researchers

Examines questions central to K-12 curriculum and instruction. Focuses on developing research projects applicable to current classroom practice, writing proposals for curriculum investigations, conducting specific curriculum investigations, and writing research findings.

School of Education Education Graduate Education

---

---

## EDUC-5105 (3) Teaching for Understanding and Equity

Addresses perspectives and evidence-based teaching practices that promote equity and access to conceptual understanding. Introduces the knowledge base on effective teaching practices, and the theories and research that support these practices. Explores the impact of theory and research on classroom instruction.

School of Education Education Graduate Education

---

---

## EDUC-5115 (3) Issues in School Change and Reform

Examines recent developments in teaching, and trends in the philosophy and practice of education. Focuses special attention on a variety of issues central to school reform.

School of Education Education Graduate Education

---

---

## EDUC-5135 (3) Story and Memoir

Examines the questions of "who I am", "where I come from", "what I might become" and "what I am called to do" in order to remember as well as make sense of our lives. Introduces and discusses narrative theory and selected memoirs. Students engage in reflection on their own narrative, and evaluate their practical and analytic understanding of narrative practice. EDUC 4135 and 5135 are the same course. Prerequisites: Restricted to Graduate Students only.

School of Education Education Graduate Education

---

---

## EDUC-5145 (3) Gender, Literacy, and the K-12 Classroom

Explores and critiques various conceptions of gender within popular and scholarly publications that have influenced how gender is approached in literacy classrooms. Builds a theoretical stance toward gender that supports equity, engagement and achievement for all children. Discusses teaching strategies that thoughtfully take into account gender identities and equity.

School of Education Education Graduate Education

---

---

## EDUC-5165 (3) Children's Literature

Involves reading and evaluation of picture books, and emphasizes children's interests, authors and illustrators, multicultural literature, the components of narrative, and the features of illustrations. Examines connections between children's literature and children's development as writers.

[School of Education](#) [Education](#) [Graduate Education](#)

---

## EDUC-5205 (3) Elementary Mathematics Theory and Methods

Provides pre-service teachers opportunities to explore contemporary theories of learning, curriculum development, and pedagogical strategies pertaining to teaching elementary-level mathematics. Blends exploration in mathematical content with understanding of mathematics teaching strategies. Coreqs., EDUC 4351 and 5215. Restricted to elementary teacher education students. Prerequisites: Restricted to Elementary Education (EDEL) majors only.

[School of Education](#) [Education](#) [Elementary Education](#)

---

## EDUC-5215 (3) Elementary Science Theory and Methods

Provides pre-service elementary teachers opportunities to explore contemporary theories of learning, curriculum development, pedagogical strategies, and assessment. Blends scientific content, pedagogy, and practical applications. Coreqs., EDUC 4351 and 5205. Restricted to students admitted to the elementary teacher education program. Prerequisites: Restricted to Elementary Education (EDEL) majors only.

[School of Education](#) [Education](#) [Elementary Education](#)

---

## EDUC-5222 (3) Language Study for Educators

Same as EDUC 4222. Prerequisites: Restricted to Graduate Students only.

[School of Education](#) [Education](#) [Graduate Education](#)

---

## EDUC-5235 (3) Language and Literacy Across the Curriculum

Same as EDUC 4232. Prerequisites: Restricted to ICCS, ICCM, EDCI, EPSY, EFPP, EECD, REME graduate students only.

[School of Education](#) [Education](#) [Graduate Education](#)

---

## EDUC-5245 (3) Foundations of Reading Instruction K-12

Comparatively analyzes current and emerging philosophies and programs in K-12 with focus on teaching reading and thinking skills. Prerequisites: Restricted to Graduate Students only.

[School of Education](#) [Education](#) [Graduate Education](#)

---

## Courses

Search by Course Number

**Subject** **Number**

EDUC

### [EDUC-5255 \(3\) Processes Involved in Literary Interpretation](#)

Stresses curiosity, observation, challenge, and insight into how children and adolescents learn to become literate beings. Discusses the work and play of literary interpretation including analytic reading, substantive discussion, reflective writing, visual presentation, and dramatic enactment where readers learn to take the words from the page to inform and transform their worlds. Prereq., EDUC 5245.

[School of Education](#) [Education](#) [Graduate Education](#)

### [EDUC-5265 \(3\) Processes in Writing](#)

Examines processes writers use from early ages to maturity by investigating current research and proposing and evaluating research designs. Discusses the reciprocal relationship between reading and writing instruction, emphasizing the Colorado Academic Content Standards and the International Reading Association Specialized Reading Professional Standards. Prerequisites: Restricted to Educ-Curriculum & Instruction (EDCI) graduate students only.

[School of Education](#) [Education](#) [Graduate Education](#)

### [EDUC-5275 \(3\) Assessment in Literacy](#)

Assumes an interactive model of reading and supports the perspective of assessment as interrelated with curriculum and instruction; examines principles that guide the selection and interpretation of assessment techniques, with a particular focus on low-performing students. Prereq., EDUC 5255. Prerequisites: Restricted to Graduate Students only.

[School of Education](#) [Education](#) [Graduate Education](#)

### [EDUC-5285 \(3\) Reading Clinic Procedures K-12](#)

---

Focuses learning on a select group of low performing students to assess reading proficiency, develop appropriate instructional goals, and provide instruction that addresses these goals. Emphasis on interpreting assessment data, extending a repertoire of instructional strategies, and developing and implementing a strong instructional plan. Prereq., EDUC 5275.

[School of Education](#) [Education](#) [Graduate Education](#)

---

## EDUC-5295 (3) Reading and Literacy in the Secondary Classroom

Examines ways in which adolescents develop literacy through reading, writing, speaking, viewing, and listening. Students learn to plan and organize literacy instruction based on ongoing assessment, to draw on and develop learner's linguistic skills related to reading, to support learner's reading comprehension skills, and to support their learning through oral language development. Prerequisites: Restricted ICCE or ICCH or EDCI or EPSY or EECD or EFPP majors only.

[School of Education](#) [Education](#) [Graduate Education](#)

---

## EDUC-5305 (3-4) Teaching and Learning in the Secondary Classroom

Presents and discusses issues in secondary school curriculum, instruction, assessment, and classroom management. Examines, analyzes, and evaluates a variety of teaching strategies, their effectiveness for students, and teacher dispositions to facilitate learning. Restricted to students admitted to the secondary MA+ program. Prerequisites: Restricted to EDCI, ICCE, ICCH, ICCM or ICCS majors only.

[School of Education](#) [Education](#) [Graduate Education](#)

---

## EDUC-5315 (3) Perspectives on Science

Explores contemporary ideas and issues in the history, philosophy, and sociology of science education and science, science as a social and cultural activity, and how contemporary issues in science relate to and impact educational practice. Same as EDUC 4312.

[School of Education](#) [Education](#) [Graduate Education](#)

---

## EDUC-5316 (3) Nature of Social Studies and Social Studies Education

Prepares teacher education candidates for teaching social studies in a social context. Participants will understand theoretical and developmental processes associated with social studies learning, methods for teaching social studies in a diverse society, and the integration of classroom instruction with the Colorado Academic Content Standards that foster such processes. Prerequisites: Restricted to Educ-Curriculum & Instruction (EDCI), Social Studies-Secondary Educ. (EDSS), Inst & Curr + Sec Soc Std Licn (ICCH), Anthropology (ANTH), Economics (ECON), Geography (GEOG), History (HIST) or International Affairs (IAFS) majors only.

[School of Education](#) [Education](#) [Graduate Education](#)

---

## EDUC-5317 (3) Perspectives on Mathematics

---

Explores the historical development of mathematics as a human construct, and the relationship between the discipline and the contemporary school mathematics curriculum. Focuses on the sociology of mathematics education and how cultural traditions and societal needs influence the school mathematics curriculum and educational practice.

[School of Education](#) [Education](#) [Graduate Education](#)

---

## EDUC-5318 (3) The Nature of "English Language Arts"

Considers historical and ongoing controversies concerning the nature of "English" as an academic field of study and of "English Language arts" as a school subject. Integrates understandings of subject-matter specialization, of approaches to teaching this contested subject, and of the diverse learners that teachers seek to prepare for the 21st century literacies. EDUC 4318 and 5318 are the same course. Prerequisites: Restricted to Graduate Students only.

[School of Education](#) [Education](#) [Graduate Education](#)

---

## EDUC-5325 (3) Teaching Literature in Middle and Secondary Schools

Provides teachers of English with background and experiences relevant to using reading, writing, and a range of other classroom social languages to teach literature to a culturally and intellectually diverse population of students. Explores relevant literary theories, texts, and genres, and examines contemporary and historical perspectives on the meaning and function of stories in both personal and democratic public life. Restricted to students admitted to the secondary English education program. Prerequisites: Restricted to Educ-Curriculum & Instruction (EDCI), English - Secondary Education (EDEN), Inst & Curr + Sec English Licn (ICCE), Social Studies-Secondary Educ. (EDSS) or Inst & Curr + Sec Soc Std Licn (ICCH) majors only.

[School of Education](#) [Education](#) [Graduate Education](#)

---

## EDUC-5345 (3) Composition for Teachers

Same as EDUC 4342. Prerequisites: Restricted ICCE or ICCH or EDCI or EPSY or EECD or EFPP or ICCM or ICCS majors only.

[School of Education](#) [Education](#) [Graduate Education](#)

---

## EDUC-5355 (3-4) Methods and Materials in Secondary Social Studies

Focuses on curriculum, materials, methods, assessment, and related aspects of instruction. Introduces best practices in teaching the social studies in middle and high schools. Examines the Colorado Academic Content Standards. Prereqs., EDUC 4295/5295 and EDUC 5325. Restricted to students admitted to the secondary social studies teacher education program. Prerequisites: Restricted to Educ-Curriculum & Instruction (EDCI) or Social Studies-Secondary Educ. (EDSS) majors only.

[School of Education](#) [Education](#) [Graduate Education](#)

---

## EDUC-5365 (3-4) Methods and Materials in Secondary English

Focuses on curriculum, materials, methods, and assessment. Introduces best practices in the teaching of English in middle and high

schools. Examines the Colorado Academic Content Standards. Prereqs., EDUC 4295/5295 and EDUC 5325. Restricted to students admitted to the secondary English teacher education program. Prerequisites: Restricted to Educ-Curriculum & Instruction (EDCI) or English - Secondary Education (EDEN) majors only.

School of Education | Education | Graduate Education

---

## EDUC-5375 (3-4) Project-Based Math Instruction

Focuses on curriculum, materials, methods and assessment, and related aspects of instruction. Introduces best practices in teaching mathematics in middle and high schools. Examines the Colorado Academic Content Standards. Restricted to students admitted to the secondary math teacher education program. Prerequisites: Restricted to EDCI, EDSC, EDMA, ICCM or ICCS majors only.

School of Education | Education | Graduate Education

---

## EDUC-5385 (3-4) Project-Based Science Instruction

Focuses on curriculum, materials, methods, assessment, and related aspects of instruction. Introduces best practices in teaching science in middle and high schools. Examines the Colorado Academic Content Standards. Restricted to students admitted to the secondary science teacher education program. Prerequisites: Restricted to EDCI, EDSC, EDMA, ICCM or ICCS majors only.

School of Education | Education | Graduate Education

---

## EDUC-5425 (3) Introduction to Bilingual/Multicultural Education

Provides a comprehensive survey of bilingual-multicultural education programs for language minority students. Includes an overview of the history and legislation related to bilingual education and English as a second language. Presents various models, philosophies, and theoretical underpinnings of bilingual education and ESL. Same as EDUC 4425. Prerequisites: Restricted to Graduate Students only.

School of Education | Education | Graduate Education

---

## EDUC-5435 (3) Materials and Methods in Bilingual/ Multicultural Education

Provides an in-depth study of the curriculum options available for bilingual and ESL programs. Presents, reviews, and critiques specific methods and strategies for teaching language to minority students. Gives the opportunity to develop and present teaching units in Spanish or in ESL methodology, as appropriate. Prereq., EDUC 5425.

School of Education | Education | Graduate Education

---

## EDUC-5445 (3) Curriculum for Multicultural Education

Analyzes curriculum programs and examines principles that inform innovation for education of diverse students at all school levels. Includes topics of ethnic, racial, socio-economic, linguistic, and gender diversity.

School of Education | Education | Graduate Education

---

---

## EDUC-5455 (3) Literacy for Linguistically Different Learners

Presents current and emerging philosophies and methods on teaching reading to culturally diverse second-language learners. Includes review of materials, strategies for teaching reading and writing skills, and important considerations for transference from L1 to L2 reading. Prereq., Educ 5425 or reading course at 5000 level.

[School of Education](#) [Education](#) [Graduate Education](#)

---

## EDUC-5460 (3) Teaching and Learning Physics

Learn how people understand key concepts in physics. Through examination of physics content, pedagogy and problems, through teaching, and through research in physics education, students will explore the meaning and means of teaching physics. Students will gain a deeper understanding of how education research is done and how people learn. Useful for all students, especially for those interested in physics, teaching, and education research. Prereqs., PHYS 3210 and 3310 or instructor consent. EDUC 4460 and 5460 are the same course. Same as PHYS 4460 and 5460. Prerequisites: Restricted to Graduate Students only.

[School of Education](#) [Education](#) [Graduate Education](#)

---

## EDUC-5465 (3) Introduction to ESL/Bilingual and Special Education

Provides students with the fundamental information of ESL, bilingual and special education, including theories, assumptions, philosophies, and paradigms of bilingual and special education. Discusses successful teaching techniques and instructional approaches, including individualization, least restrictive environment, transition, and career education.

[School of Education](#) [Education](#) [Graduate Education](#)

---

## EDUC-5485 (3) Differentiation in the Classroom

Focuses on teaching culturally and linguistically diverse school students, special education students, and differentiation in the classroom. Emphasizes evidence-based teaching practices and programmatic interventions that support student learning.

[School of Education](#) [Education](#) [Graduate Education](#)

---

## EDUC-5505 (3) Education of Students with Learning and Behavior Disorders

Discusses unique learning needs of students with learning and behavior disorders. Emphasizes development of a systems model for diagnosis, programming, and remediation. Stresses data-based individualization of instruction, with emphasis on intervention in inclusive learning environments and developing a culturally responsive system.

---

## EDUC-5515 (3) Curriculum and Assessment for Special Learners

Emphasizes assessment of special education students from pre-referral through staffing and placement, including response to intervention, research-based assessment practices, analytic teaching and assessment, curriculum-based assessment and measurement. Selection, administration, and interpretation of formal and informal assessment devices are studied, with particular emphasis on cultural relevance and equity in assessment for special learners with mild to severe needs. Prerequisites: Restricted to Graduate Students only.

**Subject**    **Number**

EDUC

### [EDUC-5525 \(3\) Research Issues in Special Education](#)

Provides practical experience in the review, critique, conceptualization, and writing of research studies in special education. Also offers experience in design of evaluation systems for classroom practice. Prerequisites: Restricted to Graduate Students only.

[School of Education](#) | [Education](#) | [Graduate Education](#)

### [EDUC-5535 \(3\) Diagnostic Testing in ESL and Bilingual Education](#)

Includes both theoretical and applied aspects of diagnostic testing. Reviews administration and interpretation of current formal and informal educational tests (language proficiency). Emphasizes practices for equitable testing and assessment of English language learners. Prerequisites: Restricted to Graduate Students only.

[School of Education](#) | [Education](#) | [Graduate Education](#)

### [EDUC-5545 \(3\) Strategies for Teaching Students with Special Needs](#)

Provides teachers with specific evidence-based methods and techniques for teaching students with a wide variety of high and low disabilities including learning and language disabilities, hearing and visual impairments, physical disabilities, and health impairments. Emphasizes different teaching methods, instructional materials, and learning strategies that have proven effective working students with cognitive learning needs. Prerequisites: Restricted to Graduate Students only.

[School of Education](#) | [Education](#) | [Graduate Education](#)

### [EDUC-5555 \(3-4\) Practicum in Bilingual/Special Education](#)

Offers supervised field experience in elementary and secondary special education class settings. Each credit hour requires 50 contact hours. Prereqs., EDUC 5465, 5505, and EDUC 5515 or 5545. Prerequisites: Restricted to Graduate Students only.

---

School of Education Education Graduate Education

---

## EDUC-5575 (1-4) Workshop in Curriculum and Instruction

School of Education Education Graduate Education

---

## EDUC-5580 (3) Physics and Everyday Thinking

Same as EDUC 4580.

School of Education Education Graduate Education

---

## EDUC-5595 (1-4) Practicum in Linguistically Different: English as a Second Language

University supervised, school-based field experience teaching linguistically different students, as well as assistance in the completion of EECD portfolio. Prereqs., EDUC 5425, 5435 and 5535. Prerequisites: Restricted to Graduate Students only.

School of Education Education Graduate Education

---

## EDUC-5605 (3) Research Issues in Bilingual Education

Offers practical experience in the review, critique, conceptualization, and writing of research studies in bilingual/ESL education. Provides experience in the design of classroom evaluation systems. Prereq., EDUC 5425. Prerequisites: Restricted to Graduate Students only.

School of Education Education Graduate Education

---

## EDUC-5610 (1-3) Math and Science Education

Introduces learning theory and teaching practices for mathematics and science learning assistants. Presents theoretical issues such as conceptual development, questioning techniques, cooperative learning, nature of math/science, and argumentation in mathematics and science.

School of Education Education Graduate Education

---

## EDUC-5615 (3) Second Language Acquisition

Presents a broad survey of second-language acquisition research. Stresses theoretical concerns and research findings and practical applications to teaching second languages. Gives special emphasis to second-language acquisition. Prerequisites: Restricted to

Graduate Students only.

School of Education Education Graduate Education

---

---

## EDUC-5625 (3) Methods of Teaching English as a Second Language

Prepares teachers to teach English as a second language in public schools in the United States. Covers both theoretical and applied aspects of language learning and teaching. Recommended prereq., EDUC 5615.

School of Education Education Graduate Education

---

---

## EDUC-5635 (3) Education and Sociolinguistics

Explores the discipline of sociolinguistics, the study of language variation and use, and its application within education settings. Not designed as an advanced sociology or linguistics course. Areas of study include language variation, speech communities, the ethnography of communication, speech and social identities, and sociolinguistic research related to teaching and learning.

School of Education Education Graduate Education

---

---

## EDUC-5706 (3) Assessment in Mathematics and Science Education

Examines purposes and practices of assessment in mathematics and science education. Particular attention is given to application of theoretical foundations and contemporary research in the design and use of assessment techniques and tools to support teaching for student understanding. Addresses the role of effective formative assessment in teaching and learning.

School of Education Education Graduate Education

---

---

## EDUC-5716 (3) Basic Statistical Methods

Introduces descriptive statistics including graphic presentation of data, measures of central tendency and variability, correlation and prediction, and basic inferential statistics, including the t-test. Prerequisites: Restricted to Graduate Students only.

School of Education Education Graduate Education

---

---

## EDUC-5726 (3) Introduction to Disciplined Inquiry

Considers various research approaches and methodologies included in education including experimental and quasi-experimental methods; anthropological and case study methods; evaluative research and field studies; correlational; and sociological, historical, and philosophical research. Topics include library research, research criticism, research design, and proposal writing. Prerequisites: Restricted to Graduate Students only.

School of Education Education Graduate Education

---

---

## EDUC-5810 (3) Teaching K-12 Mathematics: Number Sense

Provides teachers opportunity to explore fundamental mathematical theories and pedagogical perspectives pertaining to the teaching and learning of number and operation. Engages students in explorations of mathematical content underlying number and operations, while highlighting relevant problem solving, reasoning and proof, and mathematical connections. Explores implications of teachers' mathematical learning on their classroom teaching. Develops practices supporting learner's number sense development.

[School of Education](#) [Education](#) [Graduate Education](#)

---

---

---

## EDUC-5820 (3) Teaching K-12 Mathematics: Algebraic Thinking

Uses reform-based mathematics curricula to engage participants in algebraic thinking, to reflect on their own knowledge of algebraic concepts, and to examine pedagogical ideas that can foster K-12 students' algebraic thinking and learning. Algebraic topics include patterning, variable, functions, multiple representations, equality, and solving linear and systems of equations.

[School of Education](#) [Education](#) [Graduate Education](#)

---

---

---

## EDUC-5822 (3) Teaching and Learning Chemistry

Explores issues related to how people learn and teach chemistry. Reviews high school and early college chemistry concepts both from the content and pedagogical perspectives. Delves into the chemistry education research, education, psychology and cognitive science literature. Provides an opportunity to observe and/or teach K-12 or college chemistry classes.

[School of Education](#) [Education](#) [Graduate Education](#)

---

---

---

## EDUC-5830 (3) Teaching K-12 Mathematics: Geometry & Measurement

Provides an opportunity to explore how to foster geometric thinking while examining fundamental mathematical theory underlying the content area of geometry and measurement. Emphasizes investigative approach involving problem solving, reasoning, connections, and communication as well as learning mathematics content in a flexible and conceptual way. Challenges participants to apply their understanding to teaching practices that foster geometric thinking in K-12 learners.

[School of Education](#) [Education](#) [Graduate Education](#)

---

---

---

## EDUC-5840 (3) Teaching K-12 Mathematics: Probability & Statistics

Focuses on teaching probability, data analysis, and statistics in K-12 classrooms. Explores curriculum and assessment strategies in the areas of probability and statistics. Examines research on students' thinking on stochastic tasks and how this research informs teaching practice. Emphasizes deepening of one's conceptual understanding of probability and statistics and their importance in the current information age.

---

School of Education Education Graduate Education

---

## EDUC-6210 (3) Education Policy and the Law

Approaches education policy issues through the rich history of litigation and current legal challenges facing American K-12 schooling. Builds an understanding of the legal and policy development of the American schooling system, particularly in the 20th century. Laws and legal cases will be used as jumping-off points for broader discussions. Prerequisites: Restricted to Graduate Students only.

School of Education Education Graduate Education

---

## EDUC-6220 (3) Gender Issues in Education

Provides a strong foundation in the various gender issues in education. Stimulates explorations into the ways the construct of "Gender" affects and is affected by the educational system and process. Presents knowledge and research about contemporary gender-related educational issues and theories of gender in education. Encourages development of well-considered views about the various issues, research, and theories.

School of Education Education Graduate Education

---

## EDUC-6230 (3) Ethics in Education

Investigates controversies in education from a self-consciously ethical perspective, drawing as appropriate from moral and political theory as well as law. Focuses on public education's role in fostering democratic citizenship and providing equal educational opportunity. Critically evaluates various education reform policies and curriculum policies. Applies method commonly used in medical ethics to make decisions regarding concrete ethically problematic cases.

School of Education Education Graduate Education

---

## EDUC-6240 (3) African American and Latino Education in the United States

Explores development of schooling for African Americans in the U.S. and for Latinos in the American Southwest. Emphasizes parallels and points of intersection these groups experienced in their quest to access meaningful educational opportunities. Examines how social, economic, political, and judicial action defined and organized policy and practice for these two groups. EDUC 4240 and 6240 are identical courses.

School of Education Education General Education

---

## EDUC-6318 (3) Psychological Foundations of Education

Introduces students to theoretical and empirical contributions of educational psychology, emphasizing applications to educational practices. Topics include learning, development, cognitive processes, social and cultural context, motivation, assessment, and individual

differences. Prerequisites: Restricted to Graduate Students only.

College/School

All

Search by Course Number

Subject Number

EDUC

### EDUC-6325 (3) Culture and Ethnography in Education

Applies anthropological perspectives to research in educational settings. Focuses on theories of culture, cultural transmission and acquisition, and cultural reproduction and production for understanding schooling and its outcomes.

[School of Education](#) [Education](#) [Graduate Education](#)

### EDUC-6328 (3) Advanced Child Growth and Educational Development

Introduces students to recent theoretical and research advances in the study of children and adolescent's cognitive, social and emotional development, with an emphasis on implications for learning in and out of school.

[School of Education](#) [Education](#) [Graduate Education](#)

### EDUC-6368 (3) Adolescent Psychology and Development for Teachers

Examines current theory and research on adolescent development, learning, motivation, and academic achievement. Emphasizes how theory and research can inform instructional decisions in the secondary classroom. Restricted to English-Secondary Education (EDEN), Social Studies-Secondary Educ (EDSS), Mathematics-Secondary Educ (EDMA) or Science-Secondary Educ (EDSC) graduate students only. Prerequisites: Restricted to English-Secondary Education (EDEN), Social Studies-Secondary Educ (EDSS), Mathematics-Secondary Educ (EDMA) or Science-Secondary Educ (EDSC) graduate students only.

[School of Education](#) [Education](#) [Graduate Education](#)

### EDUC-6504 (3) Issues and Methods in Cognitive Science

Interdisciplinary introduction to cognitive science, examining ideas from cognitive psychology, philosophy, education, and linguistics via computational modeling and psychological experimentation. Prereqs., graduate standing or at least one upper-division course in computer science, linguistics, philosophy, or psychology. Same as CSCI 6402, LING 6200, PHIL 6310, and PSYC 6200. Prerequisites: Restricted to Graduate Students only.

School of Education | Education | Graduate Education

---

## EDUC-6505 (1-2) Readings and Research in Cognitive Science

Interdisciplinary reading of innovative theories and methodologies of cognitive science. Share interdisciplinary perspectives through in-class and online discussion and analysis of controversial texts and of their own research in cognitive science. Required for joint PhD in cognitive science. Prereq., graduate standing. Same as CSCI 7762, LING 7762, and PSYC 7765.

School of Education | Education | Graduate Education

---

## EDUC-6506 (2) Cognitive Science Research Practicum

Independent, interdisciplinary research project in cognitive science for advanced graduate students pursuing a joint PhD in an approved core discipline and cognitive science. Research projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students need commitments from two mentors for their project. Prereq., CSCI 6402 or EDUC 6504 or LING 6200 or PHIL 6310 or PSYC 6200. Recommended prereq., CSCI 7762 or EDUC 6505 or LING 7762 or PHIL 7310 or PSYC 7762. Same as PSYC 7415, LING 7415, PHIL 7415, and CSCI 7412. Prerequisites: Restricted to Graduate Students only.

School of Education | Education | Graduate Education

---

## EDUC-6516 (2) Cognitive Science Research Practicum 2

Independent, interdisciplinary research project in cognitive science for advanced graduate students pursuing a joint PhD in an approved core discipline and cognitive science. Research projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students need commitments from two mentors for their project. Prereq., LING 7415 or PSYC 7415 or CSCI 7412 or EDUC 6506. Same as PSYC 7425, LING 7425, PHIL 7425, and CSCI 7422. Prerequisites: Restricted to Graduate Students only.

School of Education | Education | Graduate Education

---

## EDUC-6804 (1-4) Special Topics

May be repeated up to 12 total credit hours. Prerequisites: Restricted to Graduate Students only.

School of Education | Education | Graduate Education

---

## EDUC-6811 (3-4) Teaching and Learning Biology

Provides an introduction to recent research into student learning on the conceptual foundations of modern biology, together with

pedagogical methods associated with effective instruction and its evaluation. Students will be involved in active research into conceptual and practical issues involved in biology education, methods to discover student preconceptions, and the design, testing and evaluation of various instructional interventions. Same as MCDB 4811 and EDUC 6811. Prerequisites: Restricted to Graduate Students only.

EDUC

### EDUC-6954 (1-6) Master's Thesis

[School of Education](#) [Education](#) [Graduate Education](#)

### EDUC-6964 (3) Capstone: Inquiry in the Content Areas

Supports students in using and building on the ideas and content encountered in previous coursework. Requires students to conceptualize, design and implement an original research project in content area that will serve as exit requirement for the degree. Reads and engages in research and theory associated with Teacher Research (i.e. research conducted by teachers for professional purposes). Prerequisites: Restricted to Educ-Curriculum & Instruction (EDCI) graduate students only.

[School of Education](#) [Education](#) [Graduate Education](#)

### EDUC-7015 (3) Teaching Internship in Teacher Education

One-semester teaching internship in an undergraduate or graduate foundations course.

[School of Education](#) [Education](#) [Graduate Education](#)

### EDUC-7055 (3) Philosophy of Education

Examines exemplars of educational philosophy from ancient times to the present day, emphasizing their relevance and application to current controversies in education (e.g., multiculturalism, gender equity, and school choice). Formerly EDUC 5055. Prerequisites: Restricted to Graduate Students only.

[School of Education](#) [Education](#) [Graduate Education](#)

---

---

## EDUC-7105 (3) Collaboration to Meet Special Needs

Covers effective collaboration practices involving the special education teacher, other educational personnel, students, and parents. Bilingual special education considerations in collaboration will be described. Issues regarding inclusion will be explored. Practical application to teaching and learning will be made. Strategies for disseminating information and collaborative activities will be discussed.

[School of Education](#) [Education](#) [Graduate Education](#)

---

---

## EDUC-7316 (3) Intermediate Statistical Methods

Studies sampling theory and inferential statistics; advanced applications for testing of hypotheses regarding central tendency, variability, proportion, correlation, and normality; chi-square and the analysis of frequency data; multiple regression and prediction; introduction to the analysis of variance; and related computer programs for statistical analysis. Prereq., EDUC 5716.

[School of Education](#) [Education](#) [Graduate Education](#)

---

---

## EDUC-7326 (3) Experimental Design and Analysis 1

Focuses on experimental and quasi-experimental designs in educational research; applications of the general linear model; power and statistical efficiency; randomization and control; multiple comparisons; factorial experiments and interaction with fixed-factor and mixed design; analysis of covariance; effects of assumption violations; and related computer programs for statistical analysis. Prereqs., EDUC 5726 and 7316.

[School of Education](#) [Education](#) [Graduate Education](#)

---

---

## EDUC-7336 (3) Methods of Survey Research and Assessments

Examines theory and techniques involved in each stage of survey research, including problem formulation, questionnaire development, interview and mailed surveys, assessing reliability and validity, sampling plans, data reduction (e.g., factor analysis), and analysis of continuous and categorical data. Prereqs, EDUC 5726 and 7316.

[School of Education](#) [Education](#) [Graduate Education](#)

---

---

## EDUC-7346 (3) Ethnographic Methods in Educational Research

Explores the history of ethnography and its translation into educational research. Students practice participant observation, interviewing, journal writing, artifact searches, qualitative analysis and interpretation, and styles of reporting. Prereq., EDUC 6325 or equivalent doctoral level course in anthropological or sociological theory, or sociology of education.

[School of Education](#) [Education](#) [Graduate Education](#)

---

---

## EDUC-7376 (3) Theory and Practice of Educational and Psychological Measurement

Introduces theories of measurement and applications, and presents classical test theory. Includes quantitative concepts, methods, and computational techniques for the development, application, and evaluation of measurement instruments in social/ behavioral science and education. Prereq., EDUC 5716.

[School of Education](#) [Education](#) [Graduate Education](#)

---

## EDUC-7386 (3) Educational Evaluation

Builds an understanding of the range of approaches taken by educational evaluators, focusing particularly on the evaluation of programs. Explores the nature of different evaluation perspectives and how these disparate views translate into methodological and conceptual models. Students develop a familiarity with the most common and influential approaches to evaluation.

[School of Education](#) [Education](#) [Graduate Education](#)

---

## EDUC-7396 (3) Multivariate Analysis

Introduces contemporary advanced multivariate techniques and their application in social science research. Methods include multivariate regression and analysis of variance, structural equation models, and hierarchical/multi-level models. Prior experience with Anova and multiple regression is assumed. Prerequisites: Restricted to Graduate Students only.

[School of Education](#) [Education](#) [Graduate Education](#)

---

## EDUC-7416 (3) Seminar: Research Methodology

Presents selected topics for advanced study in educational research, statistics, measurement, and evaluation.

[School of Education](#) [Education](#) [Graduate Education](#)

---

## EDUC-7436 (3) Item Response Theory

Includes one-, two-, and three-parameter logistic models for dichotomously-scored items and partial credit models for polychotomously-scored items; applications of the models to problems such as equating of test forms, test design, computerized adaptive testing, and the detection of item bias. Prereqs., EDUC 7316, 7376.

[School of Education](#) [Education](#) [Graduate Education](#)

---

---

## EDUC-7446 (3) Seminar: Policy Issues in Education

Explores major policy issues confronting U.S. education and examines the nature and undertaking of educational policy studies. Learn to approach policy issues from a contextual perspective that highlights systemic forces and analyzes and applies differing policy instruments. While a wide variety of policies are covered in the course, it particularly emphasizes issues of educational equity.

[School of Education](#) [Education](#) [Graduate Education](#)

---

## EDUC-7456 (3) Advanced Multivariate Methods: Multi-level and Latent Variable Modeling

Covers in depth two advanced multivariate models common to social science research: latent variable (structural equation) models and multi-level (hierarchical) models. Topics may be taught with a particular analytic context, such as measurement of change (longitudinal analysis) or experimental design. Prereq., EDUC 7396 or equivalent.

[School of Education](#) [Education](#) [Graduate Education](#)

---

## EDUC-7775 (1-2) Topics in Cognitive Science

Reading of interdisciplinary innovative theories and methodologies of cognitive science. Students participate in the ICS Distinguished Speakers series that hosts internationally recognized cognitive scientists who share and discuss their current research. Session discussions include analysis of leading edge and controversial new approaches in cognitive science. Restricted to students enrolled in ICS Cognitive Science Academic Programs. Same as LING 7775, CSCI 7772, PSYC 7775, SLHS 7775, and PHIL 7810. Prerequisites: Restricted to Graduate Students only.

[School of Education](#) [Education](#) [Graduate Education](#)

---

## EDUC-8014 (3) Doctoral Seminar: Multiculturalism and Education

Addresses the sociopolitical context of multiculturalism and education, and the sociocultural context of learning. Examines critical issues involved in making schooling responsive to an increasingly multicultural and multilingual society. Required for all doctoral students. Prereqs., EDUC 8210, 8220, 8230 8240, 8250 and 8260. Prerequisites: Restricted to EDCl, EECD, EPSY, EFPP or REME PhD graduate students only.

[School of Education](#) [Education](#) [Graduate Education](#)

---

## EDUC-8025 (3) Seminar: Curriculum Theories

Examines in depth recent developments in curriculum theory highlighting conceptual, contextual, and normative issues. Substantially explores distinct curricular traditions, corresponding conceptions of the good life along with related approaches to reason and emotion. Focuses on the works of prominent curriculum theorists.

[School of Education](#) [Education](#) [Graduate Education](#)

---

---

## EDUC-8045 (3) Philosophical Issues in Educational Research

Familiarizes students with important concepts and issues from the philosophy of science and, to a lesser extent, political theory and ethics; grounds such concepts and issues in the literature (often in terms of primary philosophical sources); and stimulates students to apply this material to the field of educational research in an informed way. Restricted to EDCI, EECD, EPSY, EFPP or REME PhD graduate students only. Prerequisites: Restricted to EDCI, EECD, EPSY, EFPP or REME PhD graduate students only.

School of Education | Education | Graduate Education

---

---

## EDUC-8055 (3) Theoretical Issues in Education Policy

Provides students with an examination of the theories behind education policy analysis. Takes a thematic approach to the study of policy in order to understand how policy agendas are set; how democratic deliberation should be linked with research and policy; and the relationship between politics, social structures, research, and policies. Prerequisites: Restricted to EDCI, EECD, EPSY, EFPP or REME PhD graduate students only.

School of Education | Education | Graduate Education

---

---

## EDUC-8125 (3) Seminar: Radical Education Theories

Examines radical analyses, based on class, gender, and race, that public schooling in the U.S. maintains a dynamic of oppression and domination that undermines the schools' democratic premise. Scrutinizes the conceptual framework, interpretive and explanatory adequacy, and ethical justification of radical claims.

School of Education | Education | Graduate Education

---

---

## EDUC-8135 (3) Seminar: Research on Teaching

Provides an historical perspective of research on teaching, focusing on the evolution of conceptual frameworks, research methods, and research findings. Examines substantive and methodological issues that underlie contemporary research on teaching. Explores areas of research including teacher knowledge and beliefs, teaching for understanding, understanding student thinking, motivation and volition, and classroom assessment.

School of Education | Education | Graduate Education

---

---

## EDUC-8145 (3) Seminar: Research on Teacher Education and Learning to Teach

Explores substantive and methodological issues that underlie current research on learning to teach, teacher education, and teacher professional development. Considers the learning and development of experienced and novice teachers, with an emphasis on learning to teach in ways that conform to reform-based educational ideas.

## EDUC-8155 (3) Advanced Topics in Literacy Education

Examines special topics in theory and research related to literacy and literacy education. Topics vary each semester. May be repeated up to 12 total credit hours.

EDUC

### [EDUC-8165 \(3\) Advanced Topics in Mathematics Education](#)

Examines special topics in theory and research related to mathematics education. Topics vary each semester. May be repeated up to 12 total credit hours. Prerequisites: Restricted to Graduate Students only.

[School of Education](#) [Education](#) [Graduate Education](#)

### [EDUC-8175 \(3\) Advanced Topics in Science Education](#)

Examines special topics in theory, research, and assessment related to science education. Focuses on the development of the doctoral prospectus. Provides opportunities for students to defend their own work and to critique the work of their peers. Topics range from theoretical framing to presenting and defending one's work. May be repeated up to 12 total credit hours.

[School of Education](#) [Education](#) [Graduate Education](#)

### [EDUC-8210 \(3\) Perspectives on Classroom Teaching and Learning](#)

Introduces students to various paradigms within educational research and how they are employed to study teaching and learning in K-12 classrooms. Includes an analysis of the theories, assumptions, questions, methods, and findings associated with each of them. Prerequisites: Restricted to EDCl, EECD, EPSY, EFPP or REME PhD graduate students only.

[School of Education](#) [Education](#) [Graduate Education](#)

### [EDUC-8220 \(3\) Introduction to Educational Research and Policy](#)

Introduces conceptual and empirical issues and controversies in educational research and policy. Complements other doctoral courses in quantitative and qualitative methodology. Prerequisites: Restricted to EDCl, EECD, EPSY, EFPP or REME PhD graduate students only.

---

School of Education Education Graduate Education

---

## EDUC-8230 (3-4) Quantitative Methods I

Explores the use of statistics to formalize research design in educational research. Introduces descriptive statistics, linear regression, probability, and the basics of statistical inference. Includes instruction in the use of statistical software, (e.g., SPSS.). Prerequisites: Restricted to EDCI, EECD, EPSY, EFPP or REME PhD graduate students only.

School of Education Education Graduate Education

---

## EDUC-8240 (3-4) Quantitative Methods II

Continues the exploration of research design in the social sciences, especially the evaluation of the quantitative research reported in professional journals. Introduces instances of the general linear model (both multiple regression and ANOVA) and its application to educational research. Prereq., EDUC 8230 or equivalent. Prerequisites: Restricted to EDCI, EECD, EPSY, EFPP or REME PhD graduate students only.

School of Education Education Graduate Education

---

## EDUC-8250 (3) Qualitative Methods I

Introduces students to the theory and practice of qualitative research in education. First of a two-course sequence covering research design, theoretical perspectives, and methods. Preference given to first-year doctoral students in education. Prerequisites: Restricted to EDCI, EECD, EPSY, EFPP or REME PhD graduate students only.

School of Education Education Graduate Education

---

## EDUC-8260 (3) Qualitative Methods II

Builds on EDUC 8250 to develop knowledge and skills in ethnographic and case study research. Second of a two-course sequence covering qualitative research design, theoretical perspectives, and methods. Prerequisites: Restricted to EDCI, EECD, EPSY, EFPP or REME PhD graduate students only.

School of Education Education Graduate Education

---

## EDUC-8348 (3) Seminar: Human Development

Intensive study of selected topics in human development. The focus of the seminar will vary depending on the instructor's expertise and students' interests; may repeat for credit more than once. Recent topics include adolescent development in social context, Vygotsky and Cultural-Historical Activity Theory, and teaching and learning in and out of school. Prereqs., EDUC 6318, EDUC 8210, or instructor consent. Prerequisites: Restricted to Graduate Students only.

School of Education Education Graduate Education

---

---

## EDUC-8358 (3) Seminar: Human Learning

Intensive study of selected topics in human learning. The focus of the seminar will vary depending on the instructor's expertise and students' interest; may repeat for credit more than once. Recent topics include sociocultural, situated, and other approaches to understanding the role of discourse in learning and teaching disciplinary content in school. Prereq., EDUC 6318, EDUC 8210, or instructor consent.

School of Education | Education | Graduate Education

---

## EDUC-8605 (3) Research and Professional Ethics for Educational Researchers

Examines the central issues and venerable theories of philosophical ethics that have historically framed research ethics. Also examines contemporary ethical theory that emphasizes a greater attention to the social sciences. Focuses on research ethics (both research of human subjects and research misconduct), various issues of professional academic ethics, and the AERA ethical code. Prerequisites: Restricted to Graduate Students only.

School of Education | Education | Graduate Education

---

## EDUC-8610 (3) Advanced Topics in Educational Equity and Cultural Diversity

Examines special topics in theory and research related to educational equity and cultural diversity in education. Topics vary each semester. May be repeated up to 12 total credit hours. Prerequisites: Restricted to Graduate Students only.

School of Education | Education | Graduate Education

---

## EDUC-8615 (3) Language Issues in Education Research

Examines ways in which issues of language can affect the validity of educational research. Discusses how language can be properly addressed with a multidisciplinary perspective through different stages in the process of an investigation, including design, sampling, data collection, and data analysis. Provides the conceptual basis for addressing linguistic diversity from a multidisciplinary perspective. Prerequisites: Restricted to Graduate Students only.

School of Education | Education | Graduate Education

---

## EDUC-8710 (3) Measurement in Survey Research

Introduces students to classical test theory and item response theory. Emphasizes the process of developing, analyzing and validating a survey instrument. Focuses on developing a survey instrument with items that derive from a clearly delineated theory for the construct to be measured. Analyzes item responses and put together a validity argument to support the proposed uses of the survey. Prerequisites: Restricted to Graduate Students only.

School of Education | Education | Graduate Education

---

---

---

## EDUC-8720 (3) Advanced Topics in Measurement

Focuses on psychometric models for measurement and their applications in educational and psychological research. Emphasizes understanding and evaluating the utility of models from item response theory (IRT). Applies and compares measurement models in the context of simulated or empirical data sets. Recommended prereq., EDUC 8710.

School of Education | Education | Graduate Education

---

---

## EDUC-8730 (3) Advanced Qualitative Data Analysis

Requires students begin semester with qualitative data already collected (from class project, pilot study, dissertation). Focuses on three approaches to data analysis: reconstruction, coding (deductive and inductive), and constant comparative method. Students apply these approaches to their own data. Instructors customize part of course to address specific topic of expertise, e.g., discourse analysis, video analysis, textual analysis, ethnographic analysis. May be repeated up to 12 total credit hours.

School of Education | Education | Graduate Education

---

---

## EDUC-8740 (3) Advances in the Assessment of Student Learning

Focuses on theories underlying traditional and contemporary proposals for assessment of student learning, and design and research of large-scale and classroom-based methods to assess student learning. Explores intersections between large-scale and classroom assessment, although gives greater attention to issues related to classroom assessment. Prerequisites: Restricted to Graduate Students only.

School of Education | Education | Graduate Education

---

---

## EDUC-8804 (3) Special Topics

Designed to meet needs of graduate students with topics of pertinent interest. Prerequisites: Restricted to Graduate Students only.

School of Education | Education | Graduate Education

---

---

## EDUC-8844 (1-4) Doctoral Independent Study

School of Education | Education | Graduate Education

EHON

## EHON-1151 (3) Critical Encounters

Explores critical, literary and philosophical approaches to the following related problems: 1) how we organize knowledge and construct meaning, and 2) how we locate a sense of self as both individuals and members of various groups amidst the resources and demands of competing interpretations, traditions challenges and circumstances. Prereq., honors standing or instructor consent required. Prerequisites: Restricted to College of Engineering majors only.

[College of Engineering & Applied Science](#) | [Engineering Administration](#)

## EHON-1500 (1) Honors Reading Group

Faculty led reading seminars, focusing on specific text or texts chosen by the faculty. Special attention will be paid to group formation and the process of collaborative learning. Restricted to Engineering Honors Program (PHEN) students only or instructor consent required. Prerequisites: Restricted to Engineering Honors Program (PEHN) students only.

[College of Engineering & Applied Science](#) | [Engineering Administration](#)

## EHON-4051 (1) Dimensions of Leadership

Explores the many dimensions of leadership that exceed technical knowledge: the ethical, societal, cultural, interpersonal, and personal. Through seminars, workshops and exposure to leaders, students will reflect upon their engineering education in light of the multifaceted demands of effective leadership and their own personal career goals. Students will take an active role in shaping the course. Prereq., junior standing; honors standing or instructor consent. Repeatable for credit up to 3 credit hours.

EMEN

## EMEN-4030 (3) Project Management Systems

Acquaints the student with multidisciplinary aspects of project management, including the relationship between schedule, project cost, and performance. Uses qualitative and quantitative tools to facilitate project management skills. Restricted to junior or senior in the College of Engineering and Applied Science with EMP approval. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

[College of Engineering & Applied Science](#) [Engineering Management](#)

## EMEN-4050 (3) Leadership and Professional Skills

Provides basic concepts of leadership and the essential skills required to become an effective leader/manager. Students will be provided the opportunity for personal development through exercises in communication and leadership effectiveness. Other major topics include leadership styles, managing commitments, change management, negotiation, conflict resolution, organizational culture, emotional intelligence, team dynamics, and business ethics. Restricted to seniors in the College of Engineering and Applied Science with EMP approval. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Engineering majors only.

[College of Engineering & Applied Science](#) [Engineering Management](#)

## EMEN-4100 (3) Business Methods and Economics for Engineers

Covers cost concepts, financial statements, and the company economic environment. Includes concepts and methods of analysis of the time value of money, comparison of project alternatives before and after taxes, cash flows, replacement analysis, risk management, and financial cash statements. Restricted to junior or senior in the College of Engineering and Applied Science with EMP approval. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

[College of Engineering & Applied Science](#) [Engineering Management](#)

---

## EMEN-4800 (3) Technology Ventures and Marketing.

Acquiring basic management and marketing skills is essential to successfully participating in technology venture development whether in a start-up company or Fortune 500 company. In the course, students learn to evaluate a technology, consider its viability as product, and learn the basic tenets of marketing with emphasis on developing a technology innovation into a commercially successful product with a mind on customer development as a key aspect of product development. Restricted to junior or senior in the College of Engineering and Applied Science with EMP approval. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

College of Engineering & Applied Science | Engineering Management

---

## EMEN-4825 (3) Entrepreneurial Business Plan Preparation

Instructs students in the necessary elements of a business plan and how to prepare a complete well-written plan for an entrepreneurial business venture. Students work in interdisciplinary business-engineering five-person teams to create a business concept and take it through to business plan completion. Same as ESBM 4830. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

College of Engineering & Applied Science | Engineering Management

---

## EMEN-4830 (1-3) Special Topics

College of Engineering & Applied Science | Engineering Management

---

## EMEN-5000 (3) Engineering Analysis

Provides an introduction to the logical and systematic thinking required to evaluate and solve typical engineering problems in mechanics, electricity, thermodynamics, fluid mechanics, and light. Emphasizes understanding the physical behavior of systems and applying the principles and laws from the physical sciences to analyze these systems. Required for nonengineers seeking admission to the graduate technology management curriculum track. Not for degree credit. Non-EMP students require instructor permission. Prerequisites: Restricted to graduate students in Engineering Management Program (EMEN) only.

College of Engineering & Applied Science | Engineering Management

---

## EMEN-5005 (3) Introduction to Applied Statistical Methods

Covers foundations for statistical reasoning and statistical applications. Topics include descriptive statistics, introduction to probability, random variables, discrete and continuous probability distributions, sampling theory and sampling distributions, statistical inference (point and interval estimation and hypothesis testing), and simple regression. All material taught is based upon case studies from business and industry. Restricted to students with 57-180 credits (Junior or Senior) or graduate students only. Not for EMP degree credit. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) or graduate students only.

College of Engineering & Applied Science | Engineering Management

---

## EMEN-5010 (3) Introduction to Engineering Management

Provides a general introduction to the principles and methods of technical management covering a variety of topics in leadership, strategic planning, product management, entrepreneurship, finance, value chains, management of R&D, and economic environments. Industry guest speakers provide real-life examples and applications. Required for all degree students. Non-EMP students require instructor permission. Prerequisites: Restricted to graduate students in Engineering Management Program (EMEN) only.

College of Engineering & Applied Science | Engineering Management

---

## EMEN-5020 (3) Finance and Accounting for Engineering Managers

Provides the concepts and skills necessary to financially analyze project and assess financial performance and status of an organization. Includes the time value of money, comparison of alternatives, taxes, risk management, cash flow, and financial cash statements. Required for all degree students. Non-EMP students require instructor permission. Prerequisites: Restricted to graduate students in Engineering Management Program (EMEN) only.

College of Engineering & Applied Science | Engineering Management

---

## EMEN-5025 (3) Entrepreneurial Finance for Engineers

Teaches students to prepare, interpret and use financial information, in the context of startup and early stage enterprises. Includes historical financial statements, budgets and the budgeting process, and the use of financial information in raising capital. Non-EMP students require instructor permission. Prerequisites: Restricted to graduate students in Engineering Management Program (EMEN) only.

College of Engineering & Applied Science | Engineering Management

---

## EMEN-5030 (3) Project Management

Presents the basic skills required to manage a wide range of technical projects. Topics include selecting project alternatives, managing project teams, developing project plan elements, risk management, monitoring and controlling projects, and financial analysis of projects. Skills learned are applied to a representative project. Non-EMP students require instructor permission. Prerequisites: Restricted to graduate students in Engineering Management Program (EMEN) only.

College of Engineering & Applied Science | Engineering Management

---

## EMEN-5031 (3) Software Project Management

Understand unique considerations of the software lifecycle that impact project management. Emphasize configuration management, code reviews, architectural influences, and quality assurance with automated testing. Explore Capability Maturity Model (CMM) and Unified Modeling Language (UML) impact on project success. Recommended prereq., some software development experience. Same as ECEN 5603 and CSCI 5608. Non-EMP students require instructor permission. Prerequisites: Restricted to graduate students in Engineering Management Program (EMEN) only.

College of Engineering & Applied Science | Engineering Management

---

## EMEN-5032 (3) Advanced Topics in Project Management

Covers advanced topics in project management from a systems view based on the Project Management Body of Knowledge (PMBOK); spans the entire project life cycle. Prereq., EMEN 5030 or equivalent. Non-EMP students require instructor permission. Prerequisites: Restricted to graduate students in Engineering Management Program (EMEN) only.

College of Engineering & Applied Science | Engineering Management

---

## EMEN-5040 (3) Quality, Strategy, and Value Creation

Introduces business performance excellence (BPE) including history of Quality Sciences, Six Sigma, and Deming's Theory of Profound Knowledge. Addresses use of strategic planning, policy deployment, and Total Asset Utilization to exceed customer requirements and maximize profitability. Addresses topics strategically and tactically through case analysis, field study, and experiential learning. Prereq., EMEN 5005 or equivalent. Non-EMP students require instructor permission. Similar to OPIM 6030. Prerequisites: Restricted to graduate students in Engineering Management Program (EMEN) only.

College of Engineering & Applied Science | Engineering Management

---

## EMEN-5041 (3) Advanced Topics in Value Creation

Studies methods designed to maximize excellence in business performance. Advanced study includes interactions with the customers and suppliers, integrated manufacturing, and meeting customer requirements while focusing on maximizing profitability. These characteristics are addressed both strategically and tactically through the use of case analysis, field study, and experiential learning for both the production and service sectors. Prereq., EMEN 5040. Recommended prereq., EMEN 5042. Non-EMP students require instructor permission. Prerequisites: Restricted to graduate students in Engineering Management Program (EMEN) only.

College of Engineering & Applied Science | Engineering Management

---

## EMEN-5042 (3) Methods for Quality Improvement

In-depth investigation of the concepts, tools, and techniques used in the management and measurement of quality and productivity. Topics include basic statistics and probability; process variation; statistical process control charting and capability analysis for process, product, and management systems; and an introduction to design of experiments (DOE) in business and industry. Prereq., EMEN 5040 or instructor consent. Non-EMP students require instructor permission. Prerequisites: Restricted to graduate students in Engineering Management Program (EMEN) only.

College of Engineering & Applied Science | Engineering Management

---

## EMEN-5043 (3) Advanced Topics in Quality Systems/ Engineering

Advanced study of methods, tools, techniques, and systems associated with advanced quality applications. Includes a survey of advanced process control technologies, control schemes, and measurement system analysis. Prereq., EMEN 5042. Non-EMP students require instructor permission. Prerequisites: Restricted to graduate students in Engineering Management Program (EMEN) only.

College of Engineering & Applied Science | Engineering Management

---

---

## EMEN-5050 (3) Leadership

Provides working engineers a background in leadership concepts and methods, and enables students to develop practical skills through numerous exercises. Topics include authentic leadership, increasing human performance and effectiveness, emotional intelligence, managing commitments, conflict resolution, leading change, and organizational culture. Required for all engineering management degree students. Same as TLEN 5050. Non-EMP students require instructor permission. Prerequisites: Restricted to graduate students in Engineering Management Program (EMEN) only.

College of Engineering & Applied Science | Engineering Management

---

## EMEN-5080 (3) Ethical Decision-Making in Engineering Management

Provide students with the ability to recognize ethical issues and dilemmas affecting managers in the workplace; understand various models and practices offering solutions to these issues; and understand how to create a culture of ethics and integrity in supporting and/or building a profitable, healthy, and responsible organization. Prerequisites: Restricted to students with 87-180 credits (Seniors) or graduate students only.

College of Engineering & Applied Science | Engineering Management

---

## EMEN-5090 (3) Technology Ventures and Marketing

Acquiring marketing know-how is essential for engineers interested in technology and product development. Students learn the basic tenets of marketing with emphasis on developing a technology innovation into a commercially successful product. Special attention given to customer development as a key aspect of product development. Course designed to be of interest to engineers in existing companies and startups. Highlighted will be in-depth discussions of real-world case studies and providing the student with marketing strategies for the high tech environment. Non-EMP students require instructor permission. Restricted to graduate students in Engineering Management Program (EMEN) only. Prerequisites: Restricted to graduate students in Engineering Management Program (EMEN) only.

College of Engineering & Applied Science | Engineering Management

---

## EMEN-5300 (3) Management of Research and Development

Provides practical, tested tools to manage research and development in industry and in university and government laboratories. R&D strategies are emphasized, as are innovation and creativity concepts and techniques. R&D portfolio techniques are emphasized and are the basis for a team project. Non-EMP students require instructor permission. Prerequisites: Restricted to graduate students in Engineering Management Program (EMEN) only.

College of Engineering & Applied Science | Engineering Management

---

## EMEN-5400 (3) Product Development

Provides state-of-the-art techniques for improving the identification and creation of new products, services, and brands that provide an exceptional customer experience. Both proven and emerging management techniques in new product management are covered. Non-EMP students require instructor permission. Prerequisites: Restricted to graduate students in Engineering Management Program (EMEN) only.

College of Engineering & Applied Science | Engineering Management

---

---

---

## EMEN-5405 (3) Systems Engineering: Requirements

Provides students with an understanding of how to prepare a program for effective and timely specification development and analytical methods for specification development. Management aspects covered include traceability, margins and budgets, requirements validation, specification publishing, and use of database systems. Non-EMP students require instructor permission. Prerequisites: Restricted to graduate students in Engineering Management Program (EMEN) only.

[College of Engineering & Applied Science](#) | [Engineering Management](#)

---

## EMEN-5410 (3) Systems Engineering: Synthesis

Provides methods for transforming a set of requirements in a series of specifications into a physical reality through product design, material procurement, and manufacturing transforms. The solution is developed through integration and optimization. This is the second course in a three course systems engineering sequence. Non-EMP students require instructor permission. Prerequisites: Restricted to graduate students in Engineering Management Program (EMEN) only.

EMEN

## EMEN-5415 (3) Systems Engineering: Verification

Provides students with methods to plan and implement effective product verification process on a program involving development of complicated products. Applies a process perfected on military programs, but the process is generic and can be applied effectively to commercial products. A worst case product and program complexity are considered permitting tailoring of the process for less complex cases. Non-EMP students require instructor permission. Prerequisites: Restricted to graduate students in Engineering Management Program (EMEN) only.

[College of Engineering & Applied Science](#) | [Engineering Management](#)

## EMEN-5430 (3) Software Product Management

Explores software product management activities from product concept to launch while ensuring both market visibility and customer satisfaction. Includes market research and opportunity analysis, software requirements, pricing and profitability, alpha-beta program feedback, operational readiness, sales channels and partner strategies. Recommended prereq., some software development experience. Non-EMP students require instructor permission. Prerequisites: Restricted to graduate students in Engineering Management Program (EMEN) only.

[College of Engineering & Applied Science](#) | [Engineering Management](#)

## EMEN-5500 (3) Lean and Agile Management

Operations Management has evolved and broadened from a sole focus on the manufacturing of hardware to a more universal set of concepts, management methods, and practical tools spanning manufacturing, supply chains, product development, software development, project management, support services, and accounting. This new approach can best be described as lean and agile management. Credit not granted for this course and OPIM 6080. Non-EMP students require instructor permission. Prerequisites: Restricted to graduate students in Engineering Management Program (EMEN) only.

[College of Engineering & Applied Science](#) | [Engineering Management](#)

---

## EMEN-5600 (3) Survey of Operations Research

Applications oriented survey of operations research topics including linear and integer programming, network analysis, dynamic programming, nonlinear programming, decision analysis, Markov chain and Markovian decision models, queuing theory, and simulation. Non-EMP students require instructor permission. Same as OPIM 6070. Prerequisites: Restricted to graduate students in Engineering Management Program (EMEN) only.

College of Engineering & Applied Science | Engineering Management

---

## EMEN-5610 (3) Advanced Statistical Methods for Engineering Research

Combines statistical methods with practical applications and computer software. Develops commonly used statistical models such as analysis of variance as well as linear and logistic regression. The statistical models are implemented and interpreted in the context of actual data sets using available statistical software. Continuation of EMEN 5005. Prereq., EMEN 5005 or equivalent and EMEN 5900 or equivalent. Non-EMP students require instructor permission. Prerequisites: Restricted to graduate students in Engineering Management Program (EMEN) only.

College of Engineering & Applied Science | Engineering Management

---

## EMEN-5620 (3) Data Mining and Screening Experiments for Engineering Research

Combine intermediate and advanced statistical methods with practical research applications. Develops commonly used statistical models such as Two and Three-Way Analysis of Variance and the analysis of Fractional Factorial Designs for the solution of common business and industrial research problems. The statistical models are implemented and interpreted in the context of actual data sets using available statistical software. Prereq., EMEN 5610. Non-EMP students require instructor permission. Prerequisites: Restricted to graduate students in Engineering Management Program (EMEN) only.

College of Engineering & Applied Science | Engineering Management

---

## EMEN-5710 (3) Applied Business Decisions

Student teams launch a high-tech company over eight quarters in a simulated business environment. Decisions are made in all major business areas-e.g. product development, marketing, operations, finance- in competition with other teams. Given the results of the previous quarter, teams make decisions for the next quarter. After the first year (four quarters), students prepare an elevator pitch, executive summary, and PowerPoint pitch to justify additional venture capital or a bank loan. Non-EMP students require instructor permission. Prerequisites: Restricted to graduate students in Engineering Management Program (EMEN) only.

College of Engineering & Applied Science | Engineering Management

---

## EMEN-5825 (3) Entrepreneurial Business Plan Preparation

Instructs students in the necessary elements of a business plan and how to prepare a complete, well-written plan for an entrepreneurial business venture. Students work in teams to create a business concept and take it through business plan completion. Recommended prereq., EMEN 5020 or equivalent. Non-EMP students require instructor permission. Prerequisites: Restricted to graduate students in

Engineering Management Program (EMEN) only.

College of Engineering & Applied Science | Engineering Management

---

## EMEN-5840 (1-3) Independent Study Project

Available only through approval of graduate advisor. Subjects arranged to fit the needs of the particular student. Non-EMP students require instructor permission. Prerequisites: Restricted to graduate students in Engineering Management Program (EMEN) only.

College of Engineering & Applied Science | Engineering Management

---

## EMEN-5900 (3) Research Methods

Explores commonly used research methods including analytical, agreement, descriptive, and relational methods; experimental design including incorporation, nesting, blocking, and controlling; threats to the internal and external validity of research. Sampling procedures and considerations, measurement validity and reliability, and managing the research study are also reviewed. Prereq., EMEN 5005 or equivalent. Non-EMP students require instructor permission. Same as TLEN 5750. Prerequisites: Restricted to graduate students in Engineering Management Program (EMEN) only.

College of Engineering & Applied Science | Engineering Management

---

## EMEN-6805 (1) Capstone Preparation

Students determine capstone research question, conduct literature review, develop research methodology and project plan, write a proposal, and select capstone committee. Restricted to students who have completed 21 credit hours toward the EMEN degree. Prereq., either EMEN 5900 if choosing an applications-oriented capstone or EMEN 5825 if choosing a business plan capstone, and selection of a capstone advisor. Prerequisites: Restricted to graduate students in Engineering Management Program (EMEN) only.

College of Engineering & Applied Science | Engineering Management

---

## EMEN-6810 (2) Capstone Completion

Continues EMEN 6805 as the second half of a two-course sequence for the engineering management capstone project. Students conduct agreed-upon research, research and analyze results, develop recommendations, write a final report, and present the project to the committee for evaluation. Prereq., EMEN 6805. Prerequisites: Restricted to graduate students in Engineering Management Program (EMEN) only.

College of Engineering & Applied Science | Engineering Management

---

## EMEN-6830 (3) Project Management Capstone

Evaluate project management practices in the student's work unit, company, or in another organization. Identify strengths and weaknesses of the major product management processes as outlined in the Project Management Body of Knowledge (PMBOK). Opportunities for improvement and methods for implementation are expected. Prereqs., EMEN 5030 and 5032 and acceptance into the Project Management Certification option. Prerequisites: Restricted to graduate students in Engineering Management Program (EMEN)

only.

## EMUS-1217 (1) University Singers

[College of Music](#) | [Music Ensembles](#)

## EMUS-1227 (1) University Choir

Prerequisites: Restricted to students with 0-56 credits (Freshmen or Sophomore) only.

[College of Music](#) | [Music Ensembles](#)

## EMUS-1237 (1) Women's Chorus

Prerequisites: Restricted to students with 0-56 credits (Freshmen or Sophomore) only.

[College of Music](#) | [Music Ensembles](#)

## EMUS-1247 (1) Men's Chorus

Prerequisites: Restricted to students with 0-56 credits (Freshmen or Sophomore) only.

[College of Music](#) | [Music Ensembles](#)

## EMUS-1257 (1) Collegiate Chorale

Prerequisites: Restricted to students with 0-56 credits (Freshmen or Sophomore) only.

College of Music | Music Ensembles

---

---

## EMUS-1267 (1) Choirs/Festival

College of Music | Music Ensembles

---

---

## EMUS-1277 (1) Court Players

College of Music | Music Ensembles

---

---

## EMUS-1287 (1) Marching Band

Prerequisites: Restricted to students with 0-56 credits (Freshmen or Sophomore) only.

College of Music | Music Ensembles

---

---

## EMUS-1297 (1) Wind Symphony

Prerequisites: Restricted to students with 0-56 credits (Freshmen or Sophomore) only.

College of Music | Music Ensembles

---

---

## EMUS-1307 (1) Band

Prerequisites: Restricted to students with 0-56 credits (Freshmen or Sophomore) only.

College of Music | Music Ensembles

---

---

## EMUS-1317 (1) Campus Band

Prerequisites: Restricted to students with 0-56 credits (Freshmen or Sophomore) only.

College of Music | Music Ensembles

---

---

## EMUS-1327 (1) Symphony Orchestra

2.0 hours offered CE Aspen Music School only. Prerequisites: Restricted to students with 0-56 credits (Freshmen or Sophomore) only.

College of Music | Music Ensembles

---

---

## EMUS-1337 (1) Chamber Orchestra

College of Music | Music Ensembles

Subject Number

EMUS

### EMUS-1477 (1) Vocal Jazz Ensemble

Study and performance of various vocal jazz styles, development of improvisational techniques, and investigation of the challenges of music making in a small group setting. Same as EMUS 3477 and EMUS 5477.

[College of Music](#) | [Music Ensembles](#)

### EMUS-1507 (1) Chamber Music

Prerequisites: Restricted to students with 0-56 credits (Freshmen or Sophomore) only.

[College of Music](#) | [Music Ensembles](#)

### EMUS-1517 (1) Campus Orchestra

Offers University string, wind and percussion performers not majoring in music an opportunity to play in a conducted orchestra. Rehearsals are one night per week and has limited performance demands. Auditions are not required for strings. Instruments are available if needed. May be repeated up to 12 total credit hours. Same as EMUS 3517. Prerequisites: Restricted to students with 0-56 credits (Freshmen or Sophomore) only.

[College of Music](#) | [Music Ensembles](#)

### EMUS-3217 (1) University Singers

Restricted to Juniors or Seniors only. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

ENGL

## ENGL-1001 (3) Freshman Writing Seminar

Provides training and practice in writing. Focuses on the writing process, the fundamentals of composition, and the structure of argument. Provides numerous and varied assignments with opportunity for revision. Prereqs., College of Arts and Sciences freshman or sophomore standing. Not open to business or engineering majors. Meets MAPS requirement for English. Approved for arts and sciences CORE curriculum: lower-division written communication. Prerequisites: Not open to Engineering or Business majors.

[College of Arts & Sciences](#) [English](#) [Undergraduate Writing](#)

## ENGL-1191 (3) Introduction to Creative Writing

Introduces techniques of fiction and poetry. Student work is scrutinized by the instructor and may be discussed in a workshop atmosphere with other students. May not be taken concurrently with ENGL 2021 or 2051. May not be repeated. Not open to graduate students.

[College of Arts & Sciences](#) [English](#) [Undergraduate Writing](#)

## ENGL-1260 (3) Introduction to Women's Literature

Introduces literature by women in England and America. Covers both poetry and fiction and varying historical periods. Acquaints students with the contribution of women writers to the English literary tradition and investigates the nature of this contribution. Same as WMST 1260. Approved for arts and sciences core curriculum: human diversity.

[College of Arts & Sciences](#) [English](#) [General Literature & Language](#)

## ENGL-1500 (3) Masterpieces of British Literature

---

Introduces students to a range of major works of British literature, including at least one play by Shakespeare, a pre-20th century English novel, and works by Chaucer and/or Milton. Approved for arts and sciences CORE curriculum: literature and the arts.

College of Arts & Sciences English General Literature & Language

---

## ENGL-1600 (3) Masterpieces of American Literature

Enhances student understanding of the American literary and artistic heritage through an intensive study of a few centrally significant texts, emphasizing works written before the 20th century. Approved for arts and sciences CORE curriculum: literature and the arts.

College of Arts & Sciences English General Literature & Language

---

## ENGL-1800 (3) American Ethnic Literatures

Introduces significant fiction by ethnic Americans. Explores both the literary and the cultural elements that distinguish work by these writers. Emphasizes materials from Native American, African American, and Chicano traditions. Approved for arts and sciences core curriculum: human diversity.

College of Arts & Sciences English General Literature & Language

---

## ENGL-1840 (1-3) Independent Study---Lower Division

Creative writing. May be repeated up to 8 total credit hours.

College of Arts & Sciences English General Literature & Language

---

## ENGL-1850 (1-3) Independent Study---Lower Division

Literature/language. May be repeated up to 8 total credit hours.

College of Arts & Sciences English General Literature & Language

---

## ENGL-2000 (3) Literary Analysis

Provides a basic skills course designed to equip students to handle the English major. Emphasizes critical writing and the acquisition of basic techniques and vocabulary of literary criticism through close attention to poetic and prose language. Required for students who declared the major summer 1999 and thereafter. Restricted to English majors only. Credit not granted for this course and ENGL 1010. Prerequisites: Restricted to English majors only.

College of Arts & Sciences English General Literature & Language

---

---

---

## ENGL-2010 (3) Introduction to Literary Theory

Introduces students to a wide range of critical theories that English majors need to know. Covers major movements in modern literary/critical theory, from Matthew Arnold through new criticism to contemporary postmodern frameworks. Required for all English majors. Restricted to English majors only. Prerequisites: Restricted to English majors only.

College of Arts & Sciences English General Literature & Language

---

## ENGL-2020 (5) Literary Analysis (with Lab)

Provides basic skills for the English major, enhanced with a language arts lab. Emphasizes critical writing and the acquisition of the techniques and vocabulary of criticism through close attention to literary language. Required for students who declared the major summer 1999 and thereafter. Restricted to English majors. Credit not granted for this course and English 2000. Prerequisites: Restricted to English majors only.

College of Arts & Sciences English General Literature & Language

---

## ENGL-2021 (3) Introductory Poetry Workshop

Introductory course in poetry writing. May be repeated up to 9 total credit hours. Prereq., ENGL 1191 (min grade B-), or equivalent transfer course work. Prerequisites: Requires prerequisite course of ENGL 1191 (B- or better). Not open to graduate students.

College of Arts & Sciences English Undergraduate Writing

---

## ENGL-2036 (3) Introduction to Digital Media in the Humanities

Serves as a humanities-based introduction to digital media structures such as digital archive and reading/writing software; studies theories and methodologies for undertaking digital media scholarship in the humanities; and explores digital textualities ranging from text messaging, blogging, and game to digital fiction and poetry. Same as ATLS 2036. Formerly ENGL 2030.

College of Arts & Sciences English Advanced Thry, Genre, Pop Cult

---

## ENGL-2051 (3) Introductory Fiction Workshop

Introductory course in fiction writing. May be repeated up to 9 total credit hours. Prereq., ENGL 1191 (min grade B-), or equivalent transfer course work. Prerequisites: Requires prerequisite course of ENGL 1191 (B- or better).

College of Arts & Sciences English Undergraduate Writing

---

## ENGL-2222 (3) Foundations of British and American Literature

Studies major texts of medieval and Renaissance writers who fundamentally influenced the course of English writing. Ordinarily deals

with Chaucer, Shakespeare, and Milton, though other classical, medieval, and Renaissance authors may be substituted.

College of Arts & Sciences English Backgrounds to Literature Engl

---

---

## ENGL-2502 (3) British Literary History 1

Provides a chronological study of great figures and forces in English literature from Beowulf to 1660. Students may not receive credit for both ENGL 2502 and 3503.

College of Arts & Sciences English Backgrounds to Literature Engl

---

---

## ENGL-2512 (3) British Literary History 2

Provides a chronological study of great figures and forces in English literature from 1660 to the present. Credit not granted for this course and ENGL 3512 and 3513.

College of Arts & Sciences English Backgrounds to Literature Engl

---

---

## ENGL-2602 (3) Introduction to Western European Literature 1

Close study of literary classics of Western civilization: the Odyssey or Iliad, Greek drama, and several books of the Bible.

College of Arts & Sciences English Backgrounds to Literature Engl

---

---

## ENGL-2612 (3) Introduction to Western European Literature 2

Close study of literary classics of Western civilization: major Roman and medieval texts.

College of Arts & Sciences English Backgrounds to Literature Engl

---

---

## ENGL-2707 (3) Introduction to Lesbian, Bisexual, and Gay Literature

Offers students at sophomore and junior levels an introduction to some of the forms, concerns, and genres of contemporary lesbian, bisexual, and gay writing in English. Prereq., sophomore standing. Same as LGBT 2707.

College of Arts & Sciences English Multicultural & Gender Studies

---

---

## ENGL-2717 (3) American Indian Literature

Surveys historical and contemporary North American Native American literature. Examines the continuity and incorporation of traditional stories and values in Native Literature, including novels, short stories, and poetry. Same as ETHN 2713.

College of Arts & Sciences English Multicultural & Gender Studies

## ENGL-2727 (3) Survey of African American Literature 1

Chronological study of African American literature from the 17th century to the Harlem Renaissance. Same as ETHN 2722.

College of Arts & Sciences English Multicultural & Gender Studies

## ENGL-2737 (3) Survey of African American Literature 2

Chronological study of African American literature from the Depression writers to the present. Same as ETHN 2732.

College of Arts & Sciences English Multicultural & Gender Studies

## ENGL-2747 (3) Chicana/Chicano and Mexican Literature

Introduces Chicana and Chicano and Mexican literary studies, focusing on narrative works by Chicana and Chicano writers. Examines diverse range of Mexican writing in Greater Mexico as it addresses recurring issues and themes, including language, race and class, questions of identity, and gender relations. Same as ETHN 2746.

College of Arts & Sciences English Multicultural & Gender Studies

## ENGL-2767 (3) Survey of Post-Colonial Literature

Surveys the development of literatures in English in former British colonies. Topics include the spread and adaptation of English language literary forms in Asia, Africa, the Caribbean, and the far new world (Australia and New Zealand). Students learn the causes of the dispersion and the motivations for the clearly different uses of English literary forms in the ex-colonies. Same as ETHN 2761. .

Provides an interdisciplinary study of England in one of its most vibrant cultural and historical periods. Topics include politics, religion, family life, and the ways contemporary authors understood their world. Prereq., sophomore standing. Approved for arts and sciences core curriculum: historical context. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences English British Literature after 1660

---

---

## ENGL-3217 (3) Topics in Gender Studies

Studies special topics in gender studies; specially designed for English majors. Topics vary each semester. May be repeated up to 6 total credit hours for different topics. Prereq., sophomore standing. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences English Multicultural & Gender Studies

---

## ENGL-3226 (3) Folklore 1

Emphasizes formal study of folk traditions (includingtales, songs, games, customs, beliefs, and crafts) within a theoretical framework, using examples from several cultures. Prereq., sophomorestanding. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences English Advanced Thry, Genre, Pop Cult

---

## ENGL-3246 (3) Topics in Popular Culture

Studies special topics in popular culture; specially designed for English majors. Topics vary each semester. May be repeated for a total of 6 credit hours for different topics. Prereq., sophomore standing. Prerequisites: Restricted to sophomore, junior, or senior English or Humanities Majors only.

College of Arts & Sciences English Advanced Thry, Genre, Pop Cult

---

## ENGL-3267 (3) Women Writers

Introduces literature by British and American women. Prereq., sophomore standing. Same as WMST 3267.

College of Arts & Sciences English Multicultural & Gender Studies

---

## ENGL-3302 (3) Backgrounds of English and American Literature

Studies literary, philosophic, and religious traditions of the Greco-Roman and Judeo-Christian worlds, with close analysis of major texts in translation. Compares ancient and modern texts where feasible. Prereq., sophomore standing. Restricted to English and Humanities majors. Prerequisites: Restricted to sophomore, junior, or senior English or Humanities Majors only.

College of Arts & Sciences English Backgrounds to Literature Engl

---

## ENGL-3312 (3) The Bible as Literature

Surveys literary achievements of the Judeo-Christian tradition as represented by the Bible. Restricted to sophomores/juniors/seniors. Same as JWST 3312. Approved for arts and sciences core curriculum: ideals and values. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

---

College of Arts & Sciences English Backgrounds to Literature Engl

---

## ENGL-3377 (3) Topics in Multicultural Literature

Studies special topics in multicultural literature; specially designed for English majors. Topics vary each semester. May be repeated up to 6 total credit hours for different topics. Prereq., sophomore standing. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences English Multicultural & Gender Studies

---

## ENGL-3553 (3) Geoffrey Chaucer

Selection of Chaucer's works, including The Canterbury Tales and other shorter poems. Includes an introduction to Middle English. Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences English English Literature to 1660

---

## ENGL-3563 (3) Early Shakespeare

Shakespeare's works through 1600. Prereq., junior standing. Restricted to English, humanities, and theatre majors only. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) English (ENGL), Humanities (HUMN), Theatre (THTR or TBFA) majors only.

College of Arts & Sciences English English Literature to 1660

---

## ENGL-3573 (3) Later Shakespeare

Shakespeare's works after 1600. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) English (ENGL), Humanities (HUMN) or Theatre (THTR or TBFA) majors only.

College of Arts & Sciences English English Literature to 1660

---

## ENGL-3583 (3) Milton

Milton's poetry and selected prose. Prerequisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) English (ENGL) or Humanities (HUMN) majors only.

College of Arts & Sciences English English Literature to 1660

---

## ENGL-3655 (3) American Literature to 1860

Chronological survey of the literature from Bradford to Whitman. Restricted to English, humanities, and film studies majors only. Credit

not granted for this course and ENGL 3654. Prerequisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) English (ENGL), Humanities (HUMN) or Film (FILM or FMST) majors only.

College of Arts & Sciences English American Literature

## ENGL-3665 (3) American Literature after 1860

Chronological survey of the literature from Whitman to Faulkner. Continuation of ENGL 3655. Restricted to English, humanities, and film studies majors only. Prereq., sophomore standing. Credit not granted for this course and ENGL 3664.

College of Arts & Sciences English American Literature

## ENGL-3677 (3) Jewish-American Literature

Explores the Jewish-American experience from the 19th century to the present through writers such as Sholom Aleichem, Peretz, babel, Singer, Malamud, Miller, Ginsberg, and Ozick. The Jewish experience ranges from the travails of immigration to the loss of identity through assimilation. Restricted to sophomores/juniors/seniors. Same as JWST 3677. Approved for arts and sciences core curriculum: human diversity.

College of Arts & Sciences English Multicultural & Gender Studies

Designed to give students practical criticism of their script writing and technical format requirements. Either stage plays or screenplays are studied, as announced. May be repeated up to 9 total credit hours. Prereq., CRW major or instructor consent based on submission of manuscript. Same as FILM 4075. Prerequisites: Requires prerequisite course of ENGL 1191 (B- or better).

College of Arts & Sciences English Undergraduate Writing

---

## ENGL-4081 (3) Playwriting

May be repeated up to 9 total credit hours. Prereq., CRW major or instructor consent based on submission of manuscript. Prerequisites: Requires prerequisite course of ENGL 1191 (B- or better). Restricted to students with a sub plan of Creative Writing.

College of Arts & Sciences English Undergraduate Writing

---

## ENGL-4113 (3) History and Culture of Medieval England

Explores the major historical, literary, and cultural developments in England from the Anglo-Saxon period through the 15th century. Prereq., junior standing. Approved for arts and sciences CORE curriculum: historical context.

College of Arts & Sciences English English Literature to 1660

---

## ENGL-4116 (3) Advanced Topics in Media Studies

Studies specialized topics in the history, theory, and practice of media, such as the history of the book, the theory of digital media, and the theory and practice of multimedia forms. Specially designed for English majors. Topics vary year to year. May be repeated up to 6 total credit hours. Restricted to sophomores/juniors/seniors. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences English Advanced Thry, Genre, Pop Cult

---

---

## ENGL-4204 (3) Development of the English Novel 1

From the beginnings to 1830. Prereq., junior standing. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

College of Arts & Sciences English British Literature after 1660

---

## ENGL-4214 (3) Development of the English Novel 2

Continuation of ENGL 4204. Prereq., junior standing.

College of Arts & Sciences English British Literature after 1660

---

## ENGL-4224 (3) Modern British and Irish Novel

Studies major figures and trends in the 20th century. Restricted to students with 57-180 credits (Junior or Senior). Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

College of Arts & Sciences English British Literature after 1660

---

## ENGL-4235 (3) American Novel 1

From the beginnings to 1900. Prereq., junior standing.

College of Arts & Sciences English American Literature

---

## ENGL-4245 (3) American Novel 2

From 1900 to the present. Prereq., junior standing. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

College of Arts & Sciences English American Literature

---

## ENGL-4250 (3) Modern and Contemporary Novel

Close study of masterpieces by such novelists as Proust, Joyce, Woolf, Lawrence, Mann, Kafka, and Faulkner. Prereq., junior standing. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

College of Arts & Sciences English General Literature & Language

---

## ENGL-4277 (3) Topics in Women's Literature

Focuses on areas of research interest in the study of women's literature, such as selected themes or critical issues. Students are expected to contribute original research to the topic under consideration. Prereq., junior standing. Same as WMST 4277.

College of Arts & Sciences English Multicultural & Gender Studies

---

## ENGL-4286 (3) Folklore 2

Upper-division studies of folk groups, events, texts, and contexts as they reflect traditional knowings---folk perceptions and teachings about the structure and purpose of the universe. Restricted to juniors/seniors. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

College of Arts & Sciences English Advanced Thry, Genre, Pop Cult

---

## ENGL-4287 (3) Studies in Lesbian, Gay, Bisexual, and Transgender Literature

Examines selected British, American, and French literary representations of lesbian and gay identity from the early 16th century to the present. Discusses the changing status of homosexuality as a literary and cultural topos, including how same-sex desire is defined, and the rhetorical and ideological difficulties involved in its representation. Specific topics vary each semester. May be repeated up to 9 total credit hours. Restricted to juniors and seniors. Same as LGBT/WMST 4287.

College of Arts & Sciences English Multicultural & Gender Studies

---

## ENGL-4460 (3) Modern Poetry

Selects works of British and American poets from 1900 to the present. Prereq., junior standing. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

College of Arts & Sciences English General Literature & Language

---

## ENGL-4503 (3) Continental Medieval Literature

Intensive study of the major literary works of the Middle Ages in Europe. Prereq., junior standing.

College of Arts & Sciences English English Literature to 1660

---

## ENGL-4513 (3) British Medieval Literature

Intensive study of the major literary works of the Middle Ages in Britain. Restricted to students with 57-180 credits (Junior or Senior). May be repeated up to 9 total credit hours provided the topics vary. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

College of Arts & Sciences English English Literature to 1660

---

---

## ENGL-4523 (3) The Renaissance in England: 1500--1600

Selected prose and non-dramatic poetry from Skelton and More through Shakespeare and his contemporaries. Prereq., junior standing. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

College of Arts & Sciences English English Literature to 1660

---

---

---

## ENGL-4533 (3) The Renaissance in England: 1600--1700

Selected prose and poetry by Donne, Jonson, Bacon, and their successors. Prereq., junior standing. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

College of Arts & Sciences English English Literature to 1660

---

---

---

## ENGL-4544 (3) The Age of Satire: 1660--1740

Dryden, Defoe, Swift, Pope, Addison, Steele, and their contemporaries. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) English (ENGL) or Humanities (HUMN) majors only.

College of Arts & Sciences English British Literature after 1660

---

---

---

## ENGL-4554 (3) The Age of Sense and Sensibility: 1740--1800

Gray, Johnson, Goldsmith, Boswell, Cowper, Burns, Blake, and their contemporaries. Prereq., junior standing.

College of Arts & Sciences English British Literature after 1660

---

College/School

All

Search by Course Number

Subject Number

ENGL

### ENGL-4564 (3) The Early Romantics

Major emphasis on Blake, Coleridge, and Wordsworth. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) English (ENGL) or Humanities (HUMN) majors only.

College of Arts & Sciences English British Literature after 1660

### ENGL-4574 (3) The Later Romantics

Major emphasis on Keats, Shelley, and Byron. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) English (ENGL) or Humanities (HUMN) majors only.

College of Arts & Sciences English British Literature after 1660

### ENGL-4583 (3) Elizabeth I and Her Times

Interdisciplinary course explores different aspects of the reign of Elizabeth I: social and political history; literature; theater; and music. Explores the role and impact of a female ruler on English culture. Restricted to juniors and seniors. Same as HIST 4134 and THTR 4091.

College of Arts & Sciences English English Literature to 1660

### ENGL-4604 (3) The Early Victorians

Main currents of Victorian thought in prose and poetry, 1830--1860. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) English (ENGL) or Humanities (HUMN) majors only.

College of Arts & Sciences English British Literature after 1660

---

---

## ENGL-4614 (3) The Later Victorians

Continuation of ENGL 4604, covering 1860-1900. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) English (ENGL) or Humanities (HUMN) majors only.

College of Arts & Sciences English British Literature after 1660

---

---

---

## ENGL-4655 (3) Studies in American Literature to 1900

Extensive study of particular periods and movements in American literature. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) English (ENGL) or Humanities (HUMN) majors only.

College of Arts & Sciences English American Literature

---

---

---

## ENGL-4665 (3) Studies in American Literature after 1900

Extensive study of particular periods and movements in American literature. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) English (ENGL) or Humanities (HUMN) majors only.

College of Arts & Sciences English American Literature

---

---

---

## ENGL-4697 (3) Contemporary African American Literature 1

Advanced in-depth study of the works of prominent African American novelists and poets. Restricted to juniors/seniors. Same as ETHN 4692. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

College of Arts & Sciences English Multicultural & Gender Studies

---

---

---

## ENGL-4820 (3) Honors Seminar

Prepares prospective honors students to write honors theses. Focuses on sharpening the skills needed to write a successful thesis, including research techniques and the ability to evaluate and respond to secondary materials. May not be repeated. Prereq., instructor consent. Restricted to junior and senior English majors. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

College of Arts & Sciences English General Literature & Language

---

---

---

## ENGL-4830 (3) Honors Thesis

Students accepted to English Departmental Honors are enrolled in this course.

College of Arts & Sciences English General Literature & Language

---

---

---

## ENGL-4840 (1-3) Independent Study---Upper Division

Creative writing. May be repeated up to 8 total credit hours.

College of Arts & Sciences English General Literature & Language

---

---

---

## ENGL-4850 (1-3) Independent Study---Upper Division

Literature/language. May be repeated up to 8 total credit hours.

College of Arts & Sciences English General Literature & Language

---

---

---

## ENGL-5019 (3) Survey of Contemporary Literary and Cultural Theory

Introduces a variety of critical and theoretical practices informing contemporary literary and cultural studies. May be repeated up to 6 total credit hours. Prerequisites: Restricted to English (ENGL) MA-Lit graduate students only.

College of Arts & Sciences English Graduate Courses

---

---

---

## ENGL-5029 (3) British Literature and Culture Before 1800

Introduces graduate level study of medieval and early modern writing through the long eighteenth century. Emphasizes a wide range of genres, forms, historical background, and secondary criticism. Cultivates research skills necessary for advanced graduate study. Topics will vary. May be repeated up to 6 total credit hours. Prerequisites: Restricted to English Lit-Creative Writing (CRWR), English Literature (ENLT), English (ENGL) or Comparative Literature (CMLT) graduate students only.

College of Arts & Sciences English Graduate Courses

---

---

---

## ENGL-5059 (3) British Literature and Culture After 1800

Introduces graduate level study of Romantic, Victorian, Modern, and Postmodern writing. Emphasizes a wide range of genres, forms, historical background, and secondary criticism. Cultivates research skills necessary for advanced graduate study. Topics will vary. May be repeated up to 6 total credit hours. Same as ENGL 5079. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences English Graduate Courses

---

---

---

## ENGL-5079 (3) British Literature and Culture After 1800.

Same as ENGL 5059.

---

---

College of Arts & Sciences English Graduate Courses

## ENGL-5109 (3) Literature and Culture of the United States

Introduces graduate level study of writing of the United States from its inception to the present. Emphasizes a wide range of genres, forms, historical background, and secondary criticism. Topics will vary. May be repeated up to 6 total credit hours. Prerequisites: Restricted to English Lit-Creative Writing (CRWR), English Literature (ENLT), English (ENGL) or Comparative Literature (CMLT) graduate students only.

## ENGL-5139 (3) Global Literature and Culture

Introduces graduate level study of recent writing in English from around the world. Emphasizes a wide range of genres, forms, new media, and secondary criticism. Cultivates research skills necessary for advanced graduate study. Topics will vary. May be repeated up to 6 total credit hours. Prerequisites: Restricted to English Lit-Creative Writing (CRWR), English Literature (ENLT), English (ENGL) or Comparative Literature (CMLT) graduate students only.

## ENGL-5169 (3) Multicultural/Postcolonial Studies.

Introduces graduate level study of ethnic American and/or postcolonial writing in English, including relevant theoretical discourse. Emphasizes a wide range of genres, forms, historical background, and secondary criticism. Cultivates research skills necessary for advanced graduate study. Topics will vary. May be repeated up to 6 total credit hours. Prerequisites: Restricted to English, English Literature or English Literature-Creative Writing graduate students only.

## ENGL-5199 (3) Studies in Special Topics

See ENGL 5109 for description.

## ENGL-5229 (3) Poetry Workshop

Designed to give students time and impetus to generate poetry and discussion of it in an atmosphere at once supportive and critically serious. Admission to graduate creative writing students or by instructor's approval of an application manuscript. May be repeated up to 9 total credit hours. Prerequisites: Restricted to English Literature-Creative Writing, English Literature or English graduate students only.

## ENGL-5239 (3) Fiction Workshop

Designed to give students time and impetus to generate fiction and discussion of it in an atmosphere at once supportive and critically serious. Admission to graduate creative writing students or by instructor's approval of an application manuscript. May be repeated up to 9 total credit hours. Prerequisites: Restricted to English Literature-Creative Writing, English Literature or English graduate students only.

[College of Arts & Sciences](#) [English](#) [Graduate Courses](#)

## ENGL-5259 (3) Nonfiction Workshop

Designed to give students time and impetus to generate nonfiction and discussion of it in an atmosphere at once supportive and critically serious. Admission to graduate creative writing students or by instructor's approval of an application manuscript. May be repeated up to 9 total credit hours. Prerequisites: Restricted to English, English Literature or English Literature-Creative Writing graduate students only.

[College of Arts & Sciences](#) [English](#) [Graduate Courses](#)

## ENGL-5269 (3) Publishing Workshop

Provides practical experience in the editorial, design, and business procedures of desktop publishing. Prerequisites: Restricted to Graduate Students only.

[College of Arts & Sciences](#) [English](#) [Graduate Courses](#)

## ENGL-5279 (3) Studies in Poetry

Addresses modern poetry, written since World War II. May be repeated up to 6 total credit hours. Prerequisites: Restricted to English, English Literature or English Literature-Creative Writing graduate students only.

[College of Arts & Sciences](#) [English](#) [Graduate Courses](#)

ENGL

## ENGL-5289 (3) Scriptwriting Workshop

Designed to give time and impetus to scriptwriting in terms of both imaginative and technical aspects. Either stage plays or screenplays are studied, as announced. Admission to graduate writing students or by instructor of an application manuscript. May be repeated up to 9 total credit hours.

[College of Arts & Sciences](#) [English](#) [Graduate Courses](#)

## ENGL-5299 (3) Studies in Fiction

Addresses modern fiction written since World War II. May be repeated up to 6 total credit hours.

[College of Arts & Sciences](#) [English](#) [Graduate Courses](#)

## ENGL-5309 (3) Playwriting

[College of Arts & Sciences](#) [English](#) [Graduate Courses](#)

## ENGL-5319 (3) Studies in Literary Movements

Studies styles, trends, innovations, and major writers in significant literary movements, particularly those after 1900, such as modernism and objectivism. May be repeated up to 9 total credit hours. Restricted to graduate CRWR, ENLT, and ENGL majors. Prerequisites: Restricted to English Literature-Creative Writing, English Literature or English graduate students only.

[College of Arts & Sciences](#) [English](#) [Graduate Courses](#)

---

---

## ENGL-5459 (3) Introduction to the Profession

Introduces purposes, methods and techniques of professional scholarship in English. Provides an overview of the discipline, including traditional areas of research and recent developments. Teaches students how to use research, bibliographic, and reference tools to prepare papers for conferences and publication. Required of all MA students in English. Prereq., graduate standing or instructor consent. Formerly ENGL 7859.

College of Arts & Sciences English Graduate Courses

---

---

## ENGL-5529 (3) Studies in Special Topics

Studies special topics that focus on a theme, genre, or theoretical issue not limited to a specific period or national tradition. Topics vary each semester. May be repeated up to 9 total credit hours. Same as ENGL 5549 and 5559. Prerequisites: Restricted to English Lit-Creative Writing (CRWR), English Literature (ENLT), English (ENGL) or Comparative Literature (CMLT) graduate students only.

College of Arts & Sciences English Graduate Courses

---

---

## ENGL-5549 (3) Studies in Special Topics

Same as ENGL 5529 and 5559. Prerequisites: Restricted to English Lit-Creative Writing (CRWR), English Literature (ENLT), English (ENGL) or Comparative Literature (CMLT) graduate students only.

College of Arts & Sciences English Graduate Courses

---

---

## ENGL-5559 (3) Studies in Special Topics

Same as ENGL 5529 and 5549. Prerequisites: Restricted to English Lit-Creative Writing (CRWR), English Literature (ENLT), English (ENGL) or Comparative Literature (CMLT) graduate students only.

College of Arts & Sciences English Graduate Courses

---

---

## ENGL-5849 (1-6) Independent Study (Graduate Level 1)

Independent investigation of topics of specific interest to individual students. Students wishing to enroll in independent study must petition the Associate Chair for Graduate Studies prior to the beginning of the semester. May be repeated up to 6 total credit hours. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences English Graduate Courses

---

---

## ENGL-6949 (1) Master's Degree Candidate

Prerequisites: Restricted to Graduate Students only.

---

College of Arts & Sciences English Graduate Courses

---

## ENGL-6959 (1-9) Master's Thesis

Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences English Graduate Courses

---

## ENGL-7019 (3) Advanced British Literature and Cultre Before 1800

Studies special topics in medieval and early modern writing through the long 18th Century. Topics will vary. May be repeated up to 9 total credit hours. Recommended prereq., ENGL. 5019. Prerequisites: Restricted to English Literature-Creative Writing, English Literature or English graduate students only.

College of Arts & Sciences English Graduate Courses

---

## ENGL-7059 (3) Advanced British Literature and Culture After 1800

Studies special topics in romantic, Victorian, modern and postmodern writing. Topics will vary. May be repeated up to 9 total credit hours. Recommended prereq., ENGL 5059. Prerequisites: Restricted to English Literature-Creative Writing, English Literature or English graduate students only.

College of Arts & Sciences English Graduate Courses

---

## ENGL-7119 (3) Advanced Literature and Culture of the United States

Studies special topics in writing of the United States. May be repeated up to 9 total credit hours. Recommended prereq., ENGL 5109. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences English Graduate Courses

---

## ENGL-7149 (3) Advanced Global Literature and Culture

Studies special topics in recent writing in English from around the world. May be repeated up to 9 total credit hours. Recommended prereq., ENGL 5149. Prerequisites: Restricted to English Lit-Creative Writing (CRWR), English Literature (ENLT), English (ENGL) or Comparative Literature (CMLT) graduate students only.

College of Arts & Sciences English Graduate Courses

---

## ENGL-7179 (3) Advanced Multicultural/Postcolonial Studies

Studies special topics in ethnic American and/or postcolonial writing in English, including relevant theoretical discourses. Topics will vary.

May be repeated up to 9 total credit hours. Recommended prereq., ENGL 5169. Prerequisites: Restricted to Graduate Students only.

[College of Arts & Sciences](#) [English](#) [Graduate Courses](#)

## ENGL-7489 (3) Advanced Special Topics

Studies special topics in theory, culture, and literature of any period. Topics will vary. May be repeated up to 9 total credit hours. Prereq., ENGL 5019; Ph.D. exempted. Prerequisites: Restricted to English graduate students only.

[College of Arts & Sciences](#) [English](#) [Graduate Courses](#)

## ENGL-7849 (1-3) Independent Study (Graduate Level 2)

May be repeated up to 7 total credit hours.

[College of Arts & Sciences](#) [English](#) [Graduate Courses](#)

## ENGL-8999 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

ENVD

## ENVD-1004 (3) Introduction to Environmental Design Theory

Introduces students to the complexity of forces that interact to shape the designed environment. A lecture sequence and parallel set of design exercises exposes students to the theory and practice of environmental design, and to the important issues that guide the work of architects, landscape architects, urban designers, and urban planners. Open to nonmajors on a space available basis. Coreqs., ENVD 1052, 2001. Prerequisites: Restricted to College of Architecture and Planning majors only.

[College of Architecture & Planning](#) | [Environmental Design](#) | [History and Theory](#)

## ENVD-1010 (3) Design Appreciation

Designed for students who are interested in pursuing a degree in design. Provides a foundation for viewing the world through the "eyes" of a designer and gives a broad overview of various design professions including: Architecture, Planning, Landscape Architecture, and Industrial Design through a basic history of design and speculation concerning the future of these professions. Restricted to non-ARPL students. Prerequisites: Restricted to non-College of Architecture and Planning majors only.

[College of Architecture & Planning](#) | [Environmental Design](#) | [History and Theory](#)

## ENVD-1052 (3) Design and Communication 1

Using both lectures and drawing exercises, this class extends understandings of the representational conventions used by the design professions through its introduction to the possibilities offered by emerging digital techniques for the depiction of designed artifacts and environments, allowing students to extend and enhance their understandings of advanced practices for design visualization, representation, and communication. Coreqs., ENVD 1004, 2001. Prerequisites: Restricted to College of Architecture and Planning majors only.

[College of Architecture & Planning](#) | [Environmental Design](#) | [Methods and Techniques](#)

---

## ENVD-1102 (3) Design and Communication 2

Using both lectures and drawing exercises, this class extends understandings of the representational conventions used by the design professions through its introduction to the possibilities offered by traditional techniques for the advanced practices for design visualization, representation, and communication. Prereqs., ENVD 1004, 1052, 2001. Coreqs., ENVD 1104, 2003. Prerequisites: Requires prerequisite courses of ENVD 1004, ENVD 1052, and ENVD 2001. Restricted to College of Architecture and Planning majors only.

College of Architecture & Planning Environmental Design Methods and Techniques

---

## ENVD-1104 (3) Introduction to Environmental Design Methods

Explores the forces and conditions that interact to shape the designed environment. It does so through a lecture sequence and parallel set of design exercises introducing students to the theory and practice of environmental design. It develops student understandings of the central role design thinking plays as the unique process used to effect appropriate change in the designed environment. Prereq., ENVD 1004, 1052, 2001. Coreqs., ENVD 1102, 2003. Prerequisites: Requires prerequisite courses of ENVD 1004, ENVD 1052, and ENVD 2001. Restricted to College of Architecture and Planning majors only.

College of Architecture & Planning Environmental Design History and Theory

---

## ENVD-2001 (3) Human Behavior in Design and Planning

Examines reciprocal relationships between people and their built and natural environments, tracing major issues and approaches in design research to understand how people are influenced by the environment and how they can create healthy, just, and livable places. Coreqs., ENVD 1004, 1052. Prerequisites: Restricted to College of Architecture and Planning majors only.

College of Architecture & Planning Environmental Design Social Factors

---

## ENVD-2002 (3) Environmental Design Media 1

Using both lectures and drawing exercises, this class examines the traditional representational conventions used by the design professions to depict and describe space, form, pattern and information. Uses a multi-disciplined approach that explores the three basic intentions that inform the marks that designers make: visualization, representation and communication. Prereq., ENVD 1004. Open to nonmajors on a space available basis. Prerequisites: Restricted to College of Architecture and Planning majors only.

College of Architecture & Planning Environmental Design Methods and Techniques

---

## ENVD-2003 (3) Ecology and Design

Introduces basic principles and techniques of ecology as they relate to the design and understanding of the built environment. Includes a study of hazards and the impact of modern technology on the natural and built environments. Prereqs., ENVD 1004, 1052, 2001. Coreqs., ENVD 1102, 1104. Prerequisites: Requires prerequisite courses of ENVD 1004, ENVD 1052, and ENVD 2001. Restricted to College of Architecture and Planning majors only.

College of Architecture & Planning Environmental Design Physical Factors

---

## ENVD-2052 (3) Introduction to Computers in Planning

Introduces the use of computers in design fields, including applications for word-processing, desktop publishing, graphic creation, and Cad-style design. Aims to provide basic general skills in computer use that are transferable to other computer applications. Prerequisites: Restricted to College of Architecture and Planning majors only.

College of Architecture & Planning Environmental Design Methods and Techniques

---

## ENVD-2100 (6) Architecture Studio 1

The first of four architecture studios, this class introduces students to the basic strategies and techniques of architectural design. Focuses on the languages of design, as well as on traditional and digital methods of visualizing architectural ideas and forms. Prereq., ENVD 2002. Prerequisites: Restricted to College of Architecture and Planning majors only.

College of Architecture & Planning Environmental Design Studios

---

## ENVD-2110 (6) Environmental Design Studio

This class exposes students to a sequence of design investigations that lead to the development of design concepts for critical evaluation and discussion. The intent of this introductory design studio is to expose students to fundamental design practices common to the disciplines---architecture, landscape architecture, planning, urban design---that share the responsibility for shaping the designed environment. Prereq., ENVD 2002.

College of Architecture & Planning Environmental Design Studios

---

## ENVD-2120 (6) Environmental Design Lab - Urban Design

Exposes students to a sequence of design investigations that lead to the development of design concepts for critical evaluation and discussion. The intent of this introductory design studio is to expose students to the fundamental design practices that are common to the disciplines of environmental design, planning, urban design and landscape design - that share the responsibility for shaping the designed environment. Prereqs., ENVD 1102, 1104, 2003. Coreqs., ENVD 3122, 3124. Prerequisites: Requires prerequisite courses of ENVD 1102, ENVD 1104, and ENVD 2003. Restricted to College of Architecture and Planning majors only.

College of Architecture & Planning Environmental Design Studios

---

## ENVD-2130 (6) Environmental Design Studio: Landscape Design

Exposes students to a sequence of design investigations that lead to the development of design concepts for critical evaluation and discussion. The intent of this introductory design studio is to expose students to the fundamental design practices that are common to the disciplines of architecture, urban design and landscape design - disciplines that share the responsibility for shaping the designed environment. Prereqs., ENVD 1004 and 1104. Restricted to ARPL majors. Prerequisites: Requires prerequisite courses of ENVD 2120, ENVD 3122, and ENVD 3124. Restricted to College of Architecture and Planning majors only.

College of Architecture & Planning Environmental Design Studios

---

## ENVD-2152 (3) Geographic Info Systems

Focuses on construction and use of computer-based information systems to represent and manipulate geographic data. Emphasizes the recording, mapping, and transforming of data for analysis and use by planners. Prerequisites: Restricted to College of Architecture and Planning majors only.

College of Architecture & Planning | Environmental Design | Methods and Techniques

---

## ENVD-3001 (3) Environment and Behavior

Examines the social and behavioral aspects of relationships between people and the designed environment. Gives special attention to antecedent factors (why we have the environments we do), implications of given arrangements for special population groups, and responses to incongruent environments. Open to nonmajors on a space available basis. Prerequisites: Restricted to College of Architecture and Planning majors only.

College of Architecture & Planning | Environmental Design | Social Factors

---

## ENVD-3002 (3) Design Theory and Methods

The nature of design and systematic methods for improving design. Topics include: nature of design problems; structure of design process; theory of form; problem definition; generating solution ideas; evaluation; roles of form and function. Students use computers without having to learn to program. Open to nonmajors.

College of Architecture & Planning | Environmental Design | Methods and Techniques

---

## ENVD-3003 (3) Site Planning

Introduces the site planning process including: site analysis and its relationship to building program and site concept, and preparation of site plans. Emphasis is placed on the planning of the physical site through a thorough understanding of process, land use, site constraints and synthesis of ecological, functional and aesthetic considerations in the site planning process. Prereqs., ENVD 2120, 3122, 3124. Coreqs., ENVD 2130, 3004. Prerequisites: Requires prerequisite courses of ENVD 2120, ENVD 3122, and ENVD 3124. Restricted to College of Architecture and Planning majors only.

College of Architecture & Planning | Environmental Design | Physical Factors

---

## ENVD-3004 (3) History of Landscape Architecture

Investigates landscape architectural thought from antiquity to the present. Begins with a review of Greek ideals and proceeds - through an appreciation of landscape and nature as essential cultural constituents - with a survey of major themes such as Renaissance Humanism, the Picturesque, and the varieties of Modernism, Neo-Eclecticism and most recent directions in landscape and garden design. Prereqs., ENVD 2120, 3122, 3124. Coreqs., ENVD 2130, 3003. Restricted to College of Architecture and Planning undergrads. Prerequisites: Requires prerequisite courses of ENVD 2120, ENVD 3122, and ENVD 3124. Restricted to College of Architecture and Planning majors only.

College of Architecture & Planning | Environmental Design | History and Theory

---

---

## ENVD-3015 (3) Introduction to Historic Preservation

Introduces methods for identifying historic structures and evaluating their materials. Considers techniques for preserving and restoring and legal options for promoting preservation efforts. Prereq., ENVD 2130. Prerequisites: Restricted to College of Architecture and Planning majors only.

College of Architecture & Planning Environmental Design Technology and Practice

---

## ENVD-3022 (3) Technical Photography

Introduces students to the technical and practical aspects of making photographic images: the workings of the camera and lens, principles of depth of field, black and white film processing, printing, and basic darkroom procedures. Open to nonmajors on a space available basis. Prerequisites: Restricted to College of Architecture and Planning majors only.

College of Architecture & Planning Environmental Design Methods and Techniques

---

## ENVD-3052 (3) Introduction to Computer Methods in Environmental Design

Surveys existing and emerging computer methods used in the environmental design professions, with an introduction to computer programming. Open to nonmajors with instructor consent.

College of Architecture & Planning Environmental Design Methods and Techniques

---

## ENVD-3100 (6) ENVD Studio--Architectural Design

Exposes students to a sequence of design investigations that lead to the development of design concepts for critical evaluation and discussion. The intent of this introductory design studio is to expose students to the fundamental design practices that are common to the disciplines of environmental design, planning, urban design and landscape design - that share the responsibility for shaping the designed environment. Prereqs., ENVD 2130, 3003, 3004. Coreqs., ARCH 3114, ENVD 3115. Restricted to ARPL students only. Prerequisites: Restricted to College of Architecture and Planning majors only.

College of Architecture & Planning Environmental Design Studios

---

## ENVD-3110 (6) Architecture Studio 1

The first of four upper-division studios introduces students to the basic strategies and techniques of architectural design. Focuses on the languages of design, as well as on traditional and digital methods of visualizing architectural ideas and forms. Prereq., ENVD 2110. Restricted to junior/senior ARCH majors.

College of Architecture & Planning Environmental Design Studios

---

---

## ENVD-3115 (3) Introduction to Building Materials and Systems

Surveys building methods, materials, and assemblies from the designer's perspective. Prereqs., ENVD 2130, 3003, 3004. Coreqs., ARCH 3114, ENVD 3100. Prerequisites: Restricted to College of Architecture and Planning majors only.

[College of Architecture & Planning](#) [Environmental Design](#) [Technology and Practice](#)

## ENVD-3122 (3) Research Issues and Methods in Design and Planning

Explores topics of current interest in planning. Looks at the development and social consequences of the neighborhood movement, forms of municipal and regional governments, regional settlement patterns, and new communities. Introduces selected methods from the social sciences used by planners and urban designers. Prereqs., ENVD 1102, 1104, 2003. Coreqs., ENVD 2120, 3124. Prerequisites: Requires prerequisite courses of ENVD 1102, ENVD 1104, and ENVD 2003. Restricted to College of Architecture and Planning majors only.

ENVD

## ENVD-3124 (3) Issues in Planning History

Broadly introduces physical environmental planning in the U.S., examining both historical roots and recent trends in American planning concepts and implementation. Emphasizes an analytical and critical approach to historical and contemporary planning issues, mechanisms, and cases. Prereqs., ENVD 1102, 1104, 2003. Coreqs., ENVD 2120, 3122. Prerequisites: Requires prerequisite courses of ENVD 1102, ENVD 1104, and ENVD 2003. Restricted to College of Architecture and Planning majors only.

[College of Architecture & Planning](#) | [Environmental Design](#) | [History and Theory](#)

## ENVD-3152 (3) Introduction to Computer Graphics Applications

Explores principles and uses of computer graphics in design. Topics include creation and modification of complex two- and three-dimensional objects; orthographic and perspective views; use of color; input using mouse and digitizer; output using screen, plotter, matrix printer, and slides; automated aids for form generation and manipulation; and analysis of current and future trends of computer usage for design. May be repeated up to 12 total credit hours. Prereq., ENVD 1052, 1102. Prerequisites: Restricted to College of Architecture and Planning majors only.

[College of Architecture & Planning](#) | [Environmental Design](#) | [Methods and Techniques](#)

## ENVD-3212 (3) Color Theory

Illustrates color media techniques for the preparation, composition, and presentation of landscape and built environment drawings. Prereq., ENVD 2130. Prerequisites: Restricted to College of Architecture and Planning majors only.

[College of Architecture & Planning](#) | [Environmental Design](#) | [Methods and Techniques](#)

## ENVD-3220 (6) Planning Studio 2

See ENVD 2120. Prereq., ENVD 2120. Restricted to PLAN majors. Prerequisites: Restricted to College of Architecture and Planning majors only.

College of Architecture & Planning Environmental Design Studios

---

## ENVD-3252 (3) Computer Graphic Programming

Provides an introductory computer programming course designed to teach the capabilities of a computer in providing graphic representations of environments, including buildings. Open to nonmajors.

College of Architecture & Planning Environmental Design Methods and Techniques

---

## ENVD-3300 (3-6) Special Topics: Intermediate Design Lab

Design lab exploring new and emerging themes in environmental design. May be repeated up to 18 total credit hours. Prereqs., ARCH 3114, ENVD 3100, 3115. Prerequisites: Restricted to College of Architecture and Planning majors only.

College of Architecture & Planning Environmental Design Studios

---

## ENVD-3310 (6) Architecture Studio 2

The second of the four upper-division studios focuses on concepts of medium-scale building design, siting, and climate. Through a number of design exercises, students learn how these factors help shape buildings. Prereq., ENVD 3110. Formerly ENVD 3210. Prerequisites: Restricted to College of Architecture and Planning majors only.

College of Architecture & Planning Environmental Design Studios

---

## ENVD-3320 (2) Planning Practicum

Supervised practicum in some aspect of urban or regional planning. Prereq., ENVD 3220.

College of Architecture & Planning Environmental Design Studios

---

## ENVD-3352 (3) Architectural Computer Media

Introduces the integration of computing and the architectural design process and related representational tasks. Studies common computer-aided design programs, emphasizing two- and three-dimensional and animation techniques. Prerequisites: Restricted to College of Architecture and Planning majors only.

College of Architecture & Planning Environmental Design Methods and Techniques

---

## ENVD-3909 (1-6) Independent Study

By special arrangement with instructor. Prereq., ENVD 3100 and a 3.00 GPA.

College of Architecture & Planning Environmental Design Miscellaneous

---

## ENVD-3919 (1-6) Teaching Assistant

By special arrangement with instructor. Prereq., junior standing and 3.00 GPA. Available for pass/fail credit only.

College of Architecture & Planning Environmental Design Miscellaneous

---

## ENVD-4005 (3) Design and Planning Law

Teaches students how to research the various codes and to draft and pass laws. Covers environmental, water quality, property, zoning, and building codes and laws. Prereq., ENVD 2130.

College of Architecture & Planning Environmental Design Technology and Practice

---

## ENVD-4012 (3) Imagination and Creativity

Offers a seminar on imagination and creativity in environmental design. Students research and prepare a class presentation and paper on a topic of interest. Open to nonmajors at all levels.

College of Architecture & Planning Environmental Design Methods and Techniques

---

## ENVD-4023 (3) Environmental Impact Assessment

Provides a field-oriented seminar in current environmental impact controversies. Gives attention to history, theory, and application of impact analysis at state levels for designers, land-use planners, and others involved in resource decision making. Prereq., instructor consent. Open to nonmajors on a space available basis, by instructor consent. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Architecture and Planning majors only.

College of Architecture & Planning Environmental Design Physical Factors

---

## ENVD-4031 (3) Thinking Like a Mountain: A New Land Ethic

Critically reviews and analyzes land use policies, the ethics and economics of air and water pollution, regional sustainability, and resource management. Includes critical evaluation of empirical methodologies, and criteria of cultural and social equity. Prereq., junior or senior standing in the college.

---

## ENVD-4035 (3) Solar and Sustainable Design

Introduces aspects of solar technology relevant to the environmental design professions. Includes readings and lectures on the nature of energy limitations, energy needs, and the potential role of solar energy in meeting these needs. Prereq., ENVD 2130.

## ENVD-4052 (3) Digital Presentation and Portfolio

Introductory course creating interactive web sites. Covers use of Hypertext Markup Language (HTML) and Flash to create linked pages containing text, images animations, menus, and buttons. Covers principles of site navigation, page layout, and graphic design for designers and planners. Credit not granted for this course and ENVD 2352. Prerequisites: Restricted to College of Architecture and Planning majors only.

## ENVD-4092 (3) Improving Imaging Ability

Offers an advanced course dealing with theories of imaging and methods of improving imaging in the design process. Open to nonmajors.

## ENVD-4100 (3-6) Advanced Design Lab 1

Design lab exploring new and emerging themes in design. May be repeated up to 18 total credit hours. Prereq., ENVD 3300.

## ENVD-4112 (3) Architectural Graphics 1

Illustrates techniques of graphics communication and presentation for architectural design. Includes advanced delineation and use of color. Prereq., ENVD 2130.

## ENVD-4114 (3) History of American Architecture and Urbanism

Surveys architecture, landscape architecture, urban design, and planning in the U.S. from ca. 1600 to the present. Prereq., ENVD 2130.

[College of Architecture & Planning](#) [Environmental Design](#) [History and Theory](#)

---

---

## ENVD-4122 (3) Advanced Technical Photography

Focuses on working with a variety of alternative photographic processes intended to give students an array of photographic techniques to incorporate into studio course presentations and portfolio work. Processes include hand-applied color to black and white images, using two or more negatives to produce black and white combination prints, shooting color slides to produce graphic arts, high-contrast black and white prints, and documentary photography of Colorado architecture and urban landscapes using color slide film. Students must provide their own 35mm SLR camera. Prereq., ENVD 3022 or ARTS 2191 or instructor consent.

[College of Architecture & Planning](#) [Environmental Design](#) [Methods and Techniques](#)

---

---

## ENVD-4152 (3) Computer Graphic Applications

Introduces the mechanics of entering 2-D images and 3-D objects into the computer. Once entered, graphics are interactively rotated in space, walked through, and displayed in perspective from any position. Also covers the mechanics of other computer programs allowing additional manipulation of images and objects. Prereq., ENVD 2130.

[College of Architecture & Planning](#) [Environmental Design](#) [Methods and Techniques](#)

---

---

## ENVD-4192 (3) Improving Imaging Ability 2

Offers an advanced course dealing with theories of imaging and methods of improving imaging in the design process. Open to nonmajors.

[College of Architecture & Planning](#) [Environmental Design](#) [Methods and Techniques](#)

---

---

## ENVD-4212 (3) Architectural Graphics 2

Covers development of an architectural set of construction documents combined with job administration, field observation, and guest speakers from related construction and architectural disciplines. Prereq., ENVD 2130. Prerequisites: Restricted to College of Architecture and Planning majors only.

[College of Architecture & Planning](#) [Environmental Design](#) [Methods and Techniques](#)

ENVD

## ENVD-4233 (3) Environmental Aesthetics

Explores the interdisciplinary field of environmental aesthetics, examining the history of landscape tastes, theoretical approaches to the study of aesthetic responses, and contemporary attempts to incorporate matters of aesthetics in American planning. Emphasizes developing analytical and critical approaches to aesthetics in the public realm.

[College of Architecture & Planning](#) [Environmental Design](#) [Physical Factors](#)

## ENVD-4300 (3-6) Advanced Design Lab 2

Design lab exploring new and emerging themes in design. May be repeated up to 12 total credit hours. Prereq., ENVD 4100. Prerequisites: Restricted to College of Architecture and Planning majors only.

[College of Architecture & Planning](#) [Environmental Design](#) [Studios](#)

## ENVD-4311 (3) Housing Policies and Practices

A seminar providing students with a descriptive knowledge and analytical understanding of the use and development of residential settings in different political economies, globally divided into advanced capitalist nations, collectivist economies, and the third world. Prereq., ENVD 2130.

[College of Architecture & Planning](#) [Environmental Design](#) [Social Factors](#)

## ENVD-4314 (3) Architectural Theory

Surveys, through lectures and readings, the major historical developments and contemporary directions in architectural theory. Prereqs.,

ARCH 3114 and ARCH 3214. Prerequisites: Restricted to College of Architecture and Planning majors only.

College of Architecture & Planning Environmental Design History and Theory

---

## ENVD-4320 (6) Planning Studio 3

See ENVD 2120. Prereq., ENVD 3300.

College of Architecture & Planning Environmental Design Studios

---

## ENVD-4322 (1-6) Special Topics: Graphics

Provides an advanced seminar on special issues in design communications. May be repeated for credit by petition. Prereq., ENVD 2130. Prerequisites: Restricted to College of Architecture and Planning majors only.

College of Architecture & Planning Environmental Design Methods and Techniques

---

## ENVD-4340 (4-6) Landscape Design Studio

Studio in landscape design. Prereq., ENVD 3300. Prerequisites: Restricted to College of Architecture and Planning majors only.

College of Architecture & Planning Environmental Design Studios

---

## ENVD-4352 (1-6) Special Topics: Computer Methods

Topics include animation and environmental simulation, computational methods of technical evaluation and optimization, and computational mapping and analysis. May be repeated for credit by petition. Prereq., ENVD 2130. Prerequisites: Restricted to College of Architecture and Planning majors only.

College of Architecture & Planning Environmental Design Methods and Techniques

---

## ENVD-4360 (4-6) Historic Preservation Studio

A design studio exploring emerging issues and practices in historic preservation. Prereq., ENVD 3300. Prerequisites: Restricted to College of Architecture and Planning majors only.

College of Architecture & Planning Environmental Design Studios

---

## ENVD-4361 (1-6) Special Topics: Social Factors in Design

Addresses variable topics in the relationship of human experience and behavior to the built environment, e.g., social research methods in environmental design. Prereq., ENVD 2130. Prerequisites: Restricted to College of Architecture and Planning majors only.

---

College of Architecture & Planning Environmental Design Social Factors

---

## ENVD-4363 (1-6) Special Topics: Physical Factors in Environmental Design

Includes such topics as appropriate technology, public policy and natural hazards, organization of the designing and building process, and physical elements of urban development. Prereq., ENVD 2130. Prerequisites: Restricted to College of Architecture and Planning majors only.

College of Architecture & Planning Environmental Design Physical Factors

---

## ENVD-4364 (1-6) Special Topics: History and Historiography of Environmental Design

Provides an advanced seminar on history and historiography of environmental design, e.g., American dwellings. May be repeated for credit by petition. Prereq., ENVD 2130.

College of Architecture & Planning Environmental Design History and Theory

---

## ENVD-4365 (1-6) Special Topics: Technology and Practice

Provides an advanced seminar on new technologies and issues of professional practice in the environmental design professions. Prereq., ENVD 3100. Prerequisites: Restricted to College of Architecture and Planning majors only.

College of Architecture & Planning Environmental Design Technology and Practice

---

## ENVD-4420 (3) Senior Capstone Seminar

Advanced seminar focuses on theoretical concerns and practical issues inherent in environmental design and planning. Views concerns and issues in terms of setting, processes, and planning and design outcomes. Provides a critical synthesis of the inherently interdisciplinary nature of planning and design education. Open to planning and design studies seniors only, or by instructor consent. Prerequisites: Restricted to College of Architecture and Planning majors only.

College of Architecture & Planning Environmental Design Studios

---

## ENVD-4440 (6) Landscape Design Studio 2

A preprofessional studio in landscape architecture. Prereq., ENVD 4340.

College of Architecture & Planning Environmental Design Studios

---

---

## ENVD-4510 (6) Architecture Studio 3

The third of the four upper-division studios focuses on concepts of program, architectural meaning and human behavior in buildings. Through a number of design exercises, students learn how these factors help shape buildings. Prereq., ENVD 3310. Formerly ENVD 4310. Prerequisites: Restricted to College of Architecture and Planning majors only.

College of Architecture & Planning Environmental Design Studios

---

## ENVD-4550 (4-6) Urban Design Studio

A studio exploring emerging issues and practices Prereq., ENVD 3300. Prerequisites: Restricted to College of Architecture and Planning majors only.

College of Architecture & Planning Environmental Design Studios

---

## ENVD-4710 (6) Architecture Studio 4

The last of the four upper-division studios focuses on concepts of building technology, context and environmental sustainability. Prereq., ENVD 4510. Formerly ENVD 4410. Prerequisites: Restricted to College of Architecture and Planning majors only.

College of Architecture & Planning Environmental Design Studios

---

## ENVD-4764 (1-6) Special Topics: Theory and Criticism in Environmental Design

Provides an advanced seminar on theory and criticism in environmental design, e.g., architecture now and introduction to design theory and criticism. May be repeated for credit by petition. Prereq., ENVD 2130. Prerequisites: Restricted to College of Architecture and Planning majors only.

College of Architecture & Planning Environmental Design History and Theory

---

## ENVD-4794 (3) History of Urban Design and Planning

Examines history of European and American planning and urban design in the late 19th and 20th centuries. Prereq., ENVD 2130. Prerequisites: Restricted to College of Architecture and Planning majors only.

College of Architecture & Planning Environmental Design History and Theory

---

## ENVD-4909 (1-6) Independent Study

By special arrangement with instructor. Prereq., ENVD 3100 and a 3.00 GPA.

College of Architecture & Planning Environmental Design Miscellaneous

---

---

## ENVD-4919 (1-6) Teaching Assistant

By special arrangement with instructor. Pass/fail credit only. Prereq., ENVD 3100 and a 3.00 GPA.

[College of Architecture & Planning](#) [Environmental Design](#) [Miscellaneous](#)

---

## ENVD-4929 (1-6) Research Assistant

By special arrangement with instructor. Prereq., ENVD 3100 and a 3.00 GPA.

[College of Architecture & Planning](#) [Environmental Design](#) [Miscellaneous](#)

---

## ENVD-4939 (1-6) Internship

By special arrangement with instructor and outside sponsor. Pass/fail credit only. Prereq., ENVD 3100 and a 3.00 GPA.

ENVS

## ENVS-1000 (4) Introduction to Environmental Studies

Surveys environmental studies, examining ecological, socioeconomic, political, aesthetic, and technological factors that influence the quality of life on Earth. Required for ENVS majors. Approved for arts and sciences CORE curriculum: natural science.

[College of Arts & Sciences](#) [Environmental Studies](#)

## ENVS-2100 (3) Topics in Applied Environmental Studies

Covers a variety of topics not currently offered in the curriculum: offered depending on instructor availability and student demand. May be repeated up to 6 total credit hours, provided the topics vary. Prereq., ENVS 1000.

[College of Arts & Sciences](#) [Environmental Studies](#)

## ENVS-2840 (1-6) Independent Study

Students work with an approved faculty sponsor to explore a topic in greater depth and to pursue an interest that is not offered in the formal curriculum. May be repeated up to 8 total credit hours. Prereq., ENVS 1000.

[College of Arts & Sciences](#) [Environmental Studies](#)

## ENVS-3001 (3) Sustainable Solutions Consulting

Introduces students to green design, industrial ecology, and life cycle analysis. Students use basic techniques of environmental auditing to analyze the CU-Boulder campus. Prereq., any two-semester science sequence. Prerequisites: Restricted to students with 57-180

credits (Junior or Senior) Environmental Studies (ENVS) majors only.

College of Arts & Sciences Environmental Studies

---

## ENVS-3020 (3) Advanced Writing in Environmental Studies

Offers training in critical thinking and analytical writing skills appropriate to upper-division classes. Writing assignments integrate the subject matter of different topical areas. Approved for arts and sciences core curriculum: written communication. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) Environmental Studies (ENVS) majors only.

College of Arts & Sciences Environmental Studies

---

## ENVS-3040 (4) Conservation Biology

Applies principles of population ecology, population genetics, biogeography, animal behavior, and paleobiology to the maintenance of biodiversity and natural systems. The resulting theory is then applied to conservation policy and management techniques. Prereq., EBIO 2040 or 2640. Same as EBIO 3040.

College of Arts & Sciences Environmental Studies

---

## ENVS-3070 (3) Energy and the Environment

Examines contemporary issues in energy consumption and its environmental impact, including fossil fuel use and depletion; nuclear energy and waste disposal; solar, wind, hydroelectric, and other renewable sources; home heating; energy storage; fuel cells; and alternative transportation vehicles. Includes some basic physical concepts and principles that often constrain choices. No background in physics is required. Same as PHYS 3070. Approved for arts and sciences CORE curriculum: natural science.

College of Arts & Sciences Environmental Studies

---

## ENVS-3103 (3) Applied Environmental Studies: Mining in Four Corners

Explores mining related issues that have pronounced impact on the environment, economy and politics of the Four Corners region. Students apply their basic knowledge of environmental science, policy and values toward the understanding of and productive discourse about the conflicts and opportunities brought about by the mining industry in the Four Corners region. Course includes a seven day field trip, visiting mining and reclamation sites in New Mexico, Utah and Colorado. Fulfills application requirement for Environmental Studies majors. Prereq., ENVS 1000 and one year natural science.

College of Arts & Sciences Environmental Studies

---

## ENVS-3140 (3) Environmental Ethics

Examines major traditions in moral philosophy to see what light they shed on value issues in environmental policy and the value

presuppositions of the economic, ecological, and juridical approaches to the environment. Prereq., sophomore standing or PHIL 1100, 1200, 2200, 3100, or 3200. Same as PHIL 3140. Approved for arts and sciences core curriculum: ideals and values. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences Environmental Studies

---

---

## ENVS-3434 (3) Introduction to Applied Ecology

Emphasizes the integration of physical, chemical, and biological processes in controlling terrestrial and aquatic ecosystems. Ecosystem concepts are applied to current environmental and water quality problems. Includes field trips and a group project. Prereq., CHEM 1111 or CHEN 1211 and 1221. Same as CVEN 3434.

College of Arts & Sciences Environmental Studies

---

---

## ENVS-3520 (3) Energy and Climate Change: An Interdisciplinary Approach

Examines sources of energy and other resources in light of their availability, use, environmental impact, as well as their impact on policy, economics and values. As fossil fuels are the dominant energy source today, particular emphasis is placed on climate impacts and the carbon cycle. All material is assessed through the lenses of the physical sciences, policy, ethics and economics. Prereq., a two-course sequence in any natural science. May be repeated up to 6 total credit hours. Same as GEOL 3520. Approved for arts and sciences core curriculum: natural science.

College of Arts & Sciences Environmental Studies

---

---

## ENVS-3521 (3) Climate Politics and Policy

Engages students in exploring the realm of contemporary and historical climate policy at three major levels of government: international, national and local/regional. Through course lectures, discussions, readings and activities, students will become conversant with the actors, mechanisms and concerns involved in climate policy and politics, and develop their own sense of how to judge the success of climate policies.. Prereq., ENVS 1000.

College of Arts & Sciences Environmental Studies

---

---

## ENVS-3522 (3) Environment, Media & Society

Examines how mass media influence our society, specifically with regard to environmental issues and outcomes. Focuses on media influence over environmental politics and policy, environmental public opinion, popular culture, and environmental/scientific knowledge.

College of Arts & Sciences Environmental Studies

---

---

## ENVS-3600 (3) Principles of Climate

Describes the basic components of the climate system: the atmosphere, ocean, cryosphere, and lithosphere. Investigates the basic physical processes that determine climate and link the components of the climate system, including the hydrological cycle and its role in climate, climate stability, and global change. Covers forecasting climate, its applications, and human dimensions. Prereqs., ATOC 1050 and 1060, or ATOC 3300/GEOG 3301, or GEOG 1001 and 1-semester calculus. Same as GEOG 3601 and ATOC 3600. Approved for arts and sciences CORE curriculum: natural science. Prerequisites: Restricted to Environmental Studies or Geography majors only.

College of Arts & Sciences Environmental Studies

---

---

## ENVS-3621 (3) Energy Policy and Society

Examines how society makes decisions about energy, and how these decisions affect the environment and the economy. Uses tools from policy analysis, economics, and other disciplines to build an in-depth understanding of energy's role in U.S. contemporary society. Recommended prereqs., ENVS/PHYS 3070.

College of Arts & Sciences Environmental Studies

---

---

## ENVS-3800 (3) The Art of Research: The Essential Elements of Research in Environmental Studies

Introduces students to the practice of doing research in environmental studies. Examines how to define a research problem, select methods, design research, construct arguments and evaluate others' research. Aims to familiarize students with the process of doing research and enable them to proceed with confidence in pursuing their own research topics. Recommended for juniors planning to write ENVS honors theses. Prereq., ENVS 1000. Recommended prereq., ENVS 3020. Restricted to juniors/seniors. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

College of Arts & Sciences Environmental Studies

---

---

## ENVS-3930 (1-3) Internship

Relates classroom theory to practice. Provides academically supervised opportunities for environmental studies majors to work in public and private organizations on projects related to students' career goals. May be repeated up to 6 total credit hours.

College of Arts & Sciences Environmental Studies

---

---

## ENVS-4027 (3) Inequality, Democracy, and the Environment

Focuses on the structural forces affecting environmental degradation and environmental behavior by examining the relationships between (a) inequality and democratic decision making and (b) undemocratic decision making; U.S. and corporate food and energy policy; and global environmental degradation. The course also focuses on the role that global inequality plays in fostering environmental degradation. Restricted to juniors/seniors. Same as SOCY 4027.

College of Arts & Sciences Environmental Studies

---

---

## ENVS-4050 (2-4) Field Studies in Environmental Sciences

Includes field-oriented courses offered at irregular intervals during academic year or during summer sessions.

College of Arts & Sciences Environmental Studies

---

## ENVS-4100 (1-3) Topics in Environmental Policy

Covers a variety of topics not currently offered in the curriculum; offered depending on instructor availability and student demand. May be repeated upto 9 total credit hours, provided the topics vary. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

College of Arts & Sciences Environmental Studies

---

## ENVS-4120 (1-3) Topics in Environmental Sciences

Covers a variety of topics not currently offered in the curriculum; offered depending on instructor availability and student demand. May be repeated upto 6 total credit hours, provided the topics vary. Restricted to junior and senior ENVS majors.

College of Arts & Sciences Environmental Studies

---

## ENVS-4160 (3) Introduction to Biogeochemistry

Covers fundamentals of biogeochemical cycling, emphasizing water, carbon, and nutrient dynamics in terrestrial ecosystems; chemical interactions of atmosphere, biosphere, lithosphere, and hydrosphere, and natural and human-managed environments. Prereqs., GEOL 3320 or EBIO 3270, and CHEM 1011 or higher. Same as GEOL and EBIO 4160

College of Arts & Sciences Environmental Studies

---

## ENVS-4201 (3) Biometeorology

Introduces this interdisciplinary science, studying the interactions between atmospheric processes and living organisms (plants, animals, and humans). Discusses how organisms adapt to a changing environment. Uses a practical, problem-solving approach to explore these interactions. Prereq., GEOG 1001. Same as GEOG 4201.

College of Arts & Sciences Environmental Studies

---

## ENVS-4795 (3) Field Methods in Zoology and Botany

Class covers research and field methods for biological disciplines associated with natural history museums: vertebrates, invertebrates,

and plants. Emphasis is on field research techniques: observations, sampling, collection and preservation methods, and comparisons among elevation zones. Includes 5 field labs, 2 weekend trips, 5 lab practica, experience with several taxonomic experts, and individual research projects. Same as MUSM 4795 and EBIO 4795.

[College of Arts & Sciences](#) [Environmental Studies](#)

---

---

## ENVS-4800 (3) Critical Thinking in Environmental Studies

Examines a specific environmental topic in depth, synthesizing information from complex and controversial issues. Different course sections present different topics. May be repeated up to 6 total credit hours. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) Environmental Studies (ENVS) or Geography (GEOG) majors only.

ENVS

### ENVS-4840 (1-6) Independent Study

May be repeated up to 8 total credit hours. Prereq., ENVS 1000.

[College of Arts & Sciences](#) [Environmental Studies](#)

### ENVS-4990 (3) Senior Thesis

Supervised project involving original research. Open only to environmental studies majors with at least a 3.30 GPA. Thesis proposal must be accepted by honors chairman. May be repeated up to 6 total credit hours. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) Environmental Studies (ENVS) majors only.

[College of Arts & Sciences](#) [Environmental Studies](#)

### ENVS-5000 (3) Policy, Science, and the Environment

Introduction to methodologies of the policy sciences with emphasis on applications to environmental issues; role of science in decision making; professional roles and responsibilities as a policy analyst. Prerequisites: Restricted to Environmental Studies (ENVS) or Political Science (PSCI) graduate students only.

[College of Arts & Sciences](#) [Environmental Studies](#)

### ENVS-5001 (3) Environmental Philosophy

A survey of the major philosophical issues in environmental studies, comprising key issues in environmental ethics, in environmental political philosophy, and in the philosophy of biology and ecology.

College of Arts & Sciences Environmental Studies

---

## ENVS-5002 (3) Environmental Science

Surveys methodologies of environmental science. Emphasizes understanding the scientific basis of current environmental problems, and linking scientific understanding to policy making.

College of Arts & Sciences Environmental Studies

---

## ENVS-5100 (1-3) Special Topics in Environmental Studies

A variety of topics not currently offered in curriculum; offered depending on instructor availability and student demand. May be repeated up to 9 total credit hours, provided the topics vary.

College of Arts & Sciences Environmental Studies

---

## ENVS-5110 (1-3) Topics in Environmental Social Science and Humanities

Covers various topics in the social sciences and humanities in environmental studies. Prerequisites: Restricted to Arts and Sciences, Journalism, Law or Business Graduate Students only.

College of Arts & Sciences Environmental Studies

---

## ENVS-5120 (1-3) Topics in Quantitative Methods

Covers a wide range of quantitative methods used in policy research and their applications. Topics may include decision-making under uncertainty, fundamentals of microeconomics, mathematics of economic efficiency, cost-benefit analysis, system optimization, budgeting, fundamentals or probability, risk assessment, risk perception, risk communication, and decision analysis. Includes practical exercises, as well as readings and discussion, of various strengths and weaknesses of the different methods.

College of Arts & Sciences Environmental Studies

---

## ENVS-5710 (3) Introduction to the Policy Sciences

Provides an introduction to the policy sciences as a distinctive tradition within the policy field. Emphasizes the use of conceptual tools to improve analysis of complex problems. Teaches problem-solving framework that students apply to an issue of their choice. Restricted to graduate students or instructor consent required. Same as PSCI 7016. Prerequisites: Restricted to Environmental Studies (ENVS) or Political Science (PSCI) graduate students only.

College of Arts & Sciences Environmental Studies

---

---

## ENVS-5720 (3) The Problem Orientation

Teaches basic problem-solving framework for policy analysis. Emphasizes applications to develop policy recommendations for issues selected by students. Includes group projects. Restricted to graduate students or instructor consent required. Same as PSCI 7026.

College of Arts & Sciences Environmental Studies

---

## ENVS-5730 (3) Introduction to the Policy Sciences: The Decision Process

Provides policy sciences frameworks for analyzing policy processes and designing political strategies to influence those processes in the direction of the preferred alternative. Emphasizes applications to problems selected by students for term projects. Restricted to graduate students or instructor consent required. Same as PSCI 7036. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Environmental Studies

---

## ENVS-5740 (3) Context-Sensitive Research Methods

Prepares students to conduct research on topics where data is not obvious or not easily available. Encompasses variations in context and setting as part of data observations. Methods include interviewing protocols, interpretive methods, cluster analyses, case study methodologies, and textual analyses. Restricted to graduate students or instructor consent required. Same as PSCI 7116.

College of Arts & Sciences Environmental Studies

---

## ENVS-5810 (3) Water Resources and Environmental Sustainability

Assesses impacts of climate variability and regional growth on western U.S. water resources, and examines successes and failures of different management strategies, as well as ways that science is used and misused in support of water management. Prerequisites: Restricted to Arts and Sciences, Journalism, Law or Business Graduate Students only.

College of Arts & Sciences Environmental Studies

---

## ENVS-5820 (3) Renewable Energy Policy

Examines the technology, policy and politics of renewables. Technology includes the resource, science, and engineering aspects of renewables. Policy includes various policy levers used to influence renewables. Politics refers to political settings of renewables: how decision-makers perceive them, who supports/opposes policies, and how policies progress through the political process. Prereq., an introductory energy science and technology course. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Environmental Studies

---

## ENVS-5830 (3) Critical Issues in Climate and the Environment

Discusses current issues such as ozone depletion, global warming, and air quality for graduate students in nonscientific fields. Provides the scientific background necessary to understand, follow scientific developments, and critically evaluate these issues. Same as ATOC 5000. Credit not granted for this course and ATOC 4800.

College of Arts & Sciences Environmental Studies

---

---

## ENVS-5840 (3) Global Biogeochemical Cycles

Focuses on the cycling of elements at the global scale with a particular emphasis on human modification of biogeochemical cycles. Major biogeochemical cycles, their past dynamics, present changes, and potential future scenarios will be addressed. Ecosystem to global-scale model of the earth system will be discussed, along with global-scale measurements of element fluxes from satellites, aircraft, and measurement networks. Prereq., general chemistry, some organic chemistry. Same as GEOL 5305. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Environmental Studies

---

---

## ENVS-5909 (1-3) Independent Study

Only 3 hours of independent study can be used towards degree requirements. May be repeated up to 6 total credit hours for different topics. Prereq., department and instructor consent.

College of Arts & Sciences Environmental Studies

---

---

## ENVS-5930 (2) Internship

Provides academically supervised opportunities for environmental studies majors to work in public and private organizations on projects related to the students' research and career goals, and to relate classroom theory to practice.

College of Arts & Sciences Environmental Studies

---

---

## ENVS-6007 (3) Foundations of Environmental Sociology

Provides overview of environmental sociological theory and research including topics such as: public environmental perception, concern, and knowledge; environmentalism as a social movement; environmental justice; energy, technology, and risk; human dimensions of environmental change; and natural hazards and disasters. Same as SOCY 6007.

College of Arts & Sciences Environmental Studies

---

---

## ENVS-6940 (1) Master's Degree Candidacy

College of Arts & Sciences Environmental Studies

---

---

## ENVS-6950 (1-6) Master's Thesis

[College of Arts & Sciences](#) [Environmental Studies](#)

---

---

## ENVS-8990 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

ESBM

## ESBM-3100 (3) Introduction to Entrepreneurship

Introduces non-business students to the multiple facets of entrepreneurship and the entrepreneurial process. Entrepreneurship is a process of fundamental transformation: from innovative idea to enterprise and from enterprise to value, thus, entrepreneurship is more than a business practice. Innovation is central to this process and students will be challenged to develop creative solutions to a problem or need. Restricted to non-Business majors with 60-180 units completed. Prerequisites: Restricted to non-Business majors with 60-180 units completed.

[Leeds School of Business](#) [Entrepreneurship and Small Business Management](#)

## ESBM-3200 (3) Principles of Business for Entrepreneurs

Provides non-business students with a basic understanding of the business principles required to start and grow an entrepreneurial venture. It is intended for individuals who have not taken a marketing, accounting or finance course. This course will focus on two aspects of business that are critical to the success of any new venture: marketing and financial management. Restricted to non-Business majors with 60-180 units completed. Prerequisites: Restricted to non-Business majors with 60-180 units completed.

[Leeds School of Business](#) [Entrepreneurship and Small Business Management](#)

## ESBM-3700 (3) Entrepreneurial Environments

Introduces entrepreneurship. Addresses opportunity recognition, target markets, industry analysis, business model identification, sources of funding, managing rapid growth, and writing feasibility studies. Examines alternative forms of entrepreneurship such as franchising, corporate entrepreneurship, family business, and social entrepreneurship. Prereqs., BCOR 2000, 2050, 2100, 2150, or BCOR 2000, 2200, 2300, 2400. Restricted to students with 52 hours completed. Prerequisites: Restricted to Business majors with 52-180 units completed.

[Leeds School of Business](#) [Entrepreneurship and Small Business Management](#)

---

## ESBM-4100 (3) Writing a Venture Plan

Requires non-business students to engage in a rigorous, thoughtful and challenging process essential to planning a new venture. Using their own concept, students will develop a strategy to start and grow a venture. Communicating the plan is an essential element of this course and students will learn when and how to write a plan and make effective presentations. Restricted to non-Business majors with 60-180 units completed. Prerequisites: Restricted to non-Business majors with 60-180 units completed.

[Leeds School of Business](#) | [Entrepreneurship and Small Business Management](#)

---

## ESBM-4570 (3) Entrepreneurial Finance.

Focuses on the financial concepts, issues, methods, and industry practices relevant to entrepreneurial decision makers. Addresses a variety of topics including financial valuation, various sources of funds, structures and legal issues in arranging financing, the private and public venture capital markets, and preparation for, and execution of, an initial public securities offering. Provides an understanding of the segments of the capital markets specializing in start-ups and growth financing. Prereq., BCOR 2200. Restricted to Business majors with 52-180 units completed. Prerequisites: Restricted to Business majors with 52-180 units completed.

[Leeds School of Business](#) | [Entrepreneurship and Small Business Management](#)

---

## ESBM-4820 (3) Special Topics in Entrepreneurship

[Leeds School of Business](#) | [Entrepreneurship and Small Business Management](#)

---

## ESBM-4825 (3) Experimental Seminar

Offered irregularly to provide opportunity for investigation of new frontiers in Entrepreneurship and Small Business Management. Restricted to juniors/seniors.

[Leeds School of Business](#) | [Entrepreneurship and Small Business Management](#)

---

## ESBM-4826 (3) Exp. Sem-Social Entrepreneurship: Designing a Better World

See the future through the eyes of entrepreneurs who are addressing global and social environmental problems such as poverty and deforestation. Can the social ventures they create to solve these problems survive over time and will they achieve the impact they seek? We will meet some of these social entrepreneurs and, in teams, write case studies to tell their stories. Restricted to non-Business majors with 60-180 units completed. CESR 4826 and ESBM 4826 are the same course. Prerequisites: Restricted to non-Business majors with 60-180 units completed.

[Leeds School of Business](#) | [Entrepreneurship and Small Business Management](#)

---

## ESBM-4830 (3) Entrepreneurship Business Planning and Preparation

Work as part of a small team, with the focus on the process of creating a plan from the business concept and model through all of the elements of a professionally written business plan document. Prereqs., ESBM 3700 and 4570. Same as EMEN 4825. Prerequisites: Restricted to Business majors with 52-180 units completed.

[Leeds School of Business](#) | [Entrepreneurship and Small Business Management](#)

---

---

## ESBM-4900 (1-3) Projects in Entrepreneurial Companies

Complete projects in preselected entrepreneurial companies. Prereq., instructor consent.

[Leeds School of Business](#) | [Entrepreneurship and Small Business Management](#)

ESLG

## ESLG-1130 (2) Accent Reduction for Foreign Students

Provides oral activities with authentic English materials to reduce accents and to increase intelligibility for U.S. academic situations. Evaluates individual problem areas and includes one-on-one meetings with the native-speaker instructor. Improves overall articulation and fluency. Does not fulfill humanities or major requirements.

College of Arts & Sciences Linguistics

## ESLG-1140 (2) Presentation Skills for International Students

Provides instruction and practice to improve classroom oral communication skills necessary for effective participation in the U.S. academic setting, either as an international TA or RA, graduate or undergraduate student. Evaluates individual problem areas and includes digital audio and video recording with extensive feedback from the native-speaker instructor. Improves oral competence and listening comprehension in English for international students. Recommended prereq., ESLG 1130.

College of Arts & Sciences Linguistics

## ESLG-1210 (2) Academic Writing for Foreign Students

Addresses the development of paragraphs and full-length essays. Focus areas include organization and style, grammar and vocabulary, and conventions of academic writing, including incorporating the ideas of others and citing sources appropriately. Extensive instructor feedback provided. Improves fluency and precision in academic writing. Does not fulfill humanities or major requirements.

College of Arts & Sciences Linguistics

# ESLG-1222 (2) Advanced Written Composition for Foreign Students

Continued practice in academic writing, including incorporating the ideas of others and citing sources appropriately. Extensive instructor feedback provided. Preparation, writing, and revising of a full-length academic term/research paper or work on chapters for a master's thesis or doctoral dissertation. Does not fulfill humanities or major requirements. Prereq., ESLG 1210 or instructor consent.

ETHN

### [ETHN-1022 \(3\) Introduction to Africana Studies](#)

Overview of Africana studies as a field of investigation, its origins, and history. Formerly ETHN 2002. Approved for arts and sciences core curriculum: human diversity.

[College of Arts & Sciences](#) [Ethnic Studies](#) [Africana Studies](#)

### [ETHN-1023 \(3\) Introduction to American Indian Studies](#)

Introduces critical terms, issues, and questions that inform the discipline of American Indian Studies. Examines "historical silences" and highlights how American Indian scholars, poets, and filmmakers use their work to address/redress historical subjects, and represent their Native communities. Approved for arts and sciences core curriculum: human diversity.

[College of Arts & Sciences](#) [Ethnic Studies](#) [American Indian Studies](#)

### [ETHN-1025 \(3\) Introduction to Asian American Studies](#)

Examines the various factors that define minority groups and their positions in American society using Asian Americans as a case study. Emphasizes the perspectives and methodologies of the discipline of ethnic studies. Formerly AAST 1015. Approved for arts and sciences core curriculum: contemporary societies or human diversity.

[College of Arts & Sciences](#) [Ethnic Studies](#) [Asian American Studies](#)

### [ETHN-1123 \(3\) Exploring a Non-Western Culture: Hopi and Navajo](#)

---

Explores two American Indian cultures, Hopi and Navajo, and cultural interrelationships from the prehistoric through the contemporary period, using an integrated, holistic, and humanistic viewpoint. Same as ANTH 1120. Formerly AIST 1125. Approved for arts and sciences core curriculum: human diversity.

College of Arts & Sciences Ethnic Studies American Indian Studies

---

## ETHN-2001 (3) Foundations: Race and Ethnicity in the United States

Introduction to race, ethnicity and gender in the United States. Focuses on the five major racialized groups (African Americans, Asian Americans, Chicanas and Chicanos, European Americans and Indigenous peoples) in the U.S. The course design centers on historical and contemporary ideologies and systems that have constructed and continue to define, shape, and impact the significance of race and ethnicity in our economic, political and social lives. Formerly ETHN 2000.

College of Arts & Sciences Ethnic Studies Crosscultural/Comparative Study

---

## ETHN-2004 (3) Themes in American Culture 1

Enables students to explore various themes in pre-1865 American culture. Examines these themes, which vary each year, in their social context. Formerly AMST 2000. Approved for arts and sciences CORE curriculum: United States context.

College of Arts & Sciences Ethnic Studies American Studies

---

## ETHN-2013 (3) Critical Issues in Native North America

Explores a series of issues including regulations of population, land and resource holdings, water rights, education, religious freedom, military obligations, the sociopolitical role of men and women, self-governance, and legal standing as these pertain to American Indian life. Formerly AIST 2015. Approved for arts and sciences core curriculum: human diversity or United States context.

College of Arts & Sciences Ethnic Studies American Indian Studies

---

## ETHN-2014 (3) Themes in American Culture 2

Enables students to explore various themes in post-1865 American culture. Examines these themes, which vary each year, in their social context. Formerly AMST 2010. Approved for arts and sciences CORE curriculum: United States context.

College of Arts & Sciences Ethnic Studies American Studies

---

## ETHN-2064 (3) Topics in American Studies

Critically examines American identity and experiences, past and present, focusing on ethnicity, gender, popular culture, and political

culture. Formerly AMST 2060.

College of Arts & Sciences Ethnic Studies American Studies

---

## ETHN-2203 (3) American Indians in Film

Examines images of American Indians in films produced by, and about, Native peoples. Follows the creation of "the Hollywood Indian" from still-photography to contemporary motion pictures. Films are analyzed within historical, social, and artistic contexts, and examined in terms of the impact their images have exerted upon American society at large and Native communities in particular. Formerly AIST 2201.

College of Arts & Sciences Ethnic Studies American Indian Studies

---

## ETHN-2215 (3) The Japanese American Experience

Surveys the Japanese American experience, emphasizing post-WWII developments. Gives attention to intragroup diversity having to do with generation, ethnicity, ecology, and gender. Recommended prereq., ETHN 1025. Formerly AAST 2210. Approved for arts and sciences core curriculum: human diversity.

College of Arts & Sciences Ethnic Studies Asian American Studies

---

## ETHN-2232 (3) Contemporary African American Social Movements

Examines selected case studies of African American collective behavior in a historical context. Emphasizes an in-depth investigation of the continuing African American struggle for social/democratic rights. Formerly BLST 2200. Approved for arts and sciences core curriculum: human diversity or contemporary societies.

College of Arts & Sciences Ethnic Studies Africana Studies

---

## ETHN-2242 (3) African American Social and Political Thought

Introductory course designed to acquaint students with historical and contemporary thinking, writings, and speeches of African Americans. Formerly BLST 2210. Approved for arts and sciences core curriculum: human diversity or contemporary societies.

College of Arts & Sciences Ethnic Studies Africana Studies

---

## ETHN-2432 (3) African American History

Surveys African American history. Studies, interprets and analyzes major problems, issues, and trends affecting African Americans from about 1600 to the present. Same as HIST 2437. Formerly BLST 2437. Approved for arts and sciences core curriculum: human diversity or United States context.

College of Arts & Sciences Ethnic Studies Africana Studies

---

## ETHN-2502 (2) African Dance

Explores the technique, style, and rhythms of various African, Caribbean, and dance forms of the Americas. Music, history, anthropology, and folklore help to enhance the dance and provide a cultural experience. May be repeated up to 6 total credit hours within a term. Same as DNCE 2501. Formerly BLST 2501.

College of Arts & Sciences Ethnic Studies Africana Studies

---

## ETHN-2536 (3) Survey of Chicana/o History and Culture

Through historical and social scientific studies, novels, autobiographies, testimonies, films, music, and art, this course will provide students a survey of Chicana/o history and culture. Historical overviews of Chicana/o peoples from Mesoamerica; the Spanish Conquest; the historical presence of Chicana/o peoples in the Southwest; the rise of the Chicana/o student and community movements; immigration issues; and the gender, sexuality, and criminalization issues. Formerly CHST 2537. Approved for arts and sciences core curriculum: human diversity or United States context.

College of Arts & Sciences Ethnic Studies Chicana/o Studies

---

## ETHN-2546 (3) Chicana and Chicano Fine Arts and Humanities

Provides foundation for study of Chicano literature, music, the plastic arts, theatre, and film. Also introduces aesthetic and critical concepts and their applications in Chicana and Chicano studies. Formerly ETHN 1036, CHST 1031. Approved for arts and sciences core curriculum: human diversity.

College of Arts & Sciences Ethnic Studies Chicana/o Studies

---

## ETHN-2713 (3) American Indian Literature

Surveys historical and contemporary North American Native American literature. Examines the continuity and incorporation of traditional stories and values in Native Literature, including novels, short stories, and poetry. Same as ENGL 2717.

College of Arts & Sciences Ethnic Studies American Indian Studies

---

## ETHN-2732 (3) Survey of African American Literature 2

Chronological study of African American literature from the Depression writers to the present. Same as ENGL 2737. Formerly BLST 2732.

College of Arts & Sciences Ethnic Studies Africana Studies

---

## ETHN-2746 (3) Chicana/Chicano and Mexican Literature

Introduces Chicana and Chicano and Mexican literary studies, focusing on narrative works by Chicana and Chicano writers. Examines diverse range of Mexican writing in Greater Mexico as it addresses recurring issues and themes, including language, race and class, questions of identity, and gender relations. Same as ENGL 2747.

College of Arts & Sciences Ethnic Studies Chicana/o Studies

---

## ETHN-2761 (3) Survey of Post-Colonial Literature

Surveys the development of literatures in English in former British colonies. Topics include the spread and adaptation of English language literary forms in Asia, Africa, the Caribbean, and the far new world (Australia and New Zealand). Students learn the causes of the dispersion and the motivations for the clearly different uses of English literary forms in the ex-colonies. Same as ENGL 2767. Formerly ETHN 2762.

College of Arts & Sciences Ethnic Studies Crosscultural/Comparative Study

---

## ETHN-3015 (3) Asian Pacific American Communities

Covers the concepts, methods, and theories commonly used in community research, as well as substantive information on selected Asian/Pacific American communities. Emphasizes the ethical/political dimensions of community studies. Prereq., ETHN 2001 or 1025. Formerly AAST 3013. Approved for arts and sciences CORE curriculum: United States context or contemporary societies.

College of Arts & Sciences Ethnic Studies Asian American Studies

---

## ETHN-3026 (3) Women of Color: Chicanas in U.S. Society

Critically explores the Chicana experience and identity. Examines issues arising from the intersection of class, race, and gender. Focuses on controversies surrounding culture and gender through an analysis of feminism and feminismo. Prereq., ETHN 2001 or 2536 or equivalent.. Formerly CHST 3026.

College of Arts & Sciences Ethnic Studies Chicana/o Studies

---

## ETHN-3031 (3) Race and Racism

Explores the origins and evolution of racism as a political and religious force in American life, beginning with Puritan ideology in colonial New England, proceeding through the era of Manifest Destiny, and ending in the present day. Special attention is paid to the history of organizations such as the Ku Klux Klan, and emergence of Christian identity doctrine. Prereq., ETHN 2001 or equivalent. Formerly ETHN 3013.

## ETHN-3101 (3) Selected Topics in Ethnic Studies

Intensive examination of a particular topic, theme, issue, or problem in ethnic studies as chosen by the instructor. May be repeated up to 6 total credit hours on different topics. Prereq., ETHN 2001 or equivalent. Formerly ETHN 3100.

# Courses

ETHN

## ETHN-3102 (3) Selected Topics in African American Studies

Intensive examination of a particular topic, theme, issue, or problem concerning the African American presence, as chosen by the instructor. Sample offerings could include African American Pop Culture, the Civil Rights Movement, or other African American issues. May be repeated up to 6 total credit hours on different topics. Prereq., ETHN 2001, 2002 or equivalent. Formerly ETHN 3022

[College of Arts & Sciences](#) | [Ethnic Studies](#) | [Africana Studies](#)

## ETHN-3103 (3) Selected Topics in American Indian Studies

Examines a particular topic, theme, issue, or problem in American Indian Studies. May be repeated up to 6 total credit hours on different topics. Prereq., ETHN 2001 or 2003 or equivalent. Formerly ETHN 3023.

[College of Arts & Sciences](#) | [Ethnic Studies](#) | [American Indian Studies](#)

## ETHN-3105 (3) Selected Topics in Asian American Studies

Intensive examination of a topic or issue affecting Asian Americans, such as the Japanese American internment during World War II, or Asian American social movements or community organizations. May be repeated up to 6 total credit hours on different topics. Prereq., ETHN 1025 or 2001. Formerly ETHN 3425, AAST 3420.

[College of Arts & Sciences](#) | [Ethnic Studies](#) | [Asian American Studies](#)

## ETHN-3106 (3) Selected Topics in Chicana and Chicano Studies

---

Intensive examination of a particular topic, theme, issue, or problem in Chicana and Chicano studies as chosen by the instructor. May be repeated up to 6 total credit hours within a term on different topics. Prereq., ETHN 1016 or 2001. Formerly CHST 3100.

College of Arts & Sciences Ethnic Studies Chicana/o Studies

---

## ETHN-3136 (3) Chicana Feminisms and Knowledges

Provides insight into the present socioeconomic condition of Chicanas and the concept of feminismo through interdisciplinary study of history, sociology, literary images, and film portrayals. Prereq., ETHN 2001 or 2536 or equivalent. Same as WMST 3135. Formerly CHST 3135. Approved for arts and sciences core curriculum: human diversity.

College of Arts & Sciences Ethnic Studies Chicana/o Studies

---

## ETHN-3201 (3-4) Multicultural Leadership: Theories, Principles and Practices

Focuses on leadership theories and skills necessary for effectiveness in multicultural settings. Students gain understanding of traditional and culturally diverse approaches to leadership and change through comparative analyses of western and non-western theories and practices. Community service required. Prereq., ETHN 2001 or equivalent. Formerly ETHN 3200. Same as INVS 3100 and LDSP 3100. Approved for arts and sciences core curriculum: human diversity.

College of Arts & Sciences Ethnic Studies Crosscultural/Comparative Study

---

## ETHN-3212 (3) Introduction to Hip Hop Studies

Examines critical questions posed by hip hop culture. Accentuated in this course are hip hops contributions to the political-economic, philosophical, and sociological study of race, racism, sexism, and sexuality. This course examines the ways in which hip hop, as a new social phenomenon, cultural force and aesthetic form, have influenced contemporary American and global culture. Prereq., ETHN 2001 or 2002.

College of Arts & Sciences Ethnic Studies Africana Studies

---

## ETHN-3213 (3) American Indian Women

Explores the experiences, perspectives, and status of American Indian women in historical and contemporary contexts. Examines representations of Indigenous women in mainstream culture. Emphasizes the agency of American Indian women-their persistence, creativity, and activism, especially in maintaining Indigenous traditions. Prereq., WMST 2000, 2600 or ETHN 2001 or 2003. Same as WMSt 3210. Approved for arts and sciences core curriculum: human diversity. Formerly AIST 3210. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences Ethnic Studies American Indian Studies

---

---

## ETHN-3252 (3) African American Urban History

Fosters a better understanding and appreciation of the role African Americans have played in the evolution and shaping of urban America. Employs techniques of urban studies to more effectively assess the many dimensions, subtleties, and insensitivities of life in the city. Prereq., ETHN 2001 or 2002 or equivalent. Recommended prereq., a working knowledge of U.S. and Afro-American history. Restricted to juniors/seniors. Formerly ETHN 4252.

College of Arts & Sciences Ethnic Studies Africana Studies

---

## ETHN-3301 (3) Elements of Religion

Explores universal components of religion, as inferred from religions of the world, ranging from smaller-scale oral to larger-scale literate traditions. Same as ANTH 3300. Formerly ETHN 3300.

College of Arts & Sciences Ethnic Studies Crosscultural/Comparative Study

---

## ETHN-3403 (3) Indigenous Rights and Red Power Movement

Deals with historical events involving conflicts between the U.S. government and American Indians. Examples include the role of the FBI in the Pine Ridge Sioux Reservation (1972--76) or the 1864 massacre of the Cheyenne and Arapaho Indians in Colorado territory. Additional courses may relate to tribal governments. May be repeated up to 6 total credit hours on different topics. Prereq., ETHN 2001, 2003, 2013. Restricted to juniors/seniors. Formerly AIST 3400.

College of Arts & Sciences Ethnic Studies American Indian Studies

---

## ETHN-3501 (3) Theory/Methods/Writing in Ethnic Studies

Preparation for empirical inquiry in Ethnic Studies. Emphasizes philosophy of social science and cultural studies. Students engage rigorous, theoretical concepts to understand research methods. Prepares students for writing a lengthy, cogent research paper. Prereq., ETHN 2001. Formerly ETHN 3500. Prerequisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) Ethnic Studies (ETHN) majors only.

College of Arts & Sciences Ethnic Studies Crosscultural/Comparative Study

---

## ETHN-3502 (3) Historical and Contemporary Issues of African American Women

Explores the social, economic, political, historical, and cultural role of African American women from an interdisciplinary perspective. Special emphasis is placed on African American women's rich oral and literary tradition. Prereq., ETHN 2001, 2002, or WMST 2000 or equivalent. Same as WMST 3505. Formerly BLST 3505.

College of Arts & Sciences Ethnic Studies Africana Studies

---

---

## ETHN-3575 (3) Japanese American Internment: Critical Thinking in Sociocultural Diversity

Offers an historical overview of the Japanese American experience in the United States. Introduces and explores fundamental issues inherent in the study of human beings from the perspective of cultural social difference. Prereq., ETHN 1025 or 2001. Restricted to juniors/seniors. Formerly AAST 3670. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

[College of Arts & Sciences](#) [Ethnic Studies](#) [Asian American Studies](#)

---

---

## ETHN-3671 (3) People of Color and Social Movements

People of color the world over are struggling for sovereignty, independence, civil and human rights, food security, decent wages and working conditions, healthy housing, and freedom from environmental racism and other forms of imperialism. Course analyzes and brings alive these struggles. Prereq., ETHN 2001 or equivalent. Restricted to juniors/seniors. Approved for arts and sciences core curriculum: human diversity. Formerly ETHN 3675.

[College of Arts & Sciences](#) [Ethnic Studies](#) [Crosscultural/Comparative Study](#)

---

---

## ETHN-3841 (1-6) Undergraduate Independent Study

Consult the Department of Ethnic Studies for information. May be repeated up to 6 total credit hours. Prereq., ETHN 2001. Department and instructor consent required. Formerly ETHN 3840.

[College of Arts & Sciences](#) [Ethnic Studies](#) [Crosscultural/Comparative Study](#)

---

---

## ETHN-3954 (3) Methods in American Ethnic Studies

Through structured discussions, selected readings, and written assignments, students develop an understanding of theoretical concepts that engage race, class gender and sexuality in American Ethnic Studies. The emphasis is on critical analysis and theoretical arguments that encourage students to become critical thinkers. Prereqs., ETHN 2001 or 2004 and ETHN 2014 or 2064. Restricted to juniors and seniors. Formerly AMST 3950. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

[College of Arts & Sciences](#) [Ethnic Studies](#) [American Studies](#)

---

---

## ETHN-4001 (3) Screening Race, Class & Gender in the U.S. and the Global Borderland

Engaging with the ways in which race, class, gender and sexual oppression intersect, this class examines several film productions by and about diasporic and subaltern subjects (especially children and women) in the U.S./Mexico borderlands, and the urban ethnic metropolises of the global borderlands. Prereq., ETHN 2001 or equivalent ETHN course. Same as FILM 4001. ETHN 4001 and 5001 are the same course. Formerly ETHN 3001.

---

College of Arts & Sciences Ethnic Studies Crosscultural/Comparative Study

---

## ETHN-4006 (3) Chicana/Chicano Native American Cultures of the U.S.

Theoretically engaged seminar considers intersections of Chicana/o and Native American studies to shape our scholarly understanding of the U.S. and Mexico borderlands. Ethnographies, historical studies, novels, film, and music will be used to understand the processes of Spanish and Euro-American colonization, neocolonialism, identity formation, gender, syncretism, and mestizaje. Prereq., ETHN 2001 or 2536 or equivalent. Formerly CHST 400.

College of Arts & Sciences Ethnic Studies Chicana/o Studies

---

## ETHN-4112 (3) African American Educational History

Examines the history of the education of African Americans from early American history until current times. Covers primary, secondary, and higher education. Topics include education of African Americans before 1800, education of African Americans during the period of American slavery, and factors affecting today's education gains. Also covers current research being conducted in higher education. Prereq., ETHN 2001, 2002 or equivalent. Formerly ETHN 3112.

College of Arts & Sciences Ethnic Studies Africana Studies

---

## ETHN-4116 (3) Spoken Word Latino Poetics and Poetry

This is a writing intensive workshop in contemporary poetry writing and Chicana/o and Latina/o poetics-specifically, Nuyorican and Afro-Latino (the Nuyorican Poets Cafe). The purpose of the course is dual-fold: 1) students will be encouraged and empowered to express and develop their poetic voice; 2) students will be challenged to develop and refine their poetic craft. Examines primarily Chicana and Latino specific poetic expression that reflects the cultural mestizaje of Chicano/a and Latina/o peoples. Prereq., ETHN 2001. Recommended prereq., 6 credits in any ETHN class.

College of Arts & Sciences Ethnic Studies Chicana/o Studies

---

## ETHN-4232 (3) The Life and Thought of Martin Luther King Jr

An intensive exploration and examination of the life and thought of the Rev. Dr. Martin Luther King Jr. Special emphasis on the stages of his life and their corresponding productions. Prereq., ETHN 2001 or 2002 or equivalent. Restricted to juniors/seniors. Formerly BLST 4235.

College of Arts & Sciences Ethnic Studies Africana Studies

---

## ETHN-4272 (3) W.E.B. Du Bois Seminar

Analyzes the life and thought of W.E.B. Du Bois for its contributions to interdisciplinary and intersectional studies. Emphasis will be placed on the innovative interdisciplinary and intersectional nature of Du Bois's epistemology and research methodology, as well as his participation in radical political and social movements. Prereq., ETHN 2001 or 2002. Restricted to junior/senior ETHN majors/minors. ETHN 4272 and 5272 are the same course. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) Ethnic Studies (ETHN) majors only.

[College of Arts & Sciences](#) [Ethnic Studies](#) [Africana Studies](#)

## ETHN-4306 (3) The Chicana and Chicano and U.S. Social Systems

Gives special attention to ways U.S. institutions (i.e., legal, economic, educational, governmental and social agencies) affect Chicanas and Chicanos. Discusses internal colonialism, institutional racism, assimilation and acculturation, and identity. Prereq., ETHN 2536 or equivalent. ETHN 4306 and 5306 are indetical courses. Formerly CHST 4303.

[College of Arts & Sciences](#) [Ethnic Studies](#) [Chicana/o Studies](#)

## ETHN-4504 (3) Ethnic-American Autobiography

Investigates the genre of autobiography in America from its inception to the present. American autobiography has been associated with the invention of national character and, thus, is a site of cultural contestation and identity formation. Its changing form crosses disciplinary lines and provides a site for discourses on ethnicity, class, gender, sexuality, age, family, religion and other American cultural conflicts. Prereq., ETHN 2001 or equivalent. Restricted to juniors/seniors. Approved for arts and sciences core curriculum: United States context. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

ETHN

### [ETHN-4521 \(3\) Applied Cultural Anthropology](#)

Analyzes problems of cultural change due to contacts between people of different cultures. Restricted to senior ANTH or ETHN majors. Same as ANTH 4510. Formerly ETHN 4520.

[College of Arts & Sciences](#) [Ethnic Studies](#) [Crosscultural/Comparative Study](#)

### [ETHN-4553 \(3\) Indigenous Representations in the United States](#)

Examines the relationship and negotiation of culture/status/place through representation(s) within and concerning Indigenous peoples/communities. Focuses on U.S. representational forms in popular experiences e.g., literature, film, media and the roots of those representations via legal and medical definitions. This investigation and analysis is supplemented with focus on gender as well as contextualization through global Indigenous portrayals. Recommended prereq., ETHN 2003 or 2013. ETHN 4553 and 5553 are the same course.

[College of Arts & Sciences](#) [Ethnic Studies](#) [American Indian Studies](#)

### [ETHN-4563 \(3\) North American Indian Acculturation](#)

Comprehensive survey of changes in the native cultures of America north of Mexico caused by occupation of the continent of Old World populations, including a review of processes of contact, environmental changes, changes in major institutions, the nature of federal/state administration, the reservation system, and contemporary developments. Prereq., ETHN 2001 or 2003. Restricted to junior/senior ANTH or ETHN majors. Same as ANTH 4560. Formerly AIST 4565. Approved for arts and sciences core curriculum: human diversity.

[College of Arts & Sciences](#) [Ethnic Studies](#) [American Indian Studies](#)

---

## ETHN-4632 (3) Frantz Fanon Seminar

Analyzes the life and thought of Frantz Fanon for its contributions to interdisciplinary and intersectional studies. Emphasis will be placed on the innovative interdisciplinary and intersectional nature of Fanon's psychology, sociology and philosophical anthropology, as well as his participation in African and Caribbean anti-colonial movements. Prereq., ETHN 2001 or 2002. ETHN 4632 is restricted to junior/senior ETHN majors/minors. ETHN 4632 and 5632 are the same course. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) Ethnic Studies (ETHN) majors only.

College of Arts & Sciences Ethnic Studies Africana Studies

---

---

## ETHN-4652 (3) Contemporary Issues in African American Studies

Variable topic that allows intensive coverage of a subject, theme, or issue in African American studies. May be repeated up to 6 total credit hours on different topics. Prereq., ETHN 2001 or 2002 or equivalent. Restricted to juniors/seniors. ETHN 4652 and 5652 are the same course. Formerly BLST 4650. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

College of Arts & Sciences Ethnic Studies Africana Studies

---

---

## ETHN-4672 (3) Seminar on the Civil Rights and Black Power Movements

A review of the ideas, events, persons, organizations oriented to the quest for African American social justice in the decade of the sixties. Prereq., ETHN 2001 or 2002. Restricted to juniors/seniors or instructor consent. Formerly BLST 4670. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

College of Arts & Sciences Ethnic Studies Africana Studies

---

---

## ETHN-4686 (3) Special Topics in Chicana and Chicano Studies

Examines a particular topic, theme, issue, or problem concerning Chicana and Chicano studies. May be repeated up to 6 total credit hours on different topics. Prereq., ETHN 2001 or 2536 or equivalent. Same as ETHN 5686. Formerly CHST 4681.

College of Arts & Sciences Ethnic Studies Chicana/o Studies

---

---

## ETHN-4692 (3) Contemporary African American Literature 1

Advanced in-depth study of works of prominent African American novelists and poets. Prereq., ETHN 2001 or 2002. Restricted to juniors/seniors. Same as ENGL 4697. Formerly BLST 4692. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

College of Arts & Sciences Ethnic Studies Africana Studies

---

---

## ETHN-4841 (1-6) Independent Study

Work with an approved faculty sponsor to explore a topic in greater depth. May be repeated up to 6 total credit hours for different topics. Prereq., department and instructor consent.

---

[College of Arts & Sciences](#) [Ethnic Studies](#) [Crosscultural/Comparative Study](#)

---

## ETHN-4951 (3) Senior/Graduate Seminar in Ethnic Studies

Capstone experience in Ethnic Studies. Includes an independent research project and public presentation. Prereqs for ETHN 4951 are ETHN 2001, 3501 and 4511 or equivalent. ETHN 4951 is restricted to students with 57-180 credits (junior or senior). ETHN 5951 is restricted to graduate students. ETHN 4951 and 5951 are identical courses. Formerly ETHN 4950. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

[College of Arts & Sciences](#) [Ethnic Studies](#) [Crosscultural/Comparative Study](#)

---

## ETHN-4961 (3) Honors Thesis I

Supervised project involving original research in the emerging field of ethnic studies. The thesis is submitted to the Honors Program of the College of Arts and Sciences and is orally defended. Prereqs., ETHN 2001 and ETHN 4511. Formerly ETHN 4960. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Ethnic Studies (ETHN) majors only.

[College of Arts & Sciences](#) [Ethnic Studies](#) [Crosscultural/Comparative Study](#)

---

## ETHN-4971 (3) Honors Thesis II

Prereqs., ETHN 2001, 4511, and 4961. Formerly ETHN 4970. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Ethnic Studies (ETHN) majors only.

[College of Arts & Sciences](#) [Ethnic Studies](#) [Crosscultural/Comparative Study](#)

---

## ETHN-5001 (3) Screening Race, Class & Gender in the U.S. and the Global Borderland

Engaging with the ways in which race, class, gender and sexual oppression intersect, this class examines several film productions by and about diasporic and subaltern subjects (especially children and women) in the U.S./Mexico borderlands, and the urban ethnic metropolises of the global borderlands. Prereq., ETHN 2001 or equivalent ETHN course. Same as FILM 4001. ETHN 4001 and 5001 are the same course. Formerly ETHN 3001.

[College of Arts & Sciences](#) [Ethnic Studies](#) [Crosscultural/Comparative Study](#)

---

## ETHN-5272 (3) W.E.B. Du Bois Seminar

Analyzes the life and thought of W.E.B. Du Bois for its contributions to interdisciplinary and intersectional studies. Emphasis will be placed on the innovative interdisciplinary and intersectional nature of Du Bois's epistemology and research methodology, as well as his participation in radical political and social movements. Prereq., ETHN 2001 or 2002. Restricted to junior/senior ETHN majors/minors. ETHN 4272 and 5272 are the same course. Prerequisites: Restricted to Graduate Students only.

---

College of Arts & Sciences Ethnic Studies Africana Studies

---

## ETHN-5306 (3) The Chicana and Chicano and U.S. Social Systems

Gives special attention to ways U.S. institutions (i.e., legal, economic, educational, governmental and social agencies) affect Chicanas and Chicanos. Discusses internal colonialism, institutional racism, assimilation and acculturation, and identity. Prereq., ETHN 2536 or equivalent. ETHN 4306 and 5306 are identical courses. Formerly CHST 4303.

College of Arts & Sciences Ethnic Studies Chicana/o Studies

---

## ETHN-5553 (3) Indigenous Representations in the United States

Examines the relationship and negotiation of culture/status/place through representation(s) within and concerning Indigenous peoples/communities. Focuses on U.S. representational forms in popular experiences e.g., literature, film, media and the roots of those representations via legal and medical definitions. This investigation and analysis is supplemented with focus on gender as well as contextualization through global Indigenous portrayals. Recommended prereq., ETHN 2003 or 2013. ETHN 4553 and 5553 are the same course. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Ethnic Studies American Indian Studies

---

## ETHN-5632 (3) Frantz Fanon Seminar

Analyzes the life and thought of Frantz Fanon for its contributions to interdisciplinary and intersectional studies. Emphasis will be placed on the innovative interdisciplinary and intersectional nature of Fanon's psychology, sociology and philosophical anthropology, as well as his participation in African and Caribbean anti-colonial movements. Prereq., ETHN 2001 or 2002. ETHN 4632 is restricted to junior/senior ETHN majors/minors. ETHN 4632 and 5632 are the same course. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Ethnic Studies Africana Studies

---

## ETHN-5652 (3) Contemporary Issues in African American Studies

Variable topic that allows intensive coverage of a subject, theme, or issue in African American studies. May be repeated up to 6 total credit hours on different topics. Prereq., ETHN 2001 or 2002 or equivalent. Restricted to juniors/seniors. ETHN 4652 and 5652 are the same course. Formerly BLST 4650.

College of Arts & Sciences Ethnic Studies Africana Studies

---

## ETHN-5686 (3) Selected Topics Chicana and Chicano Studies

Examines a particular topic, theme, issue, or problem concerning Chicanas and Chicanos. May be repeated up to 6 total credit hours on different topics. Same as ETHN 4686. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Ethnic Studies Chicana/o Studies

---

---

---

## ETHN-5951 (3) Senior/Graduate Seminar in Ethnic Studies

Capstone experience in Ethnic Studies. Includes an independent research project and public presentation. Prereqs for ETHN 4951 are ETHN 2001, 3501 and 4511 or equivalent. ETHN 4951 is restricted to students with 57-180 credits (junior or senior). ETHN 5951 is restricted to graduate students. ETHN 4951 and 5951 are identical courses. Formerly ETHN 4950. Prerequisites: Restricted to Graduate Students only.

[College of Arts & Sciences](#) [Ethnic Studies](#) [Crosscultural/Comparative Study](#)

---

---

---

## ETHN-6011 (3) Race and Sexuality Studies

Examines primary texts in queer studies and queer theory while challenging colonial heteronormative and homonormative studies that exclude queers of color and their life experiences. Readings include works by Gloria Anzaldua, Jose Munoz, Audre Lorde, David Eng, Judith Butler, Judith Halberstam, and Michel Foucault. Topics such as queer borderlands, citizenship, racialized and transgender identities will be interrogated. Restricted to grad students. Prerequisites: Restricted to Graduate Students only.

[College of Arts & Sciences](#) [Ethnic Studies](#) [Crosscultural/Comparative Study](#)

---

---

---

## ETHN-6101 (1-6) Topics: Specialized Comparative Studies

Focuses on a variety of advanced interdisciplinary studies. Themes include: Race and Sports, Critical Whiteness Studies, Race and Masculinity, Applied Community Engagement, Black Women in the Diaspora, US/Mexico Border Cultures, Criminalization and Latinas/os, Race, Violence and Film, and Cuba and Tourism. May be repeated up to 6 total credit hours. Recommended prereq., ETHN coursework. Restricted to graduate students. Prerequisites: Restricted to Graduate Students only.

[College of Arts & Sciences](#) [Ethnic Studies](#) [Crosscultural/Comparative Study](#)

---

---

---

## ETHN-6841 (1-6) Advanced Directed Readings in Ethnic Studies

This is a graduate level directed readings course designed to expand student knowledge in a particular area of concentration with a broad interdisciplinary and comparative framework. These areas of concentration include work in Africana, American Indian, Asian American, Chicana and Chicano and Transnational/Hemispheric ethnic studies. Prerequisites: Restricted to Graduate Students only.

EVEN

## [EVEN-1000 \(1\) Introduction to Environmental Engineering](#)

Introduces students to environmental engineering as an academic major and a career. Covers air quality, aquatic ecology, chemical processing, energy, site remediation, and water resources and treatment. Includes reading and writing on the history of environmental engineering, major environmental issues, and professional ethics.

[College of Engineering & Applied Science](#) | [Environmental Engineering](#)

## [EVEN-2840 \(1-3\) Independent Study: General Topics](#)

General topics relating to environmental engineering. One-on-one assistance with an instructor.

[College of Engineering & Applied Science](#) | [Environmental Engineering](#)

## [EVEN-4100 \(3\) Environmental Sampling and Analysis](#)

Introduces students to hands-on environmental sampling and analysis techniques for characterization of surface water, subsurface water, soils and sediments, and air. Laboratories include stream sampling, drilling, monitoring well installation, water level, slug tests, air sampling. Prereqs., CVEN 4404 and 4414, fluid mechanics, or instructor consent.

[College of Engineering & Applied Science](#) | [Environmental Engineering](#)

## [EVEN-4830 \(3\) Special Topics](#)

[College of Engineering & Applied Science](#) | [Environmental Engineering](#)

## EVEN-4840 (1-3) Independent Study: General Topics

General topics relating to environmental engineering. One-on-one assistance with an instructor. May be repeated up to 6 total credit hours.

## EVEN-4980 (3) Senior Thesis 1

Provides faculty-supervised independent research in environmental engineering for students planning to complete a senior thesis. To be taken prior to EVEN 4990, during the final year before graduation. Instructor consent required. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Environmental Engineering (EVEN) majors only.

## EVEN-4990 (3) Senior Thesis 2

Continuation of EVEN 4980. Consists of final phase of faculty-supervised research, the preparation of a written thesis, and an oral defense of the research to a committee. Prereq., EVEN 4980.

FARR

## FARR-1000 (1) Farrand Service-Learning Practicum: Special Topics

Offers a varying service-learning practicum experience as corequisite to a service-learning lecture course. May be repeated up to 6 total credit hours, provided the practica are different. Graded pass/fail.

[College of Arts & Sciences](#) [Farrand Residential Academic Program](#)

## FARR-1003 (1) Banned Books and the First Amendment

Focuses on a heated topic of discussion since the Constitution was drafted: the censorship of books. This class will look at some classics in literature: Catcher in the Rye, The Color Purple, and Huck Finn, and will explore the questions of why they were controversial and whether censorship of books is ever justified. Graded pass/fail.

[College of Arts & Sciences](#) [Farrand Residential Academic Program](#)

## FARR-1004 (1) Teen Trials and Tribulations in Literature

Discusses major themes and literary strategies in coming-of-age literature. Pass/fail only.

[College of Arts & Sciences](#) [Farrand Residential Academic Program](#)

## FARR-1005 (1) Comics and the Interpretive Arts

Explores comic books as literature and visual art. This course will introduce methods of literary analysis and apply them to a specific medium of art: the comic book. Discussions will focus on content and form and will be guided by questions about the way in which art is

defined and categorized. Graded pass/fail.

College of Arts & Sciences Farrand Residential Academic Program

---

## FARR-1561 (1) Nonviolence for Everyday: Meditation and Other Helpful Habits

Focuses on the challenge of achieving nonviolence on a day-to-day basis by maintaining a peaceful, focused frame of mind. Explores ways to train the mind, including methods that may aid healing.

College of Arts & Sciences Farrand Residential Academic Program

---

## FARR-1562 (3) Gandhi's Satyagraha: Love in Action for Humans and Other Creatures

Class texts and films explore social justice and structural violence in regard to humans, animals, and the environment in the light of a Gandhian approach to these issues. Outreach work in the community is included.

College of Arts & Sciences Farrand Residential Academic Program

---

## FARR-2000 (3) Farrand Seminar in the Humanities and the Arts

Studies an aspect of the theme of the Center for Humanities Seminar Program each year, and will be taught by faculty participants in the Center's fellowship program. May be repeated up to 6 total credit hours.

College of Arts & Sciences Farrand Residential Academic Program

---

## FARR-2002 (3) Literature of Lifewriting

Examines how diverse writers have created unique personal narratives that shape memory within historical and social contexts. Works will exemplify a wide range of literary structures, themes, and strategies that enhance an understanding of the genre and provide models for students' own lifewriting assignments. Approved for arts and sciences CORE curriculum: literature and the arts.

College of Arts & Sciences Farrand Residential Academic Program

---

## FARR-2400 (3) Understanding Privilege and Oppression in Contemporary Society

Through a focus on race, class, sexual orientation, and physical ability, this course explores privilege, oppression, and empowerment in

the United States. Through community service, students learn how oppression and privilege interact, and apply classroom learning to community experiences. Same as LDSP 2400. Approved for the arts and sciences core curriculum: human diversity or contemporary societies

[College of Arts & Sciences](#) [Farrand Residential Academic Program](#)

---

## FARR-2510 (3) Exploring Good and Evil through Film

Eighteen films depict our capacities for good and evil. Topics addressed include the following: the Holocaust, Jung's concept of "The Shadow," the Seven Deadly Sins, altruistic and sociopathic personalities, capital punishment, the redemptive narrative, and the satanic in film. Same as FILM 2613. Approved for arts and sciences CORE curriculum: ideals and values.

[College of Arts & Sciences](#) [Farrand Residential Academic Program](#)

---

## FARR-2660 (3) Ethics of Ambition

Through selected readings in classical literature on ethics and through more contemporary readings and films, examines critical ethical issues relating to the competition of ambitions and the alternative styles of choosing between courses of action in a dangerous world. Uses biographies of those whose lives illustrate both the complexities of the struggles and the profundity of possibilities. Considers the unconscious metaphors of national visions and ambitions, the competing ethics of ends and means, the conflicting ambitions in a pluralistic society, and the transcendent ambitions of visionaries. Same as HONR 2250. Approved for arts and sciences CORE curriculum: ideals and values.

[College of Arts & Sciences](#) [Farrand Residential Academic Program](#)

---

## FARR-2820 (3) Future of the Spaceship Earth

Examines major ecological, political, economic, cultural, legal, and ethical issues that will shape the future. Students consider how their decisions influence the future, and reflect on fundamental values and ideals underlying the search for solutions to these complex problems. Approved for the arts and sciences CORE curriculum: ideals and values.

FILM

## FILM-1002 (3) Film Analysis for Non-Majors

Introduces the critical study of film, exploring theoretical, historical, and technical concerns while presenting a survey of important film periods and genres. Students will hone critical-thinking, close-analysis, and writing skills. The course will cover a wide variety of films, approaching them from numerous perspectives, considering both the effects films have on individual viewers and their ability to reflect culture.

[College of Arts & Sciences](#) [Film Studies](#) [Genre and Movements](#)

## FILM-1502 (3) Introduction to Film Studies

Introduces the critical study of film, exploring basic theoretical concerns while presenting a survey of important film genres, both narrative and nonnarrative. Lectures may be presented by various faculty members. Considerable amount of writing is required.

[College of Arts & Sciences](#) [Film Studies](#) [Genre and Movements](#)

## FILM-2000 (3) Beginning Filmmaking

Instructs students in making Super-8 films. Covers use of cameras and editing equipment, basic editing and splicing techniques, and analysis of pertinent films. May emphasize making personal, experimental films or making narrative sound films, according to instructor. Students need to purchase materials and rent the necessary equipment. The Film Studies Program maintains an equipment pool with modest rental fees for students needing equipment. Prereq., FILM 1502.

[College of Arts & Sciences](#) [Film Studies](#) [Production](#)

---

## FILM-2002 (3) Recent International Cinema

Familiarizes students with current trends and major directors in international cinema. Students attend specific films screened in class and/or offered in the International Film Series, and read and write about these films. Prereq., FILM 1502 or 6 hours humanities courses involving critical writing.

College of Arts & Sciences | Film Studies | Genre and Movements

---

## FILM-2003 (3) Film Topics

Varying topics on important individuals, historical developments, groupings of films, film directors, critical and theoretical issues in film. May be repeated up to 9 total credit hours, provided the topics are different.

College of Arts & Sciences | Film Studies | Topics

---

## FILM-2005 (3) Movies and Screenplay Analysis

Analyzes the narrative structure of films and screenplays. Familiarizes students with the specific narrative characteristics of the classic motion picture, the three-act structure, and the multiple tasks involved in the process of adaptation. Dissects the form and structure of feature films through analyzing movies and screenplays. Prereq., FILM 1502.

College of Arts & Sciences | Film Studies | Workshops

---

## FILM-2010 (3) Moving Image Computer Foundations

Provides students with artistic foundational hands-on experience in integrated use of media software in both the PC and Mac creative imaging making digital working environments. Includes fundamentals in general computer maintenance, creative and practical audio editing, image management and manipulation, and creative moving image practice. Restricted to Film (FILM or FMST) majors only. Prerequisites: Restricted to Film (FILM or FMST) majors only.

College of Arts & Sciences | Film Studies | Production

---

## FILM-2105 (3) Introduction to the Screenplay

Explores, through close reading and original student work, the form and structure of the screenplay from the writer's perspective. Students will begin by analyzing structural and character elements of such screenplays as Chinatown and Witness, then analyze screenplays of their choosing. Students will learn the basics of screenwriting form, then develop and write 10 minutes of an original screenplay. Prereq., FILM 1502. Prerequisites: Restricted to students with 0-26 credits (Freshmen) only.

College of Arts & Sciences | Film Studies | Workshops

---

---

## FILM-2300 (3) Beginning/Intermediate Filmmaking

Covers basic camera, editing, and splicing techniques for Super-8 film. Equipment is available at the film studies office for a modest rental fee. Prereq., FILM 1502.

College of Arts & Sciences Film Studies Production

---

## FILM-2312 (3) Film Trilogies

Study of films designed as trilogies, drawing on a wide range of international cinema. Films include Satyajit Ray's Apu Trilogy (India), Krzysztof Kieslowski's Three Colors Trilogy (Poland), Francois Truffaut's Antoine Doinel cycle (France), and Abbas Kiarostami's Iran Trilogy (Iran). Restricted to FILM/FMST majors. Non-majors will need instructor's consent.

College of Arts & Sciences Film Studies Genre and Movements

---

## FILM-2500 (3) Introduction to Cinematography

Film production class focusing on developing a basic understanding of the aesthetics and principles of Cinematography. Through projects, screenings, and critiques, students learn creative camera lighting processes. Prereqs., FILM 1502 and 2000 or 2300 with an averaged combined grade in these two courses of 3.00, with a minimum overall GPA of 2.0. Restricted to FILM majors. Prerequisites: Restricted to Film (FILM or FMST) majors only.

College of Arts & Sciences Film Studies Production

---

## FILM-2513 (3) Major Asian Filmmakers

Surveys the major Asian directors from China, India, Japan, Taiwan, and Vietnam. Recommended prereq., FILM 1502. Restricted to FILM/FMST majors. Non-majors will need instructor's consent.

College of Arts & Sciences Film Studies Topics

---

## FILM-2521 (3) Classics of the Foreign Film: 1960s to Present

Surveys the classics of international cinema from the 1960s to the present. Recommended prereq., FILM 1502. Restricted to FILM/FMST majors. Non-majors will need instructor's consent.

College of Arts & Sciences Film Studies History

---

## FILM-2610 (3) Animation Production

Includes analysis of independent and experimental animation and an introduction to various animation techniques (object, line, collage, sand or paint on glass, Xerox, cameraless, pixellation, etc.). Students produce exercise films and a final film exploring these techniques.

---

Prereq., FILM 2000 or 2300. Recommended prereq., FILM 2500.

College of Arts & Sciences Film Studies Production

---

## FILM-2613 (3) Exploring Good and Evil Through Film

Eighteen films depict our capacities for good and evil. Topics addressed include the following: the Holocaust, Jung's concept of "The Shadow," the Seven Deadly Sins, altruistic and sociopathic personalities, capital punishment, the redemptive narrative, and the satanic in film. Same as FARR 2510. Approved for arts and sciences CORE curriculum: ideals and values.

College of Arts & Sciences Film Studies Topics

---

## FILM-2900 (3) Lighting

Covers the basics of "Why you need lighting", color temp, as well as camera techniques, lighting theory, and lighting set-ups for still and motion picture film video. Emphasizes hands on as well as theory. Prereq., FILM 2000 or 2300. Recommended prereq., FILM 1502.

College of Arts & Sciences Film Studies Production

---

## FILM-3002 (3) Major Film Movements

Historical-aesthetic survey dealing with various national cinemas, taught in conjunction with the appropriate language department. Typical offerings are the French film, the German film, the Russian film, and so on. Also offers a more detailed approach to a more restricted subject, i.e., film comedy, women filmmakers, German expressionist cinema, Italian neorealism. May be repeated up to 12 total credit hours within the same term with departmental consent. Restricted to FILM/FMST majors. Non-majors will need instructor's consent. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

College of Arts & Sciences Film Studies Genre and Movements

---

## FILM-3003 (3) Major Film Directors

Focuses on the work of a single director or a group of related directors. Course content varies each semester. Consult the online Schedule Planner for specific topic. May be repeated up to 12 total credit hours with departmental consent. . Non-majors need instructor consent. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) FILM (FILM or FMST) majors only.

College of Arts & Sciences Film Studies Topics

---

## FILM-3004 (3) Films of Alfred Hitchcock

Intensive, critical investigation of the films of one of cinema's greatest directors, Alfred Hitchcock. Concepts to be examined include authorship, desire, gender, and film acting. Critical and theoretical writings about Hitchcock are explored. Paper and exams required. Restricted to FILM/FMST majors. Non-majors will need instructor's consent.

---

College of Arts & Sciences | Film Studies | Intensive and Small Courses

---

## FILM-3010 (1-3) Film Production Topics

Offers students both theoretical and practical experience in various specialized areas of cinematic production. Topics vary but include production in the documentary, fictional narrative, animation, computer animation, and experimental genres. May be repeated up to 9 total credit hours. Prereq., FILM 2000 or 2300. Prerequisites: Restricted to Film (FILM or FMST) majors only.

College of Arts & Sciences | Film Studies | Production

---

## FILM-3012 (3) Documentary Film

Provides a historical and theoretical introduction to the documentary film. Examines the historical beginnings of documentary film as well as exploring contemporary documentary practice. Canonical moments of documentary history and lesser known examples of documentary film work will be explored. Prereq., FILM 1502. Recommended prereq., FILM 3051.

College of Arts & Sciences | Film Studies | Genre and Movements

---

## FILM-3013 (3) Women and Film

Examines the representation of women both in mainstream movies and in women's counter-cinema that resists traditional form, content, and spectator-text relationships of Hollywood models. Emphasizes work by key women filmmakers such as Margarethe Von Trotta, Lizzy Borden, and Yvonne Rainer, as well as readings in feminist film theory. Approved for arts and sciences core curriculum: human diversity. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences | Film Studies | Topics

---

## FILM-3022 (3) Jung, Film and Literature

The basic themes of C. G. Jung's archetypal psychology (shadow, anima/animus, character typology, and individuation) are studied and applied as tools of critical analysis to selected films and literary texts of the modern period. Instructor consent required. Same as HUMN 3015.

College of Arts & Sciences | Film Studies | Genre and Movements

---

## FILM-3030 (3) Cinema Alternative Process

Explores alternative methods of film processing and filmic image manipulation. Through projects, film screenings, lectures and discussions students will learn fine arts approaches to creative control for the moving image. Prereq., FILM 1502, 2000, 2300 or 2500, or instructor consent. Restricted to BFA majors.

---

---

## FILM-3032 (3) Stage Tragedy and Film

Presents an aerial survey of the history of Western drama as represented in film: Greek drama, the Elizabethans, Ibsen/Strindberg to O'Neill/Williams, Beckett, etc. Prereq., FILM 1502. Recommended prereq., FILM 3051.

FILM

### FILM-3033 (3) Color and Cinema

Examines color and cinema from historical, technological, aesthetic and theoretical perspectives. Students will be required to complete both creative and scholarly assignments.

[College of Arts & Sciences](#) [Film Studies](#) [Topics](#)

### FILM-3042 (3) Horror Film

Serious investigation of the horror film genre as well as its origins in, and relation to, works of romanticist literature (e.g., Poe, Shelley). Issues include: the relation of fantasy and reality; gender in horror film; psychological issues raised by the films; historical issues generated by the genre. Prereq., FILM 1502. Recommended prereq., FILM 3051.

[College of Arts & Sciences](#) [Film Studies](#) [Genre and Movements](#)

### FILM-3043 (3) Topics in Critical Film Studies

Prepares students for advanced Film Critical Studies work. Subject matter varies from semester to semester. May be repeated up to 9 total credit hours, provided topics are different. Prereq., FILM 1502 or instructor consent. Restricted to FILM or FMST majors. Prerequisites: Restricted to Film (FILM or FMST) majors only.

[College of Arts & Sciences](#) [Film Studies](#) [Topics](#)

### FILM-3051 (4) Film History 1

Intensive introduction to film history from 1895 to 1935. Topics covered include the beginnings of motion picture photography, the growth

of narrative complexity from Lumiere to Griffith, American silent comedy, Soviet theories of montage, German expressionist films, and the transition to sound. Prereq., FILM 1502.

College of Arts & Sciences Film Studies History

---

---

## FILM-3061 (4) Film History 2

Starts with the late 1930s and early 1940s films of Renoir and Welles and follows the historical growth and evolution of film aesthetics to the present. Studies Italian neorealist, French new wave, and recent experimental films, as well as the films of major auteur figures such as Bergman, Kurosawa, Fellini, Hitchcock, Bunuel, Antonioni, and Coppola. Prereqs., FILM 1502 and 3051, or instructor consent.

College of Arts & Sciences Film Studies History

---

---

## FILM-3081 (3) American Film in the 1980s and '90s

Examines the relationship between American films of the 1980s and '90s and their cultural and historical context. Includes films by Lynch, Stone, Solondz, Scott, Scorsese, Lee, Duyme, Lemmons, Tarantino, Altman. Controlled enrollment. Prereqs., FILM 1502, 3051, 3061, or instructor consent.

College of Arts & Sciences Film Studies Production

---

---

## FILM-3104 (3) Film Criticism and Theory

Surveys the range and function of film criticism, introduces major positions and concepts of film theory, and focuses on students' abilities to write about film. Prereq., FILM 1502. Restricted to FILM, FMST, and HUMN majors. Same as HUMN 3104.

College of Arts & Sciences Film Studies Intensive and Small Courses

---

---

## FILM-3211 (3) History of Russian Cinema

Surveys Russian cinema in historical and cultural context from early 20th century to the present. Prereq., FILM 1502 or RUSS 2221. Same as RUSS 3211. Approved for arts and sciences CORE curriculum: literature and the arts.

College of Arts & Sciences Film Studies Production

---

---

## FILM-3301 (3) Contemporary Issues in Russian Film

Examines the relationship between politics, economics, aesthetics, and the way moral and social issues are treated in noteworthy Russian films from the last 20 years. Same as RUSS 3301.

---

College of Arts & Sciences Film Studies History

---

## FILM-3400 (3) Cinema Production I

Exploration of creative cinema production through short production and post-production projects. A short final project will be required. Focuses on the tactics and strategies of independent cinema production, examining a variety of approaches to genre. Explores a range of film and digital technologies. Restricted to Film (FILM or FMST) majors only. Prereqs., FILM 1502, 2000 or 2300, and 2500. Coreqs., FILM 3515 and 3525. Prerequisites: Restricted to Film (FILM or FMST) majors only.

College of Arts & Sciences Film Studies Production

---

## FILM-3402 (3) European Film and Culture

Studies the relationships between European film, art, and culture. Offered each summer in a different European city (viz, Rome, Paris, London, Athens, Barcelona). There will be regular in-class lectures, film screenings, field trips, and on-site teaching. May be repeated up to 12 total credit hours. Recommended prereq., introductory film and art history courses. Approved for arts and sciences CORE curriculum: literature and the arts.

College of Arts & Sciences Film Studies Genre and Movements

---

## FILM-3422 (3) Genre: The Hollywood Musical

Second only to jazz, some critics regard the Hollywood musical as the greatest American popular art form of the 20th century. This course proposes a historical, formal, and theoretical approach to the musical through its several iterations, from the classical, to the revisionist, to the unusual, placing the changes in the genre's form, structure, and ideology in the context of America's changing social, political, and religious values. Prereq., FILM 1502. Recommended prereq., FILM 3051.

College of Arts & Sciences Film Studies Genre and Movements

---

## FILM-3503 (3) German Film Through World War II

History and theory of Weimar and Nazi film with sociocultural emphasis. Taught in English. Same as GRMN 3503.

College of Arts & Sciences Film Studies Topics

---

## FILM-3504 (3) Topics in German Film

Analyzes key issues in German culture as they are represented in film and other media, e.g., technology, architecture, women, and the Holocaust. Taught in English. May be repeated up to 6 total credit hours provided the topics are different. Same as GRMN 3504.

College of Arts & Sciences Film Studies Intensive and Small Courses

---

---

---

## FILM-3513 (3) German Film and Society 1945-1989

Introduces issues in German society through film during the Cold War. Focus on East and West Germany, though some other German language films may be included. Emphasis is on reading films in their social, historical, and political contexts. Taught in English. Same as GRMN 3513.

[College of Arts & Sciences](#) [Film Studies](#) [Topics](#)

---

---

## FILM-3514 (3) German Film & Society After 1989

Introduces post-1989 German culture through film. The course emphasizes films in their socio-historical contexts and explores developments in German culture during and after the unification. Taught in English. Same as GRMN 3514.

[College of Arts & Sciences](#) [Film Studies](#) [Intensive and Small Courses](#)

---

---

## FILM-3515 (2) Camera Workshop

Focuses on the development of independent cinema production and post-production skills. The instructor must certify students in order to continue with their BFA studies. Prereqs., FILM 1502, 2000 or 2300, and 2500. Coreq., FILM 3400. Restricted to BFA film studies majors. Prerequisites: Restricted to Film (FILM or FMST) majors only.

[College of Arts & Sciences](#) [Film Studies](#) [Workshops](#)

---

---

## FILM-3525 (2) Cinema Editing Workshop

Focuses on the development of independent cinema post-production skills. The instructor must certify students in order to continue with their BFA studies. Prereqs., FILM 1502, 2000 or 2300, and 2500. Coreq., FILM 3400. Restricted to BFA film studies majors. Prerequisites: Restricted to Film (FILM or FMST) majors only.

[College of Arts & Sciences](#) [Film Studies](#) [Workshops](#)

---

---

## FILM-3563 (3) Producing the Film

Focuses on the production process of movie making from idea through distribution, analyzing each of the five phases involved, including the major players, function and problems inherent in each. Emphasizes the critical role the script plays in this process. Designed to give students a "map of the minefield" before venturing out on their own. Offered through Continuing Education.

[College of Arts & Sciences](#) [Film Studies](#) [Topics](#)

---

---

## FILM-3600 (3) Digital Post-Production Process

Through projects, discussions, and screenings, this class explores the practices and aesthetics of computer-based moving-image art editing. Restricted to Film (FILM or FMST) majors only. Prerequisites: Restricted to Film (FILM or FMST) majors only.

College of Arts & Sciences Film Studies Production

---

---

## FILM-3603 (3) Sound and Vision

Historical and aesthetic overview of sound in relation to film, ranging from Hitchcock's *Blackmail* to Mailick's *The Thin Red Line*. Pursues issues in sound design, mixing film scores, voiceovers, and film/sound theory in narrative, experimental, and documentary films. Among the filmmakers to be studied are Vertov, Welles, Altman, Brakhage, Lipsett, Eisenstein, Coppola, Scorsese, Stone, Leone, Godard, Nelson. Also explores a limited practicum using Pro Tools for sound design. Prereq., FILM 1502. Recommended prereq., FILM 3051.

College of Arts & Sciences Film Studies Topics

---

---

## FILM-3620 (3) Experimental Digital Animation

Instructs students in the making of digital animation. Covers the use of the exposure sheet, frame series manipulation, digital motion techniques, and an analysis of pertinent films. Emphasis is on digital tools to create individual, personal, or experimental animated works. Includes experimental techniques of transfer between digital media and film. Prereq., FILM 2610. Recommended prereqs., FILM 3030 and FILM 3400 or 3600.

College of Arts & Sciences Film Studies Production

---

---

## FILM-3660 (3) The Postmodern

Analyzes the cultural and critical practices as well as the thought that defines the postmodern period at the end of twentieth century. Prereq., HUMN 2000 or junior/senior standing. HUMN 3660 and FILM 3660 are the same course. Approved for arts and sciences core curriculum: literature and the arts. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

College of Arts & Sciences Film Studies History

---

---

## FILM-3700 (3) Digital Audio Design

Studies and applies Pro Tools as a post-production audio toolbox. Applied techniques include sound recording, sound editing, field recording, foley, vocal recording and editing, plug-in generated sound creation, MIDI, basic scoring principles, audio sweetening, and audio mixing. Students will be required to complete regular editing assignments in addition to a final soundscape project. Prereq., FILM 2000 or 2300, 2500, and 3400 or 3600. Restricted to BFA majors. Prerequisites: Restricted to Film (FILM or FMST) majors only.

College of Arts & Sciences Film Studies Production

---

---

# FILM-3900 (1-3) Independent Study (Production)

May be repeated up to 6 total credit hours.

FILM

## FILM-3901 (1-3) Independent Study (Critical Study)

May be repeated up to 6 total credit hours.

[College of Arts & Sciences](#) [Film Studies](#) [History](#)

## FILM-3920 (3) Professional Seminar

Learning aspects of professional development in the field of cinema. Through workshops and assignments students will learn of the many opportunities found within all areas of production. Guests will help inform the students of professional options and expectations. Topics will include: crew work, fund raising, marketing festivals, low budget filmmaking, and alternative venues. Students may have an internship concurrently with this course. May be repeated up to 6 total credit hours. Recommended restriction to Film (FILM or FMST) majors only. Prereq., FILM 2500.

[College of Arts & Sciences](#) [Film Studies](#) [Production](#)

## FILM-3940 (1-6) Film Studies Internship

Provides students with professional internship experiences with film, video, new media production companies, governmental agencies, production units, audio recording studios, and new media industries. Students will be responsible for securing their own internship position. May be repeated up to 9 credit hours. Prereqs., must be a BA or BFA film studies major with a CU GPA of at least 2.00, upper-division standing, and a 3.00 GPA as a BA or BFA film studies major. Offered pass/fail only. Prerequisites: Restricted to Film (FILM or FMST) majors only.

[College of Arts & Sciences](#) [Film Studies](#) [Production](#)

---

## FILM-4000 (3) Advanced Digital Postproduction

Through projects, discussions, and screenings, this class explores the advanced practices and aesthetics of computer-based moving-image art editing. Topics include how to edit and manage a postproduction cycle, how to use digital editing systems and capabilities such as compositing, digital audio, and optical effects treatments. Prereqs., FILM 1502, 2000 or 2300, 2500, and 3400 or 3600, or instructor consent. Restricted to BFA FMST majors. Cannot be taken simultaneously with FILM 3400 or 3600. Same as ARTF 5000.

College of Arts & Sciences Film Studies Production

---

## FILM-4001 (3) Screening Race, Class & Gender in the U.S. and the Global Borderland

Engaging with the ways in which racial, class, gender and sexual oppression intersect, this class examines several filmic productions by and about diasporic and subaltern subjects (especially children and women) in the U.S./Mexico borderlands, and the urban ethnic metropolises of the global borderlands. Prereq., ETHN 2001 or equivalent ETHN course. Same as ETHN 4001.

College of Arts & Sciences Film Studies History

---

## FILM-4003 (3) Film and Fiction

Explores similarities and differences between literature and film as narrative arts. Studies several novels, short stories, and plays and films made from them. Examines problems in point of view, manipulation of time, tone, structure, and setting. Same as ARTF/COML 5003.

College of Arts & Sciences Film Studies Topics

---

## FILM-4004 (3) Topics in Film Theory

Provides topic-centered analyses of controversial areas in film theory. Students read extensive materials in the topic area, analyze and summarize arguments as presented in the literature, write "position" papers, and make oral presentations in which they elaborate their own arguments about specific assigned topic, establishing critical dialogue with the primary materials. May be repeated up to 6 total credit hours. Prereq., FILM 3051 or instructor consent. Same as HUMN 4004 and ARTF 5004. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) FILM (FILM or FMST) or Humanities (HUMN) majors only.

College of Arts & Sciences Film Studies Intensive and Small Courses

---

## FILM-4005 (3) Screenwriting Workshop: Short Form

A writing intensive course that focuses on the art of the short form screenplay. Students will complete regular writing exercises, presentations, and several short scripts. May be repeated up to 6 total credit hours. Prereq., FILM 3400 or 3600. BFAs only. Prerequisites: Restricted to sophomore, junior or senior FMST majors only.

College of Arts & Sciences Film Studies Workshops

---

---

## FILM-4010 (1-3) Topics in Film Studies-Production

Prepares students for advanced Film Studies production courses. Subject matter varies each semester. May be repeated up to 9 total credit hours, provided the topics are different. Same as ARTF 5010.

College of Arts & Sciences Film Studies Production

---

## FILM-4013 (3) Film, Photography and Modernism

Provides interdisciplinary study of film, photography, and modernism, focusing on issues such as dystopia, alienation, sexuality, subjectivity, and self-referentiality. Photographs by Stieglitz, Strand, Weston, Evans, Cartier-Bresson, Kertesz, and Moholy-Nagy. Films by Dziga-Vertov, Eisenstein, Resnais, Antonioni, Bergman, Bunuel, and Bertolucci. Prereq., FILM 1502. Recommended prereq., FILM 3051. Same as ARTF 5013.

College of Arts & Sciences Film Studies Topics

---

## FILM-4021 (3) Directing/Acting for the Camera

Offers an intensive workshop that provides students with experience directing dramatic material, acting before a camera, and interpreting or adopting dramatic material for film. No experience in directing or acting required. Attendance, research, and papers required. Recommended prereq., FILM 1502. Same as ARTF 5021.

College of Arts & Sciences Film Studies History

---

## FILM-4023 (3) Topics in International Cinema

Focuses on major international filmmakers who have had a decisive impact on world cinema. Students will learn how directors create their own innovative body of work with specific formal and thematic patterns, and will also learn to place such work within multiple frameworks that will cover film history, theory, aesthetics, philosophy, and social and cultural analysis. May be repeated up to 6 total credit hours provided topics are different. Prereq., FILM 1502. Recommended prereqs., FILM 3051 and 3061. Restricted to FILM, FMST, ARTC majors. Same as ARTF 5023. Prerequisites: Restricted to Film (FILM or FMST) or Fine Arts - Creative Arts (ARTC) majors only.

College of Arts & Sciences Film Studies Topics

---

## FILM-4024 (3) Advanced Research Seminar

Focuses on a specific topic, director, or genre chosen by the professor. Research skills and critical thinking are emphasized. With faculty guidance, students determine individual projects and present them to the class. Class participation is mandatory. Each student submits a thorough and original research paper for a final grade. May be repeated up to 6 total credit hours. Prereq., FILM 1502. Recommended prereqs., FILM 3051, 3061. Same as ARTF 5024.

College of Arts & Sciences Film Studies Intensive and Small Courses

---

## FILM-4030 (3) Visiting Filmmakers Seminar

Examines creative issues in contemporary cinema art. Graduate and advanced undergraduate students explore filmmaking ideas with guest artists within a seminar setting. Filmmakers, videographers and programmers of national and international reputation, with an emphasis on "experimental" practice, interact with graduate and advanced undergraduate students, and discuss their work at seminar meetings, public lectures or events. May be repeated up to 6 total credit hours. Restricted to Film (FILM or FMST), Fine Art -Studio Arts (BASA), or Fine Arts-Creative Arts (ARTC) majors only. Recommended prereqs., FILM 1502 and 4453. Same as ARTF 5030. Prerequisites: Restricted to Film (FILM or FMST), Fine Art -Studio Arts (BASA), or Fine Arts-Creative Arts (ARTC) majors only.

College of Arts & Sciences | Film Studies | Production

---

## FILM-4043 (1-3) Topics in Film Studies-Critical Studies

Prepares students for advanced Film Studies critical studies courses. Subject matter varies each semester. May be repeated up to 9 total credit hours, provided the topics are different. Same as ARTF 5043.

College of Arts & Sciences | Film Studies | Topics

---

## FILM-4105 (3) Advanced Screenwriting

Introduces professional screenwriting, in the form of a creative writing workshop. Admission by portfolio (see film department). Students write scenes and scripts for short films, feature treatments, etc., and are graded on a final portfolio. Prereq., approved writing sample. Recommended prereqs., FILM 3051 and 3061. Same as ARTF 5105.

College of Arts & Sciences | Film Studies | Workshops

---

## FILM-4135 (3) Art and Psychoanalysis

Explores psychoanalytic theory as it relates to our understanding of literature, film, and other arts. After becoming familiar with some essential Freudian notions (repression, narcissism, ego/libido, dreamwork, etc.), students apply these ideas to works by several artists (e.g., Flaubert, James, Kafka, Hoffmann, and Hitchcock). Prereq., HUMN 2000 or junior/senior standing. Approved for arts and sciences core curriculum: literature and the arts.

College of Arts & Sciences | Film Studies | Topics

---

## FILM-4200 (3) Flow Visualization

Explores techniques for the visualization of the physics of fluid flows including seeding with dyes, particles and bubbles, and shadowgraphy and schlieren. Reviews optics and fluid physics, especially atmospheric clouds. Assignments are student-driven, to individuals and mixed teams of grad, undergrad, engineering majors and photography/video majors. Please see <http://flowvis.colorado.edu>. Prereq., MCEN 3021 or equivalent, or significant imaging experience (photography/video). FILM 4200 and

ARTF 5200 are the same course. Same as MCEN 4151/5151.

College of Arts & Sciences Film Studies Graduate Film Courses

---

## FILM-4240 (3) Beginning Video Production

Presents a studio course on basic single camera video production strategies and concepts. Through class screenings, projects, demonstrations, discussions, and readings, students gain an introductory familiarity with camera, lighting, sound, editing and the organization and planning involved in a video project. Explores a basic theoretical understanding of video as an art form and its relationship to television, film, art, history, culture. Prereqs., FILM 2000 and 2500 or instructor consent. Same as ARTS 4246.

College of Arts & Sciences Film Studies Production

---

## FILM-4340 (3) Intermediate Video Production

Continuation of beginning video production. Extends the knowledge of single camera video production strategies and concepts. Expands the concept of montage (editing) and strategies to develop a video project through class screenings, projects, discussions, and readings. Furthers theoretical understanding of video as an art form. Prereq., FILM 4240 or instructor consent. Same as ARTS 4346.

College of Arts & Sciences Film Studies Production

---

## FILM-4440 (3) Advanced Video Production

Continuation of intermediate video production. Explores advanced technical skills to control the quality of the video image in production, postproduction, and distribution. Emphasizes self-motivated independent projects, conceptual realization of advanced student work and basic working knowledge of distribution and life as a media artist. Promotes further theoretical understanding of video as an art form. May be repeated up to 9 total credit hours. Prereq., FILM 4340 or instructor consent. Same as ARTS 4446.

College of Arts & Sciences Film Studies Production

---

## FILM-4453 (3) Elective Affinities: Avant-Garde Film and the Arts

Traces the history and aesthetics of avant-garde/ experimental films in light of similar ideas found in the other arts, particularly painting, poetry, photography and music. Topics covered include Dada and the early avant-garde; surrealism and psychodramas; Brakhage and abstract expressionism; feminist arts and film since the 1980s; the idea of the sublime in painting, music, and film; landscape in painting, photography, and film; post-modernism and the cinema; queer theory, gender/identity politics, and aesthetics of recent films; and specific multiple disciplinary artists such as Andy Warhol, Michael Snow, Helen Levitt, and Gunvor Nelson. Prereq., FILM 1502. Same as ARTF 5453.

College of Arts & Sciences Film Studies Topics

---

## FILM-4500 (3) Cinema Production 2

Advanced exploration of creative cinema production through short production and post-production projects. Course focuses on the tactics and strategies of independent cinema production leading to the completion of a BFA thesis project exploring either documentary, experimental, or narrative genres. May be repeated up to 6 total credit hours. Prereq., FILM 3400, 3515 and 3525. Same as ARTF 5500. Prerequisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) Film (FILM or FMST) majors only.

[College of Arts & Sciences](#) [Film Studies](#) [Production](#)

## FILM-4505 (3) Screenwriting Workshop: Long Form

Creative writing workshop in which students plan and write a feature-length screenplay with emphasis on format, dialogue, characterization, and story. Prereqs., FILM 1502 and 2000.

[College of Arts & Sciences](#) [Film Studies](#) [Workshops](#)

## FILM-4600 (3) Creative Digital Cinematography

Explores creative approaches to single camera digital cinematography through short projects, discussions, and screenings. Relates creative photography and poetic approaches to the digital camera cinema. May be repeated up to 6 total credit hours. Restricted to Film (FILM or FMST) majors only. Prereqs., FILM 2000 or 2300, 2500, and 3400 or 3600, or ARTS 4246 or 5346. Same as ARTF 5600. Prerequisites: Restricted to Film (FILM or FMST) majors only.

FNCE

## FNCE-3010 (3) Corporate Finance

Covers the theory and practices governing the management of capital in a business firm. Examines the determinants of capital requirements, methods of obtaining capital, problems of internal financial management, and methods of financial analysis. Prereqs., BCOR 1020, 2000, and 2200. Prerequisites: Requires pre-requisite courses of BCOR 1020, 2000, & 2200. Restricted to Business Majors with 52-180 units completed.

[Leeds School of Business](#) [Finance](#)

## FNCE-4000 (3) Financial Institutions Management

Analyzes the structure, markets, and regulations of financial institutions. Studies problems and policies of internal management of funds, loan practices and procedures, investment behavior, deposit and capital adequacy, liquidity, and solvency. Prereq., FNCE 3010. Prerequisites: Restricted to Business majors with 52-180 units completed.

[Leeds School of Business](#) [Finance](#)

## FNCE-4030 (3) Investment and Portfolio Management

Develops modern portfolio theory and applies it to pricing both individual assets and portfolios of assets. Topics include Markowitz portfolio selection model, capital asset pricing model, arbitrage pricing theory, options, futures, bonds, portfolio performance measurement, and issues of market efficiency. Prereq., FNCE 3010. Prerequisites: Restricted to Business majors with 52-180 units completed.

[Leeds School of Business](#) [Finance](#)

## FNCE-4040 (3) Derivative Securities

---

Develops the modern theory of contingent claims in a mathematical framework oriented toward applications. Examines how to use derivatives for risk management and to tailor portfolio payoffs. Provides an in-depth analysis of the properties of options. Prereq., FNCE 3010. Prerequisites: Restricted to Business majors with 52-180 units completed.

Leeds School of Business Finance

---

## FNCE-4050 (3) Capital Investment Analysis

Focuses on capital budgeting and investment issues. Emphasizes issues relating to cash flows, capital rationing, the investment versus financing decision, leasing, fluctuating rates of output, investment timing, capital budgeting under uncertainty, and investment decisions with additional information. Prereq., FNCE 3010. Prerequisites: Restricted to Business majors with 52-180 units completed.

Leeds School of Business Finance

---

## FNCE-4060 (1-6) Special Topics in Finance

Presents new subject matter in finance. The summer offering is the London Seminar in International Finance and Business. Prereqs. vary depending upon course offering. See advising office.

Leeds School of Business Finance

---

## FNCE-4070 (3) Financial Markets and Institutions

Examines the economics of financial markets and the management of financial institutions, both domestic and international. Topics include an overview of U.S. and international financial markets, pricing and risk factors, interest rates, markets for securities and financial services, and markets for derivative financial instruments. Prereq., BCOR 2200. Restricted to students with 52 hours completed. Formerly FNCE 3020. Prerequisites: Restricted to Business majors with 52-180 units completed.

Leeds School of Business Finance

---

## FNCE-4820 (3) Topics in Finance

Offered irregularly to provide opportunity for investigation into new frontiers in finance. May be repeated up to 6 total credit hours. Restricted to 52 hours completed. Prerequisites: Restricted to Business majors with 52-180 units completed.

Leeds School of Business Finance

---

## FNCE-4825 (3) Experimental Seminar

Offered irregularly to provide opportunity for investigation of new frontiers in Finance. Restricted to juniors/seniors. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

Leeds School of Business Finance

---

---

## FNCE-4830 (3) Seminar in Investment Banking

Introduces the student to a career in investment banking and provides specific modeling skills necessary and important during the first phase of such a career. Prereq., BCOR 2200. Recommended prereq., FNCE 3010. Restricted to students with 52 hours completed. Prerequisites: Requires pre-requisite course of BCOR 2200. Restricted to Business majors with 52-180 units completed.

Leeds School of Business Finance

---

## FNCE-4831 (3) Seminar in Investment Management

The purpose of this course is for students to understand the investment management profession. The course is designed to be a blend of theory and practice. Extends the basic principles of security analysis, asset pricing theory, portfolio construction, and portfolio performance evaluation. Students will apply these principles in determining, over the semester, how to manage the CU investment fund. Prereqs., BCOR 2000, 2300, and FNCE 3010. Prerequisites: Restricted to Business majors with 52-180 units completed.

Leeds School of Business Finance

---

## FNCE-4832 (3) Microfinance

In the last two decades, microfinance initiatives have provided the primary worldwide impetus to promote economic independence for the poor (1.4 billion). Microfinance seminar links the financial markets with entrepreneurship to create a platform for building a microfinance institution that facilitates financial inclusion to the poor. The students in a semester long project build a hypothetical financial institution that provides access to credit, saving, insurance and more to a segmented poor population, somewhere in the world including the U.S. Restricted to Business majors with 52-180 units completed. CESR 4010 and FNCE 4832 are the same course. Prerequisites: Restricted to Business majors with 52-180 units completed.

Leeds School of Business Finance

---

## FNCE-4850 (3) Business Senior Seminar in Finance

Develops analytical and decision making skills necessary to address real-world business finance situations. Topics include financial analysis and forecasting, capital budgeting, valuation, capital structure policy, international finance, and financial ethics. Uses a combination of lecture and cases; team and individual work. Prereqs., ACCT 3220, FNCE 3010, 4030, and 102 hours completed. Restricted to graduating senior FNCE majors. Formerly BCOR 4002. Prerequisites: Restricted to Finance majors with 102 to 180 units completed.

Leeds School of Business Finance

---

## FNCE-4900 (1-6) Independent Study

Intended only for exceptionally well qualified business seniors. Prereq., prior consent of dean and instructor under whose direction study is taken, and departmental form.

Leeds School of Business Finance

---

---

## FNCE-6820 (1-3) Graduate Seminar

Experimental seminar offered irregularly to provide opportunity for investigation of new frontiers in finance.

Leeds School of Business Finance

---

## FNCE-6900 (1-6) Independent Study

Requires consent of instructor under whose direction study is taken. Departmental form required.

Leeds School of Business Finance

---

## FNCE-6950 (1-6) Master's Thesis

Leeds School of Business Finance

---

## FNCE-7100 (3) Doctoral Seminar: Finance Theory

Develops the foundations for the study of modern financial economics by analyzing individuals' consumption and portfolio decisions in the context of risk and then traces the implications to market valuation of traded securities. Topics include the meaning and measurement of risk, portfolio theory, the Capital Asset Pricing Model, and arbitrage pricing arguments like those employed in Modigliani and Miller's capital structure theory and the Black-Scholes option pricing model. Prerequisites: Restricted to Business Administration graduate students only.

Leeds School of Business Finance

---

## FNCE-7200 (3) Doctoral Seminar: Empirical Research Methods in Finance

Develops an understanding of current empirical methods used to examine research issues related to corporate finance and the capital markets.

Leeds School of Business Finance

---

## FNCE-7330 (3) Doctoral Seminar: Corporate Finance, Theoretical, and Empirical Issues

Develops and examines theories and issues in corporate finance. Topics may include corporate control, capital structure, financial signaling, and payout policy.

## FNCE-7550 (3) Doctoral Seminar: Special Topics in Finance

Closely examines areas of specific interest to academic research in finance. Subjects vary and may include game theory, stochastic processes in finance, continuous-time modeling, derivative security pricing, the microstructure of securities markets and financial institutions, innovation, and engineering.

## FNCE-7800 (3) Doctoral Proseminar: Finance

Provides finance doctoral students with an orientation to the finance field; introduces contemporary research perspectives and priorities. Students discuss papers that illustrate academic researchers' use of various disciplinary theoretical and empirical tools to address finance problems.

## FNCE-7830 (1) Doctoral Seminar: Dissertation Research

Assists doctoral students in integrating courses and fields of study in order to apply their knowledge and skills to problems in finance. Gives special attention to development of thesis topics. Continuous enrollment required of all finance doctoral students while doing course work.

## FNCE-8820 (3) Graduate Seminar

Experimental seminar offered irregularly to provide opportunity for investigation of new frontiers in finance.

## FNCE-8900 (1-3) Independent Study

Instructor consent and departmental form required.

Subject Number

FREN

### FREN-1010 (5) Beginning French 1

For students with no previous knowledge of French. Presents basic grammar and most commonly used French vocabulary. Introduces students to Francophone culture. Credit not granted for this course and FREN 1050.

[College of Arts & Sciences](#) [French & Italian](#) [French](#)

### FREN-1020 (5) Beginning French 2

Continuation of FREN 1010. Completes the presentation of most basic structures and French vocabulary. Prereq., successful completion of one semester of college-level French or two years of high school French. Credit not granted for this course and FREN 1050.

[College of Arts & Sciences](#) [French & Italian](#) [French](#)

### FREN-1050 (5) Beginning French Review

Covers the material of FREN 1010 and 1020 in one accelerated semester. Intended for students who know some French (i.e., four to five semesters in high school) but do not have skills adequate for 2000-level courses. Credit not granted for this course and FREN 1010 or FREN 1020.

[College of Arts & Sciences](#) [French & Italian](#) [French](#)

### FREN-1200 (3) Medieval Epic and Romance

Covers the most important works of medieval literature, in English translation. Among the texts studied are the Nibelungenlied, the Song

of Roland, and Arthurian romances, including the stories of Lancelot and Guinevere and Tristan and Isolde. Offers a general introduction for nonmajors to medieval literature and society. Taught in English. Approved for arts and sciences CORE curriculum: literature and the arts.

College of Arts & Sciences French & Italian French

---

---

## FREN-1400 (3) Medieval/Renaissance Women Writers in Italy and France

Introduces major literature through close readings of women's writings in their historical context. Offers a general introduction to women's status and roles in Italy and France. Taught in English. Same as ITAL 1400. Approved for arts and sciences core curriculum: human diversity.

College of Arts & Sciences French & Italian French

---

---

## FREN-1500 (3) Literature and Politics in the Age of Enlightenment

Introduces political dimensions of 18th century French literature. Surveys political and social preoccupations that manifest themselves across genres (novels, scientific treatises, dialogues, erotic literature, etc.). Examines contributions made by 18th century French writers to the sociological and political imagination of Western tradition. Taught in English.

College of Arts & Sciences French & Italian French

---

---

## FREN-1610 (3) How to Be French, 1: The Ancien Regime

Explores medieval and early modern French culture in the widest sense, encompassing masterpieces of French literature, architecture, and visual art as a key to the habits, customs, and practices of everyday life. Major themes are "living and dying," "heroes, villains, and kings," "courtliness, civility, and the art of love," and "crafty little guys." Approved for arts and sciences core curriculum: literature and the arts.

College of Arts & Sciences French & Italian French

---

---

## FREN-1620 (3) How To Be French? 2: Modernity

Introduces students to French culture in its widest sense and in particular to reflect on major social and cultural contradictions inherited from the French Revolution, which still define "Frenchness" today. Taught in English. Approved for arts and sciences core curriculum: literature and the arts.

College of Arts & Sciences French & Italian French

---

---

## FREN-1700 (3) Francophone Literature in Translation

Studies the literary expression of French-speaking peoples of Africa, the Caribbean, and Canada. Gives special attention to oral tradition, identity, question, and cultural conflict. Taught in English.

College of Arts & Sciences French & Italian French

---

## FREN-1750 (3) French Colonialism: North Africa and the Middle East

Offers a general introduction to French and Francophone literature and visual arts (painting, photography, film) from the nineteenth century to the present depicting cultures and societies of the Middle East and North Africa. In English with English translations of French texts. Approved for arts and sciences core curriculum: human diversity.

College of Arts & Sciences French & Italian French

---

## FREN-1800 (3) Contemporary French Literature in Translation

Reviews the major philosophical, political, and aesthetic issues in the 20th century French novel and drama. Beginning with existentialist literature, discussion focuses subsequently on the Theatre of the Absurd, the new novel, World War II and the Holocaust, and recent women writers. Taught in English.

College of Arts & Sciences French & Italian French

---

## FREN-1900 (3) Modern Paris in Literature, Photographs, Paintings and Movies

Introduces the rise of modern Paris from the French Revolution (1789) to today. Studies the physical and sociological changes of the city in terms of architecture and industrialization through French literature, movies, paintings and photographs. Addresses problems due to the magnitude of the city, the growing fear of urban vices, and the dilemma of controlling massive urban populations. Taught in English. Approved for arts and sciences CORE curriculum: literature and the arts.

College of Arts & Sciences French & Italian French

---

## FREN-2110 (3) Second-Year French Grammar Review and Reading 1

A film based curriculum will expand the knowledge of francophone culture and will continue the development of communication skills begun in the first year. This third semester course will review essential beginning grammar before introducing intermediate structures, vocabulary, and cultural/literary readings. Prereqs., FREN 1020 and 1050 (min grade C-) or equivalent. Meets MAPS requirement for foreign language. Satisfies arts and sciences foreign language requirement.

College of Arts & Sciences French & Italian French

---

---

## FREN-2120 (3) Second-Year French Grammar Review and Reading 2

Completes the film-based study of intermediate grammar begun in FREN 2110. Continued reading in French literature and culture, with considerable practice in writing and speaking French. Prereq., FREN 2110 (min grade C-). Fulfills the Graduate School language requirement for the Ph.D.

College of Arts & Sciences French & Italian French

---

## FREN-2500 (3) Conversation in French

Puts into practice all that has been learned in the first four semesters of college French. Builds conversational skills and confidence through acquisition of new vocabulary and a review of grammar essential to discussing different aspects of French culture. All work is in French. Prereq., FREN 2120 or equivalent.

College of Arts & Sciences French & Italian French

---

## FREN-3010 (3) French Phonetics and Pronunciation

Improves students' ability to pronounce French correctly. Coursework involves the International Phonetic Alphabet, understanding the differences between pairs of sounds, and recognizing the relationship between spelling and pronunciation. Required of all FREN majors. Prereq., FREN 2120 or equivalent.

College of Arts & Sciences French & Italian French

---

## FREN-3020 (3) French Phonetics Through Musical Performance

Advanced oral practice and interpretation of a French Musical. This course of applied and corrective phonetics concentrates on developing good pronunciation and fluency through song. The course culminates with a public presentation of the musical studied in class. Prereq., FREN 3010 or equivalent and instructor consent. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences French & Italian French

---

## FREN-3050 (3) French Composition 1

French third-year level composition course. Students practice and write different forms of formal French writing. They also hone their grammar skills and analytical reading of short literature pieces. Must be taken before FREN 3060. Required for French majors. Prereq., FREN 2120 or equivalent.

College of Arts & Sciences French & Italian French

---

---

## FREN-3060 (3) French Composition 2

The second semester of a French third-year level composition course. Students build on their previous knowledge of formal writing in French and more emphasis is given to argumentative and analytical style of writing in FREN 3060. Prereq., FREN 3050 or equivalent. Required for French majors.

College of Arts & Sciences French & Italian French

---

## FREN-3100 (3) Introduction to Critical Reading and Writing in French Literature

Study of French literature through close readings of representative examples of major literary forms (poetry, fiction, drama, essay) and through the composition of critical writings in French. Required for French majors. Prereq., FREN 3060. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences French & Italian French

---

## FREN-3110 (3) Main Currents of French Literature 1

Surveys French literature from the Middle Ages through the 18th century. Students are expected to acquire a fairly detailed knowledge of principal writers and schools of the periods covered. Required for majors. Prereq., FREN 3100. May be taken with FREN 3120. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences French & Italian French

---

## FREN-3120 (3) Main Currents of French Literature 2

Surveys 19th and 20th century French literature. Close reading of selected texts of the principal writers and schools. Required for majors. Prereq., FREN 3100. May be taken before, after, or with FREN 3110. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences French & Italian French

---

## FREN-3200 (3) Introduction to Literary Theory and Advanced Critical Analysis

Introduces important aspects of both classical and modern literary theory as an aid to reading and understanding literary texts. Covers theoretical works by figures ranging from Plato and Aristotle to modern French critics such as Barthes, Foucault, and Derrida in conjunction with selected literary works. Offers students more sophisticated means of understanding issues like gender, ethnicity, the roles of both author and reader in constructing meaning, the nature and functions of signs, and the relationship between literature and the larger society. Conducted in English, though French majors are required to read the texts in the original language. Required for students taking honors in French or Italian. Prereq., FREN 3100 or instructor consent. Approved for arts and sciences core curriculum: literature and the arts.

## FREN-3500 (3) French Current Events: Conversation and Composition

For students who have spent fewer than four months in a French-speaking environment. Focuses on presentations, debates, discussions, readings, and written work. Prereq., FREN 3060 or equivalent.

## FREN-3600 (3) Business French 1

Gives students the tools needed to function in a French-speaking work environment. A culminating project involves creating a business in a francophone country. Prereq., FREN 2120 or equivalent.

### FREN-3700 (3) French-American Cultural Differences

Through readings, films, discussion, and activities, students learn the defining values of their own country, those of France, and key differences between the two cultures. Taught in French. Prereq., FREN 3060 or equivalent.

[College of Arts & Sciences](#) [French & Italian](#) [French](#)

### FREN-3800 (3) France and the Muslim World

Introduces students to the polemic colonial, social, and cultural interactions of France and Islam. Close attention will be paid to paradigms of identities of one of the major European nations and the Islamic world. Readings and discussion topics for this course cover the social, cultural, and literary depictions of Islamic and French interactions, negotiations, and contradictions. Taught in English. Restricted to juniors and seniors. Cannot be used for French major or minor credit. Approved for arts and sciences core curriculum: human diversity.

[College of Arts & Sciences](#) [French & Italian](#) [French](#)

### FREN-4030 (3) Advanced Oral Practice and Interpreting

Concentrates on developing (or preserving) speaking fluency, correct pronunciation, and a good working vocabulary. May be repeated once for credit. Prereq., FREN 3060 and/or 3500, or instructor consent.

[College of Arts & Sciences](#) [French & Italian](#) [French](#)

### FREN-4110 (3) French Special Topics

Topics vary each semester. Consult the online Schedule Planner for specific topics. See also FREN 4120.

College of Arts & Sciences French & Italian French

## FREN-4120 (3) French Special Topics

Topics vary each semester. Consult the online Schedule Planner for specific topics. See also FREN 4110.

College of Arts & Sciences French & Italian French

## FREN-4170 (3) Francophone Literature

Studies the literary expression of French-speaking peoples of Africa, the Caribbean, and French Canada. Gives special attention to oral tradition, identity question, and cultural conflict. Prereqs., FREN 3100, 3110, and 3120, or instructor consent. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences French & Italian French

## FREN-4200 (3) Studies in Contemporary French Culture

Through a wide variety of texts and audio-visual documents, students learn the structures of contemporary French society and study the cultural phenomena of that society. Prereqs., FREN 3050 and 3060.

College of Arts & Sciences French & Italian French

## FREN-4250 (3) Medieval and Renaissance Readings

Explores the complex and evolving cultural and historical contexts of medieval and Renaissance French. Introduces the masterpieces of French medieval and Renaissance literature, including the Chanson de Roland and Arthurian romance. Also focuses on the work of Marie de France, Guillaume de Lorris, and Jean de Meun, Christine de Pisan, Machaut, Villon, Louise Labe, and the poets of the Pliade, Rabelais, and Montaigne. Prereqs., FREN 3100, 3110, and 3120 or instructor consent.

College of Arts & Sciences French & Italian French

## FREN-4300 (3) Theatre and Modernity in 17th Century France

Readings of plays by Corneille, Moliere, and Racine introduce students to theatre's role as a mirror of the multifarious tensions shaping modern Western experience. Taught in English with English translations. Approved for arts and sciences CORE curriculum: literature and the arts.

College of Arts & Sciences French & Italian French

College of Arts & Sciences French & Italian French

---

## FREN-4330 (3) Moliere and 17th Century French Comedy

Close readings of farces and comedies of Moliere in context with selected comedies by Corneille, Rotrou, and Cyrano de Bergerac and selected satires by Boileau and La Fontaine. Themes include comedy as a form of social criticism and the sociocultural significance of such episodes of Moliere's career as the scandalous quarrels of L'ecole des Femmes and Tartuffe. Prereqs., FREN 3100, 3110, and 3120 or instructor consent.

College of Arts & Sciences French & Italian French

---

## FREN-4350 (3) French Enlightenment

Studies fiction, essays, theatre, and philosophical tales. Emphasizes the Enlightenment in France through the texts of its major representatives: Montesquieu, Voltaire, Marivaux, Diderot, and Rousseau. Prereqs., FREN 3100, 3110, and 3120, or instructor consent.

College of Arts & Sciences French & Italian French

---

## FREN-4360 (3) Survey of 18th Century French Literature

Close readings of texts by Voltaire, Rousseau, Diderot, Marivaux, and Beaumarchais. Focuses on the evolution of literary genres and the influence of philosophy, politics, and social change on belles lettres. Prereqs., FREN 3100, 3110, and 3120, or instructor consent.

College of Arts & Sciences French & Italian French

---

## FREN-4430 (3) Survey of 19th Century French Literature

Examines fiction, poetry, and theatre in 19th century France. Focuses on developing and changing literary styles and subject matter throughout the century in historical, philosophical, and social context. Prereqs., FREN 3100, 3110, and 3120, or instructor consent. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences French & Italian French

---

## FREN-4470 (3) 20th Century French Theatre and Poetry

Close readings of plays from the turn of the century to the contemporary period introduce the principal themes and techniques of modernist and postmodernist French theatre. Students are encouraged to consider problems commonly evoked by these texts, and to compare the positions that each text takes on such problems as the status and uses of language, the function and limits of the theatre, and the dialectic of appearance and reality. Prereqs., FREN 3100, 3110, and 3120, or instructor consent.

College of Arts & Sciences French & Italian French

---

---

## FREN-4480 (3) 20th Century French Novel

Close readings of novels from the 1930s to the contemporary period introduce the principal themes and techniques of the modernist and postmodernist French novel. Students are encouraged to analyze a variety of questions commonly evoked in these texts, such as the problem of representation, the uses and abuses of writing, the relation of fiction and history, and the status of the subject in the world. Prereqs., FREN 3100, 3110, and 3120 or instructor consent.

College of Arts & Sciences French & Italian French

---

## FREN-4600 (3) Topics in French Film

Covers various topics in the French and some other Francophone cinemas (Belgian, Swiss, Quebecois) from 1895 to the present. Focuses on periods, schools, themes, and directors from Melies to Duras, and the critical approaches by which they are studied. Varies from year to year. May be repeated up to 6 total credit hours on different topics. Prereqs., junior standing and 6 hours in French literature, other literature, or film studies.

College of Arts & Sciences French & Italian French

---

## FREN-4750 (3) Methods of Teaching French and Professional Orientation

Presents current methodology and techniques for teaching foreign language for proficiency. Areas of study include ACTFLFL guidelines, National Standards, assessment, classroom activities, curriculum, and syllabus design. Prereqs., FREN 3100, 3110 or 3120, an additional course above FREN 3060, and admission to the teacher certification program or instructor consent. Restricted to juniors/seniors.

College of Arts & Sciences French & Italian French

---

## FREN-4800 (3) Postmodernist French Novel in Translation

Focuses upon recent innovations in the French novel, and upon the postmodernist literary aesthetic. Students will examine a variety of avant-garde novels, and analyze the kinds of literary experimentation that those novels propose. They will be asked to consider a series of questions concerning the changing nature of literary representation and the status of the novel as a cultural form. Taught in English. Restricted to juniors/seniors. Cannot be used for major or minor credit. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

College of Arts & Sciences French & Italian French

---

## FREN-4840 (1-6) Independent Study: Language

Upon consultation only and at the undergraduate level. May be repeated up to 7 total credit hours.

---

## FREN-4860 (3) War, Trauma, and Memory: Amnesias, Revisions, and Representations of Traumatic History

Attempts to investigate how extreme historical events (war, genocides, terror attacks) function as "Trauma" and how these extreme events are dealt with by personal and collective memory in historical narratives, literary and cinematic fiction, and memorials. Amnesia and other types of historical negations or revisions will be analyzed, along with representations of trauma and the difficulties raised by this memorializing. Taught in English. Restricted to juniors/seniors. Cannot be used for major or minor credit. Approved for arts and sciences CORE curriculum: ideals and values.

## FREN-4960 (6) High School French Teaching

Offered as part of the supervised student teaching in a secondary school required for state certification to teach French. These hours do not count toward student hours in the major nor in the maximum departmental hours allowed. Prereq., FREN 4750 or 5770 and admission to the secondary teaching education program. Coreq., EDUC 4712. Pass/fail only. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

## FREN-4980 (3) French Senior Honors Thesis

The senior honor thesis is a 40 to 45 page original research paper, written in French, and constitutes a requirement for graduating with departmental honors. Prereqs., all third-year course requirements including FREN 3200. Recommended prereq., at least one course numbered FREN 4100 or above.

## FREN-4990 (3) Senior Seminar

Preparation of a 15-page research paper in French presented to two members of the department faculty and defended orally in class. Prereq., all third-year requirements and advisor consent. Recommended prereq., at least one course numbered FREN 4100 or above.

## FREN-5110 (3) French Special Topics

Different topics are offered and, in a number of cases, cross-listed with other departments. Prereq., graduate standing or instructor consent. May be repeated up to 6 total credit hours on different topics. Prerequisites: Restricted to Graduate Students only.

---

## FREN-5120 (3) French Special Topics

Different topics are offered and, in a number of cases, cross-listed with other departments. Prereq., graduate standing or instructor consent. May be repeated up to 6 total credit hours on different topics.

### FREN-5170 (3) Francophone African Literature

Prereq., graduate standing or instructor consent.

[College of Arts & Sciences](#) [French & Italian](#) [French](#)

### FREN-5250 (3) Medieval and Renaissance Readings

Through close readings of masterpieces of French medieval and Renaissance literature in conjunction with contemporary criticism and theory, explores the contexts of medieval and Renaissance France. Readings in French. May be taught in English to accommodate students in other programs. May be repeated up to 12 total credit hours on different topics. Prereq., graduate standing or instructor consent. Prerequisites: Restricted to Graduate Students only.

[College of Arts & Sciences](#) [French & Italian](#) [French](#)

### FREN-5310 (3) 17th Century French Tragedy and Poetry

Close readings of tragedies by (among others) Corneille and Racine, placed in the context of baroque and neoclassical political and artistic culture as illustrated by philosophy, painting, and science. Drawing on recent criticism and theory, explores heroic drama's role as a symptom and agent of early modern French social and intellectual history. Readings in French, but may be taught in English. Prereq., graduate standing or instructor consent.

[College of Arts & Sciences](#) [French & Italian](#) [French](#)

### FREN-5320 (3) 17th Century French Prose

---

Close readings of major works by, e.g., Descartes, Pascal, La Fayette, La Rochefoucauld, and La Bruyere. Themes include 17th century theories of self, early modern epistemology, notions of honnetete and the critical analysis of human motives and behavior, the emerging novel, and the critique of heroic idealism and of the monarchic absolutism of the Sun King, Louis XIV. Readings in French, but may be taught in English. Prereq., graduate standing or instructor consent.

College of Arts & Sciences French & Italian French

---

## FREN-5330 (3) Moliere and 17th Century French Comedy

Close readings of the comedies in context with the works of, e.g., Corneille, Rotrou, Cyrano, Boileau, and La Fontaine. Themes include Moliere and the institution of literary authorship, comedy's role as social critique, the deconstruction of the early modern subject, and the cultural politics of the scandals surrounding L'ecole des femmes and Tartuffe. Readings in French, but may be taught in English. Prereq., graduate standing or instructor consent.

College of Arts & Sciences French & Italian French

---

## FREN-5350 (3) French Enlightenment

Focuses on the uses of literature to address the revolutionary philosophical, scientific, religious, and/or sociopolitical questions of the day. Explores Diderot and d'alembert's Encyclopedie, Voltaire and Diderot's philosophical tales and dialogues, Rousseau's Discours, and other writings. Discusses the development of specific literary forms to promote the ideas and goals of the philosophers to reach a changing and diverse readership and to fight censorship. Prereq., graduate standing or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences French & Italian French

---

## FREN-5360 (3) 18th Century French Literature

Focuses on the study of a specific literary genre (e.g., theatre, the novel) or on the global production of a major author (e.g., Voltaire, Diderot, Rousseau). Discussion stresses both the uniqueness of the genre/writer and their significance as representatives of the century's changing society and culture. May be repeated up to 6 total credit hours during a student's graduate career. Prereq., graduate standing or instructor consent.

College of Arts & Sciences French & Italian French

---

## FREN-5420 (3) 19th Century French Literature

A survey of principal works and movements, intended as an introductory course. Prereq., graduate standing or instructor consent.

College of Arts & Sciences French & Italian French

---

## FREN-5430 (3) Topics in 19th Century French Prose, Poetry, and Theatre

Topics vary. May be repeated up to 6 total credit hours. Prereq., graduate standing or instructor consent.

College of Arts & Sciences French & Italian French

---

---

## FREN-5440 (3) Literary Ludics

Taught in French and English. Focuses on literary structures proposed by author to reader as games. Considers critical texts, both practical and theoretical, with a view toward defining the relation between criticism and its objects. Prereq., graduate standing or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences French & Italian French

---

---

## FREN-5470 (3) 20th Century French Theatre and Poetry

Prereq., graduate standing or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences French & Italian French

---

---

## FREN-5770 (2) College Foreign Language Teaching

Required for teaching assistants and graduate part-time instructors. Prereq., graduate standing or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences French & Italian French

---

---

## FREN-6840 (1-3) Independent Study

May be repeated up to 3 total credit hours, except with permission of the director of graduate studies. Prereq., graduate standing or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences French & Italian French

---

---

## FREN-8990 (1-10) Doctoral Dissertation

All doctoral students must register for no fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences French & Italian French

FRSI

## FRSI-1010 (5) Beginning Farsi I

Provides a grounding in basic Persian Farsi grammar. The morphological and phonological nuances of the language will be introduced, along with Persian culture. Basic conversation is re-enforced on a daily basis with strong emphasis and reiteration upon the homework and covered grammar.

[College of Arts & Sciences](#) [Arts & Sciences Special Courses](#) [Farsi](#)

## FRSI-1011 (3) Introduction to Persian Civilization

An introduction to the history, literature and art of Iranian (Persian) civilization with a focus on the social and cultural aspects of contemporary Iran. Taught in English.

[College of Arts & Sciences](#) [Arts & Sciences Special Courses](#) [Farsi](#)

## FRSI-1020 (5) Beginning Farsi II

Continuation of FRSI 1010. Completes the presentation of basic structures of Farsi. Continued acquisition of vocabulary and practice of speaking, listening, reading, and writing. Class conducted largely in Farsi. The second half of the course will introduce authentic texts of Persian prose literature. Some poetry may be included. Prereq., FRSI 1010 (min. grade C) or instructor consent required.

[College of Arts & Sciences](#) [Arts & Sciences Special Courses](#) [Farsi](#)

## FRSI-2110 (4) Intermediate Farsi I

Provides an intensive introduction to cultural and literary texts of Iran, along with an introduction of the grammatical and rhetorical complexities of Persian prose and poetry. Students continue to develop speaking, listening, and writing skills through activities based on the readings. Prereq., FRSI 1020 (min. grade C) or instructor consent required. Meets MAPS requirement: foreign language. Approved for arts and sciences core curriculum: foreign language. Formerly FRSI 2010.

[College of Arts & Sciences](#) [Arts & Sciences Special Courses](#) [Farsi](#)

## FRSI-2120 (4) Intermediate Farsi II

Continuation of FRSI 2010. Incorporates more readings in Persian literature, both poetry and prose, and cultural readings. Students continue developing speaking, listening and writing skills based on the readings. Prereq., FRSI 2010 (min. grade C) or instructor consent required. Formerly FRSI 2020.

[College of Arts & Sciences](#) [Arts & Sciences Special Courses](#) [Farsi](#)

## FRSI-3110 (3) Advanced Farsi I

An intensive introduction to both Persian philology and the contemporary novel. Textual analysis of texts ranging from complex to very complex will enable the students to gain a strong grounding in Persian literary texts. Students continue developing speaking, listening, and writing skills through activities based on the readings. Prereq., FRSI 2020 (min. grade C). Formerly FRSI 3010.

[College of Arts & Sciences](#) [Arts & Sciences Special Courses](#) [Farsi](#)

## FRSI-3120 (3) Advanced Farsi II

This course is the continuation of Farsi 3010. The focus will be on textual analysis and discussion of authentic texts in a wide variety of genres and a wide range of topics. Students continue developing speaking and listening skills through activities based on the readings and develop the ability to write short papers (3-5 pages) in Farsi. Prereq., FRSI 3010 (min. grade C). Formerly FRSI 3120.

[College of Arts & Sciences](#) [Arts & Sciences Special Courses](#) [Farsi](#)

GEEN

## GEEN-1100 (3) Social Impact of Technology

Introduces undergraduate students to the social impact of technology and how technology impacts all aspects of life, the health of planet Earth, and how people interact with each other. Fulfills Engineering social science requirements. Prerequisites: Restricted to students with 0-56 (Freshmen or Sophomore) College of Engineering majors only.

[College of Engineering & Applied Science](#) | [Engineering Administration](#)

## GEEN-1235 (4) Pre-Calculus for Engineers

Prepares students for the challenging content and pace of the calculus sequence required for all engineering majors. The course covers algebra, trigonometry and selected topics in analytical geometry. It prepares students for the calculus courses offered for engineering students. It requires students to engage in rigorous work sessions as they review topics that they must be comfortable with to pursue engineering course work. The course is structured to accustom students to the pace and culture of learning encountered in engineering math courses.

[College of Engineering & Applied Science](#) | [Engineering Administration](#)

## GEEN-1300 (3) Introduction to Engineering Computing

Introduces the use of computers in engineering problem solving, including elementary numerical methods. Teaches programming fundamentals, including data and algorithm structure, and modular programming. Software vehicles include Excel/Vba and Matlab. Coreq., APPM 1350 or equivalent. Restricted to ENGR majors. Prerequisites: Restricted to College of Engineering majors only.

[College of Engineering & Applied Science](#) | [Engineering Administration](#)

---

## GEEN-1350 (1) Calculus 1 Work Group

Provides problem-solving assistance to students enrolled in APPM 1350. Student groups work in collaborative learning environment. Student participation is essential. Grading under pass/fail option only. Coreq., APPM 1350.

College of Engineering & Applied Science | Engineering Administration

---

## GEEN-1360 (1) Calculus 2 Work Group

Provides problem solving assistance for students enrolled in APPM 1360. Conducted in a collaborative learning environment. Student work groups solve calculus problems with assistance of facilitator. Grading under pass/fail option only. Prereq., APPM 1350. Coreq., APPM 1360.

College of Engineering & Applied Science | Engineering Administration

---

## GEEN-1400 (3) Engineering Projects

First-year engineering students work to solve real engineering design problems in interdisciplinary teams. Completed projects are exhibited at an end-of-semester design expo. In lieu of a textbook (available online), each student is expected to contribute up to \$75 towards their design project and poster, and purchase his/her own pair of safety glasses. Restricted to Engineering majors with 75 or fewer cumulative hours. Prerequisites: Restricted to College of Engineering majors with 75 or less cumulative hours.

College of Engineering & Applied Science | Engineering Administration

---

## GEEN-1410 (3) Social Innovation and Design for Sustainable Communities

Learn to apply principles of sustainability to designs. Student teams design solutions to real-world problems, integrating scientific and social science perspectives. Emphasis is on the social, economic, cultural, and political context shaping the effectiveness of technical solutions. Restricted to students in the Williams Village North RAPs. Prerequisites: Restricted to Sustainable by Design Residential Academic Program (PSBD) or SEEDS Residential Academic Program (PSEE) students only.

College of Engineering & Applied Science | Engineering Administration

---

## GEEN-1500 (2) Introduction to Engineering

Provides an introduction to the engineering profession, to include a focus on the engineering grand challenges of the future, professional and ethical expectations, and an examination of current disciplines specializations. Provides sufficient knowledge of the engineering disciplines necessary to make an informed major choice. Restricted to Engineering Majors with 75 or less cumulative hours. Prerequisites: Restricted to College of Engineering majors with 75 or less cumulative hours.

College of Engineering & Applied Science | Engineering Administration

---

## GEEN-1510 (1) Self Management and Leadership Principles 1

---

Develops group cohesiveness, mutual support, multicultural awareness, and leadership skills. Topics include collaborative learning, motivation, time management and study skills, personal assertiveness, and career awareness. Open to new freshmen and transfer students. Controlled enrollment. Fulfills one credit hour of the Engineering social science requirement. Prerequisites: Restricted to College of Engineering majors only.

College of Engineering & Applied Science | Engineering Administration

---

## GEEN-1520 (1) Self Management and Leadership Principles 2

Continuation of GEEN 1510. Controlled enrollment. Prereq., GEEN 1510. Prerequisites: Restricted to College of Engineering majors only.

College of Engineering & Applied Science | Engineering Administration

---

## GEEN-1550 (1) YOU'RE@CU: Undergraduate Career Seminar

Exposes first or second year undergraduate students to engineering research careers through a partner program (YOU'RE@CU), panel discussions with researchers in academics and industry, and exposure to research labs. Restricted to YOU'RE@CU participants. Restricted enrollment; offered pass/fail only.

College of Engineering & Applied Science | Engineering Administration

---

## GEEN-2050 (3) Engineering Leadership Gateway

Examines concepts of engineering leadership and the essential skills required to become an effective leader. Together students will explore leadership principles, creative and critical thinking, interpersonal skills (e.g. collaboration, conflict resolution, leading in diverse communities), intrapersonal development (e.g. self-appraisal, reflective practice, personal leadership philosophy), organizational competencies (e.g. planning, sustainability, climate), effective communication and ethical decision-making. Instructor consent required. Prerequisites: Restricted to College of Engineering majors only.

College of Engineering & Applied Science | Engineering Administration

---

## GEEN-2350 (1) Calculus 3 Work Group

Provides problem solving assistance to students enrolled in APPM 2350. This course is conducted in a collaborative learning environment. Student work groups solve calculus problems with the assistance of a facilitator. Grading only under pass/fail option. Prereq., APPM 1360. Coreq., APPM 2350.

College of Engineering & Applied Science | Engineering Administration

---

## GEEN-3400 (3) Invention and Innovation

Introduction to invention and product innovation with a hands-on approach. Students explore the invention process, hone their engineering design skills, and explore entrepreneurship (patenting, intellectual property, marketing, raising capital). Student teams design,

---

create, and test a potentially commercial product, and exhibit at an end-of-semester design expo. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

College of Engineering & Applied Science | Engineering Administration

---

## GEEN-3851 (3) Statics for Engineers

Examines vector treatment of force systems and their resultants; equilibrium of frames and machines, including internal forces and three-dimensional configurations; static friction; properties of surfaces, including first and second moments; hydrostatics; and minimum potential energy and stability. Prereq., PHYS 1110. Recommended coreq., APPM 2350. Same as CVEN 2121.

College of Engineering & Applied Science | Engineering Administration

---

## GEEN-3852 (3) Thermodynamics for Engineers

Explores fundamental concepts and basic theory, including first and second laws of thermodynamics, properties, states, thermodynamic functions and cycles. Prereq., APPM 2350. Same as MCEN 3012.

College of Engineering & Applied Science | Engineering Administration

---

## GEEN-3853 (3) Fluid Mechanics for Engineers

Introduces fluid mechanics and momentum transfer, emphasizing the application of these principles to engineering systems. Prereqs., APPM 2350 or 2360, and GEEN 1300 or CSCI 1300. Same as CHEN 3200.

College of Engineering & Applied Science | Engineering Administration

---

## GEEN-3930 (6) Engineering Co-op

Students enrolled in this course participate in a previously arranged, department-sponsored cooperative education program with a university, government agency, or industry. This course is offered only through Continuing Education and may be repeated up to 24 credit hours (four co-op terms). GPA higher than 2.75 is required. GPA higher than 3.00 is strongly recommended.

College of Engineering & Applied Science | Engineering Administration

---

## GEEN-4830 (3) Special Topics

May be repeated up to 6 total credit hours. Restricted to engineering students.

College of Engineering & Applied Science | Engineering Administration

---

**Subject    Number**

GEOG

## GEOG-1001 (4) Environmental Systems 1---Climate and Vegetation

MLect. and lab. Introduces the atmospheric environment of the Earth: elements and controls of climate and their implications for hydrology, vegetation, and soils. Emphasizes distribution of physical features across the Earth's surface and interactions between humans and their environment, especially those leading to global change on the decade to century time scale. Meets MAPS requirement for natural science: nonlab or lab. Approved for arts and sciences CORE curriculum: natural science.

[College of Arts & Sciences](#) [Geography](#) [Physical Geography](#)

## GEOG-1011 (4) Environmental Systems 2---Landscapes and Water

MLect. and lab. Introduces landscapes and flowing water, emphasizing the formation and geographic distribution of mountains, volcanoes, valleys, and deserts, and their shaping by rivers and glaciers. Includes field trips. Meets MAPS requirement for natural science: nonlab or lab. Approved for arts and sciences CORE curriculum: natural science.

[College of Arts & Sciences](#) [Geography](#) [Physical Geography](#)

## GEOG-1982 (3) World Regional Geography

Involves an intellectual journey around the globe, stopping at major regions to study the people, their environments, and how they interact. Topics include the political/economic tensions in changing Europe, conflicts in Brazilian rain forests, transitions facing African peoples, and rapid changes in China. Meets MAPS requirement for social science: geography.

[College of Arts & Sciences](#) [Geography](#) [Human and Cultural Geography](#)

---

## GEOG-1992 (3) Human Geographies

Examines social, political, economic, and cultural processes creating the geographical worlds in which we live, and how these spatial relationships shape our everyday lives. Studies urban growth, geopolitics, agricultural development and change, economic growth and decline, population dynamics, and migration exploring both how these processes work at global scale as well as shape geographies of particular places. Meets MAPS requirement for social science: geography.

College of Arts & Sciences | Geography | Human and Cultural Geography

---

---

## GEOG-2002 (3) Geographies of Global Change

Familiarizes students with spatial and ecological perspectives on economic, political, social, cultural, and environmental changes. Examines roles of transnational corporations, global media, world cities, food security, labor, migration, human rights, ethnicity, nationalism, resources, environmental degradation, and sustainable development in global change. Meets MAPS requirement for social science: geography.

College of Arts & Sciences | Geography | Human and Cultural Geography

---

---

## GEOG-2053 (4) Mapping a Changing World

Overviews the vital role cartography plays in modern society and contemporary science. Includes fundamentals of reading and creating maps for research and enjoyment. Lab provides hands-on experience with computer-based methods for creating useful maps.

College of Arts & Sciences | Geography | Techniques (Skills)

---

---

## GEOG-2412 (3) Environment and Culture

Examines nature-culture interactions and the effects of development and resource use on environmental quality, as well as practical efforts to manage and protect the environment. Meets MAPS requirement for social science: geography.

College of Arts & Sciences | Geography | Human and Cultural Geography

---

---

## GEOG-3023 (4) Statistics for Geography

Introduces parametric and distribution-free statistics, emphasizing applications to earth science problems. Not open to students who have taken a college-level statistics course. Same as GEOL 3023. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) Environmental Conservation (EVOC), Geography (GEOG), Geology (GEOL) or Environmental Studies (ENVS) majors only.

College of Arts & Sciences | Geography | Techniques (Skills)

---

---

## GEOG-3053 (4) Cartography: Visualization and Information Design

Introduction to the fundamentals of cartography--the science and art of map design. Emphasis on map projections, symbolization, and the design of maps with computers. Students produce series of thematic maps with modern computer-assisted techniques. Basic familiarity with computers strongly recommended. Introductory course in statistics recommended (may be taken concurrently). Restricted to junior or senior GEOG/ENVS majors. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) Environmental Studies (ENVS) or Geography (GEOG) majors only.

College of Arts & Sciences | Geography | Techniques (Skills)

---

---

## GEOG-3251 (3) Mountain Geography

Surveys mountain environments and their human use with illustrations from temperate and tropical mountain areas.

College of Arts & Sciences | Geography | Physical Geography

---

---

## GEOG-3301 (3) Analysis of Climate and Weather Observations

Prereqs., ATOC 1050 and 1060, or GEOG 3601/ATOC 3600/ENVS 3600, or GEOG 1001 and 1-semester calculus. Same as ATOC 3300. Approved for arts and sciences CORE curriculum: natural science.

College of Arts & Sciences | Geography | Physical Geography

---

---

## GEOG-3351 (3) Biogeography

Surveys and analyzes plant and animal distributions on a world scale from ecological and historical perspectives. Emphasizes human impact on species. Prereq., GEOG 1001.

College of Arts & Sciences | Geography | Physical Geography

---

---

## GEOG-3402 (3) Natural Hazards

Explores the impacts of extreme geophysical events on human society. Emphasizes adaptations to extreme events and ways of reducing vulnerability and damage.

College of Arts & Sciences | Geography | Human and Cultural Geography

---

---

## GEOG-3412 (3) Conservation Practice and Resource Management

Studies inventory, policy, and management of natural resources. Emphasizes practical approaches to the conservation and management of soil, land, water, and air resources. Restricted to geography and environmental studies majors.

---

College of Arts & Sciences | Geography | Human and Cultural Geography

---

## GEOG-3422 (3) Conservation Thought

Lect. and rec. Provides an historical survey of human consumption of earthly materials; environmental and global considerations of population growth, cultural attitude, and technological development; and diverse goals and philosophy of conservation movements intimate and place.

---

College of Arts & Sciences | Geography | Human and Cultural Geography

---

## GEOG-3511 (4) Introduction to Hydrology

Examines hydrologic processes in the surface environment, emphasizing the environment of the western United States. Emphasizes natural processes and their management to augment water resources. Prereq., GEOG 1001 and 1011. Approved for arts and sciences core curriculum: natural science. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) Geography (GEOG), Environmental Studies (ENVS) or Ecology and Evolutionary Biology (EBIO) majors only.

---

College of Arts & Sciences | Geography | Physical Geography

---

## GEOG-3601 (3) Principles of Climate

Describes the basic components of the climate system: the atmosphere, ocean, cryosphere, and lithosphere. Investigates the basic physical processes that determine climate and link the components of the climate system, including the hydrological cycle and its role in climate, climate stability, and global change. Covers forecasting climate, its applications, and human dimensions. Restricted to Geography or Environmental Studies majors only. Prereqs., ATOC 1050 and 1060, or GEOG 3301/ATOC 3300, or GEOG 1001 and 1-semester calculus. Same as ATOC/ENVS 3600. Approved for arts and sciences core curriculum: natural science. Prerequisites: Restricted to Geography or Environmental Studies majors only.

---

College of Arts & Sciences | Geography | Physical Geography

---

## GEOG-3612 (3) Geography of American Cities

Introduces geography of American cities. Includes demographic and ideological contexts of urban development, emergence of the city system, location theory and rent models, and urban-economic problems.

---

College of Arts & Sciences | Geography | Human and Cultural Geography

---

## GEOG-3662 (3) Economic Geography

Presents several theories of location of economic activity: general theory of land use, agricultural location theory, plant location theory, central place theory, location of systems of cities, and geographical organization of industries. Studies aggregate geographical structure of regions as the geography of three major markets: labor, product, and capital, including the banking system. Explores the economic

---

growth of regions and policies designed to influence regional growth and welfare.

College of Arts & Sciences Geography Human and Cultural Geography

---

## GEOG-3672 (3) Gender and the Global Economy

Examines the role of gender in global economy. Explores the impacts of colonialism and modern global economy on gender relations, with particular emphasis on third world societies. Also focuses on related issues of population politics, environmental crisis, women's sexual exploitation, and women's social movements worldwide. Prereqs., GEOG 1982, 1992, 2002, 2412, WMST 2000 or 2050. Same as WMST 3672. Approved for arts and sciences core curriculum: human diversity.

College of Arts & Sciences Geography Human and Cultural Geography

---

## GEOG-3682 (3) Geography of International Development

Compares and contrasts global characteristics and processes of development, emphasizing the developing countries of the world. Integrates theories of development, specific development topics, and case studies to explore the problems of development. Recommended prereqs., GEOG 1982, 1992, 2002 or 2412.

College of Arts & Sciences Geography Human and Cultural Geography

---

## GEOG-3742 (3) Place, Power, and Contemporary Culture

Presents a radical reexamination of the geography of culture. Examines the relationship between places, power, and the dynamics of culture. Explores how the globalization of economics, politics, and culture shapes local cultural change. Looks at how place-based cultural politics both assist and resist processes of globalization. Recommended prereq., GEOG 1982, 1992, or 2002. Approved for arts and sciences CORE curriculum: contemporary societies.

College of Arts & Sciences Geography Human and Cultural Geography

---

## GEOG-3812 (3) Mexico, Central America, and the Caribbean

Introduces the geography of Latin America, focusing on the lands and peoples of Mexico, Central America, and the Caribbean. Examines regional and national culture, history, environment, and population, as well as ongoing environmental and socioeconomic changes. Recommended prereqs., GEOG 1982, 1992, 2002, or 2412.

College of Arts & Sciences Geography Human and Cultural Geography

---

## GEOG-3822 (3) Geography of China

Surveys the world's most populous country, examining physical and historical geography, urbanization and regional development, agriculture, population, energy, and the environment. Seeks to situate China's development in a broader Asian and global context. Recommended prereqs., GEOG 1982, 1992, 2002 or 2412. Approved for arts and sciences core curriculum: human diversity.

[College of Arts & Sciences](#) [Geography](#) [Human and Cultural Geography](#)

## GEOG-3840 (1-6) Undergraduate Independent Study

Provides an independent study opportunity, by special arrangement with faculty, for students presenting strong geography preparation. May be repeated up to 8 total credit hours. Restricted to geography majors. Prerequisites: Restricted to Geography majors only.

### [GEOG-3862 \(3\) Geography of Africa](#)

Studies physical and cultural regions of Africa. Analyzes and compares natural and cultural regions and the development of present nation-states. Recommended prereqs., GEOG 1982, 1992, 2002 or 2412.

[College of Arts & Sciences](#) [Geography](#) [Human and Cultural Geography](#)

### [GEOG-3930 \(3\) Internship](#)

Provides an academically supervised opportunity for advanced geography or environmental conservation majors to work in public and private organizations on projects related to the student's career goals and to relate classroom theory to practice. May be repeated up to 6 total credit hours. Restricted to geography and environmental studies majors. Prerequisites: Restricted to Geography or Environmental Studies majors only.

[College of Arts & Sciences](#) [Geography](#)

### [GEOG-4023 \(4\) Introduction to Quantitative Methods in Human Geography](#)

Introduces fundamental statistical and quantitative modeling techniques widely used in geography today. Emphasizes geographic examples and spatial problems, as are statistical routines now available on most computers. Prereq., GEOG 3023 or equivalent. Same as GEOG 5023. Prerequisites: Requires pre-requisite course of GEOG 3023.

[College of Arts & Sciences](#) [Geography](#) [Techniques \(Skills\)](#)

### [GEOG-4043 \(4\) Cartography 2: Interactive and Multimedia Mapping](#)

An advanced course in interactive, multimedia, animated, and Web-based cartography stressing the important role digital cartography

---

plays in cyberspace. Focuses on principles of effective cartographic design in multimedia and hypertext environments. Labs are organized around hands-on active learning projects. Prereq., GEOG 3053. Same as GEOG 5043.

College of Arts & Sciences Geography Techniques (Skills)

---

## GEOG-4093 (4) Remote Sensing of the Environment

Covers acquisition and interpretation of environmental data by remote sensing. Discusses theory and sensors as well as manual and computerized interpretation methods. Stresses infrared and microwave portions of the spectrum. Same as GEOG 5093 and GEOL 4093.

College of Arts & Sciences Geography Techniques (Skills)

---

## GEOG-4100 (1-3) Special Topics in Geography

Various topics not normally covered in the curriculum; offered intermittently depending on student demand and availability of instructors. See also GEOG 4110 and 4120. May be repeated up to 6 total credit hours. Prereq., instructor consent.

College of Arts & Sciences Geography

---

## GEOG-4103 (4) Introduction to Geographic Information Science

Examines construction and use of an information system and its data specifically designed for representing and manipulating geographical data. Emphasizes modern geographical information systems including computer hardware/software with a collection of methods/procedures for recording, transforming, storing/retrieving, analyzing, and mapping geographic data. Prereq., GEOG 2053 or GEOG 3053 and introductory course in statistics. Same as GEOG 5103. Prerequisites: Requires pre-requisite courses of GEOG 2053 or 3053 and introductory course in statistics. Restricted to Junior or Senior Geography (GEOG) or Environmental Studies(ENVS) majors only.

College of Arts & Sciences Geography Techniques (Skills)

---

## GEOG-4110 (1-4) Special Topics in Geography

Various topics not normally covered in the curriculum; offered intermittently depending on student demand and availability of instructors. See also GEOG 4100 and 4120. May be repeated up to 6 total credit hours. Prereq., instructor consent.

College of Arts & Sciences Geography

---

## GEOG-4120 (1-3) Special Topics in Geography

Various topics not normally covered in the curriculum; offered intermittently depending on student demand and availability of instructors. See also GEOG 4100 and 4110. May be repeated up to 6 total credit hours. Prereq., instructor consent.

## GEOG-4173 (3) Research Seminar

Examines the nature of research and develops pregraduate skills for geographic research, emphasizing problem definition, methods, sources, data interpretation, and writing. Recommended for students pursuing honors. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Geography (GEOG) or Environmental Studies (ENVS) majors only.

## GEOG-4201 (3) Biometeorology

Interdisciplinary science, studying the interactions between atmospheric processes and living organisms (plants, animals, and humans). Discusses how organisms adapt to a changing environment. Uses a practical, problem-solving approach to explore these interactions. Prereq., GEOG 1001. Same as ENVS 4201.

## GEOG-4203 (4) Geographic Information Science: Modeling Applications

Extends basic GIS concepts and mechanics. Develop GIS models for human and environmental applications. Grid and vector data models, tessellated and hierarchical data structures, terrain representation, interpolation and kriging, spatial regression. Small group projects design, implement and run GIS models. Prereq., GEOG 4103/5103 or instructor consent. Recommended prereq., working knowledge of GIS software. Same as GEOG 5203.

## GEOG-4241 (4) Principles of Geomorphology

Studies weathering, mass-wasting, fluvial, wind, and marine processes and the resulting landforms. Prereq., GEOG 1011 or any 1000-level sequence in geological sciences. Same as GEOL 4241. Approved for arts and sciences core curriculum: natural science.

Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) Environmental Conservation (EVOC), Geography (GEOG), Geology (GEOL) or Environmental Studies (ENVS) majors only.

## GEOG-4251 (4) Fluvial Geomorphology

Emphasizes landscapes formed by running water. Includes basic fluid mechanics, sediment transport, hillslope and channel erosion, and sediment yield. Prereqs., Geog 1011 and 3511. Recommended prereq., Geog 3023. Same as Geog 5251.

---

## GEOG-4261 (3) Glaciers and Permafrost

Surveys the major terrestrial components of the cryosphere, including permafrost, glaciers, and ice sheets. Emphasizes physical processes involving ice, including thermal behavior, ice deformation, and mass balance, but also considers biogeochemical processes and landforms associated with ice. The climate context, including human interactions and recent climate history, will be considered. The course will be taught in a combination lecture-seminar format. Prereq., GEOG 1011 or GEOL 1010. Recommended prereq., GEOG 4241.

## GEOG-4271 (3) The Arctic Climate System

Understanding the climate of the Arctic requires a synthetic, system oriented approach. The course focuses on the intimate linkages between the atmosphere, ocean and land that give the Arctic region its unique character, link the Arctic to the larger global climate system, and promote understanding the rapid changes occurring in the Arctic. Prereq., GEOG 1001. GEOG 4271 and 5271 are the same course.

## GEOG-4292 (3) Migration, Immigrant Adaptation, and Development

Examines historical and current patterns of migration with an emphasis in international movement. Looks at leading migration theories related to both origin- and destination-based explanations while critically looking at the role of development as a potential cause and consequence of population movement. Finally, covers some aspects of immigrants' social and economic adaptation to their host society. Recommended prereqs., GEOG 1982, 1992, 2002, or 2412. Same as GEOG 5292 and ECON 4292.

## GEOG-4303 (4) GIS Programming for Spatial Analysis

Focuses on the extension of geographic information systems (GIS) through programming as well as on the development of algorithms for spatial analysis and information extraction in vector and raster data. Covers concepts, principles and techniques of programming and solving spatial problems in physical and human Geography. Prereq., GEOG 4103/5103. Recommended prereq., GEOG 4203/5203. Same as GEOG 5303.

## GEOG-4311 (3) Watershed Biogeochemistry

Emphasizes terrestrial-aquatic linkages in headwater catchments, focusing on hydrologic pathways, isotopic and geochemical tracers,

---

nutrient cycling, water quality, experimental manipulations, and modeling. Prereq., GEOG 1011 and 3511. Recommended prereq., parametric statistics.

College of Arts & Sciences | Geography | Physical Geography

---

## GEOG-4321 (3-4) Snow Hydrology

Offers a multidisciplinary and quantitative analysis of physico-chemical processes that operate in seasonally snow-covered areas, from the micro- to global-scale: snow accumulation, metamorphism, ablation, chemical properties, biological aspects, electromagnetic properties, remote sensing, Gis, and quantitative methods. Prereqs., GEOG 1001 or 1011, and any statistics course. Same as GEOG 5321.

College of Arts & Sciences | Geography | Physical Geography

---

## GEOG-4331 (3-4) Mountain Climatology

Surveys and analyzes climatic characteristics of mountain environments worldwide. Prereq., GEOG 1001 or ATOC 1050 or 1060. Same as GEOG 5331.

College of Arts & Sciences | Geography | Physical Geography

---

## GEOG-4371 (3) Forest Geography: Principles and Dynamics

Surveys principles of forest geography and ecology. Includes both individual tree responses to environmental factors and species interactions within communities. Emphasizes forest dynamics and their relation to management problems. Prereq., GEOG 1001. Same as GEOG 5371.

College of Arts & Sciences | Geography | Physical Geography

---

## GEOG-4401 (3) Soils Geography

Discusses chemical and physical properties of soils, soil development, distributions, and management relevant to understanding plant-soil relationships in natural and human-altered landscapes. Prereq., GEOG 1011. Recommended prereq., inorganic chemistry. Same as GEOG 5401.

College of Arts & Sciences | Geography | Physical Geography

---

## GEOG-4430 (3) Seminar: Conservation Trends

Provides environmental studies or geography majors with an undergraduate format for interdisciplinary discussion and research into

current and future directions of conservation. May be repeated up to 6 total credit hours. Restricted to junior and senior geography and environmental studies majors.

[College of Arts & Sciences](#) [Geography](#)

---

---

## GEOG-4501 (3) Water Resources and Water Management of Western United States

Interprets and analyzes hydroclimatic data, surface, and groundwater. Critically evaluates water use, emphasizing problems associated with geographic maldistribution, appropriations, irrigation, industry, pollution, and regional development. Same as GEOG 5501.

GEOG

## GEOG-4622 (3) City Life

Analyzes social, behavioral, political, and demographic factors that influence development and maintenance of communities in contemporary urban environments, with primary emphasis on U.S. cities. Recommended prereqs., GEOG 1982, 1992, 2002, or 2412. Same as GEOG 5622.

[College of Arts & Sciences](#)
[Geography](#)
[Human and Cultural Geography](#)

## GEOG-4632 (3) Development Geography

Provides an overview of development policy and practice, surveying foundational works in Development Studies as well as critical interventions. Required for Graduate Certificate in Development Studies. Prereqs. for GEOG 4632 are GEOG 1982, 1992, 2002 or 2412. Recommended prereq., GEOG 3682. GEOG 4632 and 5632 are the same course.

[College of Arts & Sciences](#)
[Geography](#)
[Human and Cultural Geography](#)

## GEOG-4712 (3) Political Geography

Systematic study of relations between geography and politics, especially as background for better understanding of international affairs. Includes topics such as frontiers and boundaries, power analysis, geopolitics, international political economy, and strategic concepts. Recommended prereqs., GEOG 1982, 1992, 2002, 2412, IAFS 1000, PSCI 2012 or 2223. Restricted to GEOG, IAFS, ENVS, junior/senior majors. Same as GEOG 5712.

[College of Arts & Sciences](#)
[Geography](#)
[Human and Cultural Geography](#)

## GEOG-4722 (3) Field Methods in Human Geography

Examines research methods associated with field work in human geography. Prepares students for fieldwork by focusing on geographic and interdisciplinary field work techniques; interpretation of field data; and discussion of the politics, ethics and gender, race, class, and cross-cultural issues related to field work. Prereqs., 15 credit hours in human geography. Same as GEOG 5722.

College of Arts & Sciences | Geography | Human and Cultural Geography

---

---

## GEOG-4732 (3) Population Geography

Emphasizes spatial aspects of population characteristics including fertility, mortality, migration, distribution, and composition. Includes both theoretical and empirical considerations, in addition to field work and computer simulations. Recommended prereqs., GEOG 1982, 1992, 2002 or 2412. Same as GEOG 5732.

College of Arts & Sciences | Geography | Human and Cultural Geography

---

---

## GEOG-4742 (3) Environments and Peoples

Studies the interaction of people and the environment, including human adaptation and modification of environments, cultural interpretation and construction of landscapes, and natural resources and land management. May be taken twice. Topics vary. Recommended prereqs., GEOG 1982, 1992, 2002 or 2412. Restricted to juniors/seniors. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

College of Arts & Sciences | Geography | Human and Cultural Geography

---

---

## GEOG-4812 (3) Environment and Development in South America

Presents theoretical approaches to the links between environment and development in Latin America and focuses on analytical discussion of contemporary (and controversial) issues in sustainable development in South America. Examines social, ecological, economic, and political forces influencing the use of natural resources. Recommended prereqs., GEOG 1982, 1992, 2002, 3812, 3422, ANTH 3110, or PSCI 3032.

College of Arts & Sciences | Geography | Human and Cultural Geography

---

---

## GEOG-4822 (3) Environment and Development in China

Examines key environmental problems in relation to China's rapid modernization and development. Recommended prereqs., GEOG 1982, 1992, 2002 or HIST 1608.

College of Arts & Sciences | Geography | Human and Cultural Geography

---

---

## GEOG-4832 (3) Geography of Tibet

Rigorously examines contemporary Tibetan society, culture, and nature from a geographical perspective. Uses readings on contemporary Tibet as an entry point into scholarly research about nationalism, representation, diaspora, landscape and place, sustainable development, natural resource management, identity, and environmentalism. Prereqs., GEOG 3822 or other classes on China. Same as GEOG 5832.

College of Arts & Sciences | Geography | Human and Cultural Geography

---

## GEOG-4852 (3) Health and Medical Geography

Examines geographical patterns of health and disease with an emphasis on global health issues. Focuses on three major approaches to medical geographic research: ecological approaches, which systematically analyze relationships between people and their environments; social approaches, including political economy and socio-behavioral approaches; and spatial approaches, which employ maps and spatial analysis to identify patterns of health and disease. Recommended prereqs., GEOG 1001 or 1011, and GEOG 1992, 2002 or 2412. Restricted to juniors/seniors. GEOG 4852 and 5852 are the same course.

College of Arts & Sciences | Geography | Human and Cultural Geography

---

## GEOG-4892 (3) Geography of Western Europe

Provides a regional survey of cultural, political, economic, social, and physical geography of Western Europe, emphasizing the distinctive character and problems of each major area and the relationship of the region to the world. Recommended prereqs., GEOG 1982, 1992, 2002 or 2412.

College of Arts & Sciences | Geography | Human and Cultural Geography

---

## GEOG-4990 (3) Senior Thesis

Offers thesis research under faculty supervision. May be repeated up to 6 total credit hours. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Geography (GEOG) or Environmental Studies (ENVS) majors only.

College of Arts & Sciences | Geography

---

## GEOG-5003 (4) Elements of Geographic Information Systems

Discusses incorporating GIS methods into graduate thesis or dissertation research. Reviews basic mapping concepts (scale and projections), acquiring different types of spatial data (raster and vector), building an error-free database, making simple queries, overlays, charts, and maps. Intended for students who want to learn GIS but lack background skills in computing or cartography. Recommended prereq., some experience with Mac or Windows. Restricted to graduate students.

College of Arts & Sciences | Geography | Techniques (Skills)

---

---

## GEOG-5023 (4) Introduction to Quantitative Methods in Geography

Restricted to graduate students. Same as GEOG 4023.

College of Arts & Sciences Geography Techniques (Skills)

---

## GEOG-5043 (4) Cartography 2: Interactive and Multimedia Mapping

Restricted to graduate students. Same as GEOG 4043. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Geography Techniques (Skills)

---

## GEOG-5093 (4) Remote Sensing of the Environment

Restricted to graduate students. Same as GEOG 4093 and GEOL 5093. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Geography Techniques (Skills)

---

## GEOG-5100 (1-4) Special Topics: Geography

Covers various topics outside of the normal curriculum; offered intermittently depending on student demand and availability of faculty.

May be repeated up to 9 total credit hours. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Geography

---

## GEOG-5103 (4) Geographic Information Systems

Prereqs., introductory course in statistics and instructor consent. Restricted to graduate students. Same as GEOG 4103. Prerequisites:

Restricted to Graduate Students only.

College of Arts & Sciences Geography Techniques (Skills)

---

## GEOG-5113 (3) Seminar: Geographic Information Systems

Focuses on the current research topics in geographical information systems and selected areas of application. Includes major journal articles related to each topic. Students complete and present a seminar paper. Prereq., GEOG 4103, 5103, or instructor consent.

Restricted to graduate students. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Geography Techniques (Skills)

---

---

## GEOG-5152 (3) History and Theory of Geography

History of ideas and institutions that have shaped contemporary geographic inquiry. Examines the evolving relations among human geography, physical geography, environment-society relations, and geographic information processing. Designed to situate graduate student research within major subfields and intellectual currents of geography. Restricted to graduate students. Prerequisites: Restricted to Geography (GEOG) graduate students only.

College of Arts & Sciences | Geography | Human and Cultural Geography

---

## GEOG-5161 (3) Research Design in Geography

The human section reads and discusses contemporary research philosophies and methodologies in human geography. Practices the development of research proposals and presentation of research ideas and results. The physical section reads and discusses contemporary research philosophies and methodologies in physical geography (climatology, geomorphology, biogeography, and soils geography). Practices the development of research proposals and presentation of research ideas. Restricted to geography graduate students.

College of Arts & Sciences | Geography | Physical Geography

---

## GEOG-5203 (4) Geographic Information Science: Modeling Applications

Prereq., GEOG 4103/5103 or instructor consent. Restricted to graduate students. Recommended prereq., working knowledge of Gis software. Same as GEOG 4203. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Geography | Techniques (Skills)

---

## GEOG-5211 (3) Seminar: Physical Climatology

Involves a research seminar concerned with problems of mass and energy exchange in the Earth-atmosphere system. Selects topics from such areas as air quality, bioclimatology, hydrology, climate change, and the climates of urban, agricultural, and natural environments. Restricted to graduate students.

College of Arts & Sciences | Geography | Physical Geography

---

## GEOG-5221 (3) Synoptic and Dynamic Climatology

Examines global climates from the standpoint of synoptic and dynamic climatology. Prereqs., GEOG 3201 or equivalent, 3000-level course in climate/atmospheric sciences, and instructor consent. Restricted to graduate students.

College of Arts & Sciences | Geography | Physical Geography

---

## GEOG-5241 (1-3) Topics in Physical Geography

Presents recent research topics that vary from year to year. Consult the online Schedule Planner for specific topics. May be repeated up to 6 total credit hours. Restricted to graduate students. Prerequisites: Restricted to Graduate Students only.

## GEOG-5622 (3) City Life

Restricted to graduate students. Same as GEOG 4622.

College of Arts & Sciences | Geography | Human and Cultural Geography

---

## GEOG-5632 (3) Development Geography

Provides an overview of development policy and practice, surveying foundational works in Development Studies as well as critical interventions. Required for Graduate Certificate in Development Studies. Prereqs. for GEOG 4632 are GEOG 1982, 1992, 2002 or 2412. Recommended prereq., GEOG 3682. GEOG 4632 and 5632 are the same course. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Geography | Human and Cultural Geography

---

## GEOG-5642 (3) Seminar: Urban Geography

Restricted to graduate students. Surveys current research topics in urban geography. Emphasizes definition of possible student thesis topics.

College of Arts & Sciences | Geography | Human and Cultural Geography

---

## GEOG-5712 (3) Political Geography

Restricted to graduate students. Same as GEOG 4712. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Geography | Human and Cultural Geography

## GEOG-5732 (3) Population Geography

Restricted to graduate students. Same as GEOG 4732. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Geography | Human and Cultural Geography

---

---

## GEOG-5762 (3) Sustainable Development: Theory and Classic Issues

Provides an assessment of sustainable development primarily as it relates to the Third World. Follows a sequence from development theory through facts, approaches, and goals. Investigates specific topical problems and closes with analyses of case studies. Restricted to graduate students.

College of Arts & Sciences | Geography | Human and Cultural Geography

---

## GEOG-5772 (3) Sustainable Development: Institutions and Policy

Investigates the links between social theory, development practice, and policy. Restricted to graduate students.

College of Arts & Sciences | Geography | Human and Cultural Geography

---

## GEOG-5782 (3) Sustainable Development: Critique

Investigates historical and contemporary theories and critiques of development and their implications for geographic theory and method. Focuses on the role of representation in evaluating case studies and examining the potential for a sustainable development. Prereq., graduate standing. Recommended prereq., GEOG 5762.

College of Arts & Sciences | Geography | Human and Cultural Geography

---

## GEOG-5832 (3) Geography of Tibet

Same as GEOG 4832.

College of Arts & Sciences | Geography | Human and Cultural Geography

---

## GEOG-5840 (1-3) Graduate Independent Study

Offers independent research for master's students only. May be repeated up to 6 total credit hours. Restricted to graduate students. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Geography

---

## GEOG-5852 (3) Health and Medical Geography

Examines geographical patterns of health and disease with an emphasis on global health issues. Focuses on three major approaches to medical geographic research: ecological approaches, which systematically analyze relationships between people and their environments; social approaches, including political economy and socio-behavioral approaches; and spatial approaches, which employ maps and

spatial analysis to identify patterns of health and disease. Recommended prereqs., GEOG 1001 or 1011, and GEOG 1992, 2002 or 2412. Restricted to juniors/seniors. GEOG 4852 and 5852 are the same course.

[College of Arts & Sciences](#) [Geography](#) [Human and Cultural Geography](#)

## GEOG-5930 (3) Advanced Internship

Provides an academically supervised opportunity for graduate-level geography majors to work in public and private organizations on advanced projects related to geographic theory and their career goals. May be repeated up to 7 total credit hours. Restricted to graduate students. Prerequisites: Restricted to Graduate Students only.

[College of Arts & Sciences](#) [Geography](#)

## GEOG-5961 (3) Theories of Climate and Climate Variability

Critically reviews current theories of climatic variability based on analysis of the different physical processes affecting climate. Restricted to graduate students. Same as ATOC 5960.

[College of Arts & Sciences](#) [Geography](#) [Physical Geography](#)

## GEOG-6180 (1-3) Seminar: Geographic Problems

Applies research methods to selected problems. Topics vary with instructor. Restricted to graduate students. May be repeated up to 7 total credit hours.

College/School

All

Search by Course Number

Subject Number

GEOG

### [GEOG-6211 \(1-3\) Readings in Climatology](#)

Discusses selected topics in current climatological literature. Specific themes vary. Restricted to graduate students. May be repeated up to 7 total credit hours. Prerequisites: Restricted to Graduate Students only.

[College of Arts & Sciences](#) [Geography](#) [Physical Geography](#)

### [GEOG-6402 \(3\) Seminar: Comparative Environmental Studies](#)

Critically examines cross-cultural experience with adjustments to natural hazards and political management of resource exploitation. Restricted to graduate students. May be repeated up to 7 total credit hours. Prerequisites: Restricted to Graduate Students only.

[College of Arts & Sciences](#) [Geography](#) [Human and Cultural Geography](#)

### [GEOG-6443 \(2\) Remote Sensing Field Methods](#)

Theory and practical field measurements for validation of airborne and spaceborne spectral image acquisition. Emphasizes radiative scattering properties of soil, vegetation, cryosphere, and atmosphere. Also focuses on characterization and calibration of instrumentation to measure these properties. Restricted to graduate students. Prereqs., GEOL/GEOG 4093/5093. Recommended prereq., GEOL 5240. Same as EBIO 6440.

[College of Arts & Sciences](#) [Geography](#) [Techniques \(Skills\)](#)

### [GEOG-6712 \(3\) Seminar: Political Geography](#)

Considers in detail history and methodology of the field, including an analysis of selected systematic topics such as frontiers and boundaries, international rivers, conflicting claims to territory, and electoral geography. Restricted to graduate students. May be repeated

---

up to 7 total credit hours.

College of Arts & Sciences Geography Human and Cultural Geography

---

## GEOG-6732 (3) Formal Population Geography: Analysis and Forecasting

An in-depth introduction to formal Demography. In addition to learning the basic demographic tools used nowadays in fertility, marriage, mortality, migration, and forecasting/projections, it also looks at some potential links between formal and statistical demographic work that would enable the student to apply some of the methods learnt in an econometric or multivariate setting. Prereqs., GEOG 4023/5023 or equivalent. Restricted to graduate students. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Geography Human and Cultural Geography

---

## GEOG-6742 (3) Seminar: Cultural Geography

Explores various geographic topics emphasizing the concept of culture. Emergence of several points of view in the development of cultural geography. Restricted to graduate students. May be repeated up to 7 total credit hours.

College of Arts & Sciences Geography Human and Cultural Geography

---

## GEOG-6940 (1) Master's Degree Candidate

Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Geography

---

## GEOG-6950 (1-6) Master's Thesis

Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Geography

---

## GEOG-7840 (1-3) Graduate Independent Study

Offers independent research for doctoral students only. Restricted to graduate students. May be repeated up to 6 total credit hours.

Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Geography

---

## GEOG-8990 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section. Prerequisites: Restricted to Graduate Students only.

GEOL

## GEOL-1010 (3) Introduction to Geology

Introductory geology for majors and nonmajors. Studies Earth, its materials, its characteristics, its dynamic processes, and how it relates to people. Separate lab (GEOL 1030) is optional. Meets MAPS requirement for natural science: nonlab. Approved for arts and sciences core curriculum: natural science.

[College of Arts & Sciences](#)

[Geological Sciences](#)

## GEOL-1020 (3) Introduction to Earth History

Examines how Earth's interior and surface, the atmosphere and climate, the oceans, and life interact and have changed over the immensity of geologic time. For majors and non-majors. Separate lab (GEOL 1030) is optional. Prereq., GEOL 1010. Credit not granted for this course and GEOL 1040. Approved for arts and sciences core curriculum: natural science.

[College of Arts & Sciences](#)

[Geological Sciences](#)

## GEOL-1030 (1) Introduction to Geology Laboratory 1

Features field trips to local points of geologic interest. Studies rocks and topographic and geologic maps. Prior or current registration in 1000-level geology recommended. Meets MAPS requirements for natural science lab, if taken with GEOL 1010. Approved for arts and sciences core curriculum: natural science. Formerly GEOL 1080.

[College of Arts & Sciences](#)

[Geological Sciences](#)

---

## GEOL-1040 (3) Geology of Colorado

Reviews the geologic evolution and history of Colorado. It first develops the basic concepts needed to interpret the geology, and then systematically shows how the state evolved through geologic time. The course is designed for those who enjoy understanding the beauty and splendor of the state. Prereq., GEOL 1010. Credit not granted for this course and GEOL 1020. Approved for arts and sciences core curriculum: natural science.

College of Arts & Sciences Geological Sciences

---

## GEOL-1060 (3) Global Change---An Earth Science Perspective

Focuses on evidence for planetary warming, climate change, glacier and ice-sheet melting, and sea level rise both now and in the recent past. Attempts to develop understanding of the interactions within the coupled Earth system that regulate such changes. Utilizes examples from the geological and instrumental records, and evaluates the global warming forecast. Prereq., GEOL 1010. Meets MAPS requirement for natural science: nonlab. Approved for arts and sciences core curriculum: natural science.

College of Arts & Sciences Geological Sciences

---

## GEOL-2001 (4) Planet Earth

Explores the dynamics of planet Earth with particular emphasis on the factors that make the planet habitable. Includes examination of heat balance, hydrology, geomorphology, biogeochemistry and climate history through both lecture and lab-based activities. The course is required for the Environmental Geoscience track within the Geology major and will introduce students to the major concepts in contemporary Earth system science. Prereqs., GEOL 1010, 2100 or ENVS 1000 or instructor consent required.

College of Arts & Sciences Geological Sciences

---

## GEOL-2100 (3) Environmental Geology

Introduces the influences of geologic processes on human lives and the changes human actions cause in geologic systems. Uses examples and case studies from Colorado and the West. Approved for the arts and sciences core curriculum: natural science.

College of Arts & Sciences Geological Sciences

---

## GEOL-2700 (2) Introduction to Field Geology

Introduces basic field techniques necessary to collect geologic data and samples, and necessary to map geologic units. Prereqs., GEOL 1030 and either GEOL 1010 and 1020; or GEOL 1010 and 1040; or GEOL 1010 and 1060; or GEOG 1001 and 1011.

College of Arts & Sciences Geological Sciences

---

## GEOL-3010 (3) Introduction to Mineralogy

Two lects. and one lab per week. Origin, occurrence, identification, classification, and uses of minerals. Applications of mineralogy to economic geology and petrology are emphasized. Prereq., Chem 1111 and Math 1300.

College of Arts & Sciences Geological Sciences

---

---

## GEOL-3020 (3) Petrology

Field relations, petrography, petrology, chemistry, and origins of igneous and metamorphic rocks are studied by means of lectures, reading, and lab and field experience. Labs include instruction in the fundamentals of optical petrography and the study of rocks in thin section. Prereq., GEOL 3010.

College of Arts & Sciences Geological Sciences

---

---

## GEOL-3023 (4) Statistics for Geography

Introduces parametric and distribution-free statistics, emphasizing applications to earth science problems. Same as GEOG 3023.

College of Arts & Sciences Geological Sciences

---

---

## GEOL-3030 (3) Introduction to Hydrogeology

Introduces groundwater flow concepts, hydrologic cycle, physical and chemical properties, flow net, hydraulic potential, geologic controls on heterogeneity and anisotropy, aquifers and aquitards in a geologic system, saturated and unsaturated flow, flow to a well, pumping tests, and role of groundwater in geologic processes. Prereqs., GEOL 1010 or 2001, and MATH 1300; or instructor consent.

College of Arts & Sciences Geological Sciences

---

---

## GEOL-3040 (3) Global Change: The Recent Geological Record

Geological records in lakes, oceans, deserts, and around glaciers indicate the significant changes in the global systems that have taken place over the last few hundred or thousand years. Explores the timing and nature of these changes. Prereqs., any two-course sequence of natural science core courses. Credit not granted for this course and GEOL 4070. Approved for arts and sciences core curriculum: natural science.

College of Arts & Sciences Geological Sciences

---

---

## GEOL-3050 (2) GIS for Geologists

Introduction to Geographic Information Systems (GIS) techniques focused on geological applications. GIS analyzing, mapping, and GPS use are covered. Basic computer skills are a plus before entering the class.

College of Arts & Sciences Geological Sciences

---

---

## GEOL-3070 (3) Introduction to Oceanography

Investigates the broad-scale features and dynamics of Earth's oceans. The course is roughly divided amongst the four major, interrelated disciplines of oceanography: marine geology, marine chemistry, physical oceanography (i.e. circulation), and marine biology. Specific topics include seafloor spreading, marine sediments, salinity, biogeochemical cycles, currents, waves, tides, primary production, marine ecology, marine resources, global warming, and much more. Prereq., any two-course sequence of natural science courses. Same as ATOC 3070. Approved for arts and sciences core curriculum: natural science.

College of Arts & Sciences Geological Sciences

---

---

## GEOL-3090 (3) Developing Scientific Writing Skills

Focuses on the development of scientific writing skills. Enhances student ability to write professionally, revise text, and review the work of others. Writing assignments integrate the subject matter of different topics in earth science. Prereq., a lower division writing course and one of the following: GEOL 2001, 2700, 3010, 3030, 3120, 3230, 3320, 3430, or 3820. Approved for arts and sciences core curriculum: written communication.

College of Arts & Sciences Geological Sciences

---

---

## GEOL-3120 (4) Structural Geology

Geometrical techniques for describing and illustrating geological structures. Major topics include graphic methods and geometry of fractures and folds. Prereqs., any 1000-level sequence in geological sciences.

College of Arts & Sciences Geological Sciences

---

---

## GEOL-3130 (3) Global Warming: Understanding the Forecast

Uses the example of man-made climate change to develop an analytical understanding of the Earth system (solid, fluid, and living) that can be used to interpret the complex and uncertain forecast. Emphasis is given to the concepts of forcing, feedback and response in order to examine natural vs. man-made environmental changes and climate change mitigation strategies.

College of Arts & Sciences Geological Sciences

---

---

## GEOL-3230 (3) Earth Materials

Provides introduction to the classification, composition and properties of Earth rocks and minerals, with emphasis on near surface Earth materials. Two lectures and one lab per week. Labs include instruction on optical mineralogy and on the study of rocks in thin section. Prereqs., CHEM 1111 and MATH 1300.

College of Arts & Sciences Geological Sciences

---

---

## GEOL-3300 (3) Extraterrestrial Life

Discusses the scientific basis for the possible existence of extraterrestrial life. Includes origin and evolution of life on Earth; possibility of life elsewhere in the solar system, including Mars; and the possibility of life on planets around other stars. Prereq., one-year sequence in a natural science. Same as ASTR 3300.

College of Arts & Sciences Geological Sciences

---

---

## GEOL-3320 (3) Introduction to Geochemistry

Introduces chemical principles as applied to geologic processes. Includes an introductory discussion of mineral and rock chemistry, aqueous geochemistry, and organic geochemistry. Prereqs., CHEM 1111 , CHEM 1133, and MATH 1300.

College of Arts & Sciences Geological Sciences

---

---

## GEOL-3410 (3) Paleobiology

Surveys morphology, ecology, and evolution of ancient animal and plant life and their interactions on Earth. Fossils used to solve geological and biological problems. Prereqs., any 1000-level sequence in geological science or environmental, population, and organismic biology or instructor consent.

College of Arts & Sciences Geological Sciences

---

---

## GEOL-3430 (4) Sedimentology and Stratigraphy

Introduces the study of sedimentary rocks emphasizing their origin, characteristics, and interpretation; and the principles and techniques for establishing the temporal order and spatial distribution of sedimentary layers. Prereq., GEOL 1010 and GEOL 1020 or 1040, and GEOL 1030, and GEOL 2700 or 3010, or instructor consent.

College of Arts & Sciences Geological Sciences

---

---

## GEOL-3500 (3) Earth Resources and the Environment

Examines Earth's most important natural resources and their impact on society and the environment. Addresses the geology, occurrence, production, and use of petroleum, coal, mineral, and water resources. Future world energy supply and demand, conservation, and the transition from fossil fuels to non-polluting renewable resources are discussed. Prereq., GEOL 1010 or 1060. Approved for arts and sciences core curriculum: natural science.

College of Arts & Sciences Geological Sciences

## GEOL-3520 (3) Energy & Climate Change: An Interdisciplinary Approach

Examines sources of energy and other resources in light of their availability, use, environmental impact, as well as their impact on policy, economics and values. As fossil fuels are the dominant energy source today, particular emphasis is placed on climate impacts and the carbon cycle. All material is assessed through the lenses of the physical sciences, policy, ethics and economics. Prereq., a two-course sequence in any natural science. May be repeated up to 6 total credit hours. Same as ENVS 3520. Approved for arts and sciences core curriculum: natural science.

GEOL

## GEOL-3540 (3) Introduction to Petroleum Geology

Discusses the origin and distribution of conventional and unconventional petroleum resources, source rocks, types of traps and seals, reservoir rock properties, exploration methods (seismic data analysis and interpretation, formation evaluation, subsurface mapping), reservoir characterization and modeling, reserves calculations. Prereqs., GEOL 1010 and MATH 1300 or APPM 1350, or instructor consent.

[College of Arts & Sciences](#) [Geological Sciences](#)

## GEOL-3720 (3) Evolution of Life: The Geological Record

Discusses the evolution of life on Earth, beginning with the earliest origins and surveying the major steps that led to the rise of higher plants and animals. Covers modern ideas on the causes of periodic mass extinctions in both the marine and terrestrial realms. Emphasizes geologic evidence for the pathways of evolution, using examples from the ordinary to the bizarre. Approved for arts and sciences core curriculum: natural science.

[College of Arts & Sciences](#) [Geological Sciences](#)

## GEOL-3820 (3) The Fluid Earth

Examines the myriad forms of fluid behavior found on Earth, from the atmosphere to the inner core. Explores how basic principles of fluid physics may be used to understand a broad range of earth processes, including mantle convection, atmosphere and ocean dynamics, stream flow, lava spreading, and glacier motion, among others. Covers fundamental fluid concepts such as viscosity, pressure, convection, friction, and free-surface flow. Prereqs., MATH 1300, or APPM 1340 and 1345, or APPM 1350, or equivalent. Recommended prereq., GEOL 1010 or equivalent.

[College of Arts & Sciences](#) [Geological Sciences](#)

---

---

## GEOL-3930 (1-6) Internship

Offers an academically supervised opportunity for geological sciences majors to work with public or private organizations. Projects are usually associated with students' career goals; each project has an academic emphasis. Prereq., junior standing and completion, with a B or better, of at least two courses for geology majors.

College of Arts & Sciences Geological Sciences

---

---

---

## GEOL-3950 (3) Natural Catastrophes and Geologic Hazards

Surveys historic and prehistoric natural disasters, their cause, and potential for recurrence. Meteorite impact, earthquakes, volcanic eruptions, tsunamis, landslides, floods, magnetic reversals, and major extinction events. Course formerly numbered as GEOL 4950. Prereq., one year science. Approved for arts and sciences core curriculum: natural science.

College of Arts & Sciences Geological Sciences

---

---

---

## GEOL-4060 (4) Oceanography

Examines the ocean as a system influencing the Earth's surficial processes and climate. Composition and properties of seawater, ocean circulation, waves, tides, coastal-, shallow-, and deep-water processes, biogeochemical cycles, deep sea sediments. Laboratory emphasizes the use of oceanographic data. Prereq., one semester chemistry, physics, or geology. Same as GEOL 5060.

College of Arts & Sciences Geological Sciences

---

---

---

## GEOL-4070 (3) Paleoclimatology

Covers the primary forcings and feedbacks that determine Earth's energy balance and the resultant climate system on decadal to millennial time scales. Covers ocean/atmosphere circulation, the role of ice sheets in the climate system, monsoons, Holocene climate change and 20th Century warming. Includes coverage of the proxies available to reconstruct climates of the past and the archives that contain these proxies. Recommended for natural science majors only and recommended prerequisite of ENVS or GEOL introduction sequence. Credit not granted for this course and GEOL 3040.

College of Arts & Sciences Geological Sciences

---

---

---

## GEOL-4093 (4) Remote Sensing of the Environment

Covers acquisition and interpretation of environmental data by remote sensing. Discusses theory and sensors, as well as manual and computerized interpretation methods. Stresses infrared and microwave portions of the spectrum. Same as GEOL 5093 and GEOG 4093.

College of Arts & Sciences Geological Sciences

---

---

## GEOL-4130 (3) Principles of Geophysics

Students are introduced to fundamental geophysics including seismology, geomagnetism, gravity, radiometric dating, and heat flow with applications to plate tectonics and exploration of the subsurface. Prereqs., MATH 1300 and PHYS 1110 and any 1000-level sequence in geological sciences; GEOL 3120 recommended.

College of Arts & Sciences Geological Sciences

---

## GEOL-4160 (3) Introduction to Biogeochemistry

Covers fundamentals of biogeochemical cycling, emphasizing water, carbon, and nutrient dynamics in terrestrial ecosystems; chemical interactions of atmosphere, biosphere, lithosphere, and hydrosphere; and natural and human-managed environments. Prereqs., GEOL 3320 or EBIO 3270, and CHEM 1011 or higher. Same as ENVS 4160 and EBIO 4160.

College of Arts & Sciences Geological Sciences

---

## GEOL-4241 (4) Principles of Geomorphology

Studies weathering, mass-wasting, fluvial, wind, and marine processes and the resulting landforms. Prereq., GEOG 1011 or any 1000-level sequence in geological sciences. Same as GEOG 4241. Approved for arts and sciences core curriculum: natural science.

College of Arts & Sciences Geological Sciences

---

## GEOL-4270 (3) Marine Chemistry and Geochemistry

Examines the chemical, biological, geological, and physical processes affecting (and affected by) the chemistry of the oceans. Topics include: chemical separation in seawater; the marine carbon cycle and its long-term control on atmospheric CO<sub>2</sub>; the large-scale interdependence of nutrient distributions and biological productivity, chemical tracers of ocean circulation; and the chemistry of marine sediments, including early diagenesis. Prereq., CHEM 1113/1114 and intro geology and/or oceanography or equivalent. Restricted to juniors/seniors.

College of Arts & Sciences Geological Sciences

---

## GEOL-4330 (3) Cosmochemistry

Investigates chemical and isotopic data to understand the composition of the solar system: emphasis on the physical conditions in various objects, time scales for change, chemical and nuclear processes leading to change, observational constraints, and various models that attempt to describe the chemical state and history of cosmological objects in general and the early solar system in particular. Prereq., upper-div undergrad or grad standing in physical science. Recommended prereq., upper-div undergrad Chem, Phys, or Math. Same as GEOL 5330 and ASTR 4330.

---

College of Arts & Sciences Geological Sciences

---

## GEOL-4474 (4) Vertebrate Paleontology

Discusses the history and evolution of the vertebrates, including the phylogenetic relationships and evolutionary patterns of the major groups. Lab focuses on comparative vertebrate osteology and fossil representation of major groups. Prereqs., GEOL 1010, 1020, and 3410, or instructor consent. Restricted to juniors and seniors. Same as GEOL 5474. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

College of Arts & Sciences Geological Sciences

---

## GEOL-4500 (3) Critical Thinking in the Earth Sciences

Deals with controversies within the broad realm of geological sciences, including planetary geology, evolution, paleobiology, global change, environmental issues, plate tectonics, resources, other societal problems, or geologic thought in general. Students are provided the opportunity to analyze and debate scientific issues in the earth sciences. May be repeated up to 6 total credit hours. Prereq., any 1000-level geological science sequence.

College of Arts & Sciences Geological Sciences

---

## GEOL-4550 (3) Petroleum Reservoir Characterization and Modeling

Introduces concepts and methods of petroleum reservoir analysis and 3-D reservoir modeling using subsurface data (cores, well logs, 3-D seismic) and outcrop analogs. Examines petroleum system, petrophysics (lithology, porosity, permeability, capillary pressure, flow units), and sequence-stratigraphic, facies, and structural controls on reservoir properties, heterogeneity, and recovery efficiency. Deterministic and stochastic reservoir modeling methods are addressed. Prereqs., GEOL 1010, 1020, and 3430 or instructor consent. Restricted to juniors/seniors. Same as GEOL 5550. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

College of Arts & Sciences Geological Sciences

---

## GEOL-4670 (3) Isotope Geology

Introduces principles of stable and radiogenic isotope systematics in inorganic and organic geochemistry. Emphasizes application of isotope data to problems in igneous, metamorphic, and sedimentary petrology, geobiochemistry, and petroleum genesis. Prereqs., CHEM 1131, MATH 1300, and GEOL 3020. Same as GEOL 5670.

College of Arts & Sciences Geological Sciences

---

## GEOL-4700 (1-4) Special Geological Topics

Studies in selected geological subjects of special current interest (for undergraduates). May be repeated up to 9 total credit hours within a term. Prereq., instructor consent. Restricted to juniors and seniors. Prerequisites: Restricted to students with 57-180 credits (Junior or

---

Senior).

College of Arts & Sciences Geological Sciences

---

## GEOL-4711 (2) Igneous and Metamorphic Field Geology

Applies field techniques to interpretation of igneous and metamorphic rocks. Field exercises and lectures focus on collecting data required to map igneous and metamorphic rock units. Prereqs., GEOL 2700 or 2001 and GEOL 3020.

College of Arts & Sciences Geological Sciences

---

## GEOL-4712 (2) Structural Field Geology

Methods of field study of structure of rocks, including observations, data collection, and interpretation to understand geometry of deformation and causative processes and kinematics. Field projects are mapped using different scales, air photos, topographic maps, and compass and tape. Prereqs., GEOL 2700 or 2001, and GEOL 3120.

College of Arts & Sciences Geological Sciences

---

## GEOL-4714 (2) Field Geophysics

Applies geophysical field techniques and data interpretation to studying geological and engineering problems. Fieldwork includes seismic, gravity, magnetic, and electrical measurements. Prereqs., GEOL 2700 or 2001, and MATH 1300 and PHYS 1110, or instructor consent.

College of Arts & Sciences Geological Sciences

---

## GEOL-4715 (2) Field Techniques in Hydrogeology

Introduces various field techniques and data analysis methods in hydrogeologic studies for students in geology, environmental studies, geography, and civil engineering. Exercises include mapping ground water levels, conducting slug and pumping tests, measuring stream flows, interpreting aquifer parameters from geophysical measurements, and using field data for water budget analysis. Prereq., GEOL 2001 or 2700.

College of Arts & Sciences Geological Sciences

---

## GEOL-4716 (2) Environmental Field Geochemistry

Develops basic field skills in the most commonly performed tasks required for the environmental characterization of solid and aqueous wastes. Media of study include soils, stream sediments, surface waters, ground waters, and atmospheric particulates. Prereqs., GEOL 2700 or 2001, and CHEM 1011/1031, or CHEM 1113/1133, and GEOL 3320 or instructor consent.

## GEOL-4717 (2) Field Seminar in Geology and Tectonics

Studies geologic features in and around Colorado to gain an overview of the geologic and tectonic evolution of the western U.S. Prereqs., GEOL 2700 or 2001, and one or more of GEOL 3120, 3320, or 3430.

## GEOL-4721 (2) Field Methods in Active Tectonics

Analysis of active geologic structures, including strike slip fault systems, secondary structures in stepovers and related eruptive centers. Includes the use of digital imagery, elevation models, offset geomorphic features and Quaternary deposits to determine local deformation rates and their relation to plate motions. Prereqs., GEOL 2700 or 2001 and GEOL 3120. Recommended prereq., GEOL 4712.

## Courses

**Subject**    **Number**

GEOL

### GEOL-4840 (1-3) Independent Study in Geology

Time and credit to be arranged. Numbered GEOL 4840 through GEOL 4849. For advanced undergraduates who have high scholastic standing. Open only upon consultation with department advisor. May be repeated up to 7 total credit hours.

[College of Arts & Sciences](#) [Geological Sciences](#)

### GEOL-4851 (1-3) Independent Study in Geoscience Education

May be repeated up to 3 credit hours.

[College of Arts & Sciences](#) [Geological Sciences](#)

### GEOL-4960 (1) Writing in Geosciences

Emphasizes strategies of literature research and scientific writing in the geosciences. Includes small writing assignments and a larger library research paper. Prereq., 15 hours of upper-division course work in geological sciences.

[College of Arts & Sciences](#) [Geological Sciences](#)

### GEOL-4990 (1-3) Honors Thesis

Supervised project involving original research in any area of the geological sciences. The thesis is submitted to the Honors Program of the College of Arts and Sciences and is orally defended. The candidate must have a cumulative GPA of 3.30 or better and must be accepted by the departmental honors committee.

College of Arts & Sciences Geological Sciences

---

## GEOL-5060 (4) Oceanography

Same as GEOL 4060.

College of Arts & Sciences Geological Sciences Graduate Course

---

## GEOL-5080 (3) Advanced Hydrogeology and Modeling Concepts

Introduces advanced groundwater flow and modeling concepts, equations for steady state and transient flow, saturated and unsaturated flow, finite difference method, application of modeling in geologic processes, radial flow and aquifer parameters, infiltration and groundwater recharge, model calibration, verification, and prediction. Prereqs., MATH 2300, Fortran, or instructor consent.

College of Arts & Sciences Geological Sciences Graduate Course

---

## GEOL-5093 (4) Remote Sensing of the Environment

Same as GEOL 4093 and GEOG 5093. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Geological Sciences Graduate Course

---

## GEOL-5110 (3) Geomechanics

Introduces fundamental physical processes important to the transport of heat and mass in the Earth and on Earth's surface. Provides practice with quantitative treatment of geological problems. Solutions for each problem are derived from first principles, including conservation and flux laws. Emphasizes heat conduction and viscous fluid flow. Prereq., calculus. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Geological Sciences Graduate Course

---

## GEOL-5270 (3) Marine Chemistry and Geochemistry

Same as GEOL 4270.

College of Arts & Sciences Geological Sciences Graduate Course

---

---

## GEOL-5280 (3) Aqueous and Environmental Geochemistry

Explores the fundamentals of low-temperature geochemistry to investigate element speciation and chemical behavior in waters, soils and sediments. Topics include water-rock interaction and weathering, mineral dissolution and precipitation reactions, aqueous complexation, mineral surface chemistry, kinetics, element cycles, and redox biogeochemistry. Includes exposure to spectroscopic tools, computer simulations, and microbial geochemistry. Prereq., GEOL 3320 or 1 year of college chemistry or instructor consent.

College of Arts & Sciences Geological Sciences Graduate Course

---

## GEOL-5305 (3) Global Biogeochemical Cycles

Focuses on the cycling of elements at the global scale with a particular emphasis on human modification of biogeochemical cycles. Major biogeochemical cycles, their past dynamics, present changes, and potential future scenarios will be addressed. Ecosystem to global-scale model of the earth system will be discussed along with global scale measurements of element fluxes from satellites, aircraft, and measurement networks. Prereq., general chemistry, some organic chemistry. Same as ENVS 5840. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Geological Sciences Graduate Course

---

## GEOL-5330 (3) Cosmochemistry

Same as GEOL 4330 and ASTR 5330.

College of Arts & Sciences Geological Sciences Graduate Course

---

## GEOL-5420 (3) Quaternary Dating Methods

In-depth survey of standard and experimental dating methods that provide absolute ages for events of the last two million years of Earth history. Includes theory and application of radiocarbon, uranium series, amino acid, thermo-luminescence, fission track, potassium/argon, hydration, light stable isotopes, and other radioactive techniques. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Geological Sciences Graduate Course

---

## GEOL-5430 (3) Paleoceanography and Paleoclimatology

Examines scientific tools, data, and theories related to the dramatically varied past climate of Earth. Focus will be on marine records of climate change and ocean circulation, but ice core and continental archives will also be discussed. Course will cover the Cretaceous Period to the present, with particular emphasis on the past 150,000 years (the last ice age cycle). Prereq., intro geology or equivalent. Recommended prereq., intro oceanography or atmospheric science. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Geological Sciences Graduate Course

---

## GEOL-5474 (4) Vertebrate Paleontology

---

Same as GEOL 4474 and MUSM 5474.

College of Arts & Sciences Geological Sciences Graduate Course

---

## GEOL-5550 (3) Petroleum Reservoir Characterization and Modeling

Restricted to graduate students. Same as GEOL 4550.

College of Arts & Sciences Geological Sciences Graduate Course

---

## GEOL-5670 (3) Isotope Geology

Same as GEOL 4670.

College of Arts & Sciences Geological Sciences Graduate Course

---

## GEOL-5690 (3) Tectonic History of the Western United States

Provides students with the practical tools needed to make tectonic interpretations through study of the geologic history of the western United States and the geodynamic models used in interpreting that history. Paleomagnetism, geobarametry, geothermometry, geodynamic modeling, and elements of structural geology and stratigraphy are topics considered in this class. Prereqs., GEOL 3120 and PHYS 1110.

College of Arts & Sciences Geological Sciences Graduate Course

---

## GEOL-5700 (1-4) Geological Topics Seminar

Seminar studies in geological subjects of special current interest are offered primarily for graduate students, as departmental staff and facilities permit. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Geological Sciences Graduate Course

---

## GEOL-5711 (1-3) Igneous and Metamorphic Field Geology

Applies field techniques to interpretation of igneous and metamorphic rocks. Field exercises and lectures focus on collecting data required to map igneous and metamorphic rock units. Prereqs., GEOL 2700 or 2011 and GEOL 3020 or equivalent. May be repeated up to 6 total credit hours. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Geological Sciences Graduate Course

---

---

## GEOL-5712 (1-3) Structural Field Geology

Methods of field study of structure of rocks, including observations, data collection, and interpretation to understand geometry of deformation and causative processes and kinematics. Field projects are mapped using different scales, air photos, topographic maps, and compass and tape. Prereqs., GEOL 2700 or 2001 and GEOL 3120 or equivalent. May be repeated up to 6 total credit hours.

College of Arts & Sciences Geological Sciences Graduate Course

---

## GEOL-5714 (1-3) Field Geophysics

Applies geophysical field techniques and data interpretation to studying geological and engineering problems. Fieldwork includes seismic, gravity, magnetic, and electrical measurements. Prereqs., GEOL 2700 or 2001 and MATH 1300 and PHYS 1110 or equivalent or instructor consent required. May be repeated up to 6 total credit hours. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Geological Sciences Graduate Course

---

## GEOL-5715 (1-3) Field Techniques in Surficial Geology and Geohydrology

Introduces various field techniques and data analysis methods in hydrogeologic studies for students in geology, environmental studies, geography, and civil engineering. Exercises include mapping ground water levels, conducting slug and pumping tests, measuring steam flows, interpreting aquifer parameters from geophysical measurements, and using field data for water budget analysis. Prereqs., GEOL 2001 or 2700 or equivalent. May be repeated up to 6 total credit hours.

College of Arts & Sciences Geological Sciences Graduate Course

---

## GEOL-5716 (1-3) Environmental Field Geochemistry

Develops basic field skills in the most commonly performed tasks required for the environmental characterization of solid and aqueous wastes. Media of study include soils, stream sediments, surface waters, ground waters, and atmospheric particulates. Prereqs., GEOL 2700 or 2001 and CHEM 1011 and 1031, or CHEM 1113 or 1133 and GEOL 3320 or equivalent or instructor consent required. May be repeated up to 6 total credit hours.

College of Arts & Sciences Geological Sciences Graduate Course

---

## GEOL-5717 (1-3) Field Seminar in Geology and Tectonics

Studies geologic features in and around Colorado to gain an overview of the geologic and tectonic evolution of the western U.S. Prereqs., GEOL 2700 or 2001 and one or more of GEOL 3120, 3320 or 3430 or equivalent. May be repeated up to 6 total credit hours. Prerequisites: Restricted to Graduate Students only.

GEOL

## GEOL-5800 (3) Planetary Surfaces and Interiors

Examines processes operating on the surfaces of solid planets and in their interiors. Emphasizes spacecraft observations, their interpretation, the relationship to similar processes on Earth, the relationship between planetary surfaces and interiors, and the integrated geologic histories of the terrestrial planets and satellites. Prereq., graduate standing in physical sciences or instructor consent. Same as ASTR 5800. Prerequisites: Restricted to Graduate Students only.

[College of Arts & Sciences](#) [Geological Sciences](#) [Graduate Course](#)

## GEOL-5810 (3) Planetary Atmospheres

Covers the structure, composition, and dynamics of planetary atmospheres. Includes the origin of planetary atmospheres, chemistry and cloud physics, greenhouse effects, climate, and the evolution of planetary atmospheres---past and future. Same as ATOC 5810 and ASTR 5810.

[College of Arts & Sciences](#) [Geological Sciences](#) [Graduate Course](#)

## GEOL-5820 (3) Origin and Evolution of Planetary Systems

Considers the origin and evolution of planetary systems, including protoplanetary disks, condensation in the solar nebula, composition of meteorites, planetary accretion, comets, asteroids, planetary rings, and extrasolar planets. Applies celestial mechanics to the dynamical evolution of solar system bodies. Prereq., graduate standing in physical sciences or instructor consent. Same as ASTR 5820 and ATOC 5820. Prerequisites: Restricted to Graduate Students only.

[College of Arts & Sciences](#) [Geological Sciences](#) [Graduate Course](#)

## GEOL-5830 (3) Topics in Planetary Science

Current topics in planetary science, based on recent discoveries, spacecraft observations, or other developments. Focuses on a specific topic each time it is offered, such as Mars, Venus, Galilean satellites, exobiology, comets, or extrasolar planets. May be repeated up to 6 total credit hours, provided the topics vary. Prereq., graduate standing in physical sciences or instructor consent. Same as ATOC/ASTR 5830.

College of Arts & Sciences Geological Sciences Graduate Course

---

---

## GEOL-5835 (1) Seminar in Planetary Science

Studies current research on a topic in planetary science. Students and faculty give presentations. Subjects may vary each semester. May be repeated up to 4 total credit hours to meet candidacy requirements. Prereq., graduate standing or instructor consent. Same as ATOC 5835 and ASTR 5835. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Geological Sciences Graduate Course

---

---

## GEOL-5840 (1-3) Independent Study-Quaternary Geology

Numbered GEOL 5840 through GEOL 5851. May be repeated up to 7 total credit hours. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Geological Sciences Graduate Course

---

---

## GEOL-5852 (1-3) Independent Study--GIS Applications in Quaternary Geosciences

Leads students through quantitative spatial analysis of environmental and paleoclimatic problems. Each student will develop a project from start to finish, with emphasis on raster GIS for building large empirical databases that bear on process and variability.

College of Arts & Sciences Geological Sciences Graduate Course

---

---

## GEOL-6060 (4) Petroleum Geology of Turbidite Systems

Covers the exploration and production aspects of petroleum submarine fans and turbidite systems. A one-week field trip to Arkansas is included. Students are responsible for part of the trip expenses. Prereq., GEOL 6330.

College of Arts & Sciences Geological Sciences Graduate Course

---

---

## GEOL-6310 (3) Sedimentary Petrology

Interpretation of depositional and diagenetic history of sedimentary rocks as determined from thin-section studies. Prereqs., GEOL 3010,

---

3020, and 3430. Prerequisites: Restricted to Graduate Students only.

[College of Arts & Sciences](#) [Geological Sciences](#) [Graduate Course](#)

---

## GEOL-6330 (4) Applied Sequence Stratigraphy and Basin Analysis

Develops skills in the stratigraphic interpretation of seismic reflection data, recognition of sequence stratigraphy in well logs and outcrop, and their applications to basin analysis in petroleum exploration. Prereqs., graduate standing, introductory undergraduate physics, and sedimentology/stratigraphy. Prerequisites: Restricted to Graduate Students only.

[College of Arts & Sciences](#) [Geological Sciences](#) [Graduate Course](#)

---

## GEOL-6610 (3) Earth and Planetary Physics 1

Offered alternate years. Mechanics of deformable materials, with applications to earthquake processes. Introduces seismic wave theory. Inversion of seismic data for the structure, composition, and state of the interior of Earth. Same as ASTR 6610 and PHYS 6610.

[College of Arts & Sciences](#) [Geological Sciences](#) [Graduate Course](#)

---

## GEOL-6620 (3) Earth and Planetary Physics 2

Offered alternate years. Space and surface geodetic techniques, as well as potential theory, are covered. Other topics are definition and geophysical interpretation of the geoid and of surface gravity anomalies; isostasy; post-glacial rebound; tides and the rotation of the Earth. Same as ASTR 6620 and PHYS 6620. Prerequisites: Restricted to Graduate Students only.

[College of Arts & Sciences](#) [Geological Sciences](#) [Graduate Course](#)

---

## GEOL-6630 (3) Earth and Planetary Physics 3

Offered alternate years. The solar system: theories of its origin, meteorites. Distribution of radioactive materials; age dating. Heat flow through continents and the ocean floor; internal temperature distribution in Earth; mantle convection. Origin of the oceans and atmosphere. Same as ASTR 6630 and PHYS 6630.

[College of Arts & Sciences](#) [Geological Sciences](#) [Graduate Course](#)

---

## GEOL-6650 (1-3) Seminar in Geophysics

Advanced seminar studies in geophysical subjects for graduate students. Same as ASTR 6650 and PHYS 6650. May be repeated up to 6 total credit hours. Prerequisites: Restricted to Graduate Students only.

[College of Arts & Sciences](#) [Geological Sciences](#) [Graduate Course](#)

---

## GEOL-6670 (2) Geophysical Inverse Theory

Principles of geophysical inverse theory as applied to problems in the Earth sciences, including topography, Earth structure, and earthquake locations. Prereqs., calculus and computer programming (any language). Same as PHYS 6670.

College of Arts & Sciences Geological Sciences Graduate Course

## GEOL-6940 (1) Master's Degree Candidate

Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Geological Sciences Graduate Course

## GEOL-6950 (1-6) Master's Thesis

College of Arts & Sciences Geological Sciences Graduate Course

## GEOL-6960 (3) Plan II Master's Research

College of Arts & Sciences Geological Sciences Graduate Course

## GEOL-8990 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

GRMN

### GRMN-1010 (4) Beginning German 1

For students with no previous training in German. Credit not granted for this course and GRMN 1030.

[College of Arts & Sciences](#) [Germanic & Slavic Languages & Literature](#) [German](#)

### GRMN-1020 (4) Beginning German 2

Prereq., GRMN 1010 (min grade of C-). Credit not granted for this course and GRMN 1030.

[College of Arts & Sciences](#) [Germanic & Slavic Languages & Literature](#) [German](#)

### GRMN-1030 (5) Intensive Beginning German

Covers the same material as GRMN 1010 and GRMN 1020 in one course. Focuses on acquiring ability to understand and speak everyday German; on developing reading and writing skills; and on learning about the cultures of the German-speaking countries. Credit not granted for this course and GRMN 1010 and GRMN 1020.

[College of Arts & Sciences](#) [Germanic & Slavic Languages & Literature](#) [German](#)

### GRMN-1500 (3) German for Reading Knowledge

Designed especially for graduate students. Emphasizes analytical skills for acquiring reading proficiency in specialized and technical German in one's field of research. Recommended for pass/fail registration. Does not satisfy the arts and sciences foreign language requirement. Does not count towards the German major.

---

[College of Arts & Sciences](#) [Germanic & Slavic Languages & Literature](#) [German](#)

---

## GRMN-1601 (3) Germany Today

Introduces the culture of contemporary German-speaking central Europe, examining historical processes, social and political patterns, and the intellectual and artistic responses to problems of the 20th and 21st centuries. Taught in English. Approved for arts and sciences core curriculum: contemporary societies.

[College of Arts & Sciences](#) [Germanic & Slavic Languages & Literature](#) [German Courses Taught in Engl](#)

---

## GRMN-1602 (3) Metropolis and Modernity

An interdisciplinary introduction to the modern industrial city in Europe and the USA, with particular attention to the representation of urbanism in the visual arts. Taught in English. Approved for arts and sciences core curriculum: literature and the arts.

[College of Arts & Sciences](#) [Germanic & Slavic Languages & Literature](#) [German Courses Taught in Engl](#)

---

## GRMN-1701 (3) Nature and Environment in German Literature and Thought

Critically examines titles in German literature and thought. Nature and environment are used to explore alienation, artistic inspiration, nihilism, exploitation, sexuality, rural versus urban, meaning of the earth, cultural renewal, identity and gender. This "Green" survey of German classics spans Romanticism's conception of nature as unconscious spirit to the politics and values of contemporary Germany's Green Party. Taught in English. Same as HUMN 1701. Approved for arts and sciences core curriculum: ideals and values.

[College of Arts & Sciences](#) [Germanic & Slavic Languages & Literature](#) [German Courses Taught in Engl](#)

---

## GRMN-2010 (4) Intermediate German 1

Review and continuation of basic skills begun in the first year: reading, writing, speaking, and oral comprehension. Prereq., GRMN 1020 or 1030 (min grade C-). Meets MAPS requirement for foreign language. Satisfies arts and sciences language requirement. Credit not granted for this course and GRMN 2030.

[College of Arts & Sciences](#) [Germanic & Slavic Languages & Literature](#) [German](#)

---

## GRMN-2020 (4) Intermediate German 2

Prereq., GRMN 2010 (min grade C-). Credit not granted for this course and GRMN 2030.

[College of Arts & Sciences](#) [Germanic & Slavic Languages & Literature](#) [German](#)

---

---

---

---

## GRMN-2030 (5) Intensive Intermediate German

Covers the same material as GRMN 2010 and GRMN 2020 in one semester. Offers review and continuation of basic skills begun in the first year: reading, writing, speaking and oral comprehensive. Prereq., GRMN 1020 or GRMN 1030 (min grade C-), or instructor consent. Credit not granted for this course and GRMN 2010 and GRMN 2020. Meets MAPS requirement for foreign language. Approved for arts and sciences core curriculum: foreign language.

College of Arts & Sciences Germanic & Slavic Languages & Literature German

---

## GRMN-2301 (3) Inside Nazi Germany: Politics, Culture, and Everyday Life in the Third Reich

Examines social culture and everyday life in Nazi Germany. Topics include the role of propaganda in the media and entertainment industries, anti-Semitism and suppression of ethnic, social and religious minorities, the role of education and youth organizations, as well as the role of women, the churches, and the effects of a controlled economy before and during World War II. Taught in English. Approved for arts and sciences core curriculum: historical context.

College of Arts & Sciences Germanic & Slavic Languages & Literature German Courses Taught in Engl

---

## GRMN-2501 (3) 20th-Century German Short Story

Short stories by Thomas Mann, Kafka, Boell, and Grass, such as Death in Venice, Metamorphosis, and Cat and Mouse. Emphasizes literary themes, their traditions, and their cultural significance. Taught in English. Approved for arts and sciences core curriculum: literature and the arts.

College of Arts & Sciences Germanic & Slavic Languages & Literature German Courses Taught in Engl

---

## GRMN-2502 (3) Representing the Holocaust

Examines how the memory of the Holocaust in Nazi Germany is increasingly determined by the means of its representation, e.g., film, autobiography, poetry, architecture. Taught in English. Same as JWST 2502. Approved for arts and sciences core curriculum: ideals and values.

College of Arts & Sciences Germanic & Slavic Languages & Literature German Courses Taught in Engl

---

## GRMN-2503 (3) Fairy Tales of Germany

Explores the origins, cultural significance, stylistic and thematic features of the German fairy tale, with emphasis on the Brothers Grimm; on artistic fairy tales by Goethe, Tieck, Brentano, and others; and, on modern retellings in literature and popular culture. Taught in

English. Approved for arts and sciences core curriculum: literature and the arts.

College of Arts & Sciences Germanic & Slavic Languages & Literature German Courses Taught in Engl

---

---

## GRMN-2601 (3) Kafka and the Kafkaesque

Exposes the students to a wide selection of Kafka's literary output and aims to define the meaning of the Kafkaesque, by looking not only for traces of Kafka's influence in the verbal and visual arts, but also for traces left in Kafka's own work by his precursors in the literary tradition. Taught in English. Same as HUMN 2601. Approved for arts and sciences core curriculum: literature and the arts.

College of Arts & Sciences Germanic & Slavic Languages & Literature German Courses Taught in Engl

---

---

## GRMN-2603 (3) Moral Dilemmas in Philosophy and Literature

Examines the moral dilemmas that arise when opportunities afforded by basic freedoms or advances in technology clash with the ethical imperatives that issue from the Enlightenment and the social contract. Guiding questions include: When does the quest for knowledge legitimate transgression of prevailing morality? By what standard do we adjudicate the ambitions of the individual when they compete with the interests of the state? Taught in English. Approved for art and sciences core curriculum: ideals and values.

College of Arts & Sciences Germanic & Slavic Languages & Literature German Courses Taught in Engl

---

---

## GRMN-3010 (3) Advanced German 1

Reviews special grammatical topics, reading, and conversation. Students have the option of taking the internationally recognized exam Zertifikat Deutsch in GRMN 3010. Prereq., four semesters of college German or equivalent. Open to freshmen with instructor consent.

College of Arts & Sciences Germanic & Slavic Languages & Literature German

---

---

## GRMN-3020 (3) Advanced German 2

Expands and refines skills acquired in GRMN 3010. Students acquire a varied, precise, and idiomatically advanced vocabulary; an understanding of different registers, from the casual to the very formal; and an ability to communicate effectively in spoken and written German in a variety of social situations, including professional life. Prereq., GRMN 3010 or instructor consent.

College of Arts & Sciences Germanic & Slavic Languages & Literature German

---

---

## GRMN-3030 (3) Business German

Introduces students to the language of German business and economic life. Provides insights into everyday business practices and institutions, including Germany's position in the European and world markets. Emphasizes acquiring basic business vocabulary and

---

writing business letters and resumes in German. Prepares students for the exam Deutsch fuer den Beruf, a diploma recognized worldwide by business and industry. Prereq., GRMN 2020 or instructor consent.

College of Arts & Sciences Germanic & Slavic Languages & Literature German

---

## GRMN-3110 (3) German Literature from the Avant-garde to the Postmodern

Examines selected literary texts. Emphasizes longer unedited texts as well as critical skills. May be taken either before or after GRMN 3120. Prereq., GRMN 2020 or equivalent, or instructor consent.

College of Arts & Sciences Germanic & Slavic Languages & Literature German

---

## GRMN-3120 (3) German Literature from the Enlightenment to Expressionism

Examines selected literary texts of various periods. Emphasizes longer texts and critical skills. May be taken either before or after GRMN 3110. Prereq., GRMN 2020 or equivalent, or instructor consent.

College of Arts & Sciences Germanic & Slavic Languages & Literature German

---

## GRMN-3130 (3) Issues in German Philosophy and Literature

Examines selected interdisciplinary texts from the German literary and philosophical tradition. Topics address issues central to philosophical inquiry, and may include knowledge and its limits, mind and body, determinism and free will, reason and religious belief, and ethical problems. Prereqs., GRMN 2020 and 2030, or equivalent.

College of Arts & Sciences Germanic & Slavic Languages & Literature German

---

## GRMN-3140 (3) Current Issues in German Literature

Examines issues pervading contemporary German literature, such as concerns of youth, gender, stereotyping as it affects women and men in their relations with one another, loneliness and sexual frustration, work experiences, and other issues. Prereq., ability to read unedited German and to speak German.

College of Arts & Sciences Germanic & Slavic Languages & Literature German

---

## GRMN-3150 (3) Issues in German Politics and Literature

Examines literary and theoretical texts in German about the relationship between literature and politics. Topics may include history and revolution, political theater, feminist aesthetics, or terrorism. Readings and discussion in German. Prereqs., GRMN 2020 and GRMN

2030, or equivalent.

[College of Arts & Sciences](#) [Germanic & Slavic Languages & Literature](#) [German](#)

---

---

## GRMN-3501 (3) German-Jewish Writers: From the Enlightenment to the Present

Provides insight into the German-Jewish identity through essays, autobiographies, fiction, and journalism from the Enlightenment to the post-Holocaust period. Examines the religious and social conflicts that typify the history of Jewish existence in German-speaking lands during the modern epoch. Taught in English. Same as JWST 3501. Approved for arts and sciences core curriculum: human diversity.

### GRMN-3502 (3) Literature in the Age of Goethe

Features the writings of Germany's major literary figures from 1749 to 1832. Special attention is paid to the formation of literary periods, genres, aesthetic, and socio-historical developments contributing to the birth of modernism in German intellectual history and literature. Taught in English. Approved for arts and sciences core curriculum: literature and the arts.

[College of Arts & Sciences](#)

[Germanic & Slavic Languages & Literature](#)

[German Courses Taught in Engl](#)

### GRMN-3503 (3) German Film Through World War II

History and theory of Weimar and Nazi film with sociocultural emphasis. Taught in English. Same as FILM 3503.

[College of Arts & Sciences](#)

[Germanic & Slavic Languages & Literature](#)

[German Courses Taught in Engl](#)

### GRMN-3504 (3) Topics in German Film

A comparative analysis of key issues in German culture as they are represented in film and other media, e.g., technology, architecture, women, and the Holocaust. May be repeated up to 6 total credit hours when topic varies. Taught in English. Same as FILM 3504.

[College of Arts & Sciences](#)

[Germanic & Slavic Languages & Literature](#)

[German Courses Taught in Engl](#)

### GRMN-3505 (3) The Enlightenment: Tolerance and Emancipation

Examines Enlightenment notions of reason, humanity, and social progress. Topics include 18th century views on government, science, education, religion, slavery, and gender roles. Taught in English. Same as HUMN 3505. Approved for arts and sciences core curriculum:

ideals and values.

College of Arts & Sciences Germanic & Slavic Languages & Literature German Courses Taught in Engl

## GRMN-3513 (3) German Film and Society 1945-1989

Introduces issues in German society through film during the Cold War. Focus on East and West Germany, though some other German language films may be included. Emphasis is on reading films in their social, historical, and political contexts. Taught in English. Same as FILM 3513.

College of Arts & Sciences Germanic & Slavic Languages & Literature German Courses Taught in Engl

## GRMN-3514 (3) German Film & Society After 1989

Introduces post-1989 German culture through film. The course emphasizes films in their socio-historical contexts and explores developments in German culture during and after the unification. Taught in English. Same as FILM 3514.

College of Arts & Sciences Germanic & Slavic Languages & Literature German Courses Taught in Engl

## GRMN-3520 (3) Open Topics in the Cultural Context

Examines topics in the cultures of German-speaking central Europe. Contact the departmental office for specific course offerings. May be repeated up to 6 total credit hours when topic varies. Prereq., GRMN 3020 or equivalent, or instructor consent.

College of Arts & Sciences Germanic & Slavic Languages & Literature German

## GRMN-3601 (3) German Women Writers

Explores writing by German/Austrian women from 1945 to the present, with special attention to the representation of the Holocaust, the continuation of avant-garde traditions, innovations in literary form, and feminism. Visual arts, film, and feminist theory will also be considered in their relation to literature. Taught in English. Same as WMST 3601. Approved for arts and sciences core curriculum: human diversity.

College of Arts & Sciences Germanic & Slavic Languages & Literature German Courses Taught in Engl

## GRMN-3702 (3) Dada and Surrealist Literature

Surveys the major theoretical concepts and literary genres of the Dada and Surrealist movements. Topics include Dada performance and cabaret, the manifesto, montage, the ready made, the Surrealist novel, colonialism and the avant-garde, and literary and philosophical precursors to the avant-garde. Taught in English. Same as HUMN 3702. Approved for arts and sciences core curriculum: literature and

the arts.

College of Arts & Sciences Germanic & Slavic Languages & Literature German Courses Taught in Engl

---

---

## GRMN-3802 (3) Politics and Culture in Berlin 1900-1933

Examines early 20th century German culture, with emphasis on the Weimar Republic (1918-1933) in light of contemporaneous political discussions. The course presents modern art and literature (Expressionism, Dada, Brecht's epic theater) and architecture and design (Bauhaus, Werkbund) as well as political movements of women, sexual minorities, and Berlin's Jewish communities. Taught in English. GRMN 3802 and HUMN 3802 are the same course. Offered through CU Study Abroad Program. Approved for arts and sciences core curriculum: literature and the arts.

College of Arts & Sciences Germanic & Slavic Languages & Literature German Courses Taught in Engl

---

---

## GRMN-3900 (1-6) Independent Study

May be repeated up to 6 total credit hours.

College of Arts & Sciences Germanic & Slavic Languages & Literature German

---

---

## GRMN-3930 (1-6) Internship

Provides an academically supervised opportunity for upper-division students to earn credit while working for public or private organizations. Students apply skills and knowledge earned in the major, and supplement their work experience through directed readings and assignments. May be repeated up to 6 total credit hours. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) German Studies (GRMN) majors only.

College of Arts & Sciences Germanic & Slavic Languages & Literature German

---

---

## GRMN-4010 (3) Advanced Grammar and Stylistics

Offers a complete final review of German grammar and syntax and its more complex aspects. Prepares students for the Goethe-Zertifikat C1. Prereq., GRMN 3020 or instructor consent.

College of Arts & Sciences Germanic & Slavic Languages & Literature German

---

---

## GRMN-4051 (3) Critical Theory of the Frankfurt School

Serves as an introduction to the "Frankfurt School" and Critical Theory with particular emphasis upon rationality, social psychology, cultural criticism, and aesthetics. Through close readings of key texts by members of the school (Horkheimer, Benjamin, Adorno, Habermas) we will work toward a critical understanding of the analytical tools they developed and consider their validity. Taught in

English. GRMN 4051, 5051 and COML 5051 are the same course.

[College of Arts & Sciences](#) [Germanic & Slavic Languages & Literature](#) [German Courses Taught in Engl](#)

---

---

## GRMN-4251 (3) Marxism

Historical and systematic study of principal themes of Marxist thought, from its Hegelian origins to its contemporary varieties, emphasizing the works of Marx and Engels. Taught in English. Prereq., 12 hours of GRMN or PHIL course work or instructor consent. Same as PHIL 4250. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

[College of Arts & Sciences](#) [Germanic & Slavic Languages & Literature](#) [German Courses Taught in Engl](#)

---

---

## GRMN-4253 (3) Philosophy of Language

Surveys seminal essays from Frege to the present on the philosophy of language. Taught in English.

[College of Arts & Sciences](#) [Germanic & Slavic Languages & Literature](#) [German Courses Taught in Engl](#)

---

---

## GRMN-4301 (3) Gender, Race and Immigration in Germany and Europe

Introduce students to debates surrounding migration and race in contemporary Germany. Emphasis on reading texts in context using tools of cultural studies, integrating analyses of gender, race, nation, and sexuality. Texts may include film, literature, television, magazine images, etc. Topics include: questioning "multiculturalism," self-representation, integration, Islam, citizenship, violence, public space, youth culture, racism and nationalism. Taught in English. Same as GRMN 5301 and WMST 4301. Approved for arts and sciences core curriculum: human diversity.

[College of Arts & Sciences](#) [Germanic & Slavic Languages & Literature](#) [German Courses Taught in Engl](#)

---

---

## GRMN-4330 (3) The Age of Goethe

German literature from 1770 to 1830. Close examination of representative texts from the periods of Sturm und Drang, classicism, and romanticism. Emphasizes philosophical and social background. Prereq., GRMN 3020 or instructor consent.

[College of Arts & Sciences](#) [Germanic & Slavic Languages & Literature](#) [German](#)

---

---

## GRMN-4340 (3) Seminar in German Literature

Intensive study of a particular literary period, author, or genre. Secondary sources are used. Course content differs each time. May be repeated up to 6 total credit hours when topic varies. Prereq., GRMN 3020 or instructor consent.

[College of Arts & Sciences](#) [Germanic & Slavic Languages & Literature](#) [German](#)

## GRMN-4450 (3) Methods of Teaching German

Required of students who desire the recommendation of the department for secondary school teaching positions. For student teaching in German, see EDUC 4712 under the School of Education. Restricted to students who have been admitted to the teacher education program in the School of Education. Prerequisites: Restricted to EDUC Majors only.

## GRMN-4460 (6) High School German Teaching

Part of the supervised student teaching in a secondary school required for state certification to teach German. Restricted to students who have been admitted to the teacher education program in the School of Education. Prerequisites: Restricted to EDUC Majors only.

## GRMN-4501 (3) Seminar: Literature in Cultural Context

Provides a broader basis for the work of literature, viewing it from various cultural perspectives. Specific content of course is defined by the instructor. May be repeated up to 6 total credit hours when topic varies. Taught in English.

## GRMN-4502 (3) Nietzsche: Literature and Values

Emphasizes Nietzsche's major writings from 1872 to 1888 with particular attention to the critique of Western values. Includes a systematic exploration of doctrines, concepts, and ideas leading to the values of creativity. Taught in English. Same as HUMN 4502. Approved for arts and sciences core curriculum: ideals and values. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

## GRMN-4503 (3) Issues in German Thought

Provides the opportunity to examine major issues in German philosophical, social, and religious thought from the end of German idealism to existentialism and critical theory. Emphasizes the relationship between ideas and social and political action. May be repeated up to 6 total credit hours when topic varies. Taught in English.

## GRMN-4504 (3) Goethe's Faust

Systematic study of the Faust motif in Western literature, with major emphasis on Faust I and II by Goethe and Thomas Mann's Doctor Faustus. Taught in English. Same as GRMN 5504, COML 5504 and HUMN 4504. Approved for arts and sciences core curriculum: literature and the arts.

### GRMN-4550 (3) Senior Seminar: The Roles of Intellectuals and Academics in German Culture

Examines the articulation of the German bourgeoisie during critical periods in German history. Looks at specific groups and their participation in German public culture, e.g., writers, artists, journalists, academics, and political figures. Students work closely with a faculty advisor during the semester and are expected to produce a major research paper. Prereq., GRMN 3020 or instructor consent. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) German (GRMN) or School of Education (EDUC) majors only.

[College of Arts & Sciences](#) [Germanic & Slavic Languages & Literature](#) [German](#)

### GRMN-4900 (1-6) Independent Study

May be repeated up to 6 total credit hours.

[College of Arts & Sciences](#) [Germanic & Slavic Languages & Literature](#) [German](#)

### GRMN-5010 (3) Bibliography and Methods of Research

Required of all German MA students. Training in the use of reference works for conducting research in the humanities and social sciences. Analysis of, and hands-on practice with, bibliographic tools specific to German, as well as reference tools inclusive of German-area materials but broader in their scope. Students learn proper procedure for manuscript preparation and submission. Prereq., graduate standing or instructor consent.

[College of Arts & Sciences](#) [Germanic & Slavic Languages & Literature](#) [German Graduate Courses](#)

---

## GRMN-5020 (3) Applied Linguistics and Foreign Language Teaching Methodology

Required of all graduate teaching assistants, this course provides a knowledge of the aspects of German linguistics that are important for teaching German and a survey of foreign language teaching methods and second language acquisition research. Prereq., graduate standing or instructor consent. Prerequisites: Restricted to Graduate Students only.

[College of Arts & Sciences](#) [Germanic & Slavic Languages & Literature](#) [German Graduate Courses](#)

---

## GRMN-5030 (3) Foundations of Critical Theory

An introductory study of nineteenth-century German philosophy (especially Kant, Hegel, and Marx). Required course for the graduate certificate in Critical Theory. GRMN 5030 and COML 5030 are the same course.

[College of Arts & Sciences](#) [Germanic & Slavic Languages & Literature](#) [German Graduate Courses](#)

---

## GRMN-5051 (3) Critical Theory of the Frankfurt School

Serves as an introduction to the "Frankfurt School" and Critical Theory with particular emphasis upon rationality, social psychology, cultural criticism, and aesthetics. Through close readings of key texts by members of the school (Horkheimer, Benjamin, Adorno, Habermas) we will work toward a critical understanding of the analytical tools they developed and consider their validity. Taught in English. GRMN 4051, 5051 and COML 5051 are the same course.

[College of Arts & Sciences](#) [Germanic & Slavic Languages & Literature](#) [German Courses Taught in Engl](#)

---

## GRMN-5210 (3) Seminar: The Age of Enlightenment

Examines the influence of the emerging middle class on the transformation of aesthetic and societal values. Major works of theory, philosophy, literature, and criticism by Lessing, Herder, Kant, J. E. Schlegel, and others. Examines major literary and cultural influences from France and Great Britain. Prereq., graduate standing or instructor consent.

[College of Arts & Sciences](#) [Germanic & Slavic Languages & Literature](#) [German Graduate Courses](#)

---

## GRMN-5220 (3) Seminar: Topics in the Age of Goethe

Examines various aspects of German-speaking society from the 1770s to 1830s. Topics may include Sturm und Drang as social commentary; romantic theory in the wake of the French Revolution; romantic nationalism; the Faust theme; Weimar as a cultural center; and others. May be repeated up to 6 total credit hours when topic varies. Prereq., graduate standing or instructor consent. Prerequisites: Restricted to Graduate Students only.

[College of Arts & Sciences](#) [Germanic & Slavic Languages & Literature](#) [German Graduate Courses](#)

---

---

## GRMN-5301 (3) Gender, Race, and Immigration in Germany and Europe

Introduces students to debates surrounding migration and race in contemporary Germany. Emphasis on reading texts in context using tools of cultural studies, integrating analyses of gender, race, nation, and sexuality. Texts may include film, literature, television, magazine images, etc. Topics include: questioning "multiculturalism," self-representation, integration, Islam, citizenship, violence, public space, youth culture, racism and nationalism. Taught in English. Same as GRMN 4301.

[College of Arts & Sciences](#) [Germanic & Slavic Languages & Literature](#) [German Graduate Courses](#)

---

## GRMN-5310 (3) Seminar: Topics in the 19th Century

Examines the transformation of realism from Buechner to Gerhart Hauptmann. Topics may include literary responses to the Restoration; intellectuals and the Revolution of 1848; philosophy and literature; theatrical representations of woman, family, and gender; and others. May be repeated up to 6 total credit hours when topic varies. Prereq., graduate standing or instructor consent. Prerequisites: Restricted to Graduate Students only.

[College of Arts & Sciences](#) [Germanic & Slavic Languages & Literature](#) [German Graduate Courses](#)

---

## GRMN-5320 (3) Seminar: The German Novel from 1901--1956

Beginning with T. Mann's *Buddenbrooks*, charts the rise of the German novel in the early 20th century and examines such topics as Wilhelminian society; intellectuals and World War I; dehumanization and alienation; national socialism and literary exile; and others. Authors include T. Mann, H. Hesse, R. Rilke, F. Kafka, A. Seghers, and A. Zweig. Prereq., graduate standing or instructor consent.

[College of Arts & Sciences](#) [Germanic & Slavic Languages & Literature](#) [German Graduate Courses](#)

---

## GRMN-5330 (3) Seminar: German Intellectuals and Society Between the Wars

Examines the period of social crisis and the intellectual responses to the collapse of the prewar order. Gives attention to the antidemocratic thought of Spengler, Juenger, Stefan George and his circle, to the emergence of existentialism with Scheler and Heidegger, and to the search for a new political humanism as evidenced by the work of Thomas Mann. Prereq., graduate standing or instructor consent.

[College of Arts & Sciences](#) [Germanic & Slavic Languages & Literature](#) [German Graduate Courses](#)

---

## GRMN-5410 (3) Seminar: Topics in Early 20th Century German Society

Focuses on major issues, events, movements, and figures prior to World War II. Topics may include the ontology of lyric poetry; Berlin in the 1920s; exiles, their communities, and their writings; women writers from Andreas-Salome to Anna Seghers; topics in German film; and others. May be repeated up to 6 total credit hours when topic varies. Prereq., graduate standing or instructor consent. Prerequisites: Restricted to Graduate Students only.

[College of Arts & Sciences](#) [Germanic & Slavic Languages & Literature](#) [German Graduate Courses](#)

---

## GRMN-5420 (3) Seminar: Topics in Later 20th Century German Society

Analyzes major currents and events such as the Holocaust, coming to terms with the past (Vergangenheitsbewältigung), German Democratic Republic (GDR) literature, and responses to the reunification. Topics may include the Austrians from Anschluss to Haider; Paul Celan; East German writers between Wolf Biermann and Christa Wolf; topics in German film; and others. May be repeated up to 6 total credit hours when topic varies. Prereq., graduate standing or instructor consent.

[College of Arts & Sciences](#) [Germanic & Slavic Languages & Literature](#) [German Graduate Courses](#)

---

## GRMN-5504 (3) Goethe's Faust

Systematic study of the Faust motif in Western literature, with major emphasis on Faust I and II by Goethe and Thomas Mann's Doctor Faustus. Taught in English. Same as GRMN 4504 and COML 5504. Prerequisites: Restricted to Graduate Students only.

[College of Arts & Sciences](#) [Germanic & Slavic Languages & Literature](#) [German Graduate Courses](#)

---

## GRMN-5510 (3) Seminar: Open Topics in German Civilization

Focuses on cultural issues that cross lines of literary periodization. Topics may include the theater as social criticism from Lessing to Handke; forms of German protest from Luther to Thomas Mann; nihilism from Bonaventura to Thomas Bernhard; topics in German film; and others. May be repeated up to 6 total credit hours when topic varies. Prereq., graduate standing or instructor consent.

[College of Arts & Sciences](#) [Germanic & Slavic Languages & Literature](#) [German Graduate Courses](#)

---

## GRMN-5520 (3) Seminar: Current Issues in German Literature and Media

Examines issues pervading contemporary German literature and media, such as concerns of youth, xenophobia, stereotyping as it affects women and men in their relations, work experience, feminism, problems connected with the reunification, and other issues. Prereq., graduate standing or instructor consent.

[College of Arts & Sciences](#) [Germanic & Slavic Languages & Literature](#) [German Graduate Courses](#)

---

## GRMN-5900 (1-6) Independent Study

May be repeated up to 6 total credit hours. Prereq., graduate standing or instructor consent. Prerequisites: Restricted to Graduate Students only.

[College of Arts & Sciences](#) [Germanic & Slavic Languages & Literature](#) [German Graduate Courses](#)

---

## GRMN-6900 (1-6) Master's Thesis

May be repeated up to 6 total credit hours. Prereq., graduate standing or instructor consent. Prerequisites: Restricted to Graduate Students only.

[College of Arts & Sciences](#) [Germanic & Slavic Languages & Literature](#) [German Graduate Courses](#)

---

---

GSAP

## GSAP-1000 (3) World Politics and Society

Explores the history leading up to-and away from-the attacks of 9/11 within an American framework. Topics to be covered include: America's relationship with key countries since 1945; the rise of Muslim extremism; modern terrorism and its meaning; the importance of oil; and the events of 9/11 and the Bush Administration's response to it, at home and abroad. Restricted to G-RAP students.

[College of Arts & Sciences](#) [Global Studies Residential Academic Program](#)

## GSAP-1500 (1) Community Engagement

Facilitates community-level service and volunteer opportunities in the University, Boulder-Denver area, and Colorado communities for first-year students. Participants will learn how to conduct basic community research and will design their own volunteer, service, or internship plan in conjunction with the instructor and the class, targeting a university center, community nonprofit, local business, government agency, or international institution.

[College of Arts & Sciences](#) [Global Studies Residential Academic Program](#)

## GSAP-2010 (3) Introduction to National Security

Introduces national and international security studies to students. The course examines the influence of history, domestic politics, and international events and actors on the development of security policy. Restricted to G-RAP students.

[College of Arts & Sciences](#) [Global Studies Residential Academic Program](#)

## GSAP-2020 (3) Topics in National Security

Intensive look at specific security issues. This course focuses on the specifics of policy development related to functional issues (political, military, and non-traditional ) as well as threats within specific regions. In addition to class, each student will focus on an issue of their choosing. Recommended prereq., GSAP 2010. Restricted to G-RAP students.

[College of Arts & Sciences](#) [Global Studies Residential Academic Program](#)

---

---

## GSAP-2500 (3) Global Society: The International Rights of the Child

Students will employ tools of social science research to engage in critical thinking about human rights as they apply to children in a global context. A variety of interrelated questions will be addressed such as: What are human rights? Do children have rights that are distinct from the rights of adults? What human rights challenges do children face around the world? A variety of global challenges to the rights of children will be considered, with special focus on issues of child trafficking and participation in armed conflict.

[College of Arts & Sciences](#) [Global Studies Residential Academic Program](#)

---

---

## GSAP-3000 (3) Historic and Contemporary Barcelona

Students will be invited to link their own knowledge of and experiences in Boulder, Colorado, and the United States to Barcelona, Catalonia and Spain-all within the larger framework of globalization. Key themes include national and imperial history, peace and security, trade and economics, and the mosaic of cultures that comprise Barcelona, Catalonia, and Spain as seen through the arts, governance, and diplomacy.

GSL

## GSL-3401 (3) The Heart of Europe: Filmmakers and Writers in 20th Century Central Europe

Surveys the major works of 20th century central and central east European film and literature. Examines cultural production in the non-imperial countries and non-national languages of the region including Yiddish, Belarusian, Czech, Hungarian, Polish and Romanian, among others. Traces the rise of nationalism over the course of the century from the age of empires through the "Cold War." Taught in English. Same as JWST 3401.

[College of Arts & Sciences](#)
[Germanic & Slavic Languages & Literature](#)
[Germanic and Slavic Courses](#)

## GSL-5230 (3) Russian Cultural Idioms

Focuses on the critical analysis of the Russian cultural discourse through Russian idioms. Taught in Russian. Same as RUSS 4230.

[College of Arts & Sciences](#)
[Germanic & Slavic Languages & Literature](#)
[Germanic and Slavic Courses](#)

## GSL-5352 (3) Russian Novel: Theory and Practice

Examines the Russian novel and its evolution as well as Western and Russian theories of the novel as they engage and reflect upon the claims of modernity. Taught in English. May be repeated up to 6 total credit hours. Same as COML 5352.

[College of Arts & Sciences](#)
[Germanic & Slavic Languages & Literature](#)
[Germanic and Slavic Courses](#)

---

## GSSL-5421 (3) Gogol

Explores major fictional and dramatic texts of great Russian writer Nikolai Vasil'evich Gogol (1809-52) -- "The strangest prose-poet Russia ever produced" (Nabokov). Works will be analyzed in the context of Western and Russian Romanticism. Relevant nonfiction texts will also be introduced when appropriate. Class will be run largely as group discussion, with necessary historical and critical background provided. Taught in English. Recommended prereq., RUSS 4811.

[College of Arts & Sciences](#) [Germanic & Slavic Languages & Literature](#) [Germanic and Slavic Courses](#)

---

## GSSL-5431 (3) Dostoevsky

Focuses on close reading of major novels and other works by Dostoevsky, one of the most important psychological novelists in modern literature, a profound religious thinker, and the greatest crime novelist in the world. Taught in English. Same as RUSS 4431.

[College of Arts & Sciences](#) [Germanic & Slavic Languages & Literature](#) [Germanic and Slavic Courses](#)

---

## GSSL-5441 (3) Tolstoy

Examines the development of Tolstoy's thought and literary style through study of the novel War and Peace and short works from different periods of Tolstoy's writing. Taught in English. Same as RUSS 4441.

[College of Arts & Sciences](#) [Germanic & Slavic Languages & Literature](#) [Germanic and Slavic Courses](#)

---

## GSSL-5451 (3) Chekhov

Analyzes the life and creative works of the author of some of the funniest and some of the gloomiest stories in Russian literature. Examines Chekhov's major plays that laid the foundation for modernist theatre. Taught in English. Same as RUSS 4451.

[College of Arts & Sciences](#) [Germanic & Slavic Languages & Literature](#) [Germanic and Slavic Courses](#)

---

## GSSL-5471 (3) Women in 20th Century Russian Culture

Acquaints students with major issues concerning women in 20th century Russian culture. Examines sources from folk culture, popular culture, and high culture (poetry, prose, songs, tales, visual art, and cinema) that mythologize or question women's images and societal roles. All texts and films are offered in English translation. Taught in English. Same as RUSS 4471 and WMST 4471.

[College of Arts & Sciences](#) [Germanic & Slavic Languages & Literature](#) [Germanic and Slavic Courses](#)

---

## GSSL-5830 (3) Topics in Literature and History

May be repeated up to 6 total credit hours. Taught in English. Same as COML 5830.

## GSSL-5851 (3) Critical Thinking: Russian Film and Society

Through structured discussions, selected readings, and written assignments, examines topics in Russian film from socio-historical and cultural studies perspectives. Identification and critical analysis of concepts and assumptions underlying differing cinematic approaches to controversial topics. Taught in English. Same as RUSS 4851.

## GSSL-5861 (3) Absurd and Supernatural in Russian Literature

Studies themes of grotesque, bizarre, surreal, absurd, supernatural, and fantastic in Russian short stories and novels of the 19th and 20th centuries. Discusses works by Pushkin, Gogol, Dostoevsky, Kharmis, Bulgakov, Siniavskii, Petrushevskaia, and Pelevin, within contexts of Russian folklore, Freud and Jung's interpretations of jokes and dreams, and Romanticism. Recommended prereq., one upper division humanities course. Taught in English. Same as RUSS 4861.

## GSSL-5900 (1-6) Independent Study

May be repeated up to 6 total credit hours. Prereq., graduate standing or instructor consent required. Prerequisites: Restricted to Graduate Students only.

HEBR

## HEBR-1010 (4) Beginning Hebrew 1

First semester Hebrew is a beginning level course designed for students who have little or no prior knowledge of Hebrew. Begins with learning the Hebrew alphabet and immediately starts developing rudimentary Hebrew conversational, reading and writing skills. By the end of the semester students are expected to have attained basic understanding and expressive abilities in Hebrew.

[College of Arts & Sciences](#) [Germanic & Slavic Languages & Literature](#) [Hebrew](#)

## HEBR-1020 (4) Beginning Hebrew 2

Second semester builds on Hebrew skills introduced in the first semester, with a focus on speaking, comprehension, reading and writing. Students learn new verbal tenses and paradigms. The course blends a communicative method with formal grammatical instruction. By the end of this semester students are expected to be able to converse in, comprehend, and produce written basic Hebrew. Prereq., HEBR 1010 (min. grade C-) or instructor consent.

[College of Arts & Sciences](#) [Germanic & Slavic Languages & Literature](#) [Hebrew](#)

## HEBR-1030 (3) Biblical Hebrew 1

This course is designed to enable students to read the Hebrew Bible in the original language. The focus will be the ability to read the various genres of the text, utilizing both the tools of modern language acquisition and the study of classical grammar methods. Same as JWST 1030.

[College of Arts & Sciences](#) [Germanic & Slavic Languages & Literature](#) [Hebrew](#)

## HEBR-1040 (3) Biblical Hebrew 2

Building on HEBR/JWST 1030, this course continues to build expertise in reading the Hebrew Bible. Modern language acquisition and classical grammar study methods equip students with the tools to translate and read the various genres of the Biblical material. Prereq., HEBR/JWST 1030 or instructor consent. HEBR 1040 and JWST 1040 are the same course.

College of Arts & Sciences Germanic & Slavic Languages & Literature Hebrew

---

## HEBR-2110 (4) Intermediate Hebrew 1

Third semester Hebrew builds on skills introduced in the first two semesters and focuses on speaking, comprehension, reading and writing. Students learn new verbal tenses and paradigms, modes of expression and syntactical forms. The course blends a communicative method with formal grammatical instruction. By the end of the semester students are expected to be able to converse in, comprehend, and produce written Hebrew at an intermediate level. Meets MAPS requirement for foreign language. Prereq., HEBR 1020 (min. grade C-) or instructor consent.

College of Arts & Sciences Germanic & Slavic Languages & Literature Hebrew

---

## HEBR-2120 (4) Intermediate Hebrew 2

Focuses on texts, while still developing speaking, comprehension and writing skills. Students build on grammatical understanding while learning some of the more sophisticated verbal paradigms and nominal patterns. The course blends a communicative method with some formal grammatical instruction. By the end of this semester students are expected to converse in, comprehend, and produce written Hebrew at an intermediate level. Prereq., HEBR 2110 (min. grade C-) or instructor consent.

College of Arts & Sciences Germanic & Slavic Languages & Literature Hebrew

---

## HEBR-2350 (3) Introduction to Jewish Culture

Explores the development and expressions of Jewish culture as it moves across the chronological and geographical map of the historic Jewish people, with an emphasis on the variety of Jewish ethnicities and their cultural productions, cultural syncretism, and changes. Sets the discussion in a historical context, and looks at cultural representations that include literary, religious, and visual texts. Taught in English. Same as JWST 2350. Approved for arts and sciences core curriculum: human diversity.

College of Arts & Sciences Germanic & Slavic Languages & Literature Hebrew

---

## HEBR-2352 (3) Introduction to Modern Jewish History

Explores the major historical events and socio-cultural themes in modern Jewish history including the French Revolution, the rise of modern anti-semitism, the international migration of Jews, the Holocaust, and the establishment of Israel. Taught in English. Recommended prereq., HEBR 2350.

College of Arts & Sciences Germanic & Slavic Languages & Literature Hebrew

---

---

## HEBR-2551 (3) Secular Jewish Literature, Modern to Contemporary Jews Coming of Age

Studies the literary expression of Jewish writers throughout the world in English translation. Gives special attention to questions of secularity versus tradition, identity, cultural change, diaspora and exile. Taught in English. HEBR 2551 and JWST 2551 are identical courses. Approved for arts and sciences core curriculum: literature and the arts. Approved for arts and sciences core curriculum: literature and the arts.

College of Arts & Sciences Germanic & Slavic Languages & Literature Hebrew

---

## HEBR-3010 (3) Third Year Hebrew, First Semester

Focuses on students' active Hebrew language skills acquired in the first four semesters of Hebrew at CU Boulder in weekly conversation and composition sessions. Develops grammatical understanding with a further exploration of the root, verbal and noun systems. Students are introduced to texts in contemporary Hebrew fiction and poetry, as well as some biblical readings. Prereq., HEBR 2120 (min grade C-) or instructor consent.

College of Arts & Sciences Germanic & Slavic Languages & Literature Hebrew

---

## HEBR-3020 (3) Third Year Hebrew, Second Semester

Focuses on students' Hebrew language skills acquired in the first five semesters of Hebrew at CU Boulder in weekly conversation and composition sessions. Develops grammatical understanding with a further exploration of the root, verbal and noun systems. Students are introduced to texts in contemporary Hebrew fiction and poetry, as well as some biblical readings, academic texts and Israeli newspapers. Prereq., HEBR 3010 (minimum grade C-) or instructor consent.

College of Arts & Sciences Germanic & Slavic Languages & Literature Hebrew

---

## HEBR-3202 (3) Women, Gender & Sexuality in Jewish Texts & Traditions

Reads some of the ways Jewish texts and traditions look at women, gender and sexuality from biblical times to the present. Starts with an analysis of the positioning of the body, matter and gender in creation stories, moves on to the gendered aspects of tales of rescue and sacrifice, biblical tales of sexual subversion and power, taboo-breaking and ethnos building, to rabbinic attitudes towards women, sexuality and gender and contemporary renderings and rereadings of the earlier texts and traditions. Taught in English. Same as JWST 3202. Approved for arts and sciences core curriculum: human diversity.

College of Arts & Sciences Germanic & Slavic Languages & Literature Hebrew

---

---

## HEBR-3840 (3) Independent Study

Prereqs., HEBR 1010, 1020, 2110, and 2120.

College of Arts & Sciences Germanic & Slavic Languages & Literature Hebrew

## HEBR-3850 (3) Independent Study

Prereqs., HEBR 1010, 1020, 2110, 2120, and 3840.

College of Arts & Sciences Germanic & Slavic Languages & Literature Hebrew

## HEBR-4101 (3) Topics in Hebrew Studies

Explores topics in Hebrew and Jewish literature and cultures. These may include topics such as diasporic literatures, Jewish artists and thinkers, courses on specific authors, figures or communities. Topics change each semester. May be repeated up to 9 total credit hours. Taught in English. HEBR 4101 and JWST 4101 are the same course.

College of Arts & Sciences Germanic & Slavic Languages & Literature Hebrew

## HEBR-4301 (3) Venice: the Cradle of European Jewish Culture.

Explores the development of European Jewish culture from the late Middle Ages to the present by focusing on Jewish life in the city of Venice, Italy. Emphasis is on the development of Venetian print culture and emergence of Italy as a center of Jewish publishing in both the religious and secular world. The course examines a variety of cultural and historical material including early printings of the Talmud, the creation of Yiddish popular literature, Hebrew rabbinic literature, responses to political turmoil, and the aftermath of the Nazi genocide. Taught in English. Prereq., HEBR/JWST 2350. HEBR 4301 and JWST 4301 are the same course. Approved for arts and sciences core curriculum: literature and the arts.

HIND

## HIND-1010 (5) Beginning Hindi 1

Provides a thorough introduction to the modern Hindi language, emphasizing speaking, listening, reading, and writing skills. This course is proficiency-based. Activities aim to place the student in the context of the native-speaking environment from the very beginning. Students will be provided with opportunities to participate in local South Asian cultural events. Credit not granted for this course and ASIA 1420. Formerly HNDI 1010.

[College of Arts & Sciences](#) [East Asian Languages & Civilizations](#) [Hindi](#)

## HIND-1011 (3) Introduction to South Asian Civilizations

Survey of traditional and modern world views and experiences of people on the Indian subcontinent through literature and film, beginning with the Ramayana and including medieval tales, modern novels, and feature films. Formerly HNDI 1011. Approved for arts and sciences core curriculum: human diversity.

[College of Arts & Sciences](#) [East Asian Languages & Civilizations](#) [Hindi](#)

## HIND-1020 (5) Beginning Hindi 2

Continuation of HNDI 1010. Provides a thorough introduction to the modern HNDI language, emphasizing speaking, listening, reading and writing skills. Proficiency-based course aims to place the student in the context of the native-speaking environment from the beginning of the course. Provides opportunities to participate in local South Asian cultural activities and events. Prereq., HNDI 1010 (min. grade C). Formerly HNDI 1020.

[College of Arts & Sciences](#) [East Asian Languages & Civilizations](#) [Hindi](#)

---

## HIND-2110 (5) Intermediate Hindi 1

Emphasizes speaking, listening, reading and writing skills and culturally appropriate language use. Credit not granted for this course and ASIA 2420. Prereq., HIND 1020 (min grade C). Meets MAPS requirement for foreign language. Formerly HIND 2010.

College of Arts & Sciences East Asian Languages & Civilizations Hindi

---

## HIND-2120 (5) Intermediate Hindi 2

Continuation of HNDI 2010. Enhances students' speaking, listening, reading and writing skills and culturally appropriate language use. Prereq., HNDI 2010 (min. grade C) or equivalent. Formerly HIND 2020.

College of Arts & Sciences East Asian Languages & Civilizations Hindi

---

## HIND-2441 (3) Screening India: A History of Bollywood Cinema

Provides a critical overview of one of the world's largest and most beloved film industries, the popular Hindi cinema produced in Bombay (Mumbai) and consumed around the world under the label "Bollywood". Focus on the post-Independence era to the present, with introduction to key films, directors, stars, genres, formal techniques, and themes, as well as critical analyses of these and other topics. Formerly HNDI 2441.

College of Arts & Sciences East Asian Languages & Civilizations Hindi

---

## HIND-3110 (3) Advanced Hindi 1

Emphasizes speaking, listening and conversational fluently in Hindi, with a focus on cultural appropriate expression and practical knowledge. . Prereq., HIND 2020 (min. grade C). Formerly HIND 3010.

College of Arts & Sciences East Asian Languages & Civilizations Hindi

---

## HIND-3120 (3) Advanced Hindi 2

Continuation of HIND 3110. Emphasizes reading, listening, and speaking fluency in Hindi-Urdu, with a focus on literary, cinematic and cultural themes in modern and contemporary Hindi-Urdu media and culture. Thematic focus of the course may change each semester. An effort will be made to encourage students to put their language skills into literary and cultural context. Prereq., HNDI 3110 (min. grade C). Formerly HIND 3020.

College of Arts & Sciences East Asian Languages & Civilizations Hindi

---

## HIND-3651 (3) Living Indian Epics: The Ramayana and the Mahabharata in the Modern Political Imagination

Explores the Ramayana and Mahabharata, two fundamental mythological pillars of Indian society, through literature, comic books, film, television, and political rhetoric as a means of examining major issues of religion, gender, popular culture, and social politics in contemporary India.

College of Arts & Sciences East Asian Languages & Civilizations Hindi

---

## HIND-3661 (3) South Asian Diasporas: Imagining Home Abroad

Examines fundamental questions of home, nation, identity, ethnicity, and foreignness in the context of the enormous South Asian diaspora. By means of literature, ethnography, and film, the various connotations of diaspora will be explored along with the cultural productions of members of the South Asian diaspora (both Indian and Pakistani).

College of Arts & Sciences East Asian Languages & Civilizations Hindi

---

## HIND-3811 (3) The Power of the Word: Subversive and Censored 20th Century Indo-Pakistani Literature

Provides an overview of a selection of writings by important 20th century Indo-Pakistani authors, which will permit students to get acquainted with Indian literature. Provides insight into the experience of social and political events in the 20th century and the reaction of the government to the critical analysis and portrayal of these events. Taught in English. Formerly HNDI 3811. Approved for arts and sciences core curriculum: human diversity.

College of Arts & Sciences East Asian Languages & Civilizations Hindi

---

## HIND-3821 (3) The Mahabharata as Literature, Performance, Ideology

Offers an in-depth introduction to the Mahabharata, reputedly the world's longest epic and one of the foundational works of Indian civilization. Synopsis of the full text and selected excerpts will be read, including a translation of the spiritual classic, Bhagavad Gita. Recent scholarship on the poem's historical, ritual, and mythic contexts as well as on its performance traditions will also be examined. Formerly HNDI 3821.

College of Arts & Sciences East Asian Languages & Civilizations Hindi

---

## HIND-3831 (3) The Many Faces of Krishna in South Asia Literature and Culture

Using both textual and visual sources, the multiple facets of Krishna in Indian religious experience will be explored through poetry and prose, painting and sculpture, music, dance, and drama. Formerly HNDI 3831.

## HIST-1010 (3) Western Civilization 1: From Antiquity to the 16th Century

Surveys the development of Western civilization from its beginnings in the ancient near East through the Reformation of the 16th century. Also available through correspondence study. Credit not granted for this course and HIST 1030. Meets MAPS requirement for social science: general and world history. Approved for arts and sciences core curriculum: historical context.

[College of Arts & Sciences](#)
[History](#)
[Methodo, Comparative, Global](#)

## HIST-1015 (3) History of the United States to 1865

Surveys American history from first settlement until end of the Civil War. Also available through correspondence study. Meets MAPS requirement for social science: general and U.S. history. Approved for arts and sciences CORE curriculum: United States context.

[College of Arts & Sciences](#)
[History](#)
[US: Chronological Periods](#)

## HIST-1018 (3) Introduction to Early Latin American History to 1810

Introduces students to the history of what is now called Latin America from about 1450 to the wars of independence in the nineteenth century. The course examines pertinent aspects of the societies and cultures of indigenous people, the history of European conquest, and the most salient features of the Spanish and Portuguese colonial empires in America. Students who have taken HIST 1038 may not receive credit for either HIST 1018 or 1028. Approved for arts and sciences core curriculum: historical context.

[College of Arts & Sciences](#)
[History](#)
[World Areas: Specific Regions](#)

## HIST-1020 (3) Western Civilization 2: 16th Century to the Present

Surveys political, economic, social, and intellectual developments in European history from the 16th century to the present. Similarities and contrasts between European states are underscored, as is Europe's changing role in world history. Also available through correspondence study. Credit not granted for this course and HIST 1040. Meets MAPS requirement for social science: general and world history. Approved for arts and sciences CORE curriculum: historical context.

College of Arts & Sciences | History | Methodo, Comparative, Global

---

---

## HIST-1025 (3) History of the United States since 1865

Surveys social, economic, political, and cultural development of the United States from the close of the American Civil War to the present. Also available through correspondence study. Meets MAPS requirement for social science: general and U.S. history. Approved for arts and sciences CORE curriculum: United States context.

College of Arts & Sciences | History | US: Chronological Periods

---

---

## HIST-1028 (3) Introduction to Modern Latin American History since 1800

Introduces students to the history of Latin America from independence to the present. The course investigates the social implications of various models of economic development, the opportunities and difficulties resulting from economic ties with wealthier countries, the consequences of ethnic, gender and class divisions, and the struggles of Latin Americans to construct equitable political systems. Students who have taken HIST 1038 may not receive credit for HIST 1018 or 1028. Approved for arts and sciences core curriculum: historical context.

College of Arts & Sciences | History | World Areas: Specific Regions

---

---

## HIST-1051 (3) The World of the Ancient Greeks

Surveys the emergence, major accomplishments, failures, and decline of the world of the ancient Greeks, from Bronze Age civilizations of the Minoans and Mycenaeans through the Hellenistic Age (2000--30 B.C.) Same as CLAS 1051. Approved for arts and sciences CORE curriculum: historical context.

College of Arts & Sciences | History | Europe: Ancient and Medieval

---

---

## HIST-1061 (3) The Rise and Fall of Ancient Rome

Surveys the rise of ancient Rome in the eighth century B.C. to its "Fall" in the fifth century A.D. Emphasizes political institutions, foreign policy, leading personalities, and unique cultural accomplishments. Same as CLAS 1061. Approved for arts and sciences CORE curriculum: historical context.

College of Arts & Sciences | History | Europe: Ancient and Medieval

---

---

## HIST-1113 (3) Introduction to British History to 1660

Deals with Roman, medieval, and early modern periods. Covers the demographic, economic, and social patterns, political and religious developments, and cultural changes that contributed to the formation of the English nation. Formerly HIST 2103. Approved for arts and sciences core curriculum: historical context.

College of Arts & Sciences | History | Europe: Specific Countries

---

---

---

## HIST-1123 (3) Introduction to British History Since 1660

Deals with the period from the 17th century to the present. Political, economic, social, and imperial developments that contributed to creation of the modern industrial and democratic state are the major issues covered. Formerly HIST 2123. Approved for arts and sciences core curriculum: historical context.

College of Arts & Sciences | History | Europe: Specific Countries

---

---

---

## HIST-1208 (3) Sub-Saharan Africa to 1800

Introduces the peoples of Africa south of the Sahara and some major developments in the region up to A.D. 1800. Approved for arts and sciences CORE curriculum: historical context.

College of Arts & Sciences | History | World Areas: Specific Regions

---

---

---

## HIST-1228 (3) Introduction to Sub-Saharan African History Since 1800

Introduces students to the history of Sub-Saharan Africa from 1800 to the present. Major topics of study included the trans-Atlantic slave trade, African state-building, European colonialism, African responses to colonialism and issues facing independent African nations, ranging from debt to HIV/AIDS. Approved for arts and sciences core curriculum: historical context.

College of Arts & Sciences | History | World Areas: Specific Regions

---

---

---

## HIST-1308 (3) Introduction to Middle Eastern History

Interdisciplinary course that focuses on medieval and modern history of the Middle East (A.D. 600 to the present). Introduces the Islamic civilization of the Middle East and the historical evolution of the region from the traditional into the modern eras. Covers social patterns, economic life, and intellectual trends, as well as political development. Approved for arts and sciences CORE curriculum: historical context.

College of Arts & Sciences | History | World Areas: Specific Regions

---

---

## HIST-1528 (3) Introduction to South Asian History since 1757

Introduces the history of modern South Asia from 1757 to the present. Examines themes such as the nature of British colonial state formation in South Asia, social transformation under British rule, modes of anticolonial resistance movements, particularly Mahatma Gandhi's nonviolent civil disobedience movement, Muslim nationalism and the formation of Pakistan, and current political conflicts involving India, Pakistan and Afghanistan. Formerly HIST 1408. Approved for arts and sciences core curriculum: historical context.

College of Arts & Sciences | History | World Areas: Specific Regions

---

## HIST-1618 (3) Introduction to Chinese History to 1644

Introduces students to the history of China from Neolithic period to Ming period (1368-1644). Investigates the social patterns, gender relations, economic structure, intellectual trends, and political developments of China. Pays special attention to China's long-standing interaction with the rest of the world, which played a crucial role in the historical development of Chinese society. Approved for arts and sciences core curriculum: historical context.

College of Arts & Sciences | History | World Areas: Specific Regions

---

## HIST-1708 (3) Introduction to Japanese History

A broad interdisciplinary survey of the history of Japan from earliest times to the 20th century. Explores the development of political institutions, social structures, cultural and religious life, economic development, and foreign relations in an historical perspective. Approved for arts and sciences CORE curriculum: historical context.

College of Arts & Sciences | History | World Areas: Specific Regions

---

## HIST-1800 (3) Introduction to Global History

Applies a broad perspective to the global past in order to illuminate how common historical patterns and processes as well as unique elements shaped the human experience. Using a thematic approach, this introductory course highlights cross-cultural interactions among societies, and, when relevant, how historical processes that began centuries ago still impact the contemporary world. Topic will vary by semester. Prereq., any other 1000-level HIST course. Restricted to History BA and History additional majors only. Prerequisites: Restricted to History (HIST) BA or ADL majors only.

College of Arts & Sciences | History | Methodo, Comparative, Global

---

## HIST-1828 (3) Introduction to Modern Jewish History

Surveys the major historical developments encountered by Jewish communities beginning with the Spanish Expulsion in 1492 up until the present day. We will study the various ways in which Jews across the modern world engaged with the emerging notions of nationality, equality, and citizenship, as well as with new ideologies such as liberalism, socialism, nationalism, imperialism and antisemitism. Same as JWST 1828. Formerly HIST 1108. Approved for arts and sciences core curriculum: historical context.

---

College of Arts & Sciences | History | World Areas: Specific Regions

---

## HIST-2002 (3) Introduction to Central and East European Studies

Examines major themes in the history of Russia and East-Central Europe since the early modern era, introduces the literature and arts of the region, and presents current political, social, and economic issues. Same as CEES 2002. Approved for arts and sciences CORE requirement: historical context.

College of Arts & Sciences | History | Europe: Modern

---

## HIST-2015 (3) The History of Early America

Examines major themes in the development of colonial societies in North America from the 15th to the early 19th centuries. Explores intercultural relations, economic development, labor systems, religion and society, and family life. Specific course focus may vary. History majors are restricted from taking this course. Approved for arts and sciences core curriculum: United States context. Prerequisites: History majors are restricted from taking this course.

College of Arts & Sciences | History | US: Chronological Periods

---

## HIST-2100 (3) Revolution in History

Examines the causes, character, and significance of political revolution in world history. Concentrating on one of the major revolutions of modern history, it examines why revolutions occur, who participates in revolution, and to what effect. Specific course focus varies. History majors are restricted from taking this course. Approved for arts and sciences core curriculum: historical context. Prerequisites: History majors are restricted from taking this course.

College of Arts & Sciences | History | Methodo, Comparative, Global

---

## HIST-2112 (3) Early Modern Societies (1450--1700)

Examines major themes in European Early Modern history. Issues to be explored include the Renaissance and the Reformation, popular culture, social history, and states and warfare. Specific course focus may vary. Similar to HIST 2113. History majors are restricted from taking this course. Approved for arts and sciences core curriculum: historical context. Prerequisites: History majors are restricted from taking this course.

College of Arts & Sciences | History | Europe: Modern

---

## HIST-2126 (3) Modern U.S. Politics and Diplomacy

Traces the development of contemporary U.S. politics and foreign relations. Analyzes subjects such as the Cold War, the relationship between foreign and domestic politics, the developing meaning of conservatism, liberalism, and radicalism. Explains the impact of race, gender, class, and immigration. Specific course focus may vary. History majors are restricted from taking this course. Approved for arts and sciences core curriculum: United States context or contemporary societies. Prerequisites: History majors are restricted from taking

this course.

[College of Arts & Sciences](#) [History](#) [US: Topical Courses 1](#)

## HIST-2166 (3) The Vietnam Wars

Traces the causes, course, and outcome of the wars in Vietnam from 1940 until 1975. Explains the successes of the revolutionaries and the failures of the French and Americans. Analyzes the development of Vietnamese nationalism, French colonialism, and U.S. intervention. Similar to HIST 4166. History majors are restricted from taking this course. Approved for arts and sciences core curriculum: contemporary societies or United States context. Prerequisites: History majors are restricted from taking this course.

[College of Arts & Sciences](#) [History](#) [US: Topical Courses 1](#)

## HIST-2220 (3) History of War and Society

Focuses on war and society in a variety of global contexts. Explores the character, origins, and social, political, and intellectual impacts of war in contexts ranging from several centuries of international conflict to the experience of individual nations in specific wars. Topic varies in any given semester; contact Department of History for details. History majors are restricted from taking this course. Approved for arts and sciences core curriculum: historical context. Prerequisites: History majors are restricted from taking this course.

HIST

### HIST-2437 (3) African American History

Surveys African American history. Studies, interprets, and analyzes major problems, issues, and trends affecting African Americans from about 1600 to the present. Same as ETHN 2432. History majors are restricted from taking this course. Approved for arts and sciences core curriculum: human diversity or United States context. Prerequisites: History majors are restricted from taking this course.

[College of Arts & Sciences](#) [History](#) [US: Topical Courses 2](#)

### HIST-2516 (3) America through Baseball

Baseball could not have existed without America. Course explains how the game fit into the larger context of social, cultural, economic, and political history from the nineteenth century to the present. Studies the events and people who made baseball the national pastime. Similar to HIST 4556. Restricted to non-History majors only. Approved for arts and sciences core curriculum: United States context. Prerequisites: History majors are restricted from taking this course.

[College of Arts & Sciences](#) [History](#) [US: Topical Courses 1](#)

### HIST-2616 (3) U.S. Women's History

Examines the history of women in United States culture and society over time. Particular emphasis on the roles of women in family, economy, society, and politics. Specific course focus may vary. History majors are restricted from taking this course. Approved for arts and sciences core curriculum: human diversity. Prerequisites: History majors are restricted from taking this course.

[College of Arts & Sciences](#) [History](#) [US: Topical Courses 1](#)

### HIST-2629 (3) China in World History

Examines the multiple connections between Chinese history and other parts of the world over the course of China's long history. History

---

majors are restricted from taking this course. Approved for arts and sciences core curriculum: historical context. Prerequisites: History majors are restricted from taking this course.

College of Arts & Sciences History World Areas: Comp and General

---

## HIST-2636 (3) Women of Color and Activism

Studies the history of social activism in the United States by women of color, with an emphasis on modes of social activism, issues that have organized specific communities of color, issues that have crossed ethnic/racial boundaries, and the interaction of women from different ethnic/racial groups, including women of color and white women. Recommended prereq., WMST 2000 or 2600. Same as WMST 2400. Approved for arts and sciences CORE curriculum: United States context.

College of Arts & Sciences History US: Topical Courses 1

---

## HIST-3011 (3) Seminar in Ancient History

May be repeated up to 6 total credit hours. Prereq., WRTG 3020 or an acceptable alternative upper-division writing course (min grade C-) and a History GPA of 2.0 or higher. Restricted to HIST majors. Prerequisites: Restricted to History Majors only.

College of Arts & Sciences History Europe: Ancient and Medieval

---

## HIST-3012 (3) Seminar in Modern European History

May be repeated up to 6 total credit hours. Prereq., WRTG 3020 or an acceptable alternative upper-division writing course (min grade C-) and a History GPA of 2.0 or higher. Restricted to HIST majors. Prerequisites: Restricted to History Majors only.

College of Arts & Sciences History Europe: Modern

---

## HIST-3018 (3) Seminar in Latin American History

May be repeated up to 6 total credit hours. Prereq., WRTG 3020 or an acceptable alternative upper-division writing course (min grade C-) and a History GPA of 2.0 or higher. Restricted to HIST majors. Prerequisites: Restricted to History Majors only.

College of Arts & Sciences History World Areas: Specific Regions

---

## HIST-3019 (3) Seminar in Asian and African History

May be repeated up to 6 total credit hours. Prereq., WRTG 3020 or an acceptable alternative upper-division writing course (min grade C-) and a History GPA of 2.0 or higher. Restricted to junior/senior HIST majors. Prerequisites: Restricted to History Majors only.

College of Arts & Sciences History World Areas: Comp and General

---

## HIST-3020 (3) Historical Thinking & Writing

Develops the research techniques and habits of mind required to succeed in the History major, honing students' critical, analytical, and synthetic skills while introducing them to History as a discipline and a way of understanding the world. Students practice the kinds of writing required in upper-division History classes. Topics will vary. Prereq., HIST 1080 and ARSC 1080, 1150, WRTG 1100, 1150 or 1250. Restricted to sophomore, junior and seniors. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences | History | Methodo, Comparative, Global

---

---

## HIST-3110 (3) Honors Seminar

Practical historiography for students who wish to write a senior honors thesis. Emphasizes choice of topic, critical methods, research, organization, argumentation, and writing. May be repeated up to 6 total credit hours. Prereqs., WRTG 3020 or an acceptable alternative upper-division writing course (min grade C-), honors standing, and instructor consent.

College of Arts & Sciences | History | Methodo, Comparative, Global

---

---

## HIST-3112 (3) Seminar in Renaissance and Reformation

May be repeated up to 6 total credit hours. Prereq., WRTG 3020 or an acceptable alternative upper-division writing course (min grade C-) and a History GPA of 2.0 or higher. Restricted to HIST majors. Prerequisites: Restricted to History Majors only.

College of Arts & Sciences | History | Europe: Modern

---

---

## HIST-3113 (3) Seminar in Medieval and Early Modern English History

May be repeated up to 6 total credit hours. Prereq., WRTG 3020 or an acceptable alternative upper-division writing course (min grade C-) and a History GPA of 2.0 or higher. Restricted to HIST majors. Prerequisites: Restricted to History Majors only.

College of Arts & Sciences | History | Europe: Specific Countries

---

---

## HIST-3115 (3) Seminar in Early American History

May be repeated up to 6 total credit hours. Prereq., WRTG 3020 or an acceptable alternative upper-division writing course (min grade C-) and a History GPA of 2.0 or higher. Restricted to HIST majors. Prerequisites: Restricted to History Majors only.

College of Arts & Sciences | History | US: Chronological Periods

---

---

## HIST-3116 (3) Seminar in American Diplomatic History

May be repeated up to 6 total credit hours. Prereq., WRTG 3020 or an acceptable alternative upper-division writing course (min grade C-) and a History GPA of 2.0 or higher. Restricted to HIST majors. Prerequisites: Restricted to History Majors only.

College of Arts & Sciences | History | US: Topical Courses 1

---

---

## HIST-3120 (3) Honors Thesis

Prereq., HIST 3110 and instructor consent.

College of Arts & Sciences | History | Methodo, Comparative, Global

---

---

## HIST-3133 (3) Seminar in Britain since 1688

May be repeated up to 6 total credit hours. Prereq., WRTG 3020 or an acceptable alternative upper-division writing course (min grade C-) and a History GPA of 2.0 or higher. Restricted to HIST majors. Prerequisites: Restricted to History Majors only.

College of Arts & Sciences | History | Europe: Specific Countries

---

---

## HIST-3212 (3) Seminar in Early Modern Europe

May be repeated up to 6 total credit hours. Prereq., WRTG 3020 or an acceptable alternative upper-division writing course (min grade C-) and a History GPA of 2.0 or higher. Restricted to HIST majors. Prerequisites: Restricted to History Majors only.

College of Arts & Sciences | History | Europe: Modern

---

---

## HIST-3218 (3) Peoples and Cultures of West Africa

Deals with the history and anthropology of selected west African societies in the period before the imposition of European colonial rule. Prereq., WRTG 3020 or an acceptable alternative upper-division writing course (min grade C-) and a History GPA of 2.0 or higher. Restricted to HIST majors. Same as ANTH 3218. Prerequisites: Restricted to History Majors only.

College of Arts & Sciences | History | World Areas: Specific Regions

---

---

## HIST-3317 (3) Seminar in the American West

May be repeated up to 6 total credit hours. Prereq., WRTG 3020 or an acceptable alternative upper-division writing course (min grade C-) and a History GPA of 2.0 or higher. Restricted to HIST majors. Prerequisites: Restricted to History Majors only.

College of Arts & Sciences | History | US: Topical Courses 2

---

---

## HIST-3328 (3) Seminar in Middle Eastern History

Examines selected issues in modern Middle Eastern history. Check with the department concerning the specific subject of the seminar. May be repeated up to 6 total credit hours. Prereq., WRTG 3020 or an acceptable alternative upper-division writing course (min grade C-) and a History GPA of 2.0 or higher. Restricted to junior/senior HIST majors.

## HIST-3414 (3) Seminar in European Intellectual History

May be repeated up to 6 total credit hours. Prereq., WRTG 3020 or an acceptable alternative upper-division writing course (min grade C-) and a History GPA of 2.0 or higher. Restricted to HIST majors. Prerequisites: Restricted to History Majors only.

## HIST-3415 (3) Seminar in Recent American History

May be repeated up to 6 total credit hours. Prereq., WRTG 3020 or an acceptable alternative upper-division writing course (min grade C-) and a History GPA of 2.0 or higher. Restricted to junior/senior HIST majors. .

## HIST-3416 (3) Seminar in American Society and Thought

May be repeated up to 6 total credit hours. Prereq., WRTG 3020 or an acceptable alternative upper-division writing course (min grade C-) and a History GPA of 2.0 or higher. Restricted to HIST majors. Prerequisites: Restricted to History Majors only.

## HIST-3417 (3) Seminar in African American History

May be repeated up to 6 total credit hours. Prereq., WRTG 3020 or an acceptable alternative upper-division writing course (min grade C-) and a History GPA of 2.0 or higher. Restricted to HIST majors. Prerequisites: Restricted to History Majors only.

## HIST-4013 (3) English Constitutional History to 1688

Examines the origins and developments of English legal and political institutions, including kingship, the common law, procedure, and the court and jury system from the Anglo-Saxon period to the 17th century. Emphasizes the implications of these institutions for the development of contemporary American and English legal systems. Prereq., HIST 1010, 1030, 2103 or 2543.

---

College of Arts & Sciences History Europe: Specific Countries

---

## HIST-4016 (3) African American History, 1619--1865

Explores the history of Africans in America from the first arrivals to emancipation, and their role in the social, cultural, economic, and political evolution of the United States. Prereq., HIST 1015 or 1035. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences History US: Topical Courses 1

---

## HIST-4018 (3) Aztecs, Incas, and the Spanish Conquest of the Americas

Building upon contemporary texts and modern histories of both famous and ordinary people, this course examines the indigenous empires known as the Aztecs and the Incas. It also examines the encounter of Europeans and native people, following the history of exploration and conquest from the time of Columbus to about 1550. Equal consideration is given to the course's three components: Aztec, Inca and the Spanish conquest. Recommended prereqs., HIST 1018 or 3020.

College of Arts & Sciences History World Areas: Specific Regions

---

## HIST-4020 (3) Capstone: Comparative History

Explores historical themes from a comparative perspective. As a culmination of the major, it encourages students to think more analytically about historical change. Consult the online Schedule Planner for specific topics. Team-taught by several faculty. May be repeated up to 6 total credit hours within the degree. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) History (HIST) majors (excludes minors).

College of Arts & Sciences History Methodo, Comparative, Global

---

## HIST-4021 (3) Athens and Greek Democracy

Studies Greek history from 800 B.C. (the rise of the city-state) to 323 B.C. (the death of Alexander the Great). Emphasizes the development of democracy in Athens. Readings are in the primary sources. Same as CLAS 4021. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences History Europe: Ancient and Medieval

---

## HIST-4030 (3) History of Slavery: Origins to Present

Examines slavery across the globe from its origins in ancient societies to the present. Includes the legal, social, economic, linguistic, and gender aspects of slavery, among other subjects. Restricted to sophomores/juniors/seniors. .

College of Arts & Sciences History Methodo, Comparative, Global

## HIST-4053 (3) Britain and the Empire, 1688--1964

Examines the external polity of Great Britain from 1688 to 1964 in Europe, the East, Africa, and the Americas. Same as HIST 5053. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

[College of Arts & Sciences](#)
[History](#)
[Europe: Specific Countries](#)

## HIST-4061 (3) Twilight of Antiquity

Explores the reasons for the fall of the Roman Empire in the western Mediterranean and its survival in the east as Byzantium.

Emphasizes Christianity; barbarians; social, economic, and cultural differences; contemporary views of Rome; and modern scholarship. No Greek or Latin is required. Same as HIST 5061 and CLAS 4061.

College of Arts & Sciences | History | Europe: Ancient and Medieval

---

---

## HIST-4063 (3) Women in Victorian England

Examines changing roles and status of women in a period of expansion. Studies the impact of industrialization on working women, sexuality, family planning, expansion of women in education, politics and the professions, the single women crisis, and women's rights. Restricted to sophomores/juniors/seniors. Same as WMST 4063.

College of Arts & Sciences | History | Europe: Specific Countries

---

---

## HIST-4064 (3) Early Modern Spain

Surveys the history of the Iberian Peninsula from the late medieval period through early modern period. Explores the thought, art, politics, and socio-economic milieu of Spain during the Golden Age. Topics include attitudes toward minorities, the Inquisition, the establishment of a colonial empire, rituals, court culture and architecture, religious conflicts, and literary production. Prereq for HIST 4064., HIST 1010 or 1030. Same as HIST 5064. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences | History | Europe: Topical

---

---

## HIST-4071 (3) Seminar in Ancient Social History

Considers topics ranging from demography, disease, family structure, and the organization of daily life to ancient slavery, economics, and law. Focuses either on Persia, Greece, or Rome and includes a particular emphasis on the methodology required to reconstruct an ancient society, especially the interpretation of problematic literary and material evidence, and the selective use of comparisons with better known societies. No Greek or Latin required. May be repeated up to 9 total credit hours. Same as CLAS 4071. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences | History | Europe: Ancient and Medieval

---

---

## HIST-4081 (3) The Roman Republic

Studies the Roman Republic from its foundation in 753 B.C. to its conclusion with the career of Augustus. Emphasizes the development of Roman Republic government. Readings are in the primary sources. No Greek or Latin required. Same as CLAS 4081. Prerequisites: Restricted to History Majors only.

College of Arts & Sciences | History | Europe: Ancient and Medieval

---

---

## HIST-4083 (3) Revolution and Nationalism in Modern Ireland

Surveys Irish nationalist movements since the eighteenth century, treating constitutional nationalism, revolutionary republicanism, and

---

Gaelic cultural movements while also examining the development of Unionism in Ulster as a response to political and cultural nationalism. Emphasizes the political, religious, and cultural roots of the current sectarian crisis in Northern Ireland, and analyzes that crisis up to the present day. Prereqs., HIST 1020, 1040, 2123, or 4053. Credit not granted for this course and HIST 2513. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences | History | Europe: Specific Countries

---

## HIST-4091 (3) The Roman Empire

Studies Imperial Roman history beginning with the Roman Revolution and ending with examination of the passing of centralized political authority in the western Mediterranean. Emphasizes life, letters, and personalities of the Empire. Same as CLAS 4091. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences | History | Europe: Ancient and Medieval

---

## HIST-4109 (3) World War II in Asia and the Pacific

For Asia, World War II began with the Mukden Incident (1931), resulting in the Japanese domination of Manchuria and leading to a full-scale war between China and Japan in 1937. Only after the Japanese attacked the U.S. Pacific fleet at Pearl Harbor four years later did the United States enter the war. Discusses the various socioeconomic and political factors leading to the war in Asia, examines the nature of the conflict on the Asian mainland and in the Pacific, and assesses legacy of the war on all those involved. Restricted to sophomores/juniors/seniors.

College of Arts & Sciences | History | World Areas: Comp and General

---

## HIST-4110 (3) Natives and Newcomers: Encounters in the Americas

Focuses on the first generations of interaction between natives and newcomers in the Americas, 1492-c.1650. Class will open with general section on colonialism and contact dynamics, then explore four contact areas (Caribbean, Valley of Mexico, St. Lawrence River Valley, Chesapeake) in depth. In-class discussion of primary sources a critical component of the course. Prereq., junior standing or successful completion of one lower-division history course.

College of Arts & Sciences | History | Methodo, Comparative, Global

---

## HIST-4116 (3) U.S. Diplomatic History, 1865-1939

Traces the rise of the United States to world power. Explores the interactions of expansionist and isolationist impulses with politics, ideology, culture, and economics. Restricted to sophomores/juniors/seniors.

College of Arts & Sciences | History | US: Topical Courses 1

---

## HIST-4118 (3) History of Mexico to 1821

Studies Mexican history beginning with roots and evolution of pre-Columbian civilizations and concluding with the events of Mexican independence in 1821. Emphasizes society and culture of the Aztecs and Mayans, the Spanish conquest of Mexico, and the colonial regime of New Spain. Restricted to sophomores/juniors/seniors.

College of Arts & Sciences | History | World Areas: Specific Regions

---

---

## HIST-4119 (3) Latin American Revolutions

Examines the origins, development and continuing influence of 20th-Century Latin American revolutionary movements, with a focus on placing these struggles in comparative historical context. Explores various approaches to revolution and the general role of left political formations in Latin America. Examples will be drawn from various Latin American countries, including Mexico, Guatemala, Cuba, Chile and Nicaragua. Prereq., HIST 1038. Same as HIST 5119. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences | History | World Areas: Comp and General

---

---

## HIST-4122 (3) Europe During the Renaissance

Explores the history and culture of Western Europe, 1300--1520. Comprehensive in scope, with analysis of political, economic, social, religious, intellectual, and artistic matters. Discusses significance of the Renaissance for origins of modern civilization. Prereq., HIST 1010. Restricted to sophomores/juniors/seniors.

College of Arts & Sciences | History | Europe: Modern

---

---

## HIST-4123 (3) Medieval England

Treats the major developments in English history from the Anglo-Saxon period through the 15th century. Emphasizes late medieval English society during the 13th and 14th centuries. Restricted to juniors/seniors. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

College of Arts & Sciences | History | Europe: Specific Countries

---

---

## HIST-4125 (3) British Colonial America, 1580--1756

Studies settlement and evolution of British Colonial America until the Seven Years' War. Prereqs., HIST 1015 or 1035. Same as HIST 5125. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences | History | US: Chronological Periods

---

---

## HIST-4126 (3) U.S. Diplomatic History since 1940

Traces the development of the United States as a superpower. Special attention is paid to the way in which foreign policy was created

and the relationship between foreign and domestic affairs. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences | History | US: Topical Courses 1

---

## HIST-4128 (3) The Emergence of Modern Mexico

Study of Mexican history continues with the establishment of independence in 1821. Examines the upheavals of the Mexican Revolution and culminates with recent events in Mexico. Same as ETHN 4126 and HIST 5128. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences | History | World Areas: Specific Regions

---

## HIST-4131 (3) The Origins of Christianity

Surveys the sources for the development of ancient Christianity from the ministry of Jesus Christ to the conversion of the emperor Constantine in the early fourth century. Through lectures and a close reading of primary source materials in translation, students will examine the social activity and theological development of early Christians in their Roman and Jewish context. Prereq., HIST 1010.

College of Arts & Sciences | History | Methodo, Comparative, Global

---

## HIST-4133 (3) Tudor England

Deals with the history of England from 1485 to 1603. Examines patterns of daily life, the impact of the Reformation and the Renaissance, and the development of Parliament and the monarchy under the Tudor rulers, especially Henry VIII and Elizabeth. Prereqs., HIST 1010, 1030, or 2103. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences | History | Europe: Specific Countries

---

## HIST-4134 (3) Elizabeth I and Her Times

Interdisciplinary course explores different aspects of the reign of Elizabeth I: social and political history; literature; theater; and music. Explores the role and impact of a female ruler on English culture. Restricted to juniors/seniors. Same as ENGL 4583 and THTR 4091.

College of Arts & Sciences | History | Europe: Topical

---

## HIST-4138 (3) Southwest Borderlands to 1900

Explores the history of the region that would become the American Southwest to 1900. Focusing on themes of novelty, conflict, and adaptation, class explores how changes in ecology, demography, economy, and technology transformed relations between native peoples, Spaniards, and Mexicans. Concludes with unit on causes, events, and consequences of the U.S.-Mexican War. Restricted to sophomores/juniors/seniors.

---

## HIST-4143 (3) Stuart Britain

Covers the history of the British Isles from 1603 to 1714, the era of the English Civil War and the Glorious Revolution. Traces economic and social relationships, cultural change, and religious and political conflict under the Stuart monarchs. Prereq., HIST 1010, 1030, 2103, or 2123. Restricted to sophomores, juniors, and seniors.

### HIST-4146 (3) Military History

Examines America's national defense and war efforts from the Spanish American War to the present, emphasizing causes and consequences of modern conflicts, and the impact of military activities on American society. Restricted to juniors/seniors. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

[College of Arts & Sciences](#) [History](#) [US: Topical Courses 1](#)

### HIST-4153 (3) Emergence of Modern Britain, 1688-1852

Surveys British history from the Revolution of 1688 to the Great Exhibition in 1851. Topics include creation of the United Kingdom, traditional popular culture, birth of a consumer society, the British Enlightenment, the Evangelical Revival, loss of the American colonies, imperial expansion in Asia, war with Revolutionary and Napoleonic France, the Industrial Revolution, and the impact of utilitarianism and political radicalism. Prereq., HIST 1020, 1040, 2103, or 2123. Restricted to sophomores/juniors/seniors.

[College of Arts & Sciences](#) [History](#) [Europe: Specific Countries](#)

### HIST-4166 (3) The War in Vietnam and Its Legacy

Traces diplomatic, military, cultural, social, and political history of the war in Vietnam from the beginning of U.S. involvement in 1950 to its aftermath in the 1980s. Credit not granted for this course and HIST 2166.

[College of Arts & Sciences](#) [History](#) [US: Topical Courses 1](#)

### HIST-4190 (3) French Connections: Contemporary France and America in

## Historical Context

This faculty-led Global Seminar, based in Bordeaux, France provides an opportunity to compare French history and contemporary culture, economy, and culture to that of the United States. Lectures in Boulder and Bordeaux are supplemented by interactions with officials, scholars, business leaders, interest groups, and organizations in France. Offered through Study Abroad. IAFS 3500 and HIST 4190 are the same course. Approved for arts and sciences core curriculum: historical context.

College of Arts & Sciences | History | Methodo, Comparative, Global

---

## HIST-4205 (3) The Colonial Wars and the Coming of American Independence, 1739--1776

Investigates imperial warfare and its effects during the late colonial period, concentrating on the French and Indian War (1754--1763), the disruption of Anglo-American relations, and the origins of the War of American Independence (1775--1783). Prereq., HIST 1015 or 1035. Same as HIST 5205. Credit not granted for this course and HIST 2215. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences | History | US: Chronological Periods

---

## HIST-4212 (3) Reformation Europe, 1500--1648

Traces the history of Europe from the end of the Hundred Years War through the end of the Thirty Years War. While focusing on the division of Western Christendom into competing and institutionalized factions, the course contextualizes this cultural transformation within the broader socioeconomic and political changes of the period. Prereqs., HIST 1010 or 3020. Restricted to sophomores/juniors/seniors. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences | History | Europe: Modern

---

## HIST-4215 (3) The Revolutionary War and the Making of the American Republic, 1775--1801

Investigates the Revolutionary War and its impact on the creation of American political institutions, as well as its cultural, social, and economic effects, from the Battles of Lexington and Concord through the inauguration of Thomas Jefferson. Prereq., HIST 1015 or 1035. Restricted to sophomores/juniors/seniors. Same as HIST 5215. Credit not granted for this course and HIST 2215.

College of Arts & Sciences | History | US: Chronological Periods

---

## HIST-4217 (3) The American West in the 19th Century

Explores cultural, social, and political interaction in the American West during the 19th century. Themes include environmental change; conflict and syncretism across race, class, and gender lines; and mythic images, and their relationship to the "Real" West. Prereq., HIST 1015 or 1025 or 1035 or 1045.

College of Arts & Sciences | History | US: Topical Courses 2

---

---

## HIST-4218 (3) States and Societies of West Africa to 1900

Examines the history of West Africa from the earliest times to the 19th century. Prereq., junior standing.

College of Arts & Sciences History World Areas: Specific Regions

---

---

## HIST-4222 (3) War and the European State, 1618--1793

Studies the development of the European states in response to international power struggles in the 17th and 18th centuries (up to the French Revolution). Restricted to sophomores/juniors/seniors. Same as HIST 5222.

College of Arts & Sciences History Europe: Modern

---

---

## HIST-4223 (3) Revolutionary France

Examines the two questions most fundamental to any scholarly understanding of the French Revolution: What were the political, social, and cultural causes of revolution in 1789? Why did the French Revolution become increasingly radical after 1789? HIST 4223 is restricted to juniors and seniors. HIST 4223 and 5223 are the same course. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

College of Arts & Sciences History Europe: Specific Countries

---

---

## HIST-4225 (3) The New Nation: America, 1800--1828

History of the United States from George Washington's inauguration to the election of Andrew Jackson. Deals with the political, social, economic, and cultural currents in the life of postrevolutionary America. Prereq., HIST 1015 or 1035. Restricted to sophomores/juniors/seniors.

College of Arts & Sciences History US: Chronological Periods

---

---

## HIST-4227 (3) The American West in the 20th Century

Explores cultural, social, and political interaction in the American West during the 20th century. Themes include popular culture, state-federal relationships, environmental change, urbanization, immigration, and cultural formation. Prereq., HIST 1015 or 1025 or 1035 or 1045. Restricted to sophomores/juniors/seniors.

College of Arts & Sciences History US: Topical Courses 2

---

---

---

## HIST-4232 (3) From Absolutism to Revolution in Europe, 1648--1789

Studies the history of Europe from the end of the Thirty Years War through the outbreak of the French Revolution. Central themes include the establishment of more centralized, increasingly bureaucratic states; global expansion and economic commercialization; and cultural developments such as the Scientific Revolution and the Enlightenment. Prereq., HIST 1020 or 3020. Restricted to sophomores/juniors/seniors. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences | History | Europe: Modern

---

## HIST-4233 (3) History of France since 1815

Examines the ongoing struggle between the revolutionary and counter-revolutionary traditions of France and how it shaped the political history and affected the social, cultural, and intellectual character of the nation from 1815 to the present. Restricted to juniors and seniors. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

College of Arts & Sciences | History | Europe: Specific Countries

---

## HIST-4235 (3) Jacksonian America

Focuses on the social and cultural history of the Jacksonian Era. Issues include the transformation of the market economy, slavery, moral reform, Indian removal, changes in ideas about men's and women's natures and roles, western expansion, and political culture. Prereq. for HIST 4235 is HIST 1015 or 1035. HIST 4235 and 5235 are the same course. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences | History | US: Chronological Periods

---

## HIST-4238 (3) History of Southern Africa

Examines the history of southern Africa from the earliest hunters, herders and farmers through to the present. One of the chief mediums of analysis is the novel. Short background readings and lectures cover southern Africa's history, and class discussions of novels are layered over these basics. Themes of study include: gender, migration, imperialism, religion, disease, resistance, race, ethnicity, and empire, among others. Prereq., HIST 1208. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences | History | World Areas: Specific Regions

---

## HIST-4248 (3) Africa in the 19th Century

Juxtaposes an increasing process of indigenous state-building with increasing European presence. Restricted to sophomores/juniors/seniors.

College of Arts & Sciences | History | World Areas: Specific Regions

---

## HIST-4258 (3) Africa under European Colonial Rule

Focuses on the political, economic, and social dimensions of colonialism, as well as African nationalism and decolonization. Prereq.,

HIST 1208. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences | History | World Areas: Specific Regions

---

## HIST-4259 (3) African Liberation Struggles: A Comparative History

Highlights the complexity of African decolonization by focusing on the various voices that contend for space as African begins its struggle for liberation. Examines the interrelationship between African colonizers and their colonial administrations, the liberation ideologies emanating from African Diaspora: Pan-Africanism, Garveyism, Negritude and Jamesian socialism, and African nationalist movements and leaders. Restricted to sophomores/juniors/seniors.

College of Arts & Sciences | History | World Areas: Comp and General

---

## HIST-4303 (3) Venice and Florence in the Renaissance

Comparative urban study of Florence and Venice from 13th through 16th centuries. Principal subjects are the distinctive economies of the cities, political developments, Renaissance humanism, patronage of the arts, and foreign policy. Prereq., HIST 1010. Formerly HIST 4112. HIST 4303 and 5303 are the same course. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences | History | Europe: Modern

---

## HIST-4312 (3) 19th Century Europe

Concerned with major social, political, and cultural developments in Europe from circa 1800 to the outbreak of World War I. Special emphasis is placed upon the Napoleonic experience, the rise of modern nationalism, romanticism, Darwinism and its social applications, the Industrial Revolution, imperialism, the emergence of modern ideologies, and the background of World War I. Prereq., HIST 1020 or 1040. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences | History | Europe: Modern

---

## HIST-4313 (3) History of Italy

Survey of political, social, and intellectual history of Italy and its people. Taught in English. Same as ITAL 4250. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences | History | Europe: Specific Countries

---

## HIST-4314 (3) History of Science from the Ancients to Sir Isaac Newton

History of science from pre-Socratics to Isaac Newton, underscoring major intellectual themes in scientific thought and the historical context in which they developed. Prereq., HIST 1010 or 1030. Restricted to sophomores/juniors/seniors.

College of Arts & Sciences | History | Europe: Topical

---

---

## HIST-4315 (3) Civil War and Reconstruction

Describes the forces at work in the antebellum period that led to sectional warfare; social, economic, and political changes effected by the war; the American agony of reconstruction; and the long-range results of that difficult era. Prereq., HIST 1015 or 1035. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

## HIST-4316 (3) The Origins of American Culture, 1600--1830

Traces the development of American culture from its colonial roots to the early decades of the 19th century. Focuses on regional differences in the colonial period, the creation of a new cultural synthesis during the Revolution, and the cultural implications of the Revolutionary legacy. Prereq., HIST 1015 or 1035. Restricted to sophomores/juniors/seniors.

[College of Arts & Sciences](#)
[History](#)
[US: Topical Courses 1](#)

## HIST-4320 (3) The History of the Mediterranean, 1000-1600

Familiarizes students with the Mediterranean ecumene covering concepts such as the Renaissance, the Crusades, traders and travelers, religions and cities. Explores both conflicts (military, confessional) and exchanges (commercial, artistic, scientific) thus helping students think cross culturally, comparatively, and thematically. Emphasizes the Mediterranean contribution to historical developments of western Europe, the Middle East, and North Africa. Prereq., HIST 1010, 1061, 1308, 4061, 4071, 4081, 4091, or 4711. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

[College of Arts & Sciences](#)
[History](#)
[Methodo, Comparative, Global](#)

## HIST-4326 (3) Health and Disease in the United States

Examines health care and disease patterns in the United States, from the colonial period through the 1980s. Topics include biomedicine and alternative therapies, changing ideas about health and disease, the patient perspective, and financing health care. Prereq., HIST 1025 or 1045. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

[College of Arts & Sciences](#)
[History](#)
[US: Topical Courses 1](#)

---

## HIST-4328 (3) The Modern Middle East, 1600 to the Present

Primarily from 1800 to the present. Attention divided equally between the region's political history and international relations and its patterns of economic, social, and cultural modernization in the main countries. Prereq., HIST 1308. Same as HIST 5328. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences | History | World Areas: Specific Regions

---

## HIST-4329 (3) Islam in the Modern World: Revivalism, Modernism, and Fundamentalism, 1800-2001

Examines the more important movements of reform in Muslim world (including Africa, the Middle East, and India) from the 18th century to the present, and their origins and intellectual import. Due to the trans-regional nature of this broad movement of reform, we will pay particular attention to how these movements related to local political, economic, and social contexts, and how they, in turn, moved across larger networks of oceanic commerce and trade. The course concludes with extended case studies of Islamic reformism in modern Egypt and India, and their ultimate influence on the politics of contemporary Islamist movements, especially the intellectual position of Ussama B. Ladin. Prereq., HIST 1308. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences | History | World Areas: Comp and General

---

## HIST-4336 (3) 19th Century American Intellectual History

Examines developing intellectual traditions in their social and political contexts. Addresses democracy, religion, transcendentalism, women, race, union or disunion, the Darwinian revolution, and literary realism and naturalism. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences | History | US: Topical Courses 1

---

## HIST-4338 (3) History of Modern Israel

Learn the history of this crossroads of Europe and Asia from the late Ottoman Empire to the present. Main topics include nationalism and colonialism, development of Zionist ideology, development of Palestinian nationalism, establishment of the Jewish settlement (Yishuv) under British rule, the founding of the Jewish nation-state, relations with neighbors, and the aftermath of the 1956, 1967, 1973, and 1982 wars. Prereqs., HIST 1108 or 1308 or JWST 2350. HIST 4338 and JWST 4338 are the same course.

College of Arts & Sciences | History | World Areas: Specific Regions

---

## HIST-4339 (3) Borderlands of the British Empire

Examines the development of the borderlands of the British empire through imperial expansion, consolidation, and early decolonization. Focuses on the 19th and early 20th centuries. Topics include domination, resistance, and negotiation in areas such as India, Afghanistan, the Palestine Mandate. Aims for students to acquire skills in comparative history and to develop a better understanding of the roots of contemporary conflicts. Prereq., HIST 1020, 1308, 1408, or 2123. Same as HIST 5339. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences | History | World Areas: Comp and General

---

---

---

## HIST-4346 (3) 20th Century American Intellectual History

Addresses the impacts of political, social, and economic developments on ideas about democracy, science, race, gender, faith, the supposed mission of America, and the role of intellectuals in society. Same as ETHN 4344. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences | History | US: Topical Courses 1

---

---

---

## HIST-4348 (3) Topics in Jewish History

Covers topics in Jewish history from biblical beginnings to present day. Topics vary each semester. Consult the online Schedule Planner for specific topics. May be repeated up to 6 total credit hours within the degree. Prereqs., HIST 1108 or 1308 or JWST 2350. Same as JWST 4348. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences | History | World Areas: Specific Regions

---

---

---

## HIST-4349 (3) Decolonization of the British Empire

Examines the end of the British Empire. Focuses on connections between imperial territories, such as networks of anticolonial activists and links between British decision makers. Students will acquire research skills and develop a better understanding of the roots of contemporary conflict. Prior coursework in British imperial history and excellent writing skills are required. Prereq., one of the following: HIST 1308, 1408, 4053, 4238, 4258, 4328, 4329, 4538, or 4558. HIST 4349 and 5349 are the same course. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences | History | World Areas: Comp and General

---

---

---

## HIST-4378 (3) Jews Under Islam

Examines Jewish communities of the Mediterranean basin and Middle East in modern times. Topics covered include culture and identity of these communities, as well as their encounter with empire, westernization, and nationalism, among other political and social currents. Exploration of images and representations of Sephardi and Eastern Jewries. Sources include memoirs, diaries, films, 19th century press and correspondence, and travelogues. Same as JWST 4378.

College of Arts & Sciences | History | World Areas: Specific Regions

---

---

---

## HIST-4412 (3) Europe, 1890--1945

Examines the origins, character, and significance of the First and Second World Wars for the major nations of Europe during the first half of the 20th century. Prereq., HIST 1020. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences | History | Europe: Modern

---

---

---

## HIST-4413 (3) German History to 1849

Cultural, political, and social history of Germany up to and including the revolutions of 1848. Emphasizes the political history of Prussia and such cultural phenomena as German romanticism. Prereq., HIST 1020. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences | History | Europe: Specific Countries

---

---

## HIST-4414 (3) European Intellectual History, 1750--1870

Explores major developments in European thought from the Enlightenment to Nietzsche. Special attention given to the individuals whose ideas have had the greatest influence on modern intellectual history, e.g., Rousseau, Hegel, Herder, Marx, Kierkegaard, Baudelaire, Darwin, and others. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences | History | Europe: Topical

---

---

## HIST-4415 (3) United States History, 1877--1917

Examines the social, economic, political, and cultural history of the United States from the end of Reconstruction to the eve of World War I. Topics include the struggles of labor and industry, race and immigration, western and environmental issues, city life and new technologies, feminism and Progressivism, and Indian wars and imperialism. Prereq., HIST 1015 or 1025. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences | History | US: Chronological Periods

---

---

## HIST-4417 (3) Environmental History of North America

Examines how people of North America, from precolonial times to the present, organized their lives within the ecological systems of the area, how they conceived of their natural world, and how they reshaped their environment according to their human needs. Prereqs., HIST 1015 or 1025 or 1035 or 1045. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences | History | US: Topical Courses 2

---

---

## HIST-4422 (3) World War I in Europe

Examines the origins of World War I; the military, social, and cultural character of the conflict; and its enduring impact in the post-1918 world. By thinking about the war as both a military undertaking and an experience that affected domestic and global politics, the course will explore why World War I constituted an event of major importance to Europe and the twentieth-century world. Prereq., HIST 1020 or 1040. HIST 4422 is restricted to sophomores/juniors/seniors. HIST 4422 and 5422 are the same course.

College of Arts & Sciences | History | Europe: Modern

---

---

## HIST-4423 (3) German History Since 1849

---

Cultural, political, and social history of Germany since 1849. Emphasizes German unification, Bismarkian foreign policy, the rise of neoromanticism, Weimar politics, and the rise of national socialism. Prereq., HIST 1020. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences | History | Europe: Specific Countries

---

## HIST-4424 (3) European Intellectual History, 1870 to Present

Emphasizes Nietzsche and the youth revolt against middle class society, the literary and artistic avant garde (impressionism to existentialism), the psychoanalytic movement, the European right and left, and post-WWII European thought. Restricted to sophomores/juniors/seniors.

College of Arts & Sciences | History | Europe: Topical

---

## HIST-4425 (3) United States History, 1917--1945

Examines U.S. history from World War I through World War II. Key themes include: warfare; the rise of the modern state; consumer culture; the shift from conservative politics to the New Deal liberalism; the women's movement; immigration restriction; segregation; the Great Migration, and civil rights; conflicts between secular modernism and religious fundamentalism; and new technologies such as the automobile. Prereq., HIST 1025. Restricted to sophomores/juniors/seniors.

College of Arts & Sciences | History | US: Chronological Periods

---

## HIST-4433 (3) Nazi Germany

Focuses on the political, social, cultural, and psychological roots of national socialism, with the nature of the national socialist regime, and those politics and actions that came directly out of its challenge to values central to Western civilization. Studies how Nazism came out of this civilization. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior).

College of Arts & Sciences | History | Europe: Specific Countries

---

## HIST-4435 (3) United States History, 1945--1973

Examines the History of the United States during the Cold War, with an emphasis on social and cultural issues at home. Also addresses the economic and political evolution of the American people and the nation's role in world affairs. Prereq., HIST 1025. Restricted to sophomores/juniors/seniors. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences | History | US: Chronological Periods

---

## HIST-4442 (3) Europe since 1945

Explores Europe from the end of World War II through the present day. Topics include postwar reconstruction; the cold war; anticommunist opposition and new social movements; consumer culture and punk music; the fall of communism; the Yugoslav wars; and

European unity. Prereq., HIST 1020 or 1040 or 4412, or PSCI 2012. Restricted to sophomores/juniors/seniors.

College of Arts & Sciences | History | Europe: Modern

---

---

## HIST-4444 (3) Topics in Modern European Thought

Explores a selected theme in European thought since the Enlightenment. Topics vary each term. Restricted to sophomores/juniors/seniors.

HIST

### HIST-4445 (3) United States History since 1973

Traces political, diplomatic, economic, and social developments in the United States from 1973 to the present. Prereq., HIST 1025.

Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

[College of Arts & Sciences](#) [History](#) [US: Chronological Periods](#)

### HIST-4454 (3) Jewish Intellectual History

Takes students on a journey from Medieval Spain to contemporary United States to explore how Jews, living in different societies, have attempted to reshape and interpret central Jewish values and beliefs in accordance with the prevailing ideas of their host societies.

Focuses on the historical context of each Jewish society that produced the thinkers and ideas considered in this course. Prereq., HIST 1010 or 1020, or HIST/JWST 1108, or HEBR/JWST 2350. JWST 4454 and HIST 4454 are the same course.

[College of Arts & Sciences](#) [History](#) [Europe: Topical](#)

### HIST-4511 (3) Europe in the Dark Ages (400--1000 A.D.)

Examines the history of Europe from the fall of the Roman Empire to the turn of the first millennium. Treats social, political, and religious transformations in the barbarian kingdoms, and considers the persistence of Roman institutions and culture and the impact of Christianity in northern Europe. Prereq., HIST 1010, 1030, 2170 or 2543. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

[College of Arts & Sciences](#) [History](#) [Europe: Ancient and Medieval](#)

### HIST-4516 (3) U.S. Society in the 19th Century

Concerned with the American family and community in the changing social environments of the 19th century. Examines families of different ethnic and class backgrounds, observing how they are changed by new economic conditions, reform, or new political institutions. Prereq., HIST 1015 or 1035. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences History US: Topical Courses 1

---

---

## HIST-4521 (3) Europe in the High Middle Ages (1000--1400 A.D.)

Examines the history of Europe from the emergence of feudal institutions to the rise of nation states, with specific attention to social, intellectual and religious change, the role of law and ritual, the crusades and European expansion, and urban growth and identity in the West. Prereq., HIST 1010, 1030, 2170, or 2543. Restricted to sophomores/juniors/seniors.

College of Arts & Sciences History Europe: Ancient and Medieval

---

---

## HIST-4526 (3) U.S. Society in the 20th Century

Primarily concerned with family roles and community values, and how they are altered by economic, demographic, and intellectual changes during the 20th century. Some of the more important themes are acculturation, the idea of success, reform, and the changing structure of opportunity. Prereq., HIST 1025 or 1045. Restricted to sophomores/juniors/seniors.

College of Arts & Sciences History US: Topical Courses 1

---

---

## HIST-4527 (3) Mexican-American History since 1848

Examines Mexican-origins people in the United States from the 19th century through the present. Focuses on Mexican-American history as both an integral part of American history and as a unique subject of historical investigation. Using primary and secondary sources, students will examine how Mexicans and Mexican-Americans have negotiated, influenced, and responded to political, social, cultural, and economic circumstances in the U.S. Prereq., HIST 1025. Recommended prereq., HIST 1015. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences History US: Topical Courses 2

---

---

## HIST-4528 (3) Islam in South and Southeast Asia (1000 to the Present)

Examines the history of Muslim societies in South and Southeast Asia from 1000 to the present. Focuses on themes such as the rise of Islamic empires in South Asia, Sufism, trade and the spread of Islam in Southeast Asia, the rise or Muslim nationalism and religious fundamentalism, and the impact of modernization and globalization on Muslims of the region. Recommended prereq., six hours of history credit. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences History World Areas: Specific Regions

---

---

## HIST-4538 (3) History of Modern India

---

Examines the history of India from the British conquest of India in the late 18th century to independence in 1947. Emphasizes the impact of British rule on the political, economic, and social development of modern India. Recommended prereq., at least 6 hours of history credit. Same as HIST 5538. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences | History | World Areas: Specific Regions

---

## HIST-4544 (3) History of Yiddish Culture

Jews have produced culture in Yiddish, the vernacular language of Eastern European Jewry, for 1000 years and the language continues to shape Jewish culture today. In this course, we will look at the literature, film, theater, music, art, sound, and laughter that defined the culture of Eastern European Jewry and, in the 20th century, Jews around the world. Recommended prereqs., HIST 1108 or HEBR 2350. Same as JWST 4544.

College of Arts & Sciences | History | Europe: Topical

---

## HIST-4546 (3) Popular Culture in the Modern United States

Traces the history of cultural expression in the United States since the late nineteenth century. From art, fiction, and music to the movies, amusement parks, shopping, and sports, popular culture offers clues to decipher shifting patterns of consumption, globalization, race, gender, politics, technology, and media. Includes instruction and practice interpreting cultural materials in historical context. Prereq., HIST 1025. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences | History | US: Topical Courses 1

---

## HIST-4548 (3) Women in Modern India

Examines the history of women and gender in India from the late eighteenth century to the present. Explores topics such as the changing legal status of women in the colonial and postcolonial period, marriage, domesticity and patriarchy, and women's education and participation in anti-colonial and postcolonial politics, women, work, and the environment, violence against women, and women and globalization. Prereq., any 1000 level HIST course. Recommended prereq., HIST 1408. Same as HIST 5548.

College of Arts & Sciences | History | World Areas: Specific Regions

---

## HIST-4556 (3) America through Baseball

Baseball serves as a window to view the American experience. Covers U.S. history since 1830, addressing the major topics that reflect on American society, such as professionalization, labor management conflict, race, gender, culture, politics, economics, and diplomacy. Prereq., HIST 1025 or 1045. Recommended prereq., HIST 1015 or 1035. Restricted to sophomores/juniors/seniors. Credit not granted for this course and HIST 2516.

College of Arts & Sciences | History | US: Topical Courses 1

---

---

## HIST-4558 (3) Modern Indian Intellectual History

Focuses on the nature and evolution of thought in modern India in the light of the encounter between pre-modern Indian and modern Western intellectual traditions in colonial and postcolonial India. Examines themes such as orientalism, nationalism, Hindu and Muslim nationalism, humanism, non-violence, and postcolonialism. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences | History | World Areas: Specific Regions

---

## HIST-4614 (3) Women and Society in Industrial Europe

Examines impact of industrialization and related social change on women in modern European history. Topics include work, family, sexuality, and women in movements for social and political change. Prereq., HIST 1020 or 1040. Restricted to sophomores/juniors/seniors. Same as WMST 4614.

College of Arts & Sciences | History | Europe: Topical

---

## HIST-4616 (3) History of Women in the United States to 1890

Examines female experience in the United States from 17th century European colonization to 19th century settlement of the frontier. Emphasizes comparison between classes, regions, and racial/ethnic groups. Women's writings provide the basis for discussions of private and public roles, definitions of femininity, interpersonal relationships, and struggles for survival and self-expression. Prereq., HIST 1025. Restricted to sophomores/juniors/seniors. HIST 4616 and 5616 are the same course. Also same as WMST 4616. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

College of Arts & Sciences | History | US: Topical Courses 1

---

## HIST-4617 (3) Native North American History I: Human Settlement to 1815

Explores the establishment and development of human societies in North America prior to 1492; the varied experiences of contact; the crises, opportunities, and transformations that attended colonialism; Indians and the inter-imperial contests of the eighteenth century; and the struggles of native peoples confronting the newly-independent United States. Prereq., HIST 1015 or 1035. Restricted to sophomores/juniors/seniors.

College of Arts & Sciences | History | US: Topical Courses 2

---

## HIST-4618 (3) Traditional China

Examines major traditions in philosophy, art, politics, society, and economy of China during the premodern period. Prereq., HIST 1608 or EALC 1011. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences | History | World Areas: Specific Regions

---

## HIST-4619 (3) Women in Asian History

Considers major issues in the history of Asian women in the 18th, 19th, and 20th centuries. Focuses on gender roles in Asian family, state, and religious systems. Same as WMST 4619 and HIST 5619. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences | History | World Areas: Comp and General

---

## HIST-4623 (3) History of Eastern Europe Since 1914

Examines the struggle of nations of eastern Europe to assert their independence, from break-up of the imperial system at the end of World War I, through the Soviet bloc that emerged after World War II, to the establishment of democratic governments after the 1989 revolutions. Prereq., HIST 1020 or 1040 or PSCI 2012. Restricted to sophomores, juniors or seniors. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences | History | Europe: Specific Countries

---

## HIST-4626 (3) History of Women in the United States since 1890

Examines what it means to be female in 20th century United States, emphasizing comparison between classes and racial/ethnic groups. Women's writings serve as the basis for discussions of private and public roles, definitions of womanhood, interpersonal relationships, and struggles for autonomy and equality. Restricted to sophomores, juniors or seniors.. Same as WMST 4626. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences | History | US: Topical Courses 1

---

## HIST-4627 (3) Native North American History II: 1815 to Present

Explores the longevity and continuity of human history in North America by discussing pre-European social and cultural developments. By examining ways in which Indian societies west of the Mississippi River responded to Euro-Americans, the Indians' role in western North American history is demonstrated. Restricted to sophomores/juniors/seniors.

College of Arts & Sciences | History | US: Topical Courses 2

---

## HIST-4628 (3) Modern China

Examines China from 1750 to 1949. Focuses on such issues as the influence of imperialism, the emergence of nationalism, and the meaning of revolution. Same as HIST 5628. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences | History | World Areas: Specific Regions

---

## HIST-4636 (3) Lesbian and Gay History: Culture, Politics, and Social Change in the United States

Considers current theoretical approaches to the history of sexuality and traces the changing meaning of same-sex sexuality in the United States through investigation of lesbian/gay identity formation, community development, politics, and queer cultural resistance. Prereq., HIST 1015 or 1025 or 1035 or 1045 or WMST 2000. Same as HIST 5636 and WMST 4636.

[College of Arts & Sciences](#) [History](#) [US: Topical Courses 1](#)

## HIST-4638 (3) Contemporary China

Examines the history of the People's Republic of China from 1949 to the present. Focuses on such issues as the nature of Maoism, foreign policy, political campaigns such as the Cultural Revolution and the Democracy Movement, and recent economic developmental efforts. HIST 4638 and HIST 5638 are the same course. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

## HIST-4643 (3) Poland since the 16th Century: Democracy and Nation

Traces themes of democracy and nationalism in Polish history from the "Noble Republic" of the early modern era, through the struggles with fascism and communism in the 20th century, to Poland's current position on the eastern edge of Western Europe. Restricted to sophomores/juniors/seniors.

[College of Arts & Sciences](#)
[History](#)
[Europe: Specific Countries](#)

## HIST-4648 (3) History of Modern Chinese Intellectual Thought

Examines major intellectual movements in modern China from Ch'ing neo-Confucianism, empiricism, and nationalism to Chinese communism. Prereq., HIST 1608.

[College of Arts & Sciences](#)
[History](#)
[World Areas: Specific Regions](#)

## HIST-4658 (3) China and Islam from the 7th Century to the 20th Century

This course traces how "Muslims in China" transformed themselves into "Chinese Muslims" while at once accommodating and conflicting with Chinese states and people throughout history until the present time. Recommended prereq., HIST 1608. HIST 4658 and 5658 are the same course. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences | History | World Areas: Specific Regions

---

## HIST-4688 (3) Beijing: Window on Modern China

Learn about modern Chinese history, emphasizing Beijing's important role. Think critically about ways the past is made use of in the present; how memorials capture and present meanings; how to view museums with a critical eye; and about the way Beijing works and exudes power as one of the most important capital cities in the world. Offered through Study Abroad.

College of Arts & Sciences | History | World Areas: Specific Regions

---

## HIST-4711 (3) The Medieval Crusades: Holy War and Its History, 1095--1400

Studies the innovation, impact and meaning of holy war and the expansion of Christendom during the High Middle Ages. Topics include the definition of crusade and crusaders, religious persecution and tolerance, the expansion of European modes of government, war memory, colonization and its aftermath, the meaning of the Holy Land and the home front. Prereq., HIST 1010 or 3020. Restricted to sophomores/juniors/seniors. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences | History | Europe: Ancient and Medieval

---

## HIST-4713 (3) History of Russia through the 17th Century

Introduces the history and culture of Russia from the 9th to the 17th century. Emphasizes selected topics in social, economic, religious, and cultural history, including the formation of the Russian state conversion to Orthodox Christianity, the Mongol invasion, and the reign of Ivan the Terrible. Restricted to juniors and seniors.

College of Arts & Sciences | History | Europe: Specific Countries

---

## HIST-4718 (3) Ancient, Classical, and Medieval Japanese History

Begins with the prehistoric and protohistoric periods. Explores the development of Japan's classical age and traces the rise and attenuation of an elite warrior government. Restricted to juniors and seniors.

College of Arts & Sciences | History | World Areas: Specific Regions

---

## HIST-4723 (3) Imperial Russia

Surveys major cultural, social, and economic changes from the reign of Peter the Great through World War I. Restricted to juniors and

seniors. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

College of Arts & Sciences History Europe: Specific Countries

---

---

## HIST-4726 (3) U.S. Immigration History

Focuses on economic, social, and cultural history of immigration, return migration, and permanent settlement in the U.S. during the 19th and 20th centuries. Examines the ways in which race, class, ethnicity, gender, and sexuality shape social relations. Prereq., HIST 1015 or 1025 or 1035 or 1045. Restricted to junior/senior HIST or ETHN majors.

College of Arts & Sciences History US: Topical Courses 1

---

---

## HIST-4728 (3) Modern Japanese History

Begins with early modern Japan, proceeds through the era of rapid modernization after the Meiji Restoration in the mid-19th century, and concludes with Japan's gradual descent into prolonged war, first with China and then in the Pacific. Restricted to juniors and seniors. HIST 4728 and 5728 are the same course. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

College of Arts & Sciences History World Areas: Specific Regions

---

---

## HIST-4733 (3) The Russian Revolution and the Soviet Regime

Covers in detail the significant social, economic, and political events of Soviet Russia from the February Revolution of 1917 to the present. Prereq., junior or senior standing. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

College of Arts & Sciences History Europe: Specific Countries

---

---

## HIST-4738 (3) History of Early Modern Japan (1590-1868)

Covers the history of early modern Japan (1590-1868). Explores the political, social, cultural, and economic context of Japan's history from the era of Warring States through the rise and fall of the Tokugawa military government (Shogunate). Restricted to juniors and seniors. Same as HIST 5738. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

College of Arts & Sciences History World Areas: Specific Regions

---

---

## HIST-4761 (3) Roman Law

Same as HIST 5761 and CLAS 4761.

College of Arts & Sciences History Europe: Ancient and Medieval

---

---

---

## HIST-4803 (3) Special Topics in European History

Covers specialized topics in early modern and modern European history, usually focusing on one country. May be repeated up to 6 total credit hours. Prereq., HIST 1010, 1020, 1030, or 1040. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences | History | Europe: Specific Countries

---

## HIST-4820 (3) Human Rights: Historical Perspectives

Examines the history of modern ideas of human rights. Focuses on themes such as the universalism/cultural relativism debate, colonialism, nationalism, refugees and stateless peoples, the United Nations and humanitarianism, ethnic genocide in Rwanda, and human rights abuses by the Taliban regime in Afghanistan. Prereq., 6 hours of HIST credit. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.
