German Studies - Bachelor of Arts (BA)

The major in German studies is an interdisciplinary program focusing on study of the German language, its manifestations in history and its usage in the current cultural and social context; the literary, artistic and philosophical aspects of German culture in the past and the present; the major historical events and developments in Germany and its neighboring countries, and the current political institutions and dynamics in Germany within the broader European framework.

The following areas of knowledge are central to the undergraduate degree in German Studies:

- an awareness of the fundamental outlines of German history and culture;
- familiarity with the history of modern German literature from 1750 to the present;
- familiarity with developments in modern German-speaking Central Europe in art, cinema, architecture, law, science, and technology and
- the ability to critically examine such issues as the Nazi era and the Holocaust, migration, gender, disability, racial and ethnic difference, and Germany's place in the European Union.

In addition, students completing the degree in German Studies are expected to acquire:

- the ability to read German at a level at which critical literary and cultural analyses can be performed;
- the ability to write and speak German sufficiently to participate in critical discussions and write critical essays;
- the ability to speak and comprehend German well enough to participate in all situations in daily life, including cultural, educational, business, and professional sectors of German life.

Study Abroad

The department strongly recommends that all majors take part in study abroad. The university offers study abroad programs in Regensburg (academic year or spring semester) and Berlin (academic year or summer semester). Please consult with the major advisor. For more information on study abroad programs, visit the Education Abroad (<http://abroad.colorado.edu>) website

Concurrent Degree Program BA/MA in German Studies

The concurrent BA/MA degree in German Studies recognizes the need for master's-level training upon entering the job market in a variety of sectors that call for highly advanced proficiency in the German language, knowledge of the German-speaking central Europe and its cultures, and the skills afforded to BA and MA graduates in the Humanities (research, analysis, interpretation, translation, communication).

The degree gives highly motivated BA students the opportunity to earn an MA degree using an accelerated undergraduate program in combination with a fifth year of study. Applications can be obtained in the Germanic and Slavic office (McKenna 129). It is recommended that applications be turned in by the spring semester of the sophomore year.

Students must have an overall 3.25 GPA to apply to the program, and should have completed most of their MAPS/core requirements by the end of their sophomore year. No GRE is required.

For more information, visit the department's Concurrent BA/MA Degree in German Studies (<http://www.colorado.edu/gsl/german/undergraduate/concurrent-bama-degree-german-studies>) webpage.

Requirements

Program Requirements

Students must complete the general requirements of the College of Arts and Sciences and the required courses listed below.

The major requirement in German studies is 32 hours beyond GRMN 1020 (with grades of C- or above). Students design their own major in consultation with the undergraduate advisor and a faculty mentor. At least 18 hours taken toward the major must be completed at the 3000 or 4000 level.

NOTE: GRMN 4550 *must* be taken at CU Boulder.

Required Courses and Credits

Code	Title	Credit Hours
German Language Courses		14-17
German language courses above GRMN 1020, to include either GRMN 3020 or GRMN 3030 (or both).		
GRMN 2010 & GRMN 2020	Intermediate German 1 and Intermediate German 2	
or		
GRMN 2030	Intensive Intermediate German	
Upper-division German Language courses:		
GRMN 3010	Advanced German 1	
GRMN 3020	Advanced German 2 ¹	
or GRMN 30: Business German		
GRMN 4010	Advanced Grammar and Stylistics ¹	
Senior Seminar		3
GRMN 4550	Senior Seminar in German Studies	
German Culture, Literature and Other Electives		12-15
Take at least 4 German literature/culture courses. At least 2 courses must be upper division, and at least 2 must be taught in the German language.		
<i>Courses Taught in German</i>		

Select at least two of the following:

GRMN 3110	German Literature from the Avant-garde to the Postmodern
GRMN 3120	German Literature from the Enlightenment to Expressionism
GRMN 3130	Issues in German Philosophy and Literature
GRMN 3140	Current Issues in German Literature
GRMN 3150	Issues in German Politics and Literature
GRMN 3520	Open Topics in the Cultural Context
GRMN 3900	Independent Study
GRMN 3930	Internship
GRMN 4330	The Age of Goethe
GRMN 4340	Seminar in German Literature
GRMN 4450	Methods of Teaching German
<i>Courses Taught in English</i>	
FYSM 1000	First Year Seminar (Section 032 "Uncertainty")
GRMN 1601	Germany Today
GRMN 1602	Metropolis and Modernity
GRMN 1701	Nature and Environment in German Literature and Thought
GRMN 2301	Inside Nazi Germany: Politics, Culture, and Everyday Life in the Third Reich
GRMN 2501	Miniatures of Modern Life: Introduction to Short Fiction
GRMN 2502	Representing the Holocaust
GRMN 2503	Fairy Tales of Germany
GRMN 2601	Kafka and the Kafkaesque
GRMN 2603	Moral Dilemmas in Philosophy and Literature
GRMN 3501	The German-Jewish Experience: From the Enlightenment to the Present
GRMN 3502	Literature in the Age of Goethe
GRMN 3503	German Film Through World War II
GRMN 3504	Topics in German Film
GRMN 3505	The Enlightenment: Tolerance and Emancipation
GRMN 3506	Tracing the Criminal: Crime in 19th C Society and Culture
GRMN 3513	German Film and Society 1945-1989
GRMN 3514	German Film & Society After 1989
GRMN 3601	German Women Writers
GRMN 3702	Dada and Surrealist Literature
GRMN 4231	Sex, Love and Marriage in Literature and Philosophy
GRMN 4251	Marxism
GRMN 4301	Gender, Race and Immigration in Germany and Europe
GRMN 4501	Seminar: Literature in Cultural Context
GRMN 4502	Nietzsche: Literature and Values
GRMN 4503	Issues in German Thought
GRMN 4504	Goethe's Faust
JWST 4544	History of Yiddish Culture
Total Credit Hours	32-35

- ¹ Students have the option of taking the exam *Zertifikat Deutsch als Fremdsprache* in GRMN 3020 and the Goethe-Zertifikat C1 in GRMN 4010.
- ² With the approval of the German program faculty advisor, one course from another department may be taken in lieu of one of the four courses, provided that the course has a direct link to German studies.
- ³ GRMN 4450 and GRMN 4460 can be taken only after full admission to the teacher education program in the School of Education.

Secondary Teacher Certification Program

In addition to other requirements as stated by CU Boulder’s School of Education, the following courses are required for students in the secondary teacher certification program:

- GRMN 4450 Methods of Teaching German (3)
- GRMN 4460 High School German Teaching (6)

Study Abroad

The department recommends that all majors take part in study abroad. The university’s program in Regensburg provides an academic year and spring semester study abroad program. The Berlin program offers an academic year and a summer study abroad opportunity. Please consult with a faculty advisor and visit the Education Abroad (<http://abroad.colorado.edu>) website for program-specific information. Scholarships are available to help cover the costs of study abroad.

Graduating in Four Years

Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of “adequate progress” as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress in German or Russian studies, students should meet the following requirements:

- Begin to study the language in the freshman year, or have received AP credit.
- In consultation with the major program advisor before the end of the drop/add period in the first semester, plan a tentative schedule of courses to be taken over eight semesters.
- Discuss progress toward the degree each semester with the major advisor.

NOTE: Although these requirements apply only in cases in which students are seeking to graduate under the terms of the four-year guarantee, they are good advice for all majors. Consult the program advisor about the major at any time.

Recommended Four-Year Plan of Study

Through the required course work for the major, students will complete all 12 credit hours of the Arts & Humanities area of the Gen. Ed. Distribution Requirement.

Course	Title	Credit Hours
Year One

¹ Students who take intensive language courses (GRMN 1030 or GRMN 2030) may fulfill their additional language credits with GRMN 3030 or GRMN 4010.

² Or placement credit. Students who place out of beginning and intermediate language requirements should see the major requirements for further flexible options.

Russian Studies - Bachelor of Arts (BA)

The major in Russian studies is an interdisciplinary program focusing on study of the current cultural and social context, and the literary, artistic, and historical aspects of Russian culture in the past and present. The aim of the language curriculum is to equip students to read, write, speak and understand Russian on a level allowing communication with natives and other users of the language. Before registering for a course, students should consult with a departmental advisor concerning appropriate placement.

Students interested in Russian studies should consider a double major in order to increase their career opportunities. Prospective teachers might combine Russian studies with a major in another foreign language, while those preparing for a career in government, business or social services should benefit from a combination of Russian studies and a social science or business major. Students structure their curriculum according to the departmental checklist for majors, in close consultation with a departmental advisor.

The following areas are central to the undergraduate degree in Russian:

- an awareness of the fundamental outlines of the history of Russian literature and culture from the Middle Ages to the present day;
- familiarity with the major Russian creative writers of the nineteenth and twentieth centuries;
- familiarity with the historical context of Russian literature and culture;
- an awareness of basic critical methodologies as they relate to the study of Russian literature and culture

In addition, students with a degree in Russian are expected to acquire:

- the ability to comprehend contemporary Russian, written or spoken, to a degree permitting sophisticated analysis of cultural texts;
- the ability to analyze Russian literary texts and give a reasoned response to them in literate English;
- the ability to write and converse in Russian at their own intellectual level.

Study Abroad

The department strongly recommends that all Russian majors take part in the university summer language program in St. Petersburg. For more information on CU Study Abroad programs, visit the Education Abroad (<http://abroad.colorado.edu>) website.

Courses Taught in English

A number of courses are offered in translation. These courses generally require no previous study in the language, history or culture of the area involved, and are open to all interested students, regardless of major.

Concurrent Degree Program BA/MA in Russian Studies

Highly motivated undergraduates majoring in Russian studies at CU Boulder have the opportunity to enter a BA/MA program, thereby earning both the BA and the MA in five years. The concurrent degree

program offers a unique academic credential designed to produce skilled graduates for a variety of occupations.

In most cases, students must make written application no later than April 1 of the sophomore year. A minimum GPA of 3.00 for all Russian Studies courses is required, as well as two letters of recommendation indicating strong potential for advanced, intensive work in Russian. BA/MA students are expected to take graduate courses in the fourth and fifth years only. Students should have completed most of their MAPS/Core requirements by the end of the sophomore year. Only CU Boulder students may apply.

For more information, visit the Concurrent BA/MA Degree in Russian Studies (<https://www.colorado.edu/gsl/russian/undergraduate/concurrent-bama-degree-russian-studies>) webpage.

Requirements

General Requirements

Students must complete at least 30 credit hours in Russian studies, at least 18 of which must be completed at the 3000 or 4000 level, with grades of C- or better (none may be taken as pass/fail).

- RUSS 1010 and RUSS 1020 do not count toward the 30 credit hours required for the major in Russian studies.
- Students may not receive credit for both RUSS 3060 and RUSS 4010 or RUSS 4020 and RUSS 4060. Choose either the RUSS 3060/RUSS 4060 sequence or the RUSS 4010/RUSS 4020 sequence.
- Beginning or middle-level language course requirements may be met by transfer credit or by testing out of the course. Students who enter the program at the third-year level must complete at least 18 credit hours in residence in courses numbered 3000 or above with grades of C- or better (none may be taken pass/fail).
- Students who enter at and enroll in Russian language courses at the 3000- or 4000-level may not receive credit for lower-division Russian language courses, unless lower-division language course work was completed prior to registration for 3000- and 4000-level Russian language courses.

Students are required to structure their curriculum for the major in close consultation with a departmental advisor. Students with advanced Russian language skills are strongly encouraged to meet with a departmental faculty advisor to discuss language placement. Students who have Russian language transfer credit and/or students who are Russian language native or heritage speakers may enter the program at the upper-division level, up to RUSS 4010, with faculty permission.

In the case of advanced language placement, students will be required to meet with the Russian faculty advisor for Russian course substitutions and recommendations. Students who place out of Russian language courses required for the major must replace the credits with additional coursework in Russian Studies. Any substitutions to major coursework must be preapproved by the Russian faculty advisor.

Graduating Russian studies majors are asked to participate in an annual assessment exercise during their last (spring) semester at the university to help evaluate the quality of the Russian Studies major. Students may also be interested in learning their level of language competence from the standardized online test. Students cannot study for the exams, and they do not affect course grades or graduation in any way.

NOTE: Study abroad is recommended after the second year of language study.

Elective

One other 3000- to 4000-level RUSS or GSSL culture/literature or language course, or a course in another department pertaining to Russia, upon consent of advisor. 3

Total Credit Hours 32

¹ Students may not receive credit for both RUSS 3060 and RUSS 4010 or RUSS 4020 and RUSS 4060.

² RUSS 3601 cannot be used to fulfill both the "19th Century and Earlier" and "20th and 21st Centuries" categories.

Graduating in Four Years

Consult the Four-Year Guarantee Requirements (<https://www.colorado.edu/advising/programs-requirements/germanic-slavic-languages-literatures>) for information on eligibility. The concept of "adequate progress" as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major.

Recommended four-year plans of study appear on the Four-Year Plans (p. 400) tab. To maintain adequate progress in Germanic or Russian studies, students should meet the following requirements:

- Begin to study the language in the freshman year, or have received AP credit.
- In consultation with the major program advisor before the end of the drop/add period in the first semester, plan a tentative schedule of courses to be taken over eight semesters.
- Discuss progress toward the degree each semester with the major advisor.

NOTE: Although these requirements apply only in cases in which students are seeking to graduate under the terms of the four-year guarantee, they are good advice for all majors. Consult the program advisor about the major at any time.

Recommended Four-Year Plans of Study

Through the required course work for all tracks of the major, students can complete all 12 credit hours of the Arts & Humanities area of the Gen Ed Distribution Requirement. Depending on the courses selected from options, students can potentially complete some credit hours in the Social Sciences area of the Gen Ed Distribution Requirement and the Global Perspective component of the Gen Ed Diversity Requirement.

German Studies - Minor

In German studies, we focus on all areas of German culture and its crucial role in the formation of the modern world. A minor is offered in German studies. Declaration of a minor is open to any student enrolled at CU Boulder, regardless of college or school.

For more information, see the A&S Policy on Enrollment in Undergraduate Language Courses (<http://www.colorado.edu/gssl/policy-enrollment-undergraduate-language-courses>).

Requirements

Students must complete 20 credit hours as directed below, with grades of C- or above. Students may not apply more than 9 hours of transfer credit (including 6 upper-division credits) toward the minor. Transfer courses must be approved by the department.

Required Courses and Credits

Code	Title	Credit Hours
GRMN 2010 & GRMN 2020 or GRMN 2030	Intermediate German 1 and Intermediate German 2 ¹ Intensive Intermediate German	8
GRMN 1601	Germany Today	3
GRMN 3010	Advanced German 1 (or any 3000-4000 level German literature, film, or culture course taught in German or English)	3
GRMN 3020 or GRMN 3030	Advanced German 2 (or any 3000-4000 level GRMN literature, film, or culture course taught in German or English) ² Business German	3
One 3000- or 4000-level GRMN literature, film or culture course taught in German.		3
Total Credit Hours		20

¹ Students who take GRMN 2030 cannot also receive credit for GRMN 2010 and GRMN 2020, and must take one additional 3-credit GRMN course toward the minor, such that the total number of credits for the minor equals 20.

² Students have the option of taking the exam *Zertifikat Deutsch als Fremdsprache* in GRMN 3020.

Nordic Studies - Minor

Courses are offered in English on Nordic culture and civilization. Courses are also offered in Swedish and Danish language and may be offered in Norwegian and/or Finnish language. In addition, there is an exchange program with Uppsala University in Sweden and with the University of Copenhagen in Denmark (DIS).

The language courses satisfy College of Arts and Sciences language requirements for the BA and BFA degrees.

Requirements

Declaration of a minor is open to any student enrolled at CU Boulder, regardless of college or school.

A minor in Nordic Studies requires the completion of 18 credit hours. A minimum of 9 credit hours must be taken in upper division courses. All courses used to fulfill requirements for the minor must receive a grade of C- or better; none may be taken pass/fail.

Russian Studies - Minor

The Russian minor introduces students to the basics of Russian Studies. Students fulfilling requirements for Russian minor have to take two years of Russian language and a number of survey courses in culture and literature.

Requirements

Declaration of a minor in Russian studies is open to any student enrolled at CU Boulder, regardless of college or school.

A minor in Russian requires the completion of 20 credit hours, 9 of which must be upper-division credit hours. All courses used to fulfill requirements for the minor must receive a grade of C- or better. (None may be taken pass/fail.) Students may not apply more than 9 hours of transfer credit (including 6 upper-division credit hours) toward the minor. Transfer courses must be approved by the department.

Required Courses and Credit Hours

Code	Title	Credit Hours
RUSS 2010	Second-Year Russian 1 ¹	4
RUSS 2020	Second-Year Russian 2 ¹	4
RUSS 3010	Third-Year Russian 1 (or any 3000-4000 level Russian literature, film or culture course)	3-4
Select one of the following:		3
RUSS 2211	Introduction to Russian Culture	
RUSS 2221	Introduction to Modern Russian Culture	
RUSS 3601	Russian Culture Past and Present	
Select one of the following:		3
RUSS 4811	19th Century Russian Literature	
RUSS 4821	20th Century Russian Literature and Art	
One additional 2000-4000 level RUSS course		3
Total Credit Hours		20-21

¹ Heritage speakers should take RUSS 3060 and RUSS 4060 as well as any other 4000-level Russian language course in lieu of RUSS 2010 and RUSS 2020. In this case, 18 credit hours will be sufficient for the minor if other requirements are fulfilled.

History

The history major is defined in such a way as to allow each student to structure a set of courses which is consistent with his or her individual interests and goals. A successful program in history will be one which has been thought through in advance rather than being a random array of classes which happen to fit into each semester's schedule. For more information, please see our Recommended Four-Year Plans (<http://www.colorado.edu/history/node/58/attachment>) document.

Once a student has decided upon their area of interest, they should consider what courses in departments other than history might contribute to a rich yet integrated program. For example, if a student is interested in the history of England, courses in English literature, philosophy and political science might be helpful. A student focusing

on economic history might want to do some work in economics, math and possibly geography. If the student has not yet fulfilled their language requirement and they're interested in Latin American history, Spanish might be the ideal language to take.

HIST 1800 (3) Introduction to Global History

Applies a broad perspective to the global past in order to illuminate how common historical patterns and processes as well as unique elements shaped the human experience. Using a thematic approach, introduces highlights cross-cultural interactions among societies, and, when relevant, how historical processes that began centuries ago still impact the contemporary world. Topic will vary by semester. Department enforced prerequisite: 3 hours of any history coursework.

Requisites: Restricted to students with 27-180 credits (Sophomore, Junior, or Senior) History (HIST) majors and minors only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Methodological, Comparative, and Global

HIST 1818 (3) Introduction to Jewish History: Bible to 1492

Focus on Jewish history from the Biblical period to the Spanish Expulsion in 1492. Study the origins of a group of people who call themselves, and whom others call, Jews. Focus on place, movement, power/powerlessness, gender, and the question of how to define Jews over time and place. Introduces Jews as a group of people bound together by a particular set of laws; looks at their dispersion and diversity; explores Jews' interactions with surrounding cultures and societies; introduces the basic library of Jews; sees how Jews relate to political power.

Equivalent - Duplicate Degree Credit Not Granted: JWST 1818 and RLST 1818

Additional Information: Arts Sci Core Curr: Historical Context

Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: World Areas: Specific Regions

Departmental Category: Asia Content

HIST 1828 (3) Introduction to Jewish History since 1492

Surveys the major historical developments encountered by Jewish communities beginning with the Spanish Expulsion in 1492 up until the present day. Studies the various ways in which Jews across the modern world engaged with the emerging notions of nationality, equality and citizenship, as well as with new ideologies such as liberalism, socialism, nationalism, imperialism and anti-semitism.

HIST 4013 (3) Law and Society in Premodern England to 1688

Examines the origins and developments of English legal and political institutions, including kingship, the common law, procedure and the court and jury system and sets such developments in the context of broader social and religious changes from the Anglo-Saxon period to the 17th century. Emphasizes the implications of these institutions for the development of contemporary American, English and British colonial legal systems.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5013

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1011 or HIST 1113.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Europe: Specific Countries

HIST 4018 (3) Aztecs, Incas, and the Spanish Conquest of the Americas

Building upon contemporary texts and modern histories of both famous and ordinary people, this course examines the indigenous empires known as the Aztecs and the Incas. It also examines the encounter of Europeans and native people, following the history of exploration and conquest from the time of Columbus to about 1550. Equal consideration is given to the course's three components: Aztec, Inca and the Spanish conquest.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1018 or HIST 3020.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: World Areas: Specific Regions

HIST 4020 (3) Topics in Comparative History

Explores historical themes from a comparative perspective. Encourages students to think more analytically about historical change. Consult current online schedule for specific topics. Often team-taught by more than one faculty.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite two 4000-level History courses in differing content areas.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Methodological, Comparative, and Global

HIST 4021 (3) Athens and Greek Democracy

Studies Greek history from 800 B.C. (the rise of the city-state) to 323 B.C. (the death of Alexander the Great). Emphasizes the development of democracy in Athens. Readings are in the primary sources.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4021 and CLAS 5021

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Europe: Ancient and Medieval

HIST 4031 (3) Alexander the Great and the Rise of Macedonia

Covers Macedonia's rise to dominance in Greece under Philip II and the reign and conquests of Alexander the Great.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4031 and CLAS 5031

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite CLAS 1051 or CLAS 1509 or CLAS 2039 or CLAS 4139 or CLAS 4149 or CLAS 2041 or CLAS 4021 or CLAS 4041 or HIST 1051 or GREK 3113.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Europe: Ancient and Medieval

HIST 4040 (3) The History of Space Exploration and Defense

This course examines the development and impact of American, Soviet/Russian, and European civilian and military space activities from the dawn of the space age to the space challenges of the 21st century.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Methodological, Comparative, and Global

HIST 4041 (3) Classical Greek Political Thought

Studies main representatives of political philosophy in antiquity (Plato, Aristotle, Cicero) and of the most important concepts and values of ancient political thought. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4041 and CLAS 5041 and PHIL 4210

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Europe: Ancient and Medieval

HIST 4048 (3) Latin American Revolutions

Examines the origins, development and continuing influence of 20th-Century Latin American revolutionary movements, with a focus on placing these struggles in comparative historical context. Explores various approaches to revolution and the general role of left political formations in Latin America. Specific focus can vary by semester with examples drawn from various Latin American countries, including Mexico, Guatemala, Cuba, Chile and Nicaragua.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5048

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1018 or HIST 1028 or HIST 3020.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: World Areas: Specific Regions

HIST 4050 (3) A Global History of World War II

Examines World War II in a global perspective. This era witnessed transformations in the social, political and economic orders across the globe. Traces the domestic and international developments, including military issues, that shaped the period in Europe, Asia, Africa and North America and assesses the war's legacy.

Requisites: Requires prerequisite course of HIST 1012 or 1025 or 1028 or 1123 or 1228 or 1308 or 1528 or 1628 or 1708 or 1800 or 1828 (minimum grade D-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Methodological, Comparative, and Global
Departmental Category: Asia Content

HIST 4053 (3) Britain and the Empire, 1688-1964

Examines the external polity of Great Britain from 1688 to 1964 in Europe, the East, Africa and the Americas.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5053

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Europe: Specific Countries

HIST 4061 (3) Twilight of Antiquity

Explores the reasons for the fall of the Roman Empire in the western Mediterranean and its survival in the east as Byzantium. Emphasizes Christianity; barbarians; social, economic and cultural differences; contemporary views of Rome; and modern scholarship. No Greek or Latin is required.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5061 and CLAS 4061 and CLAS 5061

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Europe: Ancient and Medieval

HIST 4071 (3) Seminar in Ancient Social History

Considers topics ranging from demography, disease, family structure, and the organization of daily life to ancient slavery, economics, and law. Focuses either on Persia, Greece, or Rome and includes a particular emphasis on the methodology required to reconstruct an ancient society, especially the interpretation of problematic literary and material evidence, and the selective use of comparisons with better known societies. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4071 and CLAS 5071

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Europe: Ancient and Medieval

HIST 4081 (3) The Roman Republic

Studies the Roman Republic from its foundation in 753 B.C. to its conclusion with the career of Augustus. Emphasizes the development of Roman Republic government. Readings are in the primary sources. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4081 and CLAS 5081

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Europe: Ancient and Medieval

HIST 4083 (3) Revolution and Nationalism in Modern Ireland

Surveys Irish nationalist movements since the eighteenth century, treating constitutional nationalism, revolutionary republicanism and Gaelic cultural movements while also examining the development of Unionism in Ulster as a response to political and cultural nationalism. Emphasizes the political, religious and cultural roots of the current sectarian crisis in Northern Ireland and analyzes that crisis up to the present day.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1012 or HIST 1123.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Europe: Specific Countries

HIST 4091 (3) The Roman Empire

Studies Imperial Roman history beginning with the Roman Revolution and ending with examination of the passing of centralized political authority in the western Mediterranean. Emphasizes life, letters and personalities of the Empire.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4091 and CLAS 5091

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Europe: Ancient and Medieval

HIST 4109 (3) World War II in Asia and the Pacific

For Asia, World War II began with the Mukden Incident (1931), resulting in the Japanese domination of Manchuria and leading to a full-scale war between China and Japan in 1937. Only after the Japanese attacked the U.S. Pacific fleet at Pearl Harbor four years later did the United States enter the war. Discusses the various socioeconomic and political factors leading to the war in Asia, examines the nature of the conflict on the Asian mainland and in the Pacific, and assesses legacy of the war on all those involved.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: World Areas: Comparable and General
Departmental Category: Asia Content

HIST 4116 (3) History of U.S. Foreign Relations, 1865-1940

Traces the rise of the United States to world power. Explores the interactions of expansionist and isolationist impulses with politics, ideology, culture and economics, with a focus on the Spanish American War and the acquisition of empire, World War I and the coming of World War II.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5116

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: United States: Topical Courses 1

HIST 4117 (3) Colorado History

Presents the story of the people, society, culture, and environment of Colorado from the earliest Native Americans, through the Spanish influx, the fur traders and mountain men, the gold rush, railroad builders, the cattlemen and farmers, the silver boom, the twentieth-century tourists, city-dwellers, workers and activists. Highlights the historical origins of twenty-first century institutions, problems, challenges, and opportunities.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1015 or HIST 1025.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: United States: Topical Courses 2

HIST 4118 (3) History of Mexico to 1821

Studies Mexican history beginning with roots and evolution of pre-Columbian civilizations and concluding with the events of Mexican independence in 1821. Emphasizes society and culture of the Aztecs and Mayans, the Spanish conquest of Mexico, and the colonial regime of New Spain.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: World Areas: Specific Regions

HIST 4122 (3) Europe During the Renaissance

Explores the history and culture of Western Europe, 1300-1520. Comprehensive in scope, with analysis of political, economic, social, religious, intellectual and artistic matters. Discusses significance of the Renaissance for origins of modern civilization.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1011.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Europe: Modern

HIST 4123 (3) Medieval England

Treats the major developments in English history from the Anglo-Saxon period through the 15th century. Emphasizes late medieval English society during the 13th and 14th centuries.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1011 or HIST 1113.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Europe: Specific Countries

HIST 4125 (3) Early American History to 1763

Explores the colonial era of American history from the pre-Columbian period to the end of the Seven Years' War. Topics include pre-contact Native societies, exploration, European settlement and Native American responses, labor system and the rise of slavery, imperial wars, and the developments in religion, society, politics and culture.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5125

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: United States: Chronological Periods

HIST 4126 (3) History of U.S. Foreign Relations Since 1941

Traces the development of the United States as a superpower. Details American power and diplomacy in World War II and the rise of the national security state in the Cold War. Explores the Korean, Vietnam and Persian Gulf Wars, and the era of modern-day globalization.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5126

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: United States: Topical Courses 1

HIST 4128 (3) The History of Modern Mexico Since 1821

Centers on the Mexican search for political consolidation and stability through the 19th, 20th and 21st centuries. Focuses on the Mexican Revolution (1910-1940) and the post revolutionary rule of the Institutional Revolutionary Party. Examines the War on Drugs and the causes of Mexican migration to the United States.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5128

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1028 or HIST 3020.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: World Areas: Specific Regions

HIST 4131 (3) The Origins of Christianity

Surveys the sources for the development of ancient Christianity from the ministry of Jesus Christ to the conversion of the emperor Constantine in the early 4th century. Through lectures and a close reading of primary source materials in translation, students will examine the social activity and theological development of early Christians in their Roman and Jewish context.

Requisites: Requires prerequisite course of HIST 1011 or HIST 1061 or HIST 2170 or CLAS 1061 (minimum grade C-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Europe: Ancient and Medieval

HIST 4133 (3) The Tudors: British History 1485-1603

Deals with the history of England from 1485 to 1603. Examines patterns of daily life, the impact of the Reformation and the Renaissance and the development of Parliament and the monarchy under the Tudor rulers, especially Henry VIII and Elizabeth.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1011 or HIST 1113.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Europe: Specific Countries

HIST 4143 (3) The Making of Great Britain: British History 1603-1714

Covers the history of the British Isles from 1603 to 1714, the era of the English Civil War and the Glorious Revolution. Traces economic and social relationships, cultural change and religious and political conflict under the Stuart monarchs.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1011 or HIST 1012 or HIST 1113 or HIST 1123.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Europe: Specific Countries

HIST 4146 (3) U.S. Military History since 1898

Examines America's national defense and war efforts from the Spanish American War to the present, emphasizing causes and consequences of modern conflicts, and the impact of military activities on American society.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1025.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: United States: Topical Courses 1

HIST 4153 (3) Emergence of Modern Britain, 1688-1851

Surveys British history from the Revolution of 1688 to the Great Exhibition in 1851. Topics include creation of the United Kingdom, traditional popular culture, birth of a consumer society, the British Enlightenment, the Evangelical Revival, loss of the American colonies, imperial expansion in Asia, war with Revolutionary and Napoleonic France, the Industrial Revolution, and the impact of utilitarianism and political radicalism.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1012 or HIST 1113 or HIST 1123.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Europe: Specific Countries

HIST 4158 (3) History of Modern Brazil

Surveys the post independence history of 19th and 20th century Brazil. Looks at the development of Brazilian nationalism and political institutions and focuses heavily on race, ethnicity, gender and sexuality in Brazil, understanding how different peoples have settled and accommodated themselves to the Brazilian environment. Finally, it will look at Brazilian economic development and its consequences at the beginning of the 21st century.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: World Areas: Specific Regions

HIST 4166 (3) The Vietnam War in Politics and Culture

Examines America's second-longest and most divisive war from the beginning of the U.S. involvement in the 1950s to the repercussions echoing into the 1980s. Considers the global context, motives, and evolution of U.S. involvement, support for and opposition to the war at home, the war's repercussions in international policy and domestic politics, and representations of the war in popular culture.

Equivalent - Duplicate Degree Credit Not Granted: HIST 2166

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: United States: Topical Courses 1
Departmental Category: Asia Content

HIST 4190 (3) French Connections: Contemporary France and America in Historical Context

Faculty-led Global Seminar, based in Bordeaux, France provides an opportunity to compare French history and contemporary culture, economy, and culture to that of the United States. Lectures in Boulder and Bordeaux are supplemented by interactions with officials, scholars, business leaders, interest groups, and organizations in France. Offered through Study Abroad.

Equivalent - Duplicate Degree Credit Not Granted: IAFS 3500

Additional Information: Arts Sci Core Curr: Historical Context

Arts Sci Gen Ed: Distribution-Arts Humanities

Arts Sci Gen Ed: Distribution-Social Sciences

Departmental Category: Methodological, Comparative, and Global

HIST 4205 (3) The Colonial Wars and the Coming of American Independence, 1739-1776

Investigates imperial warfare and its effects during the late colonial period, concentrating on the French and Indian War (1754-1763), the disruption of Anglo-American relations and the origins of the War of American Independence (1775-1783).

Equivalent - Duplicate Degree Credit Not Granted: HIST 5205

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: United States: Chronological Periods

HIST 4212 (3) The Age of Religious Wars: Reformation Europe, 1500-1648

Traces the history of Europe from the end of the Hundred Years War through the Thirty Years War. During this period Europe experienced tremendous changes including emerging religious heresies, the advent of the Spanish Inquisition, violent civil wars, the witch craze, and the Thirty Years War, a precursor to the World Wars of the 20th century.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1011 or HIST 1113.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Europe: Modern

HIST 4215 (3) The Revolutionary War and the Making of the American Republic, 1775-1801

Investigates the Revolutionary War and its impact on the creation of American political institutions, as well as its cultural, social and economic effects, from the Battles of Lexington and Concord through the inauguration of Thomas Jefferson.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5215

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: United States: Chronological Periods

HIST 4217 (3) The American West in the 19th Century

Explores cultural, social and political interaction in the American West during the 19th century. Themes include environmental change; conflict and syncretism across race, class, and gender lines; mythic images, and their relationship to the "Real" West.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1015 or HIST 1025.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: United States: Topical Courses 2

HIST 4218 (3) Lost Kingdoms & Caliphates: West Africa to 1900

Investigates the formation and dissolution of West Africa's kingdoms, caliphates and stateless societies during the era of the trans-Atlantic and trans-Saharan slave trades. Through a survey of oral and written sources, this course examines West Africa's geopolitical transformation in warfare, jihad, trade and slavery, especially in relation to the African Diaspora to the Americas and Muslim world.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: World Areas: Specific Regions

HIST 4222 (3) War and the European State, 1618-1793

Studies the development of the European states in response to international power struggles in the 17th and 18th centuries (up to the French Revolution).

Equivalent - Duplicate Degree Credit Not Granted: HIST 5222

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Europe: Modern

HIST 4223 (3) The French Revolution and Napoleon

Traces the origins, course, and consequences of the most important modern revolution, the French Revolution of 1789. While seeking to explain how a liberal movement for progressive change soon degenerated into the factional bloodbath of the Terror, will also examine the revolution's global impact and how three decades of revolutionary warfare lead to the rise and fall of Napoleon Bonaparte.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5223

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Europe: Specific Countries

HIST 4227 (3) The American West in the 20th Century

Explores cultural, social, and political interaction in the American West during the 20th century. Themes include popular culture, state-federal relationships, environmental change, urbanization, immigration, and cultural formation.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1025.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: United States: Topical Courses 2

HIST 4232 (3) From Absolutism to Revolution in Europe, 1648-1789

Studies the history of Europe from the end of the Thirty Years War through the outbreak of the French Revolution. Central themes include the establishment of more centralized, increasingly bureaucratic states; global expansion and economic commercialization; cultural developments such as the Scientific Revolution and the Enlightenment.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1012 or HIST 1123.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Europe: Modern

HIST 4233 (3) History of France since 1815

Examines the ongoing struggle between the revolutionary and counter-revolutionary traditions of France and how it shaped the political history and affected the social, cultural and intellectual character of the nation from 1815 to the present.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1012.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Europe: Specific Countries

HIST 4235 (3) Jacksonian America

Focuses on the social and cultural history of the Jacksonian Era. Issues include the transformation of the market economy, slavery, moral reform, Indian removal, changes in ideas about men's and women's natures and roles, western expansion, and political culture.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5235

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1015.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: United States: Chronological Periods

HIST 4238 (3) History of Southern Africa

Examines the history of southern Africa history from the earliest times to the present. Short background readings and lectures cover southern African's history and class discussions of novels are layered over these basics. Topics of study include Cecil Rhodes and the diamond/gold mines; Shaka and the Zulu "nation"; apartheid; Nelson Mandela and the anti-apartheid movement; issues facing South Africa today.

Requisites: Requires prerequisite course of HIST 1218 or HIST 1228 or HIST 3020 or ANTH 1150 or ANTH 3100 or ANTH 4630 or GEOG 3862 or PSCI 3082 (minimum grade C-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: World Areas: Specific Regions

HIST 4258 (3) Africa under European Colonial Rule

Looks at the British, French, Portuguese and German empires that undertook the "Scramble for Africa" in the late 19th century. Themes include slavery and the slave trade; colonization and "pacification"; African resistance to European rule; missionaries and converts; decolonization and anti-colonial uprisings; issues facing Africa today, including oil, war and the Rwandan genocide.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1218 or HIST 1228 or HIST 3020 or ANTH 1150 or ANTH 3100 or ANTH 4630 or GEOG 3862 or PSCI 3082.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: World Areas: Specific Regions

HIST 4303 (3) Venice and Florence during the Renaissance

Comparative urban study of Florence and Venice from 13th through 16th centuries. Principal subjects are the distinctive economies of the cities, political developments, Renaissance humanism, patronage of the arts, and foreign policy.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5303

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1011.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Europe: Specific Countries

HIST 4312 (3) 19th Century Europe

Concerned with major social, political and cultural developments in Europe from circa 1800 to the outbreak of World War I. Special emphasis is placed upon the Napoleonic experience, the rise of modern nationalism, romanticism, Darwinism and its social applications, the Industrial Revolution, imperialism, the emergence of modern ideologies, and the background of World War I.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1012.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Europe: Modern

HIST 4313 (3) History of Modern Italy

Examines the major historical, economic and social factors that have shaped the identity of modern Italy, from the enthusiasm of young patriots during Italy's unification in the 1860s to the discontent and domestic terrorism of the 1960s-1980s. Focuses on Mussolini, the Fascist movement and on World War II, as well as the changing role of women. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: ITAL 4250

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Europe: Specific Countries

HIST 4315 (3) Civil War and Reconstruction

Describes the forces at work in the antebellum period that led to sectional warfare; social, economic, and political changes effected by the war; the American agony of reconstruction; and the long-range results of that difficult era.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1015.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: United States: Chronological Periods

HIST 4320 (3) The History of the Mediterranean, 1000-1600

Familiarizes students with the Mediterranean ecumene covering concepts such as the Renaissance, the Crusades, traders and travelers, religions and cities. Explores both conflicts (military, confessional) and exchanges (commercial, artistic, scientific) thus helping students think cross culturally, comparatively and thematically. Emphasizes the Mediterranean contribution to historical developments of western Europe, the Middle East, and North Africa.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1011 or HIST 1061 or HIST 1308 or HIST 4061 or HIST 4071 or HIST 4081 or HIST 4091 or HIST 4711.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Methodological, Comparative, and Global

HIST 4326 (3) Epidemic Disease in US History

Focuses on the impact of infectious epidemic disease on American history, from smallpox and cholera to influenza, AIDS and Ebola. Addresses early depopulation of the Americas; contagion and social upheaval; interpretations of pestilence; social construction of disease; urbanization; doctors and alternative practitioners; public health; prejudice and infection; the ethics of quarantine; public versus individual interests; and the paradox of prevention.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: United States: Topical Courses 1

HIST 4328 (3) The Modern Middle East, 1600 to the Present

Primarily from 1800 to the present. Attention divided equally between the region's political history and international relations and its patterns of economic, social and cultural modernization in the main countries.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5328

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1308.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: World Areas: Specific Regions
Departmental Category: Asia Content

HIST 4329 (3) Islam in the Modern World: Revivalism, Modernism, and Fundamentalism, 1800-2001

Examines the more important movements of reform in Muslim world (including Africa, the Middle East and India) from the 18th century to the present, and their origins and intellectual import. Due to the trans-regional nature of this broad movement of reform, particular attention is paid to how these movements related to local political, economic and social contexts, and how they, in turn, moved across larger networks of oceanic commerce and trade. Concludes with extended case studies of Islamic reformism in modern Egypt and India, and their ultimate influence on the politics of contemporary Islamist movements, especially the intellectual position of Ussama B. Ladin.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1308.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: World Areas: Comparable and General
Departmental Category: Asia Content

HIST 4336 (3) Nineteenth-Century American Thought and Culture

Examines the emergence of intellectual traditions and cultural trends in their social and political contexts from the early republic to the beginning of the modern era. Addresses developing arguments about democracy, religion, transcendentalism, gender, race, union/disunion, the Darwinian revolution, utopia/dystopia realism and naturalism in literature and the arts.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: United States: Topical Courses 1

HIST 4338 (3) History of Modern Israel/Palestine

Explore the history culture, and politics of this crossroads of Europe and Asia from the late Ottoman period to the present. Topics include: nationalism and colonialism, development of Zionist ideology, Palestinian nationalism, the Jewish community (Yishuv) under British rule, the founding of the State of Israel, Arab-Israeli and Palestinian-Israeli relations, Israel's minorities, and the conflict of religion and state.

Equivalent - Duplicate Degree Credit Not Granted: JWST 4338

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1818 or JWST 1818 or HIST 1828 or JWST 1828 or HIST 1308 or JWST 2350 or other course work in Middle Eastern or Jewish History.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: World Areas: Specific Regions Departmental Category: Asia Content

HIST 4339 (3) Borderlands of the British Empire

Examines the development of the borderlands of the British empire through imperial expansion, consolidation, and early decolonization. Focuses on the 19th and early 20th centuries. Topics include domination, resistance and negotiation in areas such as India, Afghanistan, the Palestine Mandate. Aims for students to acquire skills in comparative history and to develop a better understanding of the roots of contemporary conflicts.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5339

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1012 or HIST 1123 or HIST 1228 or HIST 1308 or HIST 1528.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: World Areas: Comparable and General Departmental Category: Asia Content

HIST 4343 (3) Spain and Portugal during the Golden Age

Surveys the history of Spain and Portugal from the late medieval period through early modern period. Explores the thought, art, politics and socio-economic milieu of the Golden Age. Topics include attitudes toward minorities, the Inquisition, the Age of Exploration and the establishment of colonial empires in Asia and the Americas, court culture and architecture, religious conflicts and literary production. Formerly HIST 4064.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5343

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1011 or HIST 1018.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Europe: Topical

HIST 4346 (3) Twentieth-Century American Thought and Culture

Examines the emergence of intellectual traditions and cultural trends in their social and political contexts from the beginning of the modern era through the onset of the postmodern. Addresses developing arguments about democracy, science, race, gender, faith, American identity, radicalism and conservatism, modernist thinking and artistic expression, and the role of intellectuals in society.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: United States: Topical Courses 1

HIST 4348 (3) Topics in Jewish History

Covers topics in Jewish history from biblical beginnings to present day. Topics vary each semester. Consult the online Schedule Planner for specific topics.

Equivalent - Duplicate Degree Credit Not Granted: JWST 4348

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1818 or JWST 1818 or HIST 1828 or JWST 1828 or HIST 1308 or JWST 2350 or other course work in Middle Eastern or Jewish History.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: World Areas: Specific Regions

HIST 4349 (3) Decolonization of the British Empire

Examines the end of the British Empire. Focuses on connections between imperial territories, such as networks of anticolonial activists and links between British decision makers. Students will acquire research skills and develop a better understanding of the roots of contemporary conflict. Prior coursework in British imperial history and excellent writing skills are required.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5349

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1123 or HIST 1228 or HIST 1308 or HIST 1528 or HIST 4053 or HIST 4238 or HIST 4258 or HIST 4328 or HIST 4329 or HIST 4338 or HIST 4339 or HIST 4538 or HIST 4548 or HIST 4558.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: World Areas: Comparable and General

HIST 4359 (3) The Global History of Modern Arabia

Examines the history, politics and society of the countries of the Arabian Peninsula (modern day Saudi Arabia, Oman, Yemen, Bahrain, Qatar and the UAE) in the period between 1800 and the present. The guiding assumption will be that the histories of Arabia cannot be studied in isolation from broader histories of capital formation, imperialism, religious reform, state formation and the discourses and practices which they informed. To that end, the focus will be on Arabia as part of the British, Ottoman and Omani Empires, a participant in Indian Ocean commerce, a source and destination for migrant scholars, students and laborers, the center of the petroleum economy and a domain of struggle for activists and intellectuals representing multiple political/ideological currents-not only Islamist, but also, liberal, socialist and communist.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: World Areas: Comparable and General

HIST 4366 (3) Culture Wars: Modernism, Mass Culture, and the Modern U.S.

Examines how U.S. public moralists, intellectuals, and artists from the end of the nineteenth century to World War II both celebrated and attacked the rise of two characteristic features of modernity: mass culture (amusement parks, popular music, radio, movies), and modernist literary and artistic expression. Addresses how Americans both constructed and violated the line between "popular" and "high" culture.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1025.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: United States: Topical Courses 1

HIST 4378 (3) History of Modern Jewish-Muslim Relations

Examines the modern history and culture of Jewish communities under Islamic rule in the Middle East and North Africa; Jews' and Muslims' encounters with empire, westernization and nationalism; representations of Sephardi and Eastern Jews; Jewish-Muslim relations in Europe and the U.S.; and contact and conflict between Jews and Muslims in (and about) Israel/Palestine. Sources include memoirs, diaries, newspapers and films.

Equivalent - Duplicate Degree Credit Not Granted: JWST 4378

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: World Areas: Specific Regions
Departmental Category: Asia Content

HIST 4412 (3) Europe, 1890-1945

Examines the origins, character and significance of the First and Second World Wars for the major nations of Europe during the first half of the 20th century.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1012.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Europe: Modern

HIST 4414 (3) European Thought and Culture, 1750-1870

Explores major developments in European thought from the Enlightenment to Nietzsche. Special attention given to the individuals whose ideas have had the greatest influence on modern intellectual history, e.g., Rousseau, Hegel, Herder, Marx, Kierkegaard, Baudelaire, Darwin, and others.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Europe: Topical

HIST 4415 (3) Teddy Roosevelt's America - the U.S. from 1877 to 1917

Examines the social, economic, political, and cultural history of the United States from the end of Reconstruction to the eve of World War I. Topics include the struggles of labor and industry, race and immigration, western and environmental issues, city life and new technologies, feminism and Progressivism, and Indian wars and imperialism.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1015 or HIST 1025 or ENV 1000.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: United States: Chronological Periods

HIST 4416 (3) Environmental History of North America

Examines how people of North America, from precolonial times to the present, interact with, altered, and thought about the natural world. Key themes include Native American land uses; colonization and ecological imperialism; environmental impacts of food and agriculture; industrialization, urbanization and pollution; energy transitions; cultures of environmental appreciation; the growth of the conservation and environmental movements.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: United States: Topical Courses 1

HIST 4422 (3) World War I in Europe

Examines the origins of World War I; the military, social and cultural character of the conflict; and its enduring impact in the post-1918 world. By thinking about the war as both a military undertaking and an experience that affected domestic and global politics, the course will explore why World War I constituted an event of major importance to Europe and the 20th century world.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5422

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1012.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Europe: Modern

HIST 4423 (3) German History Since 1849

Cultural, political and social history of Germany since 1849. Emphasizes German unification, Bismarckian foreign policy, the rise of neoromanticism, Weimar politics and the rise of national socialism.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1012.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Europe: Specific Countries

HIST 4424 (3) Modern European Thought and Culture, 1870-Present

Emphasizes Nietzsche and the youth revolt against middle class society, the literary and artistic avant garde (impressionism to existentialism), the psychoanalytic movement, the European right and left, and post-WWII European thought.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Europe: Topical

HIST 4425 (3) United States History, 1917-1945

Examines U.S. history from World War I through World War II. Key themes include: warfare; the rise of the modern state; consumer culture; the shift from conservative politics to the New Deal liberalism; the women's movement; immigration restriction; segregation; the Great Migration, and civil rights; conflicts between secular modernism and religious fundamentalism; and new technologies such as the automobile.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1025.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: United States: Chronological Periods

HIST 4433 (3) Nazi Germany

Focuses on the political, social, cultural, and psychological roots of national socialism, with the nature of the national socialist regime, and those politics and actions that came directly out of its challenge to values central to Western civilization. Studies how Nazism came out of this civilization.

Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Europe: Specific Countries

HIST 4435 (3) United States History, 1945-1973

Examines the History of the United States during the Cold War, with an emphasis on social and cultural issues at home. Also addresses the economic and political evolution of the American people and the nation's role in world affairs.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1025.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: United States: Chronological Periods

HIST 4437 (3) African American History, 1619--1865

Explores the history of Africans in America from the first arrivals to emancipation, and their role in the social, cultural, economic, and political evolution of the United States.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1015.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: United States: Topical Courses 2

HIST 4442 (3) Europe since 1945

Explores Europe from the end of World War II through the present day. Topics include postwar reconstruction; the cold war; anticommunist opposition and new social movements; consumer culture and punk music; the fall of communism; the Yugoslav wars; European unity.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1012.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Europe: Modern

HIST 4444 (3) Topics in Modern European Thought

Explores a selected theme in European thought since the Enlightenment. Topics vary each term.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Europe: Topical

HIST 4445 (3) United States History since 1973

Traces political, diplomatic, economic, and social developments in the United States from 1973 to the present.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1025.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: United States: Chronological Periods

HIST 4454 (3) Jewish Intellectual History

Takes students on a journey from Medieval Spain to contemporary United States to explore how Jews, living in different societies, have attempted to reshape and interpret central Jewish values and beliefs in accordance with the prevailing ideas of their host societies. Focuses on the historical context of each Jewish society that produced the thinkers and ideas considered in this course.

Equivalent - Duplicate Degree Credit Not Granted: JWST 4454

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Europe: Topical

HIST 4511 (3) Europe in the Dark Ages (400-1000 A.D.)

Examines the history of Europe from the fall of the Roman Empire to the turn of the first millennium. Treats social, political and religious transformations in the barbarian kingdoms, and considers the persistence of Roman institutions and culture and the impact of Christianity in northern Europe.

Requisites: Requires prerequisite course of HIST 1011 or HIST 2170 (minimum grade C-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Europe: Ancient and Medieval

HIST 4516 (3) U.S. Society in the 19th Century

Concerned with the American family and community in the changing social environments of the 19th century. Examines families of different ethnic and class backgrounds, observing how they are changed by new economic conditions, reform, or new political institutions.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1015 or HIST 1025.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: United States: Topical Courses 1

HIST 4521 (3) Europe in the High Middle Ages (1000-1400 A.D.)

Examines the history of Europe from the emergence of feudal institutions to the rise of nation states, with specific attention to social, intellectual and religious change, the role of law and ritual, the crusades and European expansion, and urban growth and identity in the West.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1011 or HIST 2170.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Europe: Ancient and Medieval

HIST 4526 (3) Immigrants, Workers and the 1 percent - Recent U.S. Social History

In the 21st century we see a widely divided U.S. society, with a privileged "one percent" on one end, and a striking pattern of poverty on the other. How did the U.S. get this way? This course shows students how to explore social change through the people of the 20th century, their experiences, and the words they left behind.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1025.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: United States: Topical Courses 1

HIST 4527 (3) Mexican-American History since 1848

Examines Mexican-origins people in the United States from the 19th century through the present. Focuses on Mexican-American history as both an integral part of American history and as a unique subject of historical investigation. Using primary and secondary sources, students will examine how Mexicans and Mexican-Americans have negotiated, influenced, and responded to political, social, cultural, and economic circumstances in the U.S.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1015 or HIST 1025.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: United States: Topical Courses 2

HIST 4528 (3) Islam in South and Southeast Asia (1000 to the Present)

Examines the history of Muslim societies in South and Southeast Asia from 1000 to the present. Focuses on themes such as the rise of Islamic empires in South Asia, Sufism, trade and the spread of Islam in Southeast Asia, the rise of Muslim nationalism and religious fundamentalism, and the impact of modernization and globalization on Muslims of the region.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Requisite 6 hours of any history coursework.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: World Areas: Specific Regions
Departmental Category: Asia Content

HIST 4534 (3) Modern European Jewish History

Focus on the last 500 years of European Jewish history, from 1492 until the present, to examine Jews' place in European history and how Europe has functioned in Jewish history. Does not end with the Holocaust, since, although Hitler and the Nazis attempted to destroy European Jewish civilization, they did not succeed. Rather, this course will spend several weeks looking at European Jewish life in the past sixty year.

Equivalent - Duplicate Degree Credit Not Granted: JWST 4534

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1818 or JWST 1818 or HIST 1828 or JWST 1828 or HIST 1012.

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Europe: Topical

HIST 4538 (3) History of Modern India

Examines the history of India from the British conquest of India in the late 18th century to independence in 1947. Emphasizes the impact of British rule on the political, economic and social development of modern India.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5538

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite 6 hours of any history coursework.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: World Areas: Specific Regions
Departmental Category: Asia Content

HIST 4544 (3) History of Yiddish Culture

Jews have produced culture in Yiddish, the vernacular language of Eastern European Jewry, for 1000 years and the language continues to shape Jewish culture today. We will look at the literature, film, theater, music, art, sound and laughter that defined the culture of Eastern European Jewry and, in the 20th century, Jews around the world.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5544 and JWST 4544

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1818 or JWST 1818 or HIST 1828 or JWST 1828 or HEBR 2350 or JWST 2350.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Europe: Topical

HIST 4546 (3) Popular Culture in the Modern United States

Traces the history of cultural expression in the United States since the late nineteenth century. From art, fiction, and music to the movies, amusement parks, shopping, and sports, popular culture offers clues to decipher shifting patterns of consumption, globalization, race, gender, politics, technology, and media. Includes instruction and practice interpreting cultural materials in historical context.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1025 or ATLS 2000.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: United States: Topical Courses 1

HIST 4548 (3) Women in Modern India

Examines the history of women and gender in India from the late 18th century to the present. Explores topics such as the changing legal status of women in the colonial and postcolonial period, marriage, domesticity and patriarchy, and women's education and participation in anti-colonial and postcolonial politics, women, work and the environment, violence against women, and women and globalization.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5548

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1528.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: World Areas: Specific Regions
Departmental Category: Asia Content

HIST 4556 (3) The History of America through Baseball

Baseball serves as a window to view the American experience. Covers U.S. history since 1830, addressing the major topics that reflect on American society, such as professionalization, labor management conflict, race, gender, culture, politics, economics and diplomacy.

Equivalent - Duplicate Degree Credit Not Granted: HIST 2516

Requisites: Requires prerequisite course of HIST 1025 (minimum grade D-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1015.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: United States: Topical Courses 1

HIST 4558 (3) Buddha to Gandhi: A History of Indian Nonviolence

Focuses on the intellectual history of nonviolence in India from the time of the Buddha to Mahatma Gandhi who led India to national independence from the British Empire in 1947. Pursues this history in light of the encounter between Indian and western cultural traditions in modern India.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: World Areas: Specific Regions
Departmental Category: Asia Content

HIST 4616 (3) History of Gender and Sexuality in the United States to 1870

Examines the social history and cultural construction of genders and sexualities in America to 1870, exploring how discourses of race, religion, nationalism, medicine and criminality have shaped erotic encounters, informed gender and sexual identities a served as sites of political conflict.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5616 and WGST 4616

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: United States: Topical Courses 1

HIST 4617 (3) Native North American History I: Human Settlement to 1815

Explores the establishment and development of human societies in North America prior to 1492; the varied experiences of contact; the crises, opportunities, and transformations that attended colonialism; Indians and the inter-imperial contests of the eighteenth century; and the struggles of native peoples confronting the newly-independent United States.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: United States: Topical Courses 2

HIST 4618 (3) Early Modern China, 960-1842

Examines political, social, and cultural history of China from the Song Dynasty (960-1279) to the opium War (1839-1842). Topics covered include the development of imperial political institution and gentry society, Conquest Dynasties, Neo-Confucianism, China's "medieval economic revolution", Chinese world order in East Asia, Qing multiethnic empire, Chinese overseas migration, and the coming of the West.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1618 or HIST 1628 or CHIN 1012.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: World Areas: Specific Regions Departmental Category: Asia Content

HIST 4619 (3) Women in East Asian History

Considers major issues in the history of women in East Asia (China, Korea, Japan) in the 17th through 20th centuries. Focuses on gender roles in Asian family, state, and cultural systems. Topic varies in any given semester.

Equivalent - Duplicate Degree Credit Not Granted: WGST 4619 and HIST 5619

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: World Areas: Comparable and General Departmental Category: Asia Content

HIST 4620 (3) A Global History of Sexuality: The Modern Era

Provides an introduction to the history of sexuality in the modern era through engagement with recent interdisciplinary research into what sexuality has meant in the everyday lives of individuals; in the imagined communities formed by the bonds of shared religion, ethnicity, language and national citizenship; on the global stage of cultural encounter, imperialist expansion, transnational migration and international commerce.

Equivalent - Duplicate Degree Credit Not Granted: WGST 4620

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Methodological, Comparative, and Global

HIST 4623 (3) History of Eastern Europe Since 1914

Examines the struggle of nations of eastern Europe to assert their independence, from break-up of the imperial system at the end of World War I, through the Soviet bloc that emerged after World War II, to the establishment of democratic governments after the 1989 revolutions.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1012.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Europe: Specific Countries

HIST 4626 (3) History of Gender and Sexuality in the United States from 1870

Examines the social history and cultural construction of genders and sexualities in America from 1870, exploring how discourses of race, religion, nationalism, medicine and criminality have shaped erotic encounters, informed gender and sexual identities and served as sites of political conflict.

Equivalent - Duplicate Degree Credit Not Granted: WGST 4626

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: United States: Topical Courses 1

HIST 4627 (3) Native North American History II: 1815 to Present

Explores the longevity and continuity of human history in North America by discussing pre-European social and cultural developments. By examining ways in which Indian societies west of the Mississippi River responded to Euro-Americans, the Indians' role in western North American history is demonstrated.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: United States: Topical Courses 2

HIST 4628 (3) Modern China: Collapse of Imperial Brilliance, 1644-1949

Examines the brilliance of the Qing dynasty, its collapse in 1911, and the bloody and chaotic several decades that followed, up to the 1949 Communist Revolution. Focuses on such topics a Qing imperialism in Central Asia, global capitalism and Western imperialism in China, the opium trade, domestic violence, nationalism, concepts of modernity, competing revolutionary movements, and WW II in Asia.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5628

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: World Areas: Specific Regions Departmental Category: Asia Content

HIST 4636 (3) Lesbian and Gay History: Culture, Politics, and Social Change in the United States

Considers current theoretical approaches to the history of sexuality and traces the changing meaning of same-sex sexuality in the United States through investigation of lesbian/gay identity formation, community development, politics, and queer cultural resistance.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5636 and WGST 4636

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1015 or HIST 1025 or LGBT 2000.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: United States: Topical Courses 1

HIST 4638 (3) Contemporary China: Radicalism and Reform, 1949 to Present

Examines the dramatic, often tragic, and globally transformative history of China under the Chinese Communist Party. Focuses on such topics as political, social, and cultural revolution, nationalism, Maoism, the Great Leap Forward, Red Guards and the Great Proletarian Cultural Revolution, the Deng Xiaoping era, relations with Taiwan, the 1989 Tiananmen Massacre, and China's rise as a world power.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5638

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: World Areas: Specific Regions

Departmental Category: Asia Content

HIST 4640 (3) Women, Gender and War

Study of how women experience war, how the structure, practice and memory of war, and the rights and obligations of military service (masculinity and femininity) are structured by the gender system.

Equivalent - Duplicate Degree Credit Not Granted: WGST 4640

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1015 or HIST 1012 or HIST 1025 or HIST 1123 or HIST 1628 or HIST 1708.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Methodological, Comparative, and Global

HIST 4643 (3) Poland since the 16th Century: Democracy and Nation

Traces themes of democracy and nationalism in Polish history from the "Noble Republic" of the early modern era through the struggles with fascism and communism in the 20th century, to Poland's current position on the eastern edge of Western Europe.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1012.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Europe: Specific Countries

HIST 4648 (3) Inventing Chinese Modernity, 1800 to Present

Examines the long and painful transformation, during the modern period of native Chinese concepts about the meaning of life, the proper order of politics and society, the role of the individual, the nature and role of human emotions, the place of the gods, the definition of nation, the proper relations between the sexes, and China's place in the global order.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1618 or HIST 1628 or CHIN 1012.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: World Areas: Specific Regions
Departmental Category: Asia Content

HIST 4658 (3) China and Islam from the 7th Century to the 20th Century

Traces how "Muslims in China" transformed themselves into "Chinese Muslims" while at once accommodating and conflicting with Chinese states and people throughout history until the present time.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5658

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1618 or HIST 1628 or CHIN 1012.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: World Areas: Specific Regions

Departmental Category: Asia Content

HIST 4688 (3) Window on Modern China

Examines the relationship between China's recent history and its booming contemporary economy and society through on-location study in a Chinese city. The course makes use of a rich array of historical and other kinds of sites to teach students to think critically about themes and events that played a shaping role in the unfolding of modern Chinese history.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: World Areas: Specific Regions

Departmental Category: Asia Content

HIST 4711 (3) The Medieval Crusades: Holy War and Its History, 1095-1400

Studies the innovation, impact and meaning of holy war and the expansion of Christendom during the High Middle Ages. Topics include the definition of crusade and crusaders, religious persecution and tolerance, the expansion of European modes of government, war memory, colonization and its aftermath, the meaning of the Holy Land and the home front.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1011 or HIST 2170.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Europe: Ancient and Medieval

HIST 4713 (3) History of Russia through the 17th Century

Introduces the history and culture of Russia from the 9th to the 17th century. Emphasizes selected topics in social, economic, religious and cultural history, including the formation of the Russian state conversion to Orthodox Christianity, the Mongol invasion and the reign of Ivan the Terrible.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1011.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Europe: Specific Countries

HIST 4718 (3) Ancient, Classical, and Medieval Japanese History

Begins with the prehistoric and protohistoric periods. Explores the development of Japan's classical age and traces the rise and attenuation of an elite warrior government.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: World Areas: Specific Regions

Departmental Category: Asia Content

HIST 4723 (3) Imperial Russia

Surveys major cultural, social, and economic changes from the reign of Peter the Great through World War I.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1012.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Europe: Specific Countries

HIST 4726 (3) A Nation of Immigrants: Immigration in American History

Examines the shifting kaleidoscope of immigration to the United States in the 19th and 20th centuries. Considers immigrant motives, cultures and experiences; changing cultural and political ideas about the value of immigration; the relationship of immigration and immigration policy to ideas about the American national project; the creation and consequences of immigration law.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: United States: Topical Courses 1

HIST 4728 (3) Modern Japanese History

Begins with early modern Japan, proceeds through the era of rapid modernization after the Meiji Restoration in the mid-19th century, and concludes with Japan's gradual descent into prolonged war, first with China and then in the Pacific.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5728

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: World Areas: Specific Regions
Departmental Category: Asia Content

HIST 4733 (3) The Russian Revolution and the Soviet Regime

Covers in detail the significant social, economic and political events of Soviet Russia from the February Revolution of 1917 to the present.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1012.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Europe: Specific Countries

HIST 4738 (3) History of Early Modern Japan (1590-1868)

Covers the history of early modern Japan (1590-1868). Explores the political, social, cultural and economic context of Japan's history from the era of Warring States through the rise and fall of the Tokugawa military government (Shogunate).

Equivalent - Duplicate Degree Credit Not Granted: HIST 5738

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: World Areas: Specific Regions
Departmental Category: Asia Content

HIST 4758 (3) The History of Postwar Japan, 1945 to Present

Explores political, economic, social and cultural factors in postwar Japan. Although the defeat in 1945 is often seen as "zero hour", a moment of near total disjunction, the outlines of postwar Japan emerged during World War II. Beginning with the 1930s, traces growth and development, social change, globalization, the quest for collective identity and other themes in the evolving Japanese nation-state.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: World Areas: Specific Regions

HIST 4761 (3) Roman Law

Studies the constitutional and legal history of ancient Rome; emphasizes basic legal concepts and comparisons with American law. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5761 and CLAS 4761 and CLAS 5761

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Europe: Ancient and Medieval

HIST 4800 (3) Special Topics in Global History

Organized around themes that change yearly, this class allows students to study and research processes, phenomena, and events of global significance in historical context. Will stress historical subjects that span multiple geographic regions of the globe. Topics could include the global history of: the arms trade; slavery; health and disease; youth culture; women's rights; genocide, the environment, migration, economic trade, warfare exploration etc...

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Methodological, Comparative, and Global

HIST 4803 (3) Special Topics in European History

Covers specialized topics in European history, usually focusing on a specific country or theme.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1011 or HIST 1012.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Europe: Specific Countries

HIST 4806 (3) Special Topics in American History

Focuses on special topics in U.S. history to provide a novel thematic, comparative, or methodological focus that cuts across usual geographical and temporal ranges within American history. Topics vary each semester. Students will engage in focused historical learning and research that spans across geographical and temporal ranges within American history. Topics may include: the History Animals in the American West, Slavery along the Atlantic Rim, Presidential Power in the Twentieth Century, the History of American Football, Immigration and Migration in the American Past, etc...

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors).

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

HIST 4808 (3) Special Topics in World Areas History

Covers specialized topics in the history of World Areas outside of Europe and/or North America, usually focusing on one country or region.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: World Areas: Specific Regions

HIST 4820 (3) Human Rights: Historical Perspectives

Examines the history of modern ideas of human rights. Focuses on themes such as the universalism/cultural relativism debate, colonialism, nationalism, refugees and stateless peoples, the United Nations and humanitarianism, ethnic genocide in Rwanda, and human rights abuses by the Taliban regime in Afghanistan.

Requisites: Requires a prerequisite of 6 hours of credit in any History course. Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Methodological, Comparative, and Global

HIST 4827 (3) Modern U.S. Jewish History since 1880

Explores the experience of Jews in the United States from the 1880's when the great migration of Jews from Eastern Europe began, through the twentieth century. Students will explore the changing ways in which Jews adapted to life in the U.S., constructed American Jewish identities, and helped to participate in the construction of the United States as a nation.

Equivalent - Duplicate Degree Credit Not Granted: JWST 4827

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: United States: Topical Courses 2

HIST 4930 (1-6) History Internship

Matches selected students with supervised internships in professional archives research libraries, historical associations, and special projects. Interns apply their academic area specialty to their work in the field. Internships have a work and academic (reading and writing) component.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) History (HIST) majors and minors only.

Recommended: Prerequisite completion of lower-level history coursework (for example HIST 1015 or HIST 1025).

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Methodological, Comparative, and Global

HIST 4990 (1-3) History Lab: Methods, Sources, and Practices of the Past

Offers students an additional, intensive, historical learning experience intended to enrich and deepen students' study of the past. Lab credit is designed to enhance the traditional three-credit upper-division lecture course by offering students supplementary training in aspects of historical methods, interpretation, application tools, and analysis. Possible lab topics might include but not be limited to: oral history lab, digital history lab, primary source lab, etc.

Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Methodological, Comparative, and Global

History - Bachelor of Arts (BA)

As a history major studying the past, you will gain an awareness of the variety of past human achievement, as well as a perspective on how the world operates. With this knowledge, you will have a better understanding of the present. In the course of exposing you to the intellectual, political, economic, cultural, and social forces that have influenced today's world, the study of history also develops your ability to read critically, to ask intelligent questions, and to express ideas orally and in writing. In its

broadest sense, the study of history provides you with an intellectual framework and practical skills that will serve all your future pursuits.

The bachelor of arts (BA) program for history majors is structured so that while you are required to receive a broad education in various fields of historical inquiry, you have the freedom to design a program particularly suited to your own interests, provided you choose your classes wisely.

At the lower-division level, you are required to take one introductory course on the history of the United States, on the history of Europe, on the history of another area of the world outside of the U.S. or Europe, and on global history. At the upper-division level you have greater flexibility because you take more courses, but you also have to take one class on U.S. history, on European history, on the history of another area of the world outside of the U.S. or Europe, or on comparative or global history.

In addition, when choosing courses to fulfill your major requirements, you need to make sure that you take at least two pre-modern history courses and two modern history courses.

While you are required to acquire both geographical and chronological breadth in your major, the requirements are flexible enough that you can concentrate your studies in a specific geographic area (for example Britain, China, Latin America, or the U.S.) or a historical period (for example the Ancient world, the Medieval period, or the twentieth century) or on a single theme (for example intellectual history, the history of revolution, the history of women, imperialism and colonialism, the history of Islam, or Jewish history). Within these areas, you are free to plan your program around a diverse set of rotating course offerings.

An objective of the program is to provide as broad a base as possible for the curriculum. The following historical areas are among those represented: ancient and medieval history; early modern & modern European history; European national histories (Britain, France, Germany, Russia); the history of world areas (Latin America, Africa, the Middle East, South Asia & East Asia); American history considered both by periods and by topics (such as diplomatic, social, African-American); Western U.S. history; women's history; global history, and different historical methodologies.

All majors are required to take a specific historical thinking & writing course, but in all coursework, special attention is paid to skills in critical reading and writing. You are expected to work with source materials, acquire methodical research techniques, and submit clearly written papers and essays. The department encourages students with great interest and ability in history to take part in the departmental honors program. Qualified students usually complete the honors program during their senior year but, some start their history honors work during their junior year.

Requirements

Total Credit Hours

Students must complete 42 credit hours in history courses with grades of C- or better. Of those 42 credit hours, 24 must be at the upper division. Students should complete the required 1000-level survey courses, HIST 1800 (or an equivalent 1000-level Global Comparative Course) and HIST 3020, before the end of their sophomore year and before they enroll in any 4000-level history courses.

Required Courses and Credits

Students must complete the general requirements of the College of Arts and Sciences and the required courses listed below.

Code	Title	Credit Hours
Lower-division Requirements		
	One 1000-level United States history course - 3 credits	3
	One 1000-level Europe history course - 3 credits	3
	One 1000-level world areas history course - 3 credits	3
	One 1000-level global history course - 3 credits	3
Upper-division Requirements		
HIST 3020	Historical Thinking & Writing	3
	One 4000-level United States history course	3
	One 4000-level Europe history course	3
	Two 4000-level World Areas or Comparative/Global history courses	6
	Two 4000-level HIST electives	6
	One 3000-level Senior Seminar ¹	3
Lower- or Upper-division Elective Requirement		
	6 credit hours in any other HIST courses	6
Historical Period Requirement ²		
	6 credit hours in courses whose focus falls primarily before 1800	
	6 credit hours in courses whose focus falls primarily after 1800	
Total Credit Hours		42

Code	Title	Credit Hours
Ancillary Written Communication Requirement ³		
	Select one of the following lower-division written communication courses:	3-4
ARSC 1080	College Writing and Research	
ARSC 1150	Writing in Arts and Sciences	
CLAS 1020	Argument from Evidence: Critical Writing about the Ancient World	
ENGL 1001	Freshman Writing Seminar	
PHIL 1500	Reading, Writing and Reasoning	
WRTG 1100	Extended First-Year Writing and Rhetoric	
WRTG 1150	First-Year Writing and Rhetoric	
WRTG 1250	Advanced First-Year Writing and Rhetoric	
Total Credit Hours		3-4

¹ Any additional 3000-level seminars can fulfill requirements that normally are fulfilled by 4000-level courses.

² 2000-level non-major HIST courses cannot be used to fulfill this requirement. (The department maintains a list of courses broken down by geographic areas and historical periods.)

³ Complete with a grade of C- or better.

NOTE: Under normal circumstances, no more than 45 credit hours in history may be used toward a student's total University of Colorado Boulder graduation requirements. Students must have a grade point average of at least 2.00 in the major in order to graduate. Students may receive credit for HIST 1012 and/or HIST 1025 and/or 3 lower-division elective HIST credit hours by obtaining a score of 4 or better on the high school Advanced Placement history test(s). Some types of International Baccalaureate credit are acceptable; consult one of the major advisors to determine individual applicability. The CLEP test is not accepted for credit.

All students majoring in history must complete at least 12 credit hours of upper-division history in courses taught by the CU Boulder faculty. In addition, HIST 3020 and the 3000-level Senior Seminar must be successfully completed on the CU Boulder campus with a C- or better.

Graduating in Four Years

Students should consult the Four-Year Guarantee Requirements for further information on eligibility for the four-year guarantee. The concept of "adequate progress" as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress in history, students must consult a history advisor each semester, but the following plan provides a rough outline of acceptable progress:

- Declare the major no later than the second semester of the freshman year.

Recommended Four-Year Plan of Study

Through the required course work for the major, students will fulfill all 12 credits of the Arts & Humanities area of the Gen Ed Distribution Requirement and both components of the Written Communication Gen Ed Skills Requirement.

Course	Title	Credit Hours
Year One		
	Any two of the required 1000-level HIST survey courses	6
	Ancillary lower-division written communication course	3
	Gen. Ed. Distribution/Diversity course (example: Social Sciences/US Perspective)	3
	Gen. Ed. Distribution course (example: Natural Sciences with Lab)	4

Elective (Upper-Division)	3
Elective (Upper-Division)	3
Elective (Upper-Division)	3
	Credit Hours
	33
	Total Credit Hours
	121-123

History - Minor

Students who wish to take several history courses may want to consider becoming either a history major or minor. In general, the major requires a more in-depth commitment from students, whereas the minor offers students an opportunity for some specialization in history without all the obligations of the major.

For those students already pursuing a major in another field, a history minor might be the more viable option, because the minor requires the completion of fewer overall history courses.

Requirements

Program Requirements

2000-level HIST courses **are** applicable to the minor. 4000-level courses may be used to fulfill both upper-division credit hours and geographic area credit hours.

HIST 3020 and all 3000-level Senior Seminars are restricted to history majors. 3000-level courses may occasionally be taken by minors if the course is not full as of the second week of drop-add and/or you have written permission from the instructor.

All course work applied to the minor must be completed with a grade of C- or better. No pass/fail work may be applied. The GPA for all minor course work must equal 2.00 or higher.

Required Courses and Credits

Code	Title	Credit Hours
A total of 21 credit hours in history, of which at least 12 credit hours must be upper-division.		
Within the 21 credit hours:		
At least 3 credit hours (one course each) must be taken in the following geographical areas:		
	the United States	
	Europe	
Two courses (six credit hours) in World Areas (specific areas outside of Europe and North America) and/or Global/Comparative.		

Humanities

Humanities is an interdisciplinary program that allows students to combine different fields of study from all the disciplines of the humanities as well as from the social sciences (in particular, anthropology, ethnic studies, political science, psychology, sociology, women and gender studies). This major especially encourages students to develop their interdisciplinary interests in fields of cultural and humanistic expression

such as literature, art, music, film, philosophy, history, modern media, religion and contemporary critical practice and theory.

The undergraduate degree in humanities emphasizes knowledge and awareness of:

- the ways cultures and traditions define both themselves and each other;
- the formal, rhetorical and ideological properties of cultural texts in a variety of forms and media (literature, history, philosophy, film, music, visual arts, architecture, dance, theatre, performance);
- the dynamic relationships between texts and their social and historical contexts;
- the genres and modes of texts and their production, transformation and reception; and
- the theoretical and ideological underpinnings and implications of one's own and others' interpretive approaches and assumptions.

In addition, students completing the degree in humanities are expected to acquire the ability and skills to:

- analyze and interpret texts in a variety of forms and media;
- articulate such analyses and interpretations at a sophisticated level in both written and oral forms;
- discern similarities and differences among individual works, artistic media, historical periods and cultural traditions;
- reason critically; and
- explore the connections between contemporary issues and academic work.

Course code for this program is HUMN.

Bachelor's Degree

- Humanities - Bachelor of Arts (BA) (p. 432)

Minor

- Humanities - Minor (p. 433)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Courses

HUMN 1110 (3) Introduction to Humanities: Literature 1

Introduces students to works from the major Western literary periods (Classical, Medieval, Renaissance, Baroque) from the 8th c. BC to the early 17th c. AD comparatively, i.e., outside their national literary boundaries. Theorizes interdisciplinary, genre studies, periodization, comparativism, thematology, hermeneutics, criticism, etc. May be taken separately from HUMN 1120.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities

HUMN 1120 (3) Introduction to Humanities: Literature 2

Introduces students to works from the major Western literary periods (Baroque, Enlightenment, Romanticism, Realism, Modernism) from the 17th- through the 20th-centuries comparatively, i.e., outside their national literary boundaries. Theorizes interdisciplinarity, genre studies, periodization, comparativism, thematology, hermeneutics, criticism. May be taken separately from HUMN 1110.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities

HUMN 1210 (3) Introduction to Humanities: Art and Music 1

Examines the major artistic and musical works in the Western tradition from ancient Greece through the 16th century in their larger historical, interdisciplinary, and theoretical ("aesthetic") contexts. May be taken separately from HUMN 1220.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities

HUMN 1220 (3) Introduction to Humanities: Art and Music 2

Examines the major artistic and musical works in the Western tradition from the 17th century to 21st-century post-modernism in their larger historical, interdisciplinary, and theoretical ("aesthetic") contexts. May be taken separately from HUMN 1210.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities

HUMN 1400 (3) Mediterranean Foundations

Examines the pre-Modern Mediterranean as the foundational zone of Western Humanism and culture, beginning with Classical Antiquity and through to the dawn of Modernity. Through history, art, literature and thought, it studies the region's role as the crucible of Helleno-Persian culture, Roman society, of Judaism, Christianity and Islam, the intersection of Europe, Africa and Asia in the development of Modernity.

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

HUMN 1701 (3) Nature and Environment in German Literature and Thought

Critically examines titles in German literature and thought. Nature and environment are used to explore alienation, artistic inspiration, nihilism, exploitation, sexuality, rural versus urban, meaning of the earth, cultural renewal, identity and gender. This "Green" survey of German classics spans Romanticism's conception of nature as unconscious spirit to the politics and values of contemporary Germany's Green party.

Equivalent - Duplicate Degree Credit Not Granted: GRMN 1701

Additional Information: Arts Sci Core Curr: Ideals and Values
Arts Sci Gen Ed: Distribution-Arts Humanities

HUMN 2000 (3) Methods and Approaches to the Humanities

Provides a transition from the introductory courses to the upper-division courses. Introduces the various technical methods and topics encountered in the department's comparative, interdisciplinary upper-division courses, including cultural studies, rhetoric, translation, hermeneutics, word/image studies.

Requisites: Restricted to Humanities (HUMN) majors and minors only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

HUMN 2100 (3) Arts, Culture and Media

Promotes a better understanding of fundamental aesthetic and cultural issues by exploring competing definitions of art and culture. Sharpens critical and analytical abilities by asking students to read and compare different theories about arts, culture, media, and identity, and then to apply and assess those theories in relation to a selection of visual and verbal texts from a range of cultural and linguistic traditions.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities

HUMN 2145 (3) African America in the Arts

Introduces interrelationships in the arts of African Americans and the African American contribution to American culture as a whole.

Additional Information: Arts Sci Core Curr: Human Diversity

Arts Sci Core Curr: United States Context

Arts Sci Gen Ed: Diversity-U.S. Perspective

Arts Sci Gen Ed: Distribution-Arts Humanities

HUMN 2601 (3) Kafka and the Kafkaesque

Exposes the students to a wide selection of Kafka's literary output and aims to define the meaning of the Kafkaesque by looking not only for traces of Kafka's influence in the verbal and visual arts, but also for traces left in Kafka's own work by his precursors in the literary tradition.

Equivalent - Duplicate Degree Credit Not Granted: GRMN 2601

Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities

HUMN 3092 (3) Studies in Humanities

Students should check with the department for specific semester offerings.

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Requires either prerequisite course of HUMN 2000 (minimum grade D-) or restricted to students with 57-180 credits (Junior or Senior).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

HUMN 3093 (3) Topics in Humanities

Students should check with the department for specific semester offerings.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires either prerequisite course of HUMN 2000 (minimum grade D-) or restricted to students with 57-180 credits (Junior or Senior).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

HUMN 3104 (3) Film Criticism and Theory

Surveys the range and function of film criticism, introduces major positions and concepts of film theory and focuses on students' abilities to write about film.

Equivalent - Duplicate Degree Credit Not Granted: FILM 3104

Requisites: Requires prerequisite course of FILM 1502 (minimum grade D-).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

HUMN 3200 (3) Fictions of Illness: Modern Medicine and the Literary Imagination

Examines the ways in which the rise of modern medicine fueled the literary imagination with a new focus, new patterns of perception and potent metaphors. Through a study of various works of fiction, critical theory and medical history, the course traces how medical discoveries and the increasing professionalization of medicine manifested itself in modern literature.

Requisites: Requires a prerequisite course of HUMN 2000 (minimum grade C-) or restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

HUMN 3210 (3) Narrative

Explores the nature of sacred and secular narrative in literature, film, and the visual arts.

Requisites: Requires either prerequisite course of HUMN 2000 (minimum grade D-) or restricted to students with 57-180 credits (Junior or Senior).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

HUMN 3211 (3) The Craft of Mystery

Explores examples of and theories about the formation and growth of the genre of detective fiction, especially in the late 19th and early 20th centuries. Explores the social conditions of the times in which the texts were written and the possible resulting influences on style. Compares the texts and theories to examples from other genres and time periods.

Requisites: Requires either prerequisite course of HUMN 2000 (minimum grade D-) or restricted to students with 57-180 credits (Junior or Senior).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

HUMN 3212 (3) Shipwrecks, Mutinies, and Other Catastrophes at Sea

Explores the theatrical analogy that frames our understanding of catastrophes at sea and their literary and visual representation, paying particular attention to issues of gender, race, and sexuality, which are intentionally banned from such representations, but turn out to be their secret focus.

Requisites: Requires either prerequisite course of HUMN 2000 (minimum grade D-) or restricted to students with 57-180 credits (Junior or Senior).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

HUMN 3240 (3) Tragedy

Studies some of the great tragic works of art, music, and literature from the Greeks to the 20th century. Tragic theory is invoked as an aid to interpretation.

Requisites: Requires either prerequisite course of HUMN 2000 (minimum grade D-) or restricted to students with 57-180 credits (Junior or Senior).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

HUMN 3290 (3) Foundations of Disability Studies

Introduces students to the interdisciplinary field of disability studies by investigating key concepts in disability theory, disability history and culture, media representations of people with disabilities, and pertinent bioethical issues.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

HUMN 3310 (3) The Bible as Literature

Surveys literary achievements of the Judeo-Christian tradition as represented by the Bible.

Equivalent - Duplicate Degree Credit Not Granted: ENGL 3310 and JWST 3310

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Core Curr: Ideals and Values
Arts Sci Gen Ed: Distribution-Arts Humanities

HUMN 3321 (3) Culture and Literature of Ancient China

Focuses on the religious, cultural, philosophical, and literary aspects of ancient Chinese civilization (1500 B.C.-A.D. 200). Special attention is paid to foundational works that influenced later developments in Chinese culture. All readings are in English.

Equivalent - Duplicate Degree Credit Not Granted: CHIN 3321

Recommended: Prerequisite CHIN 1012 or CHIN 1051.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Asia Content

HUMN 3341 (3) Literature and Popular Culture in Modern China

Surveys 20th century Chinese literature and popular culture against the historical background of rebellion, revolution and reform. Emphasizes close and critical reading skills and an understanding of how aesthetic texts reflect and critically engage with historical and cultural experiences. Assignments include novels, essays, short stories, poems, plays, songs, films and scholarly articles. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: CHIN 3341

Recommended: Prerequisite CHIN 1012 or CHIN 1051.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Asia Content

HUMN 3500 (3) Literatures of Consciousness

Facilitates a complex and productive understanding of consciousness by analyzing and synthesizing interdisciplinary works (including literature, film and theoretical and scientific texts). This interdisciplinary approach enables students to think deeply about the following questions: what is consciousness? How do we think and perceive? What does it mean to be "neurotypical"? What does all of this have to do with who we are?

Requisites: Requires a prerequisite course of HUMN 2000 (minimum grade C-) or restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

HUMN 3505 (3) The Enlightenment: Tolerance and Emancipation

Examines Enlightenment notions of reason, humanity and social progress. Topics include 18th century views on government, science, education, religion, slavery and gender roles.

Equivalent - Duplicate Degree Credit Not Granted: GRMN 3505

Additional Information: Arts Sci Core Curr: Ideals and Values
Arts Sci Gen Ed: Distribution-Arts Humanities

HUMN 3640 (3) Modernisms: Art and Theory from 1900 to 1960

Offers an introduction to Modernism in various media, emphasizing in particular the historical development of the visual arts from German Expressionism and Cubism to Neo-Dada and Pop Art. Readings in literature will include Proust, Beckett, Blanchot and poets associated with various art movements. Theoretical readings range from Saussure and Freud to Adorno and Jameson. Recommend prerequisite: HUMN 2000.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

HUMN 3660 (3) The Postmodern

Analyzes the cultural and critical practices as well as the thought that defines the postmodern period at the end of 20th century.

Equivalent - Duplicate Degree Credit Not Granted: FILM 3660

Requisites: Requires either prerequisite course of HUMN 2000 (minimum grade D-) or restricted to students with 57-180 credits (Junior or Senior).

Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities

HUMN 3702 (3) Dada and Surrealist Literature

Surveys the major theoretical concepts and literary genres of the Dada and Surrealist movements. Topics include Dada performance and cabaret, the manifesto, montage, the ready made, the Surrealist novel, colonialism and the avant-garde, and literary and philosophical precursors to the avant-garde.

Equivalent - Duplicate Degree Credit Not Granted: GRMN 3702

Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities

HUMN 3800 (3) Paris, Modernity, and the Avant-garde (1848-1914)

Investigates the development of the concept of the 'avant-garde' in late-nineteenth and early twentieth-century Paris against a backdrop of political and social revolution. Analyzes the innovative nature of certain works of art, theater, photography, music and literature as well as the influence of the city. Probes and problematizes the concept of the artist as social outsider and cultural critic.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

HUMN 3802 (3) Politics and Culture in Berlin 1900-1933

Examines early 20th century German culture, with emphasis on the Weimar Republic (1918-1933) in light of contemporaneous political discussions. The course presents modern art and literature (Expressionism, Dada, Brecht's epic theater) and architecture and design (Bauhaus, Werkbund) as well as political movements of women, sexual minorities, and Berlin's Jewish communities. Taught in English. Offered through CU Study Abroad Program.

Equivalent - Duplicate Degree Credit Not Granted: GRMN 3802

Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities

HUMN 3811 (3) Love, Death, and Desire: Classical Japanese Literature in Translation

Surveys the major works and authors of classical Japanese literature, both poetry and prose, from the earliest historical records and literary anthologies through the Heian period (784-1185). Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: JPNS 3811

Recommended: Prerequisite JPNS 1051.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Asia Content

HUMN 3841 (3) Tradition and Transgression: Modern Japanese Literature in Translation

Surveys the major works, authors and genres of literature from the late Meiji period and 20th century in their historical and cultural contexts. Attention is given to various approaches of literary analysis and interpretation. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: JPNS 3841

Recommended: Prerequisite JPNS 1051.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Asia Content

HUMN 3850 (3) The Mediterranean: Religion Before Modernity

Offers an innovative approach to the multifaceted history of Christian-Muslim-Jewish interaction in the Mediterranean. It eschews established paradigms (e.g., Europe, Islamic world) that distort our understanding of these and pushes students to reconsider the accepted paradigms of Western history. Students will reappraise assumptions regarding the nature of ethnic, religious, national and cultural identity, and their role in human history.

Equivalent - Duplicate Degree Credit Not Granted: RLST 3850

Additional Information: Arts Sci Core Curr: Historical Context
Arts Sci Gen Ed: Distribution-Arts Humanities

HUMN 3860 (3) Politics and the Arts in the Information Age

Examines the political aspects of the art and literature of the information age, with a focus on conceptual practices since 1965. The course investigates political theories of art along side sculpture, performance, installation, poetry, and graphic design.

Recommended: Requisite HUMN 2000 or restricted to students with 57-180 credits (Junior or Senior).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

HUMN 3930 (1-6) Humanities Internship

Students gain academic credit and professional experience working in museums, galleries, arts administration, and publishing. They work 3-18 hours per week with their professional supervisor and meet regularly with a faculty advisor who determines the reading and writing requirements. An interview with faculty advisor is required.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

HUMN 3935 (1-3) Humanities Internship: Literature and Social Violence

See HUMN 4835.

Requisites: Requires enrollment in corequisite course of HUMN 4835.

HUMN 4000 (3) The Question of Romanticism

Interdisciplinary study of literature, art, and music from 1780 to 1830 in France, England, and Germany.

Requisites: Requires either prerequisite course of HUMN 2000 (minimum grade D-) or restricted to students with 57-180 credits (Junior or Senior).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

HUMN 4004 (3) Topics in Film Theory

Provides topic-centered analyses of controversial areas in film theory. Students read extensive materials in the topic area, analyze and summarize arguments as presented in the literature, write "position" papers and make oral presentations in which they elaborate their own arguments about specific assigned topics, establishing critical dialogue with the primary materials.

Equivalent - Duplicate Degree Credit Not Granted: FILM 4004 and ARTF 5004

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of FILM 3051 (minimum grade D-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Film (FILM or FMST) or Humanities (HUMN) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

HUMN 4010 (3) Hitchcock and Freud

Applies Freudian psychoanalysis to the films of Alfred Hitchcock. Students will familiarize themselves with the Freudian methodology by reading a number of books and essays and then apply both Freud's general ideas as well as specific texts to particular aspects, both formal and contentual, of his films. Particular attention will be given to the important field of "feminism and psychoanalysis" as it relates to the study of the role of women in Hitchcock's films.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

HUMN 4011 (3) The Criminal-Hero

Studies various theories of literary transgression by Aristotle, Nietzsche, Freud, Bataille and others to understand the many works, beginning with Genesis and the Iliad and including contemporary works such as Norman Mailer's *The Executioners Song* and the films of Herzog (*Aguirre*, *Nosferatu*) and Scorsese (*Taxi Driver*, *Cape Fear*) which feature this paradoxical figure.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

HUMN 4020 (3) Reading, Chance, and Guessing

Considers the method of the humanities as opposed to those of the natural and social sciences, especially in view of their respective ability or claim to predict the future and to master chance.

Requisites: Requires either prerequisite course of HUMN 2000 (minimum grade D-) or restricted to students with 57-180 credits (Junior or Senior).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

HUMN 4030 (3) The Art of Travel

Examines the art of travel: not where to go and what to do, but rather philosophical concepts about why people travel. Areas of discussion will include exploration, discovery, escape, pilgrimage, the grand tour, expatriotism, exile, nomadism, armchair travel, and the sense of home. Materials will include books by travel writers, novels, films, essays, short stories, art, music, and historical documents.

Requisites: Requires either prerequisite course of HUMN 2000 (minimum grade D-) or restricted to students with 57-180 credits (Junior or Senior).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

HUMN 4050 (3) Representations of People with Disabilities

Examines the representation of people with disabilities in canonical and contemporary literature and drama, and introduces students to disability theory and the history of people with disabilities.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

HUMN 4060 (3) Modern Critical Theory

Explores, through guided discussions, the concept of theory itself and how a theory is constructed. Emphasizes the close reading of theory in order to learn to analyze critically, considering theory as something to be thought about rather than simply applied.

Requisites: Requires either prerequisite course of HUMN 2000 (minimum grade D-) or restricted to students with 57-180 credits (Junior or Senior).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

HUMN 4082 (3) 19th Century Art and Literature

Interdisciplinary study of English fiction and poetry together with related movements in visual arts.

Requisites: Requires either prerequisite course of HUMN 2000 (minimum grade D-) or restricted to students with 57-180 credits (Junior or Senior).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

HUMN 4092 (3) Advanced Studies in the Humanities

Students should check with the department for specific semester offerings.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires either prerequisite course of HUMN 2000 (minimum grade D-) or restricted to students with 57-180 credits (Junior or Senior).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

HUMN 4093 (3) Advanced Topics in the Humanities

Students should check with the department for specific semester offerings.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires either prerequisite course of HUMN 2000 (minimum grade D-) or restricted to students with 57-180 credits (Junior or Senior).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

HUMN 4100 (3) Writing the World in Traditional China

Examines the history and implications of the central role played by writing in pre-modern China, especially with regard to traditional constructions of the world, including relations with aesthetics, the non-human, and the spiritual. Key works of Chinese literature and thought from different periods are studied, with the aim of determining a particular type of Chinese humanism. All readings in English.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Asia Content

HUMN 4110 (3) Greek and Roman Epic

Students read in English translation the major epics of Greco-Roman antiquity such as the *Iliad*, *Odyssey*, *Argonautica*, *Aeneid*, and *Metamorphoses*. Topics discussed may include the nature of classical epic, its relation to the novel, and its legacy. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4110 and CLAS 5110

Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities

HUMN 4111 (3) Modern and Contemporary Culture

Examines the legacy of the historical avant-garde (1910-1930) in postwar and contemporary culture: 1945 to the present. We will study the construction of a "neo-avant-garde" in diverse fields (art, film, philosophy) as well as the methodology of "social art history" which, like the artistic neo-avant-garde, critically analyzes the relation between aesthetic production and global capitalism.

Requisites: Requires either prerequisite course of HUMN 2000 (minimum grade D-) or restricted to students with 57-180 credits (Junior or Senior).

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

HUMN 4120 (3) Greek and Roman Tragedy

Intensive study of selected tragedies of Aeschylus, Sophocles, Euripides and Seneca in English translation. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4120 and CLAS 5120

Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities

HUMN 4130 (3) Greek and Roman Comedy

Studies Aristophanes, Plautus, and Terence in English translation. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4130 and CLAS 5130

Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities

HUMN 4131 (3) The Greek and Roman Novel

Studies a number of complete Greek and Roman novels from Classical Antiquity and their predecessors and contemporary neighbors in the genres of Greek prose fiction. Ancient texts in English translation.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4140 and CLAS 5140

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

HUMN 4135 (3) Art and Psychoanalysis

Explores psychoanalytic theory as it relates to our understanding of literature, film and other arts. After becoming familiar with some essential Freudian notions (repression, narcissism, ego/libido, dreamwork, etc.), students apply these ideas to works by several artists (e.g., Flaubert, James, Kafka, Hoffmann and Hitchcock).

Equivalent - Duplicate Degree Credit Not Granted: FILM 4135

Requisites: Requires either prerequisite course of HUMN 2000 (minimum grade D-) or restricted to students with 57-180 credits (Junior or Senior).

Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities

HUMN 4140 (3) The Age of Dante: Readings from The Divine Comedy

Focuses on close reading of Dante's poetry with emphasis on the intellectual, religious, political, and scientific background of the medieval world. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: ITAL 4140 or 4145 or ITAL 4147

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities

HUMN 4150 (3) Boccaccio's Decameron: Tales of Sex and Death in the Middle Ages

Studies Boccaccio's masterpiece, the Decameron, as emblematic of the post-Black Plague era in the late Middle Ages. Focuses on the art of storytelling through gendered perspectives to portray the complexity of the Middle Ages. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: ITAL 4150

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Diversity-Global Perspective

HUMN 4155 (3) Philosophy, Art, and the Sublime

Explores philosophies of art, theories of the sublime, and the relation between art and morality through philosophy, literature, and the visual arts. Includes works by Plato, Longinus, Burke, Rousseau, Kant, Mary Shelley, Melville, Friedrich, Turner, and Pollock.

Requisites: Requires either prerequisite course of HUMN 2000 (minimum grade D-) or restricted to students with 57-180 credits (Junior or Senior).

Additional Information: Arts Sci Core Curr: Ideals and Values
Arts Sci Gen Ed: Distribution-Arts Humanities

HUMN 4170 (3) Fiction and Reality: Literature, Science, and Culture

Explores the significance of how one defines "fiction" and "reality". Begins by defining the core concepts and compares them with related terms.

Lectures and discussions analyze the implications of these concepts from the perspective of a variety of disciplines and in the context of diverse issues in order to develop a critical awareness of them. Reading and writing intensive.

Recommended: Requisite HUMN 2000 and restricted to students with 57-180 credits (Junior or Senior).

Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities

HUMN 4502 (3) Nietzsche: Literature and Values

Emphasis is placed on Nietzsche's major writings spanning the years 1872-1888, with particular attention to the critique of Western values. A systematic exploration of doctrines, concepts and ideas leading to the values of creativity.

Equivalent - Duplicate Degree Credit Not Granted: GRMN 4502

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Core Curr: Ideals and Values
Arts Sci Gen Ed: Distribution-Arts Humanities

HUMN 4504 (3) Goethe's Faust

Systematic study of the Faust motif in Western literature, with major emphasis on Faust I and II by Goethe and Thomas Mann's Doctor Faustus.

Equivalent - Duplicate Degree Credit Not Granted: GRMN 4504 and GRMN 5504

Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities

HUMN 4552 (3) The Harlem Renaissance: Fr Black Wmn's Club Mvmnt to Hip Hop

Offers an interdisciplinary and intersectional overview of the origins and evolution of the Harlem Renaissance. Explores classic texts, music and works of art emerging from the Harlem Renaissance and related events and movements of its epoch: the Black Women's Club Movement, New Negro Movement, Pan-African Movement, Lost Generation, Jazz Age, World War I and World War II.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 4552 and ETHN 5552

Requisites: Requires prerequisite course of ETHN 1022 or ETHN 2001 or ETHN 3212 (minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Distribution-Social Sciences

HUMN 4555 (3) Interpreting Art

Introduces various methods of interpretation (New Criticism; Reader Response; structuralism, post-structuralism, psychoanalysis, art history, etc.) with which to examine how one determines the meaning of the work of art. Methodologies are studied in close conjunction with particular poems, paintings, stories and films.

Requisites: Requires either prerequisite course of HUMN 2000 (minimum grade D-) or restricted to students with 57-180 credits (Junior or Senior).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

HUMN 4650 (3) Religion, Power, Modernity

Examines the representation of religion in relationship to the claims made by modern narratives of power in fables, literature, graphic novels, visual materials and critical writings.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

HUMN 4730 (3) Italian Feminisms: Culture, Theory, and Narratives of Difference

Studies Italian women writers, artists and filmmakers. Literary and visual texts are analyzed in dialogue with readings of leading Italian gender theorists. Italian history and culture is reread by following the development of a discourse about women. Taught in English; readings in Italian for Italian majors.

Equivalent - Duplicate Degree Credit Not Granted: ITAL 4730

Additional Information: Arts Sci Core Curr: Human Diversity

Arts Sci Gen Ed: Distribution-Arts Humanities

Arts Sci Gen Ed: Diversity-Global Perspective

HUMN 4811 (3) 19th Century Russian Literature

Surveys background of Russian literature from 1800 to 1900. Russian writers and literary problems in the 19th century emphasizing major authors: Pushkin, Lermontov, Gogol, Dostoevsky, Turgenev, Tolstoy, and Chekhov.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 4811

Additional Information: Arts Sci Core Curr: Literature and the Arts

Arts Sci Gen Ed: Distribution-Arts Humanities

HUMN 4821 (3) 20th Century Russian Literature and Art

Interdisciplinary course emphasizing the influence of literature and art in 20th century Russian literature. Follows the changing cultural landscape from the time when Russia was in the vanguard of modern European literature to the period of Stalinism.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 4821

Additional Information: Arts Sci Core Curr: Literature and the Arts

Arts Sci Gen Ed: Distribution-Arts Humanities

HUMN 4835 (3) Literature and Social Violence

Provides a theoretical understanding of heightened awareness arising from literary and sociological investigations of contemporary sources of social violence (gang culture, racism, domestic violence), combined with the concrete knowledge offered by an internship in a social service agency. Optional internship credit is available.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Core Curr: Contemporary Societies

Arts Sci Gen Ed: Distribution-Arts Humanities

HUMN 4840 (1-3) Independent Study

May be repeated for a maximum of 6 total credit hours.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

HUMN 4845 (3) Reading Culture: The Meanings We Make

Analyzes a range of literary and cultural texts through the lens of critical theory in order to come to more understanding of how we are making meaning, how those meanings make us and how we might use that awareness to open new fields of possibility, both in our readings of texts and in our reactions to cultural contexts and conventions.

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

HUMN 4950 (1-6) Honors Thesis

Supervised project on a topic of the student's own choosing. It should demonstrate ability in interdisciplinary (such as literature and art, art and music, film and literature, literature and theory), extensive research, critical thinking, and excellent writing skills. The thesis is submitted to the Honors Program of the College of Arts and Sciences and is orally defended.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) Humanities (HUMN) majors only.

Humanities - Bachelor of Arts (BA)

The humanities major is an interdisciplinary program designed for students who wish to concentrate in more than one field or discipline.

The major leads to a Bachelor of Arts (BA) degree and offers considerable flexibility, but courses should be chosen in consultation with your primary advisor. Areas of concentration include a humanities-related discipline or a single language and its literature. Students interested in preparing for graduate work in comparative literature or other areas requiring extensive language training may want to select the language track option.

Requirements

Required Courses and Credits

A minimum of 60 credit hours is required for the major.

Code	Title	Credit Hours
Required Courses		
HUMN 1110 & HUMN 1120	Introduction to Humanities: Literature 1 and Introduction to Humanities: Literature 2	6
HUMN 1210 & HUMN 1220	Introduction to Humanities: Art and Music 1 and Introduction to Humanities: Art and Music 2	6
HUMN 2000	Methods and Approaches to the Humanities	3
Upper-division HUMN courses		15
Area of Concentration		
Select one of the following: ¹		18
A single language/literature (English or a foreign language, ancient or modern; first-year language courses may not be counted)		
A field related to the humanities, such as history, art history, anthropology, etc.		
Secondary Field		
Select from one other humanities-related discipline such as fine arts, music, dance, theatre, film, philosophy, foreign language literature (first-year language courses may not be counted), or other discipline ²		12
Total Credit Hours		60

¹ At least 12 of these 18 credit hours must be taken at the upper-division level.

² There is no upper-division requirement for this area of concentration.

Graduating in Four Years

Consult the Four-Year Guarantee Requirements for information on eligibility. Because the humanities major is unique in requiring courses from a number of different departments in addition to its own courses, it is imperative that students wishing to graduate in four years declare the major early and meet regularly with a major advisor. The concept of "adequate progress" as it is used here refers only to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To

maintain adequate progress in humanities, students should meet the following requirements:

- Complete the lower-division sequences HUMN 1110–HUMN 1120 and HUMN 1220–HUMN 1220 by the end of the fourth semester.
- Complete at least two lower-division courses in the secondary field and/or area of concentration by the end of the fourth semester.
- Complete 15 of the remaining 42 credit hours at the upper-division level by the end of the sixth semester—at least two of these must be upper-division humanities courses.
- Complete all remaining required courses (no more than 27 credit hours) by the end of the eighth semester.

Recommended Four-Year Plan of Study

Through the required course work for the major, students will fulfill all 12 credits of the Arts & Humanities area of the Gen Ed Distribution Requirement.

Humanities - Minor

The depth of critical analysis as well as the breadth of knowledge covered by the humanities program's courses can be a great benefit to students pursuing a variety of other majors in the College of Arts and Sciences, in the Professional Schools and particularly students pursuing a pre-medical or pre-law school program of study. This minor provides students with the kinds of skills and interests that enhance employment opportunities as well as applications to graduate school.

Humanities program courses are designed to train students to understand and analyze critical, historical, social, political and critical issues from different perspectives and to teach students to draw independent conclusions. Our courses also help develop excellent written and verbal communication skills—recognized by the business and scientific worlds as indicators of future innovators as well as indicators

of high quality practitioners and researchers across many different fields (media, communications, arts, creative design, marketing, etc.).

Requirements

The minor in humanities offers students the opportunity to take a range of interdisciplinary courses offered by the humanities program faculty. Total: 18 credit hours (9 upper-division). All course work applied to the minor must be completed with a grade of C- or better. No pass/fail work may be applied. The GPA for all minor course work must equal 2.00 or higher.

Integrative Physiology

Physiology is the field of biology that deals with function in living organisms. The academic foundation of the department is the knowledge of how humans and animals function at the level of genes, cells, organs and systems. Our multidisciplinary curriculum requires students to take foundational courses in anatomy, biochemistry, mathematics, physics, physiology and statistics. With this basic knowledge, students can undertake a flexible curriculum that includes the study of biomechanics, cell physiology, endocrinology, immunology, exercise physiology and neurophysiology. The department also encourages student participation in research.

Students completing a degree in integrative physiology are expected to acquire the ability and skills to:

- read, evaluate and synthesize information from the research literature on integrative physiology;
- observe living organisms and be able to understand the physiological principles underlying function;
- be able to interpret movement and performance data from laboratory measurements; and
- communicate the outcome of an investigation and its contribution to the body of knowledge on integrative physiology.

These goals are achieved by providing a curriculum that comprises required courses and elective experiences. The required courses establish the foundation of knowledge for the discipline, whereas the elective courses provide opportunities to extend this knowledge on selected topics. The elective courses include seminars, independent study and research projects on such topics as aging, applied biomechanics, applied exercise science, behavioral neuroendocrinology, epidemiology, genetics of substance abuse, integrative physiology of aging, integrative vascular biology, locomotion, molecular biology of

neurodegeneration, molecular neurogenetics, molecular signaling of neurological disorders, motor behavior, neuromechanics, neurophysiology of movement, reproductive endocrinology, sleep and chronobiology, sleep and development and stress physiology.

For more information, visit the Integrative Physiology (<http://www.colorado.edu/intphys>) website.

Course code for this program is IPHY.

Bachelor's Degree

- Integrative Physiology - Bachelor of Arts (BA) (p. 439)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Ahmed, Alaa Abdalla (https://experts.colorado.edu/display/fisid_144736)
Associate Professor; PhD, University of Michigan Ann Arbor

Bartlett, Jamie Lynn (https://experts.colorado.edu/display/fisid_156740)
Lecturer

Wright, Kenneth P (https://experts.colorado.edu/display/fisid_125586)

Professor; PhD, Bowling Green State University

Courses

IPHY 1950 (3) Introduction to Scientific Writing in Integrative Physiology

Provides an overview of writing skills and strategies, emphasizing those most important to the sciences, especially physiology. Focuses on fundamental skills, objective analysis, and scientific persuasion, with attention to clear organization and style, academic and scientific mechanics, and distinctions between audiences.

Requisites: Restricted to students with 0-86 credits (Freshmen, Sophomore or Juniors) only.

Additional Information: Arts Sci Core Curr: Written Communication

Arts Sci Gen Ed: Written Communication-Lower

MAPS Course: English

IPHY 2010 (1-3) Seminar in Integrative Physiology

Introduces a small group of lower-division students to current research topics in integrative physiology. Emphasizes relevant applications to real-world situations.

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

IPHY 2400 (2) Introduction to Medical Terminology for Future Health Professionals

Provides an introduction to medical terminology used within the health professions. Word roots, prefixes and suffixes used in medical records for major body systems will be examined and explained. The structure and functions of the major systems will be defined and described.

Recommended for IPHY students and students interested in pursuing a career in the health professions. No prerequisites required.

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

IPHY 2420 (3) Nutrition for Health and Performance

Focuses on the basic anatomy, physiology, and chemistry of nutrition. Topics include weight management, the role of diet and lifestyle in disease prevention, specific nutrient deficiencies and toxicities, nutrition standards and guidelines, sports nutrition recommendations, agricultural practices, and food policy issues. IPHY juniors or seniors are excluded from taking this course.

Equivalent - Duplicate Degree Credit Not Granted: IPHY 3400

Requisites: Restricted to non-IPHY majors or IPHY freshmen/sophomores (students with 0-56 credits) only.

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence

Arts Sci Gen Ed: Distribution-Natural Sciences

IPHY 2500 (1) Perspectives in Health and Medicine

Designed to increase awareness of issues that surround international and U.S. health care. Provides broad overview of topics relevant to 21st century medical practice. Includes guest lectures by faculty and practitioners from Denver Metro region, followed by opportunities to integrate new concepts using small group discussion and writing. Topics change each semester and may include: global development and health; socio-cultural issues in health care; health disparities; applied bioethics; health care system reform; narrative medicine.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Grading Basis: Pass/Fail

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

IPHY 2750 (3) Introduction to Exercise Psychology

Focuses on how psychological factors influence exercise and motor performance in both clinical and sport settings. Major topics include motivation, arousal, stress, imagery, self-confidence, concentration and burnout. Principles of psychological skills training are also discussed.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

IPHY 2800 (4) Introduction to Statistics

Examines the application of statistics to research relevant to integrative physiology. Includes instruction and hands-on experience with related computer programs and interpretation of the results of their use.

Requisites: Restricted to Integrative Physiology (IPHY) majors only.

Recommended: Prerequisite MATH 1300.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

IPHY 2910 (1-6) Practicum in Integrative Physiology

Offers practical experience in organized situations with direct supervision.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with 0-56 credits (Freshmen or Sophomore) only.

IPHY 3010 (1-2) Teaching in Integrative Physiology

Provides an opportunity to assist in teaching specific laboratory sections in IPHY under direct faculty supervision. Students must make arrangements with the faculty member responsible for the course in which they plan to assist.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

IPHY 3060 (4) Cell Physiology

Lect. and lab. Introduces the biology of eukaryotic systems at molecular, cellular and systems levels of integration, emphasizing the complementarities of structure and function and physiological mechanisms of regulation at the cellular and molecular level. Department enforced prerequisite: one year of general biology (lecture + lab).

Requisites: Requires prerequisite course of IPHY 3430 or IPHY 3470 (minimum grade C-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

IPHY 3400 (3) Nutrition for IPHY Majors

Focuses on the science of nutrition, reviewing the basic anatomy, physiology and chemistry of nutrition. Concepts will focus on what the body needs for proper nutrition, how they are obtained, absorbed and processed by the body. Studies will expand to include the following: diet types, nutrition during life stages (i.e. pregnancy), different disease states and real world applications.

Equivalent - Duplicate Degree Credit Not Granted: IPHY 2420

Requisites: Restricted to students with 57-180 credits (Junior or Senior) Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree majors only.

Recommended: Prerequisite IPHY 3410.

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

IPHY 3410 (3) Introduction to Human Anatomy

Introduces the basics of human anatomy. Department enforced prerequisite: one year of general biology (lecture + lab).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

IPHY 3415 (2) Human Anatomy Laboratory

Introduces structures of the human anatomical systems using human cadavers and animal tissue. This laboratory is meant to complement IPHY 3410. Department enforced prerequisites: one year of general biology (lecture + lab) and corequisite: IPHY 3410.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

Arts Sci Gen Ed: Distribution-Natural Sci Lab

IPHY 3430 (3) Human Physiology

Introduces the physiology of the nervous, muscular, cardiovascular, respiratory, urinary, immune, endocrine, digestive and reproductive systems. Department enforced requisites: one year: one year of general biology (lecture and lab). Recommended: IPHY 3415.

Requisites: Requires prerequisite courses of CHEM 1113/1114 or CHEM 1400/1401 or CHEN 1211/CHEM 1221 and IPHY 3410 (all minimum grade C-). Restricted to non-Integrative Physiology (IPHY) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

IPHY 3435 (2) Physiology Lab

Introduces laboratory experience in selected aspects of human and comparative physiology for students in pharmacy and allied health programs. Department enforced prerequisites: one year of general biology (lecture + lab) and one year of general chemistry (lecture + lab); IPHY 2800 (or equivalent); IPHY 3410, IPHY 3415 and IPHY 3430 (prerequisites for majors; recommended courses for non-majors); IPHY 3430 (non-majors only).

Requisites: Requires prerequisite course of IPHY 3470 (minimum grade C-).

Recommended: Corequisite IPHY 3480 (majors only).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Arts Sci Gen Ed: Distribution-Natural Sci Lab

IPHY 3440 (3) Clinical Nutrition

Exploration of clinical nutrition concepts from a health care provider perspective. Examines how and why diseases develop and what nutritional therapy and intervention is appropriate for disease resolution.

Requisites: Requires prerequisite of IPHY 2420 or IPHY 3400 (both minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

IPHY 3450 (3) Comparative Animal Physiology

Introduces principles of animal physiology and responses to environmental change. Involves animals and/or animal tissues.

Department enforced prerequisites: one year of general biology (lecture + lab) and one year of general chemistry (lecture + lab).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

IPHY 3460 (5) Comparative Vertebrate Anatomy

Introduces major components of the vertebrate body and how they are organized into a whole organism, emphasizing function, evolution, and diversity of these basic features. Laboratories involve dissection of representative groups and demonstrations. Involves animals and/or animal tissues. Department enforced prerequisites: one year of general biology (lecture + lab) and one year of general chemistry (lecture + lab).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

IPHY 3470 (3) Human Physiology 1

Focuses on scientific thinking, cell physiology, neurophysiology, endocrinology, immunology and musculoskeletal physiology. The first semester of a two-semester sequence for IPHY and NRSC majors only. Department enforced prerequisites: one year of general biology (lecture and lab). Recommended course: IPHY 2800 or statistics equivalent and IPHY 3415.

Requisites: Requires prerequisite courses of CHEM 1133 and CHEM 1134 or CHEM 2100 and CHEM 2101 (all minimum grade C-). Restricted to Integrative Physiology (IPHY) or Neuroscience (NRSC) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

IPHY 3480 (3) Human Physiology 2

Focuses on the physiology of the respiratory, cardiovascular, urinary, digestive and reproductive systems. The second semester of a two-semester sequence for IPHY and NRSC majors. Department enforced prerequisites: one year of general biology (lecture + lab) and one year of general chemistry (lecture + lab); IPHY 3410 and 3415.

Requisites: Requires prerequisite course of IPHY 3470 (minimum grade C-). Restricted to Integrative Physiology (IPHY) or Neuroscience (NRSC) majors only.

Recommended: Corequisite IPHY 3435.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

IPHY 3490 (3) Introduction to Epidemiology

Examines the history and uses of epidemiology, measures of disease frequency and occurrence, association and causality, analytic epidemiology, evidence-based screening and outbreak investigations.

Recommended: Prerequisites IPHY 2800 and SOCY 2061 and PSYC 3101.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

IPHY 3500 (2) Applied Clinical Research

Introduces fundamental concepts of clinical research to those interested in pursuing a career in medicine or medical research. In addition to lectures introducing students to research design, errors in research and basic biostatistics, there will be significant emphasis on participation in on-going medical research at Denver Health Medical Center and The Children's Hospital. This unique experience will provide students with first-hand exposure to all aspects of clinical research. Department enforced prerequisites: one year of general biology (lecture + lab).

Recommended: Prerequisite CHEM 3111 and premedical focus and/or previous research experience.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

IPHY 3580 (3) Sleep, Circadian Rhythms and Health

Examines the history of sleep and circadian rhythms; lifespan development of sleep and rhythms; observational, physiological and clinical measures of sleep; screening for sleep and circadian disorders; associations between poor sleep and circadian misalignment and health; and evidence-based sleep and circadian interventions/preventions in healthy and clinical samples. Department enforced prerequisites: one year general biology plus labs, and one semester of statistics.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

IPHY 3660 (3) Dynamics of Motor Learning

Focuses on information processing approaches and dynamical systems theory as explanations for human motor learning and the coordination of movement. Various topics are discussed from both perspectives including practice organization, attainment of elite performance, and the production of novel movements.

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences

IPHY 3700 (3) Scientific Writing in Integrative Physiology

Takes a process-based approach to writing. Assignments and classroom experiences emphasize critical thinking, using scientific evidence and reasoning to construct original arguments, and applying conventions and problem-solving skills to craft successful documents. Department enforced prerequisite: IPHY 2800 or equivalent.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree or Neuroscience (NRSC) majors only.

Additional Information: Arts Sci Core Curr: Written Communication
Arts Sci Gen Ed: Written Communication-Upper

IPHY 3800 (3) Forensic Biology

Introduces basic concepts of modern forensic science with emphasis on biological aspects such as forensic entomology, forensic botany, hair analysis, forensic anthropology, and forensic DNA analysis. Department enforced prerequisites: one year of general biology (lecture + lab) and one year of general chemistry (lecture + lab).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

IPHY 3810 (1) Forensic Biology Laboratory

Introduces basic laboratory techniques and procedures of modern forensic science with emphasis on biological aspects such as forensic entomology, forensic botany, hair analysis, forensic anthropology and forensic DNA analysis. Department enforced prerequisites: one year of general biology (lecture + lab) and one year of general chemistry (lecture + lab).

Recommended: Corequisite IPHY 3800.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Arts Sci Gen Ed: Distribution-Natural Sci Lab

IPHY 4010 (1-3) Seminar in Integrative Physiology

Introduces a small group of students to current research topics in integrative physiology, evaluation of current research and discussion of critical issues. Department enforced prerequisite: IPHY 2800 or equivalent.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

IPHY 4200 (3) Physiological Genetics and Genomics

Covers fundamental concepts in molecular genetics/genomics with physiological applications. Topics include structure and function of nucleic acids, genome structure, genetic and genomic research tools, methods for identifying disease-causing mutations, regulation of gene expression, pharmacogenetics, gene therapy and ethical issues in modern genomics. First course of a 3-course series recommended for IBG students. Includes a recitation section.

Equivalent - Duplicate Degree Credit Not Granted: IPHY 5200

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

IPHY 4440 (4) Endocrinology

Introduces mammalian endocrine system. Provides a thorough analysis of chemical communication by hormones and related bioregulators with emphasis on the major endocrine systems such as the thyroid, gonad, pituitary and the brain. Department enforced prerequisites: one year of general biology (lecture + lab) and one year of general chemistry (lecture + lab).

Equivalent - Duplicate Degree Credit Not Granted: IPHY 5440

Requisites: Requires prerequisite course of IPHY 3470 (minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Integrative Physiology (IPHY) or Neuroscience (NRSC) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

IPHY 4470 (3) Biology of Human Reproduction

Anatomy and physiology of human reproduction, including gender determination, embryology, puberty, menstrual cycle, pregnancy, lactation, menopause, sexual behavior, sexual abnormalities and contraception. Open to nonmajors. Department enforced prerequisites: one year of general biology (lecture + lab).

Recommended: Prerequisites IPHY 3470 and IPHY 3480 (majors) or IPHY 3430 or (non-majors) or IPHY 4440.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

IPHY 4480 (3) Comparative Reproduction

Focuses on comparative anatomy and physiology of reproductive system and the evolution of reproductive behavior in vertebrates and invertebrates. Topics include courtship, mating, fertilization, estrous and menstrual cycles and environmental control of seasonal reproduction. Department enforced prerequisite: one year of general biology (lecture + lab).

Recommended: Prerequisite IPHY 3480 (majors) or IPHY 3430 (non-majors).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

IPHY 4490 (3) Case Studies in Public Health

Explores case studies in public health in how they have influenced our approach to disease outbreaks and disease resolution. Examines famous case studies in infectious disease, zoonoses and non-infectious diseases, including environmental and occupational exposure to see how they have changed our understanding of disease and responses by health and medical personnel. Examines special populations within public health, as well as discuss modern public health challenges.

Requisites: Requires prerequisite courses of IPHY 3490 (minimum grade D-).

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

IPHY 4540 (5) Biomechanics

Applies the principles of physics and physiology to the analysis of human movement. Quantitative analysis of forces, torque, mechanical energy, power impulses and momentum associated with human movement. Mechanical properties of muscles, tendons, ligaments and bones.

Requisites: Requires prerequisite course of IPHY 3470 (minimum grade C-). Restricted to Integrative Physiology (IPHY) or Neuroscience (NRSC) majors only.

Recommended: Prerequisites (MATH 1300 or MATH 1310 or APPM 1350) and IPHY 3415.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

IPHY 4580 (3) Sleep Physiology

Describes the physiology and neurobiology of sleep and impact of sleep, sleep deprivation, and sleep disorders on immune, endocrine, cardiovascular, respiratory, and neural systems, as well as examines changes in sleep across the life span. The integrative nature of sleep and circadian rhythms in normal

Requisites: Requires prerequisite course of IPHY 3470 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

IPHY 4600 (3) Immunology

Studies the immune system, a multi-cellular system that functions to protect us from disease. Introduces concepts associated with the development and function of individual cells of the immune system (T-cells, B-cells, neutrophils, dendritic cells, macrophages), as well as their integrative roles in physiology and host defense. Department enforced prerequisites: one year of general biology (lecture + lab) and one year of general chemistry (lecture + lab).

Equivalent - Duplicate Degree Credit Not Granted: IPHY 5600

Requisites: Requires prerequisite course of IPHY 3470 (minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Integrative Physiology (IPHY), Integrative Physiology Concurrent Degree or Neuroscience (NRSC) majors only.

Recommended: Prerequisite IPHY 3060.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

IPHY 4650 (5) Exercise Physiology

Examines physiological and biochemical adjustments that occur in the body with acute and chronic exercise. Topics center on physiological mechanisms pertaining to metabolic, cardiovascular, and hormonal alterations, the role of exercise in health and disease, soreness and fatigue, immune function, as well as exercise during varied environmental conditions. Department enforced prerequisites: IPHY 2800 or equivalent and IPHY 3480. Department enforced corequisite: IPHY 3410.

Requisites: Requires prerequisite course of IPHY 3470 and 3480 (all minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree or Neuroscience (NRSC) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

IPHY 4660 (3) Critical Thinking in Integrative Physiology

Covers specific integrative physiology topics in areas such as animal physiology, endothelial function, neurobiology, exercise immunology and exercise physiology. Department enforced prerequisite: 13-hours of IPHY coursework.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

IPHY 4680 (3) Critical Thinking in Exercise Physiology

Covers specific exercise physiology topics such as cellular cause of fatigue and muscle soreness, heart disease, regulation of blood flow, diabetes, aging, training adaptations, exercise at high altitude, ergogenic aids and excitation-contraction of muscle. Department enforced prerequisite: IPHY 4650.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

IPHY 4720 (4) Neurophysiology

Explores the function of the nervous system, including how the properties of neurons influence nervous system activity, how the nervous system controls the activity of muscles and how the sensory effects of muscle activity influence the function of the nervous system. Department enforced prerequisites: one year of general biology (lecture + lab) and one year of general chemistry (lecture + lab), IPHY 2800 (or equivalent); IPHY 3410.

Equivalent - Duplicate Degree Credit Not Granted: IPHY 5720

Requisites: Requires prerequisite course of IPHY 3470 (minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree or Neuroscience (NRSC) majors only.

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

IPHY 4730 (3) Integrative Motor Control

Investigates human motor control by integrating concepts from exercise physiology, biomechanics, and sport psychology. Applications are made to clinical and educational exercise contexts.

Equivalent - Duplicate Degree Credit Not Granted: IPHY 5730

Recommended: Prerequisites IPHY 3410 and IPHY 3470.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

IPHY 4740 (3) Theory of Motor Skill Learning

Offers a critical analysis of motor learning theories, including Adam's closed loop theory, Schmidt's schema theory, and the influence of contextual interference on learning and performance. Also covers feedback and practice organization. Projects and presentations required.

Equivalent - Duplicate Degree Credit Not Granted: IPHY 5740

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

IPHY 4850 (1) Honors Thesis Seminar

To be taken during the final academic year prior to graduation. Consists of a lecture component on Honors thesis writing and defense, as well as a seminar component where Honors candidates present their thesis research in a practice defense talk.

Recommended: Prerequisite IPHY 3700, minimum 3.3 GPA and a declared IPHY major and approval by departmental honors committee.

Grading Basis: Pass/Fail

IPHY 4860 (1-6) Independent Study: Undergraduate

Students may register for more than one section per term.

Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

IPHY 4870 (1-3) Honors Thesis

Department enforced prerequisites: IPHY 2800 and IPHY 3700.

Additional Information: Arts Sciences Honors Course

IPHY 4890 (3) Community-Based Primary Health Care

Introduces models of Community-Based Health Care (CBPHC), relevant research regarding the models and methods of implementation in rural low resource settings. This 3 week summer global seminar in Nicaragua also includes public health data collection in a rural area in conjunction with local health promoters. Provides students with practical skills in the implementation of CBPHC in rural low resource settings.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite GEOG 3692.

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

IPHY 4930 (1-6) Internship

Provides an opportunity for field/laboratory work in a variety of different settings. Consult with faculty for approval. Department enforced prerequisite: completion of at least two of the major core classes.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

IPHY 4940 (1-6) Application for Clinical Internship

Provides an opportunity for clinical experience in a clinic or hospital setting with which the University has an established Affiliation Agreement. Consult with faculty for approval. Department enforced prerequisite: completion of two 3000-level courses.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Integrative Physiology - Bachelor of Arts (BA)

The integrative physiology program leads to a Bachelor of Arts (BA) degree. The program allows the student to learn the accumulated scientific knowledge about the human body and its responses to physical activity. IP students spend a significant portion of their freshman and sophomore years taking prerequisite course work in biology, chemistry, human anatomy and human physiology, physics and statistics.

In their junior and senior years, students take at least three of the six core courses: biomechanics, cell physiology, endocrinology, immunology, exercise physiology and neurophysiology. In addition, a number of elective courses are offered to complete the degree including independent study, internships and honors work with individual faculty members.

Because of its emphasis on the natural sciences, many students select the integrative physiology major as preparation for a premedical program, since it provides the type of course work required for advanced training in areas such as health, wellness and medicine.

The program provides students with the knowledge, skills and expertise required for advanced training in fields like physical therapy, medicine, osteopathic medicine, dentistry, exercise management, nursing and physiological sciences. A degree in IP also qualifies graduates for other career possibilities in cardiac rehabilitation, chiropractic, geriatrics, physical fitness programming (industrial and corporate) and further scientific training in graduate school.

Concurrent Degree Program BA/MS in Integrative Physiology

The Department of Integrative Physiology has developed a curriculum that allows both degrees to be completed in 5 years. The program has been designed to provide qualified undergraduate students with an opportunity to enhance their knowledge base in the discipline, engage in research, increase their opportunities for employment and make their applications to medical/allied health professional schools more competitive. Candidates for the program are recruited from the undergraduate population of declared integrative physiology majors during the beginning of their junior year. All interested candidates must apply by the second semester of their junior year. To apply, students must have a minimum GPA of 3.30, one letter of recommendation and a faculty mentor. Approximately 3–5 of the applicants will be selected on a competitive basis to begin the program.

Once accepted into the program, a student must maintain a GPA of 3.00 in all course work undertaken. After transitioning to the MS degree, students must register for at least 5 graduate course credit hours per semester. Students deciding to discontinue the program may do so at any time during their course of study. All credit hours completed toward the concurrent degree program will be counted toward the completion of the requirements for a BA degree in integrative physiology.

To complete the program in five years, students will be allowed to count 6 credit hours of their graduate work as electives for the undergraduate degree and 6 credit hours of undergraduate work toward the master's degree. See Integrative Physiology - Master of Science (MS) (p. 1108) for more information.

Requirements

Students must complete the general requirements of the College of Arts and Sciences and the required courses below. Students must complete a minimum of 38 credit hours, 30 credit hours in courses with the IPHY subject area and 8 credit hours in a biology sequence including requisite labs.

A grade must be earned of C-, or better, for any course applied to the major.

Required Courses and Credits

Code	Title	Credit Hours
Required Biology Sequence		
Select one of the following biology sequence of lecture and lab:		
<i>Lecture</i>		6
EBIO 1210 & EBIO 1220	General Biology 1 and General Biology 2	
MCDB 1150 & MCDB 2150	Introduction to Cellular and Molecular Biology and Principles of Genetics	
MCDB 1111 & MCDB 2222	Core Concepts in Biology I: Evolutionary, Molecular and Cell Biology and Core Concepts in Biology II: Genes, Genetics and Phenotypes	
<i>Lab</i>		2
EBIO 1230 & EBIO 1240	General Biology Laboratory 1 and General Biology Laboratory 2	
MCDB 1161	From Dirt to DNA: Phage Genomics Laboratory I or MCDB 1170 Drug Discovery Through Hands-on Screens I	

or MCDB 2160 From DNA to Genes, Phage Genomics Laboratory II or MCDB 2170 Drug Discovery Through Hands-On Screens 2

Required IPHY Course Work		
IPHY 2800	Introduction to Statistics	4
IPHY 3410 & IPHY 3415	Introduction to Human Anatomy and Human Anatomy Laboratory	5
IPHY 3470	Human Physiology 1	3
IPHY 3480	Human Physiology 2	3
IPHY 3435	Physiology Lab	2
Advanced IPHY Course Work		
Select three of the following (two of which must be taken at CU Boulder):		11-14
IPHY 3060	Cell Physiology	
IPHY 4440	Endocrinology	
IPHY 4540	Biomechanics	
IPHY 4600	Immunology	
IPHY 4650	Exercise Physiology	
IPHY 4720	Neurophysiology	
IPHY Elective Course Work		
Choose additional course work to get IPHY credit-hour total to at least 30, if needed.		2-0
Total Credit Hours		38-39
Code	Title	Credit Hours
Required Ancillary Course Work		
CHEM 1113 & CHEM 1114	General Chemistry 1 and Laboratory in General Chemistry 1	5
CHEM 1133 & CHEM 1134	General Chemistry 2 and Laboratory in General Chemistry 2	5
PHYS 2010 & PHYS 2020	General Physics 1 and General Physics 2	10
Electives		
Select one of the following calculus options:		4-5
MATH 1300	Calculus 1	
MATH 1310	Calculus for Life Sciences	
APPM 1350	Calculus 1 for Engineers	
Total Credit Hours		24-25

The number of major elective credit hours needed to reach the 30-credit-hour major requirement will vary based on what major courses are taken. Students cannot apply more than 45 major credit hours toward the degree. Contact department for current elective choices.

Graduating in Four Years

Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of "adequate progress" as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress in integrative physiology, students should meet the following requirements:

- By the first semester, declare the major.
- Before the beginning of the fifth semester, complete the biology and chemistry requirements.
- By the end of the sixth semester, complete the anatomy and physiology requirements.

Students must consult with a major advisor to determine adequate progress toward completion of major requirements.

Recommended Four-Year Plan of Study

Through the required course work for the major, students will fulfill all 12 credits of the Natural Sciences area of the Gen Ed Distribution Requirement, including the Lab component, and the QRMS area of the Gen Ed Skills Requirement.

Course	Title	Credit Hours

International Affairs

With the increasing importance of world issues to the United States, employment opportunities in government, international organizations and business continue to expand. Today there is an urgent need for college graduates with a strong background in international affairs. To meet this need, the University of Colorado Boulder offers a comprehensive and flexible interdisciplinary program in international affairs leading to the BA degree.

The undergraduate degree in international affairs emphasizes knowledge and awareness of:

- major political, economic, social and cultural problems facing the international community, including international economic relations, world population and resource utilization;

- the international political system in the broadest global context, international organizations and alliances, and foreign political systems and processes;
- ethical issues involved in international relations;
- patterns of conflict and cooperation among nations and peoples;
- chief historical factors that give rise to existing international institutions and processes; and
- problems and issues in United States foreign policy.

In addition, students completing the degree in international affairs are expected to acquire the ability and skills to:

- analyze an international problem from a political, economic, historical and cultural perspective;
- read, critically evaluate and synthesize information obtained from international affairs literature;
- analyze international phenomena critically;
- communicate, orally and in writing, findings to other students of international affairs and to a broader audience; and
- communicate in other cultural contexts through advanced foreign language study.

Course code for this program is IAFS.

Bachelor's Degree

- International Affairs - Bachelor of Arts (BA) (p. 444)

Certificates

- Arctic Studies - Certificate (p. 447)
- European Union Studies - Certificate (p. 448)
- Global Environmental Affairs - Certificate (p. 449)
- International Media - Certificate (p. 450)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Courses

IAFS 1000 (4) Global Issues and International Affairs

Introduces the student to the international affairs program. The course examines political and economic development in several countries in many different world regions. Examines historical trends and development as well as current political and economic issues.

Additional Information: GT Pathways: GT-SS3 -Soc Behav Sci:Hmn Behav, Cult, Soc Frame

Arts Sci Core Curr: Contemporary Societies
Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Asia Content

IAFS 3000 (3) Special Topics in International Affairs

Junior or senior level umbrella seminar spanning a variety of topics relevant to the study of international affairs. Subjects addressed under this heading vary according to student interest and faculty availability.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) International Affairs (IAFS) or Political Science (PSCI) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

IAFS 3010 (3) Islam, Geopolitics and Society: Gender, Identity and Place

Examines Islam, geopolitics and society in various locations throughout the globe, such as Afghanistan, Egypt, France, Germany, India, Indonesia, Iran, Iraq, Ireland, Israel/Palestine, Morocco, Pakistan, Saudi Arabia, Turkey, Yemen, the UK and the US. Addresses issues of gender, identity and place to illustrate the complexity and diversity of social experiences within the milieu of Islam and geopolitics.

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

IAFS 3500 (3) French Connections: Contemporary France and America in Historical Context

Faculty-led Global Seminar, based in Bordeaux, France provides an opportunity to compare French history and contemporary culture, economy, and culture to that of the United States. Lectures in Boulder and Bordeaux are supplemented by interactions with officials, scholars, business leaders, interest groups, and organizations in France. Offered through Study Abroad.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4190

Additional Information: Arts Sci Core Curr: Historical Context

Arts Sci Gen Ed: Distribution-Arts Humanities

Arts Sci Gen Ed: Distribution-Social Sciences

IAFS 3520 (6) Global Seminar: Justice, Human Rights and Democracy in Israel

Explore the challenges and complexities of justice, democracy and human rights in Israel and the West Bank through field trips, course work and service learning projects with Jerusalem based non-profit organizations. Acquire new knowledge and lived experience on critical issues facing Israelis and Palestinians with the wider scope of Middle East politics.

Equivalent - Duplicate Degree Credit Not Granted: JWST 4302

Recommended: Prerequisites ANTH 4050 or JWST 4050 and IAFS 3600 or JWST 3600.

Additional Information: Arts Sci Core Curr: Contemporary Societies

Arts Sci Gen Ed: Distribution-Social Sciences

Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Asia Content

IAFS 3530 (3) Global Seminar: Jews and Muslims - The Multiethnic History of Istanbul

Spend two weeks in Istanbul and examine Jewish-Muslim relations in a place that was for 500 years the crossroads of civilization. The only Muslim city in the 21st century with a large, thriving Jewish community, Istanbul models how people from different social classes, ethnicities and religious backgrounds can coexist.

Equivalent - Duplicate Degree Credit Not Granted: JWST 3530 and RLST 3530

Grading Basis: Letter Grade

Additional Information: Arts Sci Core Curr: Human Diversity

Arts Sci Gen Ed: Distribution-Arts Humanities

Arts Sci Gen Ed: Diversity-Global Perspective

IAFS 3600 (3) Contemporary Jewish Societies

Uses transnational lens to explore contemporary debates about Jewish people, places and practices of identity and community; places that Jews have called 'home', and what has made, or continues to make those places 'Jewish'; issues of Jewish homelands and diasporas; gender, sexuality, food and the Jewish body; religious practices in contemporary contexts. Readings drawn primarily from contemporary journalism and scholarship.

Equivalent - Duplicate Degree Credit Not Granted: JWST 3600 and GSSL 3600

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Core Curr: Human Diversity

Arts Sci Gen Ed: Distribution-Social Sciences

Arts Sci Gen Ed: Diversity-U.S. Perspective

Arts Sci Gen Ed: Distribution-Arts Humanities

Arts Sci Gen Ed: Diversity-Global Perspective

IAFS 3610 (3) Topics in International Affairs and Jewish Studies

Explores topics in international affairs as it relates to Jewish culture and society. Subjects addressed under this heading vary according to student interest and faculty availability.

Equivalent - Duplicate Degree Credit Not Granted: JWST 3610

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

IAFS 3621 (3) Rogues to Revolutionaries: Russian Rebels, Past and Present

Explores the tradition of dissent and opposition in Russian culture, from the medieval period to present, approaching forms of rebellion (religious, political, social, aesthetic) in historical context. This survey in intellectual history will trace this phenomenon across historical documents, literary texts, film, and the fine and performing arts, pairing these primary materials with readings in Russian history. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 4481 and RUSS 5481

Grading Basis: Letter Grade

Additional Information: Arts Sci Core Curr: Historical Context

Arts Sci Gen Ed: Distribution-Arts Humanities

IAFS 3630 (3) Radical Nationalism in Contemporary Northern Europe

Examines the current rise of National Socialists, white supremacists, ethnic separatists, anti-Islam activists and social and cultural ultraconservatives in northern Europe. Treats extremist nationalism as a social, cultural, aesthetic, intellectual and political movement. Consults scholarship from sociology, criminology and political science, as well as music, literature, art and film.

Equivalent - Duplicate Degree Credit Not Granted: SCAN 3301

Additional Information: Arts Sci Core Curr: Ideals and Values

Arts Sci Gen Ed: Distribution-Social Sciences

IAFS 3631 (3) Arctic Society and Culture

Investigates representations of the Arctic in literature, art, cinema, media and scientific, and geographical writing over the past century and a half, spanning material from North America, Britain, continental Europe and the Nordic region. Interpretive approaches include ecocriticism; post-colonialism; literary studies; indigenous studies; visual, film and media theory; Cold War studies.

Equivalent - Duplicate Degree Credit Not Granted: SCAN 3631

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

Arts Sci Gen Ed: Distribution-Arts Humanities

IAFS 3640 (3) Data Analysis for Global Environmental Affairs

Develops data analysis techniques for global environmental data including demographic, economic, agricultural, fisheries and energy sectors. Designed to support the development of basic and intermediate data analysis skills for students in the Global Environmental Affairs certificate program. Includes hands-on exploration of up-to-date global data sets from a variety of sources. Fulfills the application requirement for the ENVS major.

Equivalent - Duplicate Degree Credit Not Granted: ENVS 3640

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

IAFS 3650 (3) History of Arab-Israeli Conflict

Explores the origins and development of the Arab-Israeli conflict. Traces Arab-Jewish/Israeli relations from the 19th century through the Palestine Mandate, the evolution of Arab and Jewish nationalism and the creation of Israel to the present day.

Equivalent - Duplicate Degree Credit Not Granted: JWST 3650

Requisites: Restricted to students with 57-180 credits (Junior or Senior) International Affairs (IAFS) majors only.

Recommended: Prerequisite HIST 1308 or HIST 1828 or JWST 1828.

Additional Information: Arts Sci Core Curr: Historical Context

Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Asia Content

IAFS 4500 (3) The Post-Cold War World

Capstone course for international affairs majors. Examines the ways in which the end of the Cold War, the collapse of failed states, and the rise of global terrorism changed the world. Studies how peoples, governments and nongovernmental organizations face new social, political, economic and security challenges in an era of globalization. Includes discussion, oral reports, critical book reviews, and research papers.

Requisites: Restricted to students with 87-180 credits (Senior)

International Affairs (IAFS) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

IAFS 4800 (3) Honors Seminar in International Affairs

Directed research course tailored to the particular research interests of the students enrolled. Devoted to research methodology and the development of students' research. Department enforced prerequisite: overall 3.30 GPA and IAFS 3.40 GPA.

Additional Information: Arts Sciences Honors Course

IAFS 4810 (3) Honors in International Affairs

Continuation of IAFS 4800. Students complete original research begun in the fall and write, defend their honors thesis and meet regularly with the instructor.

Requisites: Requires prerequisite course of IAFS 4800 (minimum grade C-).

Additional Information: Arts Sciences Honors Course

IAFS 4900 (1-6) Independent Study in International Affairs

Provides an opportunity to earn academic credit for learning outside the formal class structure. Students interested in doing in-depth research propose a research project to a faculty sponsor and then work closely with that person to produce a piece of original research. Department enforced prerequisite: restricted to students with 57-180 credits (Juniors or Seniors), GPA of 3.00 or better, grade of C or better in all lower-division courses, and at least 6 upper-division courses.

Repeatable: Repeatable for up to 6.00 total credit hours.

IAFS 4930 (3-6) Internship in International Affairs

Working individually under the guidance of a public or private organization, students are assigned to projects selected for their academic suitability. Written assignments occur throughout the semester.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) International Affairs (IAFS) majors only.

International Affairs - Bachelor of Arts (BA)

With the increasing importance of world issues to the United States, employment opportunities in government, international organizations and business continue to expand. Today there is an urgent need for college graduates with a strong background in international affairs. To meet this need, the University of Colorado offers a comprehensive and flexible interdisciplinary program in international affairs leading to the BA degree.

The undergraduate degree in international affairs emphasizes knowledge and awareness of:

- major political, economic, social and cultural problems facing the international community, including international economic relations, world population and resource utilization
- the international political system in the broadest global context, international organizations and alliances, and foreign political systems and processes
- ethical issues involved in international relations
- patterns of conflict and cooperation among nations and peoples
- chief historical factors that give rise to existing international institutions and processes
- problems and issues in United States foreign policy

In addition, students completing the degree in international affairs are expected to acquire the ability and skills to:

- analyze an international problem from a political, economic, historical and cultural perspective
- read, critically evaluate and synthesize information obtained from international affairs literature
- analyze international phenomena critically
- communicate, orally and in writing, findings to other students of international affairs and to a broader audience
- communicate in other cultural contexts through advanced foreign language study

Requirements

Program Requirements

Students must complete the general requirements of the College of Arts and Sciences and a minimum of 51 credit hours of specified courses with a grade of C- or better (none may be taken pass/fail).

Required Courses and Credits

Lower-Division

Code	Title	Credit Hours
ECON 2010	Principles of Microeconomics	4
ECON 2020	Principles of Macroeconomics	4
IAFS 1000	Global Issues and International Affairs	4
PSCI 2012	Introduction to Comparative Politics	3
PSCI 2223	Introduction to International Relations	3
Total Credit Hours		18

Upper-Division

Complete the requirements listed below for **functional area, geographic concentration, off-campus experience, foreign language and senior seminar**. IAFS 3000 Special Topics in International Affairs can be repeated up to 9 credit hours for different topics.

Functional Area (18 credit hours)

Students must complete one class in each of the four functional areas and complete two additional classes in any functional area. Students cannot apply more than four functional area classes from any one department.

Code	Title	Credit Hours
Development and Culture (Functional Area I)		
ANTH 4020	Explorations in Anthropology (approved topics only)	3-6
ANTH 4500	Cross-Cultural Aspects of Socioeconomic Development	3
COMM 3410	Intercultural Communication	3

International Institutions, Rights and Norms (Functional Area IV)					

or IAFS 4800 Honors Seminar in International Affairs

Total Credit Hours 3

Recommendations

- All international affairs majors should have a good command of the English language.
- Students should choose electives with a view to their relevance to this program or usefulness as prerequisites for upper-division work.
- Students in international affairs are encouraged to consider the possibility of participating in one of the Study Abroad programs affiliated with the University of Colorado. Students wishing to participate in such a program should contact their advisor to work out an appropriate program.
- Internships are a useful experience for students seeking a career in international affairs. The Internship in International Affairs (IAFS 4930) provides the opportunity to earn academic credit for appropriate internships in the field. This course is generally offered during the spring and fall semesters and during summer sessions. Interested sophomores, juniors or seniors should consult with the director of the Internship Program. An application is required for admission to the Internship Program; see the International Affairs Program (<http://www.colorado.edu/iafs>) website for more details. IAFS 4930 could count for the Off-Campus Experience with approval from the internship director.
- The IAFS Honors Program offers the opportunity to learn and apply research skills for a select number of IAFS majors. Entry into the IAFS Honors Program is limited to seniors with a 3.40 major GPA and a 3.30 overall GPA. The Honors Seminar in International Affairs (IAFS 4800—offered each fall semester) provides instruction in research methods and facilitates the development of a sound research project. Research continues into the spring semester under the guidance of individual faculty members and through the continuation course, Honors in International Affairs (IAFS 4810). Interested and eligible students should consult with their academic advisor and the director of the Honors Program before spring break of their junior year. An application is required for admission to the Honors Program; see the International Affairs Program (<http://www.colorado.edu/iafs>) website for more details. IAFS 4810 could count for either an upper-division functional area and/or a geographic concentration class with approval from the honors director.
- Students interested in international affairs may want to consider the Global Studies Residential Academic Program offered through the residence halls. See Residential Academic Programs for information.
- International affairs majors who wish to minor in political science must apply the following additional rules:
 - No more than 9 credit hours toward the PSCI minor can come from courses that count toward another major
 - International affairs majors must take at least one upper-division course in American politics and one course (lower- or upper-division) in political theory, in addition to the regular minor requirements.

The specific courses that may be counted to meet the requirements in this program are determined by the committee on international affairs and the dean of the College of Arts and Sciences.

Graduating in Four Years

Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of "adequate progress" as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress in international affairs, students should meet the following requirements:

- Declare the major by the beginning of the second semester
- Begin language study by the third semester
- Complete the lower-division requirements by the end of the sophomore year
- Begin geographic concentration courses in first semester of the junior year
- Begin upper-division general international affairs requirements in the first semester of the junior year
- Successfully complete any remaining major requirements by the end of the eighth semester
- See your IAFS advisor by the end of sophomore year to plan study abroad, the Off-Campus Experience, and language requirements

Recommended Four-Year Plan of Study

Through the required course work for the major, students will fulfill all 12 credits of the Social Sciences area of the Gen Ed Distribution Requirement. Depending on elective courses selected within the major, students can potentially complete some or all credits toward the Arts & Humanities area of the Gen Ed Distribution Requirement and both components of the Gen Ed Diversity Requirement.

Course	Title	Credit Hours

Elective or Upper-division Elective (if needed)		3

Elective if needed to reach 120 total credits	1
Credit Hours	13
Total Credit Hours	118-128

Arctic Studies - Certificate

The International Affairs Program (IAFS) offers an interdisciplinary undergraduate certificate in arctic studies, in collaboration with the Program in Nordic Studies (SCAN), the Program in Russian Studies (RUSS), the Department of Geography (GEOG), the Department of Environmental Studies (ENVS), the Department of Anthropology (ANTH), the Department of Ethnic Studies (ETHN) and the research entities of the Cooperative Institute for Research in Environmental Sciences (CIRES), the National Snow and Ice Data Center (NSIDC) and the Institute of Arctic and Alpine Research (INSTAAR).

This certificate prepares students to address pressing environmental, political and cultural issues in the far north. A laboratory for studying the effects of global climate change, the arctic region spans three continents, with territories in Canada, Greenland (Denmark), Finland, Iceland, Norway, Sweden, Russia and the United States. Its population exhibits considerable ethnic, linguistic, and sociopolitical diversity, and contains numerous indigenous peoples. Issues as critical as nationalism, territorial rights and law, security, economic development and resource technology place the arctic at the center of global, regional and national interests. Further, the region's natural and social characteristics have inspired influential and enduring expressive culture—produced by locals and outsiders—from antiquity to the present.

These features make study of the arctic ideal for students pursuing careers in international politics and diplomacy, indigenous rights, environmental science and climate change, humanistic scholarship or creative work.

For more information, and to apply to the certificate in arctic studies, please contact Prof. Ben Teitelbaum (<http://www.colorado.edu/iafs/benjamin-teitelbaum>) at benjamin.teitelbaum@colorado.edu ([benjamin.teitelbaum@colorado.edu?subject=RE: Arctic Studies Certificate \(IAFS website\)](mailto:benjamin.teitelbaum@colorado.edu?subject=RE:ArcticStudiesCertificate)).

Requirements

The certificate is open to all CU undergraduates and requires the completion of six courses for a total of 18 credit hours.

Credit hours are distributed in three categories: (1) Certificate Core Courses, (2) Environment and Policy, and (3) Culture and Society. Students must complete all three courses in the core category and at least one course in each of the other two categories. They will then take one elective course, and only one 1000-level course is allowed. Nine of the 18 credits must be upper-division.

Up to three credits of approved study abroad experience may be applied to either the Environment and Policy or Culture and Society categories.

Required Courses and Credits

Code	Title	Credit Hours
Required Certificate Core Courses		
GEOG 2271	Introduction to the Arctic Environment	3
PSCI 3206	The Environment and Public Policy	3

IAFS/SCAN 3631	Arctic Society and Culture	3
Society and Culture		3-6
ETHN 2013	Critical Issues in Native North America	
RUSS 2501	Russia Today	
SCAN 2201	Introduction to Modern Nordic Culture and Society	
SCAN 3206	Nordic Colonialisms	
SCAN 3301	Radical Nationalism in Contemporary Northern Europe	
Environment and Policy		3-6
EBIO 3170	Mountain Ecology and Conservation	
ENVS 1000	Introduction to Environmental Studies	
ENVS 3022	Climate Politics and Policy	
GEOG 4261	Glaciers and Permafrost	
GEOG 4271	The Arctic Climate System	
GEOG 3682	Geography of International Development	
IAFS 1000	Global Issues and International Affairs	
PSCI 2116	Introduction to Environmental Policy and Policy Analysis	
Total Credit Hours		18

European Union Studies - Certificate

The certificate in European Union studies (CEUS) allows CU Boulder undergraduates in a range of social science and humanities programs to gain skills and understanding around the European Union (EU). The certificate documents a student's expertise in European Union studies, opening opportunities for further study, internships and careers in public, private or nonprofit sectors.

CEUS is housed in the International Affairs Program (IAFS) in the College of Arts and Sciences, and the certificate curriculum is intentionally interdisciplinary. Students admitted into the program will complete course work with EU content going beyond what they can obtain merely by completing any single major. They will also participate in cocurricular activities to augment their understanding of the development, focus, functioning and future of the EU.

Upon completion of this program, students will have a demonstrated understanding of the European Union; its politics, history, institutions, economics, policies, member states, relations with the US, role in the world and much more.

For more information, visit the program's European Union Studies (<https://www.colorado.edu/iafs/academics/certificates/european-union-studies>) webpage.

Requirements

Application and Admission

Applications for admission into the certificate program can be submitted to iafs@colorado.edu. The application includes an essay describing the applicant's interests and background in EU studies and reasons or motivations for pursuing this certificate. Please include an unofficial transcript.

All degree-seeking students at CU Boulder are eligible to apply for the certificate once they have completed at least 30 credit hours of coursework and have completed at least six credits hours of coursework from the certificate requirements (below). The certificate would be particularly useful, however, to students majoring in one of the following

related social science and humanities majors: International Affairs, Political Science, History, Geography, Sociology, Women and Gender Studies, Economics, French, Italian, Spanish, Russian Studies, or German Studies.

Applications will be reviewed once each semester for admission effective the following term.

Program Requirements

A total of 19 credit hours of course work is required to complete the certificate. All credit hours must be completed with grades of C- or better and an overall GPA of 2.000. None of the required hours may be taken pass/fail.

In addition to their course work, CEUS students will attend at least four EU-related lectures and events during their semesters of residency at CU and will submit a brief write-up of the main themes or discussion points of the events to iafs@colorado.edu.

Code	Title	Credit Hours
Lower-Division Core Requirements		7
It is essential that all students in the EU Studies Certificate program begin with a common framework for the analysis of international institutions and relations as a background for the upper division coursework in EU studies. All students must therefore complete the following lower division requirements:		
PSCI 2012	Introduction to Comparative Politics	
IAFS 1000	Global Issues and International Affairs	
Upper-Division Core Requirements		3
PSCI 4302	European Union Politics	
Upper-Division Electives		9
Students must complete at least 9 hours of relevant upper-division course work, including at least 6 credit hours from outside their major or minor, selected from the list below. Courses not listed here, but with a focus on EU issues may be applied to this elective requirement with permission from the Director of International Affairs. This includes, in particular, courses taken on authorized study abroad program in EU countries.		
ECON 4514	Economic History of Europe	
FNCE 4060	Special Topics in Finance (certain topics)	
GEOG 4892	Geography of Western Europe	
GRMN 3150	Issues in German Politics and Literature	
GRMN/WGST 4301	Gender, Race and Immigration in Germany and Europe	
HIST 4212	The Age of Religious Wars: Reformation Europe, 1500-1648	
HIST 4053	Britain and the Empire, 1688-1964	
HIST 4083	Revolution and Nationalism in Modern Ireland	
HIST 4233	History of France since 1815	
HIST 4423	German History Since 1849	
HIST 4424	Modern European Thought and Culture, 1870-Present	
HIST 4442	Europe since 1945	
IAFS 3500	French Connections: Contemporary France and America in Historical Context	
ITAL 4250	History of Modern Italy	
PSCI 3074	Democracy and Its Citizens in the US and EU	

PSCI 3143	Current Affairs in International Relations
PSCI 3183	International Law
PSCI 3213	International Political Economy
PSCI 4002	Western European Politics
PSCI 4062	East European Politics
PSCI 4173	International Cooperation and Global Anarchy
PSCI 4213	Europe and the International System
SPAN 3200	Spanish Culture
SPAN 3240	Catalan Culture 1: Nation and Art
SPAN 3250	Catalan Culture 2: Contemporary Trends and Barcelona
SPAN 3230	Discovering Barcelona: Culture and Heritage
SPAN 3270	Barcelona: Understanding Local and Immigrant Cultures
<hr/>	
Total Credit Hours	19

Students earn the certificate in European Union studies upon verification by the Director of International Affairs that they have completed a series of curricular and co-curricular requirements.

Global Environmental Affairs - Certificate

The certificate in Global Environmental Affairs provides students with opportunities to personalize undergraduate learning across disciplinary lines and to deepen student engagement with world problems. The certificate includes both formal course work and a 3-credit off-campus experiential component. This experiential learning component may be completed through internship, study abroad or CU in DC. This requirement not only enriches the students' educational experience through applied learning and fieldwork, but it also helps students demonstrate their skills and experience as they prepare for graduation and the job market.

The certificate in global environmental affairs is offered jointly by the Program in International Affairs (IAFS) and the Program in Environmental Studies (ENVS). This certificate is open to all majors at CU Boulder, and it draws upon courses and interdisciplinary expertise in both IAFS and ENVS to link and develop knowledge of global environmental policies and practices. For IAFS and ENVS students, it will provide additional value for the two interdisciplinary majors.

For more information and to apply, contact GEAcertificate@colorado.edu.

Requirements

Program Requirements

The certificate requires 19–20 credits, depending on the courses chosen. For more details and application information, see the International Affairs Program (<http://www.colorado.edu/iafs>) website.

International Media - Certificate

This undergraduate certificate program is designed exclusively for undergraduate students enrolled in the College of Media, Communication and Information (CMCI), and in the International Affairs program (IAFS) in the College of Arts and Sciences. This certificate allows students majoring in international affairs to explore careers in international reporting, advertising and entertainment, while CMCI majors will acquire the context and perspective necessary to work in global and international jobs.

Requirements

The certificate requires 18 to 19 credit hours (depending on the lower-division courses chosen), 15 of which must be upper-division courses.

Students majoring in international affairs are eligible to apply for admission to the certificate program if they have completed 30 credit hours (at least 6 of which must be in their major) with a GPA of 2.75 or better.

For more information, visit the International Affairs Program (<http://www.colorado.edu/iafs>) website.

Jewish Studies

The Program in Jewish Studies, which is open to all students of all backgrounds, Jewish and non-Jewish, explores Jewish culture, history, society and thought from a broad, interdisciplinary perspective. The program reflects the core goals of Colorado's flagship university: to provide an outstanding liberal arts education, to foster critical thought, and to instill a keen appreciation of humankind's interrelatedness and

diversity. At its core, the major trains students to be global citizens and to engage in and enact social justice in the world.

With internationally acclaimed faculty engaged in cutting-edge research and opportunities to study with leading artists, scholars and professionals working in the field of Jewish Studies, the program offers an innovative and contemporary curriculum designed to provide a strong foundation in cultural education and to connect Jewish thought and text to action and people's lives.

The program offers a Bachelor of Arts in Jewish Studies (students can pursue either a culture intensive concentration or a foreign language intensive concentration), a minor in Jewish Studies, and a minor in Hebrew and Israel studies.

An undergraduate degree in Jewish Studies emphasizes knowledge and awareness of:

- the history of global Jewish communities over time, including the history of Israel and Palestine, biblical and medieval Jewish history, history of Jewish communities in the Mediterranean, the history of the Holocaust and post-Holocaust American Judaism;
- dimensions of Jewish culture across variant Jewish communities, including differences in Jewish cultural practices, Jewish music and film, and Jewish philosophies, religious practices, mysticisms and thought;
- Jewish literature from the biblical period to the present, including Israeli literature, the Hebrew origins of western civilization, and contemporary Jewish literature; and
- global languages of the Jewish people, including Hebrew, Arabic, Spanish, French, Italian, Russian, German, Ladino and others (for students pursuing the foreign language intensive concentration).

In addition, students completing the degree in Jewish Studies are expected to develop:

- fundamental skills in critical thinking, comparative analysis, oral and written expression;
- a well-rounded perspective of the diversity of the Jewish experience;
- an ability to engage in dialogues with people who have different opinions; and
- professional skills intended to aid students in their career ambitions.

Jewish Studies alums have gone on to careers in politics, international policy, criminal justice, nonprofit, business, education, law, public relations, administration, marketing, real estate and journalism. Many have pursued additional education through graduate programs and professional schools.

The study of Jewish culture, society, history, and religion is, by its nature, comparative and interdisciplinary. Our program offers many cross-listed classes with other departments on campus to facilitate a well-rounded learning experience. Many of our courses also satisfy core requirements.

The program also offers many professional development opportunities to help students find employment after graduation in a field that fits their interests. The Internship in Jewish Studies (JWST 3930) pairs students with local organizations based on the student's long-term career goals. Majors are also required to complete a Capstone in Jewish Studies

(JWST 4000) in which they design an artistic project or research paper under the supervision of a faculty mentor that serves as a summation of their work in Jewish Studies. Majors and minors are eligible to join the Jewish Studies Undergraduate Student Advisory Board. Jewish Studies also highly encourages students to study abroad and has instituted two Global Seminars, one to Istanbul and the other to Israel.

The Program in Jewish Studies is growing rapidly and new courses are continually being added. Visit the Jewish Studies (<https://www.colorado.edu/jewishstudies>) website for the most current course information.

Course codes for this program are JWST and HEBR.

Bachelor's Degree

- Jewish Studies - Bachelor of Arts (BA) (p. 456)

Minors

- Hebrew and Israel Studies - Minor (p. 460)
- Jewish Studies - Minor (p. 461)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Courses

JWST 1040 (3) Beginning Biblical Hebrew, Second Semester

Building on HEBR 1030, continues to build expertise in reading the Hebrew Bible. Modern language acquisition and classical grammar study methods equip students with the tools to translate and read the various genres of the Biblical material. Department enforced prerequisite: HEBR 1030 or JWST 1030 (minimum grade C-).

Equivalent - Duplicate Degree Credit Not Granted: HEBR 1040

JWST 1234 (3) Mysticism and the Jewish American Literary Tradition

Explores the mystical tradition within Judaism from ancient times to the present. With roots in the Hebrew Bible, Jewish mysticism is one of the oldest forms of mysticism and has had an influence on some of the greatest philosophical traditions of western civilization.

Equivalent - Duplicate Degree Credit Not Granted: ENGL 1340

Grading Basis: Letter Grade

Additional Information: Arts Sci Core Curr: Ideals and Values
Arts Sci Gen Ed: Distribution-Arts Humanities

JWST 1818 (3) Introduction to Jewish History: Bible to 1492

Focus on Jewish history from the Biblical period to the Spanish Expulsion in 1492. Study the origins of a group of people who call themselves, and whom others call, Jews. Focus on place, movement, power/powerlessness, gender, and the question of how to define Jews over time and place. Introduces Jews as a group of people bound together by a particular set of laws; looks at their dispersion and diversity; explores Jews' interactions with surrounding cultures and societies; introduces the basic library of Jews; sees how Jews relate to political power.

Equivalent - Duplicate Degree Credit Not Granted: HIST 1818 and RLST 1818

Additional Information: Arts Sci Core Curr: Historical Context
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Asia Content

JWST 1828 (3) Introduction to Jewish History: Since 1492

Surveys the major historical developments encountered by Jewish communities beginning with the Spanish Expulsion in 1492 up until the present day. Studies the various ways in which Jews across the modern world engaged with the emerging notions of nationality, equality and citizenship, as well as with new ideologies such as liberalism, socialism, nationalism, imperialism and antisemitism.

Equivalent - Duplicate Degree Credit Not Granted: HIST 1828 and RLST 1828

Additional Information: GT Pathways: GT-HI1 - History
Arts Sci Core Curr: Historical Context
Arts Sci Gen Ed: Distribution-Arts Humanities

JWST 1830 (3) Global History of Holocaust and Genocide

Examines the interplay of politics, culture, psychology and sociology to try to understand why the great philosopher Isaiah Berlin called the 20th century, "The most terrible century in Western history." Our focus will be on the Holocaust as the event that defined the concept of genocide, but we will locate this event that has come to define the 20th century within ideas such as racism, imperialism, violence, and most important, the dehumanization of individuals in the modern world.

Equivalent - Duplicate Degree Credit Not Granted: HIST 1830 and RLST 1830

Grading Basis: Letter Grade

Additional Information: Arts Sci Core Curr: Historical Context
Arts Sci Gen Ed: Distribution-Arts Humanities

JWST 1900 (3) Introduction to the Hebrew Bible/Old Testament

Examine the content of the Hebrew Bible and critical theories regarding its development. Explore the development of these texts, as well as their foundational role for rabbinic literature and the New Testament. Assess the enduring influence of the Hebrew Bible/Old Testament in world literature and culture (such as in art and music).

Equivalent - Duplicate Degree Credit Not Granted: RLST 1900

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

JWST 1910 (3) Introduction to the New Testament

Examine the background, content and influence of the New Testament books. Studies the diverse perspectives contained in the various books, as well as the process of canonization. Assess the influence of the New Testament on the development of Christianity as well as world (eastern and western) culture.

Equivalent - Duplicate Degree Credit Not Granted: RLST 1910

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

JWST 2350 (3) Introduction to Jewish Culture

Explores the development and expressions of Jewish cultures across the chronological and geographical map of the Jewish people, with an emphasis on the variety of Jewish ethnicities and their cultural productions, cultural syncretism, and changes, including such issues as sexuality and foodways. Sets the discussion in relevant contexts and looks at cultural representations that include literary, religious and visual texts.

Equivalent - Duplicate Degree Credit Not Granted: GSLL 2350

Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Diversity-U.S. Perspective
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Diversity-Global Perspective

JWST 2502 (3) Representing the Holocaust

Examines representations of the Holocaust in film, memoirs, poetry, novels, graphic novels, memorials. Considers questions such as: How to depict an event that resists representation? How does the memory of the Holocaust transform over generations? How do representations of the Holocaust inform our understanding of other experiences of racism and genocide? What ethical issues are at stake?

Equivalent - Duplicate Degree Credit Not Granted: JWST 2502

Additional Information: Arts Sci Core Curr: Ideals and Values
Arts Sci Gen Ed: Distribution-Arts Humanities

JWST 2551 (3) Modern Jewish Literature

Examines Jewish experience through the study of literary texts from around the world, mainly from the 20th and 21st centuries. Discusses issues pertaining to secularism and tradition; diasporas and homelands; modernity and questions of identity raised by the intellectual transitions brought about by political and social emancipation; sexualities; enormous changes wrought by population redistributions, world wars and rapid cultural transformations. Formerly GSLL 2551.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Hebrew

JWST 2600 (3) Judaism, Christianity, and Islam

Introduces literature, beliefs, practices, and institutions of Judaism, Christianity, and Islam, in historical perspective.

Equivalent - Duplicate Degree Credit Not Granted: RLST 2600

Additional Information: Arts Sci Core Curr: Ideals and Values
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Asia Content

JWST 3100 (3) Judaism

Explores Jewish religious experience and its expression in thought, ritual, ethics, and social institutions.

Equivalent - Duplicate Degree Credit Not Granted: RLST 3100

Additional Information: Arts Sci Core Curr: Historical Context
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Asia Content

JWST 3110 (3) Of Jewish Legends, Folktales and the Supernatural

Explores Jewish traditional legends, folktales and stories of the supernatural. Starts with Aggadic Talmud tales and Midrashic texts and focuses on later rabbinic and mystical texts and folktales ca 500-1900 C.E. from around the Jewish world with subjects ranging from didactic narratives extolling the virtues of the simple pure soul, to the horrors of a blood sucking vampiric outside world.

Equivalent - Duplicate Degree Credit Not Granted: RLST 3110

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

JWST 3120 (3) Radical Jews

Explores major Jewish figures, and their cultural productions, who were radical in the challenges they posed and transformative in the effects they had on society. The figures we examine range from the Rabbis of the Talmud who revolutionized a sacrificial cult religion, to Western secularist Baruch Spinoza and American icons such as Allen Ginsberg, Gloria Steinem and Bob Dylan.

Equivalent - Duplicate Degree Credit Not Granted: RLST 3120

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

JWST 3200 (3) Religion and Feminist Thought

Examines the origin of patriarchal culture in the theology and practices of Judaism and Christianity. Explores attitudes and beliefs concerning women as Judeo-Christian culture impacts gender roles and gender stratification through reading and discussion. Women's religious experience is studied from the perspective of feminist interpretations of religiosity.

Equivalent - Duplicate Degree Credit Not Granted: WGST 3200

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

JWST 3202 (3) Women, Gender & Sexuality in Jewish Texts & Traditions

Reads some of the ways Jewish texts and traditions look at women, gender and sexuality from biblical times to the present. Starts with an analysis of the positioning of the body, matter and gender in creation stories, moves on to the gendered aspects of tales of rescue and sacrifice, biblical tales of sexual subversion and power, taboo-breaking and ethnos building, to rabbinic attitudes towards women, sexuality and gender and contemporary renderings and rereadings of the earlier texts and traditions.

Equivalent - Duplicate Degree Credit Not Granted: HEBR 3202 and RLST 3202 and WGST 3201

Additional Information: Arts Sci Core Curr: Human Diversity

Arts Sci Gen Ed: Distribution-Arts Humanities

Arts Sci Gen Ed: Diversity-Global Perspective

JWST 3310 (3) The Bible as Literature

Surveys literary achievements of the Judeo-Christian tradition as represented by the Bible. Formerly JWST 3312.

Equivalent - Duplicate Degree Credit Not Granted: ENGL 3310 and HUMN 3310

Additional Information: Arts Sci Core Curr: Ideals and Values

Arts Sci Gen Ed: Distribution-Arts Humanities

JWST 3401 (3) The Heart of Europe: Filmmakers and Writers in 20th Century Central Europe

Surveys the major works of 20th century central and central east European film and literature. Examines cultural production in the non-imperial countries and non-national languages of the region including Yiddish, Belarusian, Czech, Hungarian, Polish and Romanian, among others. Traces the rise of nationalism over the course of the century from the age of empires through the Cold War.

Equivalent - Duplicate Degree Credit Not Granted: GSLL 3401

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

JWST 3501 (3) The German-Jewish Experience: From the Enlightenment to the Present

Provides insight into the German-Jewish identity through essays, autobiographies, fiction and journalism from the Enlightenment to the post-Holocaust period. Examines the religious and social conflicts that typify the history of Jewish existence in German-speaking lands during the modern epoch.

Equivalent - Duplicate Degree Credit Not Granted: GRMN 3501

Additional Information: Arts Sci Core Curr: Human Diversity

Arts Sci Gen Ed: Distribution-Arts Humanities

Arts Sci Gen Ed: Diversity-Global Perspective

JWST 3530 (3) Global Seminar: Jews and Muslims - The Multiethnic History of Istanbul

Spend two weeks in Istanbul and examine Jewish-Muslim relations in a place that was for 500 years the crossroads of civilization. The only Muslim city in the 21st century with a large, thriving Jewish community, Istanbul models how people from different social classes, ethnicities and religious backgrounds can coexist.

Equivalent - Duplicate Degree Credit Not Granted: IAFS 3530 and RLST 3530

Grading Basis: Letter Grade

Additional Information: Arts Sci Core Curr: Human Diversity

Arts Sci Gen Ed: Distribution-Arts Humanities

Arts Sci Gen Ed: Diversity-Global Perspective

JWST 3600 (3) Contemporary Jewish Societies

Uses transnational lens to explore contemporary debates about Jewish people, places and practices of identity and community; places that Jews have called 'home', and what has made, or continues to make those places 'Jewish'; issues of Jewish homelands and diasporas; gender, sexuality, food and the Jewish body; religious practices in contemporary contexts. Readings drawn primarily from contemporary journalism and scholarship.

Equivalent - Duplicate Degree Credit Not Granted: IAFS 3600 and GSLL 3600

Additional Information: Arts Sci Core Curr: Human Diversity

Arts Sci Gen Ed: Distribution-Social Sciences

Arts Sci Gen Ed: Distribution-Arts Humanities

Arts Sci Gen Ed: Diversity-U.S. Perspective

Arts Sci Gen Ed: Diversity-Global Perspective

JWST 3610 (3) Topics in International Affairs and Jewish Studies

Explores topics in international affairs as it relates to Jewish culture and society. Subjects addressed under this heading vary according to student interest and faculty availability.

Equivalent - Duplicate Degree Credit Not Granted: IAFS 3610

Repeatable: Repeatable for up to 9.00 total credit hours.

JWST 3650 (3) History of Arab-Israeli Conflict

Explores the origins and development of the Arab-Israeli conflict. Traces Arab-Jewish/Israeli relations from the 19th century through the Palestine Mandate, the evolution of Arab and Jewish nationalism and the creation of Israel to the present day.

Equivalent - Duplicate Degree Credit Not Granted: IAFS 3650

Additional Information: Arts Sci Core Curr: Historical Context

Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Asia Content

JWST 3820 (3) Topics in Jewish Studies

Intensive study of a selected area or problem in Jewish Studies.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

JWST 3930 (3) Internship in Jewish Studies

Learn beyond the classroom by interning in a local non-profit organization that connects with the Program in Jewish Studies through its mission and/or program. Interns will attend class to learn about work place ethics, professional development and leadership skills through a Jewish Studies lens. Interns will be supervised by the faculty member of record as well as the employer housing the intern.

Repeatable: Repeatable for up to 6.00 total credit hours.

Recommended: Prerequisites HEBR 2350 or JWST 2350 or HIST 1818 or JWST 1818 or HIST 1828 or JWST 1828.

JWST 4000 (1-3) Capstone in Jewish Studies

Serves as the final product for students completing the major in Jewish Studies. Students will design a project under the supervision of a mentor that serves as the summation of their past work in Jewish Studies. Capstone projects can take the form of a thesis, film or another media. Instructor consent required for JWST minors.

Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Jewish Studies (JWST) BA majors only. Excludes JWST minors.

JWST 4050 (3) Anthropology of Jews and Judaism

Explores topics in Jewish anthropology. Uses the lens of anthropological inquiry to explore, discover and analyze different concepts within Jewish culture. Topics explored will include customs, religious practices, languages, ethnic and regional subdivisions, occupations, social composition, and folklore. Explores fundamental questions about the definition of Jewish identity, practices and communities.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4050

Repeatable: Repeatable for up to 9.00 total credit hours.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

JWST 4101 (3) Topics in Hebrew Studies

Explores topics in Hebrew and Jewish literature and cultures. These may include topics such as diasporic literatures, Jewish artists and thinkers, courses on specific authors, figures or communities. Topics change each semester. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: HEBR 4101

Repeatable: Repeatable for up to 9.00 total credit hours.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

JWST 4122 (3) Music in Jewish Culture

Introduces students to a wide range of musical styles, traditions, genres, performers, composers, events and works that are part of Jewish culture, focusing on the twentieth and twenty-first centuries. Provides tools for understanding music on its own and in connection with issues of identity, diaspora, memory and liturgy. Includes opportunities for creative and critical engagement with Jewish music.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 4122

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

JWST 4170 (3) God and Politics

Explores the relationship between religion and politics. Examining traditions such as Judaism and Christianity, this course considers diverse ways in which ancient, medieval and modern sources have imagined the role of religion in civic life. Some topics include the status of religious minorities, the nature of religious freedom and contemporary debates surrounding issues such as torture, sexuality and climate change.

Equivalent - Duplicate Degree Credit Not Granted: RLST 4170 and RLST 5170

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

JWST 4180 (3) Is God Dead?

Explores debates about the following questions: does it make sense to believe in God? Should believing or not believing in God make a difference for how individuals behave? Examining ancient and modern views on the existence and nature of a higher power, this course considers topics including evil and suffering, religion and science and religion's role in politics.

Equivalent - Duplicate Degree Credit Not Granted: RLST 4180 and RLST 5180

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

JWST 4190 (3) Love and Desire

Explores debates about the following questions: what and whom should humans and gods love, and what role should passions play in religion? Examining traditions such as Judaism and Christianity, this course considers diverse views on topics including religion and sexuality, the promise and perils of loving gods and humans, and the relationship between love, politics, and violence.

Equivalent - Duplicate Degree Credit Not Granted: RLST 4190 and RLST 5190

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

JWST 4203 (3) Israeli Literature: Exile, Nation, Home

Examines the creation and development of Israeli literature from its pre-State beginnings to the present day, from the writings of immigrants for whom Hebrew was not their mother tongue to a literature written by native Hebrew speakers. Considers texts written by Israeli Jewish and Arab writers and explores how ideas of exile, nation, and home play into the Israeli experience.

Equivalent - Duplicate Degree Credit Not Granted: HEBR 4203

Repeatable: Repeatable for up to 6.00 total credit hours.

Recommended: Prerequisites ENGL 4677 or JWST 4677 or GRMN 2502 or JWST 2502 or JWST 2551 or WRTG 3020.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities

JWST 4260 (3) Topics in Judaism

Examines in depth central themes, schools of thought, and movements in Judaism, along with other traditions, across a range of historical periods.

Equivalent - Duplicate Degree Credit Not Granted: RLST 4260 and RLST 5260

Repeatable: Repeatable for up to 9.00 total credit hours.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

JWST 4301 (3) Venice: The Cradle of European Jewish Culture

Explores the development of European Jewish culture from the late Middle Ages to the present by focusing on Jewish life in the city of Venice, Italy. Emphasis is on the development of Venetian print culture and emergence of Italy as a center of Jewish publishing in both the religious and secular world. Examines a variety of cultural and historical material including early printings of the Talmud, the creation of Yiddish popular literature, Hebrew rabbinic literature, responses to political turmoil, and the aftermath of the Nazi genocide. Taught in English. Department enforced prerequisite: HEBR 2350 or JWST 2350 (minimum grade C-).

Equivalent - Duplicate Degree Credit Not Granted: HEBR 4301

Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities

JWST 4302 (6) Global Seminar: Justice, Human Rights and Democracy in Israel

Explore the challenges and complexities of justice, democracy and human rights in Israel and the West Bank through field trips, course work and service learning projects with Jerusalem based non-profit organizations. Acquire new knowledge and lived experience on critical issues facing Israelis and Palestinians with the wider scope of Middle East politics.

Equivalent - Duplicate Degree Credit Not Granted: IAFS 3520

Recommended: Prerequisites ANTH 4050 or JWST 4050 and IAFS 3600 or JWST 3600.

Additional Information: Arts Sci Core Curr: Contemporary Societies
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Asia Content

JWST 4338 (3) History of Modern Israel/Palestine

Explore the history culture, and politics of this crossroads of Europe and Asia from the late Ottoman period to the present. Topics include: nationalism and colonialism, development of Zionist ideology, Palestinian nationalism, the Jewish community (Yishuv) under British rule, the founding of the State of Israel, Arab-Israeli and Palestinian-Israeli relations, Israel's minorities, and the conflict of religion and state.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4338

Recommended: Prerequisite HIST 1818 or JWST 1818 or HIST 1828 or JWST 1828 or HIST 1308 or JWST 2350 or other course work in Middle Eastern or Jewish History.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

JWST 4348 (3) Topics in Jewish History

Covers topics in Jewish history from biblical beginnings to present day. Topics vary each semester. Consult the online Schedule Planner for specific topics.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4348

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of HIST 1308 or HIST 1828 or JWST 2350 (minimum grade D-).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

JWST 4378 (3) History of Modern Jewish-Muslim Relations

Examines the modern history and culture of Jewish communities under Islamic rule in the Middle East and North Africa; Jews' and Muslims' encounters with empire, westernization and nationalism; representations of Sephardi and Eastern Jews; Jewish-Muslim relations in Europe and the U.S.; and contact and conflict between Jews and Muslims in (and about) Israel/Palestine. Sources include memoirs, diaries, newspapers and films.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4378

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Asia Content

JWST 4401 (3) The Russian Jewish Experience

Examines the experience of Russian Jews from the late 19th century to the present through fiction and films dealing with challenges of co-existence of Jews and their neighbors; Bolshevik Revolution, Stalinism, Holocaust, post-Stalin period; place of Jews as individuals and a minority within Russian and Soviet society; and emigration to America and elsewhere at the turn of the century. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 4401 and RUSS 5401

Recommended: Prerequisite any 1000 or 2000-level undergraduate literature course.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities

JWST 4454 (3) Jewish Intellectual History

Takes students on a journey from Medieval Spain to contemporary United States to explore how Jews, living in different societies, have attempted to reshape and interpret central Jewish values and beliefs in accordance with the prevailing ideas of their host societies. Focuses on the historical context of each Jewish society that produced the thinkers and ideas considered in this course.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4454

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

JWST 4534 (3) Modern European Jewish History

Focus on the last 500 years of European Jewish history, from 1492 until the present, to examine Jews' place in European history and how Europe has functioned in Jewish history. Does not end with the Holocaust, since, although Hitler and the Nazis attempted to destroy European Jewish civilization, they did not succeed. Rather, this course will spend several weeks looking at European Jewish life in the past sixty year.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4534

Recommended: Prerequisite HIST 1818 or JWST 1818 or HIST 1828 or JWST 1828 or HIST 1012.

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

JWST 4544 (3) History of Yiddish Culture

Jews have produced culture in Yiddish, the vernacular language of Eastern European Jewry, for 1000 years and the language continues to shape Jewish culture today. We will look at the literature, film, theater, music, art, sound and laughter that defined the culture of Eastern European Jewry and, in the 20th century, Jews around the world.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4544 and HIST 5544

Recommended: Prerequisite HIST 1818 or JWST 1818 or JWST 1828 or GSLL 2350 or JWST 2350.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

JWST 4580 (3) The Holocaust: An Anthropological Perspective

Focuses on the Holocaust during the Third Reich, which involved the murder of millions of people, including six million Jews. Reviews the Holocaust's history, dynamics and consequences as well as other genocides of the 20th century, using an anthropological approach.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4580

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

JWST 4677 (3) Jewish-American Literature

Explores the Jewish-American experience from the 19th century to the present through writers such as Sholom Aleichem, Peretz, Babel, Singer, Malamud, Miller, Ginsberg and Ozick. The Jewish experience ranges from the travails of immigration to the loss of identity through assimilation. Formerly JWST 3677.

Equivalent - Duplicate Degree Credit Not Granted: ENGL 4677

Additional Information: Arts Sci Core Curr: Human Diversity

Arts Sci Gen Ed: Distribution-Arts Humanities

Arts Sci Gen Ed: Diversity-U.S. Perspective

JWST 4800 (3) Ethics, Medicine and the Holocaust: Legacies in Health and Society

Engages the disturbing fact that German health care professionals actively participated in the architecture and machinery of the Third Reich; explores the implications of these facts for contemporary health care ethics; expands beyond the Holocaust to consider the ramifications for our understanding of the problem of evil in general.

Equivalent - Duplicate Degree Credit Not Granted: JWST 5800

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

JWST 4827 (3) Modern U.S. Jewish History since 1880

Explores the experience of Jews in the United States from the 1880's when the great migration of Jews from Eastern Europe began, through the twentieth century. Students will explore the changing ways in which Jews adapted to life in the U.S., constructed American Jewish identities, and helped to participate in the construction of the United States as a nation.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4827

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

JWST 4900 (1-6) Independent Study in Jewish Studies

Working with a faculty member in Jewish Studies on an independent study research project provides students with an opportunity to learn outside the formal classroom structure, with individual direction from Jewish Studies faculty on a topic of mutual interest not offered in regularly scheduled classes. (Independent study may not be used to substitute for a regular course not being offered in a given term.)

Repeatable: Repeatable for up to 6.00 total credit hours.

Jewish Studies - Bachelor of Arts (BA)

The Bachelor of Arts in Jewish studies is designed to help students develop the professional skills they need to become engaged global citizens, preparing them to obtain a job after graduation, pursue graduate studies and engage in dialogues about social justice around the world. By studying the world through the lens of Jewish culture, history, literature, society and thought from a broad, interdisciplinary perspective, our students gain fundamental critical thinking, problem solving and communication skills.

Students pursuing a BA in Jewish studies may choose one of the following two concentrations:

- Culture intensive concentration, in which students will pursue an in-depth study of Jewish culture.
- Foreign language intensive concentration, in which students will obtain advanced language skills in addition to considerable knowledge of Jewish culture.

The major in Jewish studies is open to all students of all backgrounds, Jewish and non-Jewish.

Requirements

General Requirements

In addition to the general requirements of the College of Arts and Sciences, students must complete 36 credit hours of Jewish Studies requirements, of which 18 credit hours must be upper-division (3000- or 4000-level) courses.

A grade of C- or better must be received in all courses used to satisfy the major requirements, with an overall average of 2.00 in the major.

No more than 6 credit hours may be taken in independent study. No pass/fail graded courses may satisfy the 36-credit-hour minimum requirement.

For the specific major course requirements, see the Concentration Areas tab.

Graduating in Four Years

Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of "adequate progress" as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major.

Please speak with your advisor for specific recommendations; the following is intended to be a general outline only and there may be flexibility to this plan. To maintain adequate progress in Jewish Studies, students should meet the following requirements:

- Declare the major by the beginning of the second semester, freshmen year.
- Chose to pursue either the Culture Intensive Concentration or the Foreign Language Intensive Concentration.
- For students pursuing the foreign language intensive concentration, have language study approved by Jewish Studies' director of undergraduate studies by the beginning of the first semester, freshmen year. Enroll in beginning language course (or language level applicable) during the first semester of freshmen year.
- Enroll in JWST 2350/GSLL 2350 the second semester of freshmen year.
- Each semester, complete two Jewish Studies courses.
- The last spring semester in residence, complete the Capstone in Jewish Studies (JWST 4000).

Concentration Areas

Students pursuing a BA in Jewish studies may choose one of the following two concentrations: culture intensive or foreign language intensive.

Culture Intensive Concentration

Code	Title	Credit Hours
Required Courses		6
JWST/GSLL 2350	Introduction to Jewish Culture	
JWST 4000	Capstone in Jewish Studies (Senior Capstone)	
Fundamental Jewish Studies Requirements ⁵		

Select at least two of the following courses, all courses are highly recommended: **6**

JWST/HIST 1818	Introduction to Jewish History: Bible to 1492
JWST/HIST 1828	Introduction to Jewish History: Since 1492
JWST/GSLL 2551	Modern Jewish Literature
JWST/RLST 3100	Judaism
JWST/IAFS 3600	Contemporary Jewish Societies

Literature, Culture, and the Arts¹

Select at least two of the following courses 6

JWST/GSLL 2551	Modern Jewish Literature
JWST 3110	Of Jewish Legends, Folktales and the Supernatural
JWST 3120	Radical Jews
JWST/ENGL 3310	The Bible as Literature
JWST/GSLL 3401	The Heart of Europe: Filmmakers and Writers in 20th Century Central Europe
JWST/GRMN 3501	The German-Jewish Experience: From the Enlightenment to the Present
JWST 4101	Topics in Hebrew Studies
JWST/MUSC 4122	Music in Jewish Culture
JWST 4203	Israeli Literature: Exile, Nation, Home
JWST/RUSS 4401	The Russian Jewish Experience
JWST/HIST 4544	History of Yiddish Culture
JWST/ENGL 4677	Jewish-American Literature
JWST 4900	Independent Study in Jewish Studies (On topic relevant to Literature, Culture, and the Arts)
HUMN/GRMN 2601	Kafka and the Kafkaesque ⁴

History, Politics, and Religion

Select at least two of the following courses 6

FYSM 1000	First Year Seminar (God) ⁴
JWST 1234	Mysticism and the Jewish American Literary Tradition
JWST/HIST 1818	Introduction to Jewish History: Bible to 1492
JWST/HIST 1828	Introduction to Jewish History: Since 1492
JWST/HIST/ RLST 1830	Global History of Holocaust and Genocide
JWST/RLST 1900	Introduction to the Hebrew Bible/Old Testament
JWST/RLST 1910	Introduction to the New Testament
JWST/GRMN 2502	Representing the Holocaust
JWST/RLST 2600	Judaism, Christianity, and Islam

JWST/RLST 3100	Judaism
JWST/WGST 3200	Religion and Feminist Thought
JWST/ RLST 3202/ WGST 3201	Women, Gender & Sexuality in Jewish Texts & Traditions
JWST/IAFS/ RLST 3530	Global Seminar: Jews and Muslims - The Multiethnic History of Istanbul
JWST/IAFS/ GSLL 3600	Contemporary Jewish Societies
JWST/IAFS 3610	Topics in International Affairs and Jewish Studies
JWST/IAFS 3650	History of Arab-Israeli Conflict
JWST 3930	Internship in Jewish Studies
JWST/ANTH 4050	Anthropology of Jews and Judaism
JWST/RLST 4170	God and Politics
JWST/RLST 4180	Is God Dead?
JWST 4190	Love and Desire
JWST/RLST 4260	Topics in Judaism
JWST 4301	Venice: The Cradle of European Jewish Culture
JWST 4302/ IAFS 3520	Global Seminar: Justice, Human Rights and Democracy in Israel
JWST/HIST 4338	History of Modern Israel/Palestine
JWST/HIST 4348	Topics in Jewish History
JWST/HIST 4378	History of Modern Jewish-Muslim Relations
JWST/HIST 4454	Jewish Intellectual History
JWST/HIST 4534	Modern European Jewish History
JWST/ANTH 4580	The Holocaust: An Anthropological Perspective
JWST 4800	Ethics, Medicine and the Holocaust: Legacies in Health and Society
JWST/HIST 4827	Modern U.S. Jewish History since 1880
JWST 4900	Independent Study in Jewish Studies (On topic relevant to History, Religion, and Politics)
WRTG 3020	Topics in Writing (After the Holocaust) ⁴

Electives (12 credit hours from the courses listed above not used to fulfill a requirement listed above)³ 12*Auxiliary Courses (Optional) (maximum of 6 credit hours)*

Auxiliary courses are courses from outside the Program in Jewish Studies which may count toward a Jewish Studies major. For all auxiliary courses, all final projects must be approved for the Jewish Studies major by the Director of Undergraduate Studies for the Program in Jewish Studies. A current list of auxiliary courses eligible to be counted towards the Jewish Studies major can be found on the Program in Jewish Studies website.

Total Credit Hours 36

Foreign Language Intensive Concentration

Code	Title	Credit Hours
------	-------	--------------

Required Courses 6

JWST/GSLL 2350	Introduction to Jewish Culture

Auxiliary Courses (Optional) (maximum of 6 credit hours)

Auxiliary courses are courses from outside the Program in Jewish Studies which may count toward a Jewish Studies major. For all auxiliary courses, all final projects must be approved for the Jewish Studies major by the Director of Undergraduate Studies for the Program in Jewish Studies. A current list of auxiliary courses eligible to be counted towards the Jewish Studies major can be found on the Program in Jewish Studies website.

Total Credit Hours 36

- ¹ NOTE: For students pursuing the Culture Intensive Concentration, language courses may count as electives, but they do not count for Literature, Culture, and the Arts.
- ² NOTE: For student pursuing the Language Intensive Concentration, the first three semesters of modern Hebrew (or any equivalent language being used in the required capstone course JWST 4000) do not count as credit hours toward the major.
- ³ NOTE: Electives can come from JWST, HEBR, or a range of other departments.
- ⁴ NOTE: Not subject to the 6 credit hours limit on Auxiliary courses from outside Jewish Studies.
- ⁵ Additional Fundamental Jewish Studies Requirement courses can be taken to fulfill another major requirement where allowed.

Recommended Four-Year Plan of Study

Culture Intensive Concentration

Through the required course work for this track of the major, students will complete all 12 credits of the Arts & Humanities area of the Gen Ed Distribution Requirement as well as one component of the Gen Ed Diversity Requirement and may complete some of the Social Sciences area of the Gen Ed Distribution Requirement.

Course	Title	Credit Hours

Hebrew and Israel Studies - Minor

A minor is offered in Hebrew and Israel studies. Declaration of a minor is open to any student enrolled at CU Boulder, regardless of college or school.

The minor in Hebrew and Israel studies focuses on developing a student's Hebrew language skills while exploring a variety of courses on issues related to Israel and the Middle East. This minor is ideal for students who are interested in pursuing an international career or study in the Middle East.

The minor in Hebrew & Israel studies is open to all students of all backgrounds, Jewish and non-Jewish.

For more information, visit the Minor in Hebrew and Israel Studies (<http://www.colorado.edu/jewishstudies/academics/majors-minors-jewish-studies/minor-hebrew-israel-studies>) website.

Requirements

Students must complete 19 credit hours of Hebrew language courses and content courses focusing on Israeli and/or the Middle East. Of these 19 credit hours, 9 must be in upper-division courses. All course work applied to the minor must be completed with a grade of C- or better. No pass/fail

work may be applied. The GPA for all minor course work must equal 2.00 or higher.

Required Courses and Credits

Code	Title	Credit Hours
Language Requirement		
Modern Hebrew Language (10 credit hours minimum above the 2010 Intermediate Hebrew level):		
HEBR 2120	Intermediate Modern Hebrew, Second Semester	10
HEBR 3010	Third Year Modern Hebrew, First Semester	
HEBR 3020	Third Year Modern Hebrew, Second Semester	
Required Course:		3
JWST/GSLL 2350	Introduction to Jewish Culture	
Additional Requirements:		
Select two of the following Hebrew/Israel Studies courses (one of which must be upper-division): ¹		
HEBR 1030	Beginning Biblical Hebrew, First Semester	6
HEBR 1040	Beginning Biblical Hebrew, Second Semester	
JWST/IAFS 3650	History of Arab-Israeli Conflict	
JWST/ANTH 4050	Anthropology of Jews and Judaism (Cultures of Israel and Palestine)	
JWST/HEBR 4101	Topics in Hebrew Studies	
JWST 4203	Israeli Literature: Exile, Nation, Home	
JWST 4302/IAFS 3520	Global Seminar: Justice, Human Rights and Democracy in Israel	
JWST/HIST 4338	History of Modern Israel/Palestine	
JWST/HIST 4348	Topics in Jewish History (Tel Aviv: Urban History and Culture)	
Total Credit Hours		19

¹ Or a course approved by the faculty advisor.

Jewish Studies - Minor

The minor in Jewish studies is designed to help students develop a unique interdisciplinary perspective, building their critical thinking skills by exploring the world through the lens of Jewish studies. As the Program in Jewish Studies is inherently interdisciplinary, many students are easily able to fulfill Jewish studies minor requirements while simultaneously completing requirements for their major.

The minor in Jewish studies is open to all students of all backgrounds, Jewish and non-Jewish.

Requirements

Declaration of a minor is open to any student enrolled at CU Boulder, regardless of college or school. Students must complete 18 credit hours in Jewish studies courses, of which 12 credit hours must be upper division (3000/4000). A grade of C- or better must be received in all courses used to satisfy the minor requirements. For more information, visit the program's Minor in Jewish Studies (<http://www.colorado.edu/>

[jewishstudies/undergraduates/major-minors-jewish-studies/minor-jewish-studies](http://www.colorado.edu/jewishstudies/undergraduates/major-minors-jewish-studies/minor-jewish-studies)) webpage.

Total Credit Hours	18

Lesbian, Gay, Bisexual, Transgender and Queer Studies

The lesbian, gay, bisexual, transgender and queer studies certificate program is designed to help students develop a social, historical and cross-cultural understanding of gender and sexuality. By exploring the historical and contemporary experiences of lesbians, gay men, bisexuals and transgender people, the courses in the program encourage students to think critically about the function of sexuality and gender in the world around them. In doing so, students will be able to analyze the relationships between queer and normative sexualities and gender identities.

By developing an understanding of diverse sexual and gender identities, certificate program students apply the meaning and function of sexuality to a broad range of historical and contemporary institutions and societies.

Open to any student in the university, this interdisciplinary program consists of two required courses and a number of relevant courses offered by different departments.

For more information, visit the Undergraduate Certificate in LGBTQ Studies (<https://www.colorado.edu/lgbtq/certificate>) webpage.

Course code for this program is LGBT.

Certificate

- LGBTQ Studies - Certificate (p. 463)

Courses

LGBT 2000 (3) Introduction to Lesbian, Gay, Bisexual, and Transgender Studies

Investigates the social and historical meanings of racial, gender, and sexual identities and their relationship to contemporary lesbian, bisexual, gay, and transgender communities.

Equivalent - Duplicate Degree Credit Not Granted: WGST 2030

Additional Information: GT Pathways: GT-SS3 -Soc Behav Sci:Hmn Behav, Cult, Soc Frame

Arts Sci Core Curr: Human Diversity

Arts Sci Gen Ed: Distribution-Social Sciences

Arts Sci Gen Ed: Diversity-U.S. Perspective

Arts Sci Gen Ed: Distribution-Arts Humanities

LGBT 2707 (3) Introduction to Lesbian, Bisexual, and Gay Literature

Offers students at sophomore and junior levels an introduction to some of the forms, concerns, and genres of contemporary lesbian, bisexual, transgender and gay writing in English.

Equivalent - Duplicate Degree Credit Not Granted: ENGL 2707

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

LGBT 3710 (3) Topics in LGBT Studies

Content varies by semester and reflects contemporary issues in the field of LGBT Studies.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

LGBT 3796 (3) Queer Theory

Surveys theoretical, critical, and historical writings in the context of lesbian, bisexual, transgender and gay literature. Examines relationships among aesthetic, cultural and political agendas, and literary and visual texts of the 20th century.

Equivalent - Duplicate Degree Credit Not Granted: ENGL 3796

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

LGBT 3930 (3) Lesbian, Gay, Bisexual, Transgender, and Queer Studies Internship

Matches selected students with supervised internships in university programs and advocacy groups, local businesses, human service or government agencies. Internships will focus on lesbian, gay, bisexual, transgender or queer issues, such as anti-violence programs, educational outreach, and civil rights initiatives.

Repeatable: Repeatable for up to 6.00 total credit hours.

Recommended: Prerequisite LGBT 2000.

LGBT 4287 (3) Special Topics in LGBT Literature

Examines a special topic in LGBT literature, foregrounding an approach that focuses on how same-sex desire is represented in literature.

May explore the rhetorical and ideological depiction of masculinity and femininity; literary representations of inversion, bisexuality, and transgenderism; the social construction of homosexuality and heterosexuality. Specific topics vary each semester.

Equivalent - Duplicate Degree Credit Not Granted: ENGL 4287 and WGST 4287

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

LGBT 4400 (3) Critical Inquiries in Transgender Studies

Examines theories, methods and debates in the emerging field of transgender studies. Drawing on interdisciplinary perspectives, this course examines transgender identities, communities and political movements in different historical and cultural contexts. Focuses on crosscutting issues that shape transgender subjectivities, with special attention given to how transgender movements negotiate race, class, sexuality, labor, culture and nation.

Equivalent - Duplicate Degree Credit Not Granted: LGBT 5400 and WGST 4400 and WGST 5400

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Arts Sci Gen Ed: Distribution-Arts Humanities

LGBT 4840 (1-6) Independent Study in LGBTQ Studies

Self-directed research project in LGBTQ studies supervised by a faculty member and approved by one of the Co-Directors of the LGBTQ Studies Certificate Program.

Repeatable: Repeatable for up to 6.00 total credit hours.

LGBTQ Studies - Certificate

Lesbian, gay, bisexual, transgender and queer (LGBTQ) studies at CU Boulder is an interdisciplinary undergraduate program encompassing more than 20 courses in a dozen departments.

LGBTQ studies involves the academic investigation of sexuality in established fields such as literature, history, theatre, law, medicine, economics, sociology, anthropology and political science. With its interdisciplinary approach, LGBTQ studies interweaves complex theories and analysis into the study of sexuality.

Through the certificate program and the guidance of faculty advisors, students are given an opportunity to integrate a wide variety of courses offered in the humanities, social sciences and natural sciences, to extend and deepen their knowledge and understanding of societies and cultures and to relate that understanding to lived experience.

For more details including application instructions, visit the LGBTQ Studies Certificate (<http://www.colorado.edu/lgbtq/certificate>) webpage or email lgbt@colorado.edu.

Requirements

Completion of the certificate in LGBTQ studies requires the completion of 18 credit hours (9 upper-division) of approved courses with grades of C- or better.

Required Courses and Credit Hours

Code	Title	Credit Hours
Required Courses		
LGBT 2000	Introduction to Lesbian, Gay, Bisexual, and Transgender Studies	3
LGBT 3796	Queer Theory	3
Electives		
Twelve credit hours of approved elective courses, with at least 6 credit hours of upper-division electives ¹		12
Total Credit Hours		18

¹ Up to six credit hours of independent study may be applied toward the certificate program.

Credits earned at other institutions may be transferred in partial fulfillment of the requirements upon approval of the program director. No more than 6 credit hours of transferred course work may be applied to the certificate.

Students are encouraged to meet with the program directors early in their course of study and again in the semester prior to the semester of graduation, to ensure that program requirements are met.

Available elective courses are listed each semester under the "Courses" tab of the program (<http://www.colorado.edu/lgbtq>) website.

Linguistics

Linguistics is the study of all aspects of human language: how languages make it possible to transmit ideas and feelings; how and why languages are similar and different; how we develop different styles and dialects; what will be required for computers to understand and produce spoken language; and how languages are used in everyday communication as well as in formal settings. Linguists try to figure out what it is that speakers know and do by observing the structure of languages, the way children learn language, slips of the tongue, conversations, storytelling, the acoustics of sound waves and the way people's brains react when they hear speech or read. Linguists also reconstruct prehistoric languages, and try to deduce the principles behind their evolution into the thousands of languages of the world today.

The major in linguistics is useful for careers involving cognitive science, computer science, psychology, international business, language teaching, advertising, publishing, law, documentation and social media. Double majors and minors are encouraged with language, computer science, psychology, communication, sociology, anthropology, international affairs, philosophy and education.

The core of the major is a set of courses, taught in the Department of Linguistics, on the nature of language. In addition, the major requires language courses offered by other departments (except for fluent speakers of languages other than English).

The undergraduate degree in linguistics emphasizes knowledge and awareness of:

- the fundamental architecture of language in the domains of phonetics and phonology, morphology and syntax and semantics and pragmatics;
- the diversity of languages structures;

- the main interactions between language, culture and society, including the role of language as a cultural institution and the social functions of language diversity; and
- the approaches to the study of language that are used by a discipline other than linguistics.

In addition, students completing the degree in linguistics are expected to acquire the ability and skills to:

- demonstrate proficiency in a second language equivalent to the third-year university level;
- infer language structures from the analysis of data from unfamiliar languages; and
- give coherent general interpretations of common language phenomena in terms of language structure and language use.

Course codes for this program are LING and ESLG.

Study Abroad

Language study and some courses in the major may be completed in university or university-affiliated study abroad programs, and such study is recommended. Students interested in doing part of their major work in a study abroad program should discuss the matter with their advisor before going abroad. For information on study abroad programs, consult the Education Abroad office.

Graduation with Honors

The honors program in linguistics offers the opportunity for highly motivated undergraduates to undertake a deeper and more individualized study of linguistics than is provided by the regular BA curriculum. Linguistics majors with an overall grade point average of 3.30 or higher are eligible to participate in the program. Honors that may be earned are cum laude (with honors), magna cum laude (with high honors), and summa cum laude (with highest honors).

Students interested in pursuing departmental honors are encouraged to consult with the departmental honors advisor by the beginning of their junior year to ensure that they will be able to meet the requirements for departmental honors before graduation.

Bachelor's Degree

Courses

English as a Second Language

ESLG 1130 (2) Pronunciation for International Graduate Students

Designed for international graduate students who want to polish and refine their spoken English skills. The course emphasizes producing increasingly accurate English stress, rhythm and intonation, and vowels and consonants. Students participate in listening and speaking activities targeting specific pronunciation features, prepare recordings, and deliver short presentations related to their field. Students receive weekly individualized feedback.

Requisites: Restricted to International Graduate students.

ESLG 1140 (2) Public Speaking for International Students

Designed for international graduate students to improve oral communication skills for effective academic, professional, and social interactions. Specific attention is given to presenting, explaining and clarifying ideas, negotiating, interrupting, hedging, and responding to questions. Students deliver short formal presentations and impromptu speeches, and lead and participate in group discussions. Students improve active listening skills, non-verbal communication and English pronunciation.

Requisites: Restricted to International Graduate students.

ESLG 1210 (2) Academic Writing for International Graduate Students

Designed for international graduate students who would benefit from academic and professional writing instruction and practice. This course addresses development of paragraphs and full-length papers, reports and proposals. Focus areas include organization and style, grammar and vocabulary, and using source material effectively. Assignments are customized to students' disciplines with extensive instructor feedback to improve fluency, clarity, and accuracy in writing.

Requisites: Restricted to International Graduate students.

ESLG 1222 (2) Advanced Written Composition for Foreign Students

Continued practice in academic writing, including incorporating the ideas of others and citing sources appropriately. Extensive instructor feedback provided. Preparation, writing, and revising of a full-length academic term/research paper or work on chapters for a master's thesis or doctoral dissertation. Does not fulfill humanities or major requirements.

Recommended: Prerequisite ESLG 1210.

ESLG 1410 (3) Integrated Academic English Skills for Undergraduate International Students

Designed for international undergraduate students who want to improve oral and written English communication skills. Students build confidence and accuracy through interactive reading, writing, listening and speaking activities. Students gain insight on U.S. academic culture and conventions by giving short presentations, collaborating on team projects, and writing academic papers using source materials. Course also emphasizes organization, grammar, and vocabulary.

Requisites: Restricted to International Undergraduate students.

Linguistics**LING 1000 (3) Language in U.S. Society**

Nontechnical exploration of the ways that language is used in America. Emphasizes language as a social institution and how values and goals of both public institutions and private groups shape and are shaped by language and its use.

Additional Information: Arts Sci Core Curr: Contemporary Societies

Arts Sci Core Curr: United States Context

Arts Sci Gen Ed: Distribution-Social Sciences

Arts Sci Gen Ed: Diversity-U.S. Perspective

MAPS Course: Social Science

LING 1010 (3) The Study of Words

Study of English words of Latin and Greek origin, focusing on etymological meaning by analysis of component parts (prefixes, bases, suffixes) and on the ways in which words have changed and developed semantically.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 1010

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

Arts Sci Gen Ed: Distribution-Arts Humanities

LING 1020 (3) Languages of the World

Explores the issue of human diversity by examining how languages vary around the world. Outlines historical, geographic, and typological classifications of languages across human societies, and the criteria used by linguists for grouping them into language families. Theorizes the relationship between linguistic and cognitive diversity, and considers the impact of language death on humanity. No formal training in linguistics is required.

Additional Information: Arts Sci Core Curr: Human Diversity

Arts Sci Gen Ed: Distribution-Social Sciences

Arts Sci Gen Ed: Diversity-Global Perspective

LING 1500 (3) Understanding Grammar

Presents fundamentals of grammar in the Western tradition. Emphasizes making concepts and uses of grammar (as exemplified in English and closely related foreign languages) understandable to the nonspecialist.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

LING 1900 (1) Service Learning Practicum: Adult Literacy

Practicum for selected students in LING 1000. Provides practical experience of the impact of illiteracy on individuals, families, and the community at large. Coregistration in service learning recitation is required.

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Requires a prerequisite or corequisite course of LING 1000 (prereq minimum grade C-).

Grading Basis: Pass/Fail

LING 2000 (3) Introduction to Linguistics

Introduces the study of languages as structural systems. Principles of sound patterns, word formation, meaning, and sentence structure. Gives attention to language acquisition, psycholinguistics, language families, dialects, historical change in languages, and different language types.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

MAPS Course: Social Science

LING 2400 (3) Language, Gender and Sexuality

Familiarizes students with the effects of gender and sexuality on language use; discusses popular beliefs and scholarly theories about language and communication. Provides students with tools for exploring the role of language and gender.

Additional Information: GT Pathways: GT-SS3 -Soc Behav Sci:Hmn Behav, Cult, Soc Frame

Arts Sci Core Curr: Human Diversity

Arts Sci Gen Ed: Distribution-Social Sciences

Arts Sci Gen Ed: Diversity-U.S. Perspective

LING 3005 (3) Cognitive Science

Introduces cognitive science, drawing from psychology, philosophy, artificial intelligence, neuroscience, and linguistics. Studies the linguistic relativity hypothesis, consciousness, categorization, linguistic rules, the mind-body problem, nature versus nurture, conceptual structure and metaphor, logic/problem solving and judgment. Emphasizes the nature, implications, and limitations of the computational model of mind.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 3702 and PHIL 3310 and PSYC 3005 and SLHS 3003

Recommended: Prerequisites two of the following CSCI 1300 or LING 2000 or PHIL 2440 or PSYC 2145.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

Arts Sci Gen Ed: Distribution-Social Sciences

Arts Sci Gen Ed: Distribution-Arts Humanities

LING 3100 (3) Language Sound Structures

Introduces the sounds of languages and their organization into phonological structures.

Requisites: Requires prerequisite of LING 2000 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

LING 3220 (3) American Indian Languages in their Social and Cultural Context

A sampling of the many indigenous languages and cultures found in America. Emphasizes the United States, but also gives attention to the languages of Canada and Latin America.

Recommended: students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Core Curr: Human Diversity

Arts Sci Gen Ed: Diversity-U.S. Perspective

Arts Sci Gen Ed: Distribution-Social Sciences

LING 3430 (3) Semantics

Theoretical and practical study of meaning in natural language. Considers both semantic theories and semantic phenomena from diverse languages. Does not treat techniques for improving the use of language.

Requisites: Requires prerequisite LING 2000 (minimum grade C-).

Restricted to students with 57-180 credits (Junior or Senior) Linguistic major or minors only.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

LING 3545 (3) World Language Policies

Examines the economic and sociopolitical impact of choosing English vs. other languages in the U.S. Introduces the study of language policies, rights, and planning in other countries, including the worldwide use of English in social, business, and legal contexts.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

Arts Sci Gen Ed: Diversity-Global Perspective

LING 3630 (3) Principles and Practices in Teaching English to Speakers of Other Languages

Provides a practical overview of principles and practices in TESOL in its global context. Introduces methods and materials (texts, media, tools) and standards for teaching, learning and assessment. Includes lesson observation, planning and micro-teaching focused especially on listening, speaking and pronunciation. Assumes some background and/or interest in linguistics and language and applications to teaching English to adults/young adults.

Requisites: Requires a prerequisite or corequisite course of LING 2000 (minimum grade C).

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

LING 3800 (1-4) Special Topics in Linguistics

Intensive study of a selected area or problem in linguistics.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

LING 4050 (3) Japanese Sociolinguistics: Japanese Language and Society

Issues of Japanese sociolinguistics in areas such as speech varieties, language behaviors and attitudes, linguistic contact and change and language policy. Incorporating critical perspectives of sociolinguistics into analyses of Japanese literature and Japanese language education.

Equivalent - Duplicate Degree Credit Not Granted: JPNS 4050 and JPNS 5050

Requisites: Requires prerequisite course of JPNS 3110 (minimum grade C).

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

LING 4100 (3) Perspectives on Language

Provides extended critical examination of a few selected issues, chosen each term for their general interest and relevance, e.g., the relation between language and thought, or human language vs. animal languages, and computer languages.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite LING 2000.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

LING 4220 (3) Language and Mind

Studies topics such as speech perception, word recognition, sentence comprehension, language acquisition, bilingualism, reading and writing. Examines the role of language as a product and producer of the mind, studying interactions between language and cognition from an interdisciplinary perspective. Students will become familiar with the methods of psycholinguistics and design and conduct a psycholinguistic experiment on their own.

Equivalent - Duplicate Degree Credit Not Granted: PSYC 4220

Recommended: Prerequisites PSYC 1001 and LING 2000.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

LING 4225 (4) Interdisciplinary Research Methods in Child Language Acquisition

Explores fundamental issues in language acquisition cross-culturally, combining methods from Linguistics, Anthropology, Psychology and Computer Science. Students will explore theoretical issue using a hands-on approach that involves acquiring skills such as designing and conducting experiments, investigating corpus data, and computational modeling.

Equivalent - Duplicate Degree Credit Not Granted: PSYC 4225

Recommended: Prerequisites PSYC 1001 and LING 2000.

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

LING 4420 (3) Morphology and Syntax

Introduces principles of word formation and sentence structure. Covers major morphological and syntactic structures found in the world's languages, and methods for describing grammatical structures, and includes practice in analyzing data from a variety of languages.

Equivalent - Duplicate Degree Credit Not Granted: LING 5420

Requisites: Requires prerequisite of LING 2000 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

LING 4450 (3) Introduction to Formal Syntax

Introduces formal generative grammar, including determining constituent structure, drawing trees, writing rules, understanding the properties of the lexicon and their interaction with syntax, X-bar theory and its modifications and movement analysis. Recommend pre-req: LING 4420

Requisites: Requires prerequisite of LING 2000 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

LING 4560 (3) Language Development

Emphasizes acquisition of language by young children; development in later years and into adulthood is also treated. Particular attention given to roles of environment and of neurophysiological endowment in learning to communicate with words, sentences, and narratives.

Equivalent - Duplicate Degree Credit Not Granted: SLHS 4560 and PSYC 4560

Requisites: Restricted to Linguistics (LING) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

LING 4610 (3) English Structure for Teachers of English to Speakers of Other Languages

Description of morphological and syntactic categories and structures of English.

Equivalent - Duplicate Degree Credit Not Granted: LING 5610

Recommended: Prerequisite LING 2000.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

LING 4800 (3) Language and Culture

Principles of language structure and how language and culture interrelate, how language and language use are affected by culture and how culture may be affected by use of, or contact with, particular languages.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4800

Recommended: Prerequisite LING 1000 or LING 2400 or ANTH 2100.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

LING 4830 (3) Honors Thesis

Required for students who elect departmental honors. Students write an honors thesis based on independent research under the direction of a faculty member.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Arts Sciences Honors Course

LING 4900 (1-3) Independent Study

Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

LING 4910 (3) TESOL (Tching English to Spkr of Other Languages) Practicum

Provides the field-based component and practical experience in English language teaching for the TESOL Certificate. Work on site includes class observations and supervised teaching in community-based programs/ESL providers. Weekly meetings provide opportunities to debrief/discuss teaching practice and connect theory, methods and practice. Supports professional development, completion of a teaching resume and portfolio and the job search process.

Equivalent - Duplicate Degree Credit Not Granted: LING 5910

Requisites: Requires prerequisite courses of LING 2000 and LING 3630 (minimum grade C).

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

Linguistics - Bachelor of Arts (BA)

The CU Department of Linguistics has a strong commitment to excellence in teaching at both the graduate and undergraduate levels. The linguistics faculty offers a wide range of research strengths—including syntactic theory, socio-cultural linguistics, computational and psycholinguistics, phonetics/phonology and language documentation—ensuring that students can gain both versatility and expertise in an array of subfields.

Our educational mission is to provide students with insight into the fundamental design features of language—its sound patterns, its word- and sentence formation devices, its semantic structure—and to create awareness of language varieties: the diversity of human languages, the role of language as an index of social identity and the ontogenetic and historical development of language.

Concurrent Degree Program BA/MA in Linguistics

The department has a five-year concurrent bachelor's and master's degree program, which is recommended only for the most serious and able graduate students. For further information, see the graduate advisor in the spring of the sophomore year or during the first week of the fall semester of the junior year.

Requirements

Program Requirements

Majors in linguistics must complete a total of 32 credit hours of study in general linguistics, including 5 in a natural language (for exceptions, see below). Language study is taken in other departments.

Students must complete the general requirements of the College of Arts and Sciences and the required courses listed below.

Required Courses and Credits

Code	Title	Credit Hours
General Linguistics Courses		
LING 2000	Introduction to Linguistics ¹	3
LING 3100	Language Sound Structures ¹	3
LING 3430	Semantics ¹	3
LING 4420	Morphology and Syntax ¹	3
Natural Language		
Complete a minimum of 5 credit hours of study of a natural language other than English (see details below) with a grade of C- (2.00) or better.		5
Electives		
Select a minimum of 15 elective credit hours from the following with a grade of C- (2.00) or better:		
ENGL 4003	Introduction to Old English	
FREN 3020	French Phonetics Through Musical Performance	
FREN 3010	French Phonetics and Pronunciation	
JPNS 4030	Japanese Syntax	
JPNS 4080	Kanji in Japanese Orthography	
JPNS 4070	Second Language Acquisition of Japanese	
SPAN 3050	Spanish Phonology and Phonetics	
SPAN 3150	Linguistic Analysis of Spanish	
SPAN 4430	Special Topics in Hispanic Linguistics	
SPAN 4450	Introduction to Hispanic Linguistics	
LING 1000	Language in U.S. Society	
LING 1010	The Study of Words	
LING 1020	Languages of the World	
LING 2400	Language, Gender and Sexuality	
LING 3005	Cognitive Science	
LING 3220	American Indian Languages in their Social and Cultural Context	
LING 3545	World Language Policies	
LING 3630	Principles and Practices in Teaching English to Speakers of Other Languages	
LING 3800	Special Topics in Linguistics	
LING 4100	Perspectives on Language	
LING 4220	Language and Mind	

LING 4225	Interdisciplinary Research Methods in Child Language Acquisition
LING 4450	Introduction to Formal Syntax
LING 4560	Language Development
LING 4610	English Structure for Teachers of English to Speakers of Other Languages
LING 4800	Language and Culture
Other upper-division linguistics courses may also be chosen if available; graduate courses may be taken with permission of the department.	
Total Credit Hours	32

¹ Complete with a grade of C- or better.

Natural Language

Students must complete with a grade of C- (2.00) or better a minimum of 5 credit hours of study of a natural language other than English (including signed languages used by deaf communities). The 5 credit hours offered in satisfaction of this requirement must be at the 3000 level or above for widely-taught languages (French, German, Latin, Spanish), or at the 2000 level or above for less-widely-taught languages (Arabic, American Sign Language, Chinese, Farsi, Greek, Hebrew, Hindi, Indonesian, Italian, Japanese, Korean, Norwegian, Portuguese, Russian, Swedish).

Only courses taught in the language in question, and focused specifically on language learning, may be used for this requirement. A list of all the approved courses is available from the Department of Linguistics or the departmental undergraduate advisor.

The natural language requirement may be satisfied by examination or waived for foreign students whose native language is not English; in these cases, students must still meet the college minimum major requirement of 18 credit hours of upper-division course work and 30 credit hours overall in the major. Students who wish to have their language requirement waived must obtain the consent of an undergraduate advisor before registering for the fall term of the junior year.

Additional Information

The department recommends that prospective majors complete LING 2000 and at least two 1000-level foreign language courses (in the same language) by the end of the sophomore year, unless the student's foreign language proficiency is already advanced.

The fall semester of the junior year should include LING 3430, a 2000-level foreign language course, and a linguistics elective or LING 4420. It must also include LING 2000 if that was not taken earlier. The spring semester of the junior year should include LING 3100, a linguistics elective and a further 2000-level foreign language course (if needed to prepare the student for the required upper-division foreign language credit hours).

Graduating in Four Years

Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of "adequate progress" as it is used here refers only to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress in linguistics, students should meet the following requirements:

- By the beginning of the spring semester of the freshman year (second semester), declare linguistics as a major.

- During the freshman or sophomore years (first through fourth semesters), take LING 2000 (required) and LING 1000 or LING 2400 (electives)
- By the end of the sophomore year (fourth semester) at the latest, complete two semesters of study of a natural (spoken or signed) language other than English.*
- During the junior year (fifth and sixth semesters) at the latest, continue natural language study at the 2000 level.
- During the fall of the junior year (fifth semester), take one or both of LING 3430 or LING 4420.
- During the junior or senior year (fifth through eighth semesters), take the remaining courses as needed.
- During the spring of the junior year (sixth semester), take LING 3100 and an upper-division linguistics elective.
- During the senior year (seventh and eighth semesters) at the latest, take 5 credit hours of natural language study at the 3000 level.*

*The language requirement is waived for native speakers of a language other than English, but if it is waived, 6 additional upper-division credit hours in linguistics must be taken.

NOTE: A linguistics major who has been excluded from any upper-division linguistics course due to enrollment limitations will be given first preference for a seat in that course the following year if the exclusion is made known to the department staff within two weeks after it occurs. No declared linguistics major who still needs LING 2000 for fall of the junior year and attempts to register for it during the regular registration period for continuing students (spring of the sophomore year) will be excluded from the course.

Recommended Four-Year Plan of Study

Through the required course work for the major, students will complete all 12 credits of the Social Sciences area of the Gen. Ed. Distribution Requirement. Depending on the courses selected as a major electives, students can potentially complete some credits in the Arts and Humanities area of the Distribution and both the U.S. Perspective and the Global Perspective components of the Gen Ed Diversity Requirement.

Course	Title	Credit Hours
Year One		
Fall Semester		
LING 2000	Introduction to Linguistics	3
Beginning Level Foreign Language 1 (If needed, does not count toward language requirement)		3-5

Upper-Division Elective	3	
Upper-Division Elective	3	

Upper-Division Elective	3	
	Credit Hours	15
	Total Credit Hours	121-129

Linguistics - Minor

One good reason to take the linguistics minor is that by learning to analyze language and evaluate claims about language, students can improve the quality of their writing and argumentation in their major discipline.

Students can profitably combine the linguistics minor with a major in one of the modern languages, classics, psychology or speech, hearing and language science, to name just a few possibilities.

Requirements

Declaration of a minor in linguistics is open to any student enrolled at CU Boulder, regardless of college or school.

Students minoring in linguistics must complete a total of 18 credit hours in linguistics, 9 of which must be at the upper-division level. Students must maintain an overall and linguistics GPA of at least 2.00 (C), and complete all LING courses with a C- or better.

Required Courses and Credits

Code	Title	Credit Hours
Required Courses		
LING 2000	Introduction to Linguistics	3
Electives		
Select two of the following:		6
LING 3100	Language Sound Structures	
LING 3430	Semantics	
LING 4420	Morphology and Syntax	
Take the remaining one of the three courses listed above and/or select from the following electives to bring the total credit hours to 18: ¹		9
LING 1000	Language in U.S. Society	
LING 1010	The Study of Words	
LING 1020	Languages of the World	
LING 2400	Language, Gender and Sexuality	
LING 3005	Cognitive Science	
LING 3220	American Indian Languages in their Social and Cultural Context	
LING 3545	World Language Policies	
LING 3800	Special Topics in Linguistics	
LING 4100	Perspectives on Language	
LING 4220	Language and Mind	
LING 4225	Interdisciplinary Research Methods in Child Language Acquisition	
LING 4450	Introduction to Formal Syntax	
LING 4560	Language Development	
LING 4610	English Structure for Teachers of English to Speakers of Other Languages	

LING 4800	Language and Culture
<hr/>	
Total Credit Hours	18

¹ At least 3 credit hours of the electives must be in an upper-division course.

Teaching English to Speakers of Other Languages - Certificate

The undergraduate TESOL certificate provides CU Boulder students with foundational knowledge and skills for English teaching while also incorporating the broader perspectives of culture, language use and language learning. Housed in the linguistics department, the 18-credit certificate is open to all interested students, and may be of particular relevance to students from social science, humanities, speech/language, foreign language, international affairs and communication programs or backgrounds. Recent graduates and others who hold a bachelor's degree may enroll as ACCESS students through Continuing Education.

The widespread role of English as an international lingua franca opens up many opportunities for trained English teachers globally. Increasingly, EFL (English as a foreign language) providers want to hire individuals with relevant training—not just those who are native or near-native speakers. Certificate earners, in conjunction with their bachelor's degrees, will have the credentials to be able to tap into professional opportunities in the dynamic world of English language teaching—globally and in the U.S.

The program is focused on the teaching of English to young adults and adults while also incorporating the broader perspectives of language use and language learning from education, communication, culture and society. A one-semester practicum experience involves teaching or tutoring with a community ESL provider.

Requirements

Required Courses and Credits

Code	Title	Credit Hours
Required Courses		
LING 3630	Principles and Practices in Teaching English to Speakers of Other Languages	3
LING 4610	English Structure for Teachers of English to Speakers of Other Languages	3
LING 4910	TESOL (Tching English to Spkrs of Other Languages) Practicum ¹	3
Electives		9

Choose any three courses from below in at least two subject areas. At least two courses cannot not be cross-listed with LING. Students may petition to have other electives count. Prerequisites may apply for the upper-division courses below.

Language Learning/Teaching and Literacy

SLHS/LING 4560	Language Development
PSYC/LING 4225	Interdisciplinary Research Methods in Child Language Acquisition
EDUC 2625	Teaching English as a Second Language
EDUC 4125	Secondary World Language Methods
EDUC 4222	Language Study for Educators

EDUC 4295	Reading and Literacy in the Secondary Classroom
<i>Language, Culture and Society</i>	
ANTH 2100	Introduction to Cultural Anthropology
ANTH/LING 4800	Language and Culture
ARAB 1011	Introduction to Arab and Islamic Civilizations
ARAB/RLST 2320	The Muslim World, 600-1250
ARAB/WGST 3410	Gender, Sexuality and Culture in the Modern Middle East
CHIN 1012	Introduction to Chinese Civilization
COMM 2400	Discourse, Culture and Identities
COMM 3410	Intercultural Communication
COMM 3420	Gender and Communication
EDUC 4015	International / Comparative Education
EDUC 4425	Introduction to Bilingual/Multicultural Education
FREN 1610	How to Be French, 1: The Ancien Regime
FREN 1620	How To Be French? 2: Modernity
FREN 3700	French-American Cultural Differences
GRMN 1601	Germany Today
GRMN 3520	Open Topics in the Cultural Context
HIND 1011	Introduction to South Asian Civilizations
ITAL 1500	That's Amore: Introduction to Italian Culture
JPNS 1012	Introduction to Japanese Civilization
JPNS 3851	Studies in Japanese Popular Culture
JPNS/LING 4050	Japanese Sociolinguistics: Japanese Language and Society
KREN 1011	Introduction to Korean Civilization
RUSS 2501	Russia Today

SPAN 3200	Spanish Culture
SPAN 3220	Latin American Culture: Spanish America and Brazil
<hr/>	
Total Credit Hours	18

¹ LING 4910 cannot be applied to the linguistics major or minor.

Mathematics

The Department of Mathematics offers courses leading to either a Bachelor of Arts (BA) degree in mathematics or a minor in mathematics. Students who choose to major in mathematics choose from one of five tracks for the major:

- **Comprehensive track:** The comprehensive track emphasizes theoretical mathematics, and is aimed at students seeking a general background in mathematics or intending to pursue graduate work in mathematics.
- **Applicable track:** The applicable track is aimed at students seeking a background in applied and/or applicable mathematics.
- **Secondary education track:** The secondary education track is designed to align with the Colorado licensure requirements for mathematics secondary education, and the university does offer a program for obtaining secondary education mathematics teaching licensure.

- **Computational track:** The computational track is designed for students with an interest in the intersection of mathematics and computer science.
- **Statistics track:** The statistics track is designed for students seeking a background in statistics and/or data science.

Course code for this program is **MATH**.

Bachelor's Degree

- Mathematics - Bachelor of Arts (BA) (p. 477)

Minor

- Mathematics - Minor (p. 480)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Courses

MATH 1005 (3) Introduction to College Mathematics

Introductory level mathematics course which presents a college level introduction to algebraic functions and their applications. Only offered through the Student Academic Service Center.

Equivalent - Duplicate Degree Credit Not Granted: MATH 1011

Additional Information: MAPS Course: Mathematics

MATH 1011 (3) College Algebra

Covers simplifying algebraic expressions, factoring, linear and quadratic equations, inequalities, exponentials, logarithms, functions, graphs and systems of equations. Department enforced prerequisite: one year high school algebra.

Equivalent - Duplicate Degree Credit Not Granted: MATH 1005

Additional Information: Arts Sci Core Curr: Quant Reasn Mathmat Skills

Arts Sci Gen Ed: Quantitative Reasoning Math

MAPS Course: Mathematics

MATH 1012 (3) Quantitative Reasoning and Mathematical Skills

Promotes mathematical literacy among liberal arts students. Teaches basic mathematics, logic, and problem-solving skills in the context of higher level mathematics, science, technology, and/or society. This is not a traditional math class, but is designed to stimulate interest in and appreciation of mathematics and quantitative reasoning as valuable tools for comprehending the world in which we live.

Equivalent - Duplicate Degree Credit Not Granted: MATH 1112

Additional Information: GT Pathways: GT-MA1 - Mathematics

Arts Sci Core Curr: Quant Reasn Mathmat Skills

Arts Sci Gen Ed: Quantitative Reasoning Math

MAPS Course: Mathematics

MATH 1021 (3) College Trigonometry

Covers trigonometric functions, identities, solutions of triangles, addition and multiple angle formulas, inverse and trigonometric functions and laws of sines and cosines. Department enforced prerequisite: MATH 1011 (minimum grade C-) or 1 1/2 years of high school algebra and 1 year of high school geometry.

Equivalent - Duplicate Degree Credit Not Granted: APPM 1235 or

MATH 1150

MATH 1071 (3) Finite Mathematics for Social Science and Business

Discusses systems of linear equations and introduces matrices, linear programming, and probability.

Requisites: Requires prerequisite course of MATH 1011 (minimum grade C-) or a score of 46% or greater on an ALEKS math exam taken in 2016 or earlier.

Additional Information: Arts Sci Core Curr: Quant Reasn Mathmat Skills

Arts Sci Gen Ed: Quantitative Reasoning Math

MATH 1081 (3) Calculus for Social Science and Business

Covers differential and integral calculus of algebraic, logarithmic and exponential functions. For more information about the math placement referred to in the "Enrollment Requirements", contact your academic advisor.

Equivalent - Duplicate Degree Credit Not Granted: APPM 1345 or APPM 1350 or ECON 1088 or MATH 1300 or MATH 1310 or MATH 1330

Requisites: Requires prerequisite course of ECON 1078 or MATH 1011 or MATH 1071 or MATH 1150 or MATH 1160 (minimum grade C-) or an ALEKS math exam taken in 2016 or earlier, or placement into pre-calculus based on your admission data and/or CU Boulder coursework.

Additional Information: Arts Sci Core Curr: Quant Reasn Mathmat Skills
Arts Sci Gen Ed: Quantitative Reasoning Math

MATH 1110 (3) Mathematics for Elementary Educators 1

Includes a study of problem solving techniques in mathematics and the structure of number systems. Department enforced prereq., one year of high school algebra and one year of geometry. Department enforced restriction: restricted to prospective elementary teachers.

Additional Information: Arts Sci Core Curr: Quant Reasn Mathmat Skills
Arts Sci Gen Ed: Quantitative Reasoning Math

MATH 1112 (4) Mathematical Analysis in Business

Gives students experience with mathematical problem solving in real business contexts. Students will work with data and spreadsheets to build and analyze mathematical models. Themes of the course include applying logical operators to model business rules, interpreting data and using tables and graphs, finding break-even and optimal points, and addressing uncertainty and forecasting

Equivalent - Duplicate Degree Credit Not Granted: MATH 1012

Repeatable: Repeatable for up to 4.00 total credit hours.

Additional Information: Arts Sci Core Curr: Quant Reasn Mathmat Skills
Arts Sci Gen Ed: Quantitative Reasoning Math

MATH 1120 (3) Mathematics for Elementary Educators 2

Topics include geometry, measurement, probability, and statistics. Department enforced restriction: restricted to prospective elementary teachers.

Requisites: Requires prerequisite course of MATH 1110 (minimum grade C-).

Additional Information: Arts Sci Core Curr: Quant Reasn Mathmat Skills
Arts Sci Gen Ed: Quantitative Reasoning Math

MATH 1130 (3) Mathematics from the Visual Arts

Introduces mathematical concepts through the study of visual arts.

Additional Information: Arts Sci Core Curr: Quant Reasn Mathmat Skills
Arts Sci Gen Ed: Quantitative Reasoning Math

MATH 1150 (4) Precalculus Mathematics

Develops techniques and concepts prerequisite to calculus through the study of trigonometric, exponential, logarithmic, polynomial and other functions. For more information about the math placement referred to in the "Enrollment Requirements", please contact your academic advisor.

Equivalent - Duplicate Degree Credit Not Granted: APPM 1235 or MATH 1021

Requisites: Requires prerequisite course of MATH 1011 (minimum grade C-) or an ALEKS math exam taken in 2016 or earlier, or placement into pre-calculus based on your admissions data and/or CU Boulder coursework. Requires enrollment in corequisite course MATH 1151.

Additional Information: GT Pathways: GT-MA1 - Mathematics
Arts Sci Core Curr: Quant Reasn Mathmat Skills
Arts Sci Gen Ed: Quantitative Reasoning Math
MAPS Course: Mathematics

MATH 1151 (1) Precalculus Supplemental Lab

Provides students concurrently enrolled in MATH 1150 with supplemental instruction.

Requisites: Requires enrollment in corequisite course of MATH 1150.

Grading Basis: Letter Grade

MATH 1160 (3) Transition to Calculus (IBL): The Theory, Applications and Analysis of Functions

Examines the functions of calculus and how they can be used to model concrete problems and/or change. This is an intensive study of these functions through Inquiry-Based Learning. Each class will be designed so students will be actively engaged in learning the material in small groups. For more information about the math placement referred to in the "Enrollment Requirements", please contact your academic advisor.

Requisites: Requires an ALEKS math exam taken in 2016 or earlier, or placement into pre-calculus based on your admissions data and/or CU Boulder coursework.

MATH 1212 (3) Data and Models

Engages students in statistical and algebraic problem solving through modeling data and real world questions taken from the social and life sciences. The course will emphasize these skills and the mathematical background needed for a university level statistics course.

Equivalent - Duplicate Degree Credit Not Granted: MATH 1011

Grading Basis: Letter Grade

Additional Information: Arts Sci Core Curr: Quant Reasn Mathmat Skills
Arts Sci Gen Ed: Quantitative Reasoning Math

MATH 1300 (5) Calculus 1

Topics include limits, derivatives of algebraic and transcendental functions, applications of the derivative, integration and applications of the definite integral. Students who have already earned college credit for calculus 1 are eligible to enroll in this course if they want to solidify their knowledge base in calculus 1. For more information about the math placement referred to in the "Enrollment Requirements", contact your academic advisor.

Equivalent - Duplicate Degree Credit Not Granted: APPM 1345 or APPM 1350 or ECON 1088 MATH 1081 or MATH 1310 or MATH 1330
Requisites: Requires prerequisite course of MATH 1011 and MATH 1021 or MATH 1150 or MATH 1160 or APPM 1235 (minimum grade C-) or an ALEKS math exam taken in 2016 or earlier, or placement into calculus based on your admissions data and/r CU Boulder coursework.

Additional Information: GT Pathways: GT-MA1 - Mathematics
Arts Sci Core Curr: Quant Reasn Mathmat Skills
Arts Sci Gen Ed: Quantitative Reasoning Math

MATH 1310 (5) Calculus for Life Sciences

Calculus concepts are developed through the analysis and modeling of complex systems, ranging from gene networks and cells to populations and ecosystems. Fundamental concepts of probability and statistics are also developed through the lens of calculus. MATH 1300 is similar, but a greater emphasis is placed on relevance and applications in biology and other life sciences. Students who have already earned college credit for calculus 1 are eligible to enroll in this course if they want to solidify their knowledge base in calculus 1. For more information about the math placement referred to in the "Enrollment Requirements", contact your academic advisor.

Equivalent - Duplicate Degree Credit Not Granted: APPM 1345 or APPM 1350 or ECON 1088 or MATH 1081 or MATH 1300 or MATH 1330

Requisites: Requires prerequisite course of APPM 1235 or MATH 1021 or MATH 1150 or MATH 1160 or MATH 1300 (minimum grade C-) or an ALEKS math exam taken in 2016 or earlier, or placement into calculus based on your admissions data and/r CU Boulder coursework.

Additional Information: GT Pathways: GT-MA1 - Mathematics
Arts Sci Core Curr: Quant Reasn Mathmat Skills
Arts Sci Gen Ed: Quantitative Reasoning Math

MATH 1330 (4) Calculus for Economics and the Social Sciences

A calculus course intended to meet the needs of social science and economics majors, including applications. Covers differential and integral calculus of algebraic, logarithmic and exponential functions and modeling. For more information about the math placement referred to in the "Enrollment Requirements", contact your academic advisor.

Equivalent - Duplicate Degree Credit Not Granted: APPM 1345 or APPM 1350 or ECON 1088 or MATH 1081 or MATH 1300 or MATH 1310

Requisites: Requires a prerequisite course of ECON 1078 or MATH 1011 or MATH 1071 or MATH 1150 or MATH 1160 (minimum grade C-) or an ALEKS math exam taken in 2016 or earlier, or placement into calculus based on your admissions data and/r CU Boulder coursework.

Additional Information: Arts Sci Core Curr: Quant Reasn Mathmat Skills
Arts Sci Gen Ed: Quantitative Reasoning Math

MATH 2001 (3) Introduction to Discrete Mathematics

Introduces the ideas of rigor and proof through an examination of basic set theory, existential and universal quantifiers, elementary counting, discrete probability, and additional topics. Department enforced prerequisite: MATH 1300 or MATH 1310 or APPM 1345 or APPM 1350 (minimum grade C-).

MATH 2002 (3) Number Systems: An Introduction to Higher Mathematics

Introduces the concepts of mathematical proofs using the construction of the real numbers from set theory. Topics include basic logic and set theory, equivalence relations and functions, Peano's axioms, construction of the integers, the rational numbers and axiomatic treatment of the real numbers.

Equivalent - Duplicate Degree Credit Not Granted: MATH 2001

Requisites: Requires prerequisite of MATH 1300 or MATH 1310 or APPM 1345 or APPM 1350 (all minimum grade C-).

MATH 2130 (3) Introduction to Linear Algebra for Non-Mathematics Majors

Examines basic properties of systems of linear equations, vector spaces, inner products, linear independence, dimension, linear transformations, matrices, determinants, eigenvalues, eigenvectors and diagonalization. Intended for students who do not plan to major in Mathematics. Formerly MATH 3130.

Equivalent - Duplicate Degree Credit Not Granted: MATH 2135 or APPM 3310

Requisites: Requires prerequisite course of MATH 2300 or APPM 1360 (minimum grade C-).

MATH 2135 (3) Introduction to Linear Algebra for Mathematics Majors

Examines basic properties of systems of linear equations, vector spaces, inner products, linear independence, dimension, linear transformations, matrices, determinants, eigenvalues, eigenvectors and diagonalization. Intended for students who plan to major in Mathematics. Formerly MATH 3135.

Equivalent - Duplicate Degree Credit Not Granted: MATH 2130 or APPM 3310

Requisites: Requires a prerequisite course of (MATH 2300 or APPM 1360) and (MATH 2001 or MATH 2002) (all minimum grade C-).

MATH 2300 (5) Calculus 2

Continuation of MATH 1300. Topics include transcendental functions, methods of integration, polar coordinates, differential equations, improper integrals, infinite sequences and series, Taylor polynomials and Taylor series. Department enforced prerequisite: MATH 1300 or MATH 1310 or APPM 1345 or APPM 1350 (minimum grade C-).

Equivalent - Duplicate Degree Credit Not Granted: APPM 1360

MATH 2380 (3) Mathematics for the Environment

An interdisciplinary course where environmental issues, such as climate change, global epidemics, pollution, population models and kinship relations of Australian Aborigines are studied with elementary mathematics (such as fuzzy logic). Similar techniques are applied to analyze other current events, such as surveillance, economic meltdowns, identity theft and media literacy. Department enforced prerequisite: proficiency in high school mathematics.

Additional Information: GT Pathways: GT-MA1 - Mathematics
Arts Sci Core Curr: Quant Reasn Mathmat Skills
Arts Sci Gen Ed: Quantitative Reasoning Math

MATH 2400 (5) Calculus 3

Continuation of MATH 2300. Topics include vectors, three-dimensional analytic geometry, partial differentiation and multiple integrals, and vector analysis. Department enforced prerequisite: MATH 2300 or APPM 1360 (minimum grade C-).

Equivalent - Duplicate Degree Credit Not Granted: APPM 2350

MATH 2510 (3) Introduction to Statistics

Elementary statistical measures. Introduces statistical distributions, statistical inference, hypothesis testing and linear regression. Department enforced prerequisite: two years of high school algebra.

Equivalent - Duplicate Degree Credit Not Granted: BCOR 1020

Additional Information: Arts Sci Core Curr: Quant Reasn Mathmat Skills
Arts Sci Gen Ed: Quantitative Reasoning Math
MAPS Course: Mathematics

MATH 3001 (3) Analysis 1

Provides a rigorous treatment of the basic results from elementary Calculus. Topics include the topology of the real line, sequences of numbers, continuous functions, differentiable functions and the Riemann integral.

Requisites: Requires prerequisite courses of MATH 2001 and MATH 2130 or 3130 or MATH 2135 or 3135 (all minimum grade C-).

MATH 3110 (3) Introduction to Theory of Numbers

Studies the set of integers, focusing on divisibility, congruences, arithmetic functions, sums of squares, quadratic residues and reciprocity, and elementary results on distributions of primes.

Requisites: Requires prerequisite of MATH 2001 or MATH 2002 (both minimum grade C-).

MATH 3120 (3) Functions and Modeling

Engages the students in daily projects and occasional in-class labs designed to strengthen and expand knowledge of the topics in secondary mathematics, focusing especially on topics from algebra, precalculus and calculus. Projects and labs involve the use of multiple representations, transformations, data analysis techniques and interconnections among ideas from geometry, algebra, probability and calculus. Department enforced prereq., MATH 1300 or MATH 1310 or APPM 1350 (minimum grade C-).

Requisites: Requires prerequisite of MATH 2001 or MATH 2002 (both minimum grade C-).

MATH 3130 (3) Introduction to Linear Algebra

Examines basic properties of systems of linear equations, vector spaces, inner products, linear independence, dimension, linear transformations, matrices, determinants, eigenvalues, eigenvectors and diagonalization.

Equivalent - Duplicate Degree Credit Not Granted: MATH 3135 or APPM 3310

Requisites: Requires prerequisite course of MATH 2300 or APPM 1360 (minimum grade C-).

MATH 3135 (3) Honors Introduction to Linear Algebra

Examines basic properties of systems of linear equations, vector spaces, inner products, linear independence, dimension, linear transformations, matrices, determinants, eigenvalues, eigenvectors and diagonalization.

Equivalent - Duplicate Degree Credit Not Granted: MATH 3130 or APPM 3310

Requisites: Requires a prerequisite course of MATH 2300 or APPM 1360 and MATH 2001 (all minimum grade C-).

MATH 3140 (3) Abstract Algebra 1

Studies basic properties of algebraic structures with a heavy emphasis on groups. Other topics, time permitting, may include rings and fields.

Requisites: Requires prerequisite courses of MATH 2001 and MATH 2130 or 3130 or MATH 2135 or 3135 (all minimum grade C-).

MATH 3170 (3) Combinatorics 1

Covers basic methods and results in combinatorial theory. Includes enumeration methods, elementary properties of functions and relations, and graph theory. Emphasizes applications.

Requisites: Requires prerequisite of MATH 2001 or MATH 2002 (both minimum grade C-).

MATH 3210 (3) Euclidean and Non-Euclidean Geometry

Axiomatic systems; Euclid's presentation of the elements of geometry; Hilbert's axioms; neutral, Euclidean and non-Euclidean geometries and their models.

Requisites: Requires prerequisite courses of MATH 2001 and MATH 2130 or 3130 or MATH 2135 or 3135 (all minimum grade C-).

MATH 3430 (3) Ordinary Differential Equations

Involves an elementary systematic introduction to first-order scalar differential equations, n th order linear differential equations, and n -dimensional linear systems of first-order differential equations. Additional topics are chosen from equations with regular singular points, Laplace transforms, phase plane techniques, basic existence and uniqueness and numerical solutions. Formerly MATH 4430.

Requisites: Requires prerequisite courses of MATH 2400 or APPM 2350 and MATH 2130 or 3130 or MATH 2135 or 3135 or APPM 3310 (all minimum grade C-).

MATH 3450 (3) Introduction to Complex Variables

Theory of functions of one complex variable, including integrals, power series, residues, conformal mapping, and special functions. Formerly MATH 4450.

Requisites: Requires prerequisite courses of MATH 2400 or APPM 2350 (minimum grade C-).

MATH 3510 (3) Introduction to Probability and Statistics

Introduces the basic notions of Probability: random variables, expectation, conditioning, and the standard distributions (Binomial, Poisson, Exponential, Normal). This course also covers the Law of Large Numbers and Central Limit Theorem as they apply to statistical questions: sampling from a random distribution, estimation, and hypothesis testing.

Equivalent - Duplicate Degree Credit Not Granted: MATH 2510 or MATH 4510

Requisites: Requires a prerequisite course of (MATH 2300 or APPM 1360) and (MATH 2001 or MATH 2002) (all minimum grade C-).

MATH 3850 (1) Seminar in Guided Mathematics Instruction

Provides learning assistants with an opportunity to analyze assessment data for formative purposes and develop instructional plans as a result of these analyses. These formative assessment analyses will build on the literature in the learning sciences. Students gain direct experiences interacting with the tools of the trade, especially with actual assessment data and models of instruction. Restricted to learning assistants in Math.

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Requires a corequisite course of EDUC 4610.

Grading Basis: Pass/Fail

MATH 4000 (3) Foundations of Mathematics

Focuses on a complete deductive framework for mathematics and applies it to various areas. Presents Goedel's famous incompleteness theorem about the inherent limitations of mathematical systems. Uses idealized computers to investigate the capabilities and limitations of human and machine computation.

Equivalent - Duplicate Degree Credit Not Granted: MATH 5000

Requisites: Requires prerequisite courses of MATH 2001 and MATH 3001 or MATH 2130 or 3130 or MATH 2135 or 3135 or MATH 3140 or MATH 3210 (all minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

MATH 4001 (3) Analysis 2

Provides a rigorous treatment of infinite series, sequences of functions and an additional topic chosen by the instructor (for example, multivariable analysis, the Lebesgue integral or Fourier analysis).

Equivalent - Duplicate Degree Credit Not Granted: MATH 5001

Requisites: Requires prerequisite courses of MATH 3001 and MATH 2130 or 3130 or MATH 2135 or 3135 (all minimum grade C-).

MATH 4120 (3) Introduction to Operations Research

Studies linear and nonlinear programming, the simplex method, duality, sensitivity, transportation, and network flow problems, some constrained and unconstrained optimization theory, and the Kuhn-Tucker conditions, as time permits.

Equivalent - Duplicate Degree Credit Not Granted: MATH 5120 and APPM 4120 and APPM 5120

Requisites: Requires prerequisite course of MATH 2130 or 3130 or MATH 2135 or 3135 or APPM 3310 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

MATH 4140 (3) Abstract Algebra 2

Explores some topic that builds on material in MATH 3140. Possible topics include (but are not limited to) Galois theory, representation theory, advanced linear algebra or commutative algebra.

Equivalent - Duplicate Degree Credit Not Granted: MATH 5140

Requisites: Requires prerequisite course of MATH 3140 (minimum grade C-).

MATH 4200 (3) Introduction to Topology

Introduces the basic concepts of point set topology. Includes topological spaces, metric spaces, homeomorphisms, connectedness and compactness.

Equivalent - Duplicate Degree Credit Not Granted: MATH 5200

Requisites: Requires prerequisite course of MATH 3001 (minimum grade C-).

MATH 4230 (3) Differential Geometry of Curves and Surfaces

Introduces the modern differential geometry of plane curves, space curves, and surfaces in 3-dimensional space. Topics include the Frenet frame, curvature and torsion for space curves; Gauss and mean curvature for surfaces; Gauss and Codazzi equations, and the Gauss-Bonnet theorem.

Equivalent - Duplicate Degree Credit Not Granted: MATH 5230

Requisites: Requires prerequisite courses of MATH 2400 or APPM 2350 and MATH 2130 or 3130 or MATH 2135 or 3135 and MATH 2001 (all minimum grade C-).

MATH 4240 (3) Hilbert Spaces and the Mathematics of Quantum Mechanics

Provides an introduction to Hilbert spaces and their application in quantum mechanics. The primary goal is to prove and understand the so-called spectral theorem, which is crucial for the formulation of quantum mechanics. In addition, some examples from physics will be discussed, such as the quantum harmonic oscillator and the spectrum of the hydrogen atom.

Equivalent - Duplicate Degree Credit Not Granted: MATH 5240

Requisites: Requires prerequisite courses of MATH 3001 and MATH 2130 (formerly MATH 3130) or MATH 2135 (formerly MATH 3135) (all minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

MATH 4330 (3) Fourier Analysis

The notion of Fourier analysis, via series and integrals, of periodic and nonperiodic phenomena is central to many areas of mathematics. Develops the Fourier theory in depth and considers such special topics and applications as wavelets, Fast Fourier Transforms, seismology, digital signal processing, differential equations, and Fourier optics.

Equivalent - Duplicate Degree Credit Not Granted: MATH 5330

Requisites: Requires prerequisite course of MATH 3001 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

MATH 4440 (3) Mathematics of Coding and Cryptography

Gives an introduction, with proofs, to the algebra and number theory used in coding and cryptography. Basic problems of coding and cryptography are discussed.

Equivalent - Duplicate Degree Credit Not Granted: MATH 5440

Requisites: Requires prerequisite course of MATH 2130 or 3130 or MATH 2135 or 3135 (minimum grade C-).

MATH 4470 (3) Partial Differential Equations

Studies initial, boundary, and eigenvalue problems for the wave, heat, and potential equations. Solution by separation of variables, Green's function, and variational methods.

Equivalent - Duplicate Degree Credit Not Granted: MATH 5470

Requisites: Requires prerequisite courses of MATH 3430 (minimum grade C-).

MATH 4510 (3) Introduction to Probability Theory

Studies axioms, combinatorial analysis, independence and conditional probability, discrete and absolutely continuous distributions, expectation and distribution of functions of random variables, laws of large numbers, central limit theorems, and simple Markov chains if time permits.

Equivalent - Duplicate Degree Credit Not Granted: APPM 3570 or ECEN 3810 or MATH 3510 MATH 5510

Requisites: Requires prerequisite courses of MATH 2400 or APPM 2350 and MATH 2130 or 3130 or MATH 2135 or 3135 (all minimum grade C-).

MATH 4520 (3) Introduction to Mathematical Statistics

Examines point and confidence interval estimation. Principles of maximum likelihood, sufficiency, and completeness: tests of simple and composite hypotheses, linear models, and multiple regression analysis if time permits. Analyzes various distribution-free methods.

Equivalent - Duplicate Degree Credit Not Granted: MATH 5520 and STAT 4520 and STAT 5520

Requisites: Requires prerequisite course of MATH 4510 or APPM 3570 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

MATH 4540 (3) Introduction to Time Series

Studies basic properties, trend-based models, seasonal models, modeling and forecasting with ARIMA models, spectral analysis and frequency filtration.

Equivalent - Duplicate Degree Credit Not Granted: MATH 5540 and STAT 4540 and STAT 5540

Requisites: Requires prerequisite course of MATH 4520 or APPM 4520 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

MATH 4650 (3) Intermediate Numerical Analysis 1

Focuses on numerical solution of nonlinear equations, interpolation, methods in numerical integration, numerical solution of linear systems, and matrix eigenvalue problems. Stresses significant computer applications and software. Department enforced restriction: knowledge of a programming language.

Equivalent - Duplicate Degree Credit Not Granted: APPM 4650

Requisites: Requires a prerequisite course of MATH 3430 or APPM 2360 and APPM 3310 (minimum grade C-).

MATH 4660 (3) Intermediate Numerical Analysis 2

Continuation of MATH 4650. Examines numerical solution of initial-value problems and two-point boundary-value problems for ordinary differential equations. Also looks at numerical methods for solving partial differential equations.

Equivalent - Duplicate Degree Credit Not Granted: APPM 4660

Requisites: Requires prerequisite course of MATH 4650 (minimum grade C-).

MATH 4730 (3) Set Theory

Studies in detail the theory of cardinal and ordinal numbers, definition by recursion, the statement of the continuum hypothesis, simple cardinal arithmetic and other topics chosen by the instructor.

Equivalent - Duplicate Degree Credit Not Granted: MATH 5730

Requisites: Prereq. courses of MATH 2001 and one of the following: MATH 3001, 3110, 3120, 3140, 3170, 3210, 3430, 3450, 3510, 3850, 4000, 4001, 4120, 4140, 4200, 4230, 4330, 4440, 4510, 4520, 4540, 4650, 4660 or 4820 (all min grade C-).

MATH 4805 (1) Mathematical Teacher Training: Inclusive Pedagogy

Designed to train students to teach mathematics in an inclusive, multicultural environment. Students teach a math course within the McNeill Academic Program (Student Academic Services Center) meeting weekly with faculty and colleagues to learn to re-design curriculum, fine-tune pedagogical practices, create assessments, mentor undergraduate instructor assistants and create an inclusive classroom environment. Department enforced restriction: experience with college-level instruction.

Repeatable: Repeatable for up to 4.00 total credit hours.

Requisites: Restricted to students with 87-180 credits (Seniors) or graduate students only.

MATH 4810 (1-3) Special Topics in Mathematics

Covers various topics not normally covered in the curriculum. Offered intermittently depending on student demand and availability of instructors.

Equivalent - Duplicate Degree Credit Not Granted: MATH 5810

Repeatable: Repeatable for up to 7.00 total credit hours.

MATH 4820 (3) History of Mathematical Ideas

Examines the evolution of a few mathematical concepts (e.g., number, geometric continuum, or proof), with an emphasis on the controversies surrounding these concepts. Begins with Ancient Greek mathematics and traces the development of mathematical concepts through the middle ages into the present.

Equivalent - Duplicate Degree Credit Not Granted: MATH 5820

Requisites: Prereq. courses of MATH 2001 and one of the following: MATH 3001, 3110, 3120, 3140, 3170, 3210, 3430, 3450, 3510, 3850, 4000, 4001, 4120, 4140, 4200, 4230, 4330, 4440, 4510, 4520, 4540, 4650, 4660 or 4820 (all min grade C-).

Recommended: completion of upper division Written Communication requirement.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

MATH 4890 (1-3) Honors Independent Study

Offered for students doing a thesis for departmental honors.

Additional Information: Arts Sciences Honors Course

MATH 4900 (1-3) Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours.

Mathematics - Bachelor of Arts (BA)

The undergraduate degree in mathematics emphasizes knowledge and awareness of:

- calculus of several variables and vector analysis;
- the structure of mathematical proofs and definitions;
- basic linear algebra and the theory of vector spaces;
- basic real analysis of one variable;
- at least one additional specialized area of mathematics.

In addition, students completing a degree in mathematics are expected to acquire the ability and skills to:

- move from concrete to abstract thinking and back with facility;
- recognize patterns and connections between areas of mathematics and between mathematics and other subjects;
- organize and construct a logical argument, provide evidence to support arguments and articulate arguments clearly and succinctly, both verbally and in writing.

Program Tracks

The mathematics program offers five tracks that lead to the BA degree. All five tracks require Calculus 1, Calculus 2, Calculus 3, MATH 2001, MATH 2135 and MATH 3001.

Comprehensive Track

The comprehensive track emphasizes theoretical mathematics, and is aimed at students seeking a general background in mathematics or intending to pursue graduate work in mathematics.

Applicable Track

The applicable track is aimed at students seeking a background in applied and/or applicable mathematics.

Secondary Education Track

The secondary education track is designed to align with the Colorado licensure requirements for mathematics secondary education, and the university does offer a program for obtaining secondary education mathematics teaching licensure.

Computational Track

The computational track is designed for students with an interest in the intersection of mathematics and computer science.

Statistics Track

The statistics track is designed for students seeking a background in statistics and/or data science.

Concurrent Degree Program

BA/MA in Mathematics

The Department of Mathematics Concurrent Bachelor's/Master's Program leads to both a BA in Mathematics and either an MA in Mathematics or an MS in Applied Mathematics. It allows highly motivated and successful students to experience graduate-level course work earlier in their education than would otherwise be possible, and also allows them to obtain a master's degree in a reduced time period. Students are allowed to count six hours of graduate-level Mathematics Department course work towards both their undergraduate and graduate degree requirements.

The earliest admission to the program is after the successful completion of at least total 45 credit hours and a minimum of two upper division courses from the Department of Mathematics. Students must have at least one year of coursework remaining towards the completion of their undergraduate degree in order to be admitted to the program. Students admitted to the program may not pursue a double degree or a double major; however, outside minors are allowed.

For more information, see the Concurrent Bachelors/Masters Program Overview (http://math.colorado.edu/documents/undergraduate/Concurrent_BAMA.pdf) document.

Requirements

Program Requirements

To earn a BA in mathematics, a student must complete the general requirements of the College of Arts and Sciences, as well as the six mathematics core courses and the five additional courses for one of the five tracks (described on the Program Tracks tab).

Students must earn a grade of C- or better in each of the mathematics core courses and the five additional courses, and have at least a C average for all attempted work in mathematics.

Required Core Courses

The following courses are required of all mathematics majors, regardless of track.

Code	Title	Credit Hours
Required Courses		
MATH 1300	Calculus 1	4-5
	or MATH 1310 Calculus for Life Sciences	
	or APPM 1350 Calculus 1 for Engineers	
MATH 2300	Calculus 2	4-5
	or APPM 1360 Calculus 2 for Engineers	
MATH 2400	Calculus 3	4-5
	or APPM 2350 Calculus 3 for Engineers	
MATH 2001	Introduction to Discrete Mathematics	3
	or MATH 2002 Number Systems: An Introduction to Higher Mathematics	
MATH 2135	Introduction to Linear Algebra for Mathematics Majors	3
MATH 3001	Analysis 1	3
Program Track course work		15-16
Total Credit Hours		36-40

Program Tracks

Comprehensive Track

Aimed at students seeking a general background in mathematics or intending to pursue graduate work in mathematics, in addition to the course work required of all mathematics majors, the comprehensive track requires the following courses.

Required Courses and Credits

Code	Title	Credit Hours
Required Courses		
MATH 3140	Abstract Algebra 1	3
MATH 4140	Abstract Algebra 2	3
	or MATH 4001 Analysis 2	
Electives		
Three upper-division MATH or approved APPM courses (at least one at the 4000-level)		9
Total Credit Hours		15

Graduating in Four Years

Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of "adequate progress," as it is used here, refers to maintaining eligibility for the four-year guarantee; it is not a requirement

for the major. To maintain adequate progress in mathematics, students should meet the following requirements.

- By the beginning of the second semester, declare the major.
- By the end of the fourth semester, complete Calculus 1, Calculus 2, Calculus 3, MATH 2001 or MATH 2002, MATH 2135, and MATH 3001.
- By the end of the sixth semester, complete MATH 3140, MATH 4140 or MATH 4001, and one additional approved MATH or APPM course.
- By the end of the eighth semester, complete the major.

Applicable Track

Aimed at students seeking a background in applied and/or applicable mathematics, in addition to the coursework required of all mathematics majors, the applicable track requires the following courses.

Required Courses and Credits

Code	Title	Credit Hours
Required Courses		
MATH 4510	Introduction to Probability Theory	3
MATH 3430	Ordinary Differential Equations	3
MATH 4520	Introduction to Mathematical Statistics	3
	or MATH 4470 Partial Differential Equations	
Electives		
Two upper-division MATH or approved APPM courses		6
Total Credit Hours		15

Graduating in Four Years

Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of "adequate progress," as it is used here, refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress in mathematics, students should meet the following requirements.

- By the beginning of the second semester, declare the major.
- By the end of the fourth semester, complete Calculus 1, Calculus 2, Calculus 3, MATH 2001 or MATH 2002, MATH 2135, and MATH 3001.
- By the end of the sixth semester, complete MATH 4510, MATH 3430, and either MATH 4520 or MATH 4470.
- By the end of the eighth semester, complete the major.

Secondary Education Track

Aimed at students intending to teach mathematics at the secondary level, in addition to the coursework required of all mathematics majors, the secondary education track requires the following courses.

Required Courses and Credits

Code	Title	Credit Hours
Required Courses		
MATH 3110	Introduction to Theory of Numbers	3
	or MATH 3140 Abstract Algebra 1	
MATH 3120	Functions and Modeling	3
MATH 3210	Euclidean and Non-Euclidean Geometry	3
MATH 3510	Introduction to Probability and Statistics	3
MATH 4820	History of Mathematical Ideas	3
Total Credit Hours		15

NOTE: Completion of the secondary education track does not provide the student a teaching license.

Graduating in Four Years

Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of "adequate progress," as it is used here, refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress in mathematics, students should meet the following requirements.

- By the beginning of the second semester, declare the major.
- By the end of the fourth semester, complete Calculus 1, Calculus 2, Calculus 3, MATH 2001 or MATH 2002, MATH 2135, MATH 3001, and MATH 3120 .
- By the end of the sixth semester, complete MATH 3510, MATH 3210, and either MATH 3110 or MATH 3140.
- By the end of the eighth semester, complete the major.

Computational Track

Aimed at students interested in both mathematics and computation, in addition to the coursework required of all mathematics majors, the computational track requires the following courses.

Ancillary Courses

Code	Title	Credit Hours
Ancillary Courses ¹		
CSCI 1300	Computer Science 1: Starting Computing	4
CSCI 2270	Computer Science 2: Data Structures	4
Total Credit Hours		8

¹ CSCI 1300 and CSCI 2270 do not count toward hours in the major and are not part of the major GPA.

Required Courses and Credits

Code	Title	Credit Hours
Required Courses		
CSCI 3104	Algorithms	4
MATH 3430	Ordinary Differential Equations	3
MATH/APP MATH 4650	Intermediate Numerical Analysis 1	3
Electives		
Two MATH or approved APPM or approved CSCI courses, at least one of which must be at the 4000-level. At most one of these courses may be a CSCI course		6
Total Credit Hours		16

Graduating in Four Years

Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of "adequate progress," as it is used here, refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress in mathematics, students should meet the following requirements.

- By the beginning of the second semester, declare the major.
- By the end of the fourth semester, complete Computer Science 1, Computer Science 2, Calculus 1, Calculus 2, Calculus 3, MATH 2001 or MATH 2002, MATH 2135, and MATH 3001 .

- By the end of the sixth semester, complete CSCI 3104, MATH 3430, MATH 4650/APPM 4650 and one of the additionally required upper-division MATH classes.
- By the end of the eighth semester, complete the major.

Statistics Track

Aimed at students seeking a background in statistics and/or data science, in addition to the coursework required of all mathematics majors, the statistics track requires the following courses.

Required Courses and Credits

Code	Title	Credit Hours
Required Courses		
MATH 4510	Introduction to Probability Theory	3
MATH 4520	Introduction to Mathematical Statistics	3
MATH 4540	Introduction to Time Series	3
Electives		
Two of the following courses: APPM 4580 (Statistical Applications), APPM 4590 (Statistical Modeling), APPM 4560 (Markov Processes), MATH 6550 (Introduction to Stochastic Processes)		6
Total Credit Hours		15

Graduating in Four Years

Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of "adequate progress," as it is used here, refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress in mathematics, students should meet the following requirements.

- By the beginning of the second semester, declare the major.
- By the end of the fourth semester, complete Calculus 1, Calculus 2, Calculus 3, MATH 2001 or MATH 2002, MATH 2135, and MATH 4510.
- By the end of the sixth semester, complete MATH 3001, MATH 4520, and MATH 4540.
- By the end of the eighth semester, complete the major.

Recommended Four-Year Plan of Study

Through the required course work for the major, students will complete the QRMS component of the Gen Ed Skills Requirement and, depending on the track of study, potentially some credit hours in the Natural Sciences and Arts & Humanities areas of the Gen Ed Distribution Requirement.

Course	Title	Credit Hours
Year One		
Fall Semester		
MATH 1300	Calculus 1	5
Gen. Ed. Distribution/diversity course (example: Social Sciences/Global Perspective)		3
Gen. Ed. Skills course (example: Lower-division Written Communication)		3
Elective/MAPS		3
Credit Hours		14

Gen. Ed. Distribution course (example: Social Sciences)		3

Upper-division Elective	3
Credit Hours	15
Total Credit Hours	121

Mathematics - Minor

The undergraduate minor in mathematics emphasizes knowledge and awareness of:

- calculus of several variables and vector analysis;
- the structure of mathematical proofs and definitions;
- basic linear algebra and the theory of vector spaces;
- at least one additional specialized area of mathematics.

Requirements

Declaration of a minor in mathematics is open to any student enrolled at CU Boulder, regardless of college or school.

To earn a minor in mathematics, students must complete the following courses with a grade of C- or better in each course, and they must have at least a C (2.00) average for all attempted work in mathematics.

Required Courses and Credit Hours

Code	Title	Credit Hours
Required Courses		
MATH 1300 or APPM 1350	Calculus 1 Calculus 1 for Engineers	4-5
MATH 2300 or APPM 1360	Calculus 2 Calculus 2 for Engineers	4-5
MATH 2400 or APPM 2350	Calculus 3 Calculus 3 for Engineers	4-5
MATH 2001 or MATH 2002	Introduction to Discrete Mathematics Number Systems: An Introduction to Higher Mathematics	3
MATH 2130 or MATH 2135	Introduction to Linear Algebra for Non-Mathematics Majors Introduction to Linear Algebra for Mathematics Majors	3
Electives		
Three upper-division MATH courses (at least one at the 4000-level)		9
Total Credit Hours		27-30

Medieval and Early Modern Studies

To the Middle Ages the modern world owes the preservation and transmission of Latin and Greek; the development of a host of vernaculars; the evolution of Judaism and Christianity, and the rise of Islam; the renewed study of Roman law; the growth of a mercantile class; the creation of musical notation; the erection of ecclesiastical monuments; the foundations of constitutional government; and the institution of universities. The early modern period inherited and elaborated all these institutions and inventions, adapting them to fit new conceptions of man (and woman), church and state.

The Center for Medieval and Early Modern Studies is founded on the convictions that the period from c. 400 to c. 1800, conceived in a global

context, is a dynamic cultural continuum and ever-evolving system; that study of both periods in tandem sheds new light on each; and that the unity and diversity of the premodern world can be understood and appreciated only from an interdisciplinary perspective. Medieval and Early Modern Studies therefore crosses boundaries of period, nation, language and discipline, and the center's prime function is to facilitate and encourage interdepartmental study and teaching.

Courses throughout the curriculum are available to students whose area of specialization within a given department is the medieval and/or early modern period(s) and who wish to broaden their knowledge of the cultures of the period. With the approval of the major department, a coherent group of these courses may be accepted as a related program of study and as part of the requirements for an undergraduate degree. For additional details concerning these courses, see departmental listings.

For more information, visit the Center for Medieval and Early Modern Studies (<https://www.colorado.edu/cmems>) website.

Course code for this program is MEMS.

Certificate

- Medieval and Early Modern Studies - Certificate (p. 481)

Courses

MEMS 2020 (3) Introduction to Medieval and Renaissance Studies

Introduces students to the literature, history, culture and art of Europe and the Mediterranean basin from late antiquity through the renaissance. The course is interdisciplinary and focuses on topics which reveal the dynamism and diversity of pre-modern culture.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

MEMS 4020 (3) Medieval and Early Modern Studies: Texts and Contexts

Focuses on communities in the Mediterranean basin and Europe (i.e., cloister, court and city), discussing major literary texts and visual monuments associated with them and their historical context. Emphasizes tensions between tradition and innovation, Latin and vernacular, East and West, Christian and non-Christian (Jewish and Islam), sacred and secular, authority and freedom and male and female.

Equivalent - Duplicate Degree Credit Not Granted: MEMS 5020

Requisites: Requires a prerequisite course of CLAS 1110 and CLAS 1120 and ENGL 2503 or HIST 1011 and HIST 1012 (minimum grade D-).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

MEMS 4030 (3) Medieval and Early Modern Studies: Special Topics

Different topics offered by the faculty of the Medieval and Early Modern Studies Program in alternate semesters. Topics may include the literature of pilgrimage and travel, women and minorities, theatre, music, epic, medieval and early modern views of the classics, the Bible, and medieval and early modern theories of education.

Equivalent - Duplicate Degree Credit Not Granted: MEMS 5030

Requisites: Requires a prerequisite course of CLAS 1110 and CLAS 1120 and ENGL 2503 or HIST 1011 and HIST 1012 (minimum grade D-).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

Medieval and Early Modern Studies - Certificate

Students who pursue the medieval and early modern studies (MEMS) certificate are free to take a variety of courses offered in numerous departments across the CU Boulder campus. In consultation with the CMEMS director, each student can tailor the certificate to meet their

intellectual interests in the study of premodern Europe and its global influence. Students usually earn the certificate in tandem with a BA degree in history, classics or English, and find the analytical and linguistic skills particularly useful for graduate work in history and law.

Requirements

Students must complete at least 24 credits of approved course work, as follows.

Required Courses and Credits

Code	Title	Credit Hours
Select one of the following lower-division introductory survey courses:		3
ARTH 1300	History of World Art 1	
ARTH 1400	History of World Art 2	
HIST 1011	Greeks, Romans, Kings & Crusaders: European History to 1600	
HUMN 1110	Introduction to Humanities: Literature 1	
HUMN 1120	Introduction to Humanities: Literature 2	
HUMN 1210	Introduction to Humanities: Art and Music 1	
HUMN 1220	Introduction to Humanities: Art and Music 2	
Senior-level seminar:		3
MEMS 4030	Medieval and Early Modern Studies: Special Topics (or equivalent) ¹	
Capstone Seminar:		3
MEMS 4020	Medieval and Early Modern Studies: Texts and Contexts (or equivalent) (with a minimum grade of B) ¹	
Five electives, at least four of which must be upper-division and two of which must be in disciplines other than the student's major		15
Total Credit Hours		24

¹ Substitutions for MEMS 4020 and MEMS 4030 may be made the discretion of the MEMS advisor or faculty chair.

Molecular, Cellular and Developmental Biology

The undergraduate program in molecular, cellular and developmental biology (MCDB) is directed toward understanding the molecular and cellular mechanisms that provide the basis for biological structure, growth, evolution, embryonic development and genetic inheritance. Undergraduate majors learn about the scientific method, experimental approaches and groundbreaking discoveries that have made modern molecular and cellular biology such an important force in medicine, agriculture, and the growing biotechnology industry. They also learn about the diverse tools of modern biology, including recombinant DNA, genomic mapping, transgenic organisms, gene targeting, analysis of mutants, biochemical purification, antibody probes, laser manipulation of living cells, light and electron microscopy, and computer modeling. In addition to academic and laboratory classes, MCDB majors have many opportunities to participate in ongoing research in the department.

Learn how living systems operate at the cellular and molecular levels of organization, their assembly and structure, with heavy emphasis on genetic information and regulation, including embryonic development.

Course code for this program is MCDB.

Animal Use Policy

Biology is the science of life, and a major in it must include some hands-on experience with living organisms to be complete. Exercises involving the use of living animals or animal tissues are included, therefore, in MCDB laboratory courses. Majors with objections on moral grounds may arrange to limit their participation in these exercises, although their educational experience is compromised by doing so.

Nonmajors may take MCD biology lecture courses without the accompanying laboratories. Laboratory courses in which living vertebrate animals or tissues are used are identified in the course description section of this catalog. For additional information, please contact the department.

Bachelor's Degree

- Molecular, Cellular and Developmental Biology - Bachelor of Arts (BA) (p. 489)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Courses

MCDB 1030 (3) Introduction to Molecular Biology

Introduces the foundation of molecular, cell, developmental and evolutionary biology in the context of human development and disease. Including how the immune system works to protect us from infections and technologies being developed towards the goal of better health around the world. For nonmajors.

Additional Information: GT Pathways: GT-SC2 -Natural Physicl Sci:Lec Crse w/o Req Lab

Arts Sci Core Curr: Natural Science Sequence

Arts Sci Gen Ed: Distribution-Natural Sciences

MCDB 1041 (3) Fundamentals of Human Genetics

Covers the basic principles of genetics, human pedigree analysis, and how genetic diseases affect DNA, RNA, and proteins. Considers implications of this research for medicine and society. For nonmajors.

Recommended: Requisite good background in high school chemistry and biology.

Additional Information: GT Pathways: GT-SC2 -Natural Physicl Sci:Lec Crse w/o Req Lab

Arts Sci Core Curr: Natural Science Sequence

Arts Sci Gen Ed: Distribution-Natural Sciences

MCDB 1043 (1) Exploring Genetics Laboratory

Provides hands-on experience with fundamental genetic principles. Topics include scientific method, experimental design, mitosis, meiosis, classical genetics, molecular genetics, mutagenesis, DNA analysis, and transgenic organisms. Wherever possible, the focus of the lab will be on integrating science process skills with human-relevant experiments to encourage students to learn and apply science skills while seeing the application to humans.

Requisites: Restricted to Biological Sciences (MCDB) non-majors only.

Recommended: Corequisite MCDB 1041.

Additional Information: Arts Sci Core Curr: Natural Science Lab

Arts Sci Gen Ed: Distribution-Natural Sciences

Arts Sci Gen Ed: Distribution-Natural Sci Lab

MCDB 1111 (3) Core Concepts in Biology I: Evolutionary, Molecular and Cell Biology

Web-based, in-class discussion course covering the fundamental properties shaping living systems. Uses evolutionary (including social) and physical-chemical mechanisms to frame molecular, cellular and organismic processes. Interpreting and answering questions scientifically as well as quantitative reasoning skills are stressed. Fulfills the MCDB major's requirement for MCDB 1150.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 1150

Additional Information: Arts Sci Core Curr: Natural Science Sequence

Arts Sci Gen Ed: Distribution-Natural Sciences

MCDB 1150 (3) Introduction to Cellular and Molecular Biology

Covers biologically important macromolecules and biological processes, together with an introduction to cell structure, function, and physiology. Provides the foundation for advanced MCDB courses to majors, and a rigorous overview of modern biology to nonmajors. MCDB 1151 must be taken concurrently by MCDB and biochemistry majors and prehealth science students.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 1111

Recommended: Prerequisite high school chemistry and algebra, and recommended corequisites of MCDB 1151 and MCDB 1152.

Additional Information: GT Pathways: GT-SC2 -Natural Physicl Sci:Lec Crse w/o Req Lab

Arts Sci Core Curr: Natural Science Sequence

Arts Sci Gen Ed: Distribution-Natural Sciences

MAPS Course: Natural Science Lab or Lab/Lec

MCDB 1151 (1) Introduction to Cell and Molecular Biology Lab

Offers one two-hour lab per week designed to acquaint students with research techniques and concepts in molecular and cellular biology. Topics include cell structure, function, physiology, and recombinant DNA.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 1111

Recommended: Corequisite MCDB 1150 or CHEN 2810 or EBIO 1210.

Additional Information: GT Pathways: GT-SC1 - Natural Physcal Sci:Lec Crse w/ Req Lab

Arts Sci Core Curr: Natural Science Lab

Arts Sci Gen Ed: Distribution-Natural Sciences

Arts Sci Gen Ed: Distribution-Natural Sci Lab

MAPS Course: Natural Science Lab or Lab/Lec

MCDB 1152 (1) Problem Solving Co-Seminar for Introduction to Molecular and Cellular Biology

Uses problem solving and other interactive group work to aid student learning in a corequisite course, MCDB 1150. Students will work in small groups on learning and practicing how to solve difficult conceptual problems, as well as using hands-on activities and concept mapping to help learn content.

Recommended: Corequisite MCDB 1150.

Grading Basis: Pass/Fail

MCDB 1161 (2) From Dirt to DNA: Phage Genomics Laboratory I

Provides laboratory experience working on a bacteriophage genomics research project. Students will study novel bacteriophage they isolate from the environment. Topics covered include phage biology, bacteria and phage culturing and amplification, DNA isolation, restriction digest analysis, agarose gel electrophoresis, and electron microscopy.

Additional Information: Arts Sci Core Curr: Natural Science Lab

Arts Sci Gen Ed: Distribution-Natural Sciences

Arts Sci Gen Ed: Distribution-Natural Sci Lab

MCDB 1171 (2) Drug Discovery Through Hands-on Screens I

Provides introductory research and laboratory experience. Students will work in teams to screen small molecule libraries for novel antibiotics using the bacterium Salmonella as a model system. Topics covered include the basic biology of the model system, genetics, approaches to screening for new therapeutics, statistical analysis of the data, compound verification and lead compound development.

Requisites: Requires corequisite course of MCDB 1150.

Grading Basis: Letter Grade

Additional Information: Arts Sci Core Curr: Natural Science Lab

Arts Sci Gen Ed: Distribution-Natural Sci Lab

Arts Sci Gen Ed: Distribution-Natural Sciences

MCDB 2150 (3) Principles of Genetics

Introduces the behavior of genes and chromosomes in eukaryotic and prokaryotic organisms. Covers three areas: transmission genetics, molecular genetics, and population genetics. Attention is given to genetic mapping, recombinant DNA procedures, and gene expression.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 2222

Recommended: Prerequisite MCDB 1150 or EBIO 1210 or CHEN 2810 (minimum grade C-) and recommended corequisites of MCDB 2151 and MCDB 2152.

Additional Information: GT Pathways: GT-SC2 -Natural Physicl Sci:Lec Crse w/o Req Lab

Arts Sci Core Curr: Natural Science Sequence

Arts Sci Gen Ed: Distribution-Natural Sciences

MCDB 2151 (1) Principles of Genetics Laboratory

One two-hour lab per week. Provides hands-on experience with principles introduced in MCDB 2150. Topics include mitosis, meiosis, classical genetics, complementation, mutagenesis, DNA replication, natural selection, and evolution.

Recommended: Prerequisites MCDB 1150 and MCDB 1151 (all minimum grade D-), and recommended corequisite of MCDB 2150.

Additional Information: GT Pathways: GT-SC1 - Natural Physcal Sci:Lec Crse w/ Req Lab

Arts Sci Core Curr: Natural Science Lab

Arts Sci Gen Ed: Distribution-Natural Sciences

Arts Sci Gen Ed: Distribution-Natural Sci Lab

MCDB 2152 (1) Problem Solving Co-Seminars for Genetics

Uses problem solving and other interactive group work to aid student learning in MCDB 2150. Students will work in small groups on learning and practicing how to solve difficult conceptual problems, as well as using hands-on activities and concept mapping to help learn content.

Recommended: Corequisite MCDB 2150.

Grading Basis: Pass/Fail

MCDB 2161 (2) From DNA to Genes, Phage Genomics Laboratory II

Provides laboratory experience working on a bacteriophage isolated during the previous semester. Topics include bioinformatics, genome annotation, open reading frame and RNA identification, BLAST analysis, phylogenetics and submission to a genomic database.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

MCDB 2171 (2) Drug Discovery Through Hands-On Screens 2

Provides introductory research and laboratory experience. Students will work in teams to screen molecule libraries using fruit flies as a model system. Topics covered include the basic biology of the model system, genetics, approaches to screening for new therapeutics, statistical analysis of the data, compound verification and lead compound development.

Requisites: Requires a corequisite course of MCDB 2150.

Grading Basis: Letter Grade

Additional Information: Arts Sci Core Curr: Natural Science Lab

Arts Sci Gen Ed: Distribution-Natural Sciences

Arts Sci Gen Ed: Distribution-Natural Sci Lab

MCDB 2222 (3) Core Concepts in Biology II: Genes, Genetics and Phenotypes

Web-based, in-class discussion course focused on the origins of genetic variation and inheritance, genome dynamics and gene expression and their relationship to phenotype(s). Interpreting, explaining and answering questions scientifically as well as quantitative reasoning are stress.

Course fulfills the departmental requirement for MCDB 2150.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 2150

Requisites: Requires a prerequisite course of MCDB 1111 or MCDB 1150 (minimum grade C-).

Grading Basis: Letter Grade

Additional Information: Arts Sci Core Curr: Natural Science Sequence

Arts Sci Gen Ed: Distribution-Natural Sciences

MCDB 2840 (1-3) Lower-Division Independent Study

Students with adequate prerequisites should take MCDB 4840.

Repeatable: Repeatable for up to 8.00 total credit hours.

MCDB 3010 (2) Undergraduate Teaching in Course-Based Undergraduate Research Experiences

To address the need for more advanced and continued participation in course-based research, MCDB 3010 is designed to train students who have taken MCDB 1171 or MCDB 2171 or MCDB 4202 as teaching assistants. The aim is to enhance the students' experience and responsibilities in course-based research and to prepare them for research and mentorship in a departmental or graduate laboratory.

Repeatable: Repeatable for up to 4.00 total credit hours.

Requisites: Requires prerequisite course of MCDB 1171 or MCDB 2171 or MCDB 1161 or MCDB 4202 (minimum grade B).

Grading Basis: Letter Grade

MCDB 3135 (3) Molecular Cell Biology I

Examines the central dogma of biology by discussing the most important molecules in cells (DNA, RNA and protein) and how their synthesis (DNA replication, transcription, RNA processing and translation) is regulated. Incorporated into the discussion is how recombinant DNA techniques are used to discover and dissect cellular processes, how to design and interpret experiments, and understanding the limits of experiments to draw conclusions. These principles are the foundation for subsequent examination of intracellular mechanisms in MCDB 3145.

Requisites: Requires prerequisite courses of MCDB 2150 or EBIO 2070 and CHEM 1113 or CHEM 1400 or CHEN 1211 (all minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

MCDB 3140 (2) Cell Biology Laboratory

One four-hour lab per week. Provides experience with and exposure to modern cell biology laboratory techniques. Topics include microscopy, immunocytochemistry, Western blotting, Southern blotting, and flow cytometry. This course does not use vertebrate animals.

Recommended: Corequisite MCDB 3135 or MCDB 3145.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Arts Sci Gen Ed: Distribution-Natural Sci Lab

MCDB 3145 (3) Molecular Cell Biology II

Examines intracellular mechanisms, including transport of ions and small molecules across membranes; protein targeting to organelles; membrane trafficking between organelles; signal transduction; the cytoskeleton; and the cell cycle. Analysis of these activities is from the experimental perspective established in MCDB 3135.

Recommended: Prerequisite MCDB 3135 (minimum grade C-), and recommended prerequisite or corequisite of MCDB 3140 concurrent with either this class or MCDB 3135.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

MCDB 3150 (3) Biology of the Cancer Cell

Highlights dimensions of the cancer problem; cancer as a genetic/cellular disease; chemicals, viruses, and radiation as causes of cancer; cancer and diet; cancer epidemiology; cancer risk factors; proto-oncogenes, oncogenes, and cancer suppressor genes; and prevention of cancer.

Recommended: Prerequisite MCDB 2150 or EBIO 2070 (minimum grade C-).

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences

MCDB 3160 (3) Infectious Disease

Illustrate how cutting edge tools in genomics can be used to study, monitor and cure disease caused by new and re-emerging human pathogens such as SARS/MERS, Ebola virus, Neisseria meningitides, influenza virus and malaria parasites. Technologies covered will include genome sequencing, annotation, transcriptomics, phylogenetics and genotyping of microbial populations. An integrated approach to this topic will be presented, with these concepts threaded throughout: natural history and evolution of pathogens, molecular biology, immunology, epidemiology, public health and clinical diagnosis. There may be some overlap with material covered in MCDB 1030 and MCDB 4750.

Requisites: Requires prerequisite course of MCDB 2150 or EBIO 2070 (minimum grade C-).

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

MCDB 3330 (3) Evolution and Creationism

Intensive lecture/discussion course on the interrelationships among science, religion, and social policy. Includes historical and scientific development of evolution theory, social Darwinism/sociobiology, and the public perception of science.

Recommended: Prerequisite MCDB 1150 or EBIO 1210 (minimum grade C-).

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences

MCDB 3332 (1) Scientific Ethics

A reading/discussion course on the implications of modern biologically-based technologies, from in vitro fertilization and its variants and issues surrounding these techniques, to genomic testing of embryos and adults, the genetic engineering of organisms, including humans, to issues surrounding communicable diseases and vaccination. Discussion will include a serious consideration of various philosophical and non-scientific perspectives.

Requisites: Requires prerequisite course of MCDB 1150 or EBIO 1210 (minimum grade C). Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

MCDB 3333 (3) Biomedical Innovations and Discoveries

Discusses how biological inventions and discoveries fuel biomedical innovations, how important techniques in molecular biology have advanced our understanding of cellular processes and contributed to biotechnology revolution and biomedical sciences to benefit our society. Guest lectures from experts in industry and site visits will enhance the course by providing a non-academic perspective, networking opportunities, and unexpected avenues for career paths for our graduates. Department enforced prerequisite: MCDB 2150 or EBIO 2070 or instructor consent.

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

MCDB 3350 (3) Fertility, Sterility, and Early Mammalian Development

Describes the production of germ cells, ovulation, fertilization, reproductive cycles, controls of reproduction, early development of the embryo, methods of contraception, and causes and treatments of sterility. Recommended for students planning careers in the health sciences.

Recommended: Prerequisite MCDB 1150 or EBIO 1210 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

MCDB 3501 (3) Structural Methods for Biological Macromolecules

Teaches fundamental knowledge about protein structures, protein interactions and protein folding. Discusses in detail the most common methods on how proteins and macromolecular complexes are studied, such as X-ray crystallography, NMR-spectroscopy and electron microscopy. Offers about 50 percent direct teaching, 40 percent discussion of papers in a journal club style and 10 percent hands-on practicals on software packages relevant to structural biology. Formerly MCDB 4501.

Recommended: Prerequisite MCDB 2150 or EBIO 2070 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

MCDB 3650 (3) The Brain - From Molecules to Behavior

Examines the molecular basis of the brain's role in thought, action, and consciousness by exploring issues such as relationship of cognition and localized brain function, sensory systems and their role in cognition, learning and memory, and behavioral neurochemistry.

Recommended: Prerequisite MCDB 2150 or EBIO 2070 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

MCDB 3651 (3) The Brain: Dysfunction to Disease

Misregulation of synaptic function results in abnormal brain function and behavior that is manifested in numerous neurological and psychiatric diseases. Explores the molecular mechanisms responsible for altered synaptic plasticity in neurological diseases such as frontotemporal dementia (FTD), Parkinson's disease, Huntington's disease, Creutzfeldt-Jakob disease, Down syndrome, epilepsy, autism, and Alzheimer's disease.

Recommended: Prerequisites MCDB 3650 or NRSC 2100 (minimum grade C-) or instructor consent required.

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

MCDB 3700 (3) Poisons in Cell Biology and Society

Investigate the inner workings of our cells by studying how poisons disrupt these processes. We will learn how selected poisons affect critical processes inside the cell to cause death or destruction. The scientific aspects of the poison will be discussed in the context of its historical significance or impact on society and popular culture. Department enforced prerequisites: MCDB 1150 or EBIO 1210 and MCDB 2150.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

MCDB 3990 (3) Introduction to Systems Biology for Biologists

Introduces majors with relatively little mathematical experience to the major concepts in systems biology, in the context of key processes (cell growth, division, adaptation, development, and disease). Designed to help students master the necessary mathematical tools involved.

Recommended: Prerequisites MCDB 3135 and MCDB 3145 and MATH 1310 (minimum grade C-).

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

MCDB 4100 (1-6) Special Topics

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Recommended: Prerequisites MCDB 3135 and MCDB 3145 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

MCDB 4101 (3) Editing Genomes with CRISPR-Cas9 Discovering Gene Function

Discover novel gene function in vertebrate embryonic development using the latest gene-editing technology, CRISPR-Cas9. Pick your gene of interest and design experiments to mutate the gene, confirm the mutation and characterize the phenotype. Search scientific databases to learn more about the gene and formulate a hypothesis about the gene function. Discuss and present your findings to your peer and faculty.

Recommended: Prerequisites MCDB 3135 and MCDB 3145.

Grading Basis: Letter Grade

MCDB 4111 (3) Experimental Design and Research in Cell and Molecular Biology

Learning molecular and cell biology experimental design and approaches through independent research projects. Students, working in pairs, will explore the research process and gain extensive first-hand experience in: hypothesis formation; experimental design; solution preparation and experimental methodology; proposal presentation and defense (oral and written); formal presentation of results and conclusions (oral and written in a publication-style format); the publication process; critical reading and evaluation of primary scientific literature.

Recommended: Prerequisite MCDB 1150 or EBIO 1210 (minimum grade C-) and recommended corequisite of MCDB 3135.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

MCDB 4201 (3) From Bench to Bedside: The Role of Science in Medicine

Demonstrates the breadth of research in the life sciences and how such research (not just in medical schools) can lead to medical applications. Lecturers from life sciences, the medical school and biotechnology, discuss drug development and the transfer of research into the clinical arena. Students also prepare a paper and presentation on the development of a commercial drug.

Recommended: Prerequisites MCDB 3135 and MCDB 3145 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

MCDB 4202 (3) The Python Project

Studies how python hearts grow after they consume a meal.

Understanding the molecular processes of growth and regression in the python heart could lead to development of therapeutics for heart disease. Students work in groups in the laboratory and generate novel data by using modern molecular biology and bioinformatic techniques to clone and sequence candidate molecules of the python genome. May be repeated once.

Repeatable: Repeatable for up to 6.00 total credit hours.

Recommended: Prerequisites MCDB 3135 and MCDB 3145 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

MCDB 4234 (3) Research Methods

Presents a rigorous and pedagogically coherent introduction into the experimental process used to collect data, formulate hypotheses, and answer scientific questions in general, and biological questions in particular. Includes a detailed consideration of the elements of experimental design, data collection and analysis, and the interpretation of results in the context of effective science teaching. Part of the CU Teach course sequence for teacher certification in science and mathematics.

Requisites: Restricted to Biological Sciences (MCDB) majors or School of Education (EDUC) undergraduate students only.

Recommended: Prerequisites MCDB 3135 and MCDB 3145 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

MCDB 4300 (3) Immunology

Emphasizes cellular and molecular mechanisms by which organisms protect themselves from pathogens and the experimental basis for our understanding of these processes. Discusses development, function, and malfunction of t-cells, b-cells and other components of the immune system, focusing on the human immune system.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 5301

Recommended: Prerequisites MCDB 3135 and MCDB 3145 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

MCDB 4310 (3) Microbial Genetics and Physiology

Examines the physiology and genetics of bacteria, Archaea and viruses. Particular emphasis will be on metabolism, regulation of gene expression and protein function, mechanisms of interactions with and manipulation of the environment, and evolution in response to environmental pressures.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 5310

Recommended: Prerequisites MCDB 3135 and MCDB 3145 (minimum grade C-) and recommended corequisite of CHEM 4611.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

MCDB 4312 (3-4) Quantitative Optical Imaging

Explores the fundamentals of optical imaging in biology. Covered topics include an introduction to optics and microscopes, fluorescence microscopy and image analysis. MATLAB will be taught throughout the course and used for image processing.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 5312

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

MCDB 4350 (3) Microbial Diversity and the Biosphere

Provides a molecular phylogeny-based perspective on microbial diversity and the interactions between organisms that result in the biosphere. Provides overview of recent methods and findings in microbial ecology, as well as computer-based workshop in molecular phylogeny. Fulfills MCDB scientific reasoning requirement.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 5350

Recommended: Prerequisites MCDB 1150 or EBIO 1210 and CHEM 1133 and EBIO 3400 and/or CHEM 3311 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

MCDB 4361 (3) Evolution and Development

Relates how recent discoveries in the molecular mechanisms of development are shaping our understanding of animal evolution. Reviews basic principles of molecular developmental biology and applies these concepts to critically discuss current research in the field of Evo-Devo (evolution and development). Fulfills MCDB scientific reasoning requirement.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 5361

Recommended: Prerequisites MCDB 3135 and MCDB 3145 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

MCDB 4410 (3) Human Molecular Genetics

Studies the human organism as a genetic system, including effect of mutation on protein structure and function, biochemical basis of human genetic disease, polymorphic gene loci, gene mapping and identification, gene cloning and characterization, and impact of human genetics on medicine and society. Fulfills MCDB scientific reasoning requirement.

Recommended: Prerequisite MCDB 3135 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

MCDB 4422 (3) Molecular Biology of Free Radicals: Role(s) in Oxidative Stress, Signaling, Disease, Aging

Examines how free radicals are formed in biological systems and their roles in oxidative stress, cell signalling, aging, and disease. Emphasis will be placed on the recent literature. Fulfills MCDB scientific reasoning requirement.

Recommended: Prerequisites MCDB 3135 and MCDB 3145 and CHEM 3311 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

MCDB 4425 (3) Topics in Membrane Biology: Cell Biology, Physiology and Disease

Students will apply their knowledge of basic biology to exploring several of the most exciting topics in biomedicine including protein folding and stress responses, nutrient sensing and balance and signal transduction across membranes. Emphasis will be placed upon human physiology and associated human diseases including Alzheimer's disease, diabetes and cardiovascular disease. Fulfills MCDB scientific reasoning requirement.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 5425

Recommended: Prerequisites MCDB 3135 and MCDB 3145 (minimum grade C-) or instructor consent required.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

MCDB 4426 (3) Cell Signaling and Developmental Regulation

Introduces several cell signaling processes and their biological functions. Students read and analyze original research articles to learn the thinking processes of scientific research. Writing assignments and oral presentations are required. Fulfills MCDB scientific reasoning requirement.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 5426

Recommended: Prerequisites MCDB 3135 and MCDB 3145 and CHEM 4700 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

MCDB 4427 (3) Biology of the Visual System

Explores the neurobiology, cell biology, genetics and developmental biology of the visual system. Discusses neurodegenerative and vascular diseases that lead to blindness. Students read and analyze original research articles to train scientific reasoning. Involves student-organized presentations and classroom discussion. Fulfills MCDB scientific reasoning requirement.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 5427

Recommended: Prerequisites MCDB 3135 and MCDB 3145 (minimum grade C-) or instructor consent required.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

MCDB 4441 (4) Animal Developmental Diversity

Surveys development in a range of vertebrate and invertebrate systems to reconstruct the common bilaterian ancestor, and elucidate the developmental genetic changes underlying animal diversification. Lab focuses on vertebrate embryos and explores key methods in evolutionary developmental biology including in situ hybridization, embryo microinjection, and transgenesis.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 5441 and EBIO 4440 and EBIO 5440

Recommended: Prerequisites MCDB 1150 or EBIO 1210 and MCDB 2150 or EBIO 2070 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Arts Sci Gen Ed: Distribution-Natural Sci Lab

MCDB 4444 (3) Cellular Basis of Disease

Explores the cellular basis of disease. Discusses diseases arising from defects in intracellular targeting, cytoskeletal function, intracellular signaling, genomic instability, gene regulation, cell proliferation, and cell death. Involves student-organized presentations and classroom discussion. Fulfills MCDB scientific reasoning requirement.

Recommended: Prerequisites MCDB 3135 and MCDB 3145 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

MCDB 4471 (3) Mechanisms of Gene Regulation in Eukaryotes

Focuses on manifestations of regulated gene expression. Studies gene regulation at multiple steps, including transcription, RNA processing and translation. Is based on critical analysis of primary research papers. Written assignments and oral presentations are required. Fulfills MCDB scientific reasoning requirement.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 5471

Recommended: Prerequisite MCDB 3135 (minimum grade C-) or instructor consent required.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

MCDB 4520 (3) Bioinformatics and Genomics

Computational and experimental methods in bioinformatics and genomics, and how these methods provide insights into protein structure and function, molecular evolution, biological diversity, cell biology and human disease. Topics include database searching, multiple sequence alignment, molecular phylogeny, microarrays, proteomics and pharmacogenomics.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 5520

Recommended: Prerequisites MCDB 3135 or CHEM 4700 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

MCDB 4521 (1) Bioinformatics and Genomics Laboratory

Provides experience with, and exposure to, computational and experimental methods in bioinformatics and genomics. Meets once a week. Students are expected to read original research papers, discuss findings, plan and execute data analysis in selected areas.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 5521

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Arts Sci Gen Ed: Distribution-Natural Sci Lab

MCDB 4550 (3) Cells, Molecules and Tissues: A Biophysical Approach

Focuses on the biophysics governing the structure/function of enzymes, cells, extracellular matrix and tissue. Synthesizes ideas from molecular biology, physics, and biochemistry, emphasizing how low Reynolds number physics, not Newtonian physics, is relevant to life inside a cell. Fulfills MCDB scientific reasoning requirement.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 5550 and PHYS 4550 and PHYS 5550

Recommended: Prerequisites MCDB 3135 and MCDB 3145 and PHYS 2010 and PHYS 2020 and CHEM 1133 and MATH 1300 and/or CHEM 3311 (minimum grade C-) or instructor consent required.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

MCDB 4560 (3) Introduction to Biophysics

Covers an introduction to the physics of living systems. Focuses on how living systems are able to generate order, with both physical principles and biological examples. Covers the development of quantitative models for biological systems, including estimates. Taught from a physics perspective, with biology background introduced as needed.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 5560 and PHYS 4560 and PHYS 5560

Requisites: Requires a prerequisites course of PHYS 2210 (minimum grade C-).

Recommended: Prerequisite PHYS 4230.

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

MCDB 4615 (3) Biology of Stem Cells

Stem cells have received considerable notice in both the scientific and social arena. Examines the stem cell concept by a critical examination of the primary scientific literature. Topics will include pluripotency and plasticity, environment, technology, self-renewal, transdifferentiation, molecular signature, epigenetic programming and stem cell versus cancer cell. Fulfills MCDB scientific reasoning requirement.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 5615

Recommended: Prerequisite MCDB 3135 or MCDB 3145 or instructor consent required.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

MCDB 4621 (3) Genome Databases: Mining and Management

Develops essential skills for performing genomic analyses, with focus on developing practical research tools. Introduces human genome and microbiome projects, Python/Sql scripting, accessing and understanding genomic data, sequence alignment and search, evolutionary models, expression data, biological networks, and macromolecular structure.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 4621 or CHEM 5621 MCDB 5621

Recommended: Prerequisite MCDB 3135 or CSCI 3104 or CHEM 4700 and recommended corequisite of CSCI 2270.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

MCDB 4650 (3) Developmental Biology

Explores the development of invertebrate and vertebrate organisms, emphasizing cellular, molecular and genetic mechanisms. Focuses on conceptual understanding and experimental approaches to topics such as embryology, developmental control of gene expression in eukaryotic cells, mechanisms of differentiation and morphogenesis and developmental genetics.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 5651

Recommended: Prerequisites MCDB 3135 and MCDB 3145 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

MCDB 4680 (3) Mechanisms of Aging

Studies aging as a developmental process emphasizing genetic, cellular and molecular mechanisms. Fulfills MCDB scientific reasoning requirement.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 5680

Recommended: Prerequisites MCDB 3135 and MCDB 3145 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

MCDB 4750 (3) Animal Virology

Encompasses the structure and replication of both lytic and transforming animal viruses. Emphasizes diversity of naturally occurring genomic structures and the resulting strategies of infection as well as the impact of viral epidemics on society. Includes critical analysis of primary research papers. Fulfills MCDB scientific reasoning requirement.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 5750

Recommended: Prerequisite MCDB 3135 (minimum grade C-) or instructor consent required.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

MCDB 4777 (3) Molecular Neurobiology

Introduces the functional anatomy of the nervous system and explores current knowledge regarding the molecular and genetic basis of the development and function of the nervous system. Studies recent insights into the molecular basis of neurodegenerative diseases, in the last portion of the course.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 5777

Recommended: Prerequisites MCDB 3135 and MCDB 3145 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

MCDB 4790 (3) Oocytes, Stem Cells, Organisms: Experiments to Discoveries

Develop critical thinking, scientific reasoning and communication skills by reading and presenting primary research articles and Nobel Prize winning research on patterning, stem cells, cell death, genetic and epigenetic mechanisms that regulate embryonic development. Learn about experimental approaches from a historical and present view, while discussing their ethical implications.

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

MCDB 4810 (3) Insane in the Membrane: The Biology and Biophysics of the Membrane

Studies the biology and physics of the biomembrane. Topics include structure and mechanism of membrane proteins; membrane biogenesis; membrane protein folding and stability; membrane homeostasis; mechanisms of membrane fusion and fission; lipid trafficking. Fulfills MCDB scientific reasoning requirement.

Recommended: Prerequisite CHEM 4700 (minimum grade C-) or instructor consent required.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

MCDB 4811 (3) Teaching and Learning Biology

Provides an introduction to recent research into student learning on the conceptual foundations of modern biology, together with pedagogical methods associated with effective instruction and its valuation. Students will be involved in active research into conceptual and practical issues involved in biology education, methods to discover student preconceptions, and the design, testing and evaluation of various instructional interventions. Fulfills MCDB scientific reasoning requirement.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 5811 and EDUC 4811 and EDUC 6811

Recommended: Prerequisites MCDB 1150 or EBIO 1210 and MCDB 2150 and MCDB 3145.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

MCDB 4840 (1-6) Upper-Division Independent Study

An independent study contract is required.

Repeatable: Repeatable for up to 8.00 total credit hours.

Recommended: Prerequisite MCDB 2150.

MCDB 4980 (3) Honors Research

Provides faculty-supervised research for students who have been approved by the departmental honors committee. Normally taken during the semester before completion of the honors thesis.

Recommended: Prerequisite MCDB 4840 or comparable research experience, and minimum GPA of 3.20.

Additional Information: Arts Sciences Honors Course

MCDB 4990 (3) Honors Thesis

Involves the preparation and defense of an honors thesis, based on faculty-supervised original research, including final phases of the research project.

Recommended: Prerequisites MCDB 4840 or MCDB 4980 or comparable research experience, and minimum GPA of 3.3 and approval by the MCDB Honors Committee.

Additional Information: Arts Sciences Honors Course

Molecular, Cellular and Developmental Biology - Bachelor of Arts (BA)

The undergraduate degree in molecular, cellular and developmental biology emphasizes knowledge and awareness of:

- the biological sciences in general and a detailed understanding of currently important aspects of cellular biology, molecular biology, biochemistry, genetics and developmental biology; and
- the relationship of the specialty area to broader areas of science and to society in general, including ethical issues raised by current biological research and by the rapid growth of biotechnology as an important shaping force for the future.

In addition, students completing the degree in molecular, cellular and developmental biology are expected to acquire the ability and skills to:

- learn detailed laboratory procedures rapidly when the need arises;
- demonstrate a scientific vocabulary and an understanding of research methods that permits the comprehension of current journal articles, extraction of pertinent information and judgment of the quality of the work described;

- evaluate a biological problem, determine which aspects are understood and apply basic research methods and techniques to the unknown aspects; and
- communicate scientific concepts and analytical arguments clearly and concisely, both orally and in writing.

Requirements

Prerequisites

It is MCDB policy to enforce the course prerequisites listed in the course catalog. If you have not either taken and passed (C- or better) the prerequisites for a course, or obtained permission from the instructor or a departmental advisor to take the course based on equivalent preparatory course work or experience here or elsewhere, you may be administratively dropped from the course.

Course Requirements

Students must complete the general requirements of the College of Arts and Sciences and the required courses listed below. All required courses must be completed with a grade of C- or better.

It is strongly recommended that MCDB majors consult with a departmental advisor before applying AP, IB or CLEP credit. Students majoring in MCDB who transfer biology credit from other institutions also must consult a departmental advisor.

Students who plan to double major with biochemistry or chemistry are encouraged to meet with an academic advisor to understand how their chemistry courses will apply to the MCDB major.

Students who plan to also pursue a degree in engineering are encouraged to meet with an academic advisor to understand how their chemistry and calculus courses will apply to the MCDB major.

Required Courses and Credits

Code	Title	Credit Hours
Required Courses		
Select one Intro course below:		3
MCDB 1150	Introduction to Cellular and Molecular Biology (MCDB 1152 is a recommended coseminar for MCDB 1111) ¹	
MCDB 1111	Core Concepts in Biology I: Evolutionary, Molecular and Cell Biology (MCDB 1152 is not a recommended coseminar for MCDB 1111)	
Select one Genetics course below:		3
MCDB 2150	Principles of Genetics (MCDB 2152 is a recommended coseminar for MCDB 2150) ²	
MCDB 2222	Core Concepts in Biology II: Genes, Genetics and Phenotypes (MCDB 2152 is not a recommended coseminar for MCDB 2222)	
Choose one of the following research-based introductory labs:		2
MCDB 1161	From Dirt to DNA: Phage Genomics Laboratory I	
MCDB 1171	Drug Discovery Through Hands-on Screens I	
MCDB 2171	Drug Discovery Through Hands-On Screens 2	
<i>Cell Biology courses:</i>		
MCDB 3135	Molecular Cell Biology I	3
MCDB 3140	Cell Biology Laboratory	2
MCDB 3145	Molecular Cell Biology II	3

Upper-division capstone and scientific reasoning requirements

Select one of the following MCDB Capstone courses: 3

MCDB 4650 Developmental Biology

MCDB 4300 Immunology

MCDB 4777 Molecular Neurobiology

Select one MCDB Scientific Reasoning course (see department for full list of approved courses) 3

MCDB 4350 Microbial Diversity and the Biosphere

MCDB 4361 Evolution and Development

MCDB 4410 Human Molecular Genetics

MCDB 4422 Molecular Biology of Free Radicals: Role(s) in Oxidative Stress, Signaling, Disease, Aging

MCDB 4425 Topics in Membrane Biology: Cell Biology, Physiology and Disease

MCDB 4426 Cell Signaling and Developmental Regulation

MCDB 4427 Biology of the Visual System

MCDB 4444 Cellular Basis of Disease

MCDB 4471 Mechanisms of Gene Regulation in Eukaryotes

MCDB 4550 Cells, Molecules and Tissues: A Biophysical Approach

MCDB 4615 Biology of Stem Cells

MCDB 4680 Mechanisms of Aging

MCDB 4750 Animal Virology

MCDB 4790 Oocytes, Stem Cells, Organisms: Experiments to Discoveries

MCDB 4810 Insane in the Membrane: The Biology and Biophysics of the Membrane

MCDB 4811 Teaching and Learning Biology

Electives

An additional 8 credit hours of MCDB upper-division electives (see department for approved courses)³ 8

Total Credit Hours 30

Code	Title	Credit Hours
------	-------	--------------

Required Ancillary Courses:

Complete the following chemistry courses: 18-20

CHEM 1113 General Chemistry 1

& CHEM 1114 and Laboratory in General Chemistry 1

CHEM 1133 General Chemistry 2

& CHEM 1134 and Laboratory in General Chemistry 2

CHEM 3311 Organic Chemistry 1

& CHEM 3321 and Laboratory in Organic Chemistry 1

CHEM 4611 Survey of Biochemistry

Select one of the following physics sequences: 9-10

PHYS 1110 General Physics 1

& PHYS 1120 and General Physics 2 (including PHYS 1140 lab)⁴

PHYS 2010 General Physics 1

& PHYS 2020 and General Physics 2⁴

Select one of the following calculus or statistics courses:⁵ 3-5

Calculus:

MATH 1300 Calculus 1

MATH 1310 Calculus for Life Sciences

APPM 1350 Calculus 1 for Engineers

Statistics:	
MATH 2510	Introduction to Statistics
EBIO 1010	Introduction to Quantitative Thinking for Biologists
IPHY 2800	Introduction to Statistics
PSYC 2111	Psychological Science I: Statistics
<hr/>	
Total Credit Hours	30-35

- EBIO 1210 is an acceptable alternative to MCDB 1150.
- EBIO 2070 is accepted in place of MCDB 2150.
- Up to 6 hours of MCDB 4840 Upper-Division Independent Study, MCDB 4980 Honors Research, MCDB 4990 Honors Thesis, or select courses from outside MCDB may be used. See department for details.
- PHYS 2010 and PHYS 2020 are algebra based. PHYS 1110, PHYS 1120 and PHYS 1140 are calculus-based and require calculus 1 and 2.
- Not all the courses in this category will also meet the QRMS component of the Gen Ed Skills Requirement.

Graduating in Four Years

Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of "adequate progress" as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress in molecular, cellular and developmental biology, students should meet the following requirements:

- In the first semester, declare the MCDB major.*
- During the first and second semesters, complete either general chemistry or the introductory MCDB sequence.
- By the end of the fourth semester, complete general chemistry and the introductory MCDB sequence with a C- or better.
- By the end of the eighth semester, complete the major.

*If the major is not started in the first year, the student must meet with an MCDB academic advisor to ensure that it is still possible to complete the major in 4 years.

Recommended Four-Year Plan of Study

Through the required course work for the major, students will fulfill all 12 credits of the Natural Sciences area of the Gen Ed Distribution Requirement, including the Lab requirement, and, potentially, the QRMS component of the Gen Ed Skills Requirement.

Course	Title	Credit Hours
Year One		
Fall Semester		
MCDB 1150	Introduction to Cellular and Molecular Biology	3
MCDB 2 Credit Hour Lab		2

MCDB 1152	Problem Solving Co-Seminar for Introduction to Molecular and Cellular Biology (strongly recommended, not required)	1
CHEM 1113 & CHEM 1114	General Chemistry 1 and Laboratory in General Chemistry 1	5
Gen. Ed. Skills course (example: Lower-division Written Communication)		3
		Credit Hours
		14
Spring Semester		
MCDB 2150	Principles of Genetics	3
MCDB 2152	Problem Solving Co-Seminars for Genetics (strongly recommended, not required)	1
CHEM 1133 & CHEM 1134	General Chemistry 2 and Laboratory in General Chemistry 2	5
Gen. Ed. Distribution course (example: Social Sciences)		3
Gen. Ed. Skills course (example: QRMS) or Elective if QRMS is fulfilled by major requirement.		3
		Credit Hours
		15
Year Two		
Fall Semester		
MCDB 3135	Molecular Cell Biology I	3
MCDB 3140	Cell Biology Laboratory	2
CHEM 3311 & CHEM 3321	Organic Chemistry 1 and Laboratory in Organic Chemistry 1	5
Gen. Ed. Distribution/Diversity course (example: Social Sciences/Global Perspective)		3
Elective or MAPS		3
		Credit Hours
		16
Spring Semester		
MCDB 3145	Molecular Cell Biology II	3
MATH 1300 OR Statistics: Calculus 1 or Statistics OR (some students may decide to take Organic Chemistry 2 as an approved out of department, upper division MCDB elective, in that case, taking stats or calc is advised for later semesters)		3-5
Gen. Ed. Distribution course (example: Social Sciences)		3
Gen. Ed. Distribution course (example: Arts & Humanities)		3

Elective or MAPS (only if taking Statistics)		3
	Credit Hours	15-17
Year Three		
Fall Semester		
MCDB Upper-division Elective		3
CHEM 4611	Survey of Biochemistry	3
Gen. Ed. Skills course (example: Upper-division Written Communication)		3
Gen. Ed. Distribution course (example: Arts & Humanities)		3
Free Elective		3
	Credit Hours	15
Spring Semester		
MCDB Upper-division Elective		3
MCDB Capstone or MCDB Sci Reasoning		3
Gen. Ed. Distribution course (example: Social Sciences)		3
Upper-Division Elective		3
Upper-Division Elective		3
	Credit Hours	15
Year Four		
Fall Semester		
MCDB Capstone or MCDB Sci Reasoning		3
PHYS 2010	General Physics 1	5
Gen. Ed. Distribution/Diversity course (example: Arts & Humanities/US Perspective)		3
Free Elective or Upper-Division Elective (if needed)		3
Free Elective		3
	Credit Hours	17
Spring Semester		
MCDB Elective		3
PHYS 2020	General Physics 2	5
Gen. Ed. Distribution course (example: Arts & Humanities)		3
Upper-Division Elective		3
	Credit Hours	14
	Total Credit Hours	121-123

Peace, Conflict and Security Studies

Peace, conflict and security studies (PACS) is an interdisciplinary field focused on advancing our understanding of conflict dynamics and improving our ability to wisely, equitably and efficiently handle conflict.

The program empowers students by teaching them sophisticated advocacy, collaboration and peace-building skills that are essential to solving today's big problems.

PACS offers an individually tailored program of study that provides students with:

- the ability to more constructively handle conflict in family, workplace and community settings;
- a foundation for peace-and conflict-related careers; and
- a better understanding of public policy controversies.

Course code for this program is PACS.

Certificate

- Peace, Conflict and Security - Certificate (p. 493)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Castel, Alison Rebecca (https://experts.colorado.edu/display/fisid_158167)

Instructor; MS, University of Pennsylvania

Courses

PACS 2500 (3) Introduction to Peace, Conflict and Security Studies

Introduces the related fields of peace, conflict and security studies. Examines causes and dynamics of conflict and violence (interpersonal to global). Examines theory and research concerning peace movements, conflict resolution and security institutions. Explores career options in related fields.

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Arts Sci Gen Ed: Diversity-Global Perspective

PACS 3700 (3) Communication and Conflict Management

Examines interdisciplinary concepts and theories enabling students to better understand different types of conflict, sources of conflict, and communication patterns that serve to create, maintain and transform conflict. Teaches practical skills in conflict management areas such as bargaining, facilitation, mediation and negotiation.

Equivalent - Duplicate Degree Credit Not Granted: COMM 3700

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

PACS 3800 (3) Security Studies

Provides an introduction to the academic field of "Security Studies". Focuses on motives, institutions and processes associated with societal defense against threats posed to cherished possessions and the pursuit of stable, autonomous and prosperous existence. Reviews related theoretical traditions associated with militarism, war and conflict. Covers key concerns of (in-)security in post 9/11 global society, including surveillance, terrorism, genocide and insurgency.

Equivalent - Duplicate Degree Credit Not Granted: PSCI 3123

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

PACS 4500 (3) Senior Seminar in Peace, Conflict and Security Studies

Uses theoretical perspectives in peace, conflict and security studies to conduct in-depth research projects, using a case-study approach. Emphasizes use the critical thinking skills in writing, presentations and class discussion. Case study examples include: U.S. militarism, humanitarian intervention in genocide and environmental conflict resolution.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires a prerequisite course of PACS 2500 (minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior).

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

Peace, Conflict and Security - Certificate

The Certificate Program in Peace, Conflict and Security Studies (PACS) is designed to help students explore why conflict and violence occur, and learn how conflict can be managed and transformed to accomplish constructive ends. The certificate is granted by the College of Arts and Sciences, but students in any school or major at the University of Colorado Boulder may earn it.

The program develops an interdisciplinary perspective on the study of conflict, cooperation, war, and peace. Coursework focuses on theorizing and analyzing various forms of intra- and international conflict, and also related possibilities for personal and social change. Coursework also emphasizes development of practical skills and experience in conflict resolution and civic activism. The program encourages hands-on, “in the field” engagement through volunteer service, enrollment in study-abroad programs, and internship placement with related agencies and programs.

For more information or an application, visit the Peace and Conflict Studies Program (<http://www.colorado.edu/pacs>) website.

Course code for this program is PACS.

Requirements

Completion of the certification requires 21 credit hours (12 upper-division) of study, up to six (6) of these credit hours may be completed through approved transfer credit. Each of these courses must be completed with a grade of C- or better. These courses must also include:

Required Courses and Credit Hours

Code	Title	Credit Hours
Required Courses		
PACS 2500	Introduction to Peace, Conflict and Security Studies	3
PACS 3700 or PACS 3800	Communication and Conflict Management Security Studies	3
PACS 4500	Senior Seminar in Peace, Conflict and Security Studies	3
Electives ¹		
6 credit hours of relevant course work in the student's major ¹		6
6 credit hours of relevant course work outside the major		6
Total Credit Hours		21

¹ All electives must be approved by the PACS director.

² In the event a major department does not have 6 hours of relevant courses, the PACS director may allow for substitutions with PACS approved courses outside the major department.

Philosophy

Philosophy provides an essential component in any sound general education: that form of education designed not to prepare one for a specific career, but to give one a broad and general understanding of the world, the place of human beings in the world and human values, as well as general intellectual skills that can be brought to bear on diverse subject matters.

Course code for this program is PHIL.

Bachelor's Degree

- Philosophy - Bachelor of Arts (BA) (p. 500)

Minor

- Philosophy - Minor (p. 502)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Courses

PHIL 1000 (3) Introduction to Philosophy

Introduces students to the most fundamental questions of human existence, either topically or through various major figures in philosophy. Topics may include free will, the mind-body problem, the nature of the self, the existence of God, knowledge of the external world, the nature of morality, the meaning of life.

Additional Information: GT Pathways: GT-AH3 - Arts Hum: Ways of Thinking

Arts Sci Core Curr: Ideals and Values

Arts Sci Gen Ed: Distribution-Arts Humanities

PHIL 1010 (3) Introduction to Western Philosophy: Ancient

Develops three related themes: the emergence in antiquity of a peculiarly scientific mode of thinking; the place of religious belief within this developing scientific world view; and the force of ethical speculation within the culture and political climates of ancient Greece and Rome. PHIL 1010 and PHIL 1020 may be taken in either order.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 1030

Additional Information: GT Pathways: GT-AH3 - Arts Hum: Ways of Thinking

Arts Sci Core Curr: Historical Context

Arts Sci Gen Ed: Distribution-Arts Humanities

PHIL 1020 (3) Introduction to Western Philosophy: Modern

Introduces several philosophical texts and doctrines of 17th and 18th century Europe. Gives special attention to the connection between philosophical ideas and the wider historical milieu: social, political and literary. PHIL 1010 and PHIL 1020 may be taken in either order.

Additional Information: GT Pathways: GT-AH3 - Arts Hum: Ways of Thinking

Arts Sci Core Curr: Historical Context

Arts Sci Gen Ed: Distribution-Arts Humanities

PHIL 1100 (3) Ethics

Introductory study of major philosophies on the nature of the good for humanity, principles of evaluation, and moral choice as they apply to contemporary moral problems.

Additional Information: GT Pathways: GT-AH3 - Arts Hum: Ways of Thinking

Arts Sci Core Curr: Ideals and Values

Arts Sci Gen Ed: Distribution-Arts Humanities

PHIL 1160 (3) Introduction to Bioethics

Introduce students to topics in contemporary bioethics. No previous knowledge of science, philosophy, or bioethics will be presupposed. A primary goal will be to teach students how to think critically and write persuasively.

Additional Information: Arts Sci Core Curr: Ideals and Values

Arts Sci Gen Ed: Distribution-Arts Humanities

PHIL 1200 (3) Contemporary Social Problems

Examines competing positions in debates over a wide variety of controversial moral, social and political issues. Topics may include: abortion, world poverty, animal rights, immigration, physician-assisted suicide, freedom of religion, hate speech, cloning, income inequality, pornography, gun rights, racial profiling, capital punishment, overpopulation, prostitution, drug legalization, torture. Formerly titled 'Philosophy and Society.' Repeatable up to 6 credit hours.

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: GT Pathways: GT-AH3 - Arts Hum: Ways of Thinking

Arts Sci Core Curr: Ideals and Values

Arts Sci Core Curr: United States Context

Arts Sci Gen Ed: Distribution-Arts Humanities

MAPS Course: Social Science

PHIL 1400 (3) Philosophy and the Sciences

Considers philosophical topics and concepts related to the natural sciences, such as the following: science and pseudo-science; scientific method; the nature of explanation, theory, confirmation, and falsification; the effect of science on basic concepts like mind, freedom, time, and causality; ethics of experimentation; and the relation of science to society.

Additional Information: GT Pathways: GT-AH3 - Arts Hum: Ways of Thinking

Arts Sci Core Curr: Natural Science Non-Sequence

Arts Sci Gen Ed: Distribution-Arts Humanities

Arts Sci Gen Ed: Distribution-Natural Sciences

PHIL 1440 (3) Critical Thinking

Develops students' skills in evaluating arguments and other aspects of critical thinking, focusing on the ways people reason and attempt to justify their beliefs. Activities may include modeling arguments, detecting common fallacies, examining the use (and misuse) of scientific evidence, and learning the basics of symbolic logic. Formerly titled "Introductory Logic.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

PHIL 1500 (3) Reading, Writing and Reasoning

Teaches students how to write argumentative papers. Each seminar will focus narrowly on some controversial topic. For example, one seminar might focus on the existence of God, whereas another might question whether we have free will. In all cases, a significant portion of the course will be devoted to learning how to write cogent argumentative papers about controversial topics.

Additional Information: Arts Sci Core Curr: Written Communication

Arts Sci Gen Ed: Distribution-Arts Humanities

Arts Sci Gen Ed: Written Communication-Lower

PHIL 1600 (3) Philosophy and Religion

Philosophical introduction to some of the central concepts and beliefs of religious traditions, focusing particularly on the question of the existence of God and on the relation between religious beliefs and moral beliefs.

Additional Information: GT Pathways: GT-AH3 - Arts Hum: Ways of Thinking

Arts Sci Core Curr: Ideals and Values

Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Asia Content

PHIL 1700 (3) Philosophy and the Arts

Considers philosophic questions involved in the analysis and assessment of artistic experiences and of the objects with which the arts, including the literary arts, are concerned.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

PHIL 1750 (3) Philosophy through Literature

Introduces philosophy through literature. Selected novels, plays, and short stories that exemplify traditional problems in philosophy are read and discussed.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

PHIL 1800 (3) Open Topics/Philosophy

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

PHIL 2140 (3) Environmental Justice

Traditional and contemporary theories of justice are employed in order to critically analyze social and political issues that have important environmental dimensions. Assesses the relationship of justice and equity to the presuppositions of national and global environmental issues and policies.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

PHIL 2150 (3) Ethics and Sex

Explores a variety of moral questions relating to sex and procreation. Topics may include arguments for and against the wrongness of masturbation, homosexuality, transgenderism, incest, pedophilia, bestiality, necrophilia, voyeurism, pornography, sadomasochism, prostitution, abortion, commercial surrogacy and cloning, as well as arguments addressing such additional subjects as what constitutes rape and whether procreation is morally obligatory, optional, or forbidden.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

PHIL 2160 (3) Ethics and Information Technology

Examines contemporary ethical debates about the use, misuse, and development of information technology. Topics include ethical issues surrounding privacy, security, identity, hacking and cyber crime, automation technologies such as drones and self-driving cars, artificial intelligence, and virtual reality.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

Arts Sci Gen Ed: Distribution-Arts Humanities

PHIL 2200 (3) Major Social Theories

Introductory study of major philosophies of the past in relation to political, economic, and social issues.

Additional Information: Arts Sci Core Curr: Ideals and Values

Arts Sci Gen Ed: Distribution-Arts Humanities

PHIL 2220 (3) Philosophy and Law

Considers controversies about the law in general and the U.S. system in particular. Questions may include: What is law? What should the law prohibit (e.g., abortion, drug use, prostitution, cloning)? Is there a moral obligation to obey the law? Can civil disobedience be justified? How do we justify punishing those who break the law? Is capital punishment morally justifiable?

Additional Information: Arts Sci Core Curr: United States Context

Arts Sci Gen Ed: Distribution-Arts Humanities

PHIL 2240 (3) Philosophy and Sports

Introduces students to philosophical issues surrounding sport. Topics may include: paying college athletes, sex testing in sports, the use of performance enhancing drugs, sports and gambling, the nature and value of sports and sportsmanship, gender equity and sports, the ethics of strategic fouling, sports fandom, the coach-athlete relationship, athletes as role models, and the risk of extreme bodily harm.

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

Arts Sci Gen Ed: Distribution-Social Sciences

PHIL 2260 (3) Philosophy and Food

Introduces students to topics and issues connected to the nature of food. Helps students investigate questions about our food choices, production and distribution, as well as connection food bears to culture and identity. No previous experience in philosophy required or presupposed.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

PHIL 2270 (3) Philosophy and Race

Explores the historical relationship between western philosophy and race and investigates the ways in which philosophy can be used to address contemporary racial issues.

Additional Information: Arts Sci Core Curr: Human Diversity

Arts Sci Gen Ed: Diversity-U.S. Perspective

Arts Sci Gen Ed: Distribution-Arts Humanities

Arts Sci Gen Ed: Diversity-Global Perspective

PHIL 2290 (3) Philosophy and Gender

Analyzes critically the concepts of sex, gender, and their intersection with other aspects of identity, exploring how these impact the extent to which people face injustice because of their gender.

Additional Information: Arts Sci Core Curr: Human Diversity

Arts Sci Gen Ed: Distribution-Arts Humanities

Arts Sci Gen Ed: Diversity-U.S. Perspective

Arts Sci Gen Ed: Diversity-Global Perspective

PHIL 2390 (3) Philosophy and Psychology

Interdisciplinary course on issues where philosophy and psychology meet. For example, topics such as selfhood, motivation, psychotherapy, freedom, and human behavior are examined. Selected readings in philosophy and psychology are required.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

PHIL 2440 (3) Symbolic Logic

Introduces students to sentential logic, the logic of quantification and some of the basic concepts and results of metalogic (interpretations, validity and soundness).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

PHIL 2750 (3) Philosophy and Science Fiction

Explores philosophical issues in science fiction literature and film. Topics may include time travel, artificial intelligence, free will, personal identity, and how scientific advances will change human life and society. Students may read science fiction stories and philosophical articles, and watch several movies.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

PHIL 2800 (3) Open Topics/Philosophy

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

PHIL 2840 (1-3) Independent Study

Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

PHIL 3000 (3) History of Ancient Philosophy

Survey of selected figures in ancient Greek and Roman philosophy and in medieval philosophy. Philosophers studied may include the pre-Socratics, Plato, Aristotle, the Hellenistic philosophers and such figures as Aquinas and Occam. Explores the larger cultural context that influenced these philosophers and were, in turn, influenced by them. Department enforced prerequisite: 6 hours of philosophy coursework.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Core Curr: Historical Context

Arts Sci Gen Ed: Distribution-Arts Humanities

PHIL 3010 (3) History of Modern Philosophy

Introduces modern philosophy, focusing on the period from Descartes through Kant. In addition to careful analysis of philosophical arguments, attention is paid to the ways in which philosophers responded to and participated in major developments in the 17th and 18th century, such as the scientific revolution. Department enforced prerequisite: 6 hours of philosophy course work.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Core Curr: Historical Context

Arts Sci Gen Ed: Distribution-Arts Humanities

PHIL 3100 (3) Ethical Theory

Examines important doctrines and arguments in various areas of theoretical ethics, such as the normative ethics of behavior, axiology, virtue theory and metaethics.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite 6 hours of philosophy course work.

Additional Information: Arts Sci Core Curr: Ideals and Values

Arts Sci Gen Ed: Distribution-Arts Humanities

PHIL 3110 (3) Feminist Practical Ethics

Explores a variety of personal and public policy issues in the light of the basic feminist commitment to opposing women's subordination. Provides a sense of how a principled commitment to feminism may influence or be influenced by prevailing interpretation of contemporary ideals and values, and gives an opportunity for developing skills of critical analysis.

Equivalent - Duplicate Degree Credit Not Granted: WGST 3110

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite PHIL 2290 or WGST 2000 or WGST 2290.

Additional Information: Arts Sci Core Curr: Ideals and Values

Arts Sci Gen Ed: Distribution-Arts Humanities

PHIL 3140 (3) Environmental Ethics

Examines major traditions in moral philosophy to see what light they shed on value issues in environmental policy and the value presuppositions of the economic, ecological, and juridical approaches to the environment.

Equivalent - Duplicate Degree Credit Not Granted: ENVS 3140

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite PHIL 1100 or PHIL 1200 or PHIL 2200 or PHIL 3100 or PHIL 3200.

Additional Information: Arts Sci Core Curr: Ideals and Values

Arts Sci Gen Ed: Distribution-Arts Humanities

PHIL 3160 (3) Bioethics

Analysis of ethical problems involved in such issues as abortion, euthanasia, organ transplants, eugenics, treatment of the patient as a person and the institutional nature of the health care delivery system. Department enforced prerequisite: 6 hours of philosophy course work.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Core Curr: Ideals and Values

Arts Sci Gen Ed: Distribution-Arts Humanities

PHIL 3180 (3) Critical Thinking: Contemporary Topics

Looks at a selected topic such as nuclear disarmament, racial and sexual discrimination, animal rights, or abortion and euthanasia by examining issues through the lens of critical philosophical analysis. Reviews the reasoning behind espoused positions and the logical connections and argument forms they contain. Department enforced prerequisite: 6 hours of philosophy course work.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

PHIL 3190 (3) War and Morality

Focuses on moral issues raised by war as a human institution. What are the justifications, limits and alternatives? Does the advent of nuclear weapons change the nature of war? Department enforced prerequisite: 6 hours of philosophy course work.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Core Curr: Ideals and Values
Arts Sci Gen Ed: Distribution-Arts Humanities

PHIL 3200 (3) Social and Political Philosophy

Systematic discussion and analysis of such philosophic ideas as community, freedom, political power, and violence.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite 6 hours of philosophy course work.

Additional Information: Arts Sci Core Curr: Ideals and Values
Arts Sci Gen Ed: Distribution-Arts Humanities

PHIL 3260 (3) Philosophy and the International Order

Considers philosophical topics concerning the international economic, political and legal systems. Topics that may be considered include the nature of international law, war and peace, humanitarian intervention, international justice, world hunger and human rights. Department enforced prerequisite: 6 hours philosophy course work.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Core Curr: Ideals and Values
Arts Sci Gen Ed: Distribution-Arts Humanities

PHIL 3310 (3) Cognitive Science

An interdisciplinary introduction to cognitive science, drawing from psychology, philosophy, artificial intelligence, neuroscience, and linguistics.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 3702 and LING 3005 and PSYC 3005 and SLHS 3003

Recommended: Prerequisites two of the following CSCI 1300 or LING 2000 or PHIL 2440 or PSYC 2145.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Arts Sci Gen Ed: Distribution-Social Sciences
Arts Sci Gen Ed: Distribution-Arts Humanities

PHIL 3410 (3) History of Science: Ancients to Newton

Surveys the history of science up to Newton, including the emergence of scientific modes of thinking from religious and philosophical roots in the Near East and Greece to the development of these modes in the Middle Ages and Renaissance. Culminates with Isaac Newton and the 17th century scientific revolution. Department enforced prerequisite: 6 hours of philosophy course work.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Core Curr: Historical Context
Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences
Arts Sci Gen Ed: Distribution-Arts Humanities

PHIL 3430 (3) History of Science: Newton to Einstein

History of physical and biological science, from the epoch-making achievements of Charles Darwin in biology to the dawn of the 20th century revolutions in physics, chemistry and genetics. Deals with the success of the mechanical philosophy of nature and its problems. Department enforced prerequisite: 6 hours of philosophy course work.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Core Curr: Historical Context
Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences
Arts Sci Gen Ed: Distribution-Arts Humanities

PHIL 3480 (3) Critical Thinking/Writing in Philosophy

Focuses upon the fundamental skills, methods, concepts and distinctions that are essential for the study of philosophy. Basic skills covered include the writing of philosophy papers, the reading of articles and the extraction and evaluation of arguments.

Requisites: Requires a prerequisite or corequisite course of PHIL 1440 or PHIL 2440 (minimum grade D-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) Philosophy (PHIL) majors only (excluding minors).

Recommended: Prerequisites 6 hours of philosophy course work.

Additional Information: Arts Sci Core Curr: Written Communication
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Written Communication-Upper

PHIL 3600 (3) Philosophy of Religion

Philosophical discussion of fundamental issues in religion, such as existence of God, religious experience, faith and reason, evil, immortality and religious language. Department enforced prerequisite: 6 hours of philosophy course work.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Core Curr: Ideals and Values
Arts Sci Gen Ed: Distribution-Arts Humanities

PHIL 3700 (3) Aesthetic Theory

Introduces major theories of aesthetics and contemporary discussions of problems, such as the nature of art and the problem of evaluations in art. Department enforced prerequisite: 6 hours of philosophy course work.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

PHIL 3800 (3) Open Topics in Philosophy

See current departmental announcements for specific content.

Department enforced prerequisite: 6 hours of philosophy course work.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

PHIL 3840 (1-3) Independent Study

Department enforced prerequisite: 6 hours of philosophy course work.

Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

PHIL 3930 (1-6) Internship in Social Policy

Under the guidance of an official in a governmental or non-governmental organization, students are assigned to projects selected for their academic suitability as well as for value to the sponsoring organization. Prior approval of department required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Recommended: Prerequisites PHIL 1200 and PHIL 2200 and PHIL 3200 and 9 hours in moral or political philosophy course work.

PHIL 4010 (3) Single Philosopher

Intensively studies the work of one historical figure in philosophy, with the aim of reaching a broad understanding of the philosopher's whole body of thought. Philosophers covered include, from year to year, Plato, Aristotle, Augustine, Aquinas, Descartes, Spinoza, Locke, Leibniz, Hume, and Kant. Includes at least one course per year on an ancient author and one course per year on a modern author.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 5010

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite 12 hours philosophy course work.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

PHIL 4020 (3) Topics in the History of Philosophy

Examines a specific philosophical problem over an extended historical period.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 5020

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisites 12 hours of philosophy course work including PHIL 3000 and PHIL 3010.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

PHIL 4030 (3) Medieval Philosophy

Introduces philosophy from the late Roman era to the 14th century. Philosophers studied may include Augustine, Boethius, Aquinas, and Ockham. Topics range over religion, ethics, mind, and metaphysics.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite 12 hours philosophy course work.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

PHIL 4040 (3) Studies in 20th Century Philosophy

Studies two or three major philosophies prominent during the last century.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite 12 hours philosophy course work.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

PHIL 4070 (3) Existentialist Philosophy

Examines central figures and texts in the existential tradition, from Kierkegaard and Nietzsche to Heidegger and Sartre.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite 12 hours philosophy course work.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

PHIL 4110 (3) Contemporary Moral Theory

Provides an in-depth look at some recent work in moral theory. Topics covered, varying from year to year, include: consequentialism and its critics; virtue theory; moral psychology; impartiality and the personal point of view.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 5110

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisites PHIL 3100 and 12 hours philosophy course work.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

PHIL 4120 (3) Philosophy and Animals

Examines the moral status of nonhuman animals, and its implications for the common use of animals as food and experimental subjects for humans.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 5120

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite PHIL 3100 and 12 hours philosophy course work.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

PHIL 4200 (3) Contemporary Political Philosophy

Provides a survey of recent approaches to political philosophy: liberalism (Rawls, Dworkin); libertarianism (Nozick); communitarianism (Sandel, Macintyre); feminism (Jaggar). Topics and readings vary with the instructor.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 5200

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite courses of PHIL 2200 and PHIL 3200 (all minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite 12 hours of philosophy course work.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

PHIL 4210 (3) Classical Greek Political Thought

Studies main representatives of political philosophy in antiquity (Plato, Aristotle, Cicero) and of the most important concepts and values of ancient political thought. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4041 and CLAS 5041 and HIST 4041

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

PHIL 4250 (3) Marxism

Historical and systematic study of principal themes of Marxist thought, from its Hegelian origins to its contemporary varieties, emphasizing the works of Marx and Engels.

Equivalent - Duplicate Degree Credit Not Granted: GRMN 4251

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite 12 hours of GRMN or PHIL course work or instructor consent.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

Arts Sci Gen Ed: Distribution-Social Sciences

PHIL 4260 (3) Philosophy of Law

Considers philosophical topics concerning law and the U.S. legal system. Topics that may be considered include the nature of law, relations between law and morality, justifications of punishment, the moral duty to obey the law, and law and liberty.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 5260

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite 12 hours philosophy course work.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

PHIL 4300 (3) Philosophy of Mind

Discusses topics in the philosophy of mind, including the mind-body problem, consciousness, intentionality, rationality, mental causation and the nature of mental states.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 5300

Requisites: Requires prerequisite courses PHIL 2440 and PHIL 3010 and PHIL 3480 and PHIL 4340 (all minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

PHIL 4340 (3) Epistemology

Studies some of the main topics of theory of knowledge, such as evidence, justification, prediction, explanation, skepticism, and concept acquisition.

Equivalent - Duplicate Degree Credit Not Granted: 5340

Requisites: Restricted to students with 57-180 credits (Junior or Senior) Philosophy (PHIL) majors only.

Recommended: Prerequisites PHIL 3480 and 12 credit hours of philosophy including PHIL 2440 and PHIL 3010.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

PHIL 4360 (3) Metaphysics

Traditional and contemporary theories of the basic categories of reality and the human relationship to it, including universals, substance, identity, change, mind and body, free will and modality.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 5360

Requisites: Requires prerequisite courses PHIL 2440 and PHIL 3010 and PHIL 3480 and PHIL 4340 (all minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

PHIL 4370 (3) Free Will and Determinism

Explores the full range of questions relating to the problem of free will and determinism. Topics may include; the scientific evidence for determinism, hard versus soft determinism, arguments for and against the compatibility of free will and determinism, moral responsibility and the principle of alternate possibilities, hierarchical motivation, the deep self, reactive attitudes, the intelligibility question for libertarianism, divine foreknowledge.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 5370

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

PHIL 4400 (3) Philosophy of Science

Equivalent - Duplicate Degree Credit Not Granted: PHIL 5400

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisites 12 hours philosophy course work including PHIL 2440.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

PHIL 4440 (3) Topics in Logic

Provides for offering courses in a variety of topics in logic, including, but not limited to, mathematical logic, philosophical issues in logic, probability theory, decision theory, and inductive logic. Department enforced prerequisite: 12 hours PHIL course work, including PHIL 2440.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 5440

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

PHIL 4450 (3) History and Philosophy of Physics

Investigates the role of experiment in physics. Uses case studies in the history and philosophy of physics and in scientific methodology.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 5450 and PHYS 4450 and PHYS 5450

Requisites: Requires prerequisite course PHYS 1020 or PHYS 1120 or PHYS 2020 (all minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite 12 hours philosophy course work.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

Arts Sci Gen Ed: Distribution-Natural Sciences

PHIL 4460 (3) Modal Logic

Introduces the most philosophically relevant kind of logic that builds on PHIL 2440. Modal logic is the logic of the concepts of necessity, possibility and contingency. A variety of systems of sentential modal logic will be covered, along with the standard system of first-order modal logic.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 5460

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite PHIL 2440.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

PHIL 4470 (3) Probability and Rational Choice

Examines issues in four related areas: probability theory (e.g. the interpretation of probability, the raven paradox, and the principle of indifference), decision theory (e.g., the Newcomb problem, the toxin puzzle, and Pascal's wager), game theory (e.g., Prisoner's dilemma, tragedy of the commons, and Schelling points), and social choice theory (e.g., Arrow's theorem). Familiarity with symbolic logic is strongly recommended.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 5470

Recommended: Prerequisite PHIL 2440 and 12 hours philosophy course work.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

PHIL 4490 (3) Philosophy of Language

Examines the nature of language through topics such as truth, reference, meaning, and use, as well as the general relationships between language and action, cognition, logic, and reality.

Requisites: Requires prerequisite course PHIL 2440 (minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

PHIL 4600 (1) Theology Forum Seminar

Discusses a variety of theological and philosophical topics. Some reading, much discussion, occasional guest speakers.

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite 12 hours philosophy course work.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

PHIL 4800 (3) Open Topics in Philosophy

See current departmental announcements for specific content.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite 12 hours philosophy course work.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

PHIL 4830 (3) Senior Seminar in Philosophy

Critical in-depth examination of a selected philosophical topic.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) Philosophy (PHIL) majors only.

Recommended: Prerequisite 15 hours philosophy course work.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

PHIL 4840 (1-3) Independent Study

Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior).

Recommended: Prerequisite 12 hours philosophy course work.

PHIL 4950 (3) Honors Thesis

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite 12 hours philosophy course work.

Additional Information: Arts Sciences Honors Course

Philosophy - Bachelor of Arts (BA)

The undergraduate degree in philosophy emphasizes knowledge and awareness of:

- some of the principal philosophical texts in the history of western philosophy, from its beginnings in Greece to the late 19th century;
- some of the main currents in 20th century philosophy, including some acquaintance with contemporary philosophical issues and modes of inquiry;
- a single major author or a single philosophical movement; and
- elementary formal logic.

In addition, students completing the major will develop the knowledge and skills to:

- form reasoned opinions about the issues—moral, religious, political, etc.—that educated people debate;
- understand, analyze and evaluate complex arguments and theories;
- distinguish between the main thrust of an argument or position and what is ancillary to it;
- discover and critically examine the underlying presuppositions of major systems of ideas or programs for action;
- see important connections between different systems of ideas or programs for action;
- explain difficult ideas and concepts in an informed, effective and coherent manner;
- develop a thesis and present a coherent argument for it;
- write a clear and coherent essay; and
- engage in rational and productive discussion of issues and arguments.

In addition to the general philosophy major, the department offers two topically oriented major tracks that are interdisciplinary in nature: law and society and values and social policy.

Concurrent Degree Program BA/MA in Philosophy

The Philosophy Department offers a five-year program that leads to the concurrent awarding of both the BA and MA in philosophy (p. 1135). Students who successfully complete this program receive the two degrees simultaneously, normally at the end of their fifth year of study.

To complete the concurrent BA/MA program, the student will fulfill separately all requirements for the BA and thesis-based MA, with the exception that two 4000-level courses can satisfy requirements for both the BA and the MA. In addition to these two overlapping 4000-level courses, the student must complete all of the remaining requirements for the general major in philosophy, as well as all of the remaining requirements for the thesis-based MA in philosophy.

For more information, see the department's Concurrent BA/MA Program (<http://www.colorado.edu/philosophy/undergraduate/concurrent-ba-ma-program>) webpage.

Requirements

Program Requirements

For the undergraduate degree in philosophy, students must take 33 to 45 credit hours in philosophy, no fewer than 18 of which must be upper division, earning 33 credit hours with a grade of C- or better in each course in philosophy and a C (2.00) average for all work attempted in philosophy. No fewer than 12 of those credit hours must be completed on the Boulder campus. No more than 8 credit hours of independent study may count toward the minimum requirement.

Students must complete the general requirements of the College of Arts and Sciences and the required courses listed below.

Required Courses and Credits

Code	Title	Credit Hours
History		
PHIL 3000	History of Ancient Philosophy	3
PHIL 3010	History of Modern Philosophy	3
Select one of the following:		3
PHIL 4010	Single Philosopher	
PHIL 4020	Topics in the History of Philosophy	
PHIL 4030	Medieval Philosophy	
PHIL 4040	Studies in 20th Century Philosophy	
PHIL 4070	Existentialist Philosophy	
PHIL 4250	Marxism	
Logic		
Select one of the following:		3
PHIL 2440	Symbolic Logic	
PHIL 4440	Topics in Logic (Mathematical Logic)	
PHIL 4460	Modal Logic	
Philosophical Writing		
PHIL 3480	Critical Thinking/Writing in Philosophy	3
Values		

PHIL 3100	Ethical Theory	3
Select one of the following:		3
PHIL 2140	Environmental Justice	
PHIL 2200	Major Social Theories	
PHIL 2220	Philosophy and Law	
PHIL 2270	Philosophy and Race	
PHIL 2290	Philosophy and Gender	
PHIL 3110	Feminist Practical Ethics	
PHIL 3140	Environmental Ethics	
PHIL 3160	Bioethics	
PHIL 3190	War and Morality	
PHIL 3200	Social and Political Philosophy	
PHIL 3260	Philosophy and the International Order	
PHIL 4110	Contemporary Moral Theory	
PHIL 4120	Philosophy and Animals	
PHIL 4200	Contemporary Political Philosophy	
PHIL 4250	Marxism	
Metaphysics and Epistemology		
PHIL 4340	Epistemology	3
Select one of the following:		3
PHIL 3600	Philosophy of Religion	
PHIL 4300	Philosophy of Mind	
PHIL 4360	Metaphysics	
PHIL 4400	Philosophy of Science	
PHIL 4490	Philosophy of Language	
Electives		
Two courses which includes all courses that are at the 2000 level or above, and are not taken to satisfy any of the above requirements		6
Total Credit Hours		33

Program Tracks

The department also offers two topically oriented tracks within the major that are interdisciplinary in nature: law and society and values and social policy. These tracks require two semesters in the history of philosophy, as well as a series of core courses that vary according to the track. A student intending to complete a topical track within the philosophy major should see the departmental undergraduate advisor as soon as possible.

Values and Social Policy Track

Code	Title	Credit Hours
Group I		
Required courses:		
PHIL 1440	Critical Thinking	3
or PHIL 2440	Symbolic Logic	
PHIL 2200	Major Social Theories	3
PHIL 3000	History of Ancient Philosophy	3
PHIL 3010	History of Modern Philosophy	3
PHIL 3100	Ethical Theory	3
PHIL 3200	Social and Political Philosophy	3
Group II		
Select four of the following:		
PHIL 2140	Environmental Justice	
PHIL 2220	Philosophy and Law	

PHIL 2270	Philosophy and Race	
PHIL 2290	Philosophy and Gender	
PHIL 3110	Feminist Practical Ethics	
PHIL 3140	Environmental Ethics	
PHIL 3160	Bioethics	
PHIL 3190	War and Morality	
PHIL 3260	Philosophy and the International Order	
PHIL 3930	Internship in Social Policy	
PHIL 4110	Contemporary Moral Theory	
PHIL 4120	Philosophy and Animals	
PHIL 4200	Contemporary Political Philosophy	
PHIL 4250	Marxism	
PHIL 4260	Philosophy of Law	
Other courses with advisor's approval		
Group III		
15 credit hours of approved courses in allied fields. For further information, see the Department of Philosophy advisor.		15
Total Credit Hours		33

Law and Society Track

Code	Title	Credit Hours
Group I		
Required courses:		
PHIL 1440	Critical Thinking	3
or PHIL 2440	Symbolic Logic	
PHIL 2200	Major Social Theories	3
PHIL 2220	Philosophy and Law	3
PHIL 3000	History of Ancient Philosophy	3
PHIL 3010	History of Modern Philosophy	3
PHIL 3100	Ethical Theory	3
PHIL 3180	Critical Thinking: Contemporary Topics	3
or PHIL 3480	Critical Thinking/Writing in Philosophy	
PHIL 3200	Social and Political Philosophy	3
PHIL 4260	Philosophy of Law	3
Group II		
Recommended courses:		
PHIL 2140	Environmental Justice	
PHIL 2290	Philosophy and Gender	
PHIL 3110	Feminist Practical Ethics	
PHIL 3140	Environmental Ethics	
PHIL 3160	Bioethics	
PHIL 3260	Philosophy and the International Order	
PHIL 4110	Contemporary Moral Theory	
PHIL 4200	Contemporary Political Philosophy	
PHIL 4250	Marxism	
Group III		
Required Courses:		
12 credit hours of approved courses from other departments. For further information, see the Department of Philosophy advisor.		12
Total Credit Hours		39

Graduating in Four Years

Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of "adequate progress" as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress in philosophy, students should meet the following requirements:

- By the beginning of the second semester, declare the major and meet with an undergraduate advisor at the time the major is declared.
- In each of the next five semesters, complete an average of 6.7 credit hours of required philosophy courses.
- By the end of the fifth semester of study, complete PHIL 2440, PHIL 3480, PHIL 3000 and PHIL 3010.

Recommended Four-Year Plan of Study

Through the required course work for the major, students will complete all 12 credits of the Arts & Humanities area of the Gen Ed Distribution Requirement and the Upper-division Written Communication component of the Gen Ed Skills Requirement. Depending on the courses selected in the major electives, students can potentially complete some credits in the Natural Sciences and Social Sciences areas of the Distribution and both the U.S. Perspective and the Global Perspective components of the Gen Ed Diversity Requirement.

Course	Title	Credit Hours
Year One		
Fall Semester		
PHIL 1000	Introduction to Philosophy	3
Gen. Ed. Distribution/Diversity course (example: Social Sciences/US Perspective)		3
Gen. Ed. Skills course (example: QRMS)		3
Elective/MAPS		3
Elective/MAPS		3
	Credit Hours	15
Spring Semester		
PHIL required elective (2000-level or above)		3
Gen. Ed. Skills course (example: Lower-division Written Communication)		3
Gen. Ed. Distribution course (example: Natural Sciences with Lab)		4
Elective/MAPS		3
Elective/MAPS		3
	Credit Hours	16
Year Two		
Fall Semester

Philosophy - Minor

A minor is offered in philosophy. Declaration of a minor is open to any student enrolled at CU Boulder, regardless of college or school.

Requirements

For the minor in philosophy, students must take 18 credit hours in philosophy (PHIL), earning 18 credit hours with a grade of C- or better and a 2.00 (C) average for all work attempted in philosophy. Also, students must take 9 credit hours of upper-division work in philosophy with grades of C- or better. Minor students may apply no more than 9 credit hours, including 6 upper-division credit hours of transfer work, toward a minor.

There are no distribution requirements for a minor in philosophy: any six 3-credit-hour philosophy courses will do, so long as at least three are upper-division. However, for a well-rounded course of study, the Philosophy Department recommends:

Recommended Courses

Code	Title	Credit Hours
Logic		
At least one course in Logic, such as:		
PHIL 1440	Critical Thinking	
PHIL 2440	Symbolic Logic	
History of Philosophy		
At least one course in the History of Philosophy, such as:		
PHIL 1010	Introduction to Western Philosophy: Ancient	
PHIL 1020	Introduction to Western Philosophy: Modern	
PHIL 3000	History of Ancient Philosophy	
PHIL 3010	History of Modern Philosophy	
Values		
At least one course in Values, such as:		
PHIL 1100	Ethics	
PHIL 1200	Contemporary Social Problems	
PHIL 3100	Ethical Theory	
PHIL 3200	Social and Political Philosophy	
Metaphysics/Epistemology		
At least one course in Metaphysics/Epistemology, such as:		
PHIL 1400	Philosophy and the Sciences	
PHIL 1600	Philosophy and Religion	
PHIL 3600	Philosophy of Religion	
PHIL 4300	Philosophy of Mind	
PHIL 4340	Epistemology	
PHIL 4360	Metaphysics	

Physics

The curriculum offered by the Department of Physics provides knowledge of the physical concepts that are basic to the laws of nature, and the ability to use these fundamental concepts to answer questions and solve real problems. Students also gain an understanding of the relationship of physics to other fields such as astronomy, biology, engineering, chemistry and medicine.

Course code for this program is PHYS.

Areas of Study

Students can choose from one of three plans leading to the Bachelor of Arts (BA) degree. Plan 1 is designed primarily for students who plan to pursue graduate study in physics or go directly into professional

employment. Plan 2 is intended for students who wish to combine a physics major with an interdisciplinary or applied physics focus. Interdisciplinary focuses include applied mathematics, biophysics, chemical physics, environmental science, history and philosophy of science, or premedicine. Plan 3 is a program designed specifically for those who wish to become elementary or secondary school teachers. It includes a teaching licensure in cooperation with the School of Education. A concurrent bachelor's/master's degree (BA/MS) is also available.

The Department of Physics also offers a Bachelor of Science degree in Engineering Physics (p. 796) through the College of Engineering and Applied Science.

Research Opportunities

Physics majors are strongly encouraged to work in a research laboratory. Such experience is especially useful in pursuing a career in science or engineering. Involvement in laboratory experimentation provides knowledge of modern electronic equipment and computerized instrumentation. As contributing members of a research group, students also get a real sense of the creative processes that are part of modern physics research.

Career Opportunities

Physics provides an excellent background for a wide variety of careers, as well as preparation for admission to graduate school in physics and related fields. Design and development work in industrial firms, government and academic laboratories, and nonprofit research centers present opportunities to apply theory to specific problems. In such settings, physics graduates often work closely with engineers, complementing specific disciplines with a broader physics perspective. Graduates can also go on to careers in business, law, finance or medicine after appropriate graduate work.

Bachelor's Degree

- Physics - Bachelor of Arts (BA) (p. 510)

Minor

- Physics - Minor (p. 514)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Courses

PHYS 1000 (3) Preparatory Physics

Introduces basic physics, emphasizing an analytical approach to prepare for PHYS 1110 and PHYS 1120, the engineering majors sequence.

Does not satisfy any MAPS deficiency in either the sciences or math.

Department enforced prerequisite: 1 year high school algebra.

Additional Information: Arts Sci Core Curr: MAPS Course

PHYS 1010 (3) Physics of Everyday Life 1

Intended primarily for nonscientists, this course covers physics encountered in everyday life. Topics include balls, scales, balloons, stoves, insulation, light bulbs, clocks, nuclear weapons, basics of flashlights, and microwave ovens. Department enforced prereq., high school algebra or equivalent. This course should not be taken if the student has a MAPS deficiency in math.

Additional Information: GT Pathways: GT-SC2 -Natural Physicl Sci:Lec Crse w/o Req Lab

Arts Sci Core Curr: Quant Reasn Mathmat Skills

Arts Sci Core Curr: Natural Science Sequence

Arts Sci Gen Ed: Distribution-Natural Sciences

Arts Sci Gen Ed: Quantitative Reasoning Math

MAPS Course: Chemistry

MAPS Course: Physics

PHYS 1020 (4) Physics of Everyday Life 2

Intended primarily for nonscientists, this course is a continuation of PHYS 1010. Includes electrical power generation and distribution, electrical motors, radio, television, computers, copiers, lasers, fluorescent lights, cameras, and medical imaging. Department enforced prereq., high school algebra.

Requisites: Requires prerequisite course of PHYS 1010 (minimum grade C-).

Additional Information: GT Pathways: GT-SC1 - Natural Physcal Sci:Lec Crse w/ Req Lab

Arts Sci Core Curr: Quant Reasn Mathmat Skills

Arts Sci Core Curr: Natural Science Sequence

Arts Sci Core Curr: Natural Science Lab

Arts Sci Gen Ed: Distribution-Natural Sciences

Arts Sci Gen Ed: Quantitative Reasoning Math

Arts Sci Gen Ed: Distribution-Natural Sci Lab

PHYS 1110 (4) General Physics 1

Three lect., one rec. per week, plus three evening exams in the fall and spring semesters. First semester of three-semester sequence for science and engineering students. Covers kinematics, dynamics, momentum of particles and rigid bodies, work and energy, gravitation, simple harmonic motion and introduction to thermodynamics.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 1115

Requisites: Requires prerequisite course of GEEN 3830 (minimum grade C-) or prerequisite or corequisite course of APPM 1345 or APPM 1350 or MATH 1300 or MATH 1310 (minimum grade C-).

Additional Information: GT Pathways: GT-SC2 -Natural Physicl Sci:Lec Crse w/o Req Lab

Arts Sci Core Curr: Natural Science Sequence

Arts Sci Gen Ed: Distribution-Natural Sciences

PHYS 1115 (4) General Physics 1 for Majors

First semester of three semester sequence for physics, engineering physics and astronomy majors. Covers kinematics, dynamics momentum of particles and rigid bodies, work and energy, gravitation, simple harmonic motion and introduction to thermodynamics.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 1110

Requisites: Requires prerequisite course of GEEN 3830 or prerequisite or corequisite course of APPM 1345 or APPM 1350 or MATH 1300 or MATH 1310 (minimum grade C-). Restricted to Physics (PHYS-BA) or Engineering Physics (EPEN-BS) or Astronomy (ASTR-BA) majors only.

Grading Basis: Letter Grade

Additional Information: Arts Sci Core Curr: Natural Science Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences

PHYS 1120 (4) General Physics 2

Three lect., one rec. per week, plus three evening exams in the fall and spring semesters. Second semester of three-semester introductory sequence for science and engineering students. Covers electricity and magnetism, wave motion and optics. Normally is taken concurrently with PHYS 1140.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 1125

Requisites: Requires prerequisite courses of PHYS 1110 or PHYS 1115 and a prerequisite or corequisite course of APPM 1360 or MATH 2300 (all minimum grade of C-).

Additional Information: GT Pathways: GT-SC2 -Natural Physicl Sci:Lec Crse w/o Req Lab

Arts Sci Core Curr: Natural Science Sequence

Arts Sci Gen Ed: Distribution-Natural Sciences

PHYS 1125 (4) General Physics 2 for Majors

Three lect., one rec per week, plus three evening exams in the fall and spring semesters. Second semester of three semester introductory sequence for physics, engineering and astronomy majors. Covers electricity and magnetism, wave motion and optics. Normally is taken concurrently with PHYS 1140.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 1120

Requisites: Requires a prerequisite course of PHYS 1110 or PHYS 1115.

Requires a prerequisite or corequisite course of APPM 1360 or MATH 2300 (all minimum grade C-). Restricted to Physics (BA), Engineering Physics (BS) and Astronomy (BA) students only.

Grading Basis: Letter Grade

Additional Information: Arts Sci Core Curr: Natural Science Sequence

Arts Sci Gen Ed: Distribution-Natural Sciences

PHYS 1140 (1) Experimental Physics 1

Introduces experimental physics through laboratory observation of a wide range of phenomena. Covers experiments on physical measurements, including mechanics, electricity & magnetism, and optics, with the mathematical analysis of physical errors associated with the experimental process.

Requisites: Requires a prerequisite or corequisite course of PHYS 1120 or PHYS 1125 (minimum grade C-).

Additional Information: GT Pathways: GT-SC1 - Natural Physcal Sci:Lec Crse w/ Req Lab

Arts Sci Core Curr: Natural Science Lab

Arts Sci Gen Ed: Distribution-Natural Sci Lab

Arts Sci Gen Ed: Distribution-Natural Sciences

PHYS 1230 (3) Light and Color for Nonscientists

Discusses light, color, vision, and perception. Covers reflection, refraction, lenses, and applications to photography and other methods of light sensing. Other topics include lasers and holography. Course is geared toward nonscience majors. Department enforced prereq., high school algebra or equivalent. Should not be taken by students with a math MAPS deficiency.

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences

MAPS Course: Chemistry

MAPS Course: Physics

PHYS 1240 (3) Sound and Music

Explores the physical processes that underlie the diversity of sound and musical phenomena. Topics covered include the physical nature of sound, the perception of sound, the perception of pitch and harmony, musical instruments, synthesizers and samplers, and room acoustics. Geared toward nonscience majors. Department enforced prereq., high school algebra or equivalent. Should not be taken by students with a math MAPS deficiency.

Additional Information: GT Pathways: GT-SC2 -Natural Physicl Sci:Lec
Crse w/o Req Lab

Arts Sci Core Curr: Natural Science Non-Sequence

Arts Sci Gen Ed: Distribution-Natural Sciences

MAPS Course: Chemistry

MAPS Course: Physics

PHYS 1400 (1) Fundamentals of Scientific Inquiry

Explore and discuss the nature of science and what it means to work in science, technology, engineering or math. Focus on relevant open questions in these fields and the methods used to investigate them. For more information visit: www.colorado.edu/studentgroups/cuprime.

PHYS 1580 (3) Energy and Interactions

Engages non-physics majors in hands-on, minds-on activities and labs to investigate the physical world, the nature of science, and how science knowledge is constructed. This introductory course is especially relevant for future elementary and middle school teachers although it will meet the needs of most non-physics and non-science majors. Physical content focuses on interactions and energy.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 1580

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences

MAPS Course: Chemistry

MAPS Course: Physics

PHYS 2010 (5) General Physics 1

Includes three lectures, one two-hour laboratory/recitation per week, plus three evening exams in the fall and spring semesters. Covers mechanics, heat and sound. Thorough presentation of fundamental facts and principles of physics using algebra and trigonometry. Designed for life science majors, including premed students. Natural science majors with a knowledge of calculus and others taking calculus are urged to take the calculus-based courses PHYS 1110, PHYS 1120, PHYS 1140 and PHYS 2130, rather than PHYS 2010 and PHYS 2020. Department enforced prerequisites: ability to use high school algebra and trigonometry.

Additional Information: GT Pathways: GT-SC1 - Natural Physcal Sci:Lec
Crse w/ Req Lab

Arts Sci Core Curr: Natural Science Sequence

Arts Sci Core Curr: Natural Science Lab

Arts Sci Gen Ed: Distribution-Natural Sciences

Arts Sci Gen Ed: Distribution-Natural Sci Lab

MAPS Course: Natural Science

PHYS 2020 (5) General Physics 2

Includes three lectures, one two-hour laboratory/recitation per week, plus three evening exams in the fall and spring semesters. Covers electricity and magnetism, light and modern physics. Designed for life science majors, including premed students. Natural science majors with a knowledge of calculus and others taking calculus are urged to take the calculus-based courses PHYS 1110, PHYS 1120, PHYS 1140 and PHYS 2130, rather than PHYS 2010 and PHYS 2020.

Requisites: Requires a prerequisite course of PHYS 1110 or PHYS 2010 (minimum grade C-).

Additional Information: GT Pathways: GT-SC1 - Natural Physcal Sci:Lec
Crse w/ Req Lab

Arts Sci Core Curr: Natural Science Sequence

Arts Sci Core Curr: Natural Science Lab

Arts Sci Gen Ed: Distribution-Natural Sciences

Arts Sci Gen Ed: Distribution-Natural Sci Lab

PHYS 2130 (3) General Physics 3

Covers special relativity, quantum theory, atomic physics, solid state and nuclear physics. Third semester of introductory sequence for science and engineering students. Physics majors should take PHYS 2170 instead of this course. Normally taken with PHYS 2150.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 2170

Requisites: Requires a prerequisite course of PHYS 1120 or PHYS 1125, and a prerequisite or corequisite course of MATH 2400 or APPM 2350 (all minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

PHYS 2150 (1) Experimental Physics 2

One lect., one 2-hour lab per week. Includes many experiments of modern physics, including atomic physics, solid state physics, electron diffraction, radioactivity and quantum effects. Normally taken concurrently with PHYS 2130 or PHYS 2170, this course may be taken after PHYS 2130 or PHYS 2170.

Requisites: Requires a prerequisite course of PHYS 1140 and a prerequisite or corequisite course of PHYS 2130 or PHYS 2170 (all minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Arts Sci Gen Ed: Distribution-Natural Sci Lab

PHYS 2170 (3) Foundations of Modern Physics

Covers special relativity, quantum mechanics and atomic structure. Completes the three-semester sequence of general physics for physics and engineering physics majors. Normally taken with the laboratory PHYS 2150.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 2130

Requisites: Requires a prerequisite course of PHYS 1120 or PHYS 1125, and a prerequisite or corequisite course of MATH 2400 or APPM 2350 (all minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

PHYS 2210 (3) Classical Mechanics and Mathematical Methods 1

Theoretical Newtonian mechanics, including position and velocity dependent forces, oscillation, stability, non-inertial frames and gravitation from extended bodies. Ordinary differential equations, vector algebra, curvilinear coordinates, complex numbers, and Fourier series will be introduced in the context of the mechanics.

Requisites: Requires a prerequisite course of PHYS 2130 or PHYS 2170 and a prerequisite or corequisite course of APPM 2360 or MATH 3430 (all minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

PHYS 2600 (3) Introduction to Programming and Scientific Computing

Covers basic concepts in programming and scientific computing, including numerical integration and simulation of physical systems. Students will learn the programming language Python and associated graphics libraries. Programming examples will be drawn from classical physical systems that can only be solved numerically, such as projectile motion with drag and N-body problems.

Requisites: Requires prerequisite course of PHYS 1120 (minimum grade C-). Requires prerequisite or corequisite course of PHYS 2170 or PHYS 2130 (minimum grade C-).

PHYS 2840 (1-3) Independent Study

Selected topics for undergraduate independent study. Subject matter to be arranged.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

PHYS 3000 (3) Science and Public Policy

For nonscience majors. Reading, discussions, debates and lectures are used to study how science affects society economically, intellectually, and in terms of health and national security. Another focus is how government fosters and funds scientific activities. Department enforced prerequisite: completion of core science requirement.

PHYS 3050 (3) Writing in Physics: Problem-Solving and Rhetoric

Teaches strategies used in scientific writing with an emphasis on argument, reviews and reinforces essential writing skills, provides experience in writing both academic and professional communications in a style appropriate to the literature of physics. Department enforced prerequisite: lower-division core writing requirement. Does not count toward the PHYS-BA major requirements or major GPA.

Requisites: Requires a prerequisite course of PHYS 2130 or PHYS 2170 (minimum grade C-). Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Core Curr: Written Communication
Arts Sci Gen Ed: Written Communication-Upper

PHYS 3070 (3) Energy and the Environment

Contemporary issues in energy consumption and its environmental impact, including fossil fuel use and depletion; nuclear energy and waste disposal; solar, wind, hydroelectric, and other renewable sources; home heating; energy storage; fuel cells; and alternative transportation vehicles. Included are some basic physical concepts and principles that often constrain choices. No background in physics is required.

Equivalent - Duplicate Degree Credit Not Granted: ENVS 3070

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences

PHYS 3210 (3) Classical Mechanics and Mathematical Methods 2

Lagrangian and Hamiltonian treatment of theoretical mechanics, including coupled oscillations, waves in continuous media, central force motion, rigid body motion and fluid dynamics. The calculus of variations, linear algebra, tensor algebra, vector calculus, and partial differential equations will be introduced in the context of the mechanics.

Requisites: Requires a prerequisite course of PHYS 2210 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

PHYS 3220 (3) Quantum Mechanics 1

Introduces quantum mechanics with wave, operator and matrix computational techniques. Investigates solutions for harmonic oscillator, potential well and systems with angular momentum. Develops a quantitative description of one-electron atoms in lowest order.

Requisites: Requires a prerequisite course of PHYS 3210 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

PHYS 3221 (1) Tutorial Practicum for Quantum Mechanics 1

Uses interactive group work to aid student learning in corequisite course PHYS 3220. In this tutorial, students will work in small groups to practice how to solve challenging problems and their underlying conceptual basis, as well as using hands-on activities, demonstrations, and other techniques to help learn content.

Requisites: Requires a corequisite course of PHYS 3220.

Grading Basis: Pass/Fail

PHYS 3310 (3) Principles of Electricity and Magnetism 1

Covers mathematical theory of electricity and magnetism, including electrostatics, magnetostatics, and polarized media, and provides an introduction to electromagnetic fields, waves, and special relativity.

Requisites: Requires prerequisite courses of PHYS 2210 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

PHYS 3311 (1) Tutorial Practicum for Electricity & Magnetism 1

Uses interactive group work to aid student learning in corequisite course PHYS 3310. In this tutorial, students will work in small groups to practice how to solve challenging problems and their underlying conceptual basis, as well as using hands-on activities, demonstrations, and other techniques to help learn content.

Requisites: Requires a corequisite course of PHYS 3310.

Grading Basis: Pass/Fail

PHYS 3320 (3) Principles of Electricity and Magnetism 2

Continuation of PHYS 3310. Electromagnetic induction; magnetic energy; microscopic theory of magnetic properties; AC circuits; Maxwell's Equations; planewaves; waveguides and transmission lines; radiation from electric and magnetic dipoles and from an accelerated charge.

Requisites: Requires a prerequisite course of PHYS 3310 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

PHYS 3330 (2) Electronics for the Physical Sciences

Introduces laboratory electronics for physical science students. Includes basic electronic instruments, dc bridge circuits, operational amplifiers, bipolar transistors, field-effect transistors, photodiodes, noise in electronic circuits, digital logic and microcontrollers. Students gain hands-on experience in designing, building and debugging circuits. Two lectures and one three hour laboratory per week. Concludes with a three-week project in which students design and build an experiment of their choice and present a seminar on the results.

Requisites: Requires prerequisite courses of PHYS 2150 and PHYS 2130 or PHYS 2170 (all minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Arts Sci Gen Ed: Distribution-Natural Sci Lab

PHYS 4130 (3) Biological Electron Microscopy: Principles and Recent Advances

Covers basic mechanisms for imaging and recent advances used in current biological research, elements of electron optics, image optimization, resolution, radiation damage, various imaging modes (TEM, HVEM, Sem, Stem, Stm), specimen quantitation and reconstruction (stereo and 3-D), microanalysis and electron diffraction. Specimen preparation treated only incidentally.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 5130

Requisites: Requires a prerequisite course of EBIO 1220 or MCDB 1150 or MCDB 4550 or MCDB 5550 or PHYS 1120 or PHYS 2020 (minimum grade D-).

PHYS 4150 (3) Plasma Physics

Discusses the fundamentals of plasma physics, including particle motion in electromagnetic fields, wave propagation, collisions, diffusion, and resistivity. Presents examples from space plasmas, astrophysical plasmas, laboratory fusion plasmas, and plasmas in accelerators.

Requisites: Requires a prerequisite course of PHYS 3310 and a prerequisite or corequisite course of PHYS 3320 (all minimum grade of C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

PHYS 4230 (3) Thermodynamics and Statistical Mechanics

Statistical mechanics applied to macroscopic physical systems; statistical thermodynamics, classical thermodynamics systems; applications to simple systems. Examines relationship of statistical to thermodynamic points of view.

Requisites: Requires a prerequisite course of PHYS 2210 and a prerequisite or corequisite course of PHYS 3220 (all minimum grade of C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

PHYS 4340 (3) Introduction to Solid State Physics

Discusses crystal structure, lattice dynamics, band theory, semiconductors and ferromagnetism.

Requisites: Requires a prerequisite course of PHYS 3220 (minimum grade of C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

PHYS 4410 (3) Quantum Mechanics 2

Extends quantum mechanics to include perturbation theory and its applications to atomic fine structure, multi-particle systems, interactions with external forces, the periodic table and dynamical processes including electromagnetic transition rates.

Requisites: Requires prerequisite courses of PHYS 3220 and PHYS 3310 (all minimum grade of C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

PHYS 4420 (3) Nuclear and Particle Physics

Introduces structure of the atomic nucleus, spectroscopy of subnuclear particles, scattering, reactions, radioactive decay, fundamental interactions of quarks and leptons.

Requisites: Requires a prerequisite course of PHYS 4410 (minimum grade of C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

PHYS 4430 (3) Advanced Laboratory

Two lectures, one lab per week. Experiments introduce students to realities of the experimental physics so they gain a better understanding of theory and an appreciation of the vast amount of experimental work done in the physical sciences today.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 5430

Requisites: Requires a prerequisite course of PHYS 3330 (minimum grade of C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

Arts Sci Gen Ed: Distribution-Natural Sci Lab

PHYS 4450 (3) History and Philosophy of Physics

Investigates the role of experiment in physics; case studies in the history and philosophy of physics and in scientific methodology.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 5450 and PHIL 4450 and PHIL 5450

Requisites: Requires a prerequisite course of PHYS 1020 or PHYS 1120 or PHYS 1125 or PHYS 2020 (minimum grade of C-).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

Arts Sci Gen Ed: Distribution-Natural Sciences

PHYS 4460 (3) Teaching and Learning Physics

Learn how people understand key concepts in physics. Through examination of physics content, pedagogy and problems, through teaching, and through research in physics education, students will explore the meaning and means of teaching physics. Students will gain a deeper understanding of how education research is done and how people learn. Useful for all students, especially for those interested in physics, teaching and education research.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 5460 and EDUC 4460 and EDUC 5460

Requisites: Requires prerequisite courses of PHYS 3210 and PHYS 3310 (all minimum grade of C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

PHYS 4510 (3) Optics

Basic electromagnetic theory of light, using Maxwell's equations. Examples in geometrical optics; extensive applications in physical optics including diffraction and polarization. Spectra, including Zeeman effect and fluorescence. Recent advances in experimental techniques: microwaves, lasers, image converters.

Requisites: Requires a prerequisite course of PHYS 3320 (minimum grade of C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

PHYS 4550 (3) Cells, Molecules and Tissues: A Biophysical Approach

Focuses on the biophysics governing the structure/function of enzymes, cells, extra-cellular matrix and tissue. Synthesizes ideas from molecular biology, physics, and biochemistry, emphasizing how low Reynolds number physics, not Newtonian physics, is relevant to life inside a cell. Fulfills MCDB scientific reasoning requirement.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 5550 and MCDB 4550 and MCDB 5550

Recommended: Prerequisites MCDB 3135 and MCDB 3145 and PHYS 2010 and PHYS 2020 and CHEM 1133 or MATH 1300 and/or CHEM 3311 (minimum grade C-) or instructor consent required.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

PHYS 4560 (3) Introduction to Biophysics

Covers an introduction to the physics of living systems. Focuses on how living systems are able to generate order, with both physical principles and biological examples. Covers the development of quantitative models for biological systems, including estimates. Taught from a physics perspective, with biology background introduced as needed.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 5560 and MCDB 4560 and MCDB 5560

Requisites: Requires a prerequisite course of PHYS 2210 (minimum grade C-).

Recommended: Prerequisite PHYS 4230.

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

PHYS 4610 (2) Physics Honors

Students are matched with a faculty member and work independently on a research topic. Typically, the honors program lasts three semesters. A senior thesis and an oral presentation of the work are required. See also PHYS 4620 and PHYS 4630. Department enforced prerequisite: minimum 3.00 GPA. Registration by special arrangement with the Department of Physics.

Additional Information: Arts Sciences Honors Course

PHYS 4620 (2) Physics Honors

Students are matched with a faculty member and work independently on a research topic. Typically, the honors program lasts three semesters. A senior thesis and an oral presentation of the work are required. See also PHYS 4610 and PHYS 4630. Department enforced prerequisite: minimum 3.00 GPA. Registration by special arrangement with the Department of Physics.

Additional Information: Arts Sciences Honors Course

PHYS 4630 (2) Physics Honors

Students are matched with a faculty member and work independently on a research topic. Typically, the honors program lasts three semesters. A senior thesis and an oral presentation of the work are required. See also PHYS 4610 and PHYS 4620. Department enforced prerequisite: minimum 3.00 GPA. Registration by special arrangement with the Department of Physics.

Additional Information: Arts Sciences Honors Course

PHYS 4810 (1-3) Special Topics in Physics

Various topics not normally covered in the curriculum. Offered intermittently depending on student demand and availability of instructors.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

PHYS 4840 (1-3) Independent Study

Selected topics for undergraduate independent study. Subject matter to be arranged. See also PHYS 4850.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

PHYS 4850 (1-3) Independent Study

Selected topics for undergraduate independent study. Subject matter to be arranged. See also PHYS 4840.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

PHYS 4970 (3) Seminar on Physical Methods in Biology

Covers basic mechanisms and applications of physical methods used in current biological research, microprobe analysis, EELS, elementary electron and x-ray crystallography, biomedical imaging (NMR, MRI, PET, CAT), Fourier analysis, synchrotron radiation, EXAFS, neutron scattering and novel ultramicroscopy techniques. Includes lectures, student presentations, occasional demonstrations. Emphasis depends on student interest.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 5970

Requisites: Requires a prerequisite course of PHYS 1120 or PHYS 2020 and MCDB 1150 or EBIO 1220 (all minimum grade D-).

Physics - Bachelor of Arts (BA)

The undergraduate degree in physics emphasizes knowledge and awareness of:

- the basic subfields of physics (classical mechanics, electricity and magnetism, quantum mechanics, statistical mechanics and thermodynamics), as well as at least one specialty area of application (e.g., solid state physics or optics);
- the major principles of physics, their historical development and the roles they play in the various subfields of physics;
- the interrelations between theory and observation, the role of systematic and random experimental errors and methods used to analyze experimental uncertainty and compare experiment with theory;
- physical phenomena and experience in the use of basic experimental apparatus and measuring instruments;
- mathematics sufficient to facilitate the acquisition and application of physical principles; and
- the importance of physics in other fields such as chemistry, biology, engineering, medicine and in society at large.

In addition, students completing the degree in physics are expected to acquire the ability and skills to:

- apply physical principles to new situations;
- construct and assemble experimental apparatus, conduct and analyze measurements of physical phenomena, analyze experimental uncertainty and make meaningful comparisons between experiment and theory; and
- communicate results of scientific inquiries verbally and in writing.

Plans of Study

Three different plans are available to students in physics. Because there is some flexibility within each plan, the department encourages students to pursue their own interests in setting up their curriculum. The final responsibility for fulfilling the requirements for the degree rests with the student.

Plan I

This plan is primarily for students planning graduate work in physics.

Plan II

This plan is for students desiring either an interdisciplinary or an applied physics program.

The interdisciplinary program includes a combination of a physics major with a focus in another area such as astrophysics, atmospheric sciences, applied mathematics, biophysics, chemical physics, computer science,

environmental sciences, geophysics, philosophy and history of science, and pre-medicine.

The applied physics program includes a focus on applying physics to a field such as biotechnology, optics, and electronic devices.

Plan III

This plan is for students intending to become elementary or secondary school teachers.

Concurrent Degree Program

BA/MS in Physics

The BA/MS program in physics aims to provide new opportunities for undergraduate physics majors. The program is specifically addressed to the students in the Plan 1 Major Program of the Department of Physics. The Plan 1 physics major gives students a thorough grounding in theoretical physics so that they are well prepared either to proceed with graduate work or with professional employment. For students interested in graduate studies, the BA/MS program in physics allows for participation in graduate course work and research in a broad range of areas. For students interested in immediate professional employment, the BA/MS program would serve as a terminal degree program that qualifies students for a higher level of employment.

For more information, see the Department of Physics website (<http://www.colorado.edu/physics/academics/undergraduate-students/concurrent-bachelorsmasters-degree>).

Requirements

Program Requirements

Students who have declared physics as a major are required to consult with the departmental advisor at least once per semester. Even if first-year students are only considering physics as a major, they are strongly encouraged to visit the departmental advisor and discuss the situation. Because most of the advanced physics courses have various prerequisites, failure to settle on an appropriate plan of study early in the college career can result in delay and complications later.

Students must complete the general requirements of the College of Arts and Sciences and the required courses listed below.

Plans of Study

Plan I

This plan includes 45 credit hours of physics courses.

Required Courses and Credits

Code	Title	Credit Hours
Required Physics Courses		
PHYS 1115 or PHYS 1110	General Physics 1 for Majors General Physics 1	4
PHYS 1125 or PHYS 1120	General Physics 2 for Majors General Physics 2	4
PHYS 1140	Experimental Physics 1	1
PHYS 2150	Experimental Physics 2	1
PHYS 2170	Foundations of Modern Physics	3
PHYS 2210	Classical Mechanics and Mathematical Methods 1	3
PHYS 3210	Classical Mechanics and Mathematical Methods 2	3
PHYS 3220	Quantum Mechanics 1	3

PHYS 3310	Principles of Electricity and Magnetism 1	3
PHYS 3320	Principles of Electricity and Magnetism 2	3
PHYS 3330	Electronics for the Physical Sciences	2
PHYS 4230	Thermodynamics and Statistical Mechanics	3
PHYS 4410	Quantum Mechanics 2	3
Upper-Division Physics Electives		9

Select a research activity - see details below (3-6 credit hours)

PHYS 4430	Advanced Laboratory	
PHYS 4610 & PHYS 4620 & PHYS 4630	Physics Honors and Physics Honors and Physics Honors	
PHYS 4840	Independent Study	

Select upper-division physics theory electives (3-6 credit hours)

PHYS 4150	Plasma Physics	
PHYS 4340	Introduction to Solid State Physics	
PHYS 4420	Nuclear and Particle Physics	
PHYS 4450	History and Philosophy of Physics	
PHYS 4460	Teaching and Learning Physics	
PHYS 4510	Optics	
PHYS 4550	Cells, Molecules and Tissues: A Biophysical Approach	
PHYS 4560	Introduction to Biophysics	
PHYS 4810	Special Topics in Physics	
PHYS 5030	Intermediate Mathematical Physics 1	
PHYS 5040	Intermediate Mathematical Physics 2	
PHYS 5770	Gravitational Theory (Theory of General Relativity)	

Other PHYS or ASTR upper-division courses as approved in advance by advisor.

Total Credit Hours 45

Code	Title	Credit Hours
------	-------	--------------

Ancillary mathematics and chemistry course work

<i>Ancillary Mathematics Courses</i>		
MATH 1300 or APPM 1350	Calculus 1 Calculus 1 for Engineers	4-5
MATH 2300 or APPM 1360	Calculus 2 Calculus 2 for Engineers	4-5
MATH 2400 or APPM 2350	Calculus 3 Calculus 3 for Engineers	4-5

Select one of the following Linear Algebra and Differential Equations options: 4-6

Option 1:

APPM 2360	Introduction to Differential Equations with Linear Algebra	
-----------	--	--

Option 2:

MATH 2130 & MATH 3430	Introduction to Linear Algebra for Non-Mathematics Majors and Ordinary Differential Equations	
--------------------------	---	--

Ancillary Chemistry Courses

CHEM 1113 & CHEM 1114	General Chemistry 1 and Laboratory in General Chemistry 1	5
--------------------------	--	---

CHEM 1133 & CHEM 1134	General Chemistry 2 and Laboratory in General Chemistry 2	5
Total Credit Hours		26-31

Research Activity

The research activity may be completed in one of the following ways:

- Between 3 and 6 credit hours may be earned from: PHYS 4430, PHYS 4610/PHYS 4620/PHYS 4630, or PHYS 4840.
- By documentation of your accomplishments as an intern with a research activity within the physics department or a suitable cognate department, institute or external entity such as NCAR, NIST, NOAA, etc.
 - Approval by a physics department advisor is required for option (2) and should be obtained in advance.
 - No academic credit is earned under the internship option (2), so if an internship is taken, students must still earn 9 credit hours of physics electives.

Plan II

For the interdisciplinary program, 33 credit hours of physics courses, plus 3 credit hours of physics electives, plus 12 credit hours of interdisciplinary courses are required. For the applied physics program, 33 credit hours of physics courses plus 15 credit hours of applied physics courses are required. Courses in the interdisciplinary or applied physics subjects may not be double-counted with the required 33 credit hours of physics courses.

Interdisciplinary or applied physics courses must be approved by the physics department, either by the pre-approved list of courses in each discipline or by a physics department mentor on a course-by-course basis. It is therefore imperative that students in Plan II be in close contact with the physics department advisor.

Required Courses and Credits

Code	Title	Credit Hours
Required Physics Courses		
PHYS 1115 or PHYS 1110	General Physics 1 for Majors General Physics 1	4
PHYS 1125 or PHYS 1120	General Physics 2 for Majors General Physics 2	4
PHYS 1140	Experimental Physics 1	1
PHYS 2150	Experimental Physics 2	1
PHYS 2170	Foundations of Modern Physics	3
PHYS 2210	Classical Mechanics and Mathematical Methods 1	3
PHYS 3210	Classical Mechanics and Mathematical Methods 2	3
PHYS 3220	Quantum Mechanics 1	3
PHYS 3310	Principles of Electricity and Magnetism 1	3
PHYS 3320	Principles of Electricity and Magnetism 2	3
PHYS 3330	Electronics for the Physical Sciences	2
PHYS 4230	Thermodynamics and Statistical Mechanics	3

Select the interdisciplinary program or the applied physics program: 15

Interdisciplinary Program

Select 12 credit hours from an interdisciplinary focus, as well as 3 credit hours of upper-division physics electives from the departmental list¹

Applied Physics Program

Select 15 credit hours in the applied physics program from the departmental list ¹		
Total Credit Hours		48

Code	Title	Credit Hours

CHEM 1113 & CHEM 1114	General Chemistry 1 and Laboratory in General Chemistry 1	5
CHEM 1133 & CHEM 1134	General Chemistry 2 and Laboratory in General Chemistry 2	5
Total Credit Hours		26-31

¹ Departmental lists of approved courses for the interdisciplinary and applied physics programs are available in the advising guide on the Department of Physics website (<http://www.colorado.edu/physics>).

Plan III

This plan involves a minimum of 31–34 credit hours of physics and a minimum of 35 credit hours in education courses. A School of Education advisor, who should be consulted for updated requirements, is available by appointment at 303-492-2559. Students must review the Undergraduate Program of Studies Checklist for Elementary or Secondary Science for Arts & Sciences majors on the School of Education website for current teacher licensure requirements.

Required Courses and Credits

or APPM 1350 Calculus 1 for Engineers

MATH 2300 Calculus 2 4-5
or APPM 1360 Calculus 2 for Engineers

MATH 2400 Calculus 3 4-5
or APPM 2350 Calculus 3 for Engineers

Select one of the following Linear Algebra and Differential Equations options: 4-6

Option 1:

APPM 2360 Introduction to Differential Equations with Linear Algebra

Option 2:

MATH 2130 Introduction to Linear Algebra for Non-
& MATH 3430 Mathematics Majors
and Ordinary Differential Equations

Total Credit Hours 23-31

Graduating in Four Years

Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of "adequate progress" as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress in physics plans I and II, students should meet the following requirements:

- In the first semester, declare the physics major.
- By the end of the second semester, complete the following courses: PHYS 1110 or PHYS 1115; PHYS 1120 or PHYS 1125; PHYS 1140, MATH 1300 or APPM 1350, and MATH 2300 or APPM 1360.
- By the end of the fourth semester, complete the following courses: PHYS 2150, PHYS 2170, PHYS 2210, CHEM 1113, CHEM 1133, MATH 2400 or APPM 2350; and APPM 2360. MATH 2130 and MATH 3430 can substitute for APPM 2360.
- Before the fifth semester, meet with the physics advisor to get approval for completion plan (FSACP). In addition to completing

PHYS 4230 and PHYS 4410, Plan I students must get approval to complete 9 credit hours in physics electives, with a research participation component. In addition to completing PHYS 4230, interdisciplinary Plan II students must complete 3 credit hours of physics electives and 12 credit hours of interdisciplinary courses. Applied physics students must complete 15 credit hours of applied physics courses.

- By the end of the sixth semester, complete PHYS 3210, PHYS 3220, PHYS 3310, PHYS 3320, and PHYS 3330.
- Early in the seventh semester, meet with the physics advisor to have the statement of major status filled in. This includes a plan for completing the requirements of the major during the senior year and must be signed by the student and the advisor. Further details concerning the execution of the guarantee can be obtained from the department.

Sample Four-Year Plan of Study

Through the required course work for the major, students will fulfill all 12 credits of the Natural Sciences area of the Gen Ed Distribution Requirement, including the Lab requirement, and the QRMS component of the Gen Ed Skills Requirement. See the department for Plan-specific Four-Year Plans of Study.

Course	Title	Credit Hours
Year One		
Fall Semester		
PHYS 1115 or PHYS 1110	General Physics 1 for Majors or General Physics 1	4
MATH 1300 or APPM 1350	Calculus 1 or Calculus 1 for Engineer	5
Gen. Ed. Distribution/Diversity course (example: Arts & Humanities/Global Perspective)		3
Gen. Ed. Skills course (example: Lower-division Written Communication)		3
		Credit Hours 15
Spring Semester		
PHYS 1125 or PHYS 1120	General Physics 2 for Majors or General Physics 2	4
PHYS 1140	Experimental Physics 1	1
MATH 2300 or APPM 1360	Calculus 2 or Calculus 2 for Engineer	5
Gen. Ed. Distribution course (example: Social Sciences)		3
Gen. Ed. Distribution course (example: Arts & Humanities)		3
		Credit Hours 16

Year Two**Fall Semester**

PHYS 2170	Foundations of Modern Physics	3
PHYS 2150	Experimental Physics 2	1

Physics - Minor

A minor is offered in physics. Declaration of a minor is open to any student enrolled at CU Boulder, regardless of college or school. For more information, see the Department of Physics Minor in Physics (<http://www.colorado.edu/physics/academics/undergraduate-students/minoring-physics>) webpage.

Requirements

Declaration of a minor is open to any student enrolled at CU Boulder, regardless of college or school. The minimum number of credit hours for a student without advanced placement or transfer credit is 25 hours (16 lower-division and 9 upper-division). *All of the required physics classes listed below have co-requisite or prerequisite mathematics courses. Please check to see if you meet these requisites.*

Required Courses and Credit Hours

Code	Title	Credit Hours
Required Physics Courses		16

Political Science

The Department of Political Science offers instruction and research in the art and science of politics. Work within the department is organized around six basic fields: American government and politics, comparative politics, international relations, public policy, political theory, and empirical theory and methodology. The department's mission is to understand the political world and give students skills for a lifetime of inquiry, engagement and analysis.

The undergraduate program equips students with the analytical and writing skills essential for work in government agencies, nongovernmental organizations, nonprofits and business. It also prepares students for study at the graduate level in political science, law and other cognate disciplines.

Our mission is to provide students with the knowledge and tools to understand important political ideas, political institutions (both domestic and international) and political actors. Students learn the philosophical basis of justice, equality and representation, and how those concepts are manifested in ongoing political events. Understanding the issues surrounding diversity and their political consequences, both globally and domestically, are important areas of study. A strong grasp of the American political system and society is coupled with learning about how other countries and societies organize politically. Another important component includes understanding why some countries cooperate while others engage in conflict. Finally, the major exposes students to real-world problems that require political solutions, and trains students to operate effectively in a dynamic and complex global environment.

Course code for this program is PSCI.

Political Science Courses

Below is a sample of current courses which represent areas of inquiry within our curriculum.

Code	Title	Credit Hours
PSCI 2116	Introduction to Environmental Policy and Policy Analysis	3
PSCI 3062	Revolution and Political Violence	3
PSCI 3074	Democracy and Its Citizens in the US and EU	3
PSCI 3183	International Law	3

PSCI 3225	Strategy and Politics	3
PSCI 3271	Law and Society: Legal Institutions and Human Behavior	3
PSCI 3774	Free Speech and Dangerous Ideas	3
PSCI 4243	Modern Warfare: Terrorism, Ideology, Identity	3
PSCI 4771	Civil Rights and Liberties in America	3

Undergraduate Learning Outcomes

The political science curriculum produces the following learning outcomes:

- the ability to persuasively articulate written and oral ideas and arguments,
- the ability to analyze problems using logical inference from quantitative and qualitative evidence,
- the ability to critically evaluate arguments in political science research and our current political world, and
- a solid understanding of politics at the national and international level.

Students interested in political science may want to consider the Global Studies Residential Academic Program (RAP) (p. 942).

Bachelor's Degree

- Political Science - Bachelor of Arts (BA) (catalog.colorado.edu/undergraduate/colleges-schools/arts-sciences/programs-study/political-science/political-science-bachelor-arts)

Minor

- Political Science - Minor (p. 526)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Courses

PSCI 1101 (3) Introduction to American Politics

Emphasizes interrelations among levels and branches of government, formal and informal institutions, processes, and behavior.

Additional Information: GT Pathways: GT-SS1 - Soc Behav Sci: Econ or Pol Systems

Arts Sci Core Curr: Contemporary Societies

Arts Sci Core Curr: United States Context

Arts Sci Gen Ed: Distribution-Social Sciences

Departmental Category: American

MAPS Course: Social Science

MAPS Course: Social Science US Context

PSCI 2004 (3) Survey of Western Political Thought

Studies main political philosophies and political issues of Western culture, from antiquity to 20th century.

Additional Information: GT Pathways: GT-SS1 - Soc Behav Sci: Econ or Pol Systems

Arts Sci Core Curr: Ideals and Values

Arts Sci Gen Ed: Distribution-Social Sciences

Departmental Category: Political Theory

PSCI 2012 (3) Introduction to Comparative Politics

Most countries confront a variety of common political problems, including how to gain popular support, what kinds of political institutions are most appropriate, and how to distribute burdens and benefits to different segments of the population. Concentrates on learning how to compare different political systems and provides illustrative examples from several countries in both the industrialized and nonindustrialized world.

Additional Information: GT Pathways: GT-SS1 - Soc Behav Sci: Econ or Pol Systems

Arts Sci Core Curr: Contemporary Societies
Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Comparative

PSCI 2028 (3) Special Topics

Offers subjects not covered by existing courses. Offered when department approves a special topic.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: General

PSCI 2075 (3) Quantitative Research Methods

Introduces quantitative research methods used in political science. Focuses on basic tools of analysis: data collection, processing, and evaluation, with special attention to survey techniques. Includes elite and case study analysis; aggregate, cluster, and content analysis; and the use of computers in political research.

Additional Information: Arts Sci Core Curr: Quant Reasn Mathmat Skills
Arts Sci Gen Ed: Distribution-Social Sciences
Arts Sci Gen Ed: Quantitative Reasoning Math
Departmental Category: Empirical Theory and Research Methodology

PSCI 2106 (3) Introduction to Public Policy Analysis

Studies policymaking processes in American government, factors shaping public decision, and issues and questions relevant to political inquiry.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Public Policy

PSCI 2116 (3) Introduction to Environmental Policy and Policy Analysis

Teaches a systematic general framework for the analysis of environmental policy issues. Analyzes the interaction of environmental sciences, ethics, and policy across a range of environmental policy problems. Stresses critical thinking and practical applications.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Public Policy

PSCI 2223 (3) Introduction to International Relations

Introduces the field of international relations, with general survey of the theories, histories, and problems of historical and contemporary relations among state and nonstate actors.

Additional Information: GT Pathways: GT-SS1 - Soc Behav Sci: Econ or Pol Systems

Arts Sci Core Curr: Contemporary Societies
Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: International Relations

PSCI 2481 (3) Introduction to the Legal Process

Covers basic legal concepts and processes emphasizing the American system. Gives special attention to political functions of law. Recommended as preparation for PSCI 4241.

Recommended: Prerequisite PSCI 1101.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: American

PSCI 3011 (3) The American Presidency and the Executive Branch

Examines the constitutional, institutional and historical development of the presidency and the federal bureaucracy. Explores the changing role of the executive branch in the U.S. political system over time and competing views of executive power.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Core Curr: United States Context
Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: American

PSCI 3021 (3) U.S. Campaigns and Elections

Introduces students to the subjects, techniques, and findings of Political Science research on campaigns and elections. Particular emphasis is placed on the study of voting, campaign effects, partisan coalitions, electoral rules, campaign finance, and the policy impact of elections.

Recommended: Prerequisite PSCI 1101.

Additional Information: Arts Sci Core Curr: United States Context
Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: American

PSCI 3022 (3) Russian Politics

Examines the development of Russian politics from the late Soviet period to the present. Topics covered include political culture, democratic transition, economic reform, and social problems in Russia.

Additional Information: Arts Sci Core Curr: Contemporary Societies
Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Comparative

PSCI 3031 (3) Political Parties and Interest Groups

Highlights the practice of party politics in the United States, including the nature, structure, organization, and functions of political parties and interest groups. Analyzes interest group politics and political behavior.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite PSCI 1101.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: American

PSCI 3032 (3) Democracy, Inequality and Violence in Latin America

Stresses different perspectives on Latin American politics and understanding key political actors and processes. Country focus varies.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite PSCI 2012.

Additional Information: Arts Sci Core Curr: Contemporary Societies
Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Comparative

PSCI 3041 (3) The American Congress

Provides intensive examination of the role of Congress in American government, including congressional elections, representation, the organization of Congress, and congressional policy making. Examines larger context of congressional politics, including political parties, the president, and interest groups.

Recommended: Prerequisite PSCI 1101.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: American

PSCI 3051 (3) Public Opinion and Political Behavior

Examines measurement of public opinion and evaluation of its impact on governmental policy formation, including survey research techniques.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite PSCI 1101.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: American

PSCI 3052 (3) Gender and Politics in Latin America

Examines Latin American politics with particular focus on women's participation in social movements, war, revolution, and elections. Compares women's and men's politics and activism and examines changing gender and sexuality policies, gender relations, and the differential impact of political, economic, and social changes on men and women.

Equivalent - Duplicate Degree Credit Not Granted: WGST 3650

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite WGST 2600 or PSCI 3032.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Comparative

PSCI 3054 (3) American Political Thought

Highlights the development of American political theories and ideas from colonial period to present. Can also be taken for American field credit.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite PSCI 2004.

Additional Information: Arts Sci Core Curr: Ideals and Values
Arts Sci Core Curr: United States Context
Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Political Theory

PSCI 3061 (3) State Government and Politics

Examines politics in the American states from a comparative and historical perspective. Considers major political actors—interest groups, citizens (direct democracy), and political parties, as well as central institutions, in the state political arena. Also focuses on major state public policy concerns.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite PSCI 1101.

Additional Information: Arts Sci Core Curr: United States Context
Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: American

PSCI 3062 (3) Revolution and Political Violence

Studies and evaluates alternative theoretical frameworks for the analysis of revolution and political violence. Theoretical material is firmly couched in case situations, such as ethnic, class, colonial, urban, racial, and religious conflicts.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite PSCI 1101 or PSCI 2012 or IAFS 1000.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Comparative

PSCI 3064 (3) Environmental Political Theory

Examines environmental discourses as conceptual means for theorizing environmental politics, and applies normative political theories to contemporary environmental policy issues. Considers the roles of political actors (individuals, groups, the state) in defining and addressing environmental problems on local, national, and global levels.

Equivalent - Duplicate Degree Credit Not Granted: ENV 3064

Recommended: Prerequisite PSCI 2004.

Additional Information: Arts Sci Core Curr: Ideals and Values
Arts Sci Gen Ed: Distribution-Social Sciences
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Political Theory

PSCI 3071 (3) Urban Politics

Examines the structure of political, social, and economic influence in urban areas. Focuses on the relationship of the political system to governmental, social, and economic institutions and the contemporary policy processes in American cities.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite PSCI 1101.

Additional Information: Arts Sci Core Curr: United States Context
Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: American

PSCI 3072 (3) Government and Politics in Southeast Asia

Surveys historical and contemporary forces shaping politics in Southeast Asia. Gives special attention to comparative political economy, including development strategies and transitions to democracy.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite PSCI 2012 or IAFS 1000.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Comparative
Departmental Category: Asia Content

PSCI 3074 (3) Democracy and Its Citizens in the US and EU

Studies theories and problems related to citizenship in the US and the EU. This includes rights and restrictions of citizenship, issues of immigration, multicultural citizenship, globalization and citizenship. In the EU the relation between member nation citizenship and EU citizenship is a special problem. Examines how the US and EU compare.

Additional Information: Arts Sci Core Curr: Contemporary Societies
Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Political Theory

PSCI 3082 (3) Political Systems of Sub-Saharan Africa

Analyzes post-independence and post-Cold War change in sub-Saharan Africa and provides intensive case studies of selected countries exemplifying each type with South Africa seen as a special case.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite PSCI 2012 or IAFS 1000.

Additional Information: Arts Sci Core Curr: Contemporary Societies
Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Comparative

PSCI 3084 (3) Diversity, Disagreement, and Democracy: an Introduction to the Theory and Practice of Democracy

Examines the justification and limits for moral, political and religious pluralism. Students will be trained in the practice of dialogue and research the historical context of a subject that would be appropriate for a dialogue, and then interview members of the community who have different perspectives on the subject.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Political Theory

PSCI 3091 (3) Politics of Social Movements

Examines theoretical and empirical research on social movements from a U.S. perspective. Considers why social movements arise, who participates in them, the tactics they employ, obstacles they face, and their political impact.

Recommended: Prerequisite PSCI 1101.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: American

PSCI 3092 (3) Comparative Political Economy

Presents theories on the interaction between policies and economics, economic models of politics, and familiarizes students with an approach that will prove useful in understanding current developments in both economics and politics. Explores relationships between financial markets, currency regimes and politics with some special consideration of the behavioral foundations of political and economic developments. Recommended prerequisite: PSCI 2012.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Comparative

PSCI 3101 (3) Black Politics

Examines structure of political, social, and economic influence in urban areas. Focuses on the relationship of political processes to governmental, social, and economic institutions and contemporary policy processes in American cities.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite PSCI 1101.

Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Diversity-U.S. Perspective
Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: American

PSCI 3102 (3) South Asian Politics

Examine the diverse political trajectories of four South Asian countries: India, Pakistan, Nepal, and Sri Lanka. Using a comparative lens, we will take into account historical, cultural, and economic, in addition to political, factors in deciphering this diversity of political paths.

Recommended: Prerequisite PSCI 2012 or IAFS 1000.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Comparative
Departmental Category: Asia Content

PSCI 3105 (3) Designing Social Inquiry: An Introduction to Analyzing Political Phenomena

Tackles conceptualization and measurement with a focus on reliability and validity of measures at the individual level. Explores how improper measurement and conceptualization can affect our inferences. Investigates how to use the tools of causal logic with statistical tools to differentiate linear, spurious, intervening and conditional relationships with a particular focus on what it means to "control for other factors".

Requisites: Requires prerequisite course of PSCI 2075 (minimum grade C-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors).

Additional Information: Arts Sci Core Curr: Quant Reasn Mathmat Skills
Arts Sci Gen Ed: Distribution-Social Sciences
Arts Sci Gen Ed: Quantitative Reasoning Math
Departmental Category: Empirical Theory and Research Methodology

PSCI 3123 (3) War, Peace, and Strategic Defense

Analyzes employment, or the threat of employing force, in securing American interests in the post-Cold War world. Gives special attention to utilities claimed for nuclear weapons, and alternatively, to weapons control and disarmament.

Equivalent - Duplicate Degree Credit Not Granted: PACS 3800

Recommended: Prerequisite PSCI 2223.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: International Relations

PSCI 3143 (3) Current Affairs in International Relations

Analyzes the various theoretical and policy challenges facing the post-Cold War world, with an emphasis on examining alternative conceptions of and approaches to such challenges.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite PSCI 2223.

Additional Information: Arts Sci Core Curr: Contemporary Societies
Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: International Relations

PSCI 3155 (3) Survey Design and Analysis

Provides the unique experience of involvement in ongoing survey research. Designed for students from different disciplines who will learn about what makes a good versus bad survey, how to write effective questions and how to put survey questions together into a cohesive questionnaire. Gain insight into the pitfalls of survey research and how to overcome them. Provides hands-on, real world experience on the design, implementation and analysis of the annual Colorado Political Climate survey.

Requisites: Requires prerequisite course ANTH 4000 or APPM 4570 or BCOR 1020 or ECON 3818 or GEOG 3023 or GEOL 3023 or MATH 2510 or PSCI 2075 or PSYC 2111 or SOCY 2061 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Empirical Theory and Research Methodology

PSCI 3163 (3) American Foreign Policy

Examines foundations, assumptions, objectives, dynamics, and methods of U.S. foreign policy since WWII. Gives special attention to domestic and external problems of adapting U.S. policy to the changing world environment.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite PSCI 2223.

Additional Information: Arts Sci Core Curr: United States Context
Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: International Relations

PSCI 3174 (3) Sex, Power, and Politics: U.S. Perspectives

Explores how norms of sex, gender, race and sexuality find expression in institutions and policies in ways that legitimize only certain individuals as political actors, certain identities as politically relevant, and certain relationships as important. Critically examines how norms may be exposed, resisted, and changed by studying the politics of the women's, gay liberation, and men's movements in the U.S.

Equivalent - Duplicate Degree Credit Not Granted: WGST 3174

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite PSCI 2004 or WGST 2000 or LGBT 2000.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Political Theory

PSCI 3183 (3) International Law

Investigates the body of law that regulates relations between nation states and provides a framework for the solving of common problems. Explores its nature and effectiveness as well as its adaptability to a changing environment. Formerly PSCI 4183.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite PSCI 2223.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: International Relations

PSCI 3191 (3) National Security Organization and Policy Making

Analyzes how the American governmental and political system is structured to define, select, and implement national security policies. Examines roles of the president, Congress, bureaucracy, interest groups, and other actors.

Recommended: Prerequisite PSCI 1101.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: American

PSCI 3193 (3) International Behavior

Presents alternate theoretical frameworks for the explanation of international processes. Applies theories of conflict behavior and social organization to problems of war and peace.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite PSCI 2223.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: International Relations

PSCI 3205 (3) Undergrad Research Fellowship

Broadens and strengthens social science methodological skills and training by providing individualized instruction and research collaboration between the student and advanced graduate students and faculty. Promotes hands-on learning, immersion in the research process, and professional relationships with faculty. Includes a classroom component and a research opportunity in collaboration with a mentor.

Requisites: Requires prerequisite course of PSCI 2075 (minimum grade C-). Restricted to students with 27-180 credits (Sophomore, Junior or Senior) Political Science (PSCI) majors or minors only. Restricted to students with a cumulative GPA of 3.0 or higher.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Empirical Theory and Research Methodology

PSCI 3206 (3) The Environment and Public Policy

Considers constitutional, political, and geographic factors in development of public policy affecting the use of natural resources and management of the environment; organization, procedures, and programs for use of natural resources; and administration of environmental policies.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite PSCI 1101 or PSCI 2012.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Public Policy

PSCI 3211 (3) The Politics of Economic Inequality in the United States

Explores empirical and normative origins and current state of economic inequality in the United States from a political science perspective.

Evaluates how ideas about democracy and public policy address economic inequality, including the roles of gender, race and class in inequality. Examines the relationship between economic inequality and political inequality in both political behavior and political institutions.

Requisites: Requires a prerequisite course of PSCI 1101 (minimum grade D-).

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: American

PSCI 3213 (3) International Political Economy

Analyzes issues at the intersection of international politics and international economics. Utilizes theories and concepts from both economics and political science to understand issues in trade, finance, development and migration. Formerly PSCI 4193.

Recommended: Prerequisite PSCI 2223.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: International Relations

PSCI 3225 (3) Strategy and Politics

Focuses on the rational choice approach to understanding political decision making. Introduces students to the tools and methods of game-theoretic reasoning, and examines the strategic logic of many forms of political decision-making, including voting, lawmaking, and international conflict.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite PSCI 1101 or PSCI 2012 or PSCI 2223.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Empirical Theory and Research Methodology

PSCI 3271 (3) Law and Society: Legal Institutions and Human Behavior

Examines relationship between human behavior and legal system, looking closely at the voluntary relationship between the citizen and the state, the use of law to balance economic liberty and equality, support for civil liberties, and procedural, distributive, and retributive justice.

Recommended: Prerequisite PSCI 1101.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: American

PSCI 3274 (3) Capitalism and its Critics

Examines competing theoretical approaches to questions related to origins, development, and purposes of modern government in the United States; particular attention paid to impact of transformations in the underlying structure of the capitalist economy. Formerly PSCI 3171.

Recommended: Prerequisite PSCI 1101.

Additional Information: Arts Sci Core Curr: United States Context
Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Political Theory

PSCI 3281 (3) Development of American Political Institutions

Learn about the evolution of major American political institutions including the presidency, Congress, the judiciary, the party system and the right to vote.

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: American

PSCI 3301 (3) Gender, Sexuality and U.S. Law

Contemporary and historic overview of U.S. courts' treatment of sex and gender. Using the case method, examines policy issues including, but not limited to: same sex marriage and civil unions; privacy; affirmative action; abortion; reproductive technologies; and discrimination based on sex and sexual orientation in education and in the workplace.

Equivalent - Duplicate Degree Credit Not Granted: WGST 3300

Recommended: Prerequisite PSCI 1101 or WGST 2000.

Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Diversity-U.S. Perspective
Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: American

PSCI 3311 (3) Gender and U.S. Politics: Protest, Polls and Policy

Provides an overview and critical examination of women as political actors within the United States. Students will examine the gendered components of citizenship, election, political office, and public policy. Furthermore, students will explore the ways in which gender intersects with class, race, ethnicity, sexual orientation, and other identities in U.S. politics.

Equivalent - Duplicate Degree Credit Not Granted: WGST 3311

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: American

PSCI 3774 (3) Free Speech and Dangerous Ideas

Examines in depth various philosophical and legal justifications of First Amendment rights of speech, press, association and religion. Assesses these justifications in relation to broader normative theories of liberal democracy. Can also be taken for American field credit. Formerly PSCI 4774.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisites PSCI 2004 and PSCI 2481.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Political Theory

PSCI 4002 (3) Western European Politics

Comparatively analyzes development of the political systems and processes of European democracies. Emphasizes contemporary institutions, decision making patterns, and policy issues. Special attention to challenges of welfare systems.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite PSCI 2012.

Additional Information: Arts Sci Core Curr: Contemporary Societies
Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Comparative

PSCI 4012 (3) Global Development

Analyzes development theory, case studies in development strategies, and the problems and promises of development: specifically issues of gender, environment, labor, corruption and poverty. The primary focus is on explanations for variation in level of development over time and across countries.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite PSCI 2012.

Additional Information: Arts Sci Core Curr: Contemporary Societies
Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Comparative

PSCI 4016 (3) Inequality and Public Policy in the U.S. and Europe

Provides an in-depth understanding of factors that change the level of inequality in the U.S. and in Europe and its economic, political, and social consequences across these states over time.

Recommended: Prerequisite PSCI 1101 or PSCI 2012 or PSCI 2106.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Public Policy

PSCI 4022 (3) Chinese Foreign Policy

History of China's external relations and theories of foreign policy decision making. Explores two vital bilateral relations (Sino-U.S. and Sino-Japanese) and several key issues (like Taiwan) in China's 21st century foreign policy.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite PSCI 2012.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Comparative
Departmental Category: Asia Content

PSCI 4024 (3) Senior Seminar in Political Theory

Intensively analyzes and discusses major theories and issues of both contemporary political thought and the history of political philosophy. The topic is announced by the instructor, but might include analysis of concepts (justice, human rights, democracy, etc.) or major theories. Emphasizes advanced discussion plus individual research.

Recommended: Prerequisite PSCI 2004.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Political Theory

PSCI 4028 (3) Special Topics

Offers subjects not covered by existing courses. Offered when the department approves a special topic.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: General

PSCI 4052 (3) Chinese Politics

Explores the politics of 20th century China to speculate on China's future in the 21st century. Begins with an extensive look at the political history of the People's Republic, before turning to social, cultural, economic, and political issues today. Concludes with an examination of Chinese foreign policy, with a focus on Sino-American relations.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite PSCI 2012.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Comparative
Departmental Category: Asia Content

PSCI 4062 (3) East European Politics

Studies developments in the former Soviet satellites and Yugoslavia, their governmental organizations, and their relation to the former Soviet Union and the West.

Additional Information: Arts Sci Core Curr: Contemporary Societies
Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Comparative

PSCI 4106 (3) Issues and Challenges in American Green Energy Policy

Explores growth of contemporary American green energy industry. Explores different types of green energy policies and how government institutions and regularly arrangements affect the development of green energy policy.

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Public Policy

PSCI 4131 (3) Latinos and the U.S. Political System

Examines the political status and activities of Mexican Americans and other Latino groups (Cuban Americans and Puerto Ricans) in the U.S. Also covers Latino political attitudes and behaviors; Latino efforts to influence the major national, state, and local institutions of the American government; and public policy concerns of Latinos.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite PSCI 1101.

Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Diversity-U.S. Perspective
Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: American

PSCI 4173 (3) International Cooperation and Global Anarchy

Explores if and how countries cooperate in a world with no government. Investigates cooperation over a number of international issues, including peace and security, trade and development, climate change, human rights, and justice for victims of war crimes. Gives special attention to organizations including the United Nations, International Monetary Fund, European Union and World Trade Organization.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: International Relations

PSCI 4213 (3) Europe and the International System

Covers the past, present and future of Europe's global role.

Recommended: Prerequisite PSCI 2223.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: International Relations

PSCI 4221 (3) Political Psychology

Examines the psychological foundations of political decision-making among citizens and elites. Considers the role of political psychology in explaining political behavior and outcomes at the individual and collective level.

Recommended: Prerequisite PSCI 1101.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: American

PSCI 4241 (3) Constitutional Law

Focuses on the nature and scope of American constitutional principles as developed by the U.S. Supreme Court, including federalism, separation of powers, commerce, due process and equal protection.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite PSCI 1101.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: American

PSCI 4242 (3) Middle Eastern Politics

Explores the domestic politics of various Middle Eastern countries as well as the development and globalization of the region. Includes topics such as the ongoing prevalence of dictatorships, political Islamism, oil politics, economic growth and stagnation, and relations with the U.S.

Recommended: Prerequisite PSCI 2012.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Comparative
Departmental Category: Asia Content

PSCI 4243 (3) Modern Warfare: Terrorism, Ideology, Identity

Explores the evolution of warfare and origins of terrorism. Ideological and identity differences have come to the forefront of violent political conflicts while the emerging doctrine of warfare has placed civilians in the middle of modern conflicts. Tracks potential changes in the means of and reasons for fighting, roles of civilians and media, and rules of war.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisites PSCI 2223 and PSCI 3193.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: International Relations

PSCI 4252 (3) Politics of Ethnicity and Nationalism

Analyzes ethnic identity as a factor in contemporary politics. Deals extensively with the role of ethnic groups in political mobilization, the development of national collective consciousness, nation building, and international relations. Explores the influence of religion, language, history, culture and class on ethnic group formation and behavior.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite PSCI 2012.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Comparative

PSCI 4253 (3) Politics of Identity and Inter-Ethnic Violence

Discusses politics of identity and why identity is such a potent source of violence. Is inter-ethnic conflict an end in itself, or are ethnic groups trying to achieve other goals through violence? What can be done to prevent or ameliorate inter-ethnic strife? Examines theoretical aspects of identity, inter-ethnic conflict, as well as specific examples of ethnic crises.

Recommended: Prerequisite PSCI 2223 or PSCI 2012.

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: International Relations

PSCI 4283 (3) International Migration and Policy

Explores the politics of international migration, including public attitudes toward immigration, special interests politics of immigration policy making and the dynamics between political institutions and international migrations. Students will learn about the politics of international migration across different receiving and sending states over the past two centuries with an emphasis on the current debates over immigration in the U.S. and Western Europe.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: International Relations

PSCI 4302 (3) European Union Politics

Explores the development, functioning, focus and future of the European Union. Examines history, institutions, policies and politics as well as governance theories that have been developed to explain origins and evolution of the EU.

Recommended: Prerequisite PSCI 2012.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Comparative

PSCI 4341 (3) Media and Politics

Examines aspects of political communication as it applies to citizens, political decision makers, and specific public policies.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors).

Recommended: Prerequisite PSCI 1101.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: American

PSCI 4391 (3) Gender Politics and Global Activism

Addresses the problems and challenges women face around the world and the ways in which women have mobilized to address them. Explores political activism at the local, national, regional, and global levels. Focuses on different forms of activism, including strategies aimed at working with and within governmental institutions, as well as outside and against them.

Equivalent - Duplicate Degree Credit Not Granted: WGST 4500

Recommended: Prerequisite WGST 2000 or WGST 2600.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: American

PSCI 4701 (3) Symbolic Politics

Introduces uses and abuses of symbols as instruments and indicators of political change.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite PSCI 1101.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: American

PSCI 4703 (3) Technology, Society and the Future

Explores some of the remarkable technological advances made in recent years such as Artificial Intelligence, Robotics, Social Media, "Big Data," Internet-Interconnectivity, etc. in order to better understand how they are reshaping the world around us. Looks at the implications of these technological advances for a variety of social and political issues including education, communication, medicine, international development, international relations, work, social life, politics, elections and democracy. Recommended Prerequisites: PSCI 2012 and/or IAFS 1000.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: International Relations

PSCI 4714 (3) Liberalism and Its Critics

Examines contemporary arguments for and against liberalism. Focuses on the analysis, evaluation, and understanding of the philosophical contributions to this debate. Gives special attention to the concepts of justice, freedom, equality, and individualism.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite PSCI 2004.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Political Theory

PSCI 4715 (3) Honors Political Science Seminar

Involves writing and discussion of selected topics in political science. Critically reviews the major methodological and conceptual features of the discipline. Students begin their honors papers in the seminar. Department enforced prerequisite: minimum 3.3 GPA. Generally offered in fall term only.

Additional Information: Arts Sciences Honors Course
Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Empirical Theory and Research Methodology

PSCI 4716 (3) Selected Policy Problems

Integrates general principles of policy inquiry with documents and other literature on specific problems in public policy, in order to evaluate courses of action.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Public Policy

PSCI 4725 (3) Political Science Honors Thesis

Involves writing an honors thesis. Formerly PSCI 4008.

Requisites: Requires prerequisite course of PSCI 4715 (minimum grade B-).

Additional Information: Arts Sciences Honors Course
Departmental Category: Empirical Theory and Research Methodology

PSCI 4731 (3) Civic Engagement in America

Closely examines the various understandings of democracy, the arguments for and against democracy, and the progress of and prospects for democratic politics in the United States. Particular attention is paid to economic, social, and political developments in the United States that affect popular sovereignty, political equality, and liberty.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite PSCI 1101.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: American

PSCI 4732 (3) Critical Thinking in Development

Exposes students to current issues in the political economy of development. Subjects range from globalization, democratization and economic development. Specifically explores the international and domestic determinants of economic development with special reference to currency markets, foreign direct investment, trade and democratization.

Equivalent - Duplicate Degree Credit Not Granted: INVS 4302

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite PSCI 2012.

Additional Information: Arts Sci Core Curr: Contemporary Societies
Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Comparative

PSCI 4734 (3) Politics and Literature

Broadly examines political topics as they are presented in important literary works and analyzes the possibilities involved in using the literary mode to present political teachings.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite PSCI 2004.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Political Theory

PSCI 4751 (3) The Politics of Ideas

Examines theoretical arguments and case studies of interactions of ideas, interests, and institutions in policymaking. Analyzes processes through which ideas come to the public agenda, how institutional settings shape those ideas, and why some ideas and interests are more successful.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite PSCI 1101.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: American

PSCI 4771 (3) Civil Rights and Liberties in America

Implementation of rights and liberties in America. Examines fundamental issues of free speech, press, association, and religion along with rights to due process and equal protection under the law.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: American

PSCI 4783 (3) Global Issues

Studies the principal issues confronting humanity that affect stability and survivability and their economic, social, and political implications.

Requisites: Restricted to Political Science (PSCI), International Affairs (IAFS) or Environmental Studies (ENVS) majors only.

Recommended: Prerequisite PSCI 2012 or PSCI 2223.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: International Relations

PSCI 4792 (3) Issues in Latin American Politics

Studies several Latin American countries in some depth including history and contemporary politics. Teaches students to listen to and evaluate different sides of political controversies, and critically evaluate arguments.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite PSCI 2012.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Comparative

PSCI 4841 (1-3) Independent Study in American Politics

Subjects are chosen and arrangements are made to suit the needs of each student. Independent study is for upper-division students who have completed 9 credit hours of political science and who have an overall GPA of at least 3.00. Not more than 6 credit hours of independent study may be credited toward the minimum requirements in the political science major. A special independent study approval agreement form must be obtained from the department.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Recommended: Prerequisite PSCI 1101.

Additional Information: Departmental Category: American

PSCI 4842 (1-3) Independent Study in Comparative Politics

Subjects chosen and arrangements made to suit needs of each student. Independent study is for upper-division students who have completed 9 credit hours of political science and who have an overall GPA of at least 3.00. Not more than 6 credit hours of independent study may be credited toward the minimum requirements in the political science major. Special independent study approval agreement form must be obtained from the department.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Recommended: Prerequisite PSCI 2012 or IAFS 1000.

Additional Information: Departmental Category: Comparative

PSCI 4843 (1-3) Independent Study in International Relations

Subjects chosen and arrangements made to suit needs of each student. Independent study is for upper-division students who have completed 9 credit hours of political science and who have an overall average of at least 3.00. Not more than 6 credit hours of independent study may be credited toward the minimum requirements in the political science major. Special independent study approval agreement form must be obtained from the department.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Recommended: Prerequisite PSCI 2223.

Additional Information: Departmental Category: International Relations

PSCI 4844 (1-3) Independent Study in Political Theory

Subjects and arrangements suit individual student needs. Independent study is for upper-division students who have completed 9 credit hours of political science and who have an overall GPA of at least 3.00. Not more than 6 credit hours of independent study may be credited toward the minimum requirements in the political science major. Special independent study approval agreement form must be obtained from the department.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Recommended: Prerequisite PSCI 2004.

Additional Information: Departmental Category: Political Theory

PSCI 4846 (1-3) Independent Study in Public Policy

Subjects chosen and arrangements made to suit needs of each student. Independent study is for upper-division students who have completed 9 credit hours of political science and who have an overall average GPA of at least 3.00. Not more than 6 credit hours of independent study may be credited toward the minimum requirements in the political science major. Special independent study approval agreement form must be obtained from the department.

Repeatable: Repeatable for up to 6.00 total credit hours.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Public Policy

PSCI 4848 (1-3) Independent Study

Subjects chosen and arrangements made to suit needs of each student. Independent study is for upper-division students who have completed 9 credit hours of political science and who have an overall average of at least 3.00. Not more than 6 credit hours of independent study may be credited toward the minimum requirements in the political science major. Special independent study approval agreement form must be obtained from the department.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: General

PSCI 4938 (3-6) Internship in Government

With instructor’s assistance, students secure an internship with a political or governmental organization. In addition to the internship, the class consists of regular seminars, course readings and assignments, and individual conferences with the instructor. Student pursues an academic research project and writes an original research paper. Instructor approval required in semester preceding internship. Contact instructor prior to early registration.

Recommended: Prerequisite PSCI 1101.

Additional Information: Departmental Category: General

Political Science - Bachelor of Arts (BA)

A degree in political science provides students with knowledge and understanding of political issues and prepares them for a career in fields such as:

- Civil service
- Journalism
- Management
- Politics
- Legislative analysis
- Criminology
- City planning
- Population studies

Students can combine the major with teaching credentials and teach government, political science and civics in secondary schools. If a student plans to go on to the graduate level, the political science major provides excellent background for law school or graduate school in political science, sociology, economics or a number of other social science disciplines.

Career Services (<http://www.colorado.edu/career>) offers a number of programs and services designed to help students plan their career, including workshops, internships and placement services after graduation.

Requirements

Program Requirements

Students must complete the general requirements of the College of Arts and Sciences and the required courses listed below. Total credit hours required in Political Science courses: 42 credit hours.

No courses for the PSCI major may be taken pass/fail, and a student must have a grade of C- or better in all 42 required credit hours in political science, and a cumulative GPA of 2.0 or better in political science courses.

No more than 45 credit hours in political science credit will count toward the Arts and Sciences graduation requirement of 120 credit hours. This may be exceeded by 6 credit hours (for a total of 51 credit hours), provided that the excess credit hours are taken in PSCI 4715 and PSCI 4725 (honors thesis credit).

Required Courses and Credits

Code	Title	Credit Hours
PSCI Lower-division Distribution		

PSCI 1101	Introduction to American Politics	3
PSCI 2012	Introduction to Comparative Politics	3
PSCI 2223	Introduction to International Relations	3
PSCI 2004	Survey of Western Political Thought	3

Empirical Theory and Research Methodology

PSCI 2075	Quantitative Research Methods	3
Choose one of the following: 3		
PSCI 3105	Designing Social Inquiry: An Introduction to Analyzing Political Phenomena	
PSCI 3155	Survey Design and Analysis	
PSCI 3205	Undergrad Research Fellowship	
PSCI 3225	Strategy and Politics	

PSCI Upper-division Distribution

Select one course in four of the following six primary fields:	12
American	
Comparative	
International Relations	
Political Theory	
Empirical Theory and Research Methodology ¹	
Public Policy	

Political Science Electives

Three upper-division PSCI elective courses	9
One lower or upper-division PSCI elective course	3
Total Credit Hours	42

¹ Note that the second Empirical Theory and Research Methodology course taken in sequence, PSCI 3105, PSCI 3155, PSCI 3205 or PSCI 3225, will not count toward the upper division distribution requirement for the Empirical Theory/Research Methodology field.

Graduating in Four Years

Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of "adequate progress" as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress in political science, students should meet the following requirements:

- By the end of the second semester, declare the major.
- By the end of the third semester, complete PSCI 1101 and two of the following required courses: PSCI 2012, PSCI 2223, PSCI 2004 or PSCI 2075.
- By the end of the fourth semester, complete the remaining lower-division political science courses.
- By the end of the sixth semester, complete 12 upper-division credit hours of political science courses, including at least one course in three of the following fields: American, comparative, international relations, methodology, policy and theory. In addition, complete three upper-division or lower-division political science elective credit hours.
- During the seventh and eighth semesters, complete 12 credit hours of political science courses, including at least 9 upper-division political science elective credit hours and all remaining upper-division field distribution requirements.

Recommended Four-Year Plan of Study

Through the required course work for the major, students will complete all 12 credits of the the Social Sciences area of the Gen Ed Distribution

Requirement, as well as the QRMS component of the Gen Ed Skills Requirement. Depending on the courses selected in the major, students also can potentially complete the U.S. Perspective component of the Gen Ed Diversity Requirement.

Political Science - Minor

A minor in political science provides students with knowledge and understanding of political issues and prepares them for a career in fields such as:

- Civil service
- Journalism

- Management
- Politics
- Legislative analysis
- Criminology
- City planning
- Population studies

Students can combine the minor with teaching credentials and study in an affiliated field to teach government, political science and civics in secondary schools. If a student plans to go on to the graduate level, the political science minor provides an excellent complement to other fields as preparation for law school or graduate school in political science, sociology, economics or a number of other social science disciplines.

Career Services (<http://www.colorado.edu/career>) offers a number of programs and services designed to help students plan their career, including workshops, internships and placement services after graduation.

Requirements

Declaration of a minor in political science is open to any student enrolled at CU Boulder, regardless of college or school.

Students must complete 21 credit hours of political science to complete the political science minor, of which 9 credit hours must be in upper-division course work. All 21 credit hours must be completed with grades of C- or better and an overall GPA of 2.00. None of the required credit hours may be taken pass/fail.

Required Courses and Credit Hours

Code	Title	Credit Hours
Lower-Division Courses		
PSCI 1101	Introduction to American Politics	3
Select two of the following:		6
PSCI 2012	Introduction to Comparative Politics	
PSCI 2223	Introduction to International Relations	
PSCI 2004	Survey of Western Political Thought	
PSCI 2075	Quantitative Research Methods	
Upper-Division Courses		
9 credit hours in a minimum of two of the following primary fields: ¹		9
American		
Comparative		
International Relations		
Political Theory		
Empirical Theory and Research Methodology		
Public Policy		
Lower- or Upper-Division Political Science		
3 credit hours of lower- or upper-division political science		3
Total Credit Hours		21

¹ PSCI 4938 will not fulfill a primary field area in the minor.

International Affairs Majors

International affairs majors who wish to minor in political science must apply the following additional rules:

- No more than 9 credit hours toward the PSCI minor can come from courses that count toward another major.
- International affairs majors must take at least one upper-division course in American politics and one course (lower- or upper-division) in political theory, in addition to the regular minor requirements.

Psychology and Neuroscience

At the undergraduate level, this department offers a major in psychology and a major and a certificate in neurosciences. Psychology is a broad discipline that seeks to understand human cognition, emotion and behavior. It is also an applied field that is concerned with testing perception, psychopathology, inheritance of complex behavioral traits, mental health, memory and social factors that influence behavior.

Neuroscience is the study of the mechanisms of nervous system—the brain, the spinal cord and networks of sensory nerve cells, or neurons. Neuroscientists work to describe how neural circuits transmit signals and process different types of information. The principles of neuroscience are derived from the application of methods from many scientific disciplines, including molecular and cellular biology, biochemistry, physiology, structure and computational modeling.

Students contemplating postgraduate education, either in professional or in graduate school, are encouraged to participate in the departmental honors program, which provides special opportunities for individualized attention.

CU Boulder's Department of Psychology and Neuroscience has been ranked by the National Academy of Sciences as one of the best in the country with respect to the quality of the faculty and their scholarly productivity. Moreover, the department offers undergraduates a wide range of opportunities for involvement in research.

Course codes for this program are PSYC and NRSC.

Bachelor's Degrees

- Neuroscience - Bachelor of Arts (BA) (p. 536)
- Psychology - Bachelor of Arts (BA) (p. 538)

Certificate

- Neurosciences - Certificate (p. 540)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Courses

Neuroscience

NRSC 2100 (4) Introduction to Neuroscience

Provides an introduction to fundamental concepts in neuroscience. The goal of this first course is to provide a strong foundation in neurobiology-cell biology, physiology of the neuronal membrane, interneuronal communication, neurotransmission, gross anatomy, and how the brain develops. Students will also learn principles of sensory systems functions. Recitation will reinforce lecture concepts through discussion of current research.

Requisites: Requires prerequisite courses of MCDB 1111 or MCDB 1150 or EBIO 1210 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

NRSC 2101 (1-4) Topics in Neuroscience

Provides students with the opportunity to focus on a specific area of Neuroscience in depth. Instructor consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

NRSC 2200 (2) Laboratory Techniques in Neuroscience

Introduces students to many basic and essential laboratory skills in neuroscience research. Students will learn experimental methods and perform experiments depicting principles in neurophysiology, neuroanatomy, neurochemistry, and the fundamentals of neuroimaging techniques.

Requisites: Requires a prerequisite course of NRSC 2100 (minimum grade C-). Restricted to Neuroscience (NRSC) majors only.

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Arts Sci Gen Ed: Distribution-Natural Sci Lab

NRSC 4011 (1-3) Senior Thesis

Critically reviews topics in neuroscience research, scholarly analysis of a major neuroscience issue, and/or empirical research project. See the neuroscience director for further information.

NRSC 4015 (3) Affective Neuroscience

Experiencing and learning from affect-emotional value—is a fundamental part of the human experience. When people started thinking of brains as computers, research on emotion fell by the wayside. Recently however, this has changed, and there is an explosion of work on the brain mechanisms of affective value. Covers recent advances in understanding the emotional brain.

Equivalent - Duplicate Degree Credit Not Granted: NRSC 5015

Requisites: Requires a prerequisite course of PSYC 2012 or NRSC 2100 (minimum grade C-). Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

NRSC 4032 (3) Neurobiology of Learning and Memory

Provides a comprehensive treatment of how the brain acquires, stores, and retrieves memories. To do this we will consider (a) the methods used to address these issues, (b) what we know about how brain systems are organized to support memories of different types, and (c) the synaptic mechanisms that are involved.

Equivalent - Duplicate Degree Credit Not Granted: NRSC 5032

Requisites: Requires a prerequisite course of PSYC 2012 or PSYC 4052 or NRSC 2100 or NRSC 4052 (minimum grade C-). Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Departmental Category: Biological

NRSC 4042 (3) Systems Neuroscience

Explore the neurophysiology and function of sensory systems, beginning with a detailed review of functional neuroanatomy, electrophysiology of excitable cells, and the visual, auditory and sensorimotor systems. The level of challenge in mastering both the breadth and depth of materials in this course is calibrated to prepare students for advanced post-graduate study. Credit not granted for PSYC/NRSC 4052 and NRSC 4042.

Requisites: Requires prerequisite of (PSYC 2012 or NRSC 2100) and one of the following (EBIO 1210 or MCDB 1111 or MCDB 1150) all require minimum grade of C-.

NRSC 4052 (4) Behavioral Neuroscience

This advanced course the anatomy and physiology of the central nervous system in detail, and applies that understanding to the visual, auditory, and sensorimotor systems, demonstrating how the anatomy and physiology of the nervous system can be used to explain behavior. The laboratory uses live animals and computer simulations.

Equivalent - Duplicate Degree Credit Not Granted: NRSC 5052 and PSYC 4052 and PSYC 5052

Requisites: Requires a prerequisite course of PSYC 2012 or NRSC 2100 and one of the following sequences EBIO 1210 and EBIO 1220 or CHEM 1113 and CHEM 1133 or PHYS 1010 and 1020 or PHYS 2010 and PHYS 2020 (all minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Arts Sci Gen Ed: Distribution-Natural Sci Lab

NRSC 4062 (3) The Neurobiology of Stress

Provides an introduction to the concept of stress and the physiological systems involved. Factors modulating stress vulnerability versus resilience, and stress interactions with other systems with health relevance will be explored. Emphasis will be placed on current research on brain mechanisms. Formerly PSYC 4062.

Requisites: Requires prerequisite course of PSYC 2012 or NRSC 2100 (minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior).

Recommended: Prerequisite a strong foundation and interest in biological psychology, neuroscience, and physiology.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Departmental Category: Biological

NRSC 4072 (3) Clinical Neuroscience: A Clinical and Pathological Perspective

Provides a review of the anatomy and physiology of the nervous system and then explores how alterations in these systems can result in neurologic or psychiatric disorders. Emphasizes pathological neuroanatomy, neurophysiology and neuropharmacology, which is essential for understanding problems related to health and disease.

Equivalent - Duplicate Degree Credit Not Granted: NRSC 5072

Requisites: Requires a prerequisite course of PSYC 2012 or PSYC 4052 or NRSC 2100 or NRSC 4052 and one of the following sequences of courses: EBIO 1210 and 1220 or MCDB 1150 and 2150 or MCDB 1150 and EBIO 1220 or EBIO 1210 and MCDB 2150 (all minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Departmental Category: Biological

NRSC 4082 (3) Neural Circuits of Learning and Decision Making

Provides an in-depth survey of the neural mechanisms of learning, motivated behavior and decision making. Analysis will focus on the interaction of neural circuits underlying these processes with particular attention to the cellular, molecular and information-processing aspects of identified pathways and considered into the context learning-based and neuroeconomic models of choice.

Equivalent - Duplicate Degree Credit Not Granted: NRSC 5082

Requisites: Requires prerequisite course of NRSC 2100 or NRSC 4052 (minimum grade C-).

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

NRSC 4092 (3) Behavioral Neuroendocrinology

Provides an introduction to neuroendocrinology with a focus on the interaction between hormones and brain function.

Equivalent - Duplicate Degree Credit Not Granted: NRSC 5092

Requisites: Requires a prerequisite course of NRSC 2100 (minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Psychology (PSYC) or Neuroscience (NRSC) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Departmental Category: Biological

NRSC 4132 (3) Neuropharmacology

Study of drug action within the central nervous system. This course is designed to provide a fundamental understanding of the neurobiological and neurochemical mechanisms of drug action. Topics covered include the following: 1) principles of pharmacology; 2) brain neurotransmitter systems; 3) biochemical basis of psychiatric disorders and their pharmacological treatment.

Equivalent - Duplicate Degree Credit Not Granted: NRSC 5132

Requisites: Requires a prerequisite course of NRSC 2100 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Departmental Category: Biological

NRSC 4155 (4) Cognitive Neuroscience/Neuropsychology

Introduction to cognitive neuroscience and neuropsychology. Provides a survey of the neuropsychological underpinnings for a wide range of cognitive functions: vision, object recognition, attention, language, memory and executive function. One lab per week.

Equivalent - Duplicate Degree Credit Not Granted: PSYC 4155

Requisites: Requires a prerequisite course of PSYC 2111 and PSYC 3111 and either PSYC 2012 or NRSC 2100 (all minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sci Lab
Arts Sci Gen Ed: Distribution-Natural Sciences

NRSC 4542 (3) The Neurobiology of Mental Illness

Provides in depth study of what is known concerning the neurobiology of mental illnesses, with a focus on depression and anxiety. Consideration will be given to both animal models and human work, with neurochemical, circuitry level, and neuroinflammatory processes to be highlighted. There will be discussion of the intricacies of determining the effectiveness of pharmacological treatments, and what the implications of such treatments might be.

Requisites: Requires prerequisite courses of PSYC 2012 or NRSC 2100 and one of the following: PSYC 4052 or NRSC 4052 or NRSC 4132 or NRSC 4082 or NRSC 4092 or NRSC 4032 (all minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Departmental Category: Biological

NRSC 4545 (3) Neurobiology of Addiction

Covers an intensive survey and synthesis of recent findings contributing to our understanding of the neurobiological basis of addiction. Analysis of both drug and behavioral addictions will be made at the molecular, cellular and neurocircuitry levels and synthesized into models utilizing common themes between various addictions and contributing pathologies.

Equivalent - Duplicate Degree Credit Not Granted: NRSC 5545

Requisites: Requires prerequisite courses of NRSC 4132 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

NRSC 4561 (2-3) Special Topics in Neuroscience

Presents and analyzes special interest topics from the broad and interdisciplinary field of neuroscience. The instructor determines the content of a particular section. Repeatable for up to 6.00 total credit hours.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of NRSC 2100 (minimum grade C-). Restricted to Neuroscience (NRSC) majors only.

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

NRSC 4841 (1-3) Independent Study in Neuroscience

Pass/Fail only.

Repeatable: Repeatable for up to 8.00 total credit hours.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) Neuroscience (NRSC) majors only.

Grading Basis: Pass/Fail

NRSC 4911 (3) Teaching of Neuroscience

Offers a rich experience for students to develop and organize curriculum to complement the Neuroscience core courses. Offers a valuable teaching experience utilizing computational modeling to simulate experimental results. Any Neuroscience curriculum course, such as Intro to Neuroscience I or II, Neuropharmacology, Neurobiology of Learning and Memory or Behavioral Neuroscience may be appropriate with instructor consent.

Equivalent - Duplicate Degree Credit Not Granted: NRSC 5911

Psychology**PSYC 1001 (3) General Psychology**

Provides a foundation for engaging with scientific research on human behavior, and surveys the basic principles and theories of psychology. Topics include biological and hereditary influences on behavior; human perception, attention, learning, and memory; social influences; personality; psychiatric disorders and treatments.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Departmental Category: General
MAPS Course: Social Science

PSYC 2012 (3) Biological Psychology

Surveys biological bases of learning, motivation, emotion, sensory processes and perception, movement, comparative animal behavior, sexual and reproductive activity, instinctual behavior, neurobiology of language and thought, and neurophysiology and neuroanatomy in relation to behavior.

Requisites: Requires prerequisite PSYC 1001 (minimum grade C-).

Additional Information: GT Pathways: GT-SC2 -Natural Physicl Sci:Lec
Crse w/o Req Lab

Arts Sci Core Curr: Natural Science Non-Sequence

Arts Sci Gen Ed: Distribution-Natural Sciences

Departmental Category: Biological

PSYC 2111 (4) Psychological Science I: Statistics

Three hours of lecture and one two-hour lab per week. Introduces descriptive and inferential statistics and their roles in psychological research. Topics include correlation, regression, T-test, analysis of variance and selected nonparametric statistics.

Requisites: Requires prerequisite course of MATH 1011 or MATH 1071 or MATH 1081 or MATH 1150 or MATH 1212 or MATH 1300 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Departmental Category: General

PSYC 2145 (3) Introductory Cognitive Psychology

Introduces the study of human cognitive processes and covers perception, attention, memory, language, problem solving, reasoning, and decision making. Focuses on basic research and theory in cognitive psychology but also considers their implications for everyday applications such as effective learning and retention, multitasking, and eyewitness testimony.

Requisites: Requires a prerequisite course of PSYC 1001 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Departmental Category: Experimental

PSYC 2606 (3) Social Psychology

Covers general psychological principles underlying social behavior. Analyzes major social psychological theories, methods, and topics, including attitudes, conformity, aggression, attraction, social perception, helping behavior, and group relations.

Requisites: Requires a prerequisite course of PSYC 1001 (minimum grade C-).

Additional Information: GT Pathways: GT-SS3 -Soc Behav Sci:Hmn Behav, Cult, Soc Frame

Arts Sci Core Curr: Contemporary Societies
Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Social

PSYC 2700 (3) Psychology of Gender and Sexuality

Examines psychological research on gender and sexuality as they intersect with race, class and other social categories. Points of emphasis include differences in cognition, attitudes, personality and social behavior. Conceptual themes include research methodologies, implicit and explicit attitudes, stigma and stereotypes. These elucidate such areas as close relationships, leadership, career success and mental health and happiness.

Equivalent - Duplicate Degree Credit Not Granted: WGST 2700

Requisites: Requires a prerequisite course of PSYC 1001 or WGST 2000 (minimum grade C-).

Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Distribution-Social Sciences
Arts Sci Gen Ed: Diversity-U.S. Perspective
Departmental Category: General

PSYC 3001 (4) Honors Research Methods Seminar

Focuses on research design. Each student prepares an original, detailed research proposal, which can become the honors thesis. Open only to students who have been accepted into the psychology departmental honors program. Instructor consent required.

Additional Information: Arts Sciences Honors Course
Departmental Category: General

PSYC 3005 (3) Cognitive Science

Provides an introductory survey of influential models, theoretical approaches, and methods of cognitive science. Emphasizes and explains the convergence by work in multiple fields - including psychology and neuroscience, linguistics, computer science, and philosophy - on the idea that mental activity is a form of computation. Students from diverse backgrounds are introduced to a wide range of methods and approaches, including behavioral and neuroimaging experimental approaches, computational modeling and philosophical work. Department enforced prerequisites: two of the following CSCI 1300 or LING 2000 or PSYC 2145.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 3702 and LING 3005 and PHIL 3310 and SLHS 3003

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Arts Sci Gen Ed: Distribution-Social Sciences
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Experimental

PSYC 3102 (3) Behavioral Genetics

Introduces the basic principles of genetics, covers how these principles can be used in the study of behavior, and evaluates the evidence for genetic influences on behavioral characteristics.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Departmental Category: Biological

PSYC 3111 (4) Psychological Science 2: Research Methods in Psychology

Provides a foundation in research methodology to give students the ability to design, conduct, analyze, and present (both verbally and in writing) an empirical study in psychology. Allows students to be effective producers and consumers of research.

Requisites: Requires prerequisite courses of PSYC 1001 and PSYC 2111 (minimum grade C-).

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: General

PSYC 3112 (3) Behavioral Genetics II

Follows PSYC 3102, Behavior Genetics, and surveys recent developments in behavior genetics, including recent genotyping and sequencing technologies, statistical approaches, and epigenetics.

Requisites: Requires a prerequisite course of PSYC 3102 (minimum grade C-).

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Departmental Category: Biological

PSYC 3131 (3) Human Emotion

Introduces students to a diverse array of theoretical and empirical issues related to the study of human emotion. Evolutionary theories of anger, love and disgust; emotion and morality; cultural and gender differences; emotion and the brain; relation between emotion and thinking; development of emotion; and abnormal emotions in mental illness.

Requisites: Requires a prerequisite course of PSYC 1001 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: General

PSYC 3303 (3) Abnormal Psychology

Examines etiological, theoretical, clinical, diagnostic, and experimental perspectives of major mental health disorders, with an emphasis on the main symptoms and diagnostic criteria associated with these disorders.

Requisites: Requires a prerequisite course of PSYC 1001 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Departmental Category: Clinical

PSYC 3456 (3) Psychology of Personality

Offers a psychological study of structure, organization and development of the person as a whole. Analysis of major theories, methods and research, including topics such as emotion, motivation, temperament, inner experience, identity and the self, personality change and the influence of sociocultural context.

Requisites: Requires a prerequisite course of PSYC 1001 (minimum grade C-). Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Social

PSYC 3511 (3) History of Psychology

Includes outline of development of psychological theories since the Greek philosophers, the story of experimental psychology and its problems, and schools of psychological thinking. Students read original sources in English and English translations. Formerly PSYC 4511.

Requisites: Requires a prerequisite course of PSYC 1001 (minimum grade C-). Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: General

PSYC 3684 (3) Developmental Psychology

In-depth consideration of human developmental processes across the life span. Includes coverage of the major topics in human development, such as physical, cognitive, social, emotional, and moral development.

Requisites: Requires prerequisite of PSYC 1001 (minimum grade C-). Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisites PSYC 2111 and PSYC 3111 (Both require minimum grade of C-).

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Developmental

PSYC 4001 (3) Honors Seminar 2

Surveys contemporary issues, explores current controversies, and examines in detail selected topics in psychology. Open to juniors and seniors pursuing departmental honors.

Additional Information: Arts Sciences Honors Course
Departmental Category: General

PSYC 4011 (1-3) Senior Thesis

Critically reviews some aspect of psychological literature, scholarly analysis of a major psychological issue, and/or empirical research project. See the psychology honors director for further information.

Additional Information: Departmental Category: General

PSYC 4021 (3) Psychology and Neuroscience of Exercise

Explores social, cognitive, psychobiological and behavioral aspects of exercise and other forms of physical activity. Examines how psychological and neuroscience research have been used to study how participation in regular physical activity affects mental health and how psychological and other variables influence participation in, adherence to, enjoyment of, and consequences of exercise and physical activity.

Requisites: Requires a prerequisite course of PSYC 2012 or NRSC 2100 (minimum grade C-). Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Departmental Category: General

PSYC 4031 (3) Sport Psychology

Explores the role psychological factors play in the participation in, performance in, and enjoyment of sport. Topics include the role of motivation, attention, arousal, psychological skills training, leadership, and teamwork in sport performance; the psychological variables influencing exercise addiction, overtraining, burnout, body image, and susceptibility to, and recovery from, athletic injuries; and competition, cooperation aggression, and moral behavior in sport.

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: General

PSYC 4052 (4) Behavioral Neuroscience

This advanced course the anatomy and physiology of the central nervous system in detail, and applies that understanding to the visual, auditory, and sensorimotor systems, demonstrating how the anatomy and physiology of the nervous system can be used to explain behavior. The laboratory uses live animals and computer simulations.

Equivalent - Duplicate Degree Credit Not Granted: PSYC 5052 and NRSC 4052 and NRSC 5052

Requisites: Requires a prerequisite course of PSYC 2012 or NRSC 2100 and one of the following sequences EBIO 1210 and EBIO 1220 or CHEM 1113 and CHEM 1133 or PHYS 1010 and 1020 or PHYS 2010 and PHYS 2020 (all minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sci Lab
Arts Sci Gen Ed: Distribution-Natural Sciences
Departmental Category: Biological

PSYC 4114 (3) Educational Psychology and Adolescent Development

Examines the principles of educational and adolescent psychology and development that play a significant role in analyzing and understanding the complex processes in middle and secondary school classrooms. Course has both theoretical and practical dimensions.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 4112

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Developmental

PSYC 4136 (4) Judgment and Decision Making

Introduces the study of judgment and decision making processes (estimation, prediction and diagnosis, choice under certainty, and risky decision making) and the methods that have been developed to improve these processes (statistical modeling, decision analysis, and expert systems).

Requisites: Requires prerequisite courses of PSYC 1001 and PSYC 2606 and PSYC 2111 and PSYC 3111 (all minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Psychology (PSYC) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Social

PSYC 4142 (3) Brain Injury, Plasticity and Recovery: From Neuron to Behavior

Traumatic brain injury is prevalent in all aspects of society, with incidence rates varying according to age, gender, military affiliation and participation in certain sports. Delves into the full spectrum of consequences following injury, beginning with the individual neural cells in the brain through to the behaving individual. Covers strategies to improve functional recovery.

Requisites: Requires a prerequisite course of PSYC 2012 or NRSC 2100 (minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) majors only.

Recommended: Prerequisite NRSC 4132.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Departmental Category: Biological

PSYC 4145 (4) Advanced Cognitive Psychology

Advanced course in human cognitive processes. Covers key aspects of cognition, such as perception, attention, learning, memory, language and thinking. Discusses major theories and ideas in terms of the research they have inspired. Emphasis varies with instructor. One lab per week and a research project is required.

Equivalent - Duplicate Degree Credit Not Granted: PSYC 5145

Requisites: Requires prerequisite courses of PSYC 1001 and PSYC 2145 and PSYC 2111 and PSYC 3111 (all minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Departmental Category: Experimental

PSYC 4155 (4) Cognitive Neuroscience/Neuropsychology

Introduction to cognitive neuroscience and neuropsychology. Provides a survey of the neuropsychological underpinnings for a wide range of cognitive functions: vision, object recognition, attention, language, memory and executive function. One lab per week.

Equivalent - Duplicate Degree Credit Not Granted: NRSC 4155

Requisites: Requires a prerequisite course of PSYC 2111 and PSYC 3111 and either PSYC 2012 or NRSC 2100 (all minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sci Lab
Arts Sci Gen Ed: Distribution-Natural Sciences
Departmental Category: Experimental

PSYC 4165 (4) Psychology of Perception

One lab, three lect. per week. Analyzes peripheral and central mechanisms involved in the transduction and interpretation of experience. Gives special attention to vision and audition; major theories in these areas are discussed in terms of research they have inspired.

Requisites: Requires a prerequisite course of PSYC 1001 and PSYC 2111 and PSYC 3111 (all minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Arts Sci Gen Ed: Distribution-Natural Sci Lab
Departmental Category: Experimental

PSYC 4175 (4) Computational Cognitive Neuroscience

Introduction to cognitive neuroscience (how the brain gives rise to thought) using computer simulations based on the neural networks of the brain. Covers a full range of cognitive phenomena including perception and attention, learning and memory, language, and higher-level cognition based on both large-scale cortical neuroanatomy and detailed properties of cortical neural networks. One lab per week.

Equivalent - Duplicate Degree Credit Not Granted: PSYC 5175

Requisites: Requires prereq of PSYC 1001 and PSYC 2012 or NRSC 2100 and PSYC 2111 or MATH 2510 or 2520 or IPHY 2800 or APPM 1710 or 2750 or CHEN 3010 or 3130 or ECON 3818 (min grad C-). Restricted to PSYC or NRSC majors with 57-180 credits only.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Arts Sci Gen Ed: Distribution-Natural Sci Lab
Departmental Category: Experimental

PSYC 4220 (3) Language and Mind

Studies topics such a speech perception, word recognition, sentence comprehension, language acquisition, bilingualism, reading and writing. Examines the role of language as a product and producer of the mind, studying interactions between language and cognition from an interdisciplinary perspective. Students will become familiar with the methods of psycholinguistics and design and conduct a psycholinguistic experiment on their own.

Equivalent - Duplicate Degree Credit Not Granted: LING 4220

Recommended: Prerequisites PSYC 1001 and LING 2000.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: General

PSYC 4225 (4) Interdisciplinary Research Methods in Child Language Acquisition

Explores fundamental issues in language acquisition cross-culturally, combining methods from Linguistics, Anthropology, Psychology and Computer Science. Students will explore theoretical issue using a hands-on approach that involves acquiring skills such as designing and conducting experiments, investigating corpus data, and computational modeling.

Equivalent - Duplicate Degree Credit Not Granted: LING 4225

Requisites: Requires a prerequisite course of PSYC 1001 or LING 2000 (minimum grade C).

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Developmental

PSYC 4263 (3) Evidence-Based Practice in Mental Health: Science and Skills

Provides an intensive introduction to behavioral interventions for common mental health problems and the framework of evidence-based practice in psychology, including helping students to acquire, critically evaluate and communicate about clinical psychological science intervention research and become familiar with applied skills that are relevant to a broad range of clinical settings.

Requisites: Requires prerequisite courses of PSYC 2111 and PSYC 3111 and PSYC 3303 (all minimum grade C-)

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

PSYC 4332 (1) Found in Translation: TBI From Bench to Bedside to Community

Traumatic Brain Injury (TBI) is prevalent in all aspects of society. Delves into all aspects of TBI, with particular emphasis on translational clinical neuroscience. That is, the movement of knowledge from bench, to bedside, to community. All of this knowledge resulting in better treatment of and outcome for those with TBI.

Requisites: Requires prerequisite courses of PSYC 2012 or NRSC 2100 (minimum grade C-). Restricted to students with 57-180 units (Juniors or Seniors).

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Departmental Category: Biological

PSYC 4376 (4) Research Methods in Social Psychology

Introduces the study of social psychological processes, emphasizing the social cognition perspective (e.g., stereotyping, person perception, theory of planned behavior) and the methods utilized in studying these processes. Students will complete research projects as part of the course.

Requisites: Requires prerequisite courses of PSYC 2606 and PSYC 2111 and PSYC 3111 (all minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Psychology (PSYC) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Social

PSYC 4443 (4) Research Methods in Clinical Psychology

Learn to evaluate research methods as they relate to etiology, assessment, and intervention of psychological disorders. Emphasizes the importance of using sound methodological strategies in both research and clinical settings.

Requisites: Requires prerequisite courses of PSYC 2111 and PSYC 3111 and PSYC 3303 (all minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) only.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Clinical

PSYC 4526 (3) Social Neuroscience

Develops greater knowledge of the general psychological principles underlying social behavior by using methods and theories from neuroscience. Students learn about common methods in human neuroscience and how they can be applied to better understand social behavior.

Requisites: Requires prerequisite courses of PSYC 2012 and PSYC 2111 and PSYC 2606 and PSYC 3111 (all minimum grade C-). Restricted to students with 57-180 credits (junior or senior) Psychology (PSYC) or Neuroscience (NRSC) majors only.

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Social

PSYC 4541 (3) Special Topics in Psychology- Social Science

Examines individual or social dimensions of human behavior. Students will develop expertise in basic theories, as well as in measurement techniques and data interpretation regarding issues of societal significance. Students will consider applications of that knowledge, ranging from the development of new theory to solving problems.

Particular section content is determined by instructor. PSYC 4541 and/or PSYC 4551 may be taken 3 times with different topics, for a total of 9 credits

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite courses of PSYC 1001 and PSYC 2111 and PSYC 3111 (all minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Psychology (PSYC) majors only.

Additional Information: Departmental Category: General

PSYC 4543 (3) Clinical Neuropsychological Disorders

Neuropsychological disorders are behavioral and cognitive expressions of underlying brain diseases or injury. The course will provide in-depth coverage from clinical perspectives of wide range of disorders caused by stroke, traumatic brain injury, degenerative diseases, and inflammatory diseases. Students will learn the various neurologic, neuroimaging and neuropsychological methods for assessing and diagnosing these disorders and will review specific illustrative cases.

Requisites: Requires prerequisite PSYC 1001 or PSYC 2012 or NRSC 2100 (all minimum grade C-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Departmental Category: Clinical

PSYC 4553 (3) Women's Mental Health: A Biopsychosocial Approach

Provides a broad overview of current research and theory related to women's mental health, emphasizing topics and problems that are prevalent among or particularly relevant to women. Teaches students to develop a critical and integrative understanding women's mental health, including historical, social, cultural, biological, behavioral, cognitive and emotional factors.

Requisites: Requires a prerequisite course of PSYC 3303 (minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Psychology (PSYC) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Clinical

PSYC 4560 (3) Language Development

Examines the development of language in childhood and into adult life, emphasizing the role of environment and biological endowment in learning to communicate with words, sentences, and narratives.

Equivalent - Duplicate Degree Credit Not Granted: LING 4560 and SLHS 4560

Requisites: Restricted to Psychology (PSYC) or Neuroscience (NRSC) majors only.

Recommended: Prerequisites PSYC 1001 and LING 2000.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: General

PSYC 4606 (3) Advanced Topics in Social Psychology

In-depth study of selected topics in social psychology. Particular section content each semester is determined by the instructor. May be repeated for a maximum of 6 credit hours, provided the topics vary.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite courses of PSYC 1001 and PSYC 2606 and PSYC 2111 and PSYC 3111 (minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Psychology (PSYC) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Social

PSYC 4713 (3) Survey of Clinical Psychology

Covers theories and practices relating to problems of ability and maladjustment. Diagnostic procedures and treatment methods with children and adults.

Requisites: Requires a prerequisite course of PSYC 3303 (minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Psychology (PSYC) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Clinical

PSYC 4733 (4) Psychological Testing and Assessment

Provides an overview of issues central to testing and assessment of psychological constructs, including types of evaluation instruments currently in use in the field, their applications and design.

Requisites: Requires prerequisite courses of PSYC 1001 and PSYC 2111 and 3111 (all minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Clinical

PSYC 4744 (4) Methods in Developmental Psychology

Learn to critically read and form hypotheses from studies in the developmental literature, gain hands-on experience in testing children and in the design of methods to test children, evaluate experimental data and relate them to hypotheses, previous results and theory, and write so others can understand.

Requisites: Requires prerequisite courses of PSYC 1001 and PSYC 2111 and PSYC 3111 and PSYC 3684 (all minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Psychology (PSYC) majors only.

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: General

PSYC 4841 (1-6) Independent Study (Upper Division)

Pass/fail only.

Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) Psychology (PSYC) majors only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: General

PSYC 4911 (3) Teaching of Psychology

Students receive concrete experience in teaching general psychology under supervision of a psychology faculty member. Alternative pedagogical strategies are discussed. Students must submit an application to the undergraduate advising center.

Additional Information: Departmental Category: General

PSYC 4931 (3) Field Placement Internship

Offers valuable volunteer experience through a supervised field placement. Provides hands-on insight into the decisions and issues that confront professionals in psychology and related fields.

Requisites: Restricted to Psychology (PSYC) majors only.

Recommended: Prerequisite completion of 15 or more hours of psychology course work.

Additional Information: Departmental Category: General

Neuroscience - Bachelor of Arts (BA)

Our neuroscience major provides a fundamental understanding of brain function that emerges from knowledge of the interplay of the molecular, cellular, and systems-level operation of the nervous system. Our distinguished faculty also teach excellent upper division courses in areas of expertise that include, but are not limited to, learning and memory, addiction, mental illness, stress, neuroendocrinology, neuropharmacology and behavioral neuroscience.

Requirements

Prerequisites

It is policy to enforce the course prerequisites listed in the course descriptions. If you have not either taken and passed (C- or better) the prerequisites for a course, or obtained permission from the instructor or a departmental advisor to take the course based on equivalent preparatory course work or experience here or elsewhere, you may be administratively dropped from the course.

Degree Requirements

The neuroscience major requires a minimum of 34 credit hours in neuroscience course work and additional ancillary foundation course work.

Students must complete the general requirements of the College of Arts and Sciences and the requirements listed below. Students must fulfill all of the following requirements with a grade of C- or better. Additional explanatory notes are available in the department advising office, Muenzinger D260.

The department recommends taking NRSC 2100 and NRSC 2200, the genetics and statistics requirements and the ancillary biology, and chemistry sequences during the first two years of study.

Required Courses and Credits

Code	Title	Credit Hours
Required Courses		
NRSC 2100	Introduction to Neuroscience	4
NRSC 2200	Laboratory Techniques in Neuroscience	2
Select one of the following genetics courses: ¹		4-5
MCDB 2150	Principles of Genetics (preferred)	
EBIO 2070	Genetics: Molecules to Populations	
MCDB 2222	Core Concepts in Biology II: Genes, Genetics and Phenotypes	
MCDB 2150 and MCDB 2222 require one of the following 2 credit labs. ²		
MCDB 1161	From Dirt to DNA: Phage Genomics Laboratory I	
MCDB 1171	Drug Discovery Through Hands-on Screens I	
MCDB 2161	From DNA to Genes, Phage Genomics Laboratory II	

MCDB 2171	Drug Discovery Through Hands-On Screens 2	
Select one of the following statistics/computation requirement:		3-4
BCOR 1020	Business Statistics	
EBIO 1010	Introduction to Quantitative Thinking for Biologists	
ECON 3818	Introduction to Statistics with Computer Applications	
IPHY 2800	Introduction to Statistics	
MATH 2510	Introduction to Statistics	
PSYC 2111	Psychological Science I: Statistics	
Upper-division Neuroscience Requirements		
MCDB 3135	Molecular Cell Biology I	3
Select at least three of the following Neuroscience courses:		9-10
NRSC 4032	Neurobiology of Learning and Memory	
NRSC 4052	Behavioral Neuroscience	
NRSC 4072	Clinical Neuroscience: A Clinical and Pathological Perspective	
NRSC 4082	Neural Circuits of Learning and Decision Making	
NRSC 4092	Behavioral Neuroendocrinology	
NRSC 4132	Neuropharmacology	
<i>Upper-division major electives</i>		
Select 9 credit hours of upper-division elective coursework by taking additional courses from the upper-division requirements above or from the following neuroscience and general science electives with a maximum of 6 credit hours allowed from courses outside of psychology and neuroscience. ¹		9
CHEM 4611	Survey of Biochemistry	
ECEN 3030	Electrical/Electronic Circuits Non-Major	
ECEN 4811	Neural Signals and Functional Brain Imaging	
ECEN 4821	Neural Systems and Physiological Control	
ECEN 4831	Brains, Minds, and Computers	
EBIO 3240	Animal Behavior	
IPHY 3410	Introduction to Human Anatomy	
IPHY 3430	Human Physiology	
IPHY 3470	Human Physiology 1	
IPHY 4200	Physiological Genetics and Genomics	
IPHY 4580	Sleep Physiology	
IPHY 4720	Neurophysiology	
MCDB 3140	Cell Biology Laboratory	
MCDB 4201	From Bench to Bedside: The Role of Science in Medicine	
MCDB 4426	Cell Signaling and Developmental Regulation	
MCDB 4444	Cellular Basis of Disease	
MCDB 4680	Mechanisms of Aging	
NRSC 4011	Senior Thesis	
NRSC 4015	Affective Neuroscience	
NRSC 4062	The Neurobiology of Stress	
PSYC/NRSC 4155	Cognitive Neuroscience/Neuropsychology	
NRSC 4542	The Neurobiology of Mental Illness	
NRSC 4545	Neurobiology of Addiction	
PSYC 4021	Psychology and Neuroscience of Exercise	
PSYC 4142	Brain Injury, Plasticity and Recovery: From Neuron to Behavior	
NRSC 4561	Special Topics in Neuroscience	

MCDB 3651	The Brain: Dysfunction to Disease	
PSYC 4165	Psychology of Perception	
PSYC 4175	Computational Cognitive Neuroscience	
Total Credit Hours		34-37

Code	Title	Credit Hours
------	-------	--------------

Ancillary Foundation Courses

*Ancillary molecular biology requirement—select one of the three following:*² 4-5

MCDB 1150	Introduction to Cellular and Molecular Biology (with 2 credit lab MCDB 1161, MCDB 1171, MCDB 2161, MCDB 2171)	
MCDB 1111	Core Concepts in Biology I: Evolutionary, Molecular and Cell Biology (with 2 credit lab MCDB 1161, MCDB 1171, MCDB 2161, MCDB 2171)	
EBIO 1210 & EBIO 1230	General Biology 1 and General Biology Laboratory 1	

Ancillary general chemistry sequence requirement—select one of the following options: 10

Option 1:		
CHEM 1113 & CHEM 1114	General Chemistry 1 and Laboratory in General Chemistry 1	
CHEM 1133 & CHEM 1134	General Chemistry 2 and Laboratory in General Chemistry 2	
Option 2:		
Biochemistry/Chemistry double majors: the for-majors CHEM courses count. Discuss with you NRSC advisor.		

Ancillary organic chemistry requirement: 4

CHEM 3311	Organic Chemistry 1 ³	
-----------	----------------------------------	--

Total Credit Hours		18-19
--------------------	--	-------

¹ Please check all prerequisites and corequisites before enrolling in courses.

² Only 1 two-credit lab is required when taking MCDB 1150, MCDB 1111, MCDB 2150 and MCDB 2222. EBIO 2070 does not require a separate lab.

³ Students planning graduate/medical school or work in the biotechnology industry should plan to also take CHEM 3331 and CHEM 3341. Students should verify program requirements for any additional chemistry prerequisites.

Graduating in Four Years

Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of "adequate progress" as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major.

To maintain adequate progress in neuroscience, students should meet the following requirements:

- The neuroscience major must be started in the first semester. Adequate progress is defined as cumulative completion of at least one fourth of the required course work for the major during each academic year, including the following specific requirements: a) The ancillary molecular biology requirement and the genetics requirement must be completed during the first year; b) All ancillary requirements (molecular biology, calculus and general chemistry) and Introduction

to Neuroscience and Laboratory Techniques in Neuroscience must be completed by the end of the second year.

- The neuroscience major requires at least 55 hours of required course work. Thus, at least 14 hours must be completed yearly, including timely completion of advanced course prerequisites.
- The four-year guarantee also requires completion of 30 hours of General Education courses by the end of the sophomore year.

Recommended Four-Year Plan of Study

Through the required course work for the major, students will complete all 12 credits of the the Natural Sciences area of the Gen Ed Distribution Requirement, including the lab component, and possibly the QRMS component of the Gen Ed Skills Requirement.

Course	Title	Credit Hours
Year One		
Fall Semester		
MCDB 1150	Introduction to Cellular and Molecular Biology	3

Psychology - Bachelor of Arts (BA)

The psychology major provides a fundamental understanding of the principles of human cognition, emotion, behavior, social interactions and mind-brain relationships. Our distinguished faculty also teach specialized upper-division courses in behavioral genetics, neuroscience, cognitive

psychology, clinical psychology, child development, social psychology, and judgment and decision making.

Concurrent Degree Program BA/MA in Psychology with Specialization in Cognitive Psychology

A concurrent BA/MA in psychology with a specialization in cognitive psychology is offered. Both the BA and MA degree must be completed within a five-year period. In recent years, both basic and applied research in cognitive psychology have come to rely increasingly on related findings, theories and methods in other cognitive science disciplines, including philosophy, computer science and linguistics.

The purpose of this degree program is to provide training that prepares students either for continuing doctoral study in cognitive psychology or for technical careers involving cognitive psychology in government and industry. Students complete the requirements for an undergraduate major in psychology, an interdisciplinary undergraduate certificate in cognitive science and a master's degree in the cognitive psychology graduate training program. Because of the demanding nature of this program, only highly qualified students are admitted.

Requirements

Prerequisites

It is policy to enforce the course prerequisites listed in the course descriptions. If you have not either taken and passed (C- or better) the prerequisites for a course, or obtained permission from the instructor or a departmental advisor to take the course based on equivalent preparatory course work or experience here or elsewhere, you may be administratively dropped from the course.

Degree Requirements

Students must complete the general requirements of the College of Arts and Sciences and the requirements for the major, listed below.

A major in psychology requires a minimum of 36 credit hours in psychology courses, with at least 20 of those in upper-division course work. Transfer students must complete a minimum of 12 upper-division credit hours of psychology course work on the Boulder campus with a C- or better. Of those 12 credit hours, one laboratory and methods course must be included.

Students must fulfill all of the requirements for the major with a minimum grade of C-.

Required Courses and Credits

Code	Title	Credit Hours
Required Courses		
PSYC 1001	General Psychology	3
PSYC 2012	Biological Psychology	3
PSYC 2145	Introductory Cognitive Psychology	3
PSYC 2606	Social Psychology	3
PSYC 2111	Psychological Science I: Statistics	4
PSYC 3111	Psychological Science 2: Research Methods in Psychology	4
PSYC 3102 or PSYC 3303	Behavioral Genetics Abnormal Psychology	3

Laboratory or Methods Course

Select at least one upper-division course from the following:		4
PSYC/NRSC 4052	Behavioral Neuroscience	
PSYC 4136	Judgment and Decision Making	
PSYC 4145	Advanced Cognitive Psychology	
PSYC/NRSC 4155	Cognitive Neuroscience/Neuropsychology	
PSYC 4165	Psychology of Perception	
PSYC 4175	Computational Cognitive Neuroscience	
PSYC 4376	Research Methods in Social Psychology	
PSYC 4443	Research Methods in Clinical Psychology	
PSYC 4733	Psychological Testing and Assessment	
PSYC 4744	Methods in Developmental Psychology	

Upper-Division PSYC or NRSC Electives

Select 9 credits of applicable electives.	9
Total Credit Hours	36

Code	Title	Credit Hours
------	-------	--------------

Ancillary Natural Science sequence (some courses may have required labs):

Select one of the following natural science sequences: ¹		6-10
CHEM 1011 & CHEM 1031	Environmental Chemistry 1 and Environmental Chemistry 2	
CHEM 1113 & CHEM 1133	General Chemistry 1 and General Chemistry 2	
CHEM 1400 & CHEM 2100	Foundations of Chemistry and Chemical Energetics and Dynamics	
EBIO 1210 & EBIO 1220	General Biology 1 and General Biology 2	
MATH 1300 & MATH 2300	Calculus 1 and Calculus 2	
MCDB 1150 & MCDB 2150	Introduction to Cellular and Molecular Biology and Principles of Genetics	
MCDB 1150 & EBIO 1220	Introduction to Cellular and Molecular Biology and General Biology 2	
PHYS 1110 & PHYS 1120	General Physics 1 and General Physics 2 (calculus based)	
PHYS 2010 & PHYS 2020	General Physics 1 and General Physics 2 (algebra based)	
Total Credit Hours		6-10

¹ The student is required to pass with a grade of C- or better.

Graduating in Four Years

Consult the Four-Year Guarantee Requirements for information on eligibility. The department recommends taking PSYC 1001, PSYC 2012, PSYC 2145, PSYC 2606 and PSYC 2111 by the end of the sophomore year. The two-part sequence, PSYC 2111 and PSYC 3111, should be taken in consecutive semesters. We recommend that the math prerequisite for PSYC 2111 be taken by the end of the freshman year.

Recommended Four-Year Plan of Study

Through the required course work for the major, students will complete at least 6 credits in the Social Sciences area and all 12 credits of the Natural Sciences area of the Gen Ed Distribution Requirement, possibly including

the lab component, as well as the QRMS component of the Gen Ed Skills Requirement.

Course	Title	Credit Hours
Year One		
Fall Semester		
PSYC 1001	General Psychology	3
MATH Prerequisite for PSYC 2111: (example: MATH 1011, 1150, 1212 or 1300, also fulfills Gen. Ed. Skills: QRMS)		3-5

	Total Credit Hours	122-124

¹ PSYC approved Natural Science Sequence/Ancillary. (Also partially fulfills Gen Ed: Natural Sciences. Other choices can be found above, but EBIO 1210 and EBIO 1220 are the most common.)

Neurosciences and Behavior - Certificate

The neurosciences certificate program encourages undergraduate students interested in how the brain controls behavior to take courses in the basic sciences while providing the means to specialize in neuroscience.

Since this subdiscipline of the biological sciences spans a number of departments at the university (e.g., integrative physiology, psychology & neuroscience, and MCD biology), students are encouraged to obtain greater academic breadth through interdepartmental course selection.

For more information, visit the Undergraduate Certificate in Neuroscience (<https://www.colorado.edu/neuroscience/undergraduate-education>) website.

Requirements

The Neuroscience Certificate Requirements are:

Code	Title	Credit Hours
Required Courses		
<i>General Chemistry sequence with lab (or equivalent sequence)</i>		
CHEM 1113 & CHEM 1114	General Chemistry 1 and Laboratory in General Chemistry 1	5
CHEM 1133 & CHEM 1134	General Chemistry 2 and Laboratory in General Chemistry 2	5
<i>Organic Chemistry sequence (or equivalent sequence)</i>		
CHEM 3311 & CHEM 3321	Organic Chemistry 1 and Laboratory in Organic Chemistry 1	5
CHEM 3331 & CHEM 3341	Organic Chemistry 2 and Laboratory in Organic Chemistry 2	5
<i>General Physics sequence with lab (or equivalent sequence)</i>		
PHYS 2010 & PHYS 2020	General Physics 1 and General Physics 2	10
<i>Biology with lab</i>		
Select one of the two options (or approved equivalent biology courses):		
MCDB 1150 & MCDB 1151	Introduction to Cellular and Molecular Biology and Introduction to Cell and Molecular Biology Lab	6
OR		
EBIO 1210 & EBIO 1230	General Biology 1 and General Biology Laboratory 1	
<i>Either:</i>		
PSYC 2012	Biological Psychology	3
or NRSC 210 Introduction to Neuroscience		
<i>One course in general genetics</i>		
Select one of the following:		
EBIO 2070	Genetics: Molecules to Populations	3
MCDB 2150	Principles of Genetics	
IPHY 4200	Physiological Genetics and Genomics	
Or an approved equivalent general genetics course		
<i>One course in statistics:</i>		
Select one of the following:		
PSYC 2111	Psychological Science I: Statistics	3
IPHY 2800	Introduction to Statistics	
EBIO 1010	Introduction to Quantitative Thinking for Biologists	
EBIO 4410	Biometry	
MATH 2510	Introduction to Statistics	
Or an approved equivalent statistics course		
At least two additional upper - division Neuroscience/Behavior courses in IPHY, MCDB, PSYC and/or another department; one of these courses has to be outside of the home department. In the case of double majors, one advanced neuroscience course from each major department fulfills this requirement.		
Total Credit Hours		45

All courses must be taken for a letter grade (no pass/fail).

For more information on this certificate, see the Neuroscience Undergraduate Certificate (<https://www.colorado.edu/neuroscience/>)

undergraduate-education) website or send e-mail to Prof. Serge Campeau (Serge.Campeau@Colorado.EDU), director of the program. Answers to Frequently Asked Questions are also available on this web page.

To obtain the certificate, a student must satisfy the requirements of a major and the neuroscience certificate program, and maintain a grade point average of 3.20 or better.

Public Health

As the world becomes more interconnected, our communities and populations face increasingly complex health challenges emerging through the interaction of individual vulnerability and behavior, cultural and social factors, environmental and geographic influences, as well as economic and political dynamics. Addressing these public health challenges requires innovative approaches arising from multiple disciplines.

According to the Association of Schools & Programs of Public Health (ASPPH) (<http://aspph.org/discover>), public health is the science and art of protecting and improving the health of communities through education, promotion of healthy lifestyles, and research for disease and injury prevention. Public health helps improve the health and well being of people in local communities and around the globe. Public health works to prevent health problems before they occur.

Core Areas of Public Health

While public health is defined in many different ways, the following is a list of core areas that are often associated with public health. For more information, visit the What is Public Health? (<http://aspph.org/study>) site.

- **Biostatistics:** Statistical science applied to health and biomedical data.
- **Environmental health:** The impact of air, water and the built environment on health.
- **Epidemiology:** The study of the frequency, distribution and determinants of disease.
- **Health administration and management:** Managing human and fiscal resources to deliver public health services.
- **Global health:** Addressing health challenges across the world.
- **Maternal and child health:** Improving the health of women, children and their families.
- **Nutrition:** How food and nutrients impact the health of populations.
- **Public health laboratory practice:** Diagnose, prevent, treat and control infectious disease.
- **Public health policy:** The role of policy and policy decisions on public health.
- **Public health practice:** Incorporating public health principles into clinical practice.
- **Social and behavioral science:** The study of social and behavioral determinants of health.

Certificate

- Public Health - Certificate (p. 541)

Public Health - Certificate

The undergraduate certificate in public health encourages students to extend the breadth of their undergraduate education to include elements of public health. Students are encouraged to take courses from

a variety of participating departments to develop an appreciation of the interdisciplinary nature of public health.

For more information, visit the Public Health Program (<https://www.colorado.edu/publichealthprogram>) website.

Requirements

The certificate requirements include a minimum of 18 credit hours (not to exceed 24) of course work, including at least 9 upper-division credit hours.

Required Courses and Credit Hours

Total Credit Hours		18-19

Global Public Health is an unofficial track of the Public Health Certificate designed specifically for IAFS students. Students interested in pursuing the Global Public Health track of the Public Health Certificate can find additional information on the International Affairs Program (<http://www.colorado.edu/iafs/academics/certificates/global-public-health>) website.

Religious Studies

The curriculum in the Department of Religious Studies at CU Boulder trains students in the scholarly understanding and interpretation of the complex phenomenon we call religion, through careful study of history, texts, rituals, narrative, art and media. The program offers the skills to approach the comparative study of religion with the option of gaining deeper knowledge in one religious tradition, such as Buddhism, Christianity, Daoism, East Asian Religions, Hinduism, Islam, Judaism and Native American and Indigenous traditions.

The undergraduate degree in religious studies emphasizes the application of various theoretical and methodological approaches to the study of religion; the understanding of religious practices and traditions with attention to historical context and present-day impact; and the development of media literacy, critical thinking, effective oral and written communication, and research skills in our increasingly globalized and religiously diverse world.

In addition, students with a degree in religious studies are expected to achieve basic religious literacy: the ability to communicate and analyze

practical information regarding religious diversity as educated citizens of a pluralistic society and thereby to effectively understand and participate in public debates and discussions about religion.

Course codes for this program are RLST and SNSK.

Bachelor's Degree

- Religious Studies - Bachelor of Arts (BA) (p. 548)

Minor

- Religious Studies - Minor (p. 550)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Courses

Religious Studies

RLST 1620 (3) Religious Dimension in Human Experience

Studies religion as individual experience and social phenomenon. Examines varieties of religious language (symbol, myth, ritual, scripture) and of religious experience (Asian, Western, archaic).

Additional Information: Arts Sci Core Curr: Ideals and Values
Arts Sci Gen Ed: Distribution-Arts Humanities

RLST 1800 (3) Cyborgs and Robots: Implications for Gender and Religion

Making is the core idea that connects artificial intelligence (cyborgs and robots) with classic literature (Prometheus, Pygmalion, Golem and Frankenstein) and fundamental religious and cultural concerns (Genesis, technology, work). The guiding question is what will humanity and religion be in the future? The goal is less predictive than to set a mandate with potential strategies for those who will create this future.

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

RLST 1818 (3) Introduction to Jewish History: Bible to 1492

Focus on Jewish history from the Biblical period to the Spanish Expulsion in 1492. Study the origins of a group of people who call themselves, and whom others call, Jews. Focus on place, movement, power/powerlessness, gender, and the question of how to define Jews over time and place. Introduces Jews as a group of people bound together by a particular set of laws; looks at their dispersion and diversity; explores Jews' interactions with surrounding cultures and societies; introduces the basic library of Jews; sees how Jews relate to political power.

Equivalent - Duplicate Degree Credit Not Granted: HIST 1818 and JWST 1818

RLST 1820 (3) Religion and Politics in Ancient Egypt

Studies the literature, politics, religions and other traditions of Ancient Egypt.

Repeatable: Repeatable for up to 3.00 total credit hours.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

RLST 1828 (3) Introduction to Jewish History since 1492

Surveys the major historical developments encountered by Jewish communities beginning with the Spanish Expulsion in 1492 up until the present day. Studies the various ways in which Jews across the modern world engaged with the emerging notions of nationality, equality and citizenship, as well as with new ideologies such as liberalism, socialism, nationalism, imperialism and antisemitism.

Equivalent - Duplicate Degree Credit Not Granted: HIST 1828 and JWST 1828

RLST 1830 (3) Global History of Holocaust and Genocide

Examines the interplay of politics, culture, psychology and sociology to try to understand why the great philosopher Isaiah Berlin called the 20th century, "The most terrible century in Western history." Our focus will be on the Holocaust as the event that defined the concept of genocide, but we will locate this event that has come to define the 20th century within ideas such as racism, imperialism, violence, and most important, the dehumanization of individuals in the modern world.

Equivalent - Duplicate Degree Credit Not Granted: HIST 1830 and JWST 1830

Grading Basis: Letter Grade

Additional Information: Arts Sci Core Curr: Historical Context
Arts Sci Gen Ed: Distribution-Arts Humanities

RLST 1850 (3) Ritual and Media

Ritual continues to play an important role in contemporary societies in both religious and secular contexts. This course examines the elements and genres of ritual activity from African rites of passage to the Beijing Olympics, paying close attention to how the media documents, appropriates and transforms aspects of ritual.

Additional Information: Arts Sci Core Curr: Contemporary Societies
Arts Sci Gen Ed: Distribution-Arts Humanities

RLST 1900 (3) Introduction to the Hebrew Bible/Old Testament

Examine the content of the Hebrew Bible and critical theories regarding its development. Explore the development of these texts, as well as their foundational role for rabbinic literature and the New Testament. Assess the enduring influence of the Hebrew Bible/Old Testament in world literature and culture (such as in art and music).

Equivalent - Duplicate Degree Credit Not Granted: JWST 1900

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

RLST 1910 (3) Introduction to the New Testament

Examine the background, content and influence of the New Testament books. Studies the diverse perspectives contained in the various books, as well as the process of canonization. Assess the influence of the New Testament on the development of Christianity as well as world (eastern and western) culture.

Equivalent - Duplicate Degree Credit Not Granted: JWST 1910

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

RLST 2200 (3) Religion and Dance

Connecting dancing to religions across the globe demonstrates the near synonymy of the two in most cultures, the remarkable potential for dancing to articulate cultural identity, and finally that dancing is strongly connected to what distinguishes being human. Provides an enriched appreciation of dancing and the introduction to dancing in many cultures.

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

RLST 2202 (3) Islam

Introduces students to foundational Islamic concepts, texts, core practices, historical narratives and intellectual, spiritual and literary traditions. Topics covered include: the figure of Muhammad; the Quran; the emergence of distinct Muslim identities; Hadith; Sharia; Islamic theology; Islamic philosophy; science in Islamic civilization; Islamic mysticism; the impact of colonialism and modernity on the Muslim world; gender and sexuality; political Islam.

Grading Basis: Letter Grade

Additional Information: Arts Sci Core Curr: Ideals and Values

Arts Sci Gen Ed: Distribution-Arts Humanities

RLST 2320 (3) The Muslim World, 600-1250

Focusing on the history of the Muslim World in the age of the caliphates, this course takes an interdisciplinary, comparative approach to the development of Islamicate society, focusing on social structure, politics, economics and religion. Students will use primary and secondary sources to write a research paper, and make in-class presentations to cultivate critical thinking, research and writing skills.

Equivalent - Duplicate Degree Credit Not Granted: ARAB 2320

Grading Basis: Letter Grade

Additional Information: Arts Sci Core Curr: Human Diversity

Arts Sci Gen Ed: Distribution-Arts Humanities

Arts Sci Gen Ed: Diversity-Global Perspective

Departmental Category: Asia Content

RLST 2400 (3) Religion and Contemporary Society

Explores the role of religion in contemporary society, focusing on debates in religious ethics. Examining diverse voices from Christianity, Judaism and other traditions, this course considers religion's role in debates about issues such as same-sex marriage, climate change, war, criminal justice, torture, sexual ethics, abortion and economic justice.

Additional Information: GT Pathways: GT-SS3 -Soc Behav Sci:Hmn Behav, Cult, Soc Frame

Arts Sci Core Curr: Contemporary Societies

Arts Sci Gen Ed: Distribution-Arts Humanities

RLST 2500 (3) Religions in the United States

Explores the development of various religions within the shaping influences of American culture, including separation of church and state, the frontier experience, civil religion, and the interaction of religions of indigenous peoples, immigrants, and African Americans.

Additional Information: GT Pathways: GT-AH2 - Arts Hum: Lit Humanities

Arts Sci Core Curr: Ideals and Values

Arts Sci Core Curr: United States Context

Arts Sci Gen Ed: Distribution-Arts Humanities

RLST 2600 (3) Judaism, Christianity, and Islam

Introduces literature, beliefs, practices, and institutions of Judaism, Christianity, and Islam, in historical perspective.

Equivalent - Duplicate Degree Credit Not Granted: JWST 2600

Additional Information: GT Pathways: GT-AH3 - Arts Hum: Ways of Thinking

Arts Sci Core Curr: Ideals and Values

Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Asia Content

RLST 2610 (3) Religions of India

Introduces Hinduism, Buddhism, Jainism and Sikhism, in historical perspective.

Additional Information: GT Pathways: GT-AH2 - Arts Hum: Lit Humanities

Arts Sci Core Curr: Ideals and Values

Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Asia Content

RLST 2612 (3) Yoga: Ancient and Modern

Addresses the history and philosophy of yoga, beginning from its earliest articulations in Vedic India 1200 BCE up to contemporary understandings of yoga. Examines yoga's historical evolution from a primarily mental practice to a bodily centered practice. Looks at the shifts yoga undergoes as it becomes popular in the modern West.

Additional Information: Arts Sci Core Curr: Human Diversity

Arts Sci Gen Ed: Distribution-Arts Humanities

Arts Sci Gen Ed: Diversity-Global Perspective

RLST 2614 (3) Paganism to Christianity

Offers a cultural history of Greek and Roman religion. Students read ancient texts in translation and use evidence from archaeology to reconstruct the shift from paganism to Christianity in antiquity. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 2610

Additional Information: Arts Sci Core Curr: Ideals and Values

Arts Sci Gen Ed: Distribution-Arts Humanities

RLST 2620 (3) Religions of East Asia

Introduces literature, beliefs, practices, and institutions of Taoism, Confucianism, Buddhism, and Shintoism in historical perspective.

Additional Information: GT Pathways: GT-AH3 - Arts Hum: Ways of Thinking

Arts Sci Core Curr: Ideals and Values

Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Asia Content

RLST 2700 (3) American Indian Religious Traditions

Introduces religions of the peoples indigenous to the Americas. Concerns include ritual, mythology and symbolism occurring throughout these cultures in such areas as art, architecture, cosmology, shamanism, sustenance modes, trade and history.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 2703

Additional Information: GT Pathways: GT-AH2 - Arts Hum: Lit Humanities

Arts Sci Core Curr: Human Diversity

Arts Sci Core Curr: Ideals and Values

Arts Sci Gen Ed: Distribution-Arts Humanities

Arts Sci Gen Ed: Diversity-U.S. Perspective

RLST 2800 (3) Women and Religion

Examines roles of women in a variety of religious traditions including Judaism, Christianity, Hinduism, Buddhism, and goddess traditions.

Equivalent - Duplicate Degree Credit Not Granted: WGST 2800

Additional Information: GT Pathways: GT-AH2 - Arts Hum: Lit Humanities

Arts Sci Core Curr: Human Diversity

Arts Sci Gen Ed: Distribution-Arts Humanities

Arts Sci Gen Ed: Diversity-U.S. Perspective

RLST 2840 (1-3) Independent Study

Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

RLST 3000 (3) Christian Traditions

Serves as an introduction to the academic study of Christianity, understood in its historical context, beginning with its most remote Mesopotamian origins and through to beginnings of the Protestant Reformation. Coverage is global, but "Western" Christian tradition are emphasized, as is the evolution of doctrine, ritual and institutions in relation to social, cultural and political factors.

Additional Information: Arts Sci Core Curr: Historical Context

Arts Sci Gen Ed: Distribution-Arts Humanities

RLST 3001 (3) Modern Christianity: Culture, Politics, Religion

Studies development of various aspects of global Christian traditions from the Reformation to the present day, as expressed through scripture, theology, ritual, media, politics, ethics, popular culture, and the arts. Includes topics such as colonialism, modernism and liberalism, secularism, pluralism, ecumensim, globalization, and the impact of new technologies. Recommended prerequisite: RLST 3000

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

RLST 3010 (3) Religion and the Senses

Expanding the five common senses so they are grounded on a more fundamental kinesthetic sense, that is, sense of movement, this course focuses on the study of religion and culture on all those marvelous richly and sensuously textured aspects of religious behavior: movement, experience, feeling, action, sensation, gesture, art, music, dancing, architecture, costume, food, and ritual.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

RLST 3020 (3) Advanced Writing in Religious Studies

Seminar for religious studies majors that emphasizes the development of writing skills for use inside as well as outside the academy. Writing assignments are focused on one or more core topics in religious studies.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) Religious Studies (RLST) majors only.

Additional Information: Arts Sci Core Curr: Written Communication

Arts Sci Gen Ed: Distribution-Arts Humanities

Arts Sci Gen Ed: Written Communication-Upper

RLST 3040 (3) The Quran

Explores the Quran from multiple perspectives including literary criticism, ethnomusicology, translation, history, paleography, classical exegesis, Feminist Studies, Judicial interpretation, Islamic philosophy, materiality, Islamic law, spirituality, hip-hop and Jihadism.

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Asia Content

RLST 3050 (3) Religion and Literature in America

Studies religious dimensions of American culture through representative literature, beginning with the Puritans and focusing on diversity in the 19th and 20th centuries.

Additional Information: Arts Sci Core Curr: United States Context

Arts Sci Gen Ed: Distribution-Arts Humanities

RLST 3060 (3) Fundamentalism and Islam

Explores the global rise of fundamentalism, particularly Islamic fundamentalism. Students will analyze fundamentalism as a function of modernity, and in metaphysical rather than geostrategic or cultural terms. Students will examine the arguments of Muslim fundamentalists, and the counterarguments of their critics.

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Asia Content

RLST 3070 (3) Sufism

Examines the development of Sufism from a piety movement to a social institution. Students will be introduced to classical and modern expressions of Sufism including treatises on spirituality and ethics, commentaries on the Quran, timeless poetry, music and mystical philosophy. Students will learn how Sufism differs across cultural contexts and how it compares to other mystical traditions.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

RLST 3100 (3) Judaism

Explores Jewish religious experience and its expression in thought, ritual, ethics, and social institutions.

Equivalent - Duplicate Degree Credit Not Granted: JWST 3100

Additional Information: Arts Sci Core Curr: Historical Context

Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Asia Content

RLST 3110 (3) Of Jewish Legends, Folktales and the Supernatural

Explores Jewish traditional legends, folktales and stories of the supernatural. Starts with Aggadic Talmud tales and Midrashic texts and focuses on later rabbinic and mystical texts and folktales ca 500-1900 C.E. from around the Jewish world with subjects ranging from didactic narratives extolling the virtues of the simple pure soul, to the horrors of a blood sucking vampiric outside world.

Equivalent - Duplicate Degree Credit Not Granted: JWST 3110

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

RLST 3120 (3) Radical Jews

Explores major Jewish figures, and their cultural productions, who were radical in the challenges they posed and transformative in the effects they had on society. The figures we examine range from the Rabbis of the Talmud who revolutionized a sacrificial cult religion, to Western secularist Baruch Spinoza and American icons such as Allen Ginsberg, Gloria Steinem and Bob Dylan.

Equivalent - Duplicate Degree Credit Not Granted: JWST 3120

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

RLST 3200 (3) Hinduism

Studies literature, beliefs, practices, and institutions of Hinduism, in historical perspective.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Asia Content

RLST 3202 (3) Women, Gender & Sexuality in Jewish Texts & Traditions

Reads some of the ways Jewish texts and traditions look at women, gender and sexuality from biblical times to the present. Starts with an analysis of the positioning of the body, matter and gender in creation stories, moves on to the gendered aspects of tales of rescue and sacrifice, biblical tales of sexual subversion and power, taboo-breaking and ethnos building, to rabbinic attitudes towards women, sexuality and gender and contemporary renderings and rereadings of the earlier texts and traditions.

Equivalent - Duplicate Degree Credit Not Granted: WGST 3201 and JWST 3202 and HEBR 3202

Additional Information: Arts Sci Core Curr: Human Diversity

Arts Sci Gen Ed: Distribution-Arts Humanities

Arts Sci Gen Ed: Diversity-Global Perspective

RLST 3300 (3) Foundations of Buddhism

Introduction to Buddhist thought and practice in the variety of its historical and cultural contexts. The course begins with an exploration of narrative, cosmology, doctrine and ritual in early Buddhism and the Theravada of South and Southeast Asia. Through case studies, we then trace diverse conceptions of the Buddhist path in Tibet and East Asia where the Mahayana spread.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Asia Content

RLST 3530 (3) Global Seminar: Jews and Muslims - The Multiethnic History of Istanbul

Spend two weeks in Istanbul and examine Jewish-Muslim relations in a place that was for 500 years the crossroads of civilization. The only Muslim city in the 21st century with a large, thriving Jewish community, Istanbul models how people from different social classes, ethnicities and religious backgrounds can coexist.

Equivalent - Duplicate Degree Credit Not Granted: IAFS 3530 and JWST 3530

Grading Basis: Letter Grade

Additional Information: Arts Sci Core Curr: Human Diversity

Arts Sci Gen Ed: Distribution-Arts Humanities

Arts Sci Gen Ed: Diversity-Global Perspective

RLST 3550 (3) Tibetan Buddhism

Explores Tibetan Buddhism through literature and film, including sacred biographies, treatises on the Buddhist path and films providing a visual window into Tibetan life worlds. We examine different kinds of Tibetan journeys: moving through the life cycle, treading the path of self-cultivation, embarking on solitary retreat, traversing from death to rebirth and traveling on pilgrimage and into exile.

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

RLST 3750 (3) Women in Buddhism

Explores diverse representations of the female in Buddhist literature and the social realities of actual women in Asian historical contexts. Through case studies that traverse Buddhist Asia, we delve into monastic views of the female body, philosophical analyses of the emptiness of gender, idealized images of the feminine in Buddhist tantra, and contemporary issues such as the nun's revival moment.

Equivalent - Duplicate Degree Credit Not Granted: WGST 3750

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Asia Content

RLST 3800 (3) Chinese Religions

Studies classical Confucianism, Taoism, Buddhism, and Neo-Confucianism within the historical context of Chinese culture.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Asia Content

RLST 3820 (3) Topics in Religious Studies

Intensive study of a selected area or problem in religious studies.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

RLST 3838 (3) Dancing, Religion, and Culture

A critical examination of the received cultural, religious, and academic understandings of dancing and the body; the construction of a richer theory of dancing that will more adequately support comparative studies; the study of dancing in cultures and religions in a diverse representation of cultures; and a more in depth social study of Latin American dancing including actual dancing experience.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

RLST 3850 (3) The Mediterranean: Religion Before Modernity

Offers an innovative approach to the multifaceted history of Christian-Muslim-Jewish interaction in the Mediterranean. It eschews established paradigms (e.g., Europe, Islamic world) that distort our understanding of these and pushes students to reconsider the accepted paradigms of Western history. Students will reappraise assumptions regarding the nature of ethnic, religious, national and cultural identity, and their role in human history.

Equivalent - Duplicate Degree Credit Not Granted: HUMN 3850

Additional Information: Arts Sci Core Curr: Historical Context

Arts Sci Gen Ed: Distribution-Arts Humanities

RLST 4030 (3) Religions in America

Studies various religious movements in the U.S. and other parts of the Americas. Includes American religion and religions, religion and nationalism, revitalization and religion and Asian religions in America.

Equivalent - Duplicate Degree Credit Not Granted: RLST 5030

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

RLST 4045 (3) Ritual Art Dance Drama

Ritual Art Dance Drama as well as the common actions, gestures and objects of culture provide a foundation for cultural and individual concepts and values that may often be characterized as religious. Rich examples drawn from a variety of cultures around the world will be considered from a broad range of theoretical perspectives designed to help us gain the fullest understanding and appreciation of the lived and practiced aspects of culture and religion. Consistent with the fundamental proposition of the course, each student will also engage activities that will provide an experiential basis for learning.

Equivalent - Duplicate Degree Credit Not Granted: RLST 5045

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

RLST 4050 (3) Topics in Christian Studies

Studies a particular topic in Christian theology and culture such as early Christianity, medieval Christianity, Christianity in the United States, women and Christianity, liberation theologies, Christianity and literature, and modern Christian thought.

Equivalent - Duplicate Degree Credit Not Granted: RLST 5050

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Recommended: Prerequisite 6 hours of RLST courses at any level or instructor consent.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

RLST 4170 (3) God and Politics

Explores the relationship between religion and politics. Examining traditions such as Judaism and Christianity, this course considers diverse ways in which ancient, medieval and modern sources have imagined the role of religion in civic life. Some topics include the status of religious minorities, the nature of religious freedom and contemporary debates surrounding issues such as torture, sexuality and climate change.

Equivalent - Duplicate Degree Credit Not Granted: RLST 5170 and JWST 4170

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

RLST 4180 (3) Is God Dead?

Explores debates about the following questions: does it make sense to believe in God? Should believing or not believing in God make a difference for how individuals behave? Examining ancient and modern views on the existence and nature of a higher power, this course considers topics including evil and suffering, religion and science and religion's role in politics.

Equivalent - Duplicate Degree Credit Not Granted: RLST 5180 and JWST 4180

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

RLST 4190 (3) Love and Desire

Explores debates about the following questions: what and whom should humans and gods love, and what role should passions play in religion? Examining traditions such as Judaism and Christianity, this course considers diverse views on topics including religion and sexuality, the promise and perils of loving gods and humans, and the relationship between love, politics, and violence.

Equivalent - Duplicate Degree Credit Not Granted: RLST 5190 and JWST 4190

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

RLST 4200 (3) Topics in Hinduism

Examines in depth central themes, schools of thought and movements in Hinduism, such as myth and ritual, renunciation, Vedanta, Tantra and Yoga.

Equivalent - Duplicate Degree Credit Not Granted: RLST 5200

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite 6 hours of RLST courses at any level or instructor consent.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Asia Content

RLST 4250 (3) Topics in Buddhism

Examines in depth central themes, schools of thought and movements in Buddhism, such as Theravada in Southeast Asia, Mahayana and Tantrayana thought, Zen and Buddhism in America. Department enforced prerequisite: RLST 2610 or RLST 2620 or RLST 3300 or instructor consent.

Equivalent - Duplicate Degree Credit Not Granted: RLST 5250

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Asia Content

RLST 4260 (3) Topics in Judaism

Examines in depth central themes, schools of thought, and movements in Judaism, along with other traditions, across a range of historical periods.

Equivalent - Duplicate Degree Credit Not Granted: RLST 5260 and JWST 4260

Repeatable: Repeatable for up to 9.00 total credit hours.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

RLST 4280 (3) Body and Magic in India

Addresses ideas of the body and its use and functions within magic, particularly in Tantric traditions. Uses classical Hinduism and Tantra as a point of departure, focusing on subtle bodies and Tantric bodies and will also supplement this with writing about the body and its connection to mind in contemporary Western thought addressing the mind-body problem.

Equivalent - Duplicate Degree Credit Not Granted: RLST 5280

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

RLST 4300 (3) Topics in Native American Religions

Examines a topic (varies at different offerings) focusing on religions of peoples indigenous to the Americas. May consider mythology; shamanism and medicine; trickster, clown and fool; crisis cult movements.

Equivalent - Duplicate Degree Credit Not Granted: RLST 5300

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite course of RLST 2700 (minimum grade C-).

Recommended: Prerequisite 3 additional credit hours of RLST course work or instructor consent.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

RLST 4353 (3) Indigenous Traditions and Law: A Global Perspective

Explores intersections of indigenous religions and law through historical and contemporary case studies. American Indian and Hawaiian contexts will be featured, as well as the study of the United Nations Declaration on the Rights of Indigenous Peoples and its recent implementation in places as diverse as Bolivia, Norway and Nagaland. Theoretical issues in the academic study of religion and ethnic studies will be emphasized.

Equivalent - Duplicate Degree Credit Not Granted: RLST 5353 and ETHN 4353 and ETHN 5353

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

RLST 4450 (3) Religion and Nonviolence

Studies theories of nonviolence developed by major thinkers and movements, especially in the U.S., in the context of their religious commitments and beliefs and their historical circumstances.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

RLST 4650 (3) Islam in the Modern World

Globally surveys Islam, covering religion and politics; Islam and the West; the Islamic revival and its varied forms in Iran, Indonesia, Libya and Pakistan; development and change; the status of women; media and academic stereotyping.

Equivalent - Duplicate Degree Credit Not Granted: RLST 5650

Recommended: Prerequisite 6 credit hours of religious studies at any level or instructor consent.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Asia Content

RLST 4750 (3) Daoism

Traces the development of Daoism from its origin as an organized, communal religion in the second century CE to the vibrant living religion of today, encompassing meditative monastics, martial exorcists, solemn ritual masters and lay practitioners of inner alchemy and other self-cultivation techniques. Focuses on the extensive Daoist ritual tradition and the community of believers who created and used it.

Equivalent - Duplicate Degree Credit Not Granted: RLST 5750 and CHIN 4750 and CHIN 5750

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Asia Content

RLST 4800 (3) Critical Studies in Religion

Focuses on a current issue or area of research in the study of religion. Students analyze the way theories develop and learn to develop their own critical analysis. Topics vary, e.g., comparative kingship, colonialism, ritual theories, feminist analysis.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to Religious Studies (RLST) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

RLST 4810 (3) Honors Thesis

Students write an honors thesis based on independent research under the direction of a faculty member. Required for students who elect departmental honors.

Additional Information: Arts Sciences Honors Course

RLST 4820 (3) Interdisciplinary Seminar on Religion: Topics

Variable topics in religion, drawing from a variety of disciplines and methodologies as they shed light on specific traditions and issues.

Equivalent - Duplicate Degree Credit Not Granted: RLST 5820

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Recommended: Requisite 6 credit hours of religious studies at any level or instructor consent.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

RLST 4830 (3) Senior Majors Seminar

Topics and instructors vary. Brings advanced majors together in order to focus their major experience on significant topics and issues of common interest.

Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

RLST 4840 (1-6) Senior Independent Study

Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

RLST 4850 (3) Gender in Hagiography

Explores gendered ideals of sainthood in medieval hagiographic literature. We draw primarily from the lives of female mystics in Buddhist and Christian sources and also examine the construction of mendicant masculinities. Reading from an array of primary sources, we query the category of mysticism and ask why visionary experience has so often been gendered female.

Equivalent - Duplicate Degree Credit Not Granted: RLST 5850 and WGST 4850

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

Sanskrit**SNSK 1010 (3-4) Introductory Sanskrit 1**

Repeatable: Repeatable for up to 4.00 total credit hours.

Additional Information: Departmental Category: Sanskrit

SNSK 1020 (3-4) Introductory Sanskrit 2

Repeatable: Repeatable for up to 4.00 total credit hours.

Requisites: Requires prerequisite course of SNSK 1020 (minimum grade C-).

Additional Information: Departmental Category: Sanskrit

SNSK 2110 (3-4) Intermediate Sanskrit 1

Continued study of the grammar of classical Sanskrit and translation of selected readings from the literature.

Repeatable: Repeatable for up to 4.00 total credit hours.

Requisites: Requires prerequisite course of SNSK 1020 (minimum grade C-).

Additional Information: Departmental Category: Sanskrit

SNSK 2120 (3-4) Intermediate Sanskrit 2

Continuation of SNSK 2110.

Repeatable: Repeatable for up to 4.00 total credit hours.

Requisites: Requires prerequisite course of SNSK 2110 (minimum grade C-).

Additional Information: Departmental Category: Sanskrit

Religious Studies - Bachelor of Arts (BA)

The curriculum in the Department of Religious Studies at CU Boulder trains students in the scholarly understanding and interpretation of the complex phenomenon we call religion through careful study of history, texts, rituals, narrative, art and media. The program offers the skills to approach the comparative study of religion with the option of gaining deeper knowledge in one religious tradition, such as Buddhism, Christianity, East Asian Religions, Hinduism, Islam, Judaism, and Native American and Indigenous traditions.

The undergraduate degree in religious studies emphasizes the application of various theoretical and methodological approaches to the

study of religion; the understanding of religious practices and traditions with attention to historical context and present-day impact; and the development of media literacy, critical thinking, effective oral and written communication, and research skills in our increasingly globalized and religiously diverse world.

In addition, students with a degree in religious studies are expected to achieve basic religious literacy: the ability to communicate and analyze practical information regarding religious diversity as educated citizens of a pluralistic society and thereby to effectively understand and participate in public debates and discussions about religion.

Graduation with Honors

The Honors Program in religious studies offers the opportunity for highly motivated undergraduates to undertake a deeper and more individualized study than is provided by the regular BA curriculum and to earn an honors designation on their diploma. Religious studies majors with at least a 3.30 overall grade point average and 3.50 in the major are eligible to participate in the program. Honors that may be earned are cum laude (with honors), magna cum laude (with high honors) and summa cum laude (with highest honors).

Students interested in pursuing departmental honors are encouraged to consult with the departmental undergraduate advisor by the beginning of their junior year.

Concurrent Degree Program BA/MA in Religious Studies

A concurrent bachelor's/master's degree program offers a select group of exceptional undergraduates the opportunity to begin graduate work while still an undergraduate and thereby complete the BA and MA degrees simultaneously and on an accelerated schedule. The entire program normally requires five to six years and permits 6 credit hours to be double-counted toward both degrees; otherwise, requirements for the two degrees remain unchanged.

Admission to the Program

Applicants to the program must be full-time, continuously enrolled students with a minimum overall GPA of 3.00, and a 3.50 GPA in RLST courses. They must have completed at least 24 credit hours prior to admission to the concurrent BA/MA degree program, and must have satisfied any MAPS deficiencies. Applications will include letters of recommendation from RLST faculty and will be evaluated by faculty as a whole, as graduate applications are.

Continuation in the Program

Students enrolled in the concurrent BA/MA program must maintain a minimum cumulative GPA of 3.0, and 3.50 in the department. Concurrent degree students may not participate in the Time Out program; exceptions may be granted by the CDAC (Concurrent Degree Appeals Committee) based on a review of extenuating circumstances. Each BA/MA student will be assigned a graduate advisor with whom to meet regularly and will be required to demonstrate satisfactory progress toward degree to the advisor within the framework of the department's graduate student assessment policies.

Curriculum

Students enrolled in the concurrent BA/MA program are permitted to double-count 6 credit hours of course work, thereby reducing the total amount of RLST course work to 60 credit hours (36 + 30 - 6). One of these double-counted courses must be RLST 6830, which would replace Senior Seminar for BA/MA students, and the other must be in an area of depth

concentration. Otherwise, program students will fulfill all the normal requirements for the BA and the MA degree.

Requirements

Program Requirements

Students must complete the general requirements of the College of Arts and Sciences and, in addition:

- All courses counted towards the major must be completed with a grade of C- or better and none of the courses may be taken for a Pass/Fail grade.
- The cumulative Grade Point Average (GPA) in courses counted toward the major must be at least 2.0.
- More than half of the credit hours (19 or greater) counted toward the major need to be in upper-division courses.
- At least 27 of the 36 credit hours must be taken in RLST designated courses.

Required Courses and Credits

Code	Title	Credit Hours
Academic Study of Religion Requirement		
RLST 1620	Religious Dimension in Human Experience	3
RLST 4830	Senior Majors Seminar	3
Cluster Requirement		
<i>Select three courses in either of the following:</i>		9
A single religious tradition (i.e. Buddhism, Christianity, East Asian Religions, Hinduism, Islam, Judaism, Native American and Indigenous Religions)		
A particular theme (i.e. ancient and medieval religions, gender and sexuality, interreligious interactions, law and politics, media, culture, and contemporary society, philosophy and ethics, religion and violence, ritual, performance, and the body)		
Electives		21
Total Credit Hours		36

Graduating in Four Years

Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of "adequate progress" as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress in religious studies, students should meet the following requirements:

- At the beginning of the second semester of study, declare the major.
- Each semester, complete two religious studies courses.
- The last spring semester in residence, take the senior seminar.

Recommended Four-Year Plan of Study

Through the required course work for the major, students will fulfill all 12 credits of the Arts & Humanities area of the Gen Ed Distribution Requirement.

Religious Studies - Minor

The Department of Religious Studies offers a minor in religious studies in addition to the BA. Students are subject to the College of Arts and Sciences minor requirements.

Requirements

Students must complete at least 18 credit hours in religious studies coursework, including at least 6 hours of lower division and 9 hours of upper division coursework. At least 12 hours must be taken in the Department of Religious Studies.

All course work applied to the minor must be completed with a grade of C- or better. No pass/fail work may be applied. The GPA for all minor course work must equal 2.00 or higher.

Code	Title	Credit Hours

Sociology

Sociology is the study of society. Students who major in sociology have the opportunity to learn in-depth about social structures and processes, and to gain skills in critical thinking, writing and data analysis. Sociology graduates go into many different fields, as described by a recent study by the American Sociological Association.

Course code for this program is SOCY.

Bachelor's Degree

- Sociology - Bachelor of Arts (BA) (p. 558)

Minor

- Sociology - Minor (p. 559)

Certificates

- Animals & Society - Certificate (p. 559)
- Care, Health and Resilience - Certificate (p. 560)
- Social Innovation - Certificate (p. 561)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Courses

SOCY 1001 (3) Introduction to Sociology

Examines basic sociological ideas including social relations, social interaction, social structure, and social change. Examples are drawn from societies around the world.

Additional Information: GT Pathways: GT-SS3 -Soc Behav Sci:Hmn Behav, Cult, Soc Frame

Arts Sci Core Curr: Contemporary Societies

Arts Sci Gen Ed: Distribution-Social Sciences

Departmental Category: General Sociology

MAPS Course: Social Science

SOCY 1004 (3) Deviance in U.S. Society

Examines the social construction of deviance in the U.S., the process of acquiring a deviant identity and managing deviant stigma, and the social organization of deviant act, lifestyles, relationships and careers.

Additional Information: GT Pathways: GT-SS3 -Soc Behav Sci:Hmn Behav, Cult, Soc Frame

Arts Sci Core Curr: Ideals and Values

Arts Sci Gen Ed: Distribution-Social Sciences

Departmental Category: Deviance and Criminology

SOCY 1006 (3) The Social Construction of Sexuality

Discusses the social determinants of sexuality. Analyzes the economic, psychological, and cultural influences on human sexuality. Interactional perspective of human sexuality is presented.

Equivalent - Duplicate Degree Credit Not Granted: WGST 1006

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

Arts Sci Gen Ed: Diversity-U.S. Perspective

Departmental Category: Sex and Gender

SOCY 1016 (3) Sex, Gender, and Society 1

Examines status and power differences between the sexes at individual and societal levels. Emphasizes historical context of gender roles and status, reviews major theories of gender stratification.

Equivalent - Duplicate Degree Credit Not Granted: WGST 1016

Additional Information: GT Pathways: GT-SS3 -Soc Behav Sci:Hmn Behav, Cult, Soc Frame

Arts Sci Core Curr: Human Diversity

Arts Sci Gen Ed: Distribution-Social Sciences

Arts Sci Gen Ed: Diversity-U.S. Perspective

Departmental Category: Sex and Gender

SOCY 1021 (3) United States Race and Ethnic Relations

An examination of race and minority problems in U.S. society, including the psychological, social, and cultural sources of prejudice and discrimination.

Additional Information: GT Pathways: GT-SS3 -Soc Behav Sci:Hmn Behav, Cult, Soc Frame

Arts Sci Core Curr: United States Context

Arts Sci Gen Ed: Distribution-Social Sciences

Arts Sci Gen Ed: Diversity-U.S. Perspective

Departmental Category: General Sociology

SOCY 1022 (3) Ethics and Social Issues in U.S. Health and Medicine

Explores current ethical and policy issues in U.S. health and medical practices. Includes such issues as alcohol and drug abuse, organ transplants and substitutes, genetic engineering, contraception, abortion, occupational safety and health, and euthanasia.

Additional Information: Arts Sci Core Curr: Ideals and Values

Arts Sci Gen Ed: Distribution-Social Sciences

Departmental Category: Population and Health Issue

SOCY 1841 (1-6) Independent Study in Sociology

Repeatable: Repeatable for up to 7.00 total credit hours.

Additional Information: Departmental Category: General Sociology

SOCY 2011 (3) Contemporary Social Issues and Human Values

Explores contemporary societies on a global scale. Focuses on such issues as capitalism, socialism, race and ethnic problems, sex discrimination, poverty and the concentration of wealth, crime and deviance, human rights and human values, peace and war.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

Departmental Category: General Sociology

SOCY 2031 (3) Social Problems

Examines U.S. society from a normative perspective emphasizing theories of social change. Considers such problems as distribution of power, unemployment, poverty, racism and sexism, the changing role of the family, and drugs.

Additional Information: GT Pathways: GT-SS3 -Soc Behav Sci:Hmn Behav, Cult, Soc Frame

Arts Sci Core Curr: Ideals and Values

Arts Sci Gen Ed: Distribution-Social Sciences

Departmental Category: General Sociology

SOCY 2034 (3) Drugs in United States Society

Examines the relationship between drugs and social contexts. Lends insight into why people find consciousness alteration meaningful, what kinds of experiences and problems arise, and what types of social policies emerge to control drug use.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

Departmental Category: Deviance and Criminology

SOCY 2044 (3) Crime and Society

Explores issues related to crime, the criminal justice system, and crime-related public policy. It addresses what we know about crime and how we know it, how our society responds to crime, and how the institutions designed to address crime (police, courts, corrections) function.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 2044

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

Departmental Category: Deviance and Criminology

SOCY 2061 (3) Introduction to Social Statistics

Introduces students to quantitative analysis of social phenomena. Emphasizes understanding and proper interpretation of graphs; measures of central tendency, dispersion, and association; and the concept of statistical significance. Assumes students have only limited mathematical background.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

Arts Sci Gen Ed: Quantitative Reasoning Math

Departmental Category: General Sociology

SOCY 2077 (3) Environment and Society

Examines how both natural and built environments influence human behavior and social organization. Focuses on microenvironments and their influence on individuals; the impact of macroenvironments on societal organization; and environmental movements.

Additional Information: Arts Sci Core Curr: Ideals and Values

Arts Sci Gen Ed: Distribution-Social Sciences

Departmental Category: Environment and Society

SOCY 2080 (3) Sociology of the Helping Professions

Investigates how today's helping professionals are trained and socialized to care for clients, the challenges they face in working within modern bureaucracies and with advanced technologies and the importance of inter-professional care.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

Departmental Category: General Sociology

SOCY 2091 (3) Topics in Sociology

Variety of courses taught by visiting and regular faculty. See current departmental announcements for specific content. Students may receive credit for this course up to three times for different topics.

Repeatable: Repeatable for up to 9.00 total credit hours.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: General Sociology

SOCY 2092 (3) Sex, Power and Reproduction

Examines fertility, contraception and abortion with an emphasis on demographic trends, social stratification and policy impacts. Sociological, demographic and public health perspectives will be presented.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

SOCY 3001 (3) Classical Theory

In-depth study of classical sociological theorists, particularly Marx, Durkheim, and Weber. Examines their roles in defining the discipline of sociology.

Requisites: Requires a prerequisite course of SOCY 1001 (minimum grade C-). Restricted to students with 27-180 credits (Sophomore, Junior or Senior) Sociology (SOCY) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: General Sociology

SOCY 3002 (3) Population and Society

Examines population, its structure and processes, and its relationships to selected areas of the social structure. Examines Malthusian, neo-Malthusian, and Marxist perspectives.

Requisites: Restricted to Sociology (SOCY) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Population and Health Issue

SOCY 3011 (3) Contemporary Theory

Continuation of SOCY 3001. In-depth study of modern and post-modern theories of the 20th century, including structural-functionalist, conflict, symbolic interactionist, feminist, and world system theories.

Requisites: Requires a prerequisite course of SOCY 3001 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) Sociology (SOCY) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: General Sociology

SOCY 3012 (3) Women and Development

Investigates the status of women in the context of globalization and social and economic development.

Equivalent - Duplicate Degree Credit Not Granted: WGST 3012

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite SOCY 3001.

Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Distribution-Social Sciences
Arts Sci Gen Ed: Diversity-Global Perspective
Departmental Category: Population and Health Issue
Departmental Category: Asia Content

SOCY 3016 (3) Marriage and the Family in U.S. Society

Comparative and historical examination of marriage and the family within the U.S. Emphasizes changing family roles and family structures. Also considers alternatives to the nuclear family and traditional marriage exploring new definitions of family.

Equivalent - Duplicate Degree Credit Not Granted: WGST 3016

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite SOCY 3001.

Additional Information: Arts Sci Core Curr: United States Context
Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Sex and Gender

SOCY 3032 (3) Social Epidemiology

Explores the role of medicine and medical systems in society. How does society shape health, how does health shape social position and how do societies make sense of health and illness? Topics may include epidemiology, social demography of health, social stress, health behavior, experiences of illness and recovery, health care provision and health care delivery systems.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: General Sociology

SOCY 3041 (3) Self and Consciousness

Explores human development from a psychosocial perspective, focusing on the interplay between psychological patterns and social forms. Issues such as self-image and social consciousness are studied within the larger context of individual and collective forces leading to transformation.

Equivalent - Duplicate Degree Credit Not Granted: INVS 3041

Requisites: Requires a prerequisite course of SOCY 3001 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) Sociology (SOCY) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: General Sociology

SOCY 3042 (3) Topics in Population and Health

A variety of courses in population and/or health will be taught, usually by visiting lecturers. See current departmental announcements for specific content.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires a prerequisite course of SOCY 1001 (minimum grade D-).

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Population and Health Issue

SOCY 3044 (3) Race, Class, Gender, and Crime

Overview of race, class, gender and ethnicity issues in offending, victimization and processing by the justice system. Examines women and people of color employed in the justice system.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 3044 and WGST 3044

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite SOCY 1001 or SOCY 1004 or SOCY 1021 or SOCY 2044.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Deviance and Criminology

SOCY 3045 (3) Sociology of Death and Dying

Addresses sociological aspects of thanatology (the study of death and dying). Includes study of the social meaning of death and its normative treatment in western civilization, with a focus on the contemporary United States.

Requisites: Requires a prerequisite course of SOCY 1001 or SOCY 3001 (minimum grade D-).

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Population and Health Issue

SOCY 3046 (3) Topics in Sex and Gender

Faculty present courses based on their area of expertise and specialization in the field of sex and gender. Students should check current sociology department notices of course offerings for specific topics.

Equivalent - Duplicate Degree Credit Not Granted: WGST 3046

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Sex and Gender

SOCY 3052 (3) Medical Sociology

Explores the role of medicine and medical systems in society. How does society shape health, how does health shape social position, and how do societies make sense of health and illness? Topics may include epidemiology, social demography of health, social stress, health behavior, experiences of illness and recovery, health care provision, and health care delivery systems.

Requisites: Requires a prerequisite course of SOCY 1001 (minimum grade D-).

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Population and Health Issue

SOCY 3141 (3) Social Movements in the U.S

Considers theory and research about American social movements. Emphasizes leadership, ideology, recruitment, strategy, organizational dynamics, public response, and reasons for success or failure.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) Sociology (SOCY) majors only.

Recommended: Prerequisite SOCY 3001.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: General Sociology

SOCY 3151 (3) Self in Modern Society

Explores how modern social institutions and culture shape our personal experiences, how personal experiences can affect the nature of those, institutions and culture, and how strategies can be developed for achieving balance between the individual and society.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite SOCY 3001.

Additional Information: Arts Sci Core Curr: Ideals and Values
Arts Sci Core Curr: United States Context
Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: General Sociology

SOCY 3161 (3) Sociological Perspectives on Race and Ethnicity

Addresses three subtopics of race from a sociological perspective: ethnic and racial identities, immigration, and race and ethnicity in Latin America.

Recommended: Prerequisite SOCY 1001 or SOCY 1021.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: General Sociology

SOCY 3171 (3) Whiteness Studies

Uses the conceptual framework of the sociology of race and ethnic relations to explore whiteness as a racial category that is centered and privileged in American society. Investigates the development of whiteness from past white supremacy, current colorblindness, to possible future multiculturalism. Analyzes the consequences of whiteness as a racial identity and a social structure.

Requisites: Requires a prerequisite course of SOCY 1001 (minimum grade D-).

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: General Sociology

SOCY 3201 (3) Sociological Research Methods

Introduces students to the logics and methods of sociological research. This requirement for majors teaches ways to answer sociological questions by collecting and analyzing different types of data. Students are trained in research ethics and learn how to collect their own data and conduct original sociological research. Collection and analysis of both qualitative and quantitative data are included.

Requisites: Requires prerequisite course of SOCY 2061 or ANTH 4000 or EBIO 4410 or ECON 3818 or GEOG 3023 or IPHY 2800 or MATH 2510 or PSCI 2075 or PSYC 2111 or EDUC 4716 (minimum grade C-). Restricted to Sociology (SOCY) majors only.

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: General Sociology

SOCY 3301 (3) Survey Methods

Teaches quantitative research methods and, particularly, methods of survey research. Topics include sampling, interviewing, schedule construction, data analysis, computer methods, index construction, and statistical analysis. Students participate in a survey project, design, collect data, and prepare a research paper on the basis of collected data.

Requisites: Requires prerequisite courses of SOCY 2061 and SOCY 3001 (all minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Sociology (SOCY) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: General Sociology

SOCY 3314 (3) Violence Against Women and Girls

Focuses on aspects of the victimization of women and girls that are "Gendered" - namely, sexual abuse and intimate partner abuse. Also explores the importance of race, class, and sexuality in gendered violence.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 3314 and WGST 3314

Recommended: Prerequisite SOCY 1016 or WGST 1016.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Deviance and Criminology

SOCY 3401 (3) Field Methods

Skill development prepares students to conduct qualitative sociological research. Emphasizes ethnographic techniques, including intensive interviewing, direct observation, coding, participant observation, and report writing. Students conceive and execute a field research project with data collection, analysis, and a report.

Requisites: Requires a prerequisite course of SOCY 3001 (minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Sociology (SOCY) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: General Sociology

SOCY 4000 (3) Gender, Genocide and Mass Trauma

Studies the persistence of genocide and the effects of mass trauma on women and girls. Within the framework of political and social catastrophe, examines cataclysmic world events and the traumatic consequences for women of religious persecution, colonialism, slavery and the genocides of the 20th and 21st centuries.

Equivalent - Duplicate Degree Credit Not Granted: WGST 4010

Recommended: Prerequisite SOCY 1016 or WGST 1016 or WGST 2000 or SOCY 3314 or WGST 3314.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Sex and Gender

SOCY 4002 (3) Sociology of Aging

Studies present and future roles of the aged in the family, the community, and the larger society. Considers economic, political, and health consequences of various retirement systems.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) Sociology (SOCY) majors only.

Recommended: Prerequisite SOCY 3001.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Population and Health Issue

SOCY 4004 (3) Advanced Topics in Criminology

Variety of courses in criminology. See current departmental announcements for specific content.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite SOCY 1001 or SOCY 1004 or SOCY 2044.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Deviance and Criminology

SOCY 4007 (3) Global Human Ecology

Examines global environmental issues from sociological perspectives. Focuses on such problems as overpopulation, world hunger and poverty, pollution, resource shortages, environmental impact of technology and population dynamics, public policy, and strategies for change.

Equivalent - Duplicate Degree Credit Not Granted: SEWL 2000

Requisites: Restricted to students with 57-180 credits (Junior or Senior) Sociology (SOCY) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Environment and Society

SOCY 4014 (3) Criminology

Examines the scientific study of types of criminal behavior and explanations for criminal behavior, with special attention to social factors affecting criminal behavior.

Requisites: Requires a prerequisite course of SOCY 1001 or SOCY 1004 or SOCY 2044 (minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Deviance and Criminology

SOCY 4016 (3) Sex, Gender and Society 2

Studies status and power differences between the sexes at individual, group, and societal levels. Examines empirically established sex differences, and reviews biological, psychological, and sociological explanations for gender differences.

Equivalent - Duplicate Degree Credit Not Granted: WGST 4016

Requisites: Requires a prerequisite course of SOCY 1016 or WGST 1016 or WGST 2000 (minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Sex and Gender

SOCY 4017 (3) Animals and Society

Examines the role of non-human animals in human society. Investigates the social construction of the human/animal boundary. Challenges ideas that animals are neither thinking nor feeling. Examines the many ways humans rely on animals. Considers the link between animal cruelty and other violence. Explores the moral status of animals.

Requisites: Requires a prerequisite course of SOCY 1001 (minimum grade D-).

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Environment and Society

SOCY 4024 (3) Juvenile Justice and Delinquency

Examines the history, incidence and prevalence of delinquent behavior among youth.

Requisites: Requires a prerequisite course of SOCY 1001 or SOCY 1004 or SOCY 2044 (minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Core Curr: Contemporary Societies
Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Deviance and Criminology

SOCY 4027 (3) Inequality, Democracy, and the Environment

Focuses on the structural forces affecting environmental degradation and environmental behavior by examining the relationships between (a) inequality and democratic decision making and (b) undemocratic decision making; U.S. and corporate food and energy policy; and global environmental degradation. Focuses on the role that global inequality plays in fostering environmental degradation.

Equivalent - Duplicate Degree Credit Not Granted: ENVS 4027

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Environment and Society

SOCY 4030 (3) Sociology of Climate Change

Examines the human drivers and causes of climate change, the health and security risks it creates and the efforts of societies to mitigate and adapt to its effects.

Equivalent - Duplicate Degree Credit Not Granted: ENVS 4030

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Environment and Society

SOCY 4031 (3) Social Psychology

Studies individuals in social context. Reviews philosophical and sociological treatments of the relation between the individual and society. More specific topics include the socialization process, theories of human development and personality formation, language acquisition, conformity, aggression, sex differences in personality and gender identity, and the relation between attitudes and overt behavior.

Requisites: Requires a prerequisite course of SOCY 3001 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) Sociology (SOCY) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: General Sociology

SOCY 4037 (3) Hazards, Disasters and Society

Explores the societal dimensions of hazards and disasters, emphasizing disaster theory and research, key issues in the sociological study of disasters, social vulnerability, the impacts of disasters in the U.S. and worldwide and the U.S. Emergency Management System.

Equivalent - Duplicate Degree Credit Not Granted: SOCY 5037

Requisites: Requires a prerequisite course of SOCY 2077 (minimum grade D-).

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Environment and Society

SOCY 4042 (3) Economic Sociology

Defines relationship between economy and society; sociological approach to study of economic activity and organization; difference from the theoretical and methodological assumptions orienting the discipline of economics; tackles these questions in two ways: studies foundations as established in works of Smith, Marx, Weber, Polanyi, and Schumpeter, and considers current research in economic sociology, focusing on concepts of markets, networks, and embeddedness.

Requisites: Requires a prerequisite course of SOCY 1001 (minimum grade D-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) Sociology (SOCY) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Population and Health Issue

SOCY 4047 (3) Topics in Environment and Society

Variety of courses taught by visiting and regular faculty. See current departmental announcements for specific content.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Environment and Society

SOCY 4052 (3) Social Inequalities in Health

Focuses on social inequalities in health in both U.S. and international contexts. Reviews the link between health status and various types of social statuses, including but not limited to socioeconomic status, gender, race and ethnicity. Explanations for the relationships between these factors and various health outcomes are discussed. Focuses on multiple levels of analysis, from the physician-patient interactions to health care systems and social policies. Students have the opportunity to develop their own specific research interests in this field.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Arts Sci Gen Ed: Diversity-U.S. Perspective
Departmental Category: Population and Health Issue

SOCY 4062 (3) Suffering and Care in Society

Examines how modern societies understand and respond to the reality of human suffering, how care systems are organized, and the experiences of professional caregivers.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Population and Health Issue

SOCY 4063 (3) Risk and Resilience in Society

Explores the growing dangers of modern life and the ability of society and its members to recover from epidemics, terrorism, financial disasters, natural catastrophes and other harmful events. Special attention is given to the social (as opposed to the individual) sources of risk and resilience and their implications for the helping professions.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: General Sociology

SOCY 4071 (3) Social Stratification

Studies theories of class, ethnic, sex, and age stratification. Examines social inequality in the United States and analyzes the resulting conflicts.

Equivalent - Duplicate Degree Credit Not Granted: SOCY 5071

Requisites: Requires a prerequisite course of SOCY 3001 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) Sociology (SOCY) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: General Sociology

SOCY 4081 (1-3) Sociology of Education

Analyzes the school as a social organization. Among topics considered are power and control in the school; classroom interaction and its relation to learning and personality development in students; roles of educators; and reciprocal relations of school and community.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: General Sociology

SOCY 4084 (3) Punishment, Law and Society

Places the current state of punishment in the U.S. in historical and cross national context. Examines key features of penal systems and key sociological theories about the relationship between punishment and society.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 4084

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite SOCY 1001 or SOCY 1004 or SOCY 2044.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Deviance and Criminology

SOCY 4086 (3) Family and Society

Studies the changing relationship between family and social structure. Examines variations in family organization and considers political, social, ideological, demographic, and economic determinants of family formation.

Equivalent - Duplicate Degree Credit Not Granted: WGST 4086

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite SOCY 3001.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Sex and Gender

SOCY 4104 (3) The Death Penalty in America

Examines the historical and international use of capital punishment, and then focuses on its use and status in the United States in this century, with a special look at Colorado. Critically examines the arguments for and against capital punishment. The inmates on death row and their families will be examined, as well as the needs of families of homicide victims.

Requisites: Requires a prerequisite course of SOCY 4014 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Deviance and Criminology

SOCY 4117 (3) Food and Society

Examines the food system along the lines of social justice and environmental sustainability. Investigates the institutional and cultural supports of major food system problems and contemporary efforts to address those problems, including the realms of food production, processing, distribution, marketing, policy, regulation, consumption, and activism.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Environment and Society

SOCY 4121 (3) Sociology of Religion

Examines complex interactions between religious and other social structures, such as the economy, government, and the family, and how globalization is affecting religious traditions across the globe. Includes discussion of how various religions are used or misused to justify terrorism and other acts of violence.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite SOCY 3001.

Additional Information: Arts Sci Core Curr: Ideals and Values
Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: General Sociology

SOCY 4131 (1-3) Advanced Topics in Sociology

Variety of advanced specialty courses taught by visiting and regular faculty designed for upper division sociology majors. See current departmental announcement for specific content.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires a prerequisite course of SOCY 1001 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) Sociology (SOCY) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: General Sociology

SOCY 4132 (3) Gender, Islam and Modernity

Examines gender in contemporary Muslim societies, with emphasis on Asia and the Middle East. Explores issues such as veiling, feminism, sexuality, family, women's participation in politics and social movements.

Requisites: Requires prerequisite course of SOCY 1001 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) Sociology (SOCY) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

SOCY 4141 (3) The Social Psychology of Friendships

Studies friendships between individuals and groups, applying social psychological theories of interaction and group processes. Examines the effects of hierarchies of status and power and of norms and social pressure on friendships. Attempts to answer questions like how social categories like gender, race, and class affect friendships, what are the unwritten rules of behavior among friends in different situations, and what happens when we violate them.

Requisites: Requires a prerequisite course of SOCY 1001 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) Sociology (SOCY) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: General Sociology

SOCY 4160 (3) Designing Social Innovations

Introduces students to theory and research on social entrepreneurship with special emphasis on the role of design thinking.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

SOCY 4161 (3) Executing Social Innovations

Introduces students to the skills and strategies involved in developing a business plan for a social business or an organization wanting to increase its social impact.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

SOCY 4441 (3) Senior Honors Seminar 1

Helps students design and initiate an honors thesis based on original sociological research.

Requisites: Requires prerequisite courses of SOCY 3001 and SOCY 3301 (all minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Sociology (SOCY) majors only.

Additional Information: Arts Sciences Honors Course
Departmental Category: General Sociology

SOCY 4451 (3) Senior Honors Seminar 2

Helps students complete an honors thesis based on original sociological research. Emphasizes analyzing data, writing research reports, and presenting results.

Requisites: Requires prerequisite courses of SOCY 3001 and SOCY 3301 (all minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Sociology (SOCY) majors only.

Additional Information: Arts Sciences Honors Course
Departmental Category: General Sociology

SOCY 4841 (1-8) Independent Study in Sociology

Upper-division variable credit. Instructor consent required.

Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires a prerequisite course of SOCY 3001 (minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Sociology (SOCY) majors only.

Additional Information: Departmental Category: General Sociology

SOCY 4911 (1-3) Teaching Sociology

Students participate in a teaching seminar under the supervision of a faculty member. Includes pedagogical strategies for implementing concrete educational goals and encouraging higher levels of creativity and analysis in a large, lower-division class. Emphasizes mentorship and personal development. Instructor consent required.

Requisites: Requires a prerequisite course of SOCY 1001 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) Sociology (SOCY) majors only.

Additional Information: Departmental Category: General Sociology

SOCY 4931 (1-6) Internship in Sociology

Provides an academically supervised opportunity for junior and senior sociology majors to work in public or private organizations to gain practical knowledge and experience, and allows students to make a connection between sociological theory and the "real world". Instructor consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires a prerequisite course of SOCY 3001 (minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Sociology (SOCY) majors only.

Additional Information: Departmental Category: General Sociology

SOCY 4932 (3) Internship in Care, Health and Resilience

Provides an academically supervised opportunity for juniors and seniors interested in the helping professions to work in a job that provides them valuable hands-on experience, allows them to apply insights learned in their formal coursework and helps them make informed career choices upon graduation. This course cannot be applied to the SOCY major or minor requirements.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Population and Health Issue

Sociology - Bachelor of Arts (BA)

Sociology is the scientific study of human social behavior. It considers how society influences individuals, and how individuals influence society. Sociologists describe and explain the actions of persons, groups, organizations, classes and entire societies. They also design and evaluate social programs and public policy.

The study of sociology includes social theory, research methods, social stratification, race relations, social change, criminology, demography, gender roles, religion, social psychology and the environment.

Students completing a BA in sociology will acquire the ability to:

- locate and consult works relevant to a sociological investigation and write a high-quality sociological paper;
- understand the basic procedures of sociological research and analyze sociological data; and
- understand and interpret the results of sociological research, understand sociological concepts and evaluate sociological writings.

Requirements

General Requirements

Students must complete the graduation requirements of the College of Arts and Sciences and the required courses listed below. A minimum of 36 credit hours (but not more than 45) in sociology is required for the degree. Of the 36 credit hours, 21 must be upper division with a minimum of 15 upper-division credit hours of course work in the major taken on the Boulder campus.

All required major courses must be completed with a grade of C- or better. The cumulative GPA required in sociology courses is 2.00.

In addition to formal course work, the degree offers opportunities for internships with various organizations, including social service agencies, the criminal justice system and nonprofit organizations. There is also the opportunity to design and complete an honors thesis based on the student's original research, as well as to work closely with a faculty member through the UROP program.

Required Courses and Credits

Code	Title	Credit Hours
SOCY 1001	Introduction to Sociology	3
SOCY 2061	Introduction to Social Statistics ¹	3
SOCY 3001	Classical Theory	3
SOCY 3201	Sociological Research Methods	3

Electives

SOCY Lower or Upper-division electives	9
SOCY Upper-division electives ²	15
Total Credit Hours	36

¹ A non-SOCY statistics course (C- grade or higher) can be used to substitute for SOCY 2061, but then an additional 3 credit SOCY elective would need to be taken to reach the 36 required SOCY credits.

² SOCY 4932 cannot be applied to the SOCY major or minor requirements.

Graduating in Four Years

Consult the Four-Year Guarantee Requirements for information on eligibility (p. 130). The concept of "adequate progress" as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress in sociology, students should meet the following requirements:

- By the beginning of the second semester, declare the major.
- By the end of the fourth semester, complete SOCY 1001 and SOCY 3001 and 6 credit hours of sociology electives.
- By the end of the sixth semester, complete SOCY 2061 and SOCY 3201 and 15 credit hours of sociology electives (with a minimum of 9 of the 15 being upper-division credit hours).
- By the end of the eighth semester, complete 36 credit hours (but not more than 45), in sociology with at least 21 of those credit hours in upper-division courses.

Recommended Four-Year Plan of Study

Through the required course work for the major, students will fulfill all 12 credits of the Social Sciences area of the Gen Ed Distribution Requirement and potentially one or both categories of the Gen Ed Diversity Requirement.

Course	Title	Credit Hours

Sociology - Minor

Sociology is the scientific study of human social behavior. It considers how society influences individuals, and how individuals influence

society. Sociologists describe and explain the actions of persons, groups, organizations, classes, and entire societies. They also design and evaluate social programs and public policy. The study of sociology includes social theory, research methods, social stratification, race relations, social change, criminology, demography, gender roles, religion, social psychology, and the environment.

To declare a minor in sociology, students can attend a new majors/minors meeting, or they can email michael.lynn@colorado.edu (Michael.Lynn@colorado.edu) from their CU email account. Students will need to include their student ID number along with a request to add the SOCY minor.

Students must complete minimum of 18 credit hours in sociology courses, including at least 9 hours of upper-division coursework, and the required course listed below. Students are allowed to apply no more than 9 credit hours, including 6 upper-division credit hours, of transfer work toward a minor. All minor courses must be completed with a grade of C- or better. The GPA for all minor course work must equal 2.00 or higher.

Required Courses and Credit Hours

Code	Title	Credit Hours
SOCY 1001	Introduction to Sociology	3
	SOCY Lower or Upper-division electives	6
	SOCY Upper-division electives	9
Total Credit Hours		18

SOCY 4932 cannot be applied to the SOCY major or minor requirements.

Animals and Society - Certificate

The animals and society certificate builds on a rapidly growing interdisciplinary field devoted to the critical examination and evaluation of the relationships between humans and nonhuman animals, whether historical or contemporary, factual, fictional or symbolic, beneficial or detrimental. The program requirements emphasize scholarship from the social sciences and humanities, but include elective options in the natural sciences. The interdisciplinary approach helps students explore the complexities of animals' lives, human-animal relationships, ethical and moral concerns about animals, representations of animals and humans, and the significance of animals in human evolution, history and civilization.

This certificate has an especially practical use for students in the social sciences and humanities who would like to pursue careers or interests related to wild or domesticated animals, but do not wish to become biologists, zoologists or veterinarians. Examples of career options include:

- development, management, policy work, research, outreach, marketing, lobbying or other work in animal protection or environmental organizations;
- administrative, fundraising, marketing or outreach jobs at animal shelters;
- humane or environmental education;
- jobs with government agencies, such as the U.S. Department of Agriculture, the Fisheries and Wildlife Service or others;
- animal-assisted therapy (with a master's degree in social work);
- wildlife rehabilitation;

- humane law enforcement.

Students might also consider pursuing graduate degrees in human-animal studies, anthrozoology or related fields.

For more information or to apply to the certificate in animals and society, contact Professor Leslie Irvine (leslie.irvine@colorado.edu).

Requirements

The animals and society certificate requires 18 credits through three main areas. Students must complete 9 of the 18 credit hours at the upper-division level; a minimum of 12 credit hours must be taken on campus. If applicable, a maximum of 6 transfer credit hours from other institutions will be accepted. No more than 3 courses (or 9 credits), not including the internship, may be taken in one department.

- **Core Courses:** Students must take Animals and Society (SOCY 4017) and two of the classes listed, all of which examine the research in relevant areas of human-animal studies. Courses not taken to fulfill the core requirement may be taken as electives.
- **Electives:** Students must take two classes from the list of those offered in the College of Arts and Sciences that provide essential perspectives on human-animal interactions and relationships.
- **Internship:** In either the second semester of the junior year or the senior year, students must take a semester-long, 3-credit internship. The internships allow students to apply knowledge gained in courses to practical experience. The required internship is not applicable to the sociology major or minor.

Required Courses and Credits

Code	Title	Credit Hours
Core Courses		
SOCY 4017	Animals and Society	3
Select two of the following: ¹		
ANTH 3005	Dogs, Wolves and Human Evolution	6
HIST 4117	Colorado History	
HIST 4416	Environmental History of North America	
PHIL 4120	Philosophy and Animals	
FREN 4700	Encountering Animals: contemporary Discourse and the Dialog of Species	
Electives ²		
Select at least 6 credits of elective course work; labs may result in 7 credits.		
ANTH 3000	Primate Behavior	
ANTH 4110	Human Evolutionary Biology	
EBIO 2040	Principles of Ecology	
EBIO 3040	Conservation Biology	
EBIO 3240	Animal Behavior	
HIST 4326	Epidemic Disease in US History	
MCDB 1030	Introduction to Molecular Biology	
MCDB 1041	Fundamentals of Human Genetics	
SOCY 4117	Food and Society	
Internship		3
Total Credit Hours		18

¹ Courses not taken to fulfill core requirements may be taken as electives.

² No more than 3 courses (or 9 credits), not including the internship, may be taken in one department.

About the Internship

Students can choose from the several animal welfare-related Boulder County internship sites. Students can also locate their own internship sites, with the director's approval. Students taking internships must work a minimum of 40 hours for each hour of academic credit. For 3 credits, this means 90 hours on site (i.e., 6 hours per week), 10 hours of classroom time and 20 hours of reading and writing assignments.

In collaboration with the program director and site supervisors, students will outline tasks and responsibilities that support their learning goals. Consequently, students who achieve their learning goals acquire experience and a set of transferable skills that prepare them for professional positions or further academic study.

Care, Health and Resilience - Certificate

The certificate in care, health and resilience prepares undergraduates for working in today's helping professions: nursing, medicine, counseling, teaching, community services, ministry, emergency management and related fields. It emphasizes the skills and practices expected of paid care providers, ranging from the ability to nurture clients' physical, emotional and social well-being to helping people thrive despite life-altering circumstances.

The program's curriculum will:

- provide students an opportunity to explore a variety of care-related occupations;
- address the needs of suffering people and at-risk populations;
- examine the ethical dilemmas posed by medical technologies and bureaucracies; and
- link students to Colorado's only academic health sciences center, the University of Colorado Anschutz Medical Campus, and other local hospitals through its internship program.

Requirements

The certificate is open to degree seeking CU Boulder undergraduates in good standing from any declared major and non-degree seeking students. There is no GPA requirement for admission into the program. Completion of the certificate requires the completion of 18 credits (9 upper-division) of approved courses with grades of C- or better.

Required Courses and Credits

Code	Title	Credit Hours
Required Courses		
Choose three of the following:		
SOCY 1022	Ethics and Social Issues in U.S. Health and Medicine	9
SOCY 2080	Sociology of the Helping Professions	
SOCY 4062	Suffering and Care in Society	
SOCY 4063	Risk and Resilience in Society	
Required Internship		3
SOCY 4932	Internship in Care, Health and Resilience ¹	
Electives		6

Choose two of the following:

ANTH 4110	Human Evolutionary Biology
ANTH 4610	Medical Anthropology
ARSC 3001	Social Engagement & Human Rights: The South Africa Model
ECON 4242	Urban Economics: The Economics of Cities
ECON 4646	Topics in Health Economics
ECON 4897	Economics of Organizations
ENGL 1001	Freshman Writing Seminar
ETHN 3201	Multicultural Leadership: Theories, Principles and Practices
GEOG 3692	Introduction to Global Public Health
GEOG 3742	Place, Power, and Contemporary Culture
GEOG 4852	Health and Medical Geography
IPHY 2500	Perspectives in Health and Medicine
INVS 3302	Facilitating Peaceful Community Change
PHIL 1160	Introduction to Bioethics
PHIL 3160	Bioethics
PHIL 4110	Contemporary Moral Theory
PSCI 3084	Diversity, Disagreement, and Democracy: an Introduction to the Theory and Practice of Democracy
PSYC 2606	Social Psychology
PSYC 3131	Human Emotion
PSYC 3456	Psychology of Personality
WGST 3400	Gender, Personality, and Culture

Total Credit Hours 18

¹ SOCY 4932 cannot be applied to the SOCY major or minor requirements.

Social Innovation - Certificate

The certificate in social innovation prepares students for working in fields whose primary mission is to improve the lives of society's most vulnerable and disadvantaged people. The program will teach students how to design and execute evidence-based strategies for advancing human welfare.

The program's curriculum will provide students with:

- A substantive understanding of social problems;
- A methodology for conceiving solutions to such complex problems;
- A broad set of skills needed to implement solutions in new or existing organizations; and
- The tools for critically evaluating the effectiveness and sustainability of solutions.

Requirements

Admission Requirements

Degree seeking and non-degree seeking CU Boulder undergraduate students in good standing from any discipline will be eligible to participate in the social innovation certificate program. There will not be a grade point average requirement to enroll in the program; however, students will be required to achieve a C- or better in all course work that applies toward the certificate.

Required Courses and Credits

The certificate requires the completion a minimum of 18 credits, of which 9 credits must be at the upper-division level.

Code	Title	Credit Hours
Required Courses		
SOCY 4160	Designing Social Innovations	3
SOCY 4161	Executing Social Innovations	3
Electives		12
Students will complete four of the following courses (only one of which can be from SOCY and no more than three of which may be from the any one other department) and, depending on their career goals, can choose all from the same area or from multiple areas.		
<i>Government</i>		
ECON 4211	Public Economics: the Economics of the Government Sector	
PSCI 2106	Introduction to Public Policy Analysis	
PSCI 3031	Political Parties and Interest Groups	
PSCI 3274	Capitalism and its Critics	
PSCI 4714	Liberalism and Its Critics	
<i>Economy</i>		
ANTH 4020	Explorations in Anthropology	
GEOG 3862	Geography of Africa	
GEOG 3672	Gender and the Global Economy	
ECON 4242	Urban Economics: The Economics of Cities	
ECON 4717	Economics of Entrepreneurship	
SOCY 4071	Social Stratification	
<i>Civil Society</i>		
ANTH 3170	America: An Anthropological Perspective	
ANTH 4500	Cross-Cultural Aspects of Socioeconomic Development	
ARSC 3001	Social Engagement & Human Rights: The South Africa Model	
ETHN 2001	Foundations of Comparative Ethnic Studies: Race, Gender and Culture(s)	
ETHN 2013	Critical Issues in Native North America	
ETHN 2432	African American History	
ETHN 2536	Survey of Chicana/o History and Culture	
ETHN 3201	Multicultural Leadership: Theories, Principles and Practices	
GEOG 3742	Place, Power, and Contemporary Culture	
IAFS 3000	Special Topics in International Affairs (Humanitarianism)	
INVS 3302	Facilitating Peaceful Community Change	
PACS 2500	Introduction to Peace, Conflict and Security Studies	
PACS 3700	Communication and Conflict Management	
SLHS 2000	Introduction to Communication Disorders	
SOCY 2011	Contemporary Social Issues and Human Values

18

Spanish and Portuguese

The Spanish and Portuguese Department offers three major tracks and two minors. Language courses at the elementary and intermediate levels are also offered in Spanish, Portuguese and Catalan.

The department has identified the following as educational outcomes for the three tracks within the Spanish major.

The undergraduate degree in Spanish language and literature emphasizes knowledge and awareness of:

- the fundamental outlines of the history of literary and cultural expressions of the Spanish-speaking world;
- major creative writers in both Spanish and Spanish American literature;
- basic critical methodologies in the study of different genres ranging from fiction to poetry in a variety of textual forms, and from the written word to cinema, media and other visual arts; and
- the cultural and historical contexts in which Spanish-speaking societies developed.

In addition, students completing the degree in Spanish language and literature are expected to acquire the ability and skills to:

- read sophisticated Spanish texts at a level at which literary and cultural analyses can be performed;
- write and speak Spanish sufficiently to participate in critical discussions and write critical essays;
- analyze and interpret texts in terms of themes, characters, structure, style and overall textual strategies;
- relate analysis and interpretations of different texts to one another; and
- communicate such interpretations competently in written form in Spanish.

The undergraduate degree in Spanish and Portuguese language and culture emphasizes knowledge and awareness of the same topics listed in the degree in Spanish language and literature, but specifies electives focusing on the culture of the Portuguese-speaking world and adding knowledge of the Portuguese language.

The undergraduate degree in Spanish for the professions emphasizes knowledge and awareness of:

- several professional practices including business, health, media and sustainable development practices as applied to the Spanish-speaking world;
- fundamental Professional Spanish terminology related to these areas;
- the cultural environment in which these professions are conducted in the Spanish-speaking world;
- basic disciplinary practices according to the canons of each discipline;
- best practices in cross-cultural communication; and
- best practices in the field of translation, interpretation and language services in the targeted professional areas.

In addition, students completing the degree in Spanish for the professions are expected to acquire the ability and skills to:

- read and interpret in cultural and professional-related terms sophisticated Spanish texts concerning business, health, media and sustainable development practices;
- write and speak Spanish sufficiently to communicate effectively on professional-related issues, and be involved in critical discussions and write critical essays on the subject;
- analyze a particular professional problem in order to place it in a relevant context and formulate an appropriate response; and
- adequately translate professional-related documents.

Course codes for these programs are SPAN and PORT.

Bachelor's Degree

- Spanish - Bachelor of Arts (BA) (p. 570)

Minors

- Portuguese - Minor (p. 573)
- Spanish - Minor (p. 574)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Courses

Portuguese

PORT 1010 (5) Beginning Portuguese 1

Provides students with basic vocabulary and fundamentals of grammar through practice in speaking, listening comprehension, reading and writing, based on the Communicative Approach. Introduces the cultures of the Portuguese speaking world, with a focus on Brazil.

Additional Information: Arts Sci Core Curr: Foreign Language
Arts Sci Gen Ed: Foreign Language
Departmental Category: Portuguese

PORT 1020 (5) Beginning Portuguese 2

Provides students with basic vocabulary and fundamentals of grammar through practice in speaking, listening comprehension, reading and writing, based on the Communicative Approach. Introduces the cultures of the Portuguese speaking world, with a focus on Brazil. Continuation of PORT 1010. Department enforced prerequisite: PORT 1010 (minimum grade C-).

Additional Information: Arts Sci Core Curr: Foreign Language
Arts Sci Gen Ed: Foreign Language
Departmental Category: Portuguese

PORT 2110 (3) Second-Year Portuguese 1

Involves practice in speaking, listening comprehension, reading and writing at an intermediate level. Explores relevant topics of the Brazilian culture through different media. Besides introducing grammar topics corresponding to the intermediate level of the Portuguese languages, it includes grammar review (PORT 1010 and PORT 1020) and extra work on vocabulary acquisition. Department enforced prerequisite: PORT 1020 (minimum grade C-).

Additional Information: GT Pathways: GT-AH4 - Arts Hum: Foreign Languages

Arts Sci Core Curr: Foreign Language
Arts Sci Gen Ed: Foreign Language
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Portuguese

PORT 2120 (3) Second-Year Portuguese 2

Includes practice in speaking, listening comprehension, reading and writing at intermediate level, based on the Communicative Approach. Includes grammar and extra work on vocabulary acquisition, both explored through literary texts by renowned authors of the Portuguese speaking world, with a focus on Brazilian literature.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Portuguese

PORT 2350 (3) Portuguese for Romance Language Speakers

Focusing on Brazilian Portuguese, this course constitutes an intensive introduction to Portuguese language for those who speak a Romance language. Comprehends basic vocabulary and fundamentals of grammar through practice in speaking, listening comprehension, reading and writing, based on the Communicative Approach. Uses different media to explore cultural aspects of the Portuguese speaking world.

Recommended: Requires three semesters of college equivalent in any Romance language.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Portuguese

PORT 2800 (3) Brazil: Past and Present

Discusses contemporary Brazil through the lenses of its literary, as well as socio-political movements. Students acquire a broader perspective of the country's current dynamics based on the formation of its national identity from 1500 to today. History serves as background to analyze literature and arts and critically understand Brazilian culture. Taught in English. Does not count toward Portuguese minor or Spanish and Portuguese major.

Additional Information: Arts Sci Core Curr: Contemporary Societies
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Portuguese

PORT 3003 (3) Advanced Portuguese Language Skills

Consists of an advanced language course focused on current socio-environmental issues in Brazil. Involves reading academic texts of different areas of study, writing essays, watching documentaries, conducting class presentations and discussions and studying grammar and vocabulary in the context of a more sophisticated written Portuguese.

Requisites: Requires prerequisite course of PORT 2120 or PORT 2350 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Portuguese

PORT 3220 (3) Latin American Culture: Spanish America and Brazil

Examines literary, artistic, and philosophical currents in Spanish America and Portuguese America (Brazil), from pre-Columbian times to the present. Taught in Spanish.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 3220

Requisites: Requires prerequisite course of SPAN 3000 (minimum grade C-).

Recommended: Prerequisites PORT 2110 and PORT 2120.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Portuguese

PORT 3230 (3) Transatlantic Relations in the Portuguese Speaking World

Examines cultural movements in Brazil, Portugal and Portuguese-speaking Africa, from the 15th century period of Portuguese expansion to the postcolonial present. Includes articles on culture as seen through literary, artistic, historical and sociological lenses. Taught in Portuguese.

Requisites: Requires prerequisite courses of PORT 2110 and PORT 2120 and PORT 2350 (all minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Portuguese

PORT 3270 (3) Socio-Environmental Dynamics in Brazil

Gives students the opportunity to immerse themselves in the language, culture and contemporary realities of rural Maranhao, Brazil. Explores some of the most pressing issues in Brazil today with focus on sustainable development, environmental governance and social entrepreneurship.

Requisites: Requires a prerequisite course of PORT 2110 or PORT 2350 (minimum grade C-).

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Portuguese

PORT 4110 (3) Brazilian Literature

Focuses on Brazilian literature through the lenses of literary and cultural studies. May address fiction, poetry or the relationship between literature and film. Besides reading literary texts, reading of academic essays is included.

Equivalent - Duplicate Degree Credit Not Granted: PORT 5110

Requisites: Requires a prerequisite course of PORT 2120 or PORT 2350 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Portuguese

PORT 4150 (3) Literature of the Portuguese Speaking World

Examines major works of Portuguese literature and/or Portuguese speaking African literature through the lenses of cultural and literary studies. May address fiction, poetry, or the relationship between literature and cinema.

Equivalent - Duplicate Degree Credit Not Granted: PORT 5150

Requisites: Requires a prerequisite course of PORT 2120 or PORT 2350 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Portuguese

PORT 4230 (3) Special Topics in Luso-Brazilian and/or African Literature

Designed to examine intensively particular topics or issues concerning the literatures of Portugal, Brazil and/or the African countries of Portuguese colonization. Taught in Spanish.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 4230

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite course of PORT 3230 and SPAN 3100 (all minimum grade C-).

Recommended: Prerequisites SPAN 3120 and an additional course above SPAN 3000.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Portuguese

PORT 4840 (1-3) Independent Study

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Portuguese

Spanish

SPAN 1000 (3) Cultural Difference through Hispanic Literature

For freshmen only. Organized around the general topic of cultural differences. Focuses on a related issue such as gender or history articulated in the literature of Spain, Latin America, and the Hispanic United States. Taught in English; students read selected literary texts in English from the various traditions. Does not count towards the Spanish major.

Requisites: Restricted to students with 0-26 credits (Freshmen) only.

Additional Information: GT Pathways: GT-AH2 - Arts Hum: Lit Humanities
Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Spanish

SPAN 1010 (5) Beginning Spanish 1

Offers students a firm command of Spanish grammar. Grammar is used as a point of departure for development of oral skills. Reading and writing are stressed to a lesser degree. Attendance at the language laboratory may be mandatory.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 1150

Additional Information: Arts Sci Core Curr: Foreign Language
Arts Sci Gen Ed: Foreign Language
Departmental Category: Spanish

SPAN 1020 (5) Beginning Spanish 2

Continuation of SPAN 1010. Attendance at the language laboratory may be mandatory. Department enforced prerequisite: SPAN 1010 (min. grade C-).

Equivalent - Duplicate Degree Credit Not Granted: SPAN 1150

Additional Information: Arts Sci Core Curr: Foreign Language
Arts Sci Gen Ed: Foreign Language
Departmental Category: Spanish

SPAN 1150 (5) Intensive First Year Spanish

An intensive beginning course covering the same material as SPAN 1010 and 1020. Attendance at the language laboratory may be mandatory.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 1010 and SPAN 1020 SPAN 1010

Additional Information: Arts Sci Core Curr: Foreign Language
Arts Sci Gen Ed: Foreign Language
Departmental Category: Spanish

SPAN 2110 (3) Second-Year Spanish 1

Grammar review. Emphasizes reading, writing, and speaking skills. Attendance at the language laboratory may be mandatory. Department enforced prerequisite: SPAN 1020 (min. grade C-).

Equivalent - Duplicate Degree Credit Not Granted: SPAN 2150

Additional Information: GT Pathways: GT-AH4 - Arts Hum: Foreign Languages
Arts Sci Core Curr: Foreign Language
Arts Sci Gen Ed: Foreign Language
Departmental Category: Spanish

SPAN 2120 (3) Second-Year Spanish 2

Grammar review. Emphasizes reading, writing and speaking skills. Attendance at the language laboratory may be mandatory. Department enforced prerequisite: SPAN 2110 (min. grade C-).

Equivalent - Duplicate Degree Credit Not Granted: SPAN 2150

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Spanish

SPAN 2150 (5) Intensive Second-Year Spanish

Intensive review of grammar and other subjects covered in SPAN 2110 and SPAN 2120. Attendance at the language laboratory may be mandatory.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 2110 or SPAN 2120 SPAN 2110

Requisites: Requires prerequisite course of SPAN 1020 (minimum grade C-).

Additional Information: GT Pathways: GT-AH4 - Arts Hum: Foreign Languages
Arts Sci Core Curr: Foreign Language
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Foreign Language
Departmental Category: Spanish

SPAN 2450 (3) Catalan for Spanish Speakers

Offers an intensive introduction to the Catalan language for those able to speak Spanish. By the end of the course students should be able to communicate well in all language-skills areas: listening comprehension, speaking, reading and writing. Students will also have gained a better understanding and appreciation of the Catalan singularity.

Recommended: Prerequisite SPAN 3000 or placement or five semesters of college Spanish or department consent required.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Spanish

SPAN 3000 (5) Advanced Spanish Language Skills

Transitional course that introduces students to the Spanish major and improves their writing skills. Involves composition, reading, and to a lesser extent, conversation.

Requisites: Requires prerequisite course of SPAN 2120 or SPAN 2150 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Spanish

SPAN 3001 (3) Spanish Conversation

Emphasizes vocabulary acquisition and speaking fluency. Through structured and carefully monitored individual, group, and class work, students achieve enduring language growth and meaningful acculturation that otherwise could only be achieved through an extended stay in an Hispanic country. This course is intended for those who are learning Spanish as a second-language. Native speakers of Spanish who have pursued formal education in a Spanish speaking country will not be admitted to the course. Heritage speakers of Spanish (native speakers who have pursued formal education in a non-Spanish speaking setting) as well as students from bi-lingual K-12 programs must meet with the coordinator to determine appropriate class level. Does not count toward the Spanish major or minor.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 3002

Requisites: Requires prerequisite course of SPAN 2120 or SPAN 2150 (minimum grade C-).

Additional Information: Departmental Category: Spanish

SPAN 3002 (3) Advanced Spanish Conversation

Focuses on refining fluency in both informal and formal discourse through group discussions, class work and individual and group presentations in order to prepare students for communication in professional settings. To that end, the materials used in the course will emphasize themes and problems relevant to the contemporary Hispanic world.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 3001

Requisites: Requires prerequisite course of SPAN 3000 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Spanish

SPAN 3010 (3) Advanced Rhetoric and Composition

Designed to refine expository and argumentative writing in Spanish, this course will center around four main areas of study: culture, linguistics, sociopolitical and economic reality, and literature and criticism. A multi-draft process-based approach will guide the writing and revision of essays. Additionally, there will be a focus on grammar and lexical issues most challenging for students at the third-year level.

Requisites: Requires prerequisite course of SPAN 3000 (minimum grade C-).

Additional Information: Arts Sci Core Curr: Written Communication
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Written Communication-Upper
Departmental Category: Spanish

SPAN 3030 (3) Professional Spanish for Business 1

Includes the study of business vocabulary, business concepts, geographic context, and cultural context.

Requisites: Requires prerequisite course of SPAN 3000 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Spanish

SPAN 3040 (3) Professional Spanish for Business 2

Complements SPAN 3030 with a focus on different business topics and countries. Emphasizes interpreting and elementary translation. Attention is given to the writing of resumes and application letters, as well as the entire job search process.

Requisites: Requires prerequisite course of SPAN 3000 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Spanish

SPAN 3050 (3) Spanish Phonology and Phonetics

Designed to teach some of the methods, techniques, and tools of descriptive linguistics as they apply to articulatory phonetics. Students analyze important contrasts between sounds of Spanish and English by means of phonetic transcription.

Requisites: Requires prerequisite course of SPAN 3000 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Spanish

SPAN 3060 (3) Spanish for Careers in Environmental Studies and Sustainable Development

Provides advanced Spanish language competency and transcultural knowledge of issues pertaining to the environment, energy and sustainable development in the Spanish-speaking world. Students will develop a critical apparatus for analyzing, reading, listening, speaking and writing about the social, cultural and economic parameters of these countries and the U.S.

Requisites: Requires prerequisite course of SPAN 3000 (minimum grade C-).

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Spanish

SPAN 3070 (3) Spanish 21st Century Media Professions

Develops advanced Spanish language skills, trans-cultural knowledge and regional and historical understanding necessary for using Spanish in media related professions. Examines the production, representations and cultural meaning of Hispanic and Latino media within the United States and globally drawing on films, videos and readings in political economy, cultural studies, history and sociology. Students create five media products in Spanish.

Requisites: Requires prerequisite course of SPAN 3000 (minimum grade C-).

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Spanish

SPAN 3080 (3) Spanish Health Professions

Develops advanced Spanish language competency and trans-cultural knowledge and skills for health related contexts both in the United States and abroad in order to develop a critical apparatus for analyzing, reading, listening, speaking and writing about health and understanding health fields in historical and sociocultural contexts of the Spanish speaking world.

Requisites: Requires prerequisite course of SPAN 3000 (minimum grade C-).

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Spanish

SPAN 3100 (3) Literary and Cultural Analysis in Spanish

Fosters critical thinking and the ability to discuss texts from a historical, sociological, ideological and formalistic viewpoint. Analyzes literary and cultural expressions from Latin America, Spain and the US Latino traditions in different genres, ranging from fiction to poetry, and media from the written word to cinema and other visual arts.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Spanish

SPAN 3120 (3) Advanced Spanish Grammar

Analysis of texts from morphological and syntactic perspectives. Structural and semantic characteristics of major features of Spanish are studied at the sentence level. Use of these grammatical features is then studied in selected literary texts.

Requisites: Requires prerequisite course of SPAN 3000 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Spanish

SPAN 3150 (3) Linguistic Analysis of Spanish

Introduces students to fundamental areas of linguistic analysis with special attention paid to Spanish (and Portuguese). The structural systems of language will be introduced (principles of sound patterns, word formation, meaning, and sentence structure). Different types of language variation will be discussed (historical, social, regional).

Requisites: Requires prerequisite course of SPAN 3000 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Spanish

SPAN 3200 (3) Spanish Culture

Examines historical bases of modern Spain's cultural and political currents. Department enforced prerequisite: SPAN 3000.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Spanish

SPAN 3215 (3) Urban History and Culture in the Spanish-Speaking World

Understanding the complex history, social fabric, material life and cultural diversity of Latin American and Iberian cities is the goal of this course, which in its iterations will be devoted to analyzing and discussing different urban centers on either side of the Atlantic Ocean. Materials from a wide variety of media and genres such as literature, visual arts, historiography, film, will be used. Taught in Spanish.

Requisites: Requires prerequisite course of SPAN 3000 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Spanish

SPAN 3220 (3) Latin American Culture: Spanish America and Brazil

Examines literary, artistic, and philosophical currents in Spanish America and Portuguese America (Brazil), from pre-Columbian times to the present.

Equivalent - Duplicate Degree Credit Not Granted: PORT 3220

Requisites: Requires prerequisite course of SPAN 3000 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Spanish

SPAN 3230 (3) Discovering Barcelona: Culture and Heritage

Presents more than 2,000 years of Barcelona's cultural heritage in the city of Barcelona from the Romans to the present. We will read works by locals and foreign authors to understand how the city has been a hub of the European and Mediterranean cultures for centuries. A faculty sponsored Global Seminar to Barcelona, Spain, offered through the Study Abroad Program. Department enforced prerequisite: SPAN 3000 or equivalent.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Spanish

SPAN 3240 (3) Catalan Culture 1: Nation and Art

Introduces students to the literary, artistic and historical currents of Catalonia, an economically vibrant area of the Iberian Peninsula with 10 million people, its capital Barcelona, and a distinct culture and language. Examines national identity and major works from renowned Catalan artists, spanning architecture, painting and literature, like Dali, Gaudi, or Miro. Department enforced prerequisite: SPAN 3000.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Spanish

SPAN 3250 (3) Catalan Culture 2: Contemporary Trends and Barcelona

Introduces students to the contemporary social and cultural trends of Catalonia as they take place mainly in its capital Barcelona. Examines current developments in fields such as theatre, art, fashion, cooking, urban design or architecture. Department enforced prerequisite: SPAN 3000.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Spanish

SPAN 3260 (3) Late 19th and 20th Century Argentine Narrative

Considers a series of late 19th and 20th century canonical works from several genres (poetry, short story, essay, and the novel). Students will acquire a very specific knowledge of late 19th and 20th century Argentine literature, its relationship to specific social actors and specific historical processes. A faculty sponsored Global Seminar to Rosario, Argentina, offered through the Study Abroad Program. Department enforced prerequisite: SPAN 3000 or equivalent.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Spanish

SPAN 3270 (3) Barcelona: Understanding Local and Immigrant Cultures

Explores the history of Barcelona, a cosmopolitan city that is one of the oldest in Europe, from an interdisciplinary, European perspective that emphasizes the city's cultural diversity and pluralism. A range of historical, literary, artistic, and sociological texts will be examined. Taught in Spanish. Offered through the Study Abroad program. Department enforced prereq., SPAN 3000.

Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Diversity-Global Perspective
Departmental Category: Spanish

SPAN 3280 (3) Introduction to Catalan Literature & Film

Introduces students to the rich and diverse literary and film traditions of Catalonia, an economically vibrant area of the Iberian Peninsula with 10 million people and a distinct culture and language. Department enforced prerequisite: SPAN 3000 or equivalent. Course taught in Spanish.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Spanish

SPAN 3290 (3) Argentine Culture and History in a Latin American Context

This course examines the historical trends in Latin America from 1880 to the present and compares and contrasts Argentina's unique cultural identity to the larger Latin American context. The course then considers how said history plays a role in the literary, artistic, philosophical and social currents (including identity issues related to race, ethnicity and gender) that shape contemporary Argentine culture.

Requisites: Requires prerequisite of SPAN 3000 (minimum grade C-).
Grading Basis: Letter Grade

SPAN 3310 (3) 20th Century Spanish Literature

Surveys leading writers of Spain from 1898 until the present.

Requisites: Requires prerequisite course of SPAN 3100 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Spanish

SPAN 3340 (3) 20th Century Spanish American Literature

Introduces contemporary Spanish American literature.

Requisites: Requires prerequisite course of SPAN 3100 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Spanish

SPAN 3700 (3) Selected Readings: Spanish Literature in Translation

Introduces selected Spanish literature masterpieces. Taught in English. Will not count toward major requirements.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Spanish

SPAN 3800 (3) Selected Readings: Latin American Literature in Translation

Introduces selected Latin American (Spanish and Portuguese) literature masterpieces. Taught in English. Does not count toward the Spanish major.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Spanish

SPAN 3900 (3) Cosmos Latinos: Hispanic Science Fiction and New Worlds

Examines how Hispanic science fiction (from both Spain and Latin America) in literature and film portrays and addresses topics such as technological development, the exploration (and exploitation) of space, life in other planets, alternative paradigms of modernity, and the cultural and social landscape of technologically saturated societies. Course taught in English. No knowledge of Spanish required.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

SPAN 4060 (3) Problems of Translation for Professions in Spanish 1

Develops skills in English-Spanish and Spanish-English translation and interpretation.

Requisites: Requires a prerequisite course of SPAN 3000 and SPAN 3010 or SPAN 3030 or SPAN 3040 or SPAN 3060 or SPAN 3070 or SPAN 3080 or SPAN 3120 (all minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Spanish

SPAN 4070 (3) Problems of Translation for Professions in Spanish 2

Presents documents from different professional areas (business, health, media and environmental studies and sustainable development) which are studied, prepared, translated and discussed in context in order to enable students to perform successfully in real translation situations.

Requisites: Requires a prerequisite course of SPAN 3000 and SPAN 3010 or SPAN 3030 or SPAN 3040 or SPAN 3060 or SPAN 3070 or SPAN 3080 or SPAN 3120 (all minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Spanish

SPAN 4110 (3) Hispanic Women Writers

Discusses the image of women in Spanish literature through the centuries using works by representative female writers.

Requisites: Requires prerequisite course of SPAN 3100 (minimum grade C-).

Recommended: Prerequisites SPAN 3120 and an additional course above SPAN 3000.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Spanish

SPAN 4120 (3) Literature and Cinema in Spain and Latin America

Studies film and fiction in different periods and about main topics of the Hispanic world. It will provide a historical and cultural overview, introduce students to film theory, narrative theory and the vocabulary associated with both, and integrate critical texts about all the material studied. Topics may vary each semester. This course will be taught entirely in Spanish.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Requires prerequisite course of SPAN 3100 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Spanish

SPAN 4130 (3) The Power of Storytelling: Oral, Textual and Digital Narratives

Examines the ways in which oral, textual and digital narratives have shaped, and continue to shape, our lives and the different communities we inhabit. Looks at stories of the Spanish tradition produced in a variety of historical settings and across different media.

Requisites: Requires prerequisite course of SPAN 3100 (minimum grade C-).

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Spanish

SPAN 4150 (3) Major Works and Trends in Literature and Culture in Spain Up to 1700

Examines major works and trends in literature, visual arts and/or other cultural expressions of Spain from its origins to the end of the Baroque period,

Requisites: Requires prerequisite course of SPAN 3100 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Spanish

SPAN 4160 (3) Major Works and Trends in Literature and Culture in Spain: 1700-Present

Examines major works and trends in literature, visual arts and/or other cultural expressions of Spain from 1700 to the present day.

Requisites: Requires prerequisite course of SPAN 3100 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Spanish

SPAN 4170 (3) Major Works/Trends in Literature and Culture in Latin America Up to the 19th Century

Examines major works and trends in literature, visual arts and/or other cultural expressions of Latin America from the colonial period to the end of the 19th century.

Requisites: Requires prerequisite course of SPAN 3100 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Spanish

SPAN 4180 (3) Major Works and Trends in Literature and Culture in Latin America: 1900-Present

Examines major works of literature, visual arts and/or other cultural expressions of Latin America from the beginning of the 20th century to the present day.

Requisites: Requires prerequisite course of SPAN 3100 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Spanish

SPAN 4215 (3) Spanish in the United States

Describes the linguistic characteristics of U.S. Spanish, Spanish-English bilingualism and direct contact, including the study of borrowing, code switching, phonological and grammatical convergence, leveling, accommodation and attrition, among other linguistic phenomena.

Discusses the relationships between language and identity, as well as the role of Spanish in U.S. education, media and social institutions.

Requisites: Requires a prerequisite course of SPAN 3000 or SPAN 3010 or SPAN 3050 or SPAN 3120 or SPAN 3150 (all minimum grade C-).

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Spanish

SPAN 4220 (1-3) Special Topics in Spanish and/or Spanish American Literature

Examines intensively particular topics or issues concerning Spanish and/or Spanish American literature selected by the instructor.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite course of SPAN 3100 (minimum grade C-).

Recommended: Prerequisites SPAN 3120 and an additional course above SPAN 3000.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Spanish

SPAN 4230 (3) Special Topics in Luso-Brazilian and/or African Literature

Designed to examine intensively particular topics or issues concerning the literatures of Portugal, Brazil and/or the African countries of Portuguese

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite course of PORT 3230 and SPAN 3100 (all minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Spanish

SPAN 4430 (3) Special Topics in Hispanic Linguistics

Examines intensively particular topics or issues concerning Hispanic linguistics selected by the instructor.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Requires a prerequisite course of SPAN 3000 or SPAN 3010 or SPAN 3050 or SPAN 3120 or SPAN 3150 (all minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Spanish

SPAN 4450 (3) Introduction to Hispanic Linguistics

Introduces students to the main areas of inquiry within the field of Hispanic linguistics. Topics to be covered include speech and language, phonetics and phonology, morphology and syntax, semantics, linguistic change and variation and Spanish spoken in the United States.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 5450

Requisites: Requires a prerequisite course of SPAN 3000 or SPAN 3010 or SPAN 3050 or SPAN 3120 or SPAN 3150 (all minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Spanish

SPAN 4620 (3) Cervantes

Requisites: Requires prerequisite course of SPAN 3100 (minimum grade C-).

Recommended: Prerequisites SPAN 3120 and an additional course above SPAN 3000.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Spanish

SPAN 4650 (3) Methods of Teaching Spanish

Familiarizes students with current methodology and techniques in foreign language teaching. Peer-teaching coupled with opportunity to teach mini-lessons provide students with actual teaching experience in the foreign language classroom.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 5650

Requisites: Requires a prerequisite course of SPAN 3000 and SPAN 3010 and SPAN 3002 or SPAN 3030 or SPAN 3040 or SPAN 3050 or SPAN 3150 or SPAN 3200 or SPAN 3220 or SPAN 3240 or SPAN 3250 or SPAN 3280 or SPAN 3310 or SPAN 3340 (all minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Spanish

SPAN 4660 (6) High School Spanish Teaching

Part of supervised secondary school teaching required for state certification to teach Spanish. These hours do not count toward student hours in the major nor in the total departmental hours allowed. Pass/Fail only.

Requisites: Requires prerequisite course of SPAN 4650 or SPAN 5650 (minimum grade D-).

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Spanish

SPAN 4840 (1-3) Independent Study

Departmental approval required.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Spanish

SPAN 4930 (1-4) Languages Internship for Professions

Participants interested in public service or management-oriented careers in government or business are able to work as interns in public sector agencies or in private industry, on campus, or abroad.

Requisites: Requires prerequisite course of SPAN 3100 (minimum grade C-).

Recommended: Prerequisites SPAN 3200 and an additional course above SPAN 3000.

Additional Information: Departmental Category: Spanish

SPAN 4980 (1) Methods Language Learn/Pedagogy

Required, intensive mini-course for teaching assistants in Spanish and Portuguese. Provides teachers with the opportunity to learn about language learning theory and pedagogy.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 4990 (3) Spanish Honors Thesis

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Recommended: 18 hours of upper-division Spanish, 3.00 GPA overall, and 3.50 GPA in Spanish.

Additional Information: Arts Sciences Honors Course
Departmental Category: Spanish

Spanish - Bachelor of Arts (BA)

Program Tracks

The Department of Spanish and Portuguese offers a Bachelor of Arts in Spanish with three program tracks.

Spanish Language and Literatures Track

This track emphasizes knowledge and awareness of:

- the fundamental outlines of the history of Spanish literature and of Spanish American literature;
- the major creative writers in both Spanish and Spanish American literature;
- basic critical methodologies in the study of poetry, drama, narrative fiction and nonfiction; and
- the cultural and historical contexts in which particular traditions develop.

The program focuses on critical thinking and communication skills (written and oral) and their application in today's real-world global setting. Our internationally-recognized professors and instructors integrate their research with their teaching in a fruitful manner. The degree supports an active secondary teaching certification program, which prepares future Spanish instructors for the growing demand for secondary Spanish teachers. Catalan language courses are also offered to broaden students' linguistic spectrum. Advanced students, particularly honor's program students, are invited to begin their MA work in our program by taking graduate seminars during their senior year.

Spanish and Portuguese Languages and Culture Track

This track focuses on the literature and culture of Spanish-speaking and Lusophone countries, guiding students through readings on the history of Spain, Portugal, Brazil and Latin America. Along with major authors and literary movements of the Spanish and Portuguese-speaking worlds, students read a variety of complex texts across academic disciplines.

The linguistic and cultural mastery of Spanish and Portuguese is key in opening endless possibilities to the European Union (Portugal and Spain), as well as Brazil and the whole of Latin America. Through this bilingual combination, students will gain the tools needed to conduct business in the Western Hemisphere in today's competitive global market.

Spanish for the Professions Track

This interdisciplinary track offers exciting career possibilities, both in government and private industry, at home and abroad. Languages and cultural understanding are essential in business, engineering, commerce, civil service, law, library science, media, science, economics, health and social sciences.

The degree emphasizes knowledge and awareness of the cultural environment in which professions are practiced in the Spanish-speaking world. Students develop an advanced level of language proficiency and trans-cultural competence in addition to taking courses in a professional field of their choice.

Study Abroad

The department strongly recommends that all majors include a period of study in a Spanish or Portuguese-speaking country in the course of their undergraduate education. Please visit Study Abroad (<http://abroad.colorado.edu>) for more information.

Although the 4-year graduation guarantee does not apply to those who study abroad, it is still entirely possible to go abroad for a semester or a year and graduate in 4 years. For International Spanish for the Professions track, formal admission to the major is required before departure. The Department of Spanish and Portuguese Sponsors Summer Global Seminars in Argentina (<https://www.colorado.edu/spanish/undergraduate/study-abroad/global-seminar-culture-history-literature-rosario-argentina>), Brazil and Spain (<https://www.colorado.edu/spanish/undergraduate/study-abroad/global-seminar-barcelona-literature-culture-barcelona-spain>).

Concurrent Degree Program

BA/MSIB in Spanish

This program is designed for students who wish to combine their BA in Spanish for the professions with a one-year MS in international business (MSIB) from the University of Colorado Denver. Students seeking this option should complete the Leeds Business Minor.

Students apply for the MSIB program during their third year by declaring their intention to the Spanish for the professions faculty director, submitting the standard MSIB application forms, and completing admissions requirements, which include the GMAT (Graduate Management Admissions Test). Students are notified of acceptance to the program before the start of their fourth year. Students must have at least a 3.00 GPA to be considered for admission.

Requirements

General Requirements

The following requirements apply to all program tracks.

The College of Arts and Sciences does not allow more than 45 credit hours in any one discipline to be counted toward the 120 credit hours required for a BA degree. This rule does not mean that a student may not take more than 45 credit hours in Spanish, but rather that one must have at least 75 credit hours in courses other than Spanish. PORT 2120 will be accepted as partially fulfilling upper-division courses in other foreign languages.

To fulfill the requirements for any major track, students must complete at least 12 upper-division credits at CU Boulder. For Spanish Language and Literature and the Spanish and Portuguese Language and Culture, 9 of the 12 credits must be from the major works/trends courses listed (SPAN 4150 or SPAN 4160, and SPAN 4170 or SPAN 4180) and SPAN 3100. For the Spanish for the Professions major, students must take at least 2 of the 3000-level profession courses and SPAN 4070 and SPAN 3100 on the Boulder campus. Please see the Program Tracks tab for the specific requirements for each track.

No more than 3 independent study credit hours may count toward the major. No grade lower than a C- will be counted in the major requirements. The ancillary GPA (made up of the combined grades from area courses) must be at least 2.00.

Please note that students seeking Colorado State Teaching Certification should complete the Spanish Language and Literature Track. Students seeking teaching certification in Spanish must take certain classes. For full requirements, please contact the advisor for the Secondary Spanish Teaching Certificate program in the department.

Students must complete the general requirements of the College of Arts and Sciences and the required courses. All Spanish majors are encouraged to consult with Spanish and Portuguese Department

professional advisor (<http://www.colorado.edu/mycuhub>) before they register each semester.

Latin American Literature and Culture Course		3
SPAN 4170	Major Works/Trends in Literature and Culture in Latin America Up to the 19th Century	
or SPAN 418	Major Works and Trends in Literature and Culture in Latin America: 1900-Present	
SPAN or PORT Elective. Upper division (3xxx/4xxx) SPAN or PORT literature, culture and/or language.		3
Total Credit Hours		35

NOTE: Directly-related courses outside of the department, such as ANTH 4730, may replace 3 hours of Spanish or Portuguese elective credits. These courses must be pre-approved by the department.

Native speakers of Portuguese, and in general, all students whose Portuguese skills are beyond the PORT 2120 level, are not required to take Portuguese lower-division courses. However, students have to make up these credit hours by taking 6 hours of upper-division SPAN or PORT courses or any related courses outside the department. Related courses must be approved by the department.

Spanish for the Professions Track

The department offers an interdisciplinary major in Spanish for the Professions, which includes the completion of 12 credits in a professional field, in a second major or in a second degree. It offers students numerous career possibilities, both in government and private industry at home and abroad. Those choosing this major are not able to enter the CU Boulder graduate program in Spanish without fulfilling the requirements in the language and literature major.

NOTE: Prerequisites for the program include sufficient Spanish to be admitted to 3000-level courses and any pertinent prerequisites for the 12 credits in the professional field. SPAN 4070 must be taken at CU Boulder.

Code	Title	Credit Hours
Professional Spanish Courses ¹		9
Choose three of the following:		
SPAN 3030	Professional Spanish for Business 1

Portuguese - Minor

The Portuguese minor focuses on Brazilian Portuguese, but provides the students with knowledge of the Portuguese-speaking world and the relations between the different national contexts where the language is spoken. The courses were designed to cover a variety of topics that are relevant to Brazil and other Portuguese-speaking countries. Students acquire a wider comprehension of Portuguese in a multi-cultural context.

The topics of the courses range from language to literature, from academic writing to performing arts; from sixteenth century letters on colonial issues to contemporary issues of biodiversity; from documentary films to soap operas; from nineteenth century Brazilian opera to twenty-first century *funk ostentação*.

The professors in the Portuguese program incorporate their international research into their teaching. The innovative pedagogical approaches aim at students' cultural intelligence, more than just language fluency.

Declaration of a minor is open to any student enrolled at CU Boulder, regardless of college or school.

Requirements

Declaration of a minor in Portuguese is open to any student enrolled at CU Boulder, regardless of college or school. To declare the Portuguese Minor make an appointment with the Spanish and Portuguese Department Professional Advisor (<http://www.colorado.edu/mycuhub>).

The Minor in Portuguese consists of 18 credit hours, at least nine of which must be upper-division credit hours. A grade of C- or better is required for a course to apply to the minor requirements, and a cumulative GPA in all Portuguese courses of at least 2.0 is required for completion of the minor.

Transfer credit must be approved by the Associate Chair for Undergraduate Studies. A maximum of two courses can be taken abroad; this may be in addition to transfer credits. Study Abroad courses must be approved; contact the Spanish and Portuguese Department Professional Advisor (<http://www.colorado.edu/mycuhub>) to begin the process.

Required Courses and Credit Hours

Total Credit Hours		18

Spanish - Minor

The Department of Spanish and Portuguese's minor in Spanish will help students gain an understanding of the Spanish language, as well as a grasp of main cultural concepts, practices and current literary and cultural trends.

In a global economy and competitive market environment, a Spanish minor adds value to an existing CU degree. Cultural and linguistic competence broadens a student's understanding of the nuances and complexities of today's world. Spanish, Portuguese and English are the most spoken languages in the Western Hemisphere.

Requirements

The minor in Spanish consists of 20 credit hours, including a total of 17 upper-division credit hours.. A maximum of 9 credits, with no more 6 upper-division credits, can be transferred from other US institutions toward the minor. A maximum of 6 credits can be taken abroad; this may be in addition to transfer credits.

Required Courses and Credit Hours

Code	Title	Credit Hours
Required Courses		
SPAN 2120 or SPAN 2150	Second-Year Spanish 2 ¹ Intensive Second-Year Spanish	3
SPAN 3000	Advanced Spanish Language Skills ²	5
Electives		
Twelve upper-division credits from any course offered by the department and taught in Spanish ³		12

¹ If students take SPAN 2150 instead of SPAN 2120, only 3 out of the 5 credits from SPAN 2150 will be counted toward the minor.

- ² Students who test into SPAN 3000 (i.e., who do not need to take SPAN 2120) must take 15 upper-division elective credits instead of 12.
- ³ Courses below SPAN 2120 do not count toward the minor, nor does SPAN 3001. SPAN 3100 is not required for the minor, but it is a prerequisite for all 4000-level literature courses.

Speech, Language and Hearing Sciences

The undergraduate program in speech, language and hearing sciences (SLHS) introduces concepts basic to human communication and provides opportunities for students to acquire an understanding of normal and disordered speech, language and hearing processes. The curriculum for the undergraduate degree in SLHS provides a strong academic foundation for students interested in a wide variety of careers related to the fields of disabilities, healthcare, and education. Additionally, it provides the appropriate undergraduate background for students interested in continuing onto graduate school in speech pathology, audiology and/or special education.

The undergraduate degree in speech, language and hearing sciences emphasizes knowledge of:

- the anatomy of the speech and hearing mechanisms, as well as the processes of speech production, transmission and reception;
- the development of language;
- scientific methods used in investigating speech/language/learning and hearing processes;
- the etiologies, characteristics and treatments of speech/language/learning and hearing disorders; and
- the role of the professional speech-language pathologist and audiologist, including the scientific traditions of the discipline and the ethical issues in providing service to individuals with communication disorders.

In addition, students completing the degree in speech, language and hearing sciences are expected to acquire the ability and skills to:

- express themselves effectively both orally and in written scientific and clinical discipline-specific reports;
- critically evaluate literature in the discipline; and
- analyze the acoustic output of the speech production process auditorily and/or instrumentally.

Course code for this program is SLHS.

Bachelor's Degree

- Speech, Language and Hearing Sciences - Bachelor of Arts (BA) (p. 577)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Arehart, Kathryn H (https://experts.colorado.edu/display/fisid_105561)
Professor; PhD, University of Washington

Courses

SLHS 1010 (3) Disabilities in Contemporary American Society

Addresses the issue that 50 percent of all individuals experience disability in their lifetime. Introduces students to the social, cultural, psychological, economic, political, legal, and health-care issues related to society and individuals with disabilities.

Additional Information: Arts Sci Core Curr: Contemporary Societies
Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Didactic: All-Department

SLHS 2000 (3) Introduction to Communication Disorders

Surveys communication disorders, including hearing impairments, learning disabilities, and speech-language disorders, as well as an introduction to basic speech and hearing science.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Didactic: All-Department

SLHS 2010 (3) Science of Human Communication

Discusses how human communication (the process by which a thought is transmitted from the brain of a speaker to the brain of a listener) involves a complex interaction of acoustics, anatomy, physiology, neurobiology, and psychology.

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences
Departmental Category: Didactic: All-Department

SLHS 2305 (4) American Sign Language 1

Introduces basic sign vocabulary, grammatical structures of ASL, and the culture of deaf people. Classes are taught using ASL without the use of spoken English.

Additional Information: Arts Sci Core Curr: Foreign Language
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Foreign Language
Departmental Category: American Sign Language

SLHS 2315 (4) American Sign Language 2

Develops more complex vocabulary and grammatical structures, and an understanding of deaf culture. Classes are taught using ASL without the use of spoken English.

Requisites: Requires a prerequisite course of SLHS 2305 (minimum grade C-).

Additional Information: Arts Sci Core Curr: Foreign Language
Arts Sci Gen Ed: Foreign Language
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: American Sign Language

SLHS 2325 (4) American Sign Language 3

Continuation of SLHS 2315. Covers ASL literature, advanced grammatical structures, idiomatic expressions, and deaf culture.

Requisites: Requires a prerequisite course of SLHS 2315 (minimum grade C-).

Additional Information: Arts Sci Core Curr: Foreign Language
Arts Sci Gen Ed: Foreign Language
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: American Sign Language

SLHS 3003 (3) Cognitive Science

Introduces cognitive science, drawing from psychology, philosophy, artificial intelligence, neuroscience, and linguistics. Studies the linguistic relativity hypothesis, consciousness, categorization, linguistic rules, the mind-body problem, nature versus nurture, conceptual structure and metaphor, logic/problem solving and judgment. Emphasizes the nature, implications and limitations of the computational model of mind.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 3702 and LING 3005 and PHIL 3310 and PSYC 3005

Recommended: Prerequisites two of the following CSCI 1300 or LING 2000 or PHIL 2240 or PSYC 2145.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Distribution-Social Sciences

SLHS 3006 (3) Phonetics

Focuses on production of speech sounds, transcribing speech using the International Phonetic Alphabet, analyzing the acoustic properties of speech sounds, understanding how speech sounds vary depending on the context. Provides a foundation for understanding normal and atypical speech development, atypical speech problems and patterns, regional and foreign accents, and speech recognition by computers.

Requisites: Requires a prerequisite course of LING 2000 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Didactic: Speech-Hearing Science

SLHS 3014 (3) Hearing Loss Epidemiology

Introduces students to basic epidemiological concepts related to hearing loss. Provides an overview of the hearing mechanism, assessment and identification of hearing loss, prevalence of hearing disorders, treatment and intervention. Noise pollution, aging and toxic agents are discussed. Focuses on risk factors for hearing impairment and comorbidities.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Didactic: Audiology

SLHS 3106 (3) Hearing Science

Focuses on the three main aspects of the hearing process: sounds in the environment (physical acoustics), sounds encoded within the auditory system (physiological acoustics) and perception of sound (psychological acoustics).

Requisites: Requires a prerequisite course of SLHS 2010 (minimum grade C-). Restricted to Speech, Language and Hearing Sciences (SLHS) undergraduate or master's students or Audiology (AUDD) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Departmental Category: Didactic: Speech-Hearing Science

SLHS 3116 (3) Speech Science

Provides a basic understanding of the structural organization (anatomy), function (physiology), and neural controls of the structures used to produce speech, swallowing, respiration, and related behaviors in humans.

Requisites: Requires a prerequisite course of SLHS 2010 (minimum grade C-).

Recommended: Prerequisite SLHS 3106.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Departmental Category: Didactic: Speech-Hearing Science

SLHS 4000 (3) Multicultural Aspects of Communication Differences and Disorders

Examines perceptions and attitudes regarding differences in communication as a function of cultural-linguistic diversity. Discusses implications of differing verbal and nonverbal communication styles of various cultural groups in terms of professional responsibilities.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite upper-division standing and a minimum of 60 credit hours.

Additional Information: Departmental Category: Didactic: All-Department

SLHS 4100 (1-3) Special Topics in Speech, Language, and Hearing Sciences

Studies selected topics in speech, language, hearing sciences, communication disorders, and other professional issues.

Additional Information: Departmental Category: Didactic: All-Department

SLHS 4502 (3) Language Disorders: Child and Adult

Language disorders can result from problems with cognitive, linguistic, and/or discourse processing. The theoretical framework of language dysfunction is addressed while drawing upon real clinical examples of language disorders that have been observed in children and adults.

Requisites: Requires a prerequisite or corequisite course of SLHS 4560 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Didactic: Speech-Language Pathology

SLHS 4512 (3) Speech Disorders: Voice, Cleft Palate, Motor Disorders, Stuttering

Provides students with an introductory understanding of specific speech disorders including voice disorders, neurogenic speech disorders, articulation and phonological disorders and craniofacial disorders in children and adults.

Requisites: Requires a prerequisite course of SLHS 2010 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Didactic: Speech-Language Pathology

SLHS 4560 (3) Language Development

Covers the development of language in childhood and into adult life, emphasizing the role of environment and biological endowment in learning to communicate with words, sentences, and narratives.

Equivalent - Duplicate Degree Credit Not Granted: LING 4560 and PSYC 4560

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) undergraduate or master's students or Audiology (AUDD) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Didactic: All-Department

SLHS 4576 (3) Communication Neuroscience

Provides an introduction to neuroscience with an emphasis on the systems that support human communication including speech perception and production, language, memory and cognition. Topics areas will include auditory processing, language, memory and motor systems. Development of brain systems and structures will be explored, as well as neurologically based disorders. Neuroscientific methods surveyed will include MRI, fMRI, EEG, MEG, NIRS, lesion studies and electrophysiology.

Requisites: Requires a prerequisite course of SLHS 2010 or NRSC 2100 (both minimum grade C-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

SLHS 4704 (3) Audiological Evaluation

Studies basic principles and techniques of hearing evaluation, including pure-tone, speech, immittance, and advanced audiometry; hearing conservation in hospital, school, and industrial settings; and identification and evaluation of auditory pathologies. Required projects in screening and pure-tone audiometry.

Requisites: Requires a prerequisite course of SLHS 3106 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Departmental Category: Didactic: Audiology

SLHS 4714 (3) Audiological Rehabilitation

Covers basic principles and techniques related to the habilitation and rehabilitation of individuals who are deaf or hard of hearing: amplification, speech, language, auditory, speech reading, and educational issues.

Requisites: Requires prerequisite courses of LING 3100 or SLHS 3006. Requires a prerequisite or corequisite course of SLHS 4704 (all minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Didactic: Audiology

SLHS 4849 (1-6) Independent Study for Undergraduates

Instructor consent required.

Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Independent Study

SLHS 4918 (2) Introduction to Clinical Practice

Introduces students to the clinical processes and key components of assessment and interventions. Explores the applications of the theoretical and scientific information to clinical settings. Students complete supervised observation of individuals with communication challenges.

Requisites: Requires a prerequisite course of SLHS 2000 (minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Speech, Language and Hearing Sciences (SLHS) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Practica

SLHS 4938 (1-6) Internship: Speech-Language Intervention

Provides a supervised clinical experience with children who have communication challenges enrolled in the Child Learning Center programs; individuals demonstrating communication disorders as a cotherapist in the Speech, Language, and Hearing Center; or off-campus experience in an affiliated hospital or public school program. Instructor consent required.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Practica

Speech, Language and Hearing Sciences - Bachelor of Arts (BA)

The undergraduate major in speech, language and hearing sciences (SLHS) at CU Boulder includes course work in three general areas:

- characteristics, causes and treatment of disorders that impact speech, language and/or hearing (e.g., stuttering, head injury, deafness, autism, learning disabilities, etc.),
- the science behind human communication (e.g., the anatomy and physiology of the speech and hearing mechanisms, acoustics of sound, etc.), and

- linguistics, specifically the normal development of language in children, phonetic transcription and the various component parts of language.

The program leads to a Bachelor of Arts (BA) degree. In addition to learning in the classroom about normal and disordered communication, students will observe graduate students and professionals engaged in clinical work with individuals exhibiting speech, language, learning and hearing problems. Internships are optional but are encouraged throughout a student's program.

Requirements

Program Requirements

Students must complete the general requirements of the College of Arts and Sciences and the required courses listed below. The major includes 35 credit hours of required course work plus a 3-credit course in general psychology.

Required Courses and Credits

Code	Title	Credit Hours
Required Courses		
LING 2000	Introduction to Linguistics	3
LING 3100	Language Sound Structures	3
SLHS 2000	Introduction to Communication Disorders	3
SLHS 2010	Science of Human Communication	3
SLHS 3106	Hearing Science	3
SLHS 3116	Speech Science	3
SLHS 4502	Language Disorders: Child and Adult	3
SLHS 4512	Speech Disorders: Voice, Cleft Palate, Motor Disorders, Stuttering	3
SLHS 4560	Language Development	3
SLHS 4704	Audiological Evaluation	3
SLHS 4714	Audiological Rehabilitation	3
SLHS 4918	Introduction to Clinical Practice	2
Total Credit Hours		35

Required Ancillary Course

Code	Title	Credit Hours
PSYC 1001	General Psychology	3

Recommended Electives

Code	Title	Credit Hours
------	-------	--------------

The following courses are recommended, but not required:

SLHS 2305	American Sign Language 1
Speech-Language Assistant Certificate Program	

If planning to attend graduate school for SLHS, students should take one course from each of the following categories (graduate school prerequisite courses):

<i>Statistics</i>		
EDUC 4716/5716	Basic Statistical Methods	
SOCY 2061	Introduction to Social Statistics	
MATH 2510	Introduction to Statistics	

Biological Science

ANTH 2010	Introduction to Biological Anthropology 1
ANTH 2020	Introduction to Biological Anthropology 2
EBIO 1030	Biology: A Human Approach 1
EBIO 1040	Biology: A Human Approach 2
EBIO 1210	General Biology 1
EBIO 1220	General Biology 2
PSYC 2012	Biological Psychology

Physics or Chemistry

CHEM 1011	Environmental Chemistry 1
CHEM 1021	Introductory Chemistry
PHYS 1010	Physics of Everyday Life 1
PHYS 1020	Physics of Everyday Life 2
PHYS 1230	Light and Color for Nonscientists
PHYS 1240	Sound and Music
PHYS 1580	Energy and Interactions

Graduating in Four Years

Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of "adequate progress" as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress in the Department of Speech, Language and Hearing Sciences students should meet the following requirements:

- Declare the major by the beginning of the sophomore year
- Complete prerequisite courses—LING 2000, SLHS 2010 and PSYC 1001—by the end of spring semester of sophomore year.

Recommended Four-Year Plan of Study

Through the required course work for the major, students will complete all 12 credits of the Social Sciences area and all 12 credits of the Natural Sciences area of the Gen Ed Distribution Requirement.

Course	Title	Credit Hours
Year One		
Fall Semester		
SLHS 2000	Introduction to Communication Disorders	3

Theatre & Dance

The Department of Theatre and Dance offers undergraduate and graduate degrees in both theatre and dance, a Master of Fine Arts in experience design (p. 1196) and a graduate certificate in applied Shakespeare (<http://www.colorado.edu/connect/certificate-programs/applied-shakespeare>). These programs combine traditional studies with practical training. Ambitious seasons of theatre productions and dance concerts feature student performers, designers, directors, choreographers and guest artists of national and international fame whom often participate in curricular and extracurricular activities.

Recent guests have included Ralph Lemon, Ana Prada, Asia One, Teena Marie Custer, Nina Flagg, Nina Martin, Millicent Johnnie, Ananya Chatterjea, Maria Bauman, Jane Hawley, Tim O'Donnel, Ms. Prissy, April Rose, Chris Aiken and Angie Hauser, Art Bridgman/Myrna Packer, Rennie Harris, Heidi Henderson, Kathleen Hermesdorf, Deborah Jowitt, Darrell Jones, Susan Marshall & Co., Bebe Miller, David Dorfman, Joe Goode, Kevin Wynn, John Scott and Shelley Senter in dance; Lisa Wolpe, Jennifer Hubbard, Geoffry Kent, Eric Van Baars, Silvia Gregory, Gary John LaRosa, Ami Dayan, Terry Berliner, Lee Blessing, Jill Dolan, Elizabeth Dowd, Melanie Marnich, Jim Moody, Tim Miller, Holly Hughes, Jane Page, Joan Schirle, Karen Finley and Mark Medoff in theatre.

Students interested in theatre and dance are urged to consult with an advisor in the appropriate field to obtain both advice and the most current information concerning program opportunities and expectations.

Course codes for this department are THTR, DNCE, TDXD and THDN.

Bachelor's Degrees

- Dance - Bachelor of Arts (BA) (p. 590)
- Dance - Bachelor of Fine Arts (BFA) (p. 593)
- Theatre - Bachelor of Arts (BA) (p. 595)
- Theatre - Bachelor of Fine Arts (BFA) (p. 597)

Minors

- Dance - Minor (p. 601)
- Theatre - Minor (p. 602)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Courses

Dance

DNCE 1000 (2) Beginning Contemporary Dance Technique

Introduces students to the dynamic capabilities of the body as an articulate means of expression. Presents basic concepts and skills from contemporary dance forms that may include Afro-modern, floor work, inversion, classical modern and improvisation. Classwork develops efficient alignment, strength, flexibility, coordination, rhythm, dynamics and spatial awareness. No experience necessary.

Repeatable: Repeatable for up to 4.00 total credit hours.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Nonmajor Technique

DNCE 1012 (2) Dance Production

Provides the dancer with an introduction to the types of performance venues available today, and their technical systems and equipment. It will also establish an awareness of how technical theatre design arts may be utilized by a choreographer.

Requisites: Restricted to Dance (DNCE or DBFA, excludes DNCE-MIN) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Production

DNCE 1013 (2) Dance Improvisation

An opportunity for students to develop skills of dance improvisation through the exploration of structured movement problems. Students study selected contemporary dance artists whose work stresses improvisation in performance and/or as a training vehicle. Department consent required for dance minors.

Requisites: Restricted to Dance (DNCE or DBFA, excludes DNCE-MIN) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Creative Process

DNCE 1017 (3) Dance in Popular Culture and Media

Explores and contextualizes contemporary popular culture and dance. Introduces methods of critical analysis that reveal the rich heritage hidden within and around the dances students commonly encounter at the club, on the street, on television, on the big screen and elsewhere in everyday life. Through watching, reading, and discussion, students discover new meaning in their lived cultural experience.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Dance and Cultural Studies

DNCE 1020 (1) Beginning Contemporary Dance with Experience

Invites students to deepen their somatic awareness, efficient athleticism, and creative voice through the medium of contemporary dance.

Continues the investigation of contemporary dance forms that may include Afro-modern, floor work, inversions, classical modern, and improvisation. Classwork will deepen students' alignment, strength, flexibility, coordination, rhythm, dynamics and spatial awareness.

Repeatable: Repeatable for up to 2.00 total credit hours.

Recommended: Prerequisite DNCE 1000 or previous dance experience.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Nonmajor Technique

DNCE 1027 (3) Dance in Cultural Perception and Expression

Explores how the practice of dance can reflect, disrupt, subvert, support, and reinforce cultural expectations, norms and practices. Introduces international and domestic dance traditions and provides context for an interdisciplinary examination. Comparative readings from sociology, anthropology, gender studies, history, post-colonial studies, and political science provide a foundation to understand how cultural identities are negotiated and represented through movement.

Additional Information: GT Pathways: GT-AH1 - Arts Hum: Arts Expression
Arts Sci Core Curr: Literature and the Arts

Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Dance and Cultural Studies

Departmental Category: Asia Content

DNCE 1091 (1) Modern 1

Introduces basic skills of modern dance. In-class technique work increases muscle strength, flexibility, and coordination. Offered summers only at Perry-Mansfield Performing Arts Camp.

Repeatable: Repeatable for up to 2.00 total credit hours.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Major Technique

DNCE 1100 (1) Beginning Ballet

Introduces beginning students to fundamental aspects of classical ballet technique; no previous experience required. Basic principles of alignment, rotation, and movement quality are introduced as the building blocks for success in advanced material. Foundational movements and ballet vocabulary are learned and refined. Students work toward mastery of simple combinations and rhythmic patterns.

Repeatable: Repeatable for up to 2.00 total credit hours.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Nonmajor Technique

DNCE 1120 (1) Beginning Ballet with Experience

Relies on a demonstrated comprehension of kinesthetic and conceptual principles mastered at the beginning level. New movements from the classical ballet vocabulary are introduced with continued emphasis on alignment, rotation, and movement quality. Ballet sequences are longer and more complex.

Repeatable: Repeatable for up to 2.00 total credit hours.

Recommended: Prerequisite DNCE 1100 or previous ballet experience.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Nonmajor Technique

DNCE 1190 (1) Ballet 1

Beginning ballet covering the basic vocabulary of classical ballet technique. Offered summers only at Perry-Mansfield Performing Arts Camp.

Repeatable: Repeatable for up to 2.00 total credit hours.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Nonmajor Technique

DNCE 1200 (1) Beginning Jazz Dance

Introduces various styles of movement unique to jazz dance including improvisation, isolations, and African-influenced polyrhythms. Working within a range of dynamic performance styles, students will learn fundamental dance skills and jazz vocabulary, from which more advanced skills can be developed. Designed for students with little or no dance experience.

Repeatable: Repeatable for up to 2.00 total credit hours.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Nonmajor Technique

DNCE 1220 (1) Beginning Jazz with Experience

Digs deeper into syncopated movement style of the jazz vernacular by continuing the embodied investigation of the Africanist influence on the form. Demands a rigorous awareness of efficient alignment while engaging with complex movement and challenging rhythmic structures.

Repeatable: Repeatable for up to 2.00 total credit hours.

Recommended: Prerequisite DNCE 1200 or previous dance experience.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Nonmajor Technique

DNCE 1290 (1) Jazz 1

Introduces jazz dance, consisting of a technique warm-up, locomotion across the floor, and a series of dance phrases developed into a short dance combination. Offered summers only at Perry-Mansfield Performing Arts Camp.

Repeatable: Repeatable for up to 2.00 total credit hours.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Nonmajor Technique

DNCE 1301 (2) Hip-Hop Dance Technique 1

Introduces students to Hip-Hop dance as a culturally significant form. Students learn history, the social and political forces at work, and the fundamental techniques (Campbell Locking, Popping, Breaking etiquette/movements, Hip-Hop Party Dance and House). Intellectual challenge is offered through the lens of critical race theory and historical context. Training addresses flexibility, sequencing, coordination, and performance skills.

Repeatable: Repeatable for up to 4.00 total credit hours.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Technique

DNCE 1401 (1) Transnational Fusion Dance: USA and Middle East/North Africa

Introduces a fusion form popularized in 2000: secular dance traditions of the Middle East/North African (MENA) communities in dialog with popular dances of the hip-hop and underground electronic dance music communities. Stretching, hip work, spinal undulations and poly-rhythmic orientations are covered. Educational highlights include discourse regarding cultural appropriation and gender coding in human movement.

Repeatable: Repeatable for up to 2.00 total credit hours.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

DNCE 1411 (2) Aerial Dance Technique

Study of basic technique skills in aerial dance on single point, low-flying trapeze. Additional skills include choreographic techniques, improvisation, and a historical overview of aerial dance. Through theoretical readings and discussions, this course defines the place of aerial dance in the lineage of modern dance and addresses aesthetics, philosophical approaches to teaching, and safety issues.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

DNCE 1501 (1) Beginning Tap Technique

Introduces students to the basic steps and timing of tap technique to develop rhythm, style and clear tap sounds. Exercises focus on building flexibility of the knee and ankles, coordination and speed of movement. A variety of tap styles from Broadway to Rhythm tap will be taught.

Repeatable: Repeatable for up to 2.00 total credit hours.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Technique

DNCE 1849 (1-3) Independent Study

Involves creative or scholarly investigation of an area of interest to the student not addressed in the curriculum. Work must be arranged with and advised by a faculty member. Freshman level course.

Repeatable: Repeatable for up to 7.00 total credit hours.

Additional Information: Departmental Category: Independent Study

DNCE 1901 (1-3) Technique Practicum

Broadens students' exposure to a range of diverse movement material. Topical course in dance technique, see subtopic for specific form.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Technique

DNCE 1908 (1) First Year Dance Seminar

Designed for new dance majors as an introduction to the place of dance within academia and the professional/public spheres. Through the practice of descriptive dance writing, theoretical and physical exploration of discrete pedagogical and choreographic procedures, and interactions with in-class guest artists of different disciplines, students will engage in independent research and physical experimentation, culminating in a final personal presentation and group performance.

Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Dance (DNCE or DBFA, excludes DNCE-MIN) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Performance

DNCE 2021 (2) Major Technique

Designed for Dance majors. Enrollment by audition only.

Repeatable: Repeatable for up to 16.00 total credit hours.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Major Technique

DNCE 2091 (1) Modern 2

Continuation of Modern 1. a developmental sequence of modern dance technique designed to refine the technical/expressive skills required of the professional dancer. Offered summers only at Perry-Mansfield Performing Arts Camp.

Repeatable: Repeatable for up to 2.00 total credit hours.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Major Technique

DNCE 2098 (1) Performance/Repertory

Students learn and perform dances from the repertory of guest artists. Offered summers only.

Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Performance

DNCE 2141 (1) Low Intermediate Ballet

Builds on an existing understanding of alignment, rotation, and movement quality to introduce more mentally and physically difficult movements and enchainements of the classical ballet vocabulary. Students must be able to demonstrate an embodied familiarity with all traditional barre exercises on the first day of class.

Repeatable: Repeatable for up to 2.00 total credit hours.

Recommended: Prerequisite DNCE 1120 or previous ballet experience.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Technique

DNCE 2191 (1) Ballet 2

Intermediate ballet, covering the complete vocabulary of classical ballet technique. Enchainements are of complex structure. Offered summers only at Perry-Mansfield Performing Arts Camp.

Repeatable: Repeatable for up to 2.00 total credit hours.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Major Technique

DNCE 2290 (1) Jazz 2

Continuation of Jazz 1. Studies coordination, rhythm, style, and advanced body part isolation in depth. Offered summers only at Perry-Mansfield Performing Arts Camp.

Repeatable: Repeatable for up to 2.00 total credit hours.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Nonmajor Technique

DNCE 2501 (2) African Dance

Explores the technique, styles, and rhythms of regional and national cultures of Africa. Areas of concentration may vary each semester (e.g. Ghana, Mali, Guinea, etc.). Introduces signature attributes common to different countries' dance traditions and features discussions of the musical traditions, histories, cosmologies, philosophies and aesthetics to contextualize and increase familiarity.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Technique

DNCE 2701 (2) Contact Improvisation 1

Investigates movement vocabulary and kinesthetic understanding through physical contact and weight-sharing between two or more dancers. Fundamental skills of contact will be introduced and employed in duets and larger group improvisations: rolling, falling, giving and receiving weight, and the use of momentum and gravity.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Major Technique

DNCE 2849 (1-3) Independent Study

Involves creative or scholarly investigation of an area of interest to the student not addressed in the curriculum. Work must be arranged with and advised by a faculty member. Sophomore level course.

Repeatable: Repeatable for up to 7.00 total credit hours.

Additional Information: Departmental Category: Independent Study

DNCE 2901 (1-3) Technique Practicum 2

Topical course (second level) in dance technique, see subtopic for specific form. May require an audition.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Major Technique

DNCE 2909 (1-4) Special Topics

Explores topics and research in relation to areas such as technology, environment, teaching methods, performance, world dance, arts in society, and/or criticism that the normal sequence of offerings may not allow.

Equivalent - Duplicate Degree Credit Not Granted: DNCE 4909 and DNCE 5909

Repeatable: Repeatable for up to 7.00 total credit hours.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Independent Study

DNCE 3001 (2) Intermediate/Advanced Contemporary Dance Technique

Challenges intermediate and advanced students to refine their understanding and personal approach to the study of international contemporary dance. Demands a deep sense of somatic awareness, efficient athleticism, and creative voice. Floor work, inversions, and improvisation may be included. No audition required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Recommended: Prerequisite DNCE 1000 or DNCE 1020 or any major technique course ending in "1" or previous dance experience.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Technique

DNCE 3005 (3) Movement Awareness and Injury Prevention for the Dancer

Advances safe and effective dance practices supporting longevity and wellness. Areas explored include experiential anatomy, conditioning, alignment, nutrition, injury prevention, care of common dance injuries, and experience with various somatic practices. Instructor approval required to enroll if outside dance major or minor. Formerly DNCE 2005.

Requisites: Restricted to Dance (DNCE or DBFA) majors or minors only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Somatic Awareness

DNCE 3014 (2) Inside the Groove: Developing Rhythmic Skills

Enhances rhythmic acuity through intensive rhythmic drills, analytical listening, drumming, notating and creating rhythm-based performance work. Course material explores non-Western rhythmic paradigms, irregular meters, mixed meters, polyrhythms, etc., and how to communicate clearly with a live accompanist in technique class.

Requisites: Restricted to Dance (DNCE or DBFA) majors or minors only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Music

DNCE 3024 (2) SOUND Choices: Enhancing the Music/Dance Relationship

Examines how musical choices can profoundly affect audiences, dancers and the creative process. Surveys historic and contemporary music styles and influential artists through guided listening and experimentation. Deepens understanding of music, including vocabulary, technology, collaboration skills, ethics, and copyright issues.

Requisites: Restricted to Dance (DNCE or DBFA) majors or minors only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Music

DNCE 3033 (3) Choreographic Resources

Explores movement invention and strategies of choreographic manipulation of body, space and time. Students add to their toolbox of compositional resources through solo and duet studies. Class interrogates and supports the students' developing language for addressing, critiquing and comprehending compositional choices and structures through verbal and written feedback practice. Can be taken out of sequence with DNCE 3043. Formerly DNCE 2033.

Requisites: Requires a prerequisite course of DNCE 1013 and DNCE 2021 or DNCE 3041 or DNCE 4061 (minimum grade C-). Restricted to Dance (DNCE or DBFA, excludes DNCE-MIN) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Creative Process

DNCE 3035 (1) Production Practicum

Practical production activities and projects within a designated area of dance design, stage technology, or stage management, normally related to the department's season. Instructor consent required.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Production

DNCE 3041 (2) Major Technique

Designed for dance majors. Enrollment by audition only.

Repeatable: Repeatable for up to 16.00 total credit hours.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Major Technique

DNCE 3043 (3) Choreographic Process

Examines physical and spatial relationships via group and site specific work. New methods of creative problem solving unearth and mine one's imagination and inspiration, cultivating the individual's unique process of dance-making. Class interrogates and supports students' developing language for addressing, critiquing and comprehending compositional choices and structures through verbal and written feedback practice. Can be taken out of sequence with DNCE 3033.

Requisites: Requires prerequisite courses of DNCE 1013 and DNCE 2021 or DNCE 3041 or DNCE 4061 (all minimum grade C-). Restricted to Dance (DNCE or DBFA, excludes DNCE-MIN) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Creative Process

DNCE 3101 (1-3) Ballet Practicum

Practical studio training in ballet at the advanced/professional level with a professional company. Designed for dance majors. Enrollment by audition only.

Repeatable: Repeatable for up to 4.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires a prerequisite course of DNCE 2141 or DNCE 3161 or DNCE 4181 (minimum grade C-).

Additional Information: Departmental Category: Major Technique

DNCE 3161 (1) Intermediate Ballet

Surveys a wide range of the intermediate-level classical ballet vocabulary, focusing on an anatomically sound approach to the material. Students must work efficiently to execute the technique with rhythmic accuracy, clarity of line, propriety of style, and fluency in translating names of steps. Enrollment by audition only.

Repeatable: Repeatable for up to 8.00 total credit hours.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Technique

DNCE 3241 (1) Intermediate Jazz

Expands student's performance of the syncopated movement style of the jazz vernacular. Designed for the experienced jazz dancer. Includes dance techniques that further improves alignment, strength, flexibility, and coordination within the jazz idiom through an emphasis on style, rhythm, and more challenging dance combinations.

Repeatable: Repeatable for up to 2.00 total credit hours.

Recommended: Prerequisite DNCE 1220 or previous dance experience.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Technique

DNCE 3301 (2) Hip-Hop Dance Technique 2

Builds on fundamentals established in Hip-Hop Dance Technique 1. Students deepen their understanding of Hip-Hop history through fundamental movement techniques, specifically, House, and study the social/political forces at work. The course focuses on increasing dancers' capacity for variation, sequencing, musicality and free-styling in Hip-Hop dance. Enrollment by audition only. Meets with DNCE 5331.

Repeatable: Repeatable for up to 4.00 total credit hours.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Technique

DNCE 3601 (2) Alexander Technique for Actors and Dancers

Studies how human reaction, coordination, and movement play a role in all activities. Through in-depth class discussions, movement, exploration, and individualized hands-on lessons, actors and dancers gain an understanding of the technique and its benefits to performance. Meets with DNCE 5601.

Requisites: Restricted to Dance (DNCE or DBFA, excludes DNCE-MIN) or Theatre (THTR or TBFA, excludes THTR-MIN) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Technique

DNCE 3849 (1-3) Independent Study

Involves creative or scholarly investigation of an area of interest to the student not addressed in the curriculum. Work must be arranged with and advised by a faculty member. Junior level course.

Repeatable: Repeatable for up to 7.00 total credit hours.

Additional Information: Departmental Category: Independent Study

DNCE 3901 (1-3) Technique Practicum

Topical course (intermediate level) in dance technique. See subtopic for specific form. May require an audition.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Technique

DNCE 4012 (1) Concert Production

Provides practical experience in producing formal and informal dance concerts. Introduces basic familiarity with production and promotional responsibilities, backstage and front-of-house duties and procedures. Meets with DNCE 5012.

Requisites: Requires a prerequisite course of DNCE 1012 (minimum grade C-). Restricted to Dance (DNCE or DBFA, excludes DNCE-MIN) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Major Technique

DNCE 4015 (3) Movement Analysis

Introduces Rudolf Laban's theories of movement and exposes several body therapies to heighten students' awareness of movement as a multifaceted (neuromuscular/spatial/dynamic) event. Emphasizes refinement of movement, observation skills, and improvement of performance. Meets with DNCE 5015.

Requisites: Restricted to Dance (DNCE or DBFA, excludes DNCE-MIN) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Movement Awareness Injury Prevent for the Dancer

DNCE 4016 (3) Creative Dance for Children

Methods course for prospective teachers of creative dance for children. Lectures, readings and laboratory experiences are followed by observation and teaching in primary grades.

Equivalent - Duplicate Degree Credit Not Granted: DNCE 5016

Requisites: Requires a prerequisite course of DNCE 2033 (minimum grade C-). Restricted to Dance (DNCE or DBFA, excludes DNCE-MIN) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Pedagogy

DNCE 4017 (3) Dancing Histories: Sex, Gender and Race in U.S. Concert Dance

Traces the evolution of American concert dance through roots in select dance forms, including dances of the African Diaspora, Ballet, Social Dance, Jazz, Modern, and Folklorico. Studies specific dance artists against the backdrop of social, political, economic, and environmental issues.

Equivalent - Duplicate Degree Credit Not Granted: DNCE 5017

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite or corequisite a Human Diversity core requirement course.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Dance and Cultural Studies

DNCE 4023 (2) Performance Improvisation Techniques

Explores movement and vocal improvisational techniques to enhance creative, interdisciplinary, collaborative and performance skills. Helps individuals expand their definition of performance, discover and access the diversity of the human instrument and employ improvisation to create personal and social commentary.

Equivalent - Duplicate Degree Credit Not Granted: DNCE 5023

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Creative Process

DNCE 4036 (3) Dance Teaching Practices: Inclusive Approaches to Instruction

Examines legal, practical, pedagogical and philosophical issues in current dance education. Goals and content of professional and recreational dance training are considered and strategies for effective teaching practice are discussed. All genres of dance may be utilized depending on the specialities of participants.

Equivalent - Duplicate Degree Credit Not Granted: DNCE 5036

Requisites: Restricted to Dance (DNCE or DBFA, excludes DNCE-MIN) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Pedagogy

DNCE 4037 (3) Contemporary Concert Dance: Shifting Perspectives in Performance

Focuses on the development of perceptual, descriptive, and analytical skills as well as the ability to apply cultural and critical theory to 20th and 21st century concert dance. Specific pieces of choreography are looked at from a broad range of perspectives.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite or corequisite a Human Diversity core requirement course.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Dance and Cultural Studies

DNCE 4038 (1-3) Dance Repertory

Learning and performing dances from the repertory of current faculty members, artists-in-residence and upon occasion from the repertory of historic modern dancers. Dance majors may repeat up to 9 total credit hours with different instructors. Enrollment by audition only.

Equivalent - Duplicate Degree Credit Not Granted: DNCE 5038

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Performance

DNCE 4046 (1) Teaching Practicum

Designed to give students supervised practical teaching skills through practice teaching, discussion, observation (in-person and video), reflection and feedback. Students will develop age appropriate lesson plans, define and refine principles of classroom management and understand the needs of diverse groups of students in a community, academic (K-12) and/or studio setting. All genres of dance are topic relevant.

Requisites: Requires a prerequisite course of DNCE 4036 (minimum grade C-). Restricted to Dance (DNCE or DBFA, excludes DNCE-MIN) majors only.

Additional Information: Departmental Category: Pedagogy

DNCE 4047 (3) Hip-Hop Dance History

Addresses the origin and evolution of American Hip-Hop dance rooted in a theoretical structure that springs from the elemental nature of the African Diaspora. Emphasis placed on the social, political, and economic environment in which it was fashioned. Pioneers, innovators, terminology, and styles will be identified. Course includes lectures, readings, audio/video analysis and discussion. Meets with DNCE 5047.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Dance and Cultural Studies

DNCE 4053 (3) Advanced Dance Composition

Focuses on deepening the artistic voice and engaging with other art forms. Students explore the integration of technology and collaboration in creative projects and continue to engage in an objective critical process of their own work and the work of others. Meets with DNCE 5053.

Requisites: Requires a prerequisite course of DNCE 3043 (minimum grade C-). Restricted to Dance (DNCE or DBFA, excludes DNCE-MIN) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Creative Process

DNCE 4061 (2) Major Technique

Designed for dance majors. Enrollment by audition only.

Repeatable: Repeatable for up to 16.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Major Technique

DNCE 4128 (1) Ballet Repertory

Develops understanding of the ballet canon through practice of major solos from Romantic, Classical, and New-Classical ballets. For the advanced classical ballet student. Enrollment by audition only. Meets with DNCE 5128.

Repeatable: Repeatable for up to 2.00 total credit hours.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Performance

DNCE 4181 (1) Advanced Ballet

Investigates the full range of the advanced-level classical ballet vocabulary, focusing on an anatomically sound approach to the material. Exercises require strength and a deeply subtle understanding of principles of alignment, rotation, epaulement, and movement quality. Class moves quickly through enchainements of complex structure. Enrollment by audition only.

Repeatable: Repeatable for up to 8.00 total credit hours.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Technique

DNCE 4261 (1) Advanced Jazz Dance Technique

Refines advanced students' approach to the nuances and virtuosity of jazz idiom. Emphasis is placed on efficient use of alignment, complex polyrhythmic explorations and improvisations, and dynamic performance style. Class moves quickly through material and demands a high level of proficiency. Enrollment by audition only. Meets with DNCE 5261.

Repeatable: Repeatable for up to 4.00 total credit hours.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Technique

DNCE 4701 (2) Contact Improvisation 2

Builds upon skills introduced in DNCE 2701 and moves into more rigorous exploration of weight sharing principles. Emphasis will be placed on ease and efficiency in partnering, and integrating this work into choreography and performance. Meets with DNCE 5701.

Requisites: Requires a prerequisite course of DNCE 2701 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Major Technique

DNCE 4849 (1-3) Independent Study

Involves creative or scholarly investigation of an area of interest to the student not addressed in the curriculum. Work must be arranged with and advised by a faculty member. Senior level course.

Repeatable: Repeatable for up to 7.00 total credit hours.

Additional Information: Departmental Category: Independent Study

DNCE 4909 (1-4) Special Topics

Explores topics and research in relation to areas such as technology, environment, teaching methods, performance, world dance, arts in society, and/or criticism that the normal sequence of offerings may not allow.

Equivalent - Duplicate Degree Credit Not Granted: DNCE 2909 and DNCE 5909

Repeatable: Repeatable for up to 7.00 total credit hours.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Independent Study

DNCE 4919 (1-3) Dance Practicum

Project in dance under supervision of senior faculty.

Equivalent - Duplicate Degree Credit Not Granted: DNCE 5919

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Independent Study

DNCE 4939 (1-3) Dance Internship

Provides an opportunity for upper-division dance majors to serve apprenticeships in the community in work areas related to their major interests and career goals. Internships are available in areas such as arts administration, dance therapy, and technical production. Instructor consent required.

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Independent Study

Theatre

THTR 1003 (3) Acting 1: Introduction to Acting

Introductory course designed to explore creativity, collaboration and communication in the craft of acting. Focuses on basic terms and concepts of psychological realism fundamental to the actors' process through solo work and ensemble exercises. Open to majors and non-majors.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Performance

THTR 1009 (3) Theatre and Society

Explores the importance of telling (and listening) to stories from the stages of the world; in theatre we learn what people value in their time and place. Investigates the range of genres of theatre in today's society and how theatrical artwork is devised and presented. Ideal for non-majors.

Additional Information: GT Pathways: GT-AH1 - Arts Hum: Arts Expression
Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Special Courses in Theatre

THTR 1011 (3) Global Theatre 1: Live Performance to Shakespeare

Travels across four continents exploring live performance from the beginning of recorded history to Shakespeare through various forms of theatrical storytelling including masked dramas, shadow puppets, kabuki, passion plays and commedia.

Additional Information: GT Pathways: GT-AH1 - Arts Hum: Arts Expression
Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: History/Dramaturgy/Directing

THTR 1019 (3) Script Laboratory: Text Analysis and Practice for the Theatre

Introduces fundamental methods of text analysis for performance. Equips theatre makers with common vocabulary and concepts to more effectively communicate when collaborating with other artists. Provides tools for analyzing any narrative art form.

Requisites: Restricted to students with 0-56 credits (Freshmen or Sophomore) Theatre (THTR or TBFA) majors only (excluding minors).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Special Courses in Theatre

THTR 1105 (3) Stage Technologies

Introduces technical production elements and procedures, including materials, organizations, methods and equipment to realize theatrical scenery, properties, lighting and sound.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Theatre Design and Technology

THTR 1115 (3) Costume Technologies

Introduces technical production elements and procedures including materials, organizations, methods and equipment to realize theatrical costuming and make-up.

Requisites: Restricted to students with 0-56 credits (Freshmen or Sophomore) only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Theatre Design and Technology

THTR 2021 (3) Global Theatre 2: Forms of Modern Theatre and Drama

Explores the dramatic literature, performance traditions and cultural contexts in world theatre from 1600s to the present, through discussion, writing and theatre practice, with an emphasis on the impacts of modernity and colonialism.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: History/Dramaturgy/Directing

THTR 2035 (3) Design Fundamentals

Introduces principles and techniques relevant to the expression of dramatic mood and idea through visual elements of the theatre, giving practice in concept development, style selection, and rendering techniques in scenery and costume design.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Theatre Design and Technology

THTR 2043 (3) Voice and Movement for the Stage

Natural resources of the human voice and body are studied as artistic resources for the performing artist. Designed to examine both the process and products of vocal and physical craft work.

Requisites: Restricted to Theatre (THTR, TBFA) or Dance (DNCE or DBFA) majors only (excluding minors).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Performance

THTR 2059 (3) Open Topics in Theatre and Drama

Covers topics not otherwise listed in the curriculum. Topics for each semester are specified in the online schedule planner.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Special Courses in Theatre

THTR 2105 (3) Introduction to Performance Design

Introduces the creative/collaborative process of design for theatre and dance, including scenery, costume, lighting, and sound. Students create design projects and evaluate them with regard to artistic and practical concerns. Much of the course work is hands-on, experiential, and team-oriented.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Theatre Design and Technology

THTR 2849 (1-3) Independent Study

Repeatable: Repeatable for up to 3.00 total credit hours.

Additional Information: Departmental Category: Special Courses in Theatre

THTR 3005 (3) Costume Design 1

Study and application of the principles of design as applied to stage costume, emphasizing texts in analysis and interpretation. Presented in a studio format and project driven. Explores concept development, style selection, and extensive practice in a variety of media and techniques for costume rendering.

Requisites: Requires prerequisite course of THTR 1115 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Theatre Design and Technology

THTR 3011 (3) American Musical Theatre History

Studies the creation, evolution and influence of American musical theatre and its importance to American society. Students analyze landmark productions, artists and the creative process.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite 3 credits in THTR, DNCE or MUSC.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: History/Dramaturgy/Directing

THTR 3013 (3) Studio 1: Building a Character

Students learn to deepen and develop their proficiency with specific acting techniques. Explores the craft elements of acting, as well as text analysis.

Requisites: Restricted to Theatre (TBFA) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Performance

THTR 3015 (3) Scene Design 1

Examines the process of theatrical scene design from early conception to realization. Course work is project-based. Students are introduced to the crafts of script analysis, conceptualization, design expression, drafting, and 3-D model building.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Theatre Design and Technology

THTR 3023 (3) Studio 2: Creating a Role

Continued development of acting technique and tools for play analysis, with particular emphasis on scene study. Special attention will be given to the Master Teachers of Acting and their pedagogies.

Requisites: Requires prerequisite course of THTR 3013 (minimum grade C-). Restricted to Theatre (TBFA) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Performance

THTR 3031 (3) Development of Theatre 3: 20th Century International Drama

Introduces 20th century international drama. Discusses selected plays by major African, Asian, and European authors and explores different dramatic traditions and their increasing interactions throughout the 20th century.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: History/Dramaturgy/Directing

THTR 3033 (1-3) Production Research and Practicum: Acting

Allows students to undertake an acting project, either within the major season or approved departmental production. Requires detailed preparational research, rehearsal commitments, and public presentation of theories and concepts in practice. Following the performance, students present written reports and evaluations.

Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Performance

THTR 3035 (1-2) Production Practicum

Practical production projects within a designated area of technical theatre, design, stage management, normally related to the department's season.

Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite courses of THTR 1105 and THTR 1115 (all minimum grade C-).

Additional Information: Departmental Category: Theatre Design and Technology

THTR 3037 (2-3) Shakespeare Practicum

Students are assigned to work with production artisans of the Colorado Shakespeare Festival. While there are many possible areas, production designs for each season determine the number of available positions. May substitute for two credits of THTR 3035.

Requisites: Requires prerequisite courses of THTR 1105 and THTR 1115 (all minimum grade C-).

Additional Information: Departmental Category: Shakespearean Production

THTR 3043 (3) Advanced Voice for the Stage

Continues the work begun in THTR 2043. Studies advanced vocal techniques with the goal of integrating these skills into the working process of the performing artist.

Requisites: Requires prerequisite course of THTR 2043 (minimum grade C-). Restricted to Theatre (THTR or TBFA) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Performance

THTR 3045 (3) Stage Management

Covers stage management from the inception of a production concept through the process of mounting a production, focusing on the interrelationships of the various artists involved, management and scheduling of time, and the psychology of handling a wide range of personalities.

Requisites: Requires prerequisite course of THTR 1105 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Theatre Design and Technology

THTR 3053 (3) Acting 2

Continuation of the techniques introduced in the beginning acting course (THTR 1003). Emphasis is placed on monologues and scene study of contemporary plays. Basic techniques in developing a character are explored.

Requisites: Requires prerequisite course of THTR 1003 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Performance

THTR 3055 (3) Stage Lighting Design 1

Introduces the craft of stage lighting design through experimental lighting labs, lecture/demos, hands-on production experience, and theoretical projects. Subject matter includes aesthetics of light, color theory, lighting for performance, design graphics, and basic lighting technology.

Requisites: Requires prerequisite course of THTR 1105 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Theatre Design and Technology

THTR 3075 (3) Sound Design

Study and application of the principles of sound technology and design, emphasizing concepts of electricity, acoustics, equipment, and their application to the stage.

Requisites: Requires prerequisite course of THTR 1105 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Theatre Design and Technology

THTR 3085 (3) Fashion, Society and Decor

Surveys topics in western dress and the decorative arts from civilizations of antiquity to contemporary time: the garments, objects, materials and technologies in the context of philosophical, political, social and technological change.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Theatre Design and Technology

THTR 3149 (2) Professional Orientation: Exploring Professional Potentials for THTR & DNCE Majors

Explores and identifies a wide range of professional opportunities connected to personal strengths and interests in theatre and dance by studying current professional practices, trends and cross-disciplinary connections. Instructor will: provide information/learning needed from representative professionals; open avenues to find/create employment opportunities towards internship consideration/post-graduation; and mentor structured self-assessment/professional development.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) Theatre (THTR or TBFA) or Dance (DNCE or DBFA) majors (excluding minors).

Additional Information: Departmental Category: Special Courses in Theatre

THTR 3213 (3) Improvisation I: Thinking On Your Feet

Provides students with an introduction to several forms of improvisation, including short form, long-form, playback theatre and clown. A useful course for anyone interested in improving confidence with public speaking, communication and/or performance. Attendance and participation are mandatory.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Performance

THTR 3849 (1-3) Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Special Courses in Theatre

THTR 4005 (3) Costume Design 2

Advanced studio course building on experiences and techniques studied in THTR 3005, with additional emphases on portfolio quality rendering technique and costume production technology as it affects and is affected by the designer.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of THTR 3005 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Theatre Design and Technology

THTR 4013 (3) Studio 3: Acting Shakespeare

In-depth study of Shakespearean texts from the perspective of their demands on the actor, including the conventions and performance styles of Elizabethan theatre.

Requisites: Requires prerequisite courses of THTR 3013 and THTR 3023 (all minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Performance

THTR 4015 (3) Scene Design 2

Advanced projects in theatrical scene design. Provides intensive practice in sketching, rendering, drafting and model-building. Emphasizes portfolio development and preparing the student designer for graduate training or professional work.

Requisites: Requires prerequisite course of THTR 3015 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Theatre Design and Technology

THTR 4021 (3) American Theatre and Drama

Explores American theatre and drama in the 18th centuries to the present. Examines productions, their creators and performers. Contains lecture, discussion, writing and theatre practice.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) Theatre (THTR or TBFA) majors and minors.

Recommended: Requisite at least 12 hours of THTR course work.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: History/Dramaturgy/Directing

THTR 4023 (3) Studio 4: Playing with Styles

Studies selected styles of theatre performance such as Greek Drama, Comedy of Manners, Commedia Dell'art, Modern Realism, Theatre of Absurd, and Non-Western Theatre, including vocal and physical style elements.

Requisites: Requires prerequisite courses of THTR 3013, THTR 3023 and THTR 4013 (all minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Performance

THTR 4029 (3) Performance and Community Engagement

Engages students in the power of performance for effecting positive social change. Students research collaboratively to create performances and workshop experiences to intentionally author the future they want. Readings provide theoretical foundations that serve as the basis for creative work. Students engage in creative explorations. Open to all forms of performance.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Special Courses in Theatre

THTR 4033 (3) Advanced Movement for the Stage

Continues the work begun in THTR 2043. Studies the advanced physical techniques with the goal of integrating these skills into the working processes of the performing artist.

Requisites: Requires prerequisite course of THTR 2043 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Performance

THTR 4035 (3) Scene Painting

Introduces the craft of scene painting through practical projects. Sessions are in a studio format. Students are trained in traditional methods of scenic art, including layout, representational painting, trompe l'oeil, faux finishing, and related skills. Students are taught about proper tool use and care, paint products, and the profession.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Theatre Design and Technology

THTR 4039 (3) Musical Theatre Repertory

Developed around the learning of complete scenes, songs and dances that are representative of the major periods and styles within musical comedy from the 1920s to the present. Emphasizes in-class performance. Admission by audition.

Equivalent - Duplicate Degree Credit Not Granted: THTR 5039

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to Theatre (THTR, TBFA) or Dance (DNCE or DBFA) or Music (MUSA-BAMUS, MUSC-BMUS or MUSE-BMUE) majors only (excluding minors).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Special Courses in Theatre

THTR 4047 (3) Shakespeare Behind the Scenes

Detailed study of script analysis, directing concepts, staging and criticism of the plays being produced by the Colorado Shakespeare Festival.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Shakespearean Production

THTR 4049 (1-4) Special Topics in Theatre

Opportunity for students to explore, upon consultation with the instructor, areas in theatre that the normal sequence of offerings may not allow.

Equivalent - Duplicate Degree Credit Not Granted: THTR 5049

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Special Courses in Theatre

THTR 4051 (3) Playwriting

Introductory course in craft of playwriting; primary focus on technique of developing short plays.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: History/Dramaturgy/Directing

THTR 4055 (3) Stage Lighting Design 2

Assumes a basic knowledge of stage lighting; concentrates on advanced technology, processes, and design projects.

Requisites: Requires prerequisite course of THTR 3055 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Theatre Design and Technology

THTR 4059 (3) Open Topics in Theatre and Drama

Covers topics not otherwise listed in the curriculum. Topics for each semester are specified in the online Schedule Planner.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Special Courses in Theatre

THTR 4061 (3) Directing

Theory and practice of directing for the stage.

Requisites: Requires prerequisite courses of THTR 1003 or THTR 2003 and THTR 1105 and THTR 1115 (all minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Theatre (THTR or TBFA) majors and minors.

Recommended: Prerequisites two semesters of THTR 3035.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: History/Dramaturgy/Directing

THTR 4063 (3) Audition Techniques

Prepares students for the demands of the acting profession. Trains students in various audition techniques including general auditions, prepared auditions, cold readings, on-camera auditions, and commercial auditions. Shows how to prepare and perfect audition material in a professional and exemplary way. Discusses agents, casting directors, and the process of becoming a professional actor.

Requisites: Requires prerequisite course of THTR 1003 (minimum grade D-). Restricted to students with 27-180 credits (Sophomore, Junior or Senior) Theatre (THTR or TBFA) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Performance

THTR 4073 (3) Performing Voices of Women

Explores theories underlying the "feminine voice," varied perspectives in prose and poetry, ways of embodying these voices and perspectives in performance forms and ultimately the students' own voices through creation of autobiographical performance pieces (some to be presented for student audiences). Open to both men and women.

Equivalent - Duplicate Degree Credit Not Granted: WGST 4073

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Performance

THTR 4081 (3) Senior Seminar

Intellectual and conceptual capstone course for departmental majors with separate sections for theatre and dance students. Course promotes integration of ideas regarding history, criticism, and theory in performance and production. All inquiry throughout the semester relates to the theme of creative process.

Requisites: Restricted to Theatre (THTR, TBFA) or Dance (DNCE or DBFA) majors only (excluding minors).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: History/Dramaturgy/Directing

THTR 4085 (3) Theatre Management

Concentrates on theory and practice of management aspects of the performing arts, emphasizing theatre and dance. Includes marketing, budgeting, house and stage management, audience development, grant writing, unions and season development. Includes practical experience.

Equivalent - Duplicate Degree Credit Not Granted: THTR 5085

Requisites: Requires prerequisite courses of THTR 1105 and THTR 1115 (all minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Theatre Design and Technology

THTR 4095 (1-3) Special Topics in Theatre Design and Technology

Intensive study of specialized topics in theatre technology and design. Topics and credits specified in the online Schedule Planner.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Theatre Design and Technology

THTR 4103 (3) Acting and Directing for the Camera

Offers an intensive production workshop to prepare actors and directors to work collaboratively and effectively for the medium of the camera. Directing vocabulary, script interpretation, film terminology and acting techniques are applied. Explores situations in which actors and directors interact, from auditions to rehearsals to filming. Requires attendance, textbook readings, research and production responsibilities on both sides of the camera.

Requisites: Requires prerequisite course of THTR 1003 (minimum grade D-). Restricted to students with 27-180 credits (Sophomore, Junior or Senior) Theatre (THTR or TBFA) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Performance

THTR 4105 (3) Theatre Make-Up Design

Explores theatrical make-up styles and techniques from initial research through paper design to final make-up. Ranging from period styles to Byzantine mosaic, to clowns, to special effects (old age, wounds, stages of healing, zombies, etc.) Techniques include ombre blending, removing eyebrows, shrinking and enlarging features, creating 3D appliances and applying silicone and foam prosthetics.

Equivalent - Duplicate Degree Credit Not Granted: THTR 5105

Repeatable: Repeatable for up to 6.00 total credit hours.

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Special Courses in Theatre

THTR 4113 (3) Comedy Matters

Examines the role of comedy in performance within various cultures through readings, viewings and a participatory exploration. We will analyze comedy within various societies to understand the underlying ideals and values. Throughout this investigation we will seek to understand what makes something comedic, why, for whom, for what purpose, when and under what circumstances.

Equivalent - Duplicate Degree Credit Not Granted: THTR 5113

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Performance

THTR 4125 (3) Watercolor Illustration and Rendering Techniques

Gain fluency in established techniques and styles of master illustrators and painters. Famous illustrations are technically analyzed and copied in this exploration of intent, process, technique and style. Other mediums incorporated include pastels, color pencils, pen and ink and gouache. Painting supplies must be supplied by the student.

Equivalent - Duplicate Degree Credit Not Granted: THTR 5125

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Theatre Design and Technology

THTR 4135 (3) Technical Production

Examines the process of and technology for producing theatrical scenery on a limited production timeline.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite course of THTR 1105 (minimum grade C-).

Additional Information: Departmental Category: Theatre Design and Technology

THTR 4149 (1-3) Theatre Internship

Provides opportunities for theatre majors to explore career opportunities in theatre fields other than, or in addition to, those with performance emphasis. Students apply knowledge and skills developed in their major studies to a practical work experience.

Repeatable: Repeatable for up to 6.00 total credit hours.

Recommended: Requisite 30 credit hours in THTR.

Additional Information: Departmental Category: Special Courses in Theatre

THTR 4173 (3) Creative Climate Communication

We generate multimodal compositions on the subject of climate change and engage with various dimensions of issues associated with sustainability. We work to deepen our understanding of how issues associated with climate change are or can be communicated, by analyzing previously created expressions from a variety of media (interactive theatre, film, fine art, television programming, blogs, performance art, for example) and then be creating our own work.

Equivalent - Duplicate Degree Credit Not Granted: ENVS 3173 and ATLS 3173

Recommended: Prerequisite ENVS 1000.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Performance

THTR 4175 (3) Conceptualization

Fosters the student's creative and collaborative skills by introducing a variety of strategies and scenarios for conceiving live, theatrical productions, events and experiences. A project based curriculum offers several individual and team exercises in visualizing, documenting and communicating ideas for live performances, including their overall scope, aesthetic, style, audience relationship and mode of presentation.

Equivalent - Duplicate Degree Credit Not Granted: THTR 5175

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Special Courses in Theatre

THTR 4193 (1-3) Studio 5: Senior Project

Students engage in a project or projects of their own undertaking that takes a broader experience to apply the craft utilizing self-initiative, collaborative approaches and public exhibition. Instructor consent required for non-BFA THTR performance majors.

Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite course of THTR 3013 and THTR 3023 and THTR 4013 and THTR 4023 (all minimum grade C-).

Additional Information: Departmental Category: Performance

THTR 4213 (3) Improvisation II: Advanced Improvisation

Continues the student's study of improvisation as a collaborative art form. Whereas Improvisation I introduces students to a variety of techniques, forms and applications of improvisation, this course focuses specifically on long-form improvisation in performance. Previous experience with long-form improvisation is necessary to enroll in this course.

Requisites: Requires prerequisite course of THTR 3213 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Performance

THTR 4555 (1-2) Production Studio

Requires participation in a Theatre Department production assignment in the areas of design, technology, or management, as well as participation in a semester portfolio review. May be repeated upto 6 total credit hours.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Theatre (TBFA) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Theatre Design and Technology

THTR 4849 (1-3) Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Special Courses in Theatre

Dance - Bachelor of Arts (BA)

CU Boulder has an exciting and diversified dance program. We are a contemporary program - one that values and provides study in a range of styles and fusion of forms that influence and reflect the multifaceted nature of dance performance today. Our curriculum is designed to develop concrete skills in performance and choreography and to instill an appreciation of the role that dance plays in human culture around the world. The following areas of knowledge and experience are central to all the undergraduate degrees in dance:

- physical accomplishment in a range of dance styles and within fusions of various forms, including Contemporary, Ballet, Jazz, Hip-Hop, Transnational Fusion, African Dance, Performance Improvisation, and other dance traditions from around the world;
- experience with the process and underlying aesthetics of dance creation, composition, and collaboration;
- basic familiarity with cultural, sociological, and aesthetic issues important to the contemporary realities of the field of dance, including a working knowledge of major world dance styles, works of dance literature, theoretical lenses, and the history of dance;

- knowledge of the various means, such as stagecraft, costuming, lighting, make-up, production, and projections, through which a public presentation of dance is realized;
- study and practical experience in dance pedagogy, identifying our purpose, goals and objectives as future educators;
- basic knowledge of tactics for sustaining wellness, including various somatic approaches to dance training, injury prevention and rehabilitation from injury;
- experiential study of the relationship between dance and music, including concrete practice of skills in playing and hearing music;
- and, opportunities to explore the power of performance for effecting positive social change.

In addition, students completing a degree in dance are expected to acquire the ability and skills to:

- actively participate in dance as an art form with particular attention to at least one of the following areas of dance: performance, choreography, dance production, scholarship, pedagogy or criticism;
- understand and mobilize knowledge of appropriate use of the anatomy and physiology of the body in performance and teaching;
- communicate effectively to an audience through at least one of the components of dance—performance, choreography, teaching or scholarship;
- and, function constructively as a member of a dance community in the preparation of regularly scheduled public productions.

BA and BFA students are expected to take a variety of technique styles. A minimum of three different styles, as well as African Dance, are required. Dance majors must earn a C- or better in all required courses. Students who have not placed in the major technique class (DNCE 2021, DNCE 3041 or DNCE 4061) by their second semester in dance program are strongly advised not to continue in the major program in dance. Placement into and successful completion of major technique is a prerequisite for enrollment in other required dance courses.

Requirements

Required Courses and Credits

The Bachelor of Arts provides a well-rounded dance education in both technique and theory courses. Students must receive a C- or better in all required courses. Students must complete the general requirements of the College of Arts and Sciences and the required courses listed below.

Code	Title	Credit Hours
Required Lower-Division Courses		
DNCE 1012	Dance Production	2
DNCE 1013	Dance Improvisation	2
DNCE 1027	Dance in Cultural Perception and Expression	3
DNCE 1908	First Year Dance Seminar	1
DNCE 2501	African Dance	2
Required Major Technique Courses		
Take 6 credit hours from the following courses: ¹		6
DNCE 2021	Major Technique	

DNCE 3041	Major Technique	
DNCE 4061	Major Technique	
Upper-Division Music Course		
Choose one of the following courses:		2
DNCE 3014	Inside the Groove: Developing Rhythmic Skills	
DNCE 3024	SOUND Choices: Enhancing the Music/Dance Relationship	
Upper-Division Creative Process Course		
Choose one of the following courses:		3
DNCE 3033	Choreographic Resources	
DNCE 3043	Choreographic Process	
Required Production Practicum Courses		
Take 2 credit hours of production practicum, including 1 credit of Run Crew.		2
DNCE 3035	Production Practicum	
Required Upper-Division Courses		
DNCE 3005	Movement Awareness and Injury Prevention for the Dancer	3
DNCE 4017	Dancing Histories: Sex, Gender and Race in U.S. Concert Dance	3
DNCE 4036	Dance Teaching Practices: Inclusive Approaches to Instruction	3
DNCE 4046	Teaching Practicum	1
DNCE 4939	Dance Internship	1
THTR 3149	Professional Orientation: Exploring Professional Potentials for THTR & DNCE Majors	2
THTR 4029	Performance and Community Engagement	3
THTR 4081	Senior Seminar	3
Electives in Dance Technique		
Take 6 credit hours of DNCE courses with course numbers that end in 1.		6
Required Theatre Production Course		
Choose one of the following courses:		3
THTR 1105	Stage Technologies	
THTR 1115	Costume Technologies	
THTR 2105	Introduction to Performance Design	
THTR 3005	Costume Design 1	
THTR 3015	Scene Design 1	
THTR 3045	Stage Management	
THTR 3055	Stage Lighting Design 1	
THTR 3075	Sound Design	
THTR 4035	Scene Painting	
THTR 4055	Stage Lighting Design 2	
THTR 4095	Special Topics in Theatre Design and Technology (Some sections including: Tailoring, Conceptualization or Product Design)	
THTR 4105	Theatre Make-Up Design	
THTR 5025	Costume Patterning and Construction	
Total Credit Hours		51

¹ Students are placed at the appropriate level based on audition. Students without sufficient training will be asked to take nonmajor technique classes to make up the deficiency. These classes will not count toward the major requirement.

Graduating in Four Years

Consult the Four-Year Guarantee Requirements for more information on eligibility. The concept of "adequate progress" as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress toward a BA in dance, students should meet the requirements in the Four-Year Plan section.

Recommended Four-Year Plan of Study

Through the required course work for the major, students will fulfill all 12 credits of the Arts & Humanities area of the Gen Ed Distribution Requirement.

Dance - Bachelor of Fine Arts (BFA)

Our BFA program is designed to meet the needs of highly talented and motivated students interested in preparing for a professional dance career in performance and/or choreography while in an academic setting.

The characteristics that the faculty looks for in BFA students are:

- exceptional technical/expressive ability as demonstrated in class work and performance;
- choreographic skill or potential as demonstrated through movement invention and appropriate clarity of structure;
- willingness and drive necessary to pursue a professional career in dance;
- exceptional musicality and rhythmic precision; and,
- maturity, organization, and positive attitude.

In addition to specified coursework, the BFA student must meet the following requirements:

- show original choreographic work each semester in Open Space, FRESH, or Dance Class Showings;
- present a concert in conjunction with other senior BFA's in the spring of their senior year;
- By December of their junior year the student must have formed a committee of two faculty members who will evaluate his/her concert. The student and First Reader (lead faculty member) of the committee will complete a BFA Concert Form that is given to the Director of Dance Production by January 31 junior year. The Director of Dance Production will help you plan and oversee the production aspects of the show; and,
- maintain a 3.2 in required dance and theatre courses. If you drop below the required GPA by the time of your concert proposal submission (January 31) you will be removed from the BFA and your concert proposal will no longer be considered.

Applying for the BFA

Students who did not pre-audition into the BFA program and who wish to pursue the BFA can audition during the fall semester of their freshman or sophomore year. If you are a sophomore auditioning for the BFA, you must be enrolled in or have taken DNCE 3033 or DNCE 3043 in order to be on track to graduate in 4 years. Application guidelines for the BFA track will be posted each fall semester. The undergraduate director will notify students of faculty decisions regarding their audition. If a student is admitted to the program he/she should talk to their Primary Advisor, to have their degree status officially changed from BA to BFA.

THTR 5025	Costume Patterning and Construction

Some sections of the following including Tailoring, Conceptualization or Projection Design:

THTR 4095	Special Topics in Theatre Design and Technology
-----------	---

Total Credit Hours 77-78

¹ Students are placed at the appropriate level based on audition. Students without sufficient training will be asked to take nonmajor technique classes to make up the deficiency. These classes will not count toward the major requirement.

Graduating in Four Years

Consult the Four-Year Guarantee Requirements for more information on eligibility. The concept of "adequate progress" as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress toward a BFA in dance, students should meet the requirements in the Four-Year Plan section.

Four-Year Plan of Study

Through the required course work for the major, students will fulfill all 12 credits of the Arts & Humanities area of the Gen. Ed. Distribution Requirement.

Theatre - Bachelor of Arts (BA)

The BA program in theatre is a broad-based program of theatre practice and study for the student who may wish to pursue in-depth studies in another area as well. It also serves as the core of studies for a student who wishes to pursue further theatre training in one of the BFA areas of concentration.

The undergraduate degrees in theatre emphasize knowledge and awareness of:

- the major works of dramatic literature that are representative of the most important eras in the development of theatre and drama;
- the history of theatrical production—its styles, conventions and socially related mores—from ancient civilizations to the present time;
- the various means through which a theatrical concept is realized; and
- the aesthetic and intellectual relationship between theatre in its various 21st century modes and contemporary society.

In addition, students completing a degree in theatre are expected to acquire the ability and skills to:

- analyze and interpret plays and performances with particular attention to acting and performance of literature, designing, directing and/or playwriting and criticism;
- use, with safety and efficiency, the tools and equipment basic to theatre production technology;
- communicate to an audience through at least one of the components of theatrical art: acting, directing, designing, playwriting or criticism; and
- function effectively as a collaborative member of a production team in the preparation of regularly scheduled public productions.

Concurrent Degree Program BA/MA in Theatre

The CU Boulder Department of Theatre & Dance now offers a BA/MA in theatre. This new program is an accelerated program aimed primarily at high-achieving undergraduates who may be planning to pursue a PhD at another institution and who wish to challenge themselves in advanced critical thinking.

Concurrent degrees at CU Boulder have been created in recognition of the increasing demand for master's-level training and research skills. The BA/MA in theatre can give students advanced skills in a shorter amount of

time using an integrated degree plan. A student can enter as a freshman theatre major and graduate with a BA and MA in theatre within a five-year period (dependent upon criteria described below).

The typical student will be a student writing an honors thesis who will use that project as the basis for developing the MA thesis, though this is not mandatory. This new degree program is open only to students enrolled in the BA in theatre degree program at CU Boulder.

Minimum standards for admission require a cumulative GPA of 3.0 and completion of all MAPS deficiencies. Interested students should apply for admission to the BA/MA by December 15 of their junior year.

Students admitted to the concurrent degree program will undergo a mid-program review at the middle of the senior year to determine their eligibility to continue. Students not recommended for continuation in the concurrent degree program will be eligible to complete their bachelor's degree. To comply with Title IV Higher Education regulations, CU Boulder students pursuing a BA/MA degree will automatically be changed to graduate status after the completion of 130 credit hours. (Note: Students may take graduate courses prior to this formal admission into the Graduate School.) Upon successful completion of the concurrent degree program, both the bachelor's and master's degrees will be awarded simultaneously.

Course Requirements

Students must complete the following in addition to the BA requirements.

Code	Title	Credit Hours
Required Courses		
THTR 5011	Seminar: Theory and Criticism	3
THTR 5010	Introduction to Performance Studies	3
THTR 6009		1
Electives

THTR 6111	On Stage Studies: Global Contemporary Theatre	
THTR 6959	Master's Thesis ¹	4
Graduate Electives ²		7
Total Credit Hours		24

¹ The master's thesis is optional. Students choosing the thesis plan complete 4–6 thesis hours. Students choosing the non-thesis plan take additional electives.

² Thirty credit hours are required to complete the Master of Arts degree. BAMA students transfer six undergraduate credits toward their graduate degree.

For more information, visit the department's BA/MA in Theatre and Performance Studies (<https://www.colorado.edu/theatredance/admissions/degrees/bama-theatre>) webpage.

Requirements

Program Requirements

The BA degree program in theatre requires 44 credit hours in theatre, 3 in dance and 6 in dramatic literature and/or global arts outside the department. A grade of C- or better is needed in each required course toward the BA degree, as well as an overall theatre GPA of 2.00.

Theatre - Bachelor of Fine Arts (BFA)

The BFA degree concentrations in Theatre offer preprofessional training to a limited number of highly motivated and talented students aiming at professional careers. The BFA student can pursue one of three concentration areas: acting, design/technology/management and musical theatre.

Requirements

Admission Requirements

Admission is based on talent, academic record, motivation, auditions and/or interviews. Enrollment is limited to ensure individual attention necessary for effective training. Interested students should identify themselves as early as possible. Contact the department for information regarding how to apply to the BFA degree concentrations.

Formal application to the:

- musical theatre concentration should be made concurrently with an application to the university. Auditions and interviews will be held at the regular spring auditions for the College of Music.
- acting concentration should be made at the beginning of the second semester.
- design/technology/management concentrations should be made at the beginning of the third semester.

Students are subject to the requirements in place at the time of admission to the BFA.

General Degree Requirements

The College of Arts & Sciences counts a maximum of 67 credit hours of THTR credits toward the total credit hours required for graduation. A grade of C- or higher is needed in all required courses to fulfill the requirements of the BFA degree, as well as an overall Theatre GPA of 2.00.

In addition to the specific course requirements listed for completing a BFA degree in Acting and Design/Technology/Management concentrations, students must fulfill all requirements for the BA degree in Theatre.

Concentrations

Acting Concentration

Students accepted into the BFA acting concentration each year constitute an ensemble and follow the required sequence of courses as a group. Students in this concentration must fulfill the BA requirements in theatre (p. 595), with specified electives, and are required to audition for theatre season productions each semester.

Design/Technology/Management Concentrations

In addition to the College of Arts and Sciences core requirements, students pursuing a BFA in design, technology or management must complete up to 67 credits in theatre and an additional 15 credits in other disciplines. Students who choose this concentration must elect one of the three emphases (tracks): design, technology or management.

Musical Theatre Concentration

The BFA in musical theatre offers a rigorous concentration in theatre, music and dance to a select number of highly disciplined, motivated and talented students. In addition to the graduation requirements of the College of Arts and Sciences, this concentration requires 60 credit hours: 26 credit hours in THTR, 4 credit hours in DNCE and 30 credit hours in the College of Music. Students must confirm their decision to enroll as a musical theatre BFA upon acceptance following the audition and must meet immediately with a departmental advisor.

During the application process, all potential BFA musical theatre students must declare in writing their intention to audition by submitting the

appropriate pre-audition materials (www.colorado.edu/TheatreDance/admissions (<http://www.colorado.edu/theatredance/admissions>)).

Graduating in Four Years

Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of "adequate progress" as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress toward a BFA in theatre students should meet the following requirements:

- By Dec. 1 of the year before the first semester, declare in writing the intention to audition for the BFA in Musical Theatre.
- During the second semester (Acting concentration) or third semester (Design/Technology/Management concentrations), complete the audition and interview.
- Immediately upon acceptance into a BFA concentration declare the major.
- Once accepted into a BFA concentration, meet with a departmental advisor to confirm in writing specific courses to be completed within the remaining semesters of study.

Four-Year Plans of Study

Through the required course work for all concentrations in the BFA in Theatre, students will fulfill all 12 credits of the Arts & Humanities area of the Gen Ed Distribution Requirement.

Dance - Minor

The minor in dance is designed to provide the student with a broad overview of dance as an art form. Required courses introduce students to basic elements of dance while the remaining plan is created by the student in conjunction with their primary advisor. If you have specific dance questions, please contact the director of dance.

The rules of the College of Arts and Sciences apply in designing each student's program.

Requirements

Requirements include a minimum of 20 credit hours; 9 of which must be upper division; a minimum grade of C- in each dance class; and a minimum of a 2.00 GPA for all dance and approved non-dance courses. Transfer students may apply a maximum of 9 transfer hours with a maximum of 6 upper-division credit hours to the dance minor. Students select courses from the dance curriculum based on their interests and course availability.

¹ Some upper-division courses may require prerequisites. 800–900 sections are controlled enrollment and require an audition or instructor consent.

Theatre - Minor

The minor in theatre is designed to provide students with a broad overview of theatre. Students may declare a theatre minor by contacting their advisor through the Academic Advising Center (<https://www.colorado.edu/advising>).

Requirements

Requirements include a minimum of 19 credit hours from the courses below, 9 credit hours of which must be upper-division. Students select courses from the theatre curriculum based on their interests and course availability.

Students must receive a minimum grade of C- in each THTR course, and a minimum of 2.00 GPA for all THTR courses.

Students are allowed to apply no more than 9 credit hours, including 6 upper-division credit hours, of transfer work toward the theatre minor.

Required Courses and Credits

Code	Title	Credit Hours
Required Courses		
Select one of the following:		3
THTR 1003	Acting 1: Introduction to Acting	
THTR 1009	Theatre and Society	
THTR 2105	Introduction to Performance Design	
Select one of the following:		3

Western American Studies

The Center of the American West offers an 18-credit undergraduate certificate program in Western American studies for students who have an intellectual commitment to any of a broad range of issues and aspects of the American West, including history and literature, culture and society and economic and environmental challenges facing western communities. Courses involve students in an exploration of the past, an appreciation for traditional and contemporary stories and art in the region and an understanding of western landscapes, ecosystems and the factors that affect them. For more information, visit the department's Undergraduate Certificate Program (<https://www.centerwest.org/academics/certificate-program>) webpage.

Course code for this program is CAMW.

Certificate

- Western American Studies - Certificate (p. 603)

Courses

CAMW 2001 (3) The American West

Students tour the cultural, social, and natural features of the American West, based on readings and presentations by guest speakers from the CU faculty and from important professions and positions in the West. Designed as the foundation course in the Western American Studies certificate program.

Requisites: Restricted to students with 0-56 credits (Freshmen or Sophomores).

Additional Information: GT Pathways: GT-HI1 - History
Arts Sci Core Curr: United States Context
Arts Sci Gen Ed: Distribution-Arts Humanities

CAMW 3939 (1-3) Center of the American West Internship

Work for public and private organizations on projects that enhance the understanding of various Western American topics and issues (environmental, cultural, public policy, etc.), and which foster students' development as community leaders working for a sustainable West.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite CAMW 2001.

CAMW 4001 (3) Seminar on the American West

Interdisciplinary capstone seminar for the Western American Studies certificate program. Applies a selected natural science, social science, or humanities topic to the American West and addresses how westerners can make and sustain viable landscapes and communities.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite CAMW 2001 and completion of Western American Studies certificate electives.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

CAMW 4840 (1-4) Independent Study: The American West

Requisites: Requires prerequisite course of CAMW 2001 (minimum grade B). Restricted to students with 57-180 credits (Junior or Senior).

Western American Studies - Certificate

The certificate in Western American studies offers students at CU Boulder a unique regional studies curriculum. The interdisciplinary format allows an exploration of the region's characteristic and evolving issues: from its flora and fauna to its history and literature; and from the political, social, cultural, economic and environmental concerns facing Westerners to the landscapes and ecosystems that they inhabit.

The Center for the American West believes in community and in helping students feel more at home within the larger university. As such, the center hosts dinners each semester where students and faculty can get to know each other as well as various noteworthy featured guests in a more social, off-campus environment. Students enrolled in the program are also eligible to apply for the Beardsley Family Scholarship, and the center welcomes applications from all CU Boulder students for its annual Thompson Awards writing contest.

Requirements

The certificate requires 18 credit hours (9 of which must be at the upper-division level) and includes an introductory course and a capstone course. It also allows students to choose the remaining four classes from a variety of academic areas. In this way, students are able to piece together a survey of the American West that aligns with their own unique interests.

Required Courses and Credits

Code	Title	Credit Hours
Required Courses		
CAMW 2001	The American West	3
CAMW 4001	Seminar on the American West	3
Electives		

Choose four courses from a variety of academic areas, as approved by the department. 12

Total Credit Hours 18

Western Civilization Studies

The Center for Western Civilization, Thought & Policy (CWCTP) offers an undergraduate certificate program, Foundations of Western Civilization, for students interested in a rigorous grounding in Western culture. The certificate promotes critical reflection and academic research on the traditions and issues that characterize Western civilization through the study of Western culture, science and government in their ancient, medieval and modern forms. It helps students understand their role as citizens in a nation founded on the ancient ideals of consensual rule and republican government.

Course code for this program is CWCV.

Certificate

- Foundations of Western Civilization - Certificate (p. 603)

Courses

CWCV 2000 (3) The Western Tradition

Encourages a historical and critical investigation into the formative influences on what is often called Western culture, including religious, political, social and economic factors, and contemporary interpretations and critiques of these developments and concepts. Designed as the foundation course for the Center for Western Civilization.

Additional Information: Arts Sci Core Curr: Ideals and Values

Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Arts Sciences Special Courses

CWCV 4000 (3) Foundations of Western Civilization

Offers in-depth consideration of one or more foundational traditions in Western civilization. Focus changes from semester to semester, but possible topics include the Hebrew Bible, classical Greece, Islam, early Christianity, Persia, and North Africa. Designed as a senior seminar for the certificate in Western Civilization.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Arts Sciences Special Courses

Foundations of Western Civilization - Certificate

Our undergraduate certificate program is for students interested in a rigorous grounding in Western culture, reflecting on its traditions and values, and the certificate itself is the equivalent of an inter-disciplinary minor. The program allows students to study Western culture, science and government in their ancient, medieval and modern forms. The curriculum embraces over 30 courses taught by faculty in departments that include art history, classics, English, German, history, humanities, Italian, philosophy, political science and religious studies.

For more information on the program, requirements and current course offerings, visit the Center for Western Civilization, Thought & Policy (CWC)'s Certificate in Western Civilization (<http://www.colorado.edu/cwctp/student-resources/certificate-western-civilization>) webpage,

or contact CWC Director Robert Pasnau at 303-492-4837 or pasnau@colorado.edu.

Requirements

The interdisciplinary curriculum of over 30 courses is taught by faculty in departments that include: classics, English, history, philosophy, religious studies, and Germanic languages and literatures.

The certificate requires the completion with a grade of C- or better of eight courses (24 credit hours), of which 12 credit hours must be at the upper-division level. Up to three courses (or 9 credit hours) may come from the student's major.

In addition, students must fulfill the requirements for a BA in a major in a school or college at the University of Colorado Boulder.

Required Courses and Credits

The required courses are offered each year. Students will enroll in one course from each cluster (9 hours total): literature, history and science.

The elective courses are offered regularly, but not each semester. Students are advised to check with the offering department regarding availability. Some courses may have prerequisites. Additional courses may be petitioned for inclusion in meeting certificate requirements through the center director.

Women and Gender Studies

The Department of Women and Gender Studies offers a Bachelor of Arts degree, a minor, an undergraduate certificate in global gender and sexuality studies, and a graduate certificate for students enrolled in another disciplinary master's or doctoral degree program. The interdisciplinary field of women and gender studies offers students rigorous but flexible programs of study that examine women, gender and sexuality in relation to race, class, national identity and ability, among other variables. Students explore the ways that gender and sexuality work in diverse communities and in different cultural and historical contexts. Areas of inquiry include but are not limited to: gender/sex systems across cultures, historical periods and epistemological traditions; gender and sexuality in literature, the arts and popular and media culture; legal and public policy issues around gender and sexuality; women's participation in social and cultural production; transnational feminisms; feminist, queer and transgender theories; and LGBTQI politics and histories.

The department houses a reading library and organizes colloquia, workshops and other cultural and educational events.

Many students combine their women and gender studies degree with other departmental offerings across campus as a second major, a minor or a certificate. Students have coupled the critical thinking skills they learn in women and gender studies with additional fields of study from the College of Arts and Sciences or from other colleges or schools at CU Boulder. For example, a graduate of the department who also completes studies in biology may attend medical school to specialize in women's health; by combining a women and gender studies degree with a focus in business, a graduate could better understand how gender affects the workplace. Students have gone on to careers in fields such as law, medicine, government, public health, social work, teaching, public policy, counseling, advocacy, media, public relations, academia, politics, fundraising, small business development, librarianship and arts administration, among others.

For more information, visit the Department of Women and Gender Studies (<http://www.colorado.edu/wgst>) website.

Course code for this program is WGST.

Bachelor's Degree

- Women and Gender Studies - Bachelor of Arts (BA) (p. 613)

Minor

Courses

WGST 1006 (3) The Social Construction of Sexuality

Discusses the social determinants of sexuality. Analyzes the economic, psychological and cultural influences on human sexuality. Interactional perspective of human sexuality is presented.

Equivalent - Duplicate Degree Credit Not Granted: SOCY 1006

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Arts Sci Gen Ed: Diversity-U.S. Perspective
Departmental Category: Sociology

WGST 1016 (3) Sex, Gender, and Society 1

Examines status and power differences between the sexes at individual and societal levels. Emphasizes historical context of gender roles and status, reviews major theories of gender stratification.

Equivalent - Duplicate Degree Credit Not Granted: SOCY 1016

Additional Information: GT Pathways: GT-SS3 -Soc Behav Sci:Hmn Behav, Cult, Soc Frame

Arts Sci Core Curr: Human Diversity

Arts Sci Gen Ed: Diversity-U.S. Perspective

Arts Sci Gen Ed: Distribution-Social Sciences

Departmental Category: Sociology

WGST 1260 (3) Introduction to Women's Literature

Introduces literature by women in England and America. Covers both poetry and fiction and varying historical periods. Acquaints students with the contribution of women writers to the English literary tradition and investigates the nature of this contribution.

Equivalent - Duplicate Degree Credit Not Granted: ENGL 1260

Additional Information: Arts Sci Core Curr: Human Diversity

Arts Sci Gen Ed: Distribution-Arts Humanities

Arts Sci Gen Ed: Diversity-Global Perspective

Departmental Category: English

WGST 2000 (3) Introduction to Feminist Studies

Introduces students to the field of Women and Gender Studies. Examines gender issues in the United States from interdisciplinary, multicultural and feminist perspectives. Covers such topics as sexuality, beauty ideals, women's health, violence against women, work, the economy, peace and war and the environment.

Additional Information: Arts Sci Core Curr: Human Diversity

Arts Sci Gen Ed: Distribution-Social Sciences

Arts Sci Gen Ed: Diversity-U.S. Perspective

MAPS Course: Social Science

WGST 2020 (3) Femininities, Masculinities, Alternatives

Examines the construction of gender and sexual identities in the modern world. Focuses on the role of social attitudes and material circumstances in shaping how individuals understand themselves and are understood by others, as well as the actions they take to accept, negotiate and resist these pressures.

Additional Information: Arts Sci Core Curr: Human Diversity

Arts Sci Gen Ed: Distribution-Social Sciences

Arts Sci Gen Ed: Diversity-U.S. Perspective

WGST 2030 (3) Introduction to Lesbian, Gay, Bisexual, and Transgender Studies

Investigates the social and historical meanings of racial, gender, and sexual identities and their relationship to contemporary lesbian, bisexual, gay and transgender communities.

Equivalent - Duplicate Degree Credit Not Granted: LGBT 2000

Additional Information: Arts Sci Core Curr: Human Diversity

Arts Sci Gen Ed: Distribution-Social Sciences

Arts Sci Gen Ed: Diversity-U.S. Perspective

Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: LGBT Studies

WGST 2050 (3) Gender, Sexuality, and Popular Culture

Explores diverse cultural forms such as film, popular fiction and non-fiction, music videos, public art, websites, blogs and zines which are shaped by, and in turn shape, popular understandings of gender at the intersections of race, class, ability, religion, nation and imperialism.

Additional Information: Arts Sci Core Curr: Human Diversity

Arts Sci Gen Ed: Diversity-U.S. Perspective

Arts Sci Gen Ed: Distribution-Arts Humanities

WGST 2100 (3) Gender and Sexuality in Ancient Greece

Examines evidence of art, archaeology and literature of Greek antiquity from a contemporary feminist point of view. Focuses on women's roles in art, literature and daily life. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 2100

Additional Information: Arts Sci Core Curr: Human Diversity

Arts Sci Gen Ed: Distribution-Arts Humanities

Arts Sci Gen Ed: Diversity-Global Perspective

Departmental Category: Classics

WGST 2110 (3) Gender and Sexuality in Ancient Rome

Uses art, archaeology, and literature to study, from a contemporary feminist point of view, the status of women in works of Roman art and literature, the development of attitudes expressed toward them, and their daily life. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 2110

Additional Information: Arts Sci Core Curr: Human Diversity

Arts Sci Gen Ed: Distribution-Arts Humanities

Arts Sci Gen Ed: Diversity-Global Perspective

Departmental Category: Classics

WGST 2200 (3) Women, Gender, Literature, and the Arts

Introduces the contributions of women to literature and the performing arts from a historical and cross-cultural perspective. Emphasizes representations of gender and sexuality, as well as the cultural contexts in which artworks are created. Stresses issues of structure, content, and style, along with the acquisition of basic techniques of literary and arts criticism.

Recommended: Prerequisite WGST 2000.

Additional Information: Arts Sci Core Curr: Human Diversity

Arts Sci Core Curr: Literature and the Arts

Arts Sci Gen Ed: Distribution-Arts Humanities

Arts Sci Gen Ed: Diversity-Global Perspective

WGST 2290 (3) Philosophy and Women

Explores different approaches to the study of women.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 2290

Additional Information: Arts Sci Core Curr: Human Diversity

Arts Sci Gen Ed: Diversity-U.S. Perspective

Arts Sci Gen Ed: Distribution-Arts Humanities

Arts Sci Gen Ed: Diversity-Global Perspective

Departmental Category: Philosophy

WGST 2400 (3) Women of Color and Activism

Studies the history of social activism in the United States by women of color, with an emphasis on modes of social activism, issues that have organized specific communities of color, issues that have crossed ethnic/racial boundaries and the interaction of women from different ethnic/racial groups, including women of color and white women.

Recommended: Prerequisite WGST 2000 or WGST 2600.

Additional Information: GT Pathways: GT-H11 - History

Arts Sci Core Curr: United States Context

Arts Sci Gen Ed: Distribution-Social Sciences

WGST 2500 (3) Gender, Race, Sex and the Body

Studies the body as a site for the production of social difference, meaning and inequality. Focuses on the body as a conduit for political, social, and ethical dilemmas and conflicts. Examines a selection of these issues to help students understand what a body is, how bodily difference is constructed, and what this constructed difference signifies.

WGST 2600 (3) Gender, Race, and Class in a Global Context

Examines the positionality of women in terms of gender, race, ethnicity, class and power relations in a global context.

Additional Information: GT Pathways: GT-SS3 -Soc Behav Sci:Hmn Behav, Cult, Soc Frame

Arts Sci Core Curr: Contemporary Societies

Arts Sci Gen Ed: Distribution-Social Sciences

Departmental Category: Asia Content

WGST 2700 (3) Psychology of Gender and Sexuality

Examines psychological research on gender and sexuality as they intersect with race, class and other social categories. Points of emphasis include differences in cognition, attitudes, personality and social behavior. Conceptual themes include research methodologies, implicit and explicit attitudes, stigma and stereotypes. These elucidate such areas as close relationships, leadership, career success and mental health and happiness.

Equivalent - Duplicate Degree Credit Not Granted: PSYC 2700

Recommended: Prerequisite WGST 2000 or PSYC 1001.

Additional Information: Arts Sci Core Curr: Human Diversity

Arts Sci Gen Ed: Distribution-Social Sciences

Arts Sci Gen Ed: Diversity-U.S. Perspective

WGST 2800 (3) Women and Religion

Examines roles of women in a variety of religious traditions including Judaism, Christianity, Hinduism, Buddhism and goddess traditions.

Equivalent - Duplicate Degree Credit Not Granted: RLST 2800

Additional Information: Arts Sci Core Curr: Human Diversity

Arts Sci Gen Ed: Diversity-U.S. Perspective

Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Religious Studies

WGST 3012 (3) Women and Development

Investigates the status of women in the context of globalization and social and economic development.

Equivalent - Duplicate Degree Credit Not Granted: SOCY 3012

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite SOCY 3001.

Additional Information: Arts Sci Core Curr: Human Diversity

Arts Sci Gen Ed: Distribution-Social Sciences

Arts Sci Gen Ed: Diversity-Global Perspective

Departmental Category: Sociology

Departmental Category: Asia Content

WGST 3016 (3) Marriage and the Family in the United States

Comparative and historical examination of marriage and the family within the U.S. Emphasizes changing family roles and family structures. Also considers alternatives to the nuclear family and traditional marriage exploring new definitions of family.

Equivalent - Duplicate Degree Credit Not Granted: SOCY 3016

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite SOCY 3001.

Additional Information: Arts Sci Core Curr: United States Context

Arts Sci Gen Ed: Distribution-Social Sciences

Departmental Category: Sociology

WGST 3020 (3) Methods of Inquiry in Gender, Race, Class, and Sexuality

Examines various research methods and approaches in women's and gender studies. Students will gain practical experience to be able to write a proposal for a significant research project, informed by course readings and discussions.

Recommended: Prerequisite WGST 2000 or WGST 2600.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

WGST 3044 (3) Race, Class, Gender, and Crime

Overview of race, class, gender and ethnicity issues in offending, victimization and processing by the justice system. Examines women and people of color employed in the justice system.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 3044 and SOCY 3044

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite SOCY 1001 or SOCY 1004 or SOCY 1021 or SOCY 2044.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Sociology

WGST 3046 (3) Topics in Sex and Gender

Faculty present courses based on their area of expertise and specialization in the field of sex and gender. Students should check current sociology department notices of course offerings for specific topics.

Equivalent - Duplicate Degree Credit Not Granted: SOCY 3046

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Sociology

WGST 3100 (3) Feminist Theories

Explores a variety of alternative systematic accounts of, and explanations for, gender inequities. Social norms of both masculinity and femininity are analyzed in relation to other axes of inequality such as class, sexuality, race/ethnicity, neocolonialism and the domination of nonhuman nature.

Requisites: Requires a prerequisite course of WGST 2000 or WGST 2020 or WGST 2050 or WGST 2600 (minimum grade C-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

WGST 3110 (3) Feminist Practical Ethics

Explores a variety of personal and public policy issues in light of basic feminist commitment to opposing women's subordination. Provides students not only with a deeper understanding of the specific issues discussed but also with a sense of the ways in which a principled commitment to feminism may influence and be influenced by prevailing interpretations of contemporary ideals and values (such as freedom, equality and community). Provides an opportunity to develop skills of critical analysis useful in a wide range of contexts.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 3110

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite WGST 2000 or WGST 2290 or PHIL 2290.

Additional Information: Arts Sci Core Curr: Ideals and Values

Arts Sci Gen Ed: Distribution-Arts Humanities

WGST 3135 (3) Chicana Feminisms and Knowledges

Provides insight into the present socioeconomic condition of Chicanas and the concept of feminismo through interdisciplinary study of history, sociology, literary images and film portrayals.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 3136

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite ETHN 2001 or ETHN 2536.

Additional Information: Arts Sci Core Curr: Human Diversity

Arts Sci Gen Ed: Distribution-Social Sciences

Arts Sci Gen Ed: Diversity-U.S. Perspective

Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Chicano Studies

WGST 3174 (3) Sex, Power, and Politics: U.S. Perspectives

Explores how norms of sex, gender, race and sexuality find expression in institutions and policies in ways that legitimize only certain individuals as political actors, certain identities as politically relevant, and certain relationships as important. Critically examines how norms may be exposed, resisted and changed by studying the politics of the women's, gay liberation and men's movements in the U.S.

Equivalent - Duplicate Degree Credit Not Granted: PSCI 3174

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite PSCI 2004 or WGST 2000 or LGBT 2000.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

Departmental Category: Political Science

WGST 3200 (3) Religion and Feminist Thought

Examines the origin of patriarchal culture in the theology and practices of Judaism and Christianity. Explores attitudes and beliefs concerning women as Judeo-Christian culture impacts gender roles and gender stratification through reading and discussion. Women's religious experience is studied from the perspective of feminist interpretations of religiosity.

Equivalent - Duplicate Degree Credit Not Granted: JWST 3200

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

WGST 3201 (3) Women, Gender & Sexuality in Jewish Texts & Traditions

Reads some of the ways Jewish texts and traditions look at women, gender and sexuality from biblical times to the present. Starts with an analysis of the positioning of the body, matter and gender in creation stories, moves on to the gendered aspects of tales of rescue and sacrifice, biblical tales of sexual subversion and power, taboo-breaking and ethnos building, to rabbinic attitudes towards women, sexuality and gender and contemporary renderings and rereadings of the earlier texts and traditions.

Equivalent - Duplicate Degree Credit Not Granted: JWST 3202 and HEBR 3202 and RLST 3202

Additional Information: Arts Sci Core Curr: Human Diversity

Arts Sci Gen Ed: Distribution-Arts Humanities

Arts Sci Gen Ed: Diversity-Global Perspective

WGST 3208 (3) Women in Nordic Society: Modern States of Welfare

Examines the role and status of women and marginalized social classes in the Nordic countries, whose societies have been heralded as egalitarian models since the twentieth century. Texts include a variety of media, from literature to sociological works to artifacts of political and popular culture.

Equivalent - Duplicate Degree Credit Not Granted: SCAN 3208

Additional Information: Arts Sci Core Curr: Human Diversity

Arts Sci Gen Ed: Distribution-Arts Humanities

Arts Sci Gen Ed: Diversity-Global Perspective

Departmental Category: Nordic (Formerly Scandinavian)

WGST 3210 (3) American Indian Women

Explores the experiences, perspectives and status of American Indian women in historical and contemporary contexts. Examines representations of Indigenous women in mainstream culture. Emphasizes the agency of American Indian women-their persistence, creativity and activism, especially in maintaining Indigenous traditions.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 3213

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite WGST 2000 or WGST 2600 or ETHN 2001 or ETHN 1023.

Additional Information: Arts Sci Core Curr: Human Diversity

Arts Sci Gen Ed: Distribution-Social Sciences

Arts Sci Gen Ed: Diversity-U.S. Perspective

Arts Sci Gen Ed: Distribution-Arts Humanities

WGST 3220 (3) Women in Islam

Examines the historical and contemporary relation between women, gender and Islamic cultures in different parts of the world. We will consider the role and rights of women in Islam, historical and literary representations of Muslim women, and the historically changing constructions of gender and sexuality in Muslim societies. In addition, we will critically explore the construction of Muslim women in western discourses, including liberal feminist discourse, and ask whether the representation of Muslim women in these discourses achieves or undermines ends that we might consider "Feminist". In attending to the wide range of Muslim women's lived experiences in Islamic communities and cultures, as well as the self-representations of Muslim women themselves, our readings will urge us to reexamine our presumptions about piety, secularism, modernity and feminism.

Recommended: Prerequisite WGST 2000 or WGST 2600.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Asia Content

WGST 3250 (3) Disney's Women and Girls

Examines the construction of gender, race, class, sexual orientation and disability in a selection of Disney's animated films. Cultivates skills of media literacy, exploring how mass media acts to enforce and maintain conventional gendered understandings of power, privilege and difference. Analyzes the political economy of the Disney phenomenon through a feminist lens.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

WGST 3267 (3) Women Writers

Introduces literature by British and American women.

Equivalent - Duplicate Degree Credit Not Granted: ENGL 3267

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: English

WGST 3300 (3) Gender, Sexuality and U.S. Law

Contemporary and historic overview of U.S. courts' treatment of sex and gender. Using the case method, examines policy issues including, but not limited to: same sex marriage and civil unions; privacy; affirmative action; abortion; reproductive technologies; discrimination based on sex and sexual orientation in education and in the workplace.

Equivalent - Duplicate Degree Credit Not Granted: PSCI 3301

Recommended: Prerequisite WGST 2000 or PSCI 1101.

Additional Information: Arts Sci Core Curr: Human Diversity

Arts Sci Gen Ed: Distribution-Social Sciences

Arts Sci Gen Ed: Diversity-U.S. Perspective

Departmental Category: Political Science

WGST 3302 (3) Facilitating Peaceful Community Change

Students gain knowledge and skills that enable them to become effective agents of community change. Focuses on understanding the processes of community building with a multicultural emphasis. Students are encouraged to apply their own life experiences and to examine themselves as potential change agents.

Equivalent - Duplicate Degree Credit Not Granted: INVS 3302

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

WGST 3311 (3) Gender and U.S. Politics: Protest, Polls and Policy

Provides an overview and critical examination of women as political actors within the United States. Students will examine the gendered components of citizenship, election, political office and public policy. Furthermore, students will explore the ways in which gender intersects with class, race, ethnicity, sexual orientation and other identities in U.S. politics.

Equivalent - Duplicate Degree Credit Not Granted: PSCI 3311

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

WGST 3314 (3) Violence Against Women and Girls

Focuses on aspects of the victimization of women and girls that are "Gendered" - namely, sexual abuse and intimate partner abuse. Also explores the importance of race, class and sexuality in gendered violence.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 3314 and SOCY 3314

Recommended: Prerequisite SOCY 1016 or WGST 1016.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

WGST 3400 (3) Gender, Personality, and Culture

Explores the relationship among gender, culture and personality. Brings together the disciplines of psychology and sociology in the study of gender and personality formation through investigation of psychoanalytic theory and the social environment.

Recommended: Prerequisite WGST 2000 or WGST 2700.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

WGST 3410 (3) Gender, Sexuality and Culture in the Modern Middle East

Examines the issues of gender and sexuality in the modern Middle East and North Africa from the colonial period to the present, focusing on how feminist movements, Arab women's writing and constructions of gender and sexuality have been shaped by local, national and international factors.

Equivalent - Duplicate Degree Credit Not Granted: ARAB 3410

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Arabic

WGST 3500 (3) Global Gender Issues

Introduces global gender issues, such as the gendered division of labor in the global economy, migration, women's human rights, environmental issues, gender violence in war, women in the military, nationalism and feminism and the representation of the Third World in the United States. Offers students the opportunity to broaden their perspectives beyond the borders of the United States.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite WGST 2000 or WGST 2050 or WGST 2600.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

Departmental Category: Asia Content

WGST 3505 (3) Historical and Contemporary Issues of African American Women

Explores the social, economic, political, historical and cultural role of African American women from an interdisciplinary perspective. Special emphasis is placed on African American women's rich oral and literary tradition.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 3502

Recommended: Prerequisite WGST 2000 or ETHN 1022 or ETHN 2001.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

WGST 3510 (3) Gender, Sexuality and Global Health

Examines the intersections of gender, sexuality and health in global perspective. Explores how men's and women's health are shaped by gender and sexual relations in a wide range of social contexts, including South and Southeast Asia, Latin America, sub-Saharan Africa and the United States.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

Departmental Category: Sociology

WGST 3600 (3) Latina/x Studies

Drawing from work produced by and about Latinas/xs, discusses the social and cultural construction of race and ethnicity alongside gender and sexuality, the function of nationalism, the politics of migration and citizenship, Latina/x literary production and theory, historiographical trends, Latina feminist theory, activism and the academy, and Latina/x political organizing.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite WGST 2000 or WGST 2050 or WGST 2600.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

WGST 3601 (3) German Women Writers

Explores writing by German/Austrian women from 1945 to the present, with special attention to the representation of the Holocaust, the continuation of avant-garde traditions, innovations in literary form and feminism. Visual arts, film and feminist theory will also be considered in their relation to literature. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: GRMN 3601

Additional Information: Arts Sci Core Curr: Human Diversity

Arts Sci Gen Ed: Distribution-Arts Humanities

Arts Sci Gen Ed: Diversity-Global Perspective

Departmental Category: German

WGST 3650 (3) Gender and Politics in Latin America

Examines Latin American politics with particular focus on women's participation in social movements, war, revolution and elections. Compares women's and men's politics and activism and examines changing gender and sexuality policies, gender relations and the differential impact of political, economic, and social changes on men and women.

Equivalent - Duplicate Degree Credit Not Granted: PSCI 3052

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite WGST 2600 or PSCI 2012 or PSCI 3032.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Political Science

WGST 3670 (3) Gender, Race, Sexuality and Global Migration

Engages in an interdisciplinary study of the intersections of gender, race and sexuality that have created a multicultural, multiethnic and multiracial world. Focuses on the effects of political, economic, social and cultural forces on gender, race and sexuality in migrant communities.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite WGST 2000 or WGST 2600.

Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Distribution-Social Sciences
Arts Sci Gen Ed: Diversity-Global Perspective
Departmental Category: Ethnic Studies

WGST 3672 (3) Gender and the Global Economy

Examines the role of gender in global economy. Explores the impacts of colonialism and modern global economy on gender relations, with particular emphasis on Third World societies. Also focuses on related issues of population politics, environmental crisis, women's sexual exploitation and women's social movements worldwide.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 3672

Recommended: Prerequisite GEOG 1982 or GEOG 1992 or GEOG 2002 or GEOG 2412 or WGST 2000 or WGST 2600.

Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Distribution-Social Sciences
Arts Sci Gen Ed: Diversity-Global Perspective
Departmental Category: Geography

WGST 3700 (3) Topics in U.S. Gender and Sexuality Studies

Examines selected topics in women, gender and sexuality in the US context.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite WGST 2000 or WGST 2600.

WGST 3701 (3) Topics in U.S. Gender and Sexuality Studies (AH)

Examines selected topics in women, gender and sexuality in the arts and humanities, from a U.S. perspective.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors).

Recommended: Prerequisite WGST 2000 or WGST 2600.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

WGST 3702 (3) Topics in U.S. Gender and Sexuality Studies (SS)

Examines selected topics in women, gender and sexuality in the social sciences, from a U.S. perspective.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors).

Recommended: Prerequisite WGST 2000 or WGST 2600.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

WGST 3710 (3) Topics in Global Gender and Sexuality Studies

Content varies by semester and reflects relevant issues in global feminist scholarship.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite WGST 2000 or WGST 2600.

WGST 3711 (3) Topics in Global Gender and Sexuality Studies (AH)

Examines selected topics in women, gender and sexuality in the arts and humanities, from a global perspective.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-86 credits (Junior).

Recommended: Prerequisite WGST 2000 or WGST 2600.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

WGST 3712 (3) Topics in Global Gender and Sexuality Studies (SS)

Examines selected topics in women, gender and sexuality in the social sciences, from a global perspective.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors).

Recommended: Prerequisite WGST 2000 or WGST 2600.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

WGST 3750 (3) Women in Buddhism

Explores diverse representations of the female in Buddhist literature and the social realities of actual women in Asian historical contexts. Through case studies that traverse Buddhist Asia, we delve into monastic views of the female body, philosophical analyses of the emptiness of gender, idealized images of the feminine in Buddhist tantra and contemporary issues such as the nun's revival moment.

Equivalent - Duplicate Degree Credit Not Granted: RLST 3750

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Religious Studies
Departmental Category: Asia Content

WGST 3767 (3) Feminist Fictions

Examines a series of literary texts to consider how writers across the world have used fiction to creatively stage and reimagine gender and sexuality. Attends to the formal and narrative techniques by which these texts call attention to the fictionality, and thereby the creative malleability, of gender itself. Some cinematic and performance texts will also be included.

Equivalent - Duplicate Degree Credit Not Granted: ENGL 3767

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: English

WGST 3800 (3) Advanced Writing in Feminist Studies

Offers expository writing and training in analytical and descriptive skills, structures or argument, critical thinking, the rhetoric of persuasion, and the development of a personal voice. Readings and papers focus on basic issues in gender studies.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite WGST 2000 or WGST 2600.

Additional Information: Arts Sci Core Curr: Written Communication
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Written Communication-Upper

WGST 3930 (1-6) Women and Gender Studies Internship

Provides field experience in local and national government and non-governmental agencies focusing on women and gender-related issues. Supervision by approved field instructors. Students must relate their academic experience to their field work experience through a portfolio and a final paper. Department enforced prerequisite: 6 hours of course work in Women and Gender Studies and 30 cumulative credit hours.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

WGST 3940 (1) Practicum in Women and Gender Studies

Enriches the academic experience of majors and minors within Women and Gender Studies. Usually will combine readings from books with lectures and discussions, community outreach and in-house publications spanning the interdisciplinary focus of the department.

Repeatable: Repeatable for up to 4.00 total credit hours.

Requisites: Restricted to Womens Studies (WGST) majors or minors only.

Grading Basis: Letter Grade

WGST 4000 (3) Advanced Topics in Gender and Sexuality Studies

Provides an advanced interdisciplinary course organized around a specific topic, problem, or issue relating to gender and sexuality. Course work includes discussion, reading and written projects.

Equivalent - Duplicate Degree Credit Not Granted: WGST 5000

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite WGST 2000 or WGST 2600.

WGST 4001 (3) Advanced Topics in Gender and Sexuality Studies (AH)

Provides an advanced interdisciplinary course organized around a specific issue in the social sciences relating to gender and sexuality.

Equivalent - Duplicate Degree Credit Not Granted: WGST 5001

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite WGST 2000 or WGST 2600.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

WGST 4002 (3) Advanced Topics in Gender and Sexuality Studies (SS)

Provides an advanced interdisciplinary course organized around a specific issue in the arts and humanities relating to gender and sexuality.

Equivalent - Duplicate Degree Credit Not Granted: WGST 5002

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite WGST 2000 or WGST 2600.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

WGST 4010 (3) Gender, Genocide and Mass Trauma

Studies the persistence of genocide and the effects of mass trauma on women and girls. Within the framework of political and social catastrophe, examines cataclysmic world events and the traumatic consequences for women of religious persecution, colonialism, slavery and the genocides of the 20th and 21st centuries.

Equivalent - Duplicate Degree Credit Not Granted: SOCY 4000

Recommended: Prerequisite SOCY 1016 or WGST 1016 or WGST 2000 or SOCY 3314 or WGST 3314.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Sociology

WGST 4016 (3) Sex, Gender and Society 2

Studies status and power differences between the sexes at individual, group and societal levels. Examines empirically established sex differences and reviews biological, psychological and sociological explanations for gender differences.

Equivalent - Duplicate Degree Credit Not Granted: SOCY 4016

Requisites: Requires a prerequisite course of SOCY 1016 or WGST 1016 or WGST 2000 (minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Sociology

WGST 4063 (3) Women in Victorian England

Examines changing roles and status of women in a period of expansion. Studies the impact of industrialization on working women, sexuality, family planning, expansion of women in education, politics and the professions, the single women crisis and women's rights.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4063

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: History

WGST 4073 (3) Performing Voices of Women

Explores theories underlying the "feminine voice," varied perspectives in prose and poetry, ways of embodying these voices and perspectives in performance forms and ultimately the students' own voices through creation of autobiographical performance pieces (some to be presented for student audiences). Open to both men and women.

Equivalent - Duplicate Degree Credit Not Granted: THTR 4073

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Theatre

WGST 4086 (3) Family and Society

Studies the changing relationship between family and social structure. Examines variations in family organization and considers political, social, ideological, demographic and economic determinants of family formation.

Equivalent - Duplicate Degree Credit Not Granted: SOCY 4086

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite SOCY 3001.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Sociology

WGST 4277 (3) Topics in Women's Literature

Focuses on areas of research interest in the study of women's literature, such as selected themes or critical issues. Students are expected to contribute original research to the topic under consideration.

Equivalent - Duplicate Degree Credit Not Granted: ENGL 4277

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

WGST 4287 (3) Special Topics in LGBT Literature

Examines a special topic in LGBT literature, foregrounding an approach that focuses on how same-sex desire is represented in literature.

May explore the rhetorical and ideological depiction of masculinity and femininity; literary representations of inversion, bisexuality, and transgenderism; the social construction of homosexuality and heterosexuality. Specific topics vary each semester.

Equivalent - Duplicate Degree Credit Not Granted: LGBT 4287 and ENGL 4287

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

WGST 4300 (3) Sex, Power, Politics: International Perspectives

Studies the commercial trade of sexual labor in the global economy, examining theories and assumptions about sexual-economic exchanges and gendered and racialized relations of power in the sex trade.

Emphasizes prostitution.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite WGST 2600 or WGST 3100.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

WGST 4301 (3) Gender, Race and Immigration in Germany and Europe

Introduces students to debates surrounding migration and race in contemporary Germany. Emphasis on reading texts in context using tools of cultural studies, integrating analyses of gender, race, nation and sexuality. Texts may include film, literature, television, magazine images. Topics include: questioning multiculturalism, self-representation, integration, Islam, citizenship, violence, public space, youth culture, racism and nationalism. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: GRMN 4301 and GRMN 5301

Additional Information: Arts Sci Core Curr: Human Diversity

Arts Sci Gen Ed: Distribution-Arts Humanities

Arts Sci Gen Ed: Distribution-Social Sciences

Arts Sci Gen Ed: Diversity-Global Perspective

Departmental Category: German

WGST 4331 (3) Gender, Race, Class, and Sexuality in Popular Culture

Studies the construction, interconnections, and replications of gender, race, class and sexuality in popular culture and how these constructs become cultural norms and mores. Uses critical methods with a focus on producing responsible viewers and readers.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

WGST 4400 (3) Critical Inquiries in Transgender Studies

Examines theories, methods and debates in the emerging field of transgender studies. Drawing on interdisciplinary perspectives, examines transgender identities, communities and political movements in different historical and cultural contexts. Focuses on crosscutting issues that shape transgender subjectivities, with special attention given to how transgender movements negotiate race, class, sexuality, labor, culture and nation.

Equivalent - Duplicate Degree Credit Not Granted: WGST 5400 and LGBT 4400 and LGBT 5400

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: LGBT Studies

WGST 4471 (3) Women in 20th-21st Century Russian Culture

Examines issues facing women in 20th-21st century Russia, based on study of current events, history, literature, posters and film. Studies images of women as Amazons and rebels, salon hostesses and poets, New Soviet Women and women in combat, prostitutes and mothers. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 4471 and RUSS 5471

Recommended: Prerequisite lower level literature or culture course.

Additional Information: Arts Sci Core Curr: Human Diversity

Arts Sci Gen Ed: Distribution-Arts Humanities

Arts Sci Gen Ed: Diversity-Global Perspective

Departmental Category: Russian

WGST 4500 (3) Gender Politics and Global Activism

Addresses the problems and challenges women face around the world and the ways in which women have mobilized to address them. Explores political activism at the local, national, regional and global levels.

Focuses on different forms of activism, including strategies aimed at working with and within governmental institutions, as well as outside and against them.

Equivalent - Duplicate Degree Credit Not Granted: PSCI 4391

Recommended: Prerequisite WGST 2000 or WGST 2600.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

WGST 4616 (3) History of Gender and Sexuality in the United States to 1870

Examines the social history and cultural construction of genders and sexualities in America to 1870, exploring how discourses of race, religion, nationalism, medicine and criminality have shaped erotic encounters, informed gender and sexual identities a served as sites of political conflict.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4616 and HIST 5616

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: History

WGST 4619 (3) Women in East Asian History

Considers major issues in the history of women in East Asia (China, Korea, Japan) in the 17th through 20th centuries. Focuses on gender roles in Asian family, state and cultural systems. Topic varies in any given semester.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4619 and HIST 5619

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: History

Departmental Category: Asia Content

WGST 4620 (3) A Global History of Sexuality: The Modern Era

Provides an introduction to the history of sexuality in the modern era through engagement with recent interdisciplinary research into what sexuality has meant in the everyday lives of individuals; in the imagined communities formed by the bonds of shared religion, ethnicity, language and national citizenship; on the global stage of cultural encounter, imperialist expansion, transnational migration and international commerce.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4620

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

WGST 4626 (3) History of Gender and Sexuality in the United States from 1870

Examines the social history and cultural construction of genders and sexualities in America from 1870, exploring how discourses of race, religion, nationalism, medicine and criminality have shaped erotic encounters, informed gender and sexual identities and served as sites of political conflict.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4626

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: History

WGST 4636 (3) Lesbian and Gay History: Culture and Politics and Social Change in the U.S.

Considers current theoretical approaches to the history of sexuality and traces the changing meaning of same-sex sexuality in the U.S. through investigation of lesbian and gay identity formation, community development, politics and queer cultural resistance.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4636 and HIST 5636

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite HIST 1015 or HIST 1025 or LGBT 2000 or WGST 2000 or WGST 2600.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

WGST 4640 (3) Women, Gender and War

Study of how women experience war, how the structure, practice and memory of war, and the rights and obligations of military service (masculinity and femininity) are structured by the gender system.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4640

Recommended: Prerequisite HIST 1015 or HIST 1020 or HIST 1025 or HIST 1123 or HIST 1628 or HIST 1708.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: History

WGST 4800 (3) Senior Colloquium in Feminist Studies

Provides students with the opportunity to actively reflect on their education and to complete a research project that incorporates an interdisciplinary and feminist approach to the study of gender, class, race, ethnicity and sexuality. Offered each spring.

Requisites: Requires prerequisite courses of WGST 2000 and WGST 2600 and WGST 3100 (all minimum grade C-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Womens Studies (WGST) majors or minors only.

WGST 4840 (1-6) Independent Study

Department enforced prerequisite: over minimum GPA of 3.3.

Repeatable: Repeatable for up to 7.00 total credit hours.

WGST 4850 (3) Gender in Hagiography

Explores gendered ideals of sainthood in medieval hagiographic literature. We draw primarily from the lives of female mystics in Buddhist and Christian sources, and examine the construction of mendicant masculinities. Reading from an array of primary sources, we query the category of mysticism and ask why visionary experience has so often been gendered female.

Equivalent - Duplicate Degree Credit Not Granted: RLST 4850 and RLST 5850

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Religious Studies

WGST 4950 (3) Honors Research

For qualified Women and Gender Studies majors working on the research phase of departmental honors. Department enforced prerequisite: overall GPA of 3.3.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sciences Honors Course

WGST 4999 (1-3) Senior Honors Thesis

Qualified Women and Gender Studies majors may write an honors thesis, an in-depth research paper, on a topic of choice. Thesis hours available to majors only after successfully completing the research phase.

Requisites: Restricted to Womens Studies (WGST) majors only.

Additional Information: Arts Sciences Honors Course

Women and Gender Studies - Bachelor of Arts (BA)

The interdisciplinary women and gender studies undergraduate major and minor offer students a rigorous but flexible program of study that examines women, gender and sexuality in relation to race, class, national identity and ability, among other variables. Students explore the ways that gender and sexuality work in diverse communities and in different cultural and historical contexts. Drawing from approximately 50 courses, many cross-listed with other academic units, students fulfill the requirements of the major or minor and can design an emphasis relevant to their interests by focusing on one of three cognate areas: 1) gender/sexuality, 2) race/ethnicity and 3) global/transnational.

Requirements

Program Requirements

Students must complete the general requirements of the College of Arts and Sciences and the required courses listed below.

Students must complete a minimum of 36 credit hours with grades of C- or better in approved women and gender studies courses, a minimum of 24 credit hours of which must be upper-division (3000- or 4000-level).

Required Courses and Credits

Code	Title	Credit Hours
Required Courses		
WGST 2000	Introduction to Feminist Studies	3
WGST 2600	Gender, Race, and Class in a Global Context	3
WGST 3100	Feminist Theories	3
WGST 4800	Senior Colloquium in Feminist Studies	3
Cognate Areas		
At least three courses, one from each of the three cognate areas (see below)		9
Electives ¹		
Three upper-division approved WGST elective courses (those listed under upper-division electives or cognate areas below)		9
Two additional lower- or upper-division approved WGST elective courses (see below)		6
Total Credit Hours		36

¹ Internships and independent study credit hours may apply, as well as special topics courses (WGST 3701, WGST 3702, WGST 3711, WGST 3712, WGST 4001 and WGST 4002); see advisor or department for more information.

Cognate Areas

Students must take three courses (for a total of 9 credit hours), one each from the three following cognate areas. Select topics offerings of special topics courses may apply to cognate areas; see advisor or department for more information.

Gender/Sexuality Cognate Area

Code	Title	Credit Hours
At least one course (3 credit hours) from the gender/sexuality cognate area		
LGBT 3796	Queer Theory	
WGST/SOCY 3046	Topics in Sex and Gender	
WGST 3250	Disney's Women and Girls	
WGST 3300	Gender, Sexuality and U.S. Law	
WGST 3510	Gender, Sexuality and Global Health (may count for gender/sexuality or global/transnational, but not both)	
WGST 3767	Feminist Fictions (may count for gender/sexuality or global/transnational, but not both)	
WGST 4010	Gender, Genocide and Mass Trauma	
WGST 4016	Sex, Gender and Society 2	
WGST 4287	Special Topics in LGBT Literature	
WGST 4400	Critical Inquiries in Transgender Studies	
WGST 4620	A Global History of Sexuality: The Modern Era (may count for gender/sexuality or global/transnational, but not both)	
WGST 4636	Lesbian and Gay History: Culture and Politics and Social Change in the U.S.	
WRTG 3020	Topics in Writing (select topics only; see advisor or department for approved topics)	

Race/Ethnicity Cognate Area

Code	Title	Credit Hours
At least one course (3 credit hours) from the race/ethnicity cognate area		
ETHN 3026	Women of Color: Chicanas in U.S. Society	
WGST/ETHN/SOCY 3044	Race, Class, Gender, and Crime	
WGST 3135/ETHN 3136	Chicana Feminisms and Knowledges	
WGST 3210/ETHN 3213	American Indian Women	
WGST/PSCI 3311	Gender and U.S. Politics: Protest, Polls and Policy	
WGST 3505	Historical and Contemporary Issues of African American Women	
WGST 3600	Latina/x Studies	
WGST/MDST 4331	Gender, Race, Class, and Sexuality in Popular Culture	

WGST/HIST 4619	Women in East Asian History
----------------	-----------------------------

Global/Transnational Cognate Area

Code	Title	Credit Hours
At least one course (3 credit hours) from the global/transnational cognate area		
WGST/SOCY 3012	Women and Development	
WGST 3220	Women in Islam	
WGST 3500	Global Gender Issues	
WGST 3510	Gender, Sexuality and Global Health (may count for gender/sexuality or global/transnational, but not both)	
WGST 3650/PSCI 3052	Gender and Politics in Latin America	
WGST 3670	Gender, Race, Sexuality and Global Migration	
WGST/GEOG 3672	Gender and the Global Economy	
WGST/ENGL 3767	Feminist Fictions (may count for gender/sexuality or global/transnational, but not both)	
WGST 4300	Sex, Power, Politics: International Perspectives	
WGST/GRMN 4301	Gender, Race and Immigration in Germany and Europe	
WGST 4500/PSCI 4391	Gender Politics and Global Activism	
WGST/HIST 4620	A Global History of Sexuality: The Modern Era (may count for gender/sexuality or global/transnational, but not both)	

Lower-Division Electives

Code	Title	Credit Hours
No more than 6 credit hours of lower-division electives		
LING 2400	Language, Gender and Sexuality	
LGBT/ENGL 2707	Introduction to Lesbian, Bisexual, and Gay Literature	
WGST/SOCY 1006	The Social Construction of Sexuality	
	or WGST 101 Sex, Gender, and Society 1	
	or SOCY 101 Sex, Gender, and Society 1	
WGST/ENGL 1260	Introduction to Women's Literature	
WGST 2020	Femininities, Masculinities, Alternatives	
WGST 2030/LGBT 2000	Introduction to Lesbian, Gay, Bisexual, and Transgender Studies	
WGST 2050	Gender, Sexuality, and Popular Culture	
WGST 2200	Women, Gender, Literature, and the Arts	
WGST 2400	Women of Color and Activism	
WGST/PSYC 2700	Psychology of Gender and Sexuality	

Upper-Division Electives

Code	Title	Credit Hours
ARTH 3209	Art, Culture, and Gender Diversity, 1400–1600: Renaissance Art Out of the Canon	3
ENGL 3217	Topics in Gender Studies	3
FILM 3013	Women and Film	3
ITAL 4730	Italian Feminisms: Culture, Theory, and Narratives of Difference	3
WGST/SOCY 3016	Marriage and the Family in the United States	3
WGST 3020	Methods of Inquiry in Gender, Race, Class, and Sexuality	3
WGST/PHIL 3110	Feminist Practical Ethics	3
WGST/PSCI 3174	Sex, Power, and Politics: U.S. Perspectives	3
WGST/JWST 3200	Religion and Feminist Thought	3
WGST 3201/ JWST 3202/ RLST 3202	Women, Gender & Sexuality in Jewish Texts & Traditions	3
WGST/ENGL 3267	Women Writers	3
WGST/INVS 3302	Facilitating Peaceful Community Change	3
WGST/ETHN/ SOCY 3314	Violence Against Women and Girls	3
WGST/ARAB 3410	Gender, Sexuality and Culture in the Modern Middle East	3
WGST/GRMN 3601	German Women Writers	3
WGST/RLST 3750	Women in Buddhism	3
WGST 3800	Advanced Writing in Feminist Studies	3
WGST 4063	Women in Victorian England	3
WGST/THTR 4073	Performing Voices of Women	3
WGST/SOCY 4086	Family and Society	3
WGST/ENGL 4277	Topics in Women's Literature	3
WGST/RUSS 4471	Women in 20th-21st Century Russian Culture	3
WGST/HIST 4616	History of Gender and Sexuality in the United States to 1870	3
WGST/HIST 4626	History of Gender and Sexuality in the United States from 1870	3
WGST/RLST 4850	Gender in Hagiography	3

Honors

Students may take up to 6 credit hours of honors in women and gender studies; credit hours apply to upper-division electives in the major.

For more information about pursuing departmental honors, visit the department honors (<http://www.colorado.edu/wgst/students/undergraduates/wgst-honors-program>) webpage and the main Honors Program (<http://www.colorado.edu/honors/graduation>) webpage describing qualifications, requirements and deadlines.

Code	Title	Credit Hours
WGST 4950	Honors Research	3
WGST 4999	Senior Honors Thesis	1-3

Internship

Students may take up to 6 credit hours of internship in women and gender studies; credit hours apply to upper-division electives in the major. See the College of Arts and Sciences guidelines (http://www.colorado.edu/advising/sites/default/files/attached-files/internshipcredit_0.pdf) for earning internship credit.

Code	Title	Credit Hours
WGST 3930	Women and Gender Studies Internship	1-6

Special Topics

Students may take up to 6 credit hours in WGST topics courses; course topics vary each semester. Ask the women and gender studies advisor or department about how each course applies to major cognate area requirements, if applicable.

Code	Title	Credit Hours
WGST 3701	Topics in U.S. Gender and Sexuality Studies (AH)	3
WGST 3702	Topics in U.S. Gender and Sexuality Studies (SS)	3
WGST 3711	Topics in Global Gender and Sexuality Studies (AH)	3
WGST 3712	Topics in Global Gender and Sexuality Studies (SS)	3
WGST 4001	Advanced Topics in Gender and Sexuality Studies (AH)	3
WGST 4002	Advanced Topics in Gender and Sexuality Studies (SS)	3

Graduating in Four Years

Consult the Four-Year Guarantee Requirements for more information on eligibility. The concept of "adequate progress" as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress in women and gender studies, students should meet the following requirements:

- By the beginning of the second semester, declare the major.
- By the end of the fourth semester, complete WGST 2000 and WGST 2600 and 9 additional credit hours of major requirements.
- By the end of the sixth semester, complete WGST 3100 and 9 additional credit hours of major requirements (27 credit hours total of the major requirements completed).
- During the seventh and eighth semester, complete WGST 4800 and 6 additional credit hours of the major requirements.

Students should consult with their advisor for specific recommendations. The following sample plan will outline the major requirements, but the order of some classes can vary greatly. It is important for students to check the degree audit and work with the major advisor each semester to make sure of the requirements and graduation timeline.

Four-Year Plan of Study

Through the required course work for the major, students will complete 9 credit hours of the Social Sciences area of the Gen Ed Distribution Requirement, as well as the US Perspective component of the Gen Ed Diversity Requirement. Depending on other courses taken for the major, students could easily complete the other 3 credit hours in the Social Sciences area and much of the Arts and Humanities area of the Gen Ed Distribution Requirement, as well as the Global Perspective component of the Gen Ed Diversity Requirement.

Course	Title	Credit Hours
Year One		
Fall Semester		
WGST 2000 or WGST 2600	Introduction to Feminist Studies or Gender, Race, and Class in a Global Context	3

Women and Gender Studies - Minor

The interdisciplinary women and gender studies minor offer students a rigorous but flexible program of study that examines women, gender and sexuality in relation to race, class, national identity and ability, among other variables. Students explore the ways that gender and sexuality work in diverse communities and in different cultural and historical contexts.

Drawing from approximately 50 courses, many cross-listed with other academic units, students fulfill the requirements of the minor and can design an emphasis relevant to their interests by focusing on one of three cognate areas: 1) gender/sexuality, 2) race/ethnicity, and 3) global/transnational.

Declaration of a minor is open to any student enrolled at CU Boulder, regardless of college or school.

Requirements

Required Courses and Credits

Students must complete a minimum of 21 credit hours with grades of C- or better in approved women and gender studies courses, 12 credit hours of which must be upper division (3000 or 4000 level). Students are allowed to apply no more than 9 credit hours, including 6 upper-division credit hours, of transfer work toward a minor.

Code	Title	Credit Hours
Required Courses		
WGST 2000	Introduction to Feminist Studies	3
WGST 2600	Gender, Race, and Class in a Global Context	3
WGST 3100	Feminist Theories	3
Cognate Areas		
One course each from two of the three cognate areas (see below)		6
Electives ¹		
Any upper-division course listed below under upper-division electives or cognate areas not used to fulfill any other minor requirements.		3
Any lower- or upper-division course listed below that has not been used to fulfill any other minor requirements.		3
Total Credit Hours		21

¹ Internships and independent study credit hours may apply, as well as special topics courses (WGST 3701, WGST 3702, WGST 3711, WGST 3712, WGST 4001 and WGST 4002); see advisor or department for more information.

Cognate Areas

Students must take one course each from two different cognate areas for a total of 6 credit hours. Select topics offerings of special topics courses may apply to cognate areas; see advisor or department for more information.

Gender/Sexuality Cognate Area

Code	Title	Credit Hours
Gender/Sexuality		
		0-3
LGBT 3796	Queer Theory	
WGST/SOCY 3046	Topics in Sex and Gender

WGST/HIST 4626	History of Gender and Sexuality in the United States from 1870
WGST/RLST 4850	Gender in Hagiography

Global Gender and Sexuality Studies - Certificate

The Department of Women and Gender Studies offers an undergraduate certificate in global gender and sexuality studies. The ever-increasing movement of people, commodities, politics and culture that define "globalization" affects all of us in different ways.

The certificate in global gender and sexuality studies provides students with an opportunity to study how individuals and groups from diverse gender, racial, ethnic, national, class and sexual backgrounds live in and engage with the world and how processes of global change shape gender relations locally, nationally and internationally. The certificate is designed for students who wish to understand, analyze and respond to these dramatic global transformations and their impact on women and gender relations, complementing students' majors and interests and preparing them for graduate studies and employment.

This interdisciplinary undergraduate certificate program takes advantage of the research strengths of the department's core and associate faculty and enhances the experience of undergraduate students in any major, including international affairs, political science, history,

ethnic studies, geography, English, anthropology, sociology, integrative physiology, environmental studies and many others. Career specialization in international gender and sexuality has grown in both the private and public sectors, including fields such as international development, finance, public health, public policy and education.

For more details including application instructions, visit the Undergraduate Certificate in Global Gender & Sexuality Studies (<http://www.colorado.edu/wgst/ggss>) webpage or email wgst@colorado.edu.

Requirements

Required Courses and Credits

Certificate requirements include 18 credit hours of specified course work, including 12 credit hours at the upper-division level.

Code	Title	Credit Hours
Lower-Division Required Course		
WGST 2600	Gender, Race, and Class in a Global Context	3
Upper-Division Required Courses (must select two of the following courses)		
WGST 3500	Global Gender Issues	6
WGST 3510	Gender, Sexuality and Global Health	
WGST 3650	Gender and Politics in Latin America	
WGST 3711	Topics in Global Gender and Sexuality Studies (AH) or WGST 3712 Topics in Global Gender and Sexuality Studies (SS)	
WGST 3767	Feminist Fictions	
WGST 4010/ SOCY 4000	Gender, Genocide and Mass Trauma	
WGST 4300	Sex, Power, Politics: International Perspectives	
WGST 4500/ PSCI 4391	Gender Politics and Global Activism	
WGST/HIST 4620	A Global History of Sexuality: The Modern Era	
Elective Courses		
<i>Lower-Division Electives (no more than 3 credit hours)</i>		
WGST 2050	Gender, Sexuality, and Popular Culture	9
ANTH 1170	Exploring Culture and Gender through Film	
LING 2400	Language, Gender and Sexuality	
<i>Upper-Division Electives (students may draw from the upper-division requirements listed above as well as the following courses, 6-9 credit hours)</i>		
WGST/SOCY 3012	Women and Development	9
WGST 3201/ JWST 3202/ RLST 3202	Women, Gender & Sexuality in Jewish Texts & Traditions	
WGST/SCAN 3208	Women in Nordic Society: Modern States of Welfare	
WGST 3210/ ETHN 3213	American Indian Women	
WGST 3220	Women in Islam	
WGST 3670	Gender, Race, Sexuality and Global Migration	
WGST 3672	Gender and the Global Economy	
WGST/GRMN 4301	Gender, Race and Immigration in Germany and Europe	

WGST/HIST 4619	Women in East Asian History	18
WGST/HIST 4640	Women, Gender and War	
ETHN/FILM 4001	Screening Race, Class & Gender in the U.S. and the Global Borderland	
ANTH 4505	Globalization and Transnational Culture	
Total Credit Hours		18

Appropriate topics courses offered by other departments and programs—those that deal centrally with issues of gender and/or sexuality in global context—may count for upper division elective credit with the permission of the department's director of undergraduate studies. Students must get the director's approval beforehand, or credit toward the certificate is not guaranteed.

Study Abroad and CU Global Seminars

Appropriate study abroad courses and CU Global Seminars that deal centrally with issues of gender and/or sexuality in global context may count for lower- or upper-division elective credit with the permission of the department's director of undergraduate studies. Only CU-sponsored study abroad programs and Global Seminars will count as CU credit. Appropriate study abroad courses taken through other accredited study abroad programs may count for elective transfer credit with the permission of the director of undergraduate studies. In all of these cases, students must get the director's approval beforehand, or credit toward the certificate is not guaranteed.

Writing and Rhetoric, Program for

The Program for Writing and Rhetoric (PWR) is a free-standing unit in the College of Arts and Sciences responsible for campus-wide instruction in writing. The program coordinates and oversees all writing curricula and instruction intended to meet college and campus requirements, including efforts in specific disciplines and targeted campus programs.

The program is committed to training students to think critically about the texts they read and the writing they produce, and to enable them to shape and express ideas with clarity and grace in any context: academic, professional or civic. Classes are generally conducted as intensive writing workshops, placing a premium on thoughtful, substantive revision.

The program offers both lower-division and upper-division courses, as well as some graduate seminars. Certain undergraduate courses fulfill the College of Arts and Sciences written communication requirement, and some also fulfill graduation requirements in other colleges. Students should check with their advisors to be sure that they are taking the right course to fulfill their requirement.

For information about specific classes and their instructors, students should visit www.colorado.edu/pwr (<http://www.colorado.edu/pwr>).

Courses

WRTG 1100 (4) Extended First-Year Writing and Rhetoric

Extended version of WRTG 1150 that carries an additional hour of credit and is intended for students desiring more preparation and practice in college writing. Meets the same goals as WRTG 1150. Features one extra hour of small group work out of class. Focuses on critical analysis, argument, inquiry and information literacy. Taught as a writing workshop, the course places a premium on invention, drafting and thoughtful revision. For placement criteria, see the arts and sciences advising office.

Repeatable: Repeatable for up to 8.00 total credit hours.

Additional Information: Arts Sci Core Curr: Written Communication
Arts Sci Gen Ed: Written Communication-Lower
MAPS Course: English

WRTG 1150 (3) First-Year Writing and Rhetoric

Rhetorically informed introduction to college writing. Focuses on critical analysis, argument, inquiry and information literacy. Taught as a writing workshop, the course places a premium on invention, drafting and thoughtful revision. For placement criteria, see the arts and sciences advising office.

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Arts Sci Core Curr: Written Communication
Arts Sci Gen Ed: Written Communication-Lower
MAPS Course: English

WRTG 1250 (3) Advanced First-Year Writing and Rhetoric

Advanced version of WRTG 1150 intended for more experienced writers, this course meets the same goals as WRTG 1150 but at a more challenging level. Taught as a writing workshop, the course places a premium on invention, drafting and thoughtful revision. For placement criteria, see the arts and sciences advising office.

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Arts Sci Core Curr: Written Communication
Arts Sci Gen Ed: Written Communication-Lower
MAPS Course: English

WRTG 1840 (1-3) Independent Study in Writing

Repeatable: Repeatable for up to 8.00 total credit hours.

WRTG 2020 (3) Introduction to Creative Nonfiction

Explores from both the reader's and writer's perspectives the forms of creative nonfiction, including personal essay and memoir. Students will read and write extensively within this genre, develop skill in revision and peer critique and learn how to submit work for publication. Does not fulfill core requirements. Department enforced prerequisite: WRTG 1150 or equivalent (completion of lower-division writing requirement).

WRTG 2090 (3) Electives in Writing

Explores a variety of academic and professional writing genres, ranging from research to technical writing, in intensive workshops. Students read and write extensively across genres. Check with program for semester offerings. Designed for self-motivated students in all majors. Does not fulfill core requirements. Department enforced prereq., WRTG 1150 or equivalent (completion of lower-division writing requirement)

Repeatable: Repeatable for up to 6.00 total credit hours.

WRTG 3007 (3) Writing in the Visual Arts

Enables students in the arts to improve their writing skills through organization, presentation, critique and revision. Writing assignments include formal writing (analysis and argument), informal writing and grant proposals. Department enforced prerequisite: WRTG 1150 or equivalent (completion of lower-division writing requirement).

Requisites: Restricted to students with 57-180 credits (Junior or Senior) AAAH or C-FILM or FILM or FMST or AASA or AASF or THTR or TBFA or DNCE or DBFA or AMST or ARCH or ATLS or BASA or CLAS or DSGN or ETHN or JADV or JAST or MDST or RLST or TMEN majors only.

Additional Information: Arts Sci Core Curr: Written Communication
Arts Sci Gen Ed: Written Communication-Upper

WRTG 3020 (3) Topics in Writing

Through sustained inquiry into a selected topic or issue, students will practice advanced forms of academic writing. Emphasizes analysis, criticism and argument. Taught as a writing workshop, places a premium on substantive, thoughtful revision. Department enforced prerequisite: WRTG 1150 or equivalent (completion of lower-division writing requirement).

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Arts and Sciences (ARSCU) or College of Media, Communication and Information (CMCIU) or Business (BUSNU) students only.

Additional Information: Arts Sci Core Curr: Written Communication
Arts Sci Gen Ed: Written Communication-Upper

WRTG 3030 (3) Writing on Science and Society

Through selected reading and writing assignments, students consider ethical and social ramifications of science policy and practice. Focuses on critical thinking, analytical writing, and oral presentation. Taught as a writing workshop, the course addresses communication with professional and non-technical audiences.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with 57-180 credits Engineering, MCDB, EBIO, GEOL, ASTR, IPHY, PHYS, ENVS, MATH, ECON, BCHM, CHEM, PSYC, NRSC, or CSCI majors only.

Additional Information: GT Pathways: GT-CO3 - Communication:
Advanced Writing Course

Arts Sci Core Curr: Written Communication
Arts Sci Gen Ed: Written Communication-Upper

WRTG 3035 (3) Technical Communication and Design

Rhetorically informed introduction to technical writing that hones communication skills in the context of technical design activities. Treats design as a collaborative, user-oriented, problem-based activity, and technical communication as a rhetorically informed and persuasive design art. Taught as a writing workshop emphasizing critical thinking, revision, and oral presentation skills. Focuses on client-driven design projects and effective communication with multiple stakeholders.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering, College of Media, Comm Info, MCDB, EBIO, GEOL, ASTR, IPHY, ENVS, MATH, ECON, BCHM, CHEM, PHYS, ENVD, PLAN, DSGN, ARCH, NRSC, or CSCI majors only.

Additional Information: Arts Sci Core Curr: Written Communication
Arts Sci Gen Ed: Written Communication-Upper

WRTG 3040 (3) Writing on Business and Society

Through selected reading and writing assignments, students examine ethical and social issues in the context of business decision-making processes. Focuses on critical thinking, analytical writing and oral presentation. Taught as a writing workshop, the course emphasizes effective communication with professional and non-technical audiences. Department enforced prerequisite: WRTG 1150 or equivalent (completion of lower-division writing requirement).

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Core Curr: Written Communication
Arts Sci Gen Ed: Written Communication-Upper

WRTG 3090 (1-3) Open Topics in Writing: Advanced

Advanced topics course providing intensive, specialized writing instruction in selected topics. Check with the program for semester offerings. Does not fulfill core requirements. Department enforced prerequisite: WRTG 3007 or WRTG 3020 WRTG 3030 or WRTG 3035 or WRTG 3040 or instructor consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

WRTG 3840 (1-3) Independent Study

Department enforced prerequisite: WRTG 3007 or WRTG 3020 or WRTG 3030 or WRTG 3035 or WRTG 3040 or instructor consent required.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Writing - Certificate

The interdisciplinary certificate in writing allows CU Boulder undergraduates to gain an understanding of and demonstrate expertise in writing studies, broadly defined. The certificate offers a curriculum that goes well beyond the writing courses that schools and colleges require of all students, thereby complementing a student's academic major, preparing students for professional life and enriching students' awareness of writing as a life-long tool for civic engagement. The certificate communicates the importance placed on writing well, and documents accomplishments of interest to graduate programs or workplaces emphasizing effective communication skills.

The certificate in writing is housed in the Program for Writing and Rhetoric (PWR), and the curriculum is intentionally interdisciplinary. Participating units beyond PWR include English, linguistics, communication, journalism, media studies and education. The certificate includes a practicum component, and culminates in a curated electronic

portfolio that students can use as they pursue further professional interests.

Requirements

Student's must complete at least 18 credit hours, 9 of which must be upper division, and adhere to the following:

- At least 6 credit hours: WRTG courses within the PWR (not including 1000-level courses).
- At least 6 credit hours: courses from outside of the PWR.
- At least 1 credit hour: required portfolio curation pass/fail course, and practicum course(s) focusing on applied professional work.

No more than two courses (6 credit hours) can be counted from a student's major.

Overview of Required Courses

Code	Title	Credit Hours
Writing and Rhetoric Courses		
Select at least two courses (6 credits) from the following:		6
WRTG 2020	Introduction to Creative Nonfiction	
WRTG 2090	Electives in Writing	
WRTG 3007	Writing in the Visual Arts	
WRTG 3020	Topics in Writing	
WRTG 3030	Writing on Science and Society	
WRTG 3035	Technical Communication and Design	
WRTG 3040	Writing on Business and Society	
WRTG 3090	Open Topics in Writing: Advanced	
WRTG 3840	Independent Study	
Courses Outside Writing & Rhetoric		
Select at least two courses (6 credits) outside of the PWR. See details below.		6
Portfolio Curation & Practicum Course(s)		1
Electives		5
Total Credit Hours		18

About the Requirements

Courses from Outside the Program for Writing and Rhetoric

Select at least two courses (6 credits) outside the program from the following two categories, in any combination.

Courses that Fulfill the A&S Upper-Division Written Communication Requirement

Code	Title	Credit Hours
ARSC 3100	Multicultural Perspective and Academic Discourse	3
CHIN 3200	Adv Wrtg Topics on Chinese & Japanese Literature and Civilization	3
EBIO 3940	Written Communication in the Sciences	3
ENVS 3020	Advanced Writing in Environmental Studies	3
GEOL 3090	Developing Scientific Writing Skills	3
HIST 3020	Historical Thinking & Writing	3
HONR 3220	Advanced Honors Writing Workshop	3
IPHY 3700	Scientific Writing in Integrative Physiology	3
ITAL 3025	Advanced Composition 2: Introduction to Literary Writing	3

JPNS 3200	Adv Wrtg Topics on Chinese & Japanese Literature and Civilization	3
PHIL 3480	Critical Thinking/Writing in Philosophy	3
PHYS 3050	Writing in Physics: Problem-Solving and Rhetoric	3
RLST 3020	Advanced Writing in Religious Studies	3
SPAN 3010	Advanced Rhetoric and Composition	3
WGST 3800	Advanced Writing in Feminist Studies	3

Courses that Treat Theories and Contexts Pertaining to Writing

Students in the following programs may count up to two of the listed courses in their major (6 credits) toward the certificate.

Code	Title	Credit Hours
Communication Majors		
COMM 1210	Perspectives on Human Communication	3
COMM 1300	Public Speaking	3

MDST 4111	Crime, Media and Contemporary Culture	3
MDST 4211	Asian Media and Culture	3
MDST 4331	Gender, Race, Class, and Sexuality in Popular Culture	3
MDST 4371	Media and Religion	3

¹ Upper-division EDUC courses in Literacy Studies count toward the certificate. Consult the School of Education for offerings in any given semester.

² Just as 1000-level PWR expository writing courses do not count toward the certificate, neither is ENGL 1001 eligible.

Practicum Course(s)

Students must complete a 1-credit, pass/fail course for portfolio curation, along with one of the three practicum options below. Students may select the option that best suits their interest and career goals.

Internship

Of interest to students intending to work in business, industry or nonprofits:

- Complete a 3000/4000-level internship, often sponsored by the major department (e.g., ENGL 3930 or JRNL 4931), with a significant writing component. For an internship to count toward the certificate, it must be pre-approved by the certificate coordinator. Following the internship, the student must submit a brief (2–3 page) report describing the writing activities and how the internship contributed to learning outcomes.

Writing Center Consultancy or School-Based Literacy Practicum

Of interest to students intending to work in education and related fields:

- WRTG 2090 Electives in Writing (3) (Writing Center Theory and Practice)
- EDUC 4321 Writing Instruction for Elementary Schools (3) (for students already accepted into the teacher licensure program)
- EDUC 4342 Writing in Humanities Classrooms (3) (for students already accepted into the teacher licensure program)

Graduate Study in Writing Pedagogy

Of interest to students intending to conduct graduate work in rhetoric and composition:

- WRTG 5050 Graduate Studies in Writing and Rhetoric (3) (various topics, with permission).

Business

The new innovation economy requires—and rewards—richer knowledge, sharper skills and a global mindset. Ultimately, the edge belongs to those who are principled leaders who bring inspiration and purpose to their work and in this way drive value for society.

Within this climate, the Leeds School of Business offers an innovative agenda designed to leverage our unique assets: the intellectual capital of Leeds faculty, our innovative and best-in-class curriculum, our focus on the "whole student" experience, our strong network of alumni and industry partners and our firm commitment to student support.

Accredited by the Association to Advance Collegiate Schools of Business (AACSB-International), Leeds awards four types of degrees: Bachelor of Science (BS), Master of Science (MS), Master of Business Administration (MBA) and Doctor of Philosophy (PhD). Students can specialize in accounting, finance, management and entrepreneurship and marketing. Leeds further offers certificates in a variety of areas to provide opportunities for students to explore additional areas of interest and distinction.

World-class faculty provide the foundation for breakthrough thinking—creating knowledge from research, disseminating knowledge through teaching and applying knowledge in collaboration with the business community. Faculty discoveries are frequently published in prestigious academic journals and discussed in media outlets such as the *Wall St. Journal*, the *New York Times*, CNBC and more. The cutting-edge research we produce enhances the school's reputation for innovation.

From orientation to graduation, Leeds faculty and staff guide students to discover and optimize their potential. Through an array of targeted services, students create an individualized journey that maximizes the impact of their experience and leads to future opportunities. Ethics and social responsibility are hallmarks of a Leeds education, and the school's commitment to professional development is unrivaled.

Leeds alumni and industry partners collaborate to offer a meaningful level of engagement with students and faculty. Alumni provide the support and resources that ensure graduates are poised for maximum impact. Corporate partners infuse relevance to Leeds' curriculum innovation, supporting new programs and providing the school access to professional talent. Both communities are the backbone of one of the largest mentoring programs in the world.

Leeds joins the University of Colorado and the Boulder community to generate extraordinary opportunities for students. Cross-campus collaborations with fields like engineering and science link Leeds faculty and students with more resources to put innovation into action. Our location in Boulder provides inspiration with its physical beauty as well as the intellectual energy of a thriving start-up community and high concentrations of advanced technology and socially responsible industries.

Together, these assets make Leeds uniquely qualified to deliver on our mission of educating principled, innovative leaders who drive value.

Graduation Recognition Ceremony

Every December and May, the Office of the Dean and the Leeds Business Student Government sponsor a recognition ceremony honoring the graduating class, in addition to the university-wide commencement. Graduates and their families are invited to attend.

Facilities & Research

The Leeds School of Business houses resources for the specific needs of business students:

- Burrige Center for Finance
- Business Research Division

- Career Development
- Center for Education on Social Responsibility
- Center for Research on Consumer Financial Decision Making
- MBA Business Center
- Office of Diversity Affairs
- Real Estate Center
- Robert H. and Beverly A. Deming Center for Entrepreneurship
- smart classrooms
- student lounges
- Undergraduate Student Services
- William M. White Business Library and Information Commons

The William M. White Business Library and Information Commons

The White Business Library (<http://www.colorado.edu/libraries/libraries/william-m-white-business-library>) and Information Commons provide students with a wealth of information pertaining to the business world. Students have access to the business and other libraries via the university libraries online catalog. Many databases are accessible through the wireless network and off campus. These databases contain a myriad of full-text magazines and journals; business periodical indexes; corporate annual, 10-K and proxy reports of all the public companies in the United States; short profiles of both American and international companies; demographic and business statistics; industry and market information; and investment reports written by Wall Street analysts. Over 50 computers provide access to the databases and the internet, and technology-outfitted team rooms are available for group study. Knowledgeable librarians are always available to help navigate the search for information. The Information Commons is open 24 hours, seven days per week and contains 30 of the 50 computers with a full suite of software. These are accessible to students, faculty and staff of the university. In addition, Leeds has 25 technology equipped team rooms. These rooms support group study and project work, and are available for reservation through University of Colorado Scheduling (<https://vems1.colorado.edu>).

The White Business Library is part of the University of Colorado library system, which includes more than two million volumes, more than five million microforms and more than 24,000 periodicals and serials. The system is also a full depository for United States government, international and state documents.

All classrooms in the Leeds School of Business are equipped up to campus "smart" classroom technology standards. Technologies in a typical Leeds classroom include: a desktop computer loaded with Microsoft Office Suite applications, video projection system, ceiling speakers for audio, DVD/VCR, iClicker base station, campus cable and both wired and wireless Internet connections. All classrooms have the flexibility to support a personal laptop with connectivity in place to integrate with the video projection and sound system.

Business Research Division

Established in 1915, the Business Research Division is one of the earliest organized state service-oriented bureaus in the country.

The Business Research Division conducts business, economic and market research that contributes to the efficient use of Colorado's resources and increases interest in and awareness of the Leeds School of Business. It also is the umbrella organization for the Rocky Mountain Trade Adjustment Assistance (TAA) Center (RMTAAC). Through its

annual Colorado Business Economic Outlook Forum, held in December, the division has established a base of knowledge that adds value to its work in other areas. In addition to providing businesses, government and nonprofits with information to help them make better-informed business and policy decisions, the division specializes in economic and fiscal analysis, market research and custom research projects. It also prepares a Colorado leading economic indicator series, the *Leeds Business Confidence Index*. Research results are distributed through presentations and reports; a quarterly newsletter, the *Colorado Business Review*; and the division's website.

Funding for center activities comes from the Leeds School of Business, the university, state agencies, the federal government, state and local business firms and from the sale of research products and services.

RMTAAC is one of 11 centers across the nation funded by the U.S. Department of Commerce to manage the Trade Adjustment Assistance for Firms Program, which helps import-impacted U.S. firms develop and implement business recovery strategies to strengthen their competitiveness in the global marketplace. The TAA for Firms Program is a cost-sharing federal grant program that pays a portion of professional consultant expenses or industry-specific expert services for projects that improve a firm's competitiveness, thereby increasing sales and creating U.S. jobs. Benefits of the program include up to \$75,000 in grant funds and 50/50 cost sharing for strategic projects.

Academic Centers

In addition to the Business Research Division, the school has five centers linking academic programs and the business community—the endowed Robert H. and Beverly A. Deming Center for Entrepreneurship, the Center for Real Estate, the Burridge Center for Finance, the Center for Education on Social Responsibility (CESR) and the Center for Business Integration.

The Robert H. and Beverly A. Deming Center for Entrepreneurship

As part of the Leeds School of Business, the Deming Center for Entrepreneurship's mission is to inspire and empower students, community, alumni, faculty and staff through entrepreneurship education and partnership with the community. The Deming Center does this in part by educating, engaging and partnering and focusing on student experience.

Cutting-Edge Curriculum

Our progressive curriculum and interdisciplinary programs include:

- courses in entrepreneurial finance, marketing and business planning,
- interdisciplinary programs in engineering, business, law and environmental studies,
- undergraduate business minor (p. 642) with a certificate of entrepreneurship for students across campus,
- undergraduate certificate of entrepreneurship (p. 643) for Leeds students,
- MBA (p. 1218) concentration in entrepreneurship, and
- world-renowned PhD program (p. 1221) in entrepreneurship.

The Deming Center supports the entrepreneurial curriculum and advances the Leeds School's leadership agenda through our collaborative initiatives across campus and in the business community in these key areas:

- **Education.** Our entrepreneurship students have access to a world class entrepreneurship faculty. The faculty are involved in collecting,

curating and making available the latest research and thinking on entrepreneurship in the world. These faculty are inspiring and directing new research and thought leadership in entrepreneurship and constantly working with thought leaders to develop and stay ahead of the latest trends and tools for entrepreneurship education.

- **Real-world experience.** Our entrepreneurship students are challenged to turn accepted thinking on its head—in the classroom, in real-world industry projects, and by the business innovators serving as student mentors and advisors. The center helps connect students with projects, advisors and internships that challenge them to use their new skills creatively.
- **Student experience.** Staff and faculty at Deming are focused on delivering an outstanding student experience. Deming promotes the development of entrepreneurial thinkers and doers. Entrepreneurial thinkers and doers are optimistic, resilient, resourceful, persistent, calculated risk-takers, efficient, creative problem solvers and effective workers. These are teachable skills any student is capable of learning.
- **The community.** Boulder is consistently named one of the best places in the country to launch a startup. The center connects students to industry leaders via the Deming Network—an active group of world-class entrepreneurs and innovators who are accessible and hands-on. CU Boulder is also a top research university. Across campus, the Deming Center helps students access opportunities in technology transfer and the engineering, law, biofrontiers and environmental science programs

Real Estate Center

The Real Estate Center, founded in 1995, is supported by an industry council with the goal of advancing academic excellence in real estate education and scholarship. The center oversees the school's real estate teaching programs and advises the faculty in designing an integrated curriculum at both the graduate and undergraduate levels. Course work is drawn from the law school, the colleges of architecture and engineering, construction management and others.

The center creates real-world experiences for students by providing project course work and being a resource for securing internships, mentors and jobs. It also provides support for faculty teaching and research activities in real estate and, through the Real Estate Foundation, assists the university with its real estate portfolio.

Burridge Center for Finance

The Burridge Center for Finance is dedicated to encouraging and supporting the creation and dissemination of new knowledge about the world financial markets with an emphasis on the U.S. financial markets by:

- facilitating the exchange of ideas and knowledge between professional investment managers, finance scholars, policy makers and the investing public,
- identifying critical research issues in the theory and practice of security analysis and valuation, and
- encouraging and supporting rigorous qualitative and quantitative research on topics relevant and useful to money managers, valuation experts and finance academics.

Center for Education on Social Responsibility (CESR)

CESR's goal is to help students become outstanding business leaders of tomorrow by preparing them to meet the ethical challenges posed by a highly competitive, globally-connected business world. Accordingly, CESR

oversees the infusion of values and social responsibility discussions throughout the undergraduate and graduate curricula at the Leeds School of Business. As part of the central mission at Leeds, CESR creates pedagogies that are national models and plays a leadership role carrying out the school's commitment to developing leaders of conscience. Although the Center's primary focus is on excellence in curriculum development and delivery, CESR also undertakes a broad spectrum of initiatives including a certificate program, student organizations, conferences and other extracurricular offerings as well as providing funding and administrative support for faculty research.

Courses

CESR is directly responsible for course development, staffing and coordination of the Business requisite introduction course World of Business, and collaborates on the design and delivery of the requisite 3000-level course Business Law, Ethics & Social Responsibility. CESR also offers leading edge electives such as CESR 4000, CESR 4005, CESR 4827/ACCT 4827, CESR 4828/MGMT 4828 and the Global Seminar *Social Entrepreneurship & Innovation* in Panama.

Certificate and Portfolio

CESR offers specialized recognition for students at the undergraduate and graduate levels. Undergraduates wishing to focus on CESR-related topics may earn the certificate in socially responsible enterprise (p. 645) (SRE). At the MBA level, CESR has formalized a Sustainability Portfolio of courses, including the MBA requisite Socially Responsible Enterprise course, and electives such as MBAX 6570 and MBAX 6140.

CESR Co-Curricular Activities

- **CESR Stampede at Leeds: A Week of Driving Values in Business.** This weeklong event showcases the values-driven and innovative curriculum developed by the CESR that is shaping tomorrow's business leaders. Through class visits, expert panels and lectures student competitions and showcases, attendees will explore their own values and network with like-minded professionals about applying positive values in a business setting. Stampede Week also includes the fourth annual Conscious Capitalism Conference, a CESR flagship event.

CESR routinely hosts events aimed at our students, our local business community and educators and industry leaders throughout the academic year. Guest speakers change each semester, but recurring events are included here:

- **CESR Business Ethics Case Competition (BECC).** The CESR BECC is an interactive way to deepen the Leeds undergraduate students' understanding of the importance of creating ethical as well as profitable business cultures. Teams are provided with a business case in the weeks leading up to the competition which they will have to analyze, create recommendations for course of action and present their solutions to a panel of professional judges. Cash prizes are awarded to the top three teams.
- **Conscious Capitalism Conference.** An annual conference hosted by CESR featuring innovative executives and entrepreneurs who have used the traditional tools of capitalism to serve social needs.
- **Student Center for Social Entrepreneurship.** CESR provides faculty sponsorship for SCSE, the student branch of Social Entrepreneurship for Equitable Development, an interdisciplinary, inter-generational campus group that is involved in researching, teaching and generating student involvement in the areas of social entrepreneurship and sustainable community development.
- **Net Impact Club.** CESR is home to a graduate chapter of Net Impact, an international nonprofit organization whose mission is to use the

power of business to create a more socially and environmentally sustainable world.

- **New Venture Challenge Social Impact Track.** CESR developed and continues to support the Social Impact Track of the **CU New Venture Challenge**, a campuswide initiative connecting students and faculty with teammates in a broad range of disciplines and with mentors from the business community. The goal is to provide knowledge and experience making entrepreneurship accessible to anyone on the CU Boulder campus with the enthusiasm and creativity required to start a new business.

Career Opportunities

Leeds School of Business graduates are prepared for positions in the following fields:

- Accounting—public, private, nonprofit and governmental
- Banking and other financial institutions
- Consulting
- Corporate financial management
- Entrepreneurship and small business management
- Financial analysis
- Human resources management
- Information systems
- International business
- Investment management
- Management consulting and organization management
- Marketing and sales management
- Nonprofit management
- Operations management
- Real estate
- Retailing
- Taxation
- Technology management
- Transportation
- Venture capital

Other graduates hold positions in fields as diverse as business journalism, public relations, city planning, chamber of commerce and trade association management, college administration and government. The entrepreneurial area of application prepares students to start their own business ventures to take positions in emerging growth companies and the venture capital industry.

Programs & Leadership

Professional Mentorship Program

The Professional Mentorship Program (PMP) is a unique program that offers one-on-one professional mentoring to current undergraduate students. The program's mission is to enhance business education at the Leeds School by offering hands-on learning, professional skills development, leadership opportunities and a sense of connection and community among current students, Leeds alumni and corporate partners. PMP mentors prepare and inspire our students to become the next generation of strong business leaders.

This two-year program matches students with executives or high-level business professionals who align by industry, geographic location or functional area. To ensure a quality experience for both students and

mentors, the PMP provides workshops, training and additional support for participants throughout the program.

Program Benefits

Through this program, students gain an additional level of advising and career counseling from a business professional. Through the mentoring relationships, students can explore choice of majors, potential for graduate school, work-life balance and effective networking and job search strategies.

Other potential benefits of being involved in the PMP include:

- advice and assistance on academic questions, career options, life beyond college and more,
- access to the PMP network and networking opportunities and the opportunity to start building the student's own professional network,
- opportunities to practice and strengthen professional communication and presentation skills,
- help in defining personal and professional goals, and the strategies to achieve them,
- unique internship and job opportunities, and
- development of a life-long friend and connection in the business world.

Study Abroad

Study abroad programs are available for students interested in international business or in cultural experiences abroad. The college-sponsored London Seminar in International Finance and Business is a five-week-long program held each summer in the financial district of London and is open to juniors, seniors and graduate students.

Student Organizations

Listed below are undergraduate organizations that promote professional interests and provide recognition of scholastic attainment:

- Alpha Kappa Psi
- Athletic Business Club
- CU Fashion Club
- Beta Alpha Psi
- Collegiate DECA
- CU Energy Club
- CU Finance Club
- CU American Marketing Association
- CU Investment Club
- CU Society for Human Resources Management
- Delta Sigma Pi
- International Business Club
- Leeds Ambassadors
- Leeds Association of Information Systems
- Leeds Council (Undergraduate Student Government)
- Multicultural Business Student Alliance
- Music Industry Club

- Real Estate Club
- Women in Business Club

Leeds School of Business Student Government

Leeds Council is the governing body of the Leeds School of Business that strives to serve, support and represent the student body. The council also works to make Leeds a better business school through social, academic and professional programming. The council is made up of five primary committees and an executive board that control a significant portion of the Leeds student fees.

Two members of Leeds Council also serve as representatives on University of Colorado Student Government (CUSG) to voice the interests of business students at the main campus.

Career Development

The Leeds Career Development Office is the hub for undergraduate professional development. We work with each student to create a four-year career development plan that will allow them to develop the professional competencies and business connections needed to pursue their personal and career goals. Leeds students have access to unique, business-focused resources.

Career Readiness Programs

All Leeds students are assigned a career advisor by their area of emphasis. Advisors work with each student to create a four-year career development plan that allows them to develop the professional competencies and business connections needed to pursue their goals. Key services that support career readiness include:

- one-on-one career coaching sessions,
- skill development workshops,
- personal and career assessments, and
- mock interviews.

Employer Connections

The Leeds School has created strong partnerships with more than 2,000 companies from diverse industries and locations. Our office connects students of all interests with the resources, organizations and people necessary to facilitate career success, including:

- on-campus interviews,
- employer panels by industry or topic,
- employer information session and recruitment days,
- Leeds-specific career fairs, and
- Leeds Signature Events: CoLab and Sophomore Professionalism Summit

Industry Experiences

At Leeds, students are encouraged to explore career opportunities in business through hands-on learning via internships and Career Treks.

- **Internships:** Dedicated support includes an internship advisor, internship-focused workshops and networking events.
- **Career treks:** Visits focused on an industry, functional area or location with in-depth opportunities for job search and connections. Previous visits have included Boulder, Denver, Chicago, Houston, Los Angeles, New York, Salt Lake City and San Francisco.

- **Professionalism assignments:** The World of Business and sophomore year provide all Leeds 1st and 2nd-year students with a strong foundation to pursue their career interests and goals.

Mentoring

The integration of multiple mentoring programs throughout the four-year experience is a unique feature of the Leeds education, providing students with individual connections and personalized support. More than 1,500 undergraduates and 900 professional mentors participate in mentoring through these programs:

- **CoLab: Essentials of Collaboration and Innovation in Business:** Full-day outdoor orientation experience introducing first-year students to key business concepts and corporate mentors.
- **Peer2Peer:** Connects new Leeds students with trained student mentors to help students build a strong foundation and sense of belonging at Leeds.
- **Young Alumni Mentors Program:** Partners sophomores with recent Leeds graduates to provide major and career exploration, academic preparation and professional skills development.
- **Professional Mentorship Program:** Pairs juniors and seniors with experienced business professionals providing opportunities to develop and practice critical professional skills and build their professional network.

Policies & Requirements

Academic Excellence

Honors

In recognition of high scholastic achievement, upon recommendation of the faculty, the designation "With High Distinction" or "With Distinction" will be awarded at graduation. To qualify for the "With High Distinction" designation, the student's cumulative University of Colorado GPA must be at least 3.90. For the "With Distinction" designation, the student's cumulative GPA must be at least 3.75 but less than 3.90. In addition, for these designations, at least 60 credit hours must have been earned at CU Boulder.

Dean's List

Students in the Leeds School of Business who have completed at least 12 credit hours of CU Boulder course work for a letter grade in any single semester with a term GPA of 3.600 or better are included on the dean's list and receive a notation on their transcript.

Beta Gamma Sigma

Membership in Beta Gamma Sigma is an honor that must be earned through outstanding scholastic achievement. Such membership is the highest scholastic honor that a student in a school of business or management can attain.

To be eligible for Beta Gamma Sigma membership, students must rank in the top 10 percent of their junior class, the top 10 percent of their senior class or be among the top 20 percent of those students receiving

master's degrees. Also, students completing all requirements for the doctoral degree conferred by a business school are eligible for Beta Gamma Sigma. It should be noted that Beta Gamma Sigma chapters may be chartered only in those schools of business and management accredited by AACSB, the International Association for Management Education.

Scholarships

Each year the college awards a number of divisional and general scholarships. Business scholarships are for students who have completed business course work at the university. The amount and number of the awards vary each year.

Academic Standards

Academic Ethics

Students are expected to conduct themselves in accordance with the highest standards of honesty and integrity. Cheating, plagiarism, illegitimate possession and disposition of examinations, alteration, forgery or falsification of official records and similar acts or the attempt to engage in such acts are grounds for suspension or expulsion from the university. Reported acts of academic dishonesty must be referred to the Honor Council.

Students are advised that plagiarism consists of any act involving the offering of someone else's work as the student's own. It is recommended that students consult with instructors as to the proper preparation of reports, papers, etc., in order to avoid this and similar offenses. Official college procedures concerning academic ethics are maintained in the Office of Undergraduate Studies.

Standards of Performance

Students are held to basic standards of performance with respect to attendance, active participation in course work, promptness of assignments, correct English usage both in writing and in speech, accuracy in calculations and general quality of scholastic workmanship. In general, examinations are required in all courses and for all students, including seniors.

Good Academic Standing

To be in good standing, students must have an overall grade point average of C (2.00) or better for all course work taken, and a 2.00 or better for all business courses taken. Students must earn a passing grade for all required courses. This requirement applies to work taken at all university campuses.

Any student earning all or nearly all failing grades, or no academic credit for a semester will not be permitted to register without the dean's approval.

Official double-degree students must maintain required academic standards for the Leeds School as well as their other college.

When semester grades become available, students below the acceptable standard will be placed on probation or suspension. Students are responsible for being aware of their academic status at all times, and late grades and/or late notification do not waive this responsibility.

Academic Alert (First-Year Students Only)

First-semester freshmen with a cumulative grade point average or business grade point average below 2.00 at the end of their first semester will be placed on academic alert. If a student is placed on academic alert, they are in good academic standing but must meet with an academic

advisor to discuss scholastic performance and establish a customized academic recovery contract. Students placed on a academic alert are given one semester to improve their academic performance. At the conclusion of the academic alert semester, records will be reviewed.

- If both cumulative and business GPAs are 2.00 or higher, students will remain in good standing.
- If the cumulative and/or business GPA is still below 2.00 but a student meets the terms of the academic recovery contract, the student will be placed on probation and given one academic recovery semester (see Probation/Academic Recovery).
- If the cumulative and/or business GPA is still below 2.00 and the student did not meet the terms of the academic recovery contract, or never met with an advisor to establish a contract, the student will be placed on academic suspension (see Scholastic Suspension).

Probation/Academic Recovery

If the cumulative grade point average or cumulative business grade point average falls below 2.00, students will immediately be placed on probation for one semester. If a student enrolls in any term, excluding summers, after being placed on probation, they are expected to raise their cumulative and business grade point average to at least a 2.00 or demonstrate significant progress toward improving your GPA(s).

If a student does not raise the GPA(s) to 2.00 or make significant progress during the probation semester, they will be placed on suspension.

Significant Progress

Significant progress is defined relative to whichever GPA is below 2.0. If the cumulative GPA is below 2.0, significant progress is defined as a term GPA of 2.5 with at least 12 credits completed toward the cumulative GPA. If the Business GPA is below 2.0, significant progress is defined as a term business GPA of 2.5 with at least 6 credits of business course work completed.

Scholastic Suspension

If the cumulative and/or business grade point average is below 2.00 after the semester of probation and a student has not demonstrated significant progress (as defined above), they will be suspended. Once on suspension, students will not be able to register for University of Colorado daytime courses on any campus for one academic year OR until a student raises the GPA to 2.0 or demonstrates significant progress.

Students are allowed to take summer classes at any of the CU campuses while on suspension.

If suspended, students may choose from the following options.

Suspension Option 1: Clear GPA

1. Students may take Continuing Education Independent Learning courses, and/or Boulder Evening credit classes, and apply for readmission when they have cleared their grade deficiency or when they have demonstrated significant progress.
 - If a student is readmitted based on significant progress, they will be readmitted on probation and will be subject to Leeds' probation rules (see Probation).
 - Students must maintain a 2.50 term GPA each semester while enrolled in Continuing Education courses. If a student does not earn a 2.50 GPA in Continuing Education Courses, they will be suspended from Continuing Education and will only be allowed to enroll in CU Boulder courses during the summer term.

2. Students may choose to attend another educational institution and apply for readmission when, and only when, they have overcome their grade deficiencies by means of a GPA, which is arrived at by averaging the grades from CU with the grades from the other institution. These transfer grades are used only for the purpose of readmission and do not remain in the University of Colorado grade point average. If students choose to attend another institution, they must have their proposed course work preapproved by the Office of Undergraduate Student Services in the Leeds School of Business.
 - If students choose this option and are readmitted based on a virtual GPA, they will be readmitted on probation and will be subject to Leeds' probation rules (see Probation).
3. Students may choose a combination of 1 and 2.

Suspension Option 2: Do not take classes for one year

If students have been under suspension for one calendar year and did not elect Option 1, they may apply for readmission. Students will have two semesters to raise their cumulative or business grade point average to at least a 2.00. If their GPA falls after the first semester, they will again be suspended for another academic year or until their grade deficiency has been made up.

Readmission

When students make up their grade deficiency (Option 1) or have not taken classes for one year (Option 2) and desire to be readmitted, they must request readmission in writing by contacting:

Office of Undergraduate Student Services
UCB 419
Boulder, CO 80309
Email: leedsug@colorado.edu

After doing so, students may need to reapply by submitting an application through the Office of Admissions. For more information, call 303-492-6515.

Suspended Leeds School students who transfer into another school or college of the university will not be eligible to register for business courses and will be subject to administrative drops.

Credit and Enrollment

All students are responsible for knowing and following the provisions set forth below. Any questions concerning these provisions should be directed to the college. The college cannot assume responsibility for problems resulting from a student's failure to follow the policies stated here or from incorrect advice given by those outside the Office of Undergraduate Services. Similarly, students are responsible for all deadlines, rules and regulations stated in the General Information section of this catalog. All rules and regulations are subject to change. Any questions should be directed to the Leeds School of Business, Office of Undergraduate Services, KOBL S220, 303-492-6515.

Admission to the Business Program

Prospective freshman students are encouraged to complete strong academic programs in high school. A minimum of four academic units should be completed each year with special emphasis given to writing, mathematics and science skills. For a detailed explanation of the high school preparation desired, see Undergraduate Admission in the General Information section.

Transfer students are expected to demonstrate proficiency in economics, writing and mathematics. Prospective transfer students should complete

courses equivalent to those taken by University of Colorado business freshmen and sophomores.

Residency Requirement

Complete a minimum of 45 credit hours in University of Colorado courses on the Boulder campus. Of these 45 credits, a minimum of 30 credits must be business courses completed as a matriculated student in Leeds.

Intrauniversity Transfer

An undergraduate student who is enrolled on the Boulder campus and wishes to transfer to the Leeds School of Business may submit a completed application for the fall or spring semester. A cumulative university GPA of 3.00 and a cumulative GPA of 2.00 in business courses is necessary to be considered for admission. In addition, students must have 24 completed credit hours, 12 of which must be graded work at CU Boulder, 4 credit hours of MATH 1112, and microeconomics and macroeconomics. Students must earn a grade of B- or better in ECON and MATH to be considered for admission. Intrauniversity transfer students must take a minimum of 30 credit hours of business courses, including their area of emphasis, in residence after admission to the college. Applications are accepted year round and will be reviewed once a month. However, the deadlines for admission prior to the registration period are October 1 for spring and March 1 for fall. Leeds can not guarantee the usual selection of courses for those who submit applications after the deadline.

In order to apply to the Leeds School of Business, students must complete a mandatory online IUT presentation and quiz.

Registration Stops

A service indicator stop will be placed on students' records when they have earned 45 credit hours, if they have not yet declared their area of emphasis. All first and second year students will also have a service indicator and be required to attend an advising meeting before registration for the next semester.

Registration for Business Courses

Business students may register only for those courses for which they have the stated prerequisites.

Administrative Drops

Instructors may recommend to the Office of Undergraduate Services that students who fail to meet expected course attendance or prerequisites be dropped from their courses at any time during the semester.

Attendance Regulations

Classroom attendance is left to the discretion of the instructor. Students are responsible for understanding each instructor's policy on attendance.

Students who are unavoidably absent should make arrangements with instructors to make up the work missed. Failure to attend regularly may result in receipt of an F in a course. Students who, for illness or other legitimate reasons, miss a final examination must notify the instructor no later than the end of the day on which the examination is given. Failure to do so may result in receipt of an F in the course.

Concurrent Registration

Concurrent registration is for graduating seniors who must be enrolled on two campuses of the University of Colorado at the same time in order to fulfill graduation requirements.

Students enrolled in the Leeds School of Business may exercise the concurrent registration option if they are in their graduating semester

or are two semesters from graduating and cannot obtain a course necessary to complete a prerequisite sequence. The course must be required for graduation and must not be offered on the Boulder campus, or the course must conflict with another required course in which the student is enrolled. Students from other colleges and schools who wish to take business courses must have the approval of their own college or school before submitting the concurrent registration form.

Scholastic Load

The normal scholastic load of an undergraduate student in the college is 15 credit hours, with a maximum of 21 credit hours during the fall and spring semesters. A maximum of 3 credit hours may be taken during Maymester. A maximum of 6 credit hours may be taken during a five-week summer term, with no more than 12 credit hours total during the 10-week summer session.

Credit Policies

To receive credit, all courses must be listed on the student's official transcript by the Office of the Registrar. Credit is then evaluated by the Leeds School of Business to determine degree acceptability.

Cooperative Education Credit

No credit is given for work experience or cooperative education programs.

Correspondence Credit

All correspondence courses must have prior approval and be evaluated to determine their acceptability.

Advanced Placement (College Board)

For students who earn scores of 3, 4 or 5 on Advanced Placement exams, college credit will be given where appropriate. See the Admissions section for a comprehensive AP credit chart (p. 110).

College-Level Examination Program (CLEP)

College credit for approved CLEP subject examinations may be considered, providing the scores are at 54 or above. Specific information is available in the Office of Undergraduate Student Services.

CLEP credit is only appropriate for nonbusiness requirements and nonbusiness electives. A maximum of 6 hours of credit in any one course area is allowed. CLEP may not be used in course areas where credit has already been allowed. General examinations are not acceptable. CLEP credit is not transferable.

Before a CLEP examination can be taken, students must have prior approval in writing by the Office of Undergraduate Student Services.

No Credit

Because of enrollment limitations, business classes may not be taken on a no-credit basis.

Special Sources of Credit

The college reserves the right to accept or reject all special sources of credit that do not have prior approval of the dean.

Independent Study

A maximum of 6 credit hours of independent study will be accepted as degree credit. Prior approval is required if the work is to be applied as degree credit. A maximum of 3 credit hours may be taken in any one semester.

Study Abroad Credit

Transfer credit from study abroad programs may be applied to the business degree. Students planning to attend study abroad programs

must meet with an undergraduate advisor and have their course selections approved prior to leaving campus.

More specific information about these opportunities is available from the Office of International Education.

Transfer Credit

The school reserves the right to disallow any credit that it deems inappropriate degree credit.

Credits in business subjects transferred from other institutions will be limited to the number of credit hours given for equivalent work in the regular offerings of the university. Only work from regionally accredited institutions will transfer to the college. A maximum of 60 credit hours of credit may be accepted from a two-year school.

Actual equivalent courses may be substituted for required courses. Students must submit a carefully checked catalog description and course syllabus for course equivalency determination.

Business students desiring to apply course work from another institution or University of Colorado campus toward the BS degree in business administration must have prior approval of the Leeds School of Business. Only nonbusiness requirements or elective credit is acceptable in transfer from other institutions once the student has enrolled.

All courses in the area of emphasis must be taken at the University of Colorado Boulder unless written approval is given by the associate dean of undergraduate services. Transfer students must take a minimum of 30 credit hours of business courses, including the area of emphasis, in residence after admission to the college. For more information on transfer of credit policies, see Transfer of College-Level Credit (p. 117).

Grading Policies

In addition to the campuswide grading system and pass/fail policy (p. 19), the Leeds School of Business enforces the following policies.

Pass/Fail

Students in the Leeds School of Business may not use the pass/fail option for courses taken to fulfill General Education Core Requirements, courses used to satisfy the Minimum Academic Preparation Standards (MAPS), business core requirements, business major requirements or business electives. A grade of F when earned in a course taken pass/fail will calculate into the GPA as a failing grade. Only nonbusiness electives may be taken on a pass/fail basis. A maximum of 6 credit hours of pass/fail credit may be applied toward the BS degree in business administration. Pass/fail determination must be made by the deadline set through the Office of the Registrar. A maximum of 6 credit hours designated pass/fail may be taken in any one semester.

Failed courses may be repeated, but the F will be included in the GPA.

Incomplete Grades

The only incomplete grade in the college is given only when documented circumstances clearly beyond the student's control prevent the student from completing the course. Generally, students should make up the missing work and not retake the entire course. Students should not register for the class a second time, unless directed by the instructor. All I grades must be made up within one year or the I will be changed to a grade of F.

Grade Changes

Final grades as reported by instructors are considered permanent and final. Grade changes will be considered only in cases of documented clerical errors, and must be approved by the associate dean.

Withdrawal

Students may withdraw from the university any time before the beginning of the final examination period.

Programs of Study

Business Administration

The following areas of knowledge are central to the undergraduate degree in business administration:

- knowledge of core business concepts that provides students with a comprehensive understanding of the basic functional areas of the discipline
- knowledge in one or more of the four areas of emphasis, in which students are exposed to in-depth study that provides them with the tools necessary to solve complex business problems
- awareness of the interrelations between academic theory and practice in order for students to be fully equipped to make effective decisions
- strong verbal and written communication skills, proficiency in business computer applications and knowledge of international business environments
- knowledge of mathematics sufficient to facilitate the application of quantitative principles
- awareness of the importance of academic fields in the area of arts and sciences, with special emphasis placed on the study of economics, political science and other related fields

In addition, students completing a degree in business administration are expected to acquire:

- the ability to apply basic business principles to solve problems in new and recurring situations,
- the ability to conceptualize and analyze decision-making situations to facilitate solutions in an effective and timely manner, and
- the ability to effectively communicate the results of problem-solving situations, both verbally and in writing.

Having acquired these skills and knowledge, students are able to conceptualize and analyze the concept of business and problem solving as a system. They have the ability to present solutions to business problems in an understandable and useful form. Their education provides them with excellent working knowledge, not only in the field of business, but also in related academic disciplines.

The Leeds School of Business holds accreditation by the Association to Advance Collegiate Schools of Business (AACSB-International).

Advising and Records

Undergraduate business students receive academic counseling from a staff of professional advisors in the Office of Undergraduate Student Services. During the semester, advisors are available in KOB L S220, Monday–Friday, 8 a.m.–5 p.m., by appointment.

Students are expected to assume responsibility for planning their program in accordance with college rules and policies. Students are encouraged to discuss the various emphases available as well as career opportunities with the faculty of the college.

Bachelor's Degree

Courses

BADM 1250 (1.5) First Year Seminar for Business

Surveys the entire undergraduate experience and includes topics, issues, and practices that focus on the professional, academic, and leadership growth of a business student. It addresses how to make an effective transition to college and puts students on a path to become well-rounded, engaged and globally-minded. Students will acquire the knowledge and skills to take advantage of all the opportunities and support services available to them while learning to balance the challenges and expectations of their business degree. A sample of the topics covered include: transition to college, dealing with academic rigor, developing a professional tool kit—resume and cover letter preparation, interview skills, project management, working in teams and public speaking—and preparing for the role as a global business leader.

Requisites: Restricted to Business (BUSNU) majors only.

Grading Basis: Pass/Fail

BADM 1260 (2) First-Year Global Experience

In today's world of increased mobility, globally aware students have more choices for employment upon graduation and are immediately ready to contribute in global environments. They are aware of global issues and cultural differences, and their global mindset allows them to recognize good ideas from whenever they might come and new market/product opportunities wherever they might exist. This course is the first step toward the development of a global mindset. It provides a meaningful global experience to first-year business students through an in-depth perspective of a specific country or region outside the United States and a short academic trip to the region.

Requisites: Restricted to Business (BUSNU) majors only.

BADM 2010 (1) Excel in Business

Teaches beginner to intermediate level Excel skills, emphasizing efficient use of Excel to make sense of substantial data sets. The course is designed to increase students' proficiency with Excel through a series of hands-on workshops. The workshops have a business problem solving orientation and use real data from Leeds' corporate partners. The workshops emphasize the most important skills that employers value.

Requisites: Restricted to Business (BUSNU) Majors or students with a Business Minor (BUSM-MIN)

Grading Basis: Pass/Fail

BADM 2050 (3) Honors/Special Topics

Variable topics in business, drawing from a variety of disciplines.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: At least a 3.50 cumulative GPA is required.

Additional Information: Arts Sciences Honors Course

BADM 2880 (3) Special Topics

Explores historical developments, contemporary issues, industry trends and best practices pertinent to the business of sports. Examines how sports enterprises are managed and the impacts that such enterprises have on the economic and social fabric of communities. Designed to provide sufficient background for educated consumption of this literature and pursuit of further study if desired.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

BADM 2900 (1-3) Independent Study

Department consent and departmental form required.

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Restricted to Business (BUSNU) majors only.

BADM 3100 (1) Professional Development

Designed to provide opportunities to understand and develop professional competencies for successful careers in business. Designed to increase knowledge of job search strategies and formulate a career management plan for transitioning to the workplace. Topics such as resumes, cover letters, personal branding, job search strategies, internships, career choices, networking and social media will be covered. A Self-Marketing Plan will be developed to help focus on long-term career goals.

Requisites: Restricted to Leeds School of Business majors only.

Grading Basis: Pass/Fail

BADM 3200 (1) Internship Accelerator

Three-week intensive seminar focused on developing competencies critical to a successful transition into the workplace. Discusses interpersonal communication, situational awareness, giving and receiving constructive feedback, maximizing networking opportunities, deciphering professional expectations, and adaptability in the workplace. Several modules will be taught by industry professionals. Also includes a 2.5 day "micro" internship at a top Boulder-area company.

Requisites: Restricted to Business (BUSNU) majors.

Grading Basis: Pass/Fail

BADM 3880 (3) Special Topics

Introduces students to the many facets of the marketing of sport and marketing through sport. Theoretical and practical applications of marketing sport are examined. Provides students with an understanding of current marketing concepts and best business practices, related to sports enterprises and a foundation for pursuit of further study and work in sports and event marketing.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

BADM 3900 (1) Independent Study

Department consent and departmental form required.

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Restricted to Business (BUSNU) majors only.

BADM 3930 (1-6) Internship

Student training and participation in government or industry environment under faculty supervision. Instructor consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite courses of BCOR 1000 and BCOR 1020 and BCOR 2000 and BCOR 2400 (all minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Pass/Fail

BADM 4820 (1-6) Special Topics

Variable topics in business drawing from a variety of business disciplines.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Business (BUSN) majors with 52-180 units completed.

BADM 4825 (3) Experimental Seminar

Offered irregularly to provide opportunity for investigation of new frontiers in Business Administration.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

BADM 4830 (1-3) Special Topics

Various topics in business and society drawing from a variety of business disciplines.

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Restricted to Business (BUSNU) majors only.

BADM 4900 (1-3) Independent Study

Intended only for exceptionally well qualified business seniors. Department form required.

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Restricted to Business (BUSNU) majors only.

BADM 4910 (2) VITA-Volunteer Tax Assistance

Offers students the opportunity to gain professional work experience in an accounting position while still in school. Provides academically relevant work experience that complements students' studies and enhances their career potential.

Requisites: Requires prerequisite courses of BCOR 2000 and ACCT 3440 or ACCT 5440 (all minimum grade D-). Restricted to Business (BUSN) majors with 52-180 units completed.

Grading Basis: Pass/Fail

Business Administration - Bachelor of Science (BS)

All business students pursuing a bachelor's degree in business administration must complete the prescribed courses in at least one area of emphasis. The school offers programs in four areas of emphasis: accounting, finance, management and marketing. An area of emphasis consists of a minimum of 18 credit hours taken at CU Boulder.

In addition to the area of emphasis, students also may complete an area of application. The school offers the following areas of application: entrepreneurship and small business management, international business and real estate. An area of application consists of a minimum of 9 credit hours taken at CU Boulder.

Accounting Emphasis

The accounting area of emphasis prepares students for careers in which they will develop, analyze and interpret complex financial data. Accounting majors become experts in "the language of business." This expertise prepares them for careers in CPA firms, business consulting, industry (from Fortune 500 companies to small entrepreneurial enterprises), not-for-profit enterprises or government. Accountants who pursue careers in public accounting might become partners in public accounting and consulting firms. Those who begin their careers in industry might have positions as a chief executive officer (CEO), chief financial officer (CFO), chief accounting officer (CAO) or controller, tax specialist, internal auditor, accounting systems analyst, financial analyst or managerial accountant. Many students begin their careers in public accounting firms and move to industry or government after several years of experience. Employers seek students with skills in communication, interpersonal interactions, analytical thinking, problem solving and integrity.

The major branches of study in the accounting area of emphasis are:

1. financial accounting / analysis and audit, and
2. tax planning and compliance.

Basic coursework in accounting focuses on developing a comprehensive understanding of the theory and concepts underlying the presentation of financial and operating information about an enterprise to external and internal users. Additional course work exposes the student to income taxation of business enterprises and individuals, the practice and principles of auditing and assurance services and cost management. Specialization is available through graduate work.

Professional Certification as a CPA or CMA

Most accounting students from the University of Colorado earn professional credentials within a year or two of receiving their degrees. The two most widely-recognized professional certifications are the certified public accountant (CPA) and certified management accountant (CMA).

The CPA is a state-granted license, for which each state sets its own requirements. All states require 150 total credit hours of study to be licensed as a CPA, thus earning a degree with only 120 credit hours will not meet licensure requirements. Although the CPA requirements of most states have similar components, the specifics of those requirements differ greatly. Most states set requirements for the following before a CPA license will be granted:

1. background checks
2. education
3. CPA Exam passage
4. work experience

Not only do state requirements differ greatly from one state to another, those requirements frequently change. It is very important that the accounting student obtain the guidelines for the relevant state to ensure proper development of his or her degree plan (see NASBA.org (<http://NASBA.org>) or the website of the particular state's board of accountancy).

The CPA license is a legal requirement for someone to perform financial statement audits, but is not legally required to perform other kinds of accounting work. It is important to note, however, that many professional accounting positions set CPA licensure as a job requirement even where

it is not legally required, thus a CPA license is a valuable credential for any accounting professional. As a result, most students completing an accounting emphasis at Leeds continue into the concurrent bachelor's and master's degree program (see Concurrent Degree Programs below) to seek their CPA license.

The CPA's expertise typically focuses on presentation and analysis of financial information for an external user. The CMA's primary focus is improving information for the internal user. Professional accountants' expertise in financial matters and their understanding of company operations through financial information prepare them to become key players and critical decision makers for all aspects of business creation, operation and transformation.

As is the case at most colleges and universities, simply meeting the requirements to receive a degree with an undergraduate emphasis in accounting at Leeds will not necessarily meet all of the specific requirements for CPA licensure of any particular state including Colorado. Prior to being licensed, a candidate must be granted permission by a state's board of accountancy to take the CPA Examination. As with the overall requirements for licensure, the specific requirements and timing when students can take the exam differ greatly for different states, all of which makes it crucial for the student to develop the degree plan in conjunction with applicable state requirements.

The CMA is a different type of certification because it not granted by a state, but rather by the Institute of Management Accountants, which is a professional organization. The requirements are the same regardless of where an applicant lives. The website for the Institute of Management Accountants provides information about becoming a certified management accountant (CMA). Though not legally required for any kinds of positions in any state, the CMA is also a valuable professional credential.

Finance Emphasis

Finance is essential to business. Finance faculty boast expertise in foundational concepts like corporate finance and macroeconomics, as well as specialized areas like mergers and acquisitions, derivatives and foreign exchange markets. Students within the program benefit from access to the Burrige Center for Securities Analysis and Valuation and the CU Real Estate Center. Our curriculum prepares students to succeed in areas such as financial management, business economics and real estate. The finance program addresses issues in the financial services and securities area, including topics related to high technology firms, large corporations, and entrepreneurial companies. The finance program is designed to provide students with in-depth exposure to the background necessary for entry-level positions in various areas of financial management. Students study financial management, money and capital markets, investments and derivative securities, and financial institutions. This program enables students to develop the ability to evaluate financial problems and formulate sound financial decisions and policies. Although emphasis is on financial management of profit-oriented organizations, the principles and concepts covered are applicable to nonprofit and governmental organizations.

Management & Entrepreneurship Emphasis

Advances in business knowledge and technology have radically changed business systems, organization structures, and processes. As a result, critical to today's businesses is the ability to get the right information to the right people at the right time, so that both strategic and operational decisions are made properly and quickly. Students majoring in management & entrepreneurship will learn to

recognize the pivotal role that information plays in the business world and to use their knowledge to increase business competitiveness. Students completing the management & entrepreneurship area of emphasis are viewed by potential employers as having the education required to successfully compete in the team-oriented, horizontally organized and globally competitive environments of the 21st century. The management & entrepreneurship area of emphasis prepares students for careers managing people, operations, and information. Management & entrepreneurship students must choose one of three tracks: human resource management, information management or operations management.

Marketing Emphasis

The Marketing Division at the Leeds School of Business is distinguished by its scholarly impact on academic marketing thought and by exceptional teaching. Research by our faculty is our strength. Research is published in prestigious publications such as the Journal of Consumer Research. Our faculty bring marketing theory and practical solutions to students and prepare them for careers in business and in academics. The increasingly global marketplace, coupled with new communication vehicles such as the Internet, have changed the traditional tactics used in marketing. Today's marketing practitioners must understand the unique challenges of serving foreign markets and how to effectively convey their messages to consumers throughout the world. The marketing program develops students' analytic and decision-making skills in such areas as advertising, market research, brand/product management, selling and sales management, distribution, relationship marketing, international marketing, marketing consumer products and services, and marketing nonprofit organizations. Key concepts focus on identifying customer needs and wants, developing products and services to meet those demands, establishing communications to promote products and services, and monitoring transactions and customer responses to guide future activities. Marketing concepts apply to tangible products, services and ideas, consumer and business markets, and domestic and global markets.

Concurrent Degree Programs

BS/MS in Business Administration and Accounting

Qualified Leeds undergraduate students may apply for a five-year concurrent bachelor's/master's program. Student typically begin the concurrent program in the fall of their senior year, and graduate with both the BS and MS degrees after five years. The concurrent degree program is a 150 credit-hour program. Students earn a BS in Business Administration (120 credits) with an area of emphasis in Accounting, Finance or Accounting and Finance, and an MS in Accounting (30 credits).

For more information, visit the Concurrent BS & MS Accounting or Taxation (<http://www.colorado.edu/business/academic-programs/undergraduate-programs/accounting/concurrent-bsba-ms-accounting>) webpage.

BS/MS in Business Administration and Taxation

Qualified Leeds undergraduate students may apply for a five-year concurrent bachelor's/master's program. Student typically begin the concurrent program in the fall of their senior year, and graduate with both the BS and MS degrees after five years. The concurrent degree program is a 150 credit-hour program. Students earn a BS in Business Administration (120 credits) with an area of emphasis in Accounting, Finance or Accounting and Finance, and an MS in Taxation (31 credits).

For more information, visit the Concurrent BS & MS Accounting or Taxation (<http://www.colorado.edu/business/academic-programs/undergraduate-programs/accounting/concurrent-bsba-ms-accounting>) webpage.

BS/MS in Business Administration and Telecommunications

The Leeds School of Business also offers a unique program that allows undergraduates the opportunity to earn a bachelor's and master's degree simultaneously. The joint program graduates students with a bachelor's degree from the Leeds School of Business and a master's degree from the College of Engineering in telecommunications. For more information, see engineeringanywhere.colorado.edu/itp/ (<http://engineeringanywhere.colorado.edu/itp/>).

Requirements

Total Credit Hours

Students must complete a minimum of 120 acceptable credit hours from the following categories.

- **Business core (30 credit hours):** Consists of integrated course work through which students develop key skills such as communication, teamwork and leadership while learning fundamentals of business and working on live cases.
- **Business area of emphasis (18 credit hours):** Emphases are available in accounting, finance, management or marketing, and require a minimum of three semesters to complete.
- **Business electives (16 credit hours)**
- **Nonbusiness requirements (39 credit hours):** Consists of course work from the College of Arts and Sciences core requirements.
- **Nonbusiness electives (17 credit hours)**

The school reserves the right to disallow any credit that it determines is not appropriate academic credit.

Minimum Grade Point Average

- A cumulative grade point average of 2.00 in the area of emphasis and all grades in the 18 credit hours must have a grade of C- or higher (no pass/fail credit hours can be applied to the area).
- A minimum scholastic cumulative GPA of 2.00 is required for all courses attempted at the university.
- A cumulative 2.000 is required for all business courses attempted at the university.
- A cumulative grade point average of 2.00 is required in the area of application courses.

Required Courses and Credits

Code	Title	Credit Hours
Business Core		
BCOR 1015	The World of Business	3
BCOR 1025	Statistical Analysis in Business	3
BCOR 1030	Communication Strategy	3
BCOR 2201	Principles of Marketing	1.5
BCOR 2202	Principles of Organizational Behavior	1.5
BASE 2101	BCOR Applied Semester Experience 1: Early Stage	3
BASE 2102	BCOR Applied Semester Experience 2: Growth Stage	3

BASE 2103	BCOR Applied Semester Experience 3: Mature Stage	3
BASE 2104	BCOR Applied Semester Experience 4: Case Project	3

Area of Emphasis

Students must choose an area of emphasis in accounting, finance, management or marketing. 18

Business Electives

Business courses required by specific areas in excess of the 18 credit hours listed under areas of emphasis may count as business electives. 16

Nonbusiness Requirements

Students in the Leeds School of Business are required to complete course work from the College of Arts and Sciences core requirements, including classes from the following categories: ¹ 39

Mathematical skills ²

Contemporary societies ²

Written communication ²

Historical context

Human diversity

United States context

Literature and the arts

Natural sciences

Ideals and values

Nonbusiness Electives

Students are required to complete 17 credit hours of nonbusiness electives. ³ 17

Total Credit Hours 114

¹ A list of courses that fulfill specific requirements for each area is available on the College of Arts and Sciences' Core Curriculum (<http://www.colorado.edu/artsandsciences/student-resources/core-curriculum>) webpage.

² Leeds students are required to take microeconomics and macroeconomics, specific math and writing courses to fulfill these categories. Contact undergraduate student services for more information, or visit leeds.colorado.edu (<https://leeds.colorado.edu>).

³ Not all classes are accepted as elective credit hours. Generally, to be acceptable, electives must have a form of assessment such as a term paper and/or examinations and must be regular classroom-type courses. Course coverage must be college level, must not be repetitious of other work applied toward the degree, must be academic as opposed to vocational or technical and must be part of the regular university offerings. Contact Undergraduate Student Services or visit the school's Degree Requirements (<http://www.colorado.edu/business/academic-programs/undergraduate-programs/undergraduate-degree/degree-requirements>) webpage for more information about the number of business elective credit hours required.

Residency Requirement

Students must complete 30 credit hours of business courses in residence on the Boulder campus after admission to the college, including the 18 credit hours in the area of emphasis and the 9 credit hours in the area of application (included in the business electives). Students must be in residence at CU Boulder and must be registered as business degree students during the term of graduation.

Areas of Emphasis

Accounting Emphasis

This degree may be earned by a student who takes 18 credit hours of accounting beyond the core. The 18-credit-hour requirement for the degree does not meet the educational requirements to be licensed as a CPA in any state. This option might be chosen by a student who does not want to become professionally certified, but who seeks a career involving accounting and financial analysis in industry, government or nonprofit enterprises. This also might be chosen by a student choosing a dual emphasis, such as accounting and finance or accounting and information systems.

Code	Title	Credit Hours
ACCT 3220	Corporate Financial Reporting 1	3
ACCT 3230	Corporate Financial Reporting 2	3
ACCT 3320	Cost Management	3
ACCT 3440	Income Taxation of Individuals	3
ACCT 4850	Senior Seminar - Accounting Ethics	3
Select one of the following:		
ACCT 4240	Advanced Financial Accounting	3
ACCT 4250	Financial Statement Analysis	3
ACCT 4330	Advanced Cost Management	3
ACCT 4540	Accounting Information Systems	3
ACCT 4620	Auditing and Assurance Services	3
ACCT 4800	Accounting for Government and Nonprofit Organizations	3
ACCT 4820	Topics in Business (ACCT & FNCE for Energy Ind.)	3
ACCT 4827	Integrated Reporting for Socially Responsible Strategies	3
Total Credit Hours		18

CPA Licensure Requirements

All states require 150 total credit hours for licensure as a CPA and most require additional accounting and other business courses. Most states do not require a master's degree. Thus, one route to licensure is obtain a BS with an accounting emphasis, but take additional course work to meet the specific requirements of the state(s) where the student expects to practice. Students can generally find the current requirements for a particular state at the website for that state's board of accountancy, or at NASBA.org (<http://nasba.org>). It is possible that one or more courses that a state requires for CPA certification is not available to undergraduates at CU Boulder; in such a case the student could take those courses either in person or online at a different institution.

Finance Emphasis

Students with a finance emphasis must take 18 credit hours of finance courses beyond the BCOR sequence. Students interested in a finance area of emphasis should plan to take FNCE 2010 during their sophomore year.

Code	Title	Credit Hours
FNCE 2010	Fundamentals of Financial Analysis (prereqs., BCOR 1025, BCOR 2002 and MATH 1112)	3
FNCE 3010	Corporate Finance (prereqs., BASE 2101, BASE 2102, BASE 2103, BASE 2104 and FNCE 2010 minimum grade: C)	3

FNCE 3030	Investment and Portfolio Management (prereqs., BASE 2101, BASE 2102, BASE 2103, BASE 2104 and FNCE 2010 minimum grade: C)	3
ACCT 3220	Corporate Financial Reporting 1 (prereqs., BCOR 2001, BCOR 2002)	3
FNCE 4040	Derivative Securities (prereqs., FNCE 3010 and FNCE 3030)	3
FNCE 4850	Business Senior Seminar in Finance (prereqs., FNCE 3010 and FNCE 3030)	3
Total Credit Hours		18

The required courses represent a minimum requirement for competence in financial analysis and decision-making. Combinations of the upper division elective finance courses allow students to structure their learning in preparation for specific career paths.

Code	Title	Credit Hours
FNCE 4000	Financial Institutions Management (prereqs., FNCE 3010, FNCE 3030)	3
FNCE 4050	Capital Investment Analysis (prereqs., FNCE 3010)	3
FNCE 4060	Special Topics in Finance (prereqs., BASE 2101, BASE 2102, BASE 2103, BASE 2104)	1-6
FNCE 4070	Financial Markets and Institutions (prereqs., FNCE 2010)	3
FNCE 4820	Topics in Finance (Experimental Course (prereqs., FNCE 2010)	3
FNCE 4820	Topics in Finance (Fixed Income Securities (prereqs., FNCE 3010, FNCE 3030)	3
FNCE 4826	Experimental Seminar: Corporate Governance (prereqs., FNCE 3010)	3
FNCE 4830	Seminar in Investment Banking (prereqs., admission is by application)	3
FNCE 4831	Seminar in Investment Management (prereqs., FNCE 3010, FNCE 3030)	3
APPM 4720	Open Topics in Applied Mathematics (prereqs., FNCE 3010, FNCE 3030)	3
ESBM 4570	Entrepreneurial Finance (prereqs., BASE 2101, BASE 2102, BASE 2103, BASE 2104)	3
INBU 4200	International Financial Management (prereqs., BASE 2101, BASE 2102, BASE 2103, BASE 2104)	3
REAL 4100	Real Estate Finance and Investment Analysis (prereqs., REAL 3000)	3

Investment Banking Track

In addition to the required courses, students interested in a career in investment banking should consider taking the following courses:

Code	Title	Credit Hours
FNCE 4830	Seminar in Investment Banking	3
ACCT 3230	Corporate Financial Reporting 2	3
FNCE 4050	Capital Investment Analysis	3
Total Credit Hours		9

Investment Management Track

In addition to the required courses, students interested in a career in investment management should consider taking the following courses:

Code	Title	Credit Hours
FNCE 4050	Capital Investment Analysis	3
FNCE 4831	Seminar in Investment Management	3
FNCE 4820	Topics in Finance	3
Total Credit Hours		9

Commercial Banking Track

In addition to the required courses, students interested in a career in commercial banking should consider taking the following courses:

Code	Title	Credit Hours
FNCE 4000	Financial Institutions Management	3
FNCE 4820	Topics in Finance	3
FNCE 4070	Financial Markets and Institutions	3
Total Credit Hours		9

Corporate Finance/Consulting Track

In addition to the required courses, students interested in a career in corporation finance should consider taking the following courses:

Code	Title	Credit Hours
ESBM 4570	Entrepreneurial Finance	3
ACCT 3230	Corporate Financial Reporting 2	3
FNCE 4050	Capital Investment Analysis	3
Total Credit Hours		9

Entrepreneurial Finance Track

In addition to the required courses, students interested in a career in entrepreneurial finance should consider taking the following courses:

Code	Title	Credit Hours
ESBM 4570	Entrepreneurial Finance	3
INBU 4200	International Financial Management	3
FNCE 4826	Experimental Seminar: Corporate Governance	3
Total Credit Hours		9

Personal Financial Planning Track (PFP)

Program includes six courses, with two required courses, FNCE 4040 and FNCE 4850 waived, see below.

Code	Title	Credit Hours
FNCE 2820	Introduction to Personal Financial Planning	3
ACCT 3440	Income Taxation of Individuals	3
FNCE 3040	Retirement Planning (note: replaces FNCE 4040)	3
FNCE 3060	Estate Planning	3
FNCE 4840	Personal Financial Plan Development Capstone (note: replaces FNCE 4850)	3
Total Credit Hours		15

Management & Entrepreneurship Emphasis

Management & entrepreneurship students must choose one of the following tracks: information management, leadership, operations, strategy and entrepreneurship, or talent management.

Information Management Track

There are three required courses in the information management track. IM students inclined toward careers in technical information systems are encouraged to take programming courses as non-business electives (such as CSCI 1300 or ATLS 3519).

Code	Title	Credit Hours
Required Courses		
ORGN 3030	Critical Leadership Skills	3
BAIM 3200	Business Analytics	3
MGMT 4850	Senior Seminar in Management	3

Business - Minor

In 2013, the Leeds School of Business launched a 12-credit business minor so all CU Boulder students could gain business fundamentals, increasing their immediate impact as new hires. The business minor is now the largest minor on campus, attracting more than 1000 students from over 70 majors across the university.

Visit the Business Minor (<https://www.colorado.edu/business/academic-programs/minor-business>) webpage to learn more about the curriculum, eligibility requirements, fees and application process.

Requirements

Application

The admissions process consists of an online application (<https://www.colorado.edu/business/undergraduate/admissions/non-business%20major/business%20minor>) and a one-page resume. We receive many more qualified applicants than spots available; apply early for favorable admission.

Deadlines

- Spring Deadline: October 15
- Summer Deadline: February 15
- Fall Deadline: March 15

Eligibility

To be eligible for admission, students must have a minimum of 12 completed CU credit hours, a 2.0 GPA and have earned at least a C- in a pre-approved math reasoning course. Students currently enrolled in a pre-approved math reasoning course may apply and be conditionally admitted pending final course grade.

Fees

The business minor student fees will be eliminated starting fall 2018.

Course Requirements

The minor takes a minimum of three semesters to complete. The foundation courses may be taken concurrently, but due to the intentional sequence of our curriculum, the track and capstone must be taken after the foundation courses have been completed, and may not be taken concurrently.

Required Courses and Credits

Code	Title	Credit Hours
Foundation Courses		
BUSM 2010 & BUSM 2011	Principles of Marketing and Principles of Management	3
BUSM 2020 & BUSM 2021	Principles of Accounting and Principles of Finance	3
Program Track		
	Choose one 3-credit track.	3
Capstone		
BUSM 4010	Professional Business Plan Development	3
Total Credit Hours		12

Foundation Courses

Through our foundation courses, students are introduced to the essential elements of marketing, management, accounting and finance. Foundation courses are available in the fall, spring and summer. Track and capstone courses are available in the fall and spring semesters only. The global business track is an exception, as it occurs abroad during the summer months and is available to a select few.

Students interested in taking summer courses must apply for the summer cohort and are expected to enroll in both BUSM 2010/11 and BUSM 2020/21 over summer sessions A and B. Non-summer cohort students are ineligible for summer course access.

NOTE: Prior to fall 2018, Marketing and Management was coded as BUSM 2001 and Finance and Accounting was coded as BUSM 2002; tracks were coded as BUSM 3001, 3002, 3003, 3004 and 3005; and the capstone was coded as BUSM 4001.

Program Tracks

Students must choose at least one 3-credit track, but they may choose to complete multiple tracks for increased breadth of application.

Innovation

- BUSM 3010 Managing Innovation I (1.5)
- BUSM 3011 Managing Innovation II (1.5)

Analytics

- BUSM 3020 Business and Financial Analytics I (1.5)
- BUSM 3021 Business and Financial Analytics II (1.5)

Entrepreneurship

- BUSM 3030 New Venture Creation: Intro to Entrepreneurship (3)

Global

- BUSM 3040 Introduction to International Business and Consulting (3)

Real Estate

- BUSM 3050 Introduction to Real Estate (3)

Capstone

Finally, students complete the minor with a capstone course that focuses on business strategy and development (BUSM 4010).

Entrepreneurial Studies - Certificate

Whether working for a large global corporation or a small start-up venture, graduates will be valued for their ability to innovate, lead change, recognize emerging markets and launch new products. The entrepreneurial studies program is designed to develop an individual's abilities to create, discover and exploit opportunities in start-up ventures or existing organizations.

The entrepreneurial studies program at the Leeds School of Business is internationally recognized for the quality of its instruction and the capabilities of our students. Within the Leeds School, the Deming Center for Entrepreneurship has served as a rich resource for students with interests in entrepreneurship—coordinating the academic curriculum, providing help with internship and job placement, creating links with the business community and sponsoring networking opportunities and many special events.

The curriculum focuses on experiential learning. Courses are designed to give students hands-on experiences that develop the ability to act on opportunities. Students may begin the study of entrepreneurship in their junior year.

Requirements

A certificate in entrepreneurial studies is granted to students who fulfill the following requirements:

1. complete the three courses listed below with at least a 3.00 GPA;
2. complete an entrepreneurship internship with a start-up company who's been in business for 5 years or less and has less than 200 employees and complete a 2-3 page write-up about it;
3. participate in entrepreneurship-related extracurricular activities and provide a short write-up on their experiences; and
4. pass a written exam in entrepreneurship at the conclusion of their studies.

Required Courses and Credits

Code	Title	Credit Hours
ESBM 3700	Entrepreneurial Environments	3
ESBM 4570	Entrepreneurial Finance	3
ESBM 4830	Entrepreneurship Business Planning and Preparation	3

NOTE: Students seeking internships should complete ESBM 3700.

For more information, visit the Leeds School's Deming Center for Entrepreneurship (<http://www.colorado.edu/business/deming>) webpage.

Business Leadership - Certificate

The business leadership certificate provides students with the foundations of theory and research on leadership, but emphasizes professional experiences such as mentoring, internships, and engaging in leader roles. By the time they graduate, students should be poised to embrace leadership challenges as they unfold, make sense of leadership experiences, thrive in a dynamic business culture, and lead with an ethical compass.

The business leadership certificate is recommended for students who:

- are interested in learning about the art and science of leadership,
- have an interest in developing their own leadership to take on exciting leadership roles,
- want to accelerate their leadership development so they can best learn from their early career experiences, and
- want to start their own companies or lead important projects for social change.

Admissions

Please complete the Business Leadership Certificate Application Form (<https://www.colorado.edu/business/programs/leeds-certificate-programs/business-leadership-certificate>) or email Stefanie Johnson (stefanie.johnson@colorado.edu) for additional details.

Requirements

To teach students to be leaders, we must go beyond the traditional classroom, providing students with the opportunity to engage in leadership experiences and to make sense of those experiences to prepare them for future leader roles. As such we include both classroom and experiential requirements to the certificate.

Required Courses and Credits

Code	Title	Credit Hours
Required Leadership Courses		
BADM 1250	First Year Seminar for Business	1.5
BCOR 2202	Principles of Organizational Behavior	1.5
ORGN 3030	Critical Leadership Skills	3

Total Credit Hours		12

¹ Experiential Learning: Students must complete a retreat, workshop and project to fulfill their experiential learning requirement. For more information, visit the Business Leadership Certificate (<https://www.colorado.edu/business/programs/leeds-certificate-programs/business-leadership-certificate>) webpage.

Global Business - Certificate

The globalization of the marketplace has created a need for managers who can function effectively in the international business environment. Despite this movement toward globalization, there remain significant environmental differences (cultural, economic and political) between countries and/or regions. Managers in an international business must be sensitive to these differences and also must adopt the appropriate policies and strategies for dealing with them.

To address these issues, the Leeds School of Business offers an area of application in international business consisting of 9 credit hours. Students completing additional requirements may earn a certificate in international business. The certificate program builds on the students' understanding of the functional areas of business and provides them with an appreciation of the international environment. It also supplies them with a framework for developing policies and strategies appropriate for the global marketplace.

Requirements

Required Courses and Credits

Code	Title	Credit Hours
Select one of the following:		3
INBU 3300	International Business and Management	
INBU 4200	International Financial Management	
Global Seminar: London International Finance		
Select one of the following:		3
MGMT 4150	International Operations Management	
Global Seminar: International Operations in Hong Kong		
Select one of the following:		3
INBU 3450	International Marketing	
Global Seminar: Marketing in the Global Environment		
Total Credit Hours		9

In addition to the three INBU courses, the certificate program requires the completion of the following requirements:

- 6 credit hours of additional international course work, such as international business electives not on the required list above, or courses in economics, geography, political science, history or language. Courses must be selected from an approved list maintained by the Leeds Undergraduate Advising Office.
- a significant international experience, which may be satisfied in a number of ways including participation in a study abroad program, an international academic internship, service work in an international location or an internship with an organization focused on global business and economics. Students should check with the Leeds Undergraduate Advising Office to verify that their global experience will qualify to meet this requirement.
- submit an online application to receive the global business certificate.

Operations and Information Management - Certificate

Advances in business knowledge and technology have radically changed business systems and processes—for example, how organizations buy and sell goods and services, integrate their supply chain and logistic systems and reach or retain customers. As a result, critical to today's businesses is the ability to get the right information to the right people at the right time, so that both strategic and operational decisions are made properly and quickly. To help students develop this ability, the Leeds School of Business offers the OPIM certificate.

Requirements

Students who are not in the OM or IM track in the Management and Entrepreneurship Division can take any three courses listed in the course description section below. Students majoring in the OM track can take any three IM track courses, while students majoring in the IM track can take any three OM track courses.

To complete the OPIM certificate requirements, all students must also complete a faculty-supervised OPIM research project (MGMT 4900) or faculty-supervised OPIM internship (MGMT 4910).

In addition, students are required to maintain an overall GPA of 3.00 or higher for the selected courses and receive a letter grade of B- or higher in each of the three courses. Successful completion of the certificate program will appear on the student's transcript.

The following illustrates some of the courses that students not majoring in IM or OM might want to take.

Accounting Students

Code	Title	Credit Hours
MGMT 4140	Project Management	3
BAIM 4210	Systems Thinking	3
ACCT 4540	Accounting Information Systems (Prereq: ACCT 3220)	3

BAIM 3200	Business Analytics	3
MGMT 4120	Managing Business Processes	3
BAIM 4210	Systems Thinking	3

Marketing Students

Code	Title	Credit Hours
BAIM 3200	Business Analytics	3

MGMT 4110	Supply Chain Management	3
BAIM 4210	Systems Thinking	3

Real Estate - Certificate

The real estate area of application is designed to provide students with exposure to the concepts, tools and techniques necessary for entry-level positions. A career in real estate provides an opportunity for individuals to operate as entrepreneurs whether they are brokers, appraisers, developers, property managers, consultants or investors. An integrated process is followed in the three application area courses to prepare students for real estate careers.

Requirements

The real estate certificate program allows students to broaden their knowledge and understanding of real estate through a multidisciplinary focus, whereby courses are taken outside of the Leeds School of Business. See the CU Real Estate Center (<http://realestate.colorado.edu>) website for a list of approved electives and internships.

Required Courses and Credits

Code	Title	Credit Hours
Required Courses		
REAL 3000	Principles of Real Estate	3
REAL 4000	Real Estate Law	3

	Academic internship in real estate practice or related area	3
Total Credit Hours		18

Socially Responsible Enterprise - Certificate

CU Boulder's Leeds School of Business is one of the few undergraduate business schools in the nation that emphasizes socially responsible conduct in business throughout its curriculum. The Center for Education on Social Responsibility (CESR) helps undergraduate students become outstanding business leaders of tomorrow by preparing them to meet the ethical challenges posed by an increasingly competitive, globally connected business world.

CESR offers the certificate in socially responsible enterprise (SRE) to business students who seek to distinguish themselves in the field of socially responsible business, whether their unique interests lie in environmental sustainability, social entrepreneurship, corporate ethics or values-driven leadership. Students who complete the certificate will develop the practical knowledge and marketable experiences that will distinguish them as business professionals who strive to make a positive social impact.

Requirements

Interested students need to register with the CESR office and must graduate with a 3.00 GPA.

Required Courses and Credits

Code	Title	Credit Hours
General Courses		
Select two of the following in the areas of philosophy, environmental studies, political science, economics, communication, civil engineering or sociology (check prerequisites before enrolling):		6
ECON 3545	Environmental Economics

Business Courses		
Select three of the following:		9
CESR 4000 & CESR 4001	Leadership Challenges and	
CESR 4005	Business Solutions for the Developing World: Learning through Service	
	Global Seminar: Social Entrepreneurship and Innovation (Cocle, Panama)	
CESR/MGMT 4130	Sustainable Operations	
CESR/MGMT 4440	Privacy in the Age of Social Media	
CESR/ACCT 4827	Integrated Reporting for Socially Responsible Strategies	
CESR 4828	Experimental Seminar: Corporate Boards in Action	
MGMT 4140	Project Management (must be pre-approved for SRE course work credit)	
ORGN 3030	Critical Leadership Skills	
Total Credit Hours		15

NOTE: These courses are in addition to BCOR, the capstone course, as well as any other prerequisites. See course descriptions for prerequisite details.

Experiential Learning

The experiential learning component is meant to give SRE students the freedom to gain practical experience working in a field of social responsibility of particular interest to them. Students must meet with the

SRE Certificate Advisor to gain preapproval of their proposed experiential learning experience. Upon completion of the experience, students and their supervisor will complete a brief form (provided by the SRE Certificate Advisor) that documents the student's service. Experiences will be evaluated for application of business skills and social impact.

Experiential learning options include:

- **Intern for an organization (for-profit or nonprofit).** Acceptable internships will be characterized by substantive work that adds value to the organization and contributes to the student's learning. The SRE Certificate Advisor has information on organizations seeking business assistance from Leeds students. Students may also contact Career Connections for information about internships.
- **Service learning through the Study Abroad Office.** The Office of International Education offers study abroad programs focused on service learning. These programs generally span one academic quarter or semester in the host country, during which the student will participate in, and gain credit for, study in a school of higher education. Outside of the classroom, students will work with local institutions and non-governmental organizations on service projects that promote community development. Service learning programs that are approved through the Office of International Education are automatically approved for experiential learning credit for this certificate.
- **Related course work.** Select courses may count toward the experiential learning requirement or toward the business course work requirement, but not toward both. For course descriptions and program details, visit the CESR Learning (<http://www.colorado.edu/business/CESR/cesr-learning>) webpage.

Code	Title	Credit Hours
CESR 4005	Business Solutions for the Developing World: Learning through Service	3
MGMT 4140	Project Management (with advisor approval)	3

Advisor-approved independent study in a related topic; or an advisor-approved internship of an appropriate nature

Personal Reflection and Statement of Purpose

Upon completion of all certificate requirements, students will reflect on their learning and draft a short reflection paper and a statement of purpose, setting out the values that will guide their conduct and their careers. They will then meet with the CESR faculty advisors to discuss their SRE certificate experience. This final requirement is to remind students why they elected to pursue the certificate and how it will continue to have an impact on their lives after college. Students are encouraged to truly live the statement of purpose.

Cross-College Programs

Space - Minor

The space minor is part of the larger campus-wide Grand Challenge initiative and is open to all CU Boulder students regardless of major. The space minor is designed to provide all students enrolled in the minor with an over-arching background in all aspects of space through the required Pathway to Space (<https://www.colorado.edu/p1dfb9ae7d4d>) course. Course topics include:

- Space science and exploration

- Human spaceflight and life sciences
- Aeronautics and near space
- Launch and spacecraft systems
- Climate and environment
- Space business, policy and politics
- Space arts, media and history

Visit the Grand Challenge Space Minor (<http://www.colorado.edu/spaceminor>) website for more information.

Requirements

Completion of 15 credit hours (5 courses) is required for the minor, distributed as follows:

- ASEN 1969 – Pathway to Space (3 credit hours)
- Four approved elective courses (12 credit hours)

Requirements for the minor are met by completing the required ASEN 1969 Pathway to Space course and four approved electives from the list maintained on the Space Minor web site (<http://www.colorado.edu/spaceminor/space-minor-course-list>). NOTE: There may be restrictions on how many and/or which specific courses/credits can apply towards this minor as well as towards the student's degree program.

Three of the four elective courses must be completed at the CU Boulder campus. One elective course may be transferred from another institution with approval. A grade point average (GPA) of 2.000 or better is required for all courses used to satisfy the requirements for this minor. Each individual course that is counted towards these degree requirements must be passed with a D- or better. Note, however, that a C- or better is required in all prerequisite courses to move on to a subsequent course.

International Media - Certificate

This undergraduate certificate program is designed exclusively for undergraduate students enrolled in the College of Media, Communication and Information (CMCI), and in the International Affairs program (IAFS) in the College of Arts and Sciences. This certificate allows students majoring in international affairs to explore careers in international reporting, advertising and entertainment, while CMCI majors will acquire the context and perspective necessary to work in global and international jobs.

Requirements

The certificate requires 18 to 19 credit hours (depending on the lower-division courses chosen), 15 of which must be upper-division courses.

Students majoring in international affairs are eligible to apply for admission to the certificate program if they have completed 30 credit hours (at least 6 of which must be in their major) with a GPA of 2.75 or better.

For more information, visit the International Affairs Program (<http://www.colorado.edu/iafs>) website.

GEOG 3682	Geography of International Development	3
GEOG 4712	Political Geography	3
HIST 4126	History of U.S. Foreign Relations Since 1941	3
HIST 4820	Human Rights: Historical Perspectives	3
ECON 3403	International Economics and Policy	3
ECON 3545	Environmental Economics	3
ECON 3784	Economic Development and Policy	3
ECON 4784	Economic Development	3
PHIL 3190	War and Morality	3-4
PHIL 3260	Philosophy and the International Order	3
PSCI 3143	Current Affairs in International Relations	3
PSCI 3163	American Foreign Policy	3
PSCI 3193	International Behavior	3
PSCI 4012	Global Development	3
PSCI 4173	International Cooperation and Global Anarchy	3
PSCI 3183	International Law	3
PSCI 3213	International Political Economy	3
PSCI 3193	International Behavior	3
PSCI 4732	Critical Thinking in Development	3
PSCI 4783	Global Issues	3
WGST 3500	Global Gender Issues	3

List B

Courses on this list deal with communication media.

Code	Title	Credit Hours
JRNL 2001	Fundamentals of Reporting	3

JRNL 3102	Photojournalism I	3
JRNL 3651	Media Law and Ethics	3
JRNL 4351	Reporting Wars, Conflict and Peace	3
MDST 3321	Media Industries and Economics	3
MDST 3711	Media and Popular Culture	3
MDST 3791	Media and the Public	3
MDST 4211	Asian Media and Culture	3
MDST 4371	Media and Religion	3
MDST 4331	Gender, Race, Class, and Sexuality in Popular Culture	3

Education

The School of Education offers programs that prepare individuals to lead in a wide array of educational settings, including teaching in K–12 classrooms, conducting educational research, developing evidence-informed policy and designing innovative learning environments both in schools and in community-based settings.

Undergraduate students interested in K–6 Elementary Education may either pursue a Bachelor of Arts in Elementary Education or complete the teacher licensure requirements while earning a bachelor’s degree from another college on campus. The school also provides teacher licensure programs that ensure rigorous content preparation and extensive clinical experience in local partner schools. Teacher licensure programs are available at the undergraduate, post-baccalaureate and master’s level. The School of Education collaborates with the College of Arts & Sciences, College of Engineering and Applied Science and the College of Music to design degree programs for undergraduates that combine a major in Arts & Sciences, Engineering and Applied Science or Music with courses and field experiences in education that lead to a Colorado initial license.

The school offers a range of experiences and courses for undergraduates interested in educational issues, serving in the Peace Corps and/or working in community-based settings. Through the CU Engage program, the school offers undergraduates opportunities to participate in community-based research and programs. Undergraduate students pursuing a major in the College of Arts and Sciences with a bachelor’s degree in either Social Sciences or Arts and Humanities can apply for a dual degree with a Bachelor of Arts in Leadership and Community Engagement. This option is available to undergraduate students pursuing a Bachelor of Arts in Anthropology, Political Science, Sociology, Ethnic Studies, Women and Gender Studies, Geography, English, Jewish Studies, Philosophy, Spanish & Portuguese or Asian Studies. In addition, the school offers two undergraduate minors, one in Education and one in Leadership Studies.

Graduate programs in the school serve practicing teachers as well as those seeking to improve education through rigorous research and evidence-informed policy and practice. The school’s doctoral program is a cohort-based, full-time program that prepares individuals to lead in universities, research or policy institutes, state or government agencies and innovative non-profit organizations.

Mission

Our work in the School of Education is grounded in a lived commitment to democracy, diversity, equity and justice. Guided by this commitment, our faculty, researchers, staff, and students pursue evidence-informed policy and practice. We teach and conduct research to make a positive

difference with and in schools and communities. We aim for our graduates to be engaged and informed educators, public scholars, researchers, policymakers and community leaders.

Accreditation

The licensure programs, both undergraduate and graduate, are fully accredited by the North Central Association of Colleges and Schools, the Council for Accreditation of Educator Preparation, the Colorado Department of Education and the Colorado Commission on Higher Education.

Policies & Requirements

Admission Requirements

Students may apply to one of the teacher education programs if the following requirements have been fulfilled:

- **GPA:** Elementary and Secondary students must have and maintain a 2.75 (on a 4.00 scale) cumulative GPA, 2.75 at CU Boulder, 2.75 in their subject area (secondary teacher fields) and 2.75 in education. K-12 Music Education students must have and maintain a 3.00 overall and in their subject area. Students applying to Master's Plus (MA+) programs must have and maintain a 3.00 cumulative GPA.
- **Prior Degrees:** Students applying to Post-Baccalaureate and Master's Plus (MA+) programs must have a bachelor's degree from an accredited institution.
- **Youth Experience:** Students must provide written verification of 25 clock hours of satisfactory experiences with elementary, middle/junior high or senior high school-aged youth (appropriate to the desired program) in the past five years. Forms for this purpose are available in the Office of Student Services, Education 151, or online at the School of Education (<https://www.colorado.edu/education>) website. Undergraduate students at CU Boulder meet this requirement through school experiences in EDUC 2020 Step 1: Inquiry Approaches to Teaching and EDUC 2050 Step Up to Social Justice Teaching courses.
- **Basic Skills:** All teacher education students must demonstrate basic skills competence in mathematics and literacy. This may be done through acceptable grades in appropriate college course work, or by acceptable standardized test scores. Contact the Office of Student Services in Education 151 for more information.
- **Letters of Recommendation**
- **Personal Statement**
- **Background Check and Fee:** The School of Education and our partner districts require students working in schools to undergo background checks at least once per year. The costs and process for these background checks are changing due to new state requirements. Check with the Office of Student Services for the most updated information.
- **Application Fee:** The appropriate application fee should be submitted with application materials. Fees vary by program.

Individuals interested in completing the teacher education program at the University of Colorado Boulder should request application materials from the Office of Student Services, Education 151 or online at the School of Education (<https://www.colorado.edu/education>) website. Students currently enrolled in a degree program at Boulder will need to complete an application.

Individuals who have completed a baccalaureate degree at an accredited institution and are not currently enrolled at the university must complete a program application, a university application and submit official transcripts from all previous colleges directly to the university's Office of Admissions (<http://www.colorado.edu/admissions>).

Academic Excellence Scholarships and Awards

A limited number of scholarships and awards are available for second- and third-year students within the School of Education to support study at the master's and undergraduate levels. Each year a combination of teaching assistantships (TAs), research assistantships (RAs), other forms of graduate assistantships (GAs) and fellowships are available in the School of Education to support full-time doctoral study. The strongest doctoral applicants are nominated by the school for fellowships awarded by the Graduate School. Candidates apply in the spring semester for scholarships and awards for the following school year. Application procedures and deadlines are publicized on the School of Education website.

Students are eligible to apply for university-wide financial assistance through the Office of Financial Aid. State and federal programs are available for loan cancellation or forgiveness for Colorado teachers of certain subjects or who teach in designated schools serving students from low-income families. Information about these opportunities may be found at the School of Education Financial Aid and Scholarships (<https://www.colorado.edu/education/student-life/financial-aid-scholarships>) page.

Academic Standards

Upon enrollment in a School of Education degree or licensure program, a student who fails to maintain a 2.75 GPA (3.00 for graduate students) will be placed on academic recovery or may be suspended. Readmission is subject to program requirements in effect at the time of reapplication. The same conditions apply to students in other colleges and schools who have been admitted to the teacher education program.

Advising

Students are responsible for obtaining and reading the undergraduate student handbook (<https://www.colorado.edu/education/student-life/undergraduate-experience>). Off-campus students may obtain advising materials (<https://www.colorado.edu/education/student-life/advising-ambassadors/contact-advisor>) online or by calling 303-492-6555.

At CU Boulder, degree requirements vary among the schools and colleges. Students seeking a degree at the University of Colorado should consult, as soon as possible, with an advisor in the college or school from which they expect to graduate and with the School of Education advisor (<https://www.colorado.edu/education/student-life/advising-ambassadors>).

Students are encouraged to become familiar with the teacher education requirements by comparing their own transcripts to the published advising materials. Students can then talk with an advisor before applying to the program or they may wait until after their applications are processed. Students seeking teacher licensure in French, German, Japanese, Latin, Russian, Spanish or Music Education should see the designated advisor for that content area in addition to the School of Education advisor.

Advising may also be obtained by emailing edadvise@colorado.edu. When requesting email advising, please make questions as specific as possible.

Programs of Special Interest

CU Engage

The mission of CU Engage is to leverage the resources of the Boulder campus to work collaboratively with community groups to address complex public challenges. CU Engage, which is part of the School of Education, develops and sustains equity-oriented partnerships, organizes opportunities for students to learn alongside community members and supports participatory research methods focused on the public good.

CU Engage provides support for two focal activities: 1) community-based learning pathways and 2) community-based research. These activities are linked through the formation of community partnerships that support both learning and research. Community-based learning pathways—including INVST Community Studies, Public Achievement, CU Dialogues and the Leadership Studies Minor—prioritize experience (learning by doing), reciprocity (work with rather than for communities) and intellectual rigor rooted in academic disciplines. Community-based research refers to projects that bring people together with varied training and expertise, working collectively in mutually beneficial ways, on research studies that matter to the public.

Equity & Diversity Initiatives

As an important part of its mission, the CU Boulder School of Education has a strong commitment to democracy, diversity and social justice. Given that education is a cornerstone of individuals' life chances and opportunities as well as an informed and engaged public, the unwavering evidence of inequality in American education demands the sustained and dedicated attention of researchers, educators and policymakers.

Education Diversity Scholars Program

The Education Diversity Scholars (EDS) program works with the University of Colorado's LEAD Alliance Neighborhood to provide students of color and first-generation college students with social and academic support, as well as advising on financial support and career preparation. The goal of the program is to offer students a welcoming environment and a strong support network in order to help them excel in their chosen fields. By participating in the Education Diversity Scholars neighborhood, students have access to the personal contact and support of a small community while still being able to take advantage of the benefits of a large university.

INVST Community Studies

Consistent with their vision for a just and sustainable world, the INVST Community Studies program develops engaged citizens and leaders who work for the benefit of humanity and the environment. INVST Community Studies innovatively operates as a community-based organization, practicing service learning and participatory education. In order to fulfill this mission, the program offers:

- a comprehensive two-year Community Leadership Program (CLP) focused on developing community leaders who engage in compassionate action as a lifetime commitment;
- Community Studies electives that foster civic responsibility and leadership potential;

- a Public Achievement Program where CU undergrads coach local primary and secondary school students in the design and implementation of public action projects; and
- a Youth Council for Public Policy that empowers young people to use the democratic process as a tool for positive social change.

The INVST CLP offers a unique and transformational educational experience to all majors. Each year the INVST CLP admits a small group of students who are committed to making a positive difference with their lives. The two-year program is designed to cultivate deep understanding about issues facing people and the planet and to provide skills and experiences for community leaders to fulfill progressive visions for change. Specifically, students participate in theory classes, skills-training classes and two summer service-learning experiences, one domestic and one international. In addition, students intern six hours each week with community-based organizations during their first academic year, and collectively design, implement and evaluate community leadership projects during their second academic year. Students learn and serve together in a small group environment throughout the program. Applications for the INVST CLP are due every year in February.

Course code for this program is **INVS**.

STEM Initiatives

CU is a leader in Science Technology Engineering and Math (STEM) education. The School of Education, in collaboration with the College of Arts & Sciences, developed and is a national leader in the Learning Assistant model. Additionally, CU Boulder was one of the original 13 institutions selected to replicate the U Teach Model which started at the University of Texas, Austin. Both the LA and CU Teach programs help us prepare outstanding secondary math and science teachers.

The Learning Assistant (LA) Model at the University of Colorado-Boulder uses the transformation of large-enrollment science courses as a mechanism for achieving four goals:

- to recruit and prepare talented science majors for careers in teaching;
- to engage science faculty in the recruitment and preparation of future teachers;
- to improve the quality of science education for all undergraduates; and
- to transform departmental cultures to value research-based teaching for ourselves and for our students

The transformation of large-enrollment courses involves creating environments in which students can interact with one another, engage in collaborative problem solving and articulate and defend their ideas. To accomplish this, undergraduate LAs are hired to facilitate small-group interaction in our large-enrollment courses.

CU Teach is a four-year degree/licensure program that allows students to complete a rigorous education in a mathematics, science or engineering major and fulfill requirements for a Colorado initial teaching license in secondary mathematics or secondary science. It is a unique collaborative program between the College of Arts and Sciences, the College of Engineering and Applied Science, and the School of Education. CU Teach students get immediate hands-on K-12 teaching experience by enrolling in the first course in the program, Step 1: Inquiry Approaches to Teaching (EDUC 2020). Students can enroll in Step 1 as early as their freshman year at CU. In addition to taking courses from research faculty in the School of Education, College of Arts and Sciences and College of Engineering and Applied Science, CU Teach students get support from

Mentor Teachers (current K-12 teachers) and Master Teachers (CU faculty who are veteran classroom teachers). The student organization hosts activities and events that are social as well as service-oriented, and that help students develop career networks.

Programs of Study

Undergraduate students interested in K–6 elementary education may either pursue a Bachelor of Arts in elementary education or complete the teacher licensure requirements while earning a bachelor's degree from another college on campus. The school also provides teacher licensure programs that ensure rigorous content preparation and extensive clinical experience in local partner schools. Teacher licensure programs are available at the undergraduate, post-baccalaureate and master's level. The School of Education collaborates with the College of Arts & Sciences, the College of Engineering & Applied Science, and the College of Music to design degree programs for undergraduates that combine a major in those fields with courses and field experiences in education that lead to a Colorado Initial Teacher license.

The school offers a range of experiences and courses for undergraduates interested in educational issues, serving in the Peace Corps and/or working in community-based settings. Through CU Engage, the school offers undergraduates opportunities to participate in community-based research and programs. Undergraduate students pursuing a major in the College of Arts and Sciences with a bachelor's degree can apply for a dual degree with a Bachelor of Arts in leadership and community engagement. This option is available to undergraduate students pursuing a Bachelor of Arts in anthropology, Asian studies, English, ethnic studies, geography, Jewish studies, philosophy, political science, sociology, Spanish & Portuguese, and women and gender studies. In addition, the school offers two undergraduate minors: one in education and one in leadership studies.

Course code for this program is EDUC.

Preparing the Teachers of Tomorrow

The School of Education prepares educators who are able to enact commitments to social justice and equitable access to deep content learning in school, family and community contexts.

The following principles guide our work in preparing the next generation of educators:

- Teachers must position students as sense-makers and knowledge-generators, who desire to invest and succeed in school. This involves noticing children/youth, building relationships with them, valuing their perspectives and attending to their thinking, curiosities and capabilities.
- Teaching is both intellectual work and a craft. Deep knowledge of content and pedagogy, creativity and passion fuel both learning and teaching.
- Teachers must design equitable learning environments in which all children are engaged in robust and consequential learning.
- Teacher's instruction and student learning is always conducted within the context of larger social systems, structures and hierarchies.
- What we do and say matters and must be analyzed. Our language and action constructs or constrains opportunities for children to build meaningful, positive and sustained relationships to learning and one another.

Colorado Teacher Quality Standards

Teacher education candidates engage in a planned sequence of courses and accompanying clinical experiences in local community and school sites. Courses and assessments ensure candidates have demonstrated appropriate mastery of (1) content taught in the Colorado Academic Standards and (2) professional practices and dispositions associated with the Colorado Teacher Quality Standards listed below.

1. Teachers demonstrate mastery of and pedagogical expertise in the content they teach.
2. Teachers establish a safe, inclusive and respectful learning environment for a diverse population of students.
3. Teachers plan and deliver effective instruction and create an environment that facilitates learning for their students.
4. Teachers reflect on their practice.
5. Teachers demonstrate leadership.
6. Teachers take responsibility for student academic growth.

Bachelor's Degrees

- Elementary Education - Bachelor of Arts (BA) (p. 659)
- Leadership and Community Engagement - Bachelor of Arts (BA) (p. 663)

Minors

- Education - Minor (p. 667)
- Leadership Studies - Minor (p. 667)

Teacher Licensure Program

- Post-Baccalaureate (p. 668)
- Undergraduate Nondegree (p. 677)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Courses

Education

EDUC 1500 (1) Success Strategies in Higher Education

Introduces students to learning theories and a range of college success strategies to deepen their engagement with their academic work. Students will learn metacognitive practices to identify the values and aims driving their academic ambitions and craft their most successful path through their undergraduate experience.

Repeatable: Repeatable for up to 2.00 total credit hours.

Grading Basis: Letter Grade

Additional Information: Departmental Category: General Education

EDUC 1580 (3) Energy and Interactions

Engages non-physics majors in hands-on, minds-on activities and labs to investigate the physical world, the nature of science, and how science knowledge is constructed. This introductory course is especially relevant for future elementary and middle school teachers although it will meet the needs of most non-physics and non-science majors. Physics content focuses on interactions and energy.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 1580

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences

Departmental Category: General Education

MAPS Course: Chemistry

MAPS Course: Physics

EDUC 2020 (1) Step 1: Inquiry Approaches to Teaching

Invites science, mathematics and engineering students to explore teaching as a career by providing first-hand experiences teaching science/math lessons in local elementary classrooms. Introduces theory and practice necessary to design and deliver excellent instruction. Master teachers provide ongoing support and feedback. Meets weekly on CU campus (1.5 hours/week) and involves five visits to an elementary school.

Additional Information: Departmental Category: General Education

EDUC 2025 (1) Step 1: Inquiry Approach to Teaching in Informal Settings

Invites science, mathematics and engineering students to explore teaching and learning in informal K-12 environments. Introduces theory and practice necessary to design and deliver excellent instruction. Meets weekly on CU campus (1.5 hours/week) and requires participants to work a minimum of five hours with K-12 students at STEM-related special events such as science fairs, after school programs, and science camps.

Requisites: Restricted to AMEN, ASTR, BCHM, CHEM, EBIO, GEOL, IPHY, MATH, MCDB, PHYS, GEEN, NRSC, Arts and Sciences Open Option majors, College of Engineering majors, or Education minors only.

Additional Information: Departmental Category: General Education

EDUC 2030 (1-2) Step 2: Inquiry-Based Lesson Design

Builds on EDUC 2020 and further develops lesson design and inquiry-based teaching practice. Offers opportunity to explore teaching career and learn about middle school culture. Master teacher provides support as students design and deliver lessons in middle school classrooms. Emphasizes assessment of student learning. Meets weekly on CU campus (1.5 hours/week) and involves five visits to a local middle school.

Requisites: Requires prerequisite of EDUC 2020 or EDUC 4610 (all minimum grade C).

Additional Information: Departmental Category: General Education

EDUC 2050 (1) Step Up to Social Justice Teaching

Engages students in theory and practice for justice-centered teaching. This first required course for majors introduces the principles guiding the elementary program and provides opportunities for students to enact those principles in collaboration with children and teachers in public school classrooms. Meets weekly on CU campus (1.25 hours/week). Involves additional visits to local schools.

Requisites: Restricted to School of Education (EDUC) undergraduates only

Additional Information: Departmental Category: General Education

EDUC 2125 (3) History of American Public Education

Provides an overview of the history of American education by exploring major reforms efforts from the common school movement to "Nation at Risk." Examines what intellectuals were thinking about public schools and what ordinary people experienced in them. Assesses how differences in race/ethnicity, class, gender, and power shaped public schools.

Additional Information: Arts Sci Core Curr: United States Context

Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: General Education

EDUC 2150 (3) Education in Film

Provides opportunities to view and analyze how facets of education are represented (or misrepresented) in film. Considers narratives constructed about education and how those stories fuel popular conceptions of and assumptions about students, teachers, and schools. Examines how issues of race, class, and gender are embedded in how films represent schools, teachers, students, and communities.

Additional Information: Departmental Category: General Education

EDUC 2400 (3) Cultural Diversity and Awareness

Enhances students' self-awareness in a variety of educational and cultural settings. Investigates self within a cultural context, inviting students to engage more deeply with their cultural assumptions and lenses, as well as the cultural practices and beliefs of other distinct groups. Explores themes relating to diversity through works of fiction, cultural contexts, contemplative practices, poetry, music and experiential activities.

Additional Information: Departmental Category: General Education

EDUC 2500 (3) Strategies for Social Change

Examines strategies for social change locally and internationally. Critically explores a range of social change case studies including: community organizations, social movements, social entrepreneurship, philanthropy, political and legal advocacy and technology. Students will develop their own proposal for a social change initiative.

Grading Basis: Letter Grade

Additional Information: Departmental Category: General Education

EDUC 2625 (3) Teaching English as a Second Language

Exposes students to strategies used to teach English as a second or foreign language. Covers both theoretical and applied aspects of language learning and teaching. Exposes students to techniques, activities, strategies and resources to plan instruction for students learning English as a second language. Emphasizes oral language development, literacy and content-area instruction for teaching K-12 students.

Additional Information: Departmental Category: General Education

EDUC 2800 (1-3) Special Topics

Designed to meet needs of students with topics of interest.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: General Education

EDUC 2910 (1-3) Field Practicum 1

Offers supervised campus and off-campus experiences tied to course work in the INVST program. See also EDUC 2920.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: General Education

EDUC 2919 (3) Renewing Democracy in Communities and Schools

Examines curriculum theory, K-12 reform, and the concepts of citizenship, democracy, power, and diversity through classroom discussion and participation in a school-based Public Achievement program. Students will dialogue with diverse groups of people; identify multiple perspectives around controversial issues; and learn to use research and writing to articulate public problems and advocate for their solutions.

Equivalent - Duplicate Degree Credit Not Granted: INVS 2919

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Arts Sci Core Curr: Human Diversity

Arts Sci Gen Ed: Diversity-U.S. Perspective

Arts Sci Gen Ed: Distribution-Social Sciences

Departmental Category: General Education

EDUC 2920 (1-3) Field Practicum 2

Offers supervised campus and off-campus experiences tied to course work in the INVST program. See also EDUC 2910.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: General Education

EDUC 3013 (3) School and Society

Introduces students - both future teachers and those simply interested in education - to pressing issues surrounding education within the United States. The course reveals the complex relationship between schools and the larger society of which they are a part. Examines issues of diversity and equity from different disciplinary lenses, including history, philosophy, sociology and anthropology.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Core Curr: Human Diversity

Arts Sci Core Curr: Contemporary Societies

Arts Sci Gen Ed: Diversity-U.S. Perspective

Arts Sci Gen Ed: Distribution-Social Sciences

Departmental Category: General Education

EDUC 3570 (3) Learning With Technology In and Out of School

Examines ways digital media are changing the way young people learn, play, make friends, and participate in civic life. Studies widely implemented digital tools intended to support literary, math, and science learning of children ages 4-18. Involves brief internship (5 hours outside class) and design projects that integrate these tools to transform in either a classroom or after-school program.

Additional Information: Departmental Category: General Education

EDUC 3621 (1-3) Art for the Elementary Teacher

Introduces elementary education students to art education. Introduces many visual art techniques, art media and processes used in art education. Includes hands-on studio art experiences in a format that supports subjects such as literature, writing, music and social studies. Emphasizes the role of art education and materials in supporting the artistic development and visual literacy of children. Department enforced prerequisite: completion of 30 hours of course work.

Requisites: Restricted to School of Education (EDUC) undergraduates only

Additional Information: Departmental Category: Elementary Education

EDUC 4015 (3) International / Comparative Education

Comparatively studies education in other countries, emphasizing its role in developing nations, with an emphasis on successful models in basic literacy, primary education, secondary curriculum and teacher education. Analyzes political, social and economic policies and ideologies for their relevance to the development process, including the role of international organizations: World Bank, UNICEF, UNESCO, Peace corps and Volunteer Agencies.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 5015

Additional Information: Departmental Category: General Education

EDUC 4023 (3) Differentiating Instruction in Diverse Secondary Classrooms

Focuses on teaching culturally and linguistically diverse students, special education students, and differentiation in the classroom. Emphasizes evidence-based teaching practices and programmatic interventions that support student learning. Includes practicum.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 4351

Requisites: Restricted to EDEN, EDFR, EDGR, EDIT, EDJP, EDLT, EDMA, EDMU, EDSC, EDRU, EDSP, EDSS or MMED majors only.

Additional Information: Departmental Category: Secondary Education

EDUC 4050 (3) Knowing and Learning in Mathematics and Science

Explores current theories of learning in mathematics and science at the secondary level. This course focuses on learners' opportunities to learn mathematics and science in a classroom context from the perspective of different theoretical orientations. Students examine their own assumptions about learning, and critically examine the needs of a diverse student population in the classroom.

Requisites: Restricted to AMEN, ASTR, BCHM, CHEM, EBIO, GEOL, IPHY, MATH, MCDB, PHYS, GEEN, NRSC, Arts and Sciences Open Option majors, College of Engineering majors, or Education minors only.

Additional Information: Departmental Category: Secondary Education

EDUC 4060 (3) Classroom Interactions

Students design and implement instructional activities informed by what it means to know and learn mathematics and science, and then evaluate the outcomes of those activities on the basis of classroom artifacts. Students examine how content and pedagogy combine to make effective teaching. Students are required to work in a classroom 4 hours per week.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 5060

Requisites: Restricted to School of Education (EDUC), Mathematics-Secondary Education (EDMA) or Science-Secondary Education (EDSC) majors only.

Additional Information: Departmental Category: Secondary Education

EDUC 4112 (3) Educational Psychology and Adolescent Development

Analyzes fundamental concepts from psychology and the learning sciences to understand how educators can support youth development in and out of school. Includes service learning requirement.

Equivalent - Duplicate Degree Credit Not Granted: PSYC 4114

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

Departmental Category: Secondary Education

EDUC 4125 (3) Secondary World Language Methods

Presents and discusses issues in secondary school curriculum, instruction, and classroom management as they play out in world language classroom. Examines, analyzes, and evaluates a variety of teaching strategies, their effectiveness for students, and teacher dispositions to facilitate learning. Includes in-school experiences.

Requisites: Restricted to EDEN, EDFR, EDGR, EDIT, EDJP, EDLT, EDMA, EDMU, EDSC, EDRU, EDSP, EDSS or MMED majors only.

Additional Information: Departmental Category: Secondary Education

EDUC 4135 (3) Story and Memoir

Explores narrative theory and the epistemological/stylistic commitments of stories as the basis for writing memoir, as well as for studying the written and spoken memoirs of others. We use the word memoir to mean a story of "how one remembers one's own life." Introduces and discusses narrative theory and selected memoirs. Students engage in reflection on their own narrative-making processes and evaluate their practical and analytic understanding of daily narrative practice.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 5135

Additional Information: Departmental Category: Secondary Education

EDUC 4150 (3) Introduction to Qualitative Research Methods

Introduces students to qualitative research in education. Examines the foundations, design, methods and analysis of qualitative research methods. Readings include texts about the foundations and purposes of qualitative inquiry, and methodological readings about the application of research techniques. Students will complete a variety of small, hands-on projects that introduce major dimensions of qualitative research including observation, interviewing, and document analysis.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 5150

Grading Basis: Letter Grade

Additional Information: Departmental Category: General Education

EDUC 4161 (1-3) Children's Literature

Addresses reading and evaluation of books, children's, interests, authors and illustrators, folk literature, multicultural literature, modern fanciful tales, and trends.

Additional Information: Departmental Category: General Education

EDUC 4222 (3) Language Study for Educators

Focuses on the nature of linguistic development and performance. Examines works that reflect a range of scholarly approaches to language study, explores language use both in and out of school, takes up the relationships between language practices and power and considers implications for classroom teaching.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 5222

Additional Information: Departmental Category: General Education

EDUC 4232 (3) Language and Literacy across the Curriculum

Explores the relationship between language and learning in math and science classrooms with the goal of developing teaching practices that engage students in using language as a tool for understanding and constructing meaning across the curriculum. Explores how language/literacy take on different forms and functions in different social contexts and academic disciplines.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 5235

Requisites: Restricted to undergraduate Science-Secondary Education (EDSC) or Mathematics-Secondary Education (EDMA) majors only.

Additional Information: Departmental Category: Secondary Education

EDUC 4240 (3) African American Education in the United States

Explores development of schooling for African Americans in the U.S.. Emphasizes historical and contemporary struggles of this group in their quest to access meaningful educational opportunities. Examines how social, economic, political, and judicial action defined and organized policy and practice for this group. EDUC 4240 and 6240 are identical courses.

Additional Information: Departmental Category: General Education

EDUC 4295 (4) Reading and Literacy in the Secondary Classroom

Examines ways in which adolescents develop literacy through reading, writing, speaking, viewing, and listening. Students learn to plan and organize literacy instruction based on ongoing assessment, to draw on and develop learner's linguistic skills related to reading, to support learner's reading comprehension skills, and to support their learning through oral language development.

Requisites: Requires a corequisite course of EDUC 4342 or EDUC 5345. Restricted to undergraduate English - Secondary Education (EDEN) or English - Secondary Education (EDSS) majors only.

Additional Information: Departmental Category: Secondary Education

EDUC 4301 (3) Queer(ing) Topics in Education

Bring critical and queer theoretical perspectives to bear on an inquiry into what's counted as "normal" in social, historical, and political contexts of education in the United States. We'll explore queerness, queer theory, and queer pedagogy, in an effort to examine schooling as a heteronormative institution that has tended toward (re)producing heterosexism, homophobia, and violence against queer bodies and identities.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 5301

Grading Basis: Letter Grade

Additional Information: Departmental Category: General Education

EDUC 4311 (3) Children's Literature and Literacy Engagement in Elementary Schools

Focuses on teaching children's literature in elementary schools & youth organizations. Participants will understand theoretical and developmental processes associated with literary learning, methods for teaching literature in a diverse society, and the integration of classroom instruction with the Colorado Academic Content Standards that foster such processes.

Requisites: Restricted to Elementary Education (EDEL) or Education (EDUC-MIN) students only.

Additional Information: Departmental Category: Elementary Education

EDUC 4312 (3) Perspectives on Science

Explores contemporary ideas and issues in the history, philosophy and sociology of science education and science, science as a social and cultural activity and how contemporary issues in science relate to and impact educational practice.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 5315

Additional Information: Departmental Category: General Education

EDUC 4318 (3) The Nature of "English Language Arts"

Considers historical and ongoing controversies concerning the nature of "English" as an academic field of study and of "English Language arts" as a school subject. Integrates understandings of subject-matter specialization, of approaches to teaching this contested subject, and of the diverse learners that teachers seek to prepare for 21st century literacies.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 5318

Additional Information: Departmental Category: General Education

EDUC 4320 (3) Reading Instruction for Elementary Schools

Participants will engage theories and processes of literacy learning, reading development, and equity-oriented teaching. Students will learn, develop, and enact instructional strategies and lessons to support all students' successful participation in a range of print and multimodal literacy practices embedded in reading instruction in elementary classrooms.

Requisites: Requires corequisite course of EDUC 4321. Restricted to Elementary Education (EDEL) majors only.

Additional Information: Departmental Category: Elementary Education

EDUC 4321 (3) Writing Instruction for Elementary Schools

Participants will engage theories and processes of literacy learning, writing development, and equity-oriented teaching. Students will learn, develop, and enact instructional strategies and lessons to support all students' successful participation in a range of multimodal literacy practices embedded in writing instruction in elementary classrooms.

Requisites: Requires corequisite course of EDUC 4320. Restricted to Elementary Education (EDEL) majors only.

Additional Information: Departmental Category: Elementary Education

EDUC 4331 (3) Elementary Social Studies Methods

Prepares teacher education candidates for teaching social studies in a social justice and equity context. Participants will understand theoretical and developmental processes associated with social studies learning, culturally responsive teaching pedagogy in social studies, methods for teaching social studies in a diverse society, and the integration of classroom instruction with the Colorado Academic Content Standards.

Requisites: Requires corequisite courses of EDUC 5215 and EDUC 4341. Restricted to Elementary Education (EDEL) majors only.

Additional Information: Departmental Category: Elementary Education

EDUC 4341 (3) Elementary Reading Assessment and Instruction

Builds on knowledge and teaching practices introduced in EDUC 4320. Addresses five critical components of reading. Refines understanding of research-based practices for diagnostic assessments and intervention, and teaching strategies for elementary age learners. Prepares candidates to deliver a comprehensive reading curriculum in the elementary grades.

Requisites: Requires corequisite courses of EDUC 4331 and EDUC 5215. Restricted to Elementary Education (EDEL) majors only.

Additional Information: Departmental Category: Elementary Education

EDUC 4342 (3) Writing in Humanities Classrooms

Fosters understandings of diverse students' writing processes and the development of a repertoire of research-based teaching practices. Emphasizes writing as a tool for both developing and communicating understandings across a range of settings.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 5345

Requisites: Requires a corequisite course of EDUC 4295 or EDUC 5295. Restricted to English - Secondary Education (EDEN) or English - Secondary Education (EDSS) majors only.

Additional Information: Departmental Category: Secondary Education

EDUC 4351 (3) Language and Equity in Inclusive Learning Environments

Focuses on responsive instructional approaches for elementary school students, including culturally and linguistically diverse students requiring special education services. Addresses relevant educational laws and policies aimed at protecting students' rights to a quality education. Includes practicum experiences in elementary school settings.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 4023

Requisites: Requires corequisite course of EDUC 5205. Restricted to Music (EDMU) Education majors or Elementary (EDEL) majors only.

Additional Information: Departmental Category: Elementary Education

EDUC 4411 (3-4) Educational Psychology for Elementary Schools

Integrates theories and ideas from elementary school child development, educational psychology and the learning sciences. Explores theories of learning and child development and considers implications for teaching, student engagement and the design of equitable and effective learning environments. Students are required to attend a practicum off-site for this class.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: General Education

EDUC 4425 (3) Introduction to Bilingual/Multicultural Education

Provides a comprehensive survey of bilingual-multicultural education programs for language minority students. Includes an overview of the history and legislation related to bilingual education and English as a second language. Presents various models, philosophies, and theoretical underpinnings of bilingual education and ESL.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 5425

Additional Information: Departmental Category: General Education

EDUC 4460 (3) Teaching and Learning Physics

Learn how people understand key concepts in physics. Through examination of physics content, pedagogy and problems, through teaching, and through research in physics education, students will explore the meaning and means of teaching physics. Students will gain a deeper understanding of how education research is done and how people learn. Useful for all students, especially for those interested in physics, teaching, and education research.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 5460 and PHYS 4460 and PHYS 5460

Requisites: Requires prerequisite courses of PHYS 3210 and PHYS 3310 (all minimum grade C-).

Additional Information: Departmental Category: Graduate Education

EDUC 4500 (3) Community-Based Research for Social Change

Complete a research project that draws on theories of social change and is developed in partnership with a community or civic agency. Become skilled at doing original research to address complex social problems.

Requisites: Requires prerequisite course of EDUC 2500 (minimum grade B-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: General Education

EDUC 4513 (2) Education and Practice

Meets during student teaching assignment. Includes topics of concern to teachers, such as classroom organization and management, lesson planning, assessment, preparation of edTPA, etc.

Requisites: Requires corequisite course of EDUC 4691 or 4712 or 4722. Restricted to EDEL, EDEN, EDFR, EDGR, EDJP, EDLT, EDMA, EDRU, EDSC, EDSP or EDSS majors only.

Additional Information: Departmental Category: General Teacher Education

EDUC 4610 (2) Becoming a Learning Assistant

Introduces undergraduate Learning Assistants (LAs) to education research, active learning, and strategies that support: (1) eliciting student ideas and helping all group members become active and engaged in the class; (2) listening and questioning; (3) building relationships; and (4) integrating learning theories with effective practices. Also "LA Pedagogy Course." Department enforced prerequisite: Learning Assistant Program admission. First-semester LAs requirement.

Grading Basis: Letter Grade

Additional Information: Departmental Category: General Education

EDUC 4691 (10) Student Teaching: Elementary School 1

Kindergarten through sixth grades. Department enforced prerequisite: completion of all education and content-specific arts and sciences requirements, and passing required licensure exam.

Requisites: Requires corequisite course of EDUC 4513. Restricted to Elementary Education (EDEL-LICU or LICG) majors only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: General Teacher Education

EDUC 4712 (10) Student Teaching: Secondary School

Student teacher apprentices in a middle/junior or senior high school. Must be admitted to a secondary teacher education program in English, Japanese, Latin, math, Russian, science or social studies. Department enforced prerequisites: completed all education and content-specific arts and sciences courses and passed required licensure exam.

Requisites: Requires corequisite course of EDUC 4513. Restricted to EDEN, EDJP, EDLT, EDMA, EDRU, EDSC or EDSS (LICU or LICG) majors only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: General Teacher Education

EDUC 4716 (3) Basic Statistical Methods

Introduces descriptive statistics including graphic presentation of data, measures of central tendency and variability, correlation and prediction, and basic inferential statistics, including the t-test.

Additional Information: Departmental Category: General Education

EDUC 4722 (5) Student Teaching: Secondary School 2

Student teacher apprentices in a middle/junior high or senior high school. Department enforced prerequisites: completed all education and content-specific arts and sciences courses and passed required licensure exam.

Requisites: Requires corequisite course of EDUC 4513. Restricted to EDFR, EDGR or EDSP (LICU or LICG) majors only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: General Teacher Education

EDUC 4732 (4-12) Student Teaching K-12

Required experience for music students seeking education at both elementary and secondary levels. Department enforced prerequisites: completed all education and content-specific music courses and passed required licensure exam.

Requisites: Requires corequisite course of MUSC 4193. Restricted to EDMU (LICU or LICG) majors only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: General Teacher Education

EDUC 4742 (9) Student Teaching: Secondary for Engineers

Student teacher apprentices in a middle/junior or senior high school. Must be admitted to a secondary teacher education program in English, Japanese, Latin, math, Russian, science or social studies. Department enforced prerequisites: completed all education and content-specific arts and sciences courses and passed required licensure exam.

Requisites: Requires a prerequisite course of EDUC 4513 or EDUC 4050 (minimum grade C-). Restricted to EDMA or EDSC majors only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Secondary Education

EDUC 4800 (1-9) Special Topics

Designed to meet needs of students with topics of pertinent interest.

Repeatable: Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: General Education

EDUC 4810 (1-9) Special Topics

Repeatable: Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: General Education

EDUC 4811 (3) Teaching and Learning Biology

Provides an introduction to recent research into student learning on the conceptual foundations of modern biology, together with pedagogical methods associated with effective instruction and its evaluation. Students will be involved in active research into conceptual and practical issues involved in biology education, methods to discover student preconceptions, and the design, testing and evaluation of various instructional interventions.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 6811 and MCDB 4811 and MCDB 5811

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

EDUC 4822 (3) Teaching and Learning Chemistry

Explores issues related to how people learn and teach chemistry. Reviews high school and early college chemistry concepts both from the content and pedagogical perspectives. Delves into the chemistry education research, education, psychology, and cognitive science literature. Provides an opportunity to observe and/or teach K-12 or college chemistry classes.

Requisites: Requires prerequisite course of CHEM 1133 or CHEM 2100 or CHEM 1371 (minimum grade C-).

Additional Information: Departmental Category: General Education

EDUC 4831 (3) Advanced Peer Education

Second semester of an academic year's training for students interested in peer counseling. Expand upon what you learned in ARSC 2274. Focus on presentations, leadership, and group facilitation. Basic group leadership, facilitation theory, and technique taught. Co-create and co-lead your own small groups/presentations for other CU students. Offered only spring semesters.

Requisites: Requires prerequisite course of ARSC 2274 (minimum grade D-).

Additional Information: Departmental Category: General Education

EDUC 4833 (3) Teaching and Learning Earth Systems

Learn and develop pedagogically effective strategies for teaching and understanding Earth Science concepts. Particular emphasis is placed on understanding the importance of geoscience habits of mind (i.e. spatial/temporal reasoning, multiple working hypotheses, geographic context). Focuses upon inquiry and evaluation of evidence, the importance of background knowledge and misconceptions, and developing effective discourse within and outside the classroom.

Requisites: Requires prerequisite course of ATOC 1060 or ENVS 1000 or GEOL 1010 or GEOL 1020 or GEOL 1060 (minimum grade C-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: General Teacher Education

EDUC 4840 (1-4) Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: General Education

EDUC 4910 (3) Peer Counseling Practicum

Controlled enrollment. Credit given for peer counseling activities. Students are selected to participate in this class and act as peer counselors or TAs for the peer counseling training. Repeatable up to 9 total credit hours.

Repeatable: Repeatable for up to 9.00 total credit hours.

Additional Information: Departmental Category: General Education

EDUC 4912 (1) Practicum in Teacher Education

Provides in-school practicum experience.

Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: General Teacher Education

INVST Community Studies**INVS 1000 (4) Responding to Social and Environmental Problems Through Service Learning**

By integrating theory with required community service, students explore how problems are shaped by cultural values and how alternative value paradigms affect the definition of problems in areas such as education and the environment. Students examine different approaches to solving problems and begin to envision new possibilities.

Additional Information: GT Pathways: GT-SS3 -Soc Behav Sci:Hmn Behav, Cult, Soc Frame

Arts Sci Core Curr: Ideals and Values

Arts Sci Gen Ed: Distribution-Social Sciences

Departmental Category: Invst Community Studies

INVS 1513 (3) Civic Engagement: Using the Electoral Process as a Tool for Social Change

Designed to educate and inspire civic engagement primarily in the area of electoral politics. Examines various explanations of why people participate in the electoral process and whom they choose to support. Develops the practical skills necessary to participate successfully in the electoral arena. Through a service component, the course provides experience working on a campaign and mobilizing others to participate in the electoral process.

Additional Information: Departmental Category: Invst Community Studies

INVS 2005 (2) Puksta Scholars Practicum

Integrates critical reflection and community-based experiences for undergraduates in the Puksta Scholars Program. This two-semester course will focus on the development of knowledge, attitudes and skills to productively engage the public realm. Examines topics includes ethical leadership, frameworks for social action, project design and participatory action research.

Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

Grading Basis: Letter Grade

INVS 2919 (3) Renewing Democracy in Communities and Schools

Examines concepts of activism, citizenship, democracy, power, and diversity through classroom discussions and participation in a local K-12 school's Public Achievement project. Through community-based partnerships, students will develop leadership skills; dialogue with diverse groups of people; identify multiple perspectives around controversial issues; and learn to use research and writing to articulate public problems and advocate for their solutions.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 2919

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Arts Sci Core Curr: Human Diversity

Arts Sci Gen Ed: Diversity-U.S. Perspective

Arts Sci Gen Ed: Distribution-Social Sciences

Departmental Category: Invst Community Studies

INVS 2989 (3) Dialogue Across Difference

Provides practical facilitation training that equips students to be change makers in any setting. Students examine models of dialogic communication and theories of intergroup relations to understand how dialogue can build deeper understanding of self/others, reinvigorate democratic values and foster a more just society. Through hands-on experience participating in, observing, and leading dialogue, students learn to facilitate dialogue among their peers.

Grading Basis: Letter Grade

INVS 3000 (3-4) Innovative Approaches to Contemporary Issues through Service Learning

Explores creative approaches for solving complex social and environmental issues, with a focus on peace and population. Students analyze the root causes of issues in theoretical and historical contexts, and develop their understanding of effective and innovative approaches to change. This course has a requirement of community service.

Recommended: Requisite upper-division status.

Additional Information: Arts Sci Core Curr: Contemporary Societies

Arts Sci Gen Ed: Distribution-Social Sciences

Departmental Category: Invst Community Studies

INVS 3041 (3) Self and Consciousness

Explores human development from a psychosocial perspective, focusing on the interplay between psychological patterns and social forms. Issues such as self-image and social consciousness are studied within the larger context of individual and collective forces leading to transformation.

Equivalent - Duplicate Degree Credit Not Granted: SOCY 3041

Requisites: Requires prerequisite courses of SOCY 1001 and SOCY 3001 or SOCY 3011 (all minimum grade D-).

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

Departmental Category: Invst Community Studies

INVS 3100 (3-4) Multicultural Leadership: Theories, Principles and Practices

Focuses on leadership theories and skills necessary for effectiveness in multicultural settings. Students gain understanding of traditional and culturally diverse approaches to leadership and change through comparative analyses of Western and non-Western theories and practices. Community service required.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 3201

Additional Information: Arts Sci Core Curr: Human Diversity

Departmental Category: Invst Community Studies

INVS 3302 (3) Facilitating Peaceful Community Change

Students gain knowledge and skills that enable them to become effective agents of community change. Focuses on understanding the processes of community building with a multicultural emphasis. Students are encouraged to apply their own life experiences and to examine themselves as potential change agents.

Equivalent - Duplicate Degree Credit Not Granted: WGST 3302

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

Departmental Category: Invst Community Studies

INVS 3402 (3) Implementing Social and Environmental Change

Examines grassroots innovation as a means for creating comprehensive, solution-based strategies to address social and environmental problems. Students develop an understanding of the root causes of problems, identify how changes are initiated at the grassroots level, and learn the theory and practice of effective and responsible change efforts.

Additional Information: Departmental Category: Invst Community Studies

INVS 3931 (3) The Community Leadership Internship, Part 1

Develops students' competencies as community leaders working for a just and sustainable world. Under the supervision of an instructor and a community supervisor, students learn organizational leadership skills by serving as volunteer staff members at community-based organizations. Required requisite, admission into INVST CLP.

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Invst Community Studies

INVS 3932 (3) Community Leadership Internship, Part 2

Develops students' competencies as community leaders working for a just and sustainable world. Under the supervision of an instructor and a community supervisor, students learn organizational leadership skills by serving as volunteer staff members at community-based organizations. Required requisite, membership in INVST CLP.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of INVS 3931 (minimum grade D-).

Additional Information: Departmental Category: Invst Community Studies

INVS 4302 (3) Critical Thinking in Development

Exposes students to current issues in the political economy of development. Subjects range from globalization, democratization and economic development. Specifically explores the international and domestic determinants of economic development with special reference to currency markets, foreign direct investment, trade, and democratization.

Equivalent - Duplicate Degree Credit Not Granted: PSCI 4732

Requisites: Requires prerequisite courses of PSCI 2012 or IAFS 1000 and ECON 2010 and 2020 (all minimum grade D-).

Recommended: Prerequisite one upper-division PSCI course.

Additional Information: Arts Sci Core Curr: Contemporary Societies
Departmental Category: Invst Community Studies

INVS 4402 (3) Nonviolent Social Movements

Explores theories of democracy and development in relation to movements for nonviolent social change. Focuses on means and ends, spirituality, leadership, decision-making, civil society, cooperative economics, ecology and decentralized powers.

Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Sociology (SOCY) or Political Science (PSCI) majors only.

Additional Information: Departmental Category: Invst Community Studies

INVS 4919 (1-2) Teaching Social Justice for Public Achievement

Participate as teaching assistants for the practicum course INVS 2919. Focusing on the issues of democratic education, diversity, social justice and social change, students learn how to foster undergraduates' skills as experiential educators.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires a prerequisite course of INVS 2919 (minimum grade B).

INVS 4931 (1-6) Community Leadership in Action, Part 1

Develops students' expertise as community leaders. Under the supervision of an instructor and a community advisor, students design a community-based project.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite courses of INVS 3931 and INVS 3932 (all minimum grade D-).

Recommended: Prerequisite admission to INVST CLP.

Additional Information: Departmental Category: Invst Community Studies

INVS 4932 (1-6) Community Leadership in Action, Part 2

Develops students' expertise as community leaders working for a just and sustainable world. Under the supervision of an instructor and a community advisor, students learn organizational and leadership skills by designing, implementing and evaluating a community-based project. First-hand experience provides students with a deepened understanding of the complex issues facing humanity, and competence with solution-based strategies.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of INVS 4931 (minimum grade D-).

Additional Information: Departmental Category: Invst Community Studies

INVS 4999 (1-4) Teaching Social Justice

Students participate in a service-learning practicum under the supervision of a Community Studies instructor. They explore teaching strategies for implementing concrete educational goals. Focusing on the issues of social justice and social change, they learn how to encourage higher levels of creativity and analysis among students.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Invst Community Studies

LEAD**LEAD 1000 (3) Becoming a Leader**

The foundation course will prepare students to exercise leadership in business, government and community organizations. Introduces leadership skills useful in a variety of settings including community and civic activities. Helps students to improve self awareness, understand multiple theories, recognize moral courage, build analytic and critical thinking skills and adapt leadership practices to different people and contexts.

Equivalent - Duplicate Degree Credit Not Granted: MGMT 3030

Additional Information: Departmental Category: CU Engage

LEAD 2410 (3) Dynamics of Power, Privilege, Oppression and Empowerment in Leadership

Examines the theoretical frameworks of social identity and power dynamic development (individual, group, institutional, cultural) and the resulting inequalities formed by systems of privilege and oppression - and their intersections - are manifested in society and how leadership is used to continue these systems or lead to empowerment and liberation.

Requisites: Requires prerequisite course of LEAD 1000 (minimum grade C).

Additional Information: Departmental Category: CU Engage

LEAD 4000 (4) Leadership in Context and Emerging Challenges: A Capstone

Integrates leadership topics and experiences students pursued through the Leadership Studies Minor. Using advanced critical thinking skills, the seminar requires students to evidence their knowledge, competencies and skills related to leadership theory and practice through examining contemporary leadership challenges. Further, the seminar directs students to justify decision-making processes, demonstrating their ability to synthesize prior knowledge to effect desirable, ethical outcomes.

Requisites: Requires a prerequisite course of LEAD 1000 or LDSP 1000 (minimum grade C-). Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade

Additional Information: Departmental Category: CU Engage

Elementary Education - Bachelor of Arts (BA)

If you're interested in a rewarding career as an elementary teacher, the BA in elementary education with the endorsement in Culturally and Linguistically Diverse (CLD) education provides an efficient and rigorous path. We prepare teachers who are committed to ensuring every student learns and excels.

You will gain experience through course work and extensive, hands-on experience in the classroom. This degree offers a path toward teacher licensure plus the advanced CLD endorsement, which provides preparation and tools for working with diverse populations and English-language learners, an area of high demand in education.

Please note: If you are interested in a degree in another area combined with licensure, visit the teacher licensure program (p. 667) page.

To learn more, contact our advisors at 303-492-6555 or edadvise@colorado.edu. To apply, visit the CU Boulder Admissions (<http://www.colorado.edu/admissions>) website.

² Will also count toward A&S Gen. Ed. Arts and Humanities requirement.

³ Will also count toward A&S Gen. Ed. Natural Science & Natural Science Lab requirements.

Arts and Sciences General Education Requirements

The College of Arts and Sciences (A&S) General Education (Gen. Ed.) requirements are the heart of a liberal arts education at CU Boulder. Students in the Elementary Education BA program will fill most of their A&S Gen. Ed. requirements with the courses they take to complete their Elementary Education Content Requirements.

Overview

The portions of A&S General Education curriculum included in the Elementary Education BA consists of three basic categories of requirements: Skills, Distribution and Diversity.

- Skills Requirement: 10-12 credits (6 Written Communication, 4-6 Quantitative Reasoning and Mathematical Skills, plus foreign language proficiency); *courses taken to fulfill this requirement MAY NOT also count toward the Distribution or Diversity Requirements.*
- Distribution Requirement: 31 credits (12 Arts & Humanities, 12 Social Sciences, 7 Natural Sciences)
- Diversity Requirement: 0-3 credits; *courses taken to fulfill this requirement MAY also count toward the Distribution Requirement.*
- Total: 41-43 credits

Policies

School of Education students who take approved CU Boulder coursework to fulfill their Gen. Ed. requirements must take those courses for a letter grade and receive a passing grade of C- or higher. Students may not use thesis hours, independent study, internship, or practicum courses to fill any of the Gen. Ed. requirements. All courses that have been approved to fulfill specific A&S Gen. Ed. requirements have that noted in their catalog entries and can be searched for using the CU Boulder Class Search.

Skills Requirement

This requirement is designed to assure that each student has attained a minimum level of competency in foreign language, quantitative reasoning & mathematical skills, and written communication. Students may not use a course to fulfill any area of the Skills requirement and also use this course to fulfill part of the Distribution or Diversity requirements. This includes first- and second-semester foreign language courses taken as prerequisites to a third-semester language course.

Foreign Language (third-level proficiency)

All students are required to demonstrate, while in high school, third-level proficiency in a single modern or classical foreign language. Students who have not met this requirement at the time of matriculation will have a MAPS deficiency. They may make up the deficiency only by passing an appropriate third-semester college course that is part of a three-course sequence of at least 12 semester credit hours or by passing a CU-Boulder approved proficiency examination.

The goal of the language requirement is to encourage students to confront the structure, formal and semantic, of another language, significant and difficult works in that language, and one or more aspects of the culture lived in that language. This enables students to understand their own language and culture better, analyze texts more clearly and effectively, and appreciate more vividly the dangers and limitations of using a translated document. The language requirement is a general education requirement and so concentrates on reading. In some languages, other abilities may be emphasized as well. Understanding what it means to read a significant text in its original language is essential for general education according to the standards of this university.

Quantitative Reasoning and Mathematical Skills (QRMS) (4 – 6 credit hours)

This requirement has two principal objectives. The first is to provide students with the analytical tools used in core curriculum courses and in their major areas of study. The second is to help students acquire the reasoning skills necessary to assess adequately the data that will confront them in their daily lives. Students completing this requirement

should be able to: construct a logical argument based on the rules of inference; analyze, present, and interpret numerical data; estimate orders of magnitude as well as obtain exact results when appropriate; and apply mathematical methods to solve problems in their university work and in their daily lives.

To fulfill the QRMS Gen. Ed. Skills requirement, Elementary Education students must pass one of the following approved QRMS courses or sequences of courses with a grade of C- or better.

Code	Title	Credit Hours
MATH 1110 & MATH 1120	Mathematics for Elementary Educators 1 and Mathematics for Elementary Educators 2	3
MATH 1300	Calculus 1	5
MATH 1310	Calculus for Life Sciences	5
APPM 1350	Calculus 1 for Engineers	4

Written Communication (3 lower-division and 3 upper-division credit hours)

Writing is a skill that is fundamental to all intellectual endeavors. In fulfilling this requirement, students hone their communication skills by writing for various purposes (informing, instructing, persuading) and audiences (academic, civic, professional). They learn to design their message ethically and effectively using appropriate evidence and technologies.

To fulfill the lower-division part of the Written Communication Gen. Ed. Skills requirement, students must pass, with a grade of C- or better, or receive placement credit (as determined, for example, by scores on AP or IB exams) for a 3-credit course approved as Skills - Lower-Division Written Communication, or earn an International Baccalaureate diploma. To fulfill the upper-division part of this requirement, students must pass, with a C- or better, a 3-credit course approved as Skills - Upper-Division Written Communication.

Distribution Requirement

For the Distribution requirement, students must pass, with a C- or better, a minimum of 12 credits in each of the two Arts & Sciences divisions (Arts & Humanities and Social Sciences) and 7 credits in the Natural Sciences division. As part of the 7 credits in the Natural Sciences division, students must meet the Natural Sciences lab requirement.

Arts & Humanities (12 credits)

Courses in the Arts and the Humanities explore the variety of human creative and intellectual experiences, as well as the history and foundations of culture, through the examination of human languages, literatures, and other artistic, material, social, cultural, and political products, the forms they have taken in different places and eras, and the way these have changed over time. As a result, these courses cultivate perspectives and intellectual skills necessary to comprehend and respond adeptly to the world in which we live, offering frameworks for thinking critically about the universe and the smaller societies we inhabit. In particular, these courses help students develop the ability to appreciate and evaluate human efforts to explain, translate, and transform their diverse experiences of the world, as these efforts take shape in language, literature, philosophical systems, historical contexts, religious experience, material culture, images, sounds, and performances.

To fulfill the Arts & Humanities Gen Ed Distribution Requirement, students must pass a minimum of 9 credits in courses approved as Distribution - Arts & Humanities courses. **Elementary Education students will fulfill this requirement with the courses that they take for the Elementary**

Education Ethics, World History, US History, and Literature and Arts Content requirements.

Social Sciences (12 credits)

Social Science courses examine the individual, social, ideological, cultural, political, and economic dimensions of human activities and behaviors. They address a broad range of topics through diverse theoretical and empirical approaches. As a result, these courses cultivate perspectives and intellectual skills necessary to apply qualitative and quantitative methods of inquiry to issues of societal significance. Students in social science courses are taught to analyze and interpret data from many different sources, such as fieldwork, interviews, surveys, peer-reviewed literature, published and unpublished repositories, and electronic media. These courses also discuss applications of the social sciences, which range from developing fundamental theories of the social world to solving problems and informing advocacy and activism.

To fulfill the Social Sciences Gen Ed Distribution requirement, students must pass a minimum of 9 credits in courses approved as Distribution – Social Sciences courses. **Elementary Education students will fulfill this requirement with EDUC 3013 School and Society, INVS 2919 Renewing Democracy in Communities and Schools, and the courses that they take for the Elementary Education Cultural Geography and American Government Content requirements.**

Natural Sciences (7 credits including a lab)

Natural Science courses examine the physical and biological world, exploring the nature of matter, life, and the universe. They are designed to demonstrate that science is not a static list of facts, but a dynamic process that leads to knowledge. By combining observation, experimentation, and theory, students learn to formulate interpretations and conclusions through unbiased, critical application of scientific principles. Through a combination of lecture courses and laboratory or field experiences, students gain hands-on experience with scientific research. They develop expertise in measurement techniques and data interpretation, and learn the relevance of this expertise to the formation and testing of scientific hypotheses. As a result, Natural Science courses cultivate perspectives and intellectual skills necessary to enhance knowledge of one or more scientific disciplines, and to probe scientific issues in the context of important past discoveries and new developments.

Laboratory or Field Experience: The Laboratory or Field Experience requirement is satisfied with a stand-alone lab of at least one credit, or another course with a substantial lab component, as approved by the Natural Sciences division. The lab requirement is broadly defined to include different types of hands-on learning, including – but not limited to – bench work, field work, instrumentation, and data analysis.

To fulfill the Natural Sciences Gen Ed Distribution requirement, students must pass a minimum of 7 credits in courses approved as Distribution - Natural Sciences courses, including a laboratory or field experience. **Elementary Education students will fulfill this requirement with the courses that they take for the Elementary Education Natural Science Content requirement.**

Diversity Requirement

For the Diversity requirement, students must pass, with a C- or better, a minimum of 3 credits in a course that has been identified as fulfilling diversity learning goals. Students may use the same course to fulfill the Diversity requirement and part of the Distribution requirement.

The diversity requirement addresses the need to prepare students to navigate the complexities of living and working in a diverse and

increasingly interconnected world. Diversity courses are designed to provide students with the necessary understanding and analytical skills to successfully function and lead in a multicultural, multiethnic, transnational, and global society. The courses promote historical and/or contemporary understanding of how social differences shape, and have been shaped by, political, economic, and cross-cultural relationships within the United States. Generally courses will explore the ways in which marginalization has occurred, and the reasons for this marginalization.

Diversity - United States Perspective (3 credits)

United States Perspective Diversity courses promote historical and/or contemporary understanding of how social differences have shaped social, political, economic, and cross-cultural relationships within the United States. These courses must substantially address one or more forms of diversity (for example: race, ethnicity, gender, gender identity, sexual orientation, socioeconomic class, religion, disability).

To fulfill the U.S. Perspective Gen Ed Diversity requirement, students must pass, with a C- or better, a minimum of 3 credits in courses approved as Diversity - U.S. Perspective courses. **Elementary Education students will fulfill this requirement with EDUC 3013 School and Society (3).**

Four-Year Plan of Study

Additionally, they use hands-on work in the community to produce a capstone project that addresses a local leadership challenge. The course work builds on the work of CU Engage: Center for Community-Based Learning and Research (<http://www.colorado.edu/cuengage>).

Requirements

Second Major

This major requires students to get a dual degree by completing a second degree in the College of Arts and Sciences with a major in either a social sciences or arts and humanities field.

For social sciences, these options are:

- Anthropology (p. 145)
- Ethnic Studies (p. 314)
- Geography (p. 354)
- Political Science (p. 515)
- Sociology (p. 550)
- Women and Gender Studies (p. 605)

For arts and humanities, these options are:

- Asian Studies (p. 208)
- English (p. 292)
- Jewish Studies (p. 450)
- Philosophy (p. 493)
- Spanish & Portuguese (p. 562)

Leadership and Community Engagement - Bachelor of Arts (BA)

The Bachelor of Arts in leadership and community engagement prepares ethical, skilled leaders committed to addressing complex public challenges in our nation and across the world. This major prepares you for careers in community or nonprofit organizations, higher education, international development, urban planning, social work, government and more. It is the only degree program of its kind in Colorado, and is part of a small number of emerging community engagement degrees nationwide.

Through this program, students develop a deep conceptual understanding of theories of leadership, public policy and social change.

EDUC 4XXX	Leadership Capstone 2	2
Total Credit Hours		44

Arts and Sciences General Education Requirements

The College of Arts and Sciences (A&S) General Education (Gen Ed) requirements are the heart of a liberal arts education at CU Boulder. Students in the Leadership and Community Engagement BA program may fill some of their A&S Gen. Ed. requirements with the courses they take to complete their School of Education requirements.

Overview

The new A&S General Education curriculum consists of three basic categories of requirements: Skills, Distribution, and Diversity.

- Skills Requirement: 9 credits (6 Written Communication, 3 Quantitative Reasoning and Mathematical Skills, plus foreign language proficiency); *courses taken to fulfill this requirement MAY NOT also count toward the Distribution or Diversity Requirements.*
- Distribution Requirement: 36 credits (12 Arts & Humanities, 12 Social Sciences, 12 Natural Sciences)
- Diversity Requirement: 0-6 credits; *courses taken to fulfill this requirement MAY also count toward the Distribution Requirement.*
- Total: 45 credits

Policies

School of Education students who take approved CU Boulder coursework to fulfill their Gen Ed requirements must take those courses for a letter grade and receive a passing grade of **C-** or higher. Students may not use thesis hours, independent study, internship, or practicum courses to fill any of the Gen Ed requirements. All courses that have been approved to fulfill specific A&S Gen Ed requirements have that noted in their catalog entries and can be searched for using the CU Boulder Class Search.

Skills Requirement

This requirement is designed to assure that each student has attained a minimum level of competency in foreign language, quantitative reasoning & mathematical skills, and written communication. Students may not use a course to fulfill any area of the Skills requirement and also use this course to fulfill part of the Distribution or Diversity requirements. This includes first- and second-semester foreign language courses taken as prerequisites to a third-semester language course.

Foreign Language (third-level proficiency)

All students are required to demonstrate, while in high school, third-level proficiency in a single modern or classical foreign language. Students who have not met this requirement at the time of matriculation will have a MAPS deficiency. They may make up the deficiency only by passing an appropriate third-semester college course that is part of a three-course sequence of at least 12 semester credit hours or by passing a CU-Boulder approved proficiency examination.

The goal of the language requirement is to encourage students to confront the structure, formal and semantic, of another language, significant and difficult works in that language, and one or more aspects of the culture lived in that language. This enables students to understand their own language and culture better, analyze texts more clearly and effectively, and appreciate more vividly the dangers and limitations of using a translated document. The language requirement is a general education requirement and so concentrates on reading. In some

languages, other abilities may be emphasized as well. Understanding what it means to read a significant text in its original language is essential for general education according to the standards of this university.

Students who are under the General Education requirements, but not subject to MAPS, must complete the Foreign Language Gen Ed Skills requirement to meet degree requirements.

Quantitative Reasoning and Mathematical Skills (QRMS) (3 – 6 credit hours)

This requirement has two principal objectives. The first is to provide students with the analytical tools used in core curriculum courses and in their major areas of study. The second is to help students acquire the reasoning skills necessary to assess adequately the data that will confront them in their daily lives. Students completing this requirement should be able to: construct a logical argument based on the rules of inference; analyze, present, and interpret numerical data; estimate orders of magnitude as well as obtain exact results when appropriate; and apply mathematical methods to solve problems in their university work and in their daily lives.

To fulfill the QRMS Gen Ed Skills requirement, students must pass one of the approved QRMS courses or sequences of courses, or pass any 3 credits of mathematics courses numbered MATH 1300 and above or applied mathematics courses numbered APPM 1350 and above, or pass the CU-Boulder QRMS proficiency exam.

Written Communication (3 lower-division and 3 upper-division credit hours)

Writing is a skill that is fundamental to all intellectual endeavors. In fulfilling this requirement, students hone their communication skills by writing for various purposes (informing, instructing, persuading) and audiences (academic, civic, professional). They learn to design their message ethically and effectively using appropriate evidence and technologies.

Lower-division Written Communication courses focus on the central rhetorical elements of purpose, audience, and context to help students craft effective writing in a variety of situations. They emphasize the relationships among these elements, including a writer's choices of content, structure, style and use of language conventions. In addition, courses in this area develop students' analytical reading skills and introduce them to principles and practices of information literacy.

By the end of a lower-division Written Communication course, students will:

- demonstrate their rhetorical knowledge through their writing choices;
- construct effective and ethical arguments;
- analyze texts in a variety of genres;
- refine and reflect on their writing process;
- practice information literacy; and
- apply appropriate language conventions, including grammar, spelling, punctuation and format.

In upper-division Written Communication courses, students apply the rhetorical elements of purpose, audience, and context to investigate and practice writing using disciplinary language, forms, and genres. These courses emphasize the application of students' disciplinary knowledge to a variety of writing situations, adjusting content, format, style and language conventions to accomplish specific purposes and communicate with specific audiences.

By the end of an upper-division Written Communication course, students will:

- demonstrate specialized rhetorical knowledge through composing texts in a variety of disciplinary forms and genres for specific audiences and purposes;
- argue persuasively and with evidence, using discipline-specific forms and genres to present ideas and information;
- demonstrate enhanced critical reading skills;
- refine and reflect on their writing process;
- demonstrate specialized information literacy through applying research to disciplinary questions/issues; and
- apply language conventions appropriately, including format, documentation, spelling, grammar and punctuation.

To fulfill the lower-division part of the Written Communication Gen Ed Skills requirement, students must pass or receive placement credit (as determined, for example, by scores on AP or IB exams) for a 3-credit course approved as Skills - Lower-Division Written Communication, or earn an International Baccalaureate diploma. To fulfill the upper-division part of this requirement, students must pass a 3-credit course approved as Skills - Upper-Division Written Communication, or pass a Written Communication proficiency exam.

Distribution Requirement

For the Distribution requirement, students must pass, with a C- or better, a minimum of 12 credits in each of the three Arts & Sciences divisions (Arts & Humanities, Social Sciences, and Natural Sciences). At least four different course prefixes must be represented in a student's distribution requirement coursework. No more than two lower-division (1000- and 2000-level) courses with the same course prefix may count toward the distribution requirement.

As part of, or in addition to, the 12 credits in the Natural Sciences division, students must meet the Natural Sciences lab requirement.

Arts & Humanities (12 credits)

Courses in the Arts and the Humanities explore the variety of human creative and intellectual experiences, as well as the history and foundations of culture, through the examination of human languages, literatures, and other artistic, material, social, cultural, and political products, the forms they have taken in different places and eras, and the way these have changed over time. As a result, these courses cultivate perspectives and intellectual skills necessary to comprehend and respond adeptly to the world in which we live, offering frameworks for thinking critically about the universe and the smaller societies we inhabit. In particular, these courses help students develop the ability to appreciate and evaluate human efforts to explain, translate, and transform their diverse experiences of the world, as these efforts take shape in language, literature, philosophical systems, historical contexts, religious experience, material culture, images, sounds, and performances.

The Arts & Humanities Gen Ed Distribution requirement is meant to ensure that students:

- study the fundamental intellectual and ethical dimensions of human experience;
- investigate the relations between artistic, humanistic, and scientific inquiry and interpretation; and
- understand and are prepared to navigate successfully the complex and ever-changing world in which we live.

To fulfill the Arts & Humanities Gen Ed Distribution Requirement, students must pass a minimum of 12 credits in courses approved as Distribution - Arts & Humanities courses.

Natural Sciences (12 credits including a lab)

Natural Science courses examine the physical and biological world, exploring the nature of matter, life, and the universe. They are designed to demonstrate that science is not a static list of facts, but a dynamic process that leads to knowledge. By combining observation, experimentation, and theory, students learn to formulate interpretations and conclusions through unbiased, critical application of scientific principles. Through a combination of lecture courses and laboratory or field experiences, students gain hands-on experience with scientific research. They develop expertise in measurement techniques and data interpretation, and learn the relevance of this expertise to the formation and testing of scientific hypotheses. As a result, Natural Science courses cultivate perspectives and intellectual skills necessary to enhance knowledge of one or more scientific disciplines, and to probe scientific issues in the context of important past discoveries and new developments.

The Natural Sciences Gen Ed Distribution requirement is meant to ensure that students:

- understand the evolving state of knowledge in at least one scientific discipline;
- gain experience in scientific observation and measurement, in organizing and quantifying results, in drawing conclusions from data, and in understanding the uncertainties and limitations of the results; and
- learn sufficient general scientific vocabulary and methodology to acquire additional information, evaluate it critically and make informed decisions.

Laboratory or Field Experience: The Laboratory or Field Experience requirement is satisfied with a stand-alone lab of at least one credit, or another course with a substantial lab component, as approved by the Natural Sciences division. The lab requirement is broadly defined to include different types of hands-on learning, including – but not limited to – bench work, field work, instrumentation, and data analysis.

To fulfill the Natural Sciences Gen Ed Distribution requirement, students must pass a minimum of 12 credits in courses approved as Distribution - Natural Sciences courses, including a laboratory or field experience.

Social Sciences (12 credits)

Social Science courses examine the individual, social, ideological, cultural, political, and economic dimensions of human activities and behaviors. They address a broad range of topics through diverse theoretical and empirical approaches. As a result, these courses cultivate perspectives and intellectual skills necessary to apply qualitative and quantitative methods of inquiry to issues of societal significance. Students in social science courses are taught to analyze and interpret data from many different sources, such as fieldwork, interviews, surveys, peer-reviewed literature, published and unpublished repositories, and electronic media. These courses also discuss applications of the social sciences, which range from developing fundamental theories of the social world to solving problems and informing advocacy and activism.

The Social Sciences Gen Ed Distribution requirement is meant to ensure that students:

- explore the development of the institutions and functioning of human society;

- understand the interpersonal relationships of individuals as members of social groups; and
- gain experience with social science vocabulary, methods and tools in systematic studies of the social world.

To fulfill the Social Sciences Gen Ed Distribution requirement, students must pass a minimum of 12 credits in courses approved as Distribution – Social Sciences courses. **Leadership and Community Engagement students will take EDUC 3013 and INVS 2919 Renewing Democracy in Communities and Schools, which apply towards the Social Studies Distribution requirement.**

Diversity Requirement

For the Diversity requirement, students must pass a minimum of 3 credits in each of the two Diversity categories for a total of 6 credits in courses that have been identified as fulfilling diversity learning goals. Students may use the same course to fulfill one of the Diversity categories and part of the Distribution requirement.

The diversity requirement addresses the need to prepare students to navigate the complexities of living and working in a diverse and increasingly interconnected world. Diversity courses are designed to provide students with the necessary understanding and analytical skills to successfully function and lead in a multicultural, multiethnic, transnational, and global society. The courses promote historical and/or contemporary understanding of how social differences shape, and have been shaped by, political, economic, and cross-cultural relationships within the United States and the world. Generally courses will explore the ways in which marginalization has occurred, and the reasons for this marginalization.

United States Perspective (3 credits)

United States Perspective Diversity courses promote historical and/or contemporary understanding of how social differences have shaped social, political, economic, and cross-cultural relationships within the United States. These courses must substantially address one or more forms of diversity (for example: race, ethnicity, gender, gender identity, sexual orientation, socioeconomic class, religion, disability).

To fulfill the U.S. Perspective Gen Ed Diversity requirement, students must pass a minimum of 3 credits in courses approved as Diversity - U.S. Perspective courses. **Leadership and Community Engagement students will fulfill this requirement with EDUC 3013.**

Global Perspective (3 credits)

Global Perspective Diversity courses address the need for students to learn and think critically about historical and/or contemporary global forces and transnational connections. These courses might: 1) focus in-depth on a particular country or culture outside the U.S., placing it within transnational and global context; 2) address a problem or phenomenon in the context of two or more countries, cultures, or regions; 3) examine global affairs through a comparative framework; 4) be part of a study abroad experience with a substantial cross-cultural component.

To fulfill the Global Perspective Gen Ed Diversity requirement, students must pass a minimum of 3 credits in courses approved as Diversity – Global Perspective courses.

Four-Year Plan of Study

Course	Title	Credit Hours
Year One

Teacher Licensure Program

The School of Education offers course work leading to initial Colorado licensure to undergraduate, postbaccalaureate and master's degree students. Colorado requires public school teachers to be licensed by its state department of education. Students who successfully complete all

School of Education requirements will be recommended for a Colorado provisional (initial) teaching license, the license issued to all new teachers in Colorado. Licensure requirements vary from state to state and from teaching area to area. Students who are interested in teaching in other states should familiarize themselves with the requirements of those states so they may plan an appropriate degree program.

Teacher education at the University of Colorado, while administered by the School of Education, is a university-wide function. Many academic departments provide course work that supports the teacher in training. Undergraduate students follow a prescribed set of core courses that meet state content preparation standards, complete a major, and satisfy professional education requirements concurrently. The program involves a combination of courses at the university and K–12 school placements.

Undergraduate (p. 677) and Post-Baccalaureate (p. 668) (Non-master's Degree) Teacher Licensure Programs

- Elementary (grades K–6) Education
- Secondary Education (grades 7–12) fields:
 - English Language Arts
 - Mathematics
 - Science
 - Social studies
 - World language (French, German, Japanese, Latin, Russian or Spanish)
- Music Education (grades K–12)

Secondary Master's Degree Plus Teacher Licensure Program (p. 1262) (MA+)

- Secondary Education (grades 7–12) fields:
 - English Language Arts
 - Mathematics
 - Science
 - Social studies

Program Mission and Commitments

The School of Education prepares educators who are able to enact commitments to social justice and equitable access to deep content learning in school, family and community contexts.

The following principles guide our work in preparing the next generation of educators:

- Teachers must position students as sense-makers and knowledge-generators, who desire to invest and succeed in school. This involves noticing children/youth, building relationships with them, valuing their perspectives and attending to their thinking, curiosities and capabilities.
- Teaching is both intellectual work and a craft. Deep knowledge of content and pedagogy, creativity and passion fuel both learning and teaching.
- Teachers must design equitable learning environments in which all children are engaged in robust and consequential learning.
- Teacher's instruction and student learning is always conducted within the context of larger social systems, structures and hierarchies.
- What we do and say matters and must be analyzed. Our language and action constructs or constrains opportunities for children to build

meaningful, positive and sustained relationships to learning and one another.

Colorado Teacher Quality Standards

Teacher education candidates engage in a planned sequence of courses and accompanying clinical experiences in local community and school sites. Courses and assessments ensure candidates have demonstrated appropriate mastery of (1) content taught in the Colorado Academic Standards and (2) professional practices and dispositions associated with the Colorado Teacher Quality Standards listed below.

1. Teachers demonstrate mastery of and pedagogical expertise in the content they teach.
2. Teachers establish a safe, inclusive and respectful learning environment for a diverse population of students.
3. Teachers plan and deliver effective instruction and create an environment that facilitates learning for their students.
4. Teachers reflect on their practice.
5. Teachers demonstrate leadership.
6. Teachers take responsibility for student academic growth.

Admission Requirements

Students who already hold a bachelor's degree and wish to pursue licensure should apply directly to the School of Education. Students desiring institutional recommendation for licensure must complete at least 30 credit hours of work at the University of Colorado and also must fulfill the same content area requirements as undergraduate students. The actual number of required credit hours will depend on courses already completed.

Students may apply to one of the teacher education programs if the following requirements have been fulfilled:

1. **GPA:** Elementary and Secondary students must have and maintain a 2.75 (on a 4.00 scale) cumulative GPA, 2.75 at CU Boulder, 2.75 in their subject area (Secondary teacher fields) and 2.75 in education. Music K-12 Education students must have and maintain a 3.00 overall and in their subject area. Students applying to Master's Plus (MA+) programs must have and maintain a 3.00 cumulative GPA.
2. **Prior Degrees:** Students applying to Post-Baccalaureate and Master's Plus (MA+) programs must have a bachelor's degree from an accredited institution.
3. **Youth Experience:** Students must provide written verification of 25 clock hours of satisfactory experiences with elementary, middle/junior high or senior high school-aged youth (appropriate to the desired program) in the past five years. Forms for this purpose are available in the Office of Student Services, Education 151, or online at the School of Education (<https://www.colorado.edu/education>) website. Undergraduate students at CU Boulder meet this requirement through school experiences in EDUC 2020 Step 1: Inquiry Approaches to Teaching or EDUC 2050 Step Up to Social Justice Teaching courses.
4. **Basic Skills:** All teacher education students must demonstrate basic skills competence in mathematics and literacy. This may be done through acceptable grades in appropriate college course work, or by acceptable standardized test scores. Contact the Office of Student Services in Education 151 for more information.
5. **Letters of Recommendation.** Contact the Office of Student Services in Education 151 for more information.

6. **Personal Statement.** Contact the Office of Student Services in Education 151 for more information.
7. **Background Check and Fee:** The School of Education and our partner districts require students working in schools to undergo background checks at least once per year. The costs and process for these background checks are changing due to new state requirements. Check with the Office of Student Services for the most updated information.
8. **Application Fee:** The appropriate application fee should be submitted with application materials. Fees vary by program.

Individuals interested in completing the teacher education program at the University of Colorado Boulder should request application materials from the Office of Student Services, Education 151 or online at the School of Education (<http://www.colorado.edu/education>) website. Students currently enrolled in a degree program at Boulder will need to complete an application.

Individuals who have completed a baccalaureate degree at an accredited institution and are not currently enrolled at the university must complete a program application, a university application and submit official transcripts from all previous colleges directly to the University's Office of Admissions (<http://www.colorado.edu/admissions>).

Advising

Students are responsible for obtaining and reading the undergraduate student handbook (<https://www.colorado.edu/education/student-life/undergraduate-experience>). Off-campus students may obtain advising materials online (<https://www.colorado.edu/education/student-life/advising-ambassadors>) or by calling 303-492-6555.

At CU Boulder, degree requirements vary among the schools and colleges. Students seeking a degree at the University of Colorado should consult, as soon as possible, with an advisor in the college or school from which they expect to graduate and with the School of Education advisor (<https://www.colorado.edu/education/student-life/advising-ambassadors>).

Students are encouraged to become familiar with the teacher education requirements by comparing their own transcripts to the published advising materials. Students can then talk with an advisor before applying to the program or they may wait until after their applications are processed. Students seeking teacher licensure in French, German, Japanese, Latin, Russian, Spanish or Music Education should see the designated advisor for that content area in addition to the School of Education advisor.

Advising may also be obtained through email to edadvise@colorado.edu. When requesting email advising, please make questions as specific as possible.

Post-Baccalaureate

The School of Education offers course work leading to initial Colorado licensure to undergraduate, post-baccalaureate and master's degree students. Colorado requires public school teachers to be licensed by its state department of education. Students who successfully complete all School of Education requirements will be recommended for a Colorado Initial Teacher license, the license issued to all new teachers in Colorado. Licensure requirements vary from state to state and from teaching area to area. Students who are interested in teaching in other states should

familiarize themselves with the requirements of those states so they may plan an appropriate degree program.

Teacher education at the University of Colorado, while administered by the School of Education, is a university-wide function. Many academic departments provide course work that supports teacher preparation. Undergraduate students follow a prescribed set of courses that meet state content preparation standards, complete a major, and satisfy professional education requirements concurrently. The program involves a combination of courses at the university and K–12 school placements.

Post-Baccalaureate (Non-master's Degree) Teacher Licensure Programs

- Elementary Education (K–6) (p. 669)
- Music Education (K–12) (p. 669)
- Secondary English Language Arts (7–12) (p. 670)
- Secondary Math (7–12) (p. 671)
- Secondary Science (7–12) (p. 672)
- Secondary Social Studies (7–12) (p. 673)
- World Languages (p. 673) (French, German, Japanese, Latin, Russian or Spanish)

Elementary Education (K-6) Teacher Licensure Program for Post-Baccalaureate Students

Teacher licensure candidates must maintain a 2.75 GPA in cumulative, content and education course work. All grades must be a C- or better to satisfy a requirement.

Content Course Work Requirements

Code	Title	Credit Hours
Courses and Minimum Required Credit Hours		
	Written Communication: Three (3) credit hours in a college-level composition or writing course.	3
	Literature	3
	Mathematics: College-level mathematics	6
	Social Studies: Complete two (2) of the following options: US History or Political Science, World History, Economics	6
	Physical Science	3
	Biological Science	3
	Cultural/Human Geography	3

Education Course Requirements

Code	Title	Credit Hours
Courses and Minimum Required Credit Hours		
EDUC 3013	School and Society (Meets Arts and Science Core requirement for Human Diversity or Contemporary Societies. May be taken at any time.)	3
EDUC 4411	Educational Psychology for Elementary Schools (Includes up to two (2) hours per week of out-side service learning. May be taken at any time.)	4
EDUC 4311	Children's Literature and Literacy Engagement in Elementary Schools (May be taken at any time.)	3

EDUC 4320 & EDUC 4321	Reading Instruction for Elementary Schools and Writing Instruction for Elementary Schools (Three (3) credit hours each. Must be taken with EDUC 4321. Includes 4 hours per week of school based practicum.)	6
EDUC 5205 & EDUC 4351	Elementary Mathematics Theory and Methods and Language and Equity in Inclusive Learning Environments (Three (3) credit hours each. Must be taken with EDUC 4351. EDUC 4320 & EDUC 4321 are prerequisites. Includes four (4) hours per week of school based practicum.)	6
EDUC 4331 & EDUC 4341 & EDUC 5215	Elementary Social Studies Methods and Elementary Reading Assessment and Instruction and Elementary Science Theory and Methods (Three (3) credit hours each. Must be taken with EDUC 4341 & 5215. EDUC 4351 & 5205 are prerequisites. Shares an all day, school based practicum.)	9

Total Credit Hours 31

Student Teaching

Satisfactory completion of all content and education course requirements is a prerequisite for student teaching. No other courses may be taken during the student teaching semester.

- EDUC 4513 Education and Practice (2 credits). Must be taken with EDUC 4691.
- EDUC 4691 Student Teaching: Elementary School 1 (10 credits). Must be taken with EDUC 4513.

Basic Skills: Prior to Student Teaching

Complete an appropriate, college-level math *and* composition course with a B- or better. Acceptable scores on the ACT, SAT, GRE or Praxis CORE exam will also satisfy the requirement.

Required Tests and Assessments

Licensure Exam: Prior to Student Teaching

Pass the state-approved licensure exam, PRAXIS Subject Assessment (test 5001).

edTPA: During Student Teaching

Pass the edTPA, a performance-based, subject-specific assessment, with a score of 42 or higher.

Music Education (K#12) Teacher Licensure Program for Post-Baccalaureate Students

Teacher licensure candidates must maintain a 2.75 GPA in cumulative, content and education course work. All grades must be a C- or better to satisfy a requirement.

Content Course Work Requirements

Code	Title	Credit Hours
Courses and Minimum Required Credit Hours		
	Written Communication: ENGL, ARSC, or WRTG from Arts and Sciences Core	3

Literature and the Arts: Choose from the Arts & Sciences Core area: Literature and the Arts (excluding music courses).	3
Math: Please see advisor for course options.	3
Social Science or Foreign Language (3rd semester or higher, excluding music courses).	3
Natural Sciences	3
Non-music Electives: Any courses offered at CU-Boulder outside of the College of Music, excluding any School of Education (EDUC) courses.	9

Education Course Requirements

Code	Title	Credit Hours
Courses and Minimum Required Credit Hours

EDUC 4112	Educational Psychology and Adolescent Development (Includes up to two (2) hours per week of outside-class service learning. May be taken at any time.)	3
or EDUC 4411	Educational Psychology for Elementary Schools	
EDUC 4023	Differentiating Instruction in Diverse Secondary Classrooms (Includes up to four (4) hours per week of school-based practicum.)	3
Total Credit Hours		9

Student Teaching

Satisfactory completion of all content and education course requirements is a prerequisite for Student Teaching. No other courses may be taken during the Student teaching semester.

- EDUC 4513 Education and Practice (2 credits). Must be taken with EDUC 4732.
- EDUC 4732 Student Teaching K-12 (8 credits). Pass/fail only.
- MUSC 4193 Student Teaching Seminar (1 credit).
- MUSC 4133 Student Teaching Practicum (3 credits). Optional; check with the College of Music.

Basic Skills: Prior to Student Teaching

Complete an appropriate, college-level math *and* composition course with a B- or better. Acceptable scores on the ACT, SAT, GRE or Praxis CORE exam will also satisfy the requirement.

Required Tests and Assessments

Licensure Exam: Prior to Student Teaching

Pass the state-approved licensure exam, PRAXIS Subject Assessment (test 5113).

edTPA: During Student Teaching

Pass the edTPA, a performance-based, subject-specific assessment, with a score of 42 or higher.

Secondary English Language Arts (7# 12) Teacher Licensure Program for Post-Baccalaureate Students

Teacher licensure candidates must maintain a 2.75 GPA in cumulative, content and education course work. All grades must be a C- or better to satisfy a requirement.

Content Course Work Requirements

Code	Title	Credit Hours
Courses and Minimum Required Credit Hours		
	Mathematics: College-level mathematics.	3
	Social Science	3
	Natural Science	3
	Advanced Writing: Critical or creative writing beyond the lower-division/introductory composition level.	3
	History or Grammar of the English Language: Including or equivalent to EDUC 4222/EDUC 5222, CLAS 1010/LING 1010, LING 1500, or LING 2000.	3
	Oral Communication: Includes speech, public speaking, or communication courses.	3
	Visual Communication: Includes theatre, film, offerings from ATLAS, TAM or other digital media courses.	3
	Literature: Must include a component of British literature as well as a multicultural/non- English literature.	9
	Thirty (30) credit hours in English and English Language Arts related courses.	30
	Acceptable coursework may be in Communication/Speech, Composition, Drama/ Theatre, Humanities, Journalism, and/or Literature. (May include courses from the content requirements above.)	
	Recent English coursework in the past five (5) years.	6

Content Tracks

Biology

Complete twenty four (24) credit hours in Biology (may include courses from biology area above). Coursework must include the study of: General Biology, Matter & Energy in Living Systems, Ecology, Evolution, Genetics, Molecular Biology, Human Anatomy, Environmental Biology, Biotechnology

Chemistry

Complete twenty four (24) credit hours in Chemistry (may include courses from biology area above). Coursework must include the study of: Analytical, Inorganic, Organic, Physical.

Earth/Space Science

Complete twenty four (24) credit hours in Earth/Space Science (may include courses from biology area above). Coursework must include the study of: Environmental Science, Astronomy, Historical & Physical Geology, Meteorology, Oceanography, Geomorphology & Earth Systems.

Environmental Science

Complete twenty four (24) credit hours in Environmental Science (may include courses from biology area above). Coursework must include the study of: Ecology, Astronomy, seventeen (17) credit hours in Biology.

Physics

Complete twenty four (24) credit hours in Physics (may include courses from biology area above). Coursework must include the study of: Mathematics through Differential Equations, Astronomy, Atomic & Nuclear, Classical Mechanics, Electricity & Magnetism, Heat & Thermodynamics, Optics & Sound, Quantum Mechanics, Radiation & Radioactivity, Relativity, Waves.

Recent Science coursework in the past five (5) years. Six (6) credit hours.

Student Teaching

Satisfactory completion of all content and education course requirements is a prerequisite for student teaching. No other courses may be taken during the student teaching semester.

- EDUC 4722 Student Teaching: Secondary School 2 (2 credits). Must be taken with EDUC 4722 and SPAN 4660.
- EDUC 4712 Student Teaching: Secondary School (5 credits). Must be taken with EDUC 4513 and SPAN 4660.

- SPAN 4660 High School Spanish Teaching (6 credits). Must be taken with EDUC 4513 and EDUC 4722.

Basic Skills: Prior to Student Teaching

Complete an appropriate, college-level math *and* composition course with a B- or better. Acceptable scores on the ACT, SAT, GRE or Praxis CORE exam will also satisfy the requirement.

Required Tests and Assessments

Licensure Exam: Prior to Student Teaching

Pass the state-approved licensure exam, PRAXIS Subject Assessment (test 5195).

edTPA: During Student Teaching

Pass the edTPA, a performance-based, subject-specific assessment, with a score of 42 or higher.

Undergraduate Nondegree

The School of Education offers course work leading to initial Colorado licensure to undergraduate, post-baccalaureate and master’s degree students. Colorado requires public school teachers to be licensed by its state department of education. Students who successfully complete all School of Education requirements will be recommended for a Colorado Initial Teacher license, the license issued to all new teachers in Colorado. Licensure requirements vary from state to state and from teaching area to area. Students who are interested in teaching in other states should familiarize themselves with the requirements of those states so they may plan an appropriate degree program.

Teacher education at CU Boulder, while administered by the School of Education, is a universitywide function. Many academic departments provide course work that supports the teacher in training. Undergraduate students follow a prescribed set of courses that meet state content preparation standards, complete a major and satisfy professional education requirements concurrently. The program involves a combination of courses at the university and K–12 school placements.

Undergraduate Nondegree Teacher Licensure Programs

- Elementary Education (K–6) (p. 677) (catalog.colorado.edu/undergraduate/colleges-schools/education/programs-study/teacher-licensure-program/undergraduate-nondegree/undergraduate/colleges-schools/education/programs-study/teacher-licensure-program/undergraduate-nondegree/#elementaryk6text)
- Music Education (K–12) (p. 678)
- Secondary English Language Arts (7–12) (p. 679)
- Secondary Math (7–12) (p. 680)
- Secondary Science (7–12) (p. 680)
- Secondary Social Studies (7–12) (p. 681)
- World Languages (p. 682) (French, German, Japanese, Latin, Russian or Spanish)

Elementary Education (K–6) Teacher Licensure Program Grade Requirements

Teacher licensure candidates must maintain a 2.75 GPA in cumulative, content and education course work. All grades must be a C- or better to satisfy a requirement.

Foreign Language Requirement

All students are required to demonstrate third-level (intermediate) proficiency in a single foreign language. If not completed in high school, the student must pass an appropriate third-semester college course or an approved proficiency examination. Documentation is required.

Content Course Work Requirements

Code	Title	Credit Hours
Written Communication		
Choose a 3-credit college-level composition or writing course.		3
Mathematics		
Choose one of the following: ^{1,2}		5-6
MATH 1110 & MATH 1120	Mathematics for Elementary Educators 1 and Mathematics for Elementary Educators 2	
MATH 1300	Calculus 1	
World History		
Choose a 3-credit college-level course.		3
United States Context		
Choose one course from the following:		3
CAMW 2001	The American West	
ECON 4524	Economic History of the United States	
EDUC 2125	History of American Public Education	
ETHN 2004	Themes in American Culture 1	
ETHN 2013	Critical Issues in Native North America	
ETHN 2014	Themes in American Culture 2	
ETHN 2432/ HIST 2437	African American History	
ETHN 2536	Survey of Chicana/o History and Culture	
ETHN 3015	Asian Pacific American Communities	
ETHN 4504	Ethnic-American Autobiography	
HIST 1015	American History to 1865	
HIST 1025	American History since 1865	
HIST 2015	Themes in Early American History	
HIST 2126	Issues in Modern U.S. Politics and Foreign Relations	
HIST 2166	The Vietnam Wars	
HIST 2326	Issues in the History of U.S. Society and Culture	
HIST 2516	America Through Baseball	
PSCI 1101	Introduction to American Politics	
WGST 2400	Women of Color and Activism	
Physical Science		
Choose a 3-credit college-level course in astronomy, atmospheric and oceanic sciences, chemistry, geology, physics or physical geography.		3
Biological Science		
Choose a 3-credit college-level course in the EBIO and MCDB departments. IPHY 2420 also satisfies this requirement. Physical anthropology will NOT be accepted.		3
Cultural/Human Geography		
Choose a 3-credit college-level course in a geography department. Physical geography does NOT qualify.		3
Human Diversity		

EDUC 3013	School and Society	3
Total Credit Hours		26-27

¹ CMCI communication majors may complete MATH 1011, MATH 1012, MATH 1021, MATH 1071, MATH 1081, or MATH 1150 and INFO 1201.

² Psychology majors may complete MATH 1011, MATH 1071, MATH 1081, or MATH 1150 and PSYC 2111.

EDUC 4050	Knowing and Learning in Mathematics and Science (includes up to 2 hours per week of school-based practicum)	3
Semester One (Fall)		
EDUC 2020 or EDUC 4610	Step 1: Inquiry Approaches to Teaching ¹ Becoming a Learning Assistant	1
EDUC 5317	Perspectives on Mathematics	3
Semester Two (Spring)		
EDUC 2030	Step 2: Inquiry-Based Lesson Design	1

EDUC 4060	Classroom Interactions (includes up to 5 hours per week of school-based practicum)	3
EDUC 4232	Language and Literacy across the Curriculum (spring and summer only)	3

Semester Three

EDUC 5375	Problem-Based Math Instruction (includes up to 6 hours per week of school-based practicum)	3
EDUC 4023	Differentiating Instruction in Diverse Secondary Classrooms (includes up to 4 hours per week of school-based practicum)	3

Total Credit Hours	23
--------------------	----

¹ EDUC 4610 is restricted to students admitted to the Learning Assistant Program.

Student Teaching

Satisfactory completion of all content and education course requirements is a prerequisite for student teaching. No other courses may be taken during the student teaching semester.

- EDUC 4513 Education and Practice (2 credits). Must be taken with EDUC 4712.
- EDUC 4712 Student Teaching: Secondary School (10 credits). Must be taken with EDUC 4513.

Basic Skills: Prior to Student Teaching

Complete an appropriate, college-level math *and* composition course with a B- or better. Acceptable scores on the ACT, SAT, GRE or Praxis CORE exam will also satisfy the requirement.

Required Tests and Assessments

Licensure Exam: Prior to Student Teaching

Pass the state-approved licensure exam, PRAXIS Subject Assessment (test 5161).

edTPA: During Student Teaching

Pass the edTPA, a performance-based, subject specific assessment, with a score of 42 or higher.

Secondary Science (7–12) Teacher Licensure Program

Grade Requirements

Teacher licensure candidates must maintain a 2.75 GPA in cumulative, content and education course work. All grades must be a C- or better to satisfy a requirement.

Content Course Work Requirements

Code	Title	Credit Hours
Mathematics		
APPM 1350 or MATH 1300 or MATH 1310	Calculus 1 for Engineers Calculus 1 Calculus for Life Sciences	4
Science		
Choose two biology courses.		6
Choose two chemistry courses.		6
Choose two earth/space science courses.		6
Choose two physics courses.		6

Complete three out of four of the following content area lab courses separately or as part of a course:

Biology Lab	
Chemistry Lab	
Earth/Space Science Lab	
Physics Lab	
Total Credit Hours	28

Content Majors

- **Biology:** Complete a major in ecology & evolutionary biology; integrative physiology; molecular, cellular & developmental biology; or neuroscience (may include courses from the content requirements above).
- **Chemistry:** Complete a major in chemistry or biochemistry (may include courses from the content requirements above).
- **Earth/Space Science:** Complete a major in astronomy, atmospheric & oceanic sciences or geology (may include courses from the content requirements above). Please contact an education advisor for more information at 303-492-6555.
- **Environmental Science:** Complete a major in environmental studies (may include courses from the content requirements above). Contact an education advisor for more information at 303-492-6555.
- **Physics:** Complete a major in physics with Plan 3 (may include courses from the content requirements above). Students pursuing Plan 1 or Plan 2 in the physics major, or a major in engineering physics, should contact an education advisor at 303-492-6555.

Education Course Requirements

Code	Title	Credit Hours
Take Any Time		
EDUC 3013	School and Society (meets Arts and Science Core Requirement for Human Diversity or Contemporary Societies)	3
EDUC 4050	Knowing and Learning in Mathematics and Science (includes up to 2 hours per week of school-based practicum)	3
EDUC 4232	Language and Literacy across the Curriculum (spring and summer only)	3
Choose two courses from the following:		6
EDUC 4811 & MCDB 4811	Teaching and Learning Biology and Teaching and Learning Biology	
EDUC 4822	Teaching and Learning Chemistry (spring only)	
EDUC 4460 & PHYS 4460	Teaching and Learning Physics and Teaching and Learning Physics	
EDUC/PHYS 1580	Energy and Interactions	
EDUC 4833	Teaching and Learning Earth Systems (fall only)	
GEEN 4400	Teaching Design	
Semester One		
EDUC 2020 or EDUC 4610	Step 1: Inquiry Approaches to Teaching ¹ or Becoming a Learning Assistant	1
Semester Two		
EDUC 2030	Step 2: Inquiry-Based Lesson Design	1
EDUC 4060	Classroom Interactions (includes up to 5 hours per week of school-based practicum)	3

Semester Three

EDUC 5385	Problem-Based Science Instruction (includes up to 6 hours per week of school-based practicum)	3
EDUC 4023	Differentiating Instruction in Diverse Secondary Classrooms (includes up to 4 hours per week of school-based practicum)	3
Total Credit Hours		26

¹ EDUC 4610 is restricted to students admitted to the Learning Assistant Program.

Student Teaching

Satisfactory completion of all content and education course requirements is a prerequisite for student teaching. No other courses may be taken during the student teaching semester.

- EDUC 4513 Education and Practice (2 credits). Must be taken with EDUC 4712.
- EDUC 4712 Student Teaching: Secondary School (10 credits). Must be taken with EDUC 4513.

Basic Skills: Prior to Student Teaching

Complete an appropriate, college-level math *and* composition course with a B- or better. Acceptable scores on the ACT, SAT, GRE or Praxis CORE exam will also satisfy the requirement.

Required Tests and Assessments

Licensure Exam: Prior to Student Teaching

Pass the state-approved licensure exam, PRAXIS Subject Assessment (test 5435).

edTPA: During Student Teaching

Pass the edTPA, a performance-based, subject specific assessment, with a score of 42 or higher.

Secondary Social Studies (7–12) Teacher Licensure Program

Grade Requirements

Teacher licensure candidates must maintain a 2.75 GPA in cumulative, content and education course work. All grades must be a C- or better to satisfy a requirement.

Content Course Work Requirements

Code	Title	Credit Hours
Mathematics		
	Choose a 3-credit college-level course.	3
U.S. History		
	Choose 6 credits of college-level courses.	6
World History		
	Choose 6 credits of college-level courses.	6
Economics		
	Choose a 3-credit course in an economics department.	3
Political Science		
	Choose a 3-credit course in a political science department.	
Cultural/Human Geography		
	Choose a 3-credit course in a geography department. Physical geography does NOT qualify.	3

Sociology or Social/Cultural Anthropology

Choose a 3-credit course in a sociology or anthropology department. Physical anthropology does NOT qualify. 3

Focus Area

Choose 30 credit hours in one of the following disciplines: anthropology, economics, ethnic studies, geography, history, international affairs or political science (may include courses from the content requirements above). A minimum of 12 credits must be upper division.

Total Credit Hours 24

Education Course Requirements

Code	Title	Credit Hours
Take Any Time		
EDUC 3013	School and Society (meets the Arts and Sciences Core Requirement for Human Diversity or Contemporary Societies)	3
EDUC 4112	Educational Psychology and Adolescent Development (includes up to 2 hours per week of outside-class service learning)	3
EDUC 5316	Nature of Social Studies and Social Studies Education (fall only; includes school-based practicum)	3
Fall Semester		
EDUC 4295	Reading and Literacy in the Secondary Classroom (includes up to 5 hours per week of school-based practicum)	4
EDUC 4342	Writing in Humanities Classrooms (includes up to 4 hours per week of school-based practicum)	3
Spring Semester		
EDUC 4023	Differentiating Instruction in Diverse Secondary Classrooms (includes up to 4 hours per week of school-based practicum)	3
EDUC 5355	Methods and Materials in Secondary Social Studies (includes up to 5 hours per week of school-based practicum)	4
Total Credit Hours		23

Student Teaching

Satisfactory completion of all content and education course requirements is a prerequisite for student teaching. No other courses may be taken during the student teaching semester.

- EDUC 4513 Education and Practice (2 credits). Must be taken with EDUC 4712.
- EDUC 4712 Student Teaching: Secondary School (10 credits). Must be taken with EDUC 4513.

Basic Skills: Prior to Student Teaching

Complete an appropriate, college-level math *and* composition course with a B- or better. Acceptable scores on the ACT, SAT, GRE or Praxis CORE exam will also satisfy the requirement.

Required Tests and Assessments**Licensure Exam: Prior to Student Teaching**

Pass the state-approved licensure exam, PRAXIS Subject Assessment (test 5081).

edTPA: During Student Teaching

Pass the edTPA, a performance-based, subject specific assessment, with a score of 42 or higher.

World Languages**Secondary French (7–12) Teacher Licensure Program****Grade Requirements**

Teacher licensure candidates must maintain a 2.75 GPA in cumulative, content and education course work. All grades must be a C- or better to satisfy a requirement.

Content Course Work Requirements

Students must complete 30 credits in French at the junior level or above. May include requirements from below.

Code	Title	Credit Hours
Quantitative Reasoning & Mathematical Skills		
Choose one course from the following:		3-6
MATH 1011	College Algebra	
MATH 1012	Quantitative Reasoning and Mathematical Skills	
MATH 1071	Finite Mathematics for Social Science and Business	
MATH 1081	Calculus for Social Science and Business	
MATH 1150	Precalculus Mathematics	
MATH 1300	Calculus 1	
APPM 1350	Calculus 1 for Engineers	
MATH 1110 & MATH 1120	Mathematics for Elementary Educators 1 and Mathematics for Elementary Educators 2	
French Core		
FREN 3010	French Phonetics and Pronunciation	3
FREN 3050	French Composition 1	3
FREN 3060	French Composition 2	3
FREN 3100	Introduction to Critical Reading and Writing in French Literature	3
FREN 3110	Main Currents of French Literature 1	3
FREN 3120	Main Currents of French Literature 2	3
FREN 3500	French Current Events: Conversation and Composition	3
French Electives		
Choose 6 additional credits at the 3100 level or above.		6
Total Credit Hours		30-33

Education Course Requirements

EDUC 4023	Differentiating Instruction in Diverse Secondary Classrooms (includes up to 4 hours per week of school-based practicum)	3

EDUC 4125	Secondary World Language Methods (fall only; includes up to 5 hours per week of school-based practicum)	3
FREN 5770	Methods of Teaching French as a Foreign Language (fall only)	2
Total Credit Hours		14

Student Teaching

Satisfactory completion of all content and education course requirements is a prerequisite for student teaching. No other courses may be taken during the student teaching semester.

- EDUC 4513 Education and Practice (2 credits). Must be taken with EDUC 4722 and FREN 4960.
- EDUC 4722 Student Teaching: Secondary School 2 (5 credits). Must be taken with EDUC 4513 and FREN 4960.
- FREN 4960 High School French Teaching (6 credits). Must be taken with EDUC 4513 and EDUC 4722.

Basic Skills: Prior to Student Teaching

Complete an appropriate, college-level math *and* composition course with a B- or better. Acceptable scores on the ACT, SAT, GRE or Praxis CORE exam will also satisfy the requirement.

Required Tests and Assessments

Licensure Exam: Prior to Student Teaching

Pass the state-approved licensure exam, PRAXIS Subject Assessment (test 5174).

edTPA: During Student Teaching

Pass the edTPA, a performance-based, subject-specific assessment, with a score of 42 or higher.

Secondary German (7–12) Teacher Licensure Program Grade Requirements

Teacher licensure candidates must maintain a 2.75 GPA in cumulative, content and education course work. All grades must be a C- or better to satisfy a requirement.

Content Course Work Requirements

Students must complete a total of 30 credits in German and related fields. GRMN 4450 or GRMN 5020 may not count towards requirements.

Code	Title	Credit Hours
Mathematics		
Choose a 3-credit college-level mathematics course.		3
German Core		
GRMN 2020	Intermediate German 2	4
GRMN 3010	Advanced German 1	3
GRMN 3020	Advanced German 2	3
GRMN 4010	Advanced Grammar and Stylistics	3
GRMN 4550	Senior Seminar in German Studies	3
GRMN 5020	Applied Linguistics and Foreign Language Teaching Methodology (Department permission required)	3
Complete one of the following courses:		3
GRMN 4330	The Age of Goethe	
GRMN 4340	Seminar in German Literature	
Complete two courses from the following:		6

Courses taught in German

GRMN 3110 German Literature from the Avant-garde to the Postmodern

GRMN 3120 German Literature from the Enlightenment to Expressionism

GRMN 3140 Current Issues in German Literature

GRMN 3520 Open Topics in the Cultural Context

Courses taught in English

GRMN 1601 Germany Today

GRMN 1602 Metropolis and Modernity

GRMN 1701 Nature and Environment in German Literature and Thought

GRMN 2301 Inside Nazi Germany: Politics, Culture, and Everyday Life in the Third Reich

GRMN 2501 Miniatures of Modern Life: Introduction to Short Fiction

GRMN 2502 Representing the Holocaust

GRMN 2503 Fairy Tales of Germany

GRMN 2601 Kafka and the Kafkaesque

GRMN 2603 Moral Dilemmas in Philosophy and Literature

GRMN 3501 The German-Jewish Experience: From the Enlightenment to the Present

GRMN 3503 German Film Through World War II

GRMN 3504 Topics in German Film

GRMN 3506 Tracing the Criminal: Crime in 19th C Society and Culture

GRMN 3513 German Film and Society 1945-1989

GRMN 3514 German Film & Society After 1989

GRMN 3601 German Women Writers

GRMN 3702 Dada and Surrealist Literature

GRMN 3802 Politics and Culture in Berlin 1900-1933

GRMN 4051 Critical Theory of the Frankfurt School

GRMN 4301 Gender, Race and Immigration in Germany and Europe

GRMN 4501 Seminar: Literature in Cultural Context

GRMN 4502 Nietzsche: Literature and Values

GRMN 4503 Issues in German Thought

GRMN 4504 Goethe's Faust

Total Credit Hours 31

Education Course Requirements

Code	Title	Credit Hours
Courses and Minimum Required Credit Hours		
EDUC 3013	School and Society (Meets the Arts and Science Core requirement for Human Diversity or Contemporary Societies. May be taken at any time.)	3
EDUC 4112	Educational Psychology and Adolescent Development (Includes up to two (2) hours per week of outside-class service learning. May be taken at any time.)	3
EDUC 4023	Differentiating Instruction in Diverse Secondary Classrooms (Includes up to four (4) hours per week of school-based practicum)	3

EDUC 4125	Secondary World Language Methods (Includes up to five (5) hours per week of school-based practicum. Fall only.)	3
GRMN 4450 or GRMN 5020	Methods of Teaching German Applied Linguistics and Foreign Language Teaching Methodology	3
Note: May not count GRMN 5020 for academic preparation in German (section C, item 6) and for methods.		
Total Credit Hours		15

Student Teaching

Satisfactory completion of all content and education course requirements is a prerequisite for student teaching. No other courses may be taken during the student teaching semester.

- EDUC 4513 Education and Practice (2 credits). Must be taken with EDUC 4722.
- EDUC 4722 Student Teaching: Secondary School 2 (5 credits). Must be taken with EDUC 4513.
- GRMN 4460 High School German Teaching (6 credits). Pass/fail only. Must be taken concurrently EDUC 4513 & EDUC 4722.

Basic Skills: Prior to Student Teaching

Complete an appropriate, college-level math *and* composition course with a B- or better. Acceptable scores on the ACT, SAT, GRE or Praxis CORE exam will also satisfy the requirement.

Required Tests and Assessments

Licensure Exam: Prior to Student Teaching

Pass the state-approved licensure exam, PRAXIS Subject Assessment (test 5183).

edTPA: During Student Teaching

Pass the edTPA, a performance-based, subject-specific assessment, with a score of 42 or higher.

Secondary Japanese (7–12) Teacher Licensure Program Grade Requirements

Teacher licensure candidates must maintain a 2.75 GPA in cumulative, content and education course work. All grades must be a C- or better to satisfy a requirement.

Content Course Work Requirements

Student Teaching

Satisfactory completion of all content and education course requirements is a prerequisite for student teaching. No other courses may be taken during the student teaching semester.

- EDUC 4513 Education and Practice (2 credits). Must be taken with EDUC 4722 and SPAN 4660.
- EDUC 4722 Student Teaching: Secondary School 2 (5 credits). Must be taken with EDUC 4513 and SPAN 4660.
- SPAN 4660 High School Spanish Teaching (6 credits). Must be taken with EDUC 4513 and EDUC 4722.

Basic Skills: Prior to Student Teaching

Complete an appropriate, college-level math *and* composition course with a B- or better. Acceptable scores on the ACT, SAT, GRE or Praxis CORE exam will also satisfy the requirement.

Required Tests and Assessments**Licensure Exam: Prior to Student Teaching**

Pass the state-approved licensure exam, PRAXIS Subject Assessment (test 5195).

edTPA: During Student Teaching

Pass the edTPA, a performance-based, subject-specific assessment, with a score of 42 or higher.

Engineering & Applied Science

The College of Engineering and Applied Science has a tradition of excellence in engineering education dating back to 1893, and we continually update and improve our programs to reflect the highest standards in teaching and learning, discovery, innovation, community and culture. Our college is the top-ranked engineering school in the Rocky Mountain region, with 14 baccalaureate programs and 12 graduate programs.

Mission & Vision

The College of Engineering & Applied Science's mission is to generate new knowledge in engineering and related fields, and to equip students from diverse backgrounds to become leaders and citizens responsible for the betterment of individuals and society. Our vision is to be a recognized world leader for excellence and innovation in engineering research and education, with an emphasis on inclusive excellence, active learning and global society.

Degrees

The College of Engineering and Applied Science offers Bachelor of Science degrees in:

1. aerospace engineering sciences (p. 699)
2. applied mathematics (p. 706)
3. architectural engineering (p. 732)
4. chemical engineering (p. 719)
5. chemical and biological engineering (p. 717)
6. civil engineering (p. 735)
7. computer science (p. 755)
8. electrical engineering (p. 781)
9. electrical and computer engineering (p. 778)
10. engineering physics (p. 801)
11. engineering plus (p. 805)
12. environmental engineering (p. 737)
13. mechanical engineering (p. 814)
14. technology, arts and media (p. 821)

Accreditation

The CU Boulder campus is accredited by the Higher Learning Commission of the North Central Association of Colleges and Schools. Programs numbered 1, 3–6, 8–9 and 12-13 are accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org/>. Engineering Plus is seeking accreditation by the Engineering Accreditation Commission of ABET. The Computer Science degree is accredited by the Computing Accreditation Commission of ABET, <http://www.abet.org/>. The degrees in applied mathematics and engineering physics are offered in cooperation with the departments of Department of Applied Mathematics (p. 156) and Department of Physics (p. 503) in the College of Arts and Sciences (p. 128).

Professional Registration

Professional registration is recommended for all fields of engineering in order to protect the health, safety and welfare of the public. Registration is required in all states for the legal right to practice professional engineering. Although there are variations in state laws regarding engineering licensure, there is a general four-step process for licensure candidates: earn a degree from an EAC/ABET-accredited engineering program, pass the FE exam, gain acceptable work experience under the supervision of a PE, and pass the PE exam. Students typically take the FE exam during their senior year in college.

Centers & Communities

BOLD Center

The BOLD (Broadening Opportunity through Leadership and Diversity) Center focuses the college's inclusion-centered access, retention and performance initiatives. The BOLD Center creates a vibrant and

inclusive community of students from a wide range of backgrounds, preparing engineers with diverse perspectives to be innovative leaders in a global society. Through BOLD-inspired and -led initiatives, the college is dedicated to becoming a leader in attracting, preparing and expanding opportunities for students historically underrepresented in engineering—including women, racial minorities, students from low-income families and those who are the first in their family to attend college. The BOLD Center team focuses deeply on measurable outcomes to significantly improve upon historical student access, retention and performance results.

BOLDly Moving Forward. The BOLD Center achieves breakthroughs in attracting, preparing and expanding opportunities for historically underrepresented students in engineering through academic offerings that inspire and motivate student success. Building strong community among students who might otherwise feel isolated is also a BOLD key to student success. BOLD promotes student engagement, achievement and retention in engineering through a focus on community building, leadership and professional development activities, coupled with building strong academics and an expectation for achieving excellence.

Why be BOLD? Through the inclusive BOLD community, students meet and work with peers, connect with engineering student societies, tap into internships and mentoring opportunities, explore career services, acquire effective study habits and pursue volunteer opportunities. The BOLD Center offers free tutoring for all engineering students in the Student Success Center. BOLD participation scholarships are available through an application process.

For more information, visit the BOLD Center (<http://www.colorado.edu/bold>) website.

Mortenson Center in Engineering for Developing Communities

Engineering for Developing Communities (EDC) is an innovative program dedicated to transforming the understanding, application, and evaluation of engineering to address some of the world's most pressing issues. The engineers of today need to work with colleagues in various disciplines from around the world to find locally appropriate solutions to global issues such as climate change, crumbling urban infrastructure, and adequate water and food supplies for a growing world population. By giving students tools in understanding systems perspectives, development theory, and contexts from local to global, the program helps create global citizen engineers capable of working in many roles in development engineering.

For more information, visit the Mortenson Center in Engineering for Developing Communities (<http://www.colorado.edu/mcedc>) website.

Residential Communities

The Engineering Honors Residential Academic Program, the Global Engineering Residential Academic Program, and the Quadrangle Engineering Living and Learning Community are popular community-building options for engineering students.

Engineering Honors Residential Academic Program

As a residential college (RC) housed in Andrews Hall, the Engineering Honors Program provides an educational experience that transcends the classroom and matches the unique abilities, needs and ambitions of this select group of students. The program is for students who want to help build an honors culture that cares more about learning than grades; more about maximizing opportunities than meeting minimum requirements;

and more about being thoughtful, critical, engaged and intentional than being passively defined by the vague expectations of others. Central to fulfilling this mission is the Engineering Honors Program Residential College in Andrews Hall, which includes a residential faculty member, classrooms, special study spaces and the highest percentage of upper-division students living on campus.

Being part of EHP means belonging to a community that is ambitious without being competitive and committed to a wide range of goals from international development work to graduate school, from research to teaching, and from industry to service. It means living next to students already doing research, returning from summer internships, working with Engineers without Borders and applying to graduate school.

Incoming first-year students are selected to participate in the Engineering Honors Program via an online application process. Although many EHP students live in Andrews for multiple years, it is only required during the first year.

For more information about program requirements and to access the application, visit the Engineering Honors Program (<http://www.cuhonorsengineering.com>) website.

Global Engineering Residential Academic Program

The Global Engineering Residential Academic College opened in Fall 2013 with the mission to provide a four-year educational experience for engineering students invested in foreign languages, culture and geopolitics as well as in global development and international design collaboration. Global Engineering emphasizes those aspects of education that take place outside the traditional classroom: belonging to a strong community, service opportunities, leadership training, peer mentoring and participating in the liberal arts. A Faculty Director in Residence is central to the community and interacts with all community members. Global Engineering is located in Kittredge Central, and includes a kitchen, special classrooms and study spaces, an engineering computer lab, a music room and multiple room designs to attract upper-division students. Students in global engineering are encouraged to speak Spanish, French and/or Russian in residence. Incoming students are selected each year via an online application process, both for incoming freshmen and for returning students on the CU Boulder Campus.

For more information and to access the application, visit the Global Engineering (<http://www.globalengineeringrap.org>) website.

Quadrangle Engineering Living and Learning Community

Adjacent to the Engineering Center, composed of Aden, Brackett, Cockerell and Crosman Halls, the Quad provides a supportive living environment for students studying engineering and applied sciences. Current offerings include a computer lab with engineering software, evening and Sunday drop-in tutoring, and special programs such as hands-on workshops with the Idea Forge, faculty dinners, trips to sporting and cultural events on campus and more. Students in the Quad report that they appreciate the convenient location, the additional academic resources, and always having friends in their hall to study with.

For more information, visit Housing & Dining Services' Get Involved (https://living.colorado.edu/get-involved?qt-get_involved_main_tab=0&qt-get_involved_rap_breakdown_level=2&qt-get_involved_llcs=1/#qt-get_involved_llcs) webpage and scroll down to the Quad Engineering Living & Learning Community section.

Areas of Interest

Active Learning Program

The College of Engineering and Applied Science defines active learning as "enhancing knowledge, skills and understanding through practical experience." The college's goal is to provide all students with the opportunity to participate in enrichment experiences and partnerships with individual faculty and professionals in discovery, service and professional learning. Several programs are in place to financially support students engaged in undergraduate research or "discovery learning" with faculty, graduate students and research sponsors. Students seeking professional learning experiences such as internships and co-op assignments with a participating employer also typically earn hourly wages, while those pursuing service learning opportunities in the college, community or beyond could earn wages or course credit. Active learning encompasses domestic and international opportunities such as assisting developing communities through Engineers Without Borders, a national nonprofit organization started at CU Boulder.

For more information, visit the Active Learning Program (<http://www.colorado.edu/activelearningprogram>) website.

Colorado Space Grant Consortium

CU's Space Grant program provides interdisciplinary students with access to space through innovative courses and real-world, hands-on space hardware programs that include short and long-duration, high altitude balloon payloads, sounding rocket payloads and low-Earth orbiting satellite missions. NASA's Colorado Space Grant Consortium (also known as Space Grant) is part of a national program.

Space Grant students interact with engineers and scientists from NASA and industry to develop, test and fly new space technologies. All missions are entirely student run—including students in the roles of team members, team leads, systems engineers, project managers and mission operators. Students participate in programs that aid them in their future academic courses and careers.

For more information, visit the Colorado Space Grant Consortium (<http://spacegrant.colorado.edu>) website.

Engineering Leadership Program

The Engineering Leadership Program (ELP) provides students with course work and active learning experiences to prepare them to be leaders in their chosen careers, whether it is in an engineering field or another field such as government service, law, medicine, etc. Students in the program take leadership courses through ELP and other CU programs, attend leadership seminars sponsored by the college and learn from mentors who have experience relevant to their interests. ELP Students also design and undertake a personal leadership experience and produce a portfolio of their ELP work for review prior to graduation. Students apply to the program in their first or second year.

For more information, visit the Engineering Leadership Program (<http://www.colorado.edu/engineingleadershipprogram>) website.

Engineering Study Abroad

In today's global environment, engineers can expect to work in multilingual and multicultural teams and to engage in projects with global impact. It is therefore essential that students develop global engineering competencies alongside their technical skills, either through careful selection of globally oriented courses or through international experiences such as study abroad.

The College of Engineering and Applied Science has partnered with CU's Education Abroad Office to provide engineering students with numerous global opportunities. Students can study engineering at more than 25 universities across six continents, and more than 1800 courses have been preapproved for engineering credit.

Additionally, the college is adding technically oriented global seminars each summer to allow students to study engineering within a global context and under the tutelage of a CU professor.

Careful planning is required to ensure that the courses taken abroad meet degree requirements and that participants stay on track for graduation. All participants in CU-approved study abroad programs remain enrolled at the university and receive in-residence credit; the pass/fail grade option is used by the college for course work taken during study abroad but is exempt from college and major department pass/fail limitations. CU financial aid, including most scholarships, can usually be applied to program costs, and special study-abroad scholarships may be available for program participants.

Engineering students interested in studying abroad must begin planning early and are advised to save as many HSS and technical elective courses as possible, as these are the easiest to transfer back to CU.

For more information, visit the college's International Programs (<http://www.colorado.edu/engineering-international>) website.

Herbst Program of Humanities

The Herbst Program of Humanities enriches and broadens the education of engineering students with seminar and lecture courses in literature, philosophy, history, social issues and the arts.

In its two seminars, HUEN 1010 and HUEN 3100, class time is devoted almost exclusively to roundtable discussion of original texts in literature, philosophy, and the fine arts. These seminars have fewer than 14 students, so students can hone their critical thinking skills through reading, discussion and extensive writing. Both of these seminars satisfy the college's writing requirement. Note: HUEN 1010 satisfies the writing requirement only when taken in a student's freshman year.

The Herbst Program offers various lecture courses on a rotating basis. Engineering in History: The Social Impact of Technology (HUEN 1850) studies technological change and its consequences through time. HUEN 2100, HUEN 2120 and HUEN 2130 together survey science and technology from the Stone Age to the 20th century. Engineering, Science, and Society (HUEN 2210) explores the ethics and social implications of engineering practice. Special topics courses are occasionally offered (HUEN 2843 or HUEN 3843); these address subjects as varied as world folklore, the ethics of bioengineering, and the relationship between science and religion. The Herbst Program also offers summer and study abroad courses.

Clancy and Linda Herbst founded and endowed the program in 1989 and continue to sustain it; it is also supported by the Price Foundation, the Engineering Excellence Fund, CEAS and many friends and alumni.

For more information, visit the Herbst Program of Humanities in Engineering (<http://www.colorado.edu/herbst>) website.

Idea Forge

The Idea Forge is a flexible, cross-disciplinary collaborative space where students can imagine, design, create, and test products and solutions to meet a range of societal and customer needs. The space serves as the home for Design Center Colorado and Catalyze CU. It supports student

teams working on invention and innovation as part of courses, as well as design and development driven by entrepreneurial-minded individuals and service-oriented groups. With all these students working side-by-side, the Idea Forge boosts student learning through collaborative, hands-on experience, while supporting industry interaction through scheduled workshops as well as spontaneous exchanges.

The mission of the Idea Forge is to enhance interdisciplinary creativity and synergy to develop flexible, adaptable, and practical graduates. To do this, the Idea Forge supports design from a variety of perspectives, from the most formal engineering design process to the human-centered design philosophy. By providing students the opportunity to design, build, and test their concepts, the Idea Forge builds creative confidence and promotes the formation of strong professional skills.

The Idea Forge boasts a variety of flexible spaces to achieve its mission and to fit individual student needs. These spaces fit into three categories: fabrication shops, project space, and community space. The fabrication shops provide students with the tools and equipment needed for prototyping through machining, welding, 3D printing, laser cutting, woodworking, and sewing with an additional emphasis on electronics and micro-controllers. Students learn safe, efficient use of the tools and equipment through action, by taking workshops or tackling a project. Project spaces fill the Idea Forge – students are able to find their nearest wood-topped workbench to assemble their design. The central Idea Forge Commons, an inspiring environment for teamwork and brainstorming, doubles as a project space and a community space. Just off the Commons, the Thinking Lounge community space provides students with a comfortable place to take a break. Additional community space consists of two impressive conference rooms, which are perfect for meetings with industry and community members.

For more information, visit the Idea Forge (<http://www.colorado.edu/ideaforge>) website.

Integrated Teaching and Learning Program

The Integrated Teaching and Learning (ITL) program provides K–16 engineering education initiatives aimed at supporting the teaching and learning of hands-on, minds-on engineering curriculum so that students of all ages can imagine a future in engineering. With a focus on engineering design, undergraduate engineering students have the ability to create what they dream via modern manufacturing and electronics capabilities—reinforced through innovative engineering courses, as well as through time set aside for the creation of personal projects to expand one's creative thinking.

Through ITL Program skill-building workshops on tools, machining, soldering, circuits, strain gauges, laser cutters, Arduino microcontrollers, LabVIEW, SolidWorks, spatial visualization and more, students become comfortable with the resources that help them do the engineering that impacts everyday life. The multidisciplinary, hands-on ITL Laboratory features two open and interactive laboratory plazas that support inquiry-based experimentation, data acquisition and analysis capability. The laboratory also hosts design studios, team work areas, active learning spaces—all designed to be used by all disciplines of CU engineering students as they do engineering.

The ITL Program's nationally recognized K–12 engineering education program focuses on attracting and preparing more diverse and well-prepared youth to careers in engineering and technology. K–12 audiences may visit the ITL Laboratory to learn how engineering is an essential part of their lives through myriad hands-on science and engineering exhibits. K–12 teachers and students can also access the TeachEngineering

digital library, a free online curricular resource supporting educators to bring engineering into their K–12 classrooms through high quality engineering lessons and hands-on activities aligned to science, mathematics and technological educational standards. Accessed by over 1.6 million unique users in the past year, TeachEngineering has become a key resource to the broad national STEM movement and the growing K–12 engineering community.

The ITL program features an innovative interdisciplinary undergraduate curriculum that includes the retention-building First-Year Engineering Projects course that engages student teams to experience the design process in a hands-on way, culminating in an end-of-semester public design expo. The ITL Program also supports the design courses that distinguish the Engineering Plus degree program.

For more information, visit the Integrated Teaching & Learning Laboratory (<http://itll.colorado.edu>) website.

Pre-Engineering Program

The pre-engineering program is designed to facilitate the successful transition of qualified first-year students in the College of Arts and Sciences into the College of Engineering and Applied Science. The program provides a structured pathway of CU Boulder course work combined with a faculty director and academic advising support.

The program serves qualified first-time freshmen applicants who initially applied to the College of Engineering and Applied Science, but were alternatively offered admission to the College of Arts and Sciences pre-engineering program. Pre-engineering students prepare for a transition to the engineering college by successfully completing specific math, science and engineering courses. Minimum grade, credit, and GPA requirements must be met to secure the transition from pre-engineering to engineering. Through special registration access to select engineering courses, most students can complete engineering admission requirements in three semesters, while some may do so in as few as two semesters. The maximum length of time in the pre-engineering program for any student is four semesters, at which point the student will either be admitted to engineering or will transition into a College of Arts and Sciences major. Pre-engineering students are encouraged to live on campus in engineering-affiliated living communities and actively engage in engineering student societies and organizations.

For more information, visit the Pre-Engineering Program (<http://www.colorado.edu/pre-engineering>) website.

Policies & Requirements

Admission

Freshman Applicants

When students apply to the College of Engineering and Applied Science from high school, they may indicate to enter the college as "open option" (unsure of engineering major), or they may select a preliminary engineering major. Sometime after completion of the first semester, and by the eighth week of the second semester, all students should finalize and confirm their choice of major (<http://www.colorado.edu/engineering-advising/get-your-degree/first-year-freshmen/confirming-your-major>) in the college.

Specific admission requirements are detailed in the Admissions (p. 102) section of this catalog. Contact the campus Admissions Office (<http://www.colorado.edu/admissions>) for more information.

Transfer Students

Students desiring to transfer (<http://www.colorado.edu/engineering/future-students/transferring-cu>) from other accredited collegiate institutions are considered for admission on an individual basis. All transfer students are expected to be enrolled as full-time students and must be admitted to the college prior to the last 45 credit hours of their degree program. Admission criteria for students at other CU campuses are the same as for other transfer students.

Intra-University Transfer Students - Intra-University Transfers (IUTs) (<https://www.colorado.edu/engineering-advising/intra-university-transfer-iut-engineering>) on the Boulder campus to the College of Engineering and Applied Science are considered on designated criteria. The applicant's academic record must fulfill the IUT admission requirements of the College of Engineering and Applied Science.

Former Students

A former student is expected to meet the current requirements outlined in the Admissions (p. 102) section of this catalog and must reapply to the university. Courses taken at other collegiate institutions may or may not be a determining factor in the student's readmission to CU Boulder, but transcripts on all such work must be submitted.

Interruption of studies may require completion of current degree work in addition to repetition of course work for new degree requirements.

A former student returning to the college after a break in attendance must have course work reevaluated by the student's major department/program if it is older than 10 years from the date of their return.

Minimum Academic Preparation Standards (MAPS)

All students entering the University of Colorado who finished high school in the spring of 1988 or after must meet minimum academic preparation standards (MAPS) specified by each school or college. The College of Engineering and Applied Science has adopted the following standards for students. These standards are defined in high school units; a unit is one full year of high school course work:

- **English:** 4 units
- **Mathematics:** 4 units (includes at least 2 of algebra, 1 of geometry and 1 of college preparatory math such as trigonometry, analytic geometry or elementary functions)
- **Natural Science:** 3 units (2 of physics AND 1 of biology or chemistry; **OR** 2 of chemistry AND 1 of physics or biology; **OR** 2 of biology AND 1 of chemistry or physics; **OR** 1 of physics AND 1 of chemistry or biology AND 1 of another science)
- **Social Science:** 3 units (includes at least 1 unit of U.S. or World History)
- **Foreign Language:** 3 years of the same foreign language or 2 years in each of two different foreign languages

For additional information, see the Admissions (p. 102) and MAPS (p. 119) sections of this catalog.

Academic Excellence

Dean's List

An undergraduate student in the College of Engineering and Applied Science who completes at least 12 credit hours of course work for a letter grade during the fall or spring semester on the Boulder campus, and who earns a semester grade point average (GPA) of at least 3.600, will be included on the college dean's list for that semester. Notation of "Dean's

List" is placed on the student's transcript, and is viewable at the end of the semester in which the designation is earned.

Honors at Graduation

Undergraduate students may be eligible for honors designations at graduation (<http://www.colorado.edu/engineering-advising/get-your-degree/graduation/honors-graduation>).

Engineering Scholarships

Undergraduate scholarships are provided by public funds and private donations by alumni, corporations and friends of the college. In some cases, endowments have been established; other scholarships are based on annual gifts. Some companies provide matching funds for gifts from their employees who are alumni.

For additional information about engineering college-specific scholarships (<http://www.colorado.edu/engineering/future-students/financial-aid-scholarships>), contact the College's Scholarship Coordinator at 303-735-2440.

Anyone interested in providing an undergraduate scholarship or contributing to the scholarship fund may contact:

Engineering Advancement
University of Colorado Boulder
422 UCB
Boulder, CO 80309-0422
303-492-7899

Academic Standards

Academic Policies

Students in the College of Engineering and Applied Science must abide by all college policies and procedures as outlined on the college's Academic Advising (<http://www.colorado.edu/engineering-advising>) website, such as Academic Expectations and Policies (<http://www.colorado.edu/engineering-advising/get-your-degree/academic-expectations-policies>). Students should refer to these webpages often since policies, procedures and forms may be updated throughout the academic year.

Academic Integrity

Students in the College of Engineering and Applied Science may be required to pass an academic integrity quiz. See also the campuswide Honor Code (<http://honorcode.colorado.edu>) website.

Academic Standing

Visit the College's Academic Standing (<http://www.colorado.edu/engineering-advising/academic-standing-0>) webpage for details on good academic standing, academic alert, academic recovery, and academic suspension.

Credit and Enrollment

Attendance

Successful work in the College of Engineering and Applied Science is dependent upon regular attendance in all classes. Students who are unavoidably absent should make arrangements with instructors to make up the work missed. Non-attendance does not constitute withdrawal from a class. If students stop attending a class in which they are formally enrolled, they are likely to receive a failing grade (F). All students are

expected to be enrolled full time and must petition to be enrolled part time.

Registration and Enrollment

To ensure the prompt completion of degree requirements and satisfaction of the four-year guarantee, the undergraduate student is expected to register for, and complete each semester, a full-time course load as outlined in the relevant major department/program curriculum. All students are expected to be enrolled full-time and must petition to be enrolled part-time. Part-time enrollment (less than 12 credit hours) will negatively impact the student's financial aid and scholarships, and is likely to negatively impact student health insurance, on-campus housing, and the four-year graduation guarantee. Students must also petition to be enrolled in more than 19 credit hours in any given semester.

Sequence of Courses

Students are expected to follow the curriculum recommended by their major department/program.

A student who receives a grade of D+ or lower in a course that is a prerequisite to another may not enroll in the succeeding course without an approved petition from the student's major department/program, the instructor of the succeeding course and the dean's office. Check with the major department/program for more stringent requirements on prerequisite course grades.

All courses are not necessarily offered each semester. According to college policy, undergraduate courses having an enrollment of fewer than 20 students may be cancelled. Students can minimize scheduling problems by closely following the curricular sequence recommended by their major department/program. If a course is unavailable, a student may petition to enroll for equivalent study.

Add and Drop Policies

See the Office of the Registrar website (<http://www.colorado.edu/registrar>) for campuswide add and drop policies, and specific deadline dates for a given semester/term.

Engineering students may not enroll in more than 19 credit hours in a semester (17 credit hours for first-semester students) without an approved college petition.

See Late Drops (<https://www.colorado.edu/engineering-advising/get-your-degree/academic-expectations-policies>) for eligibility to drop a class after the 10th week semester deadline but before the last day of classes.

Withdrawal from the University

Withdrawal is the term used when a student wishes to drop all classes in a given semester/term. See the the Office of the Registrar website (<http://www.colorado.edu/registrar>) for campuswide withdrawal deadlines and procedures, along with Withdrawals (<https://www.colorado.edu/engineering-advising/get-your-degree/academic-expectations-policies>) on the college web site.

If a student withdraws, college permission may be required for re-enrollment. Students who interrupt their course of study may be required to complete all current degree requirements and to repeat courses previously completed.

Repeating Courses

A student may not enroll more than three times in a course that applies towards degree requirements; furthermore, after the third attempt, a student may not substitute an equivalent course. This means that a student has a maximum of three opportunities to show sufficient mastery

of a particular subject area, whether the course is from CU Boulder or through another collegiate institution. Furthermore, the most recent occurrence of the subject is the grade which is applied (e.g., to meet a grade required for a prerequisite course). If a student has earned AP or IB college credit and then subsequently enrolls in that course content, the later grade is applied. All grades will be employed to calculate grade point averages, including any courses which are repeated. Students are not to register for courses in which they already have received a final grade of C- or higher (unless their degree program requires a higher grade in the course).

Incompletes

Incomplete grades are given only when students, for documented reasons beyond their control, are unable to complete course requirements. A substantial amount of work must have been satisfactorily completed before approval for such a grade is given. An Incomplete Grade Record Form (<http://www.colorado.edu/engineering-advising/content/incomplete-grade-form>) must be completed by the instructor and student. In addition to reflecting the course and term taught, it also states what work must be completed to award the final grade and when the work must be finished (not to exceed one year). Incomplete grades are not calculated into the GPA. If a student does not complete a course assigned an Incomplete grade within one year, the Incomplete grade will automatically convert to an F grade. Students cannot repeat an equivalent course at another campus of the university or at another institution and expect the CU Boulder grade of "I" to be removed, changed, or excluded from conversion to an F. A student is expected to complete any course with an "I" grade and not to re-enroll in a course in which a grade of "I" was awarded. Once the work has been completed, the instructor must complete and submit a Change of Record form. However, it is the student's responsibility to verify that the grade change was processed and is reflected properly on the transcript.

Credit Policies

Advanced Placement (AP)

College credit may be granted on the basis of scores earned on the College Board's Advanced Placement (AP) exams. See the Advanced Placement (AP) Credit table (p. 110) for additional details.

International Baccalaureate (IB)

College credit may be granted on the basis of International Baccalaureate (IB) program exam scores. See the International Baccalaureate (IB) Credit table (p. 112) for additional details.

College-Level Examination Program Credit

College credit may be granted for select College-Level Examination Program (CLEP) examinations. See the list of eligible CLEP exams (<https://www.colorado.edu/career/testing-services/exemption-exams>) for more information.

Credit for Reserve Officers Training Corps (ROTC)

Up to 6 credit hours of approved ROTC courses may be counted toward a student's degree requirements in the humanities/social sciences. These approved courses may be found at the Humanities, Social Sciences and Writing Requirements (<https://www.colorado.edu/engineering-advising/get-your-degree/degree-requirements/humanities-social-sciences-and-writing-requirements>) webpage. With written approval from the student's major department/program, additional ROTC credit hours may be applied as free electives and/or technical professional electives.

No Credit Restrictions

In the College of Engineering and Applied Science, courses required for fulfillment of graduation requirements *cannot be taken for no credit*

(NC). Once a course has been taken for no credit, the course cannot be repeated for credit. Engineering students must petition for approval before enrolling for any course NC.

Pass/Fail Option

The primary purpose for offering courses on a pass/fail grading option is to encourage students to broaden their educational experience by selecting elective courses with this grade option without serious risk to their academic record. Individual departments may have rules that should be checked before registering for the pass/fail option. The college pass/fail policy is:

- The maximum number of credit hours a student may elect with the pass/fail option shall be designated by the student's major department/program, but no more than 16 hours of pass/fail credit can be applied toward degree requirements. (Study abroad pass/fail credit hours are exempt from this limitation.)
- Students should obtain advance approval via petition prior to selecting the pass/fail option using the College Petition Form. Course work taken pass/fail without appropriate approval may be reverted to the letter grade earned.
- All students who wish to register for the pass/fail option in a fall or spring semester must do so by the third Friday after classes begin.
- Students on academic recovery may not elect the pass/fail grade option.

Transfer Credit

After a prospective transfer student has been admitted, the Office of Admissions issues a transfer credit evaluation listing those courses acceptable for transfer by University of Colorado Boulder standards. A copy of this evaluation is made a part of the student's college record. The student's major department/program will then indicate which of those courses are acceptable in meeting engineering degree requirements. It is the responsibility of the transfer student to request final validation of the transfer credit hours by the major department/program and confirm that this validation is noted in the student's record.

If at any time a student wishes to have a course not previously accepted reconsidered for transfer, the student should consult with the faculty transfer credit evaluator in their major department/program to determine if petitioning for credit is in order.

Nontransferable Credit Hours

Students desiring to transfer credit hours from engineering technology programs should note that such credit hours are accepted only upon submission of evidence that the work involved was fully equivalent to that offered in this college.

Some technology courses are taught with titles and textbooks identical to those in similar engineering courses. These courses may still not be equivalent to engineering courses because the areas of academic emphasis are divergent.

In order to assist engineering technology students with transfer problems, the following guidelines have been established:

1. Courses on basic subjects such as mathematics, physics, foreign languages, literature or history may be acceptable for transfer credit if they were taught as part of an accredited program for all students and were not specifically designated for technology students.
2. Students who have taken courses with technology designations that may be valid equivalents for engineering courses have these options:

- They may petition for permission to waive the course requirement. The course requirement can be waived if students demonstrate that, by previous course work, individual study or work experience, they have acquired the background and training normally provided by the course. No credit is given for a waived course, but students may benefit from the waiver by being able to include more advanced work in their curriculum. A student will need to substitute an equivalent number of credit hours (approval by major department/program and college required). Other students may profit by repeating the course at this college and thus establishing a fully sound basis for what follows.
- The appropriate University of Colorado Boulder academic department may recommend to the dean's office that credit be transferred to count toward the requirements for a related course in its curriculum. Credit cannot be given for vocational/technical or remedial courses under rules of the university.
- The student may seek credit for the course by examination, if available, and the student pays the appropriate fee.

For more information on transfer of credit policies, see Transfer of College-Level Credit (p. 117) in the Admission section of this catalog.

Petition Policy

A student desiring a waiver of college or department/program policies must request and secure approval for this waiver through a petition procedure. Petitions (<http://www.colorado.edu/engineering-advising/forms>) are first presented to the student's major department/program for review, followed by review at the dean's office. It is the student's responsibility to obtain official notification of the petition decision from the dean's office.

Final Grade Appeal

If a student (rostered in any college/school on campus) wishes to appeal the final grade in a course offered by a College of Engineering and Applied Science academic unit, refer to the college's official grade appeal policy and procedures (<http://www.colorado.edu/p17ac5aa8dc5/rules-policies/grade-appeal-policy>).

Requirements

Academic Advising

Students are advised by professional staff advisors (<https://www.colorado.edu/engineering-advising/people>) and faculty mentors from their respective major department/program, typically at least once a semester. Students use MyCUHub (<http://www.colorado.edu/mycuhub>) to communicate with advisors, schedule appointments, explore majors, etc.

Premedical Option

Students interested in meeting requirements for entry into medical or other health professions schools while earning a degree in engineering should consult with a prehealth advisor (<http://www.colorado.edu/career/exploring-interests/interest-areas/pre-health>). Students should also discuss their plans with their primary academic advisor, since some of the required course work may fulfill electives in their engineering curriculum.

Four-Year Graduation Guarantee

For academically prepared freshmen who do not wish to extend their studies beyond eight semesters, the University of Colorado extends a guarantee (<http://www.colorado.edu/engineering-advising/get-your->

degree/graduation/four-year-graduation-guarantee) that required or essential courses, or acceptable alternative courses, will be available to allow each student to complete all course work required for a bachelor of science degree from the College of Engineering and Applied Science no later than the end of eight consecutive semesters of full-time enrollment. In the event the University of Colorado is not successful in meeting the terms of this guarantee, the university will reimburse the student all tuition and course fees for those courses remaining to successfully complete the previously designated bachelor of science degree.

Degree and Graduation Requirements

To be eligible for any of the baccalaureate degrees from the College of Engineering and Applied Science, students must meet graduation requirements (<http://www.colorado.edu/engineering-advising/get-your-degree/graduation-requirements>). Students should run an online degree audit and meet with their academic advisor to discuss progress towards degree requirements, and then when appropriate, apply for graduation on MyCUInfo (<https://mycuinfo.colorado.edu>) according to timelines provided by the college, Graduate School, and/or the Office of the Registrar.

Dual Degrees

A student in the College of Engineering and Applied Science may be able to obtain two degrees in engineering, or obtain one degree in engineering and obtain one in another field, such as business, music or one of the arts and sciences disciplines. Full degree requirements must be met for each degree program.

Concurrent BS and MS Degree Program in Engineering

Students with strong academic records who plan to continue in the Graduate School usually find it advantageous to apply for admission to the concurrent BS/MS degree program. Application is made to the Graduate School through the appropriate academic department. Application and admission may occur during the junior year; consult individual departments for their exact timing. The College of Engineering and Applied Science requires a minimum GPA of 3.25 for admission to this program; some departments may have higher requirements.

Requirements for the two degrees are the same as those for two degrees taken separately: 128 credit hours for the BS degree; plus 30 credit hours including 4-6 thesis hours (Plan I) or 30 credit hours (Plan II) for the MS degree. In some departments, up to 6 hours of graduate course work may be applied to the undergraduate degree. Students are allowed to structure their senior and graduate years in an order that is optimal for their program, as long as all requirements for both the BS and MS degrees are completed by the end of the joint BS/MS program. The BS and MS degrees must be awarded concurrently at the completion of the degree program. The tuition rate for students in this program will be at the undergraduate rate until the student is converted to graduate status, which will automatically happen when the student has 145 credit hours in the undergraduate career. Transfer, AP and IB hours are included when determining the total credit hours completed.

For additional details on this program, contact the appropriate engineering academic department or the Graduate School.

Programs of Study

Aerospace Engineering Sciences

Aerospace Engineering Sciences prepares students for successful and rewarding careers in aerospace and other high-tech industries,

national research laboratories, government services and academia. This program provides students unique opportunities to develop in-depth technical knowledge, effective communication skills and a systems engineering perspective that enables them to develop creative solutions to complex problems. The curriculum encompasses core aerospace subjects including fluids, thermodynamics, dynamics, orbital mechanics, structures and systems, design of air and space vehicles and exciting multidisciplinary applications including bioastronautics, unmanned systems, remote sensing and GPS.

The mission of the Ann and H.J. Smead Department of Aerospace Engineering Sciences (<https://www.colorado.edu/aerospace>) is to provide students the highest quality education in aerospace engineering sciences, emphasizing hands-on learning, and to conduct fundamental, applied and interdisciplinary research to meet societal needs through analysis, design and implementation of aerospace systems, leveraging synergies between aerospace engineering and related sciences.

The department is uniquely characterized by:

- blending aeronautics, astronautics, and science applications,
- providing an undergraduate experience characterized by rigorous preparation in mathematics and engineering sciences, a hands-on experiential approach to learning and an extensive emphasis on design in a systems context,
- emphasizing in our graduate education and research programs forefront aerospace technology development and the integration of engineering and science activities to solve critical problems in the earth and space sciences, and
- creating graduates who are broadly educated, interdisciplinary, agile, team-oriented engineers and scientists, with end-to-end mission and systems perspectives.

Program Educational Objectives

During their first few years after the completion of their degrees, graduates of the Ann and H.J. Smead Aerospace Engineering Sciences Department will have:

- established themselves in professional careers or received a graduate degree,
- demonstrated ethical leadership, project management and/or innovation, and
- played significant roles in the research and development of engineering systems and products.

Student Outcomes

Students completing the undergraduate degree in Aerospace Engineering Sciences will be knowledgeable in the following areas:

- the professional context of the practice of aerospace engineering and expectations of new graduates in aerospace engineering organizations, including an awareness of ethics issues, economics, and the business environment,
- the history of aerospace engineering, providing a perspective on current events,
- aerospace engineering as a highly multidisciplinary endeavor, requiring a systems perspective to integrate technologies and manage complexity, and
- major principles and scientific methods underlying the technologies comprising aerospace vehicles and systems.

Upon graduation, students will have developed the following general skills and abilities:

- an ability to identify, formulate and solve complex engineering problems by applying principles of engineering, science and mathematics
- an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety and welfare, as well as global, cultural, social, environmental and economic factors
- an ability to communicate effectively with a range of audiences
- an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental and societal contexts
- an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks and meet objectives
- an ability to develop and conduct appropriate experimentation, analyze and interpret data and use engineering judgment to draw conclusions
- an ability to acquire and apply new knowledge as needed, using appropriate learning strategies

Course code for this program is ASEN.

Bachelor's Degree

- Aerospace Engineering Sciences - Bachelor of Science (BS) (p. 699)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Ahmed, Nisar Razzi (https://experts.colorado.edu/display/fisid_153237)
Assistant Professor; PhD, Cornell University

Akos, Dennis M. (https://experts.colorado.edu/display/fisid_131119)
Professor; PhD, Ohio University

Anderson, Allison P. (https://experts.colorado.edu/display/fisid_156275)
Assistant Professor; PhD, Massachusetts Institute of Technology

Argrow, Brian M. (https://experts.colorado.edu/display/fisid_102860)
Professor; PhD, University of Oklahoma Norman Campus

Axelrad, Penina (https://experts.colorado.edu/display/fisid_100792)
Professor; PhD, Stanford University

Biringen, Sedat (https://experts.colorado.edu/display/fisid_105974)
Professor; DSc, Universite Libre de Bruxelles (Belgium)

Bosanac, Natasha (https://experts.colorado.edu/display/fisid_158199)
Assistant Professor; PhD, Purdue University

Brasseur, James Gordon (https://experts.colorado.edu/display/fisid_156801)
Research Professor; PhD, Stanford University

Braun, Robert D. (https://experts.colorado.edu/display/fisid_158523)
Professor; PhD, Stanford University

Cash, Webster C (https://experts.colorado.edu/display/fisid_101759)
Professor; PhD, University of California-Berkeley

Chu, Xinzhaoh (https://experts.colorado.edu/display/fisid_141893)
Professor; PhD, Peking Univ (China)

Clark, Torin K (https://experts.colorado.edu/display/fisid_155959)
Assistant Professor; PhD, Massachusetts Institute of Technology

Correll, Nicolaus J (https://experts.colorado.edu/display/fisid_147555)
Assistant Professor; PhD, Ecole Polytech Federale de Lausanne (Switzerland)

Culp, Robert D.
Professor Emeritus

Doostan, Alireza (https://experts.colorado.edu/display/fisid_147382)
Associate Professor; PhD, Johns Hopkins University

Emery, William J (https://experts.colorado.edu/display/fisid_106038)
Professor; PhD, University of Hawaii at Manoa

Evans, John A (https://experts.colorado.edu/display/fisid_152970)
Assistant Professor; PhD, University of Texas at Austin

Farnsworth, John A (https://experts.colorado.edu/display/fisid_153255)
Assistant Professor; PhD, Rensselaer Polytechnic Institute

Felippa, Carlos A (https://experts.colorado.edu/display/fisid_105701)
Professor; PhD, University of California-Berkeley

Forbes, Jeffrey M (https://experts.colorado.edu/display/fisid_100264)
Research Professor, Professor Emeritus; PhD, Harvard University

Frew, Eric W (https://experts.colorado.edu/display/fisid_134685)
Associate Professor; PhD, Stanford University

Gerren, Donna Sue (https://experts.colorado.edu/display/fisid_108563)
Senior Instructor; PhD, University of Kansas

Hamlington, Peter Edward (https://experts.colorado.edu/display/fisid_149800)
Assistant Professor; PhD, University of Michigan Ann Arbor

Hauser, John (https://experts.colorado.edu/display/fisid_102555)
Associate Professor; PhD, University of California at Berkeley

Hieb, Rick
Scholar In Residence

Humbert, James Sean (https://experts.colorado.edu/display/fisid_156202)
Associate Professor; PhD, California Institute of Technology

Hussein, Mahmoud Ismail (https://experts.colorado.edu/display/fisid_144300)
Associate Professor; PhD, University of Michigan Ann Arbor

Jackson, Jelliffe
Instructor; PhD, University of Florida

Jansen, Kenneth E (https://experts.colorado.edu/display/fisid_147360)
Professor; PhD, Stanford University

Jones, Brandon A (https://experts.colorado.edu/display/fisid_149418)
Asst Professor Adjunct; PhD, University of Colorado

Kantha, Lakshmi H (https://experts.colorado.edu/display/fisid_100231)
Professor; PhD, Massachusetts Institute of Technology

Klaus, David M (https://experts.colorado.edu/display/fisid_107103)
Professor; PhD, University of Colorado Boulder

Knipp, Delores Jane (https://experts.colorado.edu/display/fisid_147655)
Research Professor; PhD, University of California-Los Angeles

Koster, Jean N.
Professor Emeritus

Larson, Kristine M (https://experts.colorado.edu/display/fisid_105437)
Professor; PhD, University of California-San Diego

Lawrence, Dale A (https://experts.colorado.edu/display/fisid_104057)
Professor; PhD, Cornell University

Leben, Robert R (https://experts.colorado.edu/display/fisid_105118)
Research Professor Emeritus; PhD, University of Colorado Boulder

Li, Xinlin (https://experts.colorado.edu/display/fisid_100016)
Professor; PhD, Dartmouth College

Liu, Hanli
Assoc Professor Adjunct; PhD, University of Michigan

Lopez Jimenez, Francisco (https://experts.colorado.edu/display/fisid_157867)
Assistant Professor; PhD, California Institute of Technology

Marden, Jason R. (https://experts.colorado.edu/display/fisid_147582)
Associate Professor; PhD, University of California-Los Angeles

Marshall, David (https://experts.colorado.edu/display/fisid_158629)
Research Professor; PhD, Monash University, Australia

Marshall, Robert Andrew (https://experts.colorado.edu/display/fisid_155957)
Assistant Professor; PhD, Stanford University

Maslanik, James
Research Professor Emeritus

Matsuo, Tomoko (https://experts.colorado.edu/display/fisid_145041)
Assistant Professor; PhD, SUNY at Stony Brook

Maute, Kurt Karl (https://experts.colorado.edu/display/fisid_113875)
Professor; PhD, Univ of Stuttgart (Germany)

McGrath, Michael T (https://experts.colorado.edu/display/fisid_100133)
Professor Adjunct

McMahon, Jay W (https://experts.colorado.edu/display/fisid_150062)
Assistant Professor; PhD, University of Colorado Boulder

Morton, Jade
Professor; PhD, The Pennsylvania State University

Nabity, James A. (https://experts.colorado.edu/display/fisid_153102)
Associate Professor; PhD, University of Colorado Boulder

Neogi, Sanghamitra (https://experts.colorado.edu/display/fisid_156773)
Assistant Professor; PhD, Pennsylvania State University

Nerem, Robert Steven (https://experts.colorado.edu/display/fisid_118478)

Professor; PhD, University of Texas at Austin

Palo, Scott E (https://experts.colorado.edu/display/fisid_109033)
Professor; PhD, University of Colorado Boulder

Pao, Lucy Y (https://experts.colorado.edu/display/fisid_107151)
Professor; PhD, Stanford University

Park, Kwang-Chun
Professor Emeritus

Schaub, Hanspeter (https://experts.colorado.edu/display/fisid_143818)
Professor; PhD, Texas AM University

Scheeres, Daniel J. (https://experts.colorado.edu/display/fisid_145035)
Distinguished Professor; PhD, University of Michigan Ann Arbor

Schwartz, Trudy L (https://experts.colorado.edu/display/fisid_108607)
Senior Instructor; MS, University of Colorado Boulder

Scott, Hank
Lecturer

Singer, Howard
Professor Adjunct; PhD, University of California

Sternovsky, Zoltan (https://experts.colorado.edu/display/fisid_115211)
Associate Professor; PhD, Charles Univ, Prague (Czech Republic)

Stodieck, Louis S (https://experts.colorado.edu/display/fisid_105272)
Research Professor; PhD, University of Colorado Boulder

Thayer, Jeffrey P (https://experts.colorado.edu/display/fisid_134469)
Professor; PhD, University of Michigan Ann Arbor

Voss, James S (https://experts.colorado.edu/display/fisid_140891)
Scholar In Residence; MS, University of Colorado Boulder

ASEN 1000 (1) Introduction to Aerospace Engineering Sciences

Introduces aerospace history, curriculum, ethics, and the many areas of emphasis within aerospace engineering. Academic and industry speakers are invited to address various aerospace topics.

Requisites: Restricted to students with 0-26 credits (Freshmen) Aerospace Engineering (ASEN) or Engineering Open Option majors only.

Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 1022 (3) Materials Science for Aerospace Engineers

Covers prerequisite chemistry topics for materials science and introduces material types, properties and behavior for aerospace engineers.

Topics include review of chemistry; atomic bonding; crystals; diffusion; mechanical/thermal properties; phase diagrams; heat treatment; failure mechanisms; materials selection; and a general introduction to modern materials for aerospace engineering applications including composites, nanomaterials and metamaterials. Lab project or tensile testing is included.

Requisites: Requires corequisite courses of APPM 1350 or MATH 1300 or APPM 1340 or APPM 1345 and CHEN 1310 or ECEN 1310 or CSCI 1300 or CSCI 1310 or CSCI 1320. Restricted to Aerospace Engineering (ASEN) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Structures, Materials, and Structural Dynamics

ASEN 1400 (3) Gateway to Space

Introduces the basics of atmosphere and space sciences, space exploration, spacecraft design, rocketry and orbits. Students design, build, and launch a miniature satellite on a high altitude balloon. Explores the current research in space through lectures from industry.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 2500

Requisites: Restricted to College of Engineering students with a maximum of 50 credit hours.

Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 1969 (3) Pathway to Space

Explore the many paths one can take to be a part of a space-related career in a unique, engaging and interactive course. Students will learn about the following topics: space science and exploration, human spaceflight and life sciences, aeronautics and near space, launch and spacecraft systems, climate and environment, space business, policy and politics, space arts, media, and history.

Requisites: Restricted to Space Minor students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Specialized Courses

ASEN 2001 (4) Aerospace 1: Introduction to Statics, Structures, and Materials

Introduces models and analytical/numerical methods for statics and structural analysis. Topics include force/moment equilibrium, truss analysis, beam theory, stress/strain, failure criteria, and structural design. Matlab proficiency required. Offered fall only.

Requisites: Requires prereqs PHYS 1110 APPM 1345 or APPM 1350 or MATH 1300 and APPM 1360 or MATH 2300 CSCI 1300 or 1310 or 1320 or CHEN 1310 or ECEN 1310 (all minimum grade C). Requires coreqs ASEN 2002 2012 APPM 2350 or MATH 2400. Restricted to (ASEN) mjrs

Additional Information: Departmental Category: Structures, Materials, and Structural Dynamics

ASEN 2002 (4) Aerospace 2: Introduction to Thermodynamics and Aerodynamics

Introduces the fundamental principles and concepts of thermodynamics and fluid dynamic systems. Emphasizes the synthesis of basic science (physics), mathematics and experimental methods that form the basis for quantitative and qualitative analyses of general aerospace technology systems. Proficiency in Matlab required. Offered fall only.

Requisites: Requires prereqs PHYS 1110 APPM 1345 or APPM 1350 or MATH 1300 and APPM 1360 or MATH 2300 CSCI 1300 or 1310 or 1320 or CHEN 1310 or ECEN 1310 (all require minimum grade C). Requires coreqs ASEN 2001 2012 APPM 2350 or MATH 2400. RSTR to ASEN mjrs

Additional Information: Departmental Category: Aerodynamics and Fluid Mechanics

ASEN 2003 (5) Aerospace 3: Introduction to Dynamics and Systems

Introduces the principles of particle and planar rigid body dynamics, systems, and controls. Topics include kinematics, kinetics, momentum and energy methods, system modeling, and simple feedback control. Class includes experimental and design laboratory exercises for aerospace applications of dynamic principles. Offered spring only.

Requisites: Requires prerequisite courses of ASEN 2001 and ASEN 2012 and APPM 2350 or MATH 2400 (all minimum grade C). Requires corequisite courses of APPM 2360 and ASEN 2004. Restricted to Aerospace Engineering (ASEN) majors only.

Additional Information: Departmental Category: Systems and Control

ASEN 2004 (5) Aerospace 4: Aerospace Vehicle Design and Performance

Introduction to design and analysis of aircraft and spacecraft. Aircraft topics include cruise performance, wing design, propulsion, stability, control, and structures. Spacecraft topics include rocket staging, orbit selection, launch systems, and spacecraft subsystems. Includes laboratory experiments and team design exercises. Offered spring only.

Requisites: Requires prerequisite courses of ASEN 2001 and ASEN 2002 and ASEN 2012 and APPM 2350 or MATH 2400 (all minimum grade C). Requires corequisite courses of APPM 2360 and ASEN 2003. Restricted to Aerospace Engineering (ASEN) majors only.

Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 2012 (2) Experimental and Computational Methods in Aerospace Engineering Sciences

Introduces statistical, experimental, and computational methods used in aerospace engineering sciences. Usage of MatLab is extensive. Offered fall only.

Requisites: Requires prereqs PHYS 1110 APPM 1345 or APPM 1350 or MATH 1300 and APPM 1360 or MATH 2300 CSCI 1300 or 1310 or 1320 or CHEN 1310 or ECEN 1310 (all minimum grade C). Requires coreqs ASEN 2001 2002 APPM 2350 or MATH 2400. RSTR to (ASEN) mjrs

Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 2519 (1-6) Special Topics

Studies specialized aspects of the aerospace engineering sciences or innovative treatment of required subject matter at the lower-division level. Course content is indicated in the online Schedule Planner. Department enforced prerequisites: varies.

Repeatable: Repeatable for up to 10.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

Additional Information: Departmental Category: Specialized Courses

ASEN 2849 (1-3) Independent Study

Study of special projects agreed upon by student and instructor. Department consent required.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Specialized Courses

ASEN 3036 (3) Introduction to Human Spaceflight

Introduces students to the challenges of human space flight. Historical and current space programs and spacecraft are discussed with emphasis on those systems specific to sustaining human crews. Other topics include space environment with respect to sustaining human life and health, physiological and psychological concerns in a space habitat, astronaut selection and training, anomalies, mission operations motivation, costs rationale for human space exploration, and future program directions. Not accepted as a Professional Area Elective for ASEN majors.

Additional Information: Departmental Category: Bioastronautics and Microgravity Science

ASEN 3046 (3) Introduction to Humans in Aviation

Investigates the history of manned aviation accomplished through a review of the history of flight, the physiological and psychological limitations facing aviators, and investigates the human related causal factors in aviation accidents. The course also looks at the social and economic impacts of aviation in modern society. Not accepted as a Professional Area Elective for ASEN majors.

Additional Information: Departmental Category: Bioastronautics and Microgravity Science

ASEN 3111 (4) Aerodynamics

Develops the fundamental concepts of aerodynamics and provides a working knowledge for their application to the design of aircraft and launch vehicles operating at various speeds and altitudes, as well as the atmospheric forces on satellites. Offered fall only.

Requisites: Requires prerequisite courses of ASEN 2002 and ASEN 2004 and APPM 2360 and APPM 2350 or MATH 2400 (all minimum grade C). Restricted to Aerospace Engineering (ASEN) majors only.

Additional Information: Departmental Category: Aerodynamics and Fluid Mechanics

ASEN 3112 (4) Structures

Teaches Mechanics of Materials methods of stress and deformation analysis applicable to the design and verification of aircraft and space structures. It offers an introduction to matrix and finite element methods for truss structures, and to mechanical vibrations. Offered fall only.

Requisites: Requires prerequisite courses of ASEN 2001 and ASEN 2003 and ASEN 2004 and APPM 2360 and APPM 2350 or MATH 2400 (all minimum grade C). Restricted to Aerospace Engineering (ASEN) majors only.

Additional Information: Departmental Category: Structures, Materials, and Structural Dynamics

ASEN 3113 (4) Thermodynamics and Heat Transfer

Focuses on the applications of the first and second laws of thermodynamics to control volumes and teaches the fundamental concepts of different modes of energy and heat transfer. Learn to use these concepts in gas dynamics, high-speed vehicle spacecraft design, environmental systems, and energy analysis. Offered fall only.

Requisites: Requires prerequisite courses of ASEN 2002 and APPM 2360 and APPM 2350 or MATH 2400 (all minimum grade C). Restricted to Aerospace Engineering (ASEN) majors only.

Additional Information: Departmental Category: Thermodynamics and Propulsion

ASEN 3116 (3) Introduction to Biomedical Engineering

Addresses human responses to environment and physical stimuli. Makes use of engineering and physical principles in the study of human dynamics, arriving at reasonable solutions to 15 major areas of biomedical consent. Instructor consent required.

Additional Information: Departmental Category: Bioastronautics and Microgravity Science

ASEN 3128 (4) Aircraft Dynamics

Develops the fundamental concepts of aircraft dynamics. Covers flight mechanics, performance, dynamics and control of aircraft and how they impact aircraft design. Offered spring only.

Requisites: Requires prerequisite courses of ASEN 2002 and ASEN 2003 and ASEN 2004 and APPM 2360 (all minimum grade C). Restricted to Aerospace Engineering (ASEN) majors only.

Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 3200 (4) Orbital Mechanics/Attitude Dynamics and Control

Presents the fundamentals of orbital mechanics, 3D rigid body dynamics and satellite attitude dynamics and controls. Offered spring only.

Requisites: Requires prerequisite courses of ASEN 2003 and ASEN 2004 and APPM 2360 and APPM 2350 or MATH 2400 (all minimum grade C). Restricted to Aerospace Engineering (ASEN) majors only.

Additional Information: Departmental Category: Astrodynamics and Orbital Mechanics

ASEN 3300 (4) Aerospace Electronics and Communications

Provides the fundamentals of electronics and communications widely used in aerospace engineering. Includes analog instrumentation electronics, data acquisition, digital electronics and radio communication. Offered spring only.

Requisites: Requires prerequisite courses of ASEN 2003 and PHYS 1120 and APPM 2360 (all minimum grade C). Restricted to Aerospace Engineering (ASEN) majors only.

Additional Information: Departmental Category: Systems and Control

ASEN 3519 (1-4) Special Topics

Studies specialized aspects of the aerospace engineering sciences or innovative treatment of required subject matter at the upper-division level. Course content is indicated in the online Schedule Planner.

Department enforced prerequisite: varies.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

Additional Information: Departmental Category: Specialized Courses

ASEN 3930 (6) Aerospace Engineering Cooperative Education

Students will participate in a previously arranged, department-sponsored cooperative education program with a government agency or industry. 0.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) Aerospace Engineering (ASEN) majors only.

Recommended: Prerequisite GPA above 3.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Specialized Courses

ASEN 4010 (3) Introduction to Space Dynamics

Includes central force fields, satellite orbits, rocket dynamics, orbital transfer, interplanetary mission analysis, and perturbation due to atmospheric drag and Earth oblateness.

Requisites: Requires prerequisite course of ASEN 3200 (minimum grade C). Restricted to Aerospace Engineering (ASEN) majors only.

Additional Information: Departmental Category: Astrodynamics and Orbital Mechanics

ASEN 4012 (3) Aerospace Materials

Studies aerospace grade aluminum, magnesium, nickel, and titanium alloys. Covers heat treatment, defect structures, failure mechanisms, corrosion and its prevention, the effect of space radiation on materials, and high and low temperature effects. Introduces composite materials with a lab design and experiment. Emphasizes the selection of materials in design with procedures for choosing materials rationally. Case studies include aerogels, carbides, composites, powder metallurgy, nanomaterials, and advanced materials manufacturing technologies.

Requisites: Requires prerequisite course of ASEN 2001 (minimum grade C). Restricted to Aerospace Engineering (ASEN) or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Structures, Materials, and Structural Dynamics

ASEN 4013 (3) Foundations of Propulsion

Describes aerothermodynamics and design of both rocket and air-breathing engines. Includes ramjets, turbojets, turbofans, and turboprop engines, as well as liquid, solid, and hybrid rockets.

Requisites: Requires prerequisite courses of ASEN 3113 and APPM 2360 (all minimum grade C). Restricted to Aerospace Engineering (ASEN) or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Thermodynamics and Propulsion

ASEN 4018 (4) Senior Projects 1: Design Synthesis

Focuses on the synthesis of technical knowledge, project management, design process, leadership, and communications within a team environment. Students progress through the design process beginning with requirements development, then preliminary design and culminating with critical design. Offered fall only.

Requisites: Requires prereq courses of ASEN 1022, 3111, 3112, 3113, 3128, 3200 and 3300 (all min grade C). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Aerospace Engr (ASEN) Aerospace or Engr-Concurrent Degree (C-ASEN) students majors only

Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 4028 (4) Senior Projects 2: Design Practicum

Focuses on the fabrication, integration, verification and validation of designs produced in ASEN 4018. Students work within the same teams from ASEN 4018. Department consent required. Offered spring only.

Requisites: Requires prerequisite course of ASEN 4018 (minimum grade C). Restricted to Aerospace Engineering (ASEN) majors only.

Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 4057 (3) Aerospace Software

Provides an overview of prevalent software and hardware computing concepts utilized in practice and industry. Establishes the background necessary to tackle programming projects on different computing platforms with various software tools and programming languages.

Requisites: Requires prerequisite course of CSCI 1320 or ECEN 1310 or CHEN 1310 (minimum grade C). Restricted to Aerospace Engineering (ASEN) or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Computational and Analytic Methods

ASEN 4090 (3) Global Positioning Systems Applications

Focuses on GPS technology, software development, and applications. Lectures will cover the principal concepts used in GPS, and weekly laboratories will apply that knowledge. Culminates in student design projects using GPS.

Requisites: Requires prerequisite courses of APPM 2360 and CHEN 1310 (all minimum grade C).

Recommended: Prerequisite junior/senior standing in engineering.

Additional Information: Departmental Category: Global Positioning Systems

ASEN 4114 (3) Automatic Control Systems

Methods of analysis and design of feedback control for dynamic systems. Covers nyquist, bode and linear quadratic methods based on frequency domain and state space models. Laboratory experiments provide exposure to computation for simulation and real time control, and typical control system sensors and actuators.

Equivalent - Duplicate Degree Credit Not Granted: ASEN 5114

Requisites: Requires prerequisite courses of ASEN 3128 and ASEN 3200 (all minimum grade C). Restricted to Aerospace Engineering (ASEN) majors only.

Additional Information: Departmental Category: Systems and Control

ASEN 4123 (3) Vibration Analysis

Highlights free and forced vibration of discrete and continuous systems. Examines Lagrange's equation, Fourier series, Laplace transforms, and matrix and computational methods. Applies knowledge to practical engineering problems.

Equivalent - Duplicate Degree Credit Not Granted: MCEN 4123

Requisites: Requires prerequisite course of ASEN 3112 or MCEN 3030 (minimum grade C). Restricted to Aerospace Engineering (ASEN) majors only.

Additional Information: Departmental Category: Thermodynamics and Propulsion

ASEN 4128 (3) Human Factors in Engineering and Design

Introduces the field of human factors engineering and investigates human psychological, physiological and performance limitations in complex systems and why it is vital for engineers to understand human operational limitations when designing complex systems. Course includes studies of real accidents caused by human error, good and bad designs, latent conditions and accident-producing designs. Goal is an understanding of how to conduct engineering design with consideration of human factors.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 4138 (3) Aircraft Design

Two lectures and one lab per week. Examines principles of aircraft configuration and design to meet given performance specifications, taking into account aerodynamic, stability and control, and flying quality considerations, as well as airworthiness regulations. Includes preliminary design of the major elements of an aircraft.

Requisites: Requires prerequisite course of ASEN 3128 (minimum grade C). Restricted to Aerospace Engineering (ASEN) or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 4215 (3) Descriptive Physical Oceanography

Introduces descriptive and dynamical physical oceanography, focusing on the nature and dynamics of ocean currents and their role in the distribution of heat and other aspects of ocean physics related to the Earth's climate. Dynamical material limited to mathematical descriptions of oceanic physical systems.

Equivalent - Duplicate Degree Credit Not Granted: ASEN 5215 and ATOC 4215 and ATOC 5215

Requisites: Restricted to students with 87-180 credits (Seniors) or graduate students only.

Additional Information: Departmental Category: Atmospheric, Oceanic, and Space Sciences

ASEN 4216 (3) Neural Signals and Functional Brain Imaging

Explores bioelectric and metabolic signals generated by the nervous system from two stand points: 1) their biophysical genesis and role in neural integration and 2) neurotechnologies such as electroencephalography, magnetoencephalography, deep brain stimulation and functional magnetic resonance imaging.

Equivalent - Duplicate Degree Credit Not Granted: ASEN 5216 and ECEN 4811

Requisites: Requires prerequisite course of ASEN 3300 or ECEN 2260 or ECEN 3030 (all minimum grade C). Restricted to Aerospace Engineering (ASEN) majors only.

Additional Information: Departmental Category: Bioastronautics and Microgravity Science

ASEN 4218 (3) Large Space Structures Design

Develops the necessary structural analysis skills for conducting conceptual and preliminary designs of large space structures with a practical emphasis on structures considered by NASA over the past 20 years. Applies analysis skills to a broad range of space missions requiring large space structures, emphasizing low cost and practical design.

Equivalent - Duplicate Degree Credit Not Granted: ASEN 5218

Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Aerospace Engineering (ASEN) or Mechanical Engineering (MCEN) majors only.

Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 4222 (3) Materials Science for Composite Manufacturing

Studies common matrix materials and the modifications and improvements of properties which can be achieved by adding second phase reinforcements. Properties will be significantly affected by the design approach and by requirements, and by the procedure of adding reinforcements. Investigates polymer, ceramic and metallic materials. Explores manufacturing, fabrication and processing techniques. Evaluates future developments.

Equivalent - Duplicate Degree Credit Not Granted: ASEN 5222

Requisites: Requires prerequisite course of ASEN 3112 and prerequisite or corequisite course of ASEN 4012 (all minimum grade C). Restricted to Aerospace Engineering (ASEN) majors only.

Additional Information: Departmental Category: Structures, Materials, and Structural Dynamics

ASEN 4238 (3) Computer-Aided Control Systems Design

Covers Matlab and Simulink software, and multivariable control system synthesis and analysis techniques for typical aerospace control problems. Students formulate control problems and synthesize control functions using lineage quadratic techniques. Includes numerical integration of differential equations and nonlinear simulation of orbit and attitude dynamics.

Requisites: Requires prerequisite course of APPM 2360 (minimum grade C).

Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 4248 (3) Computer-Aided Control System Design 2

Studies theory and engineering applications of Kalman filter techniques. Covers discrete and continuous filters, the extended Kalman filter, and their application to guidance, navigation, and control, including satellite orbit and attitude problems, inertial and control navigation, and the Global Positioning System.

Requisites: Requires prerequisite course of ASEN 4238 (minimum grade C).

Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 4255 (3) Environmental Aerodynamics

A review of the properties and causes of hazards posed by the environment, ranging from atmospheric wind shear to tornadic flows. Involves a multidisciplinary approach combining analytical, numerical, scale modeling studies with extensive field measurements, wind energy and biophysical aerodynamics.

Equivalent - Duplicate Degree Credit Not Granted: ASEN 5255

Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Aerospace Engineering (ASEN) majors only.

Additional Information: Departmental Category: Atmospheric, Oceanic, and Space Sciences

ASEN 4338 (3) Computer Analysis of Structures

Covers basic structural design concepts and finite element modeling techniques. Emphasizes use of finite element static and dynamic analysis to validate and refine an initial design. Introduces basic design optimization and tailoring. Proficiency in Matlab required.

Requisites: Requires prerequisite course of ASEN 3112 (minimum grade C). Restricted to Aerospace Engineering (ASEN) majors only

Additional Information: Departmental Category: Structures, Materials, and Structural Dynamics

ASEN 4426 (3) Neural Systems and Physiological Control

A biophysical exploration of human physiology from the standpoints of control systems and neural information processing. Topics include: neural control of movement and cardiovascular performance, tissue growth and repair, carcinogenesis, and physiological responses to microgravity.

Equivalent - Duplicate Degree Credit Not Granted: ASEN 5426 and ECEN 4821 and ECEN 5821

Requisites: Requires prerequisite course of ASEN 3300 or ECEN 2260 or ECEN 3030 (minimum grade C). Restricted to Aerospace Engineering (ASEN) majors only.

Additional Information: Departmental Category: Bioastronautics and Microgravity Science

ASEN 4519 (1-3) Special Topics

Studies specialized aspects of the aerospace engineering sciences or innovative treatment of required subject matter at the upper-division level. Course content is indicated in the online Schedule Planner. Department enforced prerequisite varies.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

Additional Information: Departmental Category: Specialized Courses

ASEN 4849 (1-6) Independent Study

Special projects agreed upon by student and instructor. Department consent required.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Specialized Courses

ASEN 4859 (1-6) Undergraduate Research

Assigns a research problem on an individual basis. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Specialized Courses

Aerospace Engineering Sciences - Bachelor of Science (BS)

The undergraduate curriculum in aerospace engineering sciences is designed to prepare students to advance to a distinguished professional career in the aerospace industry or for graduate school, consistent with our stated program educational objectives. In particular, this involves providing students with an interdisciplinary systems perspective of aerospace engineering. The curriculum accomplishes these goals by:

- providing a strong basis in mathematics, science, and engineering fundamentals;
- extending these fundamentals to advanced topics in aerospace engineering;

- complementing the engineering education with sufficient exposure to the humanities and social sciences; and
- beginning and ending in major design experiences that stress an interdisciplinary systems perspective.

AES students are also encouraged to consider a technical minor or double major in electrical engineering, computer science, applied math, engineering physics, astrophysical and planetary sciences, or atmospheric and oceanic sciences. In most cases, the junior- and senior-level courses required for the above-mentioned minors can be applied to the professional area elective requirements.

For students having sufficient ability and interest, planning for graduate study should begin by the start of the junior year. Such a plan should consider the foreign language requirements of appropriate graduate schools and an advanced mathematics program. Students who wish to combine the business and aerospace engineering sciences curricula are advised to consider obtaining the BS degree in aerospace and a master's degree in business rather than a combined BS degree.

For more information, visit the department's Prospective Students (<https://www.colorado.edu/aerospace/prospective-students/undergraduates>) webpage.

Bioengineering Option/Premedical Curriculum

Courses can be specifically designed for students who wish either to attend medical school or to enter graduate work in bioengineering after receiving the BS degree. Students should consult their academic advisor, as well as their prehealth advisor, regularly to assure the adequacy of their curricula.

Concurrent Degree Program BS/MS in Aerospace Engineering Sciences

The concurrent BS/MS program in aerospace engineering sciences enables the program's top BS students to be admitted to the MS program during the junior or senior year, and to work thereafter toward both the BS and MS degrees in aerospace engineering sciences. This program allows for early planning of the MS portion of the student's education, taking graduate courses as part of the BS degree requirements, more flexibility in the order in which courses are taken, and more efficient use of what would otherwise be a final semester with a light credit load. Up to 6 credit hours may be counted towards both the BS and MS degree programs. Therefore, in theory, the minimum number of credit hours required for the concurrent BS/MS degrees will be 152. Current CU Boulder aerospace students are eligible to apply after they have completed eight core ASEN courses and have a minimum CU Boulder cumulative and ASEN major GPA of 3.250.

For more information, visit the department's BS/MS Degree (<https://www.colorado.edu/aerospace/current-students/undergraduates/bsms-degree>) webpage.

Requirements

Prerequisites and Passing Grades

The minimum passing grade for a course that is a prerequisite for another required course is C. If a grade of C- or lower is received in a course which is a prerequisite to another, the student may not register for the subsequent course until the first grade has been raised to a C or higher.

The minimum passing grade for a course that is not specifically a prerequisite for another required course is D-.

The Ann and HJ Smead Department of Aerospace Engineering Sciences (AES) reserves the right to drop students enrolled in ASEN courses who have not met the minimum prerequisite grade requirements. It is the student's responsibility to communicate with the department if summer course work and/or transfer credit will be used to meet the prerequisite requirement.

Aerospace engineering students are expected to take Applied Math (APPM) courses for the required mathematics courses (APPM 1350, APPM 1360, APPM 2350, APPM 2360) once they have matriculated into the program.

Course Requirements

The BS curriculum in aerospace engineering sciences is revised annually to keep up with new advances in technology, to make use of new educational methodologies, and to satisfy updated program accreditation criteria. A total of 128 credit hours is required.

Students who are unsure of their major selection are advised to take Chemistry for Engineers & Lab (CHEN 1211/CHEM 1221) in the fall of the freshman year in case the student decides to change their major. The 5 credit hours earned for this course may then apply as free electives for ASEN majors who take the class.

Professional Area Electives

- Any ASEN course at the 4000 level or above that is not a required course can be used as a professional area elective.
- A professional area elective (PAE) is generally a course in math, engineering, or science at the 3000-level or above. Elective courses most likely to help an aerospace engineer's career development are ASEN, APPM, CSCI, ECEN, and PHYS courses. It is suggested that students secure advance approval for professional area elective courses from their advisor.
- Upper-division independent study from technical areas (math, science, and engineering) is acceptable for up to 6 credit hours of professional area elective credit. The upper-division ROTC courses AIRR 3010, NAVR 3030 and NAVR 3040 are acceptable for 3 credit hours of professional area elective credit.

A full listing of approved PAE courses can be found in the degree audit.

Recommended Four-Year Plan of Study

Course	Title	Credit Hours
Freshman		
Fall Semester		
APPM 1350	Calculus 1 for Engineers	4
First-Year Projects course		3
Humanities or social science elective ¹		3
CSCI 1320	Computer Science 1: Starting Computing- Engineering Application	4

¹ Students may choose courses from the list of college-approved humanities and social sciences (HSS) electives (<https://www.colorado.edu/engineering-advising/get-your-degree/degree-requirements/humanities-social-sciences-and-writing-requirements>).

² Students may choose a course from the list of college-approved writing courses (<https://www.colorado.edu/engineering-advising/get-your-degree/degree-requirements/humanities-social-sciences-and-writing-requirements>).

Applied Mathematics

Applied mathematics graduates have the expertise and mathematical sophistication necessary to make contributions in a wide variety of fields, including scientific computation, actuarial science, financial modeling

and most areas of science and engineering that have a mathematical basis.

A professional applied mathematician may work with engineers, scientists, programmers and other specialists. The curriculum at CU Boulder is designed to have the breadth for such an interdisciplinary career.

Course offerings at the undergraduate level focus on providing students with mathematical tools, problem-solving strategies and expertise useful in science and engineering. To fulfill requirements, a concentrated area of engineering courses (or approved natural science courses) must be completed. The college has formulated several recommended options within the discipline.

The Department of Applied Mathematics in the College of Engineering & Applied Science offers a BS degree in applied mathematics. The BS degree is designed to prepare graduates for exciting and diverse professional careers, and for graduate study in a wide variety of disciplines. A minor in applied mathematics (p. 156) and a minor in statistics (p. 162) are offered through the College of Arts & Sciences.

The objectives of the Department of Applied Mathematics at CU Boulder are summarized below:

- provide undergraduate and graduate students with high-quality education and training in applied mathematics, and prepare them for careers in industry, laboratories and the academic professions;
- offer and monitor degree programs leading to BS, MS and PhD degrees in applied mathematics;
- nourish and maintain a professional environment in which excellence in teaching, learning, scholarship and creativity are of central importance;
- assure teaching and research expertise in a number of key areas of applied mathematics, including the methodology of applied mathematics, computational mathematics and algorithms, industrial applications, mathematical biology, applied probability and statistics.

Courses at the undergraduate level provide training in a broad range of mathematical techniques and problem-solving strategies. These courses teach the concepts and methods central to applications of linear algebra, ordinary and partial differential equations, numerical analysis, probability and statistics, complex variables and nonlinear dynamics. Since applied mathematicians often are involved in interdisciplinary work, the BS degree requires an in-depth knowledge of some area of science or engineering where mathematics is used. This knowledge prepares graduates to successfully communicate and cooperate with engineers and scientists. The BS degree also requires knowledge of a programming language and skill in using the computer.

Course code for this program is APPM.

Desired Outcomes

The undergraduate degree in applied mathematics emphasizes knowledge and awareness of:

- differential and integral calculus in one and several variables;
- vector spaces and matrix algebra;
- ordinary and partial differential equations;
- at least one programming language;
- at least one application software package in either mathematics or statistics;

- methods of complex variables as used in applications; and
- numerical solutions of linear and nonlinear problems.

In addition, students completing a degree in applied mathematics acquire:

- an in-depth knowledge of an area of application (an engineering discipline or a natural science field or one of the quantitative areas of business and economics);
- knowledge of problem-formulation, problem-solving and modeling techniques, and strategies central to applications; and
- the ability to communicate analytic arguments clearly and concisely in oral and written forms.

Bachelor's Degree

- Applied Mathematics - Bachelor of Science (BS) (p. 706)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Courses

APPM 1235 (4) Pre-Calculus for Engineers

Prepares students for the challenging content and pace of the calculus sequence required for all engineering majors. Covers algebra, trigonometry and selected topics in analytical geometry. Prepares students for the calculus courses offered for engineering students. Requires students to engage in rigorous work sessions as they review topics that they must be comfortable with to pursue engineering course work. Structured to accustom students to the pace and culture of learning encountered in engineering math courses. For more information about the math placement referred to in the "Enrollment Requirements", please contact your academic advisor. Formerly GEEN 1235.

Equivalent - Duplicate Degree Credit Not Granted: MATH 1021 or MATH 1150

Requisites: Restricted to College of Engineering or Pre-Engineering Arts and Sciences majors only. Requires or an ALEKS math exam taken in 2016 or earlier, or placement into pre-calculus based on your admissions data and/or CU Boulder coursework.

APPM 1340 (4) Calculus 1 with Algebra, Part A

Studies selected topics in analytical geometry and calculus: rates of change of functions, limits, derivatives and their applications. This course and APPM 1345 together are equivalent to APPM 1350. The sequence of this course and APPM 1345 is specifically designed for students whose manipulative skills in the techniques of high school algebra and precalculus may be inadequate for APPM 1350. For more information about the math placement referred to in the "Enrollment Requirements", please contact your academic advisor.

Requisites: Requires prerequisite course of APPM 1235 or MATH 1021 or MATH 1150 or MATH 1160 (minimum grade C-) or an ALEKS math exam taken in 2016 or earlier, or placement into pre-calculus based on your admissions data and/or CU Boulder coursework.

Additional Information: Arts Sci Gen Ed: Quantitative Reasoning Math

APPM 1345 (4) Calculus 1 with Algebra, Part B

Continuation of APPM 1340. Studies selected topics in calculus: derivatives and their applications, integration, differentiation and integration of transcendental functions. Algebraic and trigonometric topics are studied throughout, as needed.

Equivalent - Duplicate Degree Credit Not Granted: APPM 1350 or ECON 1088 or MATH 1081 or MATH 1300 or MATH 1310 or MATH 1330
Requisites: Requires prerequisite course of APPM 1340 (minimum grade C-).

APPM 1350 (4) Calculus 1 for Engineers

Topics in analytical geometry and calculus including limits, rates of change of functions, derivatives and integrals of algebraic and transcendental functions, applications of differentiations and integration. Students who have already earned college credit for calculus 1 are eligible to enroll in this course if they want to solidify their knowledge base in calculus 1. For more information about the math placement referred to in the "Enrollment Requirements", contact your academic advisor.

Equivalent - Duplicate Degree Credit Not Granted: APPM 1345 or ECON 1088 or MATH 1081 or MATH 1300 or MATH 1310 or MATH 1330
Requisites: Requires prerequisite course of APPM 1235 or MATH 1021 or MATH 1150 or MATH 1160 or MATH 1300 (minimum grade C-) or an ALEKS math exam taken in 2016 or earlier, or placement into calculus based on your admissions data and/or CU Boulder coursework.

Additional Information: GT Pathways: GT-MA1 - Mathematics
Arts Sci Core Curr: Quant Reasn Mathmat Skills
Arts Sci Gen Ed: Quantitative Reasoning Math

APPM 1360 (4) Calculus 2 for Engineers

Continuation of APPM 1350. Focuses on applications of the definite integral, methods of integration, improper integrals, Taylor's theorem, and infinite series.

Equivalent - Duplicate Degree Credit Not Granted: MATH 2300

Requisites: Requires prerequisite course of APPM 1345 or APPM 1350 or MATH 1300 (minimum grade C-).

APPM 2350 (4) Calculus 3 for Engineers

Covers multivariable calculus, vector analysis, and theorems of Gauss, Green, and Stokes.

Equivalent - Duplicate Degree Credit Not Granted: MATH 2400

Requisites: Requires prerequisite course of APPM 1360 or MATH 2300 (minimum grade C-).

APPM 2360 (4) Introduction to Differential Equations with Linear Algebra

Introduces ordinary differential equations, systems of linear equations, matrices, determinants, vector spaces, linear transformations, and systems of linear differential equations.

Equivalent - Duplicate Degree Credit Not Granted: both MATH 2130 and MATH 3430

Requisites: Requires prerequisite course of APPM 1360 or MATH 2300 (minimum grade C-).

APPM 2450 (1) Calculus 3 Computer Lab

Selected topics in analytic geometry and calculus with a focus on symbolic computation using Mathematica.

Requisites: Requires a corequisite course of APPM 2350.

Grading Basis: Pass/Fail

APPM 2460 (1) Differential Equations Computer Lab

Selected topics in differential equations and linear algebra with a focus on symbolic computation using MATLAB.

Requisites: Requires enrollment in a corequisite course of APPM 2360.

Grading Basis: Pass/Fail

APPM 2720 (1-3) Open Topics in Lower Division Applied Mathematics

Provides a vehicle for the development and presentation of new topics that are accessible to lower division Applied Mathematics students.

These topics have the potential to be incorporated into the core APPM curriculum.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite course of APPM 1350 or MATH 1300 (minimum grade C-).

Grading Basis: Letter Grade

APPM 2750 (4) Java: Training, Mathematical Algorithms, and Mobile Apps

Preparatory course for Java programming. Provides necessary background for Java language: basic object-oriented concepts, analysis, and design. Learn to create Java applets, applications and mobile apps, create graphic context, and identify the key features of Java foundation classes as well as other Java-related technology. Material is taught in the context of mathematical algorithms from calculus. Department enforced requisite, knowledge of a programming language.

Requisites: Requires prerequisite course of APPM 1350 or MATH 1300 (minimum grade C-).

APPM 3010 (3) Chaos in Dynamical Systems

Introduces undergraduate students to chaotic dynamical systems. Topics include smooth and discrete dynamical systems, bifurcation theory, chaotic attractors, fractals, Lyapunov exponents, synchronization and networks of dynamical systems. Applications to engineering, biology and physics will be discussed.

Requisites: Requires prerequisite course of APPM 2360 or MATH 3430 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

APPM 3050 (3) Scientific Computing in Matlab

Topics covered include: approximations in computing, computer arithmetic, interpolation, matrix computations, nonlinear equations, optimization, and initial-value problems with emphasis on the computational cost, efficiency, and accuracy of algorithms. The problem sets are application-oriented with examples taken from orbital mechanics, physics, genetics, and fluid dynamics.

Requisites: Requires prerequisite course of APPM 2360 or MATH 3430 (minimum grade C-).

APPM 3170 (3) Discrete Applied Mathematics

Introduces students to ideas and techniques from discrete mathematics that are widely used in science and engineering. Mathematical definitions and proofs are emphasized. Topics include formal logic notation, proof methods; set theory, relations; induction, well-ordering; algorithms, growth of functions and complexity; integer congruences; basic and advanced counting techniques, recurrences and elementary graph theory. Other selected topics may also be covered.

Requisites: Requires a prerequisite of APPM 1360 or MATH 2300 (all minimum grade C-).

APPM 3310 (3) Matrix Methods and Applications

Introduces linear algebra and matrices with an emphasis on applications, including methods to solve systems of linear algebraic and linear ordinary differential equations. Discusses vector space concepts, decomposition theorems, and eigenvalue problems.

Equivalent - Duplicate Degree Credit Not Granted: MATH 2130 and MATH 2135

Requisites: Requires prerequisite course of APPM 2350 or APPM 2360 or MATH 2400 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

APPM 3350 (3) Advanced Engineering Calculus

Extends the treatment of engineering mathematics beyond the topics covered in Calculus 3 and differential equations. Topics include non-dimensionalization, elementary asymptotics and perturbation theory, Reynold's transport theorem and extensions of Leibnitz's rule, as applied to continuum conservation equations, Hamiltonian formulations, Legendre and Laplace transforms, special functions and their orthogonality properties.

Requisites: Requires prerequisite course of APPM 2350 or MATH 2400 and APPM 2360 (all minimum grade C-).

APPM 3570 (3) Applied Probability

Studies axioms, counting formulas, conditional probability, independence, random variables, continuous and discrete distribution, expectation, joint distributions, moment generating functions, law of large numbers and the central limit theorem.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 3810 or MATH 4510 STAT 3100

Requisites: Requires a prerequisite or corequisite course of APPM 2350 or MATH 2400 (prereq minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

APPM 4120 (3) Introduction to Operations Research

Studies linear and nonlinear programming, the simplex method, duality, sensitivity, transportation and network flow problems, some constrained and unconstrained optimization theory, and the Kuhn-Tucker conditions, as time permits.

Equivalent - Duplicate Degree Credit Not Granted: APPM 5120 and MATH 4120 and MATH 5120

Requisites: Requires a prerequisite course of APPM 3310 or MATH 3130 or MATH 3135 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

APPM 4350 (3) Methods in Applied Mathematics: Fourier Series and Boundary Value Problems

Reviews ordinary differential equations, including solutions by Fourier series. Physical derivation of the classical linear partial differential equations (heat, wave, and Laplace equations). Solution of these equations via separation of variables, with Fourier series, Fourier integrals, and more general eigenfunction expansions.

Equivalent - Duplicate Degree Credit Not Granted: APPM 5350

Requisites: Requires prerequisite courses of APPM 2350 or MATH 2400 and APPM 2360 (all minimum grade C-) and a prerequisite or corequisite course of APPM 3310 or MATH 3130 or MATH 3135 (prereq minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

APPM 4360 (3) Methods in Applied Mathematics: Complex Variables and Applications

Introduces methods of complex variables, contour integration and theory of residues. Applications include solving partial differential equations by transform methods, Fourier and Laplace transforms and Reimann-Hilbert boundary-value problems, conformal mapping to ideal fluid flow and/or electrostatics.

Equivalent - Duplicate Degree Credit Not Granted: APPM 5360

Requisites: Requires prerequisite courses of APPM 2350 or MATH 2400 and APPM 2360 (all minimum grade C-) and a prerequisite or corequisite course of APPM 3310 or MATH 3130 or MATH 3135 (prereq minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

APPM 4380 (3) Modeling in Applied Mathematics

An exposition of a variety of mathematical models arising in the physical and biological sciences. Students' modeling projects are presented in class. Topics may include: GPS navigation, medical imaging, ocean waves, and computerized facial recognition.

Equivalent - Duplicate Degree Credit Not Granted: APPM 5380

Requisites: Requires prerequisite courses of APPM 2350 or MATH 2400 and APPM 2360 (all minimum grade C-).

Recommended: Prerequisites APPM 3310 and APPM 4350 and APPM 4650.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

APPM 4390 (3) Modeling in Mathematical Biology

Investigates how complex systems in biology can be studied using applied mathematics. Examines several case studies which include topics from microbiology, enzyme reaction kinetics, neuroscience, ecology, epidemiology, physiology and bioengineering.

Equivalent - Duplicate Degree Credit Not Granted: APPM 5390

Requisites: Requires prerequisite courses of APPM 2360 and APPM 3310 or MATH 3130 or MATH 3135 (all minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

APPM 4440 (3) Undergraduate Applied Analysis 1

Provides a rigorous treatment of topics covered in Calculus 1 and 2. Topics include convergent sequences; continuous functions; differentiable functions; Darboux sums, Riemann sums, and integration; Taylor and power series and sequences of functions.

Requisites: Requires prerequisite courses of APPM 2350 or MATH 2400 and APPM 2360 (all minimum grade C-) and a prerequisite or corequisite course of APPM 3310 or MATH 3130 or MATH 3135 (prereq minimum grade C-).

APPM 4450 (3) Undergraduate Applied Analysis 2

Continuation of APPM 4440. Study of multidimensional analysis including n-dimensional Euclidean space, continuity and uniform continuity of functions of several variables, differentiation, linear and nonlinear approximation, inverse function and implicit function theorems, and a short introduction to metric spaces.

Requisites: Requires prerequisite course of APPM 4440 or MATH 3001 (minimum grade C-).

APPM 4500 (3) Statistical Collaboration

Educates and trains students to become effective interdisciplinary collaborators by developing the communication and collaboration skills necessary to apply technical statistics and data science skills to help domain experts answer research questions. Topics include structuring effective meetings and projects; communicating statistics to non-statisticians; using peer feedback, self-reflection and video analysis to improve collaboration skills; creating reproducible statistical workflows; working ethically.

Equivalent - Duplicate Degree Credit Not Granted: APPM 5500

Requisites: Requires a prerequisite course of APPM 4520 (minimum grade C-).

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

APPM 4505 (2) Advanced Statistical Collaboration

Educates and trains students to become advanced interdisciplinary collaborators by developing and refining the communication, collaboration and technical statistics and data science skills necessary to collaborate with domain experts to answer research questions. Students work on multiple projects. Discussions center on technical skills necessary to solve research problems and video analysis to improve communication and collaboration skills.

Equivalent - Duplicate Degree Credit Not Granted: APPM 5505

Requisites: Requires prerequisite course of APPM 4500 or APPM 5500 (minimum grade C-).

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

APPM 4510 (3) Data Assimilation in High Dimensional Dynamical Systems

Develops and analyzes approximate methods of solving the Bayesian inverse problem for high-dimensional dynamical systems. After briefly reviewing mathematical foundations in probability and statistics, the course covers the Kalman filter, particle filters, variational methods and ensemble Kalman filters. The emphasis is on mathematical formulation and analysis of methods.

Equivalent - Duplicate Degree Credit Not Granted: APPM 5510 and STAT 5250

Requisites: Requires prerequisite courses of APPM 3310 and APPM 3570 (all minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

APPM 4530 (3) Stochastic Analysis for Finance

Studies mathematical theories and techniques for modeling financial markets. Specific topics include the binomial model, risk neutral pricing, stochastic calculus, connection to partial differential equations and stochastic control theory.

Equivalent - Duplicate Degree Credit Not Granted: APPM 5530 and STAT 5230

Requisites: Requires prerequisite courses of APPM 3310 and APPM 3570, or STAT 3100, or MATH 4510 (all minimum grade C-).

APPM 4560 (3) Markov Processes, Queues, and Monte Carlo Simulations

Brief review of conditional probability and expectation followed by a study of Markov chains, both discrete and continuous time, including Poisson point processes. Queuing theory, terminology and single queue systems are studied with some introduction to networks of queues. Uses Monte Carlo simulation of random variables throughout the semester to gain insight into the processes under study.

Equivalent - Duplicate Degree Credit Not Granted: APPM 5560

Requisites: Requires prerequisite course of APPM 3570 or MATH 4510 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

APPM 4570 (3) Statistical Methods

Covers basic statistical concepts with accompanying introduction to the R programming language. Topics include discrete and continuous probability laws, random variables, expectation and variance, central limit theorem, testing hypothesis and confidence intervals, linear regression analysis, simulations for validation of statistical methods and applications of methods in R.

Equivalent - Duplicate Degree Credit Not Granted: APPM 5570

Requisites: Requires prerequisite course of APPM 1360 or MATH 2300 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

APPM 4580 (3) Introduction to Statistical Learning

Consists of applications and methods of statistical learning. Covers multiple linear regression, classification, regularization, splines, tree-based methods, support vector machines and unsupervised learning.

Equivalent - Duplicate Degree Credit Not Granted: APPM 5580

Requisites: Requires prerequisite course of APPM 4570 or APPM 5570 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

APPM 4590 (3) Statistical Modeling

Introduces methods, theory and applications of statistical models, from linear models (simple and multiple linear regression), to hierarchical linear models. Topics such as estimation, residual diagnostics, goodness of fit, transformations, and various strategies for variable selection and model comparison will be discussed in depth. Examples and exercises will be demonstrated using statistical software.

Equivalent - Duplicate Degree Credit Not Granted: APPM 5590

Requisites: Requires prerequisite course of APPM 4520 or APPM 4570 or MATH 4520 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

APPM 4650 (3) Intermediate Numerical Analysis 1

Focuses on numerical solution of nonlinear equations, interpolation, methods in numerical integration, numerical solution of linear systems, and matrix eigenvalue problems. Stresses significant computer applications and software. Department enforced prerequisite: knowledge of a programming language.

Equivalent - Duplicate Degree Credit Not Granted: MATH 4650

Requisites: Requires a prerequisite course of MATH 3430 or APPM 2360 and APPM 3310 (minimum grade C-).

APPM 4660 (3) Intermediate Numerical Analysis 2

Continuation of APPM 4650. Examines numerical solution of initial-value problems and two-point boundary-value problems for ordinary differential equations. Also looks at numerical methods for solving partial differential equations. Department enforced prerequisite: knowledge of a programming language.

Equivalent - Duplicate Degree Credit Not Granted: MATH 4660

Requisites: Requires prerequisite course of APPM 4650 or MATH 4650 (minimum grade C-).

APPM 4720 (1-3) Open Topics in Applied Mathematics

Provides a vehicle for the development and presentation of new topics that may be incorporated into the core courses in applied mathematics. Department enforced prerequisite: variable, depending on the topic, see instructor.

Equivalent - Duplicate Degree Credit Not Granted: APPM 5720

Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

APPM 4840 (1-3) Reading and Research in Applied Mathematics

Introduces undergraduate students to the research foci of the Department of Applied Mathematics. Department enforced prerequisite: variable depending on the topic.

Repeatable: Repeatable for up to 9.00 total credit hours.

APPM 4950 (1-3) Seminar in Applied Mathematics

Introduces undergraduate students to the research foci of the program in applied mathematics. It is also designed to be a capstone experience for the program's majors. Department enforced prerequisite: variable depending on the topic.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Applied Mathematics - Bachelor of Science (BS)

The Department of Applied Mathematics in the College of Arts and Sciences offers a Bachelor of Science degree in applied mathematics through the College of Engineering and Applied Science. The BS degree is designed to prepare graduates for exciting and diverse professional careers, and for graduate study in a wide variety of disciplines.

Courses at the undergraduate level provide training in a broad range of mathematical techniques and problem-solving strategies. These courses teach the concepts and methods central to applications of linear algebra, ordinary and partial differential equations, numerical analysis, probability and statistics, complex variables, and nonlinear dynamics. Since applied mathematicians often are involved in interdisciplinary work, the BS degree requires an in-depth knowledge of some area of science or engineering where mathematics is used. This knowledge prepares graduates to successfully communicate and cooperate with engineers and scientists. The BS degree also requires knowledge of a programming language and skill in using the computer.

For more information, visit the department's Prospective Students (<https://www.colorado.edu/amath/prospective-students/undergraduate>) webpage.

Research Opportunities

The Department of Applied Math offers a broad range of undergraduate research opportunities funded by National Science Foundation grants,

and students can gain professional exposure through the student chapter of the Society of Industrial and Applied Mathematics (SIAM) on campus.

Working with faculty, applied math students have developed solutions to a variety of problems in fluids, dynamical systems, data analysis, networks, signal processing, math biology, math education and numerics. Applied math students also worked with faculty to develop the Mathematical Visualization Toolkit, an award-winning online instructional tool that helps students better visualize calculus concepts.

Concurrent Degree Programs

BS/MS in Applied Mathematics

The concurrent BS/MS program in applied mathematics enables well-qualified and motivated students to experience graduate-level course work earlier in their education and to obtain an MS degree in a reduced time period. Applied math majors may apply for this program during their junior year. Minimum requirements for admission include completion of at least two APPM courses numbered 3000 or higher, an overall GPA of 3.400 or higher, a minimum GPA of 3.400 in APPM and MATH courses and two letters of recommendation from APPM faculty. Students interested in this program are encouraged to consult with an applied mathematics faculty advisor early in their undergraduate career.

For more information, see the department's BS-MS Program (<https://www.colorado.edu/amath/academics/bs-ms-program>) webpage.

BS/MS in Applied Mathematics and Interdisciplinary Telecommunications

Communications and networking systems play an increasingly central role in our individual lives and society. Social networks, internet-based commerce, wireless networks, and remote access to education and medical care all depend on the reliable, secure and efficient use of network hardware consisting of mobile devices, switches, routers, data centers, and cellular base stations. This concurrent program enables well-qualified students to be admitted to the Interdisciplinary Telecommunications Program (ITP) MS during the junior year of their BS program, and to work thereafter towards earning both the BS and MS degrees. This concurrent degree program is aimed at the specific needs of companies requiring engineers with an integrated knowledge of mathematical techniques to develop and implement secure networks and data centers that are interconnected by state of the art broadband links. For more information, please contact an ITP or APPM advisor.

Dual Degree Program

BS in Applied Mathematics and Civil Engineering

As an exceptional opportunity for talented students who are interested in analytical and computational methods related to civil engineering and general engineering science, the applied mathematics and civil engineering departments offer a streamlined track by which a student can earn a baccalaureate degree from both programs with a minimum of 15 extra credit hours. Consult faculty advisors in applied mathematics and civil engineering for information and admission.

Requirements

Required Courses and Credits

The BS degree in applied mathematics requires the satisfactory completion of a minimum of 128 credit hours as follows.

Code	Title	Credit Hours
Calculus		
APPM 1350	Calculus 1 for Engineers ¹	4
APPM 1360	Calculus 2 for Engineers ¹	4
APPM 2350	Calculus 3 for Engineers ¹	4
Computing Experience		
Select one of the following:		3-4
CSCI 1300	Computer Science 1: Starting Computing	
CSCI 1320	Computer Science 1: Starting Computing-Engineering Application	
CHEN 1310	Introduction to Engineering Computing	
ECEN 1310	C Programming for ECE	
Science Requirement		
PHYS 1110	General Physics 1	4
PHYS 1120	General Physics 2	4
PHYS 1140	Experimental Physics 1	1
Select at least 4 additional credits of chemistry or biology (including 1 credit of laboratory science) from one of the following:		5-8
CHEN 1211 & CHEM 1221	General Chemistry for Engineers and Engineering General Chemistry Lab	
CHEM 1113 & CHEM 1114	General Chemistry 1 and Laboratory in General Chemistry 1	
EBIO 1210 & EBIO 1220 & EBIO 1230 & EBIO 1240	General Biology 1 and General Biology 2 and General Biology Laboratory 1 and General Biology Laboratory 2	
MCDB 1150 & MCDB 1151 & MCDB 2150 & MCDB 2151	Introduction to Cellular and Molecular Biology and Introduction to Cell and Molecular Biology Lab and Principles of Genetics and Principles of Genetics Laboratory	
PHYS 2130 & PHYS 2150	General Physics 3 and Experimental Physics 2	
PHYS 2170 & PHYS 2150	Foundations of Modern Physics and Experimental Physics 2	
APPM Courses		
APPM 2360	Introduction to Differential Equations with Linear Algebra	4
APPM 3310	Matrix Methods and Applications	3
APPM 4350	Methods in Applied Mathematics: Fourier Series and Boundary Value Problems	3
APPM 4360	Methods in Applied Mathematics: Complex Variables and Applications	3
APPM 4650	Intermediate Numerical Analysis 1	3
Select one of the following:		3
APPM 4440	Undergraduate Applied Analysis 1	
MATH 3001	Analysis 1	
MATH 3140	Abstract Algebra 1	
APPM, STAT or MATH Courses Numbered 4000 or Above		
A two-semester course sequence of applied mathematics or mathematics courses numbered 4000 or above in addition to APPM 4350 and APPM 4360. For example:		6
APPM 4380 & APPM 4390	Modeling in Applied Mathematics and Modeling in Mathematical Biology	

APPM 4440 & APPM 4450	Undergraduate Applied Analysis 1 and Undergraduate Applied Analysis 2	
APPM 4560 & APPM 4520	Markov Processes, Queues, and Monte Carlo Simulations and	
APPM 4650 & APPM 4660	Intermediate Numerical Analysis 1 and Intermediate Numerical Analysis 2	
APPM 3570 & APPM 4520	Applied Probability and ²	
APPM 3570 & APPM 4560	Applied Probability and Markov Processes, Queues, and Monte Carlo Simulations ²	
APPM 4570 & APPM 4580	Statistical Methods and Introduction to Statistical Learning	
STAT 4000 & STAT 4010	Statistical Methods and Application I and Statistical Methods and Applications II ³	
APPM, STAT or MATH Courses Numbered 3000 or Above		
A minimum of 24 credit hours in APPM, STAT or MATH courses numbered 3000 or above (including the required courses). ⁴		24
Engineering Courses		
A minimum of 24 credit hours in engineering (see "Recommended Options For Applied Math Majors" below)		24
General Bachelor's Degree Requirements		
15 credits of humanities & social sciences electives. ⁵		15
3 credits of writing. ⁶		3
Total Credit Hours		120-124

¹ With a minimum grade of C-.

² APPM 3570 is the only 3000-level course that can be used to satisfy this requirement.

³ STAT 4000/4010 will replace APPM 4570/4580 in academic year 2018–19.

⁴ No more than 3 credit hours of APPM 4840 may count toward these 24. No more than 6 credit hours of independent study are allowed for credit toward the BS degree in applied mathematics.

⁵ Students may choose courses from the list of college-approved humanities and social sciences (HSS) electives (<http://www.colorado.edu/engineering/academics/policies/hss>).

⁶ Students may choose a course from the list of college-approved writing courses (<http://www.colorado.edu/engineering/academics/policies/hss>).

Recommended Options for Applied Math Majors

In order to fulfill their degree requirements, applied mathematics majors are required to take 24 credit hours in engineering or approved courses with significant mathematical content in A&S or business courses, with at least 6 credit hours in courses numbered 3000 or above and at least 15 credit hours in courses numbered 2000 or above. Here are several possible options. It should be stressed that the listed courses and options are *suggestions* and not *requirements*. Final course selection should be made in consultation with an applied math advisor.

These 24 credit hours are in addition to those required credit hours listed in "Computing Experience" and "Science Requirement" (mentioned above). HUEN 3100, HUEN 3200, and HUEN 4200 may not be used to fulfill this requirement, although they may be used as humanities and social sciences electives. Several possible options are listed separately.

I. Actuarial Option

BCOR 1025, is a prerequisite for BCOR 2203 and BCOR 2204. Students are advised to substitute an applied math prob/stats course for this prerequisite.

Code	Title	Credit Hours
BCOR 2203	Principles of Accounting I ((prerequisites for this course are waived for Actuarial Certificate students))	1.5
BCOR 2204	Principles of Financial Management	1.5
ECON 2010	Principles of Microeconomics ¹	4
ECON 2020	Principles of Macroeconomics ¹	4
ECON 3070	Intermediate Microeconomic Theory ^{2,4}	4
ECON 3080	Intermediate Macroeconomic Theory ^{2,4}	3
ECON 4070	Topics in Microeconomics	3
FNCE 3010	Corporate Finance ^{2,4}	3
<i>Some (or all) of the following courses should be taken:</i>		3-9
FNCE 3030	Investment and Portfolio Management	3
FNCE 4040	Derivative Securities ⁵	3
ECON 4818	Introduction to Econometrics	3
<i>Total Credit Hours:</i>		27-33

Students are required to take APPM 3570³, APPM 4520,^{2,6} and APPM 4540^{2,6} for the actuarial option. Students are strongly advised to take APPM 4560.⁶

Additional courses that may be useful include ACCT 3220, ACCT 3230 and BCOR 3000. These courses can be taken only if space is available on the first day of the semester.

¹ ECON 2010 and ECON 2020 may not count toward the 24 credit hours of the option requirement; however, they can be used to meet the 18-credit-hour social science/humanities requirement of the College of Engineering.

² The Society of Actuaries requires students to take certain college courses that will earn the Validation by Educational Experiences (VEE) credit. Courses marked with a ² satisfy this requirement, provided a grade of B- or better is obtained. These courses are also required for students completing the Actuarial Certificate Program. VEE credit is granted for both BCOR 2200 and FNCE 3010.

³ The first actuarial examination, Exam P/1, can be taken after completing this course.

⁴ The second actuarial examination, Exam FM/2, can be taken after completing these courses, as well as a self-study in interest theory.

⁵ The third actuarial examination, Exam MFE/3, can be taken after completing APPM 4560, FNCE 4040 and an independent study.

⁶ The fourth actuarial examination, Exam C/4, can be taken after completing these courses.

II. Aerospace Engineering Sciences

Students who pursue this option are usually double majors. See your applied mathematics advisor if you wish to pursue this option without being a double major.

Advising note: Students wishing to enroll in ASEN courses must register through an aerospace advisor. Students who pursue this option are typically double majors.

III. Chemical Engineering Option

Code	Title	Credit Hours
CHEN 1211 & CHEM 1221	General Chemistry for Engineers and Engineering General Chemistry Lab	5
<i>Recommended courses (to bring to a total of 25 credit hours):</i>		20
CHEN 2120	Chemical Engineering Material and Energy Balances	3
CHEN 3200	Chemical Engineering Fluid Mechanics	3
CHEN 3210	Chemical Engineering Heat Transfer	3
CHEN 3220	Chemical Engineering Separations and Mass Transfer	3
CHEN 3320	Chemical Engineering Thermodynamics	3
CHEN 4521	Physical Chemistry for Engineers	3
CHEN 4330	Chemical Engineering Reaction Kinetics	3
CHEM 3311	Organic Chemistry 1	4
<i>Total Credit Hours:</i>		25

Students choosing this option must take CHEN 1310 as part of their applied math major. CHEN 1310 is a prerequisite for CHEN 2120.

IV. Civil, Environmental and Architectural Engineering Option

Code	Title	Credit Hours
<i>Recommended basic courses:</i>		12
CVEN 2121	Analytical Mechanics 1	3
AREN 2110	Thermodynamics	3
CVEN 3161	Mechanics of Materials 1	3
CVEN 3313	Theoretical Fluid Mechanics	3
<i>Select 2 courses from any one of the following groups plus additional courses to bring the total credit hours to 24:</i>		12
<i>Group A</i>		
CVEN 3414	Fundamentals of Environmental Engineering	3
CVEN 4333	Engineering Hydrology	3
<i>Group B</i>		
CVEN 3525	Structural Analysis	3
CVEN 3708	Geotechnical Engineering 1	3
CVEN 4545	Steel Design	3
CVEN 4555	Reinforced Concrete Design	3
<i>Group C</i>		
AREN 3010	Energy Efficient Buildings	3
AREN 3540	Illumination I	3
<i>Total Credit Hours:</i>		24

Students wishing to enroll in CVEN courses that are restricted to majors only must do so through the CVEN advisor.

The Applied Mathematics and Civil Engineering departments offer a streamlined dual-degree track for talented students who are interested in analytical and computational methods related to civil engineering and general engineering science. Students can complete a double major from both programs with a minimum of 143 credits. Consult APPM-CVEN double major program faculty advisors in Applied Mathematics and Civil Engineering for additional information.

V. Computational Biology and Bioinformatics Option

The following concentration of selected courses from computer science, biology, and chemistry provide the foundation for work in mathematical biology, computational biology and/or bioinformatics.

Code	Title	Credit Hours
CSCI 2270	Computer Science 2: Data Structures ¹	4
CHEM 3311 & CHEM 3321	Organic Chemistry 1 and Laboratory in Organic Chemistry 1	5
MCDB 1150 & MCDB 1151	Introduction to Cellular and Molecular Biology and Introduction to Cell and Molecular Biology Lab	4
MCDB 2150 & MCDB 2151	Principles of Genetics and Principles of Genetics Laboratory	4
MCDB 3135 & MCDB 3140	Molecular Cell Biology I and Cell Biology Laboratory	5
CSCI 3104	Algorithms ²	4
CSCI 4314	Algorithms for Molecular Biology	3
<i>Total Credit Hours:</i>		29

¹ CSCI 1300 is a prerequisite for CSCI 2270

² CSCI 2824 or APPM 3170 are prerequisites for CSCI 3104

Advising note: Students selecting this option are advised to take APPM 3570, APPM 4520, APPM 4540 and APPM 4390 as part of their applied math course work. Other recommended courses include CSCI 3287.

VI. Computer Science Option

Code	Title	Credit Hours
CSCI 2270	Computer Science 2: Data Structures ¹	4
<i>Additional courses to bring the total number of credit hours to 24; at least two of these must be at the 3000 level. Possible choices include:</i>		
CSCI 2400	Computer Systems ²	4
CSCI 3104	Algorithms ²	4
CSCI 3155	Principles of Programming Languages	4
CSCI 3287	Design and Analysis of Data Systems	3
CSCI 3308	Software Development Methods and Tools	3
CSCI 3753	Design and Analysis of Operating Systems	4
Additional CSCI courses to bring the total number of credit hours to at least 24		
<i>Total Credit Hours:</i>		24

¹ CSCI 1300 is a prerequisite for CSCI 2270.

² APPM 3170 or CSCI 2824 are prerequisites for CSCI 2400 and CSCI 3104.

Advising note: Students completing the computer science option should have a minor in computer science (<https://catalog.colorado.edu/undergraduate/colleges-schools/engineering-applied-science/programs-study/computer-science/computer-science-minor>). Check with the Computer Science Department (<https://www.colorado.edu/cs>).

VII. Electrical & Computer Engineering Option

The Department of Electrical and Computer Engineering offers two separate minor programs.

1. Students interested in this option should consult with an advisor as several areas are available (computer engineering, electrical

engineering, signals and systems, and electrical renewable energy systems.) A minimum of 24 credits is required.

2. Student choosing this option should plan on taking CSCI 1300 and CSCI 2270.

Advising note: Students interested in the ECE option should contact the Electrical, Computer and Energy Engineering (<http://www.colorado.edu/engineering/academics/degree-programs/electrical-computer-engineering>) department, as this course work can lead to one of that department's many minors.

VIII. Engineering Physics / Physics Option

Code	Title	Credit Hours
<i>Recommended courses after first-year physics:</i>		
PHYS 2130	General Physics 3	3
or PHYS 2170	Foundations of Modern Physics	
PHYS 2150	Experimental Physics 2	1
PHYS 2210	Classical Mechanics and Mathematical Methods 1	3
PHYS 3210	Classical Mechanics and Mathematical Methods 2	3
PHYS 3220	Quantum Mechanics 1	3
PHYS 3310	Principles of Electricity and Magnetism 1	3
PHYS 3320	Principles of Electricity and Magnetism 2	3
PHYS 3330	Electronics for the Physical Sciences	2-3
or PHYS 4230	Thermodynamics and Statistical Mechanics	
Additional physics courses to total at least 24 credits.		2-3
<i>Total Credit Hours:</i>		24-25

Students choosing this option are advised to take APPM 3570. MATH 3140 may also be useful for students interested in theoretical physics.

Advising note: Students completing the physics option should have a minor in physics (<https://catalog.colorado.edu/undergraduate/colleges-schools/arts-sciences/programs-study/physics/physics-minor>). Check with the Physics Department (<https://www.colorado.edu/physics>).

IX. Finance Option

BCOR 1025 is a prerequisite for BCOR 2203 and BCOR 2204. Students are advised to substitute an applied math prob/stats course for this prerequisite.

Code	Title	Credit Hours
<i>Recommended basic courses:</i>		
BCOR 2203	Principles of Accounting I	1.5
BCOR 2204	Principles of Financial Management	1.5
FNCE 3010	Corporate Finance	3
ECON 2010 & ECON 2020 & ECON 3070 & ECON 3080	Principles of Microeconomics and Principles of Macroeconomics and Intermediate Microeconomic Theory and Intermediate Macroeconomic Theory ¹	15
ECON 4818	Introduction to Econometrics	3
<i>Select a minimum of two of the following courses in order to meet the 24-8-10 credit requirement of the option. All of them must be taken to complete the requirements of the Quantitative Finance Certificate Program:</i>		
ACCT 3220	Corporate Financial Reporting 1	3
FNCE 3030	Investment and Portfolio Management	3
FNCE 4040	Derivative Securities	3

FNCE 4820	Topics in Finance	3
FNCE 4070	Financial Markets and Institutions	3
<i>Total Credit Hours:</i>		24-26

¹ ECON 2010, ECON 2020 may not count toward the 24 credits of the option requirement; however, they can be used to meet the 18-credit social science/humanities requirement of the College of Engineering.

Students are required to take APPM 3570 and APPM 4520 as part of the major's required 24 credits at 3000 level or above for the finance option. Students are advised to take APPM 4560 and APPM 4540 if time permits.

Additional courses that may be taken as time permits:

Code	Title	Credit Hours
ACCT 3230	Corporate Financial Reporting 2	3
FNCE 4000	Financial Institutions Management	3
FNCE 4050	Capital Investment Analysis	3
FNCE 4060	Special Topics in Finance	1-6

Advising note: Students wishing to take College of Business courses cannot register until the first day of classes. However, students can register for BCOR/FNCE courses in summer sessions. Alternatively, students can apply for admittance to the Actuarial Studies and Quantitative Finance Certificate Program (<http://www.colorado.edu/asqf/html>). Students accepted into this program receive preferential treatment with respect to other non-business students when registering for business courses. For more information, please see your applied math advisor.

X. Geographic Information Science (GIS) Option

Code	Title	Credit Hours
GEOG 3023	Statistics for Geography	4
CSCI 2270	Computer Science 2: Data Structures ¹	4
GEOG 3053	Cartography: Visualization and Information Design	4
GEOG 4103	Introduction to Geographic Information Science	4
<i>Additional courses to bring the total number of credits to 24. Possible choices include:</i>		8
GEOG 4023	Introduction to Quantitative Methods in Human Geography	4
GEOG 4303	GIS Programming for Spatial Analysis	4
GEOG 4403	Space Time Analytics	3
GEOG 4503	GIS and Geospatial Project Management	3
GEOL 3050	GIS for Geologists	2
<i>Total Credit Hours:</i>		24

¹ CSCI 1300 is a prerequisite for CSCI 2270.

Advising note: Students completing the geographic information science option should qualify to receive a certificate in GIS and computational science. Check with the faculty contacts for the GIS Certificate Program (<https://www.colorado.edu/geography/undergraduate-certificate-gis-and-computational-science>).

XI. Geological Sciences Option

Code	Title	Credit Hours
<i>One of the following introductory sequences:</i>		6

GEOL 1010 & GEOL 1020	Exploring Earth and Dodos, Dinos, and Deinococcus: The History of a Habitable Planet	
GEOL 1040 & GEOL 1010	Geology of Colorado and Exploring Earth	
GEOL 1060 & GEOL 1010	Global Change: An Earth Science Perspective and Exploring Earth	
<i>Required Lab Course:</i>		1
GEOL 1030	Introduction to Geology Laboratory 1	1
<i>Additional courses to bring the total number of credits to 24; at least two of these must be at the 3000 level</i>		17
GEOL 2700	Introduction to Field Geology	
GEOL 3010	Introduction to Mineralogy	
GEOL 3023	Statistics for Geography	
GEOL 3120	Structural Geology	
GEOL 3410	Paleobiology	
GEOL 3430	Sedimentology and Stratigraphy	
GEOL 4130	Principles of Geophysics	
GEOL 4093	Remote Sensing of the Environment	
GEOL 4241	Principles of Geomorphology	
Total Credit Hours		25

Advising note: Students completing the geological sciences option should have a minor in geology (<https://catalog.colorado.edu/undergraduate/colleges-schools/arts-sciences/programs-study/geological-sciences/geology-minor>). Check with the Geological Sciences Department (<https://www.colorado.edu/geologicalsciences>).

XII. Mechanical Engineering Option

Code	Title	Credit Hours
Recommended Courses		
MCEN 2023	Statics and Structures	3
MCEN 2043	Dynamics	3
MCEN 2063	Mechanics of Solids	3
MCEN 3012	Thermodynamics	3
MCEN 3021	Fluid Mechanics	3
MCEN 3022	Heat Transfer	3
MCEN 3025	Component Design	3
MCEN 4043	System Dynamics	3
Total Credit Hours		24

Students choosing this option are advised to take STAT 4000 or APPM 3570 and APPM 4520 as part of their applied math major.

Students wishing to enroll in MCEN courses must do so through the MCEN advisor.

XIII. Statistics and Data Science

Students will take the courses in statistics for the APPM Statistics Minor (<https://catalog.colorado.edu/undergraduate/colleges-schools/arts-sciences/programs-study/applied-mathematics/statistics-minor>) plus additional course work chosen from Computer Science (<https://catalog.colorado.edu/undergraduate/colleges-schools/engineering-applied-science/programs-study/computer-science>); College of Media, Communication and Information (<https://catalog.colorado.edu/undergraduate/colleges-schools/media-communication-information>); Technology, Arts and Media (<https://catalog.colorado.edu/undergraduate/colleges-schools/engineering-applied-science/programs-study/technology-arts-media>); or another relevant area as approved by the advisor.

Students choosing this option must complete STAT 2600 as part of the statistics minor and CSCI 2270 is recommended.

Advising note: Students completing the statistics & data science option may qualify for an applied mathematics minor in statistics (p. 162). Check with your advisor for confirmation. Students may earn a BS in applied mathematics and a minor in statistics. The 12 upper-division statistics credits required for the minor may not be counted toward the 24 credits of upper-division math courses for the bachelor's degree.

XIV. Technology, Arts & Media Option

Code	Title	Credit Hours
Required Courses		
ATLS 2000	The Meaning of Information Technology ¹	3
ATLS 2100	Image	3
ATLS 2200	Web	3
ATLS 2300	Text	3
ATLS 3000	Code	3
CSCI 2270	Computer Science 2: Data Structures ²	4
CSCI 3104	Algorithms ³	4
CSCI 4229	Computer Graphics	3
Additional Courses		
Recommended additional courses to bring the total to at least 24 credit hours:		4
Advisor approved technical electives to complete the ATLAS/TAM Certificate in Digital Media		
CSCI 3202	Introduction to Artificial Intelligence	3
CSCI 4448	Object-Oriented Analysis and Design	3
Total Credit Hours		36

¹ This course may be used to satisfy EITHER 3 credit hours of H&SS requirement or the applied math area of emphasis, but not both.

² CSCI 1300 is a prerequisite for CSCI 2270.

³ APPM 3170 or CSCI 2824 or ECEN 2703 or MATH 2001 are prerequisites for CSCI 3104.

Students are advised to take APPM 3570, APPM 4560 and APPM 4660 as part of their applied math course work.

Advising note: Students interested in the certificate in technology, arts and media (p. 821) or the minor in technology, arts & media (p. 821) should contact the ATLAS Institute (<https://www.colorado.edu/atlas/academics>).

Recommended Four-Year Plan of Study

Students must complete 128 hours for graduation.

Course	Title	Credit Hours
Year One		
Fall Semester		
APPM 1350	Calculus 1 for Engineers	4

CHEN 1211	General Chemistry for Engineers	4
CHEM 1221	Engineering General Chemistry Lab	1
CSCI 1300	Computer Science 1: Starting Computing	4
Humanities or Social Sciences Elective ¹		3
		Credit Hours 16
Spring Semester		
APPM 1360	Calculus 2 for Engineers	4
PHYS 1110	General Physics 1	4
Free Electives		6
Humanities or Social Sciences Elective ¹		3
		Credit Hours 17
Year Two		
Fall Semester		
APPM 2350	Calculus 3 for Engineers	4
APPM 2450	Calculus 3 Computer Lab (Recommended, Not Required)	1
PHYS 1120	General Physics 2	4
PHYS 1140	Experimental Physics 1	1
Technical Electives (Area of Emphasis)		3
Humanities or Social Sciences Elective ¹		3
		Credit Hours 16
Spring Semester		
APPM 2360	Introduction to Differential Equations with Linear Algebra	4
APPM 2460	Differential Equations Computer Lab (Recommended but not required)	1
APPM 3310	Matrix Methods and Applications	3
Technical Electives (Area of Emphasis)		3
Free Electives		3
Humanities or Social Sciences Elective ¹		3
		Credit Hours 17

Year Three		
Fall Semester		
APPM 4350	Methods in Applied Mathematic: Fourier Series and Boundary Value Problems	3
APPM 4440	Undergraduate Applied Analysis 1	3
Technical Electives (Area of Emphasis)		6
College-approved writing course ²		3
		Credit Hours 15
Spring Semester		
APPM 3XXX		3
APPM 4360	Methods in Applied Mathematic: Complex Variables and Applications	3
Technical Electives (Area of Emphasis)		3
Free Electives		3
Humanities or Social Sciences Elective ¹		3
		Credit Hours 15
Year Four		
Fall Semester		
APPM 4650	Intermediate Numerical Analysis 1	3
APPM 4XXX		3
Technical Electives (Area of Emphasis)		6
Free Electives		4
		Credit Hours 16
Spring Semester		
APPM 4660	Intermediate Numerical Analysis 2 (or Senior Sequence Course)	3
APPM 4XXX		3
Technical Electives (Area of Emphasis)		3
Free Electives		7
		Credit Hours 16
		Total Credit Hours 128

¹ Students may choose courses from the list of college-approved humanities and social sciences (HSS) electives (<http://www.colorado.edu/engineering/academics/policies/hss>).

² Students may choose a course from the list of college-approved writing courses (<http://www.colorado.edu/engineering/academics/policies/hss>).

Chemical and Biological Engineering

The Department of Chemical and Biological Engineering (<http://www.colorado.edu/chbe>) offers degrees at the bachelor's, master's and doctoral levels. The department offers two distinct BS degree programs, one in chemical engineering and one in chemical and biological engineering. Both programs are accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>.

The standard chemical engineering undergraduate program includes curricular options in energy, materials, and premedicine. There are active and exciting research and educational programs in biotechnology, pollution control, novel membrane separations, and advanced polymeric and ceramic materials. Chemical engineering prepares students for careers in a range of industries including energy, consumer products, petrochemicals, semiconductors, medicine, environment, and materials. Modern industry depends on chemical engineers to tailor manufacturing technology to the requirements of its products, and chemical engineers play a central role in development of new polymeric materials, alternative energy sources, and safe, efficient processes for chemical synthesis.

The chemical and biological engineering undergraduate program prepares students for careers in biotechnology, pharmaceuticals, medicine, and materials. This degree program adapts a core chemical engineering curriculum to allow for greater depth in biological aspects of chemical engineering. Exploring the structure of protein molecules, the functioning of cells, and the growth and regeneration of tissues are among the new frontiers that chemical and biological engineering students will address.

In addition to the standard chemical and biological curriculum, a premedicine curriculum is also offered. The chemical and biological engineering department has active research and educational programs in the exciting field of biotechnology, which involves the use of individual cells and their components for producing pharmaceuticals and other important products. The department is also active in biomedical engineering, which involves medical devices, tissues and biomaterials.

There are opportunities to specialize via electives, independent study, and research, and the BS in chemical engineering also offers optional variations to the core curriculum that allow students to specialize in energy and materials aspects of chemical engineering.

Given the international nature of most large chemical and engineering corporations and international cooperation in scientific and engineering research, students may carry out part of their studies in another country and are encouraged to consider this opportunity. Many faculty members have significant international experience.

Course code for this program is CHEN.

Cooperative Education and Internships

The Department of Chemical and Biological Engineering offers a formal Co-Op Program, where students obtain a BS in chemical engineering or a BS in chemical and biological engineering and significant industrial experience in five years.

Senior Thesis

The department offers this program for undergraduates with a strong interest in research. The student carries out a yearlong project under the direction of a faculty member in lieu of taking CHEN 4130 (for ChE

students) or CHEN 4810 (for ChBE students). Students must apply at the end of their junior year.

Research Facilities

Chemical and biological engineering research facilities are extensive and modern. Nearly all research equipment is interfaced to computers for automated data collection, monitoring, and control. A full description of chemical engineering research facilities can be found on the department website. (<http://www.colorado.edu/chbe>)

Bachelor's Degrees

- Chemical and Biological Engineering - Bachelor of Science (BS) (p. 717)
- Chemical Engineering - Bachelor of Science (BS) (p. 719)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Anseth, Kristi (https://experts.colorado.edu/display/fisid_103471)
Distinguished Professor; PhD, University of Colorado Boulder

Bowman, Christopher (https://experts.colorado.edu/display/fisid_102043)
Distinguished Professor, Professor; PhD, Purdue University

Bryant, Stephanie J (https://experts.colorado.edu/display/fisid_111810)
Associate Professor; PhD, University of Colorado Boulder

Cha, Jennifer N (https://experts.colorado.edu/display/fisid_151746)
Associate Professor; PhD, University of California-Santa Barbara

Chatterjee, Anushree (https://experts.colorado.edu/display/fisid_151712)
Assistant Professor; PhD, University of Minnesota Central office

Clough, David Edwards (https://experts.colorado.edu/display/fisid_102332)
Professor; PhD, University of Colorado Boulder

Davis, Robert H (https://experts.colorado.edu/display/fisid_105896)
Professor; PhD, Stanford University

deGrazia, Janet (https://experts.colorado.edu/display/fisid_107661)
Senior Instructor; PhD, University of Colorado Boulder

Falconer, John L (https://experts.colorado.edu/display/fisid_101426)
Professor; PhD, Stanford University

Fox, Jerome Michael (https://experts.colorado.edu/display/fisid_156682)
Assistant Professor; PhD, University of California-Berkeley

Gill, Ryan T. (https://experts.colorado.edu/display/fisid_122697)
Professor; PhD, University of Maryland College Park Campus

Gin, Douglas L. (https://experts.colorado.edu/display/fisid_122861)
Professor; PhD, California Institute of Technology

Goodwin, Andrew Pratt (https://experts.colorado.edu/display/fisid_151595)
Assistant Professor; PhD, University of California-Berkeley

Heinz, Hendrik (https://experts.colorado.edu/display/fisid_156488)
Associate Professor; PhD, ETH Zurich (Switzerland)

Holewinski, Adam P (https://experts.colorado.edu/display/fisid_155859)
Assistant Professor; PhD, University of Michigan Ann Arbor

Hrenya, Christine M (https://experts.colorado.edu/display/fisid_113245)
Professor; PhD, Carnegie Mellon University

Kaar, Joel L. (https://experts.colorado.edu/display/fisid_148491)
Assistant Professor; PhD, University of Pittsburgh

Mahoney, Melissa J (https://experts.colorado.edu/display/fisid_129517)
Instructor, Lecturer; PhD, Cornell University

Medlin, James William (https://experts.colorado.edu/display/fisid_122699)
Professor; PhD, University of Delaware

Musgrave, Charles Bruce (https://experts.colorado.edu/display/fisid_144977)
Professor; PhD, California Institute of Technology

Nagpal, Prashant (https://experts.colorado.edu/display/fisid_151726)
Assistant Professor; PhD, University of Minnesota Central office

Noble, Richard D (https://experts.colorado.edu/display/fisid_101068)
Professor; PhD, University of California-Davis

Nuttelman, Charles Raymond (https://experts.colorado.edu/display/fisid_142758)
Instructor; PhD, University of Colorado Boulder

Randolph, Theodore W (https://experts.colorado.edu/display/fisid_101768)
Professor; PhD, University of California-Berkeley

Schwartz, Daniel K. (https://experts.colorado.edu/display/fisid_118479)
Professor; PhD, Harvard University

Shirts, Michael R (https://experts.colorado.edu/display/fisid_156474)
Associate Professor; PhD, Stanford University

Weimer, Alan W (https://experts.colorado.edu/display/fisid_109152)
Professor; PhD, University of Colorado Boulder

Young, Wendy Mores (https://experts.colorado.edu/display/fisid_146942)
Senior Instructor, Instructor; PhD, University of Colorado Boulder

Courses

CHEN 1211 (4) General Chemistry for Engineers

One-semester lecture and recitation course designed to meet the general chemistry requirement for engineering students. Topics include stoichiometry; thermodynamics; gases, liquids, and solids; equilibrium; acids and bases; bonding concepts; kinetics; reactions; and materials science. Examples and problems illustrate the application of chemistry to engineering sub-disciplines. Department enforced prerequisites: one year of high school chemistry or CHEM 1021 (min. grade C-) and high school algebra. Not recommended for students with grade below B- in CHEM 1021.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 1113 or CHEM 1114 or CHEM 1400 or MCEN 1024

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

Recommended: Corequisite CHEM 1221.

CHEN 1300 (1) Introduction to Chemical Engineering

Meets for one lecture per week. Introduces chemical engineering emphasizing history of the profession, curriculum, chemical industry, and industrial chemistry. Includes industry visits, oral presentations, faculty and professional meetings, and development of a goals statement.

Requisites: Restricted to Chemical (CHEN) Engineering or Chemical and Biological (CBEN) Engineering majors only.

CHEN 1310 (3) Introduction to Engineering Computing

Introduces the use of computers in engineering problem solving, including elementary numerical methods. Teaches programming fundamentals, including data and algorithm structure, and modular programming. Software vehicles include Excel/Vba and Matlab. Formerly GEEN 1300 and COEN 1300.

Requisites: Requires prerequisite or corequisite course of APPM 1340 or 1345 or 1350 or MATH 1300 (minimum grade C-). Restricted to College of Engineering majors or Pre-Engineering Arts and Sciences (PREN-COS) students only.

CHEN 2120 (3) Chemical Engineering Material and Energy Balances

Provides a basic understanding of chemical engineering calculations involving material and energy balances around simple chemical processes.

Requisites: Requires prerequisite courses of CHEN 1211 or CHEM 1133 and CHEN 1310 or GEEN 1300 or COEN 1300 (all minimum grade C-). Restricted to College of Engineering majors only

CHEN 2810 (3) Biology for Engineers

Develops a basic understanding of the science of biology, including an introduction to the disciplines of biochemistry, cell organization, metabolism, genetics, genomics, molecular biology, recombinant DNA technology and evolution. Provides a basic introduction to several key techniques used in biological engineering laboratories. Uses examples of complex and creative structures engineered by natural processes.

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

CHEN 2840 (1-4) Independent Study

Available to sophomores with approval of Department of Chemical Engineering. Subject arranged to fit needs of student.

Repeatable: Repeatable for up to 6.00 total credit hours.

CHEN 3010 (3) Applied Data Analysis

Teaches students to analyze and interpret data. Topics include engineering measurements, graphical presentation and numerical treatment of data, statistical inference, and regression analysis.

Requisites: Requires prerequisite course of CHEN 1310 (formerly GEEN 1300/COEN 1300) and APPM 2360 (all minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

CHEN 3200 (3) Chemical Engineering Fluid Mechanics

Introduces fluid mechanics and momentum transfer, emphasizing the application of these principles to chemical engineering systems.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 3313 and GEEN 3853 and MCEN 3021

Requisites: Requires prerequisite courses of APPM 2350 or MATH 2400 (min grade C-) and MCEN 2023 or CHEN 2120 (min grade C). Requires prerequisite or corequisite course of APPM 2360 (min grade C-). Restricted to College of Engineering majors only.

CHEN 3210 (3) Chemical Engineering Heat Transfer

Examines conservation and transfer of thermal energy. Focuses on conduction and convection of heat in the context of chemical processes, with a special focus on heat exchangers. Also studies thermal radiation.

Requisites: Requires prerequisite course of either CHEN 3200 or MCEN 3021 (minimum grade C-). Restricted to College of Engineering majors only

CHEN 3220 (3) Chemical Engineering Separations and Mass Transfer

Studies separation methods including distillation, absorption, and extraction, and graphical and computer-based solutions to separation problems. Also studies mass transfer rate processes, including diffusion, microscopic material balances, and correlations for mass transfer coefficients. Applies mass transfer rate theory to packed and tray columns.

Requisites: Requires prerequisite courses of CHEN 3210 or MCEN 3022 and CHEN 3320 (all minimum grade C-). Restricted to College of Engineering majors only.

CHEN 3320 (3) Chemical Engineering Thermodynamics

Applies thermodynamic principles to nonideal systems, phase equilibrium, chemical equilibrium, power generation, refrigeration, and chemical processes.

Requisites: Requires prerequisite courses of CHEN 2120 (minimum grade C) and CHEN 4521 or CHEM 4511 and CHEM 4531 (all minimum grade C-). Restricted to College of Engineering majors only.

CHEN 3660 (3) Energy Fundamentals

Explains the most important energy technologies and systems; provides tools to analyze performance using science and engineering principles. This course will investigate important energy concepts from sources and extraction to utilization, storage and efficiency. Topics include fossil fuels, hydropower, renewable energy, biofuels, carbon capture and waste disposal.

Requisites: Requires prerequisite courses of CHEN 1211 or CHEM 1133 or MCEN 1024 and PHYS 1110 and APPM 1360 or MATH 2300 (all minimum grade C-). Restricted to College of Engineering majors only.

Grading Basis: Letter Grade

CHEN 3840 (1-4) Independent Study

Available to juniors with approval of the Department of Chemical Engineering. Subject arranged to fit needs of the student.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

CHEN 3930 (6) Chemical Engineering Cooperative Education

Students enrolled in this course participate in a previously arranged, department-sponsored cooperative education program.

Requisites: Requires prerequisite course of CHEN 2120 (minimum grade C). At least a 2.85 cumulative GPA is required. Restricted to College of Engineering majors only.

Recommended: Prerequisite 3.00 GPA or higher.

CHEN 4010 (2) Chemical Engineering Senior Thesis 1

Provides an opportunity for advanced students to conduct exploratory research in chemical engineering.

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

CHEN 4020 (2) Chemical Engineering Senior Thesis 2

Continuation of CHEN 4010. This course and CHEN 4020 can substitute for CHEN 4130.

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

CHEN 4090 (1) Undergraduate Seminar

Provides chemical engineering career and professional information, facilitates contact with faculty and industry representatives, and improves communication and leadership skills. Consists of a series of seminars and field trips and requires a research project involving a written and oral report.

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Restricted to Chemical (CHEN) Engineering or Chemical and Biological (CBEN) Engineering majors only.

CHEN 4130 (3) Chemical Engineering Laboratory

Involves planning and execution of chemical engineering experiments on mass transfer operations, separations, and chemical reactors. Interprets experimental data with theoretical principles and statistical analysis. Emphasizes communication with written memos, full reports, and oral presentations.

Requisites: Requires prerequisite courses of CHEN 3010 and CHEN 3220 and CHEN 3320 and CHEN 4330 (all minimum grade C-). Restricted to College of Engineering majors only.

CHEN 4330 (3) Chemical Engineering Reaction Kinetics

Introduces chemical kinetics and chemical reactor design. Involves mass and energy balances for steady-state and transient reactor systems. Also covers residence time distribution, mass transfer, catalytic reactions, and multiple steady states in reactors.

Requisites: Requires prerequisite courses of CHEN 3320 and APPM 2360 (all minimum grade C-). Restricted to College of Engineering majors only.

CHEN 4440 (3) Chemical Engineering Materials

Introduces materials engineering, including properties of polymers, metals, ceramics, and semiconductors, especially as related to chemical engineering processes.

Requisites: Requires prerequisite courses of CHEN 3320 and CHEM 3311 (all minimum grade C-). Restricted to College of Engineering majors only.

CHEN 4450 (3) Polymer Chemistry

Introduces polymer science with a focus on polymer chemistry and polymerization reactions. Focuses on polymerization reaction engineering and how polymer properties depend on structure.

Equivalent - Duplicate Degree Credit Not Granted: CHEN 5450

Requisites: Requires prerequisite courses of CHEN 4830 or CHEN 4330 and CHEM 3311 (all minimum grade C-). Restricted to College of Engineering majors only.

CHEN 4460 (3) Polymer Engineering

Introductory polymer engineering course reviewing basic terminology and definitions; the properties and synthetic routes of important industrial polymers; and processing of polymers and their applications.

Equivalent - Duplicate Degree Credit Not Granted: CHEN 5460

Requisites: Requires prerequisite courses of CHEM 3311 and CHEN 3320 (all minimum grade C-). Restricted to College of Engineering majors only.

CHEN 4520 (3) Chemical Process Synthesis

Studies applied chemical process design including equipment specification and economic evaluation.

Requisites: Requires prerequisite courses of CHEN 3010 and CHEN 3210 or MCEN 3022 and CHEN 3220 and CHEN 4330 or CHEN 4830 (all minimum grade C-). Restricted to College of Engineering majors only.

CHEN 4521 (3) Physical Chemistry for Engineers

Examines the laws of classical thermodynamics followed by physical transformations of pure substances, the thermodynamics of simple mixtures and chemical equilibrium. Applies quantum theory to atomic and molecular structure. Presents the concepts and applications of statistical thermodynamics. Introduces rates of chemical reactions, reaction dynamics and catalysis.

Requisites: Requires prerequisite courses of APPM 2350 or MATH 2400 and CHEN 1211 or CHEM 1133 (all minimum grade C-). Requires a prerequisite or corequisite course of APPM 2360 (minimum grade C-). Restricted to College of Engineering majors only.

CHEN 4530 (2) Chemical Engineering Design Project

Provides a team-based capstone design experience for chemical engineering students. Projects are sponsored by industry and student design teams collaborate with industrial consultants. Projects consider chemical process and product design with emphasis on economic analysis. Deliverables include an oral mid-project design review, a final oral presentation and final written design report.

Requisites: Requires prerequisite course of CHEN 4520 (minimum grade C-). Restricted to College of Engineering majors only.

CHEN 4570 (4) Instrumentation and Process Control

Examines principles of control theory and their application to chemical processes. Focuses on single-loop feedback and feedforward control. Laboratory sessions cover measurement fundamentals, signal transmission, dynamic testing, control system synthesis, and implementation and adjustment.

Requisites: Requires prerequisite courses of CHEN 3220 and CHEN 4330 or CHEN 4830 and APPM 2360 (all minimum grade C-). Restricted to College of Engineering majors only.

CHEN 4630 (1) Intellectual Property Law and Engineering

Learn the fundamentals of the various types of intellectual property, obtain the ability to search the USPTO database for patents, learn the difference between provisional patents, utility patents and foreign patents and learn the timing requirements related to the filing of patents and public disclosure, use, and/or sale of an invention.

Equivalent - Duplicate Degree Credit Not Granted: CHEN 5630

Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Engineering majors only.

CHEN 4650 (3) Particle Technology

Aims to identify the important physical mechanisms occurring in processes involving particles, formulate and solve mathematical descriptions of such processes, and analyze experimental and theoretical results in both a qualitative and quantitative manner. Teaches students to apply this knowledge to the design of particulate systems. Conveys the breadth and depth of natural and industrial applications involving particulates.

Equivalent - Duplicate Degree Credit Not Granted: CHEN 5650

Requisites: Requires prerequisite courses of APPM 2360 and CHEN 3200 or MCEN 3021 (all minimum grade C-). Restricted to College of Engineering majors only.

CHEN 4801 (3) Pharmaceutical Biotechnology

Focuses on the engineering needed to bring therapeutic products derived from living organisms (e.g., proteins, peptides, DNA, RNA) from the production plant to the patient. Covers the challenges of keeping these products "active" as they are stored, shipped, and administered to patients.

Requisites: Requires prerequisite courses of CHEN 3320 and prerequisite or corequisite courses of CHEN 4830 or CHEN 4330 (all minimum grade C-). Restricted to College of Engineering majors only.

CHEN 4802 (3) Tissue Engineering and Medical Devices

The purpose of this course is to develop a basic understanding of quantitative and qualitative aspects of tissue engineering and medical devices. Particular emphasis will be placed on topics of potential importance and significance to chemical and biological engineers. Students will be introduced to important professional, societal and entrepreneurial issues in the field by examining case studies in which drugs and medical products have been developed or are being considered for FDA approval and clinical use.

Requisites: Requires prerequisite course of CHEN 2810 or MCDB 1150 or EBIO 1210 and EBIO 1220 (minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

CHEN 4803 (3) Metabolic Engineering

Introduces basic concepts in metabolic engineering and explores modern approaches in metabolic and strain engineering. Application areas that will be discussed will include the use of metabolic engineering approaches in biofuels and biorefining as well as biopharmaceutical production.

Equivalent - Duplicate Degree Credit Not Granted: CHEN 5803

Requisites: Requires prerequisite course of CHEM 4700 (formerly CHEM 4711) or CHEM 4611 (minimum grade C-). Restricted to College of Engineering majors only.

CHEN 4805 (3) Biomaterials

Provides an overview of biomaterials. Covers major classes of materials used in medical applications, properties, degradation mechanisms, and characterization methods, foreign body response, methods to control physiological response to biomaterial surfaces, biocompatibility, biomaterials used in soft and hard tissue replacements, drug delivery devices and tissue engineering, and design criteria for developing a material for a given biological application.

Requisites: Requires a prerequisite course of CHEN 2810 or MCDB 1150 or EBIO 1220 and EBIO 1230 and CHEN 3320 and CHEM 3311 (all minimum grade C-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Engineering majors only.

Recommended: Prerequisite CHEM 3331.

CHEN 4810 (3) Biological Engineering Laboratory

Involves planning and execution of chemical engineering experiments on mass transfer operations, bioseparations, and biological reactors. Interprets experimental data with theoretical principles and statistical analysis. Emphasizes communication with written memos, full reports and oral presentations.

Requisites: Requires prerequisite courses of CHEN 2810 or MCDB 1150 or EBIO 1210 and EBIO 1220 and CHEN 3010 and CHEN 4830 (all minimum grade C-). Requires a corequisite course of CHEN 4820. Restricted to College of Engineering majors only.

CHEN 4820 (3) Biochemical Separations

Lect. and lab. Presents purification methods, mass transfer coefficients, problems specific to biologicals, and scale-up of processes. Also covers chromatography, phase extraction, supercritical fluids, sedimentation, precipitation, electrophoresis, dialysis, affinity techniques, cell separation, application of separations to bioreactors, and comparison of batch and continuous processes.

Requisites: Requires prerequisite course of CHEN 3220 (minimum grade C-). Restricted to College of Engineering majors only.

CHEN 4830 (3) Chemical Engineering Biokinetics

Introduces chemical kinetics, chemical reactor design, and biological kinetics. Involves mass and energy balances for steady-state and transient reactor systems. Also covers residence time distribution, mass transfer, catalytic reactions, multiple steady states in reactors, enzyme kinetics, metabolic networks, and cell growth kinetics.

Requisites: Requires prerequisite course of CHEN 3320 (minimum grade C-). Restricted to College of Engineering majors only.

CHEN 4836 (3) Nanomaterials

Presents fundamental chemical and physical concepts that give rise to the unique optical, electronic and magnetic properties of nanoscale materials. Introduces important synthetic routes for producing nanomaterials, and interparticle forces governing colloidal behavior and self-assembly. Discusses current and potential applications in catalysis, biomedicine, renewable energy, and other fields.

Equivalent - Duplicate Degree Credit Not Granted: CHEN 5836

Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Engineering majors only.

CHEN 4838 (1-3) Special Topics in Chemical Engineering

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Engineering majors only.

CHEN 4840 (1-4) Independent Study

Available to seniors with approval of chemical engineering department. Subject arranged to fit needs of student.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Engineering majors only.

Chemical and Biological Engineering - Bachelor of Science (BS)

Program Educational Objectives

The department prepares our graduates to make significant contributions in many diverse areas. Specifically, within a few years of graduation our graduates will have achieved one or more of the following attributes:

- In their chosen field, be established in a professional career, be pursuing an advanced degree, or be seeking advanced certification.
- Be recognized as academic, industrial, or entrepreneurial leaders.
- Be successfully working and communicating in a variety of technical fields.
- Be adapting to new technologies and changing professional environments.

Student Outcomes

At the time of graduation, graduates will demonstrate:

- an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
- an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors

- an ability to communicate effectively with a range of audiences
- an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
- an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
- an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
- an ability to acquire and apply new knowledge as needed, using appropriate learning strategies

Premed Track

This track is offered for students preparing for medical school. Since chemical engineering already requires most of the premed courses, it is a logical choice for students who desire an engineering degree and the opportunity to pursue a medical profession. For information on the premed track, visit the department's Current Students (<http://www.colorado.edu/chbe/academics/undergraduate-program/current-students>) webpage and consult the current advising guide.

Concurrent Degree Program

BS/MS in Chemical and Biological Engineering and Chemical Engineering

The concurrent BS/MS program in the Department of Chemical and Biological Engineering enables especially well qualified students to work concurrently towards a BS in chemical and biological engineering and a MS degree in chemical engineering. Students are admitted into the program during the spring of their junior year and begin planning a graduate program. This program allows for early planning of the MS portion of the student's education, taking graduate courses as part of their BS degree requirements. Up to 6 credits may be counted towards both the BS and MS degree programs.

Recommended Four-Year Plan of Study

Course	Title	Credit Hours
Year One		
Fall Semester		
APPM 1350	Calculus 1 for Engineers	4
CHEN 1211	General Chemistry for Engineers	4
CHEN 1221	Engineering General Chemistry Lab	1
CHEN 1310	Introduction to Engineering Computing	3
CHEN 1300	Introduction to Chemical Engineering 1	1

Humanities or social science elective ²		3

Technical Elective ³		3
Focus Tech Elective ⁵		3
Humanities or social science elective ²		3
	Credit Hours	15
	Total Credit Hours	128

¹ Course is offered only in the semester indicated.

² Students may choose courses from the list of college-approved humanities and social sciences (HSS) electives on the college's Humanities, Social Sciences and Writing Requirements (<http://www.colorado.edu/engineering-advising/get-your-degree/degree-requirements/humanities-social-sciences-and-writing-requirements>) webpage.

³ Electives must meet specific requirements. Visit the department's Current Students (<http://www.colorado.edu/chbe/academics/undergraduate-program/current-students>) webpage and consult the current advising guide.

⁴ Alternate is CHEM 4700 and either CHEM 4720 or CHEM 4740.

⁵ One of the following courses must be taken as the focus technical elective: Pharmaceutical Biotechnology (CHEN 4801, 3), Tissue Engineering and Medical Devices (CHEN 4802, 3) or Metabolic Engineering (CHEN 4803, 3). These courses will be taught in alternating years and should be taken in the junior or senior year as available.

⁶ Students may choose a course from the list of college-approved writing courses on the college's Humanities, Social Sciences and Writing Requirements (<http://www.colorado.edu/engineering-advising/get-your-degree/degree-requirements/humanities-social-sciences-and-writing-requirements>) webpage.

Chemical Engineering - Bachelor of Science (BS)

Chemical engineers are responsible for producing products based on chemical processing and chemical transformations. They carry out basic research# they design, build, operate and manage chemical processes and plants# and they supply petroleum products, renewable resources, plastics, detergents, agricultural chemicals, pharmaceuticals, biological compounds, photographic materials, microelectronic devices and various food and other products. Today's processes must be energy efficient, nonpolluting and profitable. Thus, students must master inorganic, organic and physical chemistry, mathematics, statistics, computers, physics and often biology and biochemistry. Students must learn to apply these fundamentals in the process industries. Paralleling the technical courses are studies in the humanities and the social sciences.

Program Educational Objectives

The department prepares our graduates to make significant contributions in many diverse areas. Specifically, within a few years of graduation our graduates will have achieved one or more of the following attributes:

- In their chosen field, be established in a professional career, be pursuing an advanced degree or be seeking advanced certification.
- Be recognized as academic, industrial or entrepreneurial leaders.
- Be successfully working and communicating in a variety of technical fields.
- Be adapting to new technologies and changing professional environments

Student Outcomes

At the time of graduation, our students will demonstrate:

- an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
- an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
- an ability to communicate effectively with a range of audiences

- an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
- an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
- an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
- an ability to acquire and apply new knowledge as needed, using appropriate learning strategies

Program Tracks

Curricular options have been established in fields of major importance and particular interest. To follow one of these options requires careful planning and course selection by student and advisor.

Energy Track

Chemical engineers continue to be involved with all aspects of energy, including traditional energy (petroleum) as well as solar and renewable sources of energy. This option supplements the standard curriculum with coursework that will provide a vital foundation for students wishing to enter the energy fields.

Materials Track

The need to develop new materials for a rapidly broadening spectrum of applications is one of the major technological challenges confronting applied science. Chemical engineers have the required background in chemistry and transport theory to contribute significantly in this area. This option focuses on polymeric and ceramic materials by complementing the chemical engineering curriculum with elective courses stressing the interrelationship between materials fabrication, structure, properties and performance.

Premed Track

This track is offered for students preparing for medical school. Since chemical and engineering already requires most of the premed courses, it is a logical choice for students who desire an engineering degree and the opportunity to pursue a medical profession.

Concurrent Degree Program BS/MS in Chemical Engineering

The concurrent BS/MS program in the Department of Chemical and Biological Engineering enables especially well qualified students to work concurrently towards a BS in chemical engineering and a MS degree in chemical engineering. Students are admitted into the program during the spring of their junior year and begin planning a graduate program. This program allows for early planning of the MS portion of the student's education, taking graduate courses as part of their BS degree requirements. Up to six credit hours may be counted towards both the BS and MS degree programs.

Recommended Four-Year Plan of Study

While there are several tracks, only the Standard Curriculum is shown here. For details on the other tracks, visit the department's Current Students (<http://www.colorado.edu/chbe/academics/undergraduate->

program/current-students) webpage and consult the current advising guide.

Civil, Environmental & Architectural Engineering

Civil Engineering

Civil engineering offers a wide range of careers for students interested in the planning, design, and construction management of facilities essential to modern life in both the public and private sectors. Varying widely in nature, size and scope, such facilities include buildings, bridges, tunnels, highways, transit systems, dams, airports, irrigation projects, water treatment and distribution facilities, waste treatment and processing facilities, structures for space exploration, and offshore engineering designs applications.

In the coming decades, almost two billion more people will populate earth in both developed and developing countries. This growth will create unprecedented demands and opportunities for new methods and innovations in energy production, food supply, land development, water treatment, transportation systems, materials processing, waste disposal, healthcare delivery, environmental preservation and structural designs. Civil engineers play both direct and indirect roles in meeting many of these needs, with the goal of providing and improving the quality and infrastructure of life.

Environmental Engineering

Environmental engineering plays a vital role in maintaining the quality of both public health and the natural environment. Environmental engineering encompasses the scientific assessment and development of sustainable engineering solutions to environmental problems impacting the biosphere and land, water, and air quality. Environmental issues affect almost all commercial and industrial sectors, and are a central concern for the public, for all levels of government and in international relations.

In common with other engineering fields, courses in solid mechanics, fluid dynamics, and thermal sciences are central to the environmental engineering degree. Course work specific to environmental engineering includes environmental chemistry and microbiology, as well as treatment processes and approach.

Architectural Engineering

Architectural engineering prepares students for leadership careers in the building design, consulting, construction, and management industry and for research at the graduate level on building- and sustainability-related topics. In particular, the architectural engineering program prepares students to design, build and operate facilities that improve our quality of life. This course of study fulfills the academic requirements for registration as a professional engineer.

The architectural engineering curriculum is recommended for those wishing to specialize within the building industry in engineering design (heating, cooling, illumination, electrical, solar, and structures) or construction and contracting (facilities management). Architectural engineering students may select from several concentration areas, including: structural systems; mechanical systems (heating, ventilating and air conditioning); lighting and electrical systems; and construction engineering and management.

Course codes for these programs are AREN, CVEN and EVEN.

Bachelor's Degrees

- Architectural Engineering - Bachelor of Science (BS) (p. 732)
- Civil Engineering - Bachelor of Science (BS) (p. 735)
- Environmental Engineering - Bachelor of Science (BS) (p. 737)

Minors

- Architectural Engineering - Minor (p. 740)
- Civil Engineering - Minor (p. 741)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Courses

Architectural Engineering

AREN 1027 (3) Engineering Drawing

Introduces engineering drawing including sections and dimensioning, print readings, computer 3D, and building information modeling (BIM).

Requisites: Restricted to Engineering Physics (EPEN), Architectural (AREN), General Engineering (GEEN) or Civil (CVEN) Engineering majors only.

Additional Information: Departmental Category: Miscellaneous

AREN 1037 (3) Building Information Modeling

Learn to develop and communicate physical information using three-dimensional graphical systems including Computer-Aided Design (CAD) and Building Information Models (BIM). Learn to dimension and scale physical systems and interpret scaled drawings. Get experience with industry standard software tools (REVIT) used to produce design and construction documents, and apply BIM and CAD tools in a project producing scaled 3-D drawings.

Additional Information: Departmental Category: Miscellaneous

AREN 1316 (1) Introduction to Architectural Engineering

Surveys the broad subject of architectural engineering and professional practices. Includes professional design services, design documents, methods of construction delivery, materials for construction, codes and standards, life safety, professional ethics, structural systems, mechanical systems, electrical systems, and building systems integration.

Requisites: Restricted to students with 0-56 (Freshmen or Sophomore) College of Engineering majors only.

Additional Information: Departmental Category: Miscellaneous

AREN 2050 (3) Building Materials and Systems

Covers the broad subject of building materials and systems. Includes a practical approach to assembly details, methods of construction, codes, foundations, steel, concrete, masonry, cladding, doors and windows, interiors, finishes, mechanical, plumbing, electrical, life safety and conveyance. Includes investigation of an existing facility along with a team presentation trends in commercial building construction.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) Civil (CVEN) or Architectural (AREN) or GEEN (General) or Applied Mathematics (AMEN) majors only.

Additional Information: Departmental Category: Building Systems Engineering

AREN 2110 (3) Thermodynamics

Explores fundamental principles of thermodynamics, including first and second law of thermodynamics, thermophysical properties, power and refrigeration cycles, gas mixtures and psychrometrics.

Requisites: Requires a prereq course of PHYS 1110 (min grade C-) and a prereq or coreq course of APPM 1360 or MATH 2300 (min grade C-). Restricted to AREN, CVEN or EVEN, GEEN, AMEN or EVENCVEN Concurrent Degree majors only.

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences
Departmental Category: Building Systems Engineering

AREN 2120 (3) Fluid Mechanics and Heat Transfer

Explores fundamental principles of fluid mechanics and heat transfer. Topics include fluid statics, momentum and energy conservations; laminar and turbulent viscous flows; conduction, convection and radiation heat transfer. Emphasizes topics and problems that are important to Architectural Engineers including flow of fluids in pipes and ducts, heat transfer in buildings and building systems.

Requisites: Requires prerequisite courses of APPM 2350 or MATH 2400, and AREN 2110 or GEEN 3852 or MCEN 3012 or ASEN 2002 (all minimum grade C-). Requires corequisite course of APPM 2360. Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Building Systems Engineering

AREN 2830 (1-3) Special Topics

Supervised study of special topics of interest to students under instructor guidance.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

Additional Information: Departmental Category: Special Topics

AREN 3010 (3) Energy Efficient Buildings

Lecture course on the analysis and design of buildings and their systems to satisfy the requirements for a comfortable and healthy indoor environment. Examines psychometrics, thermal comfort, building heating and cooling loads, fluid flow basics, and HVAC components and systems.

Requisites: Requires prerequisite courses of AREN 2120 or MCEN 3021 and 3022 and AREN 2050 (all minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Building Systems Engineering

AREN 3050 (3) Environmental Systems for Buildings 1

Explores operations and architectural design strategies of environmental (climate) control systems in buildings with a focus on sustainability and resource efficiency. Topics include thermal comfort and indoor air quality, building thermal and moisture loads, HVAC equipment and systems and active and passive thermal strategies in buildings.

Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Program in Environmental Design major or minor students only. College of Engineering majors are excluded from this course.

Additional Information: Departmental Category: Building Systems Engineering

AREN 3060 (3) Environmental Systems for Buildings 2

Explores operations and architectural design strategies of plumbing, power distribution, renewable electricity generation, illumination, daylighting, acoustical control, vertical transportation, fire protection and telecommunication systems in buildings with a focus on sustainability and resource efficiency.

Requisites: College of Engineering majors are excluded from this course.

Additional Information: Departmental Category: Building Systems Engineering

AREN 3140 (3) Illumination Laboratory

Introduces the measurement of photometric and psychophysical quantities used in lighting. Experience is acquired in using light measurement instruments to evaluate lighting equipment and luminous environments. Taught intermittently.

Requisites: Requires prerequisite course of AREN 3540 (minimum grade C-).

Additional Information: Departmental Category: Building Systems Engineering

AREN 3540 (3) Illumination I

Studies the fundamentals of architectural illumination. Introduces and applies basic principles and vocabulary to elementary problems in the lighting of environments for the performance of visual work and the proper interaction with architecture.

Requisites: Requires prerequisite course of CHEN 1310 or CSCI 1300 or CSCI 1320 or ECEN 1310 and APPM 2350 or MATH 2400 (all minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Building Systems Engineering

AREN 4010 (3) HVAC System Modeling and Control

Engineering course devoted to building automation and control systems. Topics include HVAC control technology and strategies, measurement and device technologies, analysis and modeling of dynamic systems, simulation of conventional and advanced control approaches, assessment of control loop performance and hands-on direct digital control (DDC) programming exercises as used in current building control practice.

Equivalent - Duplicate Degree Credit Not Granted: AREN 5010

Requisites: Requires prerequisite course of AREN 4110 (minimum grade C-).

Additional Information: Departmental Category: Building Systems Engineering

AREN 4035 (3) Architectural Structures 1

Analyzes basic structural systems. Covers principles of mechanics and mechanical properties of materials and analysis and design of trusses, arches, and cable structures. For nonengineering students; does not apply toward an engineering degree.

Requisites: Requires prerequisite course of PHYS 1110 or PHYS 2010 and APPM 1350 or MATH 1300 (all minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Program in Environmental Design majors only.

Additional Information: Departmental Category: Structures

AREN 4045 (3) Architectural Structures 2

Analyzes basic structural systems. Covers principles of mechanics as applied to the design of flexural members, columns, continuous beams, and rigid frames. For nonengineering students; does not apply toward an engineering degree.

Requisites: Requires prerequisite course of AREN 4035 (minimum grade C-).

Additional Information: Departmental Category: Structures

AREN 4110 (3) HVAC System Design

Applies engineering principles to the design of heating, ventilating and air conditioning (HVAC) systems for buildings. Covers HVAC systems description, load estimation, psychometrics, coils and heat exchangers, air and water distribution systems and primary equipment and systems.

Equivalent - Duplicate Degree Credit Not Granted: AREN 5110

Requisites: Requires prerequisite course of AREN 3010 (minimum grade C-).

Additional Information: Departmental Category: Building Systems Engineering

AREN 4130 (3) Optical Design for Illumination and Solid State Lighting

Covers the optical design process for illumination-based optics, emphasis on applications in architectural lighting. In-depth coverage of luminaire photometry, lamps, materials, manufacturing methods, product performance requirements. Projects utilize optical design software and include a variety of lamp types including LEDs using both reflector/lens optics.

Equivalent - Duplicate Degree Credit Not Granted: AREN 5130

Requisites: Requires prerequisite course of AREN 3540 (minimum grade C-). Restricted to Architectural (AREN) or Civil (CVEN) Engineering majors only.

Additional Information: Departmental Category: Building Systems Engineering

AREN 4315 (3) Design of Masonry Structures

Covers modern masonry construction; properties and behavior of the reinforced masonry component materials, clay and concrete masonry units, mortar, grout, and steel reinforcement; vertical and lateral load types and intensities; and design of reinforced masonry walls, beams and columns by the strength design method.

Requisites: Requires prerequisite course of CVEN 3525 (minimum grade C-).

Additional Information: Departmental Category: Structures

AREN 4317 (5) Architectural Engineering Design

Provides a capstone experience to AREN students. Students design a modest commercial building and complete an integrated engineering design of the building systems executed for the conceptual, schematic, and design development phases. Students' teams work on structural, mechanical, electrical/lighting, and construction engineering management design. Each stage produce a professional-quality design document. Faculty and industry mentors participate in the teaching and evaluation of designs.

Requisites: Requires prerequisite courses of ARCH 4010 and AREN 3010 and AREN 3540 and CVEN 3246 and CVEN 3525 and ECEN 3030 (all minimum grade C-).

Additional Information: Departmental Category: Miscellaneous

AREN 4506 (3) Pre-construction Estimating and Scheduling

Covers project management estimating and scheduling methods with an emphasis on the techniques used to create pre-construction estimates and schedules for architectural and civil engineering projects.

Requisites: Requires prerequisite course of CVEN 3246 (minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Architectural (AREN), Civil (CVEN) or General (GEEN) Engineering majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Construction

AREN 4530 (3) Advanced Lighting Design

Intended to help students understand light as a medium in design, begin the formulation of a philosophical perspective for its application, and continue to develop the skills required to design and implement lighting systems. Knowledge from previous lighting classes (Illumination I and Illumination II) is essential to this course.

Requisites: Requires prerequisite courses of AREN 3540 and AREN 4550 (all minimum grade C-).

Additional Information: Departmental Category: Building Systems Engineering

AREN 4540 (3) Exterior Lighting Systems

Engages students in exploring and solving lighting problems for exterior environments. Provides an understanding of the design criteria and lighting equipment used in three primary exterior applications: parking lots and roadways, floodlighting of buildings, and sports facilities. Taught intermittently.

Equivalent - Duplicate Degree Credit Not Granted: AREN 5540

Requisites: Requires prerequisite course of AREN 3540 (minimum grade C-).

Recommended: Prerequisite AREN 4550.

Additional Information: Departmental Category: Building Systems Engineering

AREN 4550 (3) Illumination 2

Applies the principles studied in Illumination 1. Provides further study in architectural lighting design methods. Uses lighting studio work to develop a broad knowledge of lighting equipment, design methods, and their application in a series of practical design problems in modern buildings.

Requisites: Requires prerequisite course of AREN 3540 (minimum grade C-).

Additional Information: Departmental Category: Building Systems Engineering

AREN 4560 (3) Luminous Radiative Transfer

Teaches fundamentals of radiative exchange as applied to illumination engineering. Describes and uses principal numerical techniques for radiative transfer analysis. Applies techniques to lighting design and analysis.

Requisites: Requires prerequisite course of AREN 3540 (minimum grade C-).

Additional Information: Departmental Category: Building Systems Engineering

AREN 4570 (3) Building Electrical Systems Design 1

Introduces the generation and distribution of electrical power. Focuses on understanding the loads, control, and protection of secondary electrical distribution systems in building. Applies the national electric code to residential and commercial buildings.

Requisites: Requires prerequisite course of ECEN 3030 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Building Systems Engineering

AREN 4580 (3) Daylighting

Applies the fundamental principles of illumination engineering to architectural daylighting design, exploring the quantitative methods and tools used to develop daylighting designs and evaluate their performance. Topics include solar and sky modeling, luminous radiative transfer, design methods, and controls for integration with electric lighting systems.

Requisites: Requires prerequisite course of AREN 3540 (minimum grade C-).

Additional Information: Departmental Category: Building Systems Engineering

AREN 4590 (3) Computer Graphics in Lighting Engineering

Studies the numerical methods and computer implementation of computer graphics visualization for architectural lighting engineering and design. Implements finite element radiative transfer and ray-tracing in computer programs. Studies the use of computer graphics visualization in lighting analysis. Taught intermittently.

Requisites: Requires prerequisite courses of AREN 3540 and AREN 4560 (minimum grade C-).

Additional Information: Departmental Category: Building Systems Engineering

AREN 4606 (3) Construction Project Execution and Control

Integrates project execution and control techniques for construction scope, cost and schedule. Includes progress measurement, resource planning, earned value methods, productivity, risk management methods and key contract clauses.

Requisites: Requires prerequisite courses of CVEN 3246 and AREN 4506 (all minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Civil (CVEN), Architectural (AREN) or General (GEEN) Engineering majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Construction

AREN 4830 (1-3) Special Topics for Seniors/Grads

Supervised study of special topics of interest to students under instructor guidance. Department consent required.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

Additional Information: Departmental Category: Special Topics

AREN 4849 (1-3) Independent Study

Offers an independent, in-depth study, research or design in a selected area of architectural engineering. Offerings are coordinated with individual faculty. Students should consult the Department of Civil, Environmental, and Architectural Engineering.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Special Topics

AREN 4890 (3) Sustainable Building Design

Introduces green building design procedure/approach and provides insight into evolving design principles; explores aspects of building thermal/energy performance, indoor/outdoor environmental quality, occupant comfort and climate relevant to building design (structures not covered); emphasizes both comprehensive understanding and practical applications of sustainable building design strategies; applies prevailing simulation tools to assist green building design.

Equivalent - Duplicate Degree Credit Not Granted: AREN 5890

Requisites: Requires a prerequisite course of AREN 3010 (minimum grade C-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Engineering students only.

Additional Information: Departmental Category: Building Systems Engineering

AREN 4990 (3) Compu Fluid Dynamics (CFD) Analysis for Built/Natural Envmnts

Explores the fundamentals of simulating/analyzing civil and architectural environments with Computational Fluid Dynamics (CFD) method.

Run with two parallel sessions: fundamentals and applications, with fundamental lectures presenting the principles of CFD technologies, and application sessions demonstrating the application of CFD for resolving building and environmental engineering problems (different than MCEN/ASEN) with hands-on exercises.

Equivalent - Duplicate Degree Credit Not Granted: AREN 5990

Requisites: Requires prerequisite course of AREN 2120 and APPM 2360 (all minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) College of Engineering majors only.

Additional Information: Departmental Category: Building Systems Engineering

Civil Engineering**CVEN 1317 (1) Introduction to Civil and Environmental Engineering**

Surveys the broad subject of civil and environmental engineering and professional practice. Includes the subdisciplines of structures, water resources, geotechnics, transportation, environment, and construction. Discusses professional ethics, important skills for engineers, and the engineering design process as it fulfills multiple objectives.

Requisites: Restricted to students with 0-56 (Freshmen or Sophomore) College of Engineering majors only.

Additional Information: Departmental Category: Miscellaneous

CVEN 1837 (1-3) Special Topics

Supervised study of special topics of interest to student under instructor guidance.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Miscellaneous

CVEN 2012 (3) Introduction to Geomatics

Presents basic techniques of land and construction surveying, including measurement of position, elevation, orientation and length of lines, area, volume and layout calculations. Optical, GPS and GIS equipment and methods are included.

Requisites: Restricted to Architectural (AREN) or Civil (CVEN) or General (GEEN) Engineering majors only.

Additional Information: Departmental Category: Surveying and Transportation

CVEN 2121 (3) Analytical Mechanics 1

Applies mechanics to the study of static equilibrium of rigid and elastic bodies. Includes composition/resolution of forces; moments/couples; equivalent force systems; free-body diagrams; equilibrium of particles and rigid bodies; forces in trusses/beams; frictional forces; first/second moments of area; moments and products of inertia.

Equivalent - Duplicate Degree Credit Not Granted: GEEN 2851 and MCEN 2023

Requisites: Requires a prereq course of PHYS 1110 (min grade C-). Requires a prereq or coreq course of APPM 2350 or MATH 2400 (min grade C-). Restricted CVEN or EVEN or AREN or AMEN or EPEN or GEEN majors with a CIV, ENR or ARC subplan.

Additional Information: Departmental Category: Mechanics

CVEN 2837 (1-3) Special Topics

Supervised study of special topics of interest to student under instructor guidance.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Miscellaneous

CVEN 3022 (3) Construction Surveying

Studies construction and highway surveying, horizontal and vertical curves, earthwork, and analysis of data.

Requisites: Requires prerequisite course of CVEN 2012 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Surveying and Transportation

CVEN 3032 (3) Photogrammetry

Familiarizes students with characteristics of aerial photographs. Measures and interprets aerial photos for planimetric, topographic, hydrological, soil, and land use surveys. Analyzes and presents field measurements over extensive reaches.

Additional Information: Departmental Category: Surveying and Transportation

CVEN 3111 (3) Analytical Mechanics 2

Studies the motion (kinematics) of particles and rigid bodies, and the forces that cause the motion (kinetics). Newton's laws as well as energy methods are used to study the motion of particles and rigid bodies in two and three dimensions.

Requisites: Requires prerequisite courses of CVEN 2121 or GEEN 2851 or ASEN 2001 or MCEN 2023 (all minimum grade C-). Restricted to AREN, CVEN, EVEN, or GEEN majors only.

Additional Information: Departmental Category: Mechanics

CVEN 3141 (2) Engineering Materials Lab

Additional Information: Departmental Category: Mechanics

CVEN 3161 (3) Mechanics of Materials 1

Addresses concepts of stress and strain; material properties, axial loading, torsion, simple bending, and transverse shear; analysis of stress and strain; and deflections of beams. Includes selected experimental and computational laboratories.

Equivalent - Duplicate Degree Credit Not Granted: MCEN 2063

Requisites: Requires prereq CVEN 2121 or GEEN 2851 or ASEN 2001 or MCEN 2023 (all min grade C-). Requires coreq APPM 2360. Restricted to Architectural (AREN) or Civil (CVEN) or Environmental (EVEN) or General (GEEN) Engineering majors with a CIV, ENR or ARC subplan

Grading Basis: Letter Grade

Additional Information: Departmental Category: Mechanics

CVEN 3227 (3) Probability, Statistics and Decision

Introduces uncertainty based analysis concepts and applications in the planning and design of civil engineering systems emphasizing probabilistic, statistics, and design concepts and methods.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

Additional Information: Departmental Category: Miscellaneous

CVEN 3246 (3) Introduction to Construction

Provides a broad view of concerns, activities, and objectives of people involved in construction: the owner, architect/engineer, contractor, labor and inspector. Interactive gaming situation relates these people to the construction contract, plans/specifications, estimates/bids, scheduling, law and financial management. Students with a Business School Real Estate emphasis may be considered for this course.

Requisites: Restricted to students with 36+ units, Civil (CVEN) or Architectural (AREN), Environmental (EVEN) or General (GEEN) Engineering majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Construction

CVEN 3256 (3) Construction Equipment and Methods

Integrated study of construction equipment, methods, and economics. Topics include equipment productivity, equipment selection, and construction engineering design within economic constraints. Examples include earthmoving, concrete formwork, and temporary construction.

Requisites: Requires prerequisite course of CVEN 3246 (minimum grade C-). Restricted to Architectural (AREN) or Civil (CVEN) or General (GEEN) Engineering majors only.

Additional Information: Departmental Category: Construction

CVEN 3313 (3) Theoretical Fluid Mechanics

Basic principles of fluid mechanic. Covers fluid properties, hydrostatics, fluid flow concepts, including continuity, energy, momentum, dimensional analysis and similitude and flow in closed conduits.

Equivalent - Duplicate Degree Credit Not Granted: CHEN 3200 and GEEN 3853 and MCEN 3021

Requisites: Requires prerequisite course of CVEN 2121 or GEEN 2851 or ASEN 2001 or MCEN 2023 (all minimum grade C-). Restricted to Civil (CVEN) or Environmental (EVEN) majors, or General (GEEN) Engineering majors with a CIV or ENR subplan.

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 3323 (3) Hydraulic Engineering

Studies hydraulic engineering theory and applications. Topics include incompressible flow in conduits, pipe system analysis and design, open channel flow, flow measurement, analysis and design of hydraulic machinery.

Requisites: Requires prerequisite course of CVEN 3313 or MCEN 3021 or GEEN 3853 or AREN 2120 or CHEN 3200 (all minimum grade C-). Restricted to Civil (CVEN), Environmental (EVEN), Architectural (AREN) or General (GEEN) Engineering majors only.

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 3414 (3) Fundamentals of Environmental Engineering

Emphasizes chemical, ecological and hydrological fundamentals and importance of mass and energy balances in solving environmental engineering problems related to water quality, water and wastewater treatment, air pollution, solid and hazardous waste management, sustainability and risk assessment.

Requisites: Requires prereq courses of CHEN 1211 and CHEM 1221 or CHEM 1113 and CHEM 1114 or MCEN 1024 and APPM 1360 or MATH 2300 (all min grade C-). Restricted to CVEN, AREN, EVEN, MCEN, CHEN, GEEN or AMEN majors only.

Additional Information: Departmental Category: Environmental

CVEN 3424 (3) Water and Wastewater Treatment

Introduces design and operation of facilities for treatment of municipal water supplies and wastewater. Provides an engineering application of physical, chemical, and biological unit processes and operations for removal of impurities and pollutants. Involves an integrated design of whole treatment systems combining process elements.

Requisites: Requires prerequisite course of CVEN 3414 (minimum grade C-).

Additional Information: Departmental Category: Environmental

CVEN 3434 (3) Introduction to Applied Ecology

Emphasizes the integration of physical, chemical and biological processes in controlling terrestrial and aquatic ecosystems. Ecosystem concepts are applied to current environmental and water quality problems. Includes field trips and a group project.

Equivalent - Duplicate Degree Credit Not Granted: ENVS 3434

Requisites: Prereq courses of CHEN 1211 and CHEM 1221 or CHEM 1113 and CHEM 1114 or CHEM 1400 or CHEM 1351; (all min C-). Restricted to students with 57-180 credits (Junior or Senior) Civil (CVEN), Environmental (EVEN) or Architectural Eng (AREN) or (GEEN) mjrs.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Departmental Category: Environmental

CVEN 3525 (3) Structural Analysis

Studies structural analysis of statically determinate and indeterminate systems, deflections, energy methods, and force and stiffness methods.

Requisites: Requires prerequisite course of CVEN 3161 or MCEN 2063 (minimum grade C-). Restricted to Civil (CVEN), Environmental (EVEN), Architectural (AREN), General (GEEN) or Applied Mathematics (AMEN) majors only.

Additional Information: Departmental Category: Structures

CVEN 3602 (3) Transportation Systems

Introduces the principles of transportation systems with a focus on highway engineering and traffic analysis. Provides the basic skill set that will allow students to solve transportation problems related with highway design and traffic control and analysis. Provides an introduction to technology, operating characteristics, and relative merits of highway, airway, waterway, railroad, pipeline, and convey or transportation systems.

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

Additional Information: Departmental Category: Surveying and Transportation

CVEN 3698 (3) Engineering Geology

Highlights the role of geology in engineering minerals; rocks; surficial deposits; rocks and soils as engineering materials; distribution of rocks at and below the surface; hydrologic influences; geologic exploration of engineering sites; geologic hazards; mapping; and geology of underground excavations, slopes, reservoirs and dam sites.

Requisites: Requires a prerequisite or corequisite course of CVEN 2121 or GEEN 2851 or ASEN 2001 or MCEN 2023 and APPM 2350 or MATH 2400 (all minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Geotechnical

CVEN 3708 (3) Geotechnical Engineering 1

Covers basic engineering characteristics of geological materials; soil and rock classifications; site investigation; physical, mechanical, and hydraulic properties of geologic materials; the effective stress principle; soil and rock improvement; seepage analysis; stress distribution; and consolidation and settlement analyses. Selected experimental and computational laboratories.

Requisites: Requires prerequisite course of CVEN 3161 or MCEN 2063 (minimum grade C-). Restricted to Civil (CVEN), Environmental (EVEN), Architectural (AREN), General (GEEN) or Applied Mathematics (AMEN) majors only.

Additional Information: Departmental Category: Geotechnical

CVEN 3718 (3) Geotechnical Engineering 2

Covers stress analysis and plastic equilibrium, shear strength of soil, bearing capacity, lateral earth pressures, slope stability and underground construction. Analysis and design of shallow and deep foundations, retaining walls and other earth and rock structures. Selected experimental and computational laboratories.

Requisites: Requires prerequisite course of CVEN 3708 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Geotechnical

CVEN 3837 (1-3) Special Topics

Supervised study of special topics of interest to student under instructor guidance.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Miscellaneous

CVEN 4147 (3) Civil Engineering Systems

Theory and application of the principles of engineering economics and classical and metaheuristic optimization techniques for evaluating problems in civil and environmental engineering.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 5147

Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Engineering majors only.

Additional Information: Departmental Category: Miscellaneous

CVEN 4161 (3) Mechanics of Materials 2

Covers advanced topics in the mechanics of solids. Some topics such as asymmetric bending of beams, torsion of non-circular cross-sections, are extensions of topics seen in CVEN 3161. Others like 3-D stress and strain analysis, failure theories and stability of columns and frames are new.

Includes selected laboratory experiments.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 5161

Requisites: Requires prerequisite course of CVEN 3161 (minimum grade C-).

Additional Information: Departmental Category: Mechanics

CVEN 4323 (3) Water Resource Engineering Design

Studies principles and techniques of water resources engineering design. Introduces environmental modeling under uncertainty, stormwater design, precipitation estimation and flow routing. Surveys hydropower, reservoir management and water resources economics.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 5423

Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 4333 (3) Engineering Hydrology

Studies engineering applications of principles of hydrology, including hydrologic cycle, rainfall and runoff, groundwater, storm frequency and duration studies, stream hydrography, flood frequency, and flood routing.

Requisites: Requires prerequisite course of CVEN 3313 or AREN 2120 or CHEN 3200 or GEEN 3853 or MCEN 3021 (all minimum grade C-). Requires prerequisite or corequisite course of CVEN 3227 or APPM 4570 or MCEN 3047 or MCEN 3208 or CHEN 3010.

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 4353 (3) Groundwater Engineering

Studies the occurrence, movement, extraction for use, and quantity and quality aspects of groundwater. Introduces and uses basic concepts to solve engineering and geohydrologic problems.

Requisites: Requires prerequisite course of CVEN 3313 or MCEN 3021 or CHEN 3200 or GEEN 3853 (minimum grade C-).

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 4383 (3) Groundwater Modeling

Studies analytical and numerical methods for solving problems of groundwater flow and chemical transport. Emphasizes fundamental modeling techniques and the relationship between the physical system and the model results. Applies models and modeling techniques to solve problems in ground water hydrology using contemporary software.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 5383

Recommended: Prerequisite CVEN 4353.

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 4404 (3) Water Chemistry

Introduces chemical fundamentals of inorganic aqueous compounds and contaminants in lecture and laboratory. Lecture topics include thermodynamics and kinetics of acids and base reactions, carbonate chemistry, air-water exchange, precipitation, dissolution, complexation, oxidation-reduction and sorption.

Equivalent - Duplicate Degree Credit Not Granted: EVEN 4404

Requisites: Requires prerequisite courses of CHEN 1211 or CHEM 1113 and CHEM 1133 and CVEN 3414 (all minimum grade C-). Restricted to Civil (CVEN) or Environmental (EVEN) or General (GEEN) Engineering majors only.

Additional Information: Departmental Category: Environmental

CVEN 4414 (1) Water Chemistry Laboratory

Reinforces chemical fundamentals of inorganic aqueous compounds and contaminants from CVEN 4404 in laboratory experiments and reports.

Topics include acids and bases, carbonate chemistry (alkalinity) and other water chemistry characteristics (hardness, dissolved oxygen); precipitation, complexation and oxidation-reduction reactions; and laboratory techniques and reporting.

Equivalent - Duplicate Degree Credit Not Granted: EVEN 4414

Requisites: Requires prerequisite courses of CHEN 1211 or CHEM 1113 and CHEM 1133 and CVEN 3414 (all minimum grade C-). Requires corequisite course of CVEN 4404. Restricted to Civil (CVEN) or Environmental (EVEN) Engineering majors only.

Additional Information: Departmental Category: Environmental

CVEN 4424 (3) Environmental Organic Chemistry

Examines the fundamental physical and chemical transformations affecting the fate and transport of organic contaminants in natural and treated waters. Emphasizes quantitative approach to solubility, vapor pressure, air-water exchange, sorption, hydrolysis and redox reactions, and photodegradation.

Equivalent - Duplicate Degree Credit Not Granted: EVEN 4424

Requisites: Requires prerequisite course of CHEN 1211 or CHEM 1113 or CHEM 2100 (minimum grade C-).

Additional Information: Departmental Category: Environmental

CVEN 4434 (4) Environmental Engineering Design

Examines the design of facilities for the treatment of municipal water and wastewater, hazardous industrial waste, contaminated environmental sites and sustainable sanitation in developing countries. Economic, societal and site specific criteria impacting designs are emphasized.

Equivalent - Duplicate Degree Credit Not Granted: EVEN 4434

Requisites: Requires prerequisite course of CVEN 3414 (minimum grade C-).

Additional Information: Departmental Category: Environmental

CVEN 4464 (3) Environmental Engineering Processes

Develops and utilizes analytic solutions for environmental process models that can be used in a) reactor design for processes used in the treatment of water, wastewater and hazardous waste and b) process analysis of natural systems, such as streams and groundwater flow. Models facilitate the tracking of contaminants in engineered and natural systems.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 5464 and EVEN 4464

Requisites: Requires prerequisite or corequisite courses of CVEN 3414 and CVEN 3313 or CHEN 3200 or GEEN 3853 or MCEN 3021 or AREN 2120 (all minimum grade C-).

Additional Information: Departmental Category: Environmental

CVEN 4474 (3) Hazardous and Industrial Waste Management

Evaluates processes used for treatment of wastes requiring special handling and disposal: toxic organic chemicals, heavy metals, acidic, caustic and radioactive waste material. Discusses techniques for destruction, immobilization and resource recovery and assessment of environmental impact of treatment process end products.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 5474

Requisites: Requires prerequisite course of CVEN 3414 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Environmental

CVEN 4484 (3) Introduction to Environmental Microbiology

Surveys microbiology topics germane to modern civil and environmental engineering. Provides fundamentals needed to understand microbial processes and ecology in engineered and natural systems and reviews applications emphasizing the interface between molecular biology and classical civil engineering.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 5484 and EVEN 4484

Requisites: Requires prerequisite courses of CHEN 1211 and CHEM 1221 or CHEM 1113 and CHEM 1114 and APPM 2350 or MATH 2400 (all minimum grade C-).

Additional Information: Departmental Category: Environmental

CVEN 4511 (3) Introduction to Finite Element Analysis

Covers systematic formulation of finite element approximation and isoparametric interpolation (weighted residual and energy methods, triangular and quadrilateral elements). Includes computation applications to the solution of one- and two-dimensional stress-deformation problems and steady and transient heat conduction.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 5511

Requisites: Requires prerequisite courses of CVEN 3161, CVEN 3525, APPM 2360 or MATH 3130 and MATH 4430 (all minimum grade C-).

Additional Information: Departmental Category: Mechanics

CVEN 4525 (3) Matrix Structural Analysis

Covers matrix formulation of principles of structural analysis and development of direct stiffness and flexibility methods for analysis of 2D and 3D structures. Variational formulation of the finite element method. Geometric nonlinearity. Familiarity with Matlab programming is expected.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 5525

Requisites: Requires prerequisite course of CVEN 3525 (minimum grade C-).

Additional Information: Departmental Category: Structures

CVEN 4535 (1-3) Construction Materials

Introduces material science of engineering materials, such as atomic and crystal structures, defects and phase diagrams; discusses in detail three construction materials: steel, Portland cement concrete and asphalt concrete including classification and composition, engineering properties and testing methods (with three lab sessions). Covers basic of three materials: wood, fiber reinforced polymers and masonry.

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Requires a prerequisite course of CVEN 3161 or MCEN 2063 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Structures

CVEN 4537 (3) Numerical Methods in Civil Engineering

Introduces the use of numerical methods in the solution of civil engineering problems, emphasizing obtaining solutions with high-speed electronic computers. Applies methods to all types of civil engineering problems.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 5537

Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior).

Additional Information: Departmental Category: Miscellaneous

CVEN 4545 (3) Steel Design

Applies basic principles of structural engineering and mechanics to design of steel structures; design of tension members, columns, beams, open-web joists, steel decks, bolts, bolted connections, welding processes, and welded connections.

Requisites: Requires prerequisite course of CVEN 3525 (minimum grade C-).

Additional Information: Departmental Category: Structures

CVEN 4554 (3) Fundamentals of Air Quality Management

Introduces engineering methods for the study of air quality. Topics include: indoor air quality, greenhouse gases, dispersion modeling, source apportionment modeling, chemistry of combustion, pollution sources and controls, human exposure to air pollutants. A focus on Engineering for Developing Communities runs throughout. Elective for the EVEN air quality track or an environmental concentration course for CVEN.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 5554

Requisites: Requires prerequisite courses of APPM 2360 or MATH 2130 and MATH 3430 and CVEN 3313 or CHEN 3200 or MCEN 3021 (all minimum grade C-).

Additional Information: Departmental Category: Environmental

CVEN 4555 (3) Reinforced Concrete Design

Applies basic principles of structural engineering and mechanics to the design of reinforced concrete structures, including design of beams, columns, slabs, and footings; continuous beams and frames; cast-in-place buildings.

Requisites: Requires prerequisite course of CVEN 3525 (minimum grade C-).

Additional Information: Departmental Category: Structures

CVEN 4565 (3) Design of Wood Structures

Applies basic principles of structural engineering and mechanics to the design of wood structures, including the design and analysis of columns, trusses, beams and connections using dimensional lumber, glulam and cross-laminated timber.

Requisites: Requires prerequisite course of CVEN 3525 (minimum grade C-).

Additional Information: Departmental Category: Structures

CVEN 4594 (3) Water Reuse and Reclamation

Explores development of a safe, reliable and acceptable program for reusing impaired waters. As fresh water becomes scarcer around the world, communities are looking for security through development of new water resources. Reuse of impaired water is one solution to the growing water crisis. Focus is on advanced treatment technologies with emphasis on public perception, economics and regulations.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 5594

Requisites: Requires prerequisite course of CVEN 3414 (minimum grade C-). Restricted to College of Engineering students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite CVEN 3424.

Additional Information: Departmental Category: Environmental

CVEN 4718 (3) Mechanics and Dynamics of Glaciers

Develops a quantitative physical basis for understanding the functions of snow, ice and glaciers in the environment, with emphasis on developing an understanding of continuum mechanics and thermodynamics and their application to Earth systems.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 5718

Requisites: Requires prerequisite courses of APPM 2350 or MATH 2400 and APPM 2360 and AREN 2110 or GEEN 3852 or MCEN 3012 or ASEN 2002 and CHEN 1310 or CSCI 1300 or CSCI 1310 or CSCI 1320 or ECEN 1310 (all minimum grade C-).

Additional Information: Departmental Category: Geotechnical

CVEN 4728 (3) Foundation Engineering

Focuses on geotechnical design of shallow and deep foundations, including spread footings, mats, driven piles and drilled piers. Coverage includes bearing capacity, settlement, group effects and lateral load capacity of the various foundation types. Additional topics include subsurface exploration, construction of deep foundations and analysis of pile behavior using wave equation and dynamic monitoring methods.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 5728

Requisites: Requires prerequisite course of CVEN 3718 (minimum grade C-).

Additional Information: Departmental Category: Geotechnical

CVEN 4833 (1-3) Special Topics

Repeatable: Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 4834 (1-3) Special Topics

Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

Additional Information: Departmental Category: Environmental

CVEN 4835 (1-3) Special Topics

Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Structures

CVEN 4837 (1-3) Special Topics

Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Miscellaneous

CVEN 4838 (1-3) Special Topics

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Geotechnical

CVEN 4839 (3-6) Special Topics for Seniors

Offers a supervised study of special topics, under instructor guidance. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Special Topics

CVEN 4849 (1-3) Independent Study

Involves an independent, in-depth study, research, or design in a selected area of civil or environmental engineering. Offerings are coordinated with individual faculty. Students should consult the Department of Civil, Environmental, and Architectural Engineering.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Special Topics

CVEN 4897 (2) Professional Issues in Civil Engineering

Educates students about the knowledge and skills required for professional civil engineers. Students learn about the path to a professional license, prepare for the FE exam, analyze a situation involving multiple conflicting ethical interests, identify aspects of sustainability in civil engineering projects, and understand the role of project management, public policy, business and public administration, and leadership in civil engineering.

Requisites: Restricted to students with 87-180 credits (Seniors) Civil (CVEN), Environmental (EVEN), or Architectural Engineering (AREN) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Miscellaneous

CVEN 4899 (4) Civil Engineering Senior Project Design

Provides a simulated real world design and construction planning experience where teams integrate across multiple civil engineering sub-disciplines to create a solution that satisfies multiple constraints, including design, client requirements, budget, schedule, technical, regulatory, and societal. Final deliverables include: detailed design drawings, specifications, cost estimate, project schedule, construction plan, oral and written presentation.

Repeatable: Repeatable for up to 4.00 total credit hours.

Requisites: Restricted to students with 87-180 credits (Senior) Civil (CVEN) or General (GEEN) engineering majors only.

Additional Information: Departmental Category: Special Topics

CVEN 4969 (3) Water and Sanitation in Developing Countries

Studies the design and fundamentals behind effective treatment processes and engineering solutions targeted for developing countries. Approaches to clean water and sanitation in lesser industrialized countries often demand alternative solutions to those developed for industrialized societies. Explores issues and solutions developed to tackle these problems.

Equivalent - Duplicate Degree Credit Not Granted: EVEN 4969

Requisites: Requires prerequisite courses of CVEN 3414 and CVEN 3424 (all minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Environmental

Environmental Engineering**EVEN 1000 (1) Introduction to Environmental Engineering**

Introduces first-year students to the environmental engineering program from an academic and a career perspective. Covers air quality, applied ecology, chemical processing, energy, engineering for developing communities, environmental remediation, and water resources and treatment. Includes reading and writing on the history of environmental engineering, major environmental issues, and professional ethics.

Requisites: Restricted to students with 0-60 units completed. Restricted to Environmental Engineering (EVEN) majors only.

EVEN 1001 (3) Environmental Engineering 101: An Introduction to Pollution Science

Surveys the science and engineering needed to understand the environmental and energy challenges which face urbanizing society: air and water pollution, climate change, and mining. Introduces how environmental engineers leverage basic science concepts to reduce pollution and optimize energy use. Analyzes how the mainstream media presents the environmental science of climate change and modern environmental disasters.

EVEN 2840 (1-3) Independent Study: General Topics

General topics relating to environmental engineering. One-on-one assistance with an instructor.

EVEN 3550 (3) Sustainability Principles for Engineers

An introduction to sustainability principles in the field of environmental engineering. Students will apply these principles to engineering problems in order to evaluate the environmental, economic and social implications of engineering and design decisions. Topics include definitions of sustainability, main engineering sustainability challenges (e.g., water, climate and materials), pollution generation and prevention and sustainability assessment tools.

Requisites: Requires a corequisite course of CVEN 3414. Restricted to Environmental Engineering (EVEN) majors only.

Grading Basis: Letter Grade

EVEN 4100 (3) Environmental Sampling and Analysis

Introduces students to techniques for characterization of surface water, subsurface water, soils and sediments, and air and planning of sampling and analysis efforts. Laboratories include stream sampling, drilling, monitoring well installation, water level, slug tests, air sampling.

Requisites: Requires prerequisite courses of CVEN 4404 and CVEN 4424 (all minimum grade C-). Restricted to Environmental Engineering (EVEN) majors only.

EVEN 4404 (3) Water Chemistry

Introduces chemical fundamentals of inorganic aqueous compounds and contaminants in lecture and laboratory. Lecture topics include thermodynamics and kinetics of acids and base reactions, carbonate chemistry, air-water exchange, precipitation, dissolution, complexation, oxidation-reduction and sorption.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4404

Requisites: Restricted to Civil (CVEN) or Environmental (EVEN) or General (GEEN) Engineering majors only

Grading Basis: Letter Grade

EVEN 4414 (1) Water Chemistry Laboratory

Reinforces chemical fundamentals of inorganic aqueous compounds and contaminants from EVEN 4404 in laboratory experiments and reports.

Topics include acids and bases, carbonate chemistry (alkalinity) and other water chemistry characteristics (hardness, dissolved oxygen); precipitation, complexation and oxidation-reduction reactions; and laboratory techniques and reporting.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4414

Requisites: Requires prerequisite courses of CHEN 1211 or CHEM 1113 and CHEM 1133 (all minimum grade C-). Requires corequisite course of EVEN 4404. Restricted to Civil (CVEN) or Environmental (EVEN) Engineering majors only.

Grading Basis: Letter Grade

EVEN 4424 (3) Environmental Organic Chemistry

Examines the fundamental physical and chemical transformations affecting the fate and transport of organic contaminants in natural and treated waters. Emphasizes quantitative approach to solubility, vapor pressure, air-water exchange, sorption, hydrolysis and redox reactions, and photodegradation.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4424

Requisites: Requires prerequisite course of CHEN 1211 or CHEM 1113 or CHEM 1271 (minimum grade C-).

Grading Basis: Letter Grade

EVEN 4434 (4) Environmental Engineering Design

Examines the design of facilities for the treatment of municipal water and wastewater, hazardous industrial waste, contaminated environmental sites and sustainable sanitation in developing countries. Economic, societal and site specific criteria impacting designs are emphasized.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4434

Requisites: Requires prerequisite course of CVEN 3414 (minimum grade C-).

Grading Basis: Letter Grade

EVEN 4464 (3) Environmental Engineering Processes

Develops and utilizes analytic solutions for environmental process models that can be used in a) reactor design for processes used in the treatment of water, wastewater and hazardous waste and b) process analysis of natural systems, such as streams and groundwater flow. Models facilitate the tracking of contaminants in engineered and natural systems.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4464 and CVEN 5464

Requisites: Requires prerequisite courses of CVEN 3313 or CHEN 3200 or GEEN 3853 or MCEN 3021 or AREN 2120 and CVEN 3414 (all minimum grade C-).

Grading Basis: Letter Grade

EVEN 4484 (3) Introduction to Environmental Microbiology

Surveys microbiology topics germane to modern civil and environmental engineering. Provides fundamentals needed to understand microbial processes and ecology in engineered and natural systems and reviews applications emphasizing the interface between molecular biology and classical civil engineering.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4484

Requisites: Requires prerequisite course of CHEN 1211 and CHEM 1221 or CHEM 1113 and CHEM 1114 and APPM 2350 or MATH 2400 (minimum grade C-).

Grading Basis: Letter Grade

EVEN 4830 (3) Special Topics

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

EVEN 4840 (1-3) Independent Study: General Topics

General topics relating to environmental engineering. One-on-one assistance with an instructor.

Repeatable: Repeatable for up to 6.00 total credit hours.

EVEN 4969 (3) Water and Sanitation in Developing Countries

Studies the design and fundamentals behind effective treatment processes and engineering solutions targeted for developing countries. Approaches to clean water and sanitation in lesser industrialized countries often demand alternative solutions to those developed for industrialized societies. Explores issues and solutions developed to tackle these problems.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4969

Requisites: Requires prerequisites courses of CVEN 3414 and CVEN 3424 (all minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade

EVEN 4980 (3) Senior Thesis 1

Provides faculty-supervised independent research in environmental engineering for students planning to complete a senior thesis. To be taken prior to EVEN 4990, during the final year before graduation. Department consent required.

Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Environmental Engineering (EVEN) majors only.

EVEN 4990 (3) Senior Thesis 2

Continuation of EVEN 4980. Consists of final phase of faculty-supervised research, the preparation of a written thesis, and an oral defense of the research to

Requisites: Requires prerequisite course of EVEN 4980 (minimum grade C-).

Architectural Engineering - Bachelor of Science (BS)

Architectural engineering has several common elements with civil, mechanical and electrical engineering, but is specifically directed toward the building industry. It focuses on building systems, which include design of systems such as heating, ventilating and air conditioning (HVAC) systems; illumination and electrical systems; structural building systems; and construction methods applied to buildings. The Bachelor of Science degree program is administered by the Department of Civil, Environmental and Architectural Engineering. Students also take courses in architectural history and architectural design from the Program in Environmental Design.

Program Educational Objectives

The educational objectives of the architectural engineering bachelor of science degree program are to produce graduates capable of reaching the following career goals within five years:

- Our alumni will build on the educational foundation gained through our program by establishing themselves in engineering, science or other professional careers.
- Our alumni will begin advancing the state-of-the-art of their profession including one of four core disciplines of the building industry: electrical and lighting systems; heating, ventilating and air conditioning (HVAC) systems; structural systems; construction engineering and management.
- Our alumni will exercise leadership in their positions.

Student Outcomes

The outcomes that students are expected to have attained upon graduation with the Bachelor of Science degree in architectural engineering are:

- an ability to identify, formulate and solve complex engineering problems by applying principles of engineering, science and mathematics
- an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety and welfare, as well as global, cultural, social, environmental and economic factors
- an ability to communicate effectively with a range of audiences
- an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental and societal contexts
- an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks and meet objectives
- an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
- an ability to acquire and apply new knowledge as needed, using appropriate learning strategies

Areas of Knowledge

The areas of knowledge that define these objectives include both technical and non-technical areas.

Technical areas are:

- elementary—the fundamentals for architectural engineering, including basic science and mathematics, building design and construction processes; overview of building systems; elementary principles and processes of architecture; and laboratory measurement and data analysis;
- intermediate—introduction to building systems and their components, with corresponding analysis of electrical, HVAC and lighting systems as well as structural elements and components;
- proficiency—design, integration and advanced analysis of electrical, HVAC, lighting and structural systems; as well as the standards, codes and recommended practices that govern these building systems; and

- specialization—advanced design, coupled with industry experience via internships, for building lighting and electrical system design, building HVAC systems design, building structural system design, and construction engineering and management.

Non-technical areas include:

- professional life, including methods of time and resource management, and professional ethics;
- processes and requirements of written and oral communication; and
- broad areas in the humanities and social sciences, including architectural history and language.

Concurrent Degree Program BS/MS in Architectural Engineering

A concurrent BS/MS degree program in architectural engineering (<http://www.colorado.edu/ceae/current-students/undergraduate-studies/bsms-program>) is available. Students may apply to the program when they have 75–110 credit hours toward the undergraduate BS degree (including completed and in-progress courses). Once accepted into the program, students are allowed to count 6 credit hours taken at the graduate level for both the BS and MS degrees (if certain grade and GPA requirements are met); this allows a student to obtain both degrees in five to six years.

Requirements

Required Courses

Failure to complete the requirements listed below will postpone graduation. Any exceptions will require authorization from the CEAE Operations Committee and the dean's office.

Students anticipating graduation within a year should meet with the architectural engineering undergraduate advisor at least one semester prior to their planned graduation to review their records. It is the student's responsibility to be certain that all degree requirements have been met, to apply for graduation online, and to keep the architectural engineering undergraduate advisor informed of any change in graduation plans.

Civil Engineering - Bachelor of Science (BS)

The curriculum in civil engineering within the Department of Civil, Environmental and Architectural Engineering has been designed to prepare students for entry-level positions in professional practice or for graduate study in the following subdisciplines of civil engineering:

- construction engineering and management;
- environmental engineering;
- geotechnical engineering and geomechanics;
- structural engineering and structural mechanics; and

- water resource engineering and management.

For undergraduates who want additional preparation for graduate study and careers in research and development within civil engineering, a theoretically-based Engineering Science track is also available.

Program Educational Objectives

The program objectives for the bachelor of science degree in civil engineering are that within five years:

1. Graduates will be successfully employed in engineering, science, or technology careers
2. Graduates will be assuming management or leadership roles
3. Graduates will engage in continual learning by pursuing advanced degrees or additional educational opportunities through coursework, professional conferences and training, and/or participation in professional societies
4. Graduates will pursue professional registration or other appropriate certifications
5. Graduates will be engaged in activities that provide benefit to communities

Student Outcomes

The outcomes that students are expected to have attained upon graduation with a bachelor of science degree in civil engineering are:

- an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
- an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
- an ability to communicate effectively with a range of audiences
- an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
- an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
- an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
- an ability to acquire and apply new knowledge as needed, using appropriate learning strategies

Before their graduation, students in civil and environmental engineering will take a capstone design course in addition to training in structural and foundation design, civil engineering systems, construction, engineering geology, engineering materials, geotechnical engineering, soil mechanics, water quality, environmental engineering, fluid mechanics, computer-aided and manual engineering drawing, mechanics and dynamics, computer modeling, professional practice and ethics seminars, structural analysis and design, surveying, and transportation systems via required and elective courses.

Concurrent Degree Program BS/MS in Civil Engineering

A concurrent BS/MS degree program in civil engineering (<http://www.colorado.edu/ceae/current-students/undergraduate-studies/bsms-program>) is available. Students may apply to the program when they have 75–110 credit hours toward the undergraduate BS degree (including completed and in-progress courses). Once accepted into the program, students are allowed to count 6 credit hours taken at the graduate level for both the BS and MS degrees (if certain grade and GPA requirements are met); this allows a student to obtain both degrees in five to six years.

Dual Degree Program BS in Applied Mathematics and Civil Engineering

As an exceptional opportunity for talented students who are interested in analytical and computational methods related to civil engineering and general engineering science, the civil engineering and applied mathematics departments offer a streamlined track by which a student can earn a baccalaureate degree from both programs with a minimum of 15 extra credit hours. Consult the faculty program advisors in civil engineering and applied mathematics for information and admission.

Requirements

Program Requirements

The following information represents a nominal 8-semester sequence of study. Failure to complete the requirements listed below will postpone graduation. Any exceptions will require authorization from the CEAE Operations Committee and the Dean's Office.

Students anticipating graduation within a year should meet with the civil engineering undergraduate advisor at least one semester prior to their planned graduation to review their records. It is the student's responsibility to be certain that all degree requirements have been met, to apply for graduation online, and to keep the civil engineering undergraduate advisor informed of any change in graduation plans.

Environmental Engineering - Bachelor of Science (BS)

Environmental engineers play a vital role in maintaining the quality of both public health and the natural environment. Environmental engineering encompasses the scientific assessment and development of engineering solutions to environmental problems impacting the biosphere, land, water, and air quality. Environmental issues affect almost all municipal, commercial, and industrial sectors, and are a central concern for the public, for all levels of government, and in international relations. These issues include safe drinking water, wastewater processing, solid and hazardous waste disposal, outdoor and indoor air pollution, human health and ecological risk management, prevention of

pollution through alternative product or process design, and renewable and sustainable energy sources.

To address these challenges, environmental engineers often encounter challenging problems that must be solved in data-poor situations as members of multidisciplinary teams. Environmental problems require creative solutions blended with contributions from scientists, lawyers, business people, and the public. Good communication skills, as well as technical proficiency, are essential for success in this arena. In addition, technology designed to address environmental problems is marketed globally, opening up increasing opportunities for international work in the environmental engineering field.

Mission

The mission of the Environmental Engineering Program (<http://www.colorado.edu/even>) is to provide a multidisciplinary undergraduate environmental engineering education that emphasizes mastery of principles and practices, inspires service for the global public good, endows a desire for lifelong learning, and prepares students for broad and dynamic career paths in environmental engineering.

Faculty

The faculty of the Environmental Engineering (EVEN) Program (<http://www.colorado.edu/even/people>) are drawn from the Departments of Civil, Environmental, and Architectural Engineering; Mechanical Engineering; Chemical and Biological Engineering; and Aerospace Engineering Sciences. The EVEN faculty, its Professional Advisory Board (representing prospective employers of its graduates), and EVEN alumni and current students have contributed to the creation of the program's mission and the educational objectives of the BS in environmental engineering degree.

Program Educational Objectives

The educational objective of the Environmental Engineering Bachelor of Science Degree is to produce graduates who are capable of reaching the following career goals three to five years after graduation:

1. Graduates will be employed in engineering, science, or other professional careers
2. Graduates will pursue professional registration or other appropriate certifications
3. Graduates will be engaged in continual learning by pursuing advanced degrees or additional educational opportunities through coursework, professional conferences and training, and/or participation in professional societies.
4. Graduates will be engaged in activities that provide benefits to communities, the environment, and/or public health

Student Outcomes

The outcomes that students are expected to have attained upon graduation with a bachelor of science degree in environmental engineering are:

- an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
- an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
- an ability to communicate effectively with a range of audiences

- an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
- an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
- an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
- an ability to acquire and apply new knowledge as needed, using appropriate learning strategies

Concurrent Degree Program BS/MS in Environmental and Civil Engineering

A concurrent BS/MS degree program in environmental engineering (<http://www.colorado.edu/even/current-students/5-year-bsms>) is available. Students may apply to the program when they have completed 75–110 credit hours toward the undergraduate EVEN degree. Once accepted into the program, students may be allowed to count 6 credit hours taken at the graduate level for both the environmental engineering BS and the civil engineering MS degrees, thus allowing them to obtain both degrees in a five-year curriculum.

Requirements

The BS degree in environmental engineering at the University of Colorado Boulder provides preparation for professional proficiency or graduate training in environmental engineering in a four-year curriculum. The curriculum includes courses in engineering fundamentals and applications, advanced mathematics, chemistry, physics, microbiology and earth science, along with courses in the arts, humanities and social sciences.

Courses specific to environmental engineering practice include water chemistry, environmental microbiology, and air pollution control. In addition, environmental engineering requires hands-on laboratory experiences, up-to-date skills in the use of computers for modeling and data analysis, and experience in the design of environmental engineering systems. Many of the required engineering courses in the bachelor of science curriculum are culled from civil, environmental, and architectural engineering; chemical and biological engineering; and mechanical engineering.

The curriculum also includes three technical electives, three environmental engineering sequence courses, and two free electives. Technical elective courses include a broad range of science and engineering courses, and must include an earth sciences course.

The environmental engineering sequence courses are selected by the student beginning in the junior year. The sequence consists of one environmental engineering design course and two environmental engineering technical elective (https://www.colorado.edu/even/sites/default/files/attached-files/list_b_environmental_engineering_technical_electives_2017-2018.pdf) courses.

Students in the program are also encouraged to participate in research through independent study or senior thesis projects, the Undergraduate Research Opportunities Program (UROP), or as undergraduate research assistants in sponsored research programs. Students are required to

take the Fundamentals of Engineering (FE) exam when they are within 32 credit hours of graduation.

APPM 1350	Calculus 1 for Engineers	4
CHEM 1221	Engineering General Chemistry Lab	1
CHEM 1211	General Chemistry for Engineers	4
EVEN 1000	Introduction to Environment Engineering ³	1
First-Year Engineering Projects course		3
Humanities and social science elective ⁴		3
	Credit Hours	16
Spring Semester		
APPM 1360	Calculus 2 for Engineers	4
CHEM 1310	Introduction to Engineering Computing	3
PHYS 1110	General Physics 1	4
Humanities and social science elective ⁴		3
Technical elective ¹		3
	Credit Hours	17
Year Two		
Fall Semester		
APPM 2350	Calculus 3 for Engineers	4
PHYS 1120	General Physics 2	4
PHYS 1140	Experimental Physics 1	1
Select one of the following in Statics:		3
CVEN 2121	Analytical Mechanics 1	
GEEN 2851	Statics for Engineers	
MCEN 2023	Statics and Structures	
Humanities and social science elective ⁴		3
	Credit Hours	15

Spring Semester

APPM 2360	Introduction to Differential Equations with Linear Algebra	4
CVEN 3414	Fundamentals of Environment Engineering	3
Select one of the following in Fluids Mechanics:		3
CHEN 3200	Chemical Engineering Fluid Mechanics (Select one of the following in Fluids Mechanics:)	
CVEN 3313	Theoretical Fluid Mechanics	
GEEN 3853	Fluid Mechanics for Engineers	
MCEN 3021	Fluid Mechanics	
Humanities and social science elective ⁴		3
Free Elective		3
	Credit Hours	16
Year Three		
Fall Semester		
EVEN 4404	Water Chemistry ³	3
EVEN 4414	Water Chemistry Laboratory ³	1
EVEN 3350		3
Select one of the following in Engineering Economics:		3
CVEN 3246	Introduction to Construction	
CVEN 4147	Civil Engineering Systems	
EMEN 4100	Engineering Economics	
BUSM 3002	Business and Financial Analytics (only for students earning a business minor)	
Select one of the following in Thermodynamics:		3
AREN 2110	Thermodynamics	
MCEN 3012	Thermodynamics	
CHEN 3320	Chemical Engineering Thermodynamics	
GEEN 3852	Thermodynamics for Engineers	

College-approved writing course ⁵		3
	Credit Hours	16
Spring Semester		
EVEN 4424	Environment Organic Chemistry ³	3
EVEN 4484	Introduction to Environmental Microbiology ³	3
CHEN 3210 or MCEN 3022	Chemical Engineering Heat Transfer or Heat Transfer	3
Select one of the following in Probability and Statistics:		
APPM 4570	Statistical Methods	3
CHEN 3010	Applied Data Analysis	3
CVEN 3227	Probability, Statistics and Decision	3
Environmental engineering design/technical elective I ²		3
	Credit Hours	15

Year Four**Fall Semester**

EVEN 4464	Environmental Engineering Processes ³	3
Humanities and social science elective ⁴		3
Air or earth science laboratory or field course		3
Environmental engineering design/technical elective II ²		3
Select one of the following:		
Technical elective II ¹		3
Senior Thesis ⁶		3
Environmental engineering design/technical elective III ²		3
Free elective		2
	Credit Hours	17

Spring Semester

CVEN 4333	Engineering Hydrology ³	3
CVEN 4434	Environment Engineering Design ³	4
MCEN 4131	Air Pollution Control Engineering ³	3
Select one of the following:		
Environmental engineering design/technical elective III ²		3
Technical Elective II ¹		3
Select one of the following:		
Technical elective III ¹		3

Senior Thesis ⁶		16
	Credit Hours	16
	Total Credit Hours	128

- ¹ A total of 9 credit hours of technical electives is required. Three technical elective credit hours may be lower-division (1000–2000-level). Three technical elective credit hours must be in the earth sciences, either lower or upper division. Remaining technical elective credit hours must be upper division in engineering, mathematics or sciences. Independent study (EVEN 4840) or senior thesis (EVEN 4980 and EVEN 4990) may be completed as technical electives for up to 6 credits hours.
- ² A nine-credit-hour (three-course) sequence in environmental engineering – one environmental engineering design course and two environmental engineering technical electives.
- ³ Only offered in the semester shown (not including summer offerings).
- ⁴ Students may choose courses from the list of college-approved humanities and social sciences (HSS) electives (<http://www.colorado.edu/engineering/academics/policies/hss>).
- ⁵ Students may choose a course from the list of college-approved writing courses (<http://www.colorado.edu/engineering/academics/policies/hss>).
- ⁶ A senior thesis can be completed on a single research topic, with faculty approval and direction, and can apply toward technical elective requirements.

Architectural Engineering - Minor

The undergraduate minor in architectural engineering serves CU Boulder students who are interested in building science, engineering and system designs. The minor is intended to expose students to basic building science knowledge, engineering and system concepts, and calculation and design skills.

Requirements

Admission

A cumulative GPA of 2.750 or higher is required to be admitted to the minor.

The minor is not open to students pursuing the Bachelor of Science in architectural engineering or the Bachelor of Science in engineering plus with an architectural engineering disciplinary emphasis. In addition, the structural systems and construction engineering and management tracks (shown below) are not open to students pursuing the Bachelor of Science in civil engineering or the Bachelor of Science in engineering plus with a civil engineering disciplinary emphasis.

Prerequisites

The following prerequisite courses are required, with a grade of C- or higher in each. A student may be accepted into the minor with no more than two of these courses as deficiencies. All deficiencies must be completed before the minor is awarded.

- Calculus 1 (APPM 1350 or MATH 1300)
- Calculus 2 (APPM 1360 or MATH 2300)
- Calculus 3 (APPM 2350 or MATH 2400)
- Differential Equations and Linear Algebra (APPM 2360, or MATH 2130 + MATH 3430)

- Two semesters of calculus-based physics (PHYS 1110 or 1115, and PHYS 1120 or 1125)
- Statics (CVEN 2121, ASEN 2001, GEEN 2851, or MCEN 2023)

Grade Requirements

A cumulative GPA of 2.250 is required in the courses used to satisfy the minor requirements, with no individual grade lower than C-.

Residency

The minor requires 18 credit hours, at least nine of which must be AREN/CVEN courses completed on the CU Boulder campus. This is composed of three required courses: two courses in a single track plus one elective course.

Course Requirements

Code	Title	Credit Hours
Required Core Courses		
AREN 2050	Building Materials and Systems	3
CVEN 3246	Introduction to Construction	3
CVEN 3161	Mechanics of Materials 1	3
	or MCEN 2063 Mechanics of Solids	
Tracks (Choose one)		6
<i>Mechanical Systems Track</i>		
AREN 3010	Energy Efficient Buildings	
AREN 4110	HVAC System Design	
<i>Structural Systems Track</i> ¹		
CVEN 3525	Structural Analysis	
CVEN 4545	Steel Design	
	or CVEN 4555 Reinforced Concrete Design	
<i>Electrical Systems Track</i>		
ECEN 3030	Electrical/Electronic Circuits Non-Major	
	or ECEN 2250 Introduction to Circuits and Electronics	
	or ECEN 3010 Circuits and Electronics for Mechanical Engineers	
AREN 4570	Building Electrical Systems Design 1	
<i>Lighting Track</i>		
AREN 3540	Illumination 1	
AREN 4550	Illumination 2	
<i>Construction Engineering & Management Track</i> ¹		
AREN 4506	Pre-construction Estimating and Scheduling	
AREN 4606	Construction Project Execution and Control	
Elective		3
AREN 1027	Engineering Drawing	
AREN 4010	HVAC System Modeling and Control	
AREN 4130	Optical Design for Illumination and Solid State Lighting	
AREN 4315	Design of Masonry Structures	
AREN 4530	Advanced Lighting Design	
AREN 4560	Luminous Radiative Transfer	
AREN 4580	Daylighting	
AREN 4830	Special Topics for Seniors/Grads (Sustainable Lighting Workshop, Computer Simulation of Building Systems, or Forensic Engineering)	
AREN 4890	Sustainable Building Design	

AREN 4990	Compu Fluid Dynamics (CFD) Analysis for Built/Natural Envmnts	
AREN 5020	Building Energy Audits	
AREN 5050	Advanced Solar Design	
AREN 5070	Thermal Analysis of Buildings	
CVEN 4565	Design of Wood Structures	
CVEN 5830	Special Topics for Seniors/Grads (Distributed Generation Systems, Color Theory/Light Source, or Applied Data Analysis & Modeling)	
ENVD 3114	History and Theory of Environmental Design at the Small Scale: Buildings	
ENVD 3134	History and Theory of Environmental Design and the Medium Scale: Precincts	
Total Credit Hours		18

¹ Not open to students pursuing the Bachelor of Science in civil engineering or the Bachelor of Science in engineering plus with a civil engineering disciplinary emphasis.

Civil Engineering - Minor

The undergraduate minor in civil engineering serves CU Boulder students interested in an introductory exposure to the broad discipline of civil engineering. The minor is intended to expose students to five sub-disciplines of civil engineering. The minor is **not** open to civil engineering majors, or Engineering Plus majors with a civil engineering emphasis.

Requirements

Admission

A cumulative GPA of 2.750 or higher is required to be admitted to the minor. See the civil engineering undergraduate academic advisor (<https://www.colorado.edu/engineering-advising/people>) for additional admissions details.

Prerequisites

The following prerequisite courses are required, with a grade of C- or higher in each. A student may be accepted into the minor with no more than two of these courses as deficiencies. All deficiencies must be completed before the minor is awarded.

- Calculus 1 (APPM 1350 or MATH 1300)
- Calculus 2 (APPM 1360 or MATH 2300)
- Calculus 3 (APPM 2350 or MATH 2400)
- Differential Equations and Linear Algebra (APPM 2360, or MATH 2130 and MATH 3430)
- Two semesters of calculus-based physics (PHYS 1110 or PHYS 1115, and PHYS 1120 or PHYS 1125)
- Statics (CVEN 2121, ASEN 2001, GEEN 2851 or MCEN 2023)
- Fluid Mechanics (CVEN 3313, AREN 2120, MCEN 3021, GEEN 3853)
- Mechanics of Materials (CVEN 3161, MCEN 2063)

Residency

18 credits are required for the minor, at least 9 of which must be CVEN courses completed at the CU-Boulder campus.

Minimum Grades

Overall GPA of 2.250 in courses used toward the minor must be maintained, with no individual grade lower than C-.

Required Courses and Credits

Code	Title	Credit Hours
Required Core Courses		
CVEN 3246	Introduction to Construction	3
CVEN 3323	Hydraulic Engineering	3
CVEN 3414	Fundamentals of Environmental Engineering	3
CVEN 3525	Structural Analysis	3
CVEN 3708	Geotechnical Engineering 1	3
<i>One additional proficiency or advanced course in one of the following sub-disciplines:</i>		3
Construction Engineering and Management		
CVEN 3256	Construction Equipment and Methods	
AREN 4506	Pre-construction Estimating and Scheduling	
Environmental Engineering		
CVEN 3424	Water and Wastewater Treatment	
CVEN 4404	Water Chemistry	
CVEN 3434	Introduction to Applied Ecology	
CVEN 4474	Hazardous and Industrial Waste Management	
CVEN 4484	Introduction to Environmental Microbiology	
Geotechnical Engineering		
CVEN 3718	Geotechnical Engineering 2	
Structural Engineering		
CVEN 4545	Steel Design	
CVEN 4555	Reinforced Concrete Design	
Water Resource Engineering		
CVEN 4333	Engineering Hydrology	
CVEN 4353	Groundwater Engineering	
Civil Systems		
CVEN 4147	Civil Engineering Systems	
Total Credit Hours		18

Computer Science

Computer science is an exciting and challenging field that has impact on many parts of our lives. Computer scientists craft the technologies that enable the digital devices we use every day. They develop the large-scale software that powers business and industry, advance the computational techniques and write the software that supports scientists in their study of the world around us. Many new applications of computing technology remain to be discovered. Computing will be at the heart of future revolutions in business, science and society. Students who study computer science will be at the forefront of these important advances.

Computer science offers study in the fields of computer systems, cyber security, robotics, algorithm design, artificial intelligence, software and web engineering, programming languages, database design, human-computer interaction, machine learning, data science, numerical and parallel computing, speech and language processing and theoretical computer science.

Computer science is concerned with how computers are constructed, how they store and process data, how they are used in problem-solving

and how the quality of those solutions is assessed. It is about the science of creating software for a variety of users, and understanding how that software interacts with the hardware on which it is run and goes well beyond the machine to the study of how people interact with the technologies around them. Applications of computer science reach far and wide.

For more information, visit the Department of Computer Science (<http://www.colorado.edu/cs>) website.

Course code for this program is CSCI.

Career Possibilities

Computer science graduates from CU Boulder are engaged in a wide variety of jobs with many different companies in locations all over the world. They produce the software and systems that touch lives every day in fields as diverse as scientific exploration, communication, finance, medicine, manufacturing, entertainment and research. Many are software developers, but others become teachers, writers, doctors, lawyers, scientists, military leaders and entrepreneurs. They work at some of the largest, most influential companies in the world, at research institutions, nonprofits and at the smallest start-ups of every type imaginable.

Facilities, Programs and Opportunities

The Department of Computer Science uses a modern computing infrastructure that supports its research and educational missions. This includes general purpose computing labs provided by the university, additional instructional labs and administrative computing resources provided by the department and specialized labs dedicated to the work of individual research groups. A wide variety of computing resources are available so that students have the opportunity to learn about and use cutting-edge equipment and software. The university research computing service maintains a supercomputer, high-speed networking and advanced computing infrastructure for the campus. The computer science educational culture emphasizes the use of individual laptop computers, including their use in courses and group work.

There are many networking opportunities available with companies offering paid internships. Boulder's tech start-up community, tech companies and research labs provide students with many employment opportunities while earning their degrees. There are also extensive opportunities for undergraduate students to participate in research projects across the campus.

Bachelor's Degree

- Computer Science - Bachelor of Science (BS) (p. 755)
- Applied Computer Science - Post-Baccalaureate Bachelor of Science (BS) (p. 751)

Minor

- Computer Science - Minor (p. 758)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Anderson, Kenneth M (https://experts.colorado.edu/display/fisid_113566)
Professor; PhD, University of California-Irvine

Assistant Professor; PhD, Massachusetts Institute of Technology

Zagrodzki, Maciej
Instructor; MSc, Colorado School of Mines

Courses

CSCI 1000 (1) Computer Science as a Field of Work and Study

Introduces curriculum, learning techniques, time management and career opportunities in Computer Science. Includes presentations from alumni and others with relevant educational and professional experience. Does not count as Computer Science credit for the Computer Science BA.

Requisites: Restricted to students with 0-26 credits (Freshmen) Computer Science (CSEN-BS, CSEN-ADL, CSCI-BA or CSCI-ADL) majors only.

Additional Information: Departmental Category: General Computer Science

CSCI 1200 (3) Introduction to Computational Thinking

Teaches computational thinking and techniques for writing computer programs using the Python programming language. Intended for students who realize that computational skills are beneficial to all fields of study, but who have little or no experience in programming or are not Computer Science majors. Students will be expected to create computer programs to solve problems in a range of disciplines. Does not count as Computer Science credit for the Computer Science BA, BS, or minor.

Additional Information: Departmental Category: General Computer Science

CSCI 1220 (4) Virtual Worlds: An Introduction to Computer Science

Introduces the fundamental principles of computer science using an on-line virtual world called Second Life as the "Laboratory" for this course. Students will learn how to program by creating objects of interest in Second Life. In-class and in-world discussions and readings will introduce the students to important ideas and concepts that shape the field of computer science. Does not count as Computer Science credit for the Computer Science BA, BS or minor.

Additional Information: Departmental Category: General Computer Science

CSCI 1240 (3) The Computational World

Introduces and explores the "computational style of thinking" and its influence in science, mathematics, engineering and the arts. Does not focus on the nuts and bolts of any particular programming language, but rather the way in which computing has affected human culture and thought in the past half century. Does not count as Computer Science credit for the Computer Science BA, BS, or minor.

Additional Information: Departmental Category: General Computer Science

CSCI 1300 (4) Computer Science 1: Starting Computing

Teaches techniques for writing computer programs in higher level programming languages to solve problems of interest in a range of application domains. Intended for students with little to no experience in computing or programming.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 1310 or CSCI 1320 or ECEN 1310

Requisites: Requires a prerequisite or corequisite course of MATH 1300 or MATH 1310 or APPM 1345 or APPM 1350 (all minimum grade C-).

Additional Information: Departmental Category: General Computer Science

CSCI 1320 (4) Computer Science 1: Starting Computing-Engineering Application

Uses problems and tools from Engineering. Teaches techniques for writing computer programs in higher level programming languages to solve problems of interest in Engineering and other domains. Intended for students with little or no prior experience in programming.

Requisites: Requires a prerequisite or corequisite course of MATH 1300 or MATH 1310 or APPM 1345 or APPM 1350 (all minimum grade C-). Restricted to College of Engineering or Pre-Engineering Arts and Science (PREN) majors only.

Additional Information: Departmental Category: General Computer Science

CSCI 2270 (4) Computer Science 2: Data Structures

Studies data abstractions (e.g., stacks, queues, lists, trees) and their representation techniques (e.g., linking, arrays). Introduces concepts used in algorithm design and analysis including criteria for selecting data structures to fit their applications.

Requisites: Requires prerequisite courses of CSCI 1300 or CSCI 1310 or CSCI 1320 or ECEN 1030 or ECEN 1310 and APPM 1345 or APPM 1350 or MATH 1300 or MATH 1310 (all minimum grade C-).

Additional Information: Departmental Category: General Computer Science

CSCI 2400 (4) Computer Systems

Covers how programs are represented and executed by modern computers, including low-level machine representations of programs and data, an understanding of how computer components and the memory hierarchy influence performance.

Requisites: Requires prerequisite course of CSCI 2270 (minimum grade C-).

Additional Information: Departmental Category: General Computer Science

CSCI 2820 (3) Linear Algebra with Computer Science Applications

Introduces the fundamentals of linear algebra in the context of computer science applications. Includes vector spaces, matrices, linear systems, and eigenvalues. Includes the basics of floating point computation and numerical linear algebra.

Requisites: Requires prerequisite courses of CSCI 2270 and APPM 1360 or MATH 2300 (all minimum grade C-).

Additional Information: Departmental Category: General Computer Science

CSCI 2824 (3) Discrete Structures

Covers foundational materials for computer science that is often assumed in advanced courses. Topics include set theory, Boolean algebra, functions and relations, graphs, propositional and predicate calculus, proofs, mathematical induction, recurrence relations, combinatorics, discrete probability. Focuses on examples based on diverse applications of computer science.

Requisites: Requires prerequisite courses of CSCI 1200 or CSCI 1300 or CSCI 1310 or CSCI 1320 or ECEN 1030 or ECEN 1310 and APPM 1345 or APPM 1350 or MATH 1300 or MATH 1310 (all minimum grade C-).

Additional Information: Departmental Category: Theory of Computation

CSCI 2830 (1-3) Special Topics in Computer Science

Covers topics of interest in computer science at the sophomore level. Content varies from semester to semester. Does not count as Computer Science credit for the Computer Science BA.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: General Computer Science

CSCI 2900 (1-3) Lower Division, Undergraduate Level Independent Study

Offers selected topics at the elementary level for students with little or no previous computing experience. Does not count as Computer Science credit for the Computer Science BA.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: General Computer Science

CSCI 3002 (4) Fundamentals of Human Computer Interaction

Introduces the practice and research of human-computer interaction, including its history, theories, the techniques of user-centered design, and the development of interactive technologies. The course will cover computing in society at large with respect to domains such as health, education, assistive technology, ethics, environment, and more.

Requisites: Required pre-requisite of CSCI 2270 (minimum grade C-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors).

Additional Information: Departmental Category: Artificial Intelligence

CSCI 3010 (3) Programming Project Workshop

Explores concepts and techniques for design and construction of larger, reliable, and maintainable software systems. Topics covered will include: specifications, program structure and design, program-correctness approaches, and working with established code bases. This course will emphasize coding individually and in pairs and will include multiple weeks-long projects.

Requisites: Requires a prerequisite course of CSCI 2270 (minimum grade C-).

CSCI 3022 (3) Introduction to Data Science with Probability and Statistics

Introduces students to the tools methods and theory behind extracting insights from data. Covers algorithms of cleaning and munging data, probability theory and common distributions, statistical simulation, drawing inferences from data, and basic statistical modeling.

Requisites: Requires prerequisite course of CSCI 2270 and (APPM 1360 or MATH 2300) and (CSCI 2824 or ECEN 2703 or APPM 3170 or MATH 2001). (all minimum grade C-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Artificial Intelligence

CSCI 3100 (1) Software and Society

Provides students with an understanding of the professional, ethical, legal and social issues and responsibilities of software developers, as well as providing them with the ability to analyze the local and global impacts of computing on individuals, organizations and society.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 4308 and CSCI 4328 and CSCI 4338 and CSCI 4348

Requisites: Requires prerequisite course of CSCI 3308 (minimum grade C-). Restricted to Computer Science (CSEN-BS, CSEN-ADL, CSEN-BSCS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: General Computer Science

CSCI 3104 (4) Algorithms

Covers the fundamentals of algorithms and various algorithmic strategies, including time and space complexity, sorting algorithms, recurrence relations, divide and conquer algorithms, greedy algorithms, dynamic programming, linear programming, graph algorithms, problems in P and NP, and approximation algorithms.

Requisites: Requires prerequisite courses of CSCI 2270 and APPM 1360 or MATH 2300 and one of the following: CSCI 2824 or ECEN 2703 or APPM 3170 or MATH 2001 (all minimum grade C-).

Additional Information: Departmental Category: Theory of Computation

CSCI 3112 (1-3) Human-Centered Computing Professional Development

Supports students in developing professional skills and practices in human-computer interaction, design of interactive systems, computer supported cooperative work, computer supported collaborative learning, educational technology, tools that support creativity, user-developed knowledge collections and gaming.

Equivalent - Duplicate Degree Credit Not Granted: ATLS 3112

Repeatable: Repeatable for up to 3.00 total credit hours.

Additional Information: Departmental Category: Artificial Intelligence

CSCI 3155 (4) Principles of Programming Languages

Study fundamental concepts on which programming of languages are based, and execution models supporting them. Topics include values, variables, bindings, type systems, control structures, exceptions, concurrency, and modularity. Learn how to select a language and to adapt to a new language.

Requisites: Requires prerequisite courses of CSCI 2270 and CSCI 2824 or ECEN 2703 or APPM 3170 or MATH 2001 (all minimum grade C-).

Additional Information: Departmental Category: Programming Languages

CSCI 3202 (3) Introduction to Artificial Intelligence

Surveys artificial intelligence techniques of search, knowledge representation and reasoning, probabilistic inference, machine learning, and natural language

Requisites: Requires prereq courses of CSCI 2270 CSCI 2824 or MATH 2001 or ECEN 2703 or APPM 3170 one of the following Prob/Stats courses: APPM 3570,4570,4520, CSCI 3022, MATH 3510,4510, CVEN 3227, CHEN 3010, ECEN 3810, MCEN 4120 or ECON 3818(all min grade C-)

Additional Information: Departmental Category: Artificial Intelligence

CSCI 3287 (3) Design and Analysis of Data Systems

Analyzes design of data systems, including data stored in file systems, database management systems and physical data organizations. Studies calculus of data models, query languages, concurrency and data privacy and security.

Requisites: Requires prerequisites of CSCI 2270 and (CSCI 2824 or ECEN 2703 or APPM 3170 or MATH 2001) (all minimum grade C-).

Additional Information: Departmental Category: Database Systems

CSCI 3302 (3) Introduction to Robotics

Introduces students to fundamental concepts in autonomous, mobile robotics: mechanisms, locomotion, kinematics, control, perception and planning. The course consists of lectures and lab sessions that are geared toward developing a complete navigation stack on a miniature mobile robotic platform.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 3303

Requisites: Requires prerequisite courses of CSCI 2270 and (CSCI 2824 or ECEN 2703 or APPM 3170 or MATH 2001) and (APPM 2360 or APPM 3310 or CSCI 2820 or MATH 2130 or MATH 2135) (all minimum grade C-).

Additional Information: Departmental Category: Artificial Intelligence

CSCI 3308 (3) Software Development Methods and Tools

Covers tools and practices for software development with a strong focus on best practices used in industry and professional development, such as agile methodologies, pair-programming and test-driven design. Students develop web services and applications while learning these methods and tools.

Requisites: Requires prerequisite course of CSCI 2270 (minimum grade C-).

Additional Information: Departmental Category: Software Engineering

CSCI 3403 (4) Introductions to CyberSecurity for a Converged World

Introduces core concepts in cybersecurity including confidentiality, integrity, authentication, risk management, and adversarial thinking. The concepts will be applied to both traditional information technology (IT) systems and cyber physical systems (CPS). At the conclusion of the course students should have a solid foundation in cybersecurity and hands-on experience.

Requisites: Requires prerequisite course of CSCI 2400 or ECEN 3350 (minimum grade C-).

Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 3434 (3) Theory of Computation

Introduces the foundations of formal language theory, computability, and complexity. Shows relationship between automata and various classes of languages. Addresses the issue of which problems can be solved by computational means, and studies complexity of solutions.

Requisites: Requires prerequisite course of CSCI 3104 (minimum grade C-).

Additional Information: Departmental Category: Theory of Computation

CSCI 3656 (3) Numerical Computation

Covers development, computer implementation, and analysis of numerical methods for applied mathematical problems. Topics include floating point arithmetic, numerical solution of linear systems of equations, root finding, numerical interpolation, differentiation, and integration.

Requisites: Requires prerequisite courses of CSCI 1300 or CSCI 1310 or CSCI 1320 or ECEN 1310 and APPM 1360 or MATH 2300 and MATH 2130 or APPM 2360 or APPM 3310 or CSCI 2820 (all minimum grade C-).

Additional Information: Departmental Category: Numerical Computation

CSCI 3702 (3) Cognitive Science

Introduces cognitive science, drawing from psychology, philosophy, artificial intelligence, neuroscience, and linguistics. Studies the linguistic relativity hypothesis, consciousness, categorization, linguistic rules, the mind-body problem, nature versus nurture, conceptual structure and metaphor, logic/problem solving and judgment. Emphasizes the nature, implications and limitations of the computational model of mind.

Equivalent - Duplicate Degree Credit Not Granted: LING 3005 and PHIL 3310 and PSYC 3005 and SLHS 3003

Recommended: Prerequisites two of the following CSCI 1300 or LING 2000 or PHIL 2440 or PSYC 2145.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

Arts Sci Gen Ed: Distribution-Natural Sciences

Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Artificial Intelligence

CSCI 3753 (4) Design and Analysis of Operating Systems

Analyzes the software that extends hardware to provide a computing environment, including the role of linkers, file systems, resource sharing, security and networking. Studies the history of operating system organization and design and their influence on security, functionality and reliability.

Requisites: Requires prerequisite courses of CSCI 2270 and either CSCI 2400 or ECEN 3350 (all minimum grade C-).

Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 3832 (3) Machine Translation

Provides a comprehensive overview of current techniques in statistical machine translation of natural language, e., automatically translating from Spanish to English. Covers language models, reordering, hierarchical translation and evaluating whether a translation is effective.

Requisites: Requires prerequisite courses of CSCI 2270 and CSCI 2824 or MATH 2001 or ECEN 2703 or APPM 3170 (all minimum grade C-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Artificial Intelligence

CSCI 4113 (3) Linux System Administration

Introduces Linux system administration and related topics, including troubleshooting system and network problems, hardware and software configuration and installation, basic scripting and security aspects of internet hosts. Students build Linux servers from the ground up, using provided computing resources, and must maintain and secure the servers themselves.

Requisites: Requires prerequisite course of CSCI 2400 or ECEN 3350 and CSCI 3308 (minimum grade C-).

Recommended: Prerequisite CSCI 3753.

Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 4229 (3) Computer Graphics

Studies design, analysis and implementation of computer graphics techniques. Topics include interactive techniques, 2D and 3D viewing, clipping, segmentation, translation, rotation and projection. Involves removal of hidden edges, shading and color. Knowledge of basic linear algebra is required.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5229

Requisites: Requires prerequisite course of CSCI 2270 (minimum grade C-).

Additional Information: Departmental Category: Graphics

CSCI 4239 (3) Advanced Computer Graphics

Studies design, analysis and implementation of advanced computer graphics techniques. Topics include shaders, using the GPU for high performance computing, graphics programming on embedded devices such as mobile phones; advanced graphics techniques such as ray tracing.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5239

Requisites: Requires prerequisite course of CSCI 4229 (minimum grade C-).

Additional Information: Departmental Category: Graphics

CSCI 4250 (3) Computer Science: The Canon

Explores the "great works" of computer science through intensive reading and discussion. Readings include works by Babbage, Turing, Von Neumann, Goedel, Shannon and Minsky, among others. Does not count as CS credit for the Computer Science BA, BS or minor.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5250

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: General Computer Science

CSCI 4253 (3) Datacenter Scale Computing - Methods, Systems and Techniques

Covers the primary problem solving strategies, methods and tools needed for data-intensive programs using large collections of computers typically called "warehouse scale" or "data-center scale" computers. Examines methods and algorithms for processing data-intensive applications, methods for deploying and managing large collections of computers in an on-demand infrastructure and issues of large-scale computer system design.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5253

Requisites: Requires prerequisite course of CSCI 3753 (minimum grade C). Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite CSCI 4273.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 4273 (3) Network Systems

Focuses on design and implementation of network programs and systems, including topics in network protocols, file transfer, client-server computing, remote procedure call and other contemporary network system design and programming techniques. Familiarity with C and Unix or Linux is required.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5273 and ECEN 5273

Requisites: Requires prerequisite course of CSCI 3753 (minimum grade C-).

Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 4302 (3) Advanced Robotics

Exposes students to current research topics in the field of robotics and provides hands-on experience in solving a grand challenge program.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5302

Requisites: Requires prerequisite course of CSCI 3302 (minimum grade C-).

Additional Information: Departmental Category: Artificial Intelligence

CSCI 4308 (4) Software Engineering Project 1

Advanced practicum in which students design, implement, document and test software systems for use in industry, non-profits, government and research institutions. Also offers extensive experience in oral and written communication throughout the development process. Department enforced prerequisite: successful completion of a minimum of 36 credit hours of Computer Science coursework and approved WRTG. CSCI-BA students interested in taking this course should contact their advisor(s) early in their major.

Requisites: Requires prerequisite courses of CSCI 3155 and CSCI 3308 (all minimum grade C-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Computer Science (CSEN) majors or Computer Science Concurrent Degree majors only.

Additional Information: Departmental Category: Software Engineering

CSCI 4314 (3) Algorithms for Molecular Biology

Surveys molecular biology and combinatorial algorithms used to understand DNA, RNA and proteins. Students work in groups to define and tackle meaningful biological problems and learn to collaborate effectively with scientists in other disciplines.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5314

Requisites: Requires a prerequisite course of CSCI 3104 (minimum grade C-).

Recommended: Prerequisite comfort with mathematics and/or programming experience, and more advanced understanding (upper undergraduate level) of any relevant discipline.

Additional Information: Departmental Category: Theory of Computation

CSCI 4318 (4) Software Engineering Project 2

Second semester of an advanced practicum in computer science. Students must take this course and CSCI 4308 contiguously as the project spans the entire academic year.

Requisites: Requires prerequisite course of CSCI 4308 (minimum grade C-).

Additional Information: Departmental Category: Software Engineering

CSCI 4328 (4) Software Project Management and Mentoring

Review software project management and discuss the latest approaches, methodologies and standards of software development. Learn to develop software quality, documentation, testing and prototype goals. Study project risk management and cost estimation approaches. Experience mentoring Senior Software Project Team. Intended for professional software developers. Department consent required, see Senior Project Director for permission.

Requisites: Requires prerequisite courses of CSCI 3155 and CSCI 3308 (all minimum grade C-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Computer Science (CSEN) majors or Computer Science Concurrent Degree majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Software Engineering

CSCI 4338 (2) Software Project Management

Review software project management and discuss the latest approaches, methodologies and standards of software development. Learn to develop software quality, documentation, testing, and prototype goals. Study project risk management and cost estimation approaches. Intended for double majors doing interdisciplinary projects in other departments.

Department consent required, see Senior Project Director for permission.

Requisites: Requires prerequisite courses of CSCI 3155 and CSCI 3308 (all minimum grade C-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Computer Science (CSEN) majors or Computer Science Concurrent Degree majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Software Engineering

CSCI 4348 (4) Startup Essentials: Entrepreneurial Projects in Computing

Provide students with the tools to be successful technical co-founders of their own startups. Explores the initial stages of founding a startup, including team formation, idea validation, pivoting and pitching, while employing an iterative methodology. Student teams will develop a minimum viable product, pitch their final startup concept, and be evaluated on product/market fit. Department enforced restriction, successful completion of a minimum of 36 credit hours of Computer Science coursework and approved WRTG. Formerly CSCI 4000.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5340

Requisites: Requires prerequisite courses of CSCI 3155 and CSCI 3308 (all minimum grade C-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Computer Science (CSEN) majors or Computer Science Concurrent Degree majors only.

Additional Information: Departmental Category: General Computer Science

CSCI 4358 (4) Entrepreneurial Projects II

Follows CSCI 4348. In the second semester of this entrepreneurial project capstone, student teams will seek to find market traction for a high-fidelity Minimum Viable Product (MVP), software and/or hardware, that they will develop as part of their startup project. Teams will further learn to incorporate principles of marketing, business finance and legal issues into the business model for their startup concept.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5350

Requisites: Requires a prerequisite course of CSCI 4348 (minimum grade C-).

Additional Information: Departmental Category: General Computer Science

CSCI 4413 (3) Computer Security and Ethical Hacking

Teaches basic exploit design and development through hands-on experimentation and testing. Uses a controlled environment to give students a "playground" in which to test penetration skills that are normally not allowed on live networks.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5413

Requisites: Requires prerequisite course of CSCI 4273 (minimum grade C-).

Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 4446 (3) Chaotic Dynamics

Explores chaotic dynamics theoretically and through computer simulations. Covers the standard computational and analytical tools used in nonlinear dynamics and concludes with an overview of leading-edge chaos research. Topics include time and phase-space dynamics, surfaces of section, bifurcation diagrams, fractal dimension and Lyapunov exponents.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5446 and ECEN 4423 and ECEN 5423

Requisites: Requires prerequisite course of CSCI 1300 or CSCI 1310 or CSCI 1320 or ECEN 1310 and APPM 2350 or MATH 2400 (all minimum grade C-).

Recommended: Prerequisites PHYS 1120 and CSCI 3656 and (MATH 2130 or MATH 2135).

Additional Information: Departmental Category: Numerical Computation

CSCI 4448 (3) Object-Oriented Analysis and Design

An applied analysis and design class addressing the use of object-oriented techniques. Topics include domain modeling, use cases, architectural design and modeling notations. Students apply the techniques in analysis and design projects.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5448

Requisites: Requires prerequisite courses of CSCI 3155 and CSCI 3308 (all minimum grade C-).

Additional Information: Departmental Category: Software Engineering

CSCI 4502 (3) Data Mining

Introduces basic data mining concepts and techniques for discovering interesting patterns hidden in large-scale data sets, focusing on issues relating to effectiveness and efficiency. Topics covered include data preprocessing, data warehouse, association, classification, clustering, and mining specific data types such as time-series, social networks, multimedia, and Web data.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5502

Requisites: Requires prerequisite course of CSCI 2270 (minimum grade C-).

Additional Information: Departmental Category: Artificial Intelligence

CSCI 4555 (3) Compiler Construction

Introduces the basic techniques used in translating programming languages: scanning, parsing, definition table management, operator identification and coercion, code selection and register allocation, error recovery. Students build a complete compiler for a simple language.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5525 and ECEN 4553 and ECEN 5523

Requisites: Requires prerequisite courses of CSCI 3155 and CSCI 2400 or ECEN 3350 (all minimum grade C-).

Additional Information: Departmental Category: Programming Languages

CSCI 4576 (4) High-Performance Scientific Computing

Introduces computing systems, software and methods used to solve large-scale problems in science and engineering. Students use high-performance workstations and a supercomputer.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5576

Recommended: Prerequisite CSCI 3656.

Additional Information: Departmental Category: Numerical Computation

CSCI 4593 (3) Computer Organization

Studies computer design at the gate level. Discusses instruction set architecture design, arithmetic and logic unit design, control logic, memory design and caches, simple pipelining, I/O and peripheral devices. Briefly covers aspects of modern computer architecture, such as multicore processors and cache coherence for these.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4593

Requisites: Requires prerequisite course of ECEN 3350 or CSCI 2400 (minimum grade C-).

Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 4622 (3) Machine Learning

Introduces students to tools, methods, and theory to construct predictive and inferential models that learn from data. Focuses on supervised machine learning technique including practical and theoretical understanding of the most widely used algorithms (decision trees, support vector machines, ensemble methods, and neural networks). Emphasizes both efficient implementation of algorithms and understanding of mathematical foundations.

Requisites: Requires prerequisite courses of (CSCI 2820 or MATH 2130 or MATH 2135 or APPM 3310) and (CSCI 3022 or APPM 4570 or APPM 3570 or APPM 4520 or CVEN 3227 or MATH 3510 or MATH 4510 or ECEN 3810 or ECON 3818 or MCEN 4120) and CSCI 3104 (all minimum grade C-)

Additional Information: Departmental Category: Artificial Intelligence

CSCI 4753 (3) Computer Performance Modeling

Presents a broad range of system measurement and modeling techniques, emphasizing applications to computer systems. Topics include system measurement, work load characterization and analysis of data; design of experiments; simulation; and queuing theory and queuing network models.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5753 and ECEN 4753 and ECEN 5753

Requisites: Requires prerequisite course of CSCI 3753 and MATH 2300 or APPM 1360 (all minimum grade C-).

Recommended: Requisite a course in statistics.

Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 4802 (1) Data Science Team Companion Course

Gives students hands-on experience applying data science techniques and machine learning algorithms to real-world problems. Students work in small teams on internal challenges, many of which will be sponsored by local companies and organizations and will represent the university in larger teams for external challenges at the national and global level, such as those hosted by Kaggle. Students will be expected to participate in both internal and external challenges, attend meetings and present short presentations to the group when appropriate.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5802

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Requires a prerequisite course of APPM 3310 or APPM 3570 or APPM 4520 or APPM 4570 or MATH 2130 or MATH 3510 or MATH 4510 or CSCI 2820 or CSCI 3022 or CVEN 3227 or ECEN 3810 or MCEN 4120 (minimum grade C-).

Additional Information: Departmental Category: Artificial Intelligence

CSCI 4809 (3) Computer Animation

Develops a firm understanding of the general principles of computer animation. Lectures cover the creation of models, materials, textures, surfaces, and lighting. Path and key frame animation, particle dynamics, and rendering are introduced. Students are assigned a number of animation tutorials to carry out.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5809 and ATLS 4809 and ATLS 5809

Requisites: Restricted to Technology, Arts and Media (TMEN) majors and (MTAM) minors, or the ATLAS (PATL) student group only.

Additional Information: Departmental Category: Graphics

CSCI 4830 (1-4) Special Topics in Computer Science

Covers topics of interest in computer science at the senior undergraduate level. Content varies from semester to semester. Only 9 credit hours from CSCI 4830 and/or CSCI 4831 can count toward Computer Science BS or BA.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite course of CSCI 2400 or ECEN 3350 (minimum grade C-).

Additional Information: Departmental Category: General Computer Science

CSCI 4831 (1-3) Special Topics in Algorithms

Covers topics of interest in computer science at the upper-division undergraduate level. Content varies from semester to semester.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite courses of CSCI 3104 and CSCI 2820 or MATH 2130 or APPM 3310 (all minimum grade C-).

Additional Information: Departmental Category: General Computer Science

CSCI 4849 (3) Input, Interaction, and Accessibility

Explores input and interaction techniques, with an emphasis on universal design and alternative interfaces. Students will explore traditional input methods such as keyboard and mouse input, and alternative techniques such as voice and eye gaze. Students will conduct performance evaluations of existing techniques, and prototype new interaction methods. Students will design technologies to support people with varying abilities and disabilities.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5849

Requisites: Requires prerequisite of CSCI 3002 (minimum grade C-).

CSCI 4889 (3) Interactive Machine Learning for Customizable and Expressive Interfaces

Introduces students to techniques for applying machine learning in the development of customizable human-computer interfaces. Students will learn to process a wide variety of input data (e.g. video and accelerometer streams), using different machine learning algorithms to detect semantically meaningful events that can afford the construction of new interactive systems. They will complete substantial projections within the domains of assistive or creative technologies. Does not fulfill Breadth Requirement for CSEN graduate students.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5880, ATLS 4889 and ATLS 5880

Requisites: Requires prerequisite of (CSCI 3022 or APPM 4570 or APPM 3570 or APPM 4520 or CVEN 3227 or MATH 3510 or MATH 4510 or ECEN 3810 or ECON 3818 or MCEN 4120) and (CSCI 3002 or CSCI 3202 or CSCI 4448) all minimum grade C-.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Artificial Intelligence

CSCI 4900 (1-3) Upper Division, Undergraduate Level Independent Study

Provides opportunities for independent study at the upper-division undergraduate level. Students work on a small research problem or tutor lower-division computer science students.

Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite course of CSCI 1300 or CSCI 1310 or CSCI 1320 (all minimum grade C-).

Additional Information: Departmental Category: General Computer Science

CSCI 4950 (2-4) Senior Thesis

Provides an opportunity for senior computer science majors to conduct exploratory research in computer science. Department enforced restriction, successful completion of a minimum of 36 credit hours of Computer Science coursework and approved WRTG.

Repeatable: Repeatable for up to 8.00 total credit hours.

Requisites: Requires a prerequisite or corequisite course of CSCI 3100 (minimum grade C-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior).

Additional Information: Departmental Category: General Computer Science

CSCI 4960 (2-4) Computer Science Honors Thesis

Provides an opportunity for senior Computer Science majors to complete an honors thesis by conducting exploratory research in computer science. Department enforced prerequisites: successful completion of a minimum of 36 credit hours of Computer Science foundation and Computer Science electives and a writing requirement.

Repeatable: Repeatable for up to 8.00 total credit hours.

Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior).

Grading Basis: Letter Grade

Additional Information: Departmental Category: General Computer Science

Applied Computer Science - Post-Baccalaureate Bachelor of Science (BS)

The post-baccalaureate degree in applied computer science is on **online only** degree for professionals with a prior bachelor's degree that would benefit from computing but who do not have the prerequisite courses needed to pursue graduate studies. The goal of the program is to prepare students with a diverse academic background to enter the computer science field.

Students who do not have a previous bachelor's degree from an accredited university or college should apply to one of the on-campus programs: the Computer Science - Bachelor of Arts (BA) (p. 270) offered through the College of Arts & Sciences or the Computer Science - Bachelor of Science (BS) (p. 755) offered through the College of Engineering & Applied Science. Only the last degree program is accredited by the Computing Accreditation Commission of ABET.

The post-baccalaureate degree in applied computer science consists of 45 credit hours of computer science courses. Students can start any term – spring, summer or fall – and can study from anywhere in the world with an internet connection at any time of day. Students can complete the program by following a one-year, one-and-a-half-year, two-year or three-year pathway to completion. *The one-year plan requires a significant full-time commitment from students and approval from their academic advisor.*

For more information, visit the department's CSAP Online (<https://www.colorado.edu/cs/csap-online>) webpage.

Program Educational Objectives

The post-baccalaureate BS program aims to produce alumni that, within three to five years after graduation:

- are prepared to be valued individual contributors in a software-oriented organization, to be programmers and designers in an

entrepreneurial pursuit, to lead small projects and generally begin preparation for a management career, or to succeed in rigorous postgraduate programs;

- are able to focus their careers on pure computer science technology or to bring computer science expertise to a companion discipline;
- are prepared, where appropriate, to specialize in a broad spectrum of computer science sub-disciplines, ranging across formal computer science (e.g., computational science, bioinformatics and theory), cognitive science (e.g., human/machine learning, human-computer interaction, collaborative work and human language technologies), and core computing (e.g., systems, networks and software engineering).

Student Outcomes

The post-baccalaureate BS degree program has as its primary educational outcome the production of students who have strong skills in computing and information technology that can be applied within a variety of business or research contexts, skills that allow these students to achieve rewarding careers in a variety of disciplines. To achieve this outcome, the post-baccalaureate BS degree program aims to produce students that, at the time of graduation, have the ability to:

- apply knowledge of computing and mathematics in a variety of application contexts;
- analyze a problem and identify/define the computing requirements appropriate to its solution;
- design, implement and evaluate a computer-based system, process, component or program to meet desired needs;
- function effectively on teams to accomplish shared design, evaluation or implementation goals;
- understand professional, ethical, legal, security and social issues/responsibilities related to the computing profession;
- communicate effectively about computing topics with a range of audiences;
- analyze impacts of computing on individuals, organizations and society;
- engage in continuing professional development;
- use current techniques, skills and tools necessary for computing practice;
- apply mathematical foundations, algorithmic principles and computer science theory in the modeling and design of computer-based systems in a way that demonstrates comprehension of the trade-offs involved in design choices; and
- apply design and development principles in the construction of software systems of varying complexity.

Requirements

Admission Requirements

Prospective students must meet the following requirements:

- Have a four-year bachelor's degree from an accredited university.
- Have a minimum accumulated GPA of 2.75 in their existing bachelor's degree (applicants with significant life experience but a lower GPA will still be considered).
- Meet the math requirements.
- International students: Meet a minimum standard of English proficiency.

As part of the admissions process, students must:

- Complete an admissions application and pay the \$50 application fee (\$70 for international students).
- Provide a personal statement of 200-1000 words explaining why they are interested in the applied computer science degree, reflecting on the personal strengths (e.g., intellectual passion, academic abilities, disposition to work with professional colleagues) and life experiences that will enable them to succeed in the program.
- Provide two (2) letters of recommendation. References should be able to provide information regarding the applicant's ability to succeed in the program. We recommend references of the student's choice who are not relatives.
- Submit all official transcripts directly to CU Boulder from the issuing institution. Transcripts can be sent to transcripts@colorado.edu or mailed to the Office of Admissions (<http://www.colorado.edu/admissions/connect>).

Note: Meeting the minimum admissions requirements does not guarantee admission.

Math Requirements

Students are required to have one of the following:

- AP Calculus or Calculus 1 or successful completion of CLEP (<https://clep.collegeboard.org/science-and-mathematics/calculus>) exam for Calculus (CLEP exam credit is granted for a score at or above the 67th percentile) or successful completion of the ALEKS Prep for Calculus with Limits course with a grade of 80% or more.
- To take the self-paced ALEKS Prep for Calculus with Limits course, applicants should go to the ALEKS (<https://www.aleks.com>) website and sign up for the course using the class code: DURGV-K9TNH. Applicants will be required to purchase an access code to take the course. Course results will be verified by Veronika Lesiuk, Computer Science Post-Baccalaureate Program Manager, as part of the admissions process.

International Applicants

In addition to our general admission requirements, all international applicants are also required to meet a minimum standard of English proficiency. The TOEFL and IELTS are two different English language proficiency tests accepted by CU Boulder as proof of English proficiency. CU Boulder does not accept any other tests as proof of English proficiency. International applicants are required to demonstrate English proficiency with a passing TOEFL or IELTS score as set by the College of Engineering and Applied Science (<http://www.colorado.edu/engineering>).

TOEFL/IELTS Recommended Minimum English Proficiency Scores

- TOEFL: 83
- IELTS: 6.5

Total scores must include a TOEFL writing subscore of 19 or higher or an IELTS writing subscore of 5.5 or higher. Scores may not be combined.

Minimum English Proficiency

- Applicants are evaluated based on their overall application.
- Applicants who have taken the TOEFL or IELTS exams but do not meet the recommended minimum scores will still be considered for the program.

Proof of English proficiency is required for all international student applicants unless:

- The student has completed at least two years of full-time academic study at a U.S. high school or at a high school in a country where English is the native language (i.e., Australia, U.K.) at the time you begin studies at CU Boulder
- The student has completed at least one year of full-time academic study at a U.S. college or university or at an institution in a country where English is the native language (i.e., Australia, U.K.) at the time you begin studies at CU Boulder
- English is the student's native language

Sending TOEFL and IELTS Scores

Request that the testing agency submit your scores directly to the Office of Admissions. Scores must be received by the Office of Admissions no later than November 15 for spring applicants and June 15 for fall applicants. For more information on the TOEFL, go to www.toefl.org (<http://www.toefl.org>). For more information on the IELTS, go to www.ielts.org (<https://www.ielts.org>).

The CU Boulder school code for the TOEFL is 4841. IELTS does not have school codes. When requesting that your IELTS results to be sent to CU Boulder, have it sent to the following address:

Office of Admissions/International
University of Colorado Boulder
3100 Marine St Suite A122
65 UCB
Boulder, CO 80309-0065
USA

Returning to CU Boulder

Students who are enrolled in the program but do not register for courses for three consecutive semesters will have to reapply to the program.

Program Requirements

Current curricular requirements may be found on the department's Applied Computer Science B.S. Degree Requirements (<https://www.colorado.edu/cs/cs-online/curriculum>) web page.

Student must complete 26 credits of required computer science courses, as well as 19 credits of required core courses. Currently, the core courses below are planned to be offered online, with additional courses to be added in the future.

Required Courses and Credits

Code	Title	Credit Hours
Required Courses		
CSCI 1300	Computer Science 1: Starting Computing (or equivalent)	4
CSCI 2270	Computer Science 2: Data Structures	4
CSCI 2400	Computer Systems	4
CSCI 2824	Discrete Structures	3
CSCI 3104	Algorithms	4
CSCI 3155	Principles of Programming Languages	4
CSCI 3308	SoftwareDevelopment Methods and Tools	3
Core Courses		
CSCI 1000	Computer Science as a Field of Work and Study	1
CSCI 3022	Introduction to Data Science with Probability and Statistics	3
CSCI 3287	Design and Analysis of Data Systems	3

CSCI 4122		3
CSCI 4253	Datacenter Scale Computing - Methods, Systems and Techniques	3
CSCI 4502	Data Mining	3
CSCI 4XXX	Applied Computer Science Capstone	3
Total Credit Hours		45

Program Residency and Transfer Credits

Students are required to complete 45 credit hours of computer science courses in order to graduate. The residency requirement for the program is that at least 30 credit hours must be taken from CU Boulder courses in the program (online courses) after the student has matriculated in the program as an Applied Computer Science student.

Students who have taken on-campus computer science courses at CU Boulder can receive credit for a maximum of 15 credit hours before matriculating into the program.

Students who have taken computer science courses from other universities can transfer a maximum of 9 credit hours to the program assuming that the courses are equivalent to the courses in the program.

Courses that have been taken over 10 years ago may not be transferred to the program. These courses are evaluated on a case by case basis.

Recommended Plans of Study

One-Year Plan

Students can start in the fall, spring or summer. This example is based on a fall term start.

Course	Title	Credit Hours
Year One		
Fall Semester		
CSCI 1300	Computer Science 1: Starting Computing	4
CSCI 2824	Discrete Structures	3
CSCI 3022	Introduction to Data Science with Probability and Statistics	3
CSCI 4122		
		Credit Hours 10
Spring Semester		
CSCI 2270	Computer Science 2: Data Structures	4
CSCI 3104	Algorithms	4
CSCI 2400	Computer Systems	4
CSCI 3308	SoftwareDevelopment Methods and Tools	3
		Credit Hours 15

Summer

CSCI 3287	Design and Analysis of Data Systems	3
CSCI 3753	Design and Analysis of Operating Systems	4
CSCI 3155	Principles of Programming Languages	4
CSCI 4253	Datacenter Scale Computing - Methods, Systems and Techniques	3
CSCI 4502	Data Mining	3
		Credit Hours 17
		Total Credit Hours 42

Computer Science - Bachelor of Science (BS)

The goal of the Department of Computer Science is to prepare students for an intriguing and satisfying career in computer science in industry, research, or academia. The huge number of technical jobs and the continuing shortage of people to fill them mean that opportunities are great for today's computer science graduates when seeking career options or to continue on to graduate school.

The BS degree program in computer science emphasizes knowledge and awareness of computing at all levels, from circuits and computer architecture through operating systems and programming languages to large application systems; the theoretical and mathematical aspects of computing; the interdependence of hardware and software; and the challenge of large-scale software production and the engineering principles used to meet that challenge. Students may choose to take

classes that touch on a wide variety of computing topics, or may select classes that focus on a particular specialization.

For more information, visit the department's BS Degree (<http://www.colorado.edu/cs/current-students/undergraduate-students/bs-degree>) webpage.

Accreditation

The Bachelor of Science degree in computer science is accredited by the Computing Accreditation Commission of ABET, <http://www.abet.org>.

Program Educational Objectives

Our program educational objectives for students 3–5 years after graduating with a Bachelor of Science degree in computer science are that they will be:

- **Broadly Educated and Versatile.** Able to draw upon foundational knowledge, learn, adapt and successfully bring to bear analytical and computational approaches on changing societal and technological challenges
- **Inspiring and Collaborative.** Is a leader and a responsible citizen whose strengths come from an ability to draw on and contribute to diverse teams, expertise and experiences.
- **Innovative.** Drives scientific and societal advancement through technological innovation and entrepreneurship.
- **Engaged.** Is and remains engaged with the University of Colorado, the state of Colorado and technical and scientific professional communities.

Student Outcomes

Student outcomes describe what students are expected to know and be able to do by the time of graduation. The Computer Science Department's Bachelor of Science program must enable students to attain, by the time of graduation:

- Analyze a complex computing problem and to apply principles of computing and other relevant disciplines to identify solutions.
- Design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline.
- Communicate effectively in a variety of professional contexts.
- Recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles.
- Function effectively as a member or leader of a team engaged in activities appropriate to the program's discipline.
- Apply computer science theory and software development fundamentals to produce computing-based solutions.

Concurrent Degree Programs BS/MS in Computer Science

Applicants must have completed two 3000-level computer science courses on the Boulder campus. A cumulative GPA of 3.750 or better is required to apply to this program. Very few exceptions will be granted on a case-by-case basis. Students need to gain admission to this program during their junior year.

Six credit hours of Computer Science courses at the 5000 level or above may be counted towards both sets of degree requirements, if chosen from the approved list.

For more information, visit the department's Concurrent BS/MS (<http://www.colorado.edu/cs/current-students/undergraduate-students/concurrent-bsms>) webpage.

BS/MS in Computer Science and Interdisciplinary Telecommunications

The Bachelor of Science degree is from the Department of Computer Science (CS) and the Master of Science degree is from the Interdisciplinary Telecommunications Program (ITP) (p. 1361). The concurrent program enables well-qualified students to be admitted to the MS program during the junior year of their BS program, and to work toward earning both the BS and MS degrees. This concurrent degree program is aimed at the specific needs of companies requiring engineers to operate at the intersection of software development and telecommunications.

For more information, visit the department's Concurrent BS/MS (<http://www.colorado.edu/cs/current-students/undergraduate-students/concurrent-bsms>) webpage.

Requirements

Requirements for the BS degree in computer science include course work in computer science, mathematics, natural science, and the humanities and social sciences, as well as free elective course work.

The degree provides considerable freedom in the selection of specific courses to fulfill these requirements, allowing students to tailor the degree to their individual needs and interests.

A student may not earn both a BS degree in computer science and a BA degree in computer science (p. 270) from CU Boulder. A student may not earn a bachelor's degree in computer science and a minor in computer science from CU Boulder.

For more information, visit the department's BS Degree (<http://www.colorado.edu/cs/current-students/undergraduate-students/bs-degree>) webpage.

Course Requirements

Code	Title	Credit Hours
Computer Science Foundation		
CSCI 1000	Computer Science as a Field of Work and Study	1

Select additional courses to bring total Computer Science credit hours to at least 58; see department website for list of approved courses.		

Senior Capstone

CSCI 4308 & CSCI 4318	Software Engineering Project 1 and Software Engineering Project 2	8
or CSCI 4348 & CSCI 4358	Startup Essentials: Entrepreneurial Projects in Computing and Entrepreneurial Projects II	

Mathematics

APPM 1350	Calculus 1 for Engineers	4
or MATH 1300	Calculus 1	
or APPM 1340 & APPM 1345	Calculus 1 with Algebra, Part A and Calculus 1 with Algebra, Part B	
APPM 1360	Calculus 2 for Engineers	4
or MATH 2300	Calculus 2	
CSCI 2824	Discrete Structures	3
or ECEN 2703	Discrete Mathematics for Computer Engineers	
or APPM 3170	Discrete Applied Mathematics	
CSCI 2820	Linear Algebra with Computer Science Applications	3
or MATH 2130	Introduction to Linear Algebra for Non-Mathematics Majors	
or APPM 3310	Matrix Methods and Applications	
CSCI 3022	Introduction to Data Science with Probability and Statistics	3
or APPM 3570	Applied Probability	
or APPM 4520		
or APPM 4570	Statistical Methods	
or CVEN 3227	Probability, Statistics and Decision	
or MATH 3510	Introduction to Probability and Statistics	
or MATH 4510	Introduction to Probability Theory	
or ECEN 3810	Introduction to Probability Theory	
or ECON 3818	Introduction to Statistics with Computer Applications	

Logic & Ethics

<i>Logic</i>		
PHIL 1440	Critical Thinking	3
or PHIL 2440	Symbolic Logic	

Ethics

INFO 4601	Mastery in Information Science: Ethical and Policy Dimensions of Information, Technology and New Media	3
or PHIL 1100	Ethics	
or PHIL 1200	Contemporary Social Problems	

Humanities/Social Sciences/Writing

<i>Writing</i>		
HUEN 1010	Humanities for Engineers	3
or HUEN 3100	Advanced Humanities for Engineers	
or WRTG 3030	Writing on Science and Society	
or WRTG 3035	Technical Communication and Design	
or PHYS 3050	Writing in Physics: Problem-Solving and Rhetoric	
<i>Upper-Division Humanities/Social Sciences</i>		6
At least 6 credits of approved upper-division coursework		
<i>Remaining Humanities/Social Sciences</i>		9
At least 9 credits of approved coursework, any level		

Natural Science

PHYS 1110	General Physics 1	4
-----------	-------------------	---

PHYS 1120	General Physics 2	4
& PHYS 1140	and Experimental Physics 1	
or CHEN 1211	General Chemistry for Engineers	
& CHEM 1221	and Engineering General Chemistry Lab	
or CHEM 1113	General Chemistry 1	
& CHEM 1114	and Laboratory in General Chemistry 1	
or EBIO 1210	General Biology 1	
& EBIO 1230	and General Biology Laboratory 1	
or MCDB 1150	Introduction to Cellular and Molecular Biology	
& MCDB 1151	and Introduction to Cell and Molecular Biology Lab	
Natural Science electives to reach 17 credits		8-9
Free Electives		8-12
Additional coursework to bring cumulative total credit hours to at least 128		
Total Credit Hours		121-130

Students beginning the degree prior to Fall 2018 should see an academic advisor for information regarding curriculum requirements.

- ¹ Students may choose courses from the list of college-approved humanities and social sciences (HSS) electives (<https://www.colorado.edu/engineering-advising/get-your-degree/degree-requirements/humanities-social-sciences-and-writing-requirements>).
- ² Students may choose a course from the list of college-approved writing courses (<https://www.colorado.edu/engineering-advising/get-your-degree/degree-requirements/humanities-social-sciences-and-writing-requirements>).

Computer Science - Minor

The department offers a minor in computer science that is available to CU Boulder undergraduates. The minor offers a basic introduction to the field of computer science.

A student may not earn both a bachelor's degree in computer science (or applied computer science) and the minor in computer science from CU Boulder.

For more information, visit the department's Minor in Computer Science (<http://www.colorado.edu/cs/current-students/undergraduate-students/minor>) webpage.

Requirements

A minor in computer science can be earned in conjunction with any CU Boulder major degree, except for computer science (and applied computer science) BA and BS majors. For more information, visit the department's Minor in Computer Science (<http://www.colorado.edu/cs/current-students/undergraduate-students/minor>) webpage.

Prerequisites/Corequisites

Calculus courses do not count toward the 21 credit hours required for the computer science minor. Students should complete the following before pursuing the minor:

- Calculus 1 (MATH 1300, MATH 1310, APPM 1350 or APPM 1345)
- Calculus 2 (MATH 2300 or APPM 1360).

Required Courses and Credits

Code	Title	Credit Hours
Required Courses		
CSCI 1300 or CSCI 1320 or ECEN 1310	Computer Science 1: Starting Computing Computer Science 1: Starting Computing-Engineering Application C Programming for ECE	4
CSCI 2270	Computer Science 2: Data Structures	4
CSCI 2400	Computer Systems (except ECEN majors; see advisor for details)	4
CSCI 2824 or ECEN 2703	Discrete Structures (see advisor for other options) Discrete Mathematics for Computer Engineers	3
Approved upper-division Computer Science electives to reach minimum 21 credit hours, see CS Minor website for list of approved classes		6
Total Credit Hours		21

Advising

Advising for the minor is managed by the Computer Science Bachelor of Science advisors (<http://www.colorado.edu/engineering-advising/advisors>).

Time to Complete

Students should allow at least six semesters to complete the computer science minor, and are advised to start the minor no later than the first semester of their sophomore year. Otherwise, students should plan to complete summer courses or delay graduation.

Electrical, Computer & Energy Engineering

Electrical engineering offers study of the basic science and technology of information and energy. Its areas of knowledge include information theory and communications systems, computers and digital systems, signal processing and instrumentation, feedback systems and automatic control, electrical and electronic devices and systems, power electronics and renewable energy, electromagnetics and microwave devices and optics and photonic systems. Students learn how this basic knowledge is applied to such modern technologies as computers, telecommunications, biomedical systems, and remote sensing. The curriculum accommodates a variety of student interests including design, production, testing, consulting services, research, teaching, and management. Graduates pursue careers in a large variety of fields in the computer, telecommunications, instrumentation, biomedical, aerospace, energy, materials, and semiconductors industries, as well as academia. Some go on to careers in other professions such as law or medicine.

Electrical and computer engineering offers the same curriculum as electrical engineering, except that required courses in computer hardware and software replace some upper-division electives. As with electrical engineering, it accommodates broad student interests from design to service, and from research to management. Its graduates take positions in fields as diverse as those listed above for electrical engineering.

Course code for this program is ECEN.

Bachelor's Degree

- Electrical and Computer Engineering - Bachelor of Science (BS) (p. 778)
- Electrical Engineering - Bachelor of Science (BS) (p. 781)

Minor

- Computer Engineering - Minor (p. 783)
- Electrical Engineering - Minor (p. 783)
- Electrical Renewable Energy Systems - Minor (p. 784)
- Signals and Systems - Minor (p. 785)

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Zabotin, Nikolay (https://experts.colorado.edu/display/fisid_127038)
Research Professor

Zane, Regan A (https://experts.colorado.edu/display/fisid_109504)
Associate Professor; PhD, University of Colorado Boulder

Courses

ECEN 1030 (1-4) Special Topics

Special topics class.

ECEN 1100 (1) Exploring ECE

Introduces students to areas of emphasis with the ECE department through seminars presented by faculty and outside speakers. Emphasizes career opportunities, professional ethics and practices, history of the profession, and resources for academic success. Several sessions promote team building and problem solving, and provide opportunities for freshmen to meet their classmates.

Additional Information: Departmental Category: General

ECEN 1310 (4) C Programming for ECE

Introduces fundamental programming concepts with engineering applications using C at a lower level of abstraction and MATLAB at a higher, application-focused level. Teaches the use of pointers, control flow, and data types. Example engineering applications include signal processing and the numerical computations. Includes a weekly computer lab session.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 1300 or CSCI 1310 or CSCI 1320

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

Recommended: Prerequisite APPM 1350.

Additional Information: Departmental Category: General

ECEN 1400 (3) Introduction to Digital and Analog Electronics

Introduces fundamental concepts in electrical and computer engineering such as Ohm's Law, capacitors, LEDs and 7-segment displays, transformers and rectifiers, digital logic, Fourier decomposition, frequency analysis. Lab work exposes students to commonly used instrumentation. Includes a final project. Skills in wiring, soldering and wire-wrapping are developed.

Additional Information: Departmental Category: General

ECEN 1500 (3) Sustainable Energy

Explores how energy is generated and used in today's society. Through collaborative discussion and hands-on data collection, students will analyze the engineering challenges, fundamental limits, and potential solutions to meeting our energy needs sustainably. Students will learn to analyze numerical data, estimate orders of magnitude, and apply mathematical methods in their own lives and in the ongoing energy debate. Basic algebra required.

Requisites: College of Engineering majors are excluded from this course.

Additional Information: Arts Sci Core Curr: Quant Reason Mathmat Skills
Arts Sci Gen Ed: Quantitative Reasoning Math
Departmental Category: General

ECEN 1840 (1-6) Independent Study

Provides an opportunity for freshmen to do independent, creative work. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: General

ECEN 2010 (1-5) Special Topics

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: General

ECEN 2020 (1-5) Special Topics

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: General

ECEN 2050 (1-5) Special Topics

Additional Information: Departmental Category: General

ECEN 2060 (1-5) Special Topics

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: General

ECEN 2250 (3) Introduction to Circuits and Electronics

Introduces linear circuit analysis and design, including OP-Amps. Presents DC networks, including node and mesh analysis with controlled sources. Analysis of RL and RC circuits for both transient and sinusoidal steady-state responses using phasors.

Requisites: Requires prerequisite course of APPM 1360 or MATH 2300 and PHYS 1120 (all minimum grade C-), and corequisite course of APPM 2360. Restricted to College of Engineering majors only.

Recommended: Prerequisite ECEN 1310 or CSCI 1300.

Additional Information: Departmental Category: General

ECEN 2260 (3) Circuits as Systems

Continues basic circuit analysis of ECEN 2250: Laplace transform techniques, transfer functions, frequency response, Bode diagrams, resonant circuits, Fourier series expansions, and convolution.

Requisites: Requires prerequisite course of ECEN 2250 (minimum grade C-). Restricted to College of Engineering students only.

Recommended: Corequisite ECEN 2270.

Additional Information: Departmental Category: General

ECEN 2270 (3) Electronics Design Lab

Provides an introduction to analysis, modeling, design, and testing of analog electronic circuits in a practical laboratory setting. The laboratory is centered around a robot platform and includes design, SPICE simulations, prototyping and testing of circuits necessary to drive and remotely control the robot.

Requisites: Requires prerequisite course of ECEN 2260 or corequisite course of ECEN 2260. Restricted to College of Engineering majors only.

Additional Information: Departmental Category: General

ECEN 2310 (1) Programming with Mathematical Software

Applies mathematical software to the solution of engineering applications, using numerical and symbolic techniques. Typical applications include the manipulation of acoustic signals and the study of the dynamics of simple continuous and discrete systems.

Requisites: Requires prerequisites ECEN 1310 or CSCI 1300 or CSCI 1320 (all minimum grade C-). Restricted to College of Engineering students.

Grading Basis: Letter Grade

ECEN 2350 (3) Digital Logic

Covers the design and applications of digital logic circuits, including both combinational and sequential logic circuits. Introduces hardware descriptive language, simulating and synthesis software, and programming of field programmable arrays (FPGAs).

Requisites: Requires prerequisite course of ECEN 1310, CSCI 1300, or CSCI 1310 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: General

ECEN 2410 (3) Renewable Sources and Efficient Electrical Energy Systems

Introduces electrical power generation and renewable energy, including solar, wind, micro, hydro, coal, nuclear and natural gas and some of the issues in integrating renewable energy sources in the grid.

Requisites: Requires prerequisite course of PHYS 1120 (minimum grade C-). Requires corequisite course of ECEN 2250. Restricted to College of Engineering majors only.

Additional Information: Departmental Category: General

ECEN 2420 (3) Electronics for Wireless Systems

Explores fundamental principles behind the operation of a radio, including a practical introduction to circuit elements. Covers the components and operation of a radio (transmitter and receiver) with simple signals. Students learn lab exercises the operation principles behind components of a complete practical radio system.

Requisites: Requires prerequisite course of PHYS 1120 and APPM 1360 or MATH 2300 (all minimum grade C-). Requires corequisite course of ECEN 2250. Restricted to Electrical and Computer Engineering (ECEN) or Electrical Engineering (EEEN) majors only.

Additional Information: Departmental Category: General

ECEN 2440 (3) Application of Embedded Systems

Introduces embedded systems and key computer architecture concepts through a variety of projects involving programming a microcontroller in C. Provides students hands-on projects that combine the knowledge gained in their digital and analog coursework in order to engineer hardware, firmware and application software design solutions. Includes a weekly lecture and two weekly laboratory sessions.

Requisites: Requires a prerequisite course of ECEN 1310 (minimum grade C-). Requires corequisite course of ECEN 2250.

Additional Information: Departmental Category: General

ECEN 2703 (3) Discrete Mathematics for Computer Engineers

Emphasizes elements of discrete mathematics appropriate for computer engineering. Topics: logic, proof techniques, algorithms, complexity, relations, and graph theory.

Requisites: Requires prerequisite courses of ECEN 1310 or CSCI 1300 and APPM 1360 or MATH 2300 (all minimum grade C-). Restricted to College of Engineering students only.

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 2830 (1-5) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: General

ECEN 2840 (1-6) Independent Study

Offers an opportunity for sophomores to do independent, creative work.
 Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: General

ECEN 3002 (3-5) Special Topics

Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 3003 (3-5) Special Topics

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 3004 (3-5) Special Topics

Additional Information: Departmental Category: Electromagnetics and Remote Sensing

ECEN 3010 (3) Circuits and Electronics for Mechanical Engineers

Covers analysis of electrical circuits by use of Ohm's law, network reduction, node and loop analysis, Thevenin's and Norton's theorems, DC and AC signals, transient response of simple circuits, transfer functions, basic diode and transistor circuits, and operational amplifiers. Includes introductory digital electronics and microprocessors/microcontrollers.

Equivalent - Duplicate Degree Credit Not Granted: MCEN 3017

Requisites: Requires prereq course of PHYS 1120 (min grade C). Requires a prereq or coreq course of APPM 2360. Restricted to students with 57-180 credits (Jr or Sr) Mechanical Engr (MCEN) or Electrical Engr (ECEN) or Engineering Plus (GEEN) majors only.

Additional Information: Departmental Category: General

ECEN 3030 (3) Electrical/Electronic Circuits Non-Major

For students not majoring in electrical engineering. Covers analysis of electric circuits by use of Ohm's law; network reduction; superposition; node analysis; Thevenin's and Norton's theorems; sinusoidal signals; phasors; power in AC circuits; transient response, operation of simple circuits; rectifiers; transformers; 3-phase circuits; motors and generators.

Requisites: Requires prereq course of APPM 2360 (min grade C-). Electrical Computer Engineering (ECEN), Electrical Engineering (EEEN), Electrical Computer Engineering and Electrical Engineering Concurrent Degree (C-ECEN/EEEN) mjrs are excluded from this course

Additional Information: Departmental Category: General

ECEN 3070 (3) Edges of Science

Examines the evidence for paranormal phenomena, reasons for skepticism, and physical models that could account for the data. Reviews controversial scientific theories that overcame barriers to acceptance, and how worldviews shift. Considers the scientific method and ways uncontrolled factors might influence experiments. Develops skills in statistical analysis of data. Includes group projects testing for anomalous and parapsychological effects. Not accepted as a technical elective for engineering majors.

Additional Information: Departmental Category: General

ECEN 3170 (3) Electromagnetic Energy Conversion 1

Real and reactive power in single phase circuits, power triangle, balanced three-phase circuits, wye and delta connections, introduction to electromagnetic machines, transformers (single and three-phase) and their equivalent circuits, AC-machinery fundamentals, synchronous generator from a magnetic field point of view, synchronous motors and condensers, three-phase induction motors, DC machinery fundamentals, DC motors, single phase motors. Matlab/Simulink will be used.

Requisites: Requires prerequisite courses of ECEN 2260 and PHYS 1120 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Power

ECEN 3250 (3) Microelectronics

Develops a basic understanding of active semiconductor devices. Focuses on building an understanding of BJT and CMOS devices in both digital and analog applications.

Requisites: Requires prerequisite course of ECEN 2260 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: General

ECEN 3300 (3) Linear Systems

Characterization of linear time-invariant systems in time and frequency domains. Continuous time systems are analyzed using differential equations and Laplace and Fourier transforms. Discrete time systems are analyzed using difference equations, Z-transforms and discrete time Fourier transforms. Sampling and reconstruction of signals using the sampling theorem. Applications of linear systems include communications, signal processing, and control systems.

Requisites: Requires prerequisite course of ECEN 2260 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: General

ECEN 3303 (3) Introduction to Robotics

Introduces students to fundamental concepts in autonomous, mobile robotics: mechanisms, locomotion, kinematics, control, perception and planning. The course consists of lectures and lab sessions that are geared toward developing a complete navigation stack on a miniature mobile robotic platform.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 3302

Requisites: Requires prerequisite courses of CSCI 2270 and (CSCI 2824 or ECEN 2703 or APPM 3170 or MATH 2001) and (APPM 2360 or APPM 3310 or CSCI 2820 or MATH 2130 or MATH 2135) (all minimum grade C-).

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 3320 (3) Semiconductor Devices

Highlights the fundamentals of semiconductor materials and devices. Topics include the electrical and optical properties of semiconductors, the theory of Pn junctions, bipolar and field-effect transistors, and optoelectronic devices.

Requisites: Requires prerequisite course of ECEN 3250 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: General

ECEN 3350 (3) Programming Digital Systems

Explores how computers and programmable hardware in general are used to implement digital systems by looking at the capabilities of central processing units, the use and control of various input/output (I/O) devices, memory organization, and concurrency management. Topics include computer architecture, instruction sets, I/O device programming, interrupts, data transfer mechanisms, semaphores, and memory management.

Requisites: Requires prerequisite course of ECEN 2350 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 3360 (3) Digital Design Laboratory

Introduces digital system design, including system software and hardware building blocks, and system software-hardware integration. Emphasizes hands-on system development and debugging. Uses mainstream electronic system design platforms, including FPGAs, embedded and mobile computing platforms, and Assembly/C/Java/Verilog programming languages.

Requisites: Requires prerequisite course ECEN 3350 (minimum grade C-) or corequisite of ECEN 3350. Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 3400 (3) Electromagnetic Fields and Waves

Electromagnetic fields are covered at an introductory level, starting with electrostatics and continuing with DC current, magnetostatics, time-varying magnetic fields, waves on transmission lines, Maxwell's equations and the basics of plane waves. The use of fields in inductors, capacitors, resistors, transformers, and energy and power concepts are studied.

Requisites: Requires prerequisites (APPM 2350 or MATH 2400) and APPM 2360 and PHYS 1120 and ECEN 2250 (all minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: General

ECEN 3410 (3) Electromagnetic Waves and Transmission

Covers reflected and transmitted plane waves in layered media, Poynting's theorem of electromagnetic power, two-conductor transmission line theory and practice, Smith chart usage and impedance matching, waveguides, and elements of antenna theory.

Requisites: Requires prerequisite course ECEN 3400 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Electromagnetics and Remote Sensing

ECEN 3810 (3) Introduction to Probability Theory

Covers the fundamentals of probability theory, and treats the random variables and random processes of greatest importance in electrical engineering. Provides a foundation for study of communication theory, control theory, reliability theory, and optics.

Equivalent - Duplicate Degree Credit Not Granted: MATH 4510 or APPM 3570

Requisites: Requires prerequisite course of APPM 2350 or MATH 2400 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: General

ECEN 3840 (1-6) Independent Study

Offers an opportunity for juniors to do independent, creative work. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: General

ECEN 3841 (1-6) Independent Study

Offers an opportunity for juniors to do independent, creative work.

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: General

ECEN 4000 (1-3) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: General

ECEN 4001 (1-4) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Bioengineering

ECEN 4002 (1-4) Special Topics

Credit and subject matter to be arranged. Department enforced prerequisite: varies

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 4003 (1-4) Special Topics

Credit and subject matter to be arranged. Department enforced prerequisite: varies

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

ECEN 4004 (1-4) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

ECEN 4005 (1-4) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

ECEN 4006 (1-4) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.

Repeatable: Repeatable for up to 9.00 total credit hours.

Additional Information: Departmental Category: Optics

ECEN 4007 (1-4) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

ECEN 4009 (1-4) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: VLSI CAD Methods

ECEN 4011 (1-4) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5011

Repeatable: Repeatable for up to 9.00 total credit hours.

Additional Information: Departmental Category: Bioengineering

ECEN 4012 (1-4) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.

Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 4013 (1-4) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.
Additional Information: Departmental Category: Computer and Digital Systems

ECEN 4016 (1-4) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.
Additional Information: Departmental Category: Optics

ECEN 4017 (1-4) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.
Additional Information: Departmental Category: Power

ECEN 4018 (1-4) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.
Additional Information: Departmental Category: Dynamical Systems and Control

ECEN 4021 (1-4) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Engineering majors only.
Additional Information: Departmental Category: Bioengineering

ECEN 4024 (1-4) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 5024
Additional Information: Departmental Category: Electromagnetics and Remote Sensing

ECEN 4028 (1-4) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.
Additional Information: Departmental Category: Dynamical Systems and Control

ECEN 4031 (1-4) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.

ECEN 4033 (3) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

ECEN 4043 (1-4) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.

ECEN 4053 (1-4) Special Topics

Special topics course.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 5053
Repeatable: Repeatable for up to 4.00 total credit hours.
Additional Information: Departmental Category: Computer and Digital Systems

ECEN 4106 (3) Photonics

Deals with the generation, transmission, modification and detection of light. Applications include fiber optics communications, data storage, sensing, and imaging. Leads to understanding of fundamental physical principles used in the analysis and design of modern photonic systems.
Requisites: Requires prerequisite course of ECEN 3400 (minimum grade C-). Requires a corequisite course of ECEN 3300. Restricted to College of Engineering majors only.
Additional Information: Departmental Category: Optics

ECEN 4116 (3) Introduction to Optical Communications

Given data rates, distance, reliability or bit error rates, the information required to specify the type of fiber, the source, the wave length, type of modulation, repeater or optical amplifiers, and detectors will be presented.
Requisites: Requires prerequisite course of ECEN 3400 (minimum grade C-). Restricted to College of Engineering majors only.
Additional Information: Departmental Category: Optics

ECEN 4133 (3) Fundamentals of Computer Security

Practice thinking like an attacker by exploring several modern computer security attacks and defenses through hands-on programming projects. Topics include applied cryptography (encryption, authentication), web security (XSS, CSRF, SQL Injection), network security (TLS, MITM attacks), application security (shell injection, buffer overflows), and other current events and trends (government surveillance, botnets, cryptocurrencies).
Grading Basis: Letter Grade

ECEN 4138 (3) Control Systems Analysis

Analysis and design of continuous time control systems using classical and state space methods. Laplace transforms, transfer functions and block diagrams. Stability, dynamic response, and steady-state analysis. Analysis and design of control systems using root locus and frequency response methods. Computer aided design and analysis. Department enforced prerequisite: background in Laplace transforms, linear algebra, and ordinary differential equations.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 5138
Requisites: Requires prerequisite course of ECEN 3300 (minimum grade C-). Restricted to College of Engineering majors only.
Additional Information: Departmental Category: Dynamical Systems and Control

ECEN 4167 (3) Electromagnetic Energy Conversion 2

Introduction to electric machine drives, basic electric machine mechanics, structure and modeling of electric machines (DC, Synchronous, Linear, Induction), reference frame theory using d-q modeling based on the complex space vector and on matrix transformation, transient and steady state analysis of three-phase machine, design of speed regulators, vector control. Matlab/Simulink will be used.
Requisites: Requires prerequisite course of ECEN 3170 (minimum grade C-). Restricted to College of Engineering majors only.
Additional Information: Departmental Category: Power

ECEN 4224 (3) High Speed Digital Design

Covers fundamentals of high-speed properties of logic gates, measurement techniques, transmission lines, ground planes and layer stacking, terminations, vias, power systems, connectors, ribbon cables, clock distribution and clock oscillators.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 5224
Requisites: Requires prerequisite course of ECEN 3400 (minimum grade C-). Restricted to College of Engineering majors only.
Additional Information: Departmental Category: Electromagnetics and Remote Sensing

ECEN 4242 (3) Communication Theory

Covers modern digital and analog communication systems. Analysis and design of communication signals, transmitters, channels, and receivers. Amplitude and angle modulation and demodulation are treated as well as theory and application of digital data transmission. Emphasis is also placed on the analysis and mitigation of the effects of noise through signal design at the transmitter and signal processing at the receiver.

Requisites: Requires prerequisite course of ECEN 3300 and ECEN 3810 or APPM 3570 or MATH 4510 (all minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 4313 (3) Concurrent Programming

Introduces the theory and practice of multicore programming. The first part of the course presents foundations of concurrent programming: mutual exclusion, wait-free and lock-free synchronization, spin locks, monitors, memory consistency models. The second part presents a sequence of concurrent data structures and techniques used in their implementations (coarse-grained, fine-grained, optimistic and lock-free synchronization).

Requisites: Requires a prerequisite course of ECEN 1310 or CSCI 1300 or CSCI 1310 (all minimum grade C-).

Grading Basis: Letter Grade

ECEN 4324 (3) Fundamentals of Microsystem Packaging

Introduction to the fundamentals of microsystems packaging. A seminar style course which surveys topics in microsystem packaging such as electrical package design, design for reliability, thermal management, multichip packaging, IC Assembly, sealing and encapsulation, and board assembly.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5324

Requisites: Requires prerequisite course or corequisite course of ECEN 3410 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Electromagnetics and Remote Sensing

ECEN 4341 (3) Bioelectromagnetics

Effects of electric and magnetic fields on biological systems are described with applications to therapy and safety. The complexity of biological systems is described to provide a better understanding of the distribution of fields inside the body. Risk analysis is also introduced.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5341

Requisites: Requires prerequisite courses of ECEN 3400 and ECEN 3810 or APPM 3570 or MATH 4510 (all minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Bioengineering

ECEN 4375 (3) Microstructures Laboratory

Offers experience in monolithic silicon integrated circuit fabrication techniques, including IC layout, pattern compiling and generation, mask making, oxidation, photolithography, diffusion, implantation, metallization, bonding, process analysis and testing. Includes design project.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5375

Requisites: Requires prerequisite course of ECEN 3320 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Nanostructures and Devices

ECEN 4423 (3) Chaotic Dynamics

Explores chaotic dynamics theoretically and through computer simulations. Covers the standard computational and analytical tools used in nonlinear dynamics and concludes with an overview of leading-edge chaos research. Topics include time and phase-space dynamics, surfaces of section, bifurcation diagrams, fractal dimension and Lyapunov exponents.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5423 and CSCI 4446 and CSCI 5446

Requisites: Requires prerequisite courses of APPM 1360 or MATH 2300 and ECEN 1310 or CSCI 1300 and PHYS 1110 (all minimum grade C-). Restricted to College of Engineering majors only.

Recommended: Prerequisites PHYS 1120 and CSCI 3656 and MATH 2130.

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 4517 (3) Power Electronics and Photovoltaic Power Systems Laboratory

Focuses on analysis, modeling, design and testing of electrical energy processing systems in a practical laboratory setting. Studies power electronics converters for efficient utilization of available energy sources, including solar panels and utility. Experimental projects involve design, fabrication and testing of a solar power system.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5517

Requisites: Requires prerequisite course of ECEN 4797 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Power

ECEN 4532 (3) Digital Signal Processing Laboratory

Develops experience in code development, debugging and testing of real-time digital signal processing algorithms using dedicated hardware. Applications include filtering, signal synthesis, audio special effects and frequency domain techniques based on the Fast Fourier Transform.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5532

Requisites: Requires prerequisite course of ECEN 4632 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 4553 (3) Compiler Construction

Introduces the principles and techniques for compiling high-level programming languages to assembly code. Topics include parsing, instruction selection, register allocation, and compiling high-level features such as polymorphism, first-class functions, and objects. Students build a complete compiler for a simple language.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5523 and CSCI 4555 and CSCI 5525

Requisites: Requires prerequisite courses of ECEN 2703 and ECEN 3350 (all minimum grade C). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 4555 (3) Principles of Energy Systems and Devices

Develops principles underlying electronic, optical and thermal devices, materials and nanostructures for renewable energy. Provides a foundation in statistical thermodynamics and uses it to analyze the operation and efficiency limits of devices for photovoltaics, energy storage (batteries & ultra-capacitors), chemical conversion (fuel cells and engines), solid state lighting, heat pumps, cooling and potentially harvesting zero-point energy from the vacuum.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5555

Requisites: Requires prerequisite courses of ECEN 3810 or APPM 3570 or MATH 4510 and PHYS 2130 or PHYS 2170 (all minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Nanostructures and Devices

ECEN 4583 (3) Software System Development

Lectures deal with techniques for product requirements definition, project planning, coding, verification, validation, performance evaluation, and maintenance of medium-scale (2-3000 line) systems. Primary emphasis is on practical application of these techniques to a specified software project. Students work in teams to produce appropriate documents for each phase and are responsible for project completion according to specification and schedule. Course project is written in C on a Unix look-alike system; prior knowledge of C or Unix is not required.

Requisites: Requires prerequisite course of CSCI 2270 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 4593 (3) Computer Organization

Studies computer design at the gate level. Discusses instruction set architecture design, arithmetic and logic unit design, control logic, memory design and caches, simple pipelining, I/O and peripheral devices. Briefly covers aspects of modern computer architecture, such as multicore processors and cache coherence for these.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 4593

Requisites: Requires prerequisite course of ECEN 3350 or CSCI 2400 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 4606 (3) Undergraduate Optics Laboratory

Introduces fundamental concepts, techniques, and technology of modern optical and photonic systems. Individual labs cover particular fields of optical technology, including light sources such as lasers and Leds, interferometers, fiber-optic communications, photodetection, spectrometers, and holography. Practical skills such as how to align an optical system will also be emphasized.

Requisites: Requires prerequisite course of ECEN 3400 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Optics

ECEN 4610 (3) Capstone Laboratory Part 1

Hands-on laboratory experience utilizing teams in the systematic proposal, design, integration, and testing of an electronic/computer based system. Results will be the prototype of a stand-alone analog/digital system. Must have completed all required Advanced Analog Core courses for major, except one course may be taken concurrently by petition. Must take ECEN 4620 to complete the sequence. Minimum required grade for this course and ECEN 4620 is C-.

Requisites: Requires prereq of ECEN 3360 either ECEN 3250 3300; or ECEN 3250 3400; or ECEN 3300 3400 (min grade C-). Restricted to Elect/Comp Engr (ECEN) or Elect Engr (EEEN) or Elect/Comp Engr or Elect Engr Concurrent Degree (C-EEEN or C-ECENEEN) mjrs only

Additional Information: Departmental Category: General

ECEN 4616 (3) Optoelectronic System Design

Examines optical components and electro-optic devices with the goal of integrating into well design optoelectronic systems. Sample systems include optical storage, zoom lenses and telescopes.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5616

Requisites: Requires prerequisite course of ECEN 3400 (minimum grade C-).

Additional Information: Departmental Category: Optics

ECEN 4620 (3) Capstone Lab, Part 2

Hands-on laboratory experience for teams in the systematic proposal, design, build integration, test and documentation of an electronic/computer based system. Results will be a reliably operating, stand-alone analog/digital system, with publication quality technical documentation. Department enforced prerequisite: advanced analog core courses.

Requisites: Requires prerequisite course of ECEN 4610 (minimum grade C-). Restricted to Electrical and Computer Engineering (ECEN) or Electrical Engineering (EEEN) or ECEE concurrent (C-EEEN or C-ECENEEN) majors only.

Additional Information: Departmental Category: General

ECEN 4632 (3) Introduction to Digital Filtering

Covers both the analysis and design of FIR and IIR digital filters. Discusses implementations in both software and hardware. Emphasizes use of the FFT as an analysis tool. Includes examples in speech processing, noise canceling, and communications.

Requisites: Requires prerequisite course of ECEN 3300 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 4633 (3) Hybrid Embedded Systems

Introduces system hardware and design techniques for embedded and hybrid reconfigurable systems. Intended for those interested in developing projects using hardware description languages to build application-specific computing systems. Industry standards are used for design, development and debugging.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5633

Requisites: Requires prerequisite courses of ECEN 3350 and ECEN 4593 (all minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Embedded Systems Engineering

ECEN 4634 (3) Microwave and RF Laboratory

Introduce RF and microwave measurement methods. A laboratory course whose experiments build on material learned in ECEN 3410: electromagnetic waves, transmission lines, waveguides, time-domain reflection, frequency-domain measurement, microwave networks, impedance matching, antenna pattern measurement, radar and simple nonlinear concepts such as harmonics, square-law detection, mixing and transmitter/receiver applications.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5634

Requisites: Requires prerequisite course of ECEN 3410 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Electromagnetics and Remote Sensing

ECEN 4638 (3) Control Systems Laboratory

Provides experience in control system design and analysis, using both real hardware and computer simulation. Covers the entire control system design cycle: modeling the system, synthesizing a controller, conducting simulations, analyzing the design to suggest modifications and improvements, and implementing the design for actual testing.

Requisites: Requires prerequisite course of ECEN 4138 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Dynamical Systems and Control

ECEN 4643 (3) SW Engineering of Concurrent Systems

Addresses engineering of applications requiring multiple software processes running concurrently, sharing data, and communicating as a system in a single environment. Topics include performance analysis of architecture design; analysis of requirements, design and testing of synchronization and communication; the interplay of system design and performance with the impact of memory management, input/output, and file system support.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5643

Requisites: Requires prerequisite course of ECEN 4583 or ECEN 5543 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 4652 (3) Communication Laboratory

Analysis and design of realistic communication signals in a modern digital signal processing environment. Covers both analog and digital communication signals with and without noise and distortion. Pulse amplitude modulation is used initially at baseband and then combined with amplitude and phase/frequency modulation to produce the kind of bandpass signals that are used in cell phones and wireless data networks.

Requisites: Requires prerequisite course of ECEN 4242 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 4653 (3) Real-Time Digital Media

Learn how to design and build Linux-based real-time system applications for digital media encode/decode and transport. Course focus is on the process as well as fundamentals of designing, coding, and testing Linux-based real-time systems often used in industry for digital media systems. Students use POSIX kernel-mapped threads and drivers to implement real-time digital media solutions.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5653

Requisites: Requires prerequisite course of ECEN 1030 or ECEN 1310 or CSCI 1300 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Embedded Systems Engineering

ECEN 4743 (3) SW Engineering of Distributed Systems

Addresses engineering of networked applications and self-contained embedded system products involving multiple processors. The fundamental concepts of software engineering are complicated by an application running simultaneously and asynchronously on multiple processors over a network. Topics: specification, analysis, design, and testing of distributed components including concerns of security, synchronization, transaction coordination, data replication, web services, and service oriented architectures.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5743

Requisites: Requires prerequisite course of ECEN 4583 or ECEN 5543 or CSCI 5548 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 4753 (3) Computer Performance Modeling

Presents a broad range of system modeling techniques, emphasizing applications to computer systems. Covers stochastic processes, queuing network models, stochastic Petri nets and simulation (including parallel processing techniques). Also requires second-semester calculus.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5753 and CSCI 4753 and CSCI 5753

Requisites: Requires prerequisite course of CSCI 3753 (minimum grade C-). Restricted to College of Engineering majors only.

Recommended: Prerequisite a course in statistics.

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 4797 (3) Introduction to Power Electronics

An introduction to switched-mode converters. Includes steady-state converter modeling and analysis, switch realization, discontinuous conduction mode and transformer-isolated converters. Ac modeling of converters using averaged methods, small-signal transfer functions, feedback loop design and transformer design.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5797

Requisites: Requires prerequisite course of ECEN 3250 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Power

ECEN 4811 (3) Neural Signals and Functional Brain Imaging

Explores bioelectric and metabolic signals generated by the nervous system from two stand points: 1) their biophysical genesis and role in neural integration and 2) neurotechnologies such as electroencephalography, magnetoencephalography, deep brain stimulation and functional magnetic resonance imaging.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4811 and ASEN 4216 and ASEN 5216

Requisites: Requires prerequisite course of ECEN 2260 or ECEN 3030 or ASEN 3300 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Bioengineering

ECEN 4821 (3) Neural Systems and Physiological Control

A biophysical exploration of human physiology from the standpoints of control systems and neural information processing. Topics include: neural control of movement and cardiovascular performance, tissue growth and repair, carcinogenesis, and physiological responses to microgravity.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5821 and ASEN 4426 and ASEN 5426

Requisites: Requires prerequisite course of ECEN 2260 or ECEN 3030 or ASEN 3300 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Bioengineering

ECEN 4827 (3) Analog IC Design

Covers the fundamentals of transistor-level analog integrated circuit design. Starting with motivations from application circuits, the course develops principles of dc biasing, device models, amplifier stages, frequency response analysis and feedback and compensation techniques for multi-stage operational amplifiers.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5827

Requisites: Requires prerequisite course of ECEN 3250 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Power

ECEN 4831 (3) Brains, Minds, and Computers

Provides background for the design of artificially intelligent systems based upon our present knowledge of the human brain. Includes similarities and differences between the brain and computers, robots and common computer models of brain and mind. Emphasizes the neuron as an information processor, and organization of natural as well as synthetic neural networks.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5831 and ASEN 5436

Requisites: Requires prerequisite course of ECEN 2260 or ECEN 3030 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Bioengineering

ECEN 4840 (1-6) Independent Study

Offers an opportunity for seniors to do independent, creative work. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: General

ECEN 4841 (1-6) Independent Study

Offers an opportunity for seniors to do independent, creative work.

Repeatable: Repeatable for up to 6.00 total credit hours.

ECEN 5000 (3) Graduate Professional Seminar

Grading Basis: Letter Grade

Additional Information: Departmental Category: General

ECEN 5005 (1-4) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Nanostructures and Devices

ECEN 5008 (1-4) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Dynamical Systems and Control

ECEN 5009 (1-4) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: VLSI CAD Methods

ECEN 5011 (1-4) Special Topics

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4011

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Bioengineering

ECEN 5012 (3) Special Topics

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 5013 (1-4) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Campus section restricted to graduate students in EEEN or BS/Professional MS concurrent degree students with BS portion in EEEN or ECEN.

ECEN 5016 (1-4) Special Topics

Additional Information: Departmental Category: Optics

ECEN 5018 (1-4) Special Topics

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Dynamical Systems and Control

ECEN 5021 (1-4) Special Topics

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students in Electrical Engineering (EEEN) or in Electrical/Computer Engineering (ECEN) or to Electrical or Electrical/Computer Engineering BS/MS Concurrent degree students or to Graduate Certificate Engineering (CRTGE) students.

Additional Information: Departmental Category: Bioengineering

ECEN 5023 (3) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering, Embedded Systems.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Campus section restricted to graduate students in EEEN or BS/Professional MS concurrent degree students with BS portion in EEEN or ECEN.

Additional Information: Departmental Category: Embedded Systems Engineering

ECEN 5024 (1-4) Special Topics

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4024

Additional Information: Departmental Category: Electromagnetics and Remote Sensing

ECEN 5028 (1-4) Special Topics

Additional Information: Departmental Category: Dynamical Systems and Control

ECEN 5032 (3) Special Topics

Additional Information: Departmental Category: Bioengineering

ECEN 5053 (3) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering - Embedded Engineering.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4053

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Campus section restricted to graduate students in EEEN or BS/Professional MS concurrent degree students with BS portion in EEEN or ECEN.

Additional Information: Departmental Category: Embedded Systems Engineering

ECEN 5104 (3) Computer-Aided Microwave Circuit Design

Emphasizes the design of strip-line and microstrip circuits, using a CAD package. Discusses design of impedance transformers, amplifiers, switches, phase-shifters, etc. Assignments include design of typical circuits and their analysis using a microwave circuit analysis program. Laboratory includes measurements using a network analyzer facility on a typical circuit designed and fabricated by students.

Requisites: Requires a prereq course of ECEN 3410 (min grade D-).

Restricted to EEEN or ECEN graduate students or Electrical Engineering Concurrent or Electrical/Computer Engineering Concurrent Degree students only.

Additional Information: Departmental Category: Electromagnetics and Remote Sensing

ECEN 5107 (3) Electric Power Grid

Examines the electrical grid, including conventional generation, transmission/ distribution, and new renewable generation technologies. Issues including grid stability, the increase in variable generation on the grid, and how the electrical grid will change in the future will be addressed. Intended for students with an engineering background from outside electrical engineering who desire an introduction to the power grid.

Requisites: Excludes graduate students in Electrical Engineering or Electrical Engineering Concurrent degree plans.

Additional Information: Departmental Category: Power

ECEN 5114 (3) Waveguides and Transmission Lines

Intermediate course dealing with guided-wave systems at HF, microwave, and optical frequencies. Modern waveguiding structures, including circular metallic waveguides, microstrip transmission lines, and optical waveguides are treated. Additional material may include waveguide losses, excitation of waveguides, microwave network theory, coupled-mode theory, resonators, and pulse propagation in waveguides.

Requisites: Requires a prereq course of ECEN 3410 (min grade D-).

Restricted to EEEN or ECEN graduate students or Electrical Engineering Concurrent or Electrical/Computer Engineering Concurrent Degree students only.

Additional Information: Departmental Category: Electromagnetics and Remote Sensing

ECEN 5120 (3) Neural Network Design

Introduces basic (artificial) neural network architectures and learning rules. Emphasizes mathematical analysis of these networks, methods of training them and application to practical problems such as pattern recognition, signal processing and control systems. Shows how to construct a network of "neurons" and train them to serve a useful function.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4120

Additional Information: Departmental Category: General

ECEN 5122 (3) Wireless Local Area Networks

Examines small-scale wireless networks particularly personal and local area networks. Covers licensed and unlicensed spectrum, indoor and small-scale radio propagation, modulation techniques, network topologies, ad hoc and infrastructure networks, protocol design, TCP/IP-wireless interactions and protocol standards.

Equivalent - Duplicate Degree Credit Not Granted: TLEN 5520

Requisites: Requires prerequisite course of ECEN 3810 or APPM 3570 or MATH 4510 (minimum grade D-).

Recommended: Prerequisite TLEN 5430.

Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 5126 (3) Computational Optical Imaging

Covers the fundamentals of computational optical imaging modalities, namely systems in which the hardware (optics, sensors, illumination) is designed in conjunction with algorithms (implemented optically, electronically and via software) to deliver information about a scene. Students learn the analysis and design of modern imaging systems. Covers a variety of applications including biomedical imaging, nanoscopy, photography and space imaging.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

ECEN 5128 (3) Game Theory and Multiagent Systems

Provides an overview of game theory with a special emphasis on its application to multiagent systems, i.e., systems that are comprised of a collection of interacting and possibly competing decision making entities. Examples drawn from engineered, economics and social models, including multivehicle robotics, data networks, sensor networks and electronic commerce.

Additional Information: Departmental Category: Dynamical Systems and Control

ECEN 5133 (3) Fundamentals of Computer Security

Practice thinking like an attacker by exploring several modern computer security attacks and defenses through hands-on programming projects. Topics include applied cryptography (encryption, authentication), web security (XSS, CSRF, SQL Injection), network security (TLS, MITM attacks), application security (shell injection, buffer overflows), and other current events and trends (government surveillance, botnets, cryptocurrencies).

Grading Basis: Letter Grade

ECEN 5134 (3) Electromagnetic Radiation and Antennas

Covers elementary sources and antennas, cylindrical wire antennas, loop antennas, radiation patterns and antenna gain, aperture sources such as horns and dishes, specialized antennas such as microstrip patches, linear and circular arrays, mutual coupling and ground effects, ray and numerical formulations, transmission formulas, and antenna applications.

Requisites: Requires a prereq course of ECEN 3410 (min grade D-).

Restricted to any graduate students or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

Additional Information: Departmental Category: Electromagnetics and Remote Sensing

ECEN 5138 (3) Control Systems Analysis

Analysis and design of continuous time control systems using classical and state space methods. Laplace transforms, transfer functions and block diagrams. Stability, dynamic response, and steady-state analysis. Analysis and design of control systems using root locus and frequency response methods. Computer aided design and analysis. Topics covered in this course will be investigated in more depth, require external readings, additional homework will be assigned, and the exams will be more difficult.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4138

Requisites: Restricted to graduate students in Electrical Engineering (EEN) or in Electrical/Computer Engineering (ECEN) or to Electrical or Electrical/Computer Engineering BS/MS Concurrent degree students or to Graduate Certificate Engineering (CRTGE) students.

Recommended: Prerequisite ECEN 3300.

Additional Information: Departmental Category: Dynamical Systems and Control

ECEN 5139 (3) Computer-Aided Verification

Covers theoretical and practical aspects of verification of finite-state systems (hardware) and infinite-state systems (programs). Model checking: temporal logics, explicit-state and symbolic search, BDDs. Constraint solvers: SAT solvers, decision procedures. Program verification: invariants, partial vs. total correctness, abstraction. Department enforced requisite: general proficiency in discrete mathematics and programming.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5135

Requisites: Restricted to Electrical/Computer Engineering (EEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEN) or Electrical/Computer Engineering (C-ECENEEN) or to Graduate Certificate Engineering (CRTGE) students.

Recommended: Prerequisite CSCI 2824.

Additional Information: Departmental Category: VLSI CAD Methods

ECEN 5154 (3) Computational Electromagnetics

Provides a computational study of microwave circuits and antennas, using finite-difference, finite-element, and moment methods. Requires students to develop algorithms, write and execute programs, and prepare reports analyzing results. Circuits include waveguides, microstrip lines, and center-fed dipole antennas.

Requisites: Requires a prereq course of ECEN 3410 (min grade D-).

Restricted to any graduate students or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

Additional Information: Departmental Category: Electromagnetics and Remote Sensing

ECEN 5156 (3) Physical Optics

Covers the application of Maxwell's equations to optical wave propagation in free space and in media. Topics include polarization, dispersion, geometrical optics, interference, partial coherence, and diffraction.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite ECEN 3410.

Additional Information: Departmental Category: Optics

ECEN 5166 (3) Guided Wave Optics

Builds up the concepts necessary to understand guided wave optical systems. Topics include slab wave-guides, semiconductor lasers, fiber optics, and integrated optics.

Requisites: Requires prerequisite courses of ECEN 5645 and ECEN 5156 (all minimum grade C-).

Additional Information: Departmental Category: Optics

ECEN 5224 (3) High Speed Digital Design

Covers fundamentals of high-speed properties of logic gates, measurement techniques, transmission lines, ground planes and layer stacking, terminations, vias, power systems, connectors, ribbon cables, clock distribution and clock oscillators.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4224

Requisites: Requires a prereq course of ECEN 3400 (min grade D-).

Restricted to any graduate students or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

Additional Information: Departmental Category: Electromagnetics and Remote Sensing

ECEN 5244 (3) Stochastic / Environmental Signal Processing

Provides a baseline understanding for research and development in signal processing and analytics for environmental and other data-intensive applications. Topics include parameter estimation, transforms, linear and nonlinear estimation, data assimilation and detection. Applications include numerical weather prediction, GNSS sensing, ionospheric sounding, radar, radiometry, surveillance, target detection and tracking. Previous coursework in linear systems and electromagnetic waves recommended.

Grading Basis: Letter Grade

ECEN 5254 (3) Remote Sensing Signals and Systems

Examines passive and active techniques for remote sensing with emphasis on fundamental noise and detection issues from radio to optical frequencies. Emphasis is placed on electromagnetic wave detection, statistical signal and noise analysis, remote sensing system architecture, and hardware for remote sensing systems. Systems studied include radiometers, radars (real and synthetic aperture), interferometers, and lidars. Applications to detection and surveillance, Earth remote sensing, astronomy, and imaging systems are covered.

Requisites: Requires prerequisite courses of ECEN 3300 and ECEN 3400.

Restricted to any graduate students or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

Additional Information: Departmental Category: Electromagnetics and Remote Sensing

ECEN 5255 (3) Flexible/Stretchable Electronics

Provides an overview of flexible/stretchable electronics. Topics covered include: material properties, micro/nano fabrication technologies, mechanics and dynamics, polymers and soft lithography, transfer printing and theory of flexible electronics. Lab projects expose students to basic microfabrication process. Includes a final project, which requires design of flexible/stretchable devices (sensors and/or actuators) of a variety of types. No prerequisites other than graduate standing in Engineering or instructor permission is required.

Requisites: Restricted to College of Engineering graduate students only.

Grading Basis: Letter Grade

ECEN 5264 (3) Electromagnetic Absorption, Scattering, and Propagation

Electromagnetic waves in communication, navigation, and remote sensing systems from radio to optical frequencies, including propagation in deterministic and random media. Topics include absorption and refraction by gases, discrete scattering by precipitation, clouds, and aerosols, continuous scattering by refractivity fluctuations, earth-space propagation and Faraday rotation in plasmas, and radiative transfer theory.

Requisites: Restricted to Electrical/Computer Engineering (EEEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEEN) or Electrical/Computer Engineering (C-ECENEEN) or to Graduate Certificate Engineering (CRTGE) students.

Recommended: Prereqs are ECEN 3400 and ECEN 3410.

Additional Information: Departmental Category: Electromagnetics and Remote Sensing

ECEN 5273 (3) Network Systems

Focusing on the design and implementation of network protocols and algorithms. Topics covered include the internet's layered protocol stack, TCP/IP, Web/HTTP, email/SMTP, DNS, Ethernet, wireless networks, secure networking. Students will learn socket-based network programming. Familiarity with C and UNIX required.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 4273 and CSCI 5273

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 5322 (3) Search Engine & Analysis of High-dimensional Dataset

Provides students with an exposition of the novel algorithmic methods for searching and analyzing big data. The class includes a project: students design a content-based music information retrieval system similar to those used by Gracenote, Shazam, or Pandora.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 5324 (3) Fundamentals of Microsystem Packaging

Introduction to the fundamentals of microsystems packaging. A seminar style course which surveys topics in microsystem packaging such as electrical package design, design for reliability, thermal management, multichip packaging, IC Assembly, sealing and encapsulation, and board assembly.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4324

Requisites: Requires a prereq course of ECEN 3410 (min grade D-). Restricted to any graduate students or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

Additional Information: Departmental Category: Electromagnetics and Remote Sensing

ECEN 5341 (3) Bioelectromagnetics

Effects of electric and magnetic fields on biological systems are described with applications to therapy and safety. The complexity of biological systems is described to provide a better understanding of the distribution of fields inside the body. Risk analysis is also introduced.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4341

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Bioengineering

ECEN 5345 (3) Introduction to Solid State Physics

Provides an introduction to the electronic, photonic and phononic properties of solid state materials and devices. Covers optical constants, free electron gas, plasmons, energy bands, semiconductors and doping, excitons, quantum wells, phonons and electrooptical effects. Makes use of quantum mechanical methods. Department enforced prerequisite: basic quantum mechanics.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Nanostructures and Devices

ECEN 5355 (3) Principles of Electronic Devices 1

Relates performance and limitations of solid state devices to their structures and technology. Examines semiconductor physics and technology. Includes Pn-junction, Mos, and optoelectronic devices. For both advance circuit and device engineers.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite ECEN 3320.

Additional Information: Departmental Category: Nanostructures and Devices

ECEN 5358 (3) Optimization and Optimal Control

Introduces the theory and practice of optimization and optimal control. Topics include basic theory, nonlinear system trajectories and regulation, function space operators and derivatives, optimality conditions, barrier functionals and Newton's method in function space.

Requisites: Restricted to graduate students in Electrical Engineering (EEEN) or in Electrical/Computer Engineering (ECEN) or to Electrical or Electrical/Computer Engineering BS/MS Concurrent degree students or to Graduate Certificate Engineering (CRTGE) students.

Recommended: Prerequisite ECEN 5448.

Additional Information: Departmental Category: Dynamical Systems and Control

ECEN 5375 (3) Microstructures Laboratory

Offers experience in monolithic silicon integrated circuit fabrication techniques, including Ic layout, pattern compiling and generation, mask making, oxidation, photolithography, diffusion, implantation, metallization, bonding, process analysis and testing. Includes design project.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4375

Additional Information: Departmental Category: Nanostructures and Devices

ECEN 5418 (3) Automatic Control Systems 1

Coverage of principles of control systems with Multiple Inputs and Multiple Outputs (MIMO). Topics include Mimo state-space theory, applications of the singular value decomposition (SVD), coprime factorization methods, frequency domain topics, and an introduction to H-infinity design.

Requisites: Requires prerequisite course of ECEN 5448 (minimum grade C-).

Recommended: Prerequisites ECEN 3300 and ECEN 4138.

Additional Information: Departmental Category: Dynamical Systems and Control

ECEN 5423 (3) Chaotic Dynamics

Explores chaotic dynamics theoretically and through computer simulations. Covers the standard computational and analytical tools used in nonlinear dynamics and concludes with an overview of leading-edge chaos research. Topics include time and phase-space dynamics, surfaces of section, bifurcation diagrams, fractal dimension and Lyapunov exponents.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4423 and CSCI 4446 and CSCI 5446

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 5438 (3) Robot Control

Provides a comprehensive treatment of the mathematical modeling of robot mechanisms and the analysis methods used to design control laws for these mechanisms.

Requisites: Restricted to Electrical/Computer Engineering (EEEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEEN) or Electrical/Computer Engineering (C-ECENEEEN) or to Graduate Certificate Engineering (CRTGE) students.

Recommended: Prerequisites PHYS 1110 and ECEN 4138 (minimum grade C-).

Additional Information: Departmental Category: Dynamical Systems and Control

ECEN 5448 (3) Advanced Linear Systems

Offers a state space approach to analysis and synthesis of linear systems, state transition matrix, controllability and observability, system transformation, minimal realization, and analysis and synthesis of multi-input and multi-output systems.

Requisites: Restricted to Electrical/Computer Engineering (EEEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEEN) or Electrical/Computer Engineering (C-ECENEEEN) or to Graduate Certificate Engineering (CRTGE) students.

Recommended: Prerequisites ECEN 3300 and ECEN 4138.

Additional Information: Departmental Category: Dynamical Systems and Control

ECEN 5458 (3) Sampled Data and Digital Control Systems

Provides an analysis and synthesis of discrete-time systems. Studies sampling theorem and sampling process characterization, z-transform theory and z-transferfunction, and stability theory. Involves data converters (A/D and D/A), dead-beat design, and digital controller design.

Requisites: Restricted to College of Engineering graduate students only.

Recommended: Prerequisites ECEN 3300 and ECEN 4138.

Additional Information: Departmental Category: Dynamical Systems and Control

ECEN 5503 (3) Computer Systems Design and Architecture

Covers digital logic circuits, assembly language programming, and gate-level computer design and architecture. Also discusses computer arithmetic algorithms, I/O, peripheral device performance, networking, and the Internet. Limited to graduate students. For ECE/CS majors with nontraditional backgrounds.

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 5515 (3) Nanophotonics

Introduces the latest developments in nanophotonics. Students will gain an understanding of the fundamental physics governing the interaction between light and nanostructures. Students will be exposed to the various novel optical phenomena observable in the nanoscale and their applications. Students will conduct numerical simulations to investigate the optical properties of nanostructures. Previous coursework in electromagnetics is recommended.

Grading Basis: Letter Grade

ECEN 5517 (3) Power Electronics and Photovoltaic Power Systems Laboratory

Focuses on analysis, modeling, design and testing of electrical energy processing systems in a practical laboratory setting. Studies power electronics converters for efficient utilization of available energy sources, including solar panels and utility. Experimental projects involve design, fabrication and testing of a solar power system.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4517

Requisites: Requires prerequisite course of ECEN 5797 (minimum grade C-).

Additional Information: Departmental Category: Power

ECEN 5523 (3) Compiler Construction

Introduces the principles and techniques for compiling high-level programming languages to assembly code. Topics include parsing, instruction selection, register allocation, and compiling high-level features such as polymorphism, first-class functions, and objects. Students build a complete compiler for a simple language.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4553 and CSCI 4555 and CSCI 5525

Requisites: Restricted to Electrical/Computer Engineering (EEEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEEN) or Electrical/Computer Engineering (C-ECENEEEN) or to Graduate Certificate Engineering (CRTGE) students.

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 5532 (3) Digital Signal Processing Laboratory

Develops experience in code development, debugging and testing of real-time digital signal processing algorithms using dedicated hardware. Applications include filtering, signal synthesis, audio special effects and frequency domain techniques based on the Fast Fourier Transform.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4532

Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 5533 (3) Fundamental Concepts of Programming Languages

Considers concepts common to a variety of programming languages—how they are described (both formally and informally) and how they are implemented. Provides a firm basis for comprehending new languages and gives insight into the relationship between languages and machines.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5535

Requisites: Requires prerequisite course CSCI 3155 (minimum grade D-).

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 5543 (3) Software Engineering of Standalone Programs

Applies engineering principles to phases of software product development, project planning, requirements definition, design, design patterns, validation and maintenance. Emphasizes practical methods for communicating and verifying definitions and designs: prototyping, inspections, and modeling (primarily UML). Includes relation to embedded systems and object-oriented design.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5548

Requisites: Restricted to graduate students only.

Recommended: Prerequisites CSCI 1300 and CSCI 2270 (minimum grade C-).

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 5553 (3) Parallel Processing

Examines a range of topics involved in using parallel operations to improve computational performance. Discusses parallel architectures, parallel algorithms and parallel programming languages. Architectures covered include vector computers, multiprocessors, network computers and data flow machines. Department enforced prerequisite: background in computer organization, introduction to programming languages and elementary numerical analysis.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5551

Recommended: Prerequisites ECEN 4593 and CSCI 3653.

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 5555 (3) Principles of Energy Systems and Devices

Develops principles underlying electronic, optical and thermal devices, materials and nanostructures for renewable energy. Provides a foundation in statistical thermodynamics and uses it to analyze the operation and efficiency limits of devices for photovoltaics, energy storage (batteries & ultra-capacitors), chemical conversion (fuel cells and engines), solid state lighting, heat pumps, cooling and potentially harvesting zero-point energy from the vacuum.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4555

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors) or Graduate students only.

Additional Information: Departmental Category: Nanostructures and Devices

ECEN 5573 (3) Advanced Operating Systems

Intended to create a foundation for operating systems research or advanced professional practice. Examines the design and implementation of a number of research and commercial operating systems and their components, system organization and structure, threads, communication and synchronization, virtual memory, distribution, file systems, security and authentication, availability and Internet services.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5573

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 5593 (3) Advanced Computer Architecture

Provides a broad-scope treatment of important concepts in the design and implementation of high-performance computer systems. Discusses important issues in the pipelining of a processor, out-of-order instruction issue and superscalar designs, design of cache memory systems for such systems, and architectural features required for multicore processor designs. Also studies current and historically important computer architectures.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5593

Requisites: Campus section restricted to graduate students in EEEN or BS/Professional MS concurrent degree students with BS portion in EEEN or ECEN.

Recommended: Prerequisite ECEN 4593.

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 5603 (3) Software Project Management

Presents topics and techniques critical to the management of software product development, including estimating, planning, quality, tracking, reporting, team organization, people management and legal issues. Gives special attention to problems unique to software projects.

Requisites: Requires prerequisite courses ECEN 4583 and ECEN 5543 and CSCI 4318 (all minimum grade D-). Restricted to graduate students only.

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 5606 (3) Optics Laboratory

Provides advanced training in experimental optics. Consists of optics experiments that introduce the techniques and devices essential to modern optics, including characterization of sources, photodetectors, modulators, use of interferometers, spectrometers, and holograms and experimentation of fiber optics and Fourier optics. Department enforced prerequisite: undergraduate optics course (e.g. PHYS 4510).

Equivalent - Duplicate Degree Credit Not Granted: PHYS 5606

Additional Information: Departmental Category: Optics

ECEN 5612 (3) Random Processes for Engineers

Deals with random time-varying functions and is therefore useful in the broad range of applications where they occur. Topics include review of probability, convergence of random sequences, random vectors, minimum mean-square error estimation, basic concepts of random processes, Markov processes, Poisson processes, Gaussian processes, linear systems with random inputs, and Wiener filtering. Applications range from communications, communication networks, and signal processing to random vibration/stress analysis, mathematical finance, physics, etc.

Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 5613 (3) Embedded System Design

Introduces system hardware and firmware design for embedded applications. Students independently design and develop a hardware platform encompassing a microcontroller and peripherals. Firmware is developed in C and assembly. A significant final project is designed, developed, documented and presented. Prioritized for EEEN graduate students with ESE (Embedded Systems Engineering) sub-plan.

Requisites: Campus section restricted to graduate students in EEEN or BS/Professional MS concurrent degree students with BS portion in EEEN or ECEN.

Additional Information: Departmental Category: Embedded Systems Engineering

ECEN 5616 (3) Optoelectric System Design

Examines optical components and electro-optic devices with the goal of integrating into well design optoelectronic systems. Sample systems include optical storage, zoom lenses and telescopes.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4616

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Optics

ECEN 5622 (3) Information Theory and Coding

Covers fundamental limits of data compression, reliable transmission of information and information storage. Topics include information measures, typicality, entropy rates of information sources, limits and algorithms for lossless data compression, mutual information, and limits of information transmission over noisy wired and wireless links. Optional topics include lossy data compression, limits of information transmission in multiple-access and broadcast networks, and limits and algorithms for information storage.

Requisites: Restricted to Electrical/Computer Engineering, Computer Science, Applied Math or Physics graduate students only.

Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 5623 (3) Real-Time Embedded Systems

Design and build a microprocessor-based embedded system application requiring integration of sensor/actuator devices, a real-time operating system and application firmware and software. Real-time rate monotonic theory and embedded architecture are covered. Prioritized for EEEN graduate students with ESE (Embedded Systems Engineering) sub-plan.

Requisites: Campus section restricted to graduate students in EEEN or BS/Professional MS concurrent degree students with BS portion in EEEN or ECEN.

Additional Information: Departmental Category: Embedded Systems Engineering

ECEN 5626 (3) Active Optical Devices

Analysis of active optical devices such as semiconductor laser, detector and flat panel display by clearly defining and interconnecting the fundamental physical mechanism, device design and operating principles and device performance.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite ECEN 5355.

Additional Information: Departmental Category: Optics

ECEN 5632 (3) Theory and Application of Digital Filtering

Digital signal processing and its applications are of interest to a wide variety of scientists and engineers. The course covers such topics as characterization of linear discrete-time circuits by unit pulse response, transfer functions, and difference equations, use of z-transforms and Fourier analysis, discrete Fourier transform and fast algorithms (FFT), design of finite and infinite impulse response filters, frequency transformations, study of optimized filters for deterministic signals.

Requisites: Restricted to Electrical/Computer Engineering (EEEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEEN) or Electrical/Computer Engineering (C-ECENEEN) or to Graduate Certificate Engineering (CRTGE) students.

Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 5633 (3) Hybrid Embedded Systems

Introduces system hardware and design techniques for embedded and hybrid reconfigurable systems. Intended for those interested in developing projects using hardware description languages to build application-specific computing systems. Industry standards are used for design, development and debugging.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4633

Requisites: Restricted to Electrical/Computer Engineering (EEEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEEN) or Electrical/Computer Engineering (C-ECENEEN) or to Graduate Certificate Engineering (CRTGE) students.

Additional Information: Departmental Category: Embedded Systems Engineering

ECEN 5634 (3) Graduate Microwave and RF Laboratory

Introduce RF and microwave measurement methods. A laboratory course whose experiments build on material learned in ECEN 3410: electromagnetic waves, transmission lines, waveguides, time-domain reflection, frequency-domain measurement, microwave networks, impedance matching, antenna pattern measurement, radar and simple nonlinear concepts such as harmonics, square-law detection, mixing and transmitter/receiver applications.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4634

Requisites: Requires a prereq course of ECEN 3410 (min grade D-).

Restricted to any graduate students or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

Additional Information: Departmental Category: Electromagnetics and Remote Sensing

ECEN 5643 (3) SW Engineering of Concurrent Systems

Addresses engineering of applications requiring multiple software processes running concurrently, sharing data, and communicating as a system in a single environment. Topics include performance analysis of architecture design; analysis of requirements, design and testing of synchronization and communication; the interplay of system design and performance with the impact of memory management, input/output, and file system support.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4643

Requisites: Requires prerequisite course of ECEN 5543 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 5645 (3) Introduction to Optical Electronics

Introduces lasers, Gaussian optics, modulators, nonlinear optics, optical detectors, and other related devices.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Nanostructures and Devices

ECEN 5652 (3) Detection and Extraction of Signals from Noise

Introduces detection, estimation, and related algorithms. Topics in detection include simple/composite hypothesis testing, repeated observations and asymptotic performance and sequential detection. Topics in estimation include Bayesian estimation including minimum mean-square estimation and non-random parameter estimation. Topics in algorithms vary. Examples include algorithms for state estimation and smoothing in Hidden Gauss-Markov models and the expectation-maximization algorithm. Applications include communications, radar/sonar/geophysical signal processing, image analysis, authentication, etc.

Requisites: Restricted to Electrical/Computer Engineering, Computer Science, Applied Math or Physics graduate students only.

Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 5653 (3) Real-Time Digital Media

Learn how to design and build Linux-based real-time system applications for digital media encode/decode and transport. Course focus is on the process as well as fundamentals of designing, coding, and testing Linux-based real-time systems often used in industry for digital media systems. Students use POSIX kernel-mapped threads and drivers to implement real-time digital media solutions.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4653

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 5672 (3) Digital Image Processing

Course objective is to present the fundamental techniques available for image representation and compression (e.g., wavelets), filtering (e.g., Wiener and nonlinear filter), and segmentation (e.g., anisotropic diffusion).

Requisites: Requires prerequisite course ECEN 5632 (minimum grade C-).

Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 5673 (3) Distributed Systems

Examines systems that span multiple autonomous computers. Topics include system structuring techniques, scalability, heterogeneity, fault tolerance, load sharing, distributed file and information systems, naming, directory services, resource discovery, resource and network management, security, privacy, ethics and social issues.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5673

Recommended: Prerequisite CSCI 5573 or a course in computer networks.

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 5682 (3) Theory and Practice of Error Control Codes

Introduces error control coding techniques for reliable transmission of digital data over noisy channels. Topics include algebraic characterizations of cyclic codes, convolutional codes, modern graph codes, decoding algorithms for block codes, Viterbi algorithm and iterative decoding on graphs. Applications include modern digital communication and storage systems including deep space communications, satellite broadcasting, cellular networks, and optical disk storage.

Requisites: Restricted to Electrical/Computer Engineering (EEEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEEN) or Electrical/Computer Engineering (C-ECENEEEN) or to Graduate Certificate Engineering (CRTGE) students.

Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 5683 (3) Programmable Logic Embedded System Design

Learn to design programmable systems on a chip for the purpose of creating prototypes or products for a variety of applications. Explores complexities, capabilities and trends of Field Programmable Gate Arrays (FPGA) and Complex Programmable Logic Devices (CPLD). Implement synchronization and timing closure in these devices. Projects will involve the latest software and FPGA development tools and hardware platforms.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Embedded Systems Engineering

ECEN 5686 (3) Optical Communications Systems

Emphasizes the elements that optical communication systems have in common with other communication systems. Works from a general communication system model toward fiber optic applications. Emphasizes the statistical nature of electronic based communication. Topics include 1) general system models, 2) detectors and receivers, 3) optical channels with emphasis on the single mode fiber channel, 4) coherent and incoherent systems: a) sources, b) modulation and c) detection, 5) special topics ranging from optical sensing to quantum communications.

Requisites: Restricted to Electrical/Computer Engineering (EEEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEEN) or Electrical/Computer Engineering (C-ECENEEEN) or to Graduate Certificate Engineering (CRTGE) students.

Additional Information: Departmental Category: Optics

ECEN 5692 (3) Principles of Digital Communication

Introduces fundamental principles of efficient and reliable transmission of information used in wired and wireless digital communication systems including cable modems, smart phones/tablets, cellular networks, local area (wi-fi) networks, and deep-space communications. Topics include bandwidth and power constraints, digital modulation methods, optimum transmitter and receiver design principles, error rate analysis, channel coding potential in wired/wireless media, trellis coded modulation, and equalization.

Requisites: Restricted to Electrical/Computer Engineering (EEEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEEN) or Electrical/Computer Engineering (C-ECENEEEN) or to Graduate Certificate Engineering (CRTGE) students.

Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 5696 (3) Fourier Optics

Introduces a system level approach to the analysis and design of optical systems. Topics include holography, Fourier transform properties of lenses, two-dimensional convolution and correlation functions, spatial filtering and optical computing techniques. Also covers coherent and incoherent imaging techniques, tomography, and synthetic aperture imaging.

Requisites: Restricted to graduate students only.

Recommended: Prerequisites ECEN 3300 and ECEN 3410.

Additional Information: Departmental Category: Optics

ECEN 5737 (3) Adjustable-Speed AC Drives

Presents unified treatment of complete electrical drive systems: mechanical load, electrical machine, power converter, and control equipment. Emphasizes induction, synchronous, and permanent-magnet drives. Uses simulation programs (e.g., SPICE, Finite Element/Difference Program) to simulate drive system components (e.g., gating, inverter, electric machine).

Requisites: Restricted to Electrical/Computer Engineering (EEEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEEN) or Electrical/Computer Engineering (C-ECENEEEN) or to Graduate Certificate Engineering (CRTGE) students.

Recommended: Prerequisite ECEN 3170.

Additional Information: Departmental Category: Power

ECEN 5743 (3) SW Engineering of Distributed Systems

Addresses engineering of networked applications and self-contained embedded system products involving multiple processors. The fundamental concepts of software engineering are complicated by an application running simultaneously and asynchronously on multiple processors over a network. Topics: specification, analysis, design, and testing of distributed components including concerns of security, synchronization, transaction coordination, data replication, web services, and service oriented architectures.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4743

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

Recommended: Prerequisite ECEN 4583 or ECEN 5543 or CSCI 5548.

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 5753 (3) Computer Performance Modeling

Presents a broad range of system modeling techniques, emphasizing applications to computer systems. Covers stochastic processes, queuing network models, stochastic Petri nets and simulation (including parallel processing techniques). Also requires second-semester calculus.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4753 and CSCI 4753 and CSCI 5753

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 5763 (3) Embedded Machine Vision and Intelligent Automation

Introduces students to machine vision and machine learning methods used in automation, autopilots and security and inspection systems. Embedded and automation topics include implementation of algorithms with FPGA or GP-GPU embedded real time co-processing for autopilots (intelligent transportation), general automation and security including methods for detection, classification, recognition of targets for inspection, surveillance, search and rescue, and machine vision navigation applications.

Requisites: Campus section restricted to graduate students in EEEN or BS/Professional MS concurrent degree students with BS portion in EEEN or ECEN.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Embedded Systems Engineering

ECEN 5797 (3) Introduction to Power Electronics

An introduction to switched-mode converters. Includes steady-state converter modeling and analysis, switch realization, discontinuous conduction mode and transformer-isolated converters. Ac modeling of converters using averaged methods, small-signal transfer functions, feedback loop design and transformer design.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4797

Requisites: Restricted to Electrical/Computer Engineering (EEEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEEN) or Electrical/Computer Engineering (C-ECENEEEN) or to Graduate Certificate Engineering (CRTGE) students.

Additional Information: Departmental Category: Power

ECEN 5803 (3) Mastering Embedded Systems Architecture

Acquire an understanding of embedded systems architectures for the purpose of creating prototypes or products for a variety of applications. The salient issues in the decision making process will be examined, including trade-offs between hardware and software implementations, processor and operating system selection and IP creation or acquisition. Projects will involve the latest software development and tools and hardware platforms.

Requisites: Campus section restricted to graduate students in EEEN or BS/Professional MS concurrent degree students with BS portion in EEEN or ECEN.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Embedded Systems Engineering

ECEN 5807 (3) Modeling and Control of Power Electronic Systems

Studies modeling and control topics in power electronics. Averaged switch modeling of converters, computer simulation, ac modeling of the discontinuous conduction mode, the current programmed mode, null-double injection techniques in linear circuits, input filter design, and low-harmonic rectifiers.

Requisites: Requires prerequisite course of ECEN 5797 (minimum grade C-).

Additional Information: Departmental Category: Power

ECEN 5811 (3) Neural Signals and Functional Brain Imaging

Explores bioelectric and metabolic signals generated by the nervous system from two stand points: 1) their biophysical genesis and role in neural integration and 2) neurotechnologies such as electroencephalography, magnetoencephalography, deep brain stimulation and functional magnetic resonance imaging.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4811 and ASEN 4216 and ASEN 5216

Additional Information: Departmental Category: Bioengineering

ECEN 5813 (3) Principles of Embedded Software

Introduces principles around embedded software elements and software development needed for the Embedded Systems Engineering core curriculum. Student will write C program applications that employ efficient, high performance and robust software design techniques. Topics include bare-metal firmware, c-programming optimization and introductions to underlying embedded architecture. Sound testing and debug practices will be instilled and utilized in several application projects.

Requisites: Campus section restricted to graduate students in EEEN or BS/Professional MS concurrent degree students with BS portion in EEEN or ECEN.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Embedded Systems Engineering

ECEN 5817 (3) Resonant and Soft-Switching Techniques in Power Electronics

Covers resonant converters and inverters, and soft switching; sinusoidal approximations in analysis of series, parallel, LCC, and other resonant dc-dc and dc-ac converters; state-plane analysis of resonant circuits; switching transitions in hard-switched and soft-switched PWM converters; zero-voltage switching techniques, including resonant, quasi resonant, zero voltage transition, and auxiliary switch circuits.

Requisites: Requires prerequisite course of ECEN 5797 (minimum grade C-).

Additional Information: Departmental Category: Power

ECEN 5821 (3) Neural Systems and Physiological Control

A biophysical exploration of human physiology from the standpoints of control systems and neural information processing. Topics include: neural control of movement and cardiovascular performance, tissue growth and repair, carcinogenesis, and physiological responses to microgravity.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4821 and ASEN 4426 and ASEN 5426

Additional Information: Departmental Category: Bioengineering

ECEN 5823 (3) Internet of Things Embedded Firmware
