

University of Colorado **Boulder**

2013-14

Catalog

*Redefining Teaching
& Learning*

Welcome to the CU-Boulder Catalog, 2013–14

THE 2013–14 UNIVERSITY OF COLORADO BOULDER CATALOG contains a summary of campus offerings, policies, and requirements; descriptions of colleges, schools, and individual departments; and degree requirements, course descriptions, and faculty listings as of February 2013. Students should refer to the degree, major, and certification requirements listed at the time they formally enter a program. For additional information, students should consult their dean's office. Because the catalog is compiled in advance of the academic year it covers, changes in programs and policies may occur. Up-to-date information may be obtained by consulting departmental advisors, checking departmental bulletin boards, visiting MyCUinfo (mycuinfo.colorado.edu), and reviewing registration materials distributed each semester. All catalog information is subject to change without notice or obligation.

About the Course Descriptions

The courses listed through the [Courses](#) tab above are offered on the Boulder campus during the 2013–14 academic year. This listing does not constitute a guarantee that any particular course will be offered during this year. Consult specific programs and major requirements within each school and college for more information. Also see the online Schedule Planner for details about course offerings.

Course Numbering

Always consult specific departments and programs within schools and colleges for restrictions, requirements, and prerequisites.

- 1000–2000 courses are usually intended for lower-division students (freshmen and sophomores).
- 3000–4000 courses are intended for upper-division students (juniors and seniors), and may require instructor's consent. Consult the

The *University of Colorado Boulder Catalog* is published yearly by

CU-Boulder University Communications in cooperation with the academic departments.

CE/SL—civic engagement/service learning component

Nondiscrimination Statement

The University of Colorado Boulder does not discriminate on the basis of race, color, national origin, sex, pregnancy, age, disability, creed, religion, sexual orientation, gender identity, gender expression, or veteran status in admission and access to, and treatment and employment in, its educational programs and activities. The university takes affirmative action to increase ethnic, cultural, and gender diversity; to employ qualified disabled individuals; and to provide equal opportunity to all students and employees.

General Information

University of Colorado History

AT ITS FIRST SESSION IN 1861, Colorado's territorial legislature passed an act providing for a university in Boulder. Between 1861 and 1876, Boulder citizens donated land south of town and made gifts from \$15 to \$1,000 to match the \$15,000 the state legislature appropriated for the university's construction. In 1875, Colorado citizens laid the cornerstone for the university's first building, Old Main, and officially founded CU in 1876, the same year Colorado joined the union. The university opened its doors the following year with 44 students, a president, and one instructor.

Today, the University of Colorado is a four-campus system that includes the University of Colorado Boulder, the University of Colorado Colorado Springs, the University of Colorado Denver, and the University of Colorado Anschutz Medical Campus. The campuses have a combined enrollment of about 60,000 students. To meet the needs of its students, the university system offers an extensive number of undergraduate, graduate, and professional degree programs, as well as opportunities to study abroad, engage in public service, and conduct research.

CU received sponsored program awards that include funding from the National Institutes of Health, the National Science Foundation and NASA. Sponsored research within the university system represents annual awards totaling more than \$813 million. Federal agencies are the principal sources of these funds for research and training contracts and grants, but the state of Colorado also provides appropriations for university operations, teaching, and research activities. CU also relies on revenues from tuition and fees, contracts and grants, investments and interest income, health services, and the generous support of private foundations and donors.

An elected nine-member Board of Regents governs CU and is charged by the state constitution with the general supervision of the university and the exclusive control and direction of all its funds and appropriations, unless otherwise provided by law. The board conducts its business at regular meetings open to the public and through committees. The president is the chief administrative officer and is responsible for providing leadership to the university.

For more information about the CU Board of Regents, go to www.cu.edu/regents; to learn more about the CU system, visit www.cu.edu.

Campuses

The Boulder Campus

Statutory Mission

CU-Boulder's vision is grounded in its statutory mission as a national public research university. In Colorado statute, the university is defined as the "comprehensive graduate research university with selective admissions standards . . . , offer(ing) a comprehensive array of undergraduate, master, and doctoral degree programs" of what is now designated the University of Colorado System.

CU-Boulder recognizes the exceptional opportunities associated with its role as a research university, and values the unique strength and character research achievements bring to undergraduate education. It is keenly aware of its responsibility for educating the next generation of citizens and leaders, and for fostering the spirit of discovery through research. Indeed, CU-Boulder believes that its students, both graduate and undergraduate, benefit from the comprehensive mix of programs and research excellence that characterize a flagship university. Thus, CU-Boulder's statutory mission is relevant today and will remain relevant tomorrow.

Since 2007, CU-Boulder's strategic plan, *Flagship 2030* (www.colorado.edu/flagship), has been guiding near-term actions and investments that will sustain CU's quality and competitiveness and, through visionary "flagship initiatives," will transform the university within the next quarter-century.

General Information about CU-Boulder

As a comprehensive university, CU-Boulder is committed to the liberal education of students via a broad curriculum ranging from the baccalaureate through the postdoctoral levels.

With an enrollment of more than 30,000 students, the University of Colorado Boulder is the largest campus in the four-campus system. The student population comes from every state in the nation and from more than 95 foreign countries. Many different ethnic, religious, academic, and social backgrounds are represented, fostering the development of a multicultural academic community that enriches each student's educational experience.

On the Boulder campus, the chancellor is the chief academic and administrative officer and is responsible for conducting campus affairs in accordance with the policies of the Regents, and overseeing the Athletic Department. Faculty participate in campus governance through the Faculty Senate and the Faculty Assembly. Students participate through the University of Colorado Student Government (CUSG) and the United Government of Graduate Students (UGGS).

CU-Boulder has over 1,100 tenure and tenure track faculty, with more than 98 percent holding doctorates or appropriate terminal degrees. The faculty includes nationally and internationally recognized scholars with many academic honors and awards, including several CU-Boulder research faculty from the National Snow and Ice Data Center who shared the 2007 Nobel Peace Prize with former Vice President Al Gore for their contributions to the international report of the Intergovernmental Panel on Climate Change; John Hall, winner of the 2005 Nobel Prize in physics; Carl Wieman and Eric Cornell, winners of the 2001 Nobel Prize in physics; Tom Cech, winner of the 1989 Nobel Prize in chemistry; and David Wineland, winner of the 2012 Nobel Prize in physics. Seven faculty have received MacArthur Fellowships, the so-called "genius grant." Twenty-five active or retired faculty are members of the National Academy of Sciences; 23 are included in the membership of the American Academy of Arts and Sciences; 17 are members of the National Academy of Engineering; and six are members of the National Academy of Education. Most faculty members, including full professors, teach both undergraduate and graduate classes. Faculty members incorporate their research and creative activities directly into instructional programs.

Research conducted at CU-Boulder is supplemented by research institutes devoted both to the advancement of knowledge in particular areas and to graduate training. Many of these institutes have developed international reputations.

To enhance its research capabilities and to provide collaborative opportunities with government and business, CU-Boulder developed a 200-acre research park east of the main campus. The park provides expanded room for research institutes and centers that work closely with university researchers.

The educational environment of a research university is characterized by a broad range of experiences in many different settings. While the classroom is the location for most instructional activities, laboratories, seminars, and field work also are important features of the undergraduate and graduate experience. Some programs encourage off-campus internships and training; study abroad programs also have gained popularity. For students whose interests cross traditional disciplinary lines, a number of interdisciplinary programs are available.

The Campus Setting

CU-Boulder is located at the foot of the Rocky Mountains, at an altitude of 5,400 feet. The Flatirons geologic formation is visible from nearly everywhere on campus. The climate is temperate, with generally pleasant days and cool evenings. On average, Boulder enjoys about 340 sunny or partly sunny days each year. The main campus covers 600 acres and includes about 200 buildings constructed of rough-cut Colorado sandstone with red tile roofs. The rural Italian (or Tuscan vernacular) architectural style evolved from a master plan developed by Philadelphia architect Charles Klauder in 1919. The Norlin Quadrangle, including the original Old Main building, is listed in the State and *National Register of Historic Places*. The campus has been noted as one of the most aesthetically pleasing in the country.

Boulder County encompasses five ecological zones, from 5,000 feet above sea level (plains grassland) to 14,000 feet (alpine tundra). Downtown Boulder is only 20 miles from the Continental Divide and boasts some of the most spectacular scenery in the United States. The city of Boulder, population 99,000, is committed to preserving its beautiful natural environment and is surrounded by 26,000 acres of open space.

Denver, the state's capital city, is 30 miles from Boulder. Denver offers the attractions and resources of a large metropolitan area and is accessible from Boulder by traveling on U.S. 36, also known as the Denver-Boulder Turnpike. Denver's international airport is served by most major carriers and is located approximately 60 minutes southeast of Boulder. Boulder and the Denver International Airport are connected by a public transportation system.

Undergraduate Enrollment and Graduation Rates

CU-Boulder's fall 2012 entering freshman class numbered 5,470. Of these, 46 percent were females, 56 percent residents of Colorado, and 22 percent members of minority groups (African Americans, Asian Americans, Hispanics, and Native Americans). Sixty-eight percent enrolled in the College of Arts and Sciences, 14 percent in the Leeds School of Business, 13 percent in the

College of Engineering and Applied Science, and 5 percent, combined, enrolled in the Program in Environmental Design, Journalism and Mass Communication Program, and the College of Music. About 10 percent of freshmen entering CU-Boulder transfer to another college or school within the university before they graduate.

Of the freshmen entering in summer or fall 2006 who enrolled full time, 42 percent graduated within four years; 63 percent graduated within five years; and 68 percent graduated within six years. Of the students who entered in fall 2011, 84 percent returned for their second fall semester.

CU-Boulder Academic Programs

The Boulder campus offers more than 3,600 different courses in approximately 150 fields of study. These courses represent a full range of disciplines in the humanities, the social sciences, the physical and biological sciences, the fine and performing arts, and the professions. CU-Boulder is accredited by the Higher Learning Commission and a member of the North Central Association (www.ncahigherlearningcommission.org; **800-626-7440** or **312-263-0456**). (See *individual colleges and schools for additional accreditation information*.)

For information on the content of academic programs and official degree designations, refer to the appropriate catalog sections. Additional graduate and professional programs are located on other campuses of the university.

Colorado Springs Campus

The University of Colorado Colorado Springs, located on Austin Bluffs Parkway in Colorado Springs, is one of the fastest growing universities in the nation. The university offers 30 bachelor's, 26 master's, and five doctoral degrees. The campus enrolls about 9,800 students annually. Schools and colleges on this campus include:

- College of Business and Administration
- College of Education
- College of Engineering and Applied Science
- Graduate School
- College of Letters, Arts, and Sciences
- Beth-El College of Nursing and Health Sciences
- School of Public Affairs

University of Colorado Denver

The University of Colorado Denver offers comprehensive programs for undergraduate, graduate, and health sciences students on the Denver Campus and on the Anschutz Medical Campus in Aurora. Students study in more than 130 degree programs across 13 schools and colleges.

The university awards more than 4,000 degrees each year and confers more graduate degrees than any other institution in the state. More than \$434 million in sponsored research awards came to University of Colorado Denver in 2011–12.

Denver Campus

Near the heart of downtown, the campus is conveniently located on the Auraria Campus with easy access to Denver's commercial and governmental hubs. Schools and colleges on this campus include:

- College of Architecture and Planning
- College of Arts & Media
- Business School
- School of Education & Human Development
- College of Engineering and Applied Science
- College of Liberal Arts and Sciences
- School of Public Affairs

Anschutz Medical Campus

The Anschutz Medical Campus in Aurora delivers a broad network of health care programs. In addition to University of Colorado Hospital, a number of renowned institutes are affiliated with the campus. The Anschutz Medical Campus presents state-of-the-art educational and research facilities with an adjoining biomedical park. Schools and colleges on this campus include:

- School of Dental Medicine
- School of Medicine
- College of Nursing

- School of Pharmacy
- Colorado School of Public Health
- Graduate School

Programs of Study

THE UNIVERSITY'S PROGRAMS OF STUDY listed below are organized by School or College; then program name (or major); then degrees, certificates, or minors when available. Names in blue link to the department or program page.

The university offers degree programs at the bachelor's, master's, and doctoral levels, and a juris doctor degree from the Law School. It also offers certificate programs at the undergraduate, graduate, and professional levels, and a variety of additional academic programs. The latest approved degrees may be found at the Office of Planning, Budget, and Analysis website at

<http://www.colorado.edu/pba/degrees/approve/OfficialCatalogApprovedDegreesList2013-14.htm>

CU-Boulder also provides dual-degree, double-degree, concurrent degrees, and interdisciplinary programs. Details may be found through the specific program of study in this catalog or by contacting the sponsoring department.

NOTE: In the tables below, the designation (MS) or (MA) indicates master's degree offered as part of the PhD program only. The IBA is the International Bachelor of Arts degree.

Undergraduate Admission

THE OFFICE OF ADMISSIONS WELCOMES inquiries from prospective students regarding undergraduate admission. Through the admission process, the university seeks to identify applicants who will successfully complete a collegiate academic program. Admission is based on many criteria, including high school GPA or GED test scores, high school rank, the quality of course work, college entrance test scores, personal essays, and the extent to which the [minimum academic preparation standards \(MAPS\)](#) have been met.

Inquiries relating to undergraduate admission to the University of Colorado Boulder may be addressed to:

Office of Admissions, Regent Administrative Center 125, University of Colorado Boulder,
552 UCB, Boulder, CO 80309-0552
303-492-6301 • TTY 303-492-5998 (for hard of hearing persons)

To find additional admission information online, go to admissions.colorado.edu/undergraduate.

For admission requirements to graduate degree programs, see the [Graduate School](#) section and individual college and school sections.

Actuarial Studies and Quantitative Finance Certificate Program

The Actuarial Studies and Quantitative Finance Certificate Program is an interdisciplinary program provided by the Departments of Mathematics, Applied Mathematics, and Economics; and the Leeds School of Business. The program trains students in two tracks. The **Actuarial track** prepares students for the actuarial profession while the **Quantitative Finance track** trains students for financial and economics analyst positions. The admission policies and contact information are given for each track.

Anthropology

Anthropology is the study of people, both ancient and modern, in their cultural context. The field involves a global look at human cultures from prehistoric times to the present, integrating findings from the social sciences, natural sciences, and humanities. Students of anthropology learn to appreciate the variety of cultures throughout human history and to understand the meaning of human biological and cultural development as well as diversity.

The undergraduate degree in anthropology emphasizes knowledge and awareness of:

- basic methods, concepts, alternative theories and approaches, and modes of explanation appropriate to each of the three main subfields of the discipline (archaeology, biological anthropology, and cultural anthropology);
- basic archaeological techniques, including stratigraphy, dating, and inference of human behavior from archaeological data, as well as human history from its beginning through the emergence of complex societies;
- variation, patterning, and creativity in human communities and symbolic systems, including ecological, social structural, and cultural factors exemplified in a diverse array of the world's societies, including those undergoing change as a result of globalization and the impact of contemporary social and political movements; and
- theories of primate and human evolution and the basic data of the hominid fossil record, as well as biological variation in contemporary human populations.

In addition, students completing the degree in anthropology are expected to acquire the ability and skills to:

- identify trends or patterns in anthropological data from different cultures or periods, identify an appropriate context of explanation or interpretation, and formulate a testable explanation or reasonable interpretation, including the ability to identify data that constitute credible evidence for an explanation or interpretation; and
- identify and define a significant problem or topic in anthropology and analyze and interpret data in a systematic manner.

Applied Mathematics

The Department of Applied Mathematics in the College of Arts and Sciences offers courses and degree programs for undergraduate and graduate students. Course offerings at the undergraduate level focus on providing students with the mathematical tools and problem-solving strategies that are useful in science and engineering. The undergraduate bachelor of science degree is offered through the College of Engineering and Applied Science.

The department offers a range of courses and research opportunities in many areas, including computational mathematics, mathematical biology, nonlinear phenomena, physical applied mathematics, and probability and statistics. Each of these areas is described below.

Computational Mathematics

The study of computational mathematics has grown rapidly in recent years and has allowed scientists and engineers to answer questions and to develop insights not possible just a decade or two ago. Modern computational methods require in-depth knowledge of a variety of mathematical subjects including linear algebra, analysis, ordinary and partial differential equations, asymptotic analysis, elements of harmonic analysis, and nonlinear equations. Since computers are invaluable tools for an applied mathematician, students are expected to attain a high level of computer literacy and to gain a substantial knowledge of operating systems and hardware. Computational mathematics courses include the study of computational linear algebra, optimization, numerical solution of ordinary and partial differential equations, solution of nonlinear equations, and advanced seminars in wavelet and multiresolution analysis and in multigrid methods, radial basis functions, and algorithm design and development, more generally.

Mathematical Biosciences

Advances in our ability to quantitatively study biological phenomena have provided a number of exciting opportunities for applied mathematicians. The careful modeling, analysis, and simulation of these systems using the standard and state-of-the-art tools of applied mathematics has led to novel and non-intuitive insights into biology. Furthermore, deeper understanding of the inherently complex and multiscale nature of biological systems, in many cases, requires the development of new mathematical tools, techniques, and methodologies (a challenge to which applied mathematics is particularly well suited). For students interested in pursuing research in mathematical biology, good preparatory classes would include differential equations, advanced calculus, numerical analysis, and probability and statistics, as well as supplemental courses in the appropriate biological, biomedical, or bioengineering fields. Research areas at CU encompass immunology, virology, bacteriology, population genetics, and cardiac nonlinear dynamics. Specifically, current topics of interest include model selection and control of in vivo HIV pathogenesis dynamics, modeling of intracellular calcium dynamics, the analysis of heart rhythm instabilities, the role of aggregation and fragmentation in bacteremia and bacterial pneumonia, inverse problems arising in the use of population genetics and bioinformatics to identify geographic features, and the analysis of patterns in biological sequences such as DNA and RNA.

Dynamical Systems and Nonlinear Phenomena

In recent years, there has been an explosion of interest in the study of nonlinear waves and dynamical systems with analytical results, often motivated by the use of computers. The faculty in the Department of Applied Mathematics are actively and intensively involved in this growing field. Research areas include qualitative analysis and computational dynamics, conservative and dissipative systems, bifurcation theory, the onset and development of chaos, wavelets and multiresolution analysis, integrable systems, solitons, cellular automata, analytic dynamics, pattern formation and symmetry, synchronization, dynamics on networks, fluid dynamics, transport and mixing, and the study of nonlinear phenomena arising from the interactions of many interconnected dynamical units. Department courses in this field include dynamical systems, nonlinear wave motion, and many advanced seminars. Suitable background courses are analysis, computation, and methods in applied mathematics. Valuable supplemental courses include mechanics and fluid dynamics.

Physical Applied Mathematics

Physical applied mathematics is a term that generally refers to the study of mathematical problems with direct physical application. This area of research is intrinsically interdisciplinary. In addition to mathematical analysis, it requires an in-depth understanding of the underlying applications area, and usually requires knowledge and experience in numerical computation. The department has approximately 40 affiliated faculty who can direct thesis research in areas such as atmospheric and fluid dynamics, theoretical physics, plasma physics, genetic structure, parallel computation, etc. The department's course requirements are designed to provide students with a foundation for their study (analysis and computation). The department also requires supplemental courses in one of the sciences or engineering fields necessary for thesis research in physical applied mathematics.

Statistics and Applied Probability

Almost all natural phenomena in the technological, biological, physical, and social sciences have random components with complex levels of interactions, part stochastic, part deterministic. Applied

probability is the application of probabilistic and analytic methods to model, understand, and predict the behavior of real-life problems that involve random elements. Statistics is the science of using data that typically arise from the randomness inherent in nature to gain new knowledge. Areas of current interest by applied math and their affiliated faculty include optimization of stochastic networks; the study of stochastic processes, and stochastic differential equations in hydrology and telecommunications; probabilistic models, nonparametric regression methods, shrinkage estimation, gene expression microarray data analysis, false discovery rate control, classification methods, and statistical tests based on these models, in genetics and RNA sequencing; and extreme value theory in estimation of maximal wind speeds. Appropriate course work includes analysis, stochastic processes, simulation techniques, mathematical statistics, as well as background courses in one of the sciences or engineering fields in which one intends to do research.

For details on the range of courses and research opportunities available through the Department of Applied Mathematics, visit amath.colorado.edu.

Art and Art History

The Department of Art and Art History offers the bachelor of arts in art history and in studio, and the bachelor of fine arts in studio arts.

The undergraduate degree in art history emphasizes knowledge and awareness of:

- the major artistic monuments of the world in a historical context;
- varied methodologies used to study art historically; and
- artistic media and techniques.

In addition, students completing the degree in art history are expected to acquire the ability and skills to:

- relate individual monuments to their historical and cultural context by identifying technique, style, and subject matter;
- interpret historical and critical information about works of art, artists, and related issues; and
- organize and communicate concepts and data pertaining to the history of art effectively in written and oral form.

The undergraduate degree in studio art emphasizes knowledge and awareness of:

- the significance of the major monuments in art history, with an emphasis on contemporary art;
- at least one discipline of studio art;
- related critical issues in studio practice; and
- a wide range of stylistic approaches.

In addition, students completing a degree in studio art are expected to acquire the ability and skills to:

- analyze their own works of art in terms of form and content;
- interpret the work of others;
- execute ideas in one or more artistic media;
- demonstrate artistic ability and technical proficiency in one chosen medium; and
- communicate in verbal and written form the particular conceptual and perceptual attitudes and stances of their own artistic production.

Course codes for these programs are ARTS, ARTF, and ARTH.

Asian Languages and Civilizations

Undergraduate students may choose to major in either Chinese or Japanese. In either case they receive a thorough grounding in the modern language, an introduction to the classical language and literature, and a broad familiarity with the literary and cultural history of the selected area.

Before registering for specific courses, students should consult with a departmental advisor concerning appropriate placement in language classes. Also, students interested in Chinese or Japanese are encouraged to broaden their career options through a double major, combining either language with another field of interest. Recent graduates have found positions in such fields as government service, international business, and secondary-school teaching; others have gone on to graduate study in Chinese or Japanese.

Course codes for these programs are EALC, ARAB, CHIN, FRSI, HIND, INDO, JPNS, KREN, and TBTN.

Asian Studies

The Center for Asian Studies offers a broad interdisciplinary undergraduate major in Asian studies. In addition, a number of departments offer graduate training with an emphasis on Asia.

Students planning to major in Asian studies may participate in study abroad programs with prior approval from the Asian Studies Program and the Office of International Education.

For additional information on the major program, contact Tim Weston at weston@colorado.edu or **303-735-5122**.

Course code for this program is ASIA.

Astrophysical and Planetary Sciences

The undergraduate major has two tracks—one in general astronomy and one in astrophysics/physics (see the website at aps.colorado.edu).

The track in general astronomy is designed to meet student needs for basic, undergraduate training in space sciences (astronomy, astrophysics, planetary sciences, and space physics). Undergraduates are prepared for both academic research assistant careers and the industrial market (aerospace, computer software, instrumentation, and other technical areas) as well as for science education, science journalism, and space policy. This track provides a liberal arts degree in the science of astronomy, observations, and technology as well as core training in astronomical sciences and mathematics, applied physics, and computational and instrumental technology for professions in the space sciences. The track can focus on observations (ground-based telescopes, rocket probes, space-borne observatories) or on K–12 science education, for which astronomy provides excellent science content for motivating young students. It also offers broad training for careers in science policy and science writing.

The bachelor's degree track in astrophysics/physics is directed toward students interested in pursuing graduate studies in astrophysics by focusing on multidisciplinary work in physics and mathematics together with astronomy. Graduates are provided with scientific and technological training in the space sciences, including mathematical, physical, computational, and instrumental expertise. An honors thesis or other research work is encouraged.

Specific goals for both programs are to provide:

- both theoretical and practical knowledge of astronomy and astrophysics at a level comparable to the best programs at other major U.S. public institutions. The Department of Astrophysical and Planetary Sciences is one of the few programs that combines both astrophysics and planetary science, providing a unified view of space sciences, the solar system and comparative planetology, stellar and galactic astronomy, and cosmology.
- courses and significant hands-on experience with telescopes, optics, instrumentation, as well as data analysis and image processing and numeric modeling. These skills are useful for students wishing to pursue graduate degrees or careers in aerospace, technical, or computer industries.
- opportunities for faculty-advised research and senior (honors) theses.

Course code for this program is ASTR.

Atmospheric and Oceanic Sciences

The Department of Atmospheric and Oceanic Sciences (ATOC) is an interdisciplinary program that provides an educational and research environment to examine the dynamical, physical, and chemical processes in the atmosphere, ocean, and land surface, and the manner in which they interact. A major theme is the establishment of a physical basis for understanding, observing, and modeling climate and global change.

Although an undergraduate degree program is not yet offered in ATOC, an undergraduate minor program is available. A total of 18 credit hours is required for the minor, including 9 elementary ATOC credit hours and 9 advanced ATOC credit hours. A full list of approved courses for the minor is available online and in the ATOC administrative offices.

Graduate students admitted to ATOC are eligible to receive an advanced degree in atmospheric and oceanic sciences. Graduate students outside of ATOC can pursue the Graduate Certificate in Atmospheric and Oceanic Sciences while earning a graduate degree from another department at CU-Boulder, or while taking course work as a non-degree-seeking student through Continuing Education's ACCESS Program provided they have already earned a bachelor's degree and meet the course prerequisites. In addition, students inside and outside the department may pursue a Graduate Certificate in Oceanography. For more information on graduate certificate programs, see the Graduate School/Interdisciplinary Programs section.

For more information about ATOC programs and application procedures, call the ATOC office at **303-492-6633** or visit atoc.colorado.edu.

Course code for this program is ATOC.

ATOC Undergraduate Minor Program

The Department of Atmospheric and Oceanic Sciences (ATOC) does not offer an undergraduate bachelor's degree program. However, the department does offer an undergraduate minor for students pursuing a bachelor's degree in another academic department. The ATOC minor is offered through the College of Arts and Sciences and is noted on the official CU transcript.

Although the ATOC minor is primarily designed for students who are interested in developing a knowledge base in atmospheric science with an emphasis on the Earth's climate, there is considerable latitude within the program for students to design a course of study that is tailored to their individual interests.

Course Requirements. A total of 18 credit hours with at least 9 credit hours at the advanced course work level. NOTE: Not all courses at the 3000 level and above are considered to be at the advanced course work level. Please see list below.

Required Courses and Semester Credit Hours

Elementary

- ATOC 1050 Weather and the Atmosphere—3
- ATOC 1060 Our Changing Environment—3
- ATOC/GEOL 3070 Intro to Oceanography—3
- ATOC 3300 Analysis of Climate and Weather Observations—3

Advanced

- ATOC 3500/CHEM 3151 Air Chemistry and Pollution—3
- ATOC 3600/ENVS 3600/GEOG 3601 Principles of Climate—3
- ATOC/ASTR 3720 Planets and Their Atmospheres—3
- ATOC/ASEN 4215 Descriptive Physical Oceanography—3

- ATOC 4500 Special Topics—3
- ATOC 4700 Weather Analysis and Forecasting—3
- ATOC 4720 Intro to Atmospheric Dynamics—3
- ATOC 4750 Desert Meteorology—3
- ATOC 4800 Policy Implications of Climate Controversies—3
- ATOC 4900 Independent Study—3

All course work applied to the minor must be completed with a grade of C- or better (no *pass/fail* work may be applied). The GPA for all minor degree work must be equal to 2.000 (C) or higher. Course work applied toward a minor may also be applied toward general education (core curriculum or college list) and major requirements. Students are allowed to apply no more than 9 credit hours, including 6 advanced level credit hours, of transfer work to a minor.

British and Irish Studies

The Center for British and Irish Studies encourages students to develop programs that include a focus on British and Irish culture, history, and contemporary life from a variety of disciplinary perspectives. At the undergraduate level, the center offers a certificate in British and Irish studies for students who have taken 24 credit hours in British and Irish literature, history, and/or other fields.

For graduate students, it offers occasional interdisciplinary seminars. These offer exposure to methods and sources outside the students' own departments and provide preprofessional training in presenting research. The center has funds for acquiring research materials for dissertation research, and offers travel fellowships for graduate students.

For more information, contact the Center for British and Irish Studies at jeremy.smith@colorado.edu. For more information go to www.colorado.edu/artssciences/british.

Central and East European Studies

Students who seek in-depth, interdisciplinary knowledge of the region are encouraged to pursue the certificate in Central and East European Studies (CEES). The certificate program offers students the opportunity to explore the culture, history, and politics of the nations of central and eastern Europe from a variety of disciplinary perspectives.

The purpose of the certificate program is to enhance, rather than to replace, the department major. Students work with CEES faculty advisors to plan an appropriate certificate program. The certificate is issued by the dean of the College of Arts and Sciences, and is awarded in addition to a bachelor's degree in another field.

Contact the director of Central and East European Studies, Professor Elizabeth Dunn at **303-492-5388** for information.

Course code for this program is CEES.

Chemistry and Biochemistry

The undergraduate degree in chemistry and biochemistry emphasizes knowledge and awareness of:

- the basic principles of chemistry—atomic and molecular theory, reactivities and properties of chemical substances, and the states of matter;
- the basic subfields of chemistry—organic, physical, analytical, and inorganic chemistry (and biochemistry for biochemistry majors);
- mathematics sufficient to facilitate the understanding and derivation of fundamental relationships and to analyze and manipulate experimental data;
- the basic principles of physics (and for biochemistry majors, knowledge of biology); and
- safe chemical practices, including waste handling and safety equipment.

In addition, students completing the degree in chemistry or biochemistry are expected to acquire the ability and skills to:

- read, evaluate, and interpret information on a numerical, chemical, and general scientific level;
- assemble experimental chemical apparatus, design experiments, and use appropriate apparatus to measure chemical composition and properties (for biochemistry students, this includes properties of proteins, nucleic acids, and other biochemical intermediates); and
- communicate results of scientific inquiries verbally and in writing.

Course code for this program is CHEM.

Classics

Through consultation with the undergraduate advisor, the bachelor's degree in classics is tailored to the student's interests in the field. Major and minor programs can be arranged with a concentration in either Latin or Greek or a combination of the two, with a focus on classical literature, culture, and thought (including mythology, literature, philosophy, religion, art, archaeology, and history) or with a particular emphasis on classical history, art, and archaeology. Prospective majors and minors should consult with the undergraduate advisor and review the departmental list.

The undergraduate degree in classics emphasizes knowledge and awareness of:

- the fundamental outlines of the history of Greek and Roman literature, from Homer to the end of classical antiquity;
- the historical and cultural contexts of particular works; and
- the art, religion, and philosophy of ancient Greece and Rome and their roles in world cultural history.

In addition, students completing the degree in classics are expected to acquire the ability and skills to:

- read, understand, and interpret written documents and works of literature in ancient Greek or Latin where relevant, as well as in translation;
- communicate in spoken and written form with adequate clarity and complexity for the relevant audience; and
- read and think critically.

Interested students are encouraged to consult www.colorado.edu/classics/undergrad for more information.

Course code for this program is CLAS.

Communication

The bachelor of arts in communication provides analytic work from both humanistic and social-scientific perspectives, and practical work to improve communication performance in various kinds of situations.

The undergraduate degree in communication emphasizes knowledge and awareness of:

- the history and development of communication as an object of scholarly study, including both the humanistic and social-scientific traditions;
- the basic contexts in which communication is enacted (e.g., interpersonal, group, organizational, and public contexts);
- the various processes of interaction within these contexts;
- the basic methods of investigating questions about communication;
- the ethical issues and responsibilities of communication practice;
- the diversity of communication styles associated with gender and cultural differences; and
- the uses and implications of communication technology.

In addition, students completing the degree in communication are expected to acquire the ability and skills to:

- express ideas in an informed, coherent, and effective manner, particularly the ability to articulate and develop a sustained argument, both orally and in writing;
- analyze, criticize, and evaluate messages and interactions in a variety of practical contexts, both orally and in writing; and
- adapt messages and negotiate interactions responsibly in diverse and changing situations.

There are optional programs in which students are encouraged to participate such as study abroad, internships, and graduating with honors.

Graduate study in communication examines problems of human interaction and relationship, participation and collaboration, and deliberation, dialogue, and decision making in personal relationships, workplace and institutional contexts, and community and public life. The master's program provides students with knowledge of selected bodies of communication scholarship and develops their skills in analyzing complex communication situations for a range of professional positions in business, nonprofit institutions, and other types of community groups, and for doctoral study in communication. The doctoral program provides students with opportunities to conduct theoretically grounded, practically useful research that crosses traditional academic boundaries and that prepares them to assume faculty positions in universities, as well as in research and training programs in business, government, and social service agencies.

Course code for this program is COMM.

[+ Bachelor's Degree Program\(s\)](#)

[+ Graduate Degree Program\(s\)](#)

Comparative Literature

The Comparative Literature Graduate Program enables students to study the production, reception, and interpretation of written texts and related media from a comprehensive perspective involving at least two national literatures. Comparative literature has long crossed national linguistic frontiers. The discipline today questions the very basis of such boundaries, exploring the construction of national literatures, languages, and traditions and, insofar as this can be read in and out of verbal and other media, of nations and national consciousness itself. Extending its reflections on limits still further and in dialogue with other disciplines, the interpretive perspectives of comparative literature are not only crossdisciplinary, multi-media, and multilingual, but global. The aim is to analyze the world's cultures both as expressions of the various interdependent histories that have framed them, and as manifestations of the multifacetedness inscribed in the different forms by which human beings shape and communicate their experience. These forms can range from a single literary genre, period, movement, or tradition to larger concepts and constructs such as gender, sexuality, theory, or culture. Areas of analysis may also include authorship and the literary work, literacy, genre, literary history, and the canon. Students wishing to pursue graduate work in comparative literature should read the guidelines for the MA and PhD degrees in this field, which are available at complit.colorado.edu.

Course code for this program is COML.

Distributed Studies Program

Admission to the distributed studies track requires completion of 60 credits or more and permission from the dean's office. The distributed studies track is intended for students who have accumulated a significant number of credit hours toward the completion of one or more majors and are not eligible to continue in those majors.

An individually structured track also is available in the distributed studies program. Students pursuing the individually structured track must write and defend a thesis based on original scholarly or creative work.

For more information, contact the College of Arts and Sciences Academic Advising Center in Woodbury 109.

Ecology and Evolutionary Biology

Ecology seeks to understand the processes that control the abundance and distribution of organisms and how they interact with one another in a changing environment. Evolutionary biology provides a unifying conceptual framework for all of biology, including the characteristics of organisms and biological diversity. Taken together, ecology and evolutionary biology form a fundamental, broad, diverse, and interdisciplinary area of scientific inquiry. Study in both areas is necessary for understanding the complex biological issues of today, including fighting diseases, understanding of the responses of life and humankind to Earth's changing environment, and learning how species develop, thrive, and decline. Also, ecology and evolutionary biology are working toward solving some of the world's most demanding problems, including sustainability and the future of life on earth, human health and welfare, and wise stewardship of our planet. Students majoring in Ecology and Evolutionary Biology (EBIO) apply scientific approaches to issues in ecology and evolution, with an emphasis on critical evaluation of the literature, generating and testing hypotheses, designing and carrying out experiments to test predictions, and articulating, in oral or written form, the results of investigations.

In light of the broad importance of ecology and evolution for fundamental understanding of living systems, the undergraduate EBIO degree emphasizes knowledge and problem-solving in areas of:

- the ecology of organisms, populations, and communities
- the distribution and function of terrestrial, freshwater, and marine ecosystems
- principles and patterns of evolution, including natural selection and the history of life on Earth
- comparative, systematic, evolutionary, and environmental aspects of botany, microbiology, and zoology
- adaptation of organisms to the physical and biotic environment
- animal behavior and emotion
- molecular evolution and population genetics
- developmental biology and the evolution of development
- conservation biology and management of ecosystems
- the relevance of mathematics, chemistry, and physics to biology
- the development of biological thought
- infectious disease ecology
- landscape and ecosystem ecology
- sustainability and human-nature systems
- energy and biofuels
- Darwinian medicine
- health and population genetics
- genetically engineered organisms

EBIO majors include students who:

- have strong and compelling interests in the natural world and who are interested in making a difference
- are interested in pursuing advanced graduate degrees in science, especially biology
- want careers in the areas of natural resources management, environmental consulting, environmental law, environmental science, science teaching and scientific journalism, among other professions
- are passionate about making a difference in the lives of others by improving their physical and mental health
- are interested in many different areas of biology, from the molecular to ecosystem levels
- are fascinated with the complexity and diversity of nature

A bachelor of arts (BA) degree in EBIO provides excellent training, education, and experience, preparing students for many successful careers and for admission to and success in graduate study or medical school and other health professions:

- because ecology and evolution are subjects of central importance for understanding the ways all organisms live, grow and survive—everything from microbes to humans
- because the department and its classes provide students a broad learning experience in the biological sciences
- because the department's faculty provide EBIO majors with excellent classes and research opportunities

Course code for this program is EBIO.

Economics

The undergraduate degree in economics emphasizes knowledge and awareness of:

- the conditions for efficiency in free market production and exchange;
- contemporary theories concerning economic growth, inflation, unemployment, distribution of income, and international environment;
- specialized fields of economics, such as international economics and finance, natural resources and environment, the economics of gender and discrimination, and public economics;
- the descriptive statistics commonly used by economists; and
- the institutional characteristics of the U.S. economy, and how these differ from those in other economies.

In addition, students completing the degree in economics are expected to acquire the ability and skills to:

- apply the tools of microeconomic theory to reach sound conclusions for simple economic problems;
- follow arguments concerning macroeconomic theory, to distinguish between sound and fallacious reasoning, and understand how differences in policy prescription may arise;
- perform statistical analysis such as multiple regression and understand similar analyses performed by others; and
- communicate economic reasoning in writing, understand similar writing by others, and appreciate the diversity of views that may reasonably exist about economic problems.

Course code for this program is ECON.

English

The undergraduate degree in English emphasizes knowledge and awareness of:

- canonical and non-canonical works of English and American literature;
- the history of British and American literature;
- literary theories, including recent theoretical developments; and
- the social and historical contexts in which the traditions developed.

In addition, students completing the degree in English are expected to acquire the ability and skills to:

- analyze literary texts;
- interpret texts on the basis of such analysis;
- relate analyses and interpretations of different texts to one another; and
- communicate such interpretations competently in written form.

The undergraduate degree in creative writing emphasizes knowledge and awareness of:

- literary works, including the genres of fiction, poetry, playwriting, and screenwriting, and the major texts of contemporary writers;
- literary history, including the origins and development of genres, major writers of the past, and the role of the writer in society; and
- literary analysis, including theories of literary composition and critical theory.

In addition, students completing the degree in creative writing are expected to acquire the ability and skills to:

- write in various poetic modes and styles;
- write in various fictive styles;
- write in various nonfiction styles; and
- evaluate other students' written work.

Course code for this program is ENGL.

[+ Bachelor's Degree Program\(s\)](#)

[+ Graduate Degree Program\(s\)](#)

Environmental Studies

The interdisciplinary Environmental Studies major is administered through the Environmental Studies Program and draws courses from 16 departments and four colleges on the CU-Boulder campus. The major teaches the integration of science, policy, and values as applied to environmental issues. Students acquire an awareness of the complexity of factors relating to human interaction with the environment. They become acutely aware that environmental problems have both human and biophysical components, and they gain knowledge of the general principles of human-environmental interaction, global habitability, environmental change, and sustainable human societies.

To complete the ENVS major, students take foundational courses in sciences, policy, ethics, economics, writing and math, as well as an internship or field course, and a capstone course. Fifteen credit hours of "specialization" courses are required, allowing students to focus in one content area such as climate and energy, natural resources, or sustainable development.

See the program website at envs.colorado.edu/undergrad_program/C31/curriculum for details of the program requirements and current courses.

Course code for this program is ENVS.

Ethnic Studies

The ethnic studies major was created to initiate and promote interdisciplinary research and teaching in Africana studies, American Indian Studies, Asian American studies, Chicana and Chicano studies, American studies, and cross cultural/comparative studies.

The discipline of ethnic studies comprises a series of distinct approaches and theoretical analyses of the historical, political, social, and cultural forces and phenomena that have shaped the development of America's diverse racial and ethnic peoples. This approach begins with an overview and understanding of these group experiences prior to the time of the European invasion, and continues with a subsequent and primary analysis of the impact that race and ethnicity has had in America during the past 500 years.

The ethnic studies major provides a broad liberal arts education to all students. It imparts fundamental skills in critical thinking, comparative analysis, and oral and written expression. The major provides appropriate training especially for those considering admission to graduate or professional schools and careers in education, law, medicine, public health, school work, journalism, business, urban planning, politics, counseling, international relations, creative writing, as well as university teaching and research.

The Department of Ethnic Studies has a core faculty of its own, but also draws on the faculty resources of many departments in the College of Arts and Sciences, as well as the College of Architecture and Planning, the School of Education, the School of Journalism and Mass Communication, the School of Law, the College of Music, and University Libraries.

Study Abroad

The Department of Ethnic Studies encourages students to participate in the study abroad programs offered through the Office of International Education. These programs give students a deeper understanding of culture and attitudes of people of color in other parts of the world and their carryover into the United States. CU-Boulder partners with several study abroad organizations that offer summer, semester, and full year programs in many locations around the world, most notably in Africa, Asia, and Latin America. Programs of special interest include study abroad in Mexico, Dominican Republic, Peru, Bolivia, Ecuador, Ghana, Morocco, Spain, Taiwan, Japan, Australia, and South Africa.

For additional information, contact the Office of International Education. Students should always consult with their academic advisor prior to choosing their study abroad program.

Course code for this program is ETHN.

Film Studies

The Film Studies Program educates students in the history and development of film as an art form and contemporary medium. The curriculum instills an informed analytic awareness of the ways in which film has been used and provides the resources for significant creative exploration of the medium.

The undergraduate degrees in film studies emphasize knowledge and awareness of:

- the major artistic contributions to the evolution of film, from the advent of the moving image to the present;
- the general outlines of world film from the silent period to the present, with emphasis on the historical contributions of major national cinemas; and
- film criticism and film theory.

Students completing either the BA or the BFA degree in film studies are expected to acquire the ability and skills to:

- analyze and interpret films critically;
- communicate such interpretations competently in essay form; and
- make a short creative film or video work (BFA majors only).

NOTE: Admission to any class after the third meeting of the class is contingent on professor permission. The department may drop a student from a class if the student misses the first two classes of the semester.

Course code for this program is FILM.

French and Italian

French

Beyond providing mastery of the language skills (listening, speaking, reading, writing) of modern French needed for all purposes of daily life, the major introduces students to a central tradition of western and world culture. Since the Middle Ages, French literature, thought, taste, and art have helped shape the essential experience and self-understanding of humanity at large. Survey courses and upper-division seminars offer a range of exposures to the French cultural past and the far-flung ethnic and national diversity of the French-speaking present. The major explores distinctively French contributions to world culture, such as Arthurian romance, troubadour poetry, and Gothic architecture; the love sonnets of the Pléiade, the comic novels of Rabelais, and the essays of Montaigne; the neoclassical theatre of Corneille, Molière, and Racine and the critical philosophy of Descartes and Pascal; the Enlightenment philosophies of Voltaire, Diderot, and Rousseau; the psychological refinements of French fiction from Mme de La Fayette to Proust; artistic revolutions like impressionism and surrealism; the renewal of artistic conventions in the Theatre of the Absurd, the New Novel, and the cinema of the New Wave; the French-language literature of Africa, Canada, and the Caribbean; and the vital presence of French writers in major movements of 20th century thought like existentialism, structuralism, feminism, psychoanalysis, and contemporary cultural studies and multiculturalism.

The undergraduate degree in French emphasizes knowledge and awareness of:

- the fundamental outlines of the history of French literature from the Middle Ages to the present;
- significant works of French literature and the literary culture of the French-speaking world;
- the historical context in which particular works were written and the relation between literature and other forms of cultural expression (e.g., art, philosophy, politics, religion);
- contemporary French culture, politics, and current events;
- a range of literary genres, their development and reception, and relevant critical methodologies; and
- the grammatical structure of modern standard French.

In addition, students completing the degree in French are expected to acquire the ability and skills to:

- speak and understand modern, spoken standard French sufficient for all purposes of daily life and for intellectual discussion in academic settings;
- read and write modern standard French with sufficient fluency and correctness for successful literary or linguistic analysis of French texts;
- analyze and interpret literary texts in terms of style, plot, structure, characters, themes, and the use of literary devices;
- communicate such analyses and interpretations simply in French or at a more sophisticated level in English, and discuss a wide range of topics concerning French culture, civilization, and current events; and
- follow with reasonable comprehension French broadcasts or film.

Italian

The major provides the language skills (listening, speaking, reading, writing) of modern Italian needed for all purposes of daily life. Moreover, by combining courses offered by the faculty of the Department of French and Italian with courses of Italian interest taught in other units, including film studies, fine arts, and history, the program promotes an understanding of the role of the Italian literary and cultural tradition within western civilization at large. As the birthplace of Dante, Petrarca, Boccaccio, Ariosto, Tasso, Marino, Michelangelo, Raphael, and Da Vinci, Italy is the cradle of the Renaissance. Italy projects a powerful, formative influence into our own day through the work of 19th- and 20th century writers like Leopardi, Manzoni, Pirandello, Levi, and Calvino; operatic composers like Rossini, Puccini, and Verdi; philosophers and critics like Croce, d'Annunzio, Gramsci, and Ginzburg; and filmmakers like Fellini, Pasolini, and Bertolucci. Thus, in addition to supplying the necessary background for advanced professional study and specialization, the Italian major introduces students to a rich literary, artistic, and intellectual history at the roots of the modern world.

Students wishing to major in Italian are required to have a thorough advising session with the Italian program advisor. In this session the student program of study is outlined in detail. Students are required to see the advisor in the event that any of their major courses are canceled so that substitutions and revisions in their programs can be made. The department will not approve a major in

Italian unless the student has been advised by the program advisor.

For courses in other departments with an Italian emphasis (e.g., comparative literature, fine arts, history, honors, etc.), see those sections.

The undergraduate degree in Italian emphasizes knowledge and awareness of:

- the fundamental outlines of the history of Italian literature from the Middle Ages to the present;
- significant works of Italian literature and the contribution to world literature of Italian letters;
- the historical context in which particular works were written;
- contemporary Italian culture, politics, and current events;
- a range of literary genres, their development and reception, and relevant critical methodologies; and
- the grammatical structure of modern standard Italian.

In addition, students completing the degree in Italian are expected to acquire the ability and skills to:

- speak and understand modern, spoken, standard Italian sufficient for all purposes of daily life and for intellectual discussion in academic settings;
- read and write modern standard Italian with sufficient fluency and correctness for successful literary or linguistic analysis of Italian texts;
- analyze and interpret literary texts in terms of style, plot structure, characters, themes, and the use of literary devices;
- communicate such analyses and interpretations simply in Italian or at a more sophisticated level in English, and discuss a wide range of topics concerning Italian culture, civilization, and current events; and
- follow with reasonable comprehension authentic Italian broadcasts or film.

Course codes for these programs are FREN and ITAL.

Geography

The Department of Geography offers theoretical and practical work in physical geography, including climatology, hydrology, geomorphology, and biogeography; conservation of natural resources, including environmental education; human geography, including urban, social, economic, political, cultural, and population geography; geographic information science (GIS), including spatial analysis using GIS, remote sensing, computer cartography, GIS and society, and geography education; and regional analysis, including mountains, natural hazards, and specific regional courses. To complement its curriculum, the department offers internship opportunities to geography majors.

The Department of Geography offers BA, MA, and PhD degree programs in geography.

The undergraduate degree in geography emphasizes knowledge and awareness of:

- the unique contributions of the discipline to understanding the spatial components of problems and the diverse factors relating to human interaction with the environment;
- the spatial distributions of physical and human characteristics on the Earth surface, the general patterns these form, and the processes that have created and are changing these patterns;
- the major themes of geographical analysis, including absolute and relative location; human and physical characteristics of place; human and environmental relations; movement of people, ideas, and products; and regionalization; and
- the general geographical principles of human-environment interaction, global change, and human spatial organization.

In addition, students completing the degree in geography are expected to acquire proficiency in:

- one or more of the specific geographic skill areas of cartography, remote sensing, and geographic information systems;
- writing, quantitative methods, computer literacy, and library and field methods of data collection; and
- identifying the geographic dimensions of a problem and analyzing, synthesizing, and evaluating relevant data, and applying geographic principles offering a geographic perspective on that problem.

MAPS (Minimum Academic Preparation Standards)

To fulfill a MAPS deficiency in geography, students may take any one of the following courses: GEOG 1982, 1992, 2002, or 2412, or pass the Geography Exemption Exam. For more information on the exemption exam, contact Testing Services at **303-492-5854** or careerservices.colorado.edu/testing.cs.

The course code for this program is GEOG.

➤ Certificate Program

Geological Sciences

The options available in the undergraduate program in geological sciences are geology, geophysics, and environmental geosciences. Each option leads to the BA degree. All of these options provide a strong basis for understanding the functioning of the Earth system and a firm foundation for graduate study and professional employment. Students who are uncertain as to which option best suits their needs should contact a departmental advisor or faculty member. In all options, the undergraduate program emphasizes course work in theoretical, laboratory, and field-oriented aspects of the geological sciences. The nearby Rocky Mountains provide a natural laboratory for many of these courses.

Students interested in the geological sciences may also wish to consider the Baker Residential Academic Program. Students who do not wish to pursue a career in the geosciences, or who would like to combine a basic knowledge of geologic sciences with that of some other field, should consider using geological sciences as one subject in a distributed studies major or as a minor. Students who intend to pursue graduate study in the geological sciences are encouraged to consider developing an honor thesis as part of their undergraduate studies.

The three options available in the undergraduate major offer different focus areas of instruction. All three options offer excellent preparation for students interested in pursuing professional careers, or graduate study, in the geological sciences.

Each option emphasizes knowledge in:

- the ways in which Earth responds to internal and external forces; the physical, chemical, and biological evolution of Earth; and the nature of the materials of which the Earth is made
- the role of physics, chemistry, mathematics, and biology in understanding geological processes
- the history of discoveries and ideas that have contributed to our current knowledge of the Earth and the planetary system

The geology option is a traditional geology degree program that emphasizes the following:

- the mineralogy and petrology of igneous, metamorphic, and sedimentary rocks
- the processes of sedimentation and the applications of stratigraphy and paleobiology in the reconstruction of Earth history
- the role of geophysics and geochemistry in understanding the nature of Earth and its history
- the study of faults, folds, and other rock structures and the tectonic processes that create those structures
- the methods used in the field to map and interpret the diverse variety of rock types and structures

The environmental geoscience option emphasizes the following:

- the function of the integrated Earth system including the atmosphere, hydrosphere, biosphere, and geosphere
- the fundamental controls on surface Earth processes including energy balance, hydrology, geomorphology, geochemistry, and biogeochemistry
- the role of humans in the Earth system

The geophysics option emphasizes:

- applications of fundamental mathematical formulations and physical principles to an understanding of the Earth
- methods utilized to map and characterize those portions of the planet that lie below the surface, from just beneath our feet down to the core

Course code for this program is GEOL.

Germanic and Slavic Languages and Literatures

Undergraduate students may choose to major in either German studies or Russian studies. The department also offers courses in Hebrew studies and a minor in Nordic studies.

The major in **German studies** is an interdisciplinary program focusing on study of the German language, its manifestations in history, and its usage in the current cultural and social context; the literary, artistic, and philosophical aspects of German culture in the past and the present; the major historical events and developments in Germany and its neighboring countries, and the current political institutions and dynamics in Germany within the broader European framework.

The undergraduate degree in German studies emphasizes knowledge and awareness of:

- the fundamental outlines of German history and culture;
- the history of modern German literature, 1750 to the present;
- cultural developments in modern German-speaking Central Europe, such as the arts, the cinema, and architecture; and
- central issues such as the Nazi era and the Holocaust, the roles of women, German attitudes toward non-Germans, German culture after reunification, and their reflection in German literature, arts, and media.

In addition, students completing the degree in German studies are expected to acquire the ability and skills to:

- read German at a level at which critical literary and cultural analyses can be performed;
- write and speak German sufficiently to participate in critical discussions and write critical essays; and
- speak and comprehend German sufficiently for all situations in daily life, especially the business and professional sectors of German life.

The major in **Russian studies** is an interdisciplinary program focusing on study of the current cultural and social context, and the literary, artistic, and historical aspects of Russian culture in the past and present. The aim of the language curriculum is to equip students to read, write, speak, and understand Russian on a level allowing communication with natives and other users of the language. Before registering for a course, students should consult with a departmental advisor concerning appropriate placement.

Students interested in Russian studies should consider a double major in order to increase their career opportunities. Prospective teachers might combine Russian studies with a major in another foreign language, while those preparing for a career in government, business, or social services should benefit from a combination of Russian studies and a social science or business major. Students structure their curriculum according to the departmental checklist for majors, in close consultation with a departmental advisor.

The undergraduate degree in Russian studies emphasizes knowledge and awareness of:

- the fundamental outlines of the history of Russian literature and culture from the Middle Ages to the present day;
- the major Russian creative writers of the 19th and 20th centuries;
- the historical context of Russian literature and culture; and
- basic critical methodologies as they relate to the study of Russian literature.

In addition, students with a degree in Russian studies are expected to acquire the ability and skills to:

- comprehend contemporary Russian, written or spoken, to a degree permitting sophisticated analysis of cultural texts;
- analyze Russian literary texts and give a reasoned response to them in literate English; and
- write and converse in Russian at their own intellectual level.

Course codes for these programs are GRMN, GSLL, HEBR, NORW, RUSS, SCAN, and SWED.

Humanities

Humanities is an interdepartmental major that offers an interdisciplinary and comparative approach to the study of the arts within their historical and cultural context. As a direct result of its encouragement of interdisciplinary approaches to the analysis and interpretation of literature, music, film, art, and modern media, humanities offers an opportunity for students and faculty to pursue a wide variety of approaches to these areas.

Humanities is committed to a profoundly comparative perspective enabling students and faculty to bring together not only different arts, but works drawn from different eras and cultures, Western and non-Western alike.

The undergraduate degree in humanities emphasizes knowledge and awareness of:

- the ways cultures and traditions define both themselves and each other;
- the formal, rhetorical, and ideological properties of cultural texts in a variety of forms and media (literature, history, philosophy, film, music, visual arts, architecture, dance, theatre, performance);
- the dynamic relationships between texts and their social and historical contexts;
- the genres and modes of texts and their production, transformation, and reception; and
- the theoretical and ideological underpinnings and implications of one's own and others' interpretive approaches and assumptions.

In addition, students completing the degree in humanities are expected to acquire the ability and skills to:

- analyze and interpret texts in a variety of forms and media;
- articulate such analyses and interpretations at a sophisticated level in both written and oral forms;
- discern similarities and differences among individual works, artistic media, historical periods, and cultural traditions;
- reason critically; and
- explore the connections between contemporary issues and academic work.

Integrative Physiology

Physiology is the field of biology that deals with function in living organisms. The academic foundation of the department is the knowledge of how humans and animals function at the level of genes, cells, organs, and systems. Our multidisciplinary curriculum requires students to take foundational courses in anatomy, biochemistry, mathematics, physics, physiology, and statistics. With this basic knowledge, students can undertake a flexible curriculum that includes the study of biomechanics, cell physiology, comparative physiology, endocrinology, immunology, exercise physiology, and neurophysiology. The department also encourages student participation in research.

Students completing a degree in integrative physiology are expected to acquire the ability and skills to:

- Read, evaluate, and synthesize information from the research literature on integrative physiology;
- Observe living organisms and be able to understand the physiological principles underlying function;
- Be able to interpret movement and performance data from laboratory measurements; and
- Communicate the outcome of an investigation and its contribution to the body of knowledge on integrative physiology.

These goals are achieved by providing a curriculum that comprises required courses and elective experiences. The required courses establish the foundation of knowledge for the discipline, whereas the elective courses provide opportunities to extend this knowledge on selected topics. The elective courses include seminars, critical thinking classes, independent study, and research projects on such topics as applied exercise science, biochemical basis of performance, cellular and systemic cardiovascular physiology, comparative physiology, developmental neurobiology, ecophysiology, environmental and comparative endocrinology, genetics of substance abuse, mechanics and neural control of locomotion, molecular behavioral genetics, molecular neurogenetics, motor behavior, neurophysiology of movement, neuroimmunophysiology, reproductive endocrinology, sleep and chronobiology, and vascular biology. More detailed information is available at www.colorado.edu/intphys.

International Affairs

With the increasing importance of world issues to the United States, employment opportunities in government, international organizations, and business continue to expand. Today there is an urgent need for college graduates with a strong background in international affairs. To meet this need, the University of Colorado offers a comprehensive and flexible interdisciplinary program in international affairs leading to the BA degree.

The undergraduate degree in international affairs emphasizes knowledge and awareness of:

- major political, economic, social, and cultural problems facing the international community, including international economic relations, world population, and resource utilization
- the international political system in the broadest global context, international organizations and alliances, and foreign political systems and processes
- ethical issues involved in international relations
- patterns of conflict and cooperation among nations and peoples
- chief historical factors that give rise to existing international institutions and processes
- problems and issues in United States foreign policy

In addition, students completing the degree in international affairs are expected to acquire the ability and skills to:

- analyze an international problem from a political, economic, historical, and cultural perspective
- read, critically evaluate, and synthesize information obtained from international affairs literature
- analyze international phenomena critically
- communicate, orally and in writing, findings to other students of international affairs and to a broader audience

INVST Community Studies

Consistent with their vision for a just and sustainable world, INVST Community Studies program develops engaged citizens and leaders who work for the benefit of humanity and the environment. INVST Community Studies innovatively operates as a community-based organization, practicing service learning and participatory education. In order to fulfill this mission, the program offers:

- a comprehensive two-year Community Leadership Program (CLP) focused on developing community leaders who engage in compassionate action as a lifetime commitment;
- Community Studies electives that foster civic responsibility and leadership potential;
- a Public Achievement Program for local primary and secondary school students; and
- a Youth Council for Public Policy that empowers young people to use the democratic process as a tool for positive social change.

The INVST CLP is the flagship program that offers a unique and transformational educational experience to all majors. Each year the INVST CLP admits a small group of students who are committed to making a positive difference with their lives. The two-year program is designed to cultivate deep understanding about issues facing people and the planet, and to provide skills and experiences for community leaders to fulfill progressive visions for change. Specifically, students participate in theory classes, skills-training classes, and two summer service-learning experiences, one domestic and one international. In addition, students intern six hours each week with community-based organizations during their first academic year, and collectively design, implement, and evaluate community leadership projects during their second academic year. Students learn and serve together in a small group environment throughout the program. Applications for the INVST CLP are due every year in February. For more information, call **303-492-7719**.

Jewish Studies

The Program in Jewish Studies explores Jewish culture, history, society, and thought from a broad, interdisciplinary perspective. The program reflects the core goals of Colorado's flagship university: to provide an outstanding liberal arts education, to foster critical thought, and to instill a keen appreciation of humanity's interrelatedness and diversity. At its core, the major trains students to be global citizens by studying the world's oldest global people.

With a major in Jewish Studies, students will develop fundamental skills in critical thinking, comparative analysis, oral and written expression, and a well-rounded perspective of the diversity of the Jewish experience. CU-Boulder's major in Jewish Studies is designed to encourage students to explore all facets of Jewish life in the context of the larger global society. With internationally acclaimed faculty engaged in cutting-edge research and opportunities to study with leading artists, scholars, and professionals working in the field of Jewish Studies, the program offers an innovative and contemporary curriculum designed to provide a strong foundation in cultural education and to connect Jewish thought and text to action and people's lives.

As a major, students will have the opportunity to take courses that explore Jewish history, modern Jewish experience in a variety of countries and cultures, Jewish literature, and secular Jewish societies. Courses are offered on a wide array of topics and issues including Jewish culture, the history of the Arab/Israeli conflict, the Holocaust, gender and sexuality in Judaism, Israeli literature, the history of Yiddish culture, and cultures of Israel and Palestine. The study of Jewish culture, society, history, and religion is, by its nature, comparative. This program offers many cross-listed classes with other departments on campus to facilitate a well-rounded learning experience. **The program is open to students of all backgrounds.**

Linguistics

Linguistics is the study of all aspects of human language: how languages make it possible to transmit ideas and feelings; how and why languages are similar and different; how we develop different styles and dialects; what will be required for computers to understand and produce spoken language; and how languages are used in everyday communication as well as in formal settings. Linguists try to figure out what it is that speakers know and do by observing the structure of languages, the way children learn language, slips of the tongue, conversations, storytelling, the acoustics of sound waves, and the way people's brains react when they hear speech or read. Linguists also reconstruct prehistoric languages, and try to deduce the principles behind their evolution into the thousands of languages of the world today.

The major in linguistics is useful for careers involving cognitive science, computer science, psychology, international business, language teaching, advertising, publishing, law, and documentation. Double majors and minors are encouraged with language, computer science, psychology, communication, sociology, anthropology, international affairs, philosophy, and education.

The core of the major is a set of courses, taught in the Department of Linguistics, on the nature of language. In addition, the major requires language courses offered by other departments (except for fluent speakers of languages other than English).

The undergraduate degree in linguistics emphasizes knowledge and awareness of:

- the fundamental architecture of language in the domains of phonetics and phonology, morphology and syntax, and semantics and pragmatics;
- the diversity of languages structures;
- the main interactions between language, culture, and society, including the role of language as a cultural institution and the social functions of language diversity; and
- the approaches to the study of language that are used by a discipline other than linguistics.

In addition, students completing the degree in linguistics are expected to acquire the ability and skills to:

- demonstrate proficiency in a second language equivalent to the third-year university level;
- infer language structures from the analysis of data from unfamiliar languages; and
- give coherent general interpretations of common language phenomena in terms of language structure and language use.

Course codes for this program are LING and ESLG.

Mathematics

The undergraduate degree in mathematics emphasizes knowledge and awareness of:

- basic real analysis of one variable;
- calculus of several variables and vector analysis;
- basic linear algebra and theory of vector spaces;
- the structure of mathematical proofs and definitions; and
- at least one additional specialized area of mathematics.

In addition, students completing a degree in mathematics are expected to acquire the ability and skills to:

- use techniques of differentiation and integration of one and several variables;
- solve problems using differentiation and integration;
- solve systems of linear equations;
- give direct proofs, proofs by contradiction, and proofs by induction;
- formulate definitions;
- read mathematics without supervision; and
- utilize mathematics.

Course code for this program is MATH.

Molecular, Cellular, and Developmental Biology

The undergraduate degree in molecular, cellular, and developmental biology emphasizes knowledge and awareness of:

- the biological sciences in general and detailed understanding of currently important aspects of cellular biology, molecular biology, biochemistry, genetics, and developmental biology; and
- the relationship of the specialty area to broader areas of science and to society in general, including ethical issues raised by current biological research and by the rapid growth of biotechnology as an important shaping force for the future.

In addition, students completing the degree in molecular, cellular, and developmental biology are expected to acquire the ability and skills to:

- learn detailed laboratory procedures rapidly when the need arises;
- demonstrate a scientific vocabulary and an understanding of research methods that permits the comprehension of articles from current journals, extraction of pertinent information, and judgment of the quality of the work described;
- evaluate a biological problem, determine which aspects are understood, and apply basic research methods and techniques to the unknown aspects; and
- communicate scientific concepts and analytical arguments clearly and concisely, both orally and in writing.

Course code for this program is MCDB.

Museum and Field Studies

Museum courses listed in this catalog may be taken with the approval of the student's major department and the course instructor, although no undergraduate major is offered in museum studies. A graduate professional certificate in Museum and Field Studies is offered to graduate students in other disciplines. Please see the [Graduate School](#) listing for additional information.

Graduate training in anthropology, art history, history, botany, entomology, paleontology, and zoology is provided under the direction of museum faculty in cooperation with cognate departments and the museum and field studies program. Areas of study include, but are not limited to:

- anthropological interpretation
- diatom taxonomy, systematics, and ecology
- southwestern archaeology and ethnology
- plant taxonomy, evolution, and phytogeography
- vertebrate paleontology and Cenozoic stratigraphy
- biology of aquatic invertebrates
- systematics and population biology of insects of the Rocky Mountain Region
- plant–insect interactions

Museum assistantships include support from the Walker Van Riper fund and research support from the Collie and William Henry Burt museum funds. Other financial assistance is available to selected students. Students interested in working toward advanced degrees under the direction of museum faculty should write the University of Colorado Museum, Museum and Field Studies, University of Colorado Boulder, 218 UCB, Boulder, CO 80309-0218, e-mail mfsinfo@colorado.edu, or visit cumuseum.colorado.edu/MFS.

Course code for this program is MUSM.

Peace and Conflict Studies

The Certificate Program in Peace and Conflict Studies (PACS) is designed to help students explore why conflict and violence occur and learn how conflict can be managed and transformed to accomplish constructive ends. The certificate is granted by the dean of the College of Arts and Sciences, but students in any school or major at the University of Colorado may earn it.

The program takes an interdisciplinary perspective to the study of conflict, cooperation, war, and peace. Course work from various departments focuses on personal and social change, intra- and international conflicts, processes of conflict resolution, creative nonviolent activism, and the analysis of violence of various forms. The program encourages hands-on, "in the field" learning of peace and conflict issues through volunteer and internship placements with a wide variety of peace, justice, and development agencies.

For information or application go to the program's website: www.colorado.edu/peacestudies.

Course code for this program is PACS.

Philosophy

The undergraduate degree in philosophy emphasizes knowledge and awareness of:

- some of the principal philosophical texts in the history of western philosophy, from its beginnings in Greece to the late 19th century;
- some of the main currents in 20th century philosophy, including some acquaintance with contemporary philosophical issues and modes of inquiry;
- a single major author or a single philosophical movement; and
- elementary formal logic.

In addition, students completing the degree in philosophy are expected to acquire the ability and skills to:

- form reasoned opinions about the issues—moral, religious, political, etc.—that educated people debate;
- understand, analyze, and evaluate complex arguments and theories;
- distinguish between the main thrust of an argument or position and what is ancillary to it;
- discover and critically examine the underlying presuppositions of major systems of ideas or programs for action;
- see important connections between different systems of ideas or programs for action;
- explain difficult ideas and concepts in an informed, effective, and coherent manner;
- develop a thesis and present a coherent argument for it;
- write a clear and coherent essay; and
- engage in rational and productive discussion of issues and arguments.

Course code for this program is PHIL.

Physics

The undergraduate degree in physics emphasizes knowledge and awareness of:

- the basic subfields of physics (classical mechanics, electricity and magnetism, quantum mechanics, statistical mechanics, and thermodynamics), as well as at least one specialty area of application (e.g., solid state physics or optics);
- the major principles of physics, their historical development, and the roles they play in the various subfields of physics;
- the interrelations between theory and observation, the role of systematic and random experimental errors, and methods used to analyze experimental uncertainty and compare experiment with theory;
- physical phenomena and experience in the use of basic experimental apparatus and measuring instruments;
- mathematics sufficient to facilitate the acquisition and application of physical principles; and
- the importance of physics in other fields such as chemistry, biology, engineering, medicine, and in society at large.

In addition, students completing the degree in physics are expected to acquire the ability and skills to:

- apply physical principles to new situations;
- construct and assemble experimental apparatus, conduct and analyze measurements of physical phenomena, analyze properly experimental uncertainty, and make meaningful comparisons between experiment and theory; and
- communicate results of scientific inquiries verbally and in writing.

Political Science

The Department of Political Science offers instruction and research in the art and science of politics. Work within the department is organized around six basic fields: American government and politics, comparative politics, international relations, public policy, political theory, and empirical theory and methodology.

At the most general level, the goal of the undergraduate curriculum in political science at the University of Colorado Boulder is to offer students the opportunity to develop an appreciation of politics and government and of the students' roles within them.

The undergraduate degree in political science emphasizes knowledge and understanding of the following:

- the values and beliefs that constitute the Western political tradition, as well as alternative ideologies and belief systems;
- the institutions and processes of the American political system and its strengths and weaknesses in the 21st century;
- other political systems, both Western and non-Western, which are members of the world community, our allies and competitors in international relations, and through comparative analysis offering a source of insight into American society and politics;
- the patterns of interaction among members of the world community, the causes of war and peace, and the sources of international conflict and cooperation; and
- the domestic and international policy issues facing the United States and the world community and the ability to make reasoned judgments—integrating facts and values, means and ends—regarding policies to address those problems.

In addition, students completing the degree in political science are expected to acquire the ability and skills to:

- evaluate conflicting arguments, assemble and present empirical evidence, and make reasoned conclusions from the evidence available; and
- communicate effectively, both orally and in written form.

Students interested in political science may want to consider the [Global Studies Residential Academic Program](#).

Psychology and Neuroscience

At the undergraduate level, this department offers a major in psychology and a track in neuroscience. Psychology is a broad discipline that seeks to understand human cognition, emotion, and behavior. It is also an applied field that is concerned with testing perception, psychopathology, inheritance of complex behavioral traits, mental health, memory, and social factors that influence behavior. Neuroscience is the study of the mechanisms of nervous system—the brain, the spinal cord, and networks of sensory nerve cells, or neurons. Neuroscientists work to describe how neural circuits transmit signals and process different types of information. The principles of neuroscience are derived from the application of methods from many scientific disciplines, including molecular and cellular biology, biochemistry, physiology, structure, and computational modeling. Note that no terminal master's degree is offered except for the concurrent BA/MA program in cognitive psychology.

Students contemplating postgraduate education, either in professional or in graduate school, are encouraged to participate in the departmental honors program, which provides special opportunities for individualized attention.

CU-Boulder's Department of Psychology and Neuroscience has been ranked by the National Academy of Sciences as one of the best in the country with respect to the quality of the faculty and their scholarly productivity. Moreover, the department offers undergraduates a wide range of opportunities for involvement in research.

Course codes for this program are PSYC and NRSC.

Religious Studies

The curriculum in religious studies includes the study of traditions such as Buddhism, Christianity, Confucianism, Daoism, Hinduism, Islam, Judaism, and Native American and other traditional religions. The program examines topics such as ritual studies, peace studies, dance, religion and literature, women and religion, and religion and psychology.

The undergraduate degree in religious studies emphasizes knowledge and awareness of:

- the academic study of religion and the related writing and critical skills directed toward one area of concentration (tradition, issue, or theme); and
- different theoretical and methodological approaches to the study of religion.

In addition, students with a degree in religious studies are expected to acquire the ability and skills to:

- identify textual, performative, and artifactual data relevant to the study of religion;
- draw connections between different historical and/or cultural contexts of religion; and
- communicate data analysis and interpretation competently in written form.

Course codes for this program are RLST and SNSK.

Sociology

The undergraduate degree in sociology emphasizes knowledge and awareness of:

- the basic data, concepts, theories, and modes of explanation appropriate to the understanding of human societies;
- the structure of modern American society, its social stratification, its ethnic, racial, religious, and gender differentiation, and its main social institutions—family, polity, economy, and religion;
- the basic social processes that maintain and alter social structure, especially the processes of integration, organization, and conflict; and
- the diversity of human societies, including the differences between major historical types such as foraging, agricultural, industrial, and post-industrial societies.

In addition, students completing the degree in sociology are expected to acquire the ability to:

- locate and consult works relevant to a sociological investigation and write a sociological paper that is coherent, cogent, and grammatically correct;
- understand the basic procedures of sociological research and analyze sociological data;
- understand and interpret the results of sociological research; and
- integrate and evaluate sociological writings.

Spanish and Portuguese

Although no major in Portuguese alone is offered, the department offers a combined Spanish and Portuguese Language and Culture degree option (see the Spanish Majors section below), as well as a Portuguese minor. Language courses at the elementary and intermediate levels are also available, as well as senior and graduate courses in Luso-Brazilian civilization and literature.

The department has identified the following as educational outcomes for the three tracks within the Spanish major.

The undergraduate degree in Spanish language and literature emphasizes knowledge and awareness of:

- the fundamental outlines of the history of Spanish literature or of Spanish American literature;
- the major creative writers in either Spanish or Spanish American literature;
- basic critical methodologies in the study of poetry, drama, narrative fiction, and nonfiction; and
- the social and historical contexts in which particular literary traditions developed.

In addition, students completing the degree in Spanish language and literature are expected to acquire the ability and skills to:

- read sophisticated Spanish texts at a level at which literary analysis can be performed;
- write and speak Spanish sufficiently to participate in critical discussions and write critical essays;
- analyze and interpret literary texts in terms of themes, characters, structure, style, and overall textual strategies;
- relate analysis and interpretations of different texts to one another; and
- communicate such interpretations competently in written form in Spanish.

The undergraduate degree in Spanish and Portuguese language and culture emphasizes knowledge and awareness of the same topics listed in the degree in Spanish Language and Literature, but specifies electives and related field courses, focusing on the Luso-Brazilian culture and adding knowledge of the Portuguese language.

The undergraduate degree in international Spanish for the professions emphasizes knowledge and awareness of:

- modern business practices as applied to the Spanish-speaking world;
- the theories of economics, business law, and international trade and finance;
- fundamental business Spanish terminology;
- the cultural environment in which business is conducted in the Spanish-speaking world;
- basic business according to the canons of this discipline; and
- international relationships.

In addition, students completing the degree in international Spanish for the professions are expected to acquire the ability and skills to:

- read and interpret in cultural and business-related terms sophisticated Spanish texts concerning business transactions;
- write and speak Spanish sufficiently to communicate effectively on business-related issues, be involved in critical discussions, and write critical essays on the subject;
- analyze a particular business problem to place it in a relevant context and formulate an appropriate response; and
- adequately translate business-related documents.

Course codes for this program are SPAN and PORT.

Speech, Language, and Hearing Sciences

The undergraduate program in speech, language, and hearing sciences (SLHS) introduces concepts basic to human communication, and provides opportunities for students to acquire an understanding of normal and disordered speech, language, and hearing processes. The curriculum for the undergraduate degree in SLHS has been designed to fulfill the prerequisite requirements for entrance into accredited graduate programs in speech-language pathology and audiology, but also provides a strong academic foundation for students with other professional goals.

The undergraduate degree in speech, language, and hearing sciences emphasizes knowledge and awareness of:

- the anatomy of the speech and hearing mechanisms, as well as the processes of speech production, transmission, and reception;
- the development of language;
- scientific methods used in investigating speech/language/learning and hearing processes;
- the etiologies, manifestations, and treatments of speech/language/learning and hearing disorders; and
- the role of the professional speech-language pathologist and audiologist, including the history and development of the profession, the scientific traditions of the discipline, and the ethical issues in providing service to individuals with communication disorders.

In addition, students completing the degree in speech, language, and hearing sciences are expected to acquire the ability and skills to:

- express themselves effectively both orally and in written scientific and clinical discipline-specific reports;
- critically evaluate literature in the discipline; and
- analyze the acoustic output of the speech production process auditorily and/or instrumentally.

Course code for this program is SLHS.

Theatre and Dance

The Department of Theatre and Dance offers undergraduate and graduate degrees in both theatre and dance. These programs combine traditional studies with practical training. Ambitious seasons of theatre productions and dance concerts feature student performers and student designers, directors, and choreographers. Guest artists of national and international fame often participate in curricular and extracurricular activities. Recent guests have included Chris Aiken and Angie Hauser, Art Bridgman/Myrna Packer, Rennie Harris, Heidi Henderson, Kathleen Hermesdorf, Deborah Jowitz, Darrell Jones, Susan Marshall & Co., Bebe Miller, David Dorfman, Joe Goode, Kevin Wynn, and Shelley Senter in dance; Ami Dayan, Terry Berliner, Lee Blessing, Jim Moody, Tim Miller, Holly Hughes, Jane Page, Joan Schirle, Karen Finley, and Mark Medoff in theatre.

Students interested in theatre and dance are urged to consult with an advisor in the appropriate field to obtain both advice and the most current information concerning program opportunities and expectations.

Course codes for this department are THTR and DNCE.

Theatre

The undergraduate degrees in theatre emphasize knowledge and awareness of:

- the major works of dramatic literature that are representative of the most important eras in the development of theatre and drama;
- the history of theatrical production—its styles, conventions, and socially related mores—from ancient civilizations to the present time;
- the various means through which a theatrical concept is realized; and
- the aesthetic and intellectual relationship between theatre in its various 21st century modes and contemporary society.

In addition, students completing a degree in theatre are expected to acquire the ability and skills to:

- analyze and interpret plays and performances with particular attention to acting and performance of literature, designing, directing, and/or playwriting and criticism;
- use, with safety and efficiency, the tools and equipment basic to theatre production technology;
- communicate to an audience through at least one of the components of theatrical art—acting, directing, designing, playwriting, or criticism; and
- function effectively as a collaborative member of a production team in the preparation of regularly scheduled public productions.

Dance

The University of Colorado Boulder has an exciting and diversified dance program which offers BA, BFA, and MFA degrees. We are a contemporary dance program—one that values and provides study in a range of styles that influence the multifaceted nature of concert dance today. Our training reflects the influences of both West African traditional dance and Western European (ballet) folk dance traditions. Our curriculum is designed to develop concrete skills in performance and choreography and to instill an appreciation of the role that dance plays in human culture around the world. The following areas of knowledge and experience are central to all undergraduate degrees in dance:

- physical investigation of a myriad of styles including: contemporary, hip-hop, ballet, jazz, African and fusion forms, to deepen the somatic awareness and technical refinement of today's contemporary dancer;
- experience with the process and underlying aesthetics of dance creation and composition;
- basic familiarity with cultural, sociological, and aesthetic issues important to the contemporary realities of the field of dance, including a working knowledge of major world dance styles, works of dance literature, and the history of dance;
- knowledge of the various means, such as stagecraft, costuming, makeup, and promotion, through which a public presentation of dance is realized;

study and practical experience with the act of teaching dance, including issues of creativity, style, and pedagogical appropriateness;

- basic knowledge of tactics for prevention of injury to the dancer's body, first aid and approaches to rehabilitation from injury, and of various somatic approaches to dance training; and
- experiential study of the relationship between dance and music, including concrete practice of skills in playing and hearing music.

In addition, students completing a degree in dance are expected to acquire the ability and skills to:

- actively participate in dance as an art form with particular attention to at least one of the following areas of dance: performance, choreography, dance production, scholarship, pedagogy, or criticism;
- understand and mobilize knowledge of appropriate use of the anatomy and physiology of the body in performance and teaching;
- communicate effectively to an audience through at least one of the components of dance—performance, choreography, teaching, or scholarship;
- function constructively as a member of a dance community in the preparation of regularly scheduled public productions; and
- connect and collaborate with communities outside the department through dance outreach.

BA and BFA students are expected to take at least one course each in contemporary, ballet, jazz, and African dance technique before the end of their sophomore year. Dance majors must earn a C- or better in all required courses. Students who have not placed in the major technique class (DNCE 2021, 3041, or 4061) by their second semester in dance program are strongly advised not to continue in the major program in dance. Placement into and successful completion of major technique is a prerequisite for enrollment in other required dance courses.

Western American Studies

The Center of the American West offers an undergraduate certificate program in Western American Studies for students who have an intellectual commitment to any of a broad range of issues and aspects of the American West, including history and literature, culture and society, and economic and environmental challenges facing western communities. Courses involve students in an exploration of the past, an appreciation for traditional and contemporary stories and art in the region, and an understanding of western landscapes, ecosystems, and the factors that affect them.

Course code for this program is CAMW.

Western Civilization Studies

The Center for Western Civilization (CWC) offers an undergraduate certificate program, Foundations of Western Civilization, for students interested in a rigorous grounding in Western culture. The certificate promotes critical reflection and academic research on the traditions and issues that characterize Western civilization through the study of Western culture, science, and government in their ancient, medieval, and modern forms. It helps students understand their role as citizens in a nation founded on the ancient ideals of consensual rule and republican government.

Course code for this program is CWCV.

Women and Gender Studies

The interdisciplinary women and gender studies undergraduate major and minor offer students a rigorous but flexible program of study that examines women, gender, and sexuality in relation to race, class, national identity, and ability. Students explore the ways that gender and sexuality work in diverse communities and in different cultural and historical contexts. Areas of inquiry include but are not limited to: gender/sex systems across cultures and historical periods; gender, sexuality, and culture; legal and public policy issues around gender and sexuality; women's participation in social and cultural production; transnational feminisms; feminist theory and its relation to different philosophical and epistemological traditions; sexual identity politics and histories; and queer theory. Drawing from approximately 50 courses, many cross-listed with other academic units, students fulfill the requirements of the major or minor and can design an emphasis relevant to their special interests by focusing on one of three cognate areas: gender/sexuality, race/ethnicity, or global/transnational. The program houses a reading library and organizes colloquia, workshops, and other cultural and educational events.

Students have gone on to careers in fields such as law, medicine, government, public health, public policy, social work, teaching, counseling, advocacy, media, public relations, education, politics, fundraising, small business development, librarianship, and arts administration.

The undergraduate degree and the minor in women and gender studies will provide students with an in-depth understanding of:

- the historical and cross-cultural variability of social norms of masculinity and femininity
- the ways in which gender/sex systems intersect with other axes of domination, such as class, race, ethnicity, ability, and national identity
- the centrality of gender and sexuality to politics, economics, social relations, and culture at the local, national, and international level
- the diversity of global feminism
- how gender roles and expectations play out in the global economy
- how power and privilege function at the intersection of gender, sexuality, race, class, ability, and national identity
- how women participate in, contribute to, and transform areas of social life including politics, economics, social relations, culture, and religion
- institutionalized discrimination and violence against women, girls, and LGBTQ individuals
- women's activism and resistance to oppression
- the varied research methods and theoretical perspectives used in women, gender, and sexuality studies, including the relationship between theory and practice
- the history of women, gender, and sexuality studies as an academic discipline and the main themes that have characterized its emergence

In addition, students with degrees in women and gender studies will be able to:

- communicate complex ideas related to women and gender studies to academic and general audiences
- employ creative problem solving techniques, especially with regard to research and analysis of the issues noted in the previous section
- organize and synthesize material in new ways, especially with regard to research and analysis of the issues noted in the previous section
- read, critically evaluate, and synthesize women and gender studies scholarship
- work collaboratively with colleagues and the general public, especially with regard to the issues noted in the previous section

Writing and Rhetoric, Program for

The Program for Writing and Rhetoric (PWR) is a free-standing unit in the College of Arts and Sciences responsible for campus-wide instruction in expository writing. The program coordinates and oversees all writing curricula and instruction intended to meet college and campus requirements, including efforts in specific disciplines and targeted campus programs.

The program is committed to training students to think critically about the texts they read and the writing they produce, and to enable them to shape and express ideas with clarity and grace in any context: academic, professional, or civic. Classes are generally conducted as intensive writing workshops, placing a premium on thoughtful, substantive revision.

The program offers both lower-division and upper-division courses, as well as some graduate seminars. Certain undergraduate courses fulfill the College of Arts and Sciences written communication requirement, and some also fulfill graduation requirements in other colleges. Students should check with their advisors to be sure that they are taking the right course to fulfill their requirement.

For information about specific classes and their instructors, students should visit www.colorado.edu/pwr.

Programs of Study

Business Administration

The Leeds School of Business holds accreditation by the Association to Advance Collegiate Schools of Business (AACSB-International). Leeds awards four types of degrees:

- bachelor of science (BS)
- master of science (MS)
- master of business administration (MBA)
- doctor of philosophy (PhD)

Knowledge and Abilities of Business Students

The following areas of knowledge are central to the undergraduate degree in business administration:

- knowledge of core business concepts that provides students with a comprehensive understanding of the basic functional areas of the discipline;
- knowledge in one or more of the four areas of emphasis, in which students are exposed to in-depth study that provides them with the tools necessary to solve complex business problems;
- awareness of the interrelations between academic theory and practice in order for students to be fully equipped to make effective decisions;
- strong verbal and written communication skills, proficiency in business computer applications, and knowledge of international business environments;
- knowledge of mathematics sufficient to facilitate the application of quantitative principles; and
- awareness of the importance of academic fields in the area of arts and sciences, with special emphasis placed on the study of economics, political science, and other related fields.

In addition, students completing a degree in business administration are expected to acquire:

- the ability to apply basic business principles to solve problems in new and recurring situations;
- the ability to conceptualize and analyze decision-making situations to facilitate solutions in an effective and timely manner; and
- the ability to effectively communicate the results of problem-solving situations, both verbally and in writing.

Having acquired these skills and knowledge, students are able to conceptualize and analyze the concept of business and problem solving as a system. They have the ability to present solutions to business problems in an understandable and useful form. Their education provides them with excellent working knowledge, not only in the field of business, but also in related academic disciplines.

Advising and Records

Undergraduate business students receive academic counseling from a staff of professional advisors in the Office of Undergraduate Student Services. During the semester, advisors are available Monday through Friday from 8:00 a.m. to 5:00 p.m., and by appointment.

Faculty advisors are available to discuss the various areas of emphasis as well as career opportunities. Faculty advising hours will vary each semester.

Students are expected to assume responsibility for planning their program in accordance with college rules and policies.

Students are encouraged to discuss the various emphases available as well as career opportunities with the faculty of the college.

Course codes for these programs are ACCT, BADM, BCOR, BPOL, BSLW, CESR, ESBM, FNCE, INBU, MGMT, MKTG, MBAC, MBAX, OPMG, ORMG, and REAL.

Teacher Licensure Program

On This Page:

- [Program Goals](#)
- [Arts and Sciences Core Requirements for Teacher Candidates](#)
- [Performance-Based Standards for Colorado Teachers](#)
- [Admission](#)
- [Advising](#)
- [Academic Majors](#)
- [Application Requirements](#)

The School of Education offers course work leading to initial Colorado licensure to undergraduate, postbaccalaureate, and master's degree students. Colorado requires public school teachers to be licensed by its state department of education. Students who successfully complete all School of Education requirements will be recommended for a Colorado provisional (initial) teaching license, the license issued to all new teachers in Colorado. Licensure requirements vary from state to state and from teaching area to area. Students who are interested in teaching in other states should familiarize themselves with the requirements of those states so they may plan an appropriate degree program.

Undergraduate and Postbaccalaureate (Nonmaster's Degree) Licensure Programs

- Elementary (grades K–6) education
- Secondary education (grades 7–12) fields:
 - English
 - World language (French, German, Japanese, Latin, Russian, or Spanish)
 - Mathematics
 - Science
 - Social studies
- Music (grades K–12)

Secondary Master's Degree Plus Licensure Program (see Graduate Study section for additional program information)

- Secondary education (grades 7–12) fields:
 - English
 - Mathematics
 - Science
 - Social studies

Program Goals

Teacher education programs focus on the preparation of novice teachers in three interdependent areas:

- knowledge of subject matter and pedagogy,
- education of students in a diverse society, and
- professional obligations and dispositions of teachers in a democracy.

To meet these goals teacher education students engage in a planned sequence of courses and accompanying field experiences in community and school sites.

Performance-Based Standards for Colorado Teachers

In addition to program goals, the teacher education programs address eight performance-based standards for Colorado teachers, as adopted by the Colorado Department of Education in January 2000.

1. **Knowledge of Literacy.** The teacher shall be knowledgeable about student literacy development in reading, writing, speaking, viewing, and listening.
2. **Knowledge of Mathematics.** The teacher shall be knowledgeable about mathematics and mathematics instruction.
3. **Knowledge of Standards and Assessment.** The teacher shall be knowledgeable about strategies, planning practices, assessment techniques, and appropriate accommodations to ensure student learning in a standards-based curriculum.
4. **Knowledge of Content.** The elementary teacher is knowledgeable, in addition to literacy and mathematics, in the following content areas: civics, economics, foreign language, geography, history, science, music, visual arts, and physical education. Middle school and secondary content teachers shall be knowledgeable in literacy and mathematics and expert in their content endorsement area(s).
5. **Knowledge of Classroom and Instruction Management.** The teacher is knowledgeable about classroom practice in order to successfully manage time, communications, and record keeping procedures that will support and enhance student learning.
6. **Knowledge of Individualization of Instruction.** The teacher is responsive to the needs and experiences children bring to the classroom, including those based on culture, community, ethnicity, economics, linguistics, and innate learning abilities. The teacher is knowledgeable about learning exceptionalities and conditions that affect the rate and extent of student learning, and is able to adapt instruction for all learners.
7. **Knowledge of Technology.** The teacher is skilled in technology and is knowledgeable about using technology to support instruction and enhance student learning.
8. **Democracy, Educational Governance, and Careers in Teaching.** The teacher recognizes the school's role in teaching and perpetuating our democratic system. The teacher knows the relationships among the various governmental entities that create laws, rules, regulations, and policies that determine educational practices.

The objectives of the university relative to teacher education are the following:

1. Provide programs of undergraduate and graduate studies designed to develop outstanding teachers, supervisors, college teachers, administrators, and researchers.
2. Conduct and direct educational research and to engage in writing and related creative endeavors.
3. Identify and attract future outstanding teachers into the teacher education program.
4. Cooperate with other state, regional, and federal agencies to improve educational programs.

Teacher education at the University of Colorado, while administered by the School of Education, is a university-wide function. Many academic departments provide course work that supports the teacher in training. Undergraduate students follow a prescribed set of arts and sciences core courses that meet state content preparation standards, complete a major, and satisfy professional education requirements concurrently. The program involves a combination of courses at the university and K–12 school placements.

Academic Majors

Undergraduate Students. Undergraduate students enrolled at the University of Colorado Boulder seeking both a bachelor's degree and teacher licensure must complete a major approved for prospective teachers by the Colorado Department of Higher Education. With careful planning beginning freshman year, these programs may be completed in four years. A list of these approved majors is available on the School of Education website, www.colorado.edu/education. No professional education course work taken before the implementation of the Colorado Model Content Standards and Performance-Based Standards for Colorado Teachers may count for teacher education requirements.

The major selected is determined by the student's interest in teaching a certain subject or instructional level. Before selecting a particular major, students may see the School of Education advisor.

Students interested in teaching at the secondary level should be aware that in many subject areas the teaching program requires additional courses or more hours than the academic major. Course requirements for all programs are explained in the program checklists available in Education 151.

Arts and Sciences Core Requirements for Teacher Candidates

Arts and sciences students must complete college core curriculum requirements (see College of Arts and Sciences Undergraduate Degree Requirements section). Teacher licensure students must take specified courses within some categories of this core curriculum.

The arts and sciences core is listed below; courses specified in each area for students seeking teaching licensure are in **bold italic** type.

Elementary Licensure

- Foreign Language: Third semester proficiency in a single modern or classical foreign language.
- Quantitative Reasoning and Mathematical Skills: 3–6 semester hours. **MATH 1110 and 1120 Spirit and Uses of Mathematics 1 and 2** or **MATH 1300 Calculus 1**
- Written Communication: 3 lower-division and 3 upper-division semester hours.
- Historical Context: 3 semester hours. Choose from: ARAB 3230, ASIA 1000, CLAS/HIST 1051, CLAS/HIST 1061, CLAS 1140, ECON 4514, HIST 1010, HIST 1020, HIST 1038, HIST 1108, HIST 1113, HIST 1123, HIST 1208, HIST 1308, HIST 1408, HIST 1608, HIST 1708, HIST 2220, HIST 2629, RUSS 2211, RUSS 2221, RUSS 2471, RUSS 3601, RUSS 4301, or SCAN 2202.
- Human Diversity: 3 semester hours. **EDUC 3013 School and Society**
- United States Context: 3 semester hours. Choose from: CAMW 2001, ECON 4524, ETHN 2004, ETHN 2013, ETHN 2014, ETHN 2432/HIST 2437, ETHN 2536, ETHN 3015, ETHN 3905/MMST 3900, HIST 1015, HIST 1025, HIST 2015, HIST 2126, HIST 2166, HIST 2316, HIST 2326, HIST 2516, or HIST 2636/MMST 2400.
- Literature and the Arts: 6 semester hours, 3 upper-division semester hours.
- Natural Science: 13 semester hours, including a 2-course sequence and a laboratory or field experience.
- Physical science required (ASTR, ATOC, CHEM, GEOG, GEOL, PHYS)
- Biological science required (EBIO, MCDB, or IPHY)
- Contemporary Societies: 3 semester hours. **PSCI 1101 American Political Systems**
- Ideals and Values: 3 semester hours.
- Additional liberal arts requirement: 3 semester hours. **Human/Cultural Geography**

Secondary Licensure

- Foreign Language: Third semester proficiency in a single modern or classical foreign language.
- Quantitative Reasoning and Mathematical Skills: 3–6 semester hours.
MATH 1410 Mathematics for Secondary Teachers or **MATH 1300 Calculus 1**
- Written Communication: 3 lower-division and 3 upper-division semester hours.
- Historical Context: 3 semester hours.
- Human Diversity: 3 semester hours.
Course from major or **EDUC 3013 School and Society**
- United States Context: 3 semester hours.
- Literature and the Arts: 6 semester hours, 3 upper-division semester hours.
- Natural Science: 13 semester hours, including a 2-course sequence and a laboratory or field experience.
- Contemporary Societies: 3 semester hours.
Course from major or **EDUC 3013 School and Society**
- Ideals and Values: 3 semester hours.

Postbaccalaureate Students. Postbaccalaureate students are not required to have a degree in one of the majors approved by the Colorado Department of Higher Education. *However, students who have graduated with a nonapproved major often must take additional arts and sciences and major course work to fulfill state teacher licensure requirements.*

Admission

Admission to all School of Education programs is selective. Satisfying minimal admission criteria does not guarantee admission.

Students Entering or Currently Enrolled at the University of Colorado

Undergraduate students seeking to complete the School of Education teacher education program must be enrolled in an approved degree program in one of the colleges or schools of the university. All undergraduates interested in teaching may seek teacher education advising at the time they enter the university. Freshman and sophomore students are encouraged to satisfy as

many of the arts and sciences core requirements, liberal arts requirements for the appropriate licensure program, and major field requirements as possible before applying for admission to the teacher education program. Some education courses may be taken prior to admission to the teacher education program. Students should pick up advising materials in Education 151 and attend all education information sessions, including freshman orientation.

Transfer Students

Undergraduate students who seek to transfer to the University of Colorado from another accredited institution must apply for admission through the Office of Admissions. They must enroll in a degree program in one of the undergraduate degree-granting colleges or schools of the university and also apply for admission to the teacher education program in the School of Education. At least 30 hours of course work for licensure must be taken while the student is officially enrolled as a student in the university. Credit in student teaching will not transfer to the University of Colorado Boulder. Please see Undergraduate Admission in the General Information section for specific requirements.

Former Students

Former students who have not completed an undergraduate degree may reenter the university according to general university policies; however, subsequent to that readmission, they must apply separately for entry into the teacher education program. Undergraduate students who anticipate that they will graduate prior to completing the teacher education program must see the School of Education advisor. All admitted students who remain continuously enrolled will be expected to complete the program in effect at the time of their admission to the program unless state accrediting changes dictate otherwise.

Postbaccalaureate and Master's Degree Students Seeking Teacher Training

Students who already hold a bachelor's degree and wish to pursue licensure should apply directly to the School of Education. Students desiring institutional recommendation for licensure must complete at least 30 semester hours of work at the University of Colorado and also must fulfill the same academic area requirements as undergraduate students. The actual number of required hours will depend on courses already completed.

Application Requirements

Students may apply to one of the teacher education programs if the following requirements have been fulfilled:

1. **GPA.** Elementary and secondary students must have and maintain a 2.75 (on a 4.00 scale) cumulative GPA, 2.75 at CU-Boulder, 2.75 in their subject area (secondary teacher fields), and 2.75 in education. Music students must have and maintain a 3.00 overall and in their subject area. Students applying to Master's Plus (MA+) programs must have and maintain a 3.00 cumulative GPA.
2. **Prior Degrees.** Students applying to Postbaccalaureate and Master's Plus (MA+) programs must have a bachelor's degree from an accredited institution.
3. **Youth Experience.** Students must provide written verification of 25 clock hours of satisfactory experiences with elementary, middle/junior high, or senior high school-aged youth (appropriate to the desired program) in the past five years. Forms for this purpose are available in the Office of Student Services, Education 151, or online at www.colorado.edu/education/prospective/teachereducation.html. Students in the CU Teach program meet this requirement through school experiences in Step 1 and 2 courses.
4. **Basic Skills.** All teacher education students must demonstrate basic skills competence in mathematics and literacy. This may be done through acceptable grades in appropriate college course work, or by acceptable standardized test scores. Contact the Office of Student Services in Education 151 for more information.
5. **Letters of Recommendation.**
6. **Personal Statement.**
7. **Fee.** The appropriate application fee should be submitted with application materials. Fees vary by program.
8. **Deadlines.** Deadlines for undergraduate and postbaccalaureate admission are February 1 for fall and September 15 for spring. The deadline for MA+ is January 1.

Application Materials

Individuals interested in completing the teacher education program at the University of Colorado Boulder should request application materials from the Office of Student Services, Education 151 or online at www.colorado.edu/education/prospective. Students currently enrolled in a degree program at Boulder will need to complete an application.

Individuals who have completed a baccalaureate degree at an accredited institution and are not currently enrolled at the university must complete a program application, a university application and submit official transcripts from all previous colleges directly to the Office of Admissions.

Advising

Students are responsible for obtaining a student handbook and program checklist in Education 151, available online at www.colorado.edu/education/students/teachereducation.html. These materials include specific information for all teaching fields and information on how to seek advising.

Off-campus students may obtain advising materials online at www.colorado.edu/education/students/teachereducation.html or by calling **303-492-6555**.

At CU-Boulder, degree requirements vary among the schools and colleges. Students seeking a degree at the University of Colorado should consult, as soon as possible, with an advisor in the college or school from which they expect to graduate and with the School of Education advisor.

Students are encouraged to become familiar with the teacher education requirements by comparing their own transcripts to the published advising materials. Students can then talk with an advisor before applying to the program or they may wait until after their applications are processed. Students seeking teacher training in French, German, Japanese, Latin, Russian, Spanish, or music should see the designated advisor for that teaching field in addition to the School of Education advisor.

Advising also may be obtained by e-mail through EdAdvise@colorado.edu. When requesting e-mail advising, students should make questions as specific as possible.

Graduate Degrees in Education

On This Page:

- [Graduate Study](#)
- [Teaching Endorsements at the Graduate Level](#)
- [Admission](#)
- [Advising](#)
- [General Information](#)

Graduate Study

Graduate study in education at the University of Colorado is administered through the Office of Student Services, School of Education, and all inquiries regarding programs should be directed to the following address: **Office of Student Services**, School of Education, University of Colorado Boulder, 249 UCB, Boulder, CO 80309-0249.

Detailed program materials and *The School of Education Graduate Student Handbook* are available on the School of Education Student Services website at www.colorado.edu/education/prospective/gradprograms.html. The degrees available in the various areas of graduate study are listed below:

1. Curriculum and Instruction (K–12 humanities education; K–12 mathematics and science education; K–12 literacy education; research on teaching and teacher education)

- Master of arts
- Doctor of philosophy
- Secondary Master's Plus (MA+) Licensure Programs

CU-Boulder offers special programs for prospective secondary teachers that combine a master of arts degree in curriculum and instruction in a content area and teacher licensure to qualified students already holding bachelor's degrees. Admission is highly competitive, and program completion requires a two-year commitment of course work and school placements. Students in the MA+ programs become eligible for a Colorado teaching license after three semesters; they complete remaining course work for the master's degree in the fourth semester. Applicants must meet all graduate requirements listed below and undergo an extensive screening process. This program admits students for fall semester only. Complete program information is available in the Office of Student Services, Education 151 or by calling **303-492-6555**.

2. Educational-Psychological Studies (educational psychology and learning sciences)

- Master of arts
- Doctor of philosophy

3. Research and Evaluation Methodology (methods of educational research and evaluation, including statistics, measurement, and qualitative methods)

- Doctor of philosophy

4. Multicultural, Social, and Bilingual Foundations (bilingual and multicultural education; bilingual/special education; education and cultural diversity; English as a second language; cultural, historical, social, and philosophical foundations; education policy)

- Master of arts
- Doctor of philosophy

CU-Boulder does not offer programs in early childhood education, physical education, art education, counseling, school administration, higher education, school psychology, or educational technology.

Teaching Endorsements at the Graduate Level

Through the School of Education (and in conjunction with other departments), the University of Colorado Boulder offers advanced course work leading to graduate level teaching and special services training in the following areas:

- Culturally and linguistically diverse education (grades K–12)
- Culturally and linguistically diverse education specialist: bilingual education (grades K–12)
- Reading teacher (grades K–12)
- Special education generalist (grades K–12)
- Special education specialist (grades K–12)
- Special services (offered through SLHS): Audiologist (ages 0–21); Speech/language pathologist (ages 0–21)

All of the above programs have degree, licensure, or experience requirements that must be fulfilled before admission. Please check with the department before applying.

Admission

Prospective students seeking admission to a graduate degree program should view electronic application materials at www.colorado.edu/education/prospective/gradprograms.html. Prospective graduate students should also read the Graduate School section for additional admission information. If test scores are required for admission to the desired program, applicants should request that the Educational Testing Service send their scores on the verbal reasoning, quantitative reasoning, and analytical writing sections of the Graduate Record Examination (GRE) to the Office of Student Services. A doctoral applicant who has not taken the GRE should arrange to do so.

Admission to all programs and degrees in the School of Education is selective. Meeting minimal admission requirements does not guarantee admission.

Application papers and all supporting documents, including GRE or Miller's Analogy Test (MAT) scores, if these scores are required for admission to the desired program, must be submitted electronically by the admission deadline. Master's deadlines are September 1 for spring semester and February 1 for summer session and fall semester. The PhD deadline is January 1. The PhD program only has one admission cycle each year. The international student deadline for PhD students is December 1. Students should visit the International Student Admission website for additional forms and information, www.colorado.edu/prospective/international. The Secondary Master's Plus (MA+) deadline is January 1.

Advising

Graduate students are assigned an individual faculty advisor after admission and are required to submit a formal plan of study, approved by their advisor, before the end of the first full year of study. Graduate students may obtain program information from the School of Education, Office of Student Services, Education 151, or from their faculty advisors.

General Information

Maximum Load and Part-Time Study

A maximum of 15 semester hours in any one semester may be applied toward degree requirements. During the summer, 9 semester hours is the maximum that will be counted toward education graduate degrees. Within this limit, students may take up to 6 semester hours in a five-week summer term, and/or 3 semester hours in a three-week term. During the academic year for financial aid purposes, students will be regarded as having a full load if they are registered for 5 or more semester hours in courses numbered 5000 or above, or are registered in a minimum of 5 dissertation or 1 MA thesis hour. At least four semesters of residence credit, two of which must be consecutive in one academic year, must be earned for work taken at CU-Boulder. See the Graduate School section for clarification.

Quality of Work

A grade average of *B* (3.00) or better is required for all work taken for any graduate degree. Transferred credits are not included when calculating grade averages.

A mark below *B-* will not be credited toward the PhD program; a mark below *C* is not acceptable for MA students. Any graduate course in which a mark of *D* or *F* is reported as failed and must be repeated and passed if it is required in a student's degree program. Students who do not maintain at least a *B* (3.00) average or better may be suspended by the dean of the Graduate School upon the recommendation of the associate dean of graduate studies in the School of Education. Students may also be suspended from the Graduate School for continued failure to maintain satisfactory progress toward the degree sought.

Opportunities for Assistantships

The School of Education has a limited number of assistantships administered by the dean on the recommendations of faculty and the associate dean for teacher education or associate dean for graduate studies. Some assistantships involve the supervision of student teachers; others involve helping professors in their teaching or research. Taxable stipends in amounts set by the university are paid for all assistantships. Appointments are usually made in terms of one-fourth time (10 hours a week) or one-half time (20 hours a week). Inquiries should be directed to the associate dean for graduate studies.

Aerospace Engineering Sciences

The mission of the Department of Aerospace Engineering Sciences is to provide quality education, including hands-on learning, and to conduct foremost research in aerospace engineering sciences. These goals are accomplished through fundamental and multidisciplinary research and by preparing aerospace engineering students to meet the needs of 21st-century society through the conception, design, and application of aerial and spacecraft systems.

The department is uniquely characterized by:

- blending aeronautics, astronautics, and science applications;
- providing an undergraduate experience characterized by rigorous preparation in mathematics and engineering sciences, a hands-on experiential approach to learning, and an extensive emphasis on design in a systems context;
- emphasizing in our graduate education and research programs forefront aerospace technology development and the integration of engineering and science activities to solve critical problems in the Earth and space sciences; and
- creating graduates who are broadly educated, interdisciplinary, agile, team-oriented engineers and scientists, with end-to-end mission and systems perspectives.

Educational Objectives

During their first three to five years after graduation, Aerospace Engineering Sciences graduates will have:

- established themselves in professional careers or received a graduate degree;
- demonstrated ethical leadership, project management, and/or innovation; and
- played significant roles in the research and development of engineering systems and products.

Desired Outcomes

Students completing the undergraduate degree in aerospace engineering will be knowledgeable in the following areas:

- the professional context of the practice of aerospace engineering and expectations of new graduates in aerospace engineering organizations, including an awareness of ethics issues, economics, and the business environment;
- the history of aerospace engineering, providing a perspective on current events;
- aerospace engineering as a highly multidisciplinary endeavor, requiring a systems perspective to integrate technologies and manage complexity; and
- major principles and scientific methods underlying the technologies comprising aerospace vehicles and systems.

Upon graduation, students will have developed the following general skills and abilities:

- strong written, oral, and graphical communication skills;
- an ability to quantitatively estimate, model, analyze, and compute;
- an ability to define and conduct experiments using modern laboratory instruments, and to interpret experimental results;
- an ability to seek out and gather information, enabling independent and lifelong learning;
- interpersonal and organizational skills that enable individuals to work effectively in teams and assume leadership positions;
- an ability to identify needs, requirements, and constraints, and to design appropriate reliable engineering solutions;
- an ability to formulate technical problems clearly, and to correctly apply appropriate methods and procedures for their solution;
- an ability to program computers, and skills in the use of modern engineering analysis, simulation software, and operating systems; and

an ability to understand societal needs, business issues, and the ethical concerns and responsibility of the industry.

Course code for this program is ASEN.

Applied Mathematics

The Department of Applied Mathematics in the College of Arts and Sciences offers a BS degree in applied mathematics through the College of Engineering and Applied Science. The BS degree is designed to prepare graduates for exciting and diverse professional careers, and for graduate study in a wide variety of disciplines. The department also offers a 5-year BS/MS, as well as an MS degree and a PhD degree through the Graduate School.

The objectives of the Department of Applied Mathematics at CU-Boulder are summarized below:

- provide undergraduate and graduate students with high-quality education and training in applied mathematics, and prepare them for careers in industry, laboratories, and the academic professions;
- offer and monitor degree programs leading to BS, MS, and PhD degrees in applied mathematics;
- nourish and maintain a professional environment in which excellence in teaching, learning, scholarship, and creativity are of central importance;
- assure teaching and research expertise in a number of key areas of applied mathematics including the methodology of applied mathematics, computational mathematics and algorithms, industrial applications, mathematical biology, applied probability, and statistics.

Courses at the undergraduate level provide training in a broad range of mathematical techniques and problem-solving strategies. These courses teach the concepts and methods central to applications of linear algebra, ordinary and partial differential equations, numerical analysis, probability and statistics, complex variables, and nonlinear dynamics. Since applied mathematicians often are involved in interdisciplinary work, the BS degree requires an in-depth knowledge of some area of science or engineering where mathematics is used. This knowledge prepares graduates to successfully communicate and cooperate with engineers and scientists. The BS degree also requires knowledge of a programming language and skill in using the computer.

Desired Outcomes

The undergraduate degree in applied mathematics emphasizes knowledge and awareness of:

- differential and integral calculus in one and several variables;
- vector spaces and matrix algebra;
- ordinary and partial differential equations;
- at least one programming language;
- at least one application software package in either mathematics or statistics;
- methods of complex variables as used in applications; and
- numerical solutions of linear and nonlinear problems.

In addition, students completing a degree in applied mathematics acquire:

- an in-depth knowledge of an area of application (an engineering discipline or a natural science field or one of the quantitative areas of business and economics);
- knowledge of problem-formulation, problem-solving, and modeling techniques and strategies central to applications; and
- the ability to communicate analytic arguments clearly and concisely in oral and written forms.

Course code for this program is APPM.

Minor Program

The department also offers a minor in applied mathematics that is available to all undergraduate students. A minor in applied mathematics indicates that a student has received in-depth training in

mathematical techniques and computational methods well beyond the training usually received by science and engineering majors.

Architectural Engineering

Architectural engineering has many elements in common with civil, mechanical, and electrical engineering, but is specifically directed toward the building industry. It focuses on building systems, which include design of systems such as heating, ventilating, and air conditioning (HVAC) systems; illumination and electrical systems; structural building systems; and construction methods applied to buildings. The program is administered by the Department of Civil, Environmental, and Architectural Engineering. Students also take courses in architectural history and architectural design from the College of Architecture and Planning.

Program Educational Objectives

The educational objective of the architectural engineering program is to develop graduates who acquire the broad knowledge and skills necessary to successfully begin and sustain a career, and to become leaders who advance the state-of-the art, in one of four core disciplines of the building industry:

- electrical and lighting systems
- heating, ventilating, and air conditioning (HVAC) systems
- structural systems
- construction engineering and management

Educational Outcomes

The outcomes that students are expected to have attained upon graduation with the bachelor of science degree in architectural engineering are:

- the ability to apply knowledge of mathematics, science, and engineering
- the ability to design and conduct experiments
- the ability to analyze and interpret data
- the ability to design a system or component to meet desired needs
- the ability to function on multidisciplinary teams
- the ability to identify, formulate, and solve engineering problems
- an understanding of professional and ethical responsibilities
- the ability to communicate effectively through writing and/or drawing
- the ability to communicate effectively through oral presentations
- an understanding of the impact of engineering on society
- an understanding of the necessity to engage in life-long learning
- a knowledge of contemporary issues in civil, environmental, and architectural engineering
- the ability to use modern engineering techniques, skills, and tools

Areas of Knowledge

The areas of knowledge that define these objectives include both technical and non-technical areas.

Technical areas are:

- **elementary**—the fundamentals for architectural engineering, including basic science and mathematics, building design and construction processes; overview of building systems; elementary principles and processes of architecture; and laboratory measurement and data analysis;
- **intermediate**—introduction to building systems and their components, with corresponding analysis of electrical, HVAC, and lighting systems as well as structural elements and

components;

- **proficiency**—design, integration, and advanced analysis of electrical, HVAC, lighting, and structural systems; as well as the codes and recommended practices that govern these building systems; and
- **specialization**—advanced design, coupled with industry experience via internships, for building lighting and electrical system design, building HVAC systems design, building structural system design, and construction engineering and management.

Non-technical areas include:

- professional life, including methods of time and resource management, and professional ethics;
- processes and requirements of written and oral communication; and
- broad areas in the humanities and social sciences, including architectural history and language.

Chemical and Biological Engineering

The Department of Chemical and Biological Engineering offers degrees at the bachelor's, master's, and doctoral levels. The department offers two distinct BS degree programs, one in **chemical engineering** and one in **chemical and biological engineering**. The Regents of the University of Colorado and the Colorado Commission on Higher Education approved the new BS program in the combined fields of chemical and biological engineering during the summer of 2006. The first graduates of the new program graduated in the spring of 2009 and the program is accredited by the Engineering Accreditation Commission of ABET (www.abet.org).

Other Opportunities in the Department of Chemical and Biological Engineering

At the BS, MS, and PhD levels, there are opportunities to specialize via electives, independent study, and research. The BS in chemical engineering also offers optional variations to the core curriculum that allow students to specialize in environmental, computer, microelectronic, and materials aspects of chemical engineering. If a student has an interest that is not included in the following information, special arrangements can usually be made.

Students may carry out part of their studies in another country (see the Office of International Education section), and are encouraged to consider this opportunity, given the international nature of most large chemical and engineering corporations and international cooperation in scientific and engineering research. Many faculty members have significant international experience.

Cooperative Education and Internships. The Department of Chemical and Biological Engineering offers a formal Co-Op Program, where students obtain a BS in chemical engineering or chemical and biological engineering and significant industrial experience in five years. A Biotechnology Internships program is also offered for summer internships with local companies.

Senior Thesis. The department offers this program for undergraduates with a strong interest in research. The student carries out a year-long project under the direction of a faculty member in lieu of taking CHEN 4130 Chemical Engineering Laboratory 2 (for ChE students) or CHEN 4810 Biological Engineering Lab (for ChBE students). Students must apply at the end of their junior year.

Research Facilities

Chemical and biological engineering research facilities are extensive and modern. Nearly all research equipment is interfaced to computers for automated data collection, monitoring, and control. A full description of chemical engineering research facilities can be found in the Graduate School section.

Course codes for this program are CHEM and CHEN.

+ Bachelor's Degree Program(s)

+ Graduate Degree Program(s)

Civil Engineering

The curricula in civil engineering within the Department of Civil, Environmental, and Architectural Engineering have been designed to qualify students for entry-level positions in professional practice in the areas of civil and environmental engineering. These broad area designations may be separated into the subdisciplines of:

- construction engineering and management;
- environmental engineering;
- geotechnical engineering and geomechanics;
- structural engineering and structural mechanics; and
- water resource engineering and management.

Through the regular curriculum, students will be ready to enter professional practice in the foregoing areas and be equipped to progress to higher levels in many directions. An Engineering Science track is also available for undergraduates who want additional preparation for graduate study and careers in research and development.

Program Educational Objectives

The overall objectives of the bachelor of science program in civil engineering are:

- Graduates will be successfully employed in engineering, science, or technology careers.
- Graduates will be assuming management or leadership roles.
- Graduates will engage in continual learning by pursuing advanced degrees or additional educational opportunities through course work, professional conferences and training, and/or participation in professional societies.
- Graduates will pursue professional registration or other appropriate certifications.
- Graduates will be active in civic engagement.

Educational Outcomes

The outcomes that students are expected to have attained upon graduation with a bachelor of science degree in civil engineering are:

- the ability to apply knowledge of mathematics, science, and engineering
- the ability to design and conduct experiments
- the ability to analyze and interpret data
- the ability to design a system or component to meet desired needs
- the ability to function on multidisciplinary teams
- the ability to identify, formulate, and solve engineering problems
- an understanding of professional and ethical responsibilities
- the ability to communicate effectively through writing and/or drawing
- the ability to communicate effectively through oral presentations
- an understanding of the impact of engineering on society
- an understanding of the necessity to engage in lifelong learning
- a knowledge of contemporary issues in civil, environmental, and architectural engineering
- the ability to use modern engineering techniques, skills, and tools

the ability to explain basic concepts in management, business, public policy, and leadership

Before their graduation, students in civil and environmental engineering will take a capstone design course in addition to training in structural and foundation design, civil engineering systems, construction, engineering geology, engineering materials, geotechnical engineering, soil mechanics, water quality, environmental engineering, fluid mechanics, computer-aided and manual engineering drawing, mechanics and dynamics, computer modeling, professional practice and ethics seminars, structural analysis and design, surveying, and transportation systems via required and elective courses.

Research Interests and Facilities

The department has a wide variety of research facilities, including a 15g-ton centrifuge for geotechnical and structural model studies and a large 440g-ton geotechnical centrifuge for use in model testing. Also available is an instructional computing facility, the Bechtel Laboratory, and the M.Y. Leung Computational Laboratory for Soils and Structures, both equipped with Windows and Linux high-performance workstations. In addition, extensive structural engineering, engineering mechanics, and geotechnical capabilities exist such as a one-million-pound universal testing machine and several cubical cells for multi-axial testing of materials. A 40 ft. by 80 ft. structural strong floor with associated equipment permits the testing of a wide variety of structural configurations under controlled, both static and dynamic loading. The hydraulics and water resources research laboratories include excellent facilities in water quality and environmental engineering. A unique workstation laboratory for advanced decision support systems is available. Programs in construction management and building energy are well supported. A state-of-the-art building mechanical and energy laboratory is capable of testing full-scale, commercial building systems and their controls using a one-of-a-kind data acquisition and experimental control system.

The Environmental Engineering program maintains approximately 10,000 sq. ft. of laboratories in the areas of process research, environmental microbiology, environmental chemistry, water quality, air quality, molecular biology, toxicology, and field ecology. The Environmental Sustainability cluster and the Center for Environmental Mass Spectrometry offer formal collaborations between the CU-Boulder Environmental Engineering Group, Mechanical Engineering air research group, the US Geological Survey, and industry partners, providing state-of-the-art facilities for research and teaching.

The Center for Advanced Decision Support for Water and Environmental Systems (CADSWES) is an interdisciplinary center of excellence, housed within the Department of Civil, Environmental, and Architectural Engineering. CADSWES focuses on applying advanced computing techniques to provide decision makers with decision support systems (DSSs) to help them more effectively manage water and environmental systems.

Current research covers such topics as water and wastewater treatment, surface and subsurface contaminant transport, decision support systems, hydraulic research, land treatment, rapid infiltration, and activated sludge processes. Cost prediction in construction, construction management, energy conservation in buildings, solar applications, and lighting systems are included. Advances in soil mechanics, rock mechanics, soil dynamics and geotechnical earthquake engineering, foundation engineering, computational geomechanics, centrifugal modeling, geosynthetics, and glacier flows have been produced. Research in structures includes stability, damage and fracture, material microstructures, durability, finite element modeling, reinforced concrete, earthquake responses, reinforced masonry structures, prestressed concrete, and dynamic control.

Computer Science

Computer science is an exciting and challenging field that has impact on many parts of our lives. Computer scientists craft the technologies that enable the digital devices we use every day. They develop the large-scale software that powers business and industry, and advance the computational techniques and write the software that supports scientists in their study of the world around us. Many new applications of computing technology remain to be discovered. Indeed, computing will be at the heart of future revolutions in business, science, and society. Students who study computer science now will be at the forefront of those important advances.

Computer science is concerned with how computers are constructed, how they store and process data, how they are used in problem-solving, and how the quality of those solutions is assessed. It is about the science of creating software for a variety of users. It is about understanding how that software interacts with the hardware on which it is run. Computer science goes well beyond the machine to the study of how people interact with the technologies around them. Applications of computer science reach far and wide.

Computer science graduates from the University of Colorado Boulder are engaged in a wide variety of jobs with many different companies in locations all over the world. They produce the software and systems that touch lives every day in fields ranging from communications to finance to publishing. They are, of course, software developers, but also have become teachers, writers, doctors, lawyers, scientists, military leaders, and entrepreneurs. They work at some of the largest, most influential companies in the world, at research institutions, non-profits, and at the smallest start-ups of every type imaginable. And many lead highly successful companies that they themselves have founded.

Program Objectives

Within three to five years after graduation, computer science graduates:

- are prepared to be valued individual contributors in a software-oriented organization, to be programmers and designers in an entrepreneurial pursuit, to lead small projects and generally begin preparation for a management career, or to succeed in rigorous postgraduate programs.
- are able to focus their careers on pure computer science technology or to bring computer science expertise to a companion discipline.
- are prepared, where appropriate, to specialize in a broad spectrum of computer science sub-disciplines, ranging across formal computer science (e.g., computational science, bioinformatics, and theory), cognitive science (e.g., human/machine learning, human-computer interaction, collaborative work, and human language technologies), and core computing (e.g., systems, networks and software engineering).

Program Outcomes

Students completing the undergraduate degree in computer science will possess:

- an ability to apply knowledge of computing and mathematics appropriate to the discipline.
- an ability to analyze a problem, and identify and define the computing requirements appropriate to its solution.
- an ability to design, implement, and evaluate a computer-based system, process, component, or program to meet desired needs.
- an ability to function effectively on teams to accomplish shared computing design, evaluation, or implementation goals.
- an understanding of professional, ethical, legal, security, and social issues and responsibilities for the computing profession.
- an ability to communicate effectively about computing topics with a range of audiences.
- an ability to analyze impacts of computing on individuals, organizations, and society.
- a recognition of the need for and ability to engage in continuing professional development.
- an ability to use current techniques, skills, and tools necessary for computing practice.
- an ability to apply mathematical foundations, algorithm principles, and computer science theory in the modeling and design of computer-based systems in a way that demonstrates comprehension of the tradeoffs involved in design choices.
- an ability to apply design and development principles in the construction of software systems of varying complexity.

Department Computing Facility

The Department of Computer Science supports its own domain, www.cs.colorado.edu, and a modern computing infrastructure that supports its research and educational missions. The department has a variety of computing facilities for use by faculty, staff, and students. These include general purpose computing labs provided by the university, additional instructional labs and administrative computing resources provided by the department, and specialized labs dedicated to the work of individual research groups. A wide variety of computing resources are available so that students have the opportunity to learn about and use cutting-edge equipment and software.

Course code for this program is CSCI.

Minor Program

The department offers a minor in computer science that is available to undergraduates on the Boulder campus. The minor offers a basic introduction to the field of computer science; requirements may be found at www.colorado.edu/cs/bsms-degree/minor.

Electrical, Computing, and Energy Engineering

Electrical, computer, and energy engineering is about the science and technology of information and energy. Two undergraduate curricula lead to bachelor's degrees: one in electrical engineering, and another in electrical and computer engineering. These curricula are revised frequently to keep pace with changes in this dynamic field.

Up-to-date curricula and policies are contained in the department's *HELP! Guide*, available through the department and on the Web at ecee.colorado.edu.

Career Opportunities

A degree in electrical engineering or electrical and computer engineering provides graduates the opportunity to enter the profession of engineering and to engage in work as a design, production, testing, consulting, research, teaching, or management professional in a wide variety of careers in the computer industry, telecommunications, instruments, the power and renewable energy industry, the biomedical industry, aerospace, and academia. Some graduates also go on to develop careers in other professions like law and medicine.

Examples of career opportunities include development of new electrical or electronic devices, instruments, or products; design of equipment or systems; production and quality control of electrical products for private industry or government; sales or management for a private firm or government; and teaching and research in a university.

Research Centers

Colorado Power Electronics Center (CoPEC). Since it was founded in 1983, the power electronics group at the University of Colorado has maintained a tradition of innovative design-oriented and application-driven research. Colorado Power Electronics Center (CoPEC) activities now span the range of applications from high-efficiency milliwatt converters for portable battery-operated systems, to hundreds or thousands of watts for computer, aerospace, telecommunications, medical, and automotive power conversion, to hundreds of kilowatts for wind generation systems.

Our current research activities include projects in high-efficiency, high-power converter technology, power electronics for portable, battery-operated systems, converter modeling and computer-aided analysis, low harmonic rectifier technology for single-phase and three-phase applications, and advanced control techniques and their mixed-signal ASIC implementation. We collaborate with other research groups at the University of Colorado, including those in machines and power systems, microelectronics packaging, EMI, control, and semiconductor devices. For more information call **303-492-7327** or visit ecee.colorado.edu/~pwrelect.

The University of Colorado Center for Environmental Technology (CET). Understanding and managing the environment—whether for agriculture, health, water resources, disaster mitigation, energy generation, transportation, weather forecasting, climate modeling, or biodiversity—requires accurate knowledge of many variables on a wide range of time and space scales. Measurements for environmental purposes are made either using in situ or remote sensors, and rely upon a variety of different means, including acoustic and electromagnetic waves, point measurements and wide-area imaging, and active and passive systems. A variety of different types of platforms can be used for environmental observation, including ships and submersibles, aircraft (both manned and unmanned), spacecraft, and stationary sites.

Research and educational activities at the CU Center for Environmental Technology are focused on developing sensors, systems of sensors, and associated hardware and algorithms for environmental observation with a focus on new remote and in situ techniques to meet contemporary scientific and applications goals. This is accomplished by direct involvement of CU faculty, CET engineering staff, and undergraduate and graduate students on the development of sensing systems to meet the observational needs of a number of government and industry sponsors. CET training involves close interaction between students and experienced professional engineers, practicing scientists, and CU faculty.

The CET was established in 2006 with a major donation of equipment from the NOAA Earth System Research Laboratory, and has members, associates, and students from within the broad earth science and engineering communities of Colorado. For further information contact the CET director at **303-492-9688** or visit cet.colorado.edu.

Center for Research and Education in Wind (CREW). Launched in 2009, CREW is a consortium of over 70 wind energy researchers and educators from four institutions—the University of Colorado Boulder (lead institution), the National Renewable Energy Laboratory, the Colorado School of Mines, and Colorado State University. In CREW, faculty and researchers from the four institutions have come together to work to address the research and operational issues of wind energy in a coordinated manner as well as train a new generation of scientists, engineers, and managers. The center has also formed partnerships with the National Center for Atmospheric Research and the National Oceanic and Atmospheric Administration. Its research thrusts include atmosphere sciences, wind turbine and wind farm model development and validation, control of wind energy systems, electrical systems, and turbine testing, and a center-wide thrust on

education and outreach. For more information visit www.coloradocollaboratory.org/crew.html.

Research and Instructional Equipment

The department's special equipment and facilities include a class 1000 clean room facility for epitaxial growth and fabrication of microwave and optical devices; high-vacuum and vacuum deposition equipment for thin-films research; an integrated circuits laboratory; ion implantation equipment; crystal growing facilities; a modern systems laboratory; a laboratory for data storage research; a digital system design laboratory; a power electronics research laboratory; undergraduate laboratories in circuits, electronics; power electronics; digital signal processing and communications; embedded systems; microwaves; a holography and optics laboratory; an advanced optical metrology lab; numerous special purpose computers; micro-computer system development laboratory; a roof-mounted antenna range; a special microscope for laser manipulation of microorganisms in vivo; a bio-microwave laboratory; and a solar power lab.

The Department of Electrical, Computer, and Energy Engineering has a large variety of computing equipment to support its research and instructional activities. In addition to specialized computing equipment, this includes several hundred PC, Macintosh, a department server, and a student server. These machines are connected to the campuswide ethernet network.

Course code for this program is ECEN.

Minors

The following minors provide training in electrical, computer, or energy engineering beyond the training usually received by science, mathematics, and applied mathematics majors. These minors also can broaden the training of students majoring in other engineering and applied science fields. For more information, contact the department's office or visit www.colorado.edu/engineering/academics/degrees-minors-certificates/minors.

Engineering Physics

The engineering physics program focuses on the foundations of modern technology. The program prepares students for research, development, and entrepreneurial careers in many frontier areas of engineering, including quantum devices, ultra fast lasers, adaptive optics, cryogenic electronics, computer simulation of physical systems, solar cells, magnetic storage technology, micro-mechanical systems, and molecular electronics. All students study the core theoretical subjects of mechanics, electricity and magnetism, thermal physics, and quantum mechanics, supplemented by courses in mathematics, computation, and laboratory technique. The program can be tailored to a student's interests through electives in engineering, physics, or other sciences.

Environmental Engineering

Environmental engineers play a vital role in maintaining the quality of both human environmental systems and the natural environment. Environmental engineering encompasses the scientific assessment and development of engineering solutions to environmental problems impacting the biosphere, land, water, and air quality. Environmental issues affect almost all commercial and industrial sectors, and are a central concern for the public, for all levels of government, and in international relations. These issues include safe drinking water, wastewater processing, solid and hazardous waste disposal, outdoor air pollution, indoor air pollution and transfer of infectious diseases, human health and ecological risk management, prevention of pollution through product or process design, and renewable and sustainable energy sources.

To address these challenges, environmental engineers often encounter challenging problems that must be solved in data-poor situations as members of multidisciplinary teams. Environmental problems require creative solutions blended with contributions from scientists, lawyers, business people, and the public. Good communication skills, as well as technical proficiency, are essential for success in this arena. In addition, technology designed to address environmental problems is marketed globally, opening up increasing opportunities for international work in the environmental engineering field.

The faculty of the Environmental Engineering Program (EVEN) is drawn from the Departments of Civil, Environmental, and Architectural Engineering; Mechanical Engineering; Chemical and Biological Engineering; and Aerospace Engineering. The EVEN faculty, its Professional Advisory Board (representing prospective employers of its graduates), and EVEN alumni and current students have contributed to the creation of the program's mission and the educational objectives of the EVEN BS degree.

Mission

The mission of the EVEN Program is to provide a multidisciplinary undergraduate environmental engineering education that emphasizes mastery of principles and practices, inspires service for the global public good, endows a desire for lifelong learning, and prepares students for broad and dynamic career paths in environmental engineering.

Educational Objective

The educational objective of the environmental engineering bachelor of science degree is to produce graduates who reach the following achievements three to five years after graduation:

- become established in professional careers and/or earn advanced degrees;
- apply multidisciplinary approaches to manage the unique challenges and balance the competing social, political, economic, and technical goals of environmental problems and solutions; and
- serve the needs of our society and protect the future of our planet in an ethical manner.

Program Outcomes

The Environmental Engineering Program demonstrates that its graduates:

- have sufficient knowledge of engineering, mathematics, and science fundamentals to succeed in environmental engineering practice or advanced degrees;
- have sufficient knowledge of advanced environmental engineering applications and complementary natural sciences to succeed in environmental engineering practice or advanced degrees;
- have sufficient knowledge of engineering approaches to problem solving (hypothesis, design, testing; team work) to succeed in environmental engineering practice or advanced degrees;
- have sufficient knowledge of basic engineering skills and tools (computer, laboratory, and field) to succeed in environmental engineering practice or advanced degrees;
- have adequate writing and oral presentation skills to succeed in environmental engineering practice or advanced degrees;
- have adequate understanding of the social, economic, political, and ethical context of environmental problems and solutions;
- have adequate opportunity to include service at the local, state, national, or global levels as an important part of their environmental engineering education; and
- recognize the importance of life-long learning by seeking advanced degrees and pursuing continuing education.

Mechanical Engineering

The educational objective of the undergraduate program in mechanical engineering is to prepare graduates so that, within three years of graduation, they will have successfully established themselves in professional careers and/or obtained a graduate degree, and they will have begun to generate new knowledge or exercise leadership in their positions to the benefit of society.

Each graduate of the mechanical engineering program is expected to:

- apply knowledge of mathematics, science, and engineering;
- identify, formulate, and solve engineering problems;
- use computers to solve engineering problems;
- use modern instrumentation;
- design and conduct experiments, including the use of probability and statistics;
- analyze and interpret data;
- design systems, components, or processes to meet desired needs;
- understand the processes used to manufacture products;
- understand contemporary issues in mechanical engineering;
- make effective oral presentations;
- write effectively;
- function effectively on multi-disciplinary teams;
- understand professional and ethical responsibility;
- understand the impact of engineering in a global and societal context; and
- engage in lifelong learning.

Course code for this program is MCEN.

THE PROGRAM IN ENVIRONMENTAL DESIGN at the University of Colorado Boulder prepares students for graduate study and careers in **architecture, landscape architecture, urban design, and urban and regional planning**. With a diverse faculty committed to excellence in teaching, research, scholarship, and creative and professional work, the program provides students with a varied range of learning opportunities.

These courses of study prepare students for careers in some of the most exciting professions that shape the designed and built environment. In addition to the program's core design sequence, students will take a wide range of technology and theory courses. Many of these courses can be eligible for advanced standing in highly rated graduate programs throughout the country.

Programs of Study

Graduate Degrees

The Graduate School of the University of Colorado Boulder offers instruction leading to the following advanced degrees:

- Master of Arts (MA)
- Master of Business Administration (MBA) (through Leeds School of Business)
- Master of Engineering (ME)
- Master of Fine Arts (MFA)
- Master of Music (MMus)
- Master of Music Education (MMusEd)
- Master of Science (MS)
- Doctor of Audiology (AuD)
- Doctor of Musical Arts (DMusA)
- Doctor of Philosophy (PhD)

Graduate Teacher Program

The [Graduate Teacher Program](#) provides for all graduate students with professional development opportunities, career consulting, videotape consultation, and teacher training.

Inquiries regarding admission to graduate programs should be addressed to the graduate department in which the applicant wishes to study (see the [University of Colorado Boulder Directory](#) for campus addresses or see www.colorado.edu).

Interdisciplinary and Certificate Programs

A wide variety of graduate [interdisciplinary and certificate programs](#) is offered at CU-Boulder.

Concurrent Bachelor's/Master's Degree Programs

Concurrent BS/MS and BA/MA degree programs are offered in several departments at CU-Boulder. These programs allow a student to receive both a bachelor's and master's degree in five years of study without compromising the academic integrity of either degree.

Currently approved concurrent degree programs in the **College of Arts and Sciences** are offered in:

- art and art history
- Chinese/Asian languages and civilizations
- classics
- ecology and evolutionary biology
- engineering physics/physics
- film studies/art history
- French
- German studies
- integrative physiology
- Japanese/Asian languages and civilizations
- linguistics
- mathematics
- mathematics/applied mathematics
- physics
- psychology (cognitive)
- religious studies

Currently approved concurrent degree programs in the **Leeds School of Business** are offered in:

- accounting
- finance/accounting
- information mangemant/telecommunications
- systems/accounting

Currently approved concurrent degree programs in the **College of Engineering and Applied Science** are offered in:

- aerospace engineering

- applied mathematics
- architectural engineering
- chemical engineering
- chemical and biological engineering
- civil engineering
- computer science
- electrical and computer engineering
- electrical engineering
- environmental engineering
- mechanical engineering
- telecommunications/information management

These concurrent degree programs are open only to highly qualified CU-Boulder undergraduates. Students are formally admitted at the end of their sophomore year or the beginning of their junior year. They are admitted through the admission procedure of their department and do not go through the normal process of admission to Graduate School. When students have completed the program requirements, they receive both a bachelor's and a master's degree simultaneously. Students wishing to continue studying toward a doctorate must formally apply for admission to the Graduate School.

Students interested in a concurrent bachelor's/master's program should inquire in the department.

Dual Degree Programs

In an environment where there is a rapidly increasing desire for interdisciplinary and professional skills, receiving two master's degrees in complementary fields can be a real asset. Contact the individual departments for details.

Combinations with MBA

- anthropology/MBA
- computer science/MBA
- environmental studies/MBA
- German studies/MBA
- telecommunications/MBA
- theatre/MBA

Combination within the Graduate School

- applied math/MCD Biology
- audiology/speech, language, and hearing sciences (both through the Department of SLHS)
- engineering management/telecommunications
- music (two areas)
- religious studies/Asian languages/history (any two)

Combination with Law

- environmental studies/law
- business/law
- juris doctor/bachelor of laws with the University of Alberta faculty of law, Canada
- medicine/law
- public administration/law

telecommunications/law

- urban and regional planning/law

Programs of Study

The Journalism and Mass Communication Program (JMC) enrolls 750 students in **five sequences**. Students begin with a broad education in the liberal arts through the College of Arts and Sciences core requirements and finish with a robust additional field of study and superior professional preparation and media studies instruction. The field of study will be a concentration in content area outside of JMC such as political science, philosophy, history, economics, and so forth. It will consist of a minimum of 30-36 semester hours, depending on the field selected. Students should start their additional field of study during their freshman year.

In addition to the required courses, JMC offers all students a wide range of classes in many aspects of media practice including photojournalism, electronic and digital journalism, advertising creative development, consumer behavior, publication design, magazine article writing, public relations principles and projects, and communication law.

Media criticism and analysis are also broadly represented in the curriculum through courses such as media institutions and economics, media ethics, mass communication history, media culture and globalization, and special-topics offerings.

Students who intend to apply to JMC complete their freshman year of undergraduate work (a minimum of 30 semester hours) typically in JMC as prejournalism and mass communication majors.

Upon completion of their studies, students receive a bachelor of science degree in journalism from one of five sequences:

- Advertising
- Broadcast News
- Broadcast Production
- Media Studies
- News-Editorial

and an emphasis in an additional field of study.

Continuing Education

On This Page:

- [Boulder Evening Credit Program](#)
- [Individualized Instruction](#)
- [CU Complete](#)
- [Outreach: Reaching Off Campus and into Communities](#)
- [Independent Learning Program](#)
- [Center for Advanced Engineering and Technology Education \(CAETE\)](#)
- [Science Discovery](#)
- [Summer Session and Maymester at CU-Boulder](#)
- [Applied Music Program](#)
- [ACCESS and High School Concurrent Programs](#)
- [Extraordinary Program](#)
- [International English Center](#)

The mission of the Division of Continuing Education is to provide quality, innovative, lifelong learning opportunities to a diverse student population by extending the educational resources of the University of Colorado Boulder. A variety of credit courses, noncredit programs, certificate programs, and seminars is offered through Continuing Education, which also administers CU-Boulder's Summer Session. Only university-approved faculty teach in Continuing Education programs.

The office is located at 1505 University Avenue in Boulder, **303-492-5148** (or **1-800-331-2801**). The fax number is **303-492-5335**, and the website is conted.colorado.edu.

Boulder Evening Credit Program

Offered in conjunction with CU-Boulder's academic departments, the Boulder Evening Program provides credit courses in the evening on the Boulder campus. These affordable, smaller-sized classes are provided through various departments including anthropology, communication, economics, English, film studies, art and art history, geography, mathematics, philosophy, psychology, sociology, Spanish, theatre, and more.

Independent Learning Program

The Independent Learning Program offers online courses representing and approved by more than 20 departments on campus. Term-based courses follow a traditional semester schedule and allow for rich interaction with the instructor and other classmates. Self-paced courses offer students the flexibility of progressing through the course at their own pace, and to finish in less than a full semester or take up to six months.

Applied Music Program

The Applied Music Program offers students the opportunity to earn CU credit for beginning or continuing music lessons on guitar, piano, voice, organ, winds, brass, drums, percussion, or strings. Instruction is available in individual or group sessions depending on instrument.

Individualized Instruction

Individualized Instruction provides an opportunity for students to receive credit for university courses by meeting with faculty members outside the regular classroom setting. This option may be used when the student cannot reasonably be expected to enroll in the main campus course.

Center for Advanced Engineering and Technology Education (CAETE)

CAETE, a partnership between the College of Engineering and Applied Science and the Division of Continuing Education, serves as the distance learning and professional studies arm of the

college. CAETE provides graduate engineering and technical education and professional development for practicing engineers and managers of technology. Course sequences may lead to a master's degree in aerospace engineering, computer science, electrical and computer engineering, engineering management, or telecommunications. Elective courses are also offered in civil/environmental and mechanical engineering. Graduate certificates and short courses are available in some fields. CAETE also provides ongoing access to over 100 pre-recorded courses via its virtual library. These courses are available for academic course work, rental, or purchase by companies for in-house training.

ACCESS and High School Concurrent Programs

In conjunction with CU-Boulder academic departments, ACCESS (Available Credit Courses for Eligible Special Students) enables nondegree students to enroll in Boulder main campus undergraduate and graduate credit courses after most degree-seeking students have registered. Colorado high school juniors and seniors interested in the challenge of university course work may enroll in ACCESS as part of the High School Concurrent Program. In addition to earning college credit, students may also earn credit toward high school graduation requirements.

Extraordinary Program

Through Continuing Education, academic departments can offer special courses that target audiences both on and off campus and provide academic credit for those offerings. Once a course proposal is submitted, Continuing Education coordinates the approval process and provides administrative support to the course initiator. Programs initiated from outside the university community may be considered for approval as well as noncredit and certificate programs.

CU Complete

The goal of CU Complete is to assist former students in the completion of degrees they began at CU in the past. Advisors work with each student individually and offer a degree analysis, recommendations, resources, and assistance in completing remaining requirements.

Science Discovery

Science Discovery is a hands-on science, mathematics, and technology outreach program that serves over 1,500 teachers and 25,000 K–12 students each year. Its mission is to stimulate scientific interest, understanding, and literacy through the use of university resources and academic expertise. Core programs include over 500 annual classroom presentations throughout Colorado; approximately 200 summer and after-school classes for ages 4–14; a series of statewide professional development workshops for teachers; and various outdoor environmental education classes.

International English Center

The International English Center (IEC) offers language learning, cultural adjustment, and academic preparation programs for international students planning to matriculate at universities and for members of the campus and local community with limited English proficiency. The IEC also contracts with corporate groups to provide language training and professional development courses.

Outreach: Reaching Off Campus and into Communities

Extending educational opportunities to the citizens of Colorado is a vital part of the university as well as the mission of the Division of Continuing Education. CU-Boulder faculty and students provide a wide variety of outreach programs to communities across Colorado. These programs extend the scholarship of the faculty and the educational resources of the university and serve various educational, social, economic, and cultural needs. The division annually supports these efforts by designating funds for the CU-Boulder Outreach Committee along with contributions from the offices of the chancellor and the provost. The committee awards funding to faculty projects designed specifically for external audiences that highlight faculty research, creative work, and teaching. Projects feature an extensive range of disciplines, including everything from history, dance, and musical arts to physics, math, and engineering.

Summer Session and Maymester at CU-Boulder

Summer Session offers over 500 campus courses and enrolls about 8,000 students in a relaxed, comfortable learning environment. Online and on-campus courses are available to students who wish to enhance or accelerate their academic progress. Courses are also open to students visiting from other colleges, teachers, high school students, or others interested in pursuing their professional development or enrichment.

Maymester is a special three-week Summer Session term immediately following the end of spring semester. It provides intense, accelerated courses for those who need academic credits in an abbreviated time period.

Leadership, Certificate in the Study and Practice of

The certificate program in leadership development seeks to expand a students' capacity to be effective in leadership roles and opportunities during their time at CU and in their future professions. The program enhances a student's self-awareness, systemic thinking, creativity, and problem-solving skills. This development unfolds over a student's undergraduate career and is maximized by a variety of courses and experiences that challenge, support, and provide students with increased understanding of what they are learning and how it fits into the larger world. The Certificate in the Study and Practice of Leadership integrates the variety of experiences into a context that is likely to be useful when undertaking new leadership roles and responsibilities. Faculty and staff skilled at weaving those experiences and courses in connected and meaningful ways facilitate this developmental process.

A leadership certificate can enhance the undergraduate experience and better prepare students both as citizens and leaders in whatever profession they might seek to enter. The program recognizes the need for individuals to take leadership roles in all professions and sectors of society. It is the belief of the program that leadership can be learned in formal classes, community-based leadership opportunities, mentoring and internship settings, as well as through a range of collaborative leadership activities.

For more information about the Certificate in the Study and Practice of Leadership, see leadershipRAP.colorado.edu/certificate-study-and-practice-leadership.

Program Requirements

This certificate program has an 18-credit-hour requirement comprised of lower- and upper-division courses. Undergraduate students working toward this certificate are usually affiliated with one of the following academic programs:

- Leadership Residential Academic Program
- Presidents Leadership Class (PLC)
- INVST Community Studies (INVST)
- ROTC programs

Each of these programs has defined particular academic courses within their programs to be certificate requirements. Students may also apply elective courses from other disciplines on campus toward the total credits required for the certificate. Students in the leadership programs at PLC, INVST, and the Leadership RAP are required to do an internship that is overseen by one of the program directors. Students in all four programs participate in either a 4-credit-hour capstone course during their senior year or a capstone project mentored by their academic program director. To qualify for the certificate, students must maintain a 3.00 GPA in the required course work.

Leadership Residential Academic Program

For certificate requirements, see [The Leadership RAP Program](#).

Presidents Leadership Class

PLC certificate requirements are listed under the [Presidents Leadership Class](#).

INVST Community Studies

- Selection criteria govern admissions.
- Four required theory courses plus community based service-learning experiences (18–24 credits).
- Minimum of 15 hours of upper-division courses.
- INVS 4932 Senior Capstone Course and/or Project.
- Minimum total credit hours: 18 with a 3.00 GPA

Reserve Officer Training Corps Programs

- Admission to CU-Boulder and ROTC required. (Some courses are open to all CU-Boulder students.)
- Required summer field training program(s).
- 4–8 required courses in ROTC (12–22 hours).
- Minimum of 15 hours of upper-division courses.
- Additional courses from Recommended Leadership Courses to complete the 18-hour requirement.
- Senior Capstone Course and/or Project (4 hours).
- Minimum total credit hours: 18 with a 3.00 GPA.

The Capstone Course and Project

The capstone project is designed to synthesize the leadership work students have completed during their undergraduate studies. Together with the program's faculty, students design a format that demonstrates their cumulative learning and development and reflects their leadership abilities. Like oral examinations at the graduate level, these projects are an opportunity for students to present a body of work that demonstrates what they have learned as they address some of the critical questions associated with leadership development and their role as a leader in the 21st century.

In the capstone course, Critical Issues in Leadership, LDSP 4010 or PRLC 4010, students explore leadership issues across disciplines. Leadership education is multi-disciplinary and students need to know how to assess research and writing from different perspectives. Students read, discuss, and write critical evaluations of contemporary leadership theory from ethical, military, community building, and business perspectives.

Internships

Internships are an agreed-upon experience in a work setting that is driven by intentional learning goals and accompanied by sustained reflection. The internship provides students with an opportunity to apply the skills and knowledge gained through their leadership studies. During the semester students use the concepts and theories learned in the classroom to analyze and understand the host organization. In addition, students are asked to reflect on the complexities of leadership and the personal challenges that they face in practicing and refining their own leadership skills.

University of Colorado Boulder

Leadership Residential Academic Program

The Leadership Residential Academic Program (RAP) in Kittredge Central houses two academic programs for students with an interest in leadership studies: the **Ethnic Living and Learning Community Leadership Studies Program (ELLC)** and the **Chancellor's Leadership Studies Program (CLSP)**.

Admission and Enrollment. Students select one of the leadership programs in the Leadership RAP during the housing application process prior to beginning their freshman year. When students choose their residence hall they are given the option to enroll in one of these programs. Most participants reside at Kittredge Central. More information about these programs can be found at LeadershipRAP.colorado.edu.

The Ethnic Living and Learning Community Leadership Studies Program

The Ethnic Living and Learning Community Leadership Studies Program (ELLC) offers students a multicultural living and learning experience and the opportunity to study leadership from a multicultural and global perspective. Students are required to take a 3-credit-hour leadership course and the ELLC Practicum each semester of their freshman year. In these courses, students explore their roles and responsibilities in society including the moral and ethical dimensions of leadership. Students also learn about contemporary issues related to leadership and take part in activities that develop teamwork, ethical decision making, and problem solving. Credits earned from these courses may be applied toward graduation as well as a Certificate in the Study and Practice of Leadership.

ELLC Curriculum and Semester Credit Hours

- LDSP 1000 The Foundations of 21st Century Leadership (fall)—3
- LDSP 2400 Understanding Privilege and Oppression in Contemporary Society (spring)—3
- LDSP 2910 Field Practicum (1 credit each semester of freshman year)—1
- LDSP 3100 Multicultural Leadership: Theories, Principles and Practices—3
- LDSP 4010 Critical Issues in Leadership—4

Fees and Scholarship Opportunities

There is a \$850 program participation fee. Some scholarships to cover the fee are available for students with financial need. A LEAD Alliance scholarship of \$1,500 per year is also available to qualifying ELLC students.

The Chancellor's Leadership Studies Program

The Chancellor's Leadership Studies Program (CLSP) examines the academic foundations of leadership and engages students in practical applications of leadership through simulations and class projects. Utilizing an experiential learning model, students learn the basics of decision making, problem solving, dialogue skills, ethical reflection, and an understanding of how institutions and communities solve problems. Students take a required 3-credit-hour leadership course fall semester and must take at least one CLSP course in the spring. Credits earned from these courses may be applied toward graduation as well as a Certificate in the Study and Practice of Leadership.

CLSP Curriculum Semester Credit Hours

- LDSP 1000 The Foundations of 21st Century Leadership (fall)—3
- LDSP 1571 Topics in Leadership—1
- LDSP 2400 Understanding Privilege and Oppression in Contemporary Society (spring)—3
- LDSP 2910 Field Practicum—1
- LDSP 3100 Multicultural Leadership: Theories, Principles and Practices —3

- LDSP 4010 Critical Issues in Leadership—4

Fees and Scholarship Opportunities

There is a \$850 program participation fee.

Norlin Scholars Program

Being a Norlin Scholar at CU-Boulder helps students mindfully develop their capacities to the full and prepares them to make a conscious contribution to the world. Students gain self-awareness, balance and confidence; they flex their learning boundaries and get more comfortable with ambiguity and complexity. Our scholars enjoy intellectual camaraderie, establishing close and lasting friendships with other students and teachers. They're encouraged to gain a broad perspective through service experiences, international study, and merging their academic interests with community issues. In addition to the structured components of the program—courses, mentoring, and activities—students informally share music, art, and other talents, having many opportunities to share their own knowledge, experiences, and stories with the group. These skills and activities put students in a strong position for whatever comes next: the job market, graduate and professional schools, or fellowships.

Benefits of being a Norlin Scholar include:

- \$4000 scholarship per academic year
- additional funding for enrichment activities like research or study abroad
- small, invigorating core and elective courses
- research or creative projects with faculty
- access to top scholarship advising and guidance
- opportunities for professional training and development
- a stimulating, interdisciplinary peer group

Students from all majors, including undecided, can apply as high school seniors for a four-year scholarship or as second year college students for a two-year scholarship. Norlin applicants must apply to CU first, though they need not be an admitted student.

Financial Information

Each Norlin Scholar receives a merit-based award of \$4,000 per year with the possibility of additional funds for enrichment projects. Students who enter the program as freshmen receive a four-year award, contingent upon academic progress; students who enter as rising juniors receive a two-year award, contingent upon academic progress. Students who need additional financial assistance should complete the FAFSA (Free Application for Federal Student Aid).

Applying to the Program

A flexible selection system ensures that students with many different interests, talents, and majors are accepted as Norlin Scholars. Students may apply either as high school seniors (to enter the program as incoming first-year students) or as second-semester sophomores in college (to enter the program as juniors). Colorado residents as well as out-of-state and international students are eligible. Applicants should demonstrate excellent academic and/or creative ability and must have already applied to the university for admission in order to apply for the scholarship. More information and application details can be found at enrichment.colorado.edu/norlinscholars or call **303-735-6802**.

The course code for this program is NRLN.

Preprofessional Programs

Preprofessional advising resources have been developed at CU-Boulder to help undergraduate students, and previously graduated students, prepare for further study at professional schools. Except for prejournalism, CU-Boulder does not offer preprofessional undergraduate majors or degrees. Completion of preprofessional prerequisites does not guarantee admission to a professional school. However, preprofessional advisors are well-equipped to provide information about professional schools within Colorado, and beyond, and can help students to prepare well for further professional study.

Prehealth Programs

Students can prepare to enter the undergraduate professional health science program at the Anschutz Medical Campus of University of Colorado Denver in the area of nursing by taking courses on the Boulder campus.

Students whose goals include entering the medical, dentistry, physical therapy, physician assistant, pharmacy, or public health programs and schools at the University of Colorado Denver, or the veterinary medicine or occupational therapy programs at Colorado State University in Fort Collins, can complete any undergraduate major at CU-Boulder. In most cases, these students are required to complete a baccalaureate degree before entering professional school. In fact, a baccalaureate degree is recommended for most health professions.

At the time of application to a professional school, students are judged on several factors, including performance in undergraduate courses. For this reason, no required course may be taken on a *pass/fail* basis. Some fields require specific preprofessional examinations before application. For most fields, interviews are an essential part of the application process.

In all cases, admission committees are concerned with students' compassion, coping and decision-making abilities, intellectual capabilities, realistic self-appraisal, sensitivity in interpersonal relations, and staying power (physical and motivational). In addition to formal course work, students should have experience in people-related activities (especially those related to their field of choice), so they can be more certain of their motivation for health careers. Also, health-related activities expose premed and other health science hopefuls to various patients and illnesses. The health professions require, or strongly recommend, such experience.

Some of the professional programs at the Anschutz Medical Campus give preference to Colorado residents and residents of WICHE (Western Interstate Commission on Higher Education) states; interested students should check with individual programs for specific policies. Students from other states usually can obtain at CU-Boulder the preprofessional courses required by their state schools, but should check with those schools in advance. Students are encouraged to apply to their state school, as well as to other public and private professional schools, to increase their chances of gaining acceptance to the professional program of their choice.

During the preprofessional years, personal intellectual development leads many students to change professional goals. Since there are usually more applicants for these programs than there are spaces available, many students need to pursue alternative goals. Under these circumstances, students should plan college programs to give themselves the greatest flexibility in considering other vocations.

Advising for preprofessional study in the health sciences is conducted through the Preprofessional Advising Office in the University Club. Check the prehealth advising website at www.colorado.edu/aac/prehealth.html for information on prerequisite courses, events, volunteer opportunities, student prehealth organizations, applications, and many other useful resources. Students should attend a prehealth advising session at orientation and then schedule an appointment with a prehealth advisor (aac.colorado.edu) early in their undergraduate careers to help plan course work and extracurricular experience in preparation for applying to programs of their choice. CU-Boulder also offers an extensive array of workshops and informational meetings, interview workshops, a fall speaker series, and a spring Health Professions Information Day.

Prejournalism

A specific prejournalism and mass communication option is offered at CU-Boulder in the Journalism & Mass Communication Program. Students complete two prerequisite courses while working toward arts and sciences core curriculum requirements. For more information, see [Journalism & Mass Communication](#) in this catalog or visit the program website at journalism.colorado.edu.

Prelaw

Students who plan to apply to law school upon completing their baccalaureate degree do not have to complete any specific course requirements for admission to law school. Instead, they should major in the discipline that best suits their intellectual interests and talents. Prelaw students should seek a rigorous and broad-based education that will ensure them a fundamental understanding of American society and its institutions. Students should become familiar with mathematical analysis and scientific reasoning, and develop excellent oral and written communication skills.

Prelaw advising is available in the Preprofessional Advising Center. In addition, there are faculty members who have special interest and expertise in the theoretical and practical aspects of the law and judicial systems. These faculty advisors are available for consultation with students on the CU-Boulder campus. Contact the Preprofessional Advising Center in University Club 111 for more information.

Presidents Leadership Class

The Presidents Leadership Class (PLC) is a specially designed, top scholar, academic curriculum that focuses on leadership development, personal development, community impact projects, and global initiatives. Skills are developed in interdisciplinary, experiential environments through exposure to government, education, the humanities, business, and science. Students from all of the schools and colleges participate in the Presidents Leadership Class curriculum as a part of their regular course work.

The Presidents Leadership Class is a program of CU-Boulder and has an Advisory Board representing Colorado business, educational, nonprofit, and government communities.

Admission and Enrollment

Admission to the Presidents Leadership Class is considered one of the highest honors awarded to incoming University of Colorado Boulder students. Most Presidents Leadership Class students are admitted prior to the beginning of their first year, however, a maximum of 15 spots are reserved for rising sophomores and juniors in a second point of entry. Selection criteria include academic excellence, demonstrated commitment outside of self, demonstrated leadership potential, and uniqueness of contribution to the incoming cohort. Each year, 50 first-year students are enrolled, comprising both Colorado residents and nonresidents. A separate admission application must be obtained from the PLC website and returned each academic year prior to February 15. Applications may be obtained online at www.presidentsleadershipclass.org/prospective_students/apply_for_plc or by calling the PLC office at **303-492-4PLC**.

Only students who are accepted into the Presidents Leadership Class are eligible to enroll in PLC courses (PRLC). Students receive arts and sciences core credit in ideals and values for PRLC 1810 Leadership and Ethics; and core credit in contemporary societies for PRLC 1820 Community Issues in Leadership.

Academic Program

PLC believes that communities, from local to global, are especially in need of agile leaders who are able to tackle problems that: are very complex; are best understood by synthesizing insights from across disciplines; are best addressed by mobilizing diverse participants and resources from across social sectors; require especially ingenious innovation; and finally, demand leadership of exceptional integrity, ethics, and virtue of character.

To cultivate leaders who are prepared to serve their community, PLC provides a variety of academic and experiential opportunities that prepare students to lead according to this leadership process: discover, design, act, and accountability.

PLC provides opportunities by uniting the support of the university, local, and statewide leaders. PLC operates as a "leadership laboratory" in which all students, staff, faculty, and volunteers model and practice the core competencies and demonstrate the character traits that PLC strives to cultivate. The academic curriculum is supplemented by experiential learning and leading, a Wilderness Leadership Experience, and a new Global Inquiry seminar.

For more information on the PLC Academic Plan and the research behind it, go to www.presidentsleadershipclass.org.

Required Courses

- PRLC 1810 Ethical Leadership
- PRLC 1820 Community Issues in Leadership
- PRLC 2820 Multilevel Issues in Leadership
- PRLC 3810 Global Issues in Leadership
- LDSP 4010 Critical Issues in Leadership: A Capstone Course (required only for Leadership Certificate completion)

Scholarship Programs and Opportunities

PLC students receive a merit-based scholarship of \$1,000 their first year to over \$12,000 (dependent upon participation) over the course of their four years in PLC. Students must enroll in PRLC course work to maintain their scholarship. PLC students are eligible to apply for Enrichment Fund scholarship dollars each semester after the completion of their first year (maximum \$1,000 per semester; \$3,000 total).

Scholars are also eligible to be selected for a variety of other merit-based scholarships only available to PLC students, including the FirstBank Colorado Scholarship Fund (\$3,500 per year, students are nominated and selected by FirstBank board members), the Alvin G. Flanigan Scholarship Fund (annual \$500 minimum awards), the Walker Family Scholarship Fund (annual \$500 minimum awards), the Michael Lee Hoelscher Memorial Scholarship (annual \$2,000 award).

The course code for this program is PRLC.

Reserve Officer Training Corps

Enrollment in Reserve Officer Training Corps (ROTC) programs is open to both men and women, and ROTC lower-level leadership courses are open to all students whether or not they contract with ROTC.

All services provide undergraduate and selected graduate students with the opportunity to combine academic study with a military officer's educational program. The three services conduct courses in their respective areas leading to a regular or reserve commission upon graduation. The Navy also offers a program leading to a regular commission in the Marine Corps.

The course codes for these programs are AIRR, MILR, and NAVR.

Air Force Aerospace Studies

U.S. Air Force ROTC offers several programs leading to a commission in the U.S. Air Force upon receipt of at least a baccalaureate degree.

Standard Four-Year Program

This standard program is designed for incoming freshmen, or any student with four years remaining until degree completion. It consists of three parts: the general military course (GMC) for lower-division (normally freshman and sophomore) students; the professional officer course (POC) for upper-division students (normally juniors and seniors); and the leadership laboratory (LLAB) attended by all cadets. Completion of a four-week summer field training program is required prior to commissioning.

Modified Four-Year Program

Certain undergraduate and graduate students may be eligible for this program. It is offered to full-time, regularly enrolled degree students and requires at least five semesters of full-time college work (undergraduate or graduate level, or a combination). May only be available to students pursuing academic majors in demand. Those selected for this program must complete the field training program during the summer months as a prerequisite for entry into the professional officer course the following fall semester.

Leadership Lab

All AFROTC cadets must attend leadership lab (two hours per week). The laboratory involves a study of Air Force customs and courtesies, drill and ceremonies, career opportunities, and the life and work of an Air Force junior officer.

Other Air Force ROTC Programs

Other programs are frequently available based on current Air Force needs. The unit administrative officer in Boulder (**303-492-3128**) can discuss the best alternatives. Interested students should make initial contact as early as possible to create the best selection opportunity, as selection is on a competitive basis. There is no obligation until a formal contract is entered.

Air Force College Scholarship Program

Normally a scholarship board is held at the end of each semester for students who have at least one semester of full-time college credit. Prior participation in AFROTC may not be required to compete for these scholarships. Students can compete for scholarships in most academic majors. Students selected for this program receive scholarships that pay up to \$18,000 in tuition, a book allowance, nonrefundable educational fees, and subsistence each month, tax-free. These scholarships are available in all academic disciplines and are two to three years in length.

USAF Medical Programs

Qualified nursing students can compete for nursing scholarships. These scholarships can lead to a career as an Air Force officer, serving as a nurse. Students may also compete for a prehealth designator. If selected, they would receive a scholarship for medical school.

Air Force ROTC Course Credit

AFROTC credit for graduation varies with each college. Students should contact the appropriate college for credit determination.

Registration

CU-Boulder students who wish to register for AFROTC classes sign up for them through the normal course registration process.

Military Science (U.S. Army)

The Department of Military Science is a leadership program leading to an officer's commission in the Active Army, Army Reserve, or National Guard in conjunction with an undergraduate or graduate degree. Military science courses supplement a regular degree program and offer practical leadership and management experience. Scholarships are available for those that qualify. Additionally, financial benefits may be available for enlisted soldiers.

Four-Year Program

For college freshmen, the four-year program consists of two phases: the basic course (freshman and sophomore years) and the advanced course (junior and senior years).

Basic courses (MSI & MSII) cover Army history and organization as well as military leadership and management. Labs provide the opportunity to develop leadership experience while learning basic military skills. Participating in the basic courses incur no military obligation, except for those receiving an Army scholarship.

Advanced courses (MSIII & MSIV) cover leadership, tactics and unit operations, training techniques, military law, and professional ethics. Additionally, a four-week summer leadership camp at Fort Lewis, Washington, is a requirement between the Junior and Senior year, and is a prerequisite for commissioning. Students enrolled in the advanced courses must have completed the basic courses (or the equivalent) and obtain permission from the professor of military science (PMS).

Two-Year Program

For college students entering as a sophomore, the two-year program consists of the advanced courses, preceded by a four-week summer ROTC leadership training course (LTC) at Ft. Knox, Kentucky. Inquiries into LTC should be directed to the Department of Military Science prior to completing the sophomore year. LTC is a paid internship and the academic equivalent to the MS1/MSII basic courses.

Prior service and enlisted soldiers who have completed basic training may be eligible to enroll in the advanced course without attending LTC or completion of the ROTC basic courses. Enlisted soldiers pursuing advanced placement must obtain permission from the PMS.

Scholarship Programs

College freshmen, sophomores, and juniors may be eligible for four-, three-, and two-year scholarships, regardless of academic major. Interested students must enroll in Army ROTC and meet eligibility requirements, including an army physical fitness test.

High school scholarship applicants may be eligible for four- and three-year college scholarships. High school students can apply during their junior year and before January 10 of their senior year.

All scholarship recipients receive tuition and fees, a \$1,200 book allowance, and a stipend of \$300–500 per month during the academic year. Students interested in scholarships should contact the enrollment and scholarship officer at armyrotc@colorado.edu, **303-492-3549** or **303-492-6495**.

Simultaneous Membership Program

College sophomore and juniors who want additional leadership training, may participate with an Army Reserve or Army National Guard unit as an officer trainee. Students participating in this program earn approximately \$240 in monthly drill pay, plus a monthly ROTC stipend of \$300–500. Additionally, SMP participants receive Army National Guard or reserve tuition benefits of up to \$4,500 per year. Enlisted and prior service students retain their authorized GI benefits.

Army ROTC Course Credit

ROTC is an elective credit in most departments. Individual academic advisors verify if ROTC classes count toward the student's degree.

Registration

Army ROTC classes begin with MLR prefix. Register for classes through the normal course registration process. For more information, contact the enrollment and scholarship officer at CU-Boulder at armyrotc@colorado.edu, **303-492-3459** or **303-492-6495**. See also the AROTC website at www.colorado.edu/arotc.

Naval Science

Naval science course work is offered in the fall and spring semesters only. All naval science students enroll in NAVR 1010, 2020, 4010, and 4020. Those desiring commissions in the U.S.

Navy enroll in NAVR 3020, 3030, 3040, and 4030 for upper-division work. Those desiring commissions in the U.S. Marine Corps enroll in NAVR 3101 and 4101 for upper-division work.

Scholarship Programs

NROTC offers two-, three-, and four-year scholarship programs, and two-year and four-year college (non-scholarship) programs. Navy scholarships may be earned while students are enrolled in the college program. Scholarship students receive tuition and fees, a \$375 book allowance per semester, and a \$250 per month subsistence allowance. This subsistence allowance gradually rises to \$400 by the student's senior year. College program students receive a \$350 per month subsistence allowance their junior year and \$400 per month subsistence allowance their senior year in the program.

Naval science (Navy option) students must complete one year of calculus, physics, and English, and one semester of American military history or national security policy, and a cultural course. Students should check with their naval science instructor to determine specific course offerings that fulfill the above requirements.

Degree Credits

The number of NROTC semester hours of credit that may count toward degree requirements is determined by the individual colleges. Students should therefore consider their college's policy when formulating their degree plan.

Commissioned Service

Opportunities for commissioned service are presently available in the unrestricted line (surface, subsurface, aviation, special warfare, and special operations) and staff corps (nursing) in the U.S. Navy. Opportunities in ground and aviation specialties are available in the U.S. Marine Corps. Students interested in other programs leading to commissions in either the U.S. Navy or U.S. Marine Corps are encouraged to contact the NROTC unit on campus. All commissioning programs require that the student be working toward, and receive, a college degree.

Technology, Arts, and Media Program

The ever-expanding landscape of the networked age requires new and adaptable skill-sets, within both academic and commercial paradigms. In order to address this need, the Technology, Arts, and Media Program, based within the ATLAS Institute, offers two undergraduate programs: a minor in Technology, Arts, and Media (MTAM) and a smaller Certificate in Digital Media (CDM). The minor is intended for students who wish to pursue research and careers related to digital media, whereas the certificate is intended for students who are interested in the fundamentals of digital media production.

The course code for this program is ATLS.

Minor in Technology, Arts, and Media (MTAM)

The minor in Technology, Arts, and Media (MTAM) provides a broad multidisciplinary perspective that integrates technological skills with a critical, theoretical, and historical understanding of technology, media, and the arts. The MTAM curriculum includes creative production courses, as well as classes that impart foundational knowledge and critical perspectives on the role of technology in society. Students from a wide range of majors receive instruction in digital media production, design, art criticism, computer programming, information technology, data visualization, media and societal analysis, and project development.

Minor Goals

- to prepare the next generation of artists, designers, and media producers for the networked age
- to give students the necessary technical, theoretical, and historical backgrounds so they can contribute to the development of new functionalities and aesthetics for computer media
- to facilitate the exploration of the intersection of technology and other specific disciplines
- to produce active and critically aware participants and producers of technology

Minor Requirements

- A minimum of **21** credit hours:
 - ATLS 2000 The Meaning of Information Technology
 - ATLS 3010 Digital Media 1
 - ATLS 3020 Digital Media 2
 - ATLS 3030 Fundamentals of Digital Design
 - Critical thinking in technology elective*
 - Invention and practice elective*
 - ATLS 4010 Capstone
- Students must maintain a 2.00 GPA within all MTAM courses.
- Students must earn a minimum grade of *C* in all courses counted for the minor.
- Students may not take more than one elective course from a single department (this does not apply to ATLS courses).
- Course work used to satisfy MTAM requirements cannot be taken *pass/fail*.
- ATLS core courses cannot be substituted (ATLS 2000, ATLS 3010, ATLS 3020, ATLS 3030, ATLS 4010).
- A minimum of 15 credit hours must be taken on the Boulder campus.
- Failing to meet the minimum grade for any individual ATLS core course twice will result in automatic removal from the MTAM program.

**See tam.colorado.edu for a current listing of approved elective courses.*

Course Substitutions

- Course work not on the approved elective list (including course work from another University of Colorado campus, another institution, Study Abroad, or Semester at Sea) must be approved by the MTAM Faculty committee. Students must complete a Course Substitution Petition Request Form and attach supporting documentation (syllabus).
- Substitution requests will not be considered if the student has already satisfied the requirement with an approved elective course.

College of Arts & Sciences

Steven R. Leigh, dean
 275 UCB • phone: 303-492-
 7294 • fax: 303-492-4944
 college

website: www.colorado.edu/artssciences

THE COLLEGE OF ARTS AND SCIENCES is the liberal arts college at CU-Boulder. Its mission is to provide an outstanding liberal arts education for its undergraduates, cutting-edge graduate education, and world-class research, scholarship, and creative work. In addition to gaining the knowledge and skills of their areas of study, students learn how new information is acquired, and they can participate in original research and creative work with individual faculty members.

The college offers a wide variety of fields of study, with nearly 50 undergraduate majors. The environment and advantages of a small liberal arts college are created through "academic neighborhoods" in which students can meet and interact with other students and faculty in small group settings. In addition, more than 60 percent of undergraduate classes are small, with 25 or fewer students.

As the liberal arts college of CU-Boulder, the College of Arts and Sciences has several goals in the education of its students:

- Educate students for careers and a productive life. Arts and sciences students gain the most current knowledge and skills in their major fields of study. In addition, they learn how to acquire new skills to contend with—and lead—the changes that will occur in the decades to come. Education for a productive life also requires that students learn how to analyze situations, solve problems, and speak and write effectively.
- Provide students with a well-rounded education. Arts and sciences students acquire a broad knowledge and an integrated understanding of art and music, great literary works, philosophy, history and politics, the social world, science, and technology. They learn how to critically evaluate and think about morals, ethics, and values. The core curriculum and breadth requirements give students a broad, liberal-arts education that develops the whole person, not just the specialist.
- Educate citizens who can think for themselves, understand the rapidly changing world, and make wise choices within a democratic system.
- Impart a love of learning so that students can continue to grow throughout life.
- Teach ways of thinking about and approaching new problems. For some students, this will enable them to further advance knowledge and scholarship in the academy. For all students, this is important for enriching their lives.
- Prepare students to help enrich the lives of others. Arts and sciences graduates become lifelong resources for their families, neighbors, friends, and co-workers.

The college also is dedicated to outstanding graduate education. Advanced degrees are offered by nearly every academic department in the college, and the PhD is offered in approximately 30 different disciplines. In addition, an increasing number of departments offer combined bachelor's/master's degrees that can be earned in five years. Graduate training focuses on teaching and

research careers as well as on professional careers in the public and private sector.

The strength of the College of Arts and Sciences comes from its outstanding faculty. In addition to being dedicated teachers, they are active scholars in disciplines throughout the arts and humanities, social and behavioral sciences, biological sciences, and physical and mathematical sciences. They are the recipients of numerous national awards and honors for their research, scholarship, and creative work. Faculty and staff of the College of Arts and Sciences join together to create an intellectual community of students and scholars to discover, critically examine, integrate, preserve, and transmit knowledge, wisdom, and values.

University of Colorado Boulder

Academic Excellence

Dean's List

Students in the College of Arts and Sciences who have completed at least 12 credit hours of CU-Boulder course work for a letter grade in any single semester with a term GPA of 3.75 or better are included on the dean's list and receive a notation on their transcript and a letter from the dean.

Graduation with Honors

The award of honors at graduation—cum laude, magna cum laude, or summa cum laude—is determined by the Honors Program of the college and is based on several criteria, including the quality of original scholarly work. Honors are not conferred on a graduate simply by virtue of high grades. Students pursuing multiple majors or multiple degrees must complete their honors program and defend their thesis by the published deadline for the term/year in which their first major or first degree is conferred. Students intending to pursue honors must register with the Honors Program by the deadlines published on the Honors Program website. Honors requirements must be complete prior to graduation. Students "walking" in May but graduating in August must complete honors requirements, including defending the thesis, by the Honors Program deadline for May graduation. Interested students should consult the Honors Program listing in this catalog or contact the Honors Program in Norlin Library.

Graduation with Distinction

Students will graduate "With Distinction" if they have at least 30 credit hours completed at the University of Colorado Boulder and have a grade point average of 3.75 or higher for all course work completed at the University of Colorado. The average includes all grades except *P*.

Phi Beta Kappa

Phi Beta Kappa is the nation's oldest and most prestigious honor society. The CU-Boulder chapter was established in 1904. Upper-division students whose undergraduate academic records fulfill certain requirements are eligible for election to membership in recognition of outstanding scholastic achievement in the liberal arts and sciences. Students are notified by mail of their nomination; students do not apply for Phi Beta Kappa membership.

Residential Academic Programs (RAPs)

On This Page:

- [Baker Residential Academic Program](#)
- [Communication and Society Residential Academic Program](#)
- [Farrand Residential Academic Program](#)
- [Health Professions Residential Academic Program](#)
- [Honors Residential Academic Program](#)
- [Global Studies Residential Academic Program](#)
- [Libby Residential Academic Program](#)
- [Sewall Residential Academic Program](#)
- [Leadership Residential Academic Program](#)
- [SSI: Sustainability and Social Innovation Residential Academic Program](#)

Baker Residential Academic Program

The Baker Hall Residential Academic Program (RAP) is designed primarily for freshman and sophomore students who are interested in the natural sciences and environmental studies. The program provides courses that satisfy various core curriculum requirements in the College of Arts and Sciences and in majors such as ecology and evolutionary biology, environmental studies, integrative physiology, geography, geology, and chemistry. Courses are typically limited to 25 students and are taught in classrooms located in Baker Hall. Baker RAP offers access to academic advising, career counseling, student internships, guest speakers, field trips, and close faculty contact. The combination of small classes, a group of students who take many of the same classes together, and frequent field trips and special lectures creates a small-college atmosphere while offering the advantages of studying at a major research university.

Baker RAP offers courses in anthropology, biology, chemistry, economics, environmental studies, expository writing, geography, geology, history, mathematics, philosophy, and political science. The curriculum is designed to maximize the opportunities for students to satisfy core curriculum requirements in the College of Arts and Sciences. Upper-division courses are presented in biology and environmental studies. Upper-division credit is available through independent study and research. Students usually take one or two of the above courses each semester. Baker RAP also reserves seats for its students in certain high-demand courses taught outside the program, including introductory biology and chemistry laboratories.

The Baker RAP curriculum is augmented through experiential learning outside of the classroom. Undergraduate research plays an important role in these experiences. Interested students are encouraged to participate in research projects as early as their first year. Baker RAP instructors work closely with the Undergraduate Research Opportunities Program (UROP) to facilitate matching Baker RAP students with faculty members with similar research interests.

Baker RAP cocurricular activities offer social and educational opportunities for students in the program. These activities include a kick-off picnic at the beginning of the school year, local hikes, mountain climbing, backpacking, a cave tour, a day of cross-country skiing, and a spring service-oriented activity emphasizing environmental conservation. Guest lecturers are invited to speak about scientific or environmental themes.

There is a fee for participation in Baker RAP in addition to regular tuition, fees, and room and board. Students eligible for financial aid may request that their budget be adjusted to include the program fee. Their eligibility for aid will then be increased by an amount equal to the Baker RAP fee. Students interested in the program should visit bakerrap.colorado.edu. Inquiries to the program can be by e-mail, bakerrap@colorado.edu; phone, **303-492-3188**; or mail, Baker Hall Residential Academic Program, University of Colorado Boulder, 176 UCB, Boulder, CO 80309-0176.

Communication and Society Residential Academic Program

Buckingham Hall's Communication and Society Residential Academic Program (COMM RAP) is a living-learning environment for 200 students designed around the theme of Communication and Society. It offers students an opportunity to engage with faculty and other students in a small college atmosphere within a major research university. Students explore the complex social problems and challenges of communication in contemporary society in seminar-sized courses. They also have opportunities to participate in co-curricular activities that stress civic engagement. The many opportunities for outreach and collaboration with the Boulder community provide an excellent venue for learning by doing.

A unique feature of the program is its integration of courses from its three supporting areas, the Department of Communication, Journalism and Mass Communication, and the Program for Writing

and Rhetoric. These courses emphasize the role of participation, deliberation, and collaboration in shaping and resolving public problems and problems in daily life. Its offerings also include opportunities for upper-division courses on topics germane to communication and society.

In addition to communication offerings, the curriculum includes courses that satisfy the writing and core requirements in Arts and Sciences. Across the year, guest lectures and seminars provide opportunities to interact on civic engagement and societal participation with leading experts on the CU faculty and distinguished visitors to the university.

The COMM RAP is open to students with an interest in communication and society, regardless of major. A fee is charged for participation in the program. For more information, call **303-492-1996**.

Farrand Residential Academic Program

Farrand's small seminar courses in the liberal arts are taught by award-winning faculty especially selected to help create a close intellectual and social community. As the Humanities and Cultural Studies Residential Academic Program, Farrand focuses on the study of the humanities within the larger frame of culture and society. Farrand also offers high-demand courses from all areas of the curriculum. These include service-learning classes, which provide a deeper cultural understanding by applying classroom learning to service to the community.

Each semester, every Farrand student takes a Farrand course that provides a shared academic experience. For many students, this course will be a humanities course, such as Greek Mythology, Introduction to Ethics, or the interdisciplinary Introduction to the Humanities, reflecting a commitment to the humanities that is central to Farrand's identity.

Because helping others contributes to the learning experience as well as to the whole community, Farrand offers several service-learning classes each semester. Service learning gives students the chance to apply what they study in their classes to real-life situations, such as a homeless shelter, a humane society, or a tutoring program. These classes include Gandhian Philosophy; Nutrition, Health, and Performance; and Global Women Writers. The Farrand curriculum also offers a wide range of popular core curriculum classes taught by faculty known for their teaching skills. Ethics, Calculus, and Introduction to American Government are just a few examples.

Farrand's many cocurricular opportunities include a wide variety of events and performances, active and well-supported student governance (Farrand Community Council), and group projects benefiting the community and the environment.

The program is designed primarily for students in the College of Arts and Sciences. Interested students in other colleges should contact the Farrand program for special admission procedures. It is administered by academic directors selected from the faculty and a hall director experienced in the operation of a large residence hall. There is a charge for the program in addition to regular tuition, fees, and room and board.

Inquiries concerning any aspect of the academic program may be directed to the Farrand Academic Program, University of Colorado Boulder, 180 UCB, Boulder, CO 80309-0180, **303-492-8848**.

Global Studies Residential Academic Program

The Global Studies Residential Academic Program (G-RAP) promotes the recognition of global interdependence, encourages the study of foreign languages and international affairs, and emphasizes the value of international education. This year-long program, housed in the newly renovated Smith Hall in the Kittredge Complex, provides 200 first- and second-year students with the foundational tools needed to serve as effective global citizens.

G-RAP combines multidisciplinary, internationally focused courses with co-curricular activities, service learning opportunities, and short-term study abroad programs. Students select from a diverse selection of course offerings each semester, including courses in anthropology, economics, philosophy, religious / studies, and international affairs. The majority of the courses fulfill requirements from the arts and sciences core curriculum. Classes range in size from 15 to 18 students, and the instructors hold office hours in Smith to ensure enhanced accessibility for G-RAP students.

By participating in G-RAP, students gain access to staff and faculty with extensive and unique international experience and interests, as well as access to each other as a group of like-minded, globally conscious individuals. Additionally, the program offers participants access to student fellows, a group of outstanding former G-RAP students who hold office hours in the dorm each week to assist with course work, study sessions, paper writing, or language tutoring.

The Global Studies RAP is open to all students seeking to add an international component to their academic program, regardless of major. G-RAP is proud to be a leader in the effort to globalize the campus.

A fee is charged for participation in G-RAP. Interested students should visit globalstudiesrap.colorado.edu to read more, view current course offerings, and browse co-curricular opportunities. For additional information, call **303-735-3189** or e-mail GRAP@colorado.edu.

Health Professions Residential Academic Program

The Health Professions Residential Academic Program (HPRAP) will proudly take residence in the newly renovated Kittredge West Hall in fall 2013, accommodating approximately 225 students. Joining our living/learning community is an excellent choice for students interested in exploring majors and careers in healthcare. These career paths may include, but are not limited to: chiropractic medicine, dentistry, naturopathic medicine, nursing, occupational therapist, optometry, osteopathic, medical doctor, pharmacy, physical therapy, physician's assistant, podiatry, public health, veterinary medicine. Students of all colleges and schools are welcome, although the curriculum may not lend itself to some engineering majors.

HPRAP provides highly desirable introductory courses taught by expert teachers in a supportive atmosphere where each individual is valued. HPRAP students will take at least one course offered by the program each semester. Courses are taught onsite within the hall, with an average of only 20 students per class. Courses range from basic science to courses on bioethics, global health policy, writing, and the social sciences. As part of the HPRAP experience, faculty provide co-curricular activities to enhance the learning environment and integrate the health professions theme through experiences such as field trips and guest speakers.

The Health Professions RAP faculty and staff work at providing meaningful experiences that will prove valuable as students move toward their academic and career aspirations. Students with clinical and research experience, community service, and leadership roles will be very desirable to future employers and graduate school admissions committees. Through collaboration with the Pre-Health Advising Office and programming provided by the Health Professions RAP, students will be presented with opportunities in these cornerstone areas.

The Health Professions RAP will make the first year at CU a rewarding adventure and will serve as a gateway to opportunities on campus and beyond.

For more information about the program fee, application process, and course offerings, visit hrap.colorado.edu, or contact hrap@colorado.edu or **303.492.4537**.

Honors Residential Academic Program

The Honors Residential Academic Program (Honors RAP) is the residential component of the Honors Program of the College of Arts and Sciences. It is open to approximately 300 honors-qualified first-year and continuing honors-qualified students. Participants live in Smith Hall. Students of other colleges are welcome to participate although the curriculum may not lend itself as well to their requirements.

The Honors RAP promotes and sustains academic excellence within a lively community setting. Students take one onsite 3-hour seminar-style course each semester. Each semester the program offers a variety of honors courses, and the great majority of these courses satisfy arts and sciences core curriculum requirements. Each seminar is taught by an experienced faculty member, emphasizes discussion and writing, and ordinarily enrolls about 15 students.

Beyond the classroom and a variety of co-curricular activities that enhance the learning experience, Honors RAP fosters a variety of student-led activities, including evening social events each week and a monthly lecture series that brings students into contact with leading teachers and researchers from the university community.

Members of the Honors RAP draw on a rich variety of academic, advising, and informational resources. Responsibilities for community building, fostering a culture of academic success, and for the planning and implementation of programming consistent with our Honors mission are shared among the student leaders, faculty, and staff. The associate director who supervises Honors RAP's daily functioning maintains an office in Smith Hall for academic advising and acts as liaison to the rest of campus. There is a faculty in residence for Honors RAP who lives in a faculty apartment in Smith Hall east wing.

Eligibility: Beginning each December, the Honors Program of the College of Arts and Sciences invites approximately the upper 10 percent of all admitted Arts and Sciences students to participate in honors courses during their first year on campus. These invitations are issued on the basis of high school grade averages and scores on the Scholastic Aptitude Test (SAT) or American College Test (ACT). All students receiving an honors invitation are eligible to become members of the Honors RAP on a first-come, first served basis, determined by date of receipt of the online housing application. Students who wish to participate in Honors RAP beyond the first year must maintain a University of Colorado GPA of 3.30 or above. As with participants in all other residential academic programs, Honors RAP members pay a participation fee in addition to the standard charges for tuition, fees, and room and board. Students eligible for financial aid may request their budget be adjusted to include the program fee.

For more information about the program, program fee, application process, course offerings, and more, visit honorsrap.colorado.edu or contact hrap@colorado.edu or **303-492-3695**.

Leadership Residential Academic Program

This Leadership RAP is located at Kittredge Central and is dedicated to developing community, civic, and global leaders for a culturally diverse and democratic society. When a student enrolls in the Leadership RAP they select one of two academic programs.

The Ethnic Living and Learning Community (ELLC) Leadership Studies Program provides students with a multicultural living and learning experience while studying leadership from a cultural and multidisciplinary perspective.

The Chancellor's Leadership Studies Program (CLSP) offers leadership development and an understanding of how institutions and communities solve problems. Students learn different leadership styles needed to work effectively in those settings.

Students in both of these programs take leadership courses offered each semester that meet core requirements and may be applied toward graduation as well as toward a Certificate in the Study and Practice of Leadership. Students from all schools and colleges on the Boulder campus are eligible to participate.

There is a program participation fee of \$850. Scholarships are available to cover the cost of the fee for those with financial need. Contact the Leadership RAP, University of Colorado Boulder, 406 UCB, Boulder, CO 80309-0406, phone **303-735-1987**, e-mail leadership@colorado.edu, or visit LeadershipRAP.colorado.edu.

For additional information on this program, see the [Other Academic Programs](#) section.

Libby Residential Academic Program

The Libby Arts Residential Academic Program (Libby RAP or LRAP) fosters individual creativity and personal expression to prepare students for success in a wide variety of fields. The curriculum is designed for students who consider study in the arts to be a valuable complement to a major in the humanities, social sciences, natural sciences, business, or engineering, or who have an interest in the arts as a major. Prior art experience is not required for any Libby RAP class.

Libby RAP classes satisfy either core, major, or elective requirements and are taught in Libby Hall by faculty with demonstrated excellence in teaching. Class sizes are limited to approximately 18 students. Courses are offered in dance, acting, drawing, painting, writing, film criticism and theory, digital art, art history, music history, and media studies. A range of popular core curriculum classes are also offered each year in disciplines such as economics, math, and nutrition. Libby RAP classes require a healthy curiosity and the willingness to be creative.

With students taking several classes together and living in the same residence hall, LRAP fosters a small community within the larger university setting.

Libby RAP also exposes students to the diversity of the arts through co-curricular activities, experiential learning opportunities, and community events. Students are offered numerous chances to explore the breadth of the performing and visual arts, to investigate creativity and how it is applied outside the arts, and to expand their social and cultural awareness. Other activities build a sense of community within Libby Hall and address social responsibility in the community at large. Activities regularly occur on and off campus, in the Denver metro area, and even include travel to the Telluride Film Festival and to New York City.

Students enrolling in the program are required to take at least one course in the hall each semester. The LRAP faculty director and professional staff are located in Libby Hall and provide academic assistance to students. There is an annual non-refundable fee for participation and there are a limited number of scholarships available. Students who are eligible for financial aid may request that their budget be adjusted to include the LRAP program fee.

To learn more, visit libbyrap.colorado.edu, or contact libbyrap@colorado.edu or **303-735-4211**.

Sewall Residential Academic Program

The Sewall Residential Academic Program (SRAP) is a program for first-year students enrolled in the College of Arts and Sciences who have an interest in the study of history and culture. Citizenship in the 21st century requires the ability to engage complex connections between the present and past, between local places and our global society, and between the arts and sciences. SRAP combines classes ranging from history and biology to economics and English, with co-curricular activities (such as lectures, films, and field trips) and local community outreach to help students recognize and think about these connections.

Limited to 330 students, SRAP provides the opportunity to enjoy the advantages of a small liberal arts college within the broader context of a large research university. The program offers a selection of small seminar-style classes (limited to approximately 18 students) that meet in the Sewall residence hall. Classes encourage active student participation and emphasize analytical thought through intensive reading, discussion, and writing. Most SRAP courses also fulfill College of Arts and Sciences core requirements.

Each semester all SRAP students must take a 3-credit course at Sewall. All students are further required to take SEWL 2020 either fall or spring semester. In addition, students have the opportunity to take the lower-division writing course (WRTG 1150) at Sewall in either fall or spring semester.

SRAP facilitates a successful transition from high school to the university. Sewall courses are taught by faculty with a demonstrated excellence in teaching and a commitment to working closely with first-year students. Faculty members have offices conveniently located in Sewall Hall, which helps foster communication between students and faculty. Participants in the Sewall program are also fully involved in regular campus life, take the majority of their classes with the rest of the university, and are encouraged to join in all university activities.

The SRAP director, associate director, and program assistant are readily available to help students with planning schedules, making sense of the rules of the University and the College of Arts and Sciences, and choosing majors. They can refer students to other university resources for specialized counseling when necessary, and the housing department office offers free tutoring in many

subject areas.

Interested first- and second-year students who are admitted into the College of Arts and Sciences should indicate Sewall Hall as their first choice on the housing application form and return it to the Housing Reservation Center as early as possible. Students are admitted on a first-come, first-served basis, determined by date of receipt of the housing application form. There is an extra charge for participating in the program in addition to regular tuition, fees, and room and board. Some scholarships are available; please contact the academic program office for details.

Students who have questions about the program should address them to the Director, Sewall Residential Academic Program, University of Colorado Boulder, 353 UCB, Boulder, CO 80309-0353; visit the program online at rap.colorado.edu; or call the SRAP office at **303-492-6004**.

SSI: Sustainability and Social Innovation Residential Academic Program

The Sustainability and Social Innovation (SSI) RAP is an experiential skills-based program for students concerned about sustainability and innovation issues who want to participate in developing solutions while earning credits toward their degree in any college on campus. Students in the Sustainability and Social Innovation RAP are housed in the only LEED Platinum residence hall on campus, Williams Village North. The program is uniquely multidisciplinary, seeking a critical engagement of students interested in identifying sustainable solutions to diverse global challenges including resource depletion and conservation, climate change, poverty, environmental protection, and economic instability. Our teaching faculty includes professors in architecture, engineering, political science, writing, biology, psychology, anthropology, business, and sociology. Courses offered in the residence hall for RAP students vary each term but always include core curriculum courses from the College of Arts and Sciences, as well as other campus offerings.

Sustainability and Social Innovation courses challenge the status quo and emphasize collaborative problem-solving and social innovation through design, debate, planning, project development, writing, and creative enterprise. In small classes of usually no more than 22 students, and through RAP activities and events (using a state-of-the-art kitchen, computer lab, facilities and grounds at Williams Village, visiting speakers, field trips) students develop a strong knowledge base, entrepreneurial savvy, communications skills, technology literacy, teamwork skills, and compassionate understanding. SSI is one of the few RAPs with its own faculty-in-residence and with resident graduate student teaching resident assistants (TRAs) who live in the building and assist with RAP classes. As a result, mentoring, academic staff and informal support are close at hand for all RAP students. SSI students work closely with their peers in the Sustainable by Design (SbD) RAP, also located at Williams Village North.

Enrollment in the program includes an additional fee. Please contact wrraps@colorado.edu or call **303-735-1330**.

The Sustainability and Social Innovation RAP provides students from across all academic disciplines study of a variety of practices that foster social innovation and sustainability.

Leeds School of Business

David L. Ikenberry, dean
419 UCB phone: 303-492-1809
Fax: 303-492-7676
School website: leeds.colorado.edu

THE NEW INNOVATION ECONOMY requires—and rewards—richer knowledge, sharper skills and a global mindset. Ultimately the edge belongs to those who bring inspiration and purpose to their work.

Within this climate, the **Leeds School of Business** embarks on an innovation agenda designed to leverage our unique assets: the intellectual capital of Leeds faculty, our focus on the 'whole student' experience, our strong network of alumni and industry partners, and our stunning and dynamic location.

Leeds holds accreditation by the Association to Advance Collegiate Schools of Business (AACSB-International). Leeds awards four types of degrees: the bachelors of science (BS), the master of science (MS), the master of business administration (MBA), and the doctor of philosophy (PhD). Students can specialize in accounting, finance, management and entrepreneurship, and marketing.

World-class faculty provide the foundation for breakthrough thinking—creating knowledge from research, disseminating knowledge through teaching, and applying knowledge in collaboration with the business community. Faculty discoveries are frequently published in prestigious academic journals, which enhance the school's reputation for inspiring innovation.

From orientation to graduations, Leeds faculty and staff guide students to discover and optimize their potential. Through an array of targeted services, students create an individualized journey that maximizes the impact of their experience. Ethics and social responsibility are hallmarks of a Leeds education, and the school's commitment to professional development is unrivalled.

Leeds alumni and industry partners stand united to offer a meaningful level of engagement with students, faculty, and other key stakeholders that is uncommon among business schools. Alumni provide the support and resources that ensure graduates are poised for maximum impact. Corporate partners infuse relevance to Leeds' curriculum innovation, supporting new programs and providing the school access to professional talent.

Beyond its breathtaking vistas, Leeds joins the University of Colorado and the Boulder community to provide inspiration that generates extraordinary opportunities for students. Cross-campus

collaborations with fields like engineering and science link Leeds faculty and students with more resources to put innovation into action. And Boulder, the nation's hotbed for thriving start-up companies, contributes intellectual energy through a high concentration of advanced technology industries.

Together, these assets make Leeds uniquely qualified to deliver on our mission of educating principled, innovative leaders who drive value.

Facilities & Research Activities

On This Page:

- [Business Research Division](#)
- [Professional Mentorship Program](#)
- [Leeds School of Business Student Government](#)
- [Academic Centers](#)
- [Study Abroad](#)
- [Graduation Recognition Ceremony](#)
- [Career Opportunities](#)
- [Student Organizations](#)

The Leeds School of Business houses resources for the specific needs of business students. The facilities include: the Burrige Center for Securities Analysis and Valuation, the Business Research Division, Career Connections, the Center for Education on Social Responsibility, the Center for Research on Consumer Financial Decision Making, Eurest Dining, the MBA Business Center, the Office of Diversity Affairs, the Real Estate Center, the Robert H. and Beverly A. Deming Center for Entrepreneurship, smart classrooms, student lounges, Trep Café, Undergraduate Student Services, William M. White Business Library and Information Commons, and other amenities.

The William M. White Business Library (ucblibraries.colorado.edu/business) and Information Commons provides students with a wealth of information pertaining to the business world. Students have access to the business and other libraries via the university libraries online catalog. Many databases are accessible through the wireless network and off campus. These databases, both CD- and web-based, contain a myriad of full-text magazines and journals; business periodical indexes; corporate annual, 10-K, and proxy reports of all the public companies in the United States; short profiles of both American and international companies; demographic and business statistics; industry and market information; and investment reports written by Wall Street analysts. Over 50 computers provide access to the databases and the Internet, and technology-outfitted team rooms are available for group study. Knowledgeable librarians are always available to help navigate the search for information. The Information Commons is open 24 hours, seven days per week and contains 30 of the 50 computers with a full suite of software. These are accessible to students, faculty, and staff of the university. In addition, Leeds has 25 technology equipped team rooms. These rooms support group study and project work. They are available for reservation at leeds.colorado.edu/teamrooms.

The White Business Library is part of the University of Colorado library system, which includes more than two million volumes, more than five million microforms, and more than 24,000 periodicals and serials. The system is also a full depository for United States government, international, and state documents.

All classrooms in the Leeds School of Business are equipped up to campus "smart" classroom technology standards. Technologies in a typical Leeds classroom include: a desktop computer loaded with Microsoft Office Suite applications, video projection system, ceiling speakers for audio, DVD/VCR, iClicker base station, campus cable, and both wired and wireless Internet connections. All classrooms have the flexibility to support a personal laptop with connectivity in place to integrate with the video projection and sound system.

Business Research Division

Established in 1915, the Business Research Division is one of the earliest organized state service-oriented bureaus in the country.

The Business Research Division conducts business, economic, and market research that contributes to the efficient use of Colorado's resources and increases interest in and awareness of the Leeds School of Business. It also is the umbrella organization for the Rocky Mountain Trade Adjustment Assistance Center (RMTAAC) and the Colorado Association of Manufacturing and Technology (CAMT). Through its annual Colorado Business Economic Outlook Forum, held in December, the division has established a base of knowledge that adds value to its work in other areas. In addition to providing businesses, government and nonprofits with information to help them make better-informed business and policy decisions, the division specializes in economic and fiscal analysis, market research, and custom research projects. It also prepares a Colorado leading economic indicator series, the *Leeds Business Confidence Index*. Research results are distributed through presentations and reports; a quarterly newsletter, the *Colorado Business Review*; and the division's website.

Funding for center activities comes from the Leeds School of Business, the university, state agencies, the federal government, state and local business firms, and from the sale of research products and services.

RMTAAC is one of 11 centers across the nation funded by the U.S. Department of Commerce to manage the Trade Adjustment Act for Firms (TAAF) Program, which helps import-impacted U.S.

firms develop and implement business recovery strategies to strengthen their competitiveness in the global marketplace. The TAAF Program is a cost-sharing federal grant program that pays a portion of professional consultant expenses or industry-specific expert services for projects that improve a firm's competitiveness, thereby increasing sales and creating U.S. jobs. Benefits of the program include up to \$75,000 in grant funds and 50/50 cost sharing for strategic projects.

CAMT is a statewide manufacturing assistance center dedicated to increasing the competitiveness of Colorado manufacturers. The center's manufacturing experts and industry resource network provide expertise in results-driven methodologies, best practices, and innovative technologies designed to increase profitability. As a public/private partnership, industry resources are brought together to offer comprehensive programs and services, including company assessments, customized training and workshops, and hands-on facilitation and implementation.

Academic Centers

In addition to the Business Research Division, the school has five centers linking academic programs and the business community—the endowed Robert H. and Beverly A. Deming Center for Entrepreneurship, the Center for Real Estate, the Burrige Center for Securities and Valuation, the Center for Education on Social Responsibility (CESR), and the Center for Business Integration.

The Robert H. and Beverly A. Deming Center for Entrepreneurship

As part of the Leeds School of Business, the Deming Center for Entrepreneurship prepares graduates to embrace key global challenges by equipping them to think like entrepreneurs, act as social innovators and deliver as successful business leaders.

Cutting-edge Curriculum. Our progressive curriculum and interdisciplinary programs include:

- courses in entrepreneurial finance, marketing, and business planning
- interdisciplinary programs in engineering, business, law, and environmental studies
- undergraduate Certificate of Excellence in Entrepreneurial Studies
- MBA concentration in entrepreneurship

The Deming Center supports the entrepreneurial curriculum and advances the Leeds School's leadership agenda through our collaborative initiatives across campus and in the business community in three key areas:

- **Creativity.** The mark of an entrepreneur is the innovation, the creativity, the game-changing nature of his or her work—whether it manifests inside an existing organization or in a newly created one. Our entrepreneurship students are challenged to turn accepted thinking on its head—in the classroom, in real-world industry projects, and by the business innovators who serve as student mentors and advisors. The center helps connect students with projects, advisors, and internships that challenge them to use their new skills creatively.
- **Sustainability.** One of the leading areas for innovation and entrepreneurial opportunity is in the emerging field of sustainable business products and practices. The center helps students connect in key industry sectors such as cleantech, bioscience, and organics that are well-represented in the region and serve national and international markets.
- **Access.** Boulder is consistently named one of the best places in the country to launch a startup. The center connects students to industry leaders via the Deming Network—an active group of world-class entrepreneurs and innovators who are accessible and hands-on. CU-Boulder is also a top research university. Across campus, the Deming Center helps students access opportunities in technology transfer and the engineering, law, biofrontiers, and environmental science programs.

Innovation, sustainability, and a high degree of access to relevant businesses are all integral aspects of 21st century entrepreneurship education. The Deming Center helps students apply their classroom learning to design creative solutions for cutting-edge businesses.

Real Estate Center

The Real Estate Center, founded in 1995, is supported by an industry council with the goal of advancing academic excellence in real estate education and scholarship. The center oversees the school's real estate teaching programs and advises the faculty in designing an integrated curriculum at both the graduate and undergraduate levels. Course work is drawn from the law school, the colleges of architecture and engineering, construction management, and others.

The center creates real-world experiences for students by providing project course work and being a resource for securing internships, mentors, and jobs. It also provides support for faculty teaching and research activities in real estate and, through the Real Estate Foundation, assists the university with its real estate portfolio.

Burrige Center for Securities Analysis and Valuation

The Burrige Center for Securities Analysis and Valuation is dedicated to encouraging and supporting the creation and dissemination of new knowledge about the world financial markets with an emphasis on the U.S. financial markets by:

- facilitating the exchange of ideas and knowledge between professional investment managers, finance scholars, policy makers, and the investing public;
- identifying critical research issues in the theory and practice of security analysis and valuation; and

- encouraging and supporting rigorous qualitative and quantitative research on topics relevant and useful to money managers, valuation experts, and finance academics.

Center for Education on Social Responsibility (CESR)

Ethics are discovered, not taught. Even routine decisions can have tremendous and often unseen potential to do harm or good—to colleagues, society, even the whole planet. Often, the most consequential decisions and actions seem routine at the time they're made—just another day at the office.

That's why CESR has redefined ethics and social responsibility education. They make it personal. They don't simply offer a class to teach rules handed down from philosophers or case studies about CEOs who lost their way.

CESR delivers an ongoing values development and self-discovery experience. It's infused in all subject areas. It's internalized by students through an ongoing process of action learning and unconventional classroom techniques. This applied approach is built into core curricula throughout the business school, highly unusual in academia.

Self-discovered values are more resilient than those that come from books. Once students discover their values, CESR illustrates how to protect and apply them. That requires critical thinking, every day. It requires constantly asking the right questions—stepping out of routine actions to anticipate consequences for colleagues, customers, organizations and society, and to create opportunities to do good.

Asking those questions is a constantly engaged risk management skill that's highly valuable to business. Equally important, it's a constantly-engaged mechanism for setting sights higher than compliance. And that often spurs creativity and innovation that creates social value as well as competitive advantage and financial returns for business.

CESR's goal is to help students become outstanding business leaders of tomorrow by preparing them to meet the ethical challenges posed by a highly competitive, globally-connected business world. Accordingly, CESR oversees the infusion of values and social responsibility discussions throughout the undergraduate and graduate curricula at the Leeds School of Business. As part of the central mission at Leeds, CESR creates pedagogies that are national models and plays a leadership role carrying out the school's commitment to developing leaders of conscience. Although CESR's primary focus is on excellence in curriculum development and delivery, the center also undertakes a broad spectrum of initiatives including a certificate program, student organizations, conferences, and other extracurricular offerings. CESR also provides funding and support for faculty research.

Courses. CESR is directly responsible for course development, staffing, and coordination of the required courses: Introduction to Business (freshman level) and Business Applications of Social Responsibility (junior level). CESR offers leading edge electives such as CESR 4000 Leadership Challenges: Exercises in Moral Courage, CESR 4005 Business Solutions for the Developing World: Learning through Service and CESR/ACCT 4827 Integrated Reporting for Socially Responsible Strategies.

Certificate and Portfolio. Undergraduates wishing to focus on CESR-related topics may earn the Certificate in Socially Responsible Enterprise (SRE). At the MBA level, CESR is responsible for the required Socially Responsible Enterprise course, and electives such as MBAX 6845 Social Entrepreneurship in Emerging Markets and MBAX 6825 Topics in Sustainable Business, two of the four options for MBAs to acquire the sustainability portfolio.

CESR Co-Curricular Activities:

- **CESR Stampede at Leeds: A Week of Driving Values in Business.** This weeklong event showcases the values-driven and innovative curriculum developed by the CESR that is shaping tomorrow's business leaders. Through class visits, expert panels and lectures, student competitions and showcases, attendees will explore their own values and network with like-minded professionals about applying positive values in a business setting. Stampede Week also includes the fourth annual Conscious Capitalism Conference, a CESR flagship event.
- **Conscious Capitalism Conference.** An annual conference hosted by CESR featuring innovative executives and entrepreneurs who have used the traditional tools of capitalism to serve social needs.
- **Student Center for Social Entrepreneurship (SCSE).** CESR provides faculty sponsorship for SCSE, the student branch of Social Entrepreneurship for Equitable Development (SEED@CU), an interdisciplinary, inter-generational campus group that is involved in researching, teaching, and generating student involvement in the areas of social entrepreneurship and sustainable community development.
- **Net Impact Club.** CESR is home to a graduate chapter of Net Impact, an international non-profit organization whose mission is to use the power of business to create a more socially and environmentally sustainable world.
- **New Venture Challenge Social Impact Track.** CESR developed and is home to the social impact track of the **CU New Venture Challenge**, a campus-wide initiative connecting students and faculty with teammates in a broad range of disciplines and with mentors from the business community. The goal is to provide knowledge and experience making entrepreneurship accessible to anyone on the CU-Boulder campus with the enthusiasm and creativity required to start a new business.

Career Opportunities

Leeds School of Business graduates are prepared for positions in the following fields:

- Accounting—public, private, nonprofit, and governmental
- Banking and other financial institutions
- Consulting
- Corporate financial management
- Entrepreneurship and small business management
- Financial analysis
- Human resources management
- Information systems
- International business
- Investment management
- Management consulting and organization management
- Marketing and sales management
- Nonprofit management
- Operations management
- Real estate
- Retailing
- Taxation
- Technology management
- Transportation
- Venture capital

Other graduates hold positions in fields as diverse as business journalism, public relations, city planning, chamber of commerce and trade association management, college administration, and government. The entrepreneurial area of application prepares students to start their own business ventures to take positions in emerging growth companies and the venture capital industry.

Professional Mentorship Program

The Professional Mentorship Program (PMP) is a unique program that offers one-on-one professional mentoring to current undergraduate students. The program's mission is to enhance business education at the Leeds School by offering hands-on learning, professional skills development, leadership opportunities, and a sense of connection and community among current students, Leeds alumni, and corporate partners. PMP mentors prepare and inspire our students to become the next generation of strong business leaders.

This two-year program matches students with executives or high-level business professionals who align by industry, geographic location, or functional area. To ensure a quality experience for both students and mentors, the PMP provides workshops, training, and additional support for participants throughout the program.

Program Benefits

Through this program, students gain an additional level of advising and career counseling from a business professional. Through the mentoring relationships, students can explore choice of majors, potential for graduate school, work-life balance, and effective networking and job search strategies.

Other potential benefits of being involved in the PMP include:

- Advice and assistance on academic questions, career options, life beyond college, and more
- Access to the PMP network and networking opportunities and the opportunity to start building the student's own professional network
- Opportunities to practice and strengthen professional communication and presentation skills
- Help in defining personal and professional goals, and the strategies to achieve them
- Unique internship and job opportunities
- Development of a life-long friend and connection in the business world

Study Abroad

Study abroad programs are available for students interested in international business or in cultural experiences abroad. The college-sponsored London Seminar in International Finance and Business is a five-week-long program held each summer in the financial district of London and is open to juniors, seniors, and graduate students.

Student Organizations

Listed below are undergraduate organizations that promote professional interests and provide recognition of scholastic attainment:

- Alpha Kappa Psi
- ABC—Athletic Business Club
- Association for Information Systems
- Beta Alpha Psi

- Business and Film Club
- Business of Sports
- Collegiate DECA
- Collegiate Entrepreneurs Organization
- Collegiate Social Impact Initiatives
- CU Energy Club
- CU Finance Club
- CU American Marketing Association
- CU Investment Club
- CU Society for Human Resources Management
- Delta Sigma Pi
- Fashionistas, Inc.
- GLBT Business Leaders Alliance
- Graduate Finance Club
- International Business Club
- Leeds Ambassadors
- Leeds Association of Info Systems
- Leeds Council (Undergraduate Student Government)
- Multicultural Business Student Alliance
- MBA National Association of Women
- Net Impact
- Real Estate Club
- Graduate Real Estate
- Peer-2-Peer Mentors

Leeds School of Business Student Government

Leeds Council is the governing body of the Leeds School of Business that strives to serve, support, and represent the student body. The council also works to make Leeds a better business

school through social, academic, and professional programming. The council is made up of five primary committees and an executive board that control a significant portion of the Leeds student fees.

Two members of Leeds Council also serve as representatives on University of Colorado Student Government (CUSG) to voice the interests of business students at the main campus.

Graduation Recognition Ceremony

Every December and May, the Office of the Dean and the Leeds Business Student Government sponsor a recognition ceremony honoring the graduating class, in addition to the university-wide commencement. Graduates and their families are invited to attend.

Undergraduate Academic Excellence

Honors

In recognition of high scholastic achievement, upon recommendation of the faculty, the designation "With High Distinction" or "With Distinction" will be awarded at graduation. To qualify for the "With High Distinction" designation, the student's cumulative University of Colorado GPA must be at least 3.90. For the "With Distinction" designation, the student's cumulative GPA must be at least 3.75 but less than 3.90. In addition, for these designations, at least 60 semester hours must have been earned at CU-Boulder.

In addition to the distinction of honors, Leeds School of Business students also may participate in the Latin honors granted by the College of Arts and Sciences. Qualified students are encouraged to participate in this program, which coordinates the offering of a variety of honors seminars as well as the granting of Latin honors (cum laude, magna cum laude, summa cum laude) at graduation. Granting of these honors is determined by the Honors Council based on several criteria, including the quality of original scholarly work (generally reported in the form of a thesis). Latin honors are not conferred on a graduate entering in the summer of 1995 and thereafter simply by virtue of high grades. Interested students should consult the Honors Program listing in the College of Arts and Sciences section or contact the Honors Program in Norlin Library.

Dean's List

Students in the Leeds School of Business who have completed at least 12 semester hours of CU-Boulder course work for a letter grade in any single semester with a term GPA of 3.600 or better are included on the dean's list and receive a notation on their transcript.

Beta Gamma Sigma

Membership in Beta Gamma Sigma is an honor that must be earned through outstanding scholastic achievement. Such membership is the highest scholastic honor that a student in a school of business or management can attain.

To be eligible for Beta Gamma Sigma membership, students must rank in the top ten percent of their junior class, the top 10 percent of their senior class, or be among the top 20 percent of those students receiving master's degrees. Also, students completing all requirements for the doctoral degree conferred by a business school are eligible for Beta Gamma Sigma. It should be noted that Beta Gamma Sigma chapters may be chartered only in those schools of business and management accredited by AACSB, the International Association for Management Education.

Scholarships

Each year the college awards a number of divisional and general scholarships. Business scholarships are for students who have completed business course work at the university. The amount and number of the awards vary each year.

Faculty: Business

| Name | Title | Education |
|----------------------|---|---|
| APPENZELLER, William | assistant professor of recreation emeritus | |
| BAAS, Roy | senior instructor of finance | BS, University of New Orleans |
| BALKIN, David B. | professor of management and entrepreneurship | BA, University of California, Los Angeles; MA, PhD, University of Minnesota |
| BALLANTINE, John Jay | senior instructor of business law | BS, Purdue University; MBA, Indiana University; JD, University of Colorado |
| BANGS, F. Kendrick | professor of business and administration emeritus | |
| BEAGLE, Chauncey M. | associate professor of accounting emeritus | |
| BERNTHAL, Wilmar F. | professor of management and organization emeritus | |
| BHAGAT, Sanjai | professor of finance | BTech, Indian Institute of Technology; MBA, University of Rochester; PhD, University of Washington |
| BORUM, Owen | instructor, CESR | BS, University of Florida; JD, University of Colorado |
| BOSS, R. Wayne | professor of management and entrepreneurship | BS, MPA, Brigham Young University; PhD, University of Georgia |
| BROWN, Daniel | senior instructor of finance | BA, Cornell University; DPhil, Oxford University |
| BUCHMAN, Thomas A. | associate professor of accounting | BS, MS, PhD, University of Illinois |
| CACCIA, Roberto | senior instructor of finance | Laurea, University of Rome; MBA, Massachusetts Institute of Technology; PhD, University of Rome |
| CAMPBELL, Meg | professor of marketing | AB, PhD, Stanford University |
| CATEORA, Phillip R. | professor of marketing emeritus | |
| CHEN, Hui | assistant professor of accounting | BA, MA, Northeast Normal University, China; MBA, Stuttgart Institute of Management and Technology; PhD, University of Tennessee |
| CHEN, Zeyun (Jeff) | assistant professor of accounting | BBA, Fudan University; MBA, University of Louisiana; PhD, University of Houston |
| CHRISTOFF, Lorna | instructor, CESR | BS, University of Colorado; JD, University of Denver |
| CORRELL, Mark R. | senior instructor of business economics emeritus | |
| CROPANZANO, | professor of management and entrepreneurship | BA, Louisiana State University; MA, Southern Methodist University; PhD, Purdue University |

| | | |

School of Education

Lorrie A. Shepard, dean
 249 UCB • phone: 303-492-6937 •
 fax: 303-492-7090
School website:
www.colorado.edu/education

THE SCHOOL OF EDUCATION offers programs that prepare individuals to lead in a wide array of educational settings, including teaching in K-12 classrooms, conducting educational research, developing evidence-based policy, and designing innovative learning environments both in schools and in community-based settings.

The school provides teacher licensure programs that ensure rigorous content preparation and extensive clinical experience in local partner schools. Teacher licensure programs are available at the undergraduate, post-baccalaureate, and master's level. The School of Education collaborates with the College of Arts & Sciences to design degree programs for undergraduates that combine a major in Arts & Sciences with courses and field experiences in education that lead to a Colorado initial license. The school also offers an undergraduate minor in education for those interested in educational issues, serving in the Peace Corps, and/or working in community-based settings.

Graduate programs in the school serve practicing teachers as well as those seeking to improve education through rigorous research and evidence-based policy and practice. The school's doctoral program is a cohort-based, full-time program that prepares individuals to lead in universities, research or policy institutes, state or government agencies, and innovative non-profit organizations.

Mission

The School of Education is dedicated to inspiring and preparing educators, researchers, and policy makers who understand and further the democratic foundations of education, who are committed to social justice, who seek to bring about greater equity and access in education, and who will draw upon evidence-based policy and practice to improve the quality of education in both Colorado and the world.

Accreditation

The licensure programs, both undergraduate and graduate, are fully accredited by the North Central Association of Colleges and Schools, the National Council for Accreditation of Teacher Education, the Colorado Department of Education, and the Colorado Commission on Higher Education.

Academic Excellence

Scholarships and Awards

A limited number of scholarships and awards are available for second- and third-year candidates within the School of Education to support study at the master's and undergraduate levels. Each year a combination of teaching assistantships (TAs), research assistantships (RAs), other forms of graduate assistantships (GAs), and fellowships are available in the School of Education to support full-time doctoral study. The strongest doctoral applicants are nominated by the school for fellowships awarded by the Graduate School. Candidates apply in the spring semester for scholarships and awards for the following school year. Application procedures and deadlines are publicized on the School of Education website.

Students are eligible to apply for university-wide financial assistance through the Office of Financial Aid. State and federal programs are available for loan cancellation or forgiveness for Colorado teachers of certain subjects or who teach in designated schools serving students from low-income families. Information about these opportunities may be found at www.colorado.edu/education.

Programs of Study

Teacher Licensure Programs

The School of Education offers course work leading to initial Colorado licensure to undergraduate, postbaccalaureate, and master's degree students in the fields of elementary through secondary education.

Course code for this program is EDUC.

Education as a Minor Field

MA programs outside of the School of Education can include education as a minor if both their major department and the associate dean for graduate studies in the School of Education approve.

Course code for this program is EDUC.

Graduate Degree Programs

The School of Education offers the following degrees for graduate study:

- Curriculum and Instruction (MA, PhD)
- Educational-Psychological Studies (MA, PhD)
- Research and Evaluation Methodology (PhD)
- Social and Multicultural Bilingual Foundations (MA, PhD)

Course code for this program is EDUC.

College of Engineering & Applied Science

Robert H. Davis, dean

422 UCB • phone: 303-492-

5071 • fax: 303-492-2199

college website:

www.colorado.edu/engineering

THE COLLEGE OF ENGINEERING AND APPLIED SCIENCE offers the bachelor of science degree in aerospace engineering sciences, architectural engineering, chemical engineering, chemical and biological

engineering, civil engineering, electrical engineering, electrical and computer engineering, environmental engineering, mechanical engineering, computer science, applied mathematics, and engineering physics. The first nine of the programs are accredited by the Engineering Accreditation Commission of ABET (see www.abet.org). The tenth is accredited by the Computing Accreditation Commission of ABET. The two remaining programs are applied sciences; accreditation by ABET is not usually sought in these areas. The CU-Boulder campus is accredited by the Higher Learning Commission of the North Central Association of Colleges and Schools. Degrees in applied mathematics and engineering physics are offered in cooperation with the Departments of Applied Mathematics and Physics in the College of Arts and Sciences.

Mission

The mission of the College of Engineering and Applied Science is to generate new knowledge in engineering and related fields and to equip students from diverse backgrounds as future leaders and responsible citizens in these fields for the betterment of individuals and society. Its vision is to be a world leader in engineering research and education, with an emphasis on *integrated and discovery learning* and on *engineering for global society*.

The college embraces the following core values:

- Innovative research, creating knowledge to improve the global society
- Integrated learning, where students learn through team-based projects and other hands-on experiences integrated with traditional theory-based curricula
- Discovery, professional, and service learning, where students learn by undertaking research, internships, international experiences, and campus or community projects
- Inclusive excellence of diverse faculty, staff, and students, with high ethical standards of integrity, responsibility, honesty, and respect for others from differing backgrounds

The college seeks the following outcomes in their graduates:

- Technical excellence and knowledge in modern engineering, mathematics, and science
- Ability to communicate effectively with diverse peoples and other cultures
- Ability to think critically, analyze data, and formulate and solve complex problems
- Ability to contribute effectively as individuals and in multidisciplinary teams
- Knowledge of contemporary issues and preparation for societal leadership and world citizenship
- Desire and skills for lifelong learning and personal and professional development
- Passion for serving others and commitment to sustainability

Additional information about the academic programs, services, and faculty of the College of Engineering and Applied Science is found at www.colorado.edu/engineering.

Graduate School

John Stevenson, dean

26 UCB • phone: 303-492-

7401 • fax: 303-492-5777

school website:

www.colorado.edu/graduateschool

GRADUATE WORK at the University of Colorado began on a small scale in 1892. Following years of development, the Graduate School was organized in 1909 with a separate faculty. Each of the three campuses of the University of Colorado system now offers graduate degree programs, and a dean is in residence on each campus. The Graduate School at CU-Boulder is governed by its own set of [Graduate School Rules](#).

Currently overseeing 100 graduate and professional programs, the Graduate School works to guarantee a standard of quality and cohesion across all disciplines, ensuring the continuing integrity and value of a CU-Boulder graduate degree. The Graduate School also helps make possible the many connections between the campus and outside constituencies, in the state, the nation, and the world.

[Privacy](#) • [Legal & Trademarks](#)

Funding for Graduate School

CU-Boulder administers various forms of financial assistance for graduate students: fellowships, traineeships, scholarships, research and teaching assistantships, and awards from outside agencies.

Financial Aid for Graduate Study

The University of Colorado offers several types of financial assistance for graduate students who demonstrate financial need. Students apply for assistance by submitting a financial aid application (the FAFSA) as soon as possible after January 1.

Colorado residents may be eligible for the Colorado Graduate Grant program and the Graduate Fee Grant program. Both are automatically considered with the FAFSA application.

Graduate students may apply for long-term loans through the Stafford Loan (formerly GSL) program or the Perkins Loan program (formerly the National Direct Student Loan) and for part-time jobs through the college work-study program.

Graduate Part-Time Instructors and Teaching Assistants

Many departments employ graduate students as graduate part-time instructors (GPTIs) or as teaching assistants (TAs). GPTIs must possess a master's degree or the equivalent and have demonstrated competence in classroom teaching. Teaching assistants are not required to have previous teaching experience. In order to be eligible to be a GPTI or a TA, one must be a fully enrolled graduate student, with a cumulative GPA of at least 3.00. Compensation is based on the percentage of time worked, and includes a tuition waiver and partial insurance benefit.

Research Assistants

In many departments, research activities provide opportunities for graduate students to work part time as research assistants. All research assistants must maintain a cumulative GPA of at least 3.00 and be full-time regularly enrolled graduate students. Compensation is based on percentage of time worked and includes a tuition waiver and partial insurance benefit.

Scholarships and Fellowships

The Chancellor's Graduate Fellowship Program, instituted in 1984–85, attracts outstanding students for graduate study at the University of Colorado. Selected students receive a stipend of \$25,000 for two academic years and a full waiver of all tuition, fees, and insurance. Recipients must be entering master's or doctoral degree students and be nominated by their department.

Additional fellowships are available from private sources. Fellowships, traineeships, and scholarships are also offered by some departments.

Information on other funding opportunities is available on the Graduate School website at www.colorado.edu/graduateschool/funding.

Research Institutes and Centers

Some important graduate study at CU-Boulder is done through, or in partnership with, research institutes and centers.

Research Institutes

Over more than 50 years, CU-Boulder has developed a tradition of interdisciplinary collaboration throughout the university community and beyond. At the heart of this tradition is a system of world-class research institutes that create a dynamic environment for discovery and learning.

Since the first institutes emerged a half-century ago, research teams of faculty, students, and external partners have tackled complex questions from multiple perspectives, leading to important advances in human knowledge. These learning enterprises offer common ground for scholars and students to collaborate on issues that confront the world—in such areas as climate; energy resources; atmosphere; outer space; human behavior; solar energy; the human mind; and atomic, molecular and optics studies.

CU-Boulder's 11 research institutes account for more than half of all sponsored research dollars at the university, and they employ some of the most productive researchers in the country. With more than 900 researchers and supporting staff, the institutes make a major contribution to the university's research and education missions as well as the local and area economy. Numerous graduate students are employed by the institutes, which contribute to the quality of graduate education at CU-Boulder.

- [The Alliance for Technology, Learning, and Society \(ATLAS\)](#)
- [The BioFrontiers Institute](#)
- [The Cooperative Institute for Research in Environmental Sciences \(CIRES\)](#)
- [The Institute of Arctic and Alpine Research \(INSTAAR\)](#)
- [The Institute for Behavioral Genetics \(IBG\)](#)
- [The Institute of Behavioral Science \(IBS\)](#)
- [The Institute of Cognitive Science \(ICS\)](#)
- [JILA \(formerly the Joint Institute for Laboratory Astrophysics\)](#)
- [The Laboratory for Atmospheric and Space Physics \(LASP\)](#)
- [The Renewable and Sustainable Energy Institute \(RASEI\)](#)
- [University of Colorado Museum of Natural History](#)

Research Centers

In addition to the large research institutes, there are nearly 90 [research centers](#) housed within academic departments or as subsets of the research institutes themselves. They can be found in all fields of the university, including humanities and the arts, social sciences, natural sciences, engineering, business, and law.

The centers cover a broad range of topics, from multicultural education and astrophysics to glaciology and prevention of violence. They grant fellowships, sponsor internships, house archives for research, conduct competitions with cash awards, host public debates and programs, and support graduate study in many other ways.

Requirements for Advanced Degrees

A graduate student is responsible for becoming informed about and observing all regulations and procedures required by the graduate program pursued. Ignorance of a rule does not constitute a basis for waiving that rule. Any exceptions to the policies stated in this catalog must be approved by the dean of the Graduate School.

Additionally, all research must comply with campus and federal research regulations. See the research administration website at www.colorado.edu/VCRsearch/integrity.

Graduate Faculty Appointments for Courses and Exams

All courses, 5000-level or above, completed to fulfill graduate degree requirements must be taught by members of the graduate faculty. In addition, any faculty member serving on a master's or doctoral examination/defense committee must hold a current graduate faculty appointment. Membership on the university faculty does not automatically constitute an appointment to the graduate faculty. Contact your departmental graduate program assistant for questions concerning these appointments.

Master's Degrees

A student enrolled in a master's program must satisfy the degree requirements of both the Graduate School and the major department. The requirements listed below are the minimum standards of the Graduate School; additional requirements are set forth by the major department.

Minimum Requirements

The minimum requirement for the master's degree is 30 credit hours. A student may complete a Plan I (thesis) option, or a Plan II (course work) option. At least 24 hours must be completed at the 5000 level or above; these 24 hours must include a minimum of 4, but not more than 6, thesis hours for those students completing a Plan I degree. A maximum of 6 credit hours may be completed at the 3000 or 4000 level at the discretion of the academic department.

Independent study course work cannot exceed 25 percent of the course work required for the master's degree.

Master's Thesis

A thesis, which may be research or expository, critical, or creative work, is required of every master's degree candidate under Plan I. Every thesis presented in partial fulfillment of the requirements for an advanced degree must accomplish the following:

- represent the equivalent of 4–6 semester hours of work, and
- comply in mechanical features with the specifications for theses and dissertations available in the Graduate School.

The final grade is withheld until the thesis is completed; if the thesis is not finished at the end of the term in which the student is registered, an in-progress (*IP*) grade is reported.

Language Requirement

There is no campuswide foreign language requirement for the master's degree. The decision regarding the foreign language requirement for each graduate degree is the responsibility of the graduate program.

Time Limit

Master's degree students have four years (six years for students pursuing an ME) from the semester in which they are admitted and begin course work to complete all degree requirements. The phrase "all degree requirements" includes the filing of the thesis with the Graduate School if Plan I is followed. Students who fail to complete the degree in this four-year period may be dismissed from their program with the concurrence of the major advisor and/or appropriate departmental personnel. To continue, the student must file a petition for an extension of the time limit with the dean of the Graduate School. Such petitions must be endorsed by the student's major advisor and/or other appropriate departmental personnel and may be granted for up to one year.

Students who have not completed the degree within their time limit, and who have received approval for an extension, must have any course work completed more than five years prior to the

completion of the degree requirements evaluated by their department for relevance and applicability. At the discretion of the department the student may be required to validate these courses as part of the completion of their degree requirements.

Students who need to leave CU-Boulder for a period of time may apply to the Time Off Program for up to one year. Participation in the Time Off Program does not extend the student's time limit, but may be used as a reason to request an extension.

Students whose registration at CU-Boulder is interrupted by military service may apply to the dean of the Graduate School for an extension.

Minimum Registration Requirement

Master's degree minimum registration requirements can be met only by full-time registration at CU-Boulder for at least two semesters, at least three summer sessions, or a combination of at least one semester and two summer sessions/part-time semesters.

For purposes of deciding minimum registration credit toward a graduate degree, a student must be registered as a full-time student. One semester of minimum registration credit may be earned for full-time registration during the fall or spring semesters or two summer semesters/part-time semesters.

To be a full-time master's student, a student must carry one of the following course loads: a minimum of 5 credits of graduate course work, 8 credits of combined undergraduate and graduate course work, 12 hours of undergraduate course work, at least 1 master's thesis hour, or at least 1 hour of "Master's Candidate for Degree." Full- and half-time standards may be different for students receiving federal or state financial aid. Students should contact the Office of Financial Aid to see if these standards apply. These different standards are for financial aid purposes only.

Candidacy and Graduation

To be granted a master's degree, a student must become a candidate for that degree by filing an Application for Admission to Candidacy with the Graduate School no later than the posted graduation deadlines during the semester in which he or she plans to have the degree conferred. Students must meet all posted graduation deadlines in order to receive a degree in any given semester.

Comprehensive-Final Examination

Each candidate for a master's degree is required to take a comprehensive-final examination/thesis defense after the requirements for the degree have been substantially completed or to present an approved degree plan which meets the requirements of the field and represents an intellectually coherent graduate education as determined by the major department. The examination/defense may be given near the end of the student's last semester while the candidate is still taking required courses for the degree, provided satisfactory progress is being made in those courses. The approved degree plan must be approved by the department chair, graduate director, and major advisor on the Degree Plan Approval Form. The Degree Plan Approval option is available only in select departments.

The following rules apply to the comprehensive-final examination:

1. A student must be registered on the Boulder campus as a regular degree-seeking student during the semester the examination is passed.
2. Notice of the examination/defense must be filed by the major department in the Graduate School at least two weeks prior to the examination/defense. The examination/defense must be scheduled no later than the posted deadline for the semester in which the degree is to be conferred.
3. The exam is given by a committee of three graduate faculty members appointed by the department with approval of the dean of the Graduate School. The chair of the committee must have a regular or tenured graduate faculty appointment.
4. The examination, which may be oral, written, or both, must cover the thesis (which should be essentially complete), other work completed in courses and seminars in the major field, and all work presented for the degree.
5. A student must have an affirmative vote from the majority of the committee members to pass. A student who fails the comprehensive-final examination may attempt it once more after a period of time determined by the examining committee.

Doctor of Philosophy, Doctor of Musical Arts, and Doctor of Audiology

The doctor of philosophy (PhD), the doctor of musical arts (DMusA), and the doctor of audiology (AuD) are the highest academic degrees conferred by CU-Boulder. The requirements stated below are minimal requirements for all candidates for the PhD degree; additional conditions are found in department announcements. Additional requirements for the doctor of musical arts are available from the College of Music. Additional requirements for the doctor of audiology are available from the Department of Speech, Language, and Hearing Sciences.

Admission

A student admitted to the Graduate School for the master's program must reapply for admission for the doctoral program.

Minimum Course Requirement

The minimum requirements for the PhD or DMusA degree are 30 credit hours of course work at the 5000 level or above. Those students pursuing the PhD shall complete a minimum of 30 credit hours of dissertation work beyond the minimum course work requirement. The minimum transfer requirements for the AuD degree are 97 credit hours of course work at the 5000 level or above.

Unless otherwise specified by departmental requirements, all courses taken at the 5000 level or above that were taken for the master's degree at CU-Boulder may be applied toward the PhD degree. Course work taken in pursuit of a doctoral degree cannot be applied toward a subsequent master's degree.

Dissertation Credit-Hour Requirement

To complete the requirements for the PhD degree, a student must register for a minimum of 30 dissertation credit hours. Distribution of those hours is as follows:

1. A student may not register for more than 10 dissertation credit hours in any one semester.
2. Not more than 10 dissertation credit hours taken in semesters prior to the semester in which the comprehensive examination is passed may be counted in the 30 dissertation hours required for the degree.
3. Not more than 10 dissertation hours of credit taken the semester in which the comprehensive examination is passed may be included in the 30 dissertation credit hours required for the degree.

Minimum Registration Requirement

The minimum registration requirement for doctoral students is six semesters beyond the attainment of an acceptable bachelor's degree. Two semesters of minimum registration credit may be allowed for a master's degree from an accredited institution; however, at least four semesters of minimum registration credit, two of which must be consecutive in one academic year, must be earned for work taken at CU-Boulder.

For purposes of deciding minimum registration credit toward a graduate degree, a student must be registered as a full-time student. One semester of minimum registration credit may be earned for full-time registration during the fall or spring semester or during two summer semesters. Doctoral students who have not passed the comprehensive examination are considered full time during the spring and fall semesters if they are enrolled for at least 5 credit hours of course work at the graduate level, 8 credit hours of combined undergraduate and graduate hours, 12 credit hours of course work at the undergraduate level, or at least 1 doctoral dissertation hour. DMA students who have not passed their comprehensive exam may also be considered full time if they are taking 1 hour of course work numbered 8200–8399 or TMUS 8019. Doctoral students who have passed the comprehensive examination must register for at least 5 doctoral dissertation hours to be considered full-time students. DMA students who have passed their comprehensive examination must register for 1 hour of course work numbered 8200–8399 or TMUS 8029 to be considered full time. Doctor of audiology students are considered full-time students if they are enrolled for at least 5 credit hours of course work at the graduate level, 8 hours of course work of combined undergraduate and graduate hours, or 12 credit hours of course work at the undergraduate level. Full- and half-time standards may be different for students receiving federal or state financial aid. Students should contact the Office of Financial Aid to see if these standards apply. These different standards are for financial aid purposes only.

Preliminary Examination

Each department determines for itself (by examination or other means) that students who wish to study for the doctoral degree are qualified. The means by which each department makes this evaluation are specified in departmental requirements. Students who are thus evaluated are notified immediately of the results.

Language Requirement

There is no campuswide foreign language requirement for the doctoral degree. The decision regarding the foreign language requirement for each graduate degree is the responsibility of the graduate program.

Comprehensive Examination

Before admission to candidacy for the doctoral degree, students must pass a comprehensive examination in the field of concentration and related fields.

The following rules apply to the doctoral comprehensive examination.

1. Students must be registered (pass/fail or credit) on the Boulder campus as regular degree-seeking students when they pass the comprehensive examination.
2. Notice of the examination must be filed by the major department with the Graduate School at least two weeks before the examination.
3. The examination is conducted by an examining board appointed by the chair of the major department and approved by the dean of the Graduate School. The board consists of the major advisor and additional members as necessary to a minimum of five. The chair must have a regular or tenured graduate faculty appointment. Successful candidates must receive affirmative votes from a majority of the members of their examination board. A candidate who fails the examination may attempt it once more after a period of time determined by the examination board.

4. The examination, which may be oral, written, or both, tests mastery of a broad field of knowledge, not merely formal course work. The oral part is open to members of the graduate faculty.

Admission to Candidacy

A student must formally apply for admission to candidacy for the doctoral degree on forms supplied by the Graduate School at least two weeks before attempting the comprehensive examination. Before being admitted to candidacy a student must earn at least three semesters toward the minimum registration requirement, and pass the comprehensive examination.

Continuous Registration Requirement

A PhD student is required to register continuously for a minimum of 5 dissertation hours in the fall and spring semesters of each year, beginning with the semester following the passing of the comprehensive examination and extending through the semester in which the dissertation is successfully defended (final examination). DMusA students must maintain continuous registration for at least 1 credit of course work numbered 8200–8399 (or TMUS 8029). AuD students must maintain continuous registration for appropriate course work in the fall and spring semesters of each year through the semester in which the final exam is passed.

1. A student not required to maintain full-time status and not using campus facilities may claim off-campus status, which allows registration for 3 rather than the minimum of 5 dissertation credit hours. Off-campus status (3 credits of dissertation hours) is considered part-time. All CU-Boulder considerations for part-time status apply.
2. A student who fails to register continuously for dissertation credit hours after passing the comprehensive examination must retake and pass the comprehensive examination in order to regain status as a student in good standing in the Graduate School. The department may require that the student validate course work more than five years old. At its discretion, the department may petition the dean of the Graduate School for a time limit for completion of all degree requirements of up to one year after the retaking of the comprehensive exam. The department must petition the dean of the Graduate School to waive the requirement to retake the comprehensive exam.
3. A PhD student must be registered full time for a minimum of 5 dissertation hours during the semester (including summer session) in which the dissertation defense is passed. DMusA students must be registered full time in course work numbered 8200–8399 (or TMUS 8029) during the semester in which the dissertation defense is passed. AuD students must be registered full time for 5 hours of graduate level course work or 8 hours of combined undergraduate and graduate hours during the semester in which the final exam is passed.

Dissertation Requirements

A PhD student must write a dissertation based upon original investigation, showing mature scholarship and critical judgment, as well as familiarity with tools and methods of research. The subject must be approved by the student's major department.

1. Every dissertation presented in partial fulfillment of the requirements for an advanced degree must represent the equivalent of at least 30 semester hours of work.
2. The student is responsible for notifying the Graduate School of the exact title of the dissertation on or before the posted deadlines during the semester in which the doctoral degree is to be conferred.
3. The dissertation must comply in mechanical features with the specifications for theses and dissertations available in the Graduate School.
4. After the dissertation defense, the student is responsible for submitting the dissertation and signature page on or before the posted deadline during the semester in which the doctoral degree is to be conferred.

The final grade is withheld until the dissertation is completed. In progress (*IP*) grades are assigned during each semester until the defense is successfully completed and the final copy of the dissertation is accepted by the examination committee, at which time the final grade for all dissertation hours is submitted to the Graduate School.

Dissertation Defense/Final Exam

After the dissertation has been accepted for defense by the student's committee, a final examination on the dissertation and related topics is conducted. For AuD students, a final examination is conducted in place of the dissertation defense.

The following rules apply to the dissertation defense.

1. A student must be registered as a full-time, regular degree-seeking student at CU-Boulder, for a minimum of 5 dissertation hours during the semester in which the final examination is passed. DMusA students must be registered full time in course work numbered 8200–8399 (or TMUS 8029) during the semester in which the dissertation defense is passed. Doctor of audiology students should be registered during the final exam for 5 credit hours of course work at the graduate level or 8 hours of combined undergraduate and graduate hours.
2. Students must notify the Graduate School of their final oral examination at least two weeks before their scheduled examination date.
3. This examination is wholly or partly oral, the oral part being open to anyone.
4. The examination is conducted by a committee appointed by the chair of the major department and approved by the dean of the Graduate School, which consists of at least five persons, one of whom must be from outside the student's major department. Three of the members must be CU-Boulder graduate faculty. The chair and outside member of the committee must

have regular or tenured graduate faculty appointments. The other committee members must have either regular or special graduate faculty appointments. The chair and a majority of the committee must be present on the Boulder campus for the examination. More than one dissenting vote disqualifies the candidate in the final examination.

5. A student who fails the examination may attempt it once more after a period of time determined by the examining committee.

Time Limit

Doctoral degree students are expected to complete all degree requirements within six years from the semester in which they are admitted and begin course work in the doctoral program. The phrase "all degree requirements" includes the filing of the dissertation and all accompanying forms with the Graduate School. Students who fail to complete the degree in this six-year period may be dismissed from their program with the concurrence of the major advisor and/or appropriate departmental personnel. To continue, the student must file a petition for an extension of the time limit with the dean of the Graduate School. Such petitions must be endorsed by the student's major advisor and/or other appropriate departmental personnel and may be granted for up to one year. If the dean of the Graduate School and the department chair/program director cannot agree on whether a student should continue, the Graduate School's executive advisory council makes the final decision.

Students who need to leave CU-Boulder for a period of time may apply to the Time Off Program for up to one year. Doctoral students who are required to maintain continuous registration may petition for an exception in order to participate in the Time Off Program for parental leave or other extenuating circumstances. Participation in the Time Off Program does not extend the student's time limit, but may be used as a reason if applying for an extension.

Students whose registration at CU-Boulder is interrupted by military service may apply to the dean of the Graduate School for an extension of time.

Graduation

Students must meet all posted graduation deadlines in order to receive a degree in any given semester.

Sequestration of Dissertations

Dissertations approved by the departments and the Graduate School are released to ProQuest/UMI and kept on file electronically at Norlin Library.

Occasionally, the primary academic advisor, after consultation with the student, may find it necessary to sequester the student's dissertation to protect university rights to intellectual property. The university accepts the obligation to protect potentially publishable creative works and potentially patentable subject matter from premature public disclosure so as to preserve entitlement to patent protection while the technology is being evaluated. This sequestration should take place only when it is absolutely required and only for the minimum time necessary.

With just cause, the student may request that an embargo be placed on the publication/sale of the thesis for a reasonable amount of time. This request is made upon the electronic submission of the document.

Journalism & Mass Communication

Christopher Braider, director
478 UCB • phone: 303-492-
5007 • fax: 303-492-0969
website: journalism.colorado.edu

THE JOURNALISM AND MASS COMMUNICATION PROGRAM (JMC) offers a next-generation media education that prepares its graduates to collaborate within the professional world, engage the public, and produce positive social change.

JMC uses innovative teaching technologies, empowering strategies for responsible democratic engagement, and an integrated curriculum to foster excellence among its students. Students are trained for successful careers in advertising, broadcast, print and online media, photojournalism, public relations, and media analysis.

By encouraging students to apply civic responsibility in their media work, the Journalism and Mass Communication Program seeks to empower audiences through honesty, integrity, and a commitment to social progress. Students learn the significance of their role as media professionals, gaining an appreciation of the profound interactions between mass communication and society in order to approach their work with respect, openness, and a broader cultural perspective. Included in a broad array of professional and conceptual courses are offerings in global media. A large percentage of the program's students study abroad.

JMC is also home to two internationally recognized centers: the Center for Media, Religion and Culture; and the Center for Environmental Journalism.

Academic Excellence

Director's List

Students in the Journalism and Mass Communication Program who have completed at least 12 credit hours of CU-Boulder course work for a letter grade in any single semester with a term grade point average of 3.75 or better are included on the directors' list and receive a notation on their transcript and a letter from the director.

Honors

Journalism and Mass Communication Program students may graduate with general honors and/or JMC honors. Students interested in general honors must consult the Honors Program office. JMC may award the bachelor's degree with honors to students who have a 3.50 cumulative GPA and a 3.50 GPA in journalism and mass communication courses, complete an honors project, and demonstrate a high degree of professional skill. Application for JMC honors must be made to the student's advisor the semester prior to the one in which the honors project would be done. Transfer students must complete at least 60 hours in residence. Complete information on honors requirements is available at the main office.

Students who achieve a 3.75 overall GPA on 60 or more CU-Boulder hours will graduate with distinction. Students whose academic records rank in the upper 10 percent are eligible for election to Kappa Tau Alpha in recognition of outstanding scholastic achievement.

School Awards and Scholarships

Alumni and friends of JMC have made it possible to provide more than three dozen annual scholarships and awards to officially admitted students in the Journalism and Mass Communication Program sequences. The deadline for application is February 20.

School of Law

Philip J. Weiser, dean
 401 UCB • phone: 303-492-8047 • fax: 303-492-1757
 school website:
www.colorado.edu/law

THE UNIVERSITY OF COLORADO LAW SCHOOL, established in 1892, has a long and proud history as a top public law school. The first students of color entered in 1898. The school became a charter member of the Association of American Law Schools organized in 1901. The first woman graduated in 1908. And, the school has been on the American Bar Association's list of accredited law schools since its first publication in 1923.

Today, Colorado Law, housed in the beautiful new "green" Wolf Law Building with one of the largest law libraries in the country, is also one of the most technologically advanced law schools in the country. Most importantly, it provides one of the best comprehensive legal educations in the nation, featuring:

- 530 students, selected from the nation's statistically best applicants with diverse backgrounds and representing 100 undergraduate institutions
- A favorable faculty-student ratio (1:10) that produces class sizes that encourage discussion
- 55 highly published resident faculty dedicated to interacting with students inside and outside the classroom
- First-year students who are placed in small sections for more class participation opportunities and to build relationships with classmates and professors
- Full-time, three-year Juris Doctor degree, one-year Master of Law degree, eight dual degrees, four certificates, four centers, and three journals
- An Experiential Learning Program that integrates lawyering activities, including nine legal clinics, externships, public service pledge, and trial and court competitions
- Comprehensive program to prepare students for any career; a quarter of graduates obtain judicial clerkships

Law School Vision

A supportive and diverse community of scholars and students in a place that inspires vigorous pursuit of ideas, critical analysis, and civic engagement in order to advance the rule of law in an open, sustainable society.

Our Mission

- **Teaching:** To employ robust theoretical inquiry, doctrinal and policy analysis, and professional skills.
- **Scholarship:** To explore and discuss ideas, to develop and test new ideas and approaches, to challenge the status quo, and to convey the school's research and ideas to lawyers, academics, policymakers, and the world.
- **Public Service:** To instill in students an awareness of a lawyer's civic responsibilities and opportunities to serve and lead.

 college website: music.colorado.edu

THE COLLEGE OF MUSIC provides specialized training designed to prepare students for a variety of careers in music. The college offers three undergraduate degrees, two certificate programs, and four graduate degrees; numerous performance opportunities are also available.

Established by the Regents of the University of Colorado in 1920, the College of Music is a fully accredited member of the National Association of Schools of Music.

Mission

The mission of the College of Music at CU-Boulder is to promote excellence in music through distinguished instruction in performance, composition, musicology, theory and teacher preparation, and to provide opportunities for performance, creative activities, research and scholarship, and teaching.

The college is dedicated to:

- providing music majors the opportunity to develop their knowledge, understanding, and ability in the various aspects of music;
- preparing students for careers as performers, composers, scholars, teachers, administrators, and other professionals in the field of music;
- broadening and deepening the knowledge and understanding of music through research, teaching, creative activities, and publication; and
- enriching the lives of students and faculty as well as the community, state, nation, and the world with a variety of performances and publications.

The College of Music is an academic community committed to maintaining a climate of mutual respect and collegiality while showing appreciation for a diversity of musical cultures and individual backgrounds.

The widely varied functions of music in the world today present many challenging and interesting opportunities for teachers, performers, creative artists, technicians, and commercial personnel. While these different pursuits require specialized emphases, the faculty of the College of Music recognize the musical and educational experiences that are common to all. Therefore, each curriculum of the College of Music is designed to present music as an integrated whole. Solo performance and technique, ensemble performance, historical and theoretical studies, concert and recital opportunities, and elective courses both inside and outside the college are intended to give students a balanced approach to musical understanding and musicianship.

The college maintains a ratio of approximately one faculty member for every 10 students. This enables students to benefit from dynamic, personal interaction with their professors. The college also offers students regular academic advising to ensure that they complete their degrees without unnecessary delay.

In addition to training in the various professions of music, the college provides general music studies and activities for the non-major; broad cultural programs (concerts, recitals, lectures) for the university and Boulder communities; favorable conditions for research in music; and service activities to the state and nation.

The degrees bachelor of arts in music, bachelor of music, and bachelor of music education are granted by the university, upon recommendation of the faculty of the College of Music, to those who have successfully completed prescribed requirements.

Students must complete an online graduation application and schedule a final checkout appointment by December 15 for May/August graduation and by October 1 for December graduation.

Undergraduate Education in Music

The undergraduate degrees in music emphasize knowledge and awareness of:

- solo performance and technique, including the various musical styles used in compositions for students' musical instruments or voice;
- each composition performed, notation and editorial signs used in the compositions performed, and repertoire for the students' performance medium;
- ensemble performance, including familiarity with major composers in the student's performance medium and the techniques necessary to blend a number of individual musicians into an ensemble;
- concert and recital opportunities, including literature composed for different performance forces;
- theoretical studies, including tonal harmony, counterpoint, voice-leading, and notation; formal principles and analytical techniques for tonal music; and instruments in score, including the concert pitch of transposing instruments and nomenclature used in scores; and
- historical studies, including representative works in the canon of musical literature from chant to the present, the general outlines of the history of music from the Middle Ages to the present, music in the United States, and musical cultures other than those of Europe.

In addition, students completing any of the degrees in music are expected to acquire the ability to:

- perform solo and ensemble repertoire demonstrating musical artistry, technical proficiency, and stylistic understanding;
- demonstrate an understanding of theoretical studies, including sight-reading and ear training; and
- demonstrate an understanding of historical studies including the analysis of stylistic periods and music of non-Western cultures.

Graduate Degree in Music

All graduate degrees in music are granted by the Graduate School of the University of Colorado upon the recommendation of the faculty of the College of Music and approval by the administrative officers of the Graduate School. The information supplied here is supplemental to and must be read in conjunction with the information contained in the Graduate School section. Other information regarding rules applying to graduate degree students in music may be found online at music.colorado.edu/students/graduate/degrees.

Academic Excellence

Dean's Honor Roll

A full-time undergraduate student in the College of Music who has completed at least 24 credit hours of course work by the end of the spring semester on the Boulder campus (excluding continuing education), and who earned a semester grade point average of at least 3.70, will be included in the college dean's honor roll for that semester. Notation of the "Dean's Honor Roll" is also listed in the Honors Convocation Program.

Honors at Graduation

Students achieving a cumulative GPA of 3.70–3.79 (honors), 3.80–3.89 (high honors), and 3.90–4.00 (highest honors) are recognized at commencement.

Scholarships and Awards

A number of scholarships and awards are designed specifically for students in the College of Music. Undergraduate music majors are eligible for scholarships or renewal of their scholarships as long as they make satisfactory musical progress in their major as determined by the faculty in jury exams and auditions, and maintain a minimum cumulative GPA of 3.00.

Graduate students must enroll as full-time students, maintaining a 3.00 GPA, and make adequate progress toward their degrees. The college offers approximately 70 graduate assistantships as well as graduate fellowships, and a variety of endowed scholarships for graduate students.

Programs of Study & Degrees

The College of Music provides specialized training designed to prepare students for a variety of careers in music. The college offers three undergraduate degrees, two certificate programs, four graduate degrees, and three professional certificates.

Undergraduate degree programs include:

- [Bachelor of music \(BM\)](#)
- [Bachelor of arts \(BA\)](#)
- [Bachelor of music education \(BME\)](#)
- [Double degrees in music and an outside major](#)
- [Dual degree in music performance and music education](#)
- [Double major in music performance](#)

In addition, the college of music offers **undergraduate certificate programs** in:

- [Certificate in jazz studies](#)
- [Certificate in Music technology](#)

Graduate degrees include:

- [Master of music \(MM\)](#)
- [Master of music education \(MME\)](#)
- [Dual master's degree in music](#)
- [Doctor of musical arts \(DMA\)](#)
- [Doctor of philosophy \(PhD\)](#)

In addition, the college of music offers the following **professional certificates**:

- [Professional certificate in string quartet performance](#)
- [Professional certificate in opera and solo vocal performance](#)
- [Professional certificate in woodwind performance](#)

The course codes for these programs are MUEL, MUSC, PMUS, and TMUS.

Admission & Enrollment Policies

On This Page:

- [Application Procedures](#)
- [Admission Requirements](#)
- [Graduate School Advising](#)
- [Credit Policies](#)
- [Registration](#)
- [Withdrawal](#)

Application Procedures

Students seeking admission to a CU-Boulder master's or doctoral program apply directly to the appropriate department, not the Graduate School. An applicant for admission must present complete application materials that include:

1. Complete the graduate application, available online at admissions.colorado.edu/graduate.
2. One official transcript of all academic work completed to date.
3. A non-refundable application fee. The fee is currently \$50 for domestic applicants and \$70 for international applicants. The fee may be paid by credit card, electronic check, check, or money order.
4. Three or four letters of recommendation. Please check with your program to obtain the required number of recommendations needed.
5. Test scores and other materials as required by specific departments.

A completed application must be in the major department by the published deadline for the term for which admission is sought. Most departments have an application deadline that is several months before the start of the desired admission term. Qualified applicants may find that their application cannot be processed for a specific term if enrollment levels have been reached.

Admission Requirements

A graduate student may be admitted to CU-Boulder as either a regular degree student or a provisional degree student.

Regular Degree Students

Qualified students may be recommended for admission to regular degree status by approved programs of the Graduate School provided they meet the following criteria:

1. They hold a baccalaureate degree from an accredited college or university or have done work equivalent to that required for such a degree.
2. They show promise of ability to pursue advanced study and research, as judged by their scholastic record.
3. They have had adequate preparation to enter graduate study in the chosen field.
4. They have at least a 2.75 (on a 4.00 scale) undergraduate GPA (for engineering, 3.00). (Note: Applicants who cannot meet criterion 4 may still secure regular admission if they have completed 9 semester hours of relevant graduate course work with at least a 3.25 average.)
5. They meet additional requirements for admission established by the major department.

Provisional Degree Students

Students who do not meet the requirements for admission as regular degree students may be recommended for provisional degree status by their major department. With the concurrence of the dean of the Graduate School, these students are admitted for a probationary term of either one or two semesters of full-time study (or the equivalent for part-time students). At the end of the

specified probationary period, provisional degree students must be either admitted to regular degree status or dismissed from the graduate program. Provisional students are subject to the same standards of performance required of regular degree students, plus any other requirements imposed by the program faculty as conditions of admission.

Credit earned by persons in provisional degree status may count toward a degree at CU-Boulder.

To meet the standard terms of provisional admission, the student must generally complete 12 hours in two semesters (or equivalent for part-time students) with a 3.00 cumulative GPA. Program faculty may recommend additional or alternative conditions as appropriate.

Admission to a Concurrent Bachelor's/Master's Degree Program

A number of CU-Boulder departments offer concurrent bachelor's/master's degrees, which enable CU undergraduate students to pursue undergraduate and graduate programs simultaneously and to receive both degrees in a shorter time period than it would take to pursue them separately.

Highly qualified undergraduate students may be recommended for admission to a concurrent bachelor's/master's degree program at the end of their sophomore year or the beginning of their junior year. Such students are not formally admitted to the Graduate School. Standards for admission as well as eligibility to remain in the program are specified in each department's program guide.

Admission to a Dual Degree Program

The Graduate School, in conjunction with the faculty of each department and the deans of schools and colleges where appropriate, approves dual degree programs that combine previously approved graduate degree programs in two areas or departments.

Qualified graduate students may be recommended for admission to an approved dual degree program upon meeting the qualifications of each graduate program and any special qualifications as outlined by each program's approved guidelines. Minimum standards and qualifications for admission and continuation may be found in each department's approved program guide. Students wishing to complete degrees in more than one department that have no approved dual degree program or interdisciplinary major combination must complete all the requirements for both degrees with no shared or overlapping course work.

Admission of Seniors

A CU-Boulder senior who is not pursuing the concurrent bachelor's/master's degree, but who has satisfied the undergraduate residence requirement and does not need more than 6 semester hours of advanced subjects to meet the requirements for a bachelor's degree, may be admitted to the Graduate School. Students who just wish to take a graduate-level class will need the instructor's signature in a "special action form" obtained from the department.

Admission of Nondegree Students to Regular Degree Status

Students with nondegree status who wish to apply for regular student status must complete their application for admission before completing 9 semester hours as nondegree students at CU-Boulder.

Admission of Former and Suspended Students

Students who were previously admitted to a graduate degree program but who did not complete that degree and who have not been continuously registered at CU-Boulder must complete the following steps before being readmitted:

1. Clarify their status with the department to determine their eligibility to return and pursue the same degree.
2. Submit an application to the department (departmental approval is required) before enrollment levels are met or deadlines passed for the term in which they expect to return to CU-Boulder.

A regular degree student who is dismissed for failure to maintain a 3.00 grade point average is eligible to apply for readmission after one year. Approval or rejection of this application rests jointly with the student's major department and the dean of the Graduate School. The final decision will be made by the dean based on the recommendations of the department.

Students Transferring from Other CU Campuses

Students transferring from another CU campus to CU-Boulder must apply to and be accepted by the Boulder campus.

Students Changing Major Departments

Students who want to change major departments must apply to and be accepted by the new department. When adding a second major in an approved interdisciplinary major combination, this must be noted on the application.

Admission of Faculty Members

No member of the faculty above the rank of instructor may be working toward an advanced degree from CU-Boulder.

Graduate School Advising

Graduate School advisors provide information and guidance to students and staff on issues including:

- general Graduate School information, policies, and rules
- requirements for degrees that apply to all students
- exceptions to requirements
- registration requirements
- theses and dissertation format guidelines and submissions info
- graduation requirements and deadlines

For general inquiries, contact Graduate Student Services at gradinfo@colorado.edu or call **303-492-8220**.

Credit Policies

Transfer Credit

Transfer credits from accredited institutions are accepted by CU-Boulder only after approval by the department chair/program director and the dean of the Graduate School, and under conditions outlined below. Transfer credit is defined as any credit earned at another accredited institution, credits earned on another campus of the CU system, or credits earned as a nondegree student within the CU system. Students seeking a degree from CU-Boulder must complete the majority of their course work while enrolled as degree-seeking students.

The following rules apply to transferring credit to CU-Boulder graduate programs:

- The maximum amount of work that may be transferred to CU-Boulder depends upon the graduate degree sought (individual departments may have more restrictive limits).

Degree and Semester Credit Hours

MA, ME, MS, MMus, or MMusEd—9

MFA—18

DMA, PhD, or AuD—21

AuD students with MA and audiology certification—30

- Work already applied toward a graduate degree received from CU-Boulder or another institution cannot be accepted for transfer toward another graduate degree of the same level at CU-Boulder. In addition, work completed for a doctoral degree may not be applied toward a subsequent master's degree. Extension work completed at another institution cannot be transferred, and correspondence work, except to make up deficiencies, is not recognized.
- All courses accepted for transfer must be graduate-level courses. A course in which a grade of *B-* or lower was received will not be accepted for transfer. Transfer course work that is to be applied to a graduate degree at CU-Boulder and was completed more than five years prior to being accepted to the program will be evaluated by the major department as to current relevance and applicability to the degree requirements. At the discretion of the department, a student may be asked to validate transfer credits prior to approval.
- Credit may not be transferred until the student has completed 6 credits of graduate course work as a regular, degree-seeking student at the Boulder campus with a 3.00 GPA. Transferred credits do not reduce the minimum registration requirement, but may reduce the amount of work to be done in formal courses.
- Excess undergraduate credits from another institution may not be transferred to the CU-Boulder Graduate School.

Graduate Credit for CU-Boulder Seniors

With the exception of students enrolled in a concurrent bachelor's/master's degree program, seniors at CU-Boulder may earn graduate credit for a limited amount of graduate-level work (up to 9 semester hours), provided such work is completed with a grade of *B* or above in course work at CU-Boulder; comes within the five-year course time limit; has not been applied toward another degree; and is recommended for transfer by the department concerned, and such transfer is approved by the dean of the Graduate School.

Registration

Registration procedures are sent to new graduate students when they confirm their intent to enroll. Please refer to Registration in the General Information section for further information.

Late registration is held only if enrollment levels have not been reached. Graduate students (including candidates for degrees and students taking only thesis hours) who fail to complete registration and pay fees during regular registration may be charged a late registration fee.

Concurrent Registration

Boulder campus students unable to obtain courses required for their degree program on the Boulder campus may register for up to two courses or 6 credit hours, whichever is greater, on another University of Colorado campus. The course work must be required for their degree program; they must have their dean's permission; they must be enrolled for at least one course on the Boulder campus; and enrollment levels must not have been reached on the other campus. Contact the Office of the Registrar for additional information.

Reciprocal Exchange Agreement Program

Reciprocal registration enables University of Colorado graduate students to attend classes at other Colorado institutions, including Colorado School of Mines, Colorado State University, and the University of Northern Colorado. For more information, contact the Office of the Registrar.

Withdrawal

A graduate student who desires to withdraw from the university should go to Regent Administrative Center 125 for a withdrawal interview. A student who discontinues attendance in a course without officially withdrawing is marked as having failed that course. Except under extreme circumstances, graduate students are not permitted to withdraw after the last day of classes.

Courses

Search by College, Department & Category

College/School

Department

Search by Course Number

Subject

Number

ARSC-1000 (3-4) Expository Writing

Develops college-level reading, writing, and thinking. Students are asked to read critically, then construct written responses that are revised and crafted into more formal essays and position papers. Offered through the Student Academic Services Center. Prereq., program coordinator consent required.

[College of Arts & Sciences](#)
[Arts & Sciences Admin](#)
[Writing](#)

ASTR-1000 (3) The Solar System

Examines principles of modern astronomy for nonscience majors, summarizing our present knowledge about the Earth, Sun, moon, planets, and the origin of life. Offers opportunities to attend nighttime observation sessions at Sommers-Bausch Observatory and Fiske Planetarium. Similar to ASTR 1010, without lab. Also similar to ASTR 1030. Formerly ASTR 1110. Students may receive credit for only one of ASTR 1000, 1110, 1010, or 1030. Meets MAPS requirement for natural science: nonlab. Approved for arts and sciences core curriculum: natural science.

[College of Arts & Sciences](#)
[Astrophysical & Planetary Sciences](#)

COMR-1000 (1) Communication and Community

Introduction to how communication builds community by creating and sharing meaning. Examination of communication practices at the interpersonal level (friends and family), the group level (teams, classrooms and organizations) and the societal level (citizenship, social change, mass media). Restricted to students in the Communication Residential Academic Program.

[College of Arts & Sciences](#)
[Communication Residential Academic Program](#)

CSVC-1000 (1) Work Internship

a one credit pass/fail course, opened to students in good academic standing, whose internship employers require that they receive course credit. The student must first seek to obtain academic credit through their major department. Will not count toward degree requirements in any UCB school or college. No appeals for credit toward degrees or for letter grades in the course will be entertained.

College of Arts & Sciences | Career Services

DNCE-1000 (2) Beginning Technique

Introduces basic concepts and skills of various contemporary dance forms, such as Afro-modern, Release Technique, Limon-based modern, etc. Classwork develops muscle strength, flexibility, coordination, rhythm, and dynamic and spatial awareness. Lectures focus on various aspects of dance including history, composition, anatomy and criticism. Limited amount of written work is required. May be repeated up to 4 credit hours.

College of Arts & Sciences | Theater & Dance | Nonmajor Technique

ENVS-1000 (4) Introduction to Environmental Studies

Surveys environmental studies, examining ecological, socioeconomic, political, aesthetic, and technological factors that influence the quality of life on Earth. Required for ENVS majors. Approved for arts and sciences core curriculum: natural science.

College of Arts & Sciences | Environmental Studies

FARR-1000 (1) Farrand Service-Learning Practicum: Special Topics

Offers a varying service-learning practicum experience as corequisite to a service-learning lecture course. May be repeated up to 6 total credit hours, provided the practica are different. Graded pass/fail.

College of Arts & Sciences | Farrand Residential Academic Program

GSAP-1000 (3) World Politics and Society

Explores the history leading up to-and away from-the attacks of 9/11 within an American framework. Topics to be covered include: America's relationship with key countries since 1945; the rise of Muslim extremism; modern terrorism and its meaning; the importance of oil; and the events of 9/11 and the Bush Administration's response to it, at home and abroad. Restricted to G-RAP students.

College of Arts & Sciences | Global Studies Residential Academic Program

IAFS-1000 (4) Global Issues and International Affairs

Introduces the student to the international affairs program. The course examines political and economic development in several countries in many different world regions. Examines historical trends and development as well as current political and economic issues. Approved for GT-SS3. Approved for arts and sciences core curriculum: contemporary societies. Prerequisites: Restricted to International Affairs (IAFS), Political Science (PSCI), Anthropology (ANTH), Economics (ECON), History (HIST), Geography (GEOG) or College of Arts and Sciences Open Option (XXAS) majors only.

College of Arts & Sciences | International Affairs

INVS-1000 (4) Responding to Social and Environmental Problems Through Service Learning

By integrating theory with required community service, students explore how problems are shaped by cultural values and how alternative value paradigms affect the definition of problems in areas such as education and the environment. Students examine different approaches to solving problems and begin to envision new possibilities. Approved for GT-SS3. Approved for arts and sciences core curriculum: ideals and values.

College of Arts & Sciences | INVST Community Studies

LDSP-1000 (3) The Foundations of 21st Century Leadership

Introduces students to the critical need for and approaches to the practice of creative and effective leadership. Premised on the idea that the potential for leadership is present in all of us. Approved for arts and sciences core curriculum: ideals and values.

College of Arts & Sciences | Chancellor Leaderships Residential Academic Program

LING-1000 (3) Language in U.S. Society

Nontechnical exploration of the ways that language is used in America. Emphasizes language as a social institution and how values and goals of both public institutions and private groups shape and are shaped by language and its use. Meets MAPS requirement for social science: general. Approved for arts and sciences core curriculum: United States context or contemporary societies.

College of Arts & Sciences | Linguistics

PHIL-1000 (3) Introduction to Philosophy

Introduces fundamental topics of philosophy, e.g., knowledge, truth, universals, self, the mind-body problem, time, God, and value. Approved for GT-AH3. Approved for arts and sciences core curriculum: ideals and values.

College of Arts & Sciences | Philosophy

PHYS-1000 (3) Preparatory Physics

Introduces basic physics, emphasizing an analytical approach to prepare for PHYS 1110/1120, the engineering majors sequence. This course does not satisfy any MAPS deficiency in either the sciences or math. Prereq., 1 year high school algebra or equivalent.

College of Arts & Sciences | Physics

SPAN-1000 (3) Cultural Difference through Hispanic Literature

For freshmen only. Organized around the general topic of cultural differences. Focuses on a related issue such as gender or history articulated in the literature of Spain, Latin America, and the Hispanic United States. Taught in English; students read selected literary texts in English from the various traditions. Does not count towards the Spanish major. Approved for GT-AH2. Approved for arts and sciences core curriculum: literature and the arts. Prerequisites: Restricted to students with 0-26 credits (Freshmen) only.

College of Arts & Sciences | Spanish | Spanish

ENGL-1001 (3) Freshman Writing Seminar

Provides training and practice in writing. Focuses on the writing process, the fundamentals of composition, and the structure of argument. Provides numerous and varied assignments with opportunity for revision. Prereqs., College of Arts and Sciences freshman or sophomore standing. Not open to business or engineering majors. Meets MAPS requirement for English. Approved for arts and sciences core curriculum: lower-division written communication. Prerequisites: Not open to Engineering or Business majors.

College of Arts & Sciences | English | Undergraduate Writing

GEOG-1001 (4) Environmental Systems 1---Climate and Vegetation

MLect. and lab. Introduces the atmospheric environment of the Earth: elements and controls of climate and their implications for hydrology, vegetation, and soils. Emphasizes distribution of physical features across the Earth's surface and interactions between humans and their environment, especially those leading to global change on the decade to century time scale. Approved for GT-SC1. Meets MAPS requirement for natural science: nonlab or lab. Approved for arts and sciences core curriculum: natural science.

College of Arts & Sciences | Geography | Physical Geography

HONR-1001 (1) Honors Coseminar

Honors coseminars are designed to combine an honors seminar experience with the shared experience of an organized lecture course. Designed typically for 15 students, coseminars are taken for an additional 1 credit hour. Coseminars provide honors students with an opportunity to extend their common experience in the course lecture into an enriched interactive, critical thinking opportunity. May be repeated up to 4 total credit hours. Prerequisites: A minimum 3.3 cum GPA is required for this Honors class or you must be part of the first year student group.

College of Arts & Sciences | Honors

PSYC-1001 (3-4) General Psychology

Surveys major topics in psychology: perceptions, development, personality, learning and memory, and biological bases of behavior. Students may participate as subjects for several hours in ongoing research. Meets MAPS requirement for social science: general.

College of Arts & Sciences | Psychology | General

SOCY-1001 (3) Introduction to Sociology

Examines basic sociological ideas including social relations, social interaction, social structure, and social change. Examples are drawn from societies around the world. Meets MAPS requirement for social science: general. Approved for GT-SS3. Approved for arts and sciences core curriculum: contemporary societies.

College of Arts & Sciences | Sociology | General Sociology

ARTS-1002 (3) Beginning Drawing 1

In this studio course the formal visual elements are presented through a study of spatial relationships. The course is built around a series of related problems, each of which is designed to develop fluency in drawing, offer experience in handling media, foster self-confidence, and promote an understanding of the visual elements and their role in the development of pictorial space. Prereqs., ARTS 1010, 1020, and 1030.

College of Arts & Sciences | Art & Art History | Painting/Drawing

FILM-1002 (3) Film Analysis for Non-Majors

Introduces the critical study of film, exploring theoretical, historical, and technical concerns while presenting a survey of important film periods and genres. Students will hone critical-thinking, close-analysis, and writing skills. The course will cover a wide variety of films, approaching them from numerous perspectives, considering both the effects films have on individual viewers and their ability to reflect culture.

College of Arts & Sciences | Film Studies | Genre and Movements

ARTS-1003 (3) Printmaking for Non-Majors

Emphasizes processes involved with both nonmultiple and multiple methods, including but not limited to metal plate etching (intaglio), lithography, collagraph, woodcut, linoleum cut, Xerox transfer, and monotype. Places equal emphases on developing drawing skills and understanding design principles.

College of Arts & Sciences | Art & Art History | Printmaking

FARR-1003 (1) Banned Books and the First Amendment

Focuses on a heated topic of discussion since the Constitution was drafted: the censorship of books. This class will look at some classics in literature: Catcher in the Rye, The Color Purple, and Huck Finn, and will explore the questions of why they were controversial and whether censorship of books is ever justified. Graded pass/fail.

College of Arts & Sciences | Farrand Residential Academic Program

THTR-1003 (3) Acting for Nonmajors

Teaches the basic principles of acting for those with no previous acting experience, focusing on relaxation, concentration, improvisation, use of imagination, actions, objectives, initial monologue

and scene work, and basic terms and concepts of process work for the actor.

Subject

Number

ASEN-1000 (1) Introduction to Aerospace Engineering Sciences

Introduces aerospace history, curriculum, ethics, and the many areas of emphasis within aerospace engineering. Academic and industry speakers are invited to address various aerospace topics. Prerequisites: Restricted to students with 0-26 credits (Freshmen) Aerospace Engineering (ASEN) or Engineering Open Option majors only.

[College of Engineering & Applied Science](#) [Aerospace Engineering](#) [Aerospace Design & System Engr](#)

CHEN-1000 (3) Creative Technology

Lect. Introduces undergraduate arts and sciences students to the most recent concepts in technology and how these concepts impact all aspects of life, such as health, the health of the planet, and social structures. Engineering students should consult an advisor before registering for this course. Approved for arts and sciences core curriculum: natural science. Prerequisites: Restricted to non-Engineering majors only.

[College of Engineering & Applied Science](#) [Chemical Engineering](#)

CSCI-1000 (1) Computer Science as a Field of Work and Study

Introduces curriculum, learning techniques, time management and career opportunities in Computer Science. Includes presentations from alumni and others with relevant educational and professional experience.

[College of Engineering & Applied Science](#) [Computer Science](#) [General Computer Science](#)

EVEN-1000 (1) Introduction to Environmental Engineering

Introduces students to environmental engineering as an academic major and a career. Covers air quality, aquatic ecology, chemical processing, energy, site remediation, and water resources and

treatment. Includes reading and writing on the history of environmental engineering, major environmental issues, and professional ethics.

College of Engineering & Applied Science | Environmental Engineering

MCEN-1000 (1) Freshmen Seminar

Lect. and lab. Introduces facets of mechanical engineering including history of the profession, mechanical engineering curriculum, industries in which mechanical engineers practice, and expectations and tools for academic success. Students participate in hands-on experiences, visit industry, make oral presentations, meet faculty and practicing professionals, and develop goal statements. Restricted to students with 0-26 units (Freshmen) Mechanical Engineering majors only. Prerequisites: Restricted to students with 0-26 units (Freshmen) Mechanical Engineering majors only.

College of Engineering & Applied Science | Mechanical Engineering | Math

HUEN-1010 (3) Introduction to the Humanities

Explores a wide variety of challenging and interesting humanistic themes (love, responsibility, ambition, etc.) in many forms (fiction, philosophy, plays, poetry, art, music, etc.). In small discussion-based classes, emphasizes the writing, public speaking and critical thinking skills needed to excel as a professional engineer. Fulfills College of Engineering writing requirement for first-year freshmen only. Prerequisites: Restricted to students with 0-26 (Freshmen) College of Engineering majors only.

College of Engineering & Applied Science | Humanities for Engineers

MCEN-1025 (4) Computer-Aided Design and Fabrication

Introduces engineering design graphics. Includes learning a contemporary computer-aided design (CAD) software application and relevant engineering graphics concepts, such as orthographic projection, sections, engineering drawing practices, geometric dimensioning and tolerancing, and an introduction to manufacturing methods. Entails a final design project using rapid prototyping. Restricted to MCEN majors. Prerequisites: Restricted to Mechanical Engineering or Engineering Physics majors only.

College of Engineering & Applied Science | Mechanical Engineering | Design

AREN-1027 (3) Engineering Drawing

Introduces engineering drawing including sections and dimensioning, print readings, and computer 3D modeling. Prerequisites: Restricted to students with 0-56 credits (Freshmen or Sophomore) Engineering Physics (EPEN), Architectural (AREN) or Civil (CVEN) Engineering majors only.

College of Engineering & Applied Science | Civil Engineering | Miscellaneous

AREN-1037 (3) Building Information Modeling

Learn to develop and communicate physical information using three-dimensional graphical systems including Computer-Aided Design (CAD) and Building Information Models (BIM). Learn to dimension and scale physical systems and interpret scaled drawings. Get experience with industry standard software tools (REVIT) used to produce design and construction documents, and apply BIM and CAD tools in a project producing scaled 3-D drawings.

College of Engineering & Applied Science | Civil Engineering | Miscellaneous

ECEN-1100 (1) Freshman Seminar

Introduces students to areas of emphasis with the ECE department through seminars presented by faculty and outside speakers. Emphasizes career opportunities, professional ethics and practices, history of the profession, and resources for academic success. Several sessions promote team building and problem solving, and provide opportunities for freshmen to meet their classmates. Prerequisites: Restricted to College of Engineering majors only.

College of Engineering & Applied Science | Electrical & Computer Engineering | General

GEEN-1100 (3) Social Impact of Technology

Introduces undergraduate students to the social impact of technology and how technology impacts all aspects of life, the health of planet Earth, and how people interact with each other. Fulfills Engineering social science requirements. Prerequisites: Restricted to College of Engineering majors only.

College of Engineering & Applied Science | Engineering Administration

EHON-1151 (3) Critical Encounters

Explores critical, literary and philosophical approaches to the following related problems: 1) how we organize knowledge and construct meaning, and 2) how we locate a sense of self as both individuals and members of various groups amidst the resources and demands of competing interpretations, traditions challenges and circumstances. Prereq., honors standing or instructor consent required. Prerequisites: Restricted to College of Engineering majors only.

College of Engineering & Applied Science | Engineering Administration

MCEN-1208 (1-4) Special Topics in Mechanical Engineering

Subject matter to be selected from topics of current interest. Credit to be arranged. Numbered MCEN 1208-1298. Prereq., instructor consent. Restricted to students with 0-26 units (Freshmen) Mechanical Engineering majors only. Prerequisites: Restricted to students with 0-26 units (Freshmen) Mechanical Engineering majors only.

College of Engineering & Applied Science | Mechanical Engineering | Special Topics

CHEN-1211 (3) General Chemistry for Engineers

Lect. a one-semester course designed to meet the general chemistry requirement for engineering students. Topics include stoichiometry; thermodynamics; gases, liquids, and solids; equilibrium; acids and bases; bonding concepts; kinetics; reactions; and materials science. Examples and problems illustrate the application of chemistry to engineering subdisciplines. Restricted to students with one year of high school chemistry or CHEM 1001 or 1021 (min. grade C-); and high school algebra. Not recommended for students with grades below B- in CHEM 1001 or 1021. Credit not granted for this course and CHEM 1111, 1113/1114, 1251, or 1351. Prerequisites: Requires co-requisite course of CHEM 1221. Restricted to College of Engineering Majors only.

College of Engineering & Applied Science | Chemical Engineering

CSCI-1220 (4) Virtual Worlds: An Introduction to Computer Science

Introduces the fundamental principles of computer science using an on-line virtual world called Second Life as the "Laboratory" for the course. Students will learn how to program by creating

objects of interest in Second Life. In-class and in-world discussions and readings will introduce the student to important ideas and concepts that shape the field of computer science. Same as ATLS 1220.

College of Engineering & Applied Science Computer Science General Computer Science

GEEN-1235 (4) Pre-Calculus for Engineers

Prepares students for the challenging content and pace of the calculus sequence required for all engineering majors. The course covers algebra, trigonometry and selected topics in analytical geometry. It prepares students for the calculus courses offered for engineering students. It requires students to engage in rigorous work sessions as they review topics that they must be comfortable with to pursue engineering course work. The course is structured to accustom students to the pace and culture of learning encountered in engineering math courses.

College of Engineering & Applied Science Engineering Administration

CSCI-1240 (3) The Computational World

Introduces and explores the "Computational style of thinking" and its influence in science, mathematics, engineering and the arts. The course does not focus on the nuts and bolts of any particular programming language, but rather on the way in which computing has affected human culture and thought in the past half century. Same as ATLS 1240.

College of Engineering & Applied Science Computer Science General Computer Science

CHEN-1300 (1) Introduction to Chemical Engineering

Meets for one lecture per week. Introduces chemical engineering emphasizing history of the profession, curriculum, chemical industry, and industrial chemistry. Includes industry visits, oral presentations, faculty and professional meetings, and development of a goals statement. Prerequisites: Restricted to Chemical (CHEN) Engineering or Chemical and Biological (CBEN) Engineering majors only.

College of Engineering & Applied Science Chemical Engineering

CSCI-1300 (4) Computer Science 1: Programming

Teaches techniques for writing computer programs in higher level programming languages to solve problems of interest in a range of application domains.

College of Engineering & Applied Science Computer Science General Computer Science

GEEN-1300 (3) Introduction to Engineering Computing

Introduces the use of computers in engineering problem solving, including elementary numerical methods. Teaches programming fundamentals, including data and algorithm structure, and modular programming. Software vehicles include Excel/Vba and Matlab. Coreq., APPM 1350 or equivalent. Restricted to ENGR majors. Prerequisites: Restricted to College of Engineering majors only.

College of Engineering & Applied Science Engineering Administration

AREN-1316 (2) Introduction to Architectural Engineering

Surveys the broad subject of architectural engineering and professional practices. Includes professional design services, design documents, methods of construction delivery, materials for construction, codes and standards, life safety, professional ethics, structural systems, mechanical systems, electrical systems, and building systems integration. Prerequisites: Restricted to students with 0-56 (Freshmen or Sophomore) College of Engineering majors only.

College of Engineering & Applied Science | Civil Engineering | Miscellaneous

CVEN-1317 (2) Introduction to Civil and Environmental Engineering

Surveys the broad subject of civil and environmental engineering and professional practice. Includes the subdisciplines of structures, water resources, geotechnics, transportation, environment, and construction. Discusses professional ethics, important skills for engineers, and the engineering design process as it fulfills multiple objectives.

College of Engineering & Applied Science | Civil Engineering | Miscellaneous

GEEN-1350 (1) Calculus 1 Work Group

Provides problem-solving assistance to students enrolled in APPM 1350. Student groups work in collaborative learning environment. Student participation is essential. Grading under pass/fail option only. Coreq., APPM 1350.

College of Engineering & Applied Science | Engineering Administration

GEEN-1360 (1) Calculus 2 Work Group

Provides problem solving assistance for students enrolled in APPM 1360. Conducted in a collaborative learning environment. Student work groups solve calculus problems with assistance of facilitator. Grading under pass/fail option only. Prereq., APPM 1350. Coreq., APPM 1360.

College of Engineering & Applied Science | Engineering Administration

ASEN-1400 (3) Gateway to Space

Introduces the basics of atmosphere and space sciences, space exploration, spacecraft design, rocketry, and orbits. Students design, build, and launch a miniature satellite on a high altitude balloon. Explores the current research in space through lectures from industry. Formerly ASEN 2500. Same as ASTR 2500. Prerequisites: Restricted to students with 0-26 (Freshmen) College of Engineering majors only.

College of Engineering & Applied Science | Aerospace Engineering | Aerospace Design & System Engr

College/School

Department

Search by Course Number

Subject

Number

MUEL-1081 (3) Basic Music Theory

Introduction to music notation, meter and rhythm, scales, intervals, triads, seventh chords, fundamentals of harmonic progression, voice leading, aural skills, and composition. For nonmusic majors who have little or no previous background in the subject. Formerly EMUS 1081. Prerequisites: Restricted to non-College of Music majors only.

College of Music | Elective Music

MUSC-1081 (3) Intensive Music Theory

Introduces tools used in notating, performing, creating, and listening to music. Coreq., MUSC 1121. Open to music majors only. Offered fall only. Prerequisites: Restricted to Music majors or graduate students only.

College of Music | Music | Theory and Composition

MUSC-1101 (2) Semester 1 Theory

Introduces the fundamentals of diatonic harmony and voice leading, focusing on four-voice writing and analysis of excerpts from music literature. For music majors only. Offered fall only. Prerequisites: Restricted to Music majors or graduate students only.

College of Music | Music | Theory and Composition

PMUS-1105 (1) Keyboard Musicianship 1

Introduces the keyboard, music reading in the treble and bass clefs, basic theory and keyboard harmony, technical patterns, and improvisation. Studies easy classical and pop repertoire. May be repeated up to 12 total credit hours. Restricted to music majors with no keyboard experience or instructor consent required. Prerequisites: Restricted to Music majors or graduate students only.

College of Music | Music | Keyboard Musicianship

MUSC-1111 (2) Semester 2 Theory

Continuation of MUSC 1101. Covers principles of harmony and voice leading, using all common diatonic triads and seventh chords. Introduces secondary dominants, modulation, contrapuntal chord functions, and elementary structural analysis of excerpts from music literature. Prereq., MUSC 1101. Offered spring only. Prerequisites: Requires prerequisite course of MUSC 1101 or 1081. Restricted to College of Music undergraduate students only.

College of Music | Music | Theory and Composition

MUEL-1115 (1) Piano Class 1

Introduces the keyboard and music reading for nonmusic majors with no prior keyboard experience. Studies very easy classical and pop repertoire. Prereq., no prior keyboard experience or instructor consent. Formerly EMUS 1115. Prerequisites: Restricted to non-College of Music majors only.

College of Music | Elective Music

MUSC-1121 (1) Aural Skills Lab, Semester 1

Focuses on sight singing, rhythm, and dictation of diatonic melodies in major and minor keys (treble, alto, and bass clefs). Covers identification of scale types, intervals, triads, and dominant seventh chords. Studies harmonic dictation using chords from MUSC 1101. Offered fall only. Prerequisites: Restricted to Music majors or graduate students only.

College of Music | Music | Theory and Composition

MUEL-1125 (1) Piano Class II

Continuation of MUEL 1115. Focuses on development of music reading. Studies technical patterns, easy classical and pop repertoire, and improvisation. Prereq., MUEL 1115. Restricted to non-College of Music majors only. Formerly EMUS 1125. Prerequisites: Restricted to non-College of Music majors only.

College of Music | Elective Music

MUSC-1131 (1) Aural Skills Lab, Semester 2

Acquaints students with sight singing in major and minor keys (treble, alto, tenor, and bass clefs). Includes dictation of one- and two-voice examples. Studies harmonic dictation using vocabulary from MUSC 1111. Considers detection of pitch and rhythm errors in performed examples. Prereq., MUSC 1121. Restricted to College of Music majors only. Offered spring only. Prerequisites: Requires prerequisite course of MUSC 1121. Restricted to College of Music undergraduate students only.

College of Music | Music | Theory and Composition

MUEL-1145 (2-4) Guitar Class

A systematic study of the beginning literature and technique of the classical guitar with an emphasis on reading music. Designed for nonmusic majors with no prior musical experience. Restricted to non-College of Music majors only. Formerly EMUS 1145. Prerequisites: Restricted to non-College of Music majors only.

| | |
|------------------|----------------|
| College of Music | Elective Music |
|------------------|----------------|

MUEL-1155 (2) Intermediate Guitar

Studies the intermediate literature and technique of the classical and popular guitar. Emphasis on reading standard notation and chord charts. Designed for non- music majors. May be repeated up to 6 total credit hours. Prereq., MUEL 1145 or instructor consent. Restricted to non-College of Music majors only. Formerly EMUS 1155. Prerequisites: Restricted to non-College of Music majors only.

| | |
|------------------|----------------|
| College of Music | Elective Music |
|------------------|----------------|

MUEL-1184 (1) Voice Class

Involves basic vocal technique and easy solo repertoire taught through a group medium, for beginner and intermediate level students. May be repeated upto 6 total credit hours. Recommended prereq., ability to read music. Formerly EMUS 1184. Prerequisites: Restricted to non-College of Music majors only.

| | |
|------------------|----------------|
| College of Music | Elective Music |
|------------------|----------------|

PMUS-1184 (1) Voice Class

Involves basic vocal technique and easy solo repertoire taught through a group medium, for beginner and intermediate level students. May be repeated up to 6 total credit hours. Restricted to MUSC majors. Prerequisites: Restricted to College of Music undergraduate students only.

| | | |
|------------------|-------|-------|
| College of Music | Music | Voice |
|------------------|-------|-------|

PMUS-1205 (1) Keyboard-Musicianship 2

Prerequisites: Restricted to College of Music undergraduate students only.

| | | |

| College of Music | Music Ensembles |
|------------------|-----------------|

EMUS-1237 (1) Women's Chorus

Prerequisites: Restricted to students with 0-56 credits (Freshmen or Sophomore) only.

College of Music | Music Ensembles

EMUS-1247 (1) Men's Chorus

Prerequisites: Restricted to students with 0-56 credits (Freshmen or Sophomore) only.

College of Music | Music Ensembles

EMUS-1257 (1) Collegiate Chorale

Prerequisites: Restricted to students with 0-56 credits (Freshmen or Sophomore) only.

College of Music | Music Ensembles

EMUS-1267 (1) Choirs/Festival

College of Music | Music Ensembles

EMUS-1277 (1) Court Players

College of Music | Music Ensembles

EMUS-1287 (1) Marching Band

Prerequisites: Restricted to students with 0-56 credits (Freshmen or Sophomore) only.

College of Music | Music Ensembles

EMUS-1297 (1) Wind Symphony

Prerequisites: Restricted to students with 0-56 credits (Freshmen or Sophomore) only.

College of Music | Music Ensembles

EMUS-1307 (1) Band

Prerequisites: Restricted to students with 0-56 credits (Freshmen or Sophomore) only.

College of Music | Music Ensembles

EMUS-1317 (1) Campus Band

Prerequisites: Restricted to students with 0-56 credits (Freshmen or Sophomore) only.

Subject

Number

AIRR-1010 (1) Foundations of the United States Air Force 1

One 1-hour lecture and one 2-hour lab per week. Introduces students to the U.S. Air Force and the USAF officer profession. Uses instructor lectures, films and videos, and group activities to examine Air Force issues, officership qualities, and military customs and courtesies. Emphasizes the communication skills necessary for an Air Force officer.

[Cross College Programs](#)
[Reserve Office Training Corp](#)
[Air Force Aerospace Studies](#)

NAVR-1010 (2) Introduction to Naval Science

Introduces the structure, missions, and functions of the United States Navy and Marine Corps. Also covers military law, leadership, naval history, and concepts of sea power.

[Cross College Programs](#)
[Reserve Office Training Corp](#)
[Naval Science](#)

MILR-1011 (2) Adventures in Leadership 1

Introduces fundamentals of leadership and the United States Army. Examines its organization, customs, and history as well as its current relevance and purpose. Students also investigate basic leadership and management skills necessary to be successful in both military and civilian settings. Includes fundamentals of Army leadership doctrine, team-building concepts, time and stress management, an introduction to cartography and land navigation, marksmanship, briefing techniques, and some basic military tactics.

[Cross College Programs](#)
[Reserve Office Training Corp](#)
[Military Science \(U.S. Army\)](#)

AIRR-1020 (1) Foundations of the United States Air Force 2

A continuation of AIRR 1010-1. One 1-hour lecture and one 2-hour lab per week.

Cross College Programs | Reserve Office Training Corp | Air Force Aerospace Studies

MILR-1021 (2) Adventures in Leadership 2

Continues the investigation of leadership in small organizations. Covers selected topics such as basic troop leading procedures, military first aid and casualty evacuation concepts, creating ethical work climates, an introduction to Army organizations and installations, and a further examination of basic military tactics. Introduces students to effective military writing styles.

Cross College Programs | Reserve Office Training Corp | Military Science (U.S. Army)

ATLS-1220 (4) Virtual Worlds: An Introduction to Computer Science

Introduces the fundamental principles of computer science using an on-line virtual world called Second Life as the "Laboratory" for the course. Students will learn how to program by creating objects of interest in Second Life. In-class and in-world discussions and readings will introduce the student to important ideas and concepts that shape the field of computer science. Same as CSCI 1220.

Cross College Programs | Alliance for Technology, Learning, and Society (ATLAS)

ATLS-1240 (3) The Computational World

Introduces and explores the "Computational style of thinking" and its influence in science, mathematics, engineering and the arts. The course does not focus on the nuts and bolts of any particular programming language, but rather on the way in which computing has affected human culture and thought in the past half century. Same as CSCI 1240.

Cross College Programs | Alliance for Technology, Learning, and Society (ATLAS)

ATLS-1710 (3) Tools and Methods for Engineering Computing

Designed for students with little or no programming background. Students learn procedural and object-oriented programming through development of games, simulations, and animations using Flash/Actionscript, VB/Excel, Java, MATLAB, and real-world applications. Activities are oriented toward smaller projects that address topics in beginning science, engineering, and mathematics courses. Students gain practical, applicable skills. Same as APPM 1710.

Cross College Programs | Alliance for Technology, Learning, and Society (ATLAS)

PRLC-1810 (3) Ethical Leadership

Introduces fundamental principles of leadership and ethics. Emphasizes application of the principles for self-development and organizational effectiveness. Approved for arts and sciences core curriculum: ideals and values.

Cross College Programs | Leadership Residential Academic Program

PRLC-1820 (3) Community Issues in Leadership

Explores challenges to leadership at the community level such as drug abuse, poverty, decline of infrastructure, care of the aged, etc. Gives particular attention to the development of effective leadership responses to community difficulties at university, city, state, and national levels. Approved for GT-SS3. Approved for arts and sciences core curriculum: contemporary societies.

Cross College Programs | Leadership Residential Academic Program

ATLS-2000 (3) The Meaning of Information Technology

Surveys the history of information technologies and modern techniques of information production, storage, transmission, and retrieval. Emphasizes understanding not only the technological transformations in interpersonal, organizational, and mass communication, but also the technological, social and political changes that underlie the movement toward a digital society. HUEN 2020 is restricted to ENGR majors only. ATLS 2000 is restricted to TAM students. ATLS 2000 and HUEN 2020 are the same course.

Cross College Programs | Alliance for Technology, Learning, and Society (ATLAS)

AIRR-2010 (1) The Evolution of USAF Air and Space Power 1

One 1-hour lecture and one 2-hour lab per week. Studies air power from balloons and dirigibles through the jet age and historically reviews air power employment in military and nonmilitary operations in support of national objectives. Looks at the evolution of air power concepts and doctrine and introduces the development of communicative skills.

Cross College Programs | Reserve Office Training Corp | Air Force Aerospace Studies

AIRR-2020 (1) The Evolution of USAF Air and Space Power 2

a continuation of Airr 2010. One 1-hour lecture and one 2-hour lab per week.

Cross College Programs | Reserve Office Training Corp | Air Force Aerospace Studies

NAVR-2020 (3) Seapower and Maritime Affairs

Studies the importance of seapower in history including naval, maritime, and other commercial uses of the sea. Emphasizes significant milestones in the history of the U.S. Navy and Marine Corps and their role in the national strategies and policies of the United States.

Cross College Programs | Reserve Office Training Corp | Naval Science

MILR-2031 (3) Methods of Leadership and Management 1

Comprehensively reviews advanced leadership and management concepts including motivation, attitudes, communication skills, problem solving, human needs and behavior, and leadership self development. Students continue to refine effective written and oral communications skills and to explore topics such as the basic branches of the Army, and officer and NCO duties. Students conduct classroom and practical exercises in small unit light infantry tactics and are prepared to perform as midlevel leaders in the cadet organization.

Cross College Programs | Reserve Office Training Corp | Military Science (U.S. Army)

ATLS-2036 (3) Introduction to Media Studies

Serves as an introduction to media studies, including theories and methodologies for undertaking media scholarship within the humanities. Topics may include the history of the book, text messaging, blogging, and gaming, as well as digital fiction and poetry. Same as ENGL 2036.

Cross College Programs | Alliance for Technology, Learning, and Society (ATLAS)

MILR-2041 (3) Methods of Leadership and Management 2

Focuses on leadership and management functions in military and corporate environments. Studies various components of Army leadership doctrine to include the four elements of leadership, leadership principles, risk management and planning theory, the be-know-do framework, and the Army leadership evaluation program. Continue to refine communication skills.

Cross College Programs | Reserve Office Training Corp | Military Science (U.S. Army)

PRLC-2810 (3) Global Issues in Leadership

Examines the challenges of leadership posed by change and major global issues affecting everyone. Explores issues such as human rights, hunger, disease, large-scale collective violence, and environmental deterioration with a special emphasis on effective, long-term leadership strategies.

Cross College Programs | Leadership Residential Academic Program

PRLC-2820 (3) Multilevel Issues in Leadership

Studies multilevel issues that originate in organizational settings but carry community and global implications. Encourages students to fully explore the complexity and interrelatedness of issues with a special emphasis on leadership and ethical implications. Same as LDSP 2820.

Cross College Programs | Leadership Residential Academic Program

PRLC-2930 (3) Leadership Internship

Students analyze the leadership styles within a host organization, examine how successfully an organization fulfills its mission, and further refine their own theories of what constitutes effective leadership. Students also complete a meaningful project over the course of the internship. Prereqs., PRLC 1810, PRLC 1820, and PRLC 2820.

|------------------------|---|
| Cross College Programs | Leadership Residential Academic Program |
|------------------------|---|

AIRR-3010 (3) Air Force Leadership Studies I

Two 1 1/2-hour seminars plus one 2-hour lab per week. Provides an integrated management course emphasizing concepts and skills required by the successful manager and leader. Includes individual motivational and behavioral processes, leadership, communication, and group dynamics while providing foundation for the development of the junior officer's professional skills (officership). Emphasizes decision making and use of analytic aids in planning, organizing and controlling in a changing environment. Discusses organizational and personal values (ethics), management of change, organizational power, politics, managerial strategy, and tactics within the context of military organization. Uses actual Air Force case studies throughout the course to enhance the learning and communication process.

| | | |
|------------------------|------------------------------|-----------------------------|
| Cross College Programs | Reserve Office Training Corp | Air Force Aerospace Studies |
|------------------------|------------------------------|-----------------------------|

ATLS-3010 (3) Digital Media 1

Introduces techniques, software, and related concepts of digital design and image making through individual and group projects. Emphasizes digital animation, digital audio, digital video and website design and development as a means to formal and expressive ends. Introduces students to critical readings and theories related to digital media practice. May be repeated up to 6 total credit hours. Prereq., ATLS 2000. Restricted to TAM students.

| | |
|------------------------|--|
| Cross College Programs | Alliance for Technology, Learning, and Society (ATLAS) |
|------------------------|--|

AIRR-3020 (3) Air Force Leadership Studies II

Two 1 1/2-hour seminars and one 2-hour lab per week. Continuation of AIRR 3010. Emphasizes basic managerial processes while employing group discussions, case studies, and role playing as learning devices. Continues to emphasize the development of communicative skills.

| | | |
|------------------------|------------------------------|-----------------------------|
| Cross College Programs | Reserve Office Training Corp | Air Force Aerospace Studies |
|------------------------|------------------------------|-----------------------------|

ATLS-3020 (3) Digital Media 2

A continuation of Digital Media 1 (ATLS 3010), this course introduces students to advanced digital media development including interactive programming, scripting, and database functionality. Emphasizes a historical and conceptual understanding of programming and computational theories. May be repeated for a total of 6 credit hours. Prereq., ATLS 2000 and ATLS 3010. Restricted to students with minor in Technology, Arts & Media (MTAM). Prerequisites: Restricted to students with minor in Technology, Arts, and Media (MTAM).

| | |
|------------------------|--|
| Cross College Programs | Alliance for Technology, Learning, and Society (ATLAS) |
|------------------------|--|

NAVR-3020 (3) Naval Operations and Seamanship

Examines the Inland and International Rules of the Nautical Road, including court interpretations, principles of relative motion and vector analysis with the maneuvering board, ship handling procedures, weather, communications, tactical operations, and maritime law.

JOUR-1001 (3) Contemporary Media Analysis

An introduction to the role of media in contemporary society, focusing on the cultural, political, economic, and historical context within which print and media technologies developed and how audiences interact with and influence the use of media. Restricted to Journalism & Mass Communication (JOUR) or Arts and Sciences Open Option majors (XXAS) majors only. Prerequisites: Restricted to Journalism and Mass Communication (JOUR) or Arts and Sciences Open Option majors (XXAS) majors only.

[Journalism & Mass Communication Program](#) [Journalism](#) [Core Curr & General Electives](#)

JOUR-1871 (1-3) Special Topics for First-Year Students

Special studies in media that are specific for first-year students. May be repeated for a maximum of three credit hours.

[Journalism & Mass Communication Program](#) [Journalism](#) [Core Curr & General Electives](#)

JOUR-2011 (3) Media and Public Culture

Introduces the rise and development of mediated communication and its impact on and role within the formation of modern culture and public life. Restricted to JOUR majors.

[Journalism & Mass Communication Program](#) [Journalism](#) [Core Curr & General Electives](#)

JOUR-2403 (3) Principles of Advertising and Consumer Culture

Explores creative and strategic thinking plus the nature and functions of promotions, event-marketing, public relations, and advertising and their growing interdependence in a changing media landscape. Considers technology's impact and the effect of commercial culture on an increasingly diverse society. Restricted to School of Journalism and Mass Communication (JOUR) or

Marketing (MKTG) majors only. Prerequisites: Restricted to School of Journalism and Mass Communication (JOUR) or Marketing (MKTG) majors only.

Journalism & Mass Communication Program Journalism Core Curr & General Electives

JOUR-2601 (3) Principles of Journalism and Networked Communication

Surveys the history, practices and responsibilities of journalism in a democracy. Examines ethics, best practices in institutional and network settings, reporting and writing, international news systems, personal branding, and strategies for creating and distributing content across media platforms. Promotes the highest professional values and encourages students to be leaders who recognize the possibilities of journalism in a democratic society. Restricted to Journalism and Mass Communication (JOUR) majors only. Prerequisites: Restricted to Journalism and Mass Communication (JOUR) majors only.

Journalism & Mass Communication Program Journalism Core Curr & General Electives

JOUR-3001 (3) Public Affairs Reporting

Grounds students in the basic newsgathering skills needed to work for news enterprises. Students learn techniques central to researching, reporting and writing stories for various media formats, including print, online, and broadcast journalism. Prereq., JOUR 2601 or 1002. Prerequisites: Requires prerequisite course of JOUR 2601 or 1002. Restricted to News Editorial (NSED-BSJR or JNED-BSJR) majors and with a minimum of 57 hours taken.

Journalism & Mass Communication Program Journalism Print & Online Journalism

JOUR-3002 (3) Multimedia Reporting and Production

Equips students with the tools and techniques needed to produce multimedia content. Classroom instruction offers students historical, social and cultural contexts for the emergence of new media forms. Skills and practices covered include website design and construction, nonlinear video editing, digital graphics design, interactive information presentation, and multimedia reporting. Restricted to juniors/seniors. May be limited to JOUR majors. Prerequisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Journalism & Mass Communication Program Journalism Print & Online Journalism

JOUR-3102 (3) Photojournalism I

Introduces the basic elements of visual communication. Covers the use of camera systems, digital imaging techniques and other aspects of photojournalism including law, ethics, history and critical decision-making. Prereq., JOUR 2601. Prerequisites: Restricted to Program in Journalism and Mass Communication students with a minimum of 57 hours taken.

Journalism & Mass Communication Program Journalism Print & Online Journalism

JOUR-3403 (3) Branding and Positioning

Examines the theory and practice of branding, target segmentation and how the digital space and the rapid rise of consumer generated content have impacted brand management. Students analyze audience research, and the competitive set to develop brand positions and benefits. Prereq., JOUR 2403. Prerequisites: Requires pre-requisite course of JOUR 2403. Restricted to Advertising (ADVT-BSJR or JADV-BSJR) or Marketing (MKTG) majors only with a minimum of 45 hours taken.

Journalism & Mass Communication Program Journalism Advertising & Media Design

JOUR-3453 (3) Introduction to Creative Concepts

Provides an opportunity to explore approaches to creative problem solving and visual thinking. Students draw on this theoretical foundation to develop advertising ideas in a variety of media for both commercial clients and non-profit organizations. Prereq., JOUR 2403. Prerequisites: Requires pre-requisite course of JOUR 2403. Restricted to Advertising (ADVT-BSJR or JADV-BSJR) or Marketing (MKTG) majors only with a minimum of 45 hours taken.

Journalism & Mass Communication Program | Journalism | Advertising & Media Design

JOUR-3463 (3) Advertising Media

Studies media, markets, and audiences, and their relationships to advertising messages. Prereqs., JOUR 3403 and 3453. Prerequisites: Requires pre-requisite courses of JOUR 3403 and 3453. Restricted to students with 57-180 credits (Junior or Senior) Advertising (ADVT-BSJR or JADV-BSJR) or Marketing (MKTG) majors only.

Journalism & Mass Communication Program | Journalism | Advertising & Media Design

JOUR-3473 (3) Advertising Research

Introduces students to applied research methods and provides practice in using research in marketing and advertising decision making. Prereqs., JOUR 3403 and 3453. Restricted to junior/senior JOUR, MKTG and ADVT majors.

Journalism & Mass Communication Program | Journalism | Advertising & Media Design

JOUR-3503 (3) Intermediate Creative Concepts

Explores both strategic and creative thinking and examines approaches to narrative storytelling as a tool for telling overarching brand stories. Students use the foundation to develop creative briefs and advertising campaigns. Prereqs., JOUR 3403, 3453 and instructor consent. Coreq., JOUR 4513. Prerequisites: Prereq., JOUR 3453 and instructor consent. Coreq., JOUR 4513.

Journalism & Mass Communication Program | Journalism | Advertising & Media Design

JOUR-3552 (3) Editing and Presentation

Explores copy editing, graphic principles and processes, new media technology. Prereq., JOUR 3001. Prerequisites: Requires pre-requisite course of JOUR 3001. Restricted to students with 57-180 credits (Junior or Senior) News Editorial (NSED-BSJR or JNED-BSJR) majors only.

Journalism & Mass Communication Program | Journalism | Print & Online Journalism

JOUR-3604 (3) Radio and Television News

Covers principles and techniques involved in the preparation of news for broadcasting. Prereq., JOUR 2601. Restricted to Broadcast News or Broadcast Production majors only with a minimum of 57 hours taken. Prerequisites: Requires pre-requisite course of JOUR 2601. Restricted to Broadcast News (BCNS-BSJR or JBCN-BSJR) or Broadcast Production (BCPM-BSJR or JBCP-BSJR) majors only with a minimum of 57 hours taken.

Journalism & Mass Communication Program | Journalism | Broadcast Journalism

JOUR-3614 (3) Principles of Audio Production

Introduces audio production techniques using digital technologies. Students learn to apply fundamental principles to create professional radio and online programs including podcasting. Restricted to Journalism majors with a minimum of 45 hours taken. Prerequisites: Restricted to School of Journalism and Mass Communication majors with a minimum of 45 hours taken.

Journalism & Mass Communication Program | Journalism | Broadcast Journalism

JOUR-3644 (3) Principles of Television Production

Emphasizes the use of video technologies in both field and studio production, camera and editing work, producing and directing for professional program production. Prereq., JOUR 2601. Restricted to Broadcast News or Broadcast Production majors only with a minimum of 57 hours taken. Prerequisites: Requires pre-requisite course of JOUR 2601. Restricted to Broadcast News (BCNS-BSJR or JBCN-BSJR) or Broadcast Production (BCPM-BSJR or JBCP-BSJR) majors only with a minimum of 57 hours taken.

Journalism & Mass Communication Program | Journalism | Broadcast Journalism

JOUR-3674 (3) Television Production 2

Covers studio productions for "Newsteam Boulder." Students also do field projects to sharpen their writing, video production, and editing skills. Prereq., JOUR 3644. Prerequisites: Requires pre-requisite course of JOUR 3644. Restricted to students with 57-180 credits (Junior or Senior) Broadcast News (BCNS-BSJR or JBCN-BSJR) or Broadcast Production (BCPM-BSJR or JBCP-BSJR) majors only.

Journalism & Mass Communication Program | Journalism | Broadcast Journalism

JOUR-3771 (3) Media and Communication History

Examines the historical development of various communication technologies (printing press, photography, film, radio, television, computers, Internet); their impact on culture (forms of expression and social relationships); and their relation to various conceptions of the public (citizens, audiences, consumers, markets). Draws on history to explore current issues in media, popular culture and their relation to public life. Prereq., junior or senior standing. May be limited to majors.

Journalism & Mass Communication Program | Journalism | Core Curr & General Electives

JOUR-3902 (1-3) Newspaper Practicum

Gives students the opportunity to participate in newswork on Campus Press. May be repeated up to 6 total credit hours. Instructor consent required.

Journalism & Mass Communication Program | Journalism | Print & Online Journalism

JOUR-3913 (1-3) Advertising Practicum

Provides the opportunity to do advertising work outside existing classes. May be repeated up to 6 total credit hours. Instructor consent required.

Journalism & Mass Communication Program Journalism Advertising & Media Design

JOUR-4002 (3) Reporting 2

Assumes mastery of basic reporting and writing skills. Students produce more sophisticated stories on a variety of topics. Prereq., JOUR 3001. Prerequisites: Requires pre-requisite course of JOUR 3001. Restricted to students with 57-180 credits (Junior or Senior) News Editorial (NSED-BSJR or JNED-BSJR) or Journalism and Mass Communication (JOUR) majors only.

Journalism & Mass Communication Program Journalism Print & Online Journalism

JOUR-4102 (3) Photojournalism Portfolio

Advanced course intended to give students a forum in which technical skills will be brought to professional standards. Build a polished portfolio of work to present to editors and buyers. Prereq., JOUR 3102. Prerequisites: Requires a prerequisite course of JOUR 3102.

Journalism & Mass Communication Program Journalism Print & Online Journalism

JOUR-4201 (3) Media, Culture and Globalization

Surveys the political and economic structures of media system in developed and developing countries and discusses the impact of privatization, ownership consolidation, and globalization on the flow of information across national borders. Also looks at how global media flows and counter-flows affect conceptions of nationhood and cultural identity. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) Journalism & Mass Communication (JOUR) or International Affairs (IAFS) majors only.

Journalism & Mass Communication Program Journalism Core Curr & General Electives

JOUR-4211 (3) East Asian Media and Culture

Offers an understanding of the various people, cultures and nations of East Asia through their media systems. Provides a critical overview of the historical, cultural, social, political and economic dimensions of East Asian communication systems in today's digitally connected/disconnected world. Restricted to junior/senior SJMC majors. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) School of Journalism & Mass Communication majors only.

[LAWS-5103 \(1\) Legal Ethics & Professionalism: What Kind of Lawyer Do You Want to Be?](#)

Explores both the kind of law students might decide to practice and the ethical, personal, and professional commitments central to the practice of law. Students who elect to participate in this 1-unit elective are committing to enroll in the fall of the 2nd year in LAWS 6133 for 2 units, focusing on the Model Rules of Professional Conduct. Prerequisites: Restricted to Law students only.

[Law School](#) [Law](#) [Jurisprudence and Perspective](#)

[LAWS-5121 \(4\) Contracts.](#)

Covers basic principles of contract liability, offer, acceptance and consideration, statute of frauds, contract remedies, the parole evidence rule, performance of contracts, conditions, effect of changed circumstances, third-party beneficiaries, assignment, and specific performance.

[Law School](#) [Law](#) [Business](#)

[LAWS-5201 \(1\) Entrepreneurship, Innovation and Public Policy](#)

Explores cutting edge questions around entrepreneurship, including being an entrepreneur, leadership and what makes a great founding team, building and scaling a business, entrepreneurial communities, financing entrepreneurial companies, leadership in government, entrepreneurship and innovation policy. Restricted to Law students only. Prerequisites: Restricted to Law students only.

[Law School](#) [Law](#) [Business](#)

[LAWS-5205 \(3\) Legislation and Regulation](#)

Introduces lawmaking in the modern administrative state. Examines the way Congress and administrative agencies adopt binding rules of law (statutes and regulations, respectively) and the way

that implementing institutions--courts and administrative agencies--interpret and apply these laws. Considers the structure of the modern administrative state, the incentives that influence the behavior of the various actors, and the legal rules that help to structure the relationships among Congress, the agencies, and the courts. Restricted to LAWS students. Prerequisites: Restricted to Law students only.

Law School Law Government and Public

LAWS-5211 (1) Framing and Legal Narrative

Explores the role of framing effects in constructing a legal argument. From an appellate court opinion to closing statement to a jury to a white paper to a regulatory agency to a public campaign for a ballot proposition, the role of an overarching narrative is critical to effective persuasion. Prerequisites: Restricted to Law students only.

Law School Law

LAWS-5223 (2) Legal Writing II

Students prepare appellate briefs and related documents and deliver oral arguments before a three-judge court composed of faculty, upper-division students, and practicing attorneys. Practice arguments are videotaped and critiqued.

Law School Law Litigation and Procedure

LAWS-5226 (2) Legal Writing I

Provides an intensive introduction to the resources available for legal research. Students also prepare written material of various kinds designed to develop research skills, legal writing style, and analysis of legal problems. Prerequisites: Restricted to Law students only.

Law School Law Research and Writing

LAWS-5303 (4) Civil Procedure

Studies modern practice in civil suits, including rules governing pleading, joinder of parties, discovery, jurisdiction of courts over the subject matter and parties, right to jury trial, appeals, and res judicata and collateral estoppel, with emphasis on the Federal Rules of Civil Procedure and their Colorado counterpart. Prerequisites: Restricted to Law students only.

Law School Law Litigation and Procedure

LAWS-5313 (3) Civil Procedure 2

Studies modern practice in civil suits, including rules governing pleading, joinder of parties, discovery, jurisdiction of courts over the subject matter and parties, right to jury trial, appeals, and res judicata and collateral estoppel, with emphasis on the Federal Rules of Civil Procedure and their Colorado counterpart.

Law School Law Litigation and Procedure

LAWS-5323 (1) Courtroom Observation Civil

An elective that requires fifteen hours observing actual civil proceedings in a courtroom(s), attending a two-hour class meeting every other week, preparing and submitting a journal of recorded observations. Figuring out how to gain access to appropriate proceedings is part of the student's work, although the professor is available for advice and guidance. Course is offered for Pass/Fail only. Prerequisites: Restricted to Law students only.

Law School | Law | Jurisprudence and Perspective

LAWS-5425 (3) Torts

Studies nonconsensual allocation of losses for civil wrongs, focusing primarily on concepts of negligence and strict liability. Prerequisites: Restricted to Law students only.

Law School | Law | Government and Public

LAWS-5503 (4) Criminal Law

Studies statutory and common law of crimes and defenses, the procedures by which the law makes judgments as to criminality of conduct, the purposes of criminal law, and the constitutional limits upon it.

Law School | Law | Litigation and Procedure

LAWS-5513 (1) Courtroom Observation Criminal

An elective that requires fifteen hours observing actual criminal proceedings in a courtroom(s), attending a two-hour class meeting every other week, preparing and submitting a journal of recorded observations. Figuring out how to gain access to appropriate proceedings is part of the student's work, although the professor is available for advice and guidance. Course is offered for Pass/Fail only. Prerequisites: Restricted to Law students only.

Law School | Law | Jurisprudence and Perspective

LAWS-5624 (4) Property

Topics include personal property, estates and interests in land, landlord-tenant, basic land conveyancing, and private land use controls. Prerequisites: Restricted to Law students only.

Law School | Law | Property

LAWS-5634 (2-3) Property 2

Topics include personal property, estates and interests in land, landlord-tenant, basic land conveyancing, and private land use controls.

Law School | Law | Property

LAWS-5803 (1) Courtroom Observation International

An elective that requires fifteen hours observing proceedings before an international tribunal(s), attending a two-hour class meeting every other week, preparing and submitting a journal of recorded observations. The proceedings observed will be available streaming online and the professor will provide information about how to gain access to them. Prerequisites: Restricted to Law students only.

Law School | Law | Jurisprudence and Perspective

LAWS-6002 (3) Public Land Law

Deals with the legal status and management of resources on federal lands, including national forests, parks, and BLM lands. Explores federal law, policy, and agency practice affecting the use of mineral, timber, range, water, wildlife, and wilderness resources on public lands. Prereq., LAWS 6112.

Law School | Law | Envir, Nat Resources, Amer Ind

LAWS-6004 (3) Real Estate Transactions

Focuses on legal issues that arise in all phases of real estate transactions, with an emphasis on the role of the lawyer in the business of real estate as well as on the regulation of real estate markets.

Law School | Law | Property

LAWS-6005 (4) Constitutional Law

Studies constitutional structure: judicial review, federalism, separation of powers; and constitutional rights of due process and equal protection.

Law School | Law | Government and Public

LAWS-6007 (4) Income Taxation

Emphasizes the fundamentals of the federal income tax system and examines its impact on the individual. Prerequisites: Restricted to Professional Year 1, 2, or 3 Law students only.

Law School | Law | Taxation

LAWS-6008 (3) The International Legal Order: History & Foundations (1500-1950)

Examines the structural and historical aspects of the international legal system. Examines contemporary attitudes, doctrines, and theories of international law by exploring the fundamental questions since the discipline's inception in the Sixteenth Century. Provides a working familiarity with the origins of Public International Law, International Human Rights Law, International Criminal Law, International Organizations, International Trade Law, Law and Development, and Conflict of Laws. Prerequisites: Restricted to Law students only.

Law School | Law | International

LAWS-6009 (4) Legal Aid Civil Practice 1

Emphasizes procedural and practical remedies and defenses available in civil litigation. Assigns civil cases related to the course material. Develops working knowledge of courtroom skills. Prereq. or coreq., LAWS 6353. Prerequisites: Restricted to Law students only.

Law School | Law | Practice: Clinical & Simulation

LAWS-6011 (3) Payment Systems

Examines the methodology and policies of Articles 3 and 4 of the Uniform Commercial Code, dealing with such topics as negotiable instruments, bank deposits, collections, letters of credit, and electronic fund transfers.

Law School | Law | Business

LAWS-6019 (4) Civil Practice Clinic 2

Emphasizes procedural and practical remedies and defenses available in civil litigation. Assigns civil cases related to the course material. Develops working knowledge of courtroom skills. Prereq. or coreq., LAWS 6353.

Law School | Law | Practice: Clinical & Simulation

LAWS-6021 (3) Secured Transactions

Explores the methodology and policies of Article 9 of the Uniform Commercial Code, dealing with financing transactions in personal property.

Law School | Law | Business

BCOR-1010 (3) Introduction to Business

Provides an overview of how business works through the application and integration of the fundamental business functions of accounting, finance, management, marketing, and systems. Weekly discussion of current events will focus on entrepreneurship, international business, business and society, and career topics. Restricted to freshmen business majors. Prerequisites: Restricted to Business majors with less than 53 units.

[Leeds School of Business](#) [Business Core](#)

BCOR-1020 (3) Business Statistics

Covers descriptive statistics, basic probability theory, statistical inference and hypothesis testing, correlation and simple linear regression analysis. Students learn decision making and solving business problems by using data. Uses statistical features of commonly used business spreadsheet software. Formerly BCOR 2010. Credit not granted for this course and MATH 2510. Prerequisites: Requires pre-requisite course of MATH 1071 or ECON 1078 or MATH 1001 or MATH 1011 or MATH 1150 or MATH 1300 or MATH 3130 or APPM 3310 or APPM 2360 or APPM 2380. Restricted to Business, ADVT or IAFS Majors only.

[Leeds School of Business](#) [Business Core](#)

BADM-1250 (1) First Year Seminar for Business

Surveys the entire undergraduate experience and includes topics, issues, and practices that focus on the professional, academic, and leadership growth of a business student. It addresses how to make an effective transition to college and puts students on a path to become well-rounded, engaged and globally-minded. Students will acquire the knowledge and skills to take advantage of all the opportunities and support services available to them while learning to balance the challenges and expectations of their business degree. A sample of the topics covered include: transition to college, dealing with academic rigor, developing a professional tool kit--resume and cover letter preparation, interview skills, project management, working in teams and public speaking--and preparing for the role as a global business leader. Prerequisites: Restricted to College of Business majors only.

[Leeds School of Business](#) [Business Administration](#)

BADM-1260 (2) First-Year Global Experience

In today's world of increased mobility, globally aware students have more choices for employment upon graduation and are immediately ready to contribute in global environments. They are aware of global issues and cultural differences, and their global mindset allows them to recognize good ideas from wherever they might come and new market/product opportunities wherever they might exist. This course is the first step toward the development of a global mindset. It provides a meaningful global experience to first-year business students through an in-depth perspective of a specific country or region outside the United States and a short academic trip to the region. Prerequisites: Restricted to College of Business majors only.

Leeds School of Business | Business Administration

BCOR-2000 (4) Accounting and Financial Analysis

Builds a basic understanding of how information regarding a firm's resources and obligations is conveyed to decision makers both outside and within the firm. Prerequisites: Requires pre-requisite course of BCOR 1020 or MATH 2510 or ECON 3818 or APPM 3570 or 4570 or CHEN 3010 or CVEN 3227 or IPHY 2800 or MATH 4510 or PSCI 2075 or PSYC 3101. Restricted to majors in Business, SPPR-PRO, IAFS, or students with WBE subplan.

Leeds School of Business | Business Core

BADM-2010 (1) Excel Lab

Teaches beginner to intermediate level Excel skills, emphasizing efficient use of Excel to make sense of substantial data sets. The course is designed to increase students' proficiency with Excel through a series of hands-on workshops. The workshops have a business problem solving orientation and use real data from Leeds' corporate partners. The workshops emphasize the most important skills that employers value. Prerequisites: Restricted to College of Business majors only.

Leeds School of Business | Business Administration

BADM-2050 (3) Honors/Special Topics

Variable topics in business, drawing from a variety of disciplines. Prereq., 3.50 minimum cumulative GPA.

Leeds School of Business | Business Administration

BCOR-2200 (3) Introductory Finance

Emphasizes the concepts and skills needed to make sound financial decisions. Topics include financial statement analysis, time value of money, interest rates, bond valuation and bond markets, stock valuation and stock markets, cost of capital and capital structure, capital budgeting, financial forecasting, and working capital management. Formerly BCOR 2100. Prerequisites: Requires pre-req course of BCOR1020 or MATH2510 or ECON3818 or APPM3570 or 4570 or CHEN3010 or CVEN3227 or IPHY2800 or MATH4510 or PSCI2075 or PSYC3101 and BCOR2000. Restricted to Bus., IAFS majors, students w/WBE subplan and 26-180 units completed.

Leeds School of Business | Business Core

BCOR-2300 (3) Adding Value with Management

Focuses on how modern business firms compete in the global marketplace by adding value. Examines the value-chain of a firm and how firms use people, organizations, operations, and information systems to compete and win in world markets. Also covers contemporary issues such as total quality management, process reengineering, teams and team building, employee

empowerment, and horizontal organizations. Prereq., BCOR 1010. Restricted to Business, SPPR-PRO majors, or students with a subplan of WBE only and 26-180 units completed. Formerly BCOR 2150. Prerequisites: Restricted to Business majors, SPPR-PRO majors, or students with a subplan of WBE only and 26-180 units completed.

Leeds School of Business | Business Core

BCOR-2400 (3) Fundamentals of Marketing

Examines how activities in organizations provide value to the purchasers of its products and services. Includes gathering information about consumers and competitors through research and information systems, applying knowledge and technology to the design of products and services, communicating information to consumers and organizational units, and pricing and distributing products and services. Also includes issues in global marketing, ethics and diversity, relationship marketing, and integrating marketing with financial analyses. Prerequisites: Requires pre-req course of BCOR1020 or MATH2510 or ECON3818 or APPM3570 or 4570 or CHEN3010 or CVEN3227 or IPHY2800 or MATH4510 or PSCI2075 or PSYC3101. Restricted to Bus., SPPR-PRO, IAFS, or ADVT majors, students w/WBE subplan and 26-180 units.

Leeds School of Business | Business Core

BCOR-2500 (3) Introduction to Operations and Information Management

Takes a systems perspective in exploring the use of information, processes, and models used by businesses to produce goods and services and to effectively manage accounting, finance, human resources, strategy, supply chains/inventory, and other activities in a business. Focuses on making better business decisions faster through better business intelligence by using the right information, at the right time, provided to the right managers. Prerequisites: Requires pre-requisite course of BCOR 1020 or MATH 2510 or ECON 3818 or APPM 3570 or 4570 or CHEN 3010 or CVEN 3227 or IPHY 2800 or MATH 4510 or PSCI 2075 or PSYC 3101. Restricted to Business majors with 13-180 units completed.

Leeds School of Business | Business Core

ACCT-2820 (3) Introduction to Personal Financial Planning

Introduces the concepts, tools, and applications of personal financial planning. Provides the students with tools and techniques for managing their personal finances. With these skills, students gain the ability to effectively deal with their ever-changing financial environment. Restricted to students with at least 26 hours completed.

Leeds School of Business | Accounting

BADM-2880 (3) Special Topics

Explores historical developments, contemporary issues, industry trends, and best practices pertinent to the business of sports. The course examines how sports enterprises are managed, and the impacts that such enterprises have on the economic and social fabric of communities. The course is designed to provide sufficient background for educated consumption of this literature and pursuit of further study if desired. Restricted to sophomores/juniors/seniors.

Leeds School of Business | Business Administration

BCOR-3000 (3) Business Law, Ethics, and Public Policy

Surveys major topics and case studies in business law, business ethics, and government policy. Business law topics include the American legal system, constitutional law, common law, contract principles, criminal and tort law, intellectual property, employment law, and personal and real property law. Ethics topics include the philosophy of law, legal versus moral issues, and professional

responsibility. Public policy topics include the roles of business and government, types of government intervention, and the nature and theory of governmental policy formulation. Prerequisites: Restricted to Business majors, Spanish (SPPR) majors, students with a subplan of WBE, and 52-180 units completed.

Leeds School of Business | Business Core

REAL-3000 (3) Principles of Real Estate

Introduction to real estate as an asset with associated property rights, an industry, profession, and investment. Covers a broad spectrum of real estate principles and terms including legal concepts, regulation and land use, industry issues, valuation, financing methods and sources, and investment analysis. Excellent elective for all students and provides the foundation for other real estate courses. Prereq., BCOR 1010, 1020, 2000, 2200, and 52 hours completed. Prerequisites: Requires pre-requisite course of BCOR 2200. Restricted to Business majors with 52-180 units completed.

Leeds School of Business | Real Estate

BCOR-3010 (3) Business Applications of Social Responsibility

Explores alternative views of the role of business in our global society through detailed case analyses, beginning with the free market view. This is a cross-functional area course that helps students to isolate and articulate their personal values that will shape business conduct. Emphasizes individual and organizational responsibility for business behavior in the broader social context. Prerequisites: Requires pre-requisite courses of BCOR 2000, 2200, 2300, 2400 & 2500. Restricted to Business majors with 60-180 units completed.

Leeds School of Business | Business Core

FNCE-3010 (3) Corporate Finance

Covers the theory and practices governing the management of capital in a business firm. Examines the determinants of capital requirements, methods of obtaining capital, problems of internal financial management, and methods of financial analysis. Prerequisites: Requires pre-requisite courses of BCOR 2000 and 2200. Restricted to Business Majors with 52-180 units completed.

Leeds School of Business | Finance

MGMT-3030 (3) Critical Leadership Skills

Provides an opportunity to learn about and practice the skills required of all managers. These skills include leadership, negotiation, conducting performance appraisals, delegation, effective communication, interviewing and making hiring decisions, and managing employees with problem behaviors. Objectives include developing self-awareness of strengths and weaknesses as a manager, gaining familiarity with theory-based skills, and developing proficiency in the use of these skills. Prereq., BCOR 2300. Restricted to students with 52 hours completed. Prerequisites: Restricted to Business majors with 52-180 units completed.

Leeds School of Business | Management

BADM-3100 (1) Professional Development

Designed to provide opportunities to understand and develop professional competencies for successful careers in business. Designed to increase knowledge of job search strategies and formulate a career management plan for transitioning to the workplace. Topics such as resumes, cover letters, personal branding, job search strategies, internships, career choices, networking and social media will be covered. A Self-Marketing Plan will be developed to help focus on long-term career goals. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) Leeds School of Business (BUSN) majors only.

Leeds School of Business | Business Administration

ESBM-3100 (3) Introduction to Entrepreneurship

Introduces non-business students to the multiple facets of entrepreneurship and the entrepreneurial process. Entrepreneurship is a process of fundamental transformation: from innovative idea to enterprise and from enterprise to valuetus, entrepreneurship is more than a business practice. Innovation is central to this process and students will be challenged to develop creative solutions to a problem or need. Restricted to non-Business majors with 60-180 units completed. Prerequisites: Restricted to non-Business majors with 60-180 units completed.

Leeds School of Business | Entrepreneurship and Small Business Management

MGMT-3100 (3) Management of Service Operations

Examines concepts, tools and techniques used in the management of service operations. Focuses on how firms add value and compete with high quality and efficient services. Emphasizes the use of models for designing new services and improving the effectiveness of service processes. Studies the application of technology in the context of productivity, growth and the globalization of services. Restricted to Business (BUSN) majors with 52-180 units completed. Prereq., BCOR 2500. Formerly SYST 3030, OPIM 3030. Prerequisites: Restricted to Business (BUSN) majors with 52-180 units completed.

Leeds School of Business | Management

MKTG-3150 (3) Sales Management

Explores the selling task and the essentials of managing the sales force. Includes recruiting, selecting and hiring, training, compensating, supervising, and controlling. Covers sales organization, sales planning, sales forecasting, assigning territories, quotas, and sales analysis. Prereq., BCOR 2400. Restricted to students with 52 hours completed. Formerly MKTG 4150. Prerequisites: Restricted to Business or Advertising majors and 52-180 hours completed.

Leeds School of Business | Marketing

ESBM-3200 (3) Principles of Business for Entrepreneurs

Provides non-business students with a basic understanding of the business principles required to start and grow an entrepreneurial venture. It is intended for individuals who have not taken a marketing, accounting or finance course. This course will focus on two aspects of business that are critical to the success of any new venture: marketing and financial management. Restricted to non-Business majors with 60-180 units completed. Prerequisites: Restricted to non-Business majors with 60-180 units completed.

Leeds School of Business | Entrepreneurship and Small Business Management

MGMT-3200 (3) Business Intelligence

Focuses on acquiring accurate and timely knowledge to make effective operational, tactical and strategic decisions. This course focuses on how to create and use such knowledge. Topics include problem definition; critical factor isolation; data collection, storage, and querying; transformation of data into knowledge through appropriate analyses and aggregation; and the presentation of the knowledge to decision makers in meaningful ways. Restricted to Business (BUSN) majors with 52-180 units completed. Prereq., BCOR 2500. Formerly SYST 3100, OPIM 3100. Prerequisites: Restricted to Business (BUSN) majors with 52-180 units completed.

Leeds School of Business | Management

MGMT-3210 (3) Business Application Programming

Uses computer programming to teach a complex problem solving skill. Its two main course objectives are: (1) learn to use a structured problem decomposition method, designed to help decompose a complex problem into manageable sub-problems. This method is best exemplified in programming but is applicable to any complex business problem. (2) understand the core concepts of programming--such as variable, object model, and control flow--that will help you not only appreciate the power of programming behind modern technologies but also better understand business process models. Formerly SYST 2010, OPIM 2010 and MGMT 2010.

ENVD-1004 (3) Introduction to Environmental Design Theory

Introduces students to the complexity of forces that interact to shape the designed environment. A lecture sequence and parallel set of design exercises exposes students to the theory and practice of environmental design, and to the important issues that guide the work of architects, landscape architects, urban designers, and urban planners. Open to nonmajors on a space available basis. Coreqs., ENVD 1052, 2001. Prerequisites: Restricted to Environmental Design majors only.

[Program in Environmental Design](#) [Environmental Design](#) [History and Theory](#)

ENVD-1010 (3) Design Appreciation

Designed for students who are interested in pursuing a degree in design. Provides a foundation for viewing the world through the "eyes" of a designer and gives a broad overview of various design professions including: Architecture, Planning, Landscape Architecture, and Industrial Design through a basic history of design and speculation concerning the future of these professions. Restricted to non-ARPL students. Prerequisites: Restricted to non-Environmental Design majors only.

[Program in Environmental Design](#) [Environmental Design](#) [History and Theory](#)

ENVD-1052 (3) Design and Communication 1

Using both lectures and drawing exercises, this class extends understandings of the representational conventions used by the design professions through its introduction to the possibilities offered by emerging digital techniques for the depiction of designed artifacts and environments, allowing students to extend and enhance their understandings of advanced practices for design visualization, representation, and communication. Coreqs., ENVD 1004, 2001. Prerequisites: Restricted to Environmental Design majors only.

[Program in Environmental Design](#) [Environmental Design](#) [Methods and Techniques](#)

ENVD-1102 (3) Design and Communication 2

Using both lectures and drawing exercises, this class extends understandings of the representational conventions used by the design professions through its introduction to the possibilities offered by traditional techniques for the advanced practices for design visualization, representation, and communication. Prereqs., ENVD 1004, 1052, 2001. Coreqs., ENVD 1104, 2003.

Prerequisites: Requires prerequisite courses of ENVD 1004, ENVD 1052, and ENVD 2001 (min grade C- for all). Restricted to Environmental Design majors only.

Program in Environmental Design | Environmental Design | Methods and Techniques

ENVD-1104 (3) Introduction to Environmental Design Methods

Explores the forces and conditions that interact to shape the designed environment. It does so through a lecture sequence and parallel set of design exercises introducing students to the theory and practice of environmental design. It develops student understandings of the central role design thinking plays as the unique process used to effect appropriate change in the designed environment. Prereq., ENVD 1004, 1052, 2001. Coreqs., ENVD 1102, 2003. Prerequisites: Requires prerequisite courses of ENVD 1004, ENVD 1052, and ENVD 2001 (min grade C- required for all). Restricted to Environmental Design majors only.

Program in Environmental Design | Environmental Design | History and Theory

ENVD-2001 (3) Human Behavior in Design and Planning

Examines reciprocal relationships between people and their built and natural environments, tracing major issues and approaches in design research to understand how people are influenced by the environment and how they can create healthy, just, and livable places. Coreqs., ENVD 1004, 1052. Prerequisites: Restricted to Environmental Design majors only.

Program in Environmental Design | Environmental Design | Social Factors

ENVD-2002 (3) Environmental Design Media 1

Using both lectures and drawing exercises, this class examines the traditional representational conventions used by the design professions to depict and describe space, form, pattern and information. Uses a multi-disciplined approach that explores the three basic intentions that inform the marks that designers make: visualization, representation and communication. Prereq., ENVD 1004. Open to nonmajors on a space available basis. Prerequisites: Restricted to Environmental Design majors only.

Program in Environmental Design | Environmental Design | Methods and Techniques

ENVD-2003 (3) Ecology and Design

Introduces basic principles and techniques of ecology as they relate to the design and understanding of the built environment. Includes a study of hazards and the impact of modern technology on the natural and built environments. Prereqs., ENVD 1004, 1052, 2001. Coreqs., ENVD 1102, 1104. Prerequisites: Requires prerequisite courses of ENVD 1004, ENVD 1052, and ENVD 2001 (with min grade C- for all). Restricted to Environmental Design majors only.

Program in Environmental Design | Environmental Design | Physical Factors

ENVD-2052 (3) Introduction to Computers in Planning

Introduces the use of computers in design fields, including applications for word-processing, desktop publishing, graphic creation, and Cad-style design. Aims to provide basic general skills in computer use that are transferable to other computer applications. Prerequisites: Restricted to Environmental Design majors only.

Program in Environmental Design | Environmental Design | Methods and Techniques

ENVD-2100 (6) Architecture Studio 1

The first of four architecture studios, this class introduces students to the basic strategies and techniques of architectural design. Focuses on the languages of design, as well as on traditional and digital methods of visualizing architectural ideas and forms. Prereq., ENVD 2002. Prerequisites: Restricted to Environmental Design majors only.

Program in Environmental Design | Environmental Design | Studios

ENVD-2110 (6) Environmental Design Studio

This class exposes students to a sequence of design investigations that lead to the development of design concepts for critical evaluation and discussion. The intent of this introductory design studio is to expose students to fundamental design practices common to the disciplines---architecture, landscape architecture, planning, urban design---that share the responsibility for shaping the designed environment. Prereq., ENVD 2002.

Program in Environmental Design | Environmental Design | Studios

ENVD-2120 (6) Environmental Design Lab - Urban Design

Exposes students to a sequence of design investigations that lead to the development of design concepts for critical evaluation and discussion. The intent of this introductory design studio is to expose students to the fundamental design practices that are common to the disciplines of environmental design, planning, urban design and landscape design - that share the responsibility for shaping the designed environment. Prereqs., ENVD 1102, 1104, 2003. Coreqs., ENVD 3122, 3124. Prerequisites: Requires prerequisite courses of ENVD 1102, ENVD 1104, and ENVD 2003. Restricted to Environmental Design majors only.

Program in Environmental Design | Environmental Design | Studios

ENVD-2130 (6) Environmental Design Studio: Landscape Design

Exposes students to a sequence of design investigations that lead to the development of design concepts for critical evaluation and discussion. The intent of this introductory design studio is to expose students to the fundamental design practices that are common to the disciplines of architecture, urban design and landscape design - disciplines that share the responsibility for shaping the designed environment. Prereqs., ENVD 1004 and 1104. Restricted to ARPL majors. Prerequisites: Requires prerequisite courses of ENVD 2120, ENVD 3122, and ENVD 3124. Restricted to Environmental Design majors only.

Program in Environmental Design | Environmental Design | Studios

ENVD-2152 (3) Geographic Info Systems

Focuses on construction and use of computer-based information systems to represent and manipulate geographic data. Emphasizes the recording, mapping, and transforming of data for analysis and use by planners. Prerequisites: Restricted to Environmental Design majors only.

Program in Environmental Design | Environmental Design | Methods and Techniques

ENVD-3001 (3) Environment and Behavior

Examines the social and behavioral aspects of relationships between people and the designed environment. Gives special attention to antecedent factors (why we have the environments we do),

implications of given arrangements for special population groups, and responses to incongruent environments. Open to nonmajors on a space available basis. Prerequisites: Restricted to Environmental Design majors only.

Program in Environmental Design | Environmental Design | Social Factors

ENVD-3002 (3) Design Theory and Methods

The nature of design and systematic methods for improving design. Topics include: nature of design problems; structure of design process; theory of form; problem definition; generating solution ideas; evaluation; roles of form and function. Students use computers without having to learn to program. Open to nonmajors.

Program in Environmental Design | Environmental Design | Methods and Techniques

ENVD-3003 (3) Site Planning

Introduces the site planning process including: site analysis and its relationship to building program and site concept, and preparation of site plans. Emphasis is placed on the planning of the physical site through a thorough understanding of process, land use, site constraints and synthesis of ecological, functional and aesthetic considerations in the site planning process. Prereqs., ENVD 2120, 3122, 3124. Coreqs., ENVD 2130, 3004. Prerequisites: Requires prerequisite courses of ENVD 2120, ENVD 3122, and ENVD 3124. Restricted to College of Architecture and Planning majors only.

Program in Environmental Design | Environmental Design | Physical Factors

ENVD-3004 (3) History of Landscape Architecture

Investigates landscape architectural thought from antiquity to the present. Begins with a review of Greek ideals and proceeds - through an appreciation of landscape and nature as essential cultural constituents - with a survey of major themes such as Renaissance Humanism, the Picturesque, and the varieties of Modernism, Neo-Eclecticism and most recent directions in landscape and garden design. Prereqs., ENVD 2120, 3122, 3124. Coreqs., ENVD 2130, 3003. Restricted to College of Architecture and Planning undergrads. Prerequisites: Requires prerequisite courses of ENVD 2120, ENVD 3122, and ENVD 3124. Restricted to Environmental Design majors only.

Program in Environmental Design | Environmental Design | History and Theory

ENVD-3009 (1-6) Special Topics in Environmental Design

Provides a seminar or design lab on special issues in environmental design, including study abroad. May be repeated up to 18 total credit hours. Variable topic class. Recommended prereq., ENVD 1004 and 1052. Prerequisites: Restricted to Environmental Design (ENVD) majors only.

Program in Environmental Design | Environmental Design | Miscellaneous

ENVD-3015 (3) Introduction to Historic Preservation

Introduces methods for identifying historic structures and evaluating their materials. Considers techniques for preserving and restoring and legal options for promoting preservation efforts. Prereq., ENVD 2130. Prerequisites: Restricted to Environmental Design majors only.

Program in Environmental Design | Environmental Design | Technology and Practice

ENVD-3022 (3) Technical Photography

Introduces students to the technical and practical aspects of making photographic images: the workings of the camera and lens, principles of depth of field, black and white film processing, printing, and basic darkroom procedures. Open to nonmajors on a space available basis. Prerequisites: Restricted to Environmental Design majors only.

Program in Environmental Design | Environmental Design | Methods and Techniques

ENVD-3052 (3) Introduction to Computer Methods in Environmental Design

Surveys existing and emerging computer methods used in the environmental design professions, with an introduction to computer programming. Open to nonmajors with instructor consent.

Program in Environmental Design | Environmental Design | Methods and Techniques

ENVD-3100 (6) ENVD Studio--Architectural Design

Exposes students to a sequence of design investigations that lead to the development of design concepts for critical evaluation and discussion. The intent of this introductory design studio is to expose students to the fundamental design practices that are common to the disciplines of environmental design, planning, urban design and landscape design - that share the responsibility for shaping the designed environment. Prereqs., ENVD 2130, 3003, 3004. Coreqs., ARCH 3114, ENVD 3115. Restricted to ARPL students only. Prerequisites: Restricted to Environmental Design majors only.

Program in Environmental Design | Environmental Design | Studios

ENVD-3110 (6) Architecture Studio 1

The first of four upper-division studios introduces students to the basic strategies and techniques of architectural design. Focuses on the languages of design, as well as on traditional and digital methods of visualizing architectural ideas and forms. Prereq., ENVD 2110. Restricted to junior/senior ARCH majors.

Program in Environmental Design | Environmental Design | Studios

ARCH-3114 (3) History and Theories of Architecture 1

Surveys architecture, landscape architecture, and urban design from 3000 B.C. to A.D. 1400, emphasizing developments in the Western world. Prereqs., ENVD 2130, 3003, 3004. Coreqs., ENVD 3100, 3115. Prerequisites: Restricted to Environmental Design or College of Engineering and Applied Sciences majors only.

EDUC-2020 (1) Step 1: Inquiry Approaches to Teaching

Invites science and mathematics students to explore teaching as a career by providing first-hand experiences teaching science/math lessons in local elementary classrooms. Introduces theory and practice necessary to design and deliver excellent instruction. Master teachers provide ongoing support and feedback. Meets weekly on CU campus (1.5 hours/week) and involves additional visits to local elementary school. Prerequisites: Restricted to AMEN, ASTR, BCHM, CHEM, EBIO, GEOL, IPHY, MATH, MCDB, PHYS, Arts and Sciences Open Option majors, College of Engineering majors, or Education minors only.

[School of Education](#)
[Education](#)
[General Education](#)

EDUC-2030 (1) Step 2: Inquiry-Based Lesson Design

Builds on EDUC 2020 and further develops lesson design and inquiry-based teaching practice. Offers opportunity to explore teaching career and learn about middle school culture. Master teacher provides support as students design and deliver lessons in middle school classrooms. Emphasizes assessment of student learning. Meets weekly on CU campus (1.5 hours/week) and involves additional visits to local middle school. Prereq., EDUC 2020.

[School of Education](#)
[Education](#)
[General Education](#)

EDUC-2050 (1) Step into Humanities Teaching

Invites students in humanities and social sciences to explore teaching as a career by providing first-hand experiences teaching in local elementary and middle schools. Introduces theory and practice necessary to design and deliver excellent instruction. Students receive ongoing support and feedback from a classroom teacher. Meets weekly on CU campus (1.25 hours/week). Involves additional visits to local schools.

[School of Education](#)
[Education](#)
[General Education](#)

EDUC-2125 (3) History of American Public Education

Provides overview to evolution of American public schools by exploring major reform efforts from the common school movement to present. Considers contentious values, important players, and roots of school structures. Examines both what intellectuals were thinking about public education and how ordinary people experienced schools. Assesses how differences in race, class, ethnicity, gender, and power shape public schools.

School of Education | Education | General Education

EDUC-2150 (3) Education in Film

Provides opportunities to view and analyze how facets of education are represented (or misrepresented) in film. Considers narratives constructed about education and how those stories fuel popular conceptions of and assumptions about students, teachers, and schools. Examines how issues of race, class, and gender are embedded in how films represent schools, teachers, students, and communities.

School of Education | Education | General Education

EDUC-2400 (3) Cultural Diversity and Awareness

Enhances students' self-awareness in a variety of educational and cultural settings. Investigates self within a cultural context, inviting students to engage more deeply with their cultural assumptions and lenses, as well as the cultural practices and beliefs of other distinct groups. Explores themes relating to diversity through works of fiction, cultural contexts, contemplative practices, poetry, music and experiential activities.

School of Education | Education | General Education

EDUC-2625 (3) Teaching English as a Second Language

Exposes students to strategies used to teach English as a second or foreign language. Covers both theoretical and applied aspects of language learning and teaching. Exposes students to techniques, activities, strategies and resources to plan instruction for students learning English as a second language. Emphasizes oral language development, literacy and content-area instruction for teaching K-12 students.

School of Education | Education | General Education

EDUC-2800 (1-3) Special Topics

Designed to meet needs of students with topics of interest. May be repeated up to 12 credit hours.

School of Education | Education | General Education

EDUC-2910 (1-3) Field Practicum 1

Offers supervised campus and off-campus experiences tied to course work in the Chancellor's Leadership RAP or the INVST program. See also EDUC 2920. May be repeated up to 6 total credit hours. Same as LDSP 2910.

School of Education Education General Education

EDUC-2919 (3) Renewing Democracy in Communities and Schools

Examines concepts of activism, citizenship, democracy, power, and diversity through classroom discussions and participation in a local high school's Public Achievement project. Through community-based partnerships, students will develop leadership skills; dialogue with diverse groups of people; identify multiple perspectives around controversial issues; and learn to use research and writing to articulate public problems and advocate for their solutions. May be repeated up to 6 total credit hours. Same as INVS 2919. Approved for arts and sciences core curriculum: human diversity.

School of Education Education General Education

EDUC-2920 (1-3) Field Practicum 2

Offers supervised campus and off-campus experiences tied to course work in the Chancellor's Leadership RAP or the INVST program. See also EDUC 2910. May be repeated up to 6 total credit hours. Same as LDSP 2920.

School of Education Education General Education

EDUC-3013 (3-4) School and Society

Introduces students - both future teachers and those simply interested in education - to pressing issues surrounding education within the United States. The course reveals the complex relationship between schools and the larger society of which they are a part. Examines issues of diversity and equity from different disciplinary lenses, including history, philosophy, sociology and anthropology. Approved for arts and sciences core curriculum: contemporary societies or human diversity. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

School of Education Education General Education

EDUC-3570 (3) Learning With Technology In and Out of School

Examines ways digital media are changing the way young people learn, play, make friends, and participate in civic life. Studies widely implemented digital tools intended to support literary, math, and science learning of children ages 4-18. Involves brief internship (5 hours outside class) and design projects that integrate these tools to transform in either a classroom or after-school program.

School of Education Education General Education

EDUC-3621 (1-3) Art for the Elementary Teacher

Introduces elementary education students to art education. Introduces many visual art techniques, art media, and processes used in art education. The class includes hands-on studio art

experiences in a format that supports subjects such as literature, writing, music, and social studies. Emphasizes the role of art education and materials in supporting the artistic development and visual literacy of children. Prereq., completion of 30 hours of course work. Restricted to Education majors.

School of Education | Education | Elementary Education

EDUC-4015 (3) International / Comparative Education

Comparatively studies education in other countries, emphasizing its role in developing nations, with an emphasis on successful models in basic literacy, primary education, secondary curriculum, and teacher education. Analyzes political, social, and economic policies and ideologies for their relevance to the development process, including the role of international organizations: World Bank, UNICEF, UNESCO, Peace corps and Volunteer Agencies. Same as EDUC 5015.

School of Education | Education | General Education

EDUC-4023 (3-5) Differentiating Instruction in Diverse Secondary Classrooms

Focuses on teaching culturally and linguistically diverse secondary school students, special education students, and differentiation in the secondary classroom. Includes hands-on experiences in secondary school settings. Restricted to students admitted to the secondary or K-12 music teacher education program. Credit not granted for this course and EDUC 4351. Prerequisites: Restricted to EDEN, EDFR, EDGR, EDIT, EDJP, EDLT, EDMA, EDMU, EDSC, EDJU, EDSP, EDSS or MMED majors only.

School of Education | Education | Secondary Education

EDUC-4050 (3) Knowing and Learning in Mathematics and Science

Explores current theories of learning in mathematics and science at the secondary level. This course focuses on the interrelation between learners' conceptual and sociocultural development. Students examine their own assumptions about learning, and critically examine the needs of a diverse student population in the classroom. Prerequisites: Restricted to AMEN, ASTR, BOHM, CHEM, EBIO, GEOL, IPHY, MATH, MCDB, PHYS, Arts and Sciences Open Option majors, College of Engineering majors, or Education minors only.

School of Education | Education | Secondary Education

EDUC-4060 (3) Classroom Interactions

Students design and implement instructional activities informed by what it means to know and learn mathematics and science, and then evaluate the outcomes of those activities on the basis of classroom artifacts. Students examine how content and pedagogy combine to make effective teaching. Same as EDUC 5060. Prerequisites: Restricted to School of Education (EDUC), Mathematics-Secondary Education (EDMA) or Science-Secondary Education (EDSC) majors only.

School of Education | Education | Secondary Education

EDUC-4112 (3) Educational Psychology and Adolescent Development

Analyzes fundamental psychological concepts underlying classroom instruction, as well as adolescent growth and development. Same as PSYC 4114. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

School of Education | Education | Secondary Education

EDUC-4125 (3) Secondary World Language Methods

Presents and discusses issues in secondary school curriculum, instruction, and classroom management as they play out in world language classroom. Examines, analyzes, and evaluates a variety of teaching strategies, their effectiveness for students, and teacher dispositions to facilitate learning. Includes in-school experiences. Restricted to students admitted to the secondary teacher education program. Prerequisites: Restricted to EDEN, EDFR, EDGR, EDIT, EDJP, EDLT, EDMA, EDMU, EDSC, EDRU, EDSP, EDSS or MMED majors only.

School of Education | Education | Secondary Education

EDUC-4135 (3) Story and Memoir

Examines the questions of "who I am", "where I come from", "what I might become" and "what I am called to do" in order to remember as well as make sense of our lives. Introduces and discusses narrative theory and selected memoirs. Students engage in reflection on their own narrative, and evaluate their practical and analytic understanding of narrative practice. EDUC 4135 and 5135 are the same course.

School of Education | Education | Graduate Education

EDUC-4161 (1-3) Children's Literature

Addresses reading and evaluation of books, children's, interests, authors and illustrators, folk literature, multicultural literature, modern fanciful tales, and trends.

School of Education | Education | General Education

EDUC-4222 (3) Language Study for Educators

Focuses on the nature of linguistic development and performance. Examines works that reflect a range of scholarly approaches to language study, explores language use both in and out of school, takes up the relationships between language practices and power, and considers implications for classroom teaching. Same as EDUC 5222.

School of Education | Education | General Education

EDUC-4232 (3) Language and Literacy across the Curriculum

Explores the relationship between language and learning with the goal of developing teaching practices that engage students in using language as a tool for understanding and constructing meaning across the curriculum. Explores how language/literacy take on different forms and functions in different social contexts and academic disciplines. Restricted to students admitted to the secondary teacher education program. Same as EDUC 5235. Prerequisites: Restricted to undergraduate Science-Secondary Education (EDSC) or Mathematics-Secondary Education (EDMA) majors only.

School of Education | Education | Secondary Education

EDUC-4240 (3) African American and Latino Education in the United States

Explores development of schooling for African Americans in the U.S. and for Latinos in the American Southwest. Emphasizes parallels and points of intersection these groups experienced in their quest to access meaningful educational opportunities. Examines how social, economic, political, and judicial action defined and organized policy and practice for these two groups. EDUC 4240 and 6240 are identical courses. Prerequisites: Restricted to Graduate Students only.

Graduate Teacher Program

The Graduate Teacher Program (GTP) provides for all graduate students:

- professional development opportunities
- career consulting
- videotape consultation
- teacher training

Because teaching skills prepare graduate students for any career, all graduate students, including those with no teaching appointments, TAs, GPTIs, and RAs are welcome at GTP workshops on teaching, research, service, and personal and professional development. Workshops are held prior to both fall and spring semesters, throughout the academic year, and during summer session. Topics range from preparing a syllabus, diversity issues, effective approaches to research, academic service, and conflict management to preparing for an academic job interview.

The Graduate Teacher Program offers **three certificates** (*see below*). Requirements for each are posted on the GTP website at gtp.colorado.edu.

The **Lead Graduate Teacher Network** offers academic leadership training to 50 graduate students each year. Leads receive the Best Should Teach Silver Award, spend one week in extensive training, and assist departmental faculty with discipline-specific TA training.

International graduate students may benefit from workshops designed specifically for them at the Fall Intensive, workshops throughout the year, individualized consultation on teaching and career planning, and referrals to ESL services.

The Graduate Teacher Program's **Collaborative Preparing Future Faculty Network (COPFFN)** provides professional development opportunities for graduate students and faculty. PFF fellows may attend site visits on partner campuses, identify a faculty mentor on a partner campus, work on technology projects, and pursue the PDC/PFF.

The Graduate Teacher Program collaborates with the University Libraries to provide **Provost's Fellowships** to graduate students who wish to explore academic librarianship as a career.

Museum and Field Studies

The interdisciplinary museum and field studies program leading to a master of science degree is administered by the University Museum, in conjunction with the departments of anthropology; history; art history; ecology and evolutionary biology; and geological sciences; as well as other departments. The program provides a strong background in a chosen field as well as theoretical and practical grounding in museology.

Internships are offered at a variety of museums in the region, including natural history, history, and art museums. Students completing the MS are trained as collection managers, curatorial assistants, registrars, museum educators, exhibit technicians, and administrators.

Program Tracks. Two tracks are available: a collection/field track and an administrative/public track.

- The **collection/field track** offers training for students interested in the curatorial and research aspects of museum work, such as floristic or faunistic studies of the past and present, material culture of the past and present, and biological inventory. The curriculum gives students academic training as well as experience in all areas of museum work. Field experience is offered through the curatorial and field practica.
- The **administrative/public track** offers education for students interested in the public aspects of the museum such as program development and evaluation, exhibition planning and design, education, and the organization and management of museums. The curriculum offers both academic training in a discipline and hands-on experience with all aspects of the public museum.

Chemical Physics

Doctoral Degree in Chemical Physics

The interdepartmental doctoral program in chemical physics prepares students for research in such interdisciplinary fields as atomic and molecular radiative processes, spectroscopy, laser chemistry and physics, atmospheric chemistry, molecular quantum mechanics, statistical mechanics, kinetics, chemistry and physics of the surface and condensed phase, semiconductors, and nanoscale processes.

Students wishing to pursue the doctoral degree in chemical physics should apply for admission to either the Department of Chemistry and Biochemistry or the Department of Physics.

Entering students take a qualifying examination in the area of their undergraduate major. The comprehensive examination tests their knowledge of both chemistry and physics. Certain requirements associated with the regular doctoral programs in the participating departments will be replaced by requirements in the complementary field; each student's program of course work and research will be individually planned according to the student's special needs.

The program is administered by an interdepartmental committee. For further information, contact the graduate program assistant in either the Department of Chemistry and Biochemistry or the Department of Physics.

Cognitive Science Studies

The Institute of Cognitive Science offers academic programs for both graduate and undergraduate students. Cognitive science is the study of human knowledge, of which one aspect is the study of how knowledge is acquired, stored, and represented in the mind, including the mind's underlying biological mechanisms. Another aspect of cognitive science concerns how knowledge is understood, remembered, communicated, and used in the performance of activities, including the acquisition and application of skills and information. This latter aspect provides the practical applications of cognitive science, and thereby ensures a demand for graduates in both academic and industrial markets. Training for graduates in cognitive science prepares students admirably for many of the fields that are targeted as the major growth fields of the 21st century: **telecommunications, information processing, medical analysis, data retrieval, education, and multimedia services**.

The undergraduate program includes courses in the six core departments, with basic courses and two of four possible advanced skill sequences of courses.

Computer Science

Computer science is an exciting and challenging field with impact on much of modern life. Computer scientists craft the technologies enabling the digital devices used every day; developing the large-scale software powering business and industry, advancing the computational techniques, and writing the software scientists use to identify and analyze patterns in the behavior of social groups and human behavior in social networks and the applications humanists and linguists use to research language development. Many new applications of computing technology remain to be discovered and computing will be at the heart of future revolutions in business, science, and society. Students who study computer science now will be at the forefront of those important advances.

Computer science is concerned with how computers are constructed, how they are used to store and process data, used in problem-solving, and used to assess the quality of solutions to problems.

Creating software for a variety of users requires understanding how software interacts with the hardware on which it runs. Computer science goes well beyond the machine to the study of how people interact with the technologies around them. Applications of computer science reach far and wide.

Career Possibilities

Computer science graduates from CU-Boulder are engaged in a variety of jobs with organizations worldwide in fields such as communications, finance, publishing, and research. They are software developers, teachers, writers, doctors, lawyers, scientists, military leaders, and entrepreneurs. Many computer science graduates lead highly successful companies that they themselves have founded.

Facilities, Programs, and Opportunities

The Department of Computer Science supports its own domain (www.colorado.edu/cs) and a modern computing infrastructure facilitating its research and educational missions. The department has a variety of computing facilities for use by faculty, staff, and students including general purpose computing labs provided by the university, additional instructional labs and administrative computing resources provided by the department, and specialized labs for individual research groups. The variety of computing resources provides students the opportunity to learn about and use cutting-edge equipment and software.

The Undergraduate Research Opportunities Program (UROP) offers students a chance to work alongside a faculty sponsor on original research. Students learn to write proposals, conduct research, pursue creative work, analyze data, and present the results. For more information, call UROP at **303-492-2596** or visit enrichment.colorado.edu/urop.

The department also provides students networking opportunities throughout the year with companies offering paid internships. CU's location near Boulder's tech start-up community, national research labs, and traditional tech companies such as Google, IBM, Oracle, and Microsoft, gives students with computer science skills many employment opportunities while earning their degrees.

The course code for this program is CSCI.

ARSC-1000 (3-4) Expository Writing

Develops college-level reading, writing, and thinking. Students are asked to read critically, then construct written responses that are revised and crafted into more formal essays and position papers. Offered through the Student Academic Services Center. Prereq., program coordinator consent required.

[College of Arts & Sciences](#) [Arts & Sciences Admin](#) [Writing](#)

ARSC-1080 (4) College Writing and Research

Introduces academic and professional genres through the research and inquiry process. Students practice close reading, oral presentation, drafting, synthesis, analysis and research skills in discussion, writing workshops, and one-on-one conferences. Meets MAPS requirement for English. Approved for arts and sciences core curriculum: written communication.

[College of Arts & Sciences](#) [Arts & Sciences Admin](#) [Writing](#)

ARSC-1081 (1) SASC Coseminar: College Writing and Research

One-credit seminar provides extended instruction in written composition for students enrolled in ARSC 1080. Graded assignments enrich students' understanding of genre, organization, research skills, and grammar. Coreq., ARSC 1080.

[College of Arts & Sciences](#) [Arts & Sciences Admin](#) [Writing](#)

ARSC-1150 (3) Writing in Arts and Sciences

Emphasizes the development of effective writing skills with instruction provided in expository and analytical writing. Reviews basic elements of grammar, syntax, and composition as needed. May be repeated up to 6 total credit hours. Approved for GT-CO2. Meets MAPS requirement for English. Approved for arts and sciences core curriculum: written communication.

College of Arts & Sciences | Arts & Sciences Admin | Writing

ARSC-1200 (1-3) Topics in Arts and Sciences

College of Arts & Sciences | Arts & Sciences Admin | Special Curricula

ARSC-1400 (1) MASP Coseminar: Chemistry 1 & 2

Supplements and strengthens student experiences in chemistry. Allows particularly gifted students an opportunity to extend their understanding of the subject and to explore possible careers in science. May be repeated up to 2 total credit hours.

College of Arts & Sciences | Arts & Sciences Admin | Miramontes Arts & Sciences Pgr

ARSC-1420 (1) MASP Coseminar: Introduction to EEB

Designed to supplement and strengthen student experiences in EBIO 1210 and 1220. Allows particularly gifted students an opportunity to extend their understanding of the subject and possible careers in science. May be repeated up to 2 total credit hours.

College of Arts & Sciences | Arts & Sciences Admin | Miramontes Arts & Sciences Pgr

ARSC-1432 (1) MASP Coseminar: Economics

Designed to supplement and strengthen student experiences in microeconomics. Allows particularly gifted students an opportunity to extend their understanding of the subject and to explore possible careers in social science. May be repeated up to 2 total credit hours.

College of Arts & Sciences | Arts & Sciences Admin | Miramontes Arts & Sciences Pgr

ARSC-1440 (1) MASP Coseminar: Mathematics

Offers an unusual and essential opportunity for students to receive small-group enrichment and reinforcement. Supplements and strengthens student experiences in mathematics, allowing particularly gifted students an opportunity to extend their understanding of the subject in a supportive environment, and to explore possible careers in science. May be repeated up to 2 total credit hours.

College of Arts & Sciences | Arts & Sciences Admin | Miramontes Arts & Sciences Pgr

ARSC-1460 (1) MASP Coseminar: Introduction to Mcd Biology

Supplements and strengthens student experiences in MCDB 1150 and 2150. Allows particularly gifted students an opportunity to extend their understanding of the subject and to explore possible careers in science. May be repeated up to 2 total credit hours.

College of Arts & Sciences | Arts & Sciences Admin | Miramontes Arts & Sciences Pgr

ARSC-1480 (1) MASP Seminar: Exploration of Public Discourse through the Social Sciences

Fosters an appreciation of the humanities and social sciences. Readings, discussions, cooperative learning exercises, and outside activities illustrate the interconnections between different bodies of knowledge. Emphasizes relationships between the humanities/social sciences and the real world. May be repeated up to 2 total credit hours.

College of Arts & Sciences | Arts & Sciences Admin | Miramontes Arts & Sciences Pgr

ARSC-1490 (1) MASP Seminar: Activating the Humanities and Social Sciences

Building on ARSC 1480, enhances students' knowledge and appreciation of the humanities and social sciences. Readings, discussions, cooperative learning exercises, workshopping papers and presentation, guest speakers, and outside activities are designed to enhance both students' appreciation of the subject matter and their performance in their regular courses. Emphasis is on actively using knowledge of humanities and social sciences in a variety of ways. Prereq., ARSC 1480. May be repeated up to 2 total credit hours.

College of Arts & Sciences | Arts & Sciences Admin | Miramontes Arts & Sciences Pgr

ARSC-1492 (1-3) MASP Research Seminar

Building on ARSP 1490, this course seeks to enhance students' knowledge and appreciation of the humanities and social sciences. Readings, discussions, cooperative learning exercises, workshopping papers and presentations, guest speakers, and outside activities are designed to enhance both students' appreciation of the subject matter and their performance in their regular courses. Emphasis placed on actively using knowledge of humanities and social science in a variety of ways. May be repeated up to 6 total credit hours.

College of Arts & Sciences | Arts & Sciences Admin | Miramontes Arts & Sciences Pgr

ARSC-1600 (1) The University of Colorado Experience

Provides an effective transition to the university by giving students a solid base for developing scholarship, citizenship, decision making, and involvement in their university community. Topics include academic and campus resources, safety, health, and diversity.

College of Arts & Sciences | Arts & Sciences Admin | Special Curricula

ARSC-1710 (1) Calculus Bridge Course

Provides motivated pre-calculus students with more in-depth and more challenging coverage of material assumed in calculus. Students complete advanced problems that cannot be covered in pre-calculus courses due to time constraints. Mastery of material is emphasized. Prereq., proficiency in high school mathematics. Coreq., MATH 1001/1021.

College of Arts & Sciences | Arts & Sciences Admin | Special Curricula

ARSC-1720 (1) SASC Coseminar: Calculus Work Group

This 1-credit seminar provides motivated calculus students with more in-depth and more challenging coverage of material assumed in calculus. Students complete advanced problems that cannot be covered in calculus courses due to time constraints. Mastery of material is emphasized. Prereq., proficiency in pre-calculus mathematics. Recommended prereq., A/B average in pre-calculus sequence. Coreq., MATH1300.

College of Arts & Sciences | Arts & Sciences Admin | Special Curricula

ARSC-1800 (3) Methods of Inquiry

Introduces students to methodologies used in different academic disciplines, e.g., how a paleographer dates a manuscript. Course is team-taught. Students must also enroll in two of four co-requisite course sections, all in different areas of the core curriculum. The co-requisite course sections are listed in the online Schedule Planner.

College of Arts & Sciences | Arts & Sciences Admin | Special Curricula

ARSC-1810 (1) Open Option Seminar: Academic Exploration and Critical Decision Making

Survey the major exploration process in a guided and intentional way, critically evaluate your strengths and interests, learn decision making skills, and learn academic skills necessary to succeed in a major discipline. Complete the course well equipped to declare a major of interest in a timely fashion and to supplement your degree with study abroad, undergraduate research and/or co-curricular experiences. Offered Pass/Fail only. Restricted to Arts and Sciences Open Option students only. Prerequisites: Restricted to Arts and Sciences Open Option students only.

College of Arts & Sciences | Arts & Sciences Admin | Special Curricula

ARSC-2000 (3) Ways of Knowing: Constructions of Knowledge in the Academy and Beyond

Explores different ways of knowing from interdisciplinary, cross-cultural perspectives. Course begins with personal interrogations of students' primary learning modes. It goes on to examine cultural assumptions about schooling, learning and knowledge, juxtaposing western and eastern philosophies of knowing and looking at how gender, race, class, and other categories of identity shape and interpret concepts of knowledge. Restricted to Norlin Scholars only; department consent required. Same as NRLN 2000. Approved for arts and sciences core curriculum: ideals and values.

College of Arts & Sciences | Arts & Sciences Admin | Special Curricula

ARSC-2274 (3) Peer Counseling

Introduction to basic peer education and counseling theory and techniques. Students learn experientially by practicing a variety of skills in an informal atmosphere. The material learned is valuable

to students professionally (as employee or supervisor in any field or as helping professional) regardless of career path. Students increase self-awareness and apply it to their own lives. Offered Fall semesters only. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences | Arts & Sciences Admin | Special Curricula

ARSC-2400 (1) MASP Coseminar: Organic Chemistry

Supplements and strengthens student experiences in organic chemistry. Allows gifted students an opportunity to extend their understanding of the subject and to explore possible careers in science. May be repeated up to 2 total credit hours.

College of Arts & Sciences | Arts & Sciences Admin | Miramontes Arts & Sciences Pgr

ARSC-2470 (1) MASP Coseminar: Physics 1 and 2

Supplements and strengthens student experiences in physics. Allows particularly gifted students an opportunity to extend their understanding of the subjects and to explore possible careers in science. May be repeated up to 2 total credit hours.

College of Arts & Sciences | Arts & Sciences Admin | Miramontes Arts & Sciences Pgr

ARSC-3001 (6) Social Engagement & Human Rights: The South Africa Model

Examines the concept of reconciliation from a multidimensional and multidisciplinary approach as it specifically contributes to subjects of difference, inequality, and historical legacies of intractable relations. Using an experiential approach, the study of reconciliation is situated in an international environment in which reconciliation is being practiced and later in the United States context. Recommended prereq., any course with substantive race, class, gender, difference, and inequality emphasis. Offered through Study Abroad Program. Approved for arts and sciences core curriculum: human diversity.

College of Arts & Sciences | Arts & Sciences Admin | Special Curricula

ARSC-3100 (3) Multicultural Perspective and Academic Discourse

Teaches students how to write academic papers related to race, class, gender, sexuality, and other areas of cultural identity. Students acquire expertise on issues through readings, guided discussion, and research and practice oral presentation skills, drafting, and workshopping of papers. Prereq., lower level writing course(s) or waiver. Restricted to juniors/seniors. Approved for arts and sciences core curriculum: written communication. Prerequisites: Restricted to students with 57-180 credits (Juniors or Seniors).

College of Arts & Sciences | Arts & Sciences Admin | Writing

ARSC-3600 (3) Diversity Issues: Higher Education

Uses Internet dialogue, computing, and media technology to improve communication and develop research and inquiry skills and critical thinking. Race, class, gender, and sexual orientation issues are addressed to foster understanding of university codes of inquiry and modes of interaction in scholarly communities. Prereq., admission to McNair Program, junior standing, minimum GPA of 2.50, and strong interest in graduate school).

ARSC-1000 (3-4) Expository Writing

Develops college-level reading, writing, and thinking. Students are asked to read critically, then construct written responses that are revised and crafted into more formal essays and position papers. Offered through the Student Academic Services Center. Prereq., program coordinator consent required.

[College of Arts & Sciences](#) [Arts & Sciences Admin](#) [Writing](#)

ARSC-1080 (4) College Writing and Research

Introduces academic and professional genres through the research and inquiry process. Students practice close reading, oral presentation, drafting, synthesis, analysis and research skills in discussion, writing workshops, and one-on-one conferences. Meets MAPS requirement for English. Approved for arts and sciences core curriculum: written communication.

[College of Arts & Sciences](#) [Arts & Sciences Admin](#) [Writing](#)

ARSC-1081 (1) SASC Coseminar: College Writing and Research

One-credit seminar provides extended instruction in written composition for students enrolled in ARSC 1080. Graded assignments enrich students' understanding of genre, organization, research skills, and grammar. Coreq., ARSC 1080.

[College of Arts & Sciences](#) [Arts & Sciences Admin](#) [Writing](#)

ARSC-1150 (3) Writing in Arts and Sciences

Emphasizes the development of effective writing skills with instruction provided in expository and analytical writing. Reviews basic elements of grammar, syntax, and composition as needed. May be repeated up to 6 total credit hours. Approved for GT-CO2. Meets MAPS requirement for English. Approved for arts and sciences core curriculum: written communication.

College of Arts & Sciences | Arts & Sciences Admin | Writing

ARSC-3100 (3) Multicultural Perspective and Academic Discourse

Teaches students how to write academic papers related to race, class, gender, sexuality, and other areas of cultural identity. ASTR-1000 (3) The Solar System

Examines principles of modern astronomy for nonscience majors, summarizing our present knowledge about the Earth, Sun, moon, planets, and the origin of life. Offers opportunities to attend nighttime observation sessions at Sommers-Bausch Observatory and Fiske Planetarium. Similar to ASTR 1010, without lab. Also similar to ASTR 1030. Formerly ASTR 1110. Students may receive credit for only one of ASTR 1000, 1110, 1010, or 1030. Meets MAPS requirement for natural science: nonlab. Approved for arts and sciences core curriculum: natural science.

[College of Arts & Sciences](#) [Astrophysical & Planetary Sciences](#)

ASTR-1010 (4) Introductory Astronomy 1

Introduces principles of modern astronomy for nonscience majors, summarizing our present knowledge about the Earth, Sun, moon, planets, and origin of life. Requires nighttime observation sessions at Sommers-Bausch Observatory. Similar to ASTR 1000, but with additional lab experience. Also similar to ASTR 1030. Students may receive credit for only one of ASTR 1010, 1000, 1110, or 1030. Meets MAPS requirement for natural science: lab or non-lab. Approved for arts and sciences core curriculum: natural science.

[College of Arts & Sciences](#) [Astrophysical & Planetary Sciences](#)

ASTR-1020 (4) Introductory Astronomy 2

Introduces principles of modern astronomy for nonscience majors, summarizing our present knowledge about the Sun, stars, birth and death of stars, neutron stars, black holes, galaxies, quasars, and the organization and origins of the universe. May require nighttime observation sessions at Sommers-Bausch Observatory. Similar to ASTR 1200, but with recitation and sequence link to ASTR 1010. Also similar to ASTR 1040. Students may receive credit for only one of ASTR 1020, 1200, 1120, or 1040. Prereq., ASTR 1010 or 1000. Approved for arts and sciences core curriculum: natural science.

[College of Arts & Sciences](#) [Astrophysical & Planetary Sciences](#)

ASTR-1030 (4) Accelerated Introductory Astronomy 1

Covers principles of modern astronomy summarizing our present knowledge about the Earth, Sun, moon, planets, and origin of life. Requires nighttime observation sessions at Sommers-Bausch Observatory. Required in ASTR major/minor. Prereq. or coreq., Calculus I (MATH 1300 or APPM 1350). Students may receive credit for only one of ASTR 1030, 1010, 1000, or 1110. Similar to ASTR 1010 and 1000, but taught at a higher intellectual level, including a significant amount of quantitative analysis. Approved for GT-SC1. Approved for arts and sciences core curriculum: natural science.

College of Arts & Sciences | Astrophysical & Planetary Sciences

ASTR-1040 (4) Accelerated Introductory Astronomy 2

Covers principles of modern astronomy summarizing our present knowledge about the Sun, stars, birth and death of stars, neutron stars, black holes, galaxies, quasars, and the organization and origins of the universe. May require nighttime observing sessions at Sommers-Bausch Observatory. Required in ASTR major/minor. Includes a recitation. Prereq., ASTR 1030. Prereq. or coreq., Calculus I (MATH 1300 or APPM 1350). Students may receive credit for only one of ASTR 1020, 1040, 1200, or 1120. Similar to ASTR 1020 and 1200 but taught at a higher intellectual level including a significant amount of quantitative analysis. Approved for GT-SC2. Approved for arts and sciences core curriculum: natural science.

College of Arts & Sciences | Astrophysical & Planetary Sciences

ASTR-1200 (3) Stars and Galaxies

Examines principles of modern astronomy for nonscience majors, summarizing our present knowledge about the Sun, stars, neutron stars, black holes, interstellar gas, galaxies, quasars, and the structure and origins of the universe. Offers opportunities to attend nighttime observation sessions at Sommers-Bausch Observatory. Formerly ASTR 1120. Similar to ASTR 1020, without sequence link to ASTR 1010 or recitation. Also similar to ASTR 1040. Students may receive credit for only one of ASTR 1200, 1120, 1020, or 1040. Approved for arts and sciences core curriculum: natural science.

College of Arts & Sciences | Astrophysical & Planetary Sciences

ASTR-2000 (3) Ancient Astronomies of the World

Documents the numerous ways in which observational astronomy and cosmology have been features of ancient cultures. Includes naked eye astronomy, archaeoastronomy, ethnoastronomy, concepts of time, calendrics, cosmogony, and cosmology. Approved for arts and sciences core curriculum: natural science or human diversity.

College of Arts & Sciences | Astrophysical & Planetary Sciences

ASTR-2010 (3) Modern Cosmology---Origin and Structure of the Universe

Introduces modern cosmology to nonscience majors. Covers the Big Bang; the age, size, and structure of the universe; and the origin of the elements and of stars, galaxies, the solar system, and life. Approved for arts and sciences core curriculum: natural science.

College of Arts & Sciences | Astrophysical & Planetary Sciences

ASTR-2020 (3) Introduction to Space Astronomy

Discusses reasons for making astronomical observations from space, scientific goals, practical requirements for placing instruments in space, politics of starting new programs, and selected missions. Prereq., ASTR 1010, 1020, 1000, or 1200. Approved for arts and sciences core curriculum: natural science.

College of Arts & Sciences | Astrophysical & Planetary Sciences

ASTR-2030 (3) Black Holes

Black holes are one of the most bizarre phenomena of nature. Students are introduced to the predicted properties of black holes, astronomical evidence for their existence and formation, and modern ideas about space, time, and gravity. Approved for the arts and sciences core curriculum: natural science.

College of Arts & Sciences | Astrophysical & Planetary Sciences

ASTR-2040 (3) The Search for Life in the Universe

Introduces the scientific basis for the possible existence of life elsewhere in the universe. Includes origin and evolution of life on Earth and the search for evidence of life in our solar system, especially Mars and Jupiter's moon Europa. Discusses the conditions necessary for life and whether they might arise on planets around other stars. Same as GEOL 2040. Approved for arts and sciences core curriculum: natural science.

College of Arts & Sciences | Astrophysical & Planetary Sciences

ASTR-2500 (3) Gateway to Space

Introduces the basics of atmospheric and space sciences, space exploration, spacecraft design, rocketry, and orbits. Students design, build, and launch a miniature satellite on a high altitude balloon. Explores the current research in space through lectures from industry. Recommended prereqs., APPM 1360 or MATH 2300 and PHYS 1120 or ASTR 1040. Same as ASEN 1400. Similar to ASEN 4500. Prerequisites: Restricted to Astronomy or Physics majors only.

College of Arts & Sciences | Astrophysical & Planetary Sciences

ASTR-2600 (3) Computational Techniques

Introduces practical research skills and provides orientation to computational tools commonly used in research by astrophysicists and planetary scientists.

College of Arts & Sciences | Astrophysical & Planetary Sciences

ASTR-2840 (1-3) Independent Study

May be repeated up to 6 total credit hours. Prereq., instructor consent.

College of Arts & Sciences | Astrophysical & Planetary Sciences

ASTR-3300 (3) Extraterrestrial Life

Discusses the scientific basis for the possible existence of extraterrestrial life. Includes origin and evolution of life on Earth; possibility of life elsewhere in the solar system, including Mars; and the possibility of life on planets around other stars. Prereq., one-year sequence in a natural science. Same as GEOL 3300.

College of Arts & Sciences | Astrophysical & Planetary Sciences

ASTR-3510 (4) Observations and Instrumentation 1

Lab course in astronomical observation and instrumentation. Hands-on exercises include obtaining and analyzing multi-wavelength data, basic optical design and instrumentation, and statistical analysis of data, with emphasis on imaging applications. A significant number of night time observation sessions are required. Prereq. or coreq., Calculus 2 (MATH 2300 or APPM 1360), one year of college physics, and one year of college astronomy. Elective for APS majors. Elective for APS minors on space available basis. Prerequisites: Restricted to Astrophysics (ASTR) majors only.

College of Arts & Sciences | Astrophysical & Planetary Sciences

ASTR-3520 (4) Observations and Instrumentation 2

Lab course in observation and instrumentation. Hands-on exercises include obtaining and analyzing multi-wavelength data, optical design and instrumentation, and statistical analysis, with emphasis on spectroscopy. A significant number of night time observation sessions are required. Prereq., ASTR 3510 or instructor consent. Elective for APS majors. Elective for APS minors on space available basis. Prerequisites: Restricted to Astrophysics (ASTR) majors only.

College of Arts & Sciences | Astrophysical & Planetary Sciences

ASTR-3710 (3) Formation & Dynamics of Planetary Systems

Covers the origin of planetary systems and their dynamical evolution. Topics include the physics and chemistry of planetary formation, orbital mechanics, and extrasolar planets. ASTR 3710, 3720, and 3750 may be taken in any order. Prereqs., PHYS 1110 and 1120, and calculus (MATH 1300 and 2300, or APPM 1350 and 1360). Elective for APS major and minor.

College of Arts & Sciences | Astrophysical & Planetary Sciences

ASTR-3720 (3) Planets and Their Atmospheres

Explores the physics and chemistry of the atmospheres of Mars, Venus, Jupiter, Saturn, and Titan. Examines evolution of the atmospheres of Earth, Venus, and Mars; and the escape of gases from the Galilean satellites, Titan and Mars; the orbital characteristics of moons, planets, and comets. Uses recent results of space exploration. Prereqs., PHYS 1110 and 1120, and either MATH 1300 and 2300, or APPM 1350 and 1360. Same as ATOC 3720. Elective for APS major and minor.

College of Arts & Sciences | Astrophysical & Planetary Sciences

ASTR-3730 (3) Astrophysics 1 ---Stellar and Interstellar

ASTR 3730 and 3830 provide a year-long introduction to physical processes, observations, and current research methods in stellar, interstellar, galactic, and extra-galactic astrophysics, with astronomical applications of gravity, radiation processes, spectroscopy, gas dynamics, and plasma physics. Prereqs. or coreqs., PHYS 2130 or 2170, and MATH 2400 or APPM 2350. Elective for APS major and minor.

College of Arts & Sciences | Astrophysical & Planetary Sciences

ASTR-3740 (3) Cosmology and Relativity

Special and general relativity as applied to astrophysics, cosmological models, observational cosmology, experimental relativity, and the early universe. Prereqs. or coreqs., PHYS 2130 or 2170, and MATH 2400 or APPM 2350. Elective for APS major and minor.

College of Arts & Sciences | Astrophysical & Planetary Sciences

ASTR-3750 (3) Planets, Moons, and Rings

Approaches the physics of planets, emphasizing their surfaces, satellites, and rings. Topics include formation and evolution of planetary surfaces, history of the terrestrial planets, and dynamics of planetary rings. Both ASTR 3720 and ASTR 3750 may be taken for credit in any order. Prereqs., PHYS 1110 and 1120, and calculus (MATH 1300 and 2300, or APPM 1350 and 1360). Elective for APS major and minor.

College of Arts & Sciences | Astrophysical & Planetary Sciences

ASTR-3760 (3) Solar and Space Physics

Explores the physical processes linking the Sun and planets, emphasizing solar radiative and particulate variability and the response of planetary atmospheres and magnetospheres. Topics include the solar dynamo, solar wind, coronal mass ejections, cosmic ray modulation, magnetospheres, aurora, the space environment, and climate variability. Prereqs./coreqs., PHYS 2130 or 2170 and MATH 2400 or APPM 2350. Recommended prereq., PHYS 3310. Elective for APS major and minor.

College of Arts & Sciences | Astrophysical & Planetary Sciences

ASTR-3800 (3) Introduction to Scientific Data Analysis and Computing

Covers analytical and numerical techniques used in scientific data analysis, including statistical analysis, error analysis, functional fitting, spectral analysis, image processing, and testing theoretical compliance. Examples are from space-based and ground-based astronomy. Prereqs. or coreqs., ASTR 1040 or equivalent, PHYS 1120 or equivalent, and MATH 2400 or APPM 2350. Elective for APS major.

College of Arts & Sciences | Astrophysical & Planetary Sciences

ASTR-3830 (3) Astrophysics 2---Galactic and Extragalactic

ASTR 3730 and 3830 provide a year-long introduction to physical processes, observations, and current research methods in stellar, interstellar, galactic, and extragalactic astrophysics, with astronomical applications of gravity, radiation processes, spectroscopy, gas dynamics, and plasma physics. Prereqs. or coreqs., ASTR 3730, and PHYS 2130 or 2170, and MATH 2400 or APPM 2350. Elective for APS major and minor.

COMR-1000 (1) Communication and Community

Introduction to how communication builds community by creating and sharing meaning. Examination of communication practices at the interpersonal level (friends and family), the group level (teams, classrooms and organizations) and the societal level (citizenship, social change, mass media). Restricted to students in the Communication Residential Academic Program.

[College of Arts & Sciences](#)
[Communication Residential Academic Program](#)

COMR-1100 (1) RAP Community Leadership Practicum

Examines relationships between competent communication and effective leadership in the context of the Communication and Society RAP. Upon completion of the Community Leadership RAP practicum, the student will be able to identify, discuss, demonstrate, and critique effective communication skills as they apply to many different leadership opportunities within the RAP. Restricted to students in the Communication Residential Academic Program.

[College of Arts & Sciences](#)
[Communication Residential Academic Program](#)

COMR-1800 (3) Visual Literacy: Images and Ideologies

Explores the relationship between visual images and cultural values, including how we process visual information, the evolution of conventions in various media, common visual portrayals, and ethical issues. Restricted to students in the Communication Residential Academic Program. Approved for arts and sciences core curriculum: literature and the arts.

CSVC-1000 (1) Work Internship

a one credit pass/fail course, opened to students in good academic standing, whose internship employers require that they receive course credit. The student must first seek to obtain academic credit through their major department. Will not count toward degree requirements in any UCB school or college. No appeals for credit toward degrees or for letter grades in the course will be entertained.

DNCE-1000 (2) Beginning Technique

Introduces basic concepts and skills of various contemporary dance forms, such as Afro-modern, Release Technique, Limon-based modern, etc. Classwork develops muscle strength, flexibility, coordination, rhythm, and dynamic and spatial awareness. Lectures focus on various aspects of dance including history, composition, anatomy and criticism. Limited amount of written work is required. May be repeated up to 4 credit hours.

[College of Arts & Sciences](#) | [Theater & Dance](#) | [Nonmajor Technique](#)

THTR-1003 (3) Acting for Nonmajors

Teaches the basic principles of acting for those withno previous acting experience, focusing on relaxation, concentration, improvisation, use of imagination, actions, objectives, initial monologue and scene work, and basic terms and concepts of process work for the actor.

[College of Arts & Sciences](#) | [Theater & Dance](#) | [Performance](#)

THTR-1009 (3) Introduction to Theatre

Introduces the varieties of theatrical art, past and present, contributions of the various theatrical artists to the total production, and the place of theatre art in today's society. Designed for nonmajors. Approved for GT-AH1. Approved for arts and sciences core curriculum: literature and the arts.

[College of Arts & Sciences](#) | [Theater & Dance](#) | [Special Courses in Theatre](#)

THTR-1011 (3) Development of Theatre 1: Forms of Classical Theatre and Drama

Examines the interaction of dramatic literature and performance in classical forms of European and Asian theatre, including Greek, Roman, Indian, Japanese, Medieval, and Renaissance European. Approved for GT-AH1. Approved for arts and sciences core curriculum: literature and the arts.

College of Arts & Sciences Theater & Dance History/Dramaturgy/Directing

DNCE-1012 (2) Dance Production 1

Provides the dancer with an introduction to the types of performance venues available today, and their technical systems and equipment. It will also establish an awareness of how technical theatre design arts may be utilized by a choreographer. Restricted to dance majors. Credit not granted for this course and DNCE 2012. Prerequisites: Restricted to Dance (DNCE or DBFA) majors only.

College of Arts & Sciences Theater & Dance Production

DNCE-1013 (2) Dance Improvisation

An opportunity for students to develop skills of dance improvisation through the exploration of structured movement problems. Students study selected contemporary dance artists whose work stresses improvisation in performance and/or as a training vehicle. Restricted to dance majors. Formerly DNCE 2013. Prerequisites: Restricted to Dance (DNCE or DBFA) majors only.

College of Arts & Sciences Theater & Dance Creative Process

DNCE-1017 (3) Dance and Popular Culture

Explores and contextualizes contemporary popular culture and dance. Introduces methods of critical analysis that reveal the rich heritage hidden within and around the dances students commonly encounter at the club, on the street, on television, on the big screen and elsewhere in everyday life. Through watching, reading, and discussion, students discover new meaning in their lived cultural experience. Approved for arts and sciences core curriculum: literature and the arts.

College of Arts & Sciences Theater & Dance Dance and Cultural Studies

THTR-1019 (3) Theatre Foundations: Text Analysis and Practice for the Theatre Arts

Introduces fundamental methods of text analysis for the stage, presents common vocabulary and concepts of the theatre event as an art form and how it works, and what playmaking means to those who do it. Prerequisites: Restricted to students with 0-56 credits (Freshmen or Sophomore) Theatre (THTR or TBFA) majors only.

College of Arts & Sciences Theater & Dance Special Courses in Theatre

DNCE-1020 (1) Beginning Modern Dance with Experience

Studio course that continues the work from the beginning level on basic concepts and skills in modern dance technique to increase strength, flexibility, and coordination. May be repeated up to 2 total credit hours. Prereq., DNCE 1000.

College of Arts & Sciences | Theater & Dance | Nonmajor Technique

DNCE-1027 (3) Introduction to Dance and Culture

Explores dance's relationship to broad cultural realities such as food getting, sexuality, rites of passage, work, and religion. Topics are explored by looking at several different cultural groups and how their dance functions in relation to the specific topic. (For example, dance as a function of religion could be studied through explorations into Afro-Cuban orisha dances, Bharata Natyam, and Hopi Ghost dancing.) Formerly DNCE 1029. Approved for GT-AH1. Approved for arts and sciences core curriculum: literature and the arts.

College of Arts & Sciences | Theater & Dance | Dance and Cultural Studies

DNCE-1091 (1) Modern 1

Introduces basic skills of modern dance. In-class technique work increases muscle strength, flexibility, and coordination. Offered summers only at Perry-Mansfield Performing Arts Camp. May be repeated up to 2 total credit hours.

College of Arts & Sciences | Theater & Dance | Major Technique

DNCE-1100 (1) Beginning Ballet

Ballet for beginners; no previous experience required. Stretching, basic barre, simple terre a terre, and jumping steps are learned, as well as alignment and basic extended positions such as arabesque and attitude. Mastery of simple enchainements and rhythmic patterns. May be repeated up to 2 total credit hours.

College of Arts & Sciences | Theater & Dance | Nonmajor Technique

THTR-1105 (3) Stage Technologies

Introduces technical production elements and procedures, including materials, organizations, methods and equipment to realize theatrical scenery, properties, lighting and sound. Credit not granted for this course and THTR 1065 or 1075.

College of Arts & Sciences | Theater & Dance | Theatre Design and Technology

THTR-1115 (3) Costume Technologies

Introduces technical production elements and procedures including materials, organizations, methods and equipment to realize theatrical costuming and make-up. Credit not granted for this course and THTR 1065 or 1075. Prerequisites: Restricted to students with 0-56 credits (Freshmen or Sophomore) only.

College of Arts & Sciences | Theater & Dance | Theatre Design and Technology

DNCE-1120 (1) Beginning Ballet with Experience

Extension of beginning ballet, when basic concepts of ballet have been mastered. Enchainements are of greater complication and variety. Dance vocabulary is more extensive. Pirouettes and more complex musical phrases are expected. May be repeated up to 2 total credit hours. Prereq., DNCE 1100.

| | | |
|----------------------------|-----------------|--------------------|
| College of Arts & Sciences | Theater & Dance | Nonmajor Technique |
|----------------------------|-----------------|--------------------|

DNCE-1190 (1) Ballet 1

Beginning ballet covering the basic vocabulary of classical ballet technique. Offered summers only at Pery-Mansfield Performing Arts Camp. May be repeated up to 2 total credit hours.

| | | |
|----------------------------|-----------------|--------------------|
| College of Arts & Sciences | Theater & Dance | Nonmajor Technique |
|----------------------------|-----------------|--------------------|

DNCE-1200 (1) Beginning Jazz Dance

Introduces various styles of movement unique to jazz dance. Students learn fundamental technical dance skills as well as specific jazz vocabulary. Designed for students with little or no dance experience. May be repeated up to 2 total credit hours.

| | | |
|----------------------------|-----------------|--------------------|
| College of Arts & Sciences | Theater & Dance | Nonmajor Technique |
|----------------------------|-----------------|--------------------|

DNCE-1220 (1) Beginning Jazz with Experience

Further develops work begun in Beginning Jazz. Exercises and jazz dance phrases are more complex. May be repeated up to 2 total credit hours. Prereq., DNCE 1200.

| | | |
|----------------------------|-----------------|--------------------|
| College of Arts & Sciences | Theater & Dance | Nonmajor Technique |
|----------------------------|-----------------|--------------------|

DNCE-1290 (1) Jazz 1

Introduces jazz dance, consisting of a technique warm-up, locomotion across the floor, and a series of dance phrases developed into a short dance combination. Offered summers only at Pery-Mansfield Performing Arts Camp. May be repeated up to 2 total credit hours.

| | | |
|----------------------------|-----------------|--------------------|
| College of Arts & Sciences | Theater & Dance | Nonmajor Technique |
|----------------------------|-----------------|--------------------|

DNCE-1849 (1-3) Independent Study

Involves creative or scholarly investigation of an area of interest to the student not addressed in the curriculum. Work must be arranged with and advised by a faculty member. Freshman level course. May be repeated up to 7 total credit hours. Same as DNCE 2849, 3849, 4849, 5849.

| | | |
|----------------------------|-----------------|-------------------|
| College of Arts & Sciences | Theater & Dance | Independent Study |
|----------------------------|-----------------|-------------------|

DNCE-1901 (1-3) Technique Practicum

Offers special courses in the technique series. Includes world dance and/or social dance forms. May be repeated up to 6 total credit hours.

College of Arts & Sciences Theater & Dance Major Technique

DNCE-1908 (1) Performance Practicum

Students learn and perform a dance choreographed by a faculty member or graduate student for an informal and/or formal presentation. May be repeated up to 3 total credit hours. Prerequisites: Restricted to Dance (DNCE or DBFA) majors only.

College of Arts & Sciences Theater & Dance Performance

THTR-2003 (3) Acting 1

Emphasizes principles of acting, focusing on exercises in relaxation, talking and listening, actions and objectives, and basic concepts of process work. Prerequisites: Restricted to Theatre (THTR, TBFA) Dance (DNCE, DBFA), Film or Arts and Sciences Open Option majors only.

College of Arts & Sciences Theater & Dance Performance

DNCE-2005 (3) Movement Awareness and Injury Prevention for the Dancer

Helps dancers understand the prevention and care of common injuries associated with their art. Through various somatic methods, techniques, anatomy, and kinesiology, students learn to reduce tension, improve body usage, and enhance their performance. Prereqs., DNCE 2021, 3041, or 4061. Restricted to dance majors. Prerequisites: Restricted to Dance (DNCE or DBFA) majors only.

College of Arts & Sciences Theater & Dance Movement Analysis

THTR-2013 (3) Performance of Literature

Students learn to perceive literary form and content and to translate that perception into classroom performances of selected modern plays and stories. Performances, both solo and ensemble, embody literary texts diverse in terms of gender and ethnicity. Prereqs., 15 credit hours and THTR 1003, 2003 or 2043.

College/School**Department****Category**

Search by Course Number

Subject**Number**

DNCE-1000 (2) Beginning Technique

Introduces basic concepts and skills of various contemporary dance forms, such as Afro-modern, Release Technique, Limon-based modern, etc. Classwork develops muscle strength, flexibility, coordination, rhythm, and dynamic and spatial awareness. Lectures focus on various aspects of dance including history, composition, anatomy and criticism. Limited amount of written work is required. May be repeated up to 4 credit hours.

[College of Arts & Sciences](#) [Theater & Dance](#) [Nonmajor Technique](#)

DNCE-1020 (1) Beginning Modern Dance with Experience

Studio course that continues the work from the beginning level on basic concepts and skills in modern dance technique to increase strength, flexibility, and coordination. May be repeated up to 2 total credit hours. Prereq., DNCE 1000.

[College of Arts & Sciences](#) [Theater & Dance](#) [Nonmajor Technique](#)

DNCE-1100 (1) Beginning Ballet

Ballet for beginners; no previous experience required. Stretching, basic barre, simple terre a terre, and jumping steps are learned, as well as alignment and basic extended positions such as arabesque and attitude. Mastery of simple enchainements and rhythmic patterns. May be repeated up to 2 total credit hours.

[College of Arts & Sciences](#) [Theater & Dance](#) [Nonmajor Technique](#)

DNCE-1120 (1) Beginning Ballet with Experience

Extension of beginning ballet, when basic concepts of ballet have been mastered. Enchainements are of greater complication and variety. Dance vocabulary is more extensive. Pirouettes and more complex musical phrases are expected. May be repeated up to 2 total credit hours. Prereq., DNCE 1100.

College of Arts & Sciences Theater & Dance Nonmajor Technique

DNCE-1190 (1) Ballet 1

Beginning ballet covering the basic vocabulary of classical ballet technique. Offered summers only at Perry-Mansfield Performing Arts Camp. May be repeated up to 2 total credit hours.

College of Arts & Sciences Theater & Dance Nonmajor Technique

DNCE-1200 (1) Beginning Jazz Dance

Introduces various styles of movement unique to jazz dance. Students learn fundamental technical dance skills as well as specific jazz vocabulary. Designed for students with little or no dance experience. May be repeated up to 2 total credit hours.

College of Arts & Sciences Theater & Dance Nonmajor Technique

DNCE-1220 (1) Beginning Jazz with Experience

Further develops work begun in Beginning Jazz. Exercises and jazz dance phrases are more complex. May be repeated up to 2 total credit hours. Prereq., DNCE 1200.

College of Arts & Sciences Theater & Dance Nonmajor Technique

DNCE-1290 (1) Jazz 1

Introduces jazz dance, consisting of a technique warm-up, locomotion across the floor, and a series of dance phrases developed into a short dance combination. Offered summers only at Perry-Mansfield Performing Arts Camp. May be repeated up to 2 total credit hours.

College of Arts & Sciences Theater & Dance Nonmajor Technique

DNCE-2290 (1) Jazz 2

Continuation of Jazz 1. Studies coordination, rhythm, style, and advanced body part isolation in depth. Offered summers only at Perry-Mansfield Performing Arts Camp. May be repeated up to 2 total credit hours.

ENVS-1000 (4) Introduction to Environmental Studies

Surveys environmental studies, examining ecological, socioeconomic, political, aesthetic, and technological factors that influence the quality of life on Earth. Required for ENVS majors. Approved for arts and sciences core curriculum: natural science.

[College of Arts & Sciences](#)
[Environmental Studies](#)

ENVS-2000 (4) Applied Ecology for Environmental Studies

Covers how ecological ideas and principles underlie both the problems and solutions of multiple environmental issues. The ecology of environmental concerns ranging from endangered species to global carbon cycling will be reviewed, including perspectives from physiological, behavioral, population, community, and ecosystem ecology. Prereqs., ENVS 1000 and EBIO 1030, 1040 and 1050, or EBIO 1210, 1220, 1230 and 1240. Recommended prereq., a course in introductory statistics. Similar to EBIO 2040. Credit not granted for this course and EBIO 2040.

[College of Arts & Sciences](#)
[Environmental Studies](#)

ENVS-2100 (3-4) Topics in Applied Environmental Studies

Covers a variety of topics not currently offered in the curriculum: offered depending on instructor availability and student demand. May be repeated up to 6 total credit hours, provided the topics vary. Prereq., ENVS 1000.

[College of Arts & Sciences](#)
[Environmental Studies](#)

ENVS-2840 (1-6) Independent Study

Students work with an approved faculty sponsor to explore a topic in greater depth and to pursue an interest that is not offered in the formal curriculum. May be repeated up to 8 total credit hours. Prereq., ENVS 1000.

College of Arts & Sciences | Environmental Studies

ENVS-3001 (3) Sustainable Solutions Consulting

Introduces students to green design, industrial ecology, and life cycle analysis. Students use basic techniques of environmental auditing to analyze the CU-Boulder campus. Prereq., any two-semester science sequence. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) Environmental Studies (ENVS) majors only.

College of Arts & Sciences | Environmental Studies

ENVS-3020 (3) Advanced Writing in Environmental Studies

Offers training in critical thinking and analytical writing skills appropriate to upper-division classes. Writing assignments integrate the subject matter of different topical areas. Approved for arts and sciences core curriculum: written communication. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) Environmental Studies (ENVS) majors only.

College of Arts & Sciences | Environmental Studies

ENVS-3030 (3-4) Topics in Environmental Social Sciences

Covers a variety of topics that fulfill the social science requirement in the Environmental Studies major. Topics may include human ecology, environment and society, and quantitative environmental social science. Offered depending upon instructor availability and student demand. Prereq., ENVS 1000. Not repeatable for credit.

College of Arts & Sciences | Environmental Studies

ENVS-3032 (3) Environment, Media & Society

Examines how mass media influence our society, specifically with regard to environmental issues and outcomes. Focuses on media influence over environmental politics and policy, environmental public opinion, popular culture, and environmental/scientific knowledge.

College of Arts & Sciences | Environmental Studies

ENVS-3040 (4) Conservation Biology

Applies principles of population ecology, population genetics, biogeography, animal behavior, and paleobiology to the maintenance of biodiversity and natural systems. The resulting theory is then applied to conservation policy and management techniques. Prereq., EBIO 2040 or 2640. Same as EBIO 3040.

College of Arts & Sciences | Environmental Studies

ENVS-3070 (3) Energy and the Environment

Examines contemporary issues in energy consumption and its environmental impact, including fossil fuel use and depletion; nuclear energy and waste disposal; solar, wind, hydroelectric, and other renewable sources; home heating; energy storage; fuel cells; and alternative transportation vehicles. Includes some basic physical concepts and principles that often constrain choices. No background in physics is required. Same as PHYS 3070. Approved for arts and sciences core curriculum: natural science.

College of Arts & Sciences | Environmental Studies

ENVS-3100 (3) Topics in Applied Environmental Studies

Covers a variety of topics not currently offered in the curriculum; offered depending upon instructor availability and student demand. May be repeated up to 6 total credit hours, provided topics vary. Prereq., ENVS 1000.

College of Arts & Sciences | Environmental Studies

ENVS-3103 (3) Applied Environmental Studies: Mining in Four Corners

Explores mining related issues that have pronounced impact on the environment, economy and politics of the Four Corners region. Students apply their basic knowledge of environmental science, policy and values toward the understanding of and productive discourse about the conflicts and opportunities brought about by the mining industry in the Four Corners region. Course includes a seven day field trip, visiting mining and reclamation sites in New Mexico, Utah and Colorado. Fulfills application requirement for Environmental Studies majors. Prereq., ENVS 1000 and one year natural science.

College of Arts & Sciences | Environmental Studies

ENVS-3140 (3) Environmental Ethics

Examines major traditions in moral philosophy to see what light they shed on value issues in environmental policy and the value presuppositions of the economic, ecological, and juridical approaches to the environment. Prereq., sophomore standing or PHIL 1100, 1200, 2200, 3100, or 3200. Same as PHIL 3140. Approved for arts and sciences core curriculum: ideals and values. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences | Environmental Studies

ENVS-3434 (3) Introduction to Applied Ecology

Emphasizes the integration of physical, chemical, and biological processes in controlling terrestrial and aquatic ecosystems. Ecosystem concepts are applied to current environmental and water quality problems. Includes field trips and a group project. Prereq., CHEM 1111 or CHEN 1211 and 1221. Same as CVEN 3434.

College of Arts & Sciences | Environmental Studies

ENVS-3520 (3) Energy and Climate Change: An Interdisciplinary Approach

Examines sources of energy and other resources in light of their availability, use, environmental impact, as well as their impact on policy, economics and values. As fossil fuels are the dominant energy source today, particular emphasis is placed on climate impacts and the carbon cycle. All material is assessed through the lenses of the physical sciences, policy, ethics and economics. Prereq., a two-course sequence in any natural science. May be repeated up to 6 total credit hours. Same as GEOL 3520. Approved for arts and sciences core curriculum: natural science.

College of Arts & Sciences | Environmental Studies

ENVS-3521 (3) Climate Politics and Policy

Engages students in exploring the realm of contemporary and historical climate policy at three major levels of government: international, national and local/regional. Through course lectures, discussions, readings and activities, students will become conversant with the actors, mechanisms and concerns involved in climate policy and politics, and develop their own sense of how to judge the success of climate policies.. Prereq., ENVS 1000.

College of Arts & Sciences | Environmental Studies

ENVS-3600 (3) Principles of Climate

Describes the basic components of the climate system: the atmosphere, ocean, cryosphere, and lithosphere. Investigates the basic physical processes that determine climate and link the components of the climate system, including the hydrological cycle and its role in climate, climate stability, and global change. Covers forecasting climate, its applications, and human dimensions. Prereqs., ATOC 1050 and 1060, or ATOC 3300/GEOG 3301, or GEOG 1001 and 1-semester calculus. Same as GEOG 3601 and ATOC 3600. Approved for arts and sciences core curriculum: natural science. Prerequisites: Restricted to Environmental Studies or Geography majors only.

College of Arts & Sciences | Environmental Studies

ENVS-3621 (3) Energy Policy and Society

Examines how society makes decisions about energy, and how these decisions affect the environment and the economy. Uses tools from policy analysis, economics, and other disciplines to build an in-depth understanding of energy's role in U.S. contemporary society. Recommended prereqs., ENVS/PHYS 3070.

College of Arts & Sciences | Environmental Studies

ENVS-3800 (3) The Art of Research: The Essential Elements of Research in Environmental Studies

Introduces students to the practice of doing research in environmental studies. Examines how to define a research problem, select methods, design research, construct arguments and evaluate others' research. Aims to familiarize students with the process of doing research and enable them to proceed with confidence in pursuing their own research topics. Recommended for juniors planning to write ENVS honors theses. Prereq., ENVS 1000. Recommended prereq., ENVS 3020. Restricted to juniors/seniors. Prerequisites: Restricted to students with 57-180 credits (Juniors or Seniors).

College of Arts & Sciences | Environmental Studies

ENVS-3930 (1-3) Internship

Relates classroom theory to practice. Provides academically supervised opportunities for environmental studies majors to work in public and private organizations on projects related to students' career goals. May be repeated up to 6 total credit hours.

College of Arts & Sciences | Environmental Studies

ENVS-4027 (3) Inequality, Democracy, and the Environment

Focuses on the structural forces affecting environmental degradation and environmental behavior by examining the relationships between (a) inequality and democratic decision making and (b) undemocratic decision making; U.S. and corporate food and energy policy; and global environmental degradation. The course also focuses on the role that global inequality plays in fostering environmental degradation. Restricted to juniors/seniors. Same as SOCY 4027.

College of Arts & Sciences | Environmental Studies

ENVS-4050 (2-4) Field Studies in Environmental Sciences

Includes field-oriented courses offered at irregular intervals during academic year or during summer sessions.

College of Arts & Sciences | Environmental Studies

ENVS-4100 (1-3) Topics in Environmental Policy

Covers a variety of topics not currently offered in the curriculum; offered depending on instructor availability and student demand. May be repeated upto 9 total credit hours, provided the topics vary. Prerequisites: Restricted to students with 57-180 credits (Juniors or Seniors).

College of Arts & Sciences | Environmental Studies

ENVS-4120 (1-3) Topics in Environmental Sciences

Covers a variety of topics not currently offered in the curriculum; offered depending on instructor availability and student demand. May be repeated upto 6 total credit hours, provided the topics vary. Restricted to junior and senior ENVS majors.

College of Arts & Sciences | Environmental Studies

ENVS-4160 (3) Introduction to Biogeochemistry

Covers fundamentals of biogeochemical cycling, emphasizing water, carbon, and nutrient dynamics in terrestrial ecosystems; chemical interactions of atmosphere, biosphere, lithosphere, and hydrosphere, and natural and human-managed environments. Prereqs., GEOL 3320 or EBIO 3270, and CHEM 1011 or higher. Same as GEOL and EBIO 4160

FARR-1000 (1) Farrand Service-Learning Practicum: Special Topics

Offers a varying service-learning practicum experience as corequisite to a service-learning lecture course. May be repeated up to 6 total credit hours, provided the practica are different. Graded pass/fail.

College of Arts & Sciences | Farrand Residential Academic Program

FARR-1003 (1) Banned Books and the First Amendment

Focuses on a heated topic of discussion since the Constitution was drafted: the censorship of books. This class will look at some classics in literature: Catcher in the Rye, The Color Purple, and Huck Finn, and will explore the questions of why they were controversial and whether censorship of books is ever justified. Graded pass/fail.

College of Arts & Sciences | Farrand Residential Academic Program

FARR-1004 (1) Teen Trials and Tribulations in Literature

Discusses major themes and literary strategies in coming-of-age literature. Pass/fail only.

College of Arts & Sciences | Farrand Residential Academic Program

FARR-1005 (1) Comics and the Interpretive Arts

Explores comic books as literature and visual art. This course will introduce methods of literary analysis and apply them to a specific medium of art: the comic book. Discussions will focus on

content and form and will be guided by questions about the way in which art is defined and categorized. Graded pass/fail.

College of Arts & Sciences | Farrand Residential Academic Program

FARR-1561 (1) Nonviolence for Everyday: Meditation and Other Helpful Habits

Focuses on the challenge of achieving nonviolence on a day-to-day basis by maintaining a peaceful, focused frame of mind. Explores ways to train the mind, including methods that may aid healing.

College of Arts & Sciences | Farrand Residential Academic Program

FARR-1562 (3) Gandhi's Satyagraha: Love in Action for Humans and Other Creatures

Class texts and films explore social justice and structural violence in regard to humans, animals, and the environment in the light of a Gandhian approach to these issues. Outreach work in the community is included.

College of Arts & Sciences | Farrand Residential Academic Program

FARR-2000 (3) Farrand Seminar in the Humanities and the Arts

Studies an aspect of the theme of the Center for Humanities Seminar Program each year, and will be taught by faculty participants in the Center's fellowship program. May be repeated up to 6 total credit hours.

College of Arts & Sciences | Farrand Residential Academic Program

FARR-2002 (3) Literature of Lifewriting

Examines how diverse writers have created unique personal narratives that shape memory within historical and social contexts. Works will exemplify a wide range of literary structures, themes, and strategies that enhance an understanding of the genre and provide models for students' own lifewriting assignments. Approved for arts and sciences core curriculum: literature and the arts.

College of Arts & Sciences | Farrand Residential Academic Program

FARR-2510 (3) Exploring Good and Evil through Film

Eighteen films depict our capacities for good and evil. Topics addressed include the following: the Holocaust, Jung's concept of "The Shadow," the Seven Deadly Sins, altruistic and sociopathic personalities, capital punishment, the redemptive narrative, and the satanic in film. Same as FILM 2613. Approved for arts and sciences core curriculum: ideals and values.

College of Arts & Sciences | Farrand Residential Academic Program

FARR-2660 (3) Ethics of Ambition

Through selected readings in classical literature on ethics and through more contemporary readings and films, examines critical ethical issues relating to the competition of ambitions and the alternative styles of choosing between courses of action in a dangerous world. Uses biographies of those whose lives illustrate both the complexities of the struggles and the profundity of possibilities. Considers the unconscious metaphors of national visions and ambitions, the competing ethics of ends and means, the conflicting ambitions in a pluralistic society, and the transcendent ambitions of visionaries. Same as HONR 2250. Approved for arts and sciences core curriculum: ideals and values.

College of Arts & Sciences | Farrand Residential Academic Program

FARR-2820 (3) Future of the Spaceship Earth

Examines major ecological, political, economic, cultural, legal, and ethical issues that will shape the future. Students consider how their decisions influence the future, and reflect on fundamental values and ideals underlying the search for solutions to these complex problems. Approved for the arts and sciences core curriculum: ideals and values.

GSAP-1000 (3) World Politics and Society

Explores the history leading up to-and away from-the attacks of 9/11 within an American framework. Topics to be covered include: America's relationship with key countries since 1945; the rise of Muslim extremism; modern terrorism and its meaning; the importance of oil; and the events of 9/11 and the Bush Administration's response to it, at home and abroad. Restricted to G-RAP students.

[College of Arts & Sciences](#)
[Global Studies Residential Academic Program](#)

GSAP-1500 (1) Community Engagement

Facilitates community-level service and volunteer opportunities in the University, Boulder-Denver area, and Colorado communities for first-year students. Participants will learn how to conduct basic community research and will design their own volunteer, service, or internship plan in conjunction with the instructor and the class, targeting a university center, community nonprofit, local business, government agency, or international institution.

[College of Arts & Sciences](#)
[Global Studies Residential Academic Program](#)

GSAP-2010 (3) Introduction to National Security

Introduces national and international security studies to students. The course examines the influence of history, domestic politics, and international events and actors on the development of security policy. Restricted to G-RAP students.

[College of Arts & Sciences](#)
[Global Studies Residential Academic Program](#)

GSAP-2020 (3) Topics in National Security

Intensive look at specific security issues. This course focuses on the specifics of policy development related to functional issues (political, military, and non-traditional) as well as threats within specific regions. In addition to class, each student will focus on an issue of their choosing. Recommended prereq., GSAP 2010. Restricted to G-RAP students.

Examines historical trends and development as well as current political and economic issues. Approved for GT-SS3. Approved for arts and sciences core curriculum: contemporary societies. Prerequisites: Restricted to International Affairs (IAFS), Political Science (PSCI), Anthropology (ANTH), Economics (ECON), History (HIST), Geography (GEOG) or College of Arts and Sciences Open Option (XXAS) majors only.

[College of Arts & Sciences](#)
[International Affairs](#)

IAFS-3000 (3) Special Topics in International Affairs

Junior or senior level umbrella seminar spanning a variety of topics relevant to the study of international affairs. Subjects addressed under this heading vary according to student interest and faculty availability. May be repeated up to 9 total credit hours. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) International Affairs (IAFS) or Political Science (PSCI) majors only.

[College of Arts & Sciences](#)
[International Affairs](#)

IAFS-3300 (6) Economy, Politics and Society in the Middle East

Presents social, political, and economic aspects of the Middle East through a faculty-led study abroad in Kuwait, featuring interactions with officials, bankers, university faculty and local students. Offers a unique opportunity to discuss issues with Kuwaitis at Diwanayas, as well as to participate in seminars and workshops with local faculty and representatives of Kuwaiti businesses and government agencies. Prereq., ECON 1000 or 2020.

[College of Arts & Sciences](#)
[International Affairs](#)

IAFS-3500 (3) French Connections: Contemporary France and America in Historical Context

This faculty-led Global Seminar, based in Bordeaux, France provides an opportunity to compare French history and contemporary culture, economy, and culture to that of the United States.

Lectures in Boulder and Bordeaux are supplemented by interactions with officials, scholars, business leaders, interest groups, and organizations in France. Offered through Study Abroad. IAFS 3500 and HIST 4190 are the same course. Approved for arts and sciences core curriculum: historical context.

College of Arts & Sciences International Affairs

IAFS-3600 (3) Global Secular Jewish Societies

This course uses a transnational lens to explore contemporary debates about Jewish people, places, and practices of identity and community. Drawing on history, sociology, international studies, and anthropology, we'll think about the places that Jewish people have called 'home,' and what has made, or continues to make those places 'Jewish.' We'll also explore diverse practices that express the extraordinary varieties of Jewishness (such as building synagogues, food markets, and coffeehouses, creating film festivals, going on heritage travel, Israeli-Jewish backpacking, the creation of online websites and blogs, and creating new urban kibbutzim). Restricted to students with minimum 57 units completed. JWST 3600 and IAFS 3600 are the same course.

Approved for arts and sciences core curriculum: human diversity. Prerequisites: Restricted to students with 57-180 credits (Juniors or Seniors).

College of Arts & Sciences International Affairs

IAFS-3610 (3) Topics in International Affairs and Jewish Studies

Explores topics in international affairs as it relates to Jewish culture and society. Subjects addressed under this heading vary according to student interest and faculty availability. May be repeated up to 9 total credit hours. IAFS 3610 and JWST 3610 are the same course. Prerequisites: Restricted to students with 57-180 credits (Juniors or Seniors).

College of Arts & Sciences International Affairs

IAFS-3650 (3) History of Arab-Israeli Conflict

Explores the origins and development of the Arab-Israeli conflict. Traces Arab-Jewish/Israeli relations from the nineteenth century through the Palestine Mandate, the evolution of Arab and Jewish nationalism, and the creation of Israel to the present day. Recommended prereqs., HIST 1308; HIST/JWST 1828. Same as JWST 3650. Approved for arts and sciences core curriculum: historical context. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) International Affairs (IAFS) majors only.

College of Arts & Sciences International Affairs

IAFS-4500 (3) The Post-Cold War World

Capstone course for international affairs majors. Examines the ways in which the end of the Cold War, the collapse of failed states, and the rise of global terrorism changed the world. Studies how peoples, governments and nongovernmental organizations face new social, political, economic and security challenges in an era of globalization. Includes discussion, oral reports, critical book reviews, and research papers. Prerequisites: Restricted to students with 87-180 credits (Senior) International Affairs (IAFS) majors only.

College of Arts & Sciences International Affairs

IAFS-4800 (3) Honors Seminar in International Affairs

Directed research course tailored to the particular research interests of the students enrolled. Devoted to research methodology and the development of students' research. Prereq., 3.30 GPA and 3.40 IAFS GPA.

College of Arts & Sciences International Affairs

IAFS-4810 (3) Honors in International Affairs

Continuation of IAFS 4800. Students complete original research begun in the fall and write and defend their honors thesis. They meet regularly with the instructor. Prereq., IAFS 4800.

College of Arts & Sciences International Affairs

IAFS-4900 (1-6) Independent Study in International Affairs

Provides an opportunity to earn academic credit for learning outside the formal class structure. Students interested in doing in-depth research propose a research project to a faculty sponsor and then work closely with that person to produce a piece of original research. Prereq., upper-division standing, GPA of 3.00 or better, grade of C or better in all lower-division courses, and at least 6 upper-division courses. Prerequisites: Restricted to students with 57-180 credits (Juniors or Seniors).

College of Arts & Sciences International Affairs

IAFS-4930 (3-6) Internship in International Affairs

Working individually under the guidance of a public or private organization, students are assigned to projects selected for their academic suitability. Written assignments occur throughout the semester. Prereq., departmental approval.

INVS-1000 (4) Responding to Social and Environmental Problems Through Service Learning

By integrating theory with required community service, students explore how problems are shaped by cultural values and how alternative value paradigms affect the definition of problems in areas such as education and the environment. Students examine different approaches to solving problems and begin to envision new possibilities. Approved for GT-SS3. Approved for arts and sciences core curriculum: ideals and values.

[College of Arts & Sciences](#)
[INVST Community Studies](#)

INVS-1513 (3) Civic Engagement: Using the Electoral Process as a Tool for Social Change

Designed to educate and inspire civic engagement primarily in the area of electoral politics. Examines various explanations of why people participate in the electoral process and whom they choose to support. Develops the practical skills necessary to participate successfully in the electoral arena. Through a service component, the course provides experience working on a campaign and mobilizing others to participate in the electoral process.

[College of Arts & Sciences](#)
[INVST Community Studies](#)

INVS-1523 (3) Civic Engagement: Democracy as a Tool for Social Change

Educates and inspires students for civic engagement by exploring democratic values and the rights and responsibilities of citizenship. Develops theoretical knowledge and practical skills for participating in a diverse democratic society, especially at the state level, through analyzing legislative issues, making policy recommendations, and advocating for change. Approved for GT-SS3. Approved for arts and sciences core curriculum: United States context.

[College of Arts & Sciences](#)
[INVST Community Studies](#)

PACS-2500 (3) Introduction to Peace and Conflict Studies

Introduces the field of peace and conflict studies. Examines causes and dynamics of conflict and violence (interpersonal to global), peace institutions and research, peace movements, nonviolence, and careers in conflict resolution and peacemaking.

College of Arts & Sciences | INVST Community Studies

INVS-2919 (3) Renewing Democracy in Communities and Schools

Examines concepts of activism, citizenship, democracy, power, and diversity through classroom discussions and participation in a local high school's Public Achievement project. Through community-based partnerships, students will develop leadership skills; dialogue with diverse groups of people; identify multiple perspectives around controversial issues; and learn to use research and writing to articulate public problems and advocate for their solutions. May be repeated up to 6 total credit hours. Same as EDUC 2919. Approved for arts and sciences core curriculum: human diversity.

College of Arts & Sciences | INVST Community Studies

INVS-3000 (3-4) Innovative Approaches to Contemporary Issues through Service Learning

Explores creative approaches for solving complex social and environmental issues, with a focus on peace and population. Students analyze the root causes of issues in theoretical and historical contexts, and develop their understanding of effective and innovative approaches to change. This course has a requirement of community service. Recommended prereq., upper-division status. Approved for arts and sciences core curriculum: contemporary societies.

College of Arts & Sciences | INVST Community Studies

INVS-3041 (3) Self and Consciousness

Explores human development from a psychosocial perspective, focusing on the interplay between psychological patterns and social forms. Issues such as self-image and social consciousness are studied within the larger context of individual and collective forces leading to transformation. Prereqs., SOCY 1001, and SOCY 3001 or 3011, or instructor consent. Same as SOCY 3041.

College of Arts & Sciences | INVST Community Studies

INVS-3100 (3-4) Multicultural Leadership: Theories, Principles and Practices

Focuses on leadership theories and skills necessary for effectiveness in multicultural settings. Students gain understanding of traditional and culturally diverse approaches to leadership and change through comparative analyses of Western and non-Western theories and practices. Community service required. Same as ETHN 3201 and LDSP 3100. Approved for arts and sciences core curriculum: human diversity.

College of Arts & Sciences | INVST Community Studies

INVS-3302 (3) Facilitating Peaceful Community Change

Students gain knowledge and skills that enable them to become effective facilitators of community goals. Focuses on understanding the processes of community building with a multicultural emphasis. Students are encouraged to apply concepts of life experiences and to examine themselves as potential change agents. Theory and summer experience are integrated. Prereq., admission to INVST. Coreq., INVS 3912. Same as WMST 3302.

College of Arts & Sciences | INVST Community Studies

INVS-3402 (3) Implementing Social and Environmental Change

Examines grassroots innovation as a means for creating comprehensive, solution-based strategies to address social and environmental problems. Students develop an understanding of the root causes of problems, identify how changes are initiated at the grassroots level, and learn the theory and practice of effective and responsible change efforts.

College of Arts & Sciences | INVST Community Studies

PACS-3800 (3) Topics in Peace and Conflict Studies

Content varies depending on instructor. May provide an overview of the field, cover scientific, philosophical, or historical approaches, or analyze a specific substantive topic. May be repeated up to 6 total credit hours. Prerequisites: Restricted to students with 57-180 credits (Juniors or Seniors).

College of Arts & Sciences | INVST Community Studies

INVS-3931 (1-6) The Community Leadership Internship, Part 1

Develops students' competencies as community leaders working for a just and sustainable world. Under the supervision of an instructor and a community supervisor, students learn organizational leadership skills by serving as volunteer staff members at community-based organizations. Prereq., admission into INVST CLP. May be repeated up to 6 total credit hours.

College of Arts & Sciences | INVST Community Studies

INVS-3932 (1-6) Community Leadership Internship, Part 2

Develops students' competencies as community leaders working for a just and sustainable world. Under the supervision of an instructor and a community supervisor, students learn organizational leadership skills by serving as volunteer staff members at community-based organizations. May be repeated up to 6 total credit hours.

College of Arts & Sciences | INVST Community Studies

INVS-4302 (3) Critical Thinking in Development

Exposes students to current issues in the political economy of development. Subjects range from globalization, democratization, and economic development. Specifically, the course explores the international and domestic determinants of economic development with special reference to currency markets, foreign direct investment, trade, and democratization. Prereqs., PSCI 2012 or IAFS 1000, ECON 2010 and 2020, and one upper-division PSCI course. Same as PSCI 4732. Approved for arts and sciences core curriculum: contemporary societies.

| | |
|----------------------------|-------------------------|
| College of Arts & Sciences | INVST Community Studies |
|----------------------------|-------------------------|

INVS-4402 (3) Nonviolent Social Movements

Explores theories of democracy and development in relation to movements for nonviolent social change. Focuses on means and ends, spirituality, leadership, decision-making, civil society, cooperative economics, ecology and decentralized powers. Restricted to senior SOCY/PSCI majors. Same as SOCY 4111.

| | |
|----------------------------|-------------------------|
| College of Arts & Sciences | INVST Community Studies |
|----------------------------|-------------------------|

PACS-4500 (3) Senior Seminar in Peace and Conflict Studies

Examines specific theoretical perspectives in peace and conflict studies and conducts in-depth research projects using a case-study approach. Emphasizes using critical thinking skills in writing and class discussion. Case study examples include: U.S. violence, peacemaking/keeping in ethnonationalist conflicts, environmental conflict resolution. Prereq., PACS 2500 or instructor consent. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior).

| | |
|----------------------------|-------------------------|
| College of Arts & Sciences | INVST Community Studies |
|----------------------------|-------------------------|

INVS-4931 (1-6) Community Leadership in Action, Part 1

Develops students' expertise as community leaders. Under the supervision of an instructor and a community advisor, students design a community-based project. Prereqs., admission to INVST CLP, INVS 3931 and 3932. May be repeated up to 6 total credit hours.

| | |
|----------------------------|-------------------------|
| College of Arts & Sciences | INVST Community Studies |
|----------------------------|-------------------------|

INVS-4932 (1-6) Community Leadership in Action, Part 2

Develops students' expertise as community leaders working for a just and sustainable world. Under the supervision of an instructor and a community advisor, students learn organizational and leadership skills by designing, implementing and evaluating a community-based project. First-hand experience provides students with a deepened understanding of the complex issues facing humanity, and competence with solution-based strategies. May be repeated up to 6 total credit hours. INVS 4932 and LDSP 4932 are the same course.

| | |
|----------------------------|-------------------------|
| College of Arts & Sciences | INVST Community Studies |
|----------------------------|-------------------------|

INVS-4999 (1-6) Teaching Social Justice

INVS students participate in a service-learning practicum under the supervision of an INVS instructor. They explore teaching strategies for implementing concrete educational goals. Focusing on the issues of social justice and social change, they learn how to encourage higher levels of creativity and analysis among students. May be repeated up to 6 total credit hours. Prereqs., INVS 3302, 3931/3932, 4931/4932 (min grade B-).

LDSP-1000 (3) The Foundations of 21st Century Leadership

Introduces students to the critical need for and approaches to the practice of creative and effective leadership. Premised on the idea that the potential for leadership is present in all of us. Approved for arts and sciences core curriculum: ideals and values.

[College of Arts & Sciences](#) [Chancellor Leadership Residential Academic Program](#)

LDSP-1561 (1) Compassionate Leadership and Mindfulness

Explores various practices and traditions that lead to a balanced, physical, mental, emotional, and spiritual life critical to the practice of effective leadership. May be repeated up to 3 total credit hours.

[College of Arts & Sciences](#) [Chancellor Leadership Residential Academic Program](#)

LDSP-1571 (1) Topics in Leadership

Examines the complex nature of leadership by applying knowledge and practice to contemporary and social issues. May be repeated up to 3 total credit hours.

[College of Arts & Sciences](#) [Chancellor Leadership Residential Academic Program](#)

LDSP-2820 (3) Multilevel Issue in Leadership

Studies multilevel issues that originate in organizational settings but carry community and global implications. Encourages students to fully explore the complexity and interrelatedness of issues with

a special emphasis on leadership and ethical implications. Same as PRLC 2820.

College of Arts & Sciences | Chancellor Leadership Residential Academic Program

LDSP-2910 (1-3) Field Practicum 1

Offers supervised campus and off-campus experiences tied to course work in the Leadership RAP or the INVST program. See also LDSP 2920. May be repeated up to 6 total credit hours. Same as EDUC 2910.

College of Arts & Sciences | Chancellor Leadership Residential Academic Program

LDSP-2920 (1-3) Field Practicum 2

Offers supervised campus and off-campus experiences tied to course work in the Leadership RAP or the INVST program. See also LDSP 2910. May be repeated up to 6 total credit hours. Same as EDUC 2920.

College of Arts & Sciences | Chancellor Leadership Residential Academic Program

LDSP-3100 (3-4) Multicultural Leadership: Theories, Principles and Practices

Focuses on leadership theories and skills necessary for effectiveness in multicultural settings. Students gain understanding of traditional and culturally diverse approaches to leadership and change through comparative analyses of western and non-western theories and practices. Same as ETHN 3201 and INVS 3100. Approved for arts and sciences core curriculum: human diversity.

College of Arts & Sciences | Chancellor Leadership Residential Academic Program

LDSP-4010 (4) Critical Issues in Leadership: A Capstone Course

Critical thinking is fundamental to leadership competency. Leaders must have skill at making judgments and collecting information from a variety of sources and on topics in which they have limited expertise. Students read, discuss, and write critical evaluations of contemporary leadership theory from an ethical, military, community building, and business perspective. Prereq., a minimum of 10 credit hours towards the Leadership Certificate completed.

College of Arts & Sciences | Chancellor Leadership Residential Academic Program

LDSP-4932 (1-6) Community Leadership in Action, Part 2

Develops students' expertise as community leaders working for a just and sustainable world. Under the supervision of an instructor and a community advisor, students learn organizational and leadership skills by designing, implementing and evaluating a community-based project. First-hand experience provides students with a deepened understanding of the complex issues facing humanity, and competence with solution-based strategies. May be repeated up to 6 total credit hours. INVS 4932 and LDSP 4932 are the same course.

Subject

Number

LING-1000 (3) Language in U.S. Society

Nontechnical exploration of the ways that language is used in America. Emphasizes language as a social institution and how values and goals of both public institutions and private groups shape and are shaped by language and its use. Meets MAPS requirement for social science: general. Approved for arts and sciences core curriculum: United States context or contemporary societies.

[College of Arts & Sciences](#)
[Linguistics](#)

LING-1010 (3) The Study of Words

Study of English words of Latin and Greek origin, focusing on etymological meaning by analysis of component parts (prefixes, bases, suffixes) and on the ways in which words have changed and developed semantically. Same as CLAS 1010.

[College of Arts & Sciences](#)
[Linguistics](#)

LING-1020 (3) Languages of the World

Explores the issue of human diversity by examining how languages vary around the world. Outlines historical, geographic, and typological classifications of languages across human societies, and the criteria used by linguists for grouping them into language families. Theorizes the relationship between linguistic and cognitive diversity, and considers the impact of language death on humanity. No formal training in linguistics is required. Approved for arts and sciences core curriculum: human diversity.

[College of Arts & Sciences](#)
[Linguistics](#)

ESLG-1130 (2) Accent Reduction for Foreign Students

Provides oral activities with authentic English materials to reduce accents and to increase intelligibility for U.S. academic situations. Evaluates individual problem areas and includes one-on-one meetings with the native-speaker instructor. Improves overall articulation and fluency. Does not fulfill humanities or major requirements.

College of Arts & Sciences | Linguistics

ESLG-1140 (2) Presentation Skills for International Students

Provides instruction and practice to improve classroom oral communication skills necessary for effective participation in the U.S. academic setting, either as an international TA or RA, graduate or undergraduate student. Evaluates individual problem areas and includes digital audio and video recording with extensive feedback from the native-speaker instructor. Improves oral competence and listening comprehension in English for international students. Recommended prereq., ESLG 1130.

College of Arts & Sciences | Linguistics

ESLG-1210 (2) Academic Writing for Foreign Students

Addresses the development of paragraphs and full-length essays. Focus areas include organization and style, grammar and vocabulary, and conventions of academic writing, including incorporating the ideas of others and citing sources appropriately. Extensive instructor feedback provided. Improves fluency and precision in academic writing. Does not fulfill humanities or major requirements.

College of Arts & Sciences | Linguistics

ESLG-1222 (2) Advanced Written Composition for Foreign Students

Continued practice in academic writing, including incorporating the ideas of others and citing sources appropriately. Extensive instructor feedback provided. Preparation, writing, and revising of a full-length academic term/research paper or work on chapters for a master's thesis or doctoral dissertation. Does not fulfill humanities or major requirements. Prereq., ESLG 1210 or instructor consent.

College of Arts & Sciences | Linguistics

ESLG-1410 (3) Academic English Skills for International Students

Provides instruction and practice to improve academic speaking and writing skills for effective participation in U.S. universities. Speaking includes accent reduction and effective communication through oral activities and recordings. Writing addresses development of paragraphs and full-length papers, including organization, grammar, vocabulary, incorporating ideas of others, and citing sources appropriately. Instructor feedback helps students improve fluency in both speaking and writing. Restricted to non-native speakers of English. Credit not granted for this course and ESLG 1130 or ESLG 1210.

College of Arts & Sciences | Linguistics

LING-1500 (3) Understanding Grammar

Presents fundamentals of grammar in the Western tradition. Emphasizes making concepts and uses of grammar (as exemplified in English and closely related foreign languages) understandable to the nonspecialist.

College of Arts & Sciences | Linguistics

LING-1900 (1) Service Learning Practicum: Adult Literacy

Practicum for selected students in LING 1000. Provides practical experience of the impact of illiteracy on individuals, families, and the community at large. Coregistration in service learning recitation is required. Coreq., LING 1000.

College of Arts & Sciences | Linguistics

LING-2000 (3) Introduction to Linguistics

Introduces the study of languages as structural systems. Principles of sound patterns, word formation, meaning, and sentence structure. Gives attention to language acquisition, psycholinguistics, language families, dialects, historical change in languages, and different language types. Meets MAPS requirement for social science: general.

College of Arts & Sciences | Linguistics

LING-2400 (3) Language and Gender

Familiarizes students with the effects of gender on language use; discusses popular beliefs and scholarly theories about language and communication. Provides students with tools for exploring the role of language and gender. Approved for GT-SS3. Approved for arts and sciences core curriculum: human diversity.

College of Arts & Sciences | Linguistics

LING-3005 (3) Cognitive Science

Introduces cognitive science, drawing from psychology, philosophy, artificial intelligence, neuroscience, and linguistics. Studies the linguistic relativity hypothesis, consciousness, categorization, linguistic rules, the mind-body problem, nature versus nurture, conceptual structure and metaphor, logic/problem solving and judgment. Emphasizes the nature, implications, and limitations of the computational model of mind. Prereqs., two of the following: PSYC 2145, LING 2000, CSCI 1300, and PHIL 2440. Same as PSYC 3005, PHIL 3310, and CSCI 3702.

College of Arts & Sciences | Linguistics

LING-3100 (3) Language Sound Structures

Introduces the sounds of languages and their organization into phonological structures. Prereq., LING 2000 or equivalent.

College of Arts & Sciences | Linguistics

LING-3220 (3) American Indian Languages in their Social and Cultural Context

A sampling of the many languages and cultures found in America before Columbus. Emphasizes those living in what eventually became the United States, but also gives attention to the languages and higher civilizations of Latin America. Prereq., junior standing. Approved for arts and sciences core curriculum: human diversity.

College of Arts & Sciences | Linguistics

LING-3430 (3) Semantics

Theoretical and practical study of meaning in natural language. Considers both semantic theories and semantic phenomena from diverse languages. Does not treat techniques for improving the use of language. Prereq., LING 2000 or equivalent. Prerequisites: Restricted to junior or senior Linguistics (LING) majors only.

College of Arts & Sciences | Linguistics

LING-3545 (3) World Language Policies

Examines the economic and sociopolitical impact of choosing English vs. other languages in the U.S. Introduces the study of language policies, rights, and planning in other countries, including the worldwide use of English in social, business, and legal contexts.

College of Arts & Sciences | Linguistics

LING-3800 (1-4) Special Topics in Linguistics

Intensive study of a selected area or problem in linguistics. May be repeated up to 9 total credit hours.

College of Arts & Sciences | Linguistics

LING-4100 (3) Perspectives on Language

Provides extended critical examination of a few selected issues, chosen each term for their general interest and relevance, e.g., the relation between language and thought, or human language vs. animal languages, and computer languages. Prereqs., LING 2000 or equivalent, and junior or senior standing. Prerequisites: Restricted to students with 57-180 credits (Juniors or Seniors).

College of Arts & Sciences | Linguistics

LING-4220 (3) Language and Mind

Studies processes of perceiving speech, interpreting it as meaningful, and expressing intentions to communicate as utterances. Emphasizes roles of the brain and of perceptual and motor systems. Writing, gestural, and animal communicative systems also are treated. Prereqs., PSYC 1001 and LING 2000. Same as PSYC 4220.

College of Arts & Sciences | Linguistics

LING-4420 (3) Morphology and Syntax

Introduces principles of word formation and sentence structure. Covers major morphological and syntactic structures found in the world's languages, and methods for describing grammatical structures, and includes practice in analyzing data from a variety of languages. Prereq., Ling 2000 or equivalent. Same as Ling 5420.

College of Arts & Sciences | Linguistics

LING-4450 (3) Introduction to Formal Syntax

Introduces formal generative grammar, including determining constituent structure, drawing trees, writing rules, understanding the properties of the lexicon and their interaction with syntax, X-bar theory and its modifications, and movement analysis. Prereq., LING 4420 on instructor consent.

College of Arts & Sciences | Linguistics

LING-4560 (3) Language Development

Emphasizes acquisition of language by young children; development in later years and into adulthood is also treated. Particular attention given to roles of environment and of neurophysiological endowment in learning to communicate with words, sentences, and narratives. Restricted to Linguistics majors only. Prereqs., LING 2000 and PSYC 1001. Same as SLHS 4560 and PSYC 4560. Prerequisites: Restricted to Linguistics Majors only.

College of Arts & Sciences | Linguistics

LING-4610 (3) English Structure for Teachers of English to Speakers of Other Languages

Description of morphological and syntactic categories and structures of English. Prereq., LING 2000. Same as LING 5610.

College of Arts & Sciences | Linguistics

LING-4800 (3) Language and Culture

Principles of language structure and how language and culture interrelate; how language and language use are affected by culture; and how culture may be affected by use of, or contact with, particular languages. Prereq., junior standing. Same as ANTH 4800.

PHIL-1000 (3) Introduction to Philosophy

Introduces fundamental topics of philosophy, e.g., knowledge, truth, universals, self, the mind-body problem, time, God, and value. Approved for GT-AH3. Approved for arts and sciences core curriculum: ideals and values.

[College of Arts & Sciences](#) | [Philosophy](#)

PHIL-1010 (3) Introduction to Western Philosophy: Ancient

Develops three related themes: the emergence in antiquity of a peculiarly scientific mode of thinking; the place of religious belief within this developing scientific world view; and the force of ethical speculation within the culture and political climates of ancient Greece and Rome. PHIL 1010 and 1020 may be taken in either order. Same as CLAS 1030. Approved for GT-AH3. Approved for arts and sciences core curriculum: historical context.

[College of Arts & Sciences](#) | [Philosophy](#)

PHIL-1020 (3) Introduction to Western Philosophy: Modern

Introduces several philosophical texts and doctrines of 17th and 18th century Europe. Gives special attention to the connection between philosophical ideas and the wider historical milieu--social, political, and literary. PHIL 1010 and 1020 may be taken in either order. Approved for GT-AH3. Approved for arts and sciences core curriculum: historical context.

[College of Arts & Sciences](#) | [Philosophy](#)

PHIL-1100 (3) Ethics

Introductory study of major philosophies on the nature of the good for humanity, principles of evaluation, and moral choice as they apply to contemporary moral problems. Approved for GT-AH3. Approved for arts and sciences core curriculum: ideals and values.

College of Arts & Sciences | Philosophy

PHIL-1200 (3) Philosophy and Society

Introduces philosophical thought through critical analysis of our own society, its institutions, and principles. Approved for GT-AH3. Meets MAPS requirement for social science: general. Approved for arts and sciences core curriculum: United States context or ideals and values.

College of Arts & Sciences | Philosophy

PHIL-1400 (3) Philosophy and the Sciences

Considers philosophical topics and concepts related to the natural sciences, such as science and pseudo-science; scientific method; the nature of explanation, theory, confirmation, and falsification; the effect of science on basic concepts like mind, freedom, time, and causality; ethics of experimentation; and the relation of science to society. Approved for GT-AH3. Approved for arts and sciences core curriculum: natural science.

College of Arts & Sciences | Philosophy

PHIL-1440 (3) Introductory Logic

Introductory study of definition, informal fallacies, and the principles and standards of correct reasoning. Provides practice in analyzing, evaluating, and constructing frequently encountered types of arguments. Does not fulfill major requirement in logic.

College of Arts & Sciences | Philosophy

PHIL-1500 (3) Reading, Writing and Reasoning

Teaches students how to write argumentative papers. Each seminar will focus narrowly on some controversial topic. For example, one seminar might focus on the existence of God, whereas another might question whether we have free will. In all cases, a significant portion of the course will be devoted to learning how to write cogent argumentative papers about controversial topics. Approved for arts and sciences core curriculum: written communication.

College of Arts & Sciences | Philosophy

PHIL-1600 (3) Philosophy and Religion

Philosophical introduction to some of the central concepts and beliefs of religious traditions, focusing particularly on the question of the existence of God and on the relation between religious

beliefs and moral beliefs. Approved for GT-AH3. Approved for arts and sciences core curriculum: ideals and values.

College of Arts & Sciences | Philosophy

PHIL-1700 (3) Philosophy and the Arts

Considers philosophic questions involved in the analysis and assessment of artistic experiences and of the objects with which the arts, including the literary arts, are concerned.

College of Arts & Sciences | Philosophy

PHIL-1750 (3) Philosophy through Literature

Introduces philosophy through literature. Selected novels, plays, and short stories that exemplify traditional problems in philosophy are read and discussed.

College of Arts & Sciences | Philosophy

PHIL-1800 (3) Open Topics/Philosophy

May be repeated up to 6 total credit hours.

College of Arts & Sciences | Philosophy

PHIL-2140 (3) Environmental Justice

Traditional and contemporary theories of justice are employed in order to critically analyze social and political issues that have important environmental dimensions. Assesses the relationship of justice and equity to the presuppositions of national and global environmental issues and policies.

College of Arts & Sciences | Philosophy

PHIL-2200 (3) Major Social Theories

Introductory study of major philosophies of the past in relation to political, economic, and social issues. Approved for arts and sciences core curriculum: ideals and values.

College of Arts & Sciences | Philosophy

PHIL-2220 (3) Philosophy and Law

Considers philosophical issues related to law in general and the U.S. system in particular. Topics to be covered may address such questions as the following: What is the nature of law? What kinds of acts should the law prohibit (e.g., abortion, drug use, pornography, cloning)? Is there a moral obligation to obey the law? Can civil disobedience be justified? Is there a justification for punishing people for breaking the law? Is capital punishment, in particular, morally justified? Approved for arts and sciences core curriculum: United States context.

College of Arts & Sciences | Philosophy

PHIL-2270 (3) Philosophy and Race

Explores the historical relationship between western philosophy and race and investigates the ways in which philosophy can be used to address contemporary racial issues. Approved for arts and sciences core curriculum: human diversity.

College of Arts & Sciences | Philosophy

PHIL-2290 (3) Philosophy and Women

Explores different approaches to the study of women. Same as WMST 2290. Approved for arts and sciences core curriculum: cultural and gender diversity.

College of Arts & Sciences | Philosophy

PHIL-2390 (3) Philosophy and Psychology

Interdisciplinary course on issues where philosophy and psychology meet; for example, topics such as selfhood, motivation, psychotherapy, freedom, and human behavior are examined. Selected readings in philosophy and psychology are required.

College of Arts & Sciences | Philosophy

PHIL-2440 (3) Symbolic Logic

First course in mathematical logic. Topics include sentential logic, the logic of quantification, and some of the basic concepts and results of metalogic (interpretations, validity, and soundness).

College of Arts & Sciences | Philosophy

PHIL-2610 (3) From Paganism to Christianity

Offers a cultural history of Greek and Roman religion. Students read ancient text in translation and use evidence from archaeology to reconstruct the shift from paganism to Christianity in antiquity. Same as CLAS 2610. Approved for arts and sciences core curriculum: ideals and values.

College of Arts & Sciences | Philosophy

PHIL-2750 (3) Philosophy and Science Fiction

Explores philosophical issues in science fiction literature and film. Topics may include time travel, artificial intelligence, free will, personal identity, and how scientific advances will change human life and society. Students may read science fiction stories and philosophical articles, and watch several movies.

College of Arts & Sciences | Philosophy

PHIL-2800 (3) Open Topics/Philosophy

May be repeated up to 6 total credit hours.

College of Arts & Sciences | Philosophy

PHIL-2840 (1-3) Independent Study

May be repeated up to 8 total credit hours. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences | Philosophy

PHIL-3000 (3) History of Ancient Philosophy

A survey of selected figures in ancient Greek and Roman philosophy and in medieval philosophy. Philosophers studied may include the pre-Socratics, Plato, Aristotle, the Hellenistic philosophers, and such figures as Aquinas and Occam. Explores the larger cultural context that influenced these philosophers and were, in turn, influenced by them. Prereqs., 6 hours of philosophy coursework. Approved for arts and sciences core curriculum: historical context. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences | Philosophy

PHIL-3010 (3) History of Modern Philosophy

Introduces modern philosophy, focusing on the period from Descartes through Kant. In addition to careful analysis of philosophical arguments, attention is paid to the ways in which philosophers responded to and participated in major developments in the 17th and 18th century, such as the scientific revolution. Prereq., 6 hours of philosophy course work. Approved for arts and sciences core curriculum: historical context. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

PHYS-1000 (3) Preparatory Physics

Introduces basic physics, emphasizing an analytical approach to prepare for PHYS 1110/1120, the engineering majors sequence. This course does not satisfy any MAPS deficiency in either the sciences or math. Prereq., 1 year high school algebra or equivalent.

College of Arts & Sciences | Physics

PHYS-1010 (3) Physics of Everyday Life 1

Intended primarily for nonscientists, this course covers physics encountered in everyday life. Topics include balls, scales, balloons, stoves, insulation, light bulbs, clocks, nuclear weapons, basics of flashlights, and microwave ovens. Prereq., high school algebra or equivalent. Approved for GT-SC2. Meets MAPS requirements for natural sciences: chemistry or physics. However, this course should not be taken if the student has a MAPS deficiency in math. Approved for arts and sciences core curriculum: natural science or quantitative reasoning and mathematical skills.

College of Arts & Sciences | Physics

PHYS-1020 (4) Physics of Everyday Life 2

Intended primarily for nonscientists, this course is a continuation of PHYS 1010. Includes electrical power generation and distribution, electrical motors, radio, television, computers, copiers, lasers, fluorescent lights, cameras, and medical imaging. Prereqs., PHYS 1010 and high school algebra. Approved for GT-SC1. Approved for arts and sciences core curriculum: quantitative reasoning and mathematical skills or natural science.

College of Arts & Sciences | Physics

PHYS-1110 (4) General Physics 1

Three lect., one rec. per week, plus three evening exams in the semester. First semester of three-semester sequence for science and engineering students. Covers kinematics, dynamics, momentum of particles and rigid bodies, work and energy, gravitation, simple harmonic motion, and introduction to thermodynamics. Coreq., APPM 1350 or MATH 1300. Credit not granted for this course and PHYS 1170. Approved for GT-SC2. Approved for arts and sciences core curriculum: natural science.

College of Arts & Sciences | Physics

PHYS-1120 (4) General Physics 2

Three lect., one rec. per week, plus three evening exams in the semester. Second semester of three-semester introductory sequence for science and engineering students. Covers electricity and magnetism, wave motion, and optics. Normally is taken concurrently with PHYS 1140. Prereq., PHYS 1110 (min grade C-). Coreq., MATH 2300 or APPM 1360. Credit not granted for this course and PHYS 1180. Approved for GT-SC1. Approved for arts and sciences core curriculum: natural science.

College of Arts & Sciences | Physics

PHYS-1140 (1) Experimental Physics 1

Introduction to experimental physics through laboratory observations of a wide range of phenomena. Course covers experiments on physical measurements, linear and rotational mechanics, harmonic motion, wave motion, sound and heat, electricity and magnetism, optics, and electromagnetic waves with the mathematical analysis of physical errors associated with the experimental process. One lect., one 2-hour lab per week. Prereq., PHYS 1110; prereq. coreq., PHYS 1120. Approved for GT-SC1. Approved for arts and science core curriculum: natural science.

College of Arts & Sciences | Physics

PHYS-1150 (1) Experimental Physics 2

For students in Physics Plan 3 teaching track only. Students complete another full set of PHYS 1140 experiments (seven different labs from those previously completed). Registration by special arrangements with the Department of Physics. Prereqs., PHYS 1110 and 1120. Same as PHYS 1140.

College of Arts & Sciences | Physics

PHYS-1220 (3) Physics for Future Presidents

Intended primarily for nonscientists, this course covers topics relevant to leaders, policy makers, and citizens confronted with science and technology issues. Topics include energy consumption and its impact on the environment; atoms and heat; radioactivity and nuclear reactions; nuclear bombs; light and radio waves for technological applications; climate change; quantum physics. Recommended prereq., high school algebra. Approved for arts and sciences core curriculum: quantitative reasoning and mathematical skills.

College of Arts & Sciences | Physics

PHYS-1230 (3) Light and Color for Nonscientists

Discusses light, color, vision, and perception. Covers reflection, refraction, lenses, and applications to photography and other methods of light sensing. Other topics include lasers and holography. Course is geared toward nonscience majors. Meets MAPS requirements for natural science: chemistry or physics. Should not be taken by students with a math MAPS deficiency. Approved for arts and science core curriculum: natural science.

College of Arts & Sciences | Physics

PHYS-1240 (3) Sound and Music

Explores the physical processes that underlie the diversity of sound and musical phenomena. Topics covered include the physical nature of sound, the perception of sound, the perception of pitch and harmony, musical instruments, synthesizers and samplers, and room acoustics. Nonmathematical; geared toward nonscience majors. Approved for GT-SC2. Meets MAPS requirement for natural science: chemistry or physics. Should not be taken by students with a math MAPS deficiency. Approved for arts and sciences core curriculum: natural science.

College of Arts & Sciences | Physics

PHYS-1300 (3) Experiment in Physics

Examines the roles of experiment in physics, using historical examples. Experiments provide a basis for scientific knowledge, test theories, call for new theories, give hints toward the mathematical form of theories, and provide evidence for the existence of entities involved in theories. Approved for arts and sciences core curriculum: natural science.

College of Arts & Sciences | Physics

PHYS-2010 (5) General Physics 1

Three demonstration lect., one two-hour lab/rec. week, plus three evening exams in the semester. Covers mechanics, heat, and sound. Elementary but thorough presentation of fundamental facts and principles of physics. Natural science majors with a knowledge of calculus and others taking calculus are urged to consider taking the calculus-based courses PHYS 1110, 1120, 1140, and 2130, rather than PHYS 2010 and PHYS 2020. This course is designed for premed students in the biological sciences. Prereq., ability to use high school algebra and trigonometry. Approved for GT-SC1. Meets MAPS requirements for natural science. Approved for arts and sciences core curriculum: natural science.

College of Arts & Sciences | Physics

PHYS-2020 (5) General Physics 2

Three demonstration lect., one two-hour lab/rec. per week, plus three evening exams in the semester. Covers electricity and magnetism, light, and modern physics. Natural science majors with a knowledge of calculus and others taking calculus are urged to take the calculus-based courses PHYS 1110, 1120, 1140, and 2130, rather than PHYS 2010 and PHYS 2020. This course is designed for premed students and students in the biological sciences. Prereq., PHYS 2010. Approved for GT-SC1. Approved for arts and sciences core curriculum: natural science.

College of Arts & Sciences | Physics

PHYS-2130 (3) General Physics 3

Third semester of introductory sequence for science and engineering students except physics majors and those studying computer applications in physics (for these, see PHYS 2170). Covers special relativity, quantum theory, atomic physics, solid state, and nuclear physics. Physics majors should take PHYS 2170 instead of PHYS 2130. Prereqs., PHYS 1120, 1140, or ECEN 2250, 3400. Coreq., MATH 2400. Normally taken with PHYS 2150.

College of Arts & Sciences | Physics

PHYS-2150 (1) Experimental Physics

One lect., one 2-hour lab per week. Includes many experiments of modern physics, including atomic physics, solid state physics, electron diffraction, radioactivity, and quantum effects. Normally taken concurrently with PHYS 2130 or PHYS 2170 but students may take PHYS 2150 after taking PHYS 2130 or 2170. Prereqs., PHYS 1120 and 1140.

College of Arts & Sciences | Physics

PHYS-2160 (1) Experimental Physics

For students in Physics Plan 3 teaching track only. Students do another full set of PHYS 2150 experiments (seven different labs from those previously completed). Registration by special arrangements with the Department of Physics. Prereqs., PHYS 1120 and 1140. Same as PHYS 2150.

College of Arts & Sciences | Physics

PHYS-2170 (3) Foundations of Modern Physics

For physics majors in plans 1 and 2 and those studying computer applications in physics. Completes the three-semester sequence of general physics. Emphasizes developing skills for physics majors. Includes relativity, quantum mechanics, atomic structure. Normally taken with the laboratory PHYS 2150. Prereq., PHYS 1120. Coreq., MATH 2400 or APPM 2350.

College of Arts & Sciences | Physics

PHYS-2210 (3) Classical Mechanics and Mathematical Methods 1

Theoretical Newtonian mechanics, including position and velocity dependent forces, oscillation, stability, non-inertial frames and gravitation from extended bodies. Ordinary differential equations, vector algebra, curvilinear coordinates, complex numbers, and Fourier series will be introduced in the context of the mechanics. Prereqs., PHYS 2130 or 2170, MATH 2400 or APPM 2350. Coreq., APPM 2360. Credit not granted for this course and PHYS 2140. Prerequisites: Restricted to Physics, Engineering Physics or Astronomy majors only.

College of Arts & Sciences | Physics

PHYS-2810 (1-3) Special Topics in Physics

Various topics not normally covered in the curriculum; offered intermittently depending on student demand and availability of instructors. May be repeated up to 7 total credit hours.

College of Arts & Sciences | Physics

PHYS-2840 (1-3) Independent Study

Selected topics for undergraduate independent study. Subject matter to be arranged. May be repeated up to 7 total credit hours.

College of Arts & Sciences | Physics

PHYS-3000 (3) Science and Public Policy

For nonscience majors. Reading, discussions, debates, and lectures are used to study how science affects society economically, intellectually, and in terms of health and national security. Another focus is how government fosters and funds scientific activities. Recommended prereq., completion of core science requirement.

College of Arts & Sciences | Physics

PHYS-3050 (3) Writing in Physics: Problem-Solving and Rhetoric

Teaches strategies used in scientific writing with an emphasis on argument, reviews and reinforces essential writing skills, provides experience in writing both academic and professional communications in a style appropriate to the literature of physics. Prereqs., PHYS 2130 or 2170 and lower-division core writing requirement. Approved for GT-C03. Approved for arts and sciences core curriculum: written communication.

College of Arts & Sciences | Physics

PHYS-3070 (3) Energy and the Environment

Contemporary issues in energy consumption and its environmental impact, including fossil fuel use and depletion; nuclear energy and waste disposal; solar, wind, hydroelectric, and other renewable sources; home heating; energy storage; fuel cells; and alternative transportation vehicles. Included are some basic physical concepts and principles that often constrain choices. No background in physics is required. Approved for arts and sciences core curriculum: natural science. Same as ENVS 3070.

College of Arts & Sciences | Physics

PHYS-3210 (3) Classical Mechanics and Mathematical Methods 2

Lagrangian and Hamiltonian treatment of theoretical mechanics, including coupled oscillations, waves in continuous media, central force motion, rigid body motion and fluid dynamics. The calculus of variations, linear algebra, tensor algebra, vector calculus, and partial differential equations will be introduced in the context of the mechanics. Prereqs., PHYS 2210, APPM 2360, or equivalent.

College of Arts & Sciences | Physics

PHYS-3220 (3) Quantum Mechanics and Atomic Physics 1

Introduces quantum mechanics with wave, operator, and matrix computational techniques. Investigates solutions for harmonic oscillator, potential well, and systems with angular momentum. Develops a quantitative description of one-electron atoms in lowest order. Prereqs., PHYS 2130 or 2170, 2210, and 3210. Prerequisites: Requires pre-requisite courses of PHYS 2210 and 3210, and PHYS 2130 or 2170.

SPAN-1000 (3) Cultural Difference through Hispanic Literature

For freshmen only. Organized around the general topic of cultural differences. Focuses on a related issue such as gender or history articulated in the literature of Spain, Latin America, and the Hispanic United States. Taught in English; students read selected literary texts in English from the various traditions. Does not count towards the Spanish major. Approved for GT-AH2. Approved for arts and sciences core curriculum: literature and the arts. Prerequisites: Restricted to students with 0-26 credits (Freshmen) only.

[College of Arts & Sciences](#)
[Spanish](#)
[Spanish](#)

PORT-1010 (5) Beginning Portuguese 1

Offers students a firm command of Portuguese grammar. Uses grammar as point of departure for development of oral skills. Reading and writing stressed to lesser degree. Attendance at language laboratory may be mandatory.

SPAN-1010 (5) Beginning Spanish 1

Offers students a firm command of Spanish grammar. Grammar is used as a point of departure for development of oral skills. Reading and writing are stressed to a lesser degree. Attendance at the language laboratory may be mandatory. Credit not granted for this course and Span 1150.

[College of Arts & Sciences](#)
[Spanish](#)
[Spanish](#)

PORT-1020 (5) Beginning Portuguese 2

Continuation of PORT 1010. Prereq., PORT 1010 (min. grade C-) or placement.

College of Arts & Sciences Spanish Portuguese

SPAN-1020 (5) Beginning Spanish 2

Continuation of Span 1010. Attendance at the language laboratory may be mandatory. Prereq., SPAN 1010 (min. grade of C-), or placement. Credit not granted for this course and SPAN 1150.

College of Arts & Sciences Spanish Spanish

SPAN-1150 (5) Intensive First Year Spanish

An intensive beginning course covering the same material as Span 1010 and 1020. Attendance at the language laboratory may be mandatory. Similar to Span 1010 and 1020.

College of Arts & Sciences Spanish Spanish

PORT-2110 (3) Second-Year Portuguese 1

Includes grammar review and a study of Portuguese and Brazilian culture, civilization, literature, and art. Prereq., PORT 1020 (min. grade C-) or placement. Approved for GT-AH4. Meets MAPS requirement for foreign language.

College of Arts & Sciences Spanish Portuguese

SPAN-2110 (3) Second-Year Spanish 1

Grammar review. Emphasizes reading, writing, and speaking skills. Attendance at the language laboratory may be mandatory. Prereq., SPAN 1020 (min grade C-), or placement. Credit not granted for this course and SPAN 2150. Approved for GT-AH4. Meets MAPS requirement for foreign language.

College of Arts & Sciences Spanish Spanish

PORT-2120 (3) Second-Year Portuguese 2

Includes grammar review and a study of Portuguese and Brazilian culture, civilization, literature, and art. Prereq., PORT 2110 (min. grade C-) or placement.

College of Arts & Sciences Spanish Portuguese

SPAN-2120 (3) Second-Year Spanish 2

Grammar review. Emphasizes reading, writing, and speaking skills. Attendance at the language laboratory may be mandatory. Prereq., SPAN 2110 (min grade C-) or better, or placement. Credit not granted for this course and SPAN 2150.

College of Arts & Sciences Spanish Spanish

PORT-2150 (5) Intensive Second-Year Portuguese.

Intensive review of grammar and other subjects normally covered in Port 2110 and 2120. Attendance at the language laboratory may be mandatory. Prereq., Port 1020 (min. grade of C-), or placement and departmental approval. Credit not granted for this course and Port 2110 and 2120. Meets MAPS requirement for foreign language.

College of Arts & Sciences Spanish Portuguese

SPAN-2150 (5) Intensive Second-Year Spanish

Intensive review of grammar and other subjects covered in SPAN 2110 and 2120. Attendance at the language laboratory may be mandatory. Prereq., SPAN 1020 (min grade of C-), or placement and departmental approval. Credit not granted for this course and SPAN 2110 or 2120. Approved for GT-AH4. Meets MAPS requirement for foreign language.

College of Arts & Sciences Spanish Spanish

PORT-2350 (3) Portuguese for Spanish Speakers

Intensive introduction to the Portuguese language for those able to speak Spanish. Prereq., five semesters of college Spanish or equivalent, SPAN 3000, placement, or departmental approval.

College of Arts & Sciences Spanish Portuguese

SPAN-2450 (3) Catalan for Spanish Speakers

Offers an intensive introduction to the Catalan language for those able to speak Spanish. By the end of the course students should be able to communicate well in all language-skills areas: listening comprehension, speaking, reading and writing. Students will also have gained a better understanding and appreciation of the Catalan singularity. Prereq., five semesters of college Spanish or equivalent, or SPAN 3000, or placement, or department approval.

College of Arts & Sciences Spanish Spanish

SPAN-3000 (5) Advanced Spanish Language Skills

Transitional course that introduces students to the Spanish major and improves their writing skills. Involves composition, reading, and to a lesser extent, conversation. Prereq., Span 2120 or

2150 (min grade C-), the equivalent, or placement.

College of Arts & Sciences Spanish Spanish

SPAN-3001 (3) Spanish Conversation

Emphasizes vocabulary acquisition and speaking fluency. Through structured and carefully monitored individual, group, and class work, students achieve enduring language growth and meaningful acculturation that otherwise could only be achieved through an extended stay in an Hispanic country. This course is intended for those who are learning Spanish as a second-language. Native speakers of Spanish who have pursued formal education in a Spanish speaking country will not be admitted to the course. Heritage speakers of Spanish (native speakers who have pursued formal education in a non-Spanish speaking setting) as well as students from bi-lingual K-12 programs must meet with the coordinator to determine appropriate class level. Prereqs., SPAN 2120 or 2150 (min grade C-), the equivalent, or placement. Credit not granted for this course and SPAN 3002. Does not count toward the Spanish major.

College of Arts & Sciences Spanish Spanish

SPAN-3002 (3) Advanced Spanish Conversation

Designed for Spanish majors, this course focuses on refining fluency in both informal and formal discourse through group discussions, class work, and individual and group presentations with a focus on preparing students for communication in professional settings. To that end, the materials used in the course will emphasize themes and problems relevant to the contemporary Hispanic world. Prereq., SPAN 3000 (min grade C-) or equivalent. Credit not granted for this course and SPAN 3001.

College of Arts & Sciences Spanish Spanish

PORT-3003 (3) Advanced Portuguese Language Skills

Builds vocabulary and competence in more sophisticated written Portuguese. Involves composition, reading, grammar and class discussion. Themes are drawn primarily from current issues in Brazil. Mandatory for the Portuguese-track majors. Prereqs., PORT 2120 or 2150 or 2350.

College of Arts & Sciences Spanish Portuguese

SPAN-3010 (3) Advanced Rhetoric and Composition

Designed to refine expository and argumentative writing in Spanish, this course will center around four main areas of study: culture, linguistics, sociopolitical and economic reality, and literature and criticism. A multi-draft process-based approach will guide the writing and revision of essays. Additionally, there will be a focus on grammar and lexical issues most challenging for students at the third-year level. Prereq., SPAN 3000 (min. grade C-). Similar to SPAN 4010. Approved for arts and sciences core curriculum: written communication.

College of Arts & Sciences Spanish Spanish

SPAN-3030 (3) Professional Spanish for Business 1

Includes the study of business vocabulary, business concepts, geographic context, and cultural context. Prereq., SPAN 3000.

| | | |
|----------------------------|---------|---------|
| College of Arts & Sciences | Spanish | Spanish |
|----------------------------|---------|---------|

SPAN-3040 (3) Professional Spanish for Business 2

Continuation of SPAN 3030 with more emphasis on interpreting and elementary translation. Some attention is given to the writing of resumes and application letters, as well as to the entire job-search process. Prereqs., SPAN 3000, 3030. Prerequisites: Restricted to Spanish majors with a subplan of International Spanish for Professionals.

| | | |
|----------------------------|---------|---------|
| College of Arts & Sciences | Spanish | Spanish |
|----------------------------|---------|---------|

SPAN-3050 (3) Spanish Phonology and Phonetics

Designed to teach some of the methods, techniques, and tools of descriptive linguistics as they apply to articulatory phonetics. Students analyze important contrasts between sounds of Spanish and English by means of phonetic transcription. Prereq., SPAN 3000.

| | | |
|----------------------------|---------|---------|
| College of Arts & Sciences | Spanish | Spanish |
|----------------------------|---------|---------|

SPAN-3100 (3) Literary Analysis

Students read short stories and other brief narrative texts, critical and creative essays, short plays, and poems to facilitate the acquisition of critical skills in identification of basic ideological and formalistic issues within texts being studied. Prereq., SPAN 3000 or equivalent.

| | | |
|----------------------------|---------|---------|
| College of Arts & Sciences | Spanish | Spanish |
|----------------------------|---------|---------|

SPAN-3120 (3) Advanced Spanish Grammar

Analysis of texts from morphological and syntactic perspectives. Structural and semantic characteristics of major features of Spanish are studied at the sentence level. Use of these grammatical features is then studied in selected literary texts. Prereq., SPAN 3000 or equivalent.

| | | |
|----------------------------|---------|---------|
| College of Arts & Sciences | Spanish | Spanish |
|----------------------------|---------|---------|

SPAN-3150 (3) Linguistic Analysis of Spanish

Introduces students to fundamental areas of linguistic analysis with special attention paid to Spanish (and Portuguese). The structural systems of language will be introduced (principles of sound patterns, word formation, meaning, and sentence structure). Different types of language variation will be discussed (historical, social, regional). Prereq., SPAN 3000 or equivalent.

Different types of language variation will be discussed (historical, social, regional). Prereq., SPAN 3000 or equivalent.

College of Arts & Sciences Spanish Spanish

SPAN-3200 (3) Spanish Culture

Examines historical bases of modern Spain's cultural and political currents. Prereq., SPAN 3000.

College of Arts & Sciences Spanish Spanish

SPAN-3210 (3) The Cultural Heritage of Latin America

Examines literary, artistic, and philosophical currents in Latin America beginning with pre-Columbian indigenous cultures and continuing to the present. Prereq., SPAN 3000. Credit not granted for

this course and SPAN 3220.

| | | |
|----------------------------|---------|---------|
| College of Arts & Sciences | Spanish | Spanish |
|----------------------------|---------|---------|

SPAN-3220 (3) Latin American Culture: Spanish America and Brazil

Examines literary, artistic, and philosophical currents in Spanish America and Portuguese America (Brazil), from pre-Columbian times to the present. Taught in Spanish. Prereq., SPAN 3000. Recommended prereqs., PORT 2110 and 2120. Credit not granted for this course and SPAN 3210. Same as PORT 3220.

SPAN-3230 (3) Discovering Barcelona: Culture and Heritage

Presents more than 2,000 years of Barcelona's cultural heritage in the city of Barcelona from the Romans to the present. We will read works by locals and foreign authors to understand how the city has been a hub of the European and Mediterranean cultures for centuries. This is a faculty sponsored Global Seminar to Barcelona, Spain, offered through the Study Abroad Program. Prereq., SPAN 3000 or equivalent.

| | | |
|----------------------------|---------|---------|
| College of Arts & Sciences | Spanish | Spanish |
|----------------------------|---------|---------|

SPAN-3240 (3) Catalan Culture 1: Nation and Art

Introduces students to the literary, artistic, and historical currents of Catalonia, an economically vibrant area of the Iberian Peninsula with 10 million people, its capital Barcelona, and a distinct culture and language. The course examines national identity and major works from renowned Catalan artists, spanning architecture, painting, and literature, like Dalí, Gaudí, or Miró. Prereq., SPAN 3000.

| | | |
|----------------------------|---------|---------|
| College of Arts & Sciences | Spanish | Spanish |
|----------------------------|---------|---------|

SPAN-3250 (3) Catalan Culture 2: Contemporary Trends and Barcelona

Introduces students to the contemporary social and cultural trends of Catalonia as they take place mainly in its capital Barcelona. The course examines current developments in fields such as theatre, art, fashion, cooking, urban design or architecture. Prereq., SPAN 3000.

| | | |

ENGL-1001 (3) Freshman Writing Seminar

Provides training and practice in writing. Focuses on the writing process, the fundamentals of composition, and the structure of argument. Provides numerous and varied assignments with opportunity for revision. Prereqs., College of Arts and Sciences freshman or sophomore standing. Not open to business or engineering majors. Meets MAPS requirement for English. Approved for arts and sciences core curriculum: lower-division written communication. Prerequisites: Not open to Engineering or Business majors.

[College of Arts & Sciences](#) [English](#) [Undergraduate Writing](#)

ENGL-1191 (3) Introduction to Creative Writing

Introduces techniques of fiction and poetry. Student work is scrutinized by the instructor and may be discussed in a workshop atmosphere with other students. May not be taken concurrently with ENGL 2021 or 2051. May not be repeated. Not open to graduate students.

[College of Arts & Sciences](#) [English](#) [Undergraduate Writing](#)

ENGL-1260 (3) Introduction to Women's Literature

Introduces literature by women in England and America. Covers both poetry and fiction and varying historical periods. Acquaints students with the contribution of women writers to the English literary tradition and investigates the nature of this contribution. Same as WMST 1260. Approved for arts and sciences core curriculum: human diversity.

[College of Arts & Sciences](#) [English](#) [General Literature & Language](#)

ENGL-1500 (3) Masterpieces of British Literature

Introduces students to a range of major works of British literature, including at least one play by Shakespeare, a pre-20th century English novel, and works by Chaucer and/or Milton. Approved for arts and sciences core curriculum: literature and the arts.

College of Arts & Sciences | English | General Literature & Language

ENGL-1600 (3) Masterpieces of American Literature

Enhances student understanding of the American literary and artistic heritage through an intensive study of a few centrally significant texts, emphasizing works written before the 20th century. Approved for arts and sciences core curriculum: literature and the arts.

College of Arts & Sciences | English | General Literature & Language

ENGL-1800 (3) American Ethnic Literatures

Introduces significant fiction by ethnic Americans. Explores both the literary and the cultural elements that distinguish work by these writers. Emphasizes materials from Native American, African American, and Chicano traditions. Approved for arts and sciences core curriculum: human diversity.

College of Arts & Sciences | English | General Literature & Language

ENGL-2021 (3) Introductory Poetry Workshop

Introductory course in poetry writing. May be repeated up to 9 total credit hours. Prereq., ENGL 1191 (min grade B-), or equivalent transfer course work. Prerequisites: Requires prerequisite course of ENGL 1191 (B- or better). Not open to graduate students.

College of Arts & Sciences | English | Undergraduate Writing

ENGL-2022 (5) Literary Analysis (with Lab)

Provides basic skills for the English major, enhanced with a language arts lab. Emphasizes critical writing and the acquisition of the techniques and vocabulary of criticism through close attention to literary language. Required for students who declared the major summer 1999 and thereafter. Restricted to English majors. Credit not granted for this course and English 2000. Formerly ENGL 2020. Prerequisites: Restricted to English majors only.

College of Arts & Sciences | English | General Literature & Language

ENGL-2036 (3) Introduction to Media Studies

Serves as an introduction to media studies, including theories and methodologies for undertaking media scholarship within the humanities. Topics may include the history of the book, text messaging, blogging, and gaming, as well as digital fiction and poetry. Same as ATLS 2036. Formerly ENGL 2030.

College of Arts & Sciences | English | Advanced Thry, Genre, Pop Cult

ENGL-2051 (3) Introductory Fiction Workshop

Introductory course in fiction writing. May be repeated up to 9 total credit hours. Prereq., ENGL 1191 (min grade B-), or equivalent transfer course work. Prerequisites: Requires prerequisite course of ENGL 1191 (B- or better).

College of Arts & Sciences | English | Undergraduate Writing

ENGL-2058 (3) Twentieth- and Twentyfirst-Century Literature

Surveys the major literary trends in prose and poetry from 1900 to the present in the Anglo-American tradition of modern, postmodern, and contemporary literature. Provides students with a grounding in the major authors and motifs of 20th- and 21st-century in literature connection with political and cultural changes across the periods.

College of Arts & Sciences | English | Critical Studies in English

ENGL-2102 (3) Literary Analysis

Provides a basic skills course designed to equip students to handle the English major. Emphasizes critical writing and the acquisition of basic techniques and vocabulary of literary criticism through close attention to poetic and prose language. Required for students who declared the major summer 1999 and thereafter. Restricted to English majors only. Credit not granted for this course and ENGL 1010. Formerly ENGL 2000. Prerequisites: Restricted to English majors only.

College of Arts & Sciences | English | General Literature & Language

ENGL-2112 (3) Introduction to Literary Theory

Introduces students to a wide range of critical theories that English majors need to know. Covers major movements in modern literary/critical theory, from Matthew Arnold through new criticism to contemporary postmodern frameworks. Required for all English majors. Restricted to English majors only. Formerly ENGL 2010. Prerequisites: Restricted to English majors only.

College of Arts & Sciences | English | General Literature & Language

ENGL-2115 (3) American Frontiers

Considers the backdrop of the American West in literature, film, photography, and gaming. We will focus on a range of narratives and images depicting this wide swathe of American geography while simultaneously cultivating close reading skills, digital media analysis and film analysis that will aid you in deeper insights at the textual level. Approved for arts and sciences core curriculum: U.S. context.

College of Arts & Sciences | English | American Literature

ENGL-2222 (3) Foundations of British and American Literature

Studies major texts of medieval and Renaissance writers who fundamentally influenced the course of English writing. Ordinarily deals with Chaucer, Shakespeare, and Milton, though other classical, medieval, and Renaissance authors may be substituted.

College of Arts & Sciences | English | Backgrounds to Literature Engl

ENGL-2503 (3) British Literary History to 1660

Provides a chronological study of great figures and forces in English literature from Beowulf to 1660. Formerly ENGL 2502.

College of Arts & Sciences | English | British Literature to 1660

ENGL-2504 (3) British Literary History after 1660

Provides a chronological study of great figures and forces in English literature from 1660 to the present. Formerly ENGL 2512.

College of Arts & Sciences | English | British Literature after 1660

ENGL-2620 (3) Introduction to Western European Literature 1

Close study of literary classics of Western civilization: the Odyssey or Iliad, Greek drama, and several books of the Bible. Formerly ENGL 2602.

College of Arts & Sciences | English | General Literature & Language

ENGL-2630 (3) Introduction to Western European Literature 2

Close study of literary classics of Western civilization: major Roman and medieval texts. Formerly ENGL 2612.

College of Arts & Sciences | English | General Literature & Language

ENGL-2655 (3) Introduction to American Literature I

Chronological survey of the literature from Bradford to Whitman. Restricted to English, humanities, and film studies majors only. Credit not granted for this course and ENGL 3654. Similar to ENGL 3655. Prerequisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) English (ENGL), Humanities (HUMN) or Film (FILM or FMST) majors only.

College of Arts & Sciences | English | American Literature

ENGL-2665 (3) Introduction to American Literature 2

Chronological survey of the literature from Whitman to Faulkner. Continuation of ENGL 3655. Credit not granted for this course and ENGL 3664. Similar to ENGL 3665. Prerequisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) English (ENGL), Humanities (HUMN) or Film (FILM or FMST) majors only.

College of Arts & Sciences English American Literature

ENGL-2707 (3) Introduction to Lesbian, Bisexual, and Gay Literature

Offers students at sophomore and junior levels an introduction to some of the forms, concerns, and genres of contemporary lesbian, bisexual, and gay writing in English. Prereq., sophomore standing. Same as LGBT 2707.

College of Arts & Sciences English Multicultural & Gender Studies

ENGL-2717 (3) American Indian Literature

Surveys historical and contemporary North American Native American literature. Examines the continuity and incorporation of traditional stories and values in Native Literature, including novels, short stories, and poetry. Same as ETHN 2713.

College of Arts & Sciences English Multicultural & Gender Studies

ENGL-2727 (3) African American Literature

Surveys African American literature from the 17th century, through the Harlem Renaissance and Depression, to the present. Same as ETHN 2722.

College of Arts & Sciences English Multicultural & Gender Studies

ENGL-2737 (3) Survey of African American Literature 2

Chronological study of African American literature from the Depression writers to the present. Same as ETHN 2732.

College of Arts & Sciences English Multicultural & Gender Studies

ENGL-1001 (3) Freshman Writing Seminar

Provides training and practice in writing. Focuses on the writing process, the fundamentals of composition, and the structure of argument. Provides numerous and varied assignments with opportunity for revision. Prereqs., College of Arts and Sciences freshman or sophomore standing. Not open to business or engineering majors. Meets MAPS requirement for English. Approved for arts and sciences core curriculum: lower-division written communication. Prerequisites: Not open to Engineering or Business majors.

[College of Arts & Sciences](#) [English](#) [Undergraduate Writing](#)

ENGL-1191 (3) Introduction to Creative Writing

Introduces techniques of fiction and poetry. Student work is scrutinized by the instructor and may be discussed in a workshop atmosphere with other students. May not be taken concurrently with ENGL 2021 or 2051. May not be repeated. Not open to graduate students.

[College of Arts & Sciences](#) [English](#) [Undergraduate Writing](#)

ENGL-2021 (3) Introductory Poetry Workshop

Introductory course in poetry writing. May be repeated up to 9 total credit hours. Prereq., ENGL 1191 (min grade B-), or equivalent transfer course work. Prerequisites: Requires prerequisite course of ENGL 1191 (B- or better). Not open to graduate students.

[College of Arts & Sciences](#) [English](#) [Undergraduate Writing](#)

ENGL-2051 (3) Introductory Fiction Workshop

Introductory course in fiction writing. May be repeated up to 9 total credit hours. Prereq., ENGL 1191 (min grade B-), or equivalent transfer course work. Prerequisites: Requires prerequisite course of ENGL 1191 (B- or better).

College of Arts & Sciences | English | Undergraduate Writing

ENGL-3011 (3) Literary Forms and Styles in Post-1900 Literature

Studies special topics in literary forms and styles (e.g. magical realism, naturalism, language poetry, etc.) and also the development of genres (e.g. poetry, drama, digital media, novel) in the 20th- and 21st-centuries. Topics vary each semester. Specially design for English majors. May be repeated for a total of 6 units for different topics. Prerequisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors).

College of Arts & Sciences | English | Undergraduate Writing

ENGL-3021 (3) Intermediate Poetry Workshop

Intermediate course in poetry writing. May be repeated up to 9 total credit hours. Prerequisites: Requires prerequisite courses of ENGL 1191 and ENGL 2021 (both min grade B-). Restricted to Creative Writing minor students or students with a sub plan of Creative Writing.

College of Arts & Sciences | English | Undergraduate Writing

ENGL-3041 (3) Studies in Fiction and Poetry

Examines literary forms and themes with special emphasis on issues related to the craft of poetry and fiction. This course is taught in conjunction with visiting lectures by practicing writers. Does not count as Creative Writing workshop credit. Prereq., ENGL 1191 (min grade B-). Prerequisites: Requires prerequisite course of ENGL 1191 (B- or better).

College of Arts & Sciences | English | Undergraduate Writing

ENGL-3051 (3) Intermediate Fiction Workshop

Intermediate course in fiction writing. May be repeated up to 9 total credit hours. Prerequisites: Requires prerequisite courses of ENGL 1191 and ENGL 2051 (both min grade B-). Restricted to Creative Writing minor students or students with a sub plan of Creative Writing.

College of Arts & Sciences | English | Undergraduate Writing

ENGL-3081 (3) Intermediate Nonfiction Workshop

Discussion and practical criticism of student work and discussion of relevant works of literary nonfiction. May be repeated up to 9 total credit hours. Prerequisites: Requires prerequisite course of ENGL 1191 (B- or better). Restricted to English, Humanities, Theatre (THTR or TBFA) majors only or Creative Writing minor students only.

College of Arts & Sciences | English | Undergraduate Writing

ENGL-4011 (3) Global and Transnational Approaches to Post-1900 Literature

Studies special topics that focus on transnational and global issues in the 20th- and 21st-century literature. For instance, the emergence of globalization, the impact of cross-cultural exchanges, the increase of migration, or the legacies of imperialism. Topics vary each semester. Specially designed for English majors. May be repeated for a total of 6 units for different topics. Prerequisites: Restricted to students with 57-180 credits (Juniors or Seniors).

College of Arts & Sciences | English | Undergraduate Writing

ENGL-4021 (3) Advanced Poetry Workshop

Advanced course in poetry writing. May be repeated up to 9 total credit hours. Prerequisites: Requires prerequisite courses of ENGL 1119, ENGL 2021 and ENGL 3021 (all min grade B-). Restricted to Creative Writing minor students or students with a sub plan of Creative Writing.

College of Arts & Sciences | English | Undergraduate Writing

ENGL-4051 (3) Advanced Fiction Workshop

Advanced course in fiction writing. May be repeated up to 9 total credit hours. Prerequisites: Requires prerequisite courses of ENGL 1191, ENGL 2051, and ENGL 3051 (all min grade B-). Restricted to Creative Writing minor students or students with a sub plan of Creative Writing.

College of Arts & Sciences | English | Undergraduate Writing

ENGL-4071 (3) Scriptwriting Workshop

Designed to give students practical criticism of their script writing and technical format requirements. Either stage plays or screenplays are studied, as announced. May be repeated up to 9 total credit hours. Prereq., CRW major or instructor consent based on submission of manuscript. Same as FILM 4075. Prerequisites: Requires prerequisite course of ENGL 1191 (B- or better).

College of Arts & Sciences | English | Undergraduate Writing

ENGL-4081 (3) Playwriting

May be repeated up to 9 total credit hours. Prereq., CRW major or instructor consent based on submission of manuscript. Prerequisites: Requires prerequisite course of ENGL 1191 (B- or better). Restricted to students with a sub plan of Creative Writing.

GEOG-1001 (4) Environmental Systems 1---Climate and Vegetation

MLect. and lab. Introduces the atmospheric environment of the Earth: elements and controls of climate and their implications for hydrology, vegetation, and soils. Emphasizes distribution of physical features across the Earth's surface and interactions between humans and their environment, especially those leading to global change on the decade to century time scale. Approved for GT-SC1. Meets MAPS requirement for natural science: nonlab or lab. Approved for arts and sciences core curriculum: natural science.

[College of Arts & Sciences](#)
[Geography](#)
[Physical Geography](#)

GEOG-1011 (4) Environmental Systems 2---Landscapes and Water

MLect. and lab. Introduces landscapes and flowing water, emphasizing the formation and geographic distribution of mountains, volcanoes, valleys, and deserts, and their shaping by rivers and glaciers. Includes field trips. Approved for GT-SC1. Meets MAPS requirement for natural science: nonlab or lab. Approved for arts and sciences core curriculum: natural science.

[College of Arts & Sciences](#)
[Geography](#)
[Physical Geography](#)

GEOG-1982 (3) World Regional Geography

Involves an intellectual journey around the globe, stopping at major regions to study the people, their environments, and how they interact. Topics include the political/economic tensions in changing Europe, conflicts in Brazilian rain forests, transitions facing African peoples, and rapid changes in China. Meets MAPS requirement for social science: geography.

[College of Arts & Sciences](#)
[Geography](#)
[Human and Cultural Geography](#)

GEOG-1992 (3) Human Geographies

Examines social, political, economic, and cultural processes creating the geographical worlds in which we live, and how these spatial relationships shape our everyday lives. Studies urban growth, geopolitics, agricultural development and change, economic growth and decline, population dynamics, and migration exploring both how these processes work at global scale as well as shape geographies of particular places. Meets MAPS requirement for social science: geography.

College of Arts & Sciences | Geography | Human and Cultural Geography

GEOG-2002 (3) Geographies of Global Change

Familiarizes students with spatial and ecological perspectives on economic, political, social, cultural, and environmental changes. Examines roles of transnational corporations, global media, world cities, food security, labor, migration, human rights, ethnicity, nationalism, resources, environmental degradation, and sustainable development in global change. Meets MAPS requirement for social science: geography.

College of Arts & Sciences | Geography | Human and Cultural Geography

GEOG-2053 (4) Mapping a Changing World

Overviews the vital role cartography plays in modern society and contemporary science. Includes fundamentals of reading and creating maps for research and enjoyment. Lab provides hands-on experience with computer-based methods for creating useful maps.

College of Arts & Sciences | Geography | Techniques (Skills)

GEOG-2412 (3) Environment and Culture

Examines nature-culture interactions and the effects of development and resource use on environmental quality, as well as practical efforts to manage and protect the environment. Meets MAPS requirement for social science: geography.

College of Arts & Sciences | Geography | Human and Cultural Geography

GEOG-3023 (4) Statistics for Geography

Introduces parametric and distribution-free statistics, emphasizing applications to earth science problems. Not open to students who have taken a college-level statistics course. Same as GEOL 3023. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) Environmental Conservation (EVOC), Geography (GEOG), Geology (GEOL) or Environmental Studies (ENVS) majors only.

College of Arts & Sciences | Geography | Techniques (Skills)

GEOG-3053 (4) Cartography: Visualization and Information Design

Introduction to the fundamentals of cartography--the science and art of map design. Emphasis on map projections, symbolization, and the design of maps with computers. Students produce series of thematic maps with modern computer-assisted techniques. Basic familiarity with computers strongly recommended. Introductory course in statistics recommended (may be taken concurrently). Restricted to junior or senior GEOG/ENVS majors. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) Environmental Studies (ENVS) or Geography (GEOG) majors only.

College of Arts & Sciences | Geography | Techniques (Skills)

GEOG-3251 (3) Mountain Geography

Surveys mountain environments and their human use with illustrations from temperate and tropical mountain areas.

College of Arts & Sciences | Geography | Physical Geography

GEOG-3301 (3) Analysis of Climate and Weather Observations

Prereqs., ATOC 1050 and 1060, or GEOG 3601/ATOC 3600/ENVS 3600, or GEOG 1001 and 1-semester calculus. Same as ATOC 3300. Approved for arts and sciences core curriculum: natural science.

College of Arts & Sciences | Geography | Physical Geography

GEOG-3351 (3) Biogeography

Surveys and analyzes plant and animal distributions on a world scale from ecological and historical perspectives. Emphasizes human impact on species. Prereq., GEOG 1001.

College of Arts & Sciences | Geography | Physical Geography

GEOG-3402 (3) Natural Hazards

Explores the impacts of extreme geophysical events on human society. Emphasizes adaptations to extreme events and ways of reducing vulnerability and damage.

College of Arts & Sciences | Geography | Human and Cultural Geography

GEOG-3412 (3) Conservation Practice and Resource Management

Studies inventory, policy, and management of natural resources. Emphasizes practical approaches to the conservation and management of soil, land, water, and air resources. Restricted to geography and environmental studies majors.

College of Arts & Sciences | Geography | Human and Cultural Geography

GEOG-3422 (3) Conservation Thought

Lect. and rec. Provides an historical survey of human consumption of earthly materials; environmental and global considerations of population growth, cultural attitude, and technological development; and diverse goals and philosophy of conservation movements in time and place.

College of Arts & Sciences | Geography | Human and Cultural Geography

GEOG-3511 (4) Introduction to Hydrology

Examines hydrologic processes in the surface environment, emphasizing the environment of the western United States. Emphasizes natural processes and their management to augment water resources. Prereq., GEOG 1001 and 1011. Approved for arts and sciences core curriculum: natural science. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) Geography (GEOG), Environmental Studies (ENVS) or Ecology and Evolutionary Biology (EBIO) majors only.

College of Arts & Sciences | Geography | Physical Geography

GEOG-3601 (3) Principles of Climate

Describes the basic components of the climate system: the atmosphere, ocean, cryosphere, and lithosphere. Investigates the basic physical processes that determine climate and link the components of the climate system, including the hydrological cycle and its role in climate, climate stability, and global change. Covers forecasting climate, its applications, and human dimensions. Restricted to Geography or Environmental Studies majors only. Prereqs., ATOC 1050 and 1060, or GEOG 3301/ATOC 3300, or GEOG 1001 and 1-semester calculus. Same as ATOC/ENVS 3600. Approved for arts and sciences core curriculum: natural science. Prerequisites: Restricted to Geography or Environmental Studies majors only.

College of Arts & Sciences | Geography | Physical Geography

GEOG-3612 (3) Geography of American Cities

Introduces geography of American cities. Includes demographic and ideological contexts of urban development, emergence of the city system, location theory and rent models, and urban-economic problems.

College of Arts & Sciences | Geography | Human and Cultural Geography

GEOG-3662 (3) Economic Geography

Presents several theories of location of economic activity: general theory of land use, agricultural location theory, plant location theory, central place theory, location of systems of cities, and geographical organization of industries. Studies aggregate geographical structure of regions as the geography of three major markets: labor, product, and capital, including the banking system. Explores the economic growth of regions and policies designed to influence regional growth and welfare.

College of Arts & Sciences | Geography | Human and Cultural Geography

GEOG-3672 (3) Gender and the Global Economy

Examines the role of gender in global economy. Explores the impacts of colonialism and modern global economy on gender relations, with particular emphasis on third world societies. Also focuses on related issues of population politics, environmental crisis, women's sexual exploitation, and women's social movements worldwide. Prereqs., GEOG 1982, 1992, 2002, 2412, WMST 2000 or 2050. Same as WMST 3672. Approved for arts and sciences core curriculum: human diversity.

College of Arts & Sciences | Geography | Human and Cultural Geography

GEOG-3682 (3) Geography of International Development

Compares and contrasts global characteristics and processes of development, emphasizing the developing countries of the world. Integrates theories of development, specific development topics, and case studies to explore the problems of development. Recommended prereqs., GEOG 1982, 1992, 2002 or 2412.

College of Arts & Sciences | Geography | Human and Cultural Geography

GEOG-3742 (3) Place, Power, and Contemporary Culture

Presents a radical reexamination of the geography of culture. Examines the relationship between places, power, and the dynamics of culture. Explores how the globalization of economics, politics, and culture shapes local cultural change. Looks at how place-based cultural politics both assist and resist processes of globalization. Recommended prereq., GEOG 1982, 1992, or 2002. Approved for arts and sciences core curriculum: contemporary societies.

College of Arts & Sciences | Geography | Human and Cultural Geography

GEOG-3812 (3) Mexico, Central America, and the Caribbean

Introduces the geography of Latin America, focusing on the lands and peoples of Mexico, Central America, and the Caribbean. Examines regional and national culture, history, environment, and population, as well as ongoing environmental and socioeconomic changes. Recommended prereqs., GEOG 1982, 1992, 2002, or 2412.

College of Arts & Sciences | Geography | Human and Cultural Geography

GEOG-3822 (3) Geography of China

Surveys the world's most populous country, examining physical and historical geography, urbanization and regional development, agriculture, population, energy, and the environment. Seeks to situate China's development in a broader Asian and global context. Recommended prereqs., GEOG 1982, 1992, 2002 or 2412. Approved for arts and sciences core curriculum: human diversity.

College of Arts & Sciences | Geography | Human and Cultural Geography

GEOG-3840 (1-6) Undergraduate Independent Study

Provides an independent study opportunity, by special arrangement with faculty, for students presenting strong geography preparation. May be repeated up to 8 total credit hours. Restricted to geography majors. Prerequisites: Restricted to Geography majors only.

Prerequisites: Restricted to Geography or Environmental Studies majors only.

College of Arts & Sciences | Geography | Physical Geography

GEOG-4201 (3) Biometeorology

Interdisciplinary science, studying the interactions between atmospheric processes and living organisms (plants, animals, and humans). Discusses how organisms adapt to a changing environment. Uses a practical, problem-solving approach to explore these interactions. Prereq., GEOG 1001. Same as ENVS 4201.

College of Arts & Sciences | Geography | Physical Geography

GEOG-4241 (4) Principles of Geomorphology

Studies weathering, mass-wasting, fluvial, wind, and marine processes and the resulting landforms. Prereq., GEOG 1011 or any 1000-level sequence in geological sciences. Same as GEOL 4241. Approved for arts and sciences core curriculum: natural science. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) Environmental Conservation (EVOC),

Geography (GEOG), Geology (GEOL) or Environmental Studies (ENVS) majors only.

College of Arts & Sciences | Geography | Physical Geography

GEOG-4251 (4) Fluvial Geomorphology

Emphasizes landscapes formed by running water. Includes basic fluid mechanics, sediment transport, hillslope and channel erosion, and sediment yield. Prereqs., Geog 1011 and 3511. Recommended prereq., Geog 3023. Same as Geog 5251.

College of Arts & Sciences | Geography | Physical Geography

GEOG-4261 (3) Glaciers and Permafrost

Surveys the major terrestrial components of the cryosphere, including permafrost, glaciers, and ice sheets. Emphasizes physical processes involving ice, including thermal behavior, ice deformation, and mass balance, but also considers biogeochemical processes and landforms associated with ice. The climate context, including human interactions and recent climate history, will be considered. The course will be taught in a combination lecture-seminar format. Prereq., GEOG 1011 or GEOL 1010. Recommended prereq., GEOG 4241.

College of Arts & Sciences | Geography | Physical Geography

GEOG-4271 (3) The Arctic Climate System

Understanding the climate of the Arctic requires a synthetic, system oriented approach. The course focuses on the intimate linkages between the atmosphere, ocean and land that give the Arctic region its unique character, link the Arctic to the larger global climate system, and promote understanding the rapid changes occurring in the Arctic. Prereq., GEOG 1001. GEOG 4271 and 5271 are the same course.

College of Arts & Sciences | Geography | Physical Geography

GEOG-4311 (3) Watershed Biogeochemistry

Emphasizes terrestrial-aquatic linkages in headwater catchments, focusing on hydrologic pathways, isotopic and geochemical tracers, nutrient cycling, water quality, experimental manipulations, and modeling. Prereq., GEOG 1011 and 3511. Recommended prereq., parametric statistics.

College of Arts & Sciences | Geography | Physical Geography

GEOG-4321 (3-4) Snow Hydrology

Offers a multidisciplinary and quantitative analysis of physico-chemical processes that operate in seasonally snow-covered areas, from the micro- to global-scale: snow accumulation, metamorphism, ablation, chemical properties, biological aspects, electromagnetic properties, remote sensing, Gis, and quantitative methods. Prereqs., GEOG 1001 or 1011, and any statistics course. Same as GEOG 5321.

College of Arts & Sciences | Geography | Physical Geography

College of Arts & Sciences | Geography | Physical Geography

GEOG-4331 (3-4) Mountain Climatology

Surveys and analyzes climatic characteristics of mountain environments worldwide. Prereq., GEOG 1001 or ATOC 1050 or 1060. Same as GEOG 5331.

College of Arts & Sciences | Geography | Physical Geography

GEOG-4371 (3) Forest Geography: Principles and Dynamics

Surveys principles of forest geography and ecology. Includes both individual tree responses to environmental factors and species interactions within communities. Emphasizes forest dynamics and their relation to management problems. Prereq., GEOG 1001. Same as GEOG 5371.

College of Arts & Sciences | Geography | Physical Geography

GEOG-4401 (3) Soils Geography

Discusses chemical and physical properties of soils, soil development, distributions, and management relevant to understanding plant-soil relationships in natural and human-altered landscapes. Prereq., GEOG 1011. Recommended prereq., inorganic chemistry. Same as GEOG 5401.

College of Arts & Sciences | Geography | Physical Geography

GEOG-4501 (3) Water Resources and Water Management of Western United States

Interprets and analyzes hydroclimatic data, surface, and groundwater. Critically evaluates water use, emphasizing problems associated with geographic maldistribution, appropriations, irrigation, industry, pollution, and regional development. Same as GEOG 5501.

College of Arts & Sciences | Geography | Physical Geography

GEOG-5161 (3) Research Design in Geography

The human section reads and discusses contemporary research philosophies and methodologies in human geography. Practices the development of research proposals and presentation of research ideas and results. The physical section reads and discusses contemporary research philosophies and methodologies in physical geography (climatology, geomorphology, biogeography, and soils geography). Practices the development of research proposals and presentation of research ideas. Restricted to geography graduate students.

College of Arts & Sciences | Geography | Physical Geography

GEOG-5211 (3) Seminar: Physical Climatology

Involves a research seminar concerned with problems of mass and energy exchange in the Earth-atmosphere system. Selects topics from such areas as air quality, bioclimatology, hydrology, climate change, and the climates of urban, agricultural, and natural environments. Restricted to graduate students.

College of Arts & Sciences | Geography | Physical Geography

GEOG-5221 (3) Synoptic and Dynamic Climatology

Examines global climates from the standpoint of synoptic and dynamic climatology. Prereqs., GEOG 3201 or equivalent, 3000-level course in climate/atmospheric sciences, and instructor consent. Restricted to graduate students.

College of Arts & Sciences | Geography | Physical Geography

GEOG-5241 (1-3) Topics in Physical Geography

Presents recent research topics that vary from year to year. Consult the online Schedule Planner for specific topics. May be repeated up to 6 total credit hours. Restricted to graduate students. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Geography | Physical Geography

GEOG-5251 (4) Fluvial Geomorphology

Restricted to graduate students. Same as GEOG 4251.

College of Arts & Sciences | Geography | Physical Geography

GEOG-5271 (3) The Arctic Climate System

Understanding the climate of the Arctic requires a synthetic, system oriented approach. The course focuses on the intimate linkages between the atmosphere, ocean and land that give the Arctic region its unique character, link the Arctic to the larger global climate system, and promote understanding the rapid changes occurring in the Arctic. Prereq., GEOG 1001. GEOG 4271 and 5271 are the same course. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Geography | Physical Geography

GEOG-5321 (3-4) Snow Hydrology

Restricted to graduate students. Same as GEOG 4321.

College of Arts & Sciences | Geography | Physical Geography

College/School

Department

Search by Course Number

Subject

Number

HONR-1001 (1) Honors Coseminar

Honors coseminars are designed to combine an honors seminar experience with the shared experience of an organized lecture course. Designed typically for 15 students, coseminars are taken for an additional 1 credit hour. Coseminars provide honors students with an opportunity to extend their common experience in the course lecture into an enriched interactive, critical thinking opportunity. May be repeated up to 4 total credit hours. Prerequisites: A minimum 3.3 cum GPA is required for this Honors class or you must be part of the first year student group.

[College of Arts & Sciences](#)
[Honors](#)

HONR-1810 (3) Honors Diversity Seminar

Students will develop an appreciation for, and experience with, diverse perspectives. In particular this includes: racial/ethnic, gender, sexual orientation, and class perspectives, for constructing knowledge as they proceed through their undergraduate studies. Three themes provide the framework for the course: education for the next century, the 21st century citizen, and the modern individual in a diverse society. Topics explored include privilege, stigmatization, targeted and nontargeted grouping, and oppression. Engaging in independent research and experiential, empathetic experiences is required. Approved for arts and sciences core curriculum: human diversity. Prerequisites: A minimum 3.3 cum GPA is required for this Honors class or you must be part of the first year student group.

[College of Arts & Sciences](#)
[Honors](#)

HONR-2250 (3) Ethics of Ambition

Through selected readings in classical literature on ethics and through more contemporary readings and films, examines critical ethical issues relating to the competition of ambitions and the alternative styles of choosing between courses of action in a dangerous world. Uses biographies of those whose lives illustrate both the complexities of the struggles and the profundity of possibilities. Considers the unconscious metaphors of national visions and ambitions, the competing ethics of ends and means, the conflicting ambitions in a pluralistic society, and the transcendent ambitions of visionaries. Same as FARR 2660. Approved for arts and sciences core curriculum: ideals and values. Prerequisites: A minimum 3.3 cum GPA is required for this Honors class or you must be part of the first year student group.

[College of Arts & Sciences](#)
[Honors](#)

HONR-2251 (3) Introduction to the Bible

Studies the major works, figures, and genres of the Bible and attempts to understand what they meant to their own time and why they became so important to Western civilization and contemporary America. Approved for arts and sciences core curriculum: historical content. Prerequisites: A minimum 3.3 cum GPA is required for this Honors class or you must be part of the first year student group.

College of Arts & Sciences | Honors

HONR-2500 (3) Open Topics

Variety of new courses at the 2000 level. See honors program announcements for specific contents. May be repeated up to 6 total credit hours. Prereq., GPA 3.30 or higher. Prerequisites: A minimum 3.3 cum GPA is required for this Honors class or you must be part of the first year student group.

College of Arts & Sciences | Honors

HONR-2610 (1) Leadership Practicum: Kittredge Honors Program Flock Leaders

Required for students who are selected as flock leaders for the Kittredge honors residence program. Teaches skills and techniques to enable them to lead a small group in the unique environment of a residential honors program. May be repeated up to 6 total credit hours. Prereq., consent of Kittredge honors program associate director.

College of Arts & Sciences | Honors

HONR-2860 (3) The Figure of Socrates

Investigates why Socrates intrigued great writers like Aristophanes, Plato, Xenophon, and Aristotle and why, through his life and execution by the Athenian democracy, he still influences Western ethics, politics, and education and is central to cultural literacy. Approved for arts and sciences core curriculum: literature and the arts.

College of Arts & Sciences | Honors

HONR-3001 (1) Honors Coseminar

Honors coseminars are designed to combine an honors seminar experience with the shared experience of a lecture course. Designed typically for 10--15 students, coseminars are taken either for an additional 1 credit hour or in place of a recitation. Coseminars are designed to provide honors students with an opportunity to extend their common experience in the course lecture into an enriched interactive, critical thinking opportunity.

College of Arts & Sciences | Honors

HONR-3004 (3) Women in Education

Honors women in education and their legacy. Introduces women educators, beginning in the late 19th century, whose significant theories of education and work inteaching have had an impact on

all of our lives, in history, and in society. Explores the educational theories and methods of several representative women educators and analyzes them through an investigation of their professional and personal lives. Same as WMST 3004. Approved for arts and sciences core curriculum: human diversity.

College of Arts & Sciences | Honors

HONR-3056 (3) Experience of Learning

Major historical, psychological, philosophical and personal perspectives on education in general and university education in particular will be developed. Participants will be encouraged to consider how the issues discussed and the ideas developed in the seminar bear on the choices they face in planning their own educations. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences | Honors

HONR-3220 (3) Advanced Honors Writing Workshop

Intensive practice of expository writing skills, particularly argumentation in longer forms. Course includes extensive practice in researching secondary sources, synthesizing large bodies of information, structuring cogent arguments for diverse sources, etc. Approved for GT-CO3. Approved for arts and sciences core curriculum: written communication. Prerequisites: Restricted to students with 57-180 credits (Juniors or Seniors).

College of Arts & Sciences | Honors

HONR-3270 (3) Journey Motif in Women's Literature

Investigates the application of the theme of the journey to developmental narratives by analyzing modern British and American writings by women. Applies methods from psychology, feminist studies, gay studies, cultural studies to concepts of development, regression, progress, escape. Approved for arts and sciences core curriculum: human diversity. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences | Honors

HONR-3550 (1-6) Open Topics

Investigates special topics in humanities, social sciences, and natural sciences. Topics vary from semester to semester and from course to course. See Honors program announcements for specific contents. Open to Honors-qualified students beyond the freshman year. May be repeated for up to six credit hours for different topics.

College of Arts & Sciences | Honors

HONR-3560 (3) Science and Mysticism

Has modern science proven or validated the mystical religious experience? Or does a basic conflict remain between these diverse human endeavors? The similarities and differences between science and mysticism will be investigated through readings, discussions and practical, experiential exercises. Discussions and exercises will be designed to encourage both an intellectual and a non-intellectual understanding of the course material. Prerequisites: A minimum 3.3 cum GPA is required for this Honors class or you must be part of the first year student group.

College of Arts & Sciences | Honors

HONR-3810 (3) Privilege and Modern Social Construction

This course examines social constructions that lead to productive interactions between and among American social communities. Using case studies and humanistic accounts, students analyze the lived experiences of a unique group or successful citizens who routinely evidence productive practices of multicultural engagement. Through interactions with policy makers and community practitioners, students design and enact activities that allow them to reconstruct their personal patterns of privilege practices of their peer groups in various settings. Prereq., HONR 1810 or demonstrated academic study of race, class, and gender. Prerequisites: A minimum 3.3 cum GPA is required for this Honors class or you must be part of the first year student group.

College of Arts & Sciences | Honors

HONR-4000 (3) Open Topics

Variety of new courses at the 4000 level, see Honors Program announcements for specific contents. May be repeated up to 6 total credit hours. Restricted to juniors/seniors or instructor consent required. Prerequisites: Restricted to students with 57-180 credits (Juniors or Seniors).

College of Arts & Sciences | Honors

HONR-4025 (3) Heroines and Heroic Tradition

Given recent controversies about the roles of women in power, this course re-evaluates heroic traditions as the stories that ground our sense of public endeavor. What do we mean by heroic? What is a heroine? Are heroines different from heroes? Approved for arts and sciences core curriculum: human diversity. Prerequisites: A minimum 3.3 cum GPA is required for this Honors class or you must be part of the first year student group.

College of Arts & Sciences | Honors

HONR-4055 (3) Discourse Analysis and Cultural Criticism

Discourse analysis critically investigates the founding assumptions by which systems of meaning operate. Its practice is aimed at a rigorous, systematic analysis of both specific cultural issues and the dynamics by which structures of meaning may be maintained or transformed. Coreq., HONR 4056. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences | Honors

HONR-4056 (1-3) Service Practicum: Discourse Analysis and Cultural Criticism

Help communities in need, with credit hours varying according to time commitment. The practicum provides experiential and intellectual understanding of the discourses and dynamics that maintain major cultural hierarchies of values and of resource distribution. Coreq., HONR 4055. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences | Honors

HONR-4959 (3-6) Honors Thesis

May be repeated up to 6 total credit hours. Requires approval of Honors Program.

College of Arts & Sciences | Honors

Search by Course Number

Subject

Number

PSYC-1001 (3-4) General Psychology

Surveys major topics in psychology: perceptions, development, personality, learning and memory, and biological bases of behavior. Students may participate as subjects for several hours in ongoing research. Meets MAPS requirement for social science: general.

College of Arts & Sciences | Psychology | General

PSYC-2012 (3) Biological Psychology 1

Surveys biological bases of learning, motivation, emotion, sensory processes and perception, movement, comparative animal behavior, sexual and reproductive activity, instinctual behavior, neurobiology of language and thought, and neurophysiology and neuroanatomy in relation to behavior. Prereq., PSYC 1001. Approved for GT-SC2. Approved for arts and sciences core curriculum: natural science.

College of Arts & Sciences | Psychology | Biological

PSYC-2022 (3) Biological Psychology 2

Continuation of PSYC 2012. Integrates knowledge and facts presented in PSYC 2012 into current topics in biopsychology. Course no longer taught after fall 2003, except through Continuing Education correspondence. Prereq., PSYC 2012.

College of Arts & Sciences | Psychology | Biological

NRSC-2100 (4) Introduction to Neuroscience

Provides an introduction to fundamental concepts in neuroscience. The goal of this first course is to provide a strong foundation in neurobiology--cell biology, physiology of the neuronal membrane, interneuronal communication, neurotransmission, gross anatomy, and how the brain develops. Students will also learn principles of sensory systems functions. The recitation will introduce students to neuronal computational modeling. Prereqs., MCDB 1150 and 1151, or EBIO 1210 and 1230. Fulfills PSYC 2012 requirement for Psychology majors. Prerequisites: Restricted to students with 27-86 credits (Sophomores or Juniors).

College of Arts & Sciences | Psychology

NRSC-2101 (1-4) Topics in Neuroscience

Provides students with the opportunity to focus on a specific area of Neuroscience in depth. May be repeated up to 6 total credit hours. Prereq., instructor consent.

College of Arts & Sciences | Psychology

PSYC-2145 (3) Introductory Cognitive Psychology

Introduces the study of cognitive processes of human beings: sensation, perception, attention, pattern recognition, memory, learning, language, visual thought, reasoning, problem solving, and decision making. Discusses applications to education, human factors, human computer interaction, law, and other areas of psychology. Prereq., PSYC 1001.

College of Arts & Sciences | Psychology | Experimental

PSYC-2606 (3) Social Psychology

Covers general psychological principles underlying social behavior. Analyzes major social psychological theories, methods, and topics, including attitudes, conformity, aggression, attraction, social perception, helping behavior, and group relations. Prereq., PSYC 1001. Credit not granted for this course and PSYC 4406. Approved for GT-SS3. Approved for arts and sciences core curriculum: contemporary societies.

College of Arts & Sciences | Psychology | Social

PSYC-2643 (3) Child and Adolescent Psychology

Surveys major psychological processes of childhood and adolescence. Prereq., PSYC 1001.

College of Arts & Sciences | Psychology | Clinical

PSYC-2700 (3) Psychology of Contemporary American Women

Surveys psychological theory and research concerning contemporary American women. Deals with such issues as masculine bias in American culture, sex difference in cognitive functioning and

personality, psychological conflict for women between career and home, and specific areas pertaining to women's mental health. Prereq., PSYC 1001 or WMST 2000. Same as WMST 2700. Approved for arts and sciences core curriculum: human diversity.

College of Arts & Sciences Psychology

PSYC-3001 (4) Honors Research Methods Seminar

Focuses on research design. Each student prepares an original, detailed research proposal, which can become the honors thesis. Open only to students who have been accepted into the psychology departmental honors program. Prereq., instructor consent.

College of Arts & Sciences Psychology General

PSYC-3005 (3) Cognitive Science

Introduces cognitive science, drawing from psychology, philosophy, artificial intelligence, neuroscience, and linguistics. Studies the linguistic relativity hypothesis, consciousness, categorization, linguistic rules, the mind-body problem, nature versus nurture, conceptual structure and metaphor, logic/problem solving and judgment. Emphasizes the nature, implications, and limitations of the computational model of mind. Prereqs., two of the following: PSYC 2145, LING 2000, CSCI 1300, and PHIL 2440. Same as LING 3005, PHIL 3310, and CSCI 3702.

College of Arts & Sciences Psychology Experimental

PSYC-3101 (4) Statistics and Research Methods in Psychology

Three hours of lecture and one two-hour lab per week. Introduces descriptive and inferential statistics and their roles in psychological research. Topics include correlation, regression, T-test, analysis of variance, and selected nonparametric statistics. Prereqs., MATH 1011 or MATH 1150, 1300, or 1081. Prerequisites: Requires pre-requisite class of MATH 1011 or MATH 1150 or MATH 1300 or MATH 1081.

College of Arts & Sciences Psychology General

PSYC-3102 (3) Behavioral Genetics

Inheritance of behavioral characteristics. Prereq., PSYC 3101.

College of Arts & Sciences Psychology Biological

PSYC-3105 (3) Experimental Methods in Psychology

Provides an introduction to the use of experimental procedures in psychology. Students learn about the logic and design of experiments, the meaning of psychological data, how to analyze and interpret data, and the role of theory in psychology. Prereqs., Psyc 1001 and 3101. Recommended prereq., Psyc 2145.

College of Arts & Sciences Psychology Experimental

PSYC-3313 (4) Psychopathology

Three hours lec. and two hours rec. per week. Analyzes major theories of personality and behavioral disorders. Restricted to junior and senior PSYC majors. Prereq. PSYC 1001 or instructor consent. Credit not granted for this course and PSYC 4303. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) Psychology (PSYC) majors only.

College of Arts & Sciences | Psychology | Clinical

PSYC-4001 (3) Honors Seminar 2

Surveys contemporary issues, explores current controversies, and examines in detail selected topics in psychology. Open to juniors and seniors in the department's honors program. Prereq., instructor consent.

College of Arts & Sciences | Psychology | General

NRSC-4011 (1-6) Senior Thesis and Research and Ethics

Perform neuroscience related empirical research and analysis. Training emphasizes the development of critical thinking skills specific to dealing with ethical dilemmas and the responsible conduct of research. Issues related to animal and human research are covered. Prereq., instructor consent.

College of Arts & Sciences | Psychology

PSYC-4011 (1-6) Senior Thesis

Critically reviews some aspect of psychological literature, scholarly analysis of a major psychological issue, and/or empirical research project. See the psychology honors director for further information. May be repeated up to 6 total credit hours.

College of Arts & Sciences | Psychology | General

NRSC-4015 (3) Affective Neuroscience

Experiencing and learning from affect--emotional value--is a fundamental part of the human experience. When people started thinking of brains as computers, research on emotion fell by the wayside. Recently however, this has changed, and there is an explosion of work on the brain mechanisms of affective value. We will cover recent advances in understanding the emotional brain. Prereqs. for NRSC 4015 are PSYC 2012 or NRSC 2100 or instructor permission, and junior or senior standing. NRSC 4015 and 5015 are the same course. Prerequisites: Restricted to students with 57-180 credits (Juniors or Seniors).

College of Arts & Sciences | Psychology

PSYC-4021 (3) Psychology and Neuroscience of Exercise

Integrative course exploring the social, cognitive, neuroscience and physiological aspects of exercise as it relates to mental health. Examines how psychological and neuroscience research have been used to study how participation in regular physical activity affects mental health and how psychological variables influence participation in, adherence to, enjoyment of, and performance in sports and exercise. Restricted to students with 57-180 credits (Junior or Senior) Psychology (PSYC) majors only. Prereqs., PSYC 2012, 2145 and 2606. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) Psychology (PSYC) majors only.

College of Arts & Sciences | Psychology | General

NRSC-4032 (3) Neurobiology of Learning and Memory

Provides a comprehensive treatment of how the brain acquires, stores, and retrieves memories. To do this we will consider (a) the methods used to address these issues, (b) what we know about how brain systems are organized to support memories of different types, and (c) the synaptic mechanisms that are involved. Prereqs., PSYC 2012 or 4052, or IPHY 3730, or NRSC 2100 or 4052, or instructor consent. Restricted to juniors and seniors. Same as NRSC 5032. Formerly PSYC 4032 Prerequisites: Restricted to students with 57-180 credits (Juniors or Seniors).

College of Arts & Sciences | Psychology

NRSC-4052 (4) Behavioral Neuroscience

Intensive survey of the morphological, neurochemical, and physiological aspects of behavior. Prereqs., PSYC 2012-2022 or EBIO 1210-1220, or CHEM 1111-1131, or PHYS 1010-1020, or PHYS 2010-2020. NRSC 4052 and PSYC 4052 are the same course. Same as NRSC/PSYC 5052.

College of Arts & Sciences | Psychology

PSYC-4052 (4) Behavioral Neuroscience

Intensive survey of the morphological, neurochemical, and physiological aspects of behavior. Prereqs., PSYC 2012-2022 or EBIO 1210-1220, or CHEM 1111-1131, or PHYS 1010-1020, or PHYS 2010-2020. NRSC 4052 and PSYC 4052 are the same course. Same as NRSC/PSYC 5052.

College of Arts & Sciences | Psychology | Biological

PSYC-4062 (3) The Neurobiology of Stress

Provides an introduction to the concept of stress and the physiological systems involved. Factors modulating stress vulnerability versus resilience, and stress interactions with other systems with health relevance will be explored. Emphasis will be placed on current research on brain mechanisms. A strong foundation and interest in biological psychology, neuroscience, and physiology is recommended. Prereqs., PSYC 2012 or NRSC 2100 or instructor consent. Prerequisites: Requires pre-requisite course of PSYC 2012 or NRSC 2100 with grade of C- or better. Restricted to students with 57-180 credits (Junior or Senior).

College of Arts & Sciences | Psychology | Biological

NRSC-4072 (3) Clinical Neuroscience: A Clinical and Pathological Perspective

Provides basic science background for understanding the mechanism of behavioral disturbances resulting from brain damage. Emphasizes pathological neuroanatomy, neurophysiology, and neuropharmacology, which is essential for understanding problems related to health and disease. Prereqs., PSYC 2012 or NRSC 2100 and one of the following sequences of courses: EBIO 1210 and 1220, MCDB 1150 and 2150, or MCDB 1150 and EBIO 1220. Same as NRSC 5072. Formerly PSYC 4072.

College of Arts & Sciences | Psychology | General

PSYC-4001 (3) Honors Seminar 2

Surveys contemporary issues, explores current controversies, and examines in detail selected topics in psychology. Open to juniors and seniors in the department's honors program. Prereq., instructor consent.

College of Arts & Sciences Psychology General

PSYC-4011 (1-6) Senior Thesis

Critically reviews some aspect of psychological literature, scholarly analysis of a major psychological issue, and/or empirical research project. See the psychology honors director for further information. May be repeated up to 6 total credit hours.

College of Arts & Sciences Psychology General

PSYC-4021 (3) Psychology and Neuroscience of Exercise

Integrative course exploring the social, cognitive, neuroscience and physiological aspects of exercise as it relates to mental health. Examines how psychological and neuroscience research have been used to study how participation in regular physical activity affects mental health and how psychological variables influence participation in, adherence to, enjoyment of, and performance in sports and exercise. Restricted to students with 57-180 credits (Junior or Senior) Psychology (PSYC) majors only. Prereqs., PSYC 2012, 2145 and 2606. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) Psychology (PSYC) majors only.

College of Arts & Sciences Psychology General

PSYC-4511 (3) History of Psychology

Includes outline of development of psychological theories since the Greek philosophers, the story of experimental psychology and its problems, and schools of psychological thinking. Students read original sources in English and English translations.

College of Arts & Sciences Psychology General

PSYC-4521 (3) Critical Thinking in Psychology

Allows students to expand their powers as they think about psychological problems, or about how psychological knowledge and techniques can be applied to pressing political, economic, biological, quantitative, and social issues. Encourages intellectual discipline and critical thinking about concepts and ideas; enables students to participate in oral and written discussion. May not be repeated, only 3 credit hours allowed. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Psychology (PSCY)majors only.

College of Arts & Sciences Psychology General

PSYC-4541 (3) Special Topics in Psychology

Studies and analyzes special interest topics from the broad and diversified field of psychology. Particular section content is determined by instructor. May be repeated up to 9 total credit hours, provided the topics vary. Restricted to students with 57-180 credits (Junior or Senior) Psychology (PSYC) majors only. Same as PSYC 5541. Prerequisites: Restricted to students with 57-180

credits (Junior or Senior) Psychology (PSYC) majors only.

PSYC-4911 (3) Teaching of Psychology

Students receive concrete experience in teaching general psychology under supervision of a psychology faculty member. Alternative pedagogical strategies are discussed. Students must submit an application to the undergraduate advising center.

| | | |
|----------------------------|------------|---------|
| College of Arts & Sciences | Psychology | General |
|----------------------------|------------|---------|

PSYC-4931 (3) Field Placement Internship

Offers valuable volunteer experience through a supervised field placement. Provides hands-on insight into the decisions and issues that confront professionals in psychology and related fields.

Prereqs., completion of 15 or more hours of psychology course work. Restricted to psychology majors. Prerequisites: Restricted to Psychology majors only.

| | | |
|----------------------------|------------|---------|
| College of Arts & Sciences | Psychology | General |
|----------------------------|------------|---------|

PSYC-5541 (1-6) Special Topics in Psychology

Same as PSYC 4541. Prerequisites: Restricted to Graduate Students only.

| | | |
|----------------------------|------------|---------|
| College of Arts & Sciences | Psychology | General |
|----------------------------|------------|---------|

PSYC-5741 (4) General Statistics

Surveys probability and statistics in psychology. Instructor consent required. Prerequisites: Restricted to Graduate Students only.

| | | |
|----------------------------|------------|---------|
| College of Arts & Sciences | Psychology | General |
|----------------------------|------------|---------|

PSYC-5751 (4) General Statistics

Continuation of PSYC 5741. Instructor consent required. Prerequisites: Restricted to Graduate Students only.

| | | |
|----------------------------|------------|---------|
| College of Arts & Sciences | Psychology | General |
|----------------------------|------------|---------|

PSYC-5761 (3) Structural Equation Modeling

Provides training in the use of structural equation modeling, a class of analytic techniques that include the estimation of unobserved, or latent, constructs and an estimation of relationships among latent constructs. Prereqs., PSYC 5741 and 5751. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Psychology General

PSYC-6841 (1-3) Independent Study

May be repeated up to 7 total credit hours. Prereq., graduate standing.

College of Arts & Sciences Psychology General

PSYC-6911 (1-3) Research Practicum

College of Arts & Sciences Psychology General

PSYC-6941 (1) Master's Degree Candidate

May be repeated up to 7 total credit hours.

College of Arts & Sciences Psychology General

PSYC-6951 (1-6) Master's Thesis

May be repeated up to 7 total credit hours.

College of Arts & Sciences Psychology General

PSYC-7291 (3) Multivariate Analysis

Familiarizes students with scientific concepts, matrix theory, and computer techniques of multivariate analyses for psychological research. Topics include cluster and factor analysis, multiple regression, and discriminant functions. Emphasizes research technology rather than mathematical theory. Instructor consent required.

College of Arts & Sciences Psychology General

PSYC-8991 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

SOCY-1001 (3) Introduction to Sociology

Examines basic sociological ideas including social relations, social interaction, social structure, and social change. Examples are drawn from societies around the world. Meets MAPS requirement for social science: general. Approved for GT-SS3. Approved for arts and sciences core curriculum: contemporary societies.

[College of Arts & Sciences](#)
[Sociology](#)
[General Sociology](#)

SOCY-1004 (3) Deviance in U.S. Society

Examines the social construction of deviance in the U.S., the process of acquiring a deviant identity and managing deviant stigma, and the social organization of deviant act, lifestyles, relationships and careers. Approved for GT-SS3. Approved for arts and sciences core curriculum: ideals and values.

[College of Arts & Sciences](#)
[Sociology](#)
[Deviance and Criminology](#)

SOCY-1006 (3) The Social Construction of Sexuality

Discusses the social determinants of sexuality. Analyzes the economic, psychological, and cultural influences on human sexuality. Interactional perspective of human sexuality is presented. Same as WMST 1006. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

[College of Arts & Sciences](#)
[Sociology](#)
[Sex and Gender](#)

SOCY-1016 (3) Sex, Gender, and Society 1

Examines status and power differences between the sexes at individual and societal levels. Emphasizes historical context of gender roles and status, reviews major theories of gender stratification. Same as WMST 1016. Approved for GT-SS3. Approved for arts and sciences core curriculum: human diversity.

College of Arts & Sciences | Sociology | Sex and Gender

SOCY-1021 (3) United States Race and Ethnic Relations

An examination of race and minority problems in U.S. society, including the psychological, social, and cultural sources of prejudice and discrimination. Approved for GT-SS3. Approved for arts and sciences core curriculum: United States context.

College of Arts & Sciences | Sociology | General Sociology

SOCY-1022 (3) Ethics and Social Issues in U.S. Health and Medicine

Explores current ethical and policy issues in U.S. health and medical practices. Includes such issues as alcohol and drug abuse, organ transplants and substitutes, genetic engineering, contraception, abortion, occupational safety and health, and euthanasia. Approved for arts and sciences core curriculum: ideals and values.

College of Arts & Sciences | Sociology | Population and Health Issue

SOCY-1841 (1-6) Independent Study in Sociology

May be repeated up to 7 total credit hours.

College of Arts & Sciences | Sociology | General Sociology

SOCY-2011 (3) Contemporary Social Issues and Human Values

Explores contemporary societies on a global scale. Focuses on such issues as capitalism, socialism, race and ethnic problems, sex discrimination, poverty and the concentration of wealth, crime and deviance, human rights and human values, peace and war.

College of Arts & Sciences | Sociology | General Sociology

SOCY-2021 (3) Nonviolence and the Ethics of Social Action

Examines nonviolence as a strategy of social action. Focuses on ethics and dynamics of nonviolent action; racial and economic justice movements; civil disobedience; and conscientious objection to war.

College of Arts & Sciences | Sociology | General Sociology

SOCY-2031 (3) Social Problems

Examines U.S. society from a normative perspective emphasizing theories of social change. Considers such problems as distribution of power, unemployment, poverty, racism and sexism, the changing role of the family, and drugs. Approved for GT-SS3. Approved for arts and sciences core curriculum: ideals and values.

College of Arts & Sciences Sociology General Sociology

SOCY-2034 (3) Drugs in United States Society

Examines the relationship between drugs and social contexts. Lends insight into why people find consciousness alteration meaningful, what kinds of experiences and problems arise, and what types of social policies emerge to control drug use.

College of Arts & Sciences Sociology Deviance and Criminology

SOCY-2044 (3) Crime and Society

Explores issues related to crime, the criminal justice system, and crime-related public policy. It addresses what we know about crime and how we know it, how our society responds to crime, and how the institutions designed to address crime (police, courts, corrections) function.

College of Arts & Sciences Sociology Deviance and Criminology

SOCY-2061 (3) Introduction to Social Statistics

Introduces students to quantitative analysis of social phenomena. Emphasizes understanding and proper interpretation of graphs; measures of central tendency, dispersion, and association; and the concept of statistical significance. Assumes students have only limited mathematical background.

College of Arts & Sciences Sociology General Sociology

SOCY-2077 (3) Environment and Society

Examines how both natural and built environments influence human behavior and social organization. Focuses on microenvironments and their influence on individuals; the impact of macroenvironments on societal organization; and environmental movements. Credit not granted for this course and SOCY 3091. Approved for arts and sciences core curriculum: ideals and values.

College of Arts & Sciences Sociology Environment and Society

SOCY-2091 (3) Topics in Sociology

Variety of courses taught by visiting and regular faculty. See current departmental announcements for specific content. Students may receive credit for this course up to three times for different topics.

College of Arts & Sciences | Sociology | General Sociology

SOCY-3001 (3) Classical Theory

In-depth study of classical sociological theorists, particularly Marx, Durkheim, and Weber. Examines their roles in defining the discipline of sociology. Prereq., SOCY 1001. Prerequisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) Sociology (SOCY) majors only.

College of Arts & Sciences | Sociology | General Sociology

SOCY-3002 (3) Population and Society

Examines population, its structure and processes, and its relationships to selected areas of the social structure. Examines Malthusian, neo-Malthusian, and Marxist perspectives. Restricted to SOCY majors. Prerequisites: Restricted to Sociology majors only.

College of Arts & Sciences | Sociology | Population and Health Issue

SOCY-3010 (3) Sociology Capstone Course: Professional Writing

Builds on previous coursework in survey or field methods to result in an original, article-length research paper analyzing sociological data. Students will hone their writing skills through in- and -out-of-class writing exercises, and read and analyze models of quantitative and qualitative sociological articles to develop sociological writing skills. Prereq., SOCY 3301 or SOCY 3401. Approved for arts and sciences core curriculum: written communication.

College of Arts & Sciences | Sociology | General Sociology

SOCY-3011 (3) Contemporary Theory

Continuation of SOCY 3001. In-depth study of modern and post-modern theories of the 20th century, including structural-functionalist, conflict, symbolic interactionist, feminist, and world system theories. Prereqs., SOCY 1001 and 3001. Restricted to junior/senior SOCY majors.

College of Arts & Sciences | Sociology | General Sociology

SOCY-3012 (3) Women and Development

Investigates the status of women in the context of globalization and social and economic development. Prereqs., SOCY 1001, and SOCY 3001 or 3011. Restricted to junior/senior SOCY majors. Same as WMST 3012. Approved for arts and sciences core curriculum: human diversity.

College of Arts & Sciences | Sociology | Population and Health Issue

SOCY-3016 (3) Marriage and the Family in U.S. Society

Comparative and historical examination of marriage and the family within the U.S. Emphasizes changing family roles and family structures. Also considers alternatives to the nuclear family and traditional marriage exploring new definitions of family. Prereqs., SOCY 1001, and SOCY 3001 or 3011. Restricted to junior/senior SOCY majors. Same as WMST 3016. Approved for arts and sciences core curriculum: United States context.

College of Arts & Sciences | Sociology | Sex and Gender

SOCY-3034 (3) Perspectives on Violence

What counts as violence? Who decides what is violence and what is not? In what contexts does violence occur? This course critically examines different criminological and social science perspectives on violence. Prereq., SOCY 1001 or 1004. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) College of Arts and Sciences students only.

College of Arts & Sciences | Sociology | Deviance and Criminology

SOCY-3041 (3) Self and Consciousness

Explores human development from a psychosocial perspective, focusing on the interplay between psychological patterns and social forms. Issues such as self-image and social consciousness are studied within the larger context of individual and collective forces leading to transformation. Prereqs., SOCY 1001, and 3001 or 3011, or instructor consent. Same as INVS 3041.

Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) Sociology (SOCY) majors only.

College of Arts & Sciences | Sociology | General Sociology

SOCY-3042 (3) Topics in Population and Health

A variety of courses in population and/or health will be taught, usually by visiting lecturers. See current departmental announcements for specific content. May be repeated up to 9 total credit hours for different topics. Prereq., SOCY 1001.

College of Arts & Sciences | Sociology | Population and Health Issue

SOCY-3044 (3) Race, Class, Gender, and Crime

Overview of race, class, gender, and ethnicity issues in offending, victimization, and processing by the justice system. Examines women and people of color employed in the justice system. Prereq., SOCY 1001 or 1004. Same as WMST 3044. Prerequisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) Sociology (SOCY) majors only.

College of Arts & Sciences | Sociology | General Sociology

SOCY-3141 (3) Social Movements in the U.S

Considers theory and research about American social movements. Emphasizes leadership, ideology, recruitment, strategy, organizational dynamics, public response, and reasons for success or failure. Prereqs., SOCY 1001, and SOCY 3001 or 3011. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) Sociology (SOCY) majors only.

College of Arts & Sciences | Sociology | General Sociology

SOCY-3151 (3) Self in Modern Society

Explores how modern social institutions and culture shape our personal experiences, how personal experiences can affect the nature of those, institutions and culture, and how strategies can be developed for achieving balance between the individual and society. Prereqs., SOCY 1001 and SOCY 3001 3011. Approved for arts and sciences core curriculum: United States context or ideals and values. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) Sociology (SOCY) majors only.

College of Arts & Sciences | Sociology | General Sociology

SOCY-3161 (3) Sociological Perspectives on Race and Ethnicity

Addresses three subtopics of race from a sociological perspective: ethnic and racial identities, immigration, and race and ethnicity in Latin America. Recommended prereq., SOCY 1001.

| | | |
|----------------------------|-----------|-------------------|
| College of Arts & Sciences | Sociology | General Sociology |
|----------------------------|-----------|-------------------|

SOCY-3171 (3) Whiteness Studies

Uses the conceptual framework of the sociology of race and ethnic relations to explore whiteness as a racial category that is centered and privileged in American society. Investigates the development of whiteness from past white supremacy, current colorblindness, to possible future multiculturalism. Analyzes the consequences of whiteness as a racial identity and a social structure. Prereqs., SOCY 1001 and 1021.

| | | |
|----------------------------|-----------|-------------------|
| College of Arts & Sciences | Sociology | General Sociology |
|----------------------------|-----------|-------------------|

SOCY-3301 (3) Survey Methods

Teaches quantitative research methods and, particularly, methods of survey research. Topics include sampling, interviewing, schedule construction, data analysis, computer methods, index construction, and statistical analysis. Students participate in a survey project, design, collect data, and prepare a research paper on the basis of collected data. Prereqs., SOCY 1001, 2061, and SOCY 3001 or 3011. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) Sociology (SOCY) majors only.

| | | |
|----------------------------|-----------|-------------------|
| College of Arts & Sciences | Sociology | General Sociology |
|----------------------------|-----------|-------------------|

SOCY-3401 (3) Field Methods

Skill development prepares students to conduct qualitative sociological research. Emphasizes ethnographic techniques, including intensive interviewing, direct observation, coding, participant observation, and report writing. Students conceive and execute a field research project with data collection, analysis, and a report. Prereqs., SOCY 1001 and SOCY 3001 or 3011.

Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) Sociology (SOCY) majors only.

| | | |
|----------------------------|-----------|-------------------|
| College of Arts & Sciences | Sociology | General Sociology |
|----------------------------|-----------|-------------------|

SOCY-4021 (3) Conflict Management in Social Systems

Explores conflict resolution theory and method as applied to interpersonal, intergroup, and interorganization conflict. Prereqs., SOCY 1001, and SOCY 3001 or 3011.

| | | |
|----------------------------|-----------|-------------------|
| College of Arts & Sciences | Sociology | General Sociology |
|----------------------------|-----------|-------------------|

SOCY-4031 (3) Social Psychology

Studies individuals in social context. Reviews philosophical and sociological treatments of the relation between the individual and society. More specific topics include the socialization process, theories of human development and personality formation, language acquisition, conformity, aggression, sex differences in personality and gender identity, and the relation between attitudes and overt behavior. Prereqs., SOCY 1001, and SOCY 3001 or 3011. Restricted to junior/senior SOCY majors. Prerequisites: Restricted to students with 57-180 credits (Juniors or Seniors).

| | | |
|----------------------------|-----------|-------------------|
| College of Arts & Sciences | Sociology | General Sociology |
|----------------------------|-----------|-------------------|

SOCY-4071 (3) Social Stratification

Studies theories of class, ethnic, sex, and age stratification. Examines social inequality in the United States and analyzes the resulting conflicts. Prereqs., SOCY 1001, and SOCY 3001 or 3011. Restricted to junior/senior SOCY majors. Same as SOCY 5071.

| | | |
|----------------------------|-----------|-------------------|
| College of Arts & Sciences | Sociology | General Sociology |
|----------------------------|-----------|-------------------|

SOCY-4081 (1-3) Sociology of Education

Analyzes the school as a social organization. Among topics considered are power and control in the school; classroom interaction and its relation to learning and personality development in students; roles of educators; and reciprocal relations of school and community. Prereqs., SOCY 1001, and SOCY 3001 or 3011. Restricted to junior/senior SOCY majors.

| | | |
|----------------------------|-----------|-------------------|
| College of Arts & Sciences | Sociology | General Sociology |
|----------------------------|-----------|-------------------|

SOCY-4111 (3) Nonviolent Social Movements

Explores theories of democracy and development in relation to movements for nonviolent social change. Focuses on means and ends, spirituality, leadership, decision-making, civil society, cooperative economics, ecology, and decentralized power. Prereqs., SOCY 1001, and 3001 or 3011. Restricted to senior SOCY or PSCI majors. Same as INVS 4402.

| | | |
|----------------------------|-----------|-------------------|
| College of Arts & Sciences | Sociology | General Sociology |
|----------------------------|-----------|-------------------|

SOCY-4121 (3) Sociology of Religion

Examines complex interactions between religious and other social structures, such as the economy, government, and the family, and how globalization is affecting religious traditions across the globe. Includes discussion of how various religions are used or misused to justify terrorism and other acts of violence. Prereqs., SOCY 1001, and SOCY 3001 or 3011. Approved for arts and sciences core curriculum: ideals and values. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) Sociology (SOCY) majors only.

| | | |
|----------------------------|-----------|-------------------|
| College of Arts & Sciences | Sociology | General Sociology |
|----------------------------|-----------|-------------------|

SOCY-4131 (1-3) Advanced Topics in Sociology

Variety of advanced specialty courses taught by visiting and regular faculty designed for upper division sociology majors. See current departmental announcement for specific content. May be repeated up to 9 total credit hours for different topics. Prereq., SOCY 1001. Restricted to junior and senior SOCY majors.

ARTS-1002 (3) Beginning Drawing 1

In this studio course the formal visual elements are presented through a study of spatial relationships. The course is built around a series of related problems, each of which is designed to develop fluency in drawing, offer experience in handling media, foster self-confidence, and promote an understanding of the visual elements and their role in the development of pictorial space. Prereqs., ARTS 1010, 1020, and 1030.

[College of Arts & Sciences](#) [Art & Art History](#) [Painting/Drawing](#)

ARTS-1003 (3) Printmaking for Non-Majors

Emphasizes processes involved with both nonmultiple and multiple methods, including but not limited to metal plate etching (intaglio), lithography, collagraph, woodcut, linoleum cut, Xerox transfer, and monotype. Places equal emphases on developing drawing skills and understanding design principles.

[College of Arts & Sciences](#) [Art & Art History](#) [Printmaking](#)

ARTS-1010 (3) Introduction to Studio Art

Presents creative activity conceptually, and art history thematically, with an interdisciplinary, experimental, and multicultural focus. Fine arts majors explore visual literacy and culture through presentations and student-centered projects that emphasize individual development. Prerequisites: Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

[College of Arts & Sciences](#) [Art & Art History](#) [Foundations](#)

ARTS-1012 (3) Drawing for Non-Majors

Explores varied drawing techniques and media. Introduces concepts relevant to the understanding of drawing and the creative process. May not be repeated.

College of Arts & Sciences | Art & Art History | Painting/Drawing

ARTS-1020 (3) Introduction to Studio Art 2

Presents creative activity conceptually and art history thematically, with an interdisciplinary, experimental, and multicultural focus. Art and art history majors explore visual literacy and culture through presentations and student-centered projects that emphasize individual development. Prereq., ARTS 1010. Prerequisites: Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

College of Arts & Sciences | Art & Art History | Foundations

ARTS-1030 (3) Principles of Color

Introduces the relative effects of color as used by the artist. Emphasizes the practice of color relations including basic characteristics, mixtures, illusions, optical mixture, color intervals, and color quantity. May not be repeated.

College of Arts & Sciences | Art & Art History | Foundations

ARTS-1171 (3) Photography for Non-Majors

Introduces techniques and concepts of photography as art. Emphasizes photography as a means to formal and expressive ends. Students must have an adjustable camera. Credit not granted for this course and ARTS 2171.

College of Arts & Sciences | Art & Art History | Photography

ARTS-1202 (3) Beginning Painting 1

The aim of this course is to develop the basic skills, techniques and processes of painting with an understanding of basic colour principles. This integration of paint application and colour principle will develop awareness that painting and colour are used, not only as mediums for representation, but also as mediums for expressive purposes. Demonstrations, lectures, group and individual critiques will be given throughout the course. Prereqs., ARTS 1010, 1020, and 1030.

College of Arts & Sciences | Art & Art History | Painting/Drawing

ARTS-1212 (3) Painting for Non-Majors

Explores varied painting techniques. Introduces concepts relevant to the understanding of painting and the creative process. May not be repeated.

College of Arts & Sciences | Art & Art History | Painting/Drawing

ARTH-1300 (3) History of World Art 1

Surveys major art styles from the Paleolithic period through the Renaissance, including European, Asian, and the Pre-Columbian/Islamic world. Emphasizes comparison of Western and non-Western visual expressions as evidence of differing cultural orientations. Approved for GT-AH1. Approved for arts and sciences core curriculum: literature and the arts.

College of Arts & Sciences | Art & Art History | Art History

ARTH-1400 (3) History of World Art 2

Surveys major art styles from about 1600 to the present, including Europe, Asia, the Islamic world, the Americas, and tribal arts. Emphasizes comparison of Western and non-Western visual expressions as evidence of differing cultural orientations. Credit not granted for this course and FINE 1409. Approved for GT-AH1. Approved for arts and sciences core curriculum: literature and the arts.

College of Arts & Sciences | Art & Art History | Art History

ARTH-1509 (4) Trash and Treasure, Temples and Tombs: Art and Archaeology of the Ancient World

Introduces the art and archaeology of ancient Egypt, Mesopotamia, Greece, and Rome, examining various ancient approaches to power, religion, death, and the human body. Analyzes art, architecture, and everyday trash to learn about ancient humanity. Same as CLAS 1509. Approved for arts and science core curriculum: historical context or literature and the arts.

College of Arts & Sciences | Art & Art History | Art History

ARTS-1514 (3) Sculpture for Non-Majors

Offers an orientation involving three-dimensional form and application. Studies expressive problems based on non-objective form relationships in various sculptural materials. May not be repeated.

College of Arts & Sciences | Art & Art History | Sculpture

ARTH-1709 (3) Freshmem Seminar: Critical Introduction to Art History

Provides a broad introduction to understanding and appreciating art and art history within a critical lecture seminar and discussion format. The focus of this course is a selected Particularily directed to nonmajors. Formerly FINE 1709. Approved for arts and science core curriculum: literature and the arts.

College of Arts & Sciences | Art & Art History | Art History

ARTS-1875 (3) Ceramics for Non-Majors

Encompasses broad and fundamental uses of clay. Basic instruction and demonstration of throwing, hand building, and primitive clay forming methods. Investigates utility, function, and ceramics in the broader context of contemporary art. Slide presentations explore historical and contemporary attitudes involving ceramics.

College of Arts & Sciences | Art & Art History | Ceramics

ARTS-2002 (3) Figure Drawing

Explores varied drawing techniques and media. Introduces concepts relevant to the understanding of drawing and the creative process. May not be repeated. Prereqs., ARTS 1010, 1020, and either ARTH 1300 or 1400. Prerequisites: Requires pre-requisite courses of ARTS 1010 & 1020. Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

College of Arts & Sciences | Art & Art History | Painting/Drawing

ARTS-2004 (3) Participatory Objects (Sculpture and Post-Studio Practice)

Looks at the tendency in contemporary sculpture to create interactive objects and experiences for the viewer. Students in this course are required to create hands-on projects, participate in group critiques, and develop presentations and research projects. Recommended prereq., ARTS 2504. Prereqs., ARTS 1010 and 1020.

College of Arts & Sciences | Art & Art History | Sculpture

ARTH-2019 (3) Pompeii and the Cities of Vesuvius

Introduces the towns and villas buried by the eruption of Mt. Vesuvius in 79 C.E. Explores the layout and decoration of ancient Roman houses, the variety of artifacts uncovered as evidence for daily life and the history of the excavations. Same as CLAS 2019. Approved for arts and sciences core curriculum: historical context.

College of Arts & Sciences | Art & Art History | Art History

ARTS-2054 (3) Modules and Multiples (Sculpture and Post-Studio Practices)

Exposes students to the practice or creating large works through smaller multiples and modules. Students will learn to cast using plaster and other types of materials, molds and jigs will also be introduced as a way to streamline production of multiple objects. Prereq., ARTS 1010 and 1020.

College of Arts & Sciences | Art & Art History | Sculpture

ARTS-2085 (3) Ceramics 2: Handbuilding

Introduces techniques of hand-built clay forms as they relate to function and nonfunction. Various clay techniques, glazing, and firing procedures are explored. Emphasizes ceramics in the broader context of contemporary art. May not be repeated. Prereqs., ARTS 1010, 1020 and ARTH 1300 or 1400. Prerequisites: Requires pre-requisite courses of ARTS 1010 & 1020. Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

College of Arts & Sciences | Art & Art History | Ceramics

ARTS-2095 (3) Ceramics 2: Wheelthrowing

Introduces techniques of wheel-thrown forms as they relate to function and nonfunction. Explores various glazing and firing methods. May not be repeated. Prereqs., ARTS 1010, 1020 and ARTH 1300 or 1400. Prerequisites: Requires pre-requisite courses of ARTS 1010 & 1020. Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

College of Arts & Sciences | Art & Art History | Ceramics

ARTS-2104 (3) Colossal Objects (Sculpture and Post-Studio Practice)

Focuses on the conception, design and production of art works that are larger than human scale. Each object will be the result of individual and team design collaboration. This course primarily focuses on sculpture constructed and engineered from metal although other materials are welcome. Recommended prereq., ARTS 2504. Prereqs., ARTS 1010 and 1020.

College of Arts & Sciences | Art & Art History | Sculpture

ARTS-2126 (3) Digital Art 1

An introductory course in the use of the personal computer to create and process images in the visual arts. Prereq., ARTS 1010, 1020 and ARTH 1300 or 1400. Prerequisites: Requires pre-requisite courses of ARTS 1010 & 1020. Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

College of Arts & Sciences | Art & Art History | Media Arts

ARTS-2171 (3) Photography 1

Introduces techniques and concepts of photography as art. Emphasizes photography as a means to formal and expressive ends. Students must have an adjustable camera. Prereqs., ARTS 1010, 1020, and either ARTH 1300 or 1400. Credit not granted for this course and ARTS 1171. Prerequisites: Requires pre-requisite courses of ARTS 1010 & 1020. Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

College of Arts & Sciences | Art & Art History | Photography

ARTS-2184 (3) Nothing Flat: Project a Week (Sculpture & Post-Studio Practice)

Provides students the opportunity to work with a range of sculptural materials through a series of quick projects (e.g. installation, objects, writing). Students will learn to generate ideas quickly, engage issues and formats particular to sculpture, and produce a wide range of work over 15 weeks. Recommended prereq., ARTS 2504. Prereqs., ARTS 1010 and 1020.

ARTS-1002 (3) Beginning Drawing 1

In this studio course the formal visual elements are presented through a study of spatial relationships. The course is built around a series of related problems, each of which is designed to develop fluency in drawing, offer experience in handling media, foster self-confidence, and promote an understanding of the visual elements and their role in the development of pictorial space. Prereqs., ARTS 1010, 1020, and 1030.

[College of Arts & Sciences](#)
[Art & Art History](#)
[Painting/Drawing](#)

ARTS-1012 (3) Drawing for Non-Majors

Explores varied drawing techniques and media. Introduces concepts relevant to the understanding of drawing and the creative process. May not be repeated.

[College of Arts & Sciences](#)
[Art & Art History](#)
[Painting/Drawing](#)

ARTS-1202 (3) Beginning Painting 1

The aim of this course is to develop the basic skills, techniques and processes of painting with an understanding of basic colour principles. This integration of paint application and colour principle will develop awareness that painting and colour are used, not only as mediums for representation, but also as mediums for expressive purposes. Demonstrations, lectures, group and individual critiques will be given throughout the course. Prereqs., ARTS 1010, 1020, and 1030.

[College of Arts & Sciences](#)
[Art & Art History](#)
[Painting/Drawing](#)

ARTS-1212 (3) Painting for Non-Majors

Explores varied painting techniques. Introduces concepts relevant to the understanding of painting and the creative process. May not be repeated.

College of Arts & Sciences | Art & Art History | Painting/Drawing

ARTS-2002 (3) Figure Drawing

Explores varied drawing techniques and media. Introduces concepts relevant to the understanding of drawing and the creative process. May not be repeated. Prereqs., ARTS 1010, 1020, and either ARTH 1300 or 1400. Prerequisites: Requires pre-requisite courses of ARTS 1010 & 1020. Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

College of Arts & Sciences | Art & Art History | Painting/Drawing

ARTS-2202 (3) Figure Painting

Explores varied painting techniques. Introduces concepts relevant to the understanding of painting and the creative process. May not be repeated. Prereqs., ARTS 1010, 1020, and either ARTH 1300 or 1400. Prerequisites: Requires pre-requisite courses of ARTS 1010 & 1020. Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

College of Arts & Sciences | Art & Art History | Painting/Drawing

ARTS-3002 (3) Drawing Alternative Process/Materials

Continuation of Drawing 2. Offers creative possibilities in drawing and related media. Emphasizes experimentation and individual expression. Content varies by semester according to instructor; contact individual instructor for more information. May be repeated once. Prereq., ARTS 2002. Prerequisites: Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

College of Arts & Sciences | Art & Art History | Painting/Drawing

ARTS-3202 (3) Painting Alternative Process/Materials

Continuation of Painting 2. Offers creative possibilities in painting and related media. Emphasizes experimentation and individual expression. Content varies by semester according to instructor; contact individual instructor for more information. May be repeated up to 6 total credit hours. Prereq., ARTS 2202. Prerequisites: Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

College of Arts & Sciences | Art & Art History | Painting/Drawing

ARTS-3702 (3) Special Focus in Painting and Drawing

Offers varied focus and special topics in painting, drawing, and related media to explore specialized directions and creative possibilities. Emphasizes experimentation. Content varies by semester; contact individual instructor for more information. May be repeated up to 6 total credit hours. Prereq., ARTS 2002 or 2202. Recommended prereq., ARTS 3002 or 3202.

College of Arts & Sciences | Art & Art History | Painting/Drawing

ARTS-3842 (1-3) Undergraduate Independent Study---Painting

Reserved for special projects in painting not offered in the curriculum. May be repeated up to 6 total credit hours. Prereqs., ARTS 3202 and instructor consent. Requires a detailed proposal, instructor's sponsorship, and departmental approval.

College of Arts & Sciences | Art & Art History | Painting/Drawing

ARTS-4002 (3) Advanced Drawing/Portfolio

Continuation of Drawing 3. Advanced studio class in drawing for creative expression and individual portfolio development. Emphasis varies by semester; contact individual instructor for more information. May be repeated up to 12 total credit hours. Prereq., ARTS 3002. Prerequisites: Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

College of Arts & Sciences | Art & Art History | Painting/Drawing

ARTS-4202 (3) Advanced Painting/Portfolio

Continuation of Painting 3. Advanced studio class in painting for creative expression and individual portfolio development. Emphasis varies by semester; contact individual instructor for more information. May be repeated up to 12 total credit hours. Prereq., ARTS 3202. Prerequisites: Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

College of Arts & Sciences | Art & Art History | Painting/Drawing

ARTS-5202 (3) Graduate Painting

May be repeated up to 18 total credit hours. Prerequisites: Restricted to Graduate Students only.

FILM-1002 (3) Film Analysis for Non-Majors

Introduces the critical study of film, exploring theoretical, historical, and technical concerns while presenting a survey of important film periods and genres. Students will hone critical-thinking, close-analysis, and writing skills. The course will cover a wide variety of films, approaching them from numerous perspectives, considering both the effects films have on individual viewers and their ability to reflect culture.

[College of Arts & Sciences](#) [Film Studies](#) [Genre and Movements](#)

FILM-1502 (3) Introduction to Film Studies

Introduces the technical and aesthetic principles behind the production, consumption, analysis, and interpretation of films. The purpose of this class is to help us understand and think about movies critically, as technological, cultural, and artistic products. We will study films in different contexts and discuss the importance of movies as cultural expression.

[College of Arts & Sciences](#) [Film Studies](#) [Genre and Movements](#)

FILM-2000 (3) Beginning Filmmaking

Instructs students in making Super-8 films. Covers use of cameras and editing equipment, basic editing and splicing techniques, and analysis of pertinent films. May emphasize making personal, experimental films or making narrative sound films, according to instructor. Students need to purchase materials and rent the necessary equipment. The Film Studies Program maintains an equipment pool with modest rental fees for students needing equipment. Prereq., FILM 1502.

[College of Arts & Sciences](#) [Film Studies](#) [Production](#)

FILM-2002 (3) Recent International Cinema

Familiarizes students with current trends and major directors in international cinema. Students attend specific films screened in class and/or offered in the International Film Series, and read and write about these films. Prereq., FILM 1502 or 6 hours humanities courses involving critical writing.

College of Arts & Sciences | Film Studies | Genre and Movements

FILM-2003 (3) Film Topics

Varying topics on important individuals, historical developments, groupings of films, film directors, critical and theoretical issues in film. May be repeated up to 9 total credit hours, provided the topics are different.

College of Arts & Sciences | Film Studies | Topics

FILM-2005 (3) Movies and Screenplay Analysis

Analyzes the narrative structure of films and screenplays. Familiarizes students with the specific narrative characteristics of the classic motion picture, the three-act structure, and the multiple tasks involved in the process of adaptation. Dissects the form and structure of feature films through analyzing movies and screenplays. Prereq., FILM 1502.

College of Arts & Sciences | Film Studies | Workshops

FILM-2010 (3) Moving Image Computer Foundations

Provides students with artistic foundational hands-on experience in integrated use of media software in both the PC and Mac creative imaging making digital working environments. Includes fundamentals in general computer maintenance, creative and practical audio editing, image management and manipulation, and creative moving image practice. Restricted to Film (FILM or FMST) majors only. Prerequisites: Restricted to Film (FILM or FMST) majors only.

College of Arts & Sciences | Film Studies | Production

FILM-2105 (3) Introduction to the Screenplay

Explores, through close reading and original student work, the form and structure of the screenplay from the writer's perspective. Students will begin by analyzing structural and character elements of such screenplays as Chinatown and Witness, then analyze screenplays of their choosing. Students will learn the basics of screenwriting form, then develop and write 10 minutes of an original screenplay. Prereq., FILM 1502. Prerequisites: Restricted to students with 0-26 credits (Freshmen) only.

College of Arts & Sciences | Film Studies | Workshops

FILM-2300 (3) Beginning/Intermediate Filmmaking

Covers basic camera, editing, and splicing techniques for Super-8 film. Equipment is available at the film studies office for a modest rental fee. Prereq., FILM 1502.

College of Arts & Sciences | Film Studies | Production

FILM-2312 (3) Film Trilogies

Study of films designed as trilogies, drawing on a wide range of international cinema. Films include Satyajit Ray's Apu Trilogy (India), Krzysztof Kieslowski's Three Colors Trilogy (Poland), Francois Truffaut's Antoine Doinel cycle (France), and Abbas Kiarostami's Iran Trilogy (Iran). Restricted to FILM/FMST majors. Non-majors will need instructor's consent.

College of Arts & Sciences | Film Studies | Genre and Movements

FILM-2500 (3) Introduction to Cinematography

Film production class focusing on developing a basic understanding of the aesthetics and principles of Cinematography. Through projects, screenings, and critiques, students learn creative camera lighting processes. Prereqs., FILM 1502 and 2000 or 2300 with an averaged combined grade in these two courses of 3.00, with a minimum overall GPA of 2.0. Restricted to FILM majors.

Prerequisites: Restricted to Film (FILM or FMST) majors only.

College of Arts & Sciences | Film Studies | Production

FILM-2513 (3) Major Asian Filmmakers

Surveys the major Asian directors from China, India, Japan, Taiwan, and Vietnam. Recommended prereq., FILM 1502. Restricted to FILM/FMST majors. Non-majors will need instructor's consent.

College of Arts & Sciences | Film Studies | Topics

FILM-2521 (3) Classics of the Foreign Film: 1960s to Present

Surveys the classics of international cinema from the 1960s to the present. Recommended prereq., FILM 1502. Restricted to FILM/FMST majors. Non-majors will need instructor's consent.

College of Arts & Sciences | Film Studies | History

FILM-2610 (3) Animation Production

Includes analysis of independent and experimental animation and an introduction to various animation techniques (object, line, collage, sand or paint on glass, Xerox, cameraless, pixellation, etc.). Students produce exercise films and a final film exploring these techniques. Prereq., FILM 2000 or 2300. Recommended prereq., FILM 2500.

College of Arts & Sciences | Film Studies | Production

FILM-2613 (3) Exploring Good and Evil Through Film

Eighteen films depict our capacities for good and evil. Topics addressed include the following: the Holocaust, Jung's concept of "The Shadow," the Seven Deadly Sins, altruistic and sociopathic personalities, capital punishment, the redemptive narrative, and the satanic in film. Same as FARR 2510. Approved for arts and sciences core curriculum: ideals and values.

College of Arts & Sciences | Film Studies | Topics

FILM-2900 (3) Lighting

Covers the basics of "Why you need lighting", color temp, as well as camera techniques, lighting theory, and lighting set-ups for still and motion picture film video. Emphasizes hands on as well as theory. Prereq., FILM 2000 or 2300. Recommended prereq., FILM 1502.

College of Arts & Sciences | Film Studies | Production

FILM-3002 (3) Major Film Movements

Historical-aesthetic survey dealing with various national cinemas, taught in conjunction with the appropriate language department. Typical offerings are the French film, the German film, the Russian film, and so on. Also offers a more detailed approach to a more restricted subject, i.e., film comedy, women filmmakers, German expressionist cinema, Italian neorealism. May be repeated up to 12 total credit hours within the same term with departmental consent. Restricted to FILM/FMST majors. Non-majors will need instructor's consent. Prerequisites: Restricted to students with 57-180 credits (Juniors or Seniors).

College of Arts & Sciences | Film Studies | Genre and Movements

FILM-3003 (3) Major Film Directors

Focuses on the work of a single director or a group of related directors. Course content varies each semester. Consult the online Schedule Planner for specific topic. May be repeated up to 12 total credit hours with departmental consent. . Non-majors need instructor consent. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) FILM (FILM or FMST) majors only.

College of Arts & Sciences | Film Studies | Topics

FILM-3004 (3) Films of Alfred Hitchcock

Intensive, critical investigation of the films of one of cinema's greatest directors, Alfred Hitchcock. Concepts to be examined include authorship, desire, gender, and film acting. Critical and theoretical writings about Hitchcock are explored. Paper and exams required. Restricted to FILM/FMST majors. Non-majors will need instructor's consent.

College of Arts & Sciences | Film Studies | Intensive and Small Courses

FILM-3010 (1-3) Film Production Topics

Offers students both theoretical and practical experience in various specialized areas of cinematic production. Topics vary but include production in the documentary, fictional narrative, animation, computer animation, and experimental genres. May be repeated up to 9 total credit hours. Prereq., FILM 2000 or 2300. Prerequisites: Restricted to Film (FILM or FMST) majors only.

College of Arts & Sciences | Film Studies | Production

FILM-3012 (3) Documentary Film

Provides a historical and theoretical introduction to the documentary film. Examines the historical beginnings of documentary film as well as exploring contemporary documentary practice. Canonical moments of documentary history and lesser known examples of documentary film work will be explored. Prereq., FILM 1502. Recommended prereq., FILM 3051.

College of Arts & Sciences | Film Studies | Genre and Movements

FILM-3013 (3) Women and Film

Examines the representation of women both in mainstream movies and in women's counter-cinema that resists traditional form, content, and spectator-text relationships of Hollywood models. Emphasizes work by key women filmmakers such as Margarethe Von Trotta, Lizzy Borden, and Yvonne Rainer, as well as readings in feminist film theory. Approved for arts and sciences core curriculum: human diversity. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences | Film Studies | Topics

FILM-3022 (3) Jung, Film and Literature

The basic themes of C. G. Jung's archetypal psychology (shadow, anima/animus, character typology, and individuation) are studied and applied as tools of critical analysis to selected films and literary texts of the modern period. Instructor consent required. Same as HUMN 3015.

College of Arts & Sciences | Film Studies | Genre and Movements

FILM-3030 (3) Cinema Alternative Process

Explores alternative methods of film processing and filmic image manipulation. Through projects, film screenings, lectures and discussions students will learn fine arts approaches to creative control for the moving image. Prereq., FILM 1502, 2000, 2300 or 2500, or instructor consent. Restricted to BFA majors.

College of Arts & Sciences | Film Studies | Production

FILM-3032 (3) Stage Tragedy and Film

Presents an aerial survey of the history of Western drama as represented in film: Greek drama, the Elizabethans, Ibsen/Strindberg to O'Neill/Williams, Beckett, etc. Prereq., FILM 1502. Recommended prereq., FILM 3051.

College of Arts & Sciences | Film Studies | Genre and Movements

FILM-3042 (3) Horror Film

Serious investigation of the horror film genre as well as its origins in, and relation to, works of romanticist literature (e.g., Poe, Shelley). Issues include: the relation of fantasy and reality; gender in horror film; psychological issues raised by the films; historical issues generated by the genre. Prereq., FILM 1502. Recommended prereq., FILM 3051.

College of Arts & Sciences | Film Studies | Genre and Movements

FILM-3402 (3) European Film and Culture

Studies the relationships between European film, art, and culture. Offered each summer in a different European city (viz, Rome, Paris, London, Athens, Barcelona). There will be regular in-class lectures, film screenings, field trips, and on-site teaching. May be repeated up to 12 total credit hours. Recommended prereq., introductory film and art history courses. Approved for arts and sciences core curriculum: literature and the arts.

College of Arts & Sciences | Film Studies | Genre and Movements

FILM-3422 (3) Genre: The Hollywood Musical

Second only to jazz, some critics regard the Hollywood musical as the greatest American popular art form of the 20th century. This course proposes a historical, formal, and theoretical approach to the musical through its several iterations, from the classical, to the revisionist, to the unusual, placing the changes in the genre's form, structure, and ideology in the context of America's changing social, political, and religious values. Prereq., FILM 1502. Recommended prereq., FILM 3051.

ARTS-1003 (3) Printmaking for Non-Majors

Emphasizes processes involved with both nonmultiple and multiple methods, including but not limited to metal plate etching (intaglio), lithography, collagraph, woodcut, linoleum cut, Xerox transfer, and monotype. Places equal emphases on developing drawing skills and understanding design principles.

[College of Arts & Sciences](#)
[Art & Art History](#)
[Printmaking](#)

ARTS-3403 (3) Intaglio and Relief 1

Introduces the study and experimentation of intaglio and relief processes in black and white, color, and possible photo imagery. May be repeated up to 6 total credit hours. Taught with ARTS 4403/5403. Prerequisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

[College of Arts & Sciences](#)
[Art & Art History](#)
[Printmaking](#)

ARTS-3413 (3) Lithography 1

Introduces the study of stone and metal plate lithography, emphasizing individual creative development in black and white and further development in color printing processes. May be repeated up to 6 total credit hours. Not available to freshmen. Taught with ARTS 4413/5413. Prerequisites: Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

[College of Arts & Sciences](#)
[Art & Art History](#)
[Printmaking](#)

ARTS-3423 (3) Screen Printing 1

Introduces the study of silkscreen techniques, emphasizing creativity, individual development, and experimentation in contemporary silkscreen processes. May be repeated up to 6 total credit hours. Not available to freshmen.

College of Arts & Sciences | Art & Art History | Printmaking

ARTS-4403 (3) Intaglio and Relief 2

Continues the study and experimentation of intaglio and relief processes in black and white, color, digital imagery, and nontoxic processes as much as possible. May be repeated up to 12 total credit hours. Prereq., ARTS 3403. Taught with ARTS 3403/5403. Prerequisites: Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

College of Arts & Sciences | Art & Art History | Printmaking

ARTS-4413 (3) Lithography 2

Continues the study of stone and metal plate lithography, emphasizing individual creative development in black and white, and further development in color printing processes. In addition, digital imaging and nontoxic processes are emphasized as much as possible. May be repeated up to 12 total credit hours. Prereq., ARTS 3413. Taught with ARTS 3413/5413. Prerequisites: Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

College of Arts & Sciences | Art & Art History | Printmaking

ARTS-4423 (3) Screen Printing 2

Introduces advanced screen printing technology, emphasizing individual creativity and the ability to resolve problems of two-dimensional form. May be repeated up to 12 total credit hours. Prereq., ARTS 3423.

College of Arts & Sciences | Art & Art History | Printmaking

ARTS-4433 (3) Alternative Printmaking (Non-Toxic)

Introduces computer-generated imaging and developing ideas as related to traditional forms of printmaking. Emphasizes original development of ideas and skills involved in learning advanced printing processes in lithography and intaglio media. May be repeated up to 12 total credit hours. Same as ARTS 5433. Prerequisites: Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

College of Arts & Sciences | Art & Art History | Printmaking

ARTS-4453 (3) Monotype Printing

Introduces monotype printing, with the uniqueness and diversity of its methods of producing art. The process uses some of the best qualities of painting, print making, and drawing. Emphasizes creative individual development, along with processes inherent to this media. May be repeated up to 6 credit hours. Same as ARTS 5453.

College of Arts & Sciences | Art & Art History | Printmaking

ARTS-5403 (3) Graduate Intaglio and Relief

May be repeated up to 18 total credit hours. Taught with ARTS 3403/4403. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Art & Art History | Printmaking

ARTS-5413 (3) Graduate Lithography

May be repeated up to 18 total credit hours. Taught with ARTS 3413/4413. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Art & Art History | Printmaking

ARTS-5423 (3) Graduate Screen Printing

May be repeated up to 18 total credit hours. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Art & Art History | Printmaking

ARTS-5433 (3) Graduate Alternative Printmaking (Non-Toxic)

May be repeated up to 12 total credit hours. Same as ARTS 4433. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Art & Art History | Printmaking

ARTS-5453 (3) Graduate Monotype Printing

Same as ARTS 4453. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Art & Art History | Printmaking

SOCY-1001 (3) Introduction to Sociology

Examines basic sociological ideas including social relations, social interaction, social structure, and social change. Examples are drawn from societies around the world. Meets MAPS requirement for social science: general. Approved for GT-SS3. Approved for arts and sciences core curriculum: contemporary societies.

[College of Arts & Sciences](#) | [Sociology](#) | [General Sociology](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

ARTS-1002 (3) Beginning Drawing 1

In this studio course the formal visual elements are presented through a study of spatial relationships. The course is built around a series of related problems, each of which is designed to develop fluency in drawing, offer experience in handling media, foster self-confidence, and promote an understanding of the visual elements and their role in the development of pictorial space. Prereqs., ARTS 1010, 1020, and 1030.

THTR-2003 (3) Acting 1

Emphasizes principles of acting, focusing on exercises in relaxation, talking and listening, actions and objectives, and basic concepts of process work. Prerequisites: Restricted to Ttheatre (THTR, TBFA) Dance (DNCE, DBFA), Film or Arts and Sciences Open Option majors only.

[College of Arts & Sciences](#)
[Theater & Dance](#)
[Performance](#)

THTR-2013 (3) Performance of Literature

Students learn to perceive literary form and content and to translate that perception into classroom performances of selected modern plays and stories. Performances, both solo and ensemble, embody literary texts diverse in terms of gender and ethnicity. Prereqs., 15 credit hours and THTR 1003, 2003 or 2043.

[College of Arts & Sciences](#)
[Theater & Dance](#)
[Performance](#)

THTR-2043 (3) Voice and Movement for the Stage

Natural resources of the human voice and body are studied as artistic resources for the performing artist. Designed to examine both the process and products of vocal and physical craft work.

Prerequisites: Restricted to Theatre (THTR, TBFA) or Dance (DNCE or DBFA) majors only.

College of Arts & Sciences Theater & Dance Performance

THTR-3013 (3) Studio 1: Building a Character

Students learn to deepen and develop their proficiency with specific acting techniques. Explores the craft elements of acting, as well as text analysis. Prereq., THTR 2003. Restricted to BFA

program in acting or instructor consent. Prerequisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) Theatre (TBFA) majors only.

College of Arts & Sciences Theater & Dance Performance

THTR-3023 (3) Studio 2: Creating a Role

Continued development of acting technique and tools for play analysis, with particular emphasis on scene study. Special attention will be given to the Master Teachers of Acting and their

pedagogies. Prereq., THTR 3013 or instructor consent. Prerequisites: Restricted to Theatre (TBFA) majors only.

College of Arts & Sciences Theater & Dance Performance

THTR-3033 (1-3) Production Research and Practicum: Acting

Allows students to undertake an acting project, either within the major season or approved departmental production. Requires detailed preparational research, rehearsal commitments, and public presentation of theories and concepts in practice. Following the performance, students present written reports and evaluations. May be repeated up to 3 total credit hours. Prereq., THTR 2003 or 2043.

College of Arts & Sciences Theater & Dance Performance

THTR-3043 (3) Advanced Voice for the Stage

Continues the work begun in THTR 2043. Studies advanced vocal techniques with the goal of integrating these skills into the working process of the performing artist. Prereqs., THTR 2043 or

instructor consent. Prerequisites: Restricted to Theatre (THTR or TBFA) majors only.

College of Arts & Sciences Theater & Dance Performance

THTR-3053 (3) Acting 2

Continuation of the techniques introduced in the beginning acting courses (THTR 1003 and 2003). Emphasis is placed on monologues and scene study of contemporary plays. Basic techniques

in developing a character are explored. Prereq., THTR 1003 or 2003. Prerequisites: Restricted to Theatre, Music, Music Arts or Film Majors only.

College of Arts & Sciences Theater & Dance Performance

THTR-4013 (3) Studio 3: Acting Shakespeare

In-depth study of Shakespearean texts from the perspective of their demands on the actor, including the conventions and performance styles of Elizabethan theatre. Prereqs., THTR 3013 and 3023, or instructor consent. Prerequisites: Restricted to Theatre (TBFA) majors only.

| | | |
|----------------------------|-----------------|-------------|
| College of Arts & Sciences | Theater & Dance | Performance |
|----------------------------|-----------------|-------------|

THTR-4023 (3) Studio 4: Playing with Styles

Studies selected styles of theatre performance such as Greek Drama, Comedy of Manners, Commedia Dell'art, Modern Realism, Theatre of Absurd, and Non-Western Theatre, including vocal and physical style elements. Prereq., THTR 3013, 3023, and 4013, or instructor consent.

| | | |
|----------------------------|-----------------|-------------|
| College of Arts & Sciences | Theater & Dance | Performance |
|----------------------------|-----------------|-------------|

THTR-4033 (3) Advanced Movement for the Stage

Continues the work begun in THTR 2043. Studies the advanced physical techniques with the goal of integrating these skills into the working processes of the performing artist. Prereqs., THTR 2043 or instructor consent.

| | | |
|----------------------------|-----------------|-------------|
| College of Arts & Sciences | Theater & Dance | Performance |
|----------------------------|-----------------|-------------|

THTR-4063 (3) Audition Techniques

Prepares students for the demands of the acting profession. Trains students in various audition techniques including general auditions, prepared auditions, cold readings, on-camera auditions, and commercial auditions. Shows how to prepare and perfect audition material in a professional and exemplary way. Discusses agents, casting directors, and the process of becoming a professional actor.

| | | |
|----------------------------|-----------------|-------------|
| College of Arts & Sciences | Theater & Dance | Performance |
|----------------------------|-----------------|-------------|

THTR-4073 (3) Performing Voices of Women

Explores theories underlying the "Feminine voice," varied perspectives in prose and poetry, ways of embodying these voices and perspectives in performance forms, and ultimately the students' own voices through creation of autobiographical performance pieces (some to be presented for student audiences). Open to both men and women. Prereq., instructor consent. Same as WMST 4073.

| | | |
|----------------------------|-----------------|-------------|
| College of Arts & Sciences | Theater & Dance | Performance |
|----------------------------|-----------------|-------------|

THTR-4103 (3) Acting for the Camera

Introduces fundamental tools of acting for the camera. Students learn basic film terminology, specific camera acting techniques, and the demands placed on an actor when shooting a film. Uses exercises, scenes, monologues, and readings to provide a solid understanding of how to create a character, analyze a text, utilize important vocabulary, and perform effectively on camera.

Prereq., THTR 1003 or 2003 or instructor consent.

College of Arts & Sciences Theater & Dance Performance

THTR-4193 (3) Studio 5: Creating an Ensemble

Students create an ensemble piece utilizing collaborative approaches. Emphasizes training actors in weaving personal, social, political, and cultural threads into an enactment. Prereqs., THTR 3013, 3023, 4013, 4023, or instructor consent.

College of Arts & Sciences Theater & Dance Performance

THTR-6003 (1-3) Production Research and Practicum: Acting

Allows students to undertake an acting project, normally within the major theatre season, that requires detailed preparatory research, testing of ideas, and public presentation. Students work under faculty supervision and prepare a written report and evaluation of the research, rehearsal, and performance process. Prereqs., advanced studies in acting and advisor approval. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Theater & Dance Performance

FARR-1004 (1) Teen Trials and Tribulations in Literature

Discusses major themes and literary strategies in coming-of-age literature. Pass/fail only.

College of Arts & Sciences | Farrand Residential Academic Program

SOCY-1004 (3) Deviance in U.S. Society

Examines the social construction of deviance in the U.S., the process of acquiring a deviant identity and managing deviant stigma, and the social organization of deviant act, lifestyles, relationships and careers. Approved for GT-SS3. Approved for arts and sciences core curriculum: ideals and values.

College of Arts & Sciences | Sociology | Deviance and Criminology

FARR-1005 (1) Comics and the Interpretive Arts

Explores comic books as literature and visual art. This course will introduce methods of literary analysis and apply them to a specific medium of art: the comic book. Discussions will focus on content and form and will be guided by questions about the way in which art is defined and categorized. Graded pass/fail.

College of Arts & Sciences | Farrand Residential Academic Program

MATH-1005 (3) Introduction to College Mathematics

Introductory level mathematics course which presents a college level introduction to algebraic functions and their applications. Credit not granted for this course and MATH 1011. Course is only

offered through the Student Academic Service Center. Meets MAPS requirement for mathematics.

College of Arts & Sciences Mathematics

SOCY-1006 (3) The Social Construction of Sexuality

Discusses the social determinants of sexuality. Analyzes the economic, psychological, and cultural influences on human sexuality. Interactional perspective of human sexuality is presented. Same as WMST 1006. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences Sociology Sex and Gender

WMST-1006 (3) The Social Construction of Sexuality

Same as SOCY 1006. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences Womens Studies Sociology

THTR-1009 (3) Introduction to Theatre

Introduces the varieties of theatrical art, past and present, contributions of the various theatrical artists to the total production, and the place of theatre art in today's society. Designed for nonmajors. Approved for GT-AH1. Approved for arts and sciences core curriculum: literature and the arts.

College of Arts & Sciences Theater & Dance Special Courses in Theatre

ARAB-1010 (5) Beginning Arabic 1

Introduces students to speaking, listening, reading, and writing skills in the standard means of communication in the Arab world. This course is proficiency-based. All activities within the course are aimed at placing the student in the context of the native-speaking environment from the very beginning.

College of Arts & Sciences Asian Languages & Civilizations Arabic

ARTS-1010 (3) Introduction to Studio Art

Presents creative activity conceptually, and art history thematically, with an interdisciplinary, experimental, and multicultural focus. Fine arts majors explore visual literacy and culture through presentations and student-centered projects that emphasize individual development. Prerequisites: Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

College of Arts & Sciences Art & Art History Foundations

ASTR-1010 (4) Introductory Astronomy 1

Introduces principles of modern astronomy for nonscience majors, summarizing our present knowledge about the Earth, Sun, moon, planets, and origin of life. Requires nighttime observation sessions at Sommers-Bausch Observatory. Similar to ASTR 1000, but with additional lab experience. Also similar to ASTR 1030. Students may receive credit for only one of ASTR 1010, 1000, 1110, or 1030. Meets MAPS requirement for natural science: lab or non-lab. Approved for arts and sciences core curriculum: natural science.

College of Arts & Sciences | Astrophysical & Planetary Sciences

CHIN-1010 (5) Beginning Chinese 1

Introduces modern Chinese (Mandarin), developing all four skills (speaking, listening, reading and writing) and communicative strategies. Students learn both traditional full-form characters and the principles for converting them into simplified characters. Credit not granted for this course and CHIN 1150.

College of Arts & Sciences | Asian Languages & Civilizations | Chinese

CLAS-1010 (3) The Study of Words

Study of English words of Latin and Greek origin, focusing on etymological meaning by analysis of component parts (prefixes, bases, suffixes) and on the ways in which words have changed and developed semantically. No Greek or Latin required. Same as LING 1010.

College of Arts & Sciences | Classics | Literature, Culture, & Thought

FREN-1010 (5) Beginning French 1

For students with no previous knowledge of French. Presents basic grammar and most commonly used French vocabulary. Introduces students to Francophone culture. Credit not granted for this course and FREN 1050.

College of Arts & Sciences | French & Italian | French

FRSI-1010 (5) Beginning Farsi I

Provides a grounding in basic Persian Farsi grammar. The morphological and phonological nuances of the language will be introduced, along with Persian culture. Basic conversation is re-enforced on a daily basis with strong emphasis and reiteration upon the homework and covered grammar.

College of Arts & Sciences | Asian Languages & Civilizations | Farsi

GEOL-1010 (3) Introduction to Geology

Introductory geology for majors and nonmajors. Studies Earth, its materials, its characteristics, its dynamic processes, and how it relates to people. Separate lab (GEOL 1030) is optional. Approved for GT-SC1. Meets MAPS requirement for natural science: nonlab. Approved for arts and sciences core curriculum: natural science.

College of Arts & Sciences | Earth & Planetary Sciences

College of Arts & Sciences | Geological Sciences

GRMN-1010 (4) Beginning German 1

For students with no previous training in German. Credit not granted for this course and GRMN 1030.

College of Arts & Sciences | Germanic & Slavic Languages & Literature | German

HEBR-1010 (4) Beginning Hebrew 1

First semester Hebrew is a beginning level course designed for students who have little or no prior knowledge of Hebrew. Begins with learning the Hebrew alphabet and immediately starts developing rudimentary Hebrew conversational, reading and writing skills. By the end of the semester students are expected to have attained basic understanding and expressive abilities in Hebrew.

College of Arts & Sciences | Germanic & Slavic Languages & Literature | Hebrew

HIND-1010 (5) Beginning Hindi 1

Provides a thorough introduction to the modern Hindi language, emphasizing speaking, listening, reading, and writing skills. This course is proficiency-based. Activities aim to place the student in the context of the native-speaking environment from the very beginning. Students will be provided with opportunities to participate in local South Asian cultural events. Credit not granted for this course and ASIA 1420. Formerly HINDI 1010.

College of Arts & Sciences | Asian Languages & Civilizations | Hindi

HIST-1010 (3) Western Civilization 1: From Antiquity to the 16th Century

Surveys the development of Western civilization from its beginnings in the ancient near East through the Reformation of the 16th century. Also available through correspondence study. Credit not granted for this course and HIST 1030. Approved for GT-HI1. Meets MAPS requirement for social science: general or world history. Approved for arts and sciences core curriculum: historical context.

College of Arts & Sciences | History | Methods, Comparative, Global

HUMN-1010 (6) Introduction to Humanities 1

Six meetings a week (three discussion classes on literature and its critical-historical analysis and three lecture-demonstrations on art and music). Provides an analytical and comparative study of works in literature, music, and visual arts from Aegean to Baroque eras. Emphasizes structure, content, and style in specific examples. Approved for arts and sciences core curriculum: literature and the arts.

College of Arts & Sciences | Humanities

INDO-1010 (5) Beginning Indonesian 1

Provides a thorough introduction to the modern Indonesian language, emphasizing speaking, listening, reading and writing skills. This course is proficiency-based. Activities aim to place the student in the context of the native-speaking environment from the very beginning. Students will be provided opportunities to participate in local Southeast Asian cultural events. Students with previous experience with Indonesian or Malay should contact the instructor for placement.

College of Arts & Sciences | Asian Languages & Civilizations | Indonesian

ITAL-1010 (5) Beginning Italian 1.

The four skills of listening, speaking, reading, and writing are progressively developed in a predominantly oral presentation. Grammatical concepts are explained and practiced through dialogues, written exercises, and conversations. The cultural focus is on the personal world and life of students.

College of Arts & Sciences | French & Italian | Italian

JPNS-1010 (5) Beginning Japanese 1

Provides a thorough introduction to modern Japanese, emphasizing speaking, listening, reading, and writing in a cultural context.

College of Arts & Sciences | Asian Languages & Civilizations | Japanese

KREN-1010 (5) First-Year (Beginning) Korean 1

Trains students in elementary conversational and writing skills and provides grounding in the basic idiomatic and syntactical features of Korean, through lectures, drills, and language laboratory sessions based on set dialogues and readings.

College of Arts & Sciences | Asian Languages & Civilizations | Korean

LING-1010 (3) The Study of Words

Study of English words of Latin and Greek origin, focusing on etymological meaning by analysis of component parts (prefixes, bases, suffixes) and on the ways in which words have changed and developed semantically. Same as CLAS 1010.

College of Arts & Sciences | Linguistics

PHIL-1010 (3) Introduction to Western Philosophy: Ancient

Develops three related themes: the emergence in antiquity of a peculiarly scientific mode of thinking; the place of religious belief within this developing scientific world view; and the force of ethical speculation within the culture and political climates of ancient Greece and Rome. PHIL 1010 and 1020 may be taken in either order. Same as CLAS 1030. Approved for GT-AH3. Approved for arts and sciences core curriculum: historical context.

[College of Arts & Sciences](#)
[Philosophy](#)

PHYS-1010 (3) Physics of Everyday Life 1

Intended primarily for nonscientists, this course covers physics encountered in everyday life. Topics include balls, scales, balloons, stoves, insulation, light bulbs, clocks, nuclear weapons, basics of flashlights, and microwave ovens. Prereq., high school algebra or equivalent. Approved for GT-SC2. Meets MAPS requirements for natural sciences: chemistry or physics. However, this course should not be taken if the student has a MAPS deficiency in math. Approved for arts and sciences core curriculum: natural science or quantitative reasoning and mathematical skills.

[College of Arts & Sciences](#)
[Physics](#)

PORT-1010 (5) Beginning Portuguese 1

Offers students a firm command of Portuguese grammar. Uses grammar as point of departure for development of oral skills. Reading and writing stressed to lesser degree. Attendance at

language laboratory may be mandatory.

College of Arts & Sciences Spanish Portuguese

RUSS-1010 (4) Beginning Russian 1

For students with no previous training in Russian. Credit not granted for this course and RUSS 1050.

College of Arts & Sciences Germanic & Slavic Languages & Literature Russian

SLHS-1010 (3) Disabilities in Contemporary American Society

Addresses the issue that 50 percent of all individuals experience disability in their lifetime. Introduces students to the social, cultural, psychological, economic, political, legal, and health-care issues related to society and individuals with disabilities. Approved for arts and sciences core curriculum: contemporary societies or ideals and values.

College of Arts & Sciences Speech, Language, & Hearing Sciences Didactic: All-Department

SNSK-1010 (3-4) Introductory Sanskrit 1

College of Arts & Sciences Religious Studies Sanskrit

SPAN-1010 (5) Beginning Spanish 1

Offers students a firm command of Spanish grammar. Grammar is used as a point of departure for development of oral skills. Reading and writing are stressed to a lesser degree. Attendance at the language laboratory may be mandatory. Credit not granted for this course and Span 1150.

College of Arts & Sciences Spanish Spanish

SWED-1010 (4) Beginning Swedish 1

College of Arts & Sciences Germanic & Slavic Languages & Literature Swedish

TBTN-1010 (4) Beginning Colloquial Tibetan I

Provides a thorough introduction to colloquial forms of Tibetan. This course focuses on conversation practice, the acquisition of basic vocabulary and grammar in colloquial usage, learning the alphabet, and training in the skills of pronunciation, spelling and handwriting.

College of Arts & Sciences | Asian Languages & Civilizations | Tibetan

YIDD-1010 (4) Beginning Yiddish 1

Introduces students to speaking, listening, reading, and writing skills in the historic language of Ashkenazic Jewry. Uses grammar as point of departure for development of oral skills.

College of Arts & Sciences | Germanic & Slavic Languages & Literature | Yiddish

ARAB-1011 (3) Introduction to Arab and Islamic Civilizations

Provides an interdisciplinary overview of the cultures of the Arabic-speaking peoples of Southwest Asia and North Africa from the rise of Islam in the 7th century to the present. Readings include historical, religious, literary and cultural texts from both the medieval and modern eras. Taught in English. Approved for arts and sciences core curriculum: human diversity.

College of Arts & Sciences | Asian Languages & Civilizations | Arabic

CHEM-1011 (3) Environmental Chemistry 1

Lect. Introduces basic principles of chemistry with applications to current environmental issues including toxic chemicals, air and water pollution, energy sources and their environmental impact, and climate change resulting from the greenhouse effect. No credit given to chemistry or biochemistry majors for CHEM 1011 if students already have credit in any college-level chemistry course numbered 1113/1114 (formerly 1111) or higher. Approved for GT-SC2. Meets MAPS requirements for natural sciences: chemistry or physics. Approved for arts and sciences core curriculum: natural science.

College of Arts & Sciences | Chemistry

FRSI-1011 (3) Introduction to Persian Civilization

An introduction to the history, literature and art of Iranian (Persian) civilization with a focus on the social and cultural aspects of contemporary Iran. Taught in English.

College of Arts & Sciences | Asian Languages & Civilizations | Farsi

GEOG-1011 (4) Environmental Systems 2---Landscapes and Water

MLect. and lab. Introduces landscapes and flowing water, emphasizing the formation and geographic distribution of mountains, volcanoes, valleys, and deserts, and their shaping by rivers and glaciers. Includes field trips. Approved for GT-SC1. Meets MAPS requirement for natural science: nonlab or lab. Approved for arts and sciences core curriculum: natural science.

College of Arts & Sciences | Geography | Physical Geography

HIND-1011 (3) Introduction to South Asian Civilizations

Survey of traditional and modern world views and experiences of people on the Indian subcontinent through literature and film, beginning with the Ramayana and including medieval tales, modern novels, and feature films. Formerly HNDI 1011. Approved for arts and sciences core curriculum: human diversity.

College of Arts & Sciences | Asian Languages & Civilizations | Hindi

INDO-1011 (3) Introduction to Indonesian Civilization

Provides an overview of the past and present of Indonesia, the people, and their cultures. Discussions with guest speakers, and on films, music, and images, will allow them to get acquainted with important issues and values in today's Indonesia. A closer look to the five major islands in the archipelago will introduce them to the diversity of this nation's 234,693,997 people. Taught in English.

College of Arts & Sciences | Asian Languages & Civilizations | Indonesian

KREN-1011 (3) Introduction to Korean Civilization

Introduces the history of Korean culture within the context of political, social, and economic history. Covers the old Choson dynasty to present day Korea. Approved for arts and sciences core curriculum: human diversity.

College of Arts & Sciences | Asian Languages & Civilizations | Korean

MATH-1011 (3) Fundamentals and Techniques of College Algebra

Covers simplifying algebraic expressions, factoring linear and quadratic equations, inequalities, exponentials, logarithms, functions, and graphs, and systems of equations. Credit not granted for this course and MATH 1005 or 1150. Prereq., one year high school algebra. Meets MAPS requirement for mathematics. Approved for arts and sciences core curriculum: quantitative reasoning and mathematical skills.

College of Arts & Sciences | Mathematics

THTR-1011 (3) Development of Theatre 1: Forms of Classical Theatre and Drama

Examines the interaction of dramatic literature and performance in classical forms of European and Asian theatre, including Greek, Roman, Indian, Japanese, Medieval, and Renaissance European. Approved for GT-AH1. Approved for arts and sciences core curriculum: literature and the arts.

College of Arts & Sciences | Theater & Dance | History/Dramaturgy/Directing

ARTS-1012 (3) Drawing for Non-Majors

Explores varied drawing techniques and media. Introduces concepts relevant to the understanding of drawing and the creative process. May not be repeated.

College of Arts & Sciences | Art & Art History | Painting/Drawing

CHIN-1012 (3-4) Introduction to Chinese Civilization

An interdisciplinary introduction from ancient to modern times. Arts, literature, politics, social relations, religion, and material culture are studied in terms of significant themes and ideas pertaining to the civilization of China. Approved for arts and sciences core curriculum: human diversity.

College of Arts & Sciences | Asian Languages & Civilizations | Chinese Courses in English

DNCE-1012 (2) Dance Production 1

Provides the dancer with an introduction to the types of performance venues available today, and their technical systems and equipment. It will also establish an awareness of how technical theatre design arts may be utilized by a choreographer. Restricted to dance majors. Credit not granted for this course and DNCE 2012. Prerequisites: Restricted to Dance (DNCE or DBFA) majors only.

College of Arts & Sciences | Theater & Dance | Production

JPNS-1012 (3-4) Introduction to Japanese Civilization

An interdisciplinary introduction from ancient to modern times. Arts, literature, politics, social relations, religion, and material culture are studied in terms of significant themes and ideas pertaining to the civilization of Japan. Approved for arts and sciences core curriculum: human diversity.

College of Arts & Sciences | Asian Languages & Civilizations | Japanese Courses in English

MATH-1012 (3) Quantitative Reasoning and Mathematical Skills

Promotes mathematical literacy among liberal arts students. Teaches basic mathematics, logic, and problem-solving skills in the context of higher level mathematics, science, technology, and/or society. This is not a traditional math class, but is designed to stimulate interest in and appreciation of mathematics and quantitative reasoning as valuable tools for comprehending the world in which we live. Credit not granted for this course and QRMS 1010. Approved for GT-MA1. Meets MAPS requirement for mathematics. Approved for arts and sciences core curriculum: quantitative reasoning and mathematical skills.

CLAS-1013 (4) Beginning Classical Greek 1

For students with no previous knowledge of Greek. Introduces basic grammar and vocabulary.

[College of Arts & Sciences](#) [Classics](#) [Greek](#)

DNCE-1013 (2) Dance Improvisation

An opportunity for students to develop skills of dance improvisation through the exploration of structured movement problems. Students study selected contemporary dance artists whose work stresses improvisation in performance and/or as a training vehicle. Restricted to dance majors. Formerly DNCE 2013. Prerequisites: Restricted to Dance (DNCE or DBFA) majors only.

[College of Arts & Sciences](#) [Theater & Dance](#) [Creative Process](#)

CLAS-1014 (4) Beginning Latin 1

Introduces basic grammar and vocabulary. For students with no previous knowledge of Latin.

[College of Arts & Sciences](#) [Classics](#) [Latin](#)

HIST-1015 (3) History of the United States to 1865

Surveys American history from first settlement until end of the Civil War. Also available through correspondence study. Approved for GT-HI1. Meets MAPS requirement for social science: general or U.S. history. Approved for arts and sciences core curriculum: United States context.

College of Arts & Sciences | History | US: Chronological Periods

SOCY-1016 (3) Sex, Gender, and Society 1

Examines status and power differences between the sexes at individual and societal levels. Emphasizes historical context of gender roles and status, reviews major theories of gender stratification. Same as WMST 1016. Approved for GT-SS3. Approved for arts and sciences core curriculum: human diversity.

College of Arts & Sciences | Sociology | Sex and Gender

WMST-1016 (3) Sex, Gender, and Society 1

Examines status and power differences between the sexes at individual and societal levels. Emphasizes historical context of gender roles and status, reviews major theories of gender stratification. Same as SOCY 1016. Approved for GT-SS3. Approved for arts and sciences core curriculum: human diversity.

College of Arts & Sciences | Womens Studies | Sociology

DNCE-1017 (3) Dance and Popular Culture

Explores and contextualizes contemporary popular culture and dance. Introduces methods of critical analysis that reveal the rich heritage hidden within and around the dances students commonly encounter at the club, on the street, on television, on the big screen and elsewhere in everyday life. Through watching, reading, and discussion, students discover new meaning in their lived cultural experience. Approved for arts and sciences core curriculum: literature and the arts.

College of Arts & Sciences | Theater & Dance | Dance and Cultural Studies

HIST-1018 (3) Introduction to Early Latin American History to 1810

Introduces students to the history of what is now called Latin America from about 1450 to the wars of independence in the nineteenth century. The course examines pertinent aspects of the societies and cultures of indigenous people, the history of European conquest, and the most salient features of the Spanish and Portuguese colonial empires in America. Students who have taken HIST 1038 may not receive credit for either HIST 1018 or 1028. Approved for arts and sciences core curriculum: historical context.

College of Arts & Sciences | History | World Areas: Specific Regions

THTR-1019 (3) Theatre Foundations: Text Analysis and Practice for the Theatre Arts

Introduces fundamental methods of text analysis for the stage, presents common vocabulary and concepts of the theatre event as an art form and how it works, and what playmaking means to those who do it. Prerequisites: Restricted to students with 0-56 credits (Freshmen or Sophomore) Theatre (THTR or TBFA) majors only.

College of Arts & Sciences | Theater & Dance | Special Courses in Theatre

ARAB-1020 (5) Beginning Arabic 2

Continuation of ARAB 1010. Prereq., ARAB 1010 (min grade C) or placement.

College of Arts & Sciences | Asian Languages & Civilizations | Arabic

ARTS-1020 (3) Introduction to Studio Art 2

Presents creative activity conceptually and art history thematically, with an interdisciplinary, experimental, and multicultural focus. Art and art history majors explore visual literacy and culture through presentations and student-centered projects that emphasize individual development. Prereq., ARTS 1010. Prerequisites: Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

College of Arts & Sciences | Art & Art History | Foundations

ASTR-1020 (4) Introductory Astronomy 2

Introduces principles of modern astronomy for nonscience majors, summarizing our present knowledge about the Sun, stars, birth and death of stars, neutron stars, black holes, galaxies, quasars, and the organization and origins of the universe. May require nighttime observation sessions at Sommers-Bausch Observatory. Similar to ASTR 1200, but with recitation and sequence link to ASTR 1010. Also similar to ASTR 1040. Students may receive credit for only one of ASTR 1020, 1200, 1120, or 1040. Prereq., ASTR 1010 or 1000. Approved for arts and sciences core curriculum: natural science.

College of Arts & Sciences | Astrophysical & Planetary Sciences

CHIN-1020 (5) Beginning Chinese 2

Continuation of CHIN 1010. Prereq., CHIN 1010 (min. grade C) or instructor consent.

College of Arts & Sciences | Asian Languages & Civilizations | Chinese

CLAS-1020 (3) Argument from Evidence: Critical Writing about the Ancient World

Introduces students to writing about the ancient world, with special attention to the possibilities and the limitations of ancient source-material. Taught as a writing workshop, with emphasis on critical thinking, analysis, argument and inquiry. While the course reads foundational ancient texts, the skills acquired will be broadly useful among humanities disciplines. Approved for arts and sciences core curriculum: written communication.

College of Arts & Sciences | Classics | Literature, Culture, & Thought

DNCE-1020 (1) Beginning Modern Dance with Experience

Studio course that continues the work from the beginning level on basic concepts and skills in modern dance technique to increase strength, flexibility, and coordination. May be repeated up to 2 total credit hours. Prereq., DNCE 1000.

| | | |
|----------------------------|-----------------|--------------------|
| College of Arts & Sciences | Theater & Dance | Nonmajor Technique |
|----------------------------|-----------------|--------------------|

FREN-1020 (5) Beginning French 2

Continuation of FREN 1010. Completes the presentation of most basic structures and French vocabulary. Prereq., successful completion of one semester of college-level French or two years of high school French. Credit not granted for this course and FREN 1050.

| | | |
|----------------------------|------------------|--------|
| College of Arts & Sciences | French & Italian | French |
|----------------------------|------------------|--------|

FRSI-1020 (5) Beginning Farsi II

Continuation of FRSI 1010. Completes the presentation of basic structures of Farsi. Continued acquisition of vocabulary and practice of speaking, listening, reading, and writing. Class conducted largely in Farsi. The second half of the course will introduce authentic texts of Persian prose literature. Some poetry may be included. Prereq., FRSI 1010 (min. grade C) or instructor consent.

| | | |
|----------------------------|---------------------------------|-------|
| College of Arts & Sciences | Asian Languages & Civilizations | Farsi |
|----------------------------|---------------------------------|-------|

GEOL-1020 (3) Introduction to Earth History

Examines how Earth's interior and surface, the atmosphere and climate, the oceans, and life interact and have changed over the immensity of geologic time. For majors and non-majors. Separate lab (GEOL 1030) is optional. Prereq., GEOL 1010. Credit not granted for this course and GEOL 1040. Approved for GT-SC2. Approved for arts and sciences core curriculum: natural science.

| | |
|----------------------------|---------------------|
| College of Arts & Sciences | Geological Sciences |
|----------------------------|---------------------|

GRMN-1020 (4) Beginning German 2

Prereq., GRMN 1010 (min grade of C-). Credit not granted for this course and GRMN 1030.

| | | |
|----------------------------|--|--------|
| College of Arts & Sciences | Germanic & Slavic Languages & Literature | German |
|----------------------------|--|--------|

HEBR-1020 (4) Beginning Hebrew 2

Second semester builds on Hebrew skills introduced in the first semester, with a focus on speaking, comprehension, reading and writing. Students learn new verbal tenses and paradigms. The course blends a communicative method with formal grammatical instruction. By the end of this semester students are expected to be able to converse in, comprehend, and produce written basic Hebrew. Prereq., HEBR 1010 (min. grade C-) or instructor consent.

| | | |
|----------------------------|--|--------|
| College of Arts & Sciences | Germanic & Slavic Languages & Literature | Hebrew |
|----------------------------|--|--------|

HIND-1020 (5) Beginning Hindi 2

Continuation of HIND 1010. Provides a thorough introduction to the modern Hindi language, emphasizing speaking, listening, reading and writing skills. Proficiency-based course aims to place the student in the context of the native-speaking environment from the beginning of the course. Provides opportunities to participate in local South Asian cultural activities and events. Prereq., HIND 1010 (min. grade C) or instructor consent. Formerly HNDI 1020.

College of Arts & Sciences | Asian Languages & Civilizations | Hindi

HIST-1020 (3) Western Civilization 2: 16th Century to the Present

Surveys political, economic, social, and intellectual developments in European history from the 16th century to the present. Similarities and contrasts between European states are underscored, as is Europe's changing role in world history. Also available through correspondence study. Credit not granted for this course and HIST 1040. Approved for GT-HI1. Meets MAPS requirement for social science: general or world history. Approved for arts and sciences core curriculum: historical context.

College of Arts & Sciences | History | Methodo, Comparative, Global

HUMN-1020 (6) Introduction to Humanities 2

Six meetings a week (three discussion classes on literature and its critical-historical analysis and three lecture-demonstrations on art and music). Examines from Baroque to contemporary styles in literature, music, and visual arts. Emphasizes the cultural context in which art was created. Approved for arts and sciences core curriculum: literature and the arts.

College of Arts & Sciences | Humanities

INDO-1020 (5) Beginning Indonesian 2

Continuation of INDO1010. Provides a thorough introduction to the modern Indonesian language, emphasizing the context of the native-speaking environment from the very beginning. Students will be provided with opportunities to participate in local Southeast Asian events. Students with previous experience with Indonesian or Malay should contact the instructor for placement. Prereq., INDO 1010 (min. grade C).

College of Arts & Sciences | Asian Languages & Civilizations | Indonesian

ITAL-1020 (5) Beginning Italian 2

Continuation of ITAL 1010, with more difficult grammatical concepts explored. The cultural focus shifts to social and civic areas. Prereq., ITAL 1010 (min grade C-).

College of Arts & Sciences | French & Italian | Italian

JPNS-1020 (5) Beginning Japanese 2

Continuation of JPNS 1010. Prereq., JPNS 1010 (min grade C) or instructor consent.

[College of Arts & Sciences](#)
[Asian Languages & Civilizations](#)
[Japanese](#)

KREN-1020 (5) First-Year (Beginning) Korean 2

Continuation of KREN 1010. Prereq., KREN 1010 (min. grade C) or instructor consent.

[College of Arts & Sciences](#)
[Asian Languages & Civilizations](#)
[Korean](#)

LING-1020 (3) Languages of the World

Explores the issue of human diversity by examining how languages vary around the world. Outlines historical, geographic, and typological classifications of languages across human societies, and the criteria used by linguists for grouping them into language families. Theorizes the relationship between linguistic and cognitive diversity, and considers the impact of language death on humanity. No formal training in linguistics is required. Approved for arts and sciences core curriculum: human diversity.

[College of Arts & Sciences](#)
[Linguistics](#)

NORW-1020 (4) Beginning Norwegian 2

Prereq., NORW 1010 with a grade of C- or better.

| | | |
|----------------------------|--|-----------|
| College of Arts & Sciences | Germanic & Slavic Languages & Literature | Norwegian |
|----------------------------|--|-----------|

PHIL-1020 (3) Introduction to Western Philosophy: Modern

Introduces several philosophical texts and doctrines of 17th and 18th century Europe. Gives special attention to the connection between philosophical ideas and the wider historical milieu--social, political, and literary. PHIL 1010 and 1020 may be taken in either order. Approved for GT-AH3. Approved for arts and sciences core curriculum: historical context.

| | |
|----------------------------|------------|
| College of Arts & Sciences | Philosophy |
|----------------------------|------------|

PHYS-1020 (4) Physics of Everyday Life 2

Intended primarily for nonscientists, this course is a continuation of PHYS 1010. Includes electrical power generation and distribution, electrical motors, radio, television, computers, copiers, lasers, fluorescent lights, cameras, and medical imaging. Prereqs., PHYS 1010 and high school algebra. Approved for GT-SC1. Approved for arts and sciences core curriculum: quantitative reasoning and mathematical skills or natural science.

| | |
|----------------------------|---------|
| College of Arts & Sciences | Physics |
|----------------------------|---------|

PORT-1020 (5) Beginning Portuguese 2

Continuation of PORT 1010. Prereq., PORT 1010 (min. grade C-) or placement.

| | | |
|----------------------------|---------|------------|
| College of Arts & Sciences | Spanish | Portuguese |
|----------------------------|---------|------------|

RUSS-1020 (4) Beginning Russian 2

Continuation of RUSS 1010. Prereq., RUSS 1010 (min grade of C-). Credit not granted for this course and RUSS 1050.

| | | |
|----------------------------|--|---------|
| College of Arts & Sciences | Germanic & Slavic Languages & Literature | Russian |
|----------------------------|--|---------|

SEWL-1020 (1-3) Topics-Social Sciences 1

| | |
|----------------------------|-------------------------------------|
| College of Arts & Sciences | Sewall Residential Academic Program |
|----------------------------|-------------------------------------|

SNSK-1020 (3-4) Introductory Sanskrit 2

Prereq., SNSK 1010.

| | | |
|----------------------------|-------------------|----------|
| College of Arts & Sciences | Religious Studies | Sanskrit |
|----------------------------|-------------------|----------|

SPAN-1020 (5) Beginning Spanish 2

Continuation of Span 1010. Attendance at the language laboratory may be mandatory. Prereq., SPAN 1010 (mingrade of C-), or placement. Credit not granted for this course and SPAN 1150.

| | | |
|----------------------------|---------|---------|
| College of Arts & Sciences | Spanish | Spanish |
|----------------------------|---------|---------|

SWED-1020 (4) Beginning Swedish 2

Prereq., SWED 1010 (min grade of C-).

| | | |
|----------------------------|--|---------|
| College of Arts & Sciences | Germanic & Slavic Languages & Literature | Swedish |
|----------------------------|--|---------|

TBTN-1020 (4) Beginning Colloquial Tibetan II

Provides a thorough introduction to colloquial forms of Tibetan. This course continues the development of vocabulary and grammar begun in Tibetan I and expands the range of conversation topics. While students focus on oral and aural skills, they begin to learn to read and write modern Tibetan to produce an overall knowledge of the language. Prereq., TBTN 1010 (min. grade C) or instructor consent.

| | | |
|----------------------------|---------------------------------|---------|
| College of Arts & Sciences | Asian Languages & Civilizations | Tibetan |
|----------------------------|---------------------------------|---------|

YIDD-1020 (4) Beginning Yiddish 2

Continuation of YIDD 1010. Prereq., YIDD 1010 (min. grade C-) or placement.

| | | |
|----------------------------|--|---------|
| College of Arts & Sciences | Germanic & Slavic Languages & Literature | Yiddish |
|----------------------------|--|---------|

CHEM-1021 (4) Introductory Chemistry

Lect. and lab. For students with no high school chemistry or a very weak chemistry background. Remedies a deficiency in natural science MAPS requirements and prepares students for CHEM 1113/1114. No credit given to chemistry or biochemistry majors for CHEM 1021 if students already have credit in any college-level chemistry course numbered 1113/1114 (formerly 1111) or higher. Prereq., one year high school algebra or concurrent enrollment in MATH 1011. Approved for GT-SC1. Approved for arts and sciences core curriculum: natural science.

| | |
|----------------------------|-----------|
| College of Arts & Sciences | Chemistry |
|----------------------------|-----------|

MATH-1021 (2) Numerical and Analytical College Trigonometry

Covers trigonometric functions, identities, solutions of triangles, addition and multiple angle formulas, inverse and trigonometric functions, and laws of sines and cosines. Credit not granted for this course and MATH 1150, 1030 or 1040. Prereqs., MATH 1011 or 1020 or 1 1/2 years of high school algebra and 1 year of high school geometry.

College of Arts & Sciences Mathematics

SOCY-1021 (3) United States Race and Ethnic Relations

An examination of race and minority problems in U.S. society, including the psychological, social, and cultural sources of prejudice and discrimination. Approved for GT-SS3. Approved for arts and sciences core curriculum: United States context.

College of Arts & Sciences Sociology General Sociology

ETHN-1022 (3) Introduction to Africana Studies

Overview of Africana studies as a field of investigation, its origins, and history. Formerly ETHN 2002. Approved for arts and sciences core curriculum: human diversity.

College of Arts & Sciences Ethnic Studies Africana Studies

SOCY-1022 (3) Ethics and Social Issues in U.S. Health and Medicine

Explores current ethical and policy issues in U.S. health and medical practices. Includes such issues as alcohol and drug abuse, organ transplants and substitutes, genetic engineering, contraception, abortion, occupational safety and health, and euthanasia. Approved for arts and sciences core curriculum: ideals and values.

College of Arts & Sciences Sociology Population and Health Issue

CLAS-1023 (4) Beginning Classical Greek 2

Completes the presentation of grammar and introduces reading of literature. Prereq., CLAS 1013 or equivalent.

College of Arts & Sciences Classics Greek

ETHN-1023 (3) Introduction to American Indian Studies

Introduces critical terms, issues, and questions that inform the discipline of American Indian Studies. Examines "historical silences" and highlights how American Indian scholars, poets, and filmmakers use their work to address/redress historical subjects, and represent their Native communities. Approved for arts and sciences core curriculum: human diversity.

College of Arts & Sciences Ethnic Studies American Indian Studies

CLAS-1024 (4) Beginning Latin 2

Completes the presentation of grammar, incorporates review of fundamentals, and introduces reading of literature. For students with previous experience of Latin. Prereq., CLAS 1014 or equivalent.

College of Arts & Sciences | Classics | Latin

ETHN-1025 (3) Introduction to Asian American Studies

Examines the various factors that define minority groups and their positions in American society using Asian Americans as a case study. Emphasizes the perspectives and methodologies of the discipline of ethnic studies. Formerly AAST 1015. Approved for arts and sciences core curriculum: contemporary societies or human diversity.

College of Arts & Sciences | Ethnic Studies | Asian American Studies

HIST-1025 (3) History of the United States since 1865

Surveys social, economic, political, and cultural development of the United States from the close of the American Civil War to the present. Also available through correspondence study. Approved for GT-HI1. Meets MAPS requirement for social science: general or U.S. history. Approved for arts and sciences core curriculum: United States context.

College of Arts & Sciences | History | US: Chronological Periods

DNCE-1027 (3) Introduction to Dance and Culture

Explores dance's relationship to broad cultural realities such as food getting, sexuality, rites of passage, work, and religion. Topics are explored by looking at several different cultural groups and how their dance functions in relation to the specific topic. (For example, dance as a function of religion could be studied through explorations into Afro-Cuban orisha dances, Bharata Natyam, and Hopi Ghost dancing.) Formerly DNCE 1029. Approved for GT-AH1. Approved for arts and sciences core curriculum: literature and the arts.

College of Arts & Sciences | Theater & Dance | Dance and Cultural Studies

HIST-1028 (3) Introduction to Modern Latin American History since 1800

Introduces students to the history of Latin America from independence to the present. The course investigates the social implications of various models of economic development, the opportunities and difficulties resulting from economic ties with wealthier countries, the consequences of ethnic, gender and class divisions, and the struggles of Latin Americans to construct equitable political systems. Students who have taken HIST 1038 may not receive credit for HIST 1018 or 1028. Approved for arts and sciences core curriculum: historical context.

[College of Arts & Sciences](#)
[History](#)
[World Areas: Specific Regions](#)

ANTH-1030 (3) Principles of Anthropology 1

Evolution of humanity and culture from beginnings through early metal ages. Covers human evolution, race, prehistory, and rise of early civilizations. This course is taught through Continuing Education. Meets MAPS requirements for social science: general.

[College of Arts & Sciences](#)
[Anthropology](#)

ARTS-1030 (3) Principles of Color

Introduces the relative effects of color as used by the artist. Emphasizes the practice of color relations including basic characteristics, mixtures, illusions, optical mixture, color intervals, and color quantity. May not be repeated.

[College of Arts & Sciences](#)
[Art & Art History](#)
[Foundations](#)

ASTR-1030 (4) Accelerated Introductory Astronomy 1

Covers principles of modern astronomy summarizing our present knowledge about the Earth, Sun, moon, planets, and origin of life. Requires nighttime observation sessions at Sommers-Bausch Observatory. Required in ASTR major/minor. Prereq. or coreq., Calculus I (MATH 1300 or APPM 1350). Students may receive credit for only one of ASTR 1030, 1010, 1000, or 1110. Similar to ASTR 1010 and 1000, but taught at a higher intellectual level, including a significant amount of quantitative analysis. Approved for GT-SC1. Approved for arts and sciences core curriculum: natural science.

College of Arts & Sciences | Astrophysical & Planetary Sciences

CLAS-1030 (3) Introduction to Western Philosophy: Ancient

Develops three related themes: the emergence in antiquity of a peculiarly scientific mode of thinking; the place of religious belief within this developing scientific world view; and the force of ethical speculation within the culture and political climates of ancient Greece and Rome. No Greek or Latin required. Same as PHIL 1010. Approved for arts and sciences core curriculum: historical context.

College of Arts & Sciences | Classics | Literature, Culture, & Thought

EBIO-1030 (3) Biology: A Human Approach 1

Lect. Studies the principles of biology and their implications. Central theme is humans and the environment, emphasizing ecology, natural resource conservation, and the interrelatedness of a growing human population. Recommended for nonscience majors. Meets MAPS requirement for natural science: non-lab. Approved for arts and sciences core curriculum: natural science.

College of Arts & Sciences | Ecology & Evolutionary Biology

GEOL-1030 (1) Introduction to Geology Laboratory 1

Features field trips to local points of geologic interest. Studies rocks and topographic and geologic maps. Prior or current registration in 1000-level geology recommended. Approved for GT-SC1. Meets MAPS requirements for natural science lab, if taken with GEOL 1010. Approved for arts and sciences core curriculum: natural science. Formerly GEOL 1080.

College of Arts & Sciences | Geological Sciences

GRMN-1030 (5) Intensive Beginning German

Covers the same material as GRMN 1010 and GRMN 1020 in one course. Focuses on acquiring ability to understand and speak everyday German; on developing reading and writing skills; and on learning about the cultures of the German-speaking countries. Credit not granted for this course and GRMN 1010 and GRMN 1020.

College of Arts & Sciences | Germanic & Slavic Languages & Literature | German

HEBR-1030 (3) Biblical Hebrew 1

This course is designed to enable students to read the Hebrew Bible in the original language. The focus will be the ability to read the various genres of the text, utilizing both the tools of modern language acquisition and the study of classical grammar methods. Same as JWST 1030.

College of Arts & Sciences | Germanic & Slavic Languages & Literature | Hebrew

JWST-1030 (3) Biblical Hebrew 1

This course is designed to enable students to read the Hebrew Bible in the original language. The focus will be the ability to read the various genres of the text, utilizing both the tools of modern language acquisition and the study of classical grammar methods. Same as HEBR 1030.

College of Arts & Sciences | Jewish Studies

MCDB-1030 (3) Plagues, People, and Microorganisms

Discusses the biology, history, ecology, and social impact of human plagues, including Aids, smallpox, polio, bubonic plague, tuberculosis, leprosy, the impact of the Irish potato blight, and emerging human pathogens. The biology of pathogens and the human immune responses are treated in detail. Discusses the impact of molecular biology on curtailing the impact of diseases. For nonmajors. Approved for GT-SC2. Approved for arts and sciences core curriculum: natural science.

College of Arts & Sciences | Molecular, Cellular, & Development Biology

CHEM-1031 (4) Environmental Chemistry 2

Lect. and lab. Applications of chemical principles to current environmental issues including acid rain, stratospheric ozone depletion, the Antarctic ozone hole, solar energy conversion and fuel cells, and the environmental consequences of nuclear war. Laboratory experience is included. No credit given to chemistry or biochemistry majors for 1031 if students already have credit in any college-level chemistry course numbered 1113/1114 (formerly 1111) or higher. Prereq., CHEM 1011 with a grade of C- or higher. Approved for arts and sciences core curriculum: natural science.

College of Arts & Sciences | Chemistry

ANTH-1040 (3) Principles of Anthropology 2

Surveys the world's major culture areas. Covers components of culture, such as subsistence, social organization, religion, and language. This course is taught through Continuing Education. Meets MAPS requirement for social science: general.

College of Arts & Sciences | Anthropology

ASTR-1040 (4) Accelerated Introductory Astronomy 2

Covers principles of modern astronomy summarizing our present knowledge about the Sun, stars, birth and death of stars, neutron stars, black holes, galaxies, quasars, and the organization and origins of the universe. May require nighttime observing sessions at Sommers-Bausch Observatory. Required in ASTR major/minor. Includes a recitation. Prereq., ASTR 1030. Prereq. or

coreq., Calculus I (MATH 1300 or APPM 1350). Students may receive credit for only one of ASTR 1020, 1040, 1200, or 1120. Similar to ASTR 1020 and 1200 but taught at a higher intellectual level including a significant amount of quantitative analysis. Approved for GT-SC2. Approved for arts and sciences core curriculum: natural science.

College of Arts & Sciences | Astrophysical & Planetary Sciences

EBIO-1040 (3) Biology: A Human Approach 2

Lect. Continues EBIO 1030, focusing on the function of the human body, and maintenance of dynamic equilibrium in the internal environment in the face of a continually changing external environment. Discusses factors influencing these homeostatic conditions and how and why they change. Recommended for nonscience majors. Prereq., EBIO 1030. Approved for arts and sciences core curriculum: natural science.

College of Arts & Sciences | Ecology & Evolutionary Biology

GEOL-1040 (3) Geology of Colorado

Reviews the geologic evolution and history of Colorado. It first develops the basic concepts needed to interpret the geology, and then systematically shows how the state evolved through geologic time. The course is designed for those who enjoy understanding the beauty and splendor of the state. Prereq., GEOL 1010. Credit not granted for this course and GEOL 1020. Approved for arts and sciences core curriculum: natural science.

College of Arts & Sciences | Geological Sciences

HEBR-1040 (3) Biblical Hebrew 2

Building on HEBR/JWST 1030, this course continues to build expertise in reading the Hebrew Bible. Modern language acquisition and classical grammar study methods equip students with the tools to translate and read the various genres of the Biblical material. Prereq., HEBR/JWST 1030 or instructor consent. HEBR 1040 and JWST 1040 are the same course.

College of Arts & Sciences | Germanic & Slavic Languages & Literature | Hebrew

JWST-1040 (3) Biblical Hebrew 2

Building on HEBR/JWST 1030, this course continues to build expertise in reading the Hebrew Bible. Modern language acquisition and classical grammar study methods equip students with the tools to translate and read the various genres of the Biblical material. Prereq., HEBR/JWST 1030 or instructor consent. HEBR 1040 and JWST 1040 are the same course.

College of Arts & Sciences | Jewish Studies

MCDB-1041 (3) Fundamentals of Human Genetics

Covers the basic principles of genetics, human pedigree analysis, and how genetic diseases affect DNA, RNA, and proteins. Considers implications of this research for medicine and society. For nonmajors. Recommended prereq., good background in high school chemistry and biology. Approved for GT-SC2. Approved for arts and sciences core curriculum: natural science.

College of Arts & Sciences | Molecular, Cellular, & Development Biology

ATOC-1050 (3) Weather and the Atmosphere

Introduces principles of modern meteorology for nonscience majors, with emphasis on scientific and human issues associated with severe weather events. Includes description, methods of prediction, and impacts of blizzards, hurricanes, thunderstorms, tornadoes, lightning, floods, and firestorms. Approved for GT-SC1. Meets MAPS requirement for natural science: non-lab. Approved for arts and sciences core curriculum: natural science.

College of Arts & Sciences | Atmospheric & Oceanic Sciences

EBIO-1050 (1) Biology: A Human Approach Laboratory

One two-hour lab per week. Provides experiments and exercises relating to concepts presented in EBIO 1030 and 1040. Biology: a Human Approach 1 and 2. This course uses animals and/or animal tissues. Recommended for nonscience majors. When taken with EBIO 1030, meets MAPS requirement for natural science: lab. Approved for arts and sciences core curriculum: natural science.

College of Arts & Sciences | Ecology & Evolutionary Biology

FREN-1050 (5) Beginning French Review

Covers the material of FREN 1010 and 1020 in one accelerated semester. Intended for students who know some French (i.e., four to five semesters in high school) but do not have skills adequate for 2000-level courses. Credit not granted for this course and FREN 1010 or FREN 1020.

College of Arts & Sciences | French & Italian | French

RUSS-1050 (5) Intensive Beginning Russian

Covers same material as RUSS 1010 and RUSS 1020 combined in one course. Focuses on acquiring basic grammar (all cases for nouns, adjectives and possessives, verb conjugations, in all three tenses), and ability to understand and speak basic everyday Russian. Develops basic reading and writing skills and provides exposure to the fundamentals of the Russian culture. Credit not granted for this course and RUSS 1010 or 1020.

College of Arts & Sciences | Germanic & Slavic Languages & Literature | Russian

CHIN-1051 (3) Masterpieces of Chinese Literature in Translation

Surveys Chinese thought and culture through close reading and discussion of selected masterworks of Chinese literature in translation. Texts include significant works of poetry, fiction, and drama, as well as philosophical and historical writings from various eras. Taught in English. Approved for arts and sciences core curriculum: literature and the arts.

College of Arts & Sciences | Asian Languages & Civilizations | Chinese Courses in English

CLAS-1051 (3) The World of the Ancient Greeks

Presents a survey of the emergence, the major accomplishments, the failures, and the decline of the ancient Greeks, from the Bronze Age civilizations of the Minoans and Mycenaeans through the Hellenistic Age (2000--30 B.C.). No Greek or Latin required. Same as HIST 1051. Approved for arts and sciences core curriculum: historical context.

HIST-1051 (3) The World of the Ancient Greeks

Surveys the emergence, major accomplishments, failures, and decline of the world of the ancient Greeks, from Bronze Age civilizations of the Minoans and Mycenaeans through the Hellenistic Age (2000--30 B.C.) Same as CLAS 1051. Approved for GT-HI1. Approved for arts and sciences core curriculum: historical context.

[College of Arts & Sciences](#)
[History](#)
[Europe: Ancient and Medieval](#)

JPNS-1051 (3) Masterpieces of Japanese Literature in Translation

Surveys Japanese thought and culture through careful reading and discussion of selected masterworks of Japanese literature in translation. Texts include significant works of poetry, fiction, drama, diaries, and essays, from ancient times to the present. Taught in English. Approved for arts and sciences core curriculum: literature and the arts.

[College of Arts & Sciences](#)
[Asian Languages & Civilizations](#)
[Japanese Courses in English](#)

ATOC-1060 (3) Our Changing Environment: El Nino, Ozone, and Climate

Discusses the Earth's climate for nonscience majors, focusing on the role of the atmosphere, oceans, and land surface. Describes the water cycle, atmospheric circulations, and ocean currents, and how they influence global climate, El Nino, and the ozone hole. Discusses human impacts from climate change. Prereq., ATOC 1050. Approved for arts and sciences core curriculum: natural science.

[College of Arts & Sciences](#)
[Atmospheric & Oceanic Sciences](#)

GEOL-1060 (3) Global Change---An Earth Science Perspective

Focuses on evidence for planetary warming, climate change, glacier and ice-sheet melting, and sea level rise both now and in the recent past. Attempts to develop understanding of the interactions within the coupled Earth system that regulate such changes. Utilizes examples from the geological and instrumental records, and evaluates the global warming forecast. Prereq., GEOL 1010. Meets MAPS requirement for natural science: nonlab. Approved for arts and sciences core curriculum: natural science.

College of Arts & Sciences Geological Sciences

CHIN-1061 (3) Boudoirs, Books, Battlefields: Voices and Images of Chinese Women

Explores narrative and visual representations of women throughout Chinese history. Emphasizes how modern values of freedom and equality have transformed women's lives and shaped their aspirations. Course materials include memoirs, novels, ethnographies, documentaries, and feature films. No knowledge of Chinese is necessary. Approved for arts and sciences core curriculum: human diversity.

College of Arts & Sciences Asian Languages & Civilizations Chinese Courses in English

CLAS-1061 (3) The Rise and Fall of Ancient Rome

Presents a survey of the rise of ancient Rome in the eighth century B.C. to its fall in the fifth century A.D. Emphasizes political institutions, foreign policy, leading personalities, and unique cultural accomplishments. No Greek or Latin required. Same as HIST 1061. Approved for arts and sciences core curriculum: historical context.

College of Arts & Sciences Classics Ancient History

HIST-1061 (3) The Rise and Fall of Ancient Rome

Surveys the rise of ancient Rome in the eighth century B.C. to its "Fall" in the fifth century A.D. Emphasizes political institutions, foreign policy, leading personalities, and unique cultural accomplishments. Same as CLAS 1061. Approved for GT-HI1. Approved for arts and sciences core curriculum: historical context.

College of Arts & Sciences History Europe: Ancient and Medieval

ATOC-1070 (1) Weather and the Atmosphere Laboratory

Optional laboratory for ATOC 1050. Laboratory experiments illustrate fundamentals of meteorology. Covers collection, analysis, and discussion of data related to local weather. Uses computers for retrieval and interpretation of weather data from Colorado and across the U.S. Prereq. or coreq., ATOC 1050 or instructor consent. Approved for GT-SC1. Approved for arts and sciences core curriculum: natural science.

College of Arts & Sciences Atmospheric & Oceanic Sciences

MATH-1071 (3) Finite Mathematics for Social Science and Business

Discusses systems of linear equations and introduces matrices, linear programming, and probability. Prereq., MATH 1011 or 1 1/2 years of high school algebra. Credit not granted for this course and MATH 1050, 1060 and 1070. Approved for arts and sciences core curriculum: quantitative reasoning and mathematical skills.

College of Arts & Sciences Mathematics

ECON-1078 (3) Mathematical Tools for Economists 1

Teaches mathematical skills and logical thinking for use in economics. Topics include algebra, graphs, functions, and probability. The class includes many "Real world" examples and some illustrative computer assignments. Approved for arts and sciences core curriculum: quantitative reasoning and mathematical skills.

College of Arts & Sciences Economics Quantitative Economics

ARSC-1080 (4) College Writing and Research

Introduces academic and professional genres through the research and inquiry process. Students practice close reading, oral presentation, drafting, synthesis, analysis and research skills in discussion, writing workshops, and one-on-one conferences. Meets MAPS requirement for English. Approved for arts and sciences core curriculum: written communication.

College of Arts & Sciences Arts & Sciences Admin Writing

ARSC-1081 (1) SASC Coseminar: College Writing and Research

One-credit seminar provides extended instruction in written composition for students enrolled in ARSC 1080. Graded assignments enrich students' understanding of genre, organization, research skills, and grammar. Coreq., ARSC 1080.

College of Arts & Sciences Arts & Sciences Admin Writing

MATH-1081 (3) Calculus for Social Science and Business

Covers differential and integral calculus of algebraic, logarithmic, and exponential functions. Prereq., MATH 1011, 1071, 1010, or 1070 or placement exam score for MATH 1020 or two years high school algebra. Credit not granted for this course and MATH 1080, 1090, 1100, 1300, 1310, APPM 1350, and ECON 1088. Approved for arts and sciences core curriculum: quantitative reasoning and mathematical skills.

College of Arts & Sciences Mathematics

ECON-1088 (3) Mathematical Tools for Economists 2

Continuation of ECON 1078. Teaches mathematical skills for use in economics. Topics include derivatives, optimization, and integration. These skills are used on "real world" problems, and illustrated with computer assignments. Prereq., ECON 1078 or instructor consent. Credit not granted for this course and MATH 1080, 1081, 1090, 1100, 1300, 1310, and APPM 1350.

College of Arts & Sciences | Economics | Quantitative Economics

DNCE-1091 (1) Modern 1

Introduces basic skills of modern dance. In-class technique work increases muscle strength, flexibility, and coordination. Offered summers only at Perry-Mansfield Performing Arts Camp. May be repeated up to 2 total credit hours.

College of Arts & Sciences | Theater & Dance | Major Technique

ANTH-1100 (3) Exploring a Non-Western Culture: The Tamils

Surveys the social and economic patterns, ideas and values, and aesthetic achievements of the Tamils, a Hindu people who live in South India and Sri Lanka. Approved for arts and sciences core curriculum: human diversity.

College of Arts & Sciences | Anthropology

CLAS-1100 (3) Greek Mythology

Covers the Greek myths as documents of early human religious experience and imagination, the source of Greek culture, and part of the fabric of Western cultural tradition. Of particular interest to students of literature and the arts, psychology, anthropology, and history. No Greek or Latin required. Approved for arts and sciences core curriculum: literature and the arts.

College of Arts & Sciences | Classics | Literature, Culture, & Thought

COMR-1100 (1) RAP Community Leadership Practicum

Examines relationships between competent communication and effective leadership in the context of the Communication and Society RAP. Upon completion of the Community Leadership RAP practicum, the student will be able to identify, discuss, demonstrate, and critique effective communication skills as they apply to many different leadership opportunities within the RAP. Restricted to students in the Communication Residential Academic Program.

College of Arts & Sciences | Communication Residential Academic Program

DNCE-1100 (1) Beginning Ballet

Ballet for beginners; no previous experience required. Stretching, basic barre, simple terre a terre, and jumping steps are learned, as well as alignment and basic extended positions such as arabesque and attitude. Mastery of simple enchainements and rhythmic patterns. May be repeated up to 2 total credit hours.

College of Arts & Sciences | Theater & Dance | Nonmajor Technique

PHIL-1100 (3) Ethics

Introductory study of major philosophies on the nature of the good for humanity, principles of evaluation, and moral choice as they apply to contemporary moral problems. Approved for GT-AH3. Approved for arts and sciences core curriculum: ideals and values.

College of Arts & Sciences | Philosophy

WRTG-1100 (4) Extended First-Year Writing and Rhetoric

Extended version of WRTG 1150 that carries an additional hour of credit and is intended for students desiring more preparation and practice in college writing. Meets the same goals as WRTG 1150. Features one extra hour of small group work out of class. Focuses on critical analysis, argument, inquiry, and information literacy. Taught as a writing workshop, the course places a premium on invention, drafting, and thoughtful revision. For placement criteria, see the arts and sciences advising office. May be repeated up to 8 total credit hours. Approved for GT-C01 and GT-C02. Meets MAPS requirement for English. Approved for arts and sciences core curriculum: written communication.

College of Arts & Sciences | Program for Writing & Rhetoric

PSCI-1101 (3) The American Political System

Emphasizes interrelations among levels and branches of government, formal and informal institutions, processes, and behavior. Approved for GT-SS1. Meets MAPS requirement for social science: general or U.S. history. Approved for arts and sciences core curriculum: contemporary societies or United States context.

College of Arts & Sciences | Political Science | American

ANTH-1105 (3) Exploring a Non-Western Culture: Tibet

Introduction to Tibetan culture, history, religion, and society from an anthropological perspective, including traditional as well as contemporary dimensions. Topics will include Tibetan Buddhism, politics, nomadism, gender, refugee issues, and the global Tibetan diaspora, all framed within the larger methods and concepts of cultural anthropology. Approved for arts and sciences core curriculum: human diversity.

College of Arts & Sciences | Anthropology

THTR-1105 (3) Stage Technologies

Introduces technical production elements and procedures, including materials, organizations, methods and equipment to realize theatrical scenery, properties, lighting and sound. Credit not granted for this course and THTR 1065 or 1075.

College of Arts & Sciences | Theater & Dance | Theatre Design and Technology

CLAS-1110 (3) Muses and Man-eaters (1): The Literature of Ancient Greece

Surveys Greek authors whose works have most influenced Western thought: Homer, Aeschylus, Sophocles, Euripides, Aristophanes, and Plato. No Greek or Latin required. Approved for arts and sciences core curriculum: literature and the arts.

[College of Arts & Sciences](#) | [Classics](#) | [Literature, Culture, & Thought](#)

MATH-1110 (3) The Spirit and Uses of Mathematics 1

For prospective elementary teachers. Includes a study of problem-solving techniques in mathematics, the uses and role of mathematics in our society, and the structure of our familiar number systems. Additional topics are chosen from number theory, ancient numeration systems, computer sciences, modern geometry and algebra and elementary logic. Prereq., one year of high school algebra and one year of plane geometry. The combination MATH 1110 and 1120 is approved for arts and sciences core curriculum: quantitative reasoning and mathematical skills.

[College of Arts & Sciences](#) | [Mathematics](#)

PHYS-1110 (4) General Physics 1

Three lect., one rec. per week, plus three evening exams in the semester. First semester of three-semester sequence for science and engineering students. Covers kinematics, dynamics, momentum of particles and rigid bodies, work and energy, gravitation, simple harmonic motion, and introduction to thermodynamics. Coreq., APPM 1350 or MATH 1300. Credit not granted for this course and PHYS 1170. Approved for GT-SC2. Approved for arts and sciences core curriculum: natural science.

[College of Arts & Sciences](#) | [Physics](#)

CHEM-1113 (4) General Chemistry 1

Lect., rec. Intended for first-semester students whose academic plans require advanced work in chemistry. Subjects: components of matter, stoichiometry, classes of reactions, gases, thermochemistry, atomic structure, electron configuration, chemical bonding, molecular shapes, covalent bonding, organic compounds, intermolecular forces, equilibrium. Prereqs., one year high school chemistry or CHEM 1021 (min grade C-); high school math through pre-calculus. Not recommended for students with grades below B- in CHEM 1021. Coreq., CHEM 1114. Not open to engineering students with exception of EPEN majors. Credit not granted for this course and CHEM 1111, 1251, 1351, or CHEM 1221/CHEM 1211. Approved for arts and sciences core curriculum: natural science. Prerequisites: AMEN, AREN, ASEN, CHEN, CSEN, CVEN, ECEN, EEEN, EVEN, MCEN, OPEN or CBEN majors are not allowed to take this class.

[College of Arts & Sciences](#) | [Chemistry](#)

HIST-1113 (3) Introduction to British History to 1660

Deals with Roman, medieval, and early modern periods. Covers the demographic, economic, and social patterns, political and religious developments, and cultural changes that contributed to the formation of the English nation. Formerly HIST 2103. Approved for arts and sciences core curriculum: historical context.

College of Arts & Sciences | History | Europe: Specific Countries

CHEM-1114 (1) Laboratory in General Chemistry 1

Lab. Intended for first-semester students whose academic plans require advanced work in chemistry. Instruction in experimental techniques which coordinate with lecture topics in CHEM 1113. Prereqs., one year high school chemistry or CHEM 1021 (min grade C-); high school math through pre-calculus. Not recommended for students with grades below B- in CHEM 1021. Coreq., CHEM 1113. Not open to engineering students with exception of EPEN majors. Credit not granted for this course and CHEM 1111, 1251, 1351, or CHEM 1221/CHEM 1211. Approved for arts and sciences core curriculum: natural science. Prerequisites: AMEN, AREN, ASEN, CHEN, CSEN, CVEN, ECEN, EEEN, EVEN, MCEN, OPEN or CBEN majors are not allowed to take this class.

College of Arts & Sciences | Chemistry

ANTH-1115 (3) The Caribbean in Post-Colonial Perspective

Introduces the student to the varied peoples and cultures in the Caribbean region, emphasizing the historical, colonial, and contemporary political-economic contexts of their social structure and cultural patterns. Approved for arts and sciences core curriculum: human diversity.

College of Arts & Sciences | Anthropology

CLAS-1115 (3) Masterpieces of Greek Literature in Translation

Students read about mythological heroes and historical individuals from Achilles to Socrates in Greek literature. Class discusses why the Greeks told stories the way they did and what those stories might have meant to them and might mean to us. Approved for arts and sciences core curriculum: literature and the arts.

College of Arts & Sciences | Classics | Honors

THTR-1115 (3) Costume Technologies

Introduces technical production elements and procedures including materials, organizations, methods and equipment to realize theatrical costuming and make-up. Credit not granted for this course and THTR 1065 or 1075. Prerequisites: Restricted to students with 0-56 credits (Freshmen or Sophomore) only.

College of Arts & Sciences | Theater & Dance | Theatre Design and Technology

ANTH-1120 (3) Exploring a Non-Western Culture: Hopi and Navajo

Explores two American Indian cultures, Hopi and Navajo, and cultural interrelationships from the prehistoric through the contemporary period, using an integrated, holistic, and humanistic viewpoint. Same as ETHN 1123. Approved for arts and sciences core curriculum: human diversity.

College of Arts & Sciences | Anthropology

CLAS-1120 (3) Muses and Man-Eaters (2): The Literature of Ancient Rome

Surveys ideas and culture of the Romans through a study of representative literature: comedy, tragedy, history, philosophy, oratory, the novel, lyric, epic, and didactic poetry. No Greek or Latin required. Approved for GT-AH2. Approved for arts and sciences core curriculum: literature and the arts.

College of Arts & Sciences | Classics | Literature, Culture, & Thought

DNCE-1120 (1) Beginning Ballet with Experience

Extension of beginning ballet, when basic concepts of ballet have been mastered. Enchainements are of greater complication and variety. Dance vocabulary is more extensive. Pirouettes and more complex musical phrases are expected. May be repeated up to 2 total credit hours. Prereq., DNCE 1100.

College of Arts & Sciences | Theater & Dance | Nonmajor Technique

MATH-1120 (3) The Spirit and Uses of Mathematics 2

Continuation of MATH 1110. Prereq., one year of high school algebra and one year of plane geometry. The combination MATH 1110 and 1120 is approved for arts and sciences core curriculum: quantitative reasoning and mathematical skills.

College of Arts & Sciences | Mathematics

PHYS-1120 (4) General Physics 2

Three lect., one rec. per week, plus three evening exams in the semester. Second semester of three-semester introductory sequence for science and engineering students. Covers electricity and magnetism, wave motion, and optics. Normally is taken concurrently with PHYS 1140. Prereq., PHYS 1110 (min grade C-). Coreq., MATH 2300 or APPM 1360. Credit not granted for this course and PHYS 1180. Approved for GT-SC1. Approved for arts and sciences core curriculum: natural science.

College of Arts & Sciences | Physics

ETHN-1123 (3) Exploring a Non-Western Culture: Hopi and Navajo

Explores two American Indian cultures, Hopi and Navajo, and cultural interrelationships from the prehistoric through the contemporary period, using an integrated, holistic, and humanistic viewpoint. Same as ANTH 1120. Formerly AIST 1125. Approved for arts and sciences core curriculum: human diversity.

College of Arts & Sciences | Anthropology

College of Arts & Sciences | Ethnic Studies | American Indian Studies

HIST-1123 (3) Introduction to British History Since 1660

Deals with the period from the 17th century to the present. Political, economic, social, and imperial developments that contributed to creation of the modern industrial and democratic state are the major issues covered. Formerly HIST 2123. Approved for arts and sciences core curriculum: historical context.

College of Arts & Sciences | History | Europe: Specific Countries

ESLG-1130 (2) Accent Reduction for Foreign Students

Provides oral activities with authentic English materials to reduce accents and to increase intelligibility for U.S. academic situations. Evaluates individual problem areas and includes one-on-one meetings with the native-speaker instructor. Improves overall articulation and fluency. Does not fulfill humanities or major requirements.

College of Arts & Sciences | Linguistics

MATH-1130 (3) Mathematics from the Visual Arts

Introduces mathematical concepts through the study of visual arts. Credit not granted for this course and QRMS 1130. Approved for arts and sciences core curriculum: quantitative reasoning and mathematical skills.

College of Arts & Sciences | Mathematics

CHEM-1133 (4) General Chemistry 2

Lect., rec. Intended for second-semester students whose academic plans require advanced work in chemistry. Subjects: acid-base equilibria, buffers and titrations, thermodynamics, redox reactions, electrochemistry, transition elements and their coordination compounds, solubility/solubility equilibria, crystal field theory, kinetics, nuclear chemistry. Prereq., CHEM 1113/1114 or equivalent (min grade C-). Coreq., CHEM 1134. Credit not granted for this course and CHEM 1131, 1271 or 1371. Approved for arts and sciences core curriculum: natural science. Prerequisites: Requires pre-requisite courses of CHEM 1111 or CHEM 1113/1114 or CHEM 1251 or CHEM 1351 or CHEN 1211/CHEM1221.

College of Arts & Sciences | Chemistry

CHEM-1134 (1) Laboratory in General Chemistry 2

Lab. Intended for second-semester students whose academic plans require advanced work in chemistry. Instruction in experimental techniques which coordinate with lecture topics in CHEM 1133. Prereq., CHEM 1113/1114 or equivalent (min grade C-). Coreq., CHEM 1133. Credit not granted for this course and CHEM 1131, 1271, or 1371. Approved for arts and sciences core curriculum: natural science. Prerequisites: Requires pre-requisite courses of CHEM 1111 or CHEM 1113/1114 or CHEM 1251 or CHEM 1351 or CHEN 1211/CHEM1221.

College of Arts & Sciences | Chemistry

ANTH-1135 (3) Exploring a Non-Western Culture: TBA

Examines the geography, kinship, politics and religious values of a particular non-Western people in historical and contemporary context through an anthropological perspective. Approved for arts and sciences core curriculum: human diversity.

College of Arts & Sciences | Anthropology

ANTH-1140 (3) Exploring a Non-Western Culture: The Maya

Explores the culture of the Maya of Central America, emphasizing their material adaptations, social organizations, ideals and values, and artistic achievements in the past and the present. Approved for arts and sciences core curriculum: human diversity.

College of Arts & Sciences | Anthropology

CLAS-1140 (3) Bread and Circuses: Society and Culture in the Roman World

Surveys the outstanding achievements of Roman culture and society as reflected in literature; philosophy and art; private and official religion; and legal and political thought. No Greek or Latin required. Approved for GT-AH2. Approved for arts and sciences core curriculum: historical context.

College of Arts & Sciences | Classics | Literature, Culture, & Thought

ESLG-1140 (2) Presentation Skills for International Students

Provides instruction and practice to improve classroom oral communication skills necessary for effective participation in the U.S. academic setting, either as an international TA or RA, graduate or undergraduate student. Evaluates individual problem areas and includes digital audio and video recording with extensive feedback from the native-speaker instructor. Improves oral competence and listening comprehension in English for international students. Recommended prereq., ESLG 1130.

College of Arts & Sciences | Linguistics

PHYS-1140 (1) Experimental Physics 1

Introduction to experimental physics through laboratory observations of a wide range of phenomena. Course covers experiments on physical measurements, linear and rotational mechanics, harmonic motion, wave motion, sound and heat, electricity and magnetism, optics, and electromagnetic waves with the mathematical analysis of physical errors associated with the experimental process. One lect., one 2-hour lab per week. Prereq., PHYS 1110; prereq. coreq., PHYS 1120. Approved for GT-SC1. Approved for arts and science core curriculum: natural science.

College of Arts & Sciences | Physics

ANTH-1145 (3) Exploring a Non-Western Culture: The Aztecs

Explores the culture of the Aztec people of Central Mexico: their subsistence, society, religion, and achievements, as well as the impact of the Aztec empire in Mesoamerica. Also reviews the

clash of a non-western society with the western world with the arrival of the Spanish conquistadors. Approved for arts and sciences core curriculum: human diversity.

[ANTH-1150 \(3\) Exploring a Non-Western Culture: Regional Cultures of Africa](#)

Explores a small number of cultures in a specific sub-region of Africa from an integrated holistic viewpoint, emphasizing material adaptations, social patterns, ideas and values, and aesthetic achievements. Approved for arts and sciences core curriculum: human diversity.

[College of Arts & Sciences](#) | [Anthropology](#)

[ARSC-1150 \(3\) Writing in Arts and Sciences](#)

Emphasizes the development of effective writing skills with instruction provided in expository and analytical writing. Reviews basic elements of grammar, syntax, and composition as needed. May be repeated up to 6 total credit hours. Approved for GT-CO2. Meets MAPS requirement for English. Approved for arts and sciences core curriculum: written communication.

[College of Arts & Sciences](#) | [Arts & Sciences Admin](#) | [Writing](#)

[MATH-1150 \(4\) Precalculus Mathematics](#)

Develops techniques and concepts prerequisite to calculus through the study of trigonometric, exponential, logarithmic, polynomial, and other functions. Prereq., one and a half years of high school algebra. Students having credit for college algebra and trigonometry may not receive additional credit for MATH 1150. Students with credit for college algebra receive only 2 additional hours of credit for MATH 1150. Similar to MATH 1000, 1010, 1020, 1011, 1021, 1030, and 1040. Approved for GT-MA1. Meets MAPS requirement for mathematics. Approved for arts and sciences core curriculum: quantitative reasoning and mathematical skills.

[College of Arts & Sciences](#) | [Mathematics](#)

MCDB-1150 (3) Introduction to Cellular and Molecular Biology

Covers biologically important macromolecules and biological processes, together with an introduction to cell structure, function, and physiology. Provides the foundation for advanced MCDB courses to majors, and a rigorous overview of modern biology to nonmajors. MCDB 1151 must be taken concurrently by MCDB and biochemistry majors and prehealth science students. Prereq., high school chemistry and algebra. Coreq., MCDB 1151 for majors. Credit not granted for this course and MCDB 1111. Approved for GT-SC1. Meets MAPS requirement for natural sciences: lab. Approved for arts and science core curriculum: natural science.

College of Arts & Sciences | Molecular, Cellular, & Development Biology

PHYS-1150 (1) Experimental Physics 2

For students in Physics Plan 3 teaching track only. Students complete another full set of PHYS 1140 experiments (seven different labs from those previously completed). Registration by special arrangements with the Department of Physics. Prereqs., PHYS 1110 and 1120. Same as PHYS 1140.

College of Arts & Sciences | Physics

SPAN-1150 (5) Intensive First Year Spanish

An intensive beginning course covering the same material as Span 1010 and 1020. Attendance at the language laboratory may be mandatory. Similar to Span 1010 and 1020.

College of Arts & Sciences | Spanish | Spanish

WRTG-1150 (3) First-Year Writing and Rhetoric

Rhetorically informed introduction to college writing. Focuses on critical analysis, argument, inquiry, and information literacy. Taught as a writing workshop, the course places a premium on invention, drafting, and thoughtful revision. For placement criteria, see the arts and sciences advising office. May be repeated up to 6 total credit hours. Approved for GT-CO1 and GT-CO2. Meets MAPS requirement for English. Approved for arts and sciences core curriculum: written communication.

College of Arts & Sciences | Program for Writing & Rhetoric

MCDB-1151 (1) Introduction to Cell and Molecular Biology Lab

Offers one two-hour lab per week designed to acquaint students with research techniques and concepts in molecular and cellular biology. Topics include cell structure, function, physiology, and recombinant DNA. MCDB 1150 must be taken concurrently. Credit not granted for this course and MCDB 1111. Approved for GT-SC1. Meets MAPS requirement for natural sciences: lab. Approved for arts and sciences core curriculum: natural science.

College of Arts & Sciences | Molecular, Cellular, & Development Biology

MCDB-1152 (1) Problem Solving Co-Seminar for Introduction to Molecular and Cellular Biology

Uses problem solving and other interactive group work to aid student learning in co-requisite course MCDB 1150. Students will work in small groups on learning and practicing how to solve difficult conceptual problems, as well as using hands-on activities and concept mapping to help learn content. Coreq., MCDB 1150.

College of Arts & Sciences | Molecular, Cellular, & Development Biology

ANTH-1160 (3) The Ancient Egyptian Civilization

Emphasizes the origin of the Egyptian culture, its importance, and its impact on other cultures. In addition, the different points of view of various scholars are discussed with a comparative study of the ancient Egyptian culture and modern culture of Egypt and the Middle East. Approved for arts and sciences core curriculum: human diversity.

College of Arts & Sciences | Anthropology

MCDB-1161 (2) From Dirt to DNA: Phage Genomics Laboratory I

Provides laboratory experience working on a bacteriophage genomics research project. Students will study novel bacteriophage they isolate from the environment. Topics covered include phage biology, bacteria and phage culturing and amplification, DNA isolation, restriction digest analysis, agarose gel electrophoresis, and electron microscopy. Coreq., MCDB 1150 or successful completion of 2 semesters of General Biology AP credit.

College of Arts & Sciences | Molecular, Cellular, & Development Biology

ANTH-1170 (3) Exploring Culture and Gender through Film

Uses films and written texts to explore the concepts of culture and gender, as well as ethnicity and race. By looking at gender, ethnicity, and race cross-culturally, students will know how these concepts are constructed in their own society, as well as in others. Approved for arts and sciences core curriculum: human diversity.

College of Arts & Sciences | Anthropology

ARTS-1171 (3) Photography for Non-Majors

Introduces techniques and concepts of photography as art. Emphasizes photography as a means to formal and expressive ends. Students must have an adjustable camera. Credit not granted for this course and ARTS 2171.

College of Arts & Sciences | Art & Art History | Photography

ANTH-1180 (3) Maritime People: Fishers and Seafarers

Explores important milestones in the development of human societies and cultures that live from the sea. Emphasizes the evolution of maritime adaptations associated with fishing and seafaring from more than 10,000 years ago through the present. Approved for arts and sciences core curriculum: historical context.

College of Arts & Sciences | Anthropology

ANTH-1190 (3) Origins of Ancient Civilizations

Examines origins of the world's first civilizations in Mesopotamia, Egypt, the Indus Valley, Mesoamerica, and the Andes. Covers archaeology of ancient cities, trade, economy, politics, warfare, religion, and ideology. Seeks insights into general processes of cultural evolution. Approved for arts and sciences core curriculum: historical context.

College of Arts & Sciences | Anthropology

DNCE-1190 (1) Ballet 1

Beginning ballet covering the basic vocabulary of classical ballet technique. Offered summers only at Perry-Mansfield Performing Arts Camp. May be repeated up to 2 total credit hours.

College of Arts & Sciences | Theater & Dance | Nonmajor Technique

ENGL-1191 (3) Introduction to Creative Writing

Introduces techniques of fiction and poetry. Student work is scrutinized by the instructor and may be discussed in a workshop atmosphere with other students. May not be taken concurrently with ENGL 2021 or 2051. May not be repeated. Not open to graduate students.

College of Arts & Sciences | English | Undergraduate Writing

ANTH-1200 (3) Culture and Power

Compares contemporary sociopolitical systems across cultures, from non-Western tribal groups to modern states. Introduces students to anthropological approaches for understanding and analyzing political forces, processes, and institutions that affect cultures such as colonialism, warfare, violence, ethnicity, migration, and globalization. Approved for arts and sciences core curriculum: contemporary societies.

College of Arts & Sciences | Anthropology

ARSC-1200 (1-3) Topics in Arts and Sciences

College of Arts & Sciences | Arts & Sciences Admin | Special Curricula

ASTR-1200 (3) Stars and Galaxies

Examines principles of modern astronomy for nonscience majors, summarizing our present knowledge about the Sun, stars, neutron stars, black holes, interstellar gas, galaxies, quasars, and the structure and origins of the universe. Offers opportunities to attend nighttime observation sessions at Sommers-Bausch Observatory. Formerly ASTR 1120. Similar to ASTR 1020, without

sequence link to ASTR 1010 or recitation. Also similar to ASTR 1040. Students may receive credit for only one of ASTR 1200, 1120, 1020, or 1040. Approved for arts and sciences core curriculum: natural science.

College of Arts & Sciences | Astrophysical & Planetary Sciences

DNCE-1200 (1) Beginning Jazz Dance

Introduces various styles of movement unique to jazz dance. Students learn fundamental technical dance skills as well as specific jazz vocabulary. Designed for students with little or no dance experience. May be repeated up to 2 total credit hours.

College of Arts & Sciences | Theater & Dance | Nonmajor Technique

FREN-1200 (3) Medieval Epic and Romance

Covers the most important works of medieval literature, in English translation. Among the texts studied are the Nibelungenlied, the Song of Roland, and Arthurian romances, including the stories of Lancelot and Guinevere and Tristan and Isolde. Offers a general introduction for nonmajors to medieval literature and society. Taught in English. Approved for arts and sciences core curriculum: literature and the arts.

College of Arts & Sciences | French & Italian | French

PHIL-1200 (3) Philosophy and Society

Introduces philosophical thought through critical analysis of our own society, its institutions, and principles. Approved for GT-AH3. Meets MAPS requirement for social science: general. Approved for arts and sciences core curriculum: United States context or ideals and values.

College of Arts & Sciences | Philosophy

ARTS-1202 (3) Beginning Painting 1

The aim of this course is to develop the basic skills, techniques and processes of painting with an understanding of basic colour principles. This integration of paint application and colour principle will develop awareness that painting and colour are used, not only as mediums for representation, but also as mediums for expressive purposes. Demonstrations, lectures, group and individual critiques will be given throughout the course. Prereqs., ARTS 1010, 1020, and 1030.

College of Arts & Sciences | Art & Art History | Painting/Drawing

SCAN-1202 (3) Tolkien's Nordic Sources and the Lord of the Rings

Examines the Nordic aspect of J.R.R. Tolkien's work, especially The Lord of the Rings. The course concentrates on the Nordic saga tradition, mythology, folklore and fairy tales Tolkien used as his sources. Students will explore the transformations of these sources from prehistoric times to contemporary cinematic adaptations, while paying special attention to cultural appropriations, national revisions, and political alterations. Taught in English. Approved for arts and sciences core curriculum: literature and the arts.

College of Arts & Sciences | Germanic & Slavic Languages & Literature | Nordic Study Course English

ASEN-1000 (1) Introduction to Aerospace Engineering Sciences

Introduces aerospace history, curriculum, ethics, and the many areas of emphasis within aerospace engineering. Academic and industry speakers are invited to address various aerospace topics. Prerequisites: Restricted to students with 0-26 credits (Freshmen) Aerospace Engineering (ASEN) or Engineering Open Option majors only.

[College of Engineering & Applied Science](#) | [Aerospace Engineering](#) | [Aerospace Design & System Engr](#)

ASEN-1400 (3) Gateway to Space

Introduces the basics of atmosphere and space sciences, space exploration, spacecraft design, rocketry, and orbits. Students design, build, and launch a miniature satellite on a high altitude balloon. Explores the current research in space through lectures from industry. Formerly ASEN 2500. Same as ASTR 2500. Prerequisites: Restricted to students with 0-26 (Freshmen) College of Engineering majors only.

[College of Engineering & Applied Science](#) | [Aerospace Engineering](#) | [Aerospace Design & System Engr](#)

ASEN-2001 (4) Aerospace 1: Introduction to Statics, Structures, and Materials

Introduces models and analytical/numerical methods for statics and structural analysis. Topics include force/moment equilibrium, truss analysis, beam theory, stress/strain, failure criteria, and structural design. Matlab proficiency required. Prereqs., APPM 1360, GEEN 1300 or CSCI 1300 or ECEN 1030 and PHYS 1110 (min. grade C). Coreq., ASEN 2002, 2012 or APPM 2350. Offered fall only. Prerequisites: Restricted to Aerospace Engineering (ASEN) majors only.

[College of Engineering & Applied Science](#) | [Aerospace Engineering](#) | [Structures, Mat. & Struc Dynam](#)

ASEN-2002 (4) Aerospace 2: Introduction to Thermodynamics and Aerodynamics

Introduces the fundamental principals and concepts of thermodynamics and fluid dynamic systems. Emphasizes the synthesis of basic science (physics), mathematics, and experimental methods that form the basis for quantitative and qualitative analyses of general aerospace technology systems. Proficiency in Matlab required. Prereqs., APPM 1360, GEEN 1300, CSCI 1300, or ECEN 1030 and PHYS 1110 (min. grade C). Coreqs., ASEN 2001, 2012 and APPM 2350. Offered fall only. Prerequisites: Restricted to Aerospace Engineering (ASEN) majors only.

College of Engineering & Applied Science | Aerospace Engineering | Aerodynamics & Fluid Mechanics

ASEN-2003 (5) Aerospace 3: Introduction to Dynamics and Systems

Introduces the principles of particle and planar rigid body dynamics, systems, and controls. Topics include kinematics, kinetics, momentum and energy methods, system modeling, and simple feedback control. Class includes experimental and design laboratory exercises for aerospace applications of dynamic principles. Offered spring only. Prerequisites: Requires pre-requisite courses of ASEN 2001, ASEN 2012 and APPM 2350 (all min grade C). Requires co-requisite courses of APPM 2360 and ASEN 2004. Restricted to Aerospace Engineering (ASEN) majors only.

College of Engineering & Applied Science | Aerospace Engineering | Systems and Control

ASEN-2004 (5) Aerospace 4: Aerospace Vehicle Design and Performance

Introduction to design and analysis of aircraft and spacecraft. Aircraft topics include cruise performance, wing design, propulsion, stability, control, and structures. Spacecraft topics include rocket staging, orbit selection, launch systems, and spacecraft subsystems. Includes laboratory experiments and team design exercises. Offered spring only. Prerequisites: Requires pre-requisite courses of ASEN 2001, 2002, 2012 and APPM 2350 (all min grade C). Requires co-requisite courses of APPM 2360 and ASEN 2003. Restricted to Aerospace Engineering (ASEN) majors only.

College of Engineering & Applied Science | Aerospace Engineering | Aerospace Design & System Engr

ASEN-2012 (2) Experimental and Computational Methods in Aerospace Engineering Sciences

Introduces statistical, experimental, and computational methods used in aerospace engineering sciences. Usage of MatLab is extensive. Coreq., ASEN 2001 and 2002. Prereq., GEEN 1300 or CSCI 1300 or ECEN 1030 (min. grade C). Prerequisites: Restricted to Aerospace Engineering (ASEN) majors only.

College of Engineering & Applied Science | Aerospace Engineering | Aerospace Design & System Engr

ASEN-2519 (1-6) Special Topics

Studies specialized aspects of the aerospace engineering sciences or innovative treatment of required subject matter at the lower-division level. Course content is indicated in the online SchedulePlanner. Prereq., varies. Restricted to Engineering students.

College of Engineering & Applied Science | Aerospace Engineering | Specialized Courses

ASEN-2849 (1-3) Independent Study

Study of special projects agreed upon by student and instructor. May be repeated up to 9 total credit hours. Prereq., instructor consent.

College of Engineering & Applied Science | Aerospace Engineering | Specialized Courses

ASEN-3036 (3) Introduction to Human Spaceflight

Introduces students to the challenges of human space flight. Historical and current space programs and spacecraft are discussed with emphasis on those systems specific to sustaining human crews. Other topics include space environment with respect to sustaining human life and health, physiological and psychological concerns in a space habitat, astronaut selection and training, anomalies, mission operations motivation, costs rationale for human space exploration, and future program directions. Not accepted as a Professional Area Elective for ASEN majors. Approved for upper-division Humanities and Social Science elective for engineering students.

College of Engineering & Applied Science | Aerospace Engineering | Bioastronautics & Microgravity

ASEN-3046 (3) Introduction to Humans in Aviation

Investigates the history of manned aviation accomplished through a review of the history of flight, the physiological and psychological limitations facing aviators, and investigates the human related causal factors in aviation accidents. The course also looks at the social and economic impacts of aviation in modern society. Not accepted as a Professional Area Elective for ASEN majors. Approved for upper-division Humanities and Social Science elective for engineering students.

College of Engineering & Applied Science | Aerospace Engineering | Bioastronautics & Microgravity

ASEN-3111 (4) Aerodynamics

Develops the fundamental concepts of aerodynamics and provides a working knowledge for their application to the design of aircraft and launch vehicles operating at various speeds and altitudes, as well as the atmospheric forces on satellites. Prereqs., APPM 2350, ASEN 2002 and 2004 (min. grade C). Restricted to ASEN majors. Offered fall only. Prerequisites: Restricted to Aerospace Engineering (ASEN) majors only.

College of Engineering & Applied Science | Aerospace Engineering | Aerodynamics & Fluid Mechanics

ASEN-3112 (4) Structures

Teaches Mechanics of Materials methods of stress and deformation analysis applicable to the design and verification of aircraft and space structures. It offers an introduction to matrix and finite element methods for truss structures, and to mechanical vibrations. Prereq., ASEN 2001, 2003, 2004, and APPM 2360 (min. grade C). Restricted to ASEN majors. Offered fall only. Prerequisites: Restricted to Aerospace Engineering (ASEN) majors only.

College of Engineering & Applied Science | Aerospace Engineering | Structures, Mat, & Struc Dynam

ASEN-3113 (4) Thermodynamics and Heat Transfer

Focuses on the applications of the first and second laws of thermodynamics to control volumes and teaches the fundamental concepts of different modes of energy and heat transfer. Learn to use these concepts in gas dynamics, high-speed vehicle spacecraft design, environmental systems, and energy analysis. Offered fall only. Prerequisites: Requires pre-requisite courses of ASEN 2002 and APPM 2350 (all min grade C). Restricted to Aerospace Engineering (ASEN) majors only.

College of Engineering & Applied Science | Aerospace Engineering | Thermodynamics and Propulsion

ASEN-3116 (3) Introduction to Biomedical Engineering

Addresses human responses to environment and physical stimuli. Makes use of engineering and physical principles in the study of human dynamics, arriving at reasonable solutions to 15 major areas of biomedical consent. Prereq., instructor consent.

College of Engineering & Applied Science | Aerospace Engineering | Bioastronautics & Microgravity

ASEN-3128 (4) Aircraft Dynamics

Develops the fundamental concepts of aircraft dynamics. Covers flight mechanics, performance, dynamics and control of aircraft, and how they impact aircraft design. Prereqs., ASEN 2002, 2003, 2004, and APPM 2360 (min. grade C). Restricted to ASEN majors. Offered spring only. Prerequisites: Requires pre-requisite courses of ASEN 2002, 2003, 2004 & APPM 2360 (all min grade C). Restricted to Aerospace Engineering (ASEN) majors only.

College of Engineering & Applied Science | Aerospace Engineering | Aerospace Design & System Engr

ASEN-3200 (4) Orbital Mechanics/Attitude Dynamics and Control

Presents the fundamentals of orbital mechanics, 3D rigid body dynamics, and satellite attitude dynamics and controls. Prereqs., ASEN 2003, 2004, and APPM 2360 (min. grade C). Restricted to ASEN majors. Offered spring only. Prerequisites: Requires pre-requisite courses of ASEN 2003, ASEN 2004, & APPM 2360 (all min grade C). Restricted to Aerospace Engineering (ASEN) majors only.

College of Engineering & Applied Science | Aerospace Engineering | Astrodynamics & Orbital Mech

ASEN-3300 (4) Aerospace Electronics and Communications

Provides the fundamentals of electronics and communications widely used in aerospace engineering. Includes analog instrumentation electronics, data acquisition, digital electronics, and radio communication. Offered spring only. Prerequisites: Requires pre-requisite courses of ASEN 2003, PHYS 1120 and APPM 2360 (all min grade C). Restricted to Aerospace Engineering (ASEN) majors only.

College of Engineering & Applied Science | Aerospace Engineering | Systems and Control

ASEN-3519 (1-4) Special Topics

Studies specialized aspects of the aerospace engineering sciences or innovative treatment of required subject matter at the upper-division level. Course content is indicated in the online SchedulePlanner. Prereq., varies. Prerequisites: Restricted to College of Engineering majors only.

College of Engineering & Applied Science | Aerospace Engineering | Specialized Courses

ASEN-3930 (6) Aerospace Engineering Cooperative Education

Students will participate in a previously arranged, department-sponsored cooperative education program with a government agency or industry. Recommended GPA above 3.0. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) Aerospace Engineering majors only.

College of Engineering & Applied Science | Aerospace Engineering | Specialized Courses

ASEN-4010 (3) Introduction to Space Dynamics

Includes central force fields, satellite orbits, rocket dynamics, orbital transfer, interplanetary mission analysis, and perturbation due to atmospheric drag and Earth oblateness. Prereq., ASEN 3200 or equivalent, or instructor consent required. Prerequisites: Requires pre-requisite course of ASEN 3200. Restricted to Aerospace Engineering (ASEN) majors only.

College of Engineering & Applied Science | Aerospace Engineering | Astrodynamics & Orbital Mech

ASEN-4012 (3) Aerospace Materials

Studies aerospace grade aluminum, magnesium, nickel, and titanium alloys. Covers heat treatment, defect structures, failure mechanisms, corrosion and its prevention, the effect of space radiation on materials, and high and low temperature effects. Introduces composite materials with a lab design and experiment. Emphasizes the selection of materials in design with procedures for choosing materials rationally. Case studies include aerogels, carbides, composites, powder metallurgy, nanomaterials, and advanced materials manufacturing technologies. Prerequisites: Requires pre-requisite course of ASEN 2001 (min grade C). Restricted to Aerospace Engineering (ASEN) majors only.

College of Engineering & Applied Science | Aerospace Engineering | Structures, Mat. & Struc Dynam

ASEN-4013 (3) Foundations of Propulsion

Describes aerothermodynamics and design of both rocket and air-breathing engines. Includes ramjets, turbojets, turbofans, and turboprop engines, as well as liquid, solid, and hybrid rockets. Prerequisites: Requires pre-requisite courses of ASEN 3113 and APPM 2360 (all min grade C). Restricted to Aerospace Engineering (ASEN) majors only.

College of Engineering & Applied Science | Aerospace Engineering | Thermodynamics and Propulsion

ASEN-4018 (4) Senior Projects 1: Design Synthesis

Focuses on the synthesis of technical knowledge, project management, design process, leadership, and communications within a team environment. Students progress through the design process beginning with requirements development, then preliminary design and culminating with critical design. Offered fall only. Prerequisites: Requires pre-requisite courses of ASEN, 3111, 3112, 3113, 3128, 3200, and 3300 (all min grade C). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Aerospace Engineering (ASEN) majors only.

College of Engineering & Applied Science | Aerospace Engineering | Aerospace Design & System Engr

ASEN-4028 (4) Senior Projects 2: Design Practicum

Focuses on the fabrication, integration, verification and validation of designs produced in ASEN 4018. Students work within the same teams from ASEN 4018. Instructor consent required. Offered spring only. Prerequisites: Requires pre-requisite course of ASEN 4018 (min grade C). Restricted to Aerospace Engineering (ASEN) majors only.

ASEN-4128 (3) Human Factors in Engineering and Design

Introduces the field of human factors engineering and investigates human psychological, physiological and performance limitations in complex systems and why it is vital for engineers to understand human operational limitations when designing complex systems. Course includes studies of real accidents caused by human error, good and bad designs, latent conditions and accident-producing designs. Goal is an understanding of how to conduct engineering design with consideration of human factors. Prerequisites: Restricted to students with 57-180 credits (Juniors or Seniors).

| | | |
|--|-----------------------|--------------------------------|
| College of Engineering & Applied Science | Aerospace Engineering | Aerospace Design & System Engr |
|--|-----------------------|--------------------------------|

ASEN-4138 (3) Aircraft Design

Two lectures and one lab per week. Examines principles of aircraft configuration and design to meet given performance specifications, taking into account aerodynamic, stability and control, and flying quality considerations, as well as airworthiness regulations. Includes preliminary design of the major elements of an aircraft. Prereq., ASEN 3128. Restricted to ASEN majors. Prerequisites: Requires pre-requisite course of ASEN 3128. Restricted to Aerospace Engineering (ASEN) majors only.

| | | |
|--|-----------------------|--------------------------------|
| College of Engineering & Applied Science | Aerospace Engineering | Aerospace Design & System Engr |
|--|-----------------------|--------------------------------|

ASEN-4218 (3) Large Space Structures Design

Develops the necessary structural analysis skills for conducting conceptual and preliminary designs of large space structures with a practical emphasis on structures considered by NASA over the past 20 years. Applies analysis skills to a broad range of space missions requiring large space structures, emphasizing low cost and practical design. Prereq., senior standing in ASEN or MCEN, or instructor consent. Same as ASEN 5218.

College of Engineering & Applied Science | Aerospace Engineering | Aerospace Design & System Engr

ASEN-4238 (3) Computer-Aided Control Systems Design

Covers Matlab and Simulink software, and multivariable control system synthesis and analysis techniques for typical aerospace control problems. Students formulate control problems and synthesize control functions using lineage quadratic techniques. Includes numerical integration of differential equations and nonlinear simulation of orbit and attitude dynamics. Prereq., APPM 2360.

College of Engineering & Applied Science | Aerospace Engineering | Aerospace Design & System Engr

ASEN-4248 (3) Computer-Aided Control System Design 2

Studies theory and engineering applications of Kalman filter techniques. Covers discrete and continuous filters, the extended Kalman filter, and their application to guidance, navigation, and control, including satellite orbit and attitude problems, inertial and control navigation, and the Global Positioning System. Prerequisites: Requires pre-requisite course of ASEN 4238.

College of Engineering & Applied Science | Aerospace Engineering | Aerospace Design & System Engr

ASEN-5018 (3) Graduate Projects I

Exposes MS and PhD students to project management and systems engineering disciplines while working a complex aerospace engineering project as part of a project team. The project team may perform some or all of the following project activities during this first semester of the two-semester course sequence: requirements, definition, design and design review, build, test, and verification. Recommended prereqs., ASEN 4138, or 5148, or 5158.

College of Engineering & Applied Science | Aerospace Engineering | Aerospace Design & System Engr

ASEN-5034 (3) Stochastic Methods for Systems Engineering

Same as ASEN 4034. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Aerospace Engineering | Aerospace Design & System Engr

ASEN-5148 (3) Spacecraft Design

Integrates the design elements and fundamental analyses necessary to complete the conceptual (Phase A) design of an unmanned spacecraft. Lecture and discussion explore mission design, propulsion, power, structure, thermal, attitude control, communication, command, and data handling and attitude control systems. The role of project management and systems engineering are examined. Resource estimating and lessons learned in satellite programs are reviewed. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Aerospace Engineering | Aerospace Design & System Engr

ASEN-5158 (3) Space Habitat Design

Utilizes systems engineering methods for designing a spacecraft intended for human occupancy and provides a working knowledge of the technologies used to sustain life. Emphasis is placed on deriving functional requirements from stated mission objectives, developing integrated vehicle schematics, and comparing design options by trade study. Prereq., graduate standing in engineering or senior with 3.25 GPA. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Aerospace Engineering | Aerospace Design & System Engr

ASEN-5168 (3) Remote Sensing Instrumentation Design

Reviews and makes a detailed analysis of satellite instrumentation techniques and systems to understand the components, limitations, and overall capabilities. Emphasis on optical systems with in-depth treatment of conventional radiometry. Introduces both passive and microwave methods. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Aerospace Engineering | Aerospace Design & System Engr

ASEN-5188 (3) Space Systems Engineering

Develop an understanding and appreciation for the fundamentals and pragmatic principles of systems engineering and their application to space missions. This course establishes a working knowledge of the primary techniques systems engineers use to guide the development of complex systems, including: requirements development, system synthesis, good design practices, system optimization, exception handling, interface management and trade studies. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Aerospace Engineering | Aerospace Design & System Engr

ASEN-5218 (3) Large Space Structures Design

Same as ASEN 4218. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Aerospace Engineering | Aerospace Design & System Engr

ASEN-6028 (3) Graduate Projects II

Exposes MS and PhD students to leadership positions in project management and systems engineering while working a complex aerospace engineering project as part of a project team. The project team may perform some or all of the following project activities during this second semester of the two-semester course sequence: requirements definition, design and design review, build, test, and verification. Prereq., ASEN 5018. Recommended prereq., ASEN 4138, or 5148, or 5158. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

CHEN-1000 (3) Creative Technology

Lect. Introduces undergraduate arts and sciences students to the most recent concepts in technology and how these concepts impact all aspects of life, such as health, the health of the planet, and social structures. Engineering students should consult an advisor before registering for this course. Approved for arts and sciences core curriculum: natural science. Prerequisites: Restricted to non-Engineering majors only.

[College of Engineering & Applied Science](#) | [Chemical Engineering](#)

CHEN-1211 (3) General Chemistry for Engineers

Lect. a one-semester course designed to meet the general chemistry requirement for engineering students. Topics include stoichiometry; thermodynamics; gases, liquids, and solids; equilibrium; acids and bases; bonding concepts; kinetics; reactions; and materials science. Examples and problems illustrate the application of chemistry to engineering subdisciplines. Restricted to students with one year of high school chemistry or CHEM 1001 or 1021 (min. grade C-); and high school algebra. Not recommended for students with grades below B- in CHEM 1001 or 1021. Credit not granted for this course and CHEM 1111, 1113/1114, 1251, or 1351. Prerequisites: Requires co-requisite course of CHEM 1221. Restricted to College of Engineering Majors only.

[College of Engineering & Applied Science](#) | [Chemical Engineering](#)

CHEN-1300 (1) Introduction to Chemical Engineering

Meets for one lecture per week. Introduces chemical engineering emphasizing history of the profession, curriculum, chemical industry, and industrial chemistry. Includes industry visits, oral presentations, faculty and professional meetings, and development of a goals statement. Prerequisites: Restricted to Chemical (CHEN) Engineering or Chemical and Biological (CBEN) Engineering majors only.

[College of Engineering & Applied Science](#) | [Chemical Engineering](#)

CHEN-2120 (3) Chemical Engineering Material and Energy Balances

Provides a basic understanding of chemical engineering calculations involving material and energy balances around simple chemical processes. Prerequisites: Requires pre-requisite courses of CHEN 1211 and GEEN 1300 (all min grade C-).

College of Engineering & Applied Science | Chemical Engineering

CHEN-2810 (3) Biology for Engineers

Develops a basic understanding of the science of biology, including an introduction to the disciplines of biochemistry, cell organization, metabolism, genetics, genomics, molecular biology, recombinant DNA technology and evolution. Provides a basic introduction to several key techniques used in biological engineering laboratories. Uses examples of complex and creative structures engineered by natural processes.

College of Engineering & Applied Science | Chemical Engineering

CHEN-2840 (1-4) Independent Study

Available to sophomores with approval of Department of Chemical Engineering. Subject arranged to fit needs of student.

College of Engineering & Applied Science | Chemical Engineering

CHEN-3010 (3) Applied Data Analysis

Teaches students to analyze and interpret data. Topics include engineering measurements, graphical presentation and numerical treatment of data, statistical inference, and regression analysis. Prerequisites: Requires pre-requisite course of GEEN 1300.

College of Engineering & Applied Science | Chemical Engineering

CHEN-3130 (2) Chemical Engineering Laboratory 1

One four-hour lab session per week. Investigates chemical engineering fluid flow, heat transfer, and thermodynamics. Emphasizes communication by written reports and oral presentations as well as laboratory safety. Prereq., CHEN 3010, 3200, 3320 and either CHEN 3210 or MCEN 3022 (all min. grade C-). Prerequisites: Requires pre-requisite courses of CHEN 3010 and CHEN 3200 (or MCEN 3021 or GEEN 3853) and CHEN 3320 and CHEN 3210 (or MCEN 3022).

College of Engineering & Applied Science | Chemical Engineering

CHEN-3200 (3) Chemical Engineering Fluid Mechanics

Introduces fluid mechanics and momentum transfer, emphasizing the application of these principles to chemical engineering systems. Prereqs., APPM 2350 and either CHEN 2120 (min. grade C) or MCEN 2023 (min. grade C). Coreq., APPM 2360. Same as GEEN 3853.

College of Engineering & Applied Science | Chemical Engineering

CHEN-3210 (3) Chemical Engineering Heat Transfer

Examines conservation and transfer of thermal energy. Focuses on conduction and convection of heat in the context of chemical processes, with a special focus on heat exchangers. Also studies thermal radiation. Prerequisites: Requires pre-requisite courses of either CHEN 3200 or MCEN 3021 (all min grade C-).

College of Engineering & Applied Science | Chemical Engineering

CHEN-3220 (3) Chemical Engineering Separations and Mass Transfer

Studies separation methods including distillation, absorption, and extraction, and graphical and computer-based solutions to separation problems. Also studies mass transfer rate processes, including diffusion, microscopic material balances, and correlations for mass transfer coefficients. Applies mass transfer rate theory to packed and tray columns. Prerequisites: Requires pre-requisite courses of CHEN 3200 (or MCEN 3021 or GEEN 3853) and CHEN 3320.

College of Engineering & Applied Science | Chemical Engineering

CHEN-3320 (3) Chemical Engineering Thermodynamics

Applies thermodynamic principles to nonideal systems, phase equilibrium, chemical equilibrium, power generation, refrigeration, and chemical processes. Prereqs., CHEN 2120 (min. grade C) and either CHEM 4511 or 4521 (min. grade C-). Prerequisites: Requires pre-requisite courses of CHEN 2120 and either CHEM 4511 or 4521 (all min grade C-).

College of Engineering & Applied Science | Chemical Engineering

CHEN-3840 (1-4) Independent Study

Available to juniors with approval of the Department of Chemical Engineering. Subject arranged to fit needs of the student.

College of Engineering & Applied Science | Chemical Engineering

CHEN-3930 (6) Chemical Engineering Cooperative Education

Students enrolled in this course participate in a previously arranged, department-sponsored cooperative education program. Prereqs., CHEN 2120 (min. grade C) and GPA higher than 2.85. GPA higher than 3.00 strongly recommended.

College of Engineering & Applied Science | Chemical Engineering

CHEN-4010 (2) Chemical Engineering Senior Thesis 1

Provides an opportunity for advanced students to conduct exploratory research in chemical engineering.

College of Engineering & Applied Science | Chemical Engineering

CHEN-4020 (2) Chemical Engineering Senior Thesis 2

Continuation of CHEN 4010. CHEN 4010 and 4020 can substitute for CHEN 4130.

College of Engineering & Applied Science | Chemical Engineering

CHEN-4090 (1) Senior Seminar

Provides chemical engineering career and professional information, facilitates contact with faculty and industry representatives, and improves communication and leadership skills. Consists of a series of seminars and field trips and requires a research project involving a written and oral report. Prerequisites: Restricted to Chemical (CHEN) Engineering or Chemical and Biological (CBEN) Engineering majors only.

College of Engineering & Applied Science | Chemical Engineering

CHEN-4130 (2) Chemical Engineering Laboratory 2

Involves planning and execution of chemical engineering experiments on mass transfer operations, separations, and chemical reactors. Interprets experimental data with theoretical principles and statistical analysis. Emphasizes communication with written memos, full reports, and oral presentations. Prerequisites: Requires pre-requisite courses of CHEN 3130, 3220, 3320, 4330 (all min grade C-).

College of Engineering & Applied Science | Chemical Engineering

CHEN-4330 (3) Chemical Engineering Reaction Kinetics

Introduces chemical kinetics and chemical reactor design. Involves mass and energy balances for steady-state and transient reactor systems. Also covers residence time distribution, mass transfer, catalytic reactions, and multiple steady states in reactors. Prerequisites: Requires pre-requisite courses of CHEN 3320 and APPM 2360.

College of Engineering & Applied Science | Chemical Engineering

CHEN-4440 (3) Chemical Engineering Materials

Introduces materials engineering, including properties of polymers, metals, ceramics, and semiconductors, especially as related to chemical engineering processes. Prereq., CHEN 3320 and CHEM 3311 (min grade C-).

College of Engineering & Applied Science | Chemical Engineering

CHEN-4450 (3) Polymer Chemistry

Introduces polymer science with a focus on polymer chemistry and polymerization reactions. Focuses on polymerization reaction engineering and how polymer properties depend on structure. Same as CHEN 5450. Prerequisites: Requires pre-requisite courses of CHEN 4830 or CHEM 3311 and CHEN 4330 (all min grade C-).

College of Engineering & Applied Science | Chemical Engineering

CHEN-4460 (3) Polymer Engineering

Introductory polymer engineering course reviewing basic terminology and definitions; the properties and synthetic routes of important industrial polymers; and processing of polymers and their applications. Prereq., CHEM 3311 and CHEN 3320 (min. grade C-). Same as CHEN 5460. Prerequisites: Requires pre-requisite courses of CHEM 3311 and CHEN 3320.

College of Engineering & Applied Science | Chemical Engineering

CHEN-4520 (3) Chemical Process Synthesis

Studies applied chemical process design including equipment specification and economic evaluation. Prerequisites: Requires pre-requisite courses of CHEN 3210, 3220, and 4330 or 4830 (all min grade C-).

College of Engineering & Applied Science | Chemical Engineering

CHEN-4530 (2) Chemical Engineering Design Project

Provides a team-based capstone design experience for chemical engineering students. Projects are sponsored by industry and student design teams collaborate with industrial consultants. Projects consider chemical process and product design with emphasis on economic analysis. Deliverables include an oral mid-project design review, a final oral presentation and final written design report. Prereq., CHEN 4520 (min. grade C-). Prerequisites: Requires pre-requisite course of CHEN 4520.

College of Engineering & Applied Science | Chemical Engineering

CHEN-4570 (4) Instrumentation and Process Control

Examines principles of control theory and their application to chemical processes. Focuses on single-loop feedback and feedforward control. Laboratory sessions cover measurement fundamentals, signal transmission, dynamic testing, control system synthesis, and implementation and adjustment. Prereqs., CHEN 3220, 4330 or 4830, and APPM 2360 (all min. grade C-). Prerequisites: Requires pre-requisite courses of CHEN 3220 and CHEN 4330 (or CHEN 4830) and APPM 2360 (all min grade C-).

CSCI-1000 (1) Computer Science as a Field of Work and Study

Introduces curriculum, learning techniques, time management and career opportunities in Computer Science. Includes presentations from alumni and others with relevant educational and professional experience.

[College of Engineering & Applied Science](#) [Computer Science](#) [General Computer Science](#)

CSCI-1220 (4) Virtual Worlds: An Introduction to Computer Science

Introduces the fundamental principles of computer science using an on-line virtual world called Second Life as the "Laboratory" for the course. Students will learn how to program by creating objects of interest in Second Life. In-class and in-world discussions and readings will introduce the student to important ideas and concepts that shape the field of computer science. Same as ATLS 1220.

[College of Engineering & Applied Science](#) [Computer Science](#) [General Computer Science](#)

CSCI-1240 (3) The Computational World

Introduces and explores the "Computational style of thinking" and its influence in science, mathematics, engineering and the arts. The course does not focus on the nuts and bolts of any particular programming language, but rather on the way in which computing has affected human culture and thought in the past half century. Same as ATLS 1240.

[College of Engineering & Applied Science](#) [Computer Science](#) [General Computer Science](#)

CSCI-1300 (4) Computer Science 1: Programming

Teaches techniques for writing computer programs in higher level programming languages to solve problems of interest in a range of application domains.

College of Engineering & Applied Science | Computer Science | General Computer Science

CSCI-2270 (4) Computer Science 2: Data Structures

Studies data abstractions (e.g., stacks, queues, lists, trees) and their representation techniques (e.g., linking, arrays). Introduces concepts used in algorithm design and analysis including criteria for selecting data structures to fit their applications. Prereqs., CSCI 1300, and one of APPM 1350 or MATH 1300. Prerequisites: Requires pre-requisite courses of CSCI 1300 and either APPM 1350 or MATH 1300 (minimum grade C-).

College of Engineering & Applied Science | Computer Science | General Computer Science

CSCI-2400 (4) Computer Systems

Covers how programs are represented and executed by modern computers, including low-level machine representations of programs and data, an understanding of how computer components influence performance and memory hierarchy. Prerequisites: Requires pre-requisite course of CSCI 2270 (minimum grade C-).

College of Engineering & Applied Science | Computer Science | General Computer Science

CSCI-2824 (3) Discrete Structures

Covers foundational materials for computer science that is often assumed in advanced courses. Topics include set theory, Boolean algebra, functions and relations, graphs, propositional and predicate calculus, proofs, mathematical induction, recurrence relations, combinatorics, discrete probability. Focuses on examples based on diverse applications of computer science. Prerequisites: Requires pre-requisite course of CSCI 2270 (minimum grade C-).

College of Engineering & Applied Science | Computer Science | Theory of Computation

CSCI-2830 (1-3) Special Topics in Computer Science

Covers topics of interest in computer science at the sophomore level. Content varies from semester to semester.

College of Engineering & Applied Science | Computer Science | General Computer Science

CSCI-2900 (1-3) Lower Division, Undergraduate Level Independent Study

Offers selected topics at the elementary level for students with little or no previous computing experience.

College of Engineering & Applied Science | Computer Science | General Computer Science

CSCI-3002 (3) Human-Centered Computing Foundations

Introduces practice and research in human-computer interaction, design of interactive systems, computer supported cooperative work, computer supported collaborative learning, educational technology, tools that support creativity, user-developed knowledge collections, and gaming.

College of Engineering & Applied Science | Computer Science | Artificial Intelligence

CSCI-3104 (4) Algorithms

Covers advanced data structures, computational geometry, cryptography, dynamic programming, greedy algorithms, divide-and-conquer, graph algorithms (e.g., depth-first search), network algorithms (e.g., shortest paths), approximation algorithms. Prerequisites: Requires pre-requisite course of CSCI 2824 (minimum grade C-).

College of Engineering & Applied Science | Computer Science | Theory of Computation

CSCI-3112 (1-3) Human-Centered Computing Professional Development

Supports students in developing professional skills and practices in human-computer interaction, design of interactive systems, computer supported cooperative work, computer supported collaborative learning, educational technology, tools that support creativity, user-developed knowledge collections, and gaming. May be repeated up to 10 total credit hours. Same as ATLS 3112.

College of Engineering & Applied Science | Computer Science | Artificial Intelligence

CSCI-3155 (4) Principles of Programming Languages

Study fundamental concepts on which programming of languages are based, and execution models supporting them. Topics include values, variables, bindings, type systems, control structures, exceptions, concurrency, and modularity. Learn how to select a language and to adapt to a new language. Prerequisites: Requires pre-requisite courses of CSCI 2270 and either CSCI 2400 or ECEN 3350 (minimum grade C-).

College of Engineering & Applied Science | Computer Science | Programming Languages

CSCI-3202 (3) Introduction to Artificial Intelligence

Surveys artificial intelligence techniques of search, knowledge representation and reasoning, probabilistic inference, machine learning, and natural language processing. Introduces artificial intelligence programming. Prerequisites: Requires pre-requisite course of CSCI 2824 (minimum grade C-).

College of Engineering & Applied Science | Computer Science | Artificial Intelligence

CSCI-3287 (3) Database and Information Systems

Surveys data management, including file systems, database management systems design, physical data organizations, data models, query languages, concurrency, and database protection. Prereq., CSCI 3104. Prerequisites: CSCI 3287 PREREQ

| | | |
|--|------------------|------------------|
| College of Engineering & Applied Science | Computer Science | Database Systems |
|--|------------------|------------------|

CSCI-3302 (3) Introduction to Robotics

Introduces students to fundamental concepts in autonomous, mobile robotics: mechanisms, locomotion, kinematics, control, perception and planning. The course consists of lectures and lab sessions that are geared toward developing a complex robot controller in a realistic, physics-based multi-robot simulator. Prereqs., CSCI 2270 and 2824. CSCI 3302 and ECEN 3303 are the same course.

| | | |
|--|------------------|-------------------------|
| College of Engineering & Applied Science | Computer Science | Artificial Intelligence |
|--|------------------|-------------------------|

CSCI-3308 (3) Software Engineering Methods and Tools

Focuses on software engineering methods and tools for application development, including design and system organization; using and creating reusable libraries; building, testing, and debugging; and performance evaluation. Prerequisites: Requires pre-requisite course of CSCI 2270 (minimum grade C-).

| | | |
|--|------------------|----------------------|
| College of Engineering & Applied Science | Computer Science | Software Engineering |
|--|------------------|----------------------|

CSCI-3434 (3) Theory of Computation

Introduces the foundations of formal language theory, computability, and complexity. Shows relationship between automata and various classes of languages. Addresses the issue of which problems can be solved by computational means, and studies complexity of solutions. Prereq., CSCI 3104 and 3155. Prerequisites: Requires pre-requisite courses of CSCI 3104 and CSCI 3155 (minimum grade C-).

| | | |
|--|------------------|-----------------------|
| College of Engineering & Applied Science | Computer Science | Theory of Computation |
|--|------------------|-----------------------|

CSCI-3656 (3) Numerical Computation

Covers development, computer implementation, and analysis of numerical methods for applied mathematical problems. Topics include floating point arithmetic, numerical solution of linear systems of equations, root finding, numerical interpolation, differentiation, and integration. Prereqs., two semesters of calculus, linear algebra, and either CSCI 1200 or 1300.

| | | |
|--|------------------|-----------------------|
| College of Engineering & Applied Science | Computer Science | Numerical Computation |
|--|------------------|-----------------------|

CSCI-3702 (3) Cognitive Science

Introduces cognitive science, drawing from psychology, philosophy, artificial intelligence, neuroscience, and linguistics. Studies the linguistic relativity hypothesis, consciousness, categorization, linguistic rules, the mind-body problems, nature versus nurture, conceptual structure and metaphor, logic/problem solving, and judgment. Emphasizes the nature, implications, and limitations of the computational model of mind. Prereqs., two of the following: PSYC 2145, LING 2000, CSCI 1300, and PHIL 2440. Same as LING 3005, PHIL 3310, and PSYC 3005.

| | | |
|--|------------------|-------------------------|
| College of Engineering & Applied Science | Computer Science | Artificial Intelligence |
|--|------------------|-------------------------|

CSCI-3753 (4) Operating Systems

Examines software comprising computing systems as it builds upon hardware to provide a programming environment. Looks at structure and function of editors, compilers/assemblers, linkers, etc. Basic operating systems concepts and systems programming in high-level languages. Prereqs., CSCI 2700 and 2400 or ECEN 3350. Prerequisites: Requires pre-requisite courses of CSCI 2270 and either CSCI 2400 or ECEN 3350 (minimum grade C-).

College of Engineering & Applied Science | Computer Science | Operating Systems and Hardware

CSCI-4000 (3) Entrepreneurship in Computing

Examines the development of new venture creation from the entrepreneur's perspective. Provides an understanding of the entire process including opportunity identification, feasibility study, fundraising, organization, team creation, and exit strategies through case studies, oral and written presentations, and outside speakers. Taught by an experienced entrepreneur. Prereq., CSCI 2270. Restricted to juniors/seniors.

College of Engineering & Applied Science | Computer Science | General Computer Science

CSCI-4113 (3) Unix System Administration

Introduces UNIX (Linux) system administration and related topics, including trouble-shooting system and network problems, hardware and software configuration and installation, basic scripting, and security aspects of Internet hosts. Students build a Linux server from the ground up, using provided computing resources, and must maintain and secure the server themselves. Prereqs., CSCI 2270 or instructor consent. Recommended prereq., CSCI 3308. Prerequisites: Requires pre-requisite course of CSCI 2270 (minimum grade C-).

College of Engineering & Applied Science | Computer Science | Operating Systems and Hardware

CSCI-4123 (3) Network Laboratory

Develops enterprise level design and configuration skills on local area networking via switching and routing, as well as the provisioning of remote data communications across diverse Wan technologies, using the latest available transport and security services. Prereq., CSCI 4273. Credit not granted for this course and TLEN 5460. Prerequisites: Requires pre-requisite course of CSCI 4273 (minimum grade C-).

College of Engineering & Applied Science | Computer Science | Operating Systems and Hardware

CSCI-4133 (3) Security Laboratory

Allows students to gain practical experience with network security in a simulated network environment. Topics to be covered include system hardening, firewalls, intrusion detection, vulnerability assessment, and investigation. Prereq., CSCI 4273. Credit not granted for this course and TLEN 5540. Prerequisites: Requires pre-requisite course of CSCI 4273 (minimum grade C-).

College of Engineering & Applied Science | Computer Science | General Computer Science

CSCI-4900 (1-3) Upper Division, Undergraduate Level Independent Study

Provides opportunities for independent study at the upper-division undergraduate level. Students work on a small research problem or tutor lower-division computer science students. Prereq., CSCI 1200 or 1300.

College of Engineering & Applied Science | Computer Science | General Computer Science

CSCI-4950 (2-4) Senior Thesis

Provides an opportunity for senior computer science majors to conduct exploratory research in computer science. Prereqs., successful completion of a minimum of 36 credit hours of Computer Science Foundation, Track Foundation, Track Core, and Computer Science electives, and WRTG 3030. Restricted to seniors. May be repeated up to 8 total credit hours. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior).

College of Engineering & Applied Science | Computer Science | General Computer Science

CSCI-5900 (1-6) Master's Level Independent Study

Provides opportunities for independent study at the master's level. Prerequisites: Restricted to Computer Science (CSEN) graduate students only or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science | Computer Science | General Computer Science

CSCI-6000 (1) Introduction to the Computer Science PhD Program

Instructs new Ph.D students in Computer Science how to obtain a Ph.D and how to become an effective member of the computer science research community. Makes students aware of formal

requirements, educational objectives, and research themes. Provides evaluative criteria and guidelines for all objectives to be achieved. Restricted to new Ph.D students in Computer Science.
Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Computer Science | General Computer Science

CSCI-6800 (1-6) Master of Engineering Project

Students seeking the master of engineering degree must complete a creative investigation project, including a written report, supervised by a member of the graduate faculty. Prereq., completion of 21 hours towards the ME degree. Prerequisites: Restricted to graduate student Computer Sciences students only.

College of Engineering & Applied Science | Computer Science | General Computer Science

CSCI-6810 (1) Seminar in Computational Biology

Provides an overview of current research topics in computational biology and health informatics, with a focus on research conducted on campus. Each week students will attend an on-campus seminar or a presentation by an on-campus research group. Prepares students to participate in a research project. Prereqs., CSCI 4312 or 4314 or 4317. CSCI 4810 and 6810 are the same course.

College of Engineering & Applied Science | Computer Science | General Computer Science

CSCI-6940 (1) Master's Degree Candidacy

For students who need to be registered for the purpose of taking the master's comprehensive exam and who are not otherwise registered. Credit does not count toward degree requirements. Graded on a pass/fail basis. Prerequisites: Restricted to Computer Science (CSEN) graduate students only or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science | Computer Science | General Computer Science

CSCI-6950 (1-6) Master's Thesis

Prerequisites: Restricted to Computer Science (CSEN) graduate students only or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science | Computer Science | General Computer Science

CSCI-7000 (1-4) Current Topics in Computer Science

Covers research topics of current interest in computer science that do not fall into a standard subarea. May be repeated up to 8 total credit hours. Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Computer Science | General Computer Science

CSCI-7900 (1-6) Doctoral Level Independent Study

For doctoral students.

College of Engineering & Applied Science | Computer Science | General Computer Science

CSCI-8990 (1-10) Doctoral Dissertation

Investigates some specialized field of computer science. Approved and supervised by faculty members. Prerequisites: Restricted to Graduate Students only.

EVEN-2840 (1-3) Independent Study: General Topics

General topics relating to environmental engineering. One-on-one assistance with an instructor.

[College of Engineering & Applied Science](#)
[Environmental Engineering](#)

EVEN-4100 (3) Environmental Sampling and Analysis

Introduces students to hands-on environmental sampling and analysis techniques for characterization of surface water, subsurface water, soils and sediments, and air. Laboratories include stream sampling, drilling, monitoring well installation, water level, slug tests, air sampling. Prereqs., CVEN 4404 and 4414, fluid mechanics, or instructor consent.

[Environmental Engineering](#)

EVEN-4830 (3) Special Topics

College of Engineering & Applied Science Environmental Engineering

EVEN-4840 (1-3) Independent Study: General Topics

General topics relating to environmental engineering. One-on-one assistance with an instructor. May be repeated up to 6 total credit hours.

College of Engineering & Applied Science Environmental Engineering

EVEN-4980 (3) Senior Thesis 1

Provides faculty-supervised independent research in environmental engineering for students planning to complete a senior thesis. To be taken prior to EVEN 4990, during the final year before graduation. Instructor consent required. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Environmental Engineering (EVEN) majors only.

College of Engineering & Applied Science Environmental Engineering

EVEN-4990 (3) Senior Thesis 2

Continuation of EVEN 4980. Consists of final phase of faculty-supervised research, the preparation of a written thesis, and an oral defense of the research to a committee. Prereq., EVEN 4980.

MCEN-1000 (1) Freshmen Seminar

Lect. and lab. Introduces facets of mechanical engineering including history of the profession, mechanical engineering curriculum, industries in which mechanical engineers practice, and expectations and tools for academic success. Students participate in hands-on experiences, visit industry, make oral presentations, meet faculty and practicing professionals, and develop goal statements. Restricted to students with 0-26 units (Freshmen) Mechanical Engineering majors only. Prerequisites: Restricted to students with 0-26 units (Freshmen) Mechanical Engineering majors only.

[College of Engineering & Applied Science](#) [Mechanical Engineering](#) [Math](#)

MCEN-1025 (4) Computer-Aided Design and Fabrication

Introduces engineering design graphics. Includes learning a contemporary computer-aided design (CAD) software application and relevant engineering graphics concepts, such as orthographic projection, sections, engineering drawing practices, geometric dimensioning and tolerancing, and an introduction to manufacturing methods. Entails a final design project using rapid prototyping. Restricted to MCEN majors. Prerequisites: Restricted to Mechanical Engineering or Engineering Physics majors only.

[College of Engineering & Applied Science](#) [Mechanical Engineering](#) [Design](#)

MCEN-1208 (1-4) Special Topics in Mechanical Engineering

Subject matter to be selected from topics of current interest. Credit to be arranged. Numbered MCEN 1208-1298. Prereq., instructor consent. Restricted to students with 0-26 units (Freshmen) Mechanical Engineering majors only. Prerequisites: Restricted to students with 0-26 units (Freshmen) Mechanical Engineering majors only.

[College of Engineering & Applied Science](#) [Mechanical Engineering](#) [Special Topics](#)

MCEN-2023 (3) Statics and Structures

Covers statics of particles, equivalent force systems, rigid bodies, equilibrium of rigid bodies in two and three dimensions, analysis of truss and frame structures, uniaxially-loaded members, deformation and stress, distributed force systems, friction. Lectures and homework assignments involve computer work and hands-on laboratory work in the ITLL, documented by written reports. Prereq., APPM 1360. Prerequisites: Requires prerequisite course of APPM 1360 or MATH 2300. Restricted to students with 27-180 credits (Sophomores/Juniors/Seniors) MCEN or EVEN majors or Civil & Envrn Engr Concurrent Degree majors or Mechanical Engr Concurrent Degree majors.

College of Engineering & Applied Science | Mechanical Engineering | Solids

MCEN-2024 (3) Materials Science

Structure, properties, and processing of metallic, polymeric, ceramic, and composite materials. Perfect and imperfect solids; phase equilibria; transformation kinetics; mechanical behavior; material degradation. Approach incorporates both materials science and materials engineering components. Prereqs., CHEN 1211, CHEM 1221 and PHYS 1110. Prerequisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) Mechanical Engineering (MCEN) or Environmental Engineering (EVEN) majors or Civil & Environmental Engineering Concurrent Degree or Mechanical Engineering Concurrent Degree majors

College of Engineering & Applied Science | Mechanical Engineering | Materials

MCEN-2043 (3) Dynamics

Covers dynamic behavior of particle systems and rigid bodies; 2-D and 3-D kinematics and kinetics; impulse, momentum, potential, and kinetic energy; and work, collision, and vibration. Lectures and homework assignments involve computer work and hands-on laboratory work in the ITLL, documented by written reports. Prereq., MCEN 2023. Formerly MCEN 3043. Prerequisites: Requires prerequisite courses of MCEN 2023 (or CVEN 2121 or GEEN 3851). Restricted to students with 27-180 credits (Sophomores/Juniors/Seniors) MCEN or EVEN majors or concurrent degree majors in CVEN&EVEN or MCEN.

College of Engineering & Applied Science | Mechanical Engineering | Solids

MCEN-2063 (3) Mechanics of Solids

Covers shear force and bending moment, torsion, stresses in beams, deflection of beams, matrix analysis of frame structures, analysis of stress and strain in 2-D and 3-D (field equations, transformations), energy methods, stress concentrations, and columns. Lectures and homework assignments involve computer work and hands-on laboratory work in the ITLL, documented by written reports. Credit not granted for this course and CVEN 3161. Prerequisites: Requires prerequisite courses of MCEN 2023 or CVEN 2121 or GEEN 3851. Restricted to students with 27-180 credits (Sophomores/Juniors/Seniors) MCEN or EVEN majors or concurrent degree majors in CVEN&EVEN or MCEN.

College of Engineering & Applied Science | Mechanical Engineering | Solids

MCEN-3012 (3) Thermodynamics

Explores fundamental concepts and basic theory, including first and second laws of thermodynamics, properties, states, thermodynamic functions and cycles. Prereq., APPM 2350. Same as GEEN 3852. Prerequisites: Requires prerequisite course of APPM 2350 or MATH 2400. Restricted to students with 57-180 credits (Junior/Senior) MCEN or EVEN majors or concurrent degree majors in CVEN/EVEN or MCEN.

College of Engineering & Applied Science | Mechanical Engineering | Thermal

MCEN-3017 (3) Circuits and Electronics

Introductory course covers analysis of electric circuits by use of Ohm's law, network reduction, node and loop analysis, Thevenin's and Norton's theorems, DC and AC signals, transient response of simple circuits, transfer functions, basic diode and transistor circuits, and operational amplifiers. Prereqs., APPM 2360 and PHYS 1140. Same as ECEN 3010. Prerequisites: Restricted to students in the MSC/CU-Boulder Mechanical Engineering Partnership Program only.

College of Engineering & Applied Science Mechanical Engineering Miscellaneous

MCEN-3021 (3) Fluid Mechanics

Examines fundamentals of fluid flow with application to engineering problems. Explores fluid statics and kinematics; conservation equations for mass, momentum, and energy; Bernoulli and Euler equations; potential flow; laminar and turbulent viscous boundary layers; laminar and turbulent pipe flow; and compressible fluid flow. Prereqs., APPM 2360 and MCEN 2023. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) Mechanical Engineering (MCEN or MCMR) or Environmental Engineering (EVEN) majors or Civil/Environmental Engineering or Mechanical Engineering Concurrent Degree majors only.

College of Engineering & Applied Science Mechanical Engineering Fluids

MCEN-3022 (3) Heat Transfer

Studies fundamentals of heat transfer by conduction, convection, and radiation. Provides applications to heat exchangers, solar panels, and boiling and mass transfer. Also covers numerical methods for solving heat transfer problems and design of engineering equipment involving heat transfer processes. Prerequisites: Requires prereq courses of MCEN 3012 (or GEEN 3852, or CHEN 3320, or ASEN 2002, or AREN 2110) & MCEN 3021 (or GEEN 3853, or CHEN 3200, or CVEN 3313) & MCEN 3030. Restricted to students w/ 57-180 credits (Jr or Sr) MCEN or EVEN majors.

College of Engineering & Applied Science Mechanical Engineering Thermal

MCEN-3025 (3) Component Design

Application of mechanics and materials science to the detailed design of various machine elements including shafts bearings, gears, brakes, springs, and fasteners. Emphasizes application and open-ended design problems. Prereq., MCEN 2063. Prerequisites: Requires pre-requisite course of MCEN 2063 (or CVEN 3161, or ASEN 3112).

College of Engineering & Applied Science Mechanical Engineering Design

MCEN-3030 (3) Computational Methods

Studies fundamental numerical techniques for the solution of commonly encountered engineering problems. Includes methods for linear and nonlinear algebraic equations, data analysis, numerical differentiation and integration, ordinary and partial differential equations. Prereqs., GEEN 1300 and APPM 2360, or equivalent, including a working knowledge of Matlab. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering, Mechanical (MCEN or MCMR) or Environmental Engineering (EVEN) or Mechanical Engineering Concurrent Degree majors only.

College of Engineering & Applied Science Mechanical Engineering Math

MCEN-3032 (3) Thermodynamics 2

Offers advanced topics and applications, including thermodynamics of state, entropy and probability, thermodynamic cycles, and reacting and nonreacting mixtures. Provides application to engines and power generation by conventional and alternative energy technologies. Most assignments are design oriented. Prereqs., MCEN 3012 and 3021. Prerequisites: Requires prerequisite course

of MCEN 3021 (or CHEN 3200 or CVEN 3313 or GEEN 3853) and MCEN 3012 (or AREN 2110 or GEEN 3852). Restricted to students with 57-180 credits (Junior/Senior) Mechanical Engineering or Environmental Engineering majors only.

College of Engineering & Applied Science Mechanical Engineering Thermal

MCEN-3037 (2) Data Analysis

Learn to plan and carry out experiments. Coverage includes measurement fundamentals, basic statistical concepts, and uncertainty analysis. Use of statistics for the purpose of analyzing data, including regression, correlation, hypothesis testing, classification, time series analysis, and design of experiments. Prereq., APPM 2360. Prerequisites: Restricted to graduate students in College of Engineering and Applied Science or to students with 57-180 credits (Junior or Senior) or Mechanical Engineering Concurrent Degree students.

College of Engineering & Applied Science Mechanical Engineering Miscellaneous

MCEN-3208 (1-3) Special Topics in Mechanical Engineering

Subject matter to be selected from topics of current interest. Credit to be arranged. Numbered MCEN 3208-3298. Instructor consent required. Prerequisites: Restricted to Mechanical (MCEN or MCMR) majors or students with a plan of Mechanical Engineering Concurrent Degree majors.

College of Engineering & Applied Science Mechanical Engineering Special Topics

MCEN-4026 (3) Manufacturing Processes and Systems

Engineering-science design course that examines manufacturing processes for metals, polymers, and composites as well as manufacturing systems that integrate these processes. Lecture topics include: forming, machining, joining, assembling, process integration, computer-aided manufacturing, and manufacturing system engineering. Prereq., MCEN 2024. Prerequisites: Requires prerequisite course of MCEN 2024. Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical Engineering (MCEN) majors or Mechanical Engineering Concurrent Degree majors only.

College of Engineering & Applied Science Mechanical Engineering Manufacturing and Systems

MCEN-4037 (2) Measurements Lab

Carry out several experiments designed to teach methods of experimentation and data analysis. Experiments taken from solid mechanics, fluid mechanics, thermal science, and materials science. Emphasizes planning an experiment, applying sound procedures, keeping proper records, and communicating results orally and in written reports. Gives students the opportunity to participate in projects that extend over two or more weeks. Prerequisites: Requires prerequisites of ECEN3010 & MCEN2063 (or CVEN3161 or ASEN3112) & MCEN3037 (or APPM4520 or 4570 or CVEN3227 or CHEN3010) & WRTG3030 (or WTRG3035 or HUEN3100 or PHYS3050). Restricted to MCEN majors w/57-180 credits (juniors/seniors).

College of Engineering & Applied Science Mechanical Engineering Miscellaneous

MCEN-4043 (3) System Dynamics

Covers linear dynamic systems and mathematical tools for understanding them, input-output relationships, modeling templates, complex variables, Laplace transform, time-harmonic forcing and response, Fourier series and discrete Fourier transform, and coupled systems. Prereq., ECEN 3010 and MCEN 2043 or 3043. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical Engineering (MCEN) majors or Mechanical Engineering Concurrent Degree majors only.

College of Engineering & Applied Science Mechanical Engineering Solids

MCEN-4045 (3) Mechanical Engineering Design Project 1

First part of a two-course capstone design experience in mechanical engineering. Covers problem definition, determining design requirements, alternative design concepts, engineering analysis, proof-of-concept prototype, and CAD drawings. Students make several oral design reviews, a final design presentation, and prepare a written report. Coreq., MCEN 4026. Prerequisites: Requires prerequisite courses of MCEN 3025 & 3032 & 3022 (or CHEN 3210) and GEEN 1400 (or ECEN 1400 or GEEN 3400). Restricted to students with 87-180 credits (Senior) Mechanical Engineering majors or Mechanical Engineering Concurrent Degree majors only.

College of Engineering & Applied Science Mechanical Engineering Design

MCEN-4047 (2) Measurements 2

Four hours of lab per week. Student teams perform laboratory projects that extend over several weeks. Takes experiments from solid mechanics, acoustics, electronics, and other ME-related disciplines. Emphasizes planning an experiment, applying sound experimental procedures, using statistics, keeping proper records, and communicating results orally, on posters, and in written documents. Prerequisites: Requires prerequisite courses of MCEN 2024 and MCEN 4037. Restricted to College of Engineering and Applied Science graduate students or senior BS/MS Mechanical Engineering or Concurrent Degree students.

College of Engineering & Applied Science Mechanical Engineering Miscellaneous

MCEN-4085 (4) Mechanical Engineering Design Project 2

Second part of a two-course capstone design experience in mechanical engineering. Includes refinement of prototype, design optimization, fabrication, testing, and evaluation. Students orally present the final design and prepare a written report and operation manual for the product. Prereq., MCEN 4026 and 4045. Prerequisites: Requires prerequisite courses of MCEN 4026 and MCEN 4045. Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical Engineering (MCEN) majors or Mechanical Engineering Concurrent Degree (C-MCEN) majors only.

College of Engineering & Applied Science Mechanical Engineering Design

MCEN-4115 (3) Mechantronics and Robotics I

Focuses on design and construction of microprocessor-controlled electro-mechanical systems. Lectures review critical circuit topics, introduce microprocessor architecture and programming, discuss sensor and actuator component selection, robotic systems, and design strategies for complex, multi-system devices. Lab work reinforces lectures and allows hands-on experience with robotic design. Students must design and build an autonomous robotic device. Project expenses may be incurred (\$50 maximum). Prereqs., ECEN 3010 or equivalent and GEEN 1300 or equivalent. Same as MCEN 5115. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical Engineering (MCEN) majors or Mechanical Engineering Concurrent Degree (C-MCEN) majors only.

College of Engineering & Applied Science Mechanical Engineering Design

MCEN-4117 (3) Anatomy and Physiology for Engineers

Understanding human physiological function from an engineering, specifically mechanical engineering, viewpoint. Introduction to human anatomy and physiology with a focus on learning fundamental concepts and applying engineering (mass transfer, fluid dynamics, mechanics, modeling) analysis. Same as MCEN 5117. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Engineering majors only.

College of Engineering & Applied Science Mechanical Engineering Miscellaneous

MCEN-4120 (3) Engineering Statistics

Focuses on probability and statistics, emphasizing engineering applications. Studies frequency distributions; statistical hypotheses and estimation; nonparametric, linear regression, and correlation; nonlinear and multiple regression; analysis of variance; and quality control. Prereq., APPM 2360.

MCEN-5020 (3) Methods of Engineering Analysis 1

Studies selected topics from linear algebra, ordinary differential equations, and Fourier series. Assigns computer exercises. Correlates with analysis topics in other mechanical engineering graduate courses, and emphasizes applications. Prereq., APPM 2360 or equivalent. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students. Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

College of Engineering & Applied Science Mechanical Engineering Math

MCEN-5040 (3) Methods of Engineering Analysis 2

Studies selected topics from the theory of complex variables, integral transform methods, partial differential equations, and variational methods. Assigns computer exercises. Correlates with analysis topics in other mechanical engineering graduate courses, and emphasizes applications. Prereq., MCEN 5020 or equivalent. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students. Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

College of Engineering & Applied Science Mechanical Engineering Math

MCEN-7120 (3) Perturbation Methods

Teaches regular and singular perturbation methods for solving ordinary and partial differential equations and for evaluating integrals. Emphasizes formulation of mathematical models in fluid mechanics, combustion, heat transfer, solid mechanics, dynamics, and wave propagation. Prereq., MCEN 5020 and 5040, or equivalent. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students. Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

HUEN-1010 (3) Introduction to the Humanities

Explores a wide variety of challenging and interesting humanistic themes (love, responsibility, ambition, etc.) in many forms (fiction, philosophy, plays, poetry, art, music, etc.). In small discussion-based classes, emphasizes the writing, public speaking and critical thinking skills needed to excel as a professional engineer. Fulfills College of Engineering writing requirement for first-year freshmen only. Prerequisites: Restricted to students with 0-26 (Freshmen) College of Engineering majors only.

[College of Engineering & Applied Science](#) [Humanities for Engineers](#)

HUEN-1843 (3) Special Topics

Explores different important themes in the humanities; check with the department for specific semester topics. May be repeated up to 6 total credit hours. Prerequisites: Restricted to students with 0-56 credits (Freshmen or Sophomore) College of Engineering majors only.

[College of Engineering & Applied Science](#) [Humanities for Engineers](#)

HUEN-1850 (3) Engineering in History: The Social Impact of Technology

Explores how engineering has shaped who we are, how we think, and what we think about, by examining preconceived notions of progress, property, time, and work. Textbook readings plus original sources in philosophy, literature, psychology, and economics provide a rich and stimulating tour of engineering history. Prerequisites: Restricted to students with 0-56 (Freshmen or Sophomore) College of Engineering majors only.

[College of Engineering & Applied Science](#) [Humanities for Engineers](#)

HUEN-2010 (3) Tradition and Identity

Explores the place and possibility of personal identity both within and against the influence of tradition, including family, culture, language, and social, political and economic institutions. Via

literature and film, wrestles with the nature of freedom, self-determination, and belonging. Prerequisites: Restricted to College of Engineering majors only.

College of Engineering & Applied Science Humanities for Engineers

HUEN-2020 (3) The Meaning of Information Technology

Surveys the history of information technologies and modern techniques of information production, storage, transmission, and retrieval. Emphasizes understanding not only the technological transformations in interpersonal, organizational, and mass communication, but also the technological, social and political changes that underlie the movement toward a digital society. HUEN 2020 is restricted to ENGR majors only. ATLS 2000 is restricted to TAM students. ATLS 2000 and HUEN 2020 are the same course. Prerequisites: Restricted to College of Engineering majors only.

College of Engineering & Applied Science Humanities for Engineers

HUEN-2100 (3) History of Science and Technology to Newton

Spans invention and discovery from the Stone Age to the age of Newton, raising questions about culture, history, and personal expectation; studies Pyramids, odometers, cathedrals, Galileo, etc., on the way. Formerly HUEN 1100. Prerequisites: Restricted to College of Engineering majors only.

College of Engineering & Applied Science Humanities for Engineers

HUEN-2120 (3) History of Modern Science from Newton to Einstein

Surveys the great discoveries and theoretical disputes from Newtonian celestial mechanics to the theory of relativity. Includes physics, astronomy, chemistry, geology, and biology; closely examines scientific method, evolution, light and quantum theory. Uses original sources by Newton, Faraday, Lavoisier, Darwin, etc., for immediate contact with the great minds in science. Prerequisites: Restricted to College of Engineering majors only.

College of Engineering & Applied Science Humanities for Engineers

HUEN-2130 (3) History of Modern Technology from 1750 to the Atomic Bomb

Surveys the great innovations from the Steam Age to the Atomic Age: transportation, modern construction, communications, internal combustion, etc. Supplements textbook accounts with drawings, patents, and original selections by Edison, Carnegie, Tesla, Bell, etc. Studies the sociological impact of social change via contemporary sources in literature, philosophy, painting and film. Prerequisites: Restricted to College of Engineering majors only.

College of Engineering & Applied Science Humanities for Engineers

HUEN-2210 (3) Engineering, Science, and Society

Explores challenges that engineering and science pose for society plus the ways that societies shape or impede science and engineering. Case studies range from contemporary issues (global warming, nuclear weapons, and genetic engineering) to classic cases (the execution of Socrates). Core texts in the Western Tradition supplement contemporary articles and films. Prerequisites: Restricted to College of Engineering majors only.

College of Engineering & Applied Science Humanities for Engineers

HUEN-2843 (1-3) Special Topics

Explores different important themes in the humanities; check with the department for specific semester topics. May be repeated up to 6 total credit hours. Prerequisites: Restricted to College of Engineering majors only.

College of Engineering & Applied Science Humanities for Engineers

HUEN-3100 (3) Humanities for Engineers 1

Explores what it means to be a fully human being: through group discussion, closely examines individual works of culturally and historically significant philosophy, literature, and art. Includes extensive writing. Fulfills the College of Engineering & Applied Science writing requirement. Minimum GPA of 3.0 preferred. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

College of Engineering & Applied Science Humanities for Engineers

HUEN-3200 (3) Humanities for Engineers 2

Explores what it means to be a fully human being: through group discussion, closely examines individual works of culturally and historically significant philosophy, literature, and art. Includes extensive writing. Fulfills the College of Engineering and Applied Science writing requirement. Minimum GPA of 3.0 preferred. Prerequisites: Requires pre-requisite course of HUEN 3100. Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

College of Engineering & Applied Science Humanities for Engineers

HUEN-3700 (3) Culture Wars in Rome

Investigates in Rome, Italy (during Maymester), the cultural contrasts among three different cities: ancient, pagan, aristocratic Rome; medieval, Christian, theocratic Rome; and modern, secular, democratic Rome. Draws on evidence from Roman literature, politics, art, and architecture. Must have completed a minimum of 26 credit hours by start of course. Requires some preparatory work in Boulder.

College of Engineering & Applied Science Humanities for Engineers

HUEN-3750 (3) Xi'an, China: Self-Awareness and Images of the Other

Explores Chinese culture abroad, focusing on ideas of self and other within special historical, social, political, and economical circumstances. Chinese and American concepts of self and society, of individual, collective, and national identities will be analyzed. Held on the campus of Xi'an Jiaotong University, China. Prerequisite: HUEN 1010 or equivalent.

College of Engineering & Applied Science Humanities for Engineers

HUEN-3840 (1-3) Independent Study

Offers an opportunity for students to do independent work in the humanities. Subject arranged to fit the needs of the student. May be repeated up to 3 total credit hours. Instructor consent required. Prerequisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) College of Engineering students only.

College of Engineering & Applied Science Humanities for Engineers

HUEN-3843 (3) Special Topics

Explores different important themes in the humanities, check with department for specific semester topics. May be repeated up to 6 total credit hours. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

College of Engineering & Applied Science | Humanities for Engineers

HUEN-4200 (3) Humanities for Engineers 4

Continuation of HUEN 4100. Provides opportunity to pursue a variety of humanistic themes related to Herbst Humanities Program. Prereq., HUEN 4100.

MCEN-3025 (3) Component Design

Application of mechanics and materials science to the detailed design of various machine elements including shafts bearings, gears, brakes, springs, and fasteners. Emphasizes application and open-ended design problems. Prereq., MCEN 2063. Prerequisites: Requires pre-requisite course of MCEN 2063 (or CVEN 3161, or ASEN 3112).

[College of Engineering & Applied Science](#) [Mechanical Engineering](#) [Design](#)

MCEN-4045 (3) Mechanical Engineering Design Project 1

First part of a two-course capstone design experience in mechanical engineering. Covers problem definition, determining design requirements, alternative design concepts, engineering analysis, proof-of-concept prototype, and CAD drawings. Students make several oral design reviews, a final design presentation, and prepare a written report. Coreq., MCEN 4026. Prerequisites: Requires prerequisite courses of MCEN 3025 & 3032 & 3022 (or CHEN 3210) and GEEN 1400 (or ECEN 1400 or GEEN 3400). Restricted to students with 87-180 credits (Senior Mechanical Engineering majors or Mechanical Engineering Concurrent Degree majors only).

[College of Engineering & Applied Science](#) [Mechanical Engineering](#) [Design](#)

MCEN-4085 (4) Mechanical Engineering Design Project 2

Second part of a two-course capstone design experience in mechanical engineering. Includes refinement of prototype, design optimization, fabrication, testing, and evaluation. Students orally present the final design and prepare a written report and operation manual for the product. Prereq., MCEN 4026 and 4045. Prerequisites: Requires prerequisite courses of MCEN 4026 and MCEN 4045. Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical Engineering (MCEN) majors or Mechanical Engineering Concurrent Degree (C-MCEN) majors only.

College of Engineering & Applied Science Mechanical Engineering Design

MCEN-4115 (3) Mechantronics and Robotics I

Focuses on design and construction of microprocessor-controlled electro-mechanical systems. Lectures review critical circuit topics, introduce microprocessor architecture and programming, discuss sensor and actuator component selection, robotic systems, and design strategies for complex, multi-system devices. Lab work reinforces lectures and allows hands-on experience with robotic design. Students must design and build an autonomous robotic device. Project expenses may be incurred (\$50 maximum). Prereqs., ECEN 3010 or equivalent and GEEN 1300 or equivalent. Same as MCEN 5115. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical Engineering (MCEN) majors or Mechanical Engineering Concurrent Degree (C-MCEN) majors only.

College of Engineering & Applied Science Mechanical Engineering Design

MCEN-4135 (3) Wind Energy and Wind Turbine Design

Provides an excellent opportunity for students to learn about a current technology, wind energy, that is of high interest both technically and commercially. Students can then apply various technical courses they have had (e.g. fluid dynamics, dynamics and electric circuits, economics, etc.) to design a wind turbine and determine through economic analysis if their design is financially viable. Prereqs. for MCEN 4135 are two of MCEN 3021, 4043 or 3010 (min. grade C-) or equivalent. MCEN 5135 is restricted to MCEN, ASEN, or CVEN grad students only. MCEN 4135 and 5135 are the same course. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical Engineering (MCEN) or Environmental Engineering (EVEN) majors only.

College of Engineering & Applied Science Mechanical Engineering Design

MCEN-5025 (3) Computer-Aided Design of Mechanical Systems

Instructs students in displacement, velocity, and accelerations matrix formulation of mechanisms. Emphasizes numerical methods to solve simultaneous nonlinear algebraic and differential equations modeling mechanical devices. Involves analysis and synthesis of mechanical components and systems, including planar and spatial linkages, cams, springs, shafts, and gear trains. Prereqs., MCEN 3030 or equivalent, and MCEN 3025. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students. Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

College of Engineering & Applied Science Mechanical Engineering Design

MCEN-5115 (3) Mechantronics and Robotics I

Same as MCEN 4115. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students. Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

College of Engineering & Applied Science Mechanical Engineering Design

MCEN-5125 (3) Optimal Design of Mechanical Components

Applies linear and nonlinear optimization methods to the design of mechanical components and systems. Examines unconstrained and constrained optimization as well as formulation of objective functions, including cost, weight, response time, and deflection. Applies knowledge to gears, springs, cams, and linkages. Prereqs., MCEN 3025 and 3030 or equivalent. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students. Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

College of Engineering & Applied Science | Mechanical Engineering | Design

MCEN-5135 (3) Wind Energy and Wind Turbine Design

Provides an excellent opportunity for students to learn about a current technology, wind energy, that is of high interest both technically and commercially. Students can then apply various technical courses they have had (e.g. fluid dynamics, dynamics and electric circuits, economics, etc.) to design a wind turbine and determine through economic analysis if their design is financially viable. Prereqs. for MCEN 5135 are two of MCEN 3021, 4043 or 3010 (min. grade C-) or equivalent. MCEN 5135 is restricted to MCEN, ASEN, or CVEN grad students only. MCEN 4135 and 5135 are the same course. Prerequisites: Restricted to Mechanical Engineering, Civil Engineering or Aerospace Engineering graduate students only.

AREN-1027 (3) Engineering Drawing

Introduces engineering drawing including sections and dimensioning, print readings, and computer 3D modeling. Prerequisites: Restricted to students with 0-56 credits (Freshmen or Sophomore) Engineering Physics (EPEN), Architectural (AREN) or Civil (CVEN) Engineering majors only.

[College of Engineering & Applied Science](#) [Civil Engineering](#) [Miscellaneous](#)

AREN-1037 (3) Building Information Modeling

Learn to develop and communicate physical information using three-dimensional graphical systems including Computer-Aided Design (CAD) and Building Information Models (BIM). Learn to dimension and scale physical systems and interpret scaled drawings. Get experience with industry standard software tools (REVIT) used to produce design and construction documents, and apply BIM and CAD tools in a project producing scaled 3-D drawings.

[College of Engineering & Applied Science](#) [Civil Engineering](#) [Miscellaneous](#)

AREN-1316 (2) Introduction to Architectural Engineering

Surveys the broad subject of architectural engineering and professional practices. Includes professional design services, design documents, methods of construction delivery, materials for construction, codes and standards, life safety, professional ethics, structural systems, mechanical systems, electrical systems, and building systems integration. Prerequisites: Restricted to students with 0-56 (Freshmen or Sophomore) College of Engineering majors only.

[College of Engineering & Applied Science](#) [Civil Engineering](#) [Miscellaneous](#)

CVEN-1317 (2) Introduction to Civil and Environmental Engineering

Surveys the broad subject of civil and environmental engineering and professional practice. Includes the subdisciplines of structures, water resources, geotechnics, transportation, environment, and construction. Discusses professional ethics, important skills for engineers, and the engineering design process as it fulfills multiple objectives.

College of Engineering & Applied Science Civil Engineering Miscellaneous

CVEN-2012 (3) Introduction to Geomatics

Observes, analyzes, and presents basic linear, angular, area, and volume field measurements common to civil engineering endeavors with application of GPS and GIS technology. Prereq., APPM 1350 or equivalent. Prerequisites: Restricted to Architectural (AREN) or Civil (CVEN) Engineering majors only.

College of Engineering & Applied Science Civil Engineering Surveying and Transportation

AREN-2050 (3) Engineering Systems for Buildings

Provides an overview of the building mechanical and electrical systems, including HVAC, plumbing, solar, power distribution, illumination, life safety, transportation, and noise control systems. Emphasizes sustainable (green) building practices. Includes a team investigation of existing commercial building. Prereqs., AREN 1027 and 2406. Prerequisites: Restricted to Architectural (AREN) or Civil (CVEN) Engineering majors only.

College of Engineering & Applied Science Civil Engineering Building Systems Engineering

AREN-2110 (3) Thermodynamics

Explores fundamental principles of thermodynamics, including first and second law of thermodynamics, thermophysical properties, power and refrigeration cycles, gas mixtures and psychrometrics. Computing in the context of engineering problems is introduced. Prereq., PHYS 1110 or equivalent. Coreq., APPM 1360 or equivalent. Approved for arts and sciences core curriculum: natural science. Prerequisites: Restricted to Architectural (AREN), Civil (CVEN), or Environmental (EVEN) Engineering majors or Civil/Environmental (C-EVENCVEN) Engineering Concurrent Degree majors only.

College of Engineering & Applied Science Civil Engineering Building Systems Engineering

AREN-2120 (3) Fluid Mechanics and Heat Transfer

Explores fundamental principles of fluid dynamics and heat transfer. Topics include fluid statics, momentum, and energy conservation, laminar and turbulent viscous flow, convection heat transfer, conduction heat transfer, heat exchangers, and heat transfer. Prereqs., APPM 2350 and AREN 2110. Coreq., APPM 2360.

College of Engineering & Applied Science Civil Engineering Building Systems Engineering

CVEN-2121 (3) Analytical Mechanics 1

Covers forces acting on rigid bodies at rest. Equilibrium is the central concept that will be applied repeatedly to different situations. In each case, the object of interest will be isolated along with all the forces acting on it; a free body diagram. Equilibrium will be applied to analyze trusses, frames, machines, cables and hydrostatic forces on dams. Prereq., PHYS 1110. Prereq. or coreq., APPM 2350. Same as GEEN 3851. Restricted to freshmen or sophomore Civil, Environmental, or Architectural Engineering majors only. Prerequisites: Restricted to students with 0-56

(Freshmen or Sophomore) Civil (CVEN), Environmental (EVEN), or Architectural (AREN) Engineering majors only.

College of Engineering & Applied Science | Civil Engineering | Mechanics

AREN-2406 (3) Introduction to Building Construction

Covers the broad subject of building materials, assembly details, and their method of construction. Includes codes and classifications, foundations, wood, steel, concrete, masonry, cladding, doors and windows, interiors, and finishes. Formerly AREN 3406. Prerequisites: Restricted to students with 0-56 credits (Freshmen or Sophomore) Architectural Engineering (AREN) majors only.

College of Engineering & Applied Science | Civil Engineering | Construction

AREN-2830 (1-3) Special Topics

Supervised study of special topics of interest to students under instructor guidance. Prerequisites: Restricted to College of Engineering majors only.

College of Engineering & Applied Science | Civil Engineering | Special Topics

AREN-3010 (3) Mechanical Systems for Buildings

Lecture course on the analysis and design of buildings and their systems to satisfy the requirements for a comfortable and healthy indoor environment. Examines psychometrics, thermal comfort, building heating and cooling loads, fluid flow basics, and HVAC components and systems. Prereqs., AREN 2120 (or MCEN 3021 & 3022) and AREN 2110 (or GEEN 3852, or MCEN 3012, or ASEN 2002) and AREN 2050. Restricted to Architectural or Civil Engineering majors only. Prerequisites: Requires pre-requisite courses of AREN 2120 (or MCEN 3021 & 3022) and AREN 2110 (or GEEN 3852 or MCEN 3012 or ASEN 2002) and AREN 2050. Restricted to Architectural (AREN) or Civil (CVEN) Engineering majors only.

College of Engineering & Applied Science | Civil Engineering | Building Systems Engineering

CVEN-3022 (3) Construction Surveying

Studies construction and highway surveying, horizontal and vertical curves, earthwork, and analysis of data. Prereq., CVEN 2012.

College of Engineering & Applied Science | Civil Engineering | Surveying and Transportation

CVEN-3032 (3) Photogrammetry

Familiarizes students with characteristics of aerial photographs. Measures and interprets aerial photos for planimetric, topographic, hydrological, soil, and land use surveys. Analyzes and presents field measurements over extensive reaches. Prereq., instructor consent.

College of Engineering & Applied Science | Civil Engineering | Surveying and Transportation

AREN-3050 (3) Environmental Systems for Buildings 1

Introduces the operation and design of building systems for climate control, water and drainage, life safety, electrical supply, illumination, transportation (elevators and escalators), and noise control. For non-engineering majors. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Environmental Design majors only.

College of Engineering & Applied Science | Civil Engineering | Building Systems Engineering

AREN-3060 (3) Environmental Systems for Buildings 2

Continues the operation and design of building systems for climate control, water and drainage, life safety, electrical supply, illumination, transportation (elevators and escalators), and noise control. For non-engineering majors.

College of Engineering & Applied Science | Civil Engineering | Building Systems Engineering

CVEN-3111 (3) Analytical Mechanics 2

Studies the motion (kinematics) of particles and rigid bodies, and the forces that cause the motion (kinetics). Newton's laws as well as energy methods are used to study the motion of particles and rigid bodies in two and three dimensions. Prerequisites: Requires pre-requisite courses of CVEN 2121. Requires a co-requisite course of APPM 2360.

College of Engineering & Applied Science | Civil Engineering | Mechanics

AREN-3130 (3) Building Energy Laboratory

Laboratory course offering both hands-on experience with building and renewable energy systems and exposing students to the fundamentals of measurements, instrumentation, data acquisition, and statistical data analysis. Measurements and experiments will allow evaluation of building construction material, electrical equipment, lighting systems, heating and cooling systems, and solar energy devices, among others. Prereq., AREN 3010.

College of Engineering & Applied Science | Civil Engineering | Building Systems Engineering

AREN-3140 (3) Illumination Laboratory

Introduces the measurement of photometric and psychophysical quantities used in lighting. Experience is acquired in using light measurement instruments to evaluate lighting equipment and luminous environments. Prereq., AREN 3540.

College of Engineering & Applied Science | Civil Engineering | Building Systems Engineering

CVEN-3161 (3) Mechanics of Materials 1

Addresses concepts of stress and strain; material properties, axial loading, torsion, simple bending, and transverse shear; analysis of stress and strain; and deflections of beams. Includes selected experimental and computational laboratories. Prereq., CVEN 2121. Coreq., APPM 2360. Restricted to Architectural or Civil Engineering majors only. Credit not granted for this course and MCEN 2063. Prerequisites: Restricted to Architectural (AREN) or Civil (CVEN) Engineering majors only.

College of Engineering & Applied Science | Civil Engineering | Mechanics

CVEN-3227 (3) Probability, Statistics and Decision

Introduces uncertainty based analysis concepts and applications in the planning and design of civil engineering systems emphasizing probabilistic, statistics, and design concepts and methods. Restricted to juniors/seniors.

College of Engineering & Applied Science Civil Engineering Miscellaneous

CVEN-3246 (3) Introduction to Construction

Broad view of concerns, activities, and objectives of people involved in construction: the owner, architect/engineer, contractor, labor, and inspector. Interactive gaming situation relates these people to the construction contract, plans/specifications, estimates/bids, scheduling, law, and financial management. Restricted to junior or senior Civil or Architectural Engineering majors only. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) Civil (CVEN) or Architectural (AREN) Engineering majors only.

College of Engineering & Applied Science Civil Engineering Construction

CVEN-3256 (3) Construction Equipment and Methods

Integrated study of construction equipment, methods, and economics. Topics include equipment productivity, equipment selection, and construction engineering design within economic constraints. Examples include earthmoving, concrete formwork, and temporary construction. Recommended prereq., CVEN 3246. Restricted to Architectural or Civil Engineering majors only. Prerequisites: Restricted to Architectural (AREN) or Civil (CVEN) Engineering majors only.

College of Engineering & Applied Science Civil Engineering Construction

CVEN-3313 (3) Theoretical Fluid Mechanics

Basic principles of fluid mechanic. Covers fluid properties, hydrostatics, fluid flow concepts, including continuity, energy, momentum, dimensional analysis and similitude, and flow in closed conduits. Prereq., CVEN 2121. Prerequisites: Requires pre-requisite course of CVEN 2121 (or GEEN 3851, or ASEN 2001, or MCEN 2023).

College of Engineering & Applied Science Civil Engineering Fluid Mechanics & Water Resour

CVEN-3323 (3) Hydraulic Engineering

Studies hydraulic engineering theory and applications. Topics include incompressible flow in conduits, pipe system analysis and design, open channel flow, flow measurement, analysis and design of hydraulic machinery. Prereq., CVEN 3313 (or MCEN 3021, or GEEN 3853, or AREN 2120). Restricted to Civil, Environmental, or Architectural Engineering majors only. Prerequisites: Requires pre-requisite course of CVEN 3313 (or MCEN 3021, or GEEN 3853, or AREN 2120). Restricted to Civil (CVEN), Environmental (EVEN), or Architectural (ARCH) Engineering majors only.

AREN-1027 (3) Engineering Drawing

Introduces engineering drawing including sections and dimensioning, print readings, and computer 3D modeling. Prerequisites: Restricted to students with 0-56 credits (Freshmen or Sophomore) Engineering Physics (EPEN), Architectural (AREN) or Civil (CVEN) Engineering majors only.

[College of Engineering & Applied Science](#) [Civil Engineering](#) [Miscellaneous](#)

AREN-1037 (3) Building Information Modeling

Learn to develop and communicate physical information using three-dimensional graphical systems including Computer-Aided Design (CAD) and Building Information Models (BIM). Learn to dimension and scale physical systems and interpret scaled drawings. Get experience with industry standard software tools (REVIT) used to produce design and construction documents, and apply BIM and CAD tools in a project producing scaled 3-D drawings.

[College of Engineering & Applied Science](#) [Civil Engineering](#) [Miscellaneous](#)

AREN-1316 (2) Introduction to Architectural Engineering

Surveys the broad subject of architectural engineering and professional practices. Includes professional design services, design documents, methods of construction delivery, materials for construction, codes and standards, life safety, professional ethics, structural systems, mechanical systems, electrical systems, and building systems integration. Prerequisites: Restricted to students with 0-56 (Freshmen or Sophomore) College of Engineering majors only.

[College of Engineering & Applied Science](#) [Civil Engineering](#) [Miscellaneous](#)

AREN-4317 (5) Architectural Engineering Design

Provides a capstone experience to AREN students. Students design a modest commercial building and complete an integrated engineering design of the building systems executed for the conceptual, schematic, and design development phases. Students' teams work on structural, mechanical, electrical/lighting, and construction engineering management design. Each stage produce a professional-quality design document. Faculty and industry mentors participate in the teaching and evaluation of designs. Prerequisites: Requires pre-requisite courses of AREN 3010, CVEN 3246, CVEN 3525, and AREN 3540 (all min grade C-). Requires a pre-requisite or co-requisite course of AREN 4570.

MCEN-1000 (1) Freshmen Seminar

Lect. and lab. Introduces facets of mechanical engineering including history of the profession, mechanical engineering curriculum, industries in which mechanical engineers practice, and expectations and tools for academic success. Students participate in hands-on experiences, visit industry, make oral presentations, meet faculty and practicing professionals, and develop goal statements. Restricted to students with 0-26 units (Freshmen) Mechanical Engineering majors only. Prerequisites: Restricted to students with 0-26 units (Freshmen) Mechanical Engineering majors only.

HUEN-1010 (3) Introduction to the Humanities

Explores a wide variety of challenging and interesting humanistic themes (love, responsibility, ambition, etc.) in many forms (fiction, philosophy, plays, poetry, art, music, etc.). In small discussion-based classes, emphasizes the writing, public speaking and critical thinking skills needed to excel as a professional engineer. Fulfills College of Engineering writing requirement for first-year freshmen only. Prerequisites: Restricted to students with 0-26 (Freshmen) College of Engineering majors only.

MCEN-1025 (4) Computer-Aided Design and Fabrication

Introduces engineering design graphics. Includes learning a contemporary computer-aided design (CAD) software application and relevant engineering graphics concepts, such as orthographic projection, sections, engineering drawing practices, geometric dimensioning and tolerancing, and an introduction to manufacturing methods. Entails a final design project using rapid prototyping. Restricted to MCEN majors. Prerequisites: Restricted to Mechanical Engineering or Engineering Physics majors only.

ECEN-1100 (1) Freshman Seminar

Introduces students to areas of emphasis with the ECE department through seminars presented by faculty and outside speakers. Emphasizes career opportunities, professional ethics and practices, history of the profession, and resources for academic success. Several sessions promote team building and problem solving, and provide opportunities for freshmen to meet their classmates. Prerequisites: Restricted to College of Engineering majors only.

[College of Engineering & Applied Science](#)
[Electrical & Computer Engineering](#)
[General](#)

ECEN-1400 (3) Introduction to Digital and Analog Electronics

Introduces fundamental concepts in electrical and computer engineering such as Ohm's Law, capacitors, Leds and 7-segment displays, transformers and rectifiers, digital logic, Fourier decomposition, frequency analysis. Lab work exposes students to commonly used instrumentation. Includes a final project. Skills in wiring, soldering and wire-wrapping are developed. Coreq., APPM 1350.

[College of Engineering & Applied Science](#)
[Electrical & Computer Engineering](#)
[General](#)

ECEN-1500 (3) Sustainable Energy

Explores how energy is created and used in today's society. Through collaborative discussion and hands-on data collection, students will analyze the engineering challenges, fundamental limits, and potential solutions to meeting our energy needs sustainably. Students will learn to analyze numerical data, estimate orders, of magnitude, and apply mathematical methods in their own lives and in the ongoing energy debate. Basic algebra required. Restricted to non-engineering majors. Approved for arts and sciences core curriculum: quantitative reasoning and mathematical skills.

[College of Engineering & Applied Science](#)
[Electrical & Computer Engineering](#)
[General](#)

ECEN-1840 (1-6) Independent Study

Provides an opportunity for freshmen to do independent, creative work. Numbered ECEN 1840 through ECEN 1849. Prereq., instructor consent.

|--|-----------------------------------|---------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | General |
|--|-----------------------------------|---------|

ECEN-2250 (3) Introduction to Circuits and Electronics

Introduces linear circuit analysis and design, including extensive use of OP amps. Presents DC networks, including node and mesh analysis with controlled sources. Analysis of RL and RC circuits for both transient and sinusoidal steady-state responses using phasors. Prereq., APPM 1360. Coreq., APPM 2360. Prerequisites: Restricted to College of Engineering majors only.

| | | |
|--|-----------------------------------|---------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | General |
|--|-----------------------------------|---------|

ECEN-2260 (3) Circuits as Systems

Continues basic circuit analysis of ECEN 2250: Laplace transform techniques, transfer functions, frequency response, Bode diagrams, resonant circuits, Fourier series expansions, and convolution. Prereq., ECEN 2250. Coreq., Electronics Design Laboratory. Prerequisites: Requires pre-requisite course of ECEN 2250 (minimum grade C-). Restricted to College of Engineering students only.

| | | |
|--|-----------------------------------|---------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | General |
|--|-----------------------------------|---------|

ECEN-2270 (3) Electronics Design Lab

Provides an introduction to analysis, modeling, design, and testing of analog electronic circuits in a practical laboratory setting. The laboratory is centered around a robot platform and includes design, Spice simulations, prototyping and testing of circuits necessary to drive and remote control the robot. Coreq., ECEN 2260. Prerequisites: Restricted to College of Engineering majors only.

| | | |
|--|-----------------------------------|---------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | General |
|--|-----------------------------------|---------|

ECEN-2350 (3) Digital Logic

Covers the design and applications of digital logic circuits, including combinational and sequential logic circuits. Laboratory component introduces simulation and synthesis software and hands-on hardware design. Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) College of Engineering students only. Prereq., ECEN 1030 or CSCI 1300. Prerequisites: Requires pre-requisite course of ECEN 1030 or CSCI 1300 (minimum grade C-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) College of Engineering students only.

| | | |
|--|-----------------------------------|---------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | General |
|--|-----------------------------------|---------|

ECEN-2420 (3) Electronics for Wireless Systems

Explores fundamental principles behind the operation of a radio, including a practical introduction to circuit elements. The course covers the components and operation of a radio (transmitter and receiver) with simple signals. Students learn through demos the practical basic properties of all needed components with an introduction to principles of operation. Prereqs., PHYS 1120, and APPM 1360 or MATH 2300. Restricted to EN majors. Prerequisites: Restricted to Electrical and Computer Engineering or Electrical Engineering majors only.

| | | |
|--|-----------------------------------|---------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | General |
|--|-----------------------------------|---------|

ECEN-2703 (3) Discrete Mathematics for Computer Engineers

Emphasizes elements of discrete mathematics appropriate for computer engineering. Topics: logic, proof techniques, algorithms, complexity, relations, and graph theory. Prereqs., ECEN 1030/CSCI 1300 and APPM 1360.

|--|-----------------------------------|------------------|

ECEN-3010 (3) Circuits and Electronics for Mechanical Engineers

Covers analysis of electrical circuits by use of Ohm's law, network reduction, node and loop analysis, Thevenin's and Norton's theorems, DC and AC signals, transient response of simple circuits, transfer functions, basic diode and transistor circuits, and operational amplifiers. Includes introductory digital electronics and microprocessors/microcontrollers. Prereqs., APPM 2360 and PHYS 1140. Same as MCEN 3017. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) Mechanical Engineering (MCEN) or Environmental Engineering (EVEN) majors.

| | | |
|--|-----------------------------------|---------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | General |
|--|-----------------------------------|---------|

ECEN-3030 (3) Electrical/Electronic Circuits Non-Major

For students not majoring in electrical engineering. Covers analysis of electric circuits by use of Ohm's law; network reduction; super position; node and loop analysis; Thevenin's and Norton's theorems; sinusoidal signals; phasors; power in ac circuits; transient response of simple circuits; operational amplifiers; logic circuits; and flip-flops. Prereq., APPM 2360. Restricted to nonmajors. Same as GEEN 3854. Prerequisites: Electrical/Computer Engineering Majors, Electrical Engineering Majors or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree Majors are restricted from taking this course.

| | | |
|--|-----------------------------------|---------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | General |
|--|-----------------------------------|---------|

ECEN-3070 (3) Edges of Science

Examines the evidence for paranormal phenomena, reasons for skepticism, and physical models that could account for the data. Reviews controversial scientific theories that overcame barriers to acceptance, and how worldviews shift. Considers the scientific method and ways uncontrolled factors might influence experiments. Develops skills in statistical analysis of data. Includes group projects testing for anomalous and parapsychological effects. Not accepted as a technical elective for engineering majors. Prereq., MATH 1011 or equivalent.

| | | |
|--|-----------------------------------|---------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | General |
|--|-----------------------------------|---------|

ECEN-3170 (3) Energy Conversion 1

Introduces block diagrams, conventional/renewable energy sources, power electronics, magnetic circuits, transformers and power systems, forces/torques of electric machines. Employs a top-down approach to present applications first and then discuss components. Uses Pspice, Mathematica, Matlab. Prereq., PHYS 1120. Coreq., ECEN 3250. Prerequisites: Restricted to College of Engineering majors only.

College of Engineering & Applied Science | Electrical & Computer Engineering | General

ECEN-3250 (3) Microelectronics

Develops a basic understanding of active semiconductor devices. Focuses on building an understanding of BJT and CMOS devices in both digital and analog application. Prereq., ECEN 2260. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

College of Engineering & Applied Science | Electrical & Computer Engineering | General

ECEN-3300 (3) Linear Systems

Characterization of linear and time-invariant systems in time and frequency domains. Continuous time systems are analyzed using differential equations and Laplace and Fourier transforms. Discrete time systems, which can be implemented using a modern digital signal processing framework, use difference equations, z-transforms and discrete time Fourier transforms for their analysis and design. Applications of linear systems include communications, signal processing, and control systems. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

ECEN-1400 (3) Introduction to Digital and Analog Electronics

Introduces fundamental concepts in electrical and computer engineering such as Ohm's Law, capacitors, Leds and 7-segment displays, transformers and rectifiers, digital logic, Fourier decomposition, frequency analysis. Lab work exposes students to commonly used instrumentation. Includes a final project. Skills in wiring, soldering and wire-wrapping are developed. Coreq., APPM 1350.

[College of Engineering & Applied Science](#)
[Electrical & Computer Engineering](#)
[General](#)

ECEN-1500 (3) Sustainable Energy

Explores how energy is created and used in today's society. Through collaborative discussion and hands-on data collection, students will analyze the engineering challenges, fundamental limits, and potential solutions to meeting our energy needs sustainably. Students will learn to analyze numerical data, estimate orders, of magnitude, and apply mathematical methods in their own lives and in the ongoing energy debate. Basic algebra required. Restricted to non-engineering majors. Approved for arts and sciences core curriculum: quantitative reasoning and mathematical skills.

[College of Engineering & Applied Science](#)
[Electrical & Computer Engineering](#)
[General](#)

ECEN-1840 (1-6) Independent Study

Provides an opportunity for freshmen to do independent, creative work. Numbered ECEN 1840 through ECEN 1849. Prereq., instructor consent.

ECEN-2250 (3) Introduction to Circuits and Electronics

Introduces linear circuit analysis and design, including extensive use of OP amps. Presents DC networks, including node and mesh analysis with controlled sources. Analysis of RL and RC circuits for both transient and sinusoidal steady-state responses using phasors. Prereq., APPM 1360. Coreq., APPM 2360. Prerequisites: Restricted to College of Engineering majors only.

| | | |
|--|-----------------------------------|---------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | General |
|--|-----------------------------------|---------|

ECEN-2260 (3) Circuits as Systems

Continues basic circuit analysis of ECEN 2250: Laplace transform techniques, transfer functions, frequency response, Bode diagrams, resonant circuits, Fourier series expansions, and convolution. Prereq., ECEN 2250. Coreq., Electronics Design Laboratory. Prerequisites: Requires pre-requisite course of ECEN 2250 (minimum grade C-). Restricted to College of Engineering students only.

| | | |
|--|-----------------------------------|---------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | General |
|--|-----------------------------------|---------|

ECEN-2270 (3) Electronics Design Lab

Provides an introduction to analysis, modeling, design, and testing of analog electronic circuits in a practical laboratory setting. The laboratory is centered around a robot platform and includes design, Spice simulations, prototyping and testing of circuits necessary to drive and remote control the robot. Coreq., ECEN 2260. Prerequisites: Restricted to College of Engineering majors only.

| | | |
|--|-----------------------------------|---------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | General |
|--|-----------------------------------|---------|

ECEN-2350 (3) Digital Logic

Covers the design and applications of digital logic circuits, including combinational and sequential logic circuits. Laboratory component introduces simulation and synthesis software and hands-on hardware design. Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) College of Engineering students only. Prereq., ECEN 1030 or CSCI 1300. Prerequisites: Requires pre-requisite course of ECEN 1030 or CSCI 1300 (minimum grade C-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) College of Engineering students only.

| | | |
|--|-----------------------------------|---------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | General |
|--|-----------------------------------|---------|

ECEN-2420 (3) Electronics for Wireless Systems

Explores fundamental principles behind the operation of a radio, including a practical introduction to circuit elements. The course covers the components and operation of a radio (transmitter and receiver) with simple signals. Students learn through demos the practical basic properties of all needed components with an introduction to principles of operation. Prereqs., PHYS 1120, and APPM 1360 or MATH 2300. Restricted to EN majors. Prerequisites: Restricted to Electrical and Computer Engineering or Electrical Engineering majors only.

| | | |

ECEN-2840 (1-6) Independent Study

Offers an opportunity for sophomores to do independent, creative work. Numbered ECEN 2840 through ECEN 2849. Prereq., instructor consent.

| | | |
|--|-----------------------------------|---------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | General |
|--|-----------------------------------|---------|

ECEN-3010 (3) Circuits and Electronics for Mechanical Engineers

Covers analysis of electrical circuits by use of Ohm's law, network reduction, node and loop analysis, Thevenin's and Norton's theorems, DC and AC signals, transient response of simple circuits, transfer functions, basic diode and transistor circuits, and operational amplifiers. Includes introductory digital electronics and microprocessors/microcontrollers. Prereqs., APPM 2360 and PHYS 1140. Same as MCEN 3017. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) Mechanical Engineering (MCEN) or Environmental Engineering (EVEN) majors.

| | | |
|--|-----------------------------------|---------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | General |
|--|-----------------------------------|---------|

ECEN-3030 (3) Electrical/Electronic Circuits Non-Major

For students not majoring in electrical engineering. Covers analysis of electric circuits by use of Ohm's law; network reduction; super position; node and loop analysis; Thevenin's and Norton's theorems; sinusoidal signals; phasors; power in ac circuits; transient response of simple circuits; operational amplifiers; logic circuits; and flip-flops. Prereq., APPM 2360. Restricted to nonmajors. Same as GEEN 3854. Prerequisites: Electrical/Computer Engineering Majors, Electrical Engineering Majors or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree Majors are restricted from taking this course.

| | | |
|--|-----------------------------------|---------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | General |
|--|-----------------------------------|---------|

ECEN-3070 (3) Edges of Science

Examines the evidence for paranormal phenomena, reasons for skepticism, and physical models that could account for the data. Reviews controversial scientific theories that overcame barriers to acceptance, and how worldviews shift. Considers the scientific method and ways uncontrolled factors might influence experiments. Develops skills in statistical analysis of data. Includes group projects testing for anomalous and parapsychological effects. Not accepted as a technical elective for engineering majors. Prereq., MATH 1011 or equivalent.

| | | |
|--|-----------------------------------|---------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | General |
|--|-----------------------------------|---------|

ECEN-3170 (3) Energy Conversion 1

Introduces block diagrams, conventional/renewable energy sources, power electronics, magnetic circuits, transformers and power systems, forces/torques of electric machines. Employs a top-down approach to present applications first and then discuss components. Uses Pspice, Mathematica, Matlab. Prereq., PHYS 1120. Coreq., ECEN 3250. Prerequisites: Restricted to College of Engineering majors only.

| | | |
|--|-----------------------------------|---------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | General |
|--|-----------------------------------|---------|

ECEN-3250 (3) Microelectronics

Develops a basic understanding of active semiconductor devices. Focuses on building an understanding of BJT and CMOS devices in both digital and analog application. Prereq., ECEN 2260. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

| | | |
|--|-----------------------------------|---------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | General |
|--|-----------------------------------|---------|

ECEN-3300 (3) Linear Systems

Characterization of linear and time-invariant systems in time and frequency domains. Continuous time systems are analyzed using differential equations and Laplace and Fourier transforms. Discrete time systems, which can be implemented using a modern digital signal processing framework, use difference equations, z-transforms and discrete time Fourier transforms for their analysis and design. Applications of linear systems include communications, signal processing, and control systems. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

| | | |
|--|-----------------------------------|---------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | General |
|--|-----------------------------------|---------|

ECEN-3320 (3) Semiconductor Devices

Highlights the fundamentals of semiconductor materials and devices. Topics include the electrical and optical properties of semiconductors, the theory of Pn junctions, bipolar and field-effect transistors, and optoelectronic devices. Prereq., ECEN 3250. Prerequisites: Restricted to College of Engineering majors only.

College of Engineering & Applied Science | Electrical & Computer Engineering | General

ECEN-3350 (3) Programming Digital Systems

Covers computer usage in system implementation, central processor capabilities, and managing concurrency. Includes computer architecture, instruction sets, programming, input/output, interrupts, block transfers, semaphores, shared procedures, multiple processors, and memory management. Prereq., ECEN 2350. Formerly ECEN 2120. Prerequisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) College of Engineering students only.

College of Engineering & Applied Science | Electrical & Computer Engineering | General

ECEN-3400 (3) Electromagnetic Fields and Waves

Electromagnetic fields are covered at an introductory level, starting with electrostatics and continuing with DC current, magnetostatics, time-varying magnetic fields, waves on transmission lines, Maxwell's equations and the basics of plane waves. The use of fields in inductors, capacitors, resistors, transformers, and energy and power concepts are studied. Prereqs., APPM 2350, PHYS 1110, and ECEN 2250. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

College of Engineering & Applied Science | Electrical & Computer Engineering | General

ECEN-3410 (3) Electromagnetic Waves and Transmission

Covers reflected and transmitted plane waves in layered media, Poynting's theorem of electromagnetic power, two-conductor transmission line theory and practice, Smith chart usage and impedance matching, and elements of antenna theory. Prereq., ECEN 3400. Restricted to juniors/seniors. Prerequisites: Restricted to students with 57-180 credits (Juniors or Seniors).

GEEN-1100 (3) Social Impact of Technology

Introduces undergraduate students to the social impact of technology and how technology impacts all aspects of life, the health of planet Earth, and how people interact with each other. Fulfills Engineering social science requirements. Prerequisites: Restricted to College of Engineering majors only.

[College of Engineering & Applied Science](#) [Engineering Administration](#)

EHON-1151 (3) Critical Encounters

Explores critical, literary and philosophical approaches to the following related problems: 1) how we organize knowledge and construct meaning, and 2) how we locate a sense of self as both individuals and members of various groups amidst the resources and demands of competing interpretations, traditions challenges and circumstances. Prereq., honors standing or instructor consent required. Prerequisites: Restricted to College of Engineering majors only.

[College of Engineering & Applied Science](#) [Engineering Administration](#)

GEEN-1235 (4) Pre-Calculus for Engineers

Prepares students for the challenging content and pace of the calculus sequence required for all engineering majors. The course covers algebra, trigonometry and selected topics in analytical geometry. It prepares students for the calculus courses offered for engineering students. It requires students to engage in rigorous work sessions as they review topics that they must be comfortable with to pursue engineering course work. The course is structured to accustom students to the pace and culture of learning encountered in engineering math courses.

[College of Engineering & Applied Science](#) [Engineering Administration](#)

GEEN-1300 (3) Introduction to Engineering Computing

Introduces the use of computers in engineering problem solving, including elementary numerical methods. Teaches programming fundamentals, including data and algorithm structure, and modular programming. Software vehicles include Excel/Vba and Matlab. Coreq., APPM 1350 or equivalent. Restricted to ENGR majors. Prerequisites: Restricted to College of Engineering majors only.

College of Engineering & Applied Science Engineering Administration

GEEN-1350 (1) Calculus 1 Work Group

Provides problem-solving assistance to students enrolled in APPM 1350. Student groups work in collaborative learning environment. Student participation is essential. Grading under pass/fail option only. Coreq., APPM 1350.

College of Engineering & Applied Science Engineering Administration

GEEN-1360 (1) Calculus 2 Work Group

Provides problem solving assistance for students enrolled in APPM 1360. Conducted in a collaborative learning environment. Student work groups solve calculus problems with assistance of facilitator. Grading under pass/fail option only. Prereq., APPM 1350. Coreq., APPM 1360.

College of Engineering & Applied Science Engineering Administration

GEEN-1400 (3) Engineering Projects

First-year engineering students work to solve real engineering design problems in interdisciplinary teams. Completed projects are exhibited at an end-of-semester design expo. In lieu of a textbook (available online), each student is expected to contribute up to \$75 towards their design project and poster, and purchase his/her own pair of safety glasses. Restricted to Engineering majors with 75 or fewer cumulative hours. Prerequisites: Restricted to College of Engineering majors with 75 or less cumulative hours.

College of Engineering & Applied Science Engineering Administration

GEEN-1410 (3) Social Innovation and Design for Sustainable Communities

Learn to apply principles of sustainability to designs. Student teams design solutions integrating scientific and social science perspectives. Emphasis is on the design process applied to sustainable solutions to real world problems. Restricted to students in the Williams Village North RAPs. Prerequisites: Restricted to Sustainability by Design Residential Academic Program (PSBD) or Sustainability and Social Innovation (SSI) Residential Academic Program (PSEE) students only.

College of Engineering & Applied Science Engineering Administration

EHON-1500 (1) Honors Reading Group

Faculty led reading seminars, focusing on specific text or texts chosen by the faculty. Special attention will be paid to group formation and the process of collaborative learning. Restricted to Engineering Honors Program (PHEN) students only or instructor consent required. Prerequisites: Restricted to Engineering Honors Program (PEHN) students only.

College of Engineering & Applied Science Engineering Administration

GEEN-1500 (2) Introduction to Engineering

Provides an introduction to the engineering profession, to include a focus on the engineering grand challenges of the future, professional and ethical expectations, and an examination of current disciplines specializations. Provides sufficient knowledge of the engineering disciplines necessary to make an informed major choice. Restricted to Engineering Majors with 75 or less cumulative hours. Prerequisites: Restricted to College of Engineering majors with 75 or less cumulative hours.

College of Engineering & Applied Science | Engineering Administration

GEEN-1510 (1) Self Management and Leadership Principles 1

Develops group cohesiveness, mutual support, multicultural awareness, and leadership skills. Topics include collaborative learning, motivation, time management and study skills, personal assertiveness, and career awareness. Open to new freshmen and transfer students. Controlled enrollment. Fulfills one credit hour of the Engineering social science requirement. Prerequisites: Restricted to College of Engineering majors only.

College of Engineering & Applied Science | Engineering Administration

GEEN-1520 (1) Self Management and Leadership Principles 2

Continuation of GEEN 1510. Controlled enrollment. Prereq., GEEN 1510. Prerequisites: Restricted to College of Engineering majors only.

College of Engineering & Applied Science | Engineering Administration

GEEN-1550 (1) YOU'RE@CU: Undergraduate Career Seminar

Exposes first or second year undergraduate students to engineering research careers through a partner program (YOU'RE@CU), panel discussions with researchers in academics and industry, and exposure to research labs. Restricted to YOU'RE@CU participants. Restricted enrollment; offered pass/fail only.

College of Engineering & Applied Science | Engineering Administration

GEEN-2050 (3) Engineering Leadership Gateway

Examines concepts of engineering leadership and the essential skills required to become an effective leader. Together students will explore leadership principles, creative and critical thinking, interpersonal skills (e.g. collaboration, conflict resolution, leading in diverse communities), intrapersonal development (e.g. self-appraisal, reflective practice, personal leadership philosophy), organizational competencies (e.g. planning, sustainability, climate), effective communication and ethical decision-making. Instructor consent required. Prerequisites: Restricted to College of Engineering majors only.

College of Engineering & Applied Science | Engineering Administration

GEEN-2350 (1) Calculus 3 Work Group

Provides problem solving assistance to students enrolled in APPM 2350. This course is conducted in a collaborative learning environment. Student work groups solve calculus problems with the assistance of a facilitator. Grading only under pass/fail option. Prereq., APPM 1360. Coreq., APPM 2350.

College of Engineering & Applied Science Engineering Administration

GEEN-3400 (3) Invention and Innovation

Introduction to invention and product innovation with a hands-on approach. Students explore the invention process, hone their engineering design skills, and explore entrepreneurship (patenting, intellectual property, marketing, raising capital). Student teams design, create, and test a potentially commercial product, and exhibit at an end-of-semester design expo. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

College of Engineering & Applied Science Engineering Administration

GEEN-3851 (3) Statics for Engineers

Examines vector treatment of force systems and their resultants; equilibrium of frames and machines, including internal forces and three-dimensional configurations; static friction; properties of surfaces, including first and second moments; hydrostatics; and minimum potential energy and stability. Prereq., PHYS 1110. Recommended coreq., APPM 2350. Same as CVEN 2121.

College of Engineering & Applied Science Engineering Administration

GEEN-3852 (3) Thermodynamics for Engineers

Explores fundamental concepts and basic theory, including first and second laws of thermodynamics, properties, states, thermodynamic functions and cycles. Prereq., APPM 2350. Same as MCEN 3012.

College of Engineering & Applied Science Engineering Administration

GEEN-3853 (3) Fluid Mechanics for Engineers

Introduces fluid mechanics and momentum transfer, emphasizing the application of these principles to engineering systems. Prereqs., APPM 2350 or 2360, and GEEN 1300 or CSCI 1300. Same as CHEN 3200.

College of Engineering & Applied Science Engineering Administration

GEEN-3930 (6) Engineering Co-op

Students enrolled in this course participate in a previously arranged, department-sponsored cooperative education program with a university, government agency, or industry. This course is offered only through Continuing Education and may be repeated up to 24 credit hours (four co-op terms). GPA higher than 2.75 is required. GPA higher than 3.00 is strongly recommended.

College of Engineering & Applied Science Engineering Administration

EHON-4051 (1) Dimensions of Leadership

Explores the many dimensions of leadership that exceed technical knowledge: the ethical, societal, cultural, interpersonal, and personal. Through seminars, workshops and exposure to leaders, students will reflect upon their engineering education in light of the multifaceted demands of effective leadership and their own personal career goals. Students will take an active role in shaping the course. Prereq., junior standing; honors standing or instructor consent. Repeatable for credit up to 3 credit hours.

College of Engineering & Applied Science | Engineering Administration

GEEN-4830 (3) Special Topics

May be repeated up to 6 total credit hours. Prerequisites: Restricted to College of Engineering and Applied Science BS students or BS/MS Concurrent Degree Students only.

CHEN-1211 (3) General Chemistry for Engineers

Lect. a one-semester course designed to meet the general chemistry requirement for engineering students. Topics include stoichiometry; thermodynamics; gases, liquids, and solids; equilibrium; acids and bases; bonding concepts; kinetics; reactions; and materials science. Examples and problems illustrate the application of chemistry to engineering subdisciplines. Restricted to students with one year of high school chemistry or CHEM 1001 or 1021 (min. grade C-); and high school algebra. Not recommended for students with grades below B- in CHEM 1001 or 1021. Credit not granted for this course and CHEM 1111, 1113/1114, 1251, or 1351. Prerequisites: Requires co-requisite course of CHEM 1221. Restricted to College of Engineering Majors only.

CSCI-1220 (4) Virtual Worlds: An Introduction to Computer Science

Introduces the fundamental principles of computer science using an on-line virtual world called Second Life as the "Laboratory" for the course. Students will learn how to program by creating objects of interest in Second Life. In-class and in-world discussions and readings will introduce the student to important ideas and concepts that shape the field of computer science. Same as ATLS 1220.

CVEN-1317 (2) Introduction to Civil and Environmental Engineering

Surveys the broad subject of civil and environmental engineering and professional practice. Includes the subdisciplines of structures, water resources, geotechnics, transportation, environment, and construction. Discusses professional ethics, important skills for engineers, and the engineering design process as it fulfills multiple objectives.

[College of Engineering & Applied Science](#)
[Civil Engineering](#)
[Miscellaneous](#)

CVEN-3227 (3) Probability, Statistics and Decision

Introduces uncertainty based analysis concepts and applications in the planning and design of civil engineering systems emphasizing probabilistic, statistics, and design concepts and methods. Restricted to juniors/seniors.

[College of Engineering & Applied Science](#)
[Civil Engineering](#)
[Miscellaneous](#)

CVEN-4087 (3) Construction Contract Administration

Students will develop a working understanding of the various types of contracts, key contract provisions, how to evaluate contract risk, ethical requirements, and most importantly explore effective contract administration. Construction and engineering contracts are at the core of all project relationships. Through lecture, group dialog and case studies students will develop confidence in their ability to assess, understand and deploy contract administration in a construction setting. Prereq., senior standing in civil or architectural engineering or instructor consent.

[Miscellaneous](#)

CVEN-4147 (3) Civil Engineering Systems

Theory and application of the principles of engineering economics, and classical and metaheuristic optimization techniques for evaluating problems in civil and environmental engineering. Same as CVEN 5147. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Engineering majors only.

College of Engineering & Applied Science | Civil Engineering | Miscellaneous

CVEN-4537 (3) Numerical Methods in Civil Engineering

Introduces the use of numerical methods in the solution of civil engineering problems, emphasizing obtaining solutions with high-speed electronic computers. Applies methods to all types of civil engineering problems. Prereq., senior standing. Same as CVEN 5537.

College of Engineering & Applied Science | Civil Engineering | Miscellaneous

CVEN-4837 (1-3) Special Topics

College of Engineering & Applied Science | Civil Engineering | Miscellaneous

CVEN-5147 (3) Civil Engineering Systems

Same as CVEN 4147. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Civil Engineering | Miscellaneous

CVEN-5537 (3) Numerical Methods in Civil Engineering

Prereq., graduate standing. Same as CVEN 4537. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Civil Engineering | Miscellaneous

CVEN-5837 (3) Special Topics for Seniors/Grads

Supervised study of special topics of interest to students under instructor guidance. Prereq., instructor consent.

College of Engineering & Applied Science | Civil Engineering | Miscellaneous

CVEN-5939 (3) Sustainable Community Development Field Practicum

Provides a supervised in-field practicum experience in which the student applies theories and concepts learned in Sustainable Community Development I and II (CVEN 5919 and 5929). Prereqs., CVEN 5919 and 5929 or instructor consent. Restricted to students with EDC sub-plan. Prerequisites: Restricted to students with EDC Sub-Plan.

AREN-1316 (2) Introduction to Architectural Engineering

Surveys the broad subject of architectural engineering and professional practices. Includes professional design services, design documents, methods of construction delivery, materials for construction, codes and standards, life safety, professional ethics, structural systems, mechanical systems, electrical systems, and building systems integration. Prerequisites: Restricted to students with 0-56 (Freshmen or Sophomore) College of Engineering majors only.

CVEN-1317 (2) Introduction to Civil and Environmental Engineering

Surveys the broad subject of civil and environmental engineering and professional practice. Includes the subdisciplines of structures, water resources, geotechnics, transportation, environment, and construction. Discusses professional ethics, important skills for engineers, and the engineering design process as it fulfills multiple objectives.

ASEN-1400 (3) Gateway to Space

Introduces the basics of atmosphere and space sciences, space exploration, spacecraft design, rocketry, and orbits. Students design, build, and launch a miniature satellite on a high altitude balloon. Explores the current research in space through lectures from industry. Formerly ASEN 2500. Same as ASTR 2500. Prerequisites: Restricted to students with 0-26 (Freshmen) College of Engineering majors only.

ECEN-1400 (3) Introduction to Digital and Analog Electronics

Introduces fundamental concepts in electrical and computer engineering such as Ohm's Law, capacitors, Leds and 7-segment displays, transformers and rectifiers, digital logic, Fourier decomposition, frequency analysis. Lab work exposes students to commonly used instrumentation. Includes a final project. Skills in wiring, soldering and wire-wrapping are developed. Coreq., APPM 1350.

[College of Engineering & Applied Science](#)
[Electrical & Computer Engineering](#)
[General](#)

GEEN-1400 (3) Engineering Projects

First-year engineering students work to solve real engineering design problems in interdisciplinary teams. Completed projects are exhibited at an end-of-semester design expo. In lieu of a textbook (available online), each student is expected to contribute up to \$75 towards their design project and poster, and purchase his/her own pair of safety glasses. Restricted to Engineering majors with 75 or fewer cumulative hours. Prerequisites: Restricted to College of Engineering majors with 75 or less cumulative hours.

[College of Engineering & Applied Science](#)
[Engineering Administration](#)

GEEN-1410 (3) Social Innovation and Design for Sustainable Communities

Learn to apply principles of sustainability to designs. Student teams design solutions integrating scientific and social science perspectives. Emphasis is on the design process applied to sustainable solutions to real world problems. Restricted to students in the Williams Village North RAPs. Prerequisites: Restricted to Sustainability by Design Residential Academic Program (PSBD) or Sustainability and Social Innovation (SSI) Residential Academic Program (PSEE) students only.

[College of Engineering & Applied Science](#)
[Engineering Administration](#)

ECEN-1500 (3) Sustainable Energy

Explores how energy is created and used in today's society. Through collaborative discussion and hands-on data collection, students will analyze the engineering challenges, fundamental limits, and potential solutions to meeting our energy needs sustainably. Students will learn to analyze numerical data, estimate orders of magnitude, and apply mathematical methods in their own lives and in the ongoing energy debate. Basic algebra required. Restricted to non-engineering majors. Approved for arts and sciences core curriculum: quantitative reasoning and mathematical skills.

College of Engineering & Applied Science Electrical & Computer Engineering General

EHON-1500 (1) Honors Reading Group

Faculty led reading seminars, focusing on specific text or texts chosen by the faculty. Special attention will be paid to group formation and the process of collaborative learning. Restricted to Engineering Honors Program (PHEN) students only or instructor consent required. Prerequisites: Restricted to Engineering Honors Program (PEHN) students only.

College of Engineering & Applied Science Engineering Administration

GEEN-1500 (2) Introduction to Engineering

Provides an introduction to the engineering profession, to include a focus on the engineering grand challenges of the future, professional and ethical expectations, and an examination of current disciplines specializations. Provides sufficient knowledge of the engineering disciplines necessary to make an informed major choice. Restricted to Engineering Majors with 75 or less cumulative hours. Prerequisites: Restricted to College of Engineering majors with 75 or less cumulative hours.

College of Engineering & Applied Science Engineering Administration

GEEN-1510 (1) Self Management and Leadership Principles 1

Develops group cohesiveness, mutual support, multicultural awareness, and leadership skills. Topics include collaborative learning, motivation, time management and study skills, personal assertiveness, and career awareness. Open to new freshmen and transfer students. Controlled enrollment. Fulfills one credit hour of the Engineering social science requirement. Prerequisites: Restricted to College of Engineering majors only.

College of Engineering & Applied Science Engineering Administration

GEEN-1520 (1) Self Management and Leadership Principles 2

Continuation of GEEN 1510. Controlled enrollment. Prereq., GEEN 1510. Prerequisites: Restricted to College of Engineering majors only.

College of Engineering & Applied Science Engineering Administration

GEEN-1550 (1) YOU'RE@CU: Undergraduate Career Seminar

Exposes first or second year undergraduate students to engineering research careers through a partner program (YOU'RE@CU), panel discussions with researchers in academics and industry, and exposure to research labs. Restricted to YOU'RE@CU participants. Restricted enrollment; offered pass/fail only.

College of Engineering & Applied Science Engineering Administration

ECEN-1840 (1-6) Independent Study

Provides an opportunity for freshmen to do independent, creative work. Numbered ECEN 1840 through ECEN 1849. Prereq., instructor consent.

College of Engineering & Applied Science | Electrical & Computer Engineering | General

HUEN-1843 (3) Special Topics

Explores different important themes in the humanities; check with the department for specific semester topics. May be repeated up to 6 total credit hours. Prerequisites: Restricted to students with 0-56 credits (Freshmen or Sophomore) College of Engineering majors only.

College of Engineering & Applied Science | Humanities for Engineers

HUEN-1850 (3) Engineering in History: The Social Impact of Technology

Explores how engineering has shaped who we are, how we think, and what we think about, by examining preconceived notions of progress, property, time, and work. Textbook readings plus original sources in philosophy, literature, psychology, and economics provide a rich and stimulating tour of engineering history. Prerequisites: Restricted to students with 0-56 (Freshmen or Sophomore) College of Engineering majors only.

College of Engineering & Applied Science | Humanities for Engineers

ASEN-2001 (4) Aerospace 1: Introduction to Statics, Structures, and Materials

Introduces models and analytical/numerical methods for statics and structural analysis. Topics include force/moment equilibrium, truss analysis, beam theory, stress/strain, failure criteria, and structural design. Matlab proficiency required. Prereqs., APPM 1360, GEEN 1300 or CSCI 1300 or ECEN 1030 and PHYS 1110 (min. grade C). Coreq., ASEN 2002, 2012 or APPM 2350. Offered fall only. Prerequisites: Restricted to Aerospace Engineering (ASEN) majors only.

College of Engineering & Applied Science | Aerospace Engineering | Structures, Mat, & Struc Dynam

ASEN-2002 (4) Aerospace 2: Introduction to Thermodynamics and Aerodynamics

Introduces the fundamental principals and concepts of thermodynamics and fluid dynamic systems. Emphasizes the synthesis of basic science (physics), mathematics, and experimental methods that form the basis for quantitative and qualitative analyses of general aerospace technology systems. Proficiency in Matlab required. Prereqs., APPM 1360, GEEN 1300, CSCI 1300, or ECEN 1030 and PHYS 1110 (min. grade C). Coreqs., ASEN 2001, 2012 and APPM 2350. Offered fall only. Prerequisites: Restricted to Aerospace Engineering (ASEN) majors only.

College of Engineering & Applied Science | Aerospace Engineering | Aerodynamics & Fluid Mechanics

ASEN-2003 (5) Aerospace 3: Introduction to Dynamics and Systems

Introduces the principles of particle and planar rigid body dynamics, systems, and controls. Topics include kinematics, kinetics, momentum and energy methods, system modeling, and simple feedback control. Class includes experimental and design laboratory exercises for aerospace applications of dynamic principles. Offered spring only. Prerequisites: Requires pre-requisite courses of ASEN 2001, ASEN 2012 and APPM 2350 (all min grade C). Requires co-requisite courses of APPM 2360 and ASEN 2004. Restricted to Aerospace Engineering (ASEN) majors only.

| | | |
|--|-----------------------|---------------------|
| College of Engineering & Applied Science | Aerospace Engineering | Systems and Control |
|--|-----------------------|---------------------|

ASEN-2004 (5) Aerospace 4: Aerospace Vehicle Design and Performance

Introduction to design and analysis of aircraft and spacecraft. Aircraft topics include cruise performance, wing design, propulsion, stability, control, and structures. Spacecraft topics include rocket staging, orbit selection, launch systems, and spacecraft subsystems. Includes laboratory experiments and team design exercises. Offered spring only. Prerequisites: Requires pre-requisite courses of ASEN 2001, 2002, 2012 and APPM 2350 (all min grade C). Requires co-requisite courses of APPM 2360 and ASEN 2003. Restricted to Aerospace Engineering (ASEN) majors only.

HUEN-2010 (3) Tradition and Identity

Explores the place and possibility of personal identity both within and against the influence of tradition, including family, culture, language, and social, political and economic institutions. Via literature and film, wrestles with the nature of freedom, self-determination, and belonging. Prerequisites: Restricted to College of Engineering majors only.

| | |
|--|--------------------------|
| College of Engineering & Applied Science | Humanities for Engineers |
|--|--------------------------|

ASEN-2012 (2) Experimental and Computational Methods in Aerospace Engineering Sciences

Introduces statistical, experimental, and computational methods used in aerospace engineering sciences. Usage of MatLab is extensive. Coreq., ASEN 2001 and 2002. Prereq., GEEN 1300 or CSCI 1300 or ECEN 1030 (min. grade C). Prerequisites: Restricted to Aerospace Engineering (ASEN) majors only.

| | | |
|--|-----------------------|--------------------------------|
| College of Engineering & Applied Science | Aerospace Engineering | Aerospace Design & System Engr |
|--|-----------------------|--------------------------------|

CVEN-2012 (3) Introduction to Geomatics

Observes, analyzes, and presents basic linear, angular, area, and volume field measurements common to civil engineering endeavors with application of GPS and GIS technology. Prereq., APPM 1350 or equivalent. Prerequisites: Restricted to Architectural (AREN) or Civil (CVEN) Engineering majors only.

| | | |
|--|-------------------|------------------------------|
| College of Engineering & Applied Science | Civil Engineering | Surveying and Transportation |

|--|-----------------------------------|---------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | General |
|--|-----------------------------------|---------|

HUEN-2020 (3) The Meaning of Information Technology

Surveys the history of information technologies and modern techniques of information production, storage, transmission, and retrieval. Emphasizes understanding not only the technological transformations in interpersonal, organizational, and mass communication, but also the technological, social and political changes that underlie the movement toward a digital society. HUEN 2020 is restricted to ENGR majors only. ATLS 2000 is restricted to TAM students. ATLS 2000 and HUEN 2020 are the same course. Prerequisites: Restricted to College of Engineering majors only.

College of Engineering & Applied Science Humanities for Engineers

MCEN-2023 (3) Statics and Structures

Covers statics of particles, equivalent force systems, rigid bodies, equilibrium of rigid bodies in two and three dimensions, analysis of truss and frame structures, uniaxially-loaded members, deformation and stress, distributed force systems, friction. Lectures and homework assignments involve computer work and hands-on laboratory work in the ITLL, documented by written reports. Prereq., APPM 1360. Prerequisites: Requires prerequisite course of APPM 1360 or MATH 2300. Restricted to students with 27-180 credits (Sophomores/Juniors/Seniors) MCEN or EVEN majors or Civil & Envrn Engr Concurrent Degree majors or Mechanical Engr Concurrent Degree majors.

College of Engineering & Applied Science Mechanical Engineering Solids

MCEN-2024 (3) Materials Science

Structure, properties, and processing of metallic, polymeric, ceramic, and composite materials. Perfect and imperfect solids; phase equilibria; transformation kinetics; mechanical behavior; material degradation. Approach incorporates both materials science and materials engineering components. Prereqs., CHEN 1211, CHEM 1221 and PHYS 1110. Prerequisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) Mechanical Engineering (MCEN) or Environmental Engineering (EVEN) majors or Civil & Environmental Engineering Concurrent Degree or Mechanical Engineering Concurrent Degree majors

College of Engineering & Applied Science Mechanical Engineering Materials

MCEN-2043 (3) Dynamics

Covers dynamic behavior of particle systems and rigid bodies; 2-D and 3-D kinematics and kinetics; impulse, momentum, potential, and kinetic energy; and work, collision, and vibration. Lectures and homework assignments involve computer work and hands-on laboratory work in the ITLL, documented by written reports. Prereq., MCEN 2023. Formerly MCEN 3043. Prerequisites: Requires prerequisite courses of MCEN 2023 (or CVEN 2121 or GEEN 3851). Restricted to students with 27-180 credits (Sophomores/Juniors/Seniors) MCEN or EVEN majors or concurrent degree majors in CVEN&EVEN or MCEN.

AREN-2050 (3) Engineering Systems for Buildings

Provides an overview of the building mechanical and electrical systems, including HVAC, plumbing, solar, power distribution, illumination, life safety, transportation, and noise control systems. Emphasizes sustainable (green) building practices. Includes a team investigation of existing commercial building. Prereqs., AREN 1027 and 2406. Prerequisites: Restricted to Architectural (AREN) or Civil (CVEN) Engineering majors only.

[Building Systems Engineering](#)

ECEN-2050 (1-5) Special Topics

[College of Engineering & Applied Science](#)
[Electrical & Computer Engineering](#)
[General](#)

GEEN-2050 (3) Engineering Leadership Gateway

Examines concepts of engineering leadership and the essential skills required to become an effective leader. Together students will explore leadership principles, creative and critical thinking, interpersonal skills (e.g. collaboration, conflict resolution, leading in diverse communities), intrapersonal development (e.g. self-appraisal, reflective practice, personal leadership philosophy), organizational competencies (e.g. planning, sustainability, climate), effective communication and ethical decision-making. Instructor consent required. Prerequisites: Restricted to College of Engineering majors only.

[College of Engineering & Applied Science](#)
[Engineering Administration](#)

ECEN-2060 (1-5) Special Topics

[College of Engineering & Applied Science](#)
[Electrical & Computer Engineering](#)

MCEN-2063 (3) Mechanics of Solids

Covers shear force and bending moment, torsion, stresses in beams, deflection of beams, matrix analysis of frame structures, analysis of stress and strain in 2-D and 3-D (field equations, transformations), energy methods, stress concentrations, and columns. Lectures and homework assignments involve computer work and hands-on laboratory work in the ITLL, documented by written reports. Credit not granted for this course and CVEN 3161. Prerequisites: Requires prerequisite courses of MCEN 2023 or CVEN 2121 or GEEN 3851. Restricted to students with 27-180 credits (Sophomores/Juniors/Seniors) MCEN or EVEN majors or concurrent degree majors in CVEN&EVEN or MCEN.

College of Engineering & Applied Science | Mechanical Engineering | Solids

HUEN-2100 (3) History of Science and Technology to Newton

Spans invention and discovery from the Stone Age to the age of Newton, raising questions about culture, history, and personal expectation; studies Pyramids, odometers, cathedrals, Galileo, etc., on the way. Formerly HUEN 1100. Prerequisites: Restricted to College of Engineering majors only.

College of Engineering & Applied Science | Humanities for Engineers

AREN-2110 (3) Thermodynamics

Explores fundamental principles of thermodynamics, including first and second law of thermodynamics, thermophysical properties, power and refrigeration cycles, gas mixtures and psychrometrics. Computing in the context of engineering problems is introduced. Prereq., PHYS 1110 or equivalent. Coreq., APPM 1360 or equivalent. Approved for arts and sciences core curriculum: natural science. Prerequisites: Restricted to Architectural (AREN), Civil (CVEN), or Environmental (EVEN) Engineering majors or Civil/Environmental (C-EVENCVEN) Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Civil Engineering | Building Systems Engineering

AREN-2120 (3) Fluid Mechanics and Heat Transfer

Explores fundamental principles of fluid dynamics and heat transfer. Topics include fluid statics, momentum, and energy conservation, laminar and turbulent viscous flow, convection heat transfer, conduction heat transfer, heat exchangers, and heat transfer. Prereqs., APPM 2350 and AREN 2110. Coreq., APPM 2360.

College of Engineering & Applied Science | Civil Engineering | Building Systems Engineering

CHEN-2120 (3) Chemical Engineering Material and Energy Balances

Provides a basic understanding of chemical engineering calculations involving material and energy balances around simple chemical processes. Prerequisites: Requires pre-requisite courses of CHEN 1211 and GEEN 1300 (all min grade C-).

College of Engineering & Applied Science | Chemical Engineering

HUEN-2120 (3) History of Modern Science from Newton to Einstein

Surveys the great discoveries and theoretical disputes from Newtonian celestial mechanics to the theory of relativity. Includes physics, astronomy, chemistry, geology, and biology; closely examines scientific method, evolution, light and quantum theory. Uses original sources by Newton, Faraday, Lavoisier, Darwin, etc., for immediate contact with the great minds in science. Prerequisites: Restricted to College of Engineering majors only.

College of Engineering & Applied Science Humanities for Engineers

CVEN-2121 (3) Analytical Mechanics 1

Covers forces acting on rigid bodies at rest. Equilibrium is the central concept that will be applied repeatedly to different situations. In each case, the object of interest will be isolated along with all the forces acting on it; a free body diagram. Equilibrium will be applied to analyze trusses, frames, machines, cables and hydrostatic forces on dams. Prereq., PHYS 1110. Prereq. or coreq., APPM 2350. Same as GEEN 3851. Restricted to freshmen or sophomore Civil, Environmental, or Architectural Engineering majors only. Prerequisites: Restricted to students with 0-56 (Freshmen or Sophomore) Civil (CVEN), Environmental (EVEN), or Architectural (AREN) Engineering majors only.

College of Engineering & Applied Science Civil Engineering Mechanics

HUEN-2130 (3) History of Modern Technology from 1750 to the Atomic Bomb

Surveys the great innovations from the Steam Age to the Atomic Age: transportation, modern construction, communications, internal combustion, etc. Supplements textbook accounts with drawings, patents, and original selections by Edison, Carnegie, Tesla, Bell, etc. Studies the sociological impact of social change via contemporary sources in literature, philosophy, painting and film. Prerequisites: Restricted to College of Engineering majors only.

College of Engineering & Applied Science Humanities for Engineers

HUEN-2210 (3) Engineering, Science, and Society

Explores challenges that engineering and science pose for society plus the ways that societies shape or impede science and engineering. Case studies range from contemporary issues (global warming, nuclear weapons, and genetic engineering) to classic cases (the execution of Socrates). Core texts in the Western Tradition supplement contemporary articles and films. Prerequisites: Restricted to College of Engineering majors only.

College of Engineering & Applied Science Humanities for Engineers

ECEN-2250 (3) Introduction to Circuits and Electronics

Introduces linear circuit analysis and design, including extensive use of OP amps. Presents DC networks, including node and mesh analysis with controlled sources. Analysis of RL and RC circuits for both transient and sinusoidal steady-state responses using phasors. Prereq., APPM 1360. Coreq., APPM 2360. Prerequisites: Restricted to College of Engineering majors only.

College of Engineering & Applied Science Electrical & Computer Engineering General

ECEN-2260 (3) Circuits as Systems

Continues basic circuit analysis of ECEN 2250: Laplace transform techniques, transfer functions, frequency response, Bode diagrams, resonant circuits, Fourier series expansions, and convolution. Prereq., ECEN 2250. Coreq., Electronics Design Laboratory. Prerequisites: Requires pre-requisite course of ECEN 2250 (minimum grade C-). Restricted to College of Engineering students only.

College of Engineering & Applied Science Electrical & Computer Engineering General

CSCI-2270 (4) Computer Science 2: Data Structures

Studies data abstractions (e.g., stacks, queues, lists, trees) and their representation techniques (e.g., linking, arrays). Introduces concepts used in algorithm design and analysis including criteria for selecting data structures to fit their applications. Prereqs., CSCI 1300, and one of APPM 1350 or MATH 1300. Prerequisites: Requires pre-requisite courses of CSCI 1300 and either APPM 1350 or MATH 1300 (minimum grade C-).

College of Engineering & Applied Science | Computer Science | General Computer Science

ECEN-2270 (3) Electronics Design Lab

Provides an introduction to analysis, modeling, design, and testing of analog electronic circuits in a practical laboratory setting. The laboratory is centered around a robot platform and includes design, Spice simulations, prototyping and testing of circuits necessary to drive and remote control the robot. Coreq., ECEN 2260. Prerequisites: Restricted to College of Engineering majors only.

College of Engineering & Applied Science | Electrical & Computer Engineering | General

ECEN-2350 (3) Digital Logic

Covers the design and applications of digital logic circuits, including combinational and sequential logic circuits. Laboratory component introduces simulation and synthesis software and hands-on hardware design. Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) College of Engineering students only. Prereq., ECEN 1030 or CSCI 1300. Prerequisites: Requires pre-requisite course of ECEN 1030 or CSCI 1300 (minimum grade C-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) College of Engineering students only.

College of Engineering & Applied Science | Electrical & Computer Engineering | General

GEEN-2350 (1) Calculus 3 Work Group

Provides problem solving assistance to students enrolled in APPM 2350. This course is conducted in a collaborative learning environment. Student work groups solve calculus problems with the assistance of a facilitator. Grading only under pass/fail option. Prereq., APPM 1360. Coreq., APPM 2350.

College of Engineering & Applied Science | Engineering Administration

CSCI-2400 (4) Computer Systems

Covers how programs are represented and executed by modern computers, including low-level machine representations of programs and data, an understanding of how computer components influence performance and memory hierarchy. Prerequisites: Requires pre-requisite course of CSCI 2270 (minimum grade C-).

College of Engineering & Applied Science | Computer Science | General Computer Science

AREN-2406 (3) Introduction to Building Construction

Covers the broad subject of building materials, assembly details, and their method of construction. Includes codes and classifications, foundations, wood, steel, concrete, masonry, cladding,

doors and windows, interiors, and finishes. Formerly AREN 3406. Prerequisites: Restricted to students with 0-56 credits (Freshmen or Sophomore) Architectural Engineering (AREN) majors only.

College of Engineering & Applied Science Civil Engineering Construction

ECEN-2420 (3) Electronics for Wireless Systems

Explores fundamental principles behind the operation of a radio, including a practical introduction to circuit elements. The course covers the components and operation of a radio (transmitter and receiver) with simple signals. Students learn through demos the practical basic properties of all needed components with an introduction to principles of operation. Prereqs., PHYS 1120, and APPM 1360 or MATH 2300. Restricted to EN majors. Prerequisites: Restricted to Electrical and Computer Engineering or Electrical Engineering majors only.

College of Engineering & Applied Science Electrical & Computer Engineering General

ASEN-2519 (1-6) Special Topics

Studies specialized aspects of the aerospace engineering sciences or innovative treatment of required subject matter at the lower-division level. Course content is indicated in the online SchedulePlanner. Prereq., varies. Restricted to Engineering students.

College of Engineering & Applied Science Aerospace Engineering Specialized Courses

ECEN-2703 (3) Discrete Mathematics for Computer Engineers

Emphasizes elements of discrete mathematics appropriate for computer engineering. Topics: logic, proof techniques, algorithms, complexity, relations, and graph theory. Prereqs., ECEN 1030/CSCI 1300 and APPM 1360.

College of Engineering & Applied Science Electrical & Computer Engineering Computer and Digital Systems

SUST-2800 (1-3) Special Topics

Covers a variety of topics not currently offered in the curriculum; offered depending on instructor availability and student demand. May be repeated up to 9 total credit hours, provided the topics vary. Prerequisites: Restricted to Sustainability by Design Residential Academic Program (PSBD) or Sustainability and Social Innovation (SSI) Residential Academic Program (PSEE) students only.

CHEN-2810 (3) Biology for Engineers

Develops a basic understanding of the science of biology, including an introduction to the disciplines of biochemistry, cell organization, metabolism, genetics, genomics, molecular biology, recombinant DNA technology and evolution. Provides a basic introduction to several key techniques used in biological engineering laboratories. Uses examples of complex and creative structures engineered by natural processes.

[College of Engineering & Applied Science](#)
[Chemical Engineering](#)

CSCI-2824 (3) Discrete Structures

Covers foundational materials for computer science that is often assumed in advanced courses. Topics include set theory, Boolean algebra, functions and relations, graphs, propositional and predicate calculus, proofs, mathematical induction, recurrence relations, combinatorics, discrete probability. Focuses on examples based on diverse applications of computer science. Prerequisites: Requires pre-requisite course of CSCI 2270 (minimum grade C-).

[College of Engineering & Applied Science](#)
[Computer Science](#)
[Theory of Computation](#)

AREN-2830 (1-3) Special Topics

Supervised study of special topics of interest to students under instructor guidance. Prerequisites: Restricted to College of Engineering majors only.

[College of Engineering & Applied Science](#)

CSCI-2830 (1-3) Special Topics in Computer Science

Covers topics of interest in computer science at the sophomore level. Content varies from semester to semester.

College of Engineering & Applied Science | Computer Science | General Computer Science

ECEN-2830 (1-5) Special Topics

College of Engineering & Applied Science | Electrical & Computer Engineering | General

CHEN-2840 (1-4) Independent Study

Available to sophomores with approval of Department of Chemical Engineering. Subject arranged to fit needs of student.

College of Engineering & Applied Science | Chemical Engineering

ECEN-2840 (1-6) Independent Study

Offers an opportunity for sophomores to do independent, creative work. Numbered ECEN 2840 through ECEN 2849. Prereq., instructor consent.

College of Engineering & Applied Science | Electrical & Computer Engineering | General

EVEN-2840 (1-3) Independent Study: General Topics

General topics relating to environmental engineering. One-on-one assistance with an instructor.

College of Engineering & Applied Science | Environmental Engineering

HUEN-2843 (1-3) Special Topics

Explores different important themes in the humanities; check with the department for specific semester topics. May be repeated up to 6 total credit hours. Prerequisites: Restricted to College of Engineering majors only.

College of Engineering & Applied Science | Humanities for Engineers

ASEN-2849 (1-3) Independent Study

Study of special projects agreed upon by student and instructor. May be repeated up to 9 total credit hours. Prereq., instructor consent.

College of Engineering & Applied Science | Aerospace Engineering | Specialized Courses

CSCI-2900 (1-3) Lower Division, Undergraduate Level Independent Study

Offers selected topics at the elementary level for students with little or no previous computing experience.

College of Engineering & Applied Science | Computer Science | General Computer Science

CSCI-3002 (3) Human-Centered Computing Foundations

Introduces practice and research in human-computer interaction, design of interactive systems, computer supported cooperative work, computer supported collaborative learning, educational technology, tools that support creativity, user-developed knowledge collections, and gaming.

College of Engineering & Applied Science | Computer Science | Artificial Intelligence

ECEN-3002 (3-5) Special Topics

College of Engineering & Applied Science | Electrical & Computer Engineering | Communications

ECEN-3003 (3-5) Special Topics

College of Engineering & Applied Science | Electrical & Computer Engineering | Computer and Digital Systems

ECEN-3004 (3-5) Special Topics

College of Engineering & Applied Science | Electrical & Computer Engineering | Electromagnetics

AREN-3010 (3) Mechanical Systems for Buildings

Lecture course on the analysis and design of buildings and their systems to satisfy the requirements for a comfortable and healthy indoor environment. Examines psychometrics, thermal comfort, building heating and cooling loads, fluid flow basics, and HVAC components and systems. Prereqs., AREN 2120 (or MCEN 3021 & 3022) and AREN 2110 (or GEEN 3852, or MCEN 3012, or ASEN 2002) and AREN 2050. Restricted to Architectural or Civil Engineering majors only. Prerequisites: Requires pre-requisite courses of AREN 2120 (or MCEN 3021 & 3022) and AREN 2110 (or GEEN 3852 or MCEN 3012 or ASEN 2002) and AREN 2050. Restricted to Architectural (AREN) or Civil (CVEN) Engineering majors only.

College of Engineering & Applied Science | Civil Engineering | Building Systems Engineering

CHEN-3010 (3) Applied Data Analysis

Teaches students to analyze and interpret data. Topics include engineering measurements, graphical presentation and numerical treatment of data, statistical inference, and regression analysis.

Prerequisites: Requires pre-requisite course of GEEN 1300.

College of Engineering & Applied Science | Chemical Engineering

ECEN-3010 (3) Circuits and Electronics for Mechanical Engineers

Covers analysis of electrical circuits by use of Ohm's law, network reduction, node and loop analysis, Thevenin's and Norton's theorems, DC and AC signals, transient response of simple circuits, transfer functions, basic diode and transistor circuits, and operational amplifiers. Includes introductory digital electronics and microprocessors/microcontrollers. Prereqs., APPM 2360 and PHYS 1140. Same as MCEN 3017. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) Mechanical Engineering (MCEN) or Environmental Engineering (EVEN) majors.

College of Engineering & Applied Science | Electrical & Computer Engineering | General

MCEN-3012 (3) Thermodynamics

Explores fundamental concepts and basic theory, including first and second laws of thermodynamics, properties, states, thermodynamic functions and cycles. Prereq., APPM 2350. Same as GEEN 3852. Prerequisites: Requires prerequisite course of APPM 2350 or MATH 2400. Restricted to students with 57-180 credits (Junior/Senior) MCEN or EVEN majors or concurrent degree majors in CVEN/EVEN or MCEN.

College of Engineering & Applied Science | Mechanical Engineering | Thermal

MCEN-3017 (3) Circuits and Electronics

Introductory course covers analysis of electric circuits by use of Ohm's law, network reduction, node and loop analysis, Thevenin's and Norton's theorems, DC and AC signals, transient response of simple circuits, transfer functions, basic diode and transistor circuits, and operational amplifiers. Prereqs., APPM 2360 and PHYS 1140. Same as ECEN 3010. Prerequisites: Restricted to students in the MSC/CU-Boulder Mechanical Engineering Partnership Program only.

College of Engineering & Applied Science | Mechanical Engineering | Miscellaneous

MCEN-3021 (3) Fluid Mechanics

Examines fundamentals of fluid flow with application to engineering problems. Explores fluid statics and kinematics; conservation equations for mass, momentum, and energy; Bernoulli and Euler equations; potential flow; laminar and turbulent viscous boundary layers; laminar and turbulent pipe flow; and compressible fluid flow. Prereqs., APPM 2360 and MCEN 2023. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) Mechanical Engineering (MCEN or MCMR) or Environmental Engineering (EVEN) majors or Civil/Environmental Engineering or Mechanical Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Mechanical Engineering | Fluids

CVEN-3022 (3) Construction Surveying

Studies construction and highway surveying, horizontal and vertical curves, earthwork, and analysis of data. Prereq., CVEN 2012.

College of Engineering & Applied Science | Civil Engineering | Surveying and Transportation

MCEN-3022 (3) Heat Transfer

Studies fundamentals of heat transfer by conduction, convection, and radiation. Provides applications to heat exchangers, solar panels, and boiling and mass transfer. Also covers numerical methods for solving heat transfer problems and design of engineering equipment involving heat transfer processes. Prerequisites: Requires prereq courses of MCEN 3012 (or GEEN 3852, or CHEN 3320, or ASEN 2002, or AREN 2110) & MCEN 3021 (or GEEN 3853, or CHEN 3200, or CVEN 3313) & MCEN 3030. Restricted to students w/ 57-180 credits (Jr or Sr) MCEN or EVEN majors.

College of Engineering & Applied Science Mechanical Engineering Thermal

MCEN-3025 (3) Component Design

Application of mechanics and materials science to the detailed design of various machine elements including shafts bearings, gears, brakes, springs, and fasteners. Emphasizes application and open-ended design problems. Prereq., MCEN 2063. Prerequisites: Requires pre-requisite course of MCEN 2063 (or CVEN 3161, or ASEN 3112).

College of Engineering & Applied Science Mechanical Engineering Design

ECEN-3030 (3) Electrical/Electronic Circuits Non-Major

For students not majoring in electrical engineering. Covers analysis of electric circuits by use of Ohm's law; network reduction; super position; node and loop analysis; Thevenin's and Norton's theorems; sinusoidal signals; phasors; power in ac circuits; transient response of simple circuits; operational amplifiers; logic circuits; and flip-flops. Prereq., APPM 2360. Restricted to nonmajors. Same as GEEN 3854. Prerequisites: Electrical/Computer Engineering Majors, Electrical Engineering Majors or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree Majors are restricted from taking this course.

MCEN-3030 (3) Computational Methods

Studies fundamental numerical techniques for the solution of commonly encountered engineering problems. Includes methods for linear and nonlinear algebraic equations, data analysis, numerical differentiation and integration, ordinary and partial differential equations. Prereqs., GEEN 1300 and APPM 2360, or equivalent, including a working knowledge of Matlab. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering, Mechanical (MCEN or MCMR) or Environmental Engineering (EVEN) or Mechanical Engineering Concurrent Degree majors only.

[College of Engineering & Applied Science](#)
[Mechanical Engineering](#)
[Math](#)

CVEN-3032 (3) Photogrammetry

Familiarizes students with characteristics of aerial photographs. Measures and interprets aerial photos for planimetric, topographic, hydrological, soil, and land use surveys. Analyzes and presents field measurements over extensive reaches. Prereq., instructor consent.

[College of Engineering & Applied Science](#)
[Civil Engineering](#)
[Surveying and Transportation](#)

MCEN-3032 (3) Thermodynamics 2

Offers advanced topics and applications, including thermodynamics of state, entropy and probability, thermodynamic cycles, and reacting and nonreacting mixtures. Provides application to engines and power generation by conventional and alternative energy technologies. Most assignments are design oriented. Prereqs., MCEN 3012 and 3021. Prerequisites: Requires prerequisite course of MCEN 3021 (or CHEN 3200 or CVEN 3313 or GEEN 3853) and MCEN 3012 (or AREN 2110 or GEEN 3852). Restricted to students with 57-180 credits (Junior/Senior) Mechanical Engineering or Environmental Engineering majors only.

[College of Engineering & Applied Science](#)
[Mechanical Engineering](#)
[Thermal](#)

ASEN-3036 (3) Introduction to Human Spaceflight

Introduces students to the challenges of human space flight. Historical and current space programs and spacecraft are discussed with emphasis on those systems specific to sustaining human crews. Other topics include space environment with respect to sustaining human life and health, physiological and psychological concerns in a space habitat, astronaut selection and training, anomalies, mission operations motivation, costs rationale for human space exploration, and future program directions. Not accepted as a Professional Area Elective for ASEN majors. Approved for upper-division Humanities and Social Science elective for engineering students.

College of Engineering & Applied Science Aerospace Engineering Bioastronautics & Microgravity

MCEN-3037 (2) Data Analysis

Learn to plan and carry out experiments. Coverage includes measurement fundamentals, basic statistical concepts, and uncertainty analysis. Use of statistics for the purpose of analyzing data, including regression, correlation, hypothesis testing, classification, time series analysis, and design of experiments. Prereq., APPM 2360. Prerequisites: Restricted to graduate students in College of Engineering and Applied Science or to students with 57-180 credits (Junior or Senior) or Mechanical Engineering Concurrent Degree students.

College of Engineering & Applied Science Mechanical Engineering Miscellaneous

ASEN-3046 (3) Introduction to Humans in Aviation

Investigates the history of manned aviation accomplished through a review of the history of flight, the physiological and psychological limitations facing aviators, and investigates the human related causal factors in aviation accidents. The course also looks at the social and economic impacts of aviation in modern society. Not accepted as a Professional Area Elective for ASEN majors. Approved for upper-division Humanities and Social Science elective for engineering students.

College of Engineering & Applied Science Aerospace Engineering Bioastronautics & Microgravity

AREN-3050 (3) Environmental Systems for Buildings 1

Introduces the operation and design of building systems for climate control, water and drainage, life safety, electrical supply, illumination, transportation (elevators and escalators), and noise control. For non-engineering majors. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Environmental Design majors only.

College of Engineering & Applied Science Civil Engineering Building Systems Engineering

AREN-3060 (3) Environmental Systems for Buildings 2

Continues the operation and design of building systems for climate control, water and drainage, life safety, electrical supply, illumination, transportation (elevators and escalators), and noise control. For non-engineering majors.

College of Engineering & Applied Science Civil Engineering Building Systems Engineering

ECEN-3070 (3) Edges of Science

Examines the evidence for paranormal phenomena, reasons for skepticism, and physical models that could account for the data. Reviews controversial scientific theories that overcame barriers to

acceptance, and how worldviews shift. Considers the scientific method and ways uncontrolled factors might influence experiments. Develops skills in statistical analysis of data. Includes group projects testing for anomalous and parapsychological effects. Not accepted as a technical elective for engineering majors. Prereq., MATH 1011 or equivalent.

College of Engineering & Applied Science | Electrical & Computer Engineering | General

HUEN-3100 (3) Humanities for Engineers 1

Explores what it means to be a fully human being: through group discussion, closely examines individual works of culturally and historically significant philosophy, literature, and art. Includes extensive writing. Fulfills the College of Engineering & Applied Science writing requirement. Minimum GPA of 3.0 preferred. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

College of Engineering & Applied Science | Humanities for Engineers

CSCI-3104 (4) Algorithms

Covers advanced data structures, computational geometry, cryptography, dynamic programming, greedy algorithms, divide-and-conquer, graph algorithms (e.g., depth-first search), network algorithms (e.g., shortest paths), approximation algorithms. Prerequisites: Requires pre-requisite course of CSCI 2824 (minimum grade C-).

College of Engineering & Applied Science | Computer Science | Theory of Computation

ASEN-3111 (4) Aerodynamics

Develops the fundamental concepts of aerodynamics and provides a working knowledge for their application to the design of aircraft and launch vehicles operating at various speeds and altitudes, as well as the atmospheric forces on satellites. Prereqs., APPM 2350, ASEN 2002 and 2004 (min. grade C). Restricted to ASEN majors. Offered fall only. Prerequisites: Restricted to Aerospace Engineering (ASEN) majors only.

College of Engineering & Applied Science | Aerospace Engineering | Aerodynamics & Fluid Mechanics

CVEN-3111 (3) Analytical Mechanics 2

Studies the motion (kinematics) of particles and rigid bodies, and the forces that cause the motion (kinetics). Newton's laws as well as energy methods are used to study the motion of particles and rigid bodies in two and three dimensions. Prerequisites: Requires pre-requisite courses of CVEN 2121. Requires a co-requisite course of APPM 2360.

College of Engineering & Applied Science | Civil Engineering | Mechanics

ASEN-3112 (4) Structures

Teaches Mechanics of Materials methods of stress and deformation analysis applicable to the design and verification of aircraft and space structures. It offers an introduction to matrix and finite element methods for truss structures, and to mechanical vibrations. Prereq., ASEN 2001, 2003, 2004, and APPM 2360 (min. grade C). Restricted to ASEN majors. Offered fall only. Prerequisites: Restricted to Aerospace Engineering (ASEN) majors only.

College of Engineering & Applied Science | Aerospace Engineering | Structures, Mat, & Struc Dynam

CSCI-3112 (1-3) Human-Centered Computing Professional Development

Supports students in developing professional skills and practices in human-computer interaction, design of interactive systems, computer supported cooperative work, computer supported collaborative learning, educational technology, tools that support creativity, user-developed knowledge collections, and gaming. May be repeated up to 10 total credit hours. Same as ATLS 3112.

College of Engineering & Applied Science | Computer Science | Artificial Intelligence

ASEN-3113 (4) Thermodynamics and Heat Transfer

Focuses on the applications of the first and second laws of thermodynamics to control volumes and teaches the fundamental concepts of different modes of energy and heat transfer. Learn to use these concepts in gas dynamics, high-speed vehicle spacecraft design, environmental systems, and energy analysis. Offered fall only. Prerequisites: Requires pre-requisite courses of ASEN 2002 and APPM 2350 (all min grade C). Restricted to Aerospace Engineering (ASEN) majors only.

College of Engineering & Applied Science | Aerospace Engineering | Thermodynamics and Propulsion

ASEN-3116 (3) Introduction to Biomedical Engineering

Addresses human responses to environment and physical stimuli. Makes use of engineering and physical principles in the study of human dynamics, arriving at reasonable solutions to 15 major areas of biomedical consent. Prereq., instructor consent.

College of Engineering & Applied Science | Aerospace Engineering | Bioastronautics & Microgravity

ASEN-3128 (4) Aircraft Dynamics

Develops the fundamental concepts of aircraft dynamics. Covers flight mechanics, performance, dynamics and control of aircraft, and how they impact aircraft design. Prereqs., ASEN 2002, 2003, 2004, and APPM 2360 (min. grade C). Restricted to ASEN majors. Offered spring only. Prerequisites: Requires pre-requisite courses of ASEN 2002, 2003, 2004 & APPM 2360 (all min grade C). Restricted to Aerospace Engineering (ASEN) majors only.

College of Engineering & Applied Science | Aerospace Engineering | Aerospace Design & System Engr

AREN-3130 (3) Building Energy Laboratory

Laboratory course offering both hands-on experience with building and renewable energy systems and exposing students to the fundamentals of measurements, instrumentation, data acquisition, and statistical data analysis. Measurements and experiments will allow evaluation of building construction material, electrical equipment, lighting systems, heating and cooling systems, and solar energy devices, among others. Prereq., AREN 3010.

College of Engineering & Applied Science | Civil Engineering | Building Systems Engineering

CHEN-3130 (2) Chemical Engineering Laboratory 1

One four-hour lab session per week. Investigates chemical engineering fluid flow, heat transfer, and thermodynamics. Emphasizes communication by written reports and oral presentations as well

as laboratory safety. Prereq., CHEN 3010, 3200, 3320 and either CHEN 3210 or MCEN 3022 (all min. grade C-). Prerequisites: Requires pre-requisite courses of CHEN 3010 and CHEN 3200 (or MCEN 3021 or GEEN 3853) and CHEN 3320 and CHEN 3210 (or MCEN 3022).

College of Engineering & Applied Science | Chemical Engineering

AREN-3140 (3) Illumination Laboratory

Introduces the measurement of photometric and psychophysical quantities used in lighting. Experience is acquired in using light measurement instruments to evaluate lighting equipment and luminous environments. Prereq., AREN 3540.

College of Engineering & Applied Science | Civil Engineering | Building Systems Engineering

CSCI-3155 (4) Principles of Programming Languages

Study fundamental concepts on which programming of languages are based, and execution models supporting them. Topics include values, variables, bindings, type systems, control structures, exceptions, concurrency, and modularity. Learn how to select a language and to adapt to a new language. Prerequisites: Requires pre-requisite courses of CSCI 2270 and either CSCI 2400 or ECEN 3350 (minimum grade C-).

College of Engineering & Applied Science | Computer Science | Programming Languages

CVEN-3161 (3) Mechanics of Materials 1

Addresses concepts of stress and strain; material properties, axial loading, torsion, simple bending, and transverse shear; analysis of stress and strain; and deflections of beams. Includes selected experimental and computational laboratories. Prereq., CVEN 2121. Coreq., APPM 2360. Restricted to Architectural or Civil Engineering majors only. Credit not granted for this course and MCEN 2063. Prerequisites: Restricted to Architectural (AREN) or Civil (CVEN) Engineering majors only.

College of Engineering & Applied Science | Civil Engineering | Mechanics

ECEN-3170 (3) Energy Conversion 1

Introduces block diagrams, conventional/renewable energy sources, power electronics, magnetic circuits, transformers and power systems, forces/torques of electric machines. Employs a top-down approach to present applications first and then discuss components. Uses Pspice, Mathematica, Matlab. Prereq., PHYS 1120. Coreq., ECEN 3250. Prerequisites: Restricted to College of Engineering majors only.

College of Engineering & Applied Science | Electrical & Computer Engineering | General

ASEN-3200 (4) Orbital Mechanics/Attitude Dynamics and Control

Presents the fundamentals of orbital mechanics, 3D rigid body dynamics, and satellite attitude dynamics and controls. Prereqs., ASEN 2003, 2004, and APPM 2360 (min. grade C). Restricted to ASEN majors. Offered spring only. Prerequisites: Requires pre-requisite courses of ASEN 2003, ASEN 2004, & APPM 2360 (all min grade C). Restricted to Aerospace Engineering (ASEN) majors only.

College of Engineering & Applied Science | Aerospace Engineering | Astrodynamics & Orbital Mech

CHEN-3200 (3) Chemical Engineering Fluid Mechanics

Introduces fluid mechanics and momentum transfer, emphasizing the application of these principles to chemical engineering systems. Prereqs., APPM 2350 and either CHEN 2120 (min. grade C) or MCEN 2023 (min. grade C). Coreq., APPM 2360. Same as GEEN 3853.

[College of Engineering & Applied Science](#) [Chemical Engineering](#)

HUEN-3200 (3) Humanities for Engineers 2

Explores what it means to be a fully human being: through group discussion, closely examines individual works of culturally and historically significant philosophy, literature, and art. Includes extensive writing. Fulfills the College of Engineering and Applied Science writing requirement. Minimum GPA of 3.0 preferred. Prerequisites: Requires pre-requisite course of HUEN 3100. Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

[College of Engineering & Applied Science](#) [Humanities for Engineers](#)

CSCI-3202 (3) Introduction to Artificial Intelligence

Surveys artificial intelligence techniques of search, knowledge representation and reasoning, probabilistic inference, machine learning, and natural language processing. Introduces artificial intelligence programming. Prerequisites: Requires pre-requisite course of CSCI 2824 (minimum grade C-).

[College of Engineering & Applied Science](#) [Computer Science](#) [Artificial Intelligence](#)

MCEN-3208 (1-3) Special Topics in Mechanical Engineering

Subject matter to be selected from topics of current interest. Credit to be arranged. Numbered MCEN 3208-3298. Instructor consent required. Prerequisites: Restricted to Mechanical (MCEN or

MCMR) majors or students with a plan of Mechanical Engineering Concurrent Degree majors.

College of Engineering & Applied Science | Mechanical Engineering | Special Topics

CHEN-3210 (3) Chemical Engineering Heat Transfer

Examines conservation and transfer of thermal energy. Focuses on conduction and convection of heat in the context of chemical processes, with a special focus on heat exchangers. Also studies thermal radiation. Prerequisites: Requires pre-requisite courses of either CHEN 3200 or MCEN 3021 (all min grade C-).

College of Engineering & Applied Science | Chemical Engineering

CHEN-3220 (3) Chemical Engineering Separations and Mass Transfer

Studies separation methods including distillation, absorption, and extraction, and graphical and computer-based solutions to separation problems. Also studies mass transfer rate processes, including diffusion, microscopic material balances, and correlations for mass transfer coefficients. Applies mass transfer rate theory to packed and tray columns. Prerequisites: Requires pre-requisite courses of CHEN 3200 (or MCEN 3021 or GEEN 3853) and CHEN 3320.

College of Engineering & Applied Science | Chemical Engineering

CVEN-3227 (3) Probability, Statistics and Decision

Introduces uncertainty based analysis concepts and applications in the planning and design of civil engineering systems emphasizing probabilistic, statistics, and design concepts and methods. Restricted to juniors/seniors.

College of Engineering & Applied Science | Civil Engineering | Miscellaneous

CVEN-3246 (3) Introduction to Construction

Broad view of concerns, activities, and objectives of people involved in construction: the owner, architect/engineer, contractor, labor, and inspector. Interactive gaming situation relates these people to the construction contract, plans/specifications, estimates/bids, scheduling, law, and financial management. Restricted to junior or senior Civil or Architectural Engineering majors only. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) Civil (CVEN) or Architectural (AREN) Engineering majors only.

College of Engineering & Applied Science | Civil Engineering | Construction

ECEN-3250 (3) Microelectronics

Develops a basic understanding of active semiconductor devices. Focuses on building an understanding of BJT and CMOS devices in both digital and analog application. Prereq., ECEN 2260. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

College of Engineering & Applied Science | Electrical & Computer Engineering | General

CVEN-3256 (3) Construction Equipment and Methods

Integrated study of construction equipment, methods, and economics. Topics include equipment productivity, equipment selection, and construction engineering design within economic constraints. Examples include earthmoving, concrete formwork, and temporary construction. Recommended prereq., CVEN 3246. Restricted to Architectural or Civil Engineering majors only. Prerequisites: Restricted to Architectural (AREN) or Civil (CVEN) Engineering majors only.

College of Engineering & Applied Science Civil Engineering Construction

CSCI-3287 (3) Database and Information Systems

Surveys data management, including file systems, database management systems design, physical data organizations, data models, query languages, concurrency, and database protection. Prereq., CSCI 3104. Prerequisites: CSCI 3287 PREREQ

College of Engineering & Applied Science Computer Science Database Systems

ASEN-3300 (4) Aerospace Electronics and Communications

Provides the fundamentals of electronics and communications widely used in aerospace engineering. Includes analog instrumentation electronics, data acquisition, digital electronics, and radio communication. Offered spring only. Prerequisites: Requires pre-requisite courses of ASEN 2003, PHYS 1120 and APPM 2360 (all min grade C). Restricted to Aerospace Engineering (ASEN) majors only.

College of Engineering & Applied Science Aerospace Engineering Systems and Control

ECEN-3300 (3) Linear Systems

Characterization of linear and time-invariant systems in time and frequency domains. Continuous time systems are analyzed using differential equations and Laplace and Fourier transforms. Discrete time systems, which can be implemented using a modern digital signal processing framework, use difference equations, z-transforms and discrete time Fourier transforms for their analysis and design. Applications of linear systems include communications, signal processing, and control systems. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

College of Engineering & Applied Science Electrical & Computer Engineering General

CSCI-3302 (3) Introduction to Robotics

Introduces students to fundamental concepts in autonomous, mobile robotics: mechanisms, locomotion, kinematics, control, perception and planning. The course consists of lectures and lab sessions that are geared toward developing a complex robot controller in a realistic, physics-based multi-robot simulator. Prereqs., CSCI 2270 and 2824. CSCI 3302 and ECEN 3303 are the same course.

College of Engineering & Applied Science Computer Science Artificial Intelligence

ECEN-3303 (3) Introduction to Robotics

Introduces students to fundamental concepts in autonomous, mobile robotics: mechanisms, locomotion, kinematics, control, perception and planning. The course consists of lectures and lab sessions that are geared toward developing a complex robot controller in a realistic, physics-based multi-robot simulator. Prereqs., CSCI 2270 and 2824. CSCI 3302 and ECEN 3303 are the same course.

| | | |
|--|-----------------------------------|------------------------------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | Computer and Digital Systems |
|--|-----------------------------------|------------------------------|

CSCI-3308 (3) Software Engineering Methods and Tools

Focuses on software engineering methods and tools for application development, including design and system organization; using and creating reusable libraries; building, testing, and debugging; and performance evaluation. Prerequisites: Requires pre-requisite course of CSCI 2270 (minimum grade C-).

| | | |
|--|------------------|----------------------|
| College of Engineering & Applied Science | Computer Science | Software Engineering |
|--|------------------|----------------------|

CVEN-3313 (3) Theoretical Fluid Mechanics

Basic principles of fluid mechanics. Covers fluid properties, hydrostatics, fluid flow concepts, including continuity, energy, momentum, dimensional analysis and similitude, and flow in closed conduits. Prereq., CVEN 2121. Prerequisites: Requires pre-requisite course of CVEN 2121 (or GEEN 3851, or ASEN 2001, or MCEN 2023).

| | | |
|--|-------------------|--------------------------------|
| College of Engineering & Applied Science | Civil Engineering | Fluid Mechanics & Water Resour |
|--|-------------------|--------------------------------|

CHEN-3320 (3) Chemical Engineering Thermodynamics

Applies thermodynamic principles to nonideal systems, phase equilibrium, chemical equilibrium, power generation, refrigeration, and chemical processes. Prereqs., CHEN 2120 (min. grade C) and either CHEM 4511 or 4521 (min. grade C-). Prerequisites: Requires pre-requisite courses of CHEN 2120 and either CHEM 4511 or 4521 (all min grade C-).

| | |
|--|----------------------|
| College of Engineering & Applied Science | Chemical Engineering |
|--|----------------------|

ECEN-3320 (3) Semiconductor Devices

Highlights the fundamentals of semiconductor materials and devices. Topics include the electrical and optical properties of semiconductors, the theory of Pn junctions, bipolar and field-effect transistors, and optoelectronic devices. Prereq., ECEN 3250. Prerequisites: Restricted to College of Engineering majors only.

| | | |
|--|-----------------------------------|---------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | General |
|--|-----------------------------------|---------|

CVEN-3323 (3) Hydraulic Engineering

Studies hydraulic engineering theory and applications. Topics include incompressible flow in conduits, pipe system analysis and design, open channel flow, flow measurement, analysis and design of hydraulic machinery. Prereq., CVEN 3313 (or MCEN 3021, or GEEN 3853, or AREN 2120). Restricted to Civil, Environmental, or Architectural Engineering majors only. Prerequisites: Requires pre-requisite course of CVEN 3313 (or MCEN 3021, or GEEN 3853, or AREN 2120). Restricted to Civil (CVEN), Environmental (EVEN), or Architectural (ARCH) Engineering majors only.

| | | |
|--|-------------------|--------------------------------|
| College of Engineering & Applied Science | Civil Engineering | Fluid Mechanics & Water Resour |
|--|-------------------|--------------------------------|

ECEN-3350 (3) Programming Digital Systems

Covers computer usage in system implementation, central processor capabilities, and managing concurrency. Includes computer architecture, instruction sets, programming, input/output, interrupts, block transfers, semaphores, shared procedures, multiple processors, and memory management. Prereq., ECEN 2350. Formerly ECEN 2120. Prerequisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) College of Engineering students only.

College of Engineering & Applied Science | Electrical & Computer Engineering | General

ECEN-3400 (3) Electromagnetic Fields and Waves

Electromagnetic fields are covered at an introductory level, starting with electrostatics and continuing with DC current, magnetostatics, time-varying magnetic fields, waves on transmission lines, Maxwell's equations and the basics of plane waves. The use of fields in inductors, capacitors, resistors, transformers, and energy and power concepts are studied. Prereqs., APPM 2350, PHYS 1110, and ECEN 2250. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

College of Engineering & Applied Science | Electrical & Computer Engineering | General

GEEN-3400 (3) Invention and Innovation

Introduction to invention and product innovation with a hands-on approach. Students explore the invention process, hone their engineering design skills, and explore entrepreneurship (patenting, intellectual property, marketing, raising capital). Student teams design, create, and test a potentially commercial product, and exhibit at an end-of-semester design expo. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

College of Engineering & Applied Science | Engineering Administration

ECEN-3410 (3) Electromagnetic Waves and Transmission

Covers reflected and transmitted plane waves in layered media, Poynting's theorem of electromagnetic power, two-conductor transmission line theory and practice, Smith chart usage and impedance matching, and elements of antenna theory. Prereq., ECEN 3400. Restricted to juniors/seniors. Prerequisites: Restricted to students with 57-180 credits (Juniors or Seniors).

College of Engineering & Applied Science | Electrical & Computer Engineering | General

CVEN-3414 (3) Fundamentals of Environmental Engineering

Emphasizes chemical, ecological, and hydrological fundamentals and importance of mass and energy balances in solving environmental engineering problems related to water quality, water and wastewater treatment, air pollution, solid and hazardous waste management, sustainability, and risk assessment. Prerequisites: Requires pre-requisite courses of CHEN 1211 and CHEM 1211 (or CHEM 1113 and CHEM 1114 or CHEM 1251 or CHEM 1351) and APPM 1360 (or MATH 2300). Restricted to Civil, Architectural, Environmental, Mechanical or Chemical Engineering majors only.

College of Engineering & Applied Science | Civil Engineering | Environmental

CVEN-3424 (3) Water and Wastewater Treatment

Introduces design and operation of facilities for treatment of municipal water supplies and wastewater. Provides an engineering application of physical, chemical, and biological unit processes and operations for removal of impurities and pollutants. Involves an integrated design of whole treatment systems combining process elements. Prereq., CVEN 3414. Prerequisites: Requires pre-requisite course of CVEN 3414 (min grade C-).

[College of Engineering & Applied Science](#) [Civil Engineering](#) [Environmental](#)

CSCI-3434 (3) Theory of Computation

Introduces the foundations of formal language theory, computability, and complexity. Shows relationship between automata and various classes of languages. Addresses the issue of which problems can be solved by computational means, and studies complexity of solutions. Prereq., CSCI 3104 and 3155. Prerequisites: Requires pre-requisite courses of CSCI 3104 and CSCI 3155 (minimum grade C-).

[College of Engineering & Applied Science](#) [Computer Science](#) [Theory of Computation](#)

CVEN-3434 (3) Introduction to Applied Ecology

Emphasizes the integration of physical, chemical, and biological processes in controlling terrestrial and aquatic ecosystems. Ecosystem concepts are applied to current environmental and water quality problems. Includes field trips and a group project. Same as ENVS 3434. Prerequisites: Requires pre-requisite courses of CHEN 1211 and CHEM 1211 (or CHEM 1113 and CHEM 1114 or CHEM 1251 or CHEM 1351). Restricted to students with 57-180 credits (Junior or Senior) Civil (CVEN), Environmental (EVEN) or Architectural Engineering (AREN) majors.

[College of Engineering & Applied Science](#) [Civil Engineering](#) [Environmental](#)

ASEN-3519 (1-4) Special Topics

Studies specialized aspects of the aerospace engineering sciences or innovative treatment of required subject matter at the upper-division level. Course content is indicated in the online SchedulePlanner. Prereq., varies. Prerequisites: Restricted to College of Engineering majors only.

College of Engineering & Applied Science Aerospace Engineering Specialized Courses

CVEN-3525 (3) Structural Analysis

Studies structural analysis of statically determinate and indeterminate systems, deflections, energy methods, and force method. Prereq., CVEN 3161 or MCEN 2063. Restricted to Architectural or Civil Engineering majors only. Prerequisites: Requires pre-requisite course of CVEN 3161 or MCEN 2063. Restricted to Civil (CVEN), Environmental (EVEN), or Architectural (AREN) Engineering majors only.

College of Engineering & Applied Science Civil Engineering Structures

AREN-3540 (3) Illumination I

Studies the fundamentals of architectural illumination. Introduces and applies basic principles and vocabulary to elementary problems in the lighting of environments for the performance of visual work and the proper interaction with architecture. Prerequisites: Requires pre-requisite courses of GEEN 1300 or CSCI 1300 (min grade C-).

College of Engineering & Applied Science Civil Engineering Building Systems Engineering

CVEN-3602 (3) Transportation Systems

Introduces technology, operating characteristics, and relative merits of highway, airway, waterway, railroad, pipeline, and convey or transportation systems. Focuses on evaluation of urban transportation systems and recent transportation innovations. Prerequisites: Restricted to College of Engineering majors only.

College of Engineering & Applied Science Civil Engineering Surveying and Transportation

CSCI-3656 (3) Numerical Computation

Covers development, computer implementation, and analysis of numerical methods for applied mathematical problems. Topics include floating point arithmetic, numerical solution of linear systems of equations, root finding, numerical interpolation, differentiation, and integration. Prereqs., two semesters of calculus, linear algebra, and either CSCI 1200 or 1300.

College of Engineering & Applied Science Computer Science Numerical Computation

CVEN-3698 (3) Engineering Geology

Highlights the role of geology in engineering minerals; rocks; surficial deposits; rocks and soils as engineering materials; distribution of rocks at and below the surface; hydrologic influences; geologic exploration of engineering sites; mapping; and geology of underground excavations, slopes, reservoirs, and dam sites. Includes field trips.

College of Engineering & Applied Science Civil Engineering Geotechnical

HUEN-3700 (3) Culture Wars in Rome

Investigates in Rome, Italy (during Maymester), the cultural contrasts among three different cities: ancient, pagan, aristocratic Rome; medieval, Christian, theocratic Rome; and modern, secular, democratic Rome. Draws on evidence from Roman literature, politics, art, and architecture. Must have completed a minimum of 26 credit hours by start of course. Requires some preparatory work in Boulder.

College of Engineering & Applied Science Humanities for Engineers

CSCI-3702 (3) Cognitive Science

Introduces cognitive science, drawing from psychology, philosophy, artificial intelligence, neuroscience, and linguistics. Studies the linguistic relativity hypothesis, consciousness, categorization, linguistic rules, the mind-body problems, nature versus nurture, conceptual structure and metaphor, logic/problem solving, and judgment. Emphasizes the nature, implications, and limitations of the computational model of mind. Prereqs., two of the following: PSYC 2145, LING 2000, CSCI 1300, and PHIL 2440. Same as LING 3005, PHIL 3310, and PSYC 3005.

College of Engineering & Applied Science Computer Science Artificial Intelligence

CVEN-3708 (3) Geotechnical Engineering 1

Studies basic characteristics of geological materials; soil and rock classifications; site investigation; physical, mechanical, and hydraulic properties of geologic materials; the effective stress principle; soil and rock improvement; seepage analysis; stress distribution; and consolidation and settlement analyses. Selected experimental and computational laboratories. Prereq., CVEN 3161 or MCEN 2063. Prerequisites: Requires pre-requisite course of CVEN 3161 or MCEN 2063. Restricted to Civil (CVEN), Environmental (EVEN), or Architectural (AREN) Engineering majors only.

College of Engineering & Applied Science Civil Engineering Geotechnical

CVEN-3718 (3) Geotechnical Engineering 2

Discusses shear strength, bearing capacity, lateral earth pressures, slope stability, and underground construction. Analyzes and looks at the design of shallow and deep foundations, retaining walls, tunnels, and other earth and rock structures. Selected experimental and computational laboratories. Prereq., CVEN 3708. Prerequisites: Requires pre-requisite course of CVEN 3708 (minimum grade C-). Restricted to College of Engineering majors only.

College of Engineering & Applied Science Civil Engineering Geotechnical

HUEN-3750 (3) Xi'an, China: Self-Awareness and Images of the Other

Explores Chinese culture abroad, focusing on ideas of self and other within special historical, social, political, and economical circumstances. Chinese and American concepts of self and society, of individual, collective, and national identities will be analyzed. Held on the campus of Xi'an Jiaotong University, China. Prerequisite: HUEN 1010 or equivalent.

College of Engineering & Applied Science Humanities for Engineers

CSCI-3753 (4) Operating Systems

Examines software comprising computing systems as it builds upon hardware to provide a programming environment. Looks at structure and function of editors, compilers/assemblers, linkers, etc. Basic operating systems concepts and systems programming in high-level languages. Prereqs., CSCI 2700 and 2400 or ECEN 3350. Prerequisites: Requires pre-requisite courses of CSCI

2270 and either CSCI 2400 or ECEN 3350 (minimum grade C-).

College of Engineering & Applied Science | Computer Science | Operating Systems and Hardware

ECEN-3810 (3) Introduction to Probability Theory

Covers the fundamentals of probability theory, and treats the random variables and random processes of greatest importance in electrical engineering. Provides a foundation for study of communication theory, control theory, reliability theory, optics, and portfolio analysis. Prereqs., APPM 2350 and 2360. Credit not granted for this course and MATH 4510 or APPM 3570. Prerequisites: Restricted to College of Engineering majors only.

College of Engineering & Applied Science | Electrical & Computer Engineering | General

CHEN-3840 (1-4) Independent Study

Available to juniors with approval of the Department of Chemical Engineering. Subject arranged to fit needs of the student.

College of Engineering & Applied Science | Chemical Engineering

ECEN-3840 (1-6) Independent Study

Offers an opportunity for juniors to do independent, creative work. Numbered ECEN 3840-3849. Prereq., instructor consent.

College of Engineering & Applied Science | Electrical & Computer Engineering | General

HUEN-3840 (1-3) Independent Study

Offers an opportunity for students to do independent work in the humanities. Subject arranged to fit the needs of the student. May be repeated up to 3 total credit hours. Instructor consent required. Prerequisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) College of Engineering students only.

College of Engineering & Applied Science | Humanities for Engineers

HUEN-3843 (3) Special Topics

Explores different important themes in the humanities, check with department for specific semester topics. May be repeated up to 6 total credit hours. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

College of Engineering & Applied Science | Humanities for Engineers

GEEN-3851 (3) Statics for Engineers

Examines vector treatment of force systems and their resultants; equilibrium of frames and machines, including internal forces and three-dimensional configurations; static friction; properties of

surfaces, including first and second moments; hydrostatics; and minimum potential energy and stability. Prereq., PHYS 1110. Recommended coreq., APPM 2350. Same as CVEN 2121.

College of Engineering & Applied Science | Engineering Administration

GEEN-3852 (3) Thermodynamics for Engineers

Explores fundamental concepts and basic theory, including first and second laws of thermodynamics, properties, states, thermodynamic functions and cycles. Prereq., APPM 2350. Same as MCEN 3012.

College of Engineering & Applied Science | Engineering Administration

GEEN-3853 (3) Fluid Mechanics for Engineers

Introduces fluid mechanics and momentum transfer, emphasizing the application of these principles to engineering systems. Prereqs., APPM 2350 or 2360, and GEEN 1300 or CSCI 1300. Same as CHEN 3200.

College of Engineering & Applied Science | Engineering Administration

ASEN-3930 (6) Aerospace Engineering Cooperative Education

Students will participate in a previously arranged, department-sponsored cooperative education program with a government agency or industry. Recommended GPA above 3.0. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) Aerospace Engineering majors only.

College of Engineering & Applied Science | Aerospace Engineering | Specialized Courses

CHEN-3930 (6) Chemical Engineering Cooperative Education

Students enrolled in this course participate in a previously arranged, department-sponsored cooperative education program. Prereqs., CHEN 2120 (min. grade C) and GPA higher than 2.85. GPA higher than 3.00 strongly recommended.

College of Engineering & Applied Science | Chemical Engineering

ECEN-3930 (6) ECE Co-op Education

Participate in a cooperative education program working with a corporate or government entity. Individual assignments are arranged between the department and the outside employer. This course is offered only through Continuing Education. May be repeated up to 24 credit hours. Prereq., ECEN 2120, 2260, minimum GPA of 2.85 required. Restricted to sophomore, junior and senior EEEN and ECEN majors.

[College of Engineering & Applied Science](#) [Electrical & Computer Engineering](#) [General](#)

GEEN-3930 (6) Engineering Co-op

Students enrolled in this course participate in a previously arranged, department-sponsored cooperative education program with a university, government agency, or industry. This course is offered only through Continuing Education and may be repeated up to 24 credit hours (four co-op terms). GPA higher than 2.75 is required. GPA higher than 3.00 is strongly recommended.

[College of Engineering & Applied Science](#) [Engineering Administration](#)

CSCI-4000 (3) Entrepreneurship in Computing

Examines the development of new venture creation from the entrepreneur's perspective. Provides an understanding of the entire process including opportunity identification, feasibility study, fundraising, organization, team creation, and exit strategies through case studies, oral and written presentations, and outside speakers. Taught by an experienced entrepreneur. Prereq., CSCI 2270. Restricted to juniors/seniors.

[College of Engineering & Applied Science](#) [Computer Science](#) [General Computer Science](#)

ECEN-4000 (3) Special Topics

College of Engineering & Applied Science | Electrical & Computer Engineering | General

ECEN-4001 (1-4) Special Topics

Credit and subject matter to be arranged. Numbered ECEN 4001-4049. Prerequisites vary.

College of Engineering & Applied Science | Electrical & Computer Engineering | Bioengineering

ECEN-4002 (1-4) Special Topics

College of Engineering & Applied Science | Electrical & Computer Engineering | Communications

ECEN-4006 (1-4) Special Topics

College of Engineering & Applied Science | Electrical & Computer Engineering | Optics

ECEN-4009 (1-4) Special Topics

College of Engineering & Applied Science | Electrical & Computer Engineering | VLSI CAD Methods

AREN-4010 (3) HVAC System Modeling and Control

Engineering course devoted to building automation and control systems. Topics include HVAC control technology and strategies, measurement and device technologies, analysis and modeling of dynamic systems, simulation of conventional and advanced control approaches, assessment of control loop performance, and hands-on direct digital control (DDC) programming exercises as used in current building control practice. Prereq., AREN 4110. Same as CVEN 5010.

College of Engineering & Applied Science | Civil Engineering | Building Systems Engineering

ASEN-4010 (3) Introduction to Space Dynamics

Includes central force fields, satellite orbits, rocket dynamics, orbital transfer, interplanetary mission analysis, and perturbation due to atmospheric drag and Earth oblateness. Prereq., ASEN 3200 or equivalent, or instructor consent required. Prerequisites: Requires pre-requisite course of ASEN 3200. Restricted to Aerospace Engineering (ASEN) majors only.

College of Engineering & Applied Science | Aerospace Engineering | Astrodynamics & Orbital Mech

CHEN-4010 (2) Chemical Engineering Senior Thesis 1

Provides an opportunity for advanced students to conduct exploratory research in chemical engineering.

College of Engineering & Applied Science | Chemical Engineering

ECEN-4011 (1-4) Special Topics

Same as ECEN 5011.

College of Engineering & Applied Science | Electrical & Computer Engineering | Bioengineering

ASEN-4012 (3) Aerospace Materials

Studies aerospace grade aluminum, magnesium, nickel, and titanium alloys. Covers heat treatment, defect structures, failure mechanisms, corrosion and its prevention, the effect of space radiation on materials, and high and low temperature effects. Introduces composite materials with a lab design and experiment. Emphasizes the selection of materials in design with procedures for choosing materials rationally. Case studies include aerogels, carbides, composites, powder metallurgy, nanomaterials, and advanced materials manufacturing technologies. Prerequisites: Requires pre-requisite course of ASEN 2001 (min grade C). Restricted to Aerospace Engineering (ASEN) majors only.

College of Engineering & Applied Science | Aerospace Engineering | Structures, Mat, & Struc Dynam

ECEN-4012 (1-4) Special Topics

College of Engineering & Applied Science | Electrical & Computer Engineering | Communications

ASEN-4013 (3) Foundations of Propulsion

Describes aerothermodynamics and design of both rocket and air-breathing engines. Includes ramjets, turbojets, turbofans, and turboprop engines, as well as liquid, solid, and hybrid rockets. Prerequisites: Requires pre-requisite courses of ASEN 3113 and APPM 2360 (all min grade C). Restricted to Aerospace Engineering (ASEN) majors only.

College of Engineering & Applied Science | Aerospace Engineering | Thermodynamics and Propulsion

ECEN-4013 (1-4) Special Topics

College of Engineering & Applied Science | Electrical & Computer Engineering | Computer and Digital Systems

ECEN-4016 (1-4) Special Topics

College of Engineering & Applied Science | Electrical & Computer Engineering | Optics

ECEN-4017 (1-4) Special Topics

College of Engineering & Applied Science | Electrical & Computer Engineering | Power

ASEN-4018 (4) Senior Projects 1: Design Synthesis

Focuses on the synthesis of technical knowledge, project management, design process, leadership, and communications within a team environment. Students progress through the design process beginning with requirements development, then preliminary design and culminating with critical design. Offered fall only. Prerequisites: Requires pre-requisite courses of ASEN, 3111, 3112, 3113, 3128, 3200, and 3300 (all min grade C). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Aerospace Engineering (ASEN) majors only.

College of Engineering & Applied Science | Aerospace Engineering | Aerospace Design & System Engr

ECEN-4018 (1-4) Special Topics

College of Engineering & Applied Science | Electrical & Computer Engineering | Dynamical Systems and Control

CHEN-4020 (2) Chemical Engineering Senior Thesis 2

Continuation of CHEN 4010. CHEN 4010 and 4020 can substitute for CHEN 4130.

College of Engineering & Applied Science | Chemical Engineering

ECEN-4021 (1-4) Special Topics

Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Engineering majors only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Bioengineering

ECEN-4023 (1-4) Special Topics

Same as ECEN 5023.

College of Engineering & Applied Science | Electrical & Computer Engineering | Computer and Digital Systems

ECEN-4024 (1-4) Special Topics

Same as ECEN 5024.

College of Engineering & Applied Science | Electrical & Computer Engineering | Electromagnetics

MCEN-4026 (3) Manufacturing Processes and Systems

Engineering-science design course that examines manufacturing processes for metals, polymers, and composites as well as manufacturing systems that integrate these processes. Lecture topics include: forming, machining, joining, assembling, process integration, computer-aided manufacturing, and manufacturing system engineering. Prereq., MCEN 2024. Prerequisites: Requires prerequisite course of MCEN 2024. Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical Engineering (MCEN) majors or Mechanical Engineering Concurrent Degree majors only.

EMEN-4030 (3) Project Management Systems

Acquaints the student with multidisciplinary aspects of project management, including the relationship between schedule, project cost, and performance. Uses qualitative and quantitative tools to facilitate project management skills. Restricted to junior or senior in the College of Engineering and Applied Science. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

[College of Engineering & Applied Science](#)
[Engineering Management](#)

AREN-4035 (3) Architectural Structures 1

Analyzes basic structural systems. Covers principles of mechanics and mechanical properties of materials and analysis and design of trusses, arches, and cable structures. For nonengineering students; does not apply toward an engineering degree. Prereq., PHYS1110, and APPM 1350 or MATH 1300. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) Environmental Design majors only.

[College of Engineering & Applied Science](#)
[Architectural Structures](#)

College of Engineering & Applied Science | Civil Engineering | Structures

MCEN-4037 (2) Measurements Lab

Carry out several experiments designed to teach methods of experimentation and data analysis. Experiments taken from solid mechanics, fluid mechanics, thermal science, and materials science. Emphasizes planning an experiment, applying sound procedures, keeping proper records, and communicating results orally and in written reports. Gives students the opportunity to participate in projects that extend over two or more weeks. Prerequisites: Requires prerequisites of ECEN3010 & MCEN2063 (or CVEN3161 or ASEN3112) & MCEN3037 (or APPM4520 or 4570 or CVEN3227 or CHEN3010) & WRTG3030 (or WTRG3035 or HUEN3100 or PHYS3050). Restricted to MCEN majors w/57-180 credits (juniors/seniors).

College of Engineering & Applied Science | Mechanical Engineering | Miscellaneous

MCEN-4043 (3) System Dynamics

Covers linear dynamic systems and mathematical tools for understanding them, input-output relationships, modeling templates, complex variables, Laplace transform, time-harmonic forcing and response, Fourier series and discrete Fourier transform, and coupled systems. Prereqs., ECEN 3010 and MCEN 2043 or 3043. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical Engineering (MCEN) majors or Mechanical Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Mechanical Engineering | Solids

AREN-4045 (3) Architectural Structures 2

Analyzes basic structural systems. Covers principles of mechanics as applied to the design of flexural members, columns, continuous beams, and rigid frames. For nonengineering students; does not apply toward an engineering degree. Prereq., AREN 4035.

College of Engineering & Applied Science | Civil Engineering | Structures

MCEN-4045 (3) Mechanical Engineering Design Project 1

First part of a two-course capstone design experience in mechanical engineering. Covers problem definition, determining design requirements, alternative design concepts, engineering analysis, proof-of-concept prototype, and CAD drawings. Students make several oral design reviews, a final design presentation, and prepare a written report. Coreq., MCEN 4026. Prerequisites: Requires prerequisite courses of MCEN 3025 & 3032 & 3022 (or CHEN 3210) and GEEN 1400 (or ECEN 1400 or GEEN 3400). Restricted to students with 87-180 credits (Senior) Mechanical Engineering majors or Mechanical Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Mechanical Engineering | Design

ASEN-4047 (3) Probability and Statistics for Aerospace Engineering Sciences

Considers probability concepts and theory for better design and control of aerospace engineering systems. Includes descriptive and inferential statistical methods for experimental analysis. Also covers discrete and continuous random variable distributions, estimators, confidence intervals, regression, analysis of variance, hypothesis testing, nonparametric statistics, random processes, and quality control, including software models of same. Prereq., junior or graduate standing or instructor consent. Same as ASEN 5047.

College of Engineering & Applied Science | Aerospace Engineering | Computational & Analytic Meth

MCEN-4047 (2) Measurements 2

Four hours of lab per week. Student teams perform laboratory projects that extend over several weeks. Takes experiments from solid mechanics, acoustics, electronics, and other ME-related disciplines. Emphasizes planning an experiment, applying sound experimental procedures, using statistics, keeping proper records, and communicating results orally, on posters, and in written documents. Prerequisites: Requires prerequisite courses of MCEN 2024 and MCEN 4037. Restricted to College of Engineering and Applied Science graduate students or senior BS/MS Mechanical Engineering or Concurrent Degree students.

College of Engineering & Applied Science | Mechanical Engineering | Miscellaneous

ECEN-4049 (1-4) Special Topics

College of Engineering & Applied Science | Electrical & Computer Engineering | VLSI CAD Methods

EMEN-4050 (3) Leadership and Professional Skills

Provides basic concepts of leadership and the essential skills required to become an effective leader/manager. Students will be provided the opportunity for personal development through exercises in communication and leadership effectiveness. Other major topics include leadership styles, managing commitments, change management, negotiation, conflict resolution, organizational culture, emotional intelligence, team dynamics, and business ethics. Restricted to seniors in the College of Engineering and Applied Science. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Engineering majors only.

College of Engineering & Applied Science | Engineering Management

EHON-4051 (1) Dimensions of Leadership

Explores the many dimensions of leadership that exceed technical knowledge: the ethical, societal, cultural, interpersonal, and personal. Through seminars, workshops and exposure to leaders, students will reflect upon their engineering education in light of the multifaceted demands of effective leadership and their own personal career goals. Students will take an active role in shaping the course. Prereq., junior standing; honors standing or instructor consent. Repeatable for credit up to 3 credit hours.

College of Engineering & Applied Science | Engineering Administration

ECEN-4053 (1-4) Special Topics

Same as ECEN 5053.

College of Engineering & Applied Science | Electrical & Computer Engineering | Computer and Digital Systems

MCEN-4085 (4) Mechanical Engineering Design Project 2

Second part of a two-course capstone design experience in mechanical engineering. Includes refinement of prototype, design optimization, fabrication, testing, and evaluation. Students orally present the final design and prepare a written report and operation manual for the product. Prereq., MCEN 4026 and 4045. Prerequisites: Requires prerequisite courses of MCEN 4026 and

MCEN 4045. Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical Engineering (MCEN) majors or Mechanical Engineering Concurrent Degree (C-MCEN) majors only.

College of Engineering & Applied Science | Mechanical Engineering | Design

CVEN-4087 (3) Construction Contract Administration

Students will develop a working understanding of the various types of contracts, key contract provisions, how to evaluate contract risk, ethical requirements, and most importantly explore effective contract administration. Construction and engineering contracts are at the core of all project relationships. Through lecture, group dialog and case studies students will develop confidence in their ability to assess, understand and deploy contract administration in a construction setting. Prereq., senior standing in civil or architectural engineering or instructor consent.

College of Engineering & Applied Science | Civil Engineering | Miscellaneous

ASEN-4090 (3) Global Positioning Systems Applications

Focuses on GPS technology, software development, and applications. Lectures will cover the principal concepts used in GPS, and weekly laboratories will apply that knowledge. The course will culminate instudent design projects using GPS. Prereqs., APPM 2360 and GEEN 1300 or equivalent. Recommended junior/senior standing in engineering.

College of Engineering & Applied Science | Aerospace Engineering | Global Positioning Systems

CHEN-4090 (1) Senior Seminar

Provides chemical engineering career and professional information, facilitates contact with faculty and industry representatives, and improves communication and leadership skills. Consists of a series of seminars and field trips and requires a research project involving a written and oral report. Prerequisites: Restricted to Chemical (CHEN) Engineering or Chemical and Biological (CBEN) Engineering majors only.

College of Engineering & Applied Science | Chemical Engineering

EMEN-4100 (3) Business Methods and Economics for Engineers

Covers cost concepts, financial statements, and the company economic environment. Includes concepts and methods of analysis of the time value of money, comparison of project alternatives before and after taxes, cash flows, replacement analysis, risk management, and financial cash statements. Restricted to junior or senior in the College of Engineering and Applied Science. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

College of Engineering & Applied Science | Engineering Management

EVEN-4100 (3) Environmental Sampling and Analysis

Introduces students to hands-on environmental sampling and analysis techniques for characterization of surface water, subsurface water, soils and sediments, and air. Laboratories include stream sampling, drilling, monitoring well installation, water level, slug tests, air sampling. Prereqs., CVEN 4404 and 4414, fluid mechanics, or instructor consent.

College of Engineering & Applied Science | Environmental Engineering

ECEN-4106 (3) Photonics

Deals with the generation, transmission, modification and detection of light. Applications include fiber optics communications, data storage, sensing, and imaging. Leads to understanding of fundamental physical principles used in the analysis and design of modern photonic systems. Prereqs., ECEN 3400. Coreq., ECEN 3300. Restricted to seniors. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior).

College of Engineering & Applied Science | Electrical & Computer Engineering | Optics

AREN-4110 (3) HVAC Design 1

Applies engineering principles to the design of heating, ventilating, and air conditioning (HVAC) systems for buildings. Covers HVAC systems description, load estimating, applied psychometrics, coils and heat exchangers, air and water distribution systems, and primary equipment and systems. Prereq., AREN 3010. Same as CVEN 5110.

College of Engineering & Applied Science | Civil Engineering | Building Systems Engineering

CSCI-4113 (3) Unix System Administration

Introduces UNIX (Linux) system administration and related topics, including trouble-shooting system and network problems, hardware and software configuration and installation, basic scripting, and security aspects of Internet hosts. Students build a Linux server from the ground up, using provided computing resources, and must maintain and secure the server themselves. Prereqs., CSCI 2270 or instructor consent. Recommended prereq., CSCI 3308. Prerequisites: Requires pre-requisite course of CSCI 2270 (minimum grade C-).

College of Engineering & Applied Science | Computer Science | Operating Systems and Hardware

ASEN-4114 (3) Automatic Control Systems

Methods of analysis and design of feedback control for dynamic systems. Covers nyquist, bode, and linear quadratic methods based on frequency domain and state space models. Laboratory experiments provide exposure to computation for simulation and real time control, and typical control system sensors and actuators. Same as ASEN 5114. Prerequisites: Requires pre-requisite courses of ASEN 3128 and ASEN 3200 (all min grade C). Restricted to Aerospace Engineering (ASEN) majors only.

College of Engineering & Applied Science | Aerospace Engineering | Systems and Control

MCEN-4115 (3) Mechantronics and Robotics I

Focuses on design and construction of microprocessor-controlled electro-mechanical systems. Lectures review critical circuit topics, introduce microprocessor architecture and programming, discuss sensor and actuator component selection, robotic systems, and design strategies for complex, multi-system devices. Lab work reinforces lectures and allows hands-on experience with robotic design. Students must design and build an autonomous robotic device. Project expenses may be incurred (\$50 maximum). Prereqs., ECEN 3010 or equivalent and GEEN 1300 or equivalent. Same as MCEN 5115. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical Engineering (MCEN) majors or Mechanical Engineering Concurrent Degree (C-MCEN) majors only.

CSCI-7782 (3) Topics in Cognitive Science

Addresses a different set of one to three topics each year. For each topic, one or two faculty members of the Institute of Cognitive Science present background material and current research. Prereq., graduate standing or instructor consent. Prerequisites: Restricted to Graduate Students only.

[College of Engineering & Applied Science](#) [Computer Science](#) [Artificial Intelligence](#)

CVEN-7788 (3) Soil Behavior

Topics include soil mineralogy, formation of soils through sedimentary processes and weathering, determination of soil composition, soil water, colloidal phenomena in soils, fabric property relationships, analysis of mechanical behavior including compressibility, strength and deformation, and conduction phenomena in terms of physicochemical principles. Involves applications for stabilization and improvement of soils, and disposal of waste materials. Prereq., CVEN 3718 or instructor consent.

[College of Engineering & Applied Science](#) [Civil Engineering](#) [Geotechnical](#)

CSCI-7818 (3) Topics in Software Engineering

Studies selected topics of current interest in software engineering. Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

[College of Engineering & Applied Science](#) [Computer Science](#) [Software Engineering](#)

ECEN-7840 (1-6) Independent Study

Offers an opportunity for students to do independent, creative work at the doctoral level. Numbered ECEN 7840-7849. Prereq., advisor consent.

College of Engineering & Applied Science | Electrical & Computer Engineering | General

ECEN-7849 (1-6) Independent Study

Offers an opportunity for students to do independent, creative work at the doctoral level. Numbered ECEN 7840--7849. Prereq., advisor consent.

College of Engineering & Applied Science | Electrical & Computer Engineering | VLSI CAD Methods

CSCI-7900 (1-6) Doctoral Level Independent Study

For doctoral students.

College of Engineering & Applied Science | Computer Science | General Computer Science

ASEN-8990 (1-10) Doctoral Thesis

College of Engineering & Applied Science | Aerospace Engineering | Specialized Courses

CHEN-8990 (1-10) Doctoral Thesis

College of Engineering & Applied Science | Chemical Engineering

CSCI-8990 (1-10) Doctoral Dissertation

Investigates some specialized field of computer science. Approved and supervised by faculty members. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Computer Science | General Computer Science

CVEN-8990 (1-10) Doctoral Thesis

A minimum of 30 credit hours is required.

College of Engineering & Applied Science | Civil Engineering | Building Systems

ECEN-8990 (1-10) Doctoral Thesis

College of Engineering & Applied Science | Electrical & Computer Engineering | General

TLEN-8990 (1-10) Doctoral Dissertation

Investigates specialized topic or field in the area of telecommunications. Approved and supervised by faculty members. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Telecommunications

MCEN-8999 (1-10) Doctoral Thesis

College of Engineering & Applied Science | Mechanical Engineering | Special Topics

Subject

Number

MUEL-1081 (3) Basic Music Theory

Introduction to music notation, meter and rhythm, scales, intervals, triads, seventh chords, fundamentals of harmonic progression, voice leading, aural skills, and composition. For nonmusic majors who have little or no previous background in the subject. Formerly EMUS 1081. Prerequisites: Restricted to non-College of Music majors only.

[College of Music](#) [Elective Music](#)

MUEL-1115 (1) Piano Class 1

Introduces the keyboard and music reading for nonmusic majors with no prior keyboard experience. Studies very easy classical and pop repertoire. Prereq., no prior keyboard experience or instructor consent. Formerly EMUS 1115. Prerequisites: Restricted to non-College of Music majors only.

[College of Music](#) [Elective Music](#)

MUEL-1125 (1) Piano Class II

Continuation of MUEL 1115. Focuses on development of music reading. Studies technical patterns, easy classical and pop repertoire, and improvisation. Prereq., MUEL 1115. Restricted to non-College of Music majors only. Formerly EMUS 1125. Prerequisites: Restricted to non-College of Music majors only.

[College of Music](#) [Elective Music](#)

MUEL-1145 (2-4) Guitar Class

A systematic study of the beginning literature and technique of the classical guitar with an emphasis on reading music. Designed for nonmusic majors with no prior musical experience. Restricted to non-College of Music majors only. Formerly EMUS 1145. Prerequisites: Restricted to non-College of Music majors only.

College of Music | Elective Music

MUEL-1155 (2) Intermediate Guitar

Studies the intermediate literature and technique of the classical and popular guitar. Emphasis on reading standard notation and chord charts. Designed for non-music majors. May be repeated up to 6 total credit hours. Prereq., MUEL 1145 or instructor consent. Restricted to non-College of Music majors only. Formerly EMUS 1155. Prerequisites: Restricted to non-College of Music majors only.

College of Music | Elective Music

MUEL-1184 (1) Voice Class

Involves basic vocal technique and easy solo repertoire taught through a group medium, for beginner and intermediate level students. May be repeated upto 6 total credit hours. Recommended prereq., ability to read music. Formerly EMUS 1184. Prerequisites: Restricted to non-College of Music majors only.

College of Music | Elective Music

MUEL-1416 (2) Introduction to Hand Percussion

Studies the literature and technique of hand percussion. Emphasizes African and Latin percussion techniques. Designed for non-music majors. May be repeated up to 6 total credit hours. Restricted to non-College of Music majors only. Formerly EMUS1416. Prerequisites: Restricted to non-College of Music majors only.

College of Music | Elective Music

MUEL-1832 (3) Appreciation of Music

Provides a basic knowledge of primarily Western music literature and development of discriminating listening habits. Restricted to nonmusic majors. Formerly EMUS 1832. Approved for arts and sciences core curriculum: literature and the arts. Offered fall and spring. Prerequisites: Restricted to non-College of Music majors only.

College of Music | Elective Music

MUEL-2091 (2) Intro to Audio Recording

Introduces and explores basic concepts in audio recording from microphones to digital audio workstations. Also focuses on development of critical listening skills. Restricted to non-College of Music majors only. Prerequisites: Restricted to non-College of Music majors only.

College of Music | Elective Music

MUEL-2184 (1) Voice Class

Continuation of MUEL 1184, with more advanced repertoire and vocal techniques. May be repeated up to 6 total credit hours. Prereq., MUEL 1184. Restricted to non-College of Music majors only. Formerly EMUS 2184. Prerequisites: Restricted to non-College of Music majors only.

College of Music | Elective Music

MUEL-2752 (3) Music in American Culture

Offers a stylistic and historical examination of trends that have influenced present-day music in the U.S. Formerly EMUS 2752. Approved for arts and sciences core curriculum: United States context. Prerequisites: Restricted to non-College of Music majors only.

College of Music | Elective Music

MUEL-2772 (3) World Musics

Highlights music outside Western art tradition, using current ethnomusicological materials. Spring semester focuses on musical cultures of the Americas, Africa, and Europe; fall semester focuses on musical cultures of Asia and Oceania. May be repeated up to 6 total credit hours. Formerly EMUS 2772. Approved for arts and sciences core curriculum: human diversity. Prerequisites: Restricted to non-College of Music majors only.

College of Music | Elective Music

MUEL-2842 (3) American Musical Theatre

Provides an overview of the role of musical theatre in U.S. culture, emphasizing the 20th century Broadway musical. Restricted to non-College of Music majors only. Formerly EMUS 2842. Prerequisites: Restricted to non-College of Music majors only.

College of Music | Elective Music

MUEL-2852 (3) Music of the Rock Era

Examines popular music, concentrating on the U.S. after 1950. Considers precursor styles (e.g., blues folk) and contributions to the new rock style; discusses the evolution of rock style from 1960 through the 1990s. Formerly EMUS 2852. Approved for the arts and sciences core curriculum: literature and the arts. Offered spring only. Prerequisites: Restricted to non-College of Music majors only.

College of Music | Elective Music

MUEL-2862 (3) American Film Musical, 1926-1954

Examines the development of filmed musicals from the beginning of sound movies through the Golden Age of Musicals. Emphasizes analysis and relationships of characters, songs, and incidental music. Restricted to non-College of Music majors only. Formerly EMUS 2862. Approved for arts and sciences core curriculum: literature and the arts. Prerequisites: Restricted to non-College of Music majors only.

College of Music | Elective Music

MUEL-2872 (3) Music in the Rock Era: Special Topics in Heavy Metal

Explores, discuss, debate and develop deeper understanding of Heavy Metal. Included are study of musical style characteristics and lyrical content, innovative performers, unifying elements of

Heavy Metal culture and the diversity within it, and its role in the larger Rock and societal contexts. Issues of gender, religion, and sexuality in the Heavy Metal construct are also discussed. Restricted to non-College of Music majors only. Prerequisites: Restricted to non-College of Music majors only.

College of Music | Elective Music

MUEL-3051 (2) Basic Composition

Introduces the processes, materials, and forms of composition through the writing and performance of short musical works. Open to any student who already has rudimentary musical knowledge. Restricted to non-College of Music majors only. Formerly EMUS 3051. Prerequisites: Restricted to non-College of Music majors only.

College of Music | Elective Music

MUEL-3642 (3) History of Jazz

Studies the distinctly American art form of jazz music from its origins to the present, including the various traditions, practices, historical events, and people most important to its evolution. For nonmusic majors. Formerly EMUS 3642. Offered fall and spring. Prerequisites: Restricted to non-College of Music majors only.

College of Music | Elective Music

MUEL-3772 (3) West African Music and Culture in Ghana

Provides hands-on and experiential enrichment for students to interact at several levels with a local community in Ghana. Classroom lectures will be combined with direct participation in drumming and dancing, field trips to participate in festivals and court ceremonies, field trips to kente weaving village, adinkra cloth making, wood carving villages, and museums. Prereq., MUSC 2782/MUEL 2772. Restricted to sophomore, non-College of Music majors only or instructor consent required. MUSC 3772 and MUEL 3772 are the same course.

College of Music | Elective Music

MUEL-3822 (3) Words and Music

Explores the interaction between words and music in song. Students will consider how such features as rhyme, rhythm, tone, and the connotations of particular words contribute to meaning in poetry; how rhythm, tempo, dynamics, mood, and instrumentation contribute to meaning in music; and how words and music coalesce in song to make a new meaning. Restricted to non-College of Music majors only. Formerly EMUS 3822. Approved for arts and sciences core curriculum: literature and the arts. Prerequisites: Restricted to non-College of Music majors only.

College of Music | Elective Music

MUEL-3832 (3) Music in Literature

Addresses literature that seeks either to explore the meaning of music or to make music out of words. Students will consider how musical concepts and techniques can be incorporated into poetry and prose, and will analyze the roles that writers have attributed to music in society, politics, and the life of the individual. Restricted to non-College of Music majors only. Formerly EMUS 3832. Approved for arts and sciences core curriculum: literature and the arts. Prerequisites: Restricted to non-College of Music majors only.

College of Music | Elective Music

MUEL-3872 (3) Music in the Rock Era: Special Topics in Heavy Metal

Explore, discuss, debate and develop deeper understanding of Heavy metal. Included are study of musical style characteristics and lyrical content, innovative performers, unifying elements of Heavy Metal culture and the diversity within it, and its role in the larger Rock and societal contexts. Issues of gender, religion, and sexuality in the Heavy Metal construct area also discussed.

College of Music | Elective Music

MUEL-4012 (3-6) African Music

Studies the musics, dances, and cultures of various peoples of Africa. Includes African diaspora music and Afro-pop. Restricted to non-College of Music majors only. Formerly EMUS 4012. Prerequisites: Restricted to non-College of Music majors only.

College of Music | Elective Music

MUEL-4081 (3) Introduction to Music Technology

Surveys the various tools and techniques in the field of music technology. Topics include an introduction to basic synthesis, musical instrument digital interface (MIDI) sequencing, audio sequencing, digital signal processing, music notation, and a historical perspective on electronic music. For non-music majors only. Prerequisites: Restricted to non-College of Music majors only.

College of Music | Elective Music

MUEL-4121 (3) Topics in Music Technology

Exploration of issues, techniques and tools of music technology. Topics vary from term to term and may include: interactive system for performance, teaching, and learning; computer music instrument design; digital synthesis and signal processing; music in intermedia; sound design and analysis. Lectures and work sessions will support student projects. Prereqs., MUSC 4081 or MUEL 4081 or instructor consent required. For non-music majors only. Prerequisites: Restricted to non-College of Music majors only.

MUSC-1081 (3) Intensive Music Theory

Introduces tools used in notating, performing, creating, and listening to music. Coreq., MUSC 1121. Open to music majors only. Offered fall only. Prerequisites: Restricted to Music majors or graduate students only.

[College of Music](#) | [Music](#) | [Theory and Composition](#)

MUSC-1101 (2) Semester 1 Theory

Introduces the fundamentals of diatonic harmony and voice leading, focusing on four-voice writing and analysis of excerpts from music literature. For music majors only. Offered fall only. Prerequisites: Restricted to Music majors or graduate students only.

[College of Music](#) | [Music](#) | [Theory and Composition](#)

PMUS-1105 (1) Keyboard Musicianship 1

Introduces the keyboard, music reading in the treble and bass clefs, basic theory and keyboard harmony, technical patterns, and improvisation. Studies easy classical and pop repertoire. May be repeated up to 12 total credit hours. Restricted to music majors with no keyboard experience or instructor consent required. Prerequisites: Restricted to Music majors or graduate students only.

[College of Music](#) | [Music](#) | [Keyboard Musicianship](#)

MUSC-1111 (2) Semester 2 Theory

Continuation of MUSC 1101. Covers principles of harmony and voice leading, using all common diatonic triads and seventh chords. Introduces secondary dominants, modulation, contrapuntal chord functions, and elementary structural analysis of excerpts from music literature. Prereq., MUSC 1101. Offered spring only. Prerequisites: Requires prerequisite course of MUSC 1101 or 1081. Restricted to College of Music undergraduate students only.

College of Music | Music | Theory and Composition

MUSC-1121 (1) Aural Skills Lab, Semester 1

Focuses on sight singing, rhythm, and dictation of diatonic melodies in major and minor keys (treble, alto, and bass clefs). Covers identification of scale types, intervals, triads, and dominant seventh chords. Studies harmonic dictation using chords from MUSC 1101. Offered fall only. Prerequisites: Restricted to Music majors or graduate students only.

College of Music | Music | Theory and Composition

MUSC-1131 (1) Aural Skills Lab, Semester 2

Acquaints students with sight singing in major and minor keys (treble, alto, tenor, and bass clefs). Includes dictation of one- and two-voice examples. Studies harmonic dictation using vocabulary from MUSC 1111. Considers detection of pitch and rhythm errors in performed examples. Prereq., MUSC 1121. Restricted to College of Music majors only. Offered spring only. Prerequisites: Requires prerequisite course of MUSC 1121. Restricted to College of Music undergraduate students only.

College of Music | Music | Theory and Composition

PMUS-1184 (1) Voice Class

Involves basic vocal technique and easy solo repertoire taught through a group medium, for beginner and intermediate level students. May be repeated up to 6 total credit hours. Restricted to MUSC majors. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Voice

PMUS-1205 (1) Keyboard-Musicianship 2

Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Keyboard Musicianship

MUSC-1325 (1) Piano Sight Reading

Studies techniques for improving sight-reading skills at the keyboard, with practical work in solo, ensemble, and choral literature. Also covers score reading and transposition. Restricted to piano majors instructor consent. Offered fall only. Prerequisites: Restricted to Music majors or graduate students only.

College of Music | Music | Keyboard

MUSC-1326 (1) Guitar Musicianship

Activities in sight-reading, fretboard harmony and comprehension of harmony and texture. Some work will be tied to the repertoire being studied in studio lessons. Open only to students with an emphasis on guitar performance in their degree plan. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Choral and Instrumental Music

PMUS-1515 (2) Jazz Piano Class

Offers small group instruction in the concepts and skills required to learn jazz piano. Students not only learn basic techniques required to play jazz but also become familiar with the theory, grammar, and lexicon of the jazz language. May be repeated up to 4 total credit hours. Prereq., PMUS 1205 or instructor consent required. Offered spring only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Keyboard Musicianship

MUSC-1544 (1) Italian Diction

Designed for the understanding of lyric Italian diction, the international phonetic alphabet, and its application to classical singing. Required for freshmen BM voice majors. Offered fall only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Voice

MUSC-1554 (1) English Diction

Designed for the understanding of lyric English diction, the international phonetic alphabet, and its application to classical singing as well as various musical styles of English classical voice literature. Prereq., MUSC 1544. Restricted to College of Music majors only. Required for Freshmen BM voice majors. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Voice

MUSC-1802 (3) Introduction to Musical Styles and Ideas

Introduces the study of music including bibliographic, listening, score reading, critical reading, and writing skills; music terminology; a survey of selected music genres (symphonic and chamber music); and building of general music repertory. Offered fall only. Prerequisites: Restricted to Music majors or graduate students only.

College of Music | Music | Musicology

MUSC-2071 (2) Instrumentation

Introduces and studies the instruments of the orchestra and problems of scoring for diverse choirs and full orchestra. Prereqs., MUSC 2101 and 2121. Restricted to College of Music majors only. Offered spring only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Theory and Composition

MUSC-2081 (2) Prepared for the Soundcheck

Provides an overview of the recording process from the performer's perspective from soundcheck through final mastering. Uses recorded material from in-class sessions. Examines differing approaches to recording as well as current technologies. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Theory and Composition

MUSC-2091 (2) Recording Techniques

Provides hands-on training in various audio recording techniques, acoustics, and sound reinforcement, studio maintenance, and troubleshooting. Real-world experience is gained through individual recording projects and College of Music events. Prereq., MUSC 2081 or instructor consent. Restricted to College of Music majors only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Theory and Composition

MUSC-2101 (2) Semester 3 Theory

Continuation of MUSC 1111. Reviews secondary dominants, secondary leading-tone chords, and modulation. Covers dissonance and chromaticism, including modal mixture, seventh chords with added dissonance, Neapolitan sixth chord, and augmented sixth chords. Provides structural analysis of musical excerpts. Prereq., MUSC 1111. Offered fall only. Prerequisites: Restricted to Music majors or graduate students only.

College of Music | Music | Theory and Composition

MUSC-2103 (3) Introduction to Music Education

Provides an overview of basic principles and practices of the music education profession. Explores public school music teaching through class discussions, directed observations, and a supervised field experience. Offered fall only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Music Education

PMUS-2105 (1) Keyboard-Musicianship 3

Continuation of PMUS 1205. May be repeated up to 12 total credit hours. Prereq., PMUS 1205 or instructor consent required. Prerequisites: Restricted to Music majors or graduate students only.

College of Music | Music | Keyboard Musicianship

MUSC-2111 (2) Semester 4 Theory

Continuation of MUSC 2101. Focuses on advanced chromaticism including modal mixture, altered dominants, voice leading, and chromatic harmony in larger contexts. Examines impressionism and jazz. Also involves composition projects. Prereq., MUSC 2101. Restricted to College of Music majors only. Offered spring only. Prerequisites: Requires prerequisite course of MUSC 2101. Restricted to College of Music undergraduate students only.

College of Music | Music | Theory and Composition

MUSC-2121 (1) Aural Skills Lab, Semester 3

Continuation of MUSC 1131. Studies sight singing of chromatic melodies in major and minor keys (in four clefs). Includes dictation of one- through three-voice examples. Studies harmonic dictation using vocabulary from MUSC 2101. Considers detection of pitch and rhythm performance errors. Prereq., MUSC 1131. Offered fall only. Prerequisites: Restricted to Music majors or graduate students only.

College of Music | Music | Theory and Composition

MUSC-2131 (1) Aural Skills Lab, Semester 4

Continuation of MUSC 2121. Studies sight singing of chromatic and atonal melodies. Includes dictation of one- through three-voice examples. Identifies sonorities studied in MUSC 2111. Considers detection of pitch and rhythm performance errors. Prereq., MUSC 2121. Restricted to College of Music majors only. Offered spring only. Prerequisites: Requires prerequisite course of MUSC 2121. Restricted to College of Music undergraduate students only.

College of Music | Music | Theory and Composition

PMUS-2184 (1) Voice Class.

Continuation of Pmus 1184, with more advanced repertoire and vocal techniques. May be repeated up to 6 total credit hours. Prereq., Pmus 1184. Restricted to Musc majors. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Voice

PMUS-2205 (1) Keyboard-Musicianship 4

Prerequisites: Restricted to College of Music undergraduate students only.

Continuation of MUSC 1111. Reviews secondary dominants, secondary leading-tone chords, and modulation. Covers dissonance and chromaticism, including modal mixture, seventh chords with added dissonance, Neapolitan sixth chord, and augmented sixth chords. Provides structural analysis of musical excerpts. Prereq., MUSC 1111. Offered fall only. Prerequisites: Restricted to Music majors or graduate students only.

College of Music | Music | Theory and Composition

MUSC-2111 (2) Semester 4 Theory

Continuation of MUSC 2101. Focuses on advanced chromaticism including modal mixture, altered dominants, voice leading, and chromatic harmony in larger contexts. Examines impressionism and jazz. Also involves composition projects. Prereq., MUSC 2101. Restricted to College of Music majors only. Offered spring only. Prerequisites: Requires prerequisite course of MUSC 2101. Restricted to College of Music undergraduate students only.

College of Music | Music | Theory and Composition

MUSC-2121 (1) Aural Skills Lab, Semester 3

Continuation of MUSC 1131. Studies sight singing of chromatic melodies in major and minor keys (in four clefs). Includes dictation of one- through three-voice examples. Studies harmonic dictation using vocabulary from MUSC 2101. Considers detection of pitch and rhythm performance errors. Prereq., MUSC 1131. Offered fall only. Prerequisites: Restricted to Music majors or graduate students only.

College of Music | Music | Theory and Composition

MUSC-2131 (1) Aural Skills Lab, Semester 4

Continuation of MUSC 2121. Studies sight singing of chromatic and atonal melodies. Includes dictation of one- through three-voice examples. Identifies sonorities studied in MUSC 2111. Considers detection of pitch and rhythm performance errors. Prereq., MUSC 2121. Restricted to College of Music majors only. Offered spring only. Prerequisites: Requires prerequisite course of MUSC 2121. Restricted to College of Music undergraduate students only.

College of Music | Music | Theory and Composition

MUSC-3051 (2) Beginning Composition

For noncomposition majors. Introduction to the craft of musical composition with analysis and writing in various styles. Restricted to College of Music majors only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Theory and Composition

MUSC-3061 (2) Jazz Improvisation I

Develops skills in jazz improvisation through practical application of chord/scale relationship, transcription, repertoire, and analysis. Open to all instruments. Offered fall only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Theory and Composition

MUSC-3071 (2) Jazz Improvisation II

Continues and expands upon the material presented in MUSC 3061. Reinforcement of ability to create an improvised melody in a range of harmonic contexts including blues, bebop, modal jazz, free jazz, and other styles. Prereq., MUSC 3061 or instructor consent. Restricted to College of Music majors only. Offered fall only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Theory and Composition

MUSC-3081 (3) Jazz Theory and Aural Foundations

Presents the grammar and syntax of jazz. Acquaints the student with the language of jazz improvisation and various jazz styles. The musician's most valuable tool---the ear---is developed through an in-depth analytical study of jazz masters through harmonic dictation/identification. Prereq., MUSC 2101. Restricted to College of Music majors only. Offered spring only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Theory and Composition

MUSC-4001 (2) New Musical Styles and Practices

Studies the style of Palestrina and his contemporaries through analysis, species counterpoint exercises, and composing in the style. Prereqs., MUSC 2111 and 2131. Restricted to College of Music majors only. Offered every other year. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Theory and Composition

MUSC-4011 (2) 16th Century Counterpoint

Studies the style of Palestrina and his contemporaries through analysis, species counterpoint exercises, and composing in the style. Prereqs., Musc 2111 and 2131. Restricted to College of Music majors only. Offered fall of even-numbered years. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Theory and Composition

MUSC-4021 (2) 18th Century Counterpoint

Provides a stylistic study of main contrapuntal genres of the period including invention, suite, and fugue. Provides a foundation in species counterpoint; stresses analysis and composing in the style. Prereqs., MUSC 2111 and 2131. Restricted to College of Music majors only. Offered spring of even-numbered years. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Theory and Composition

MUSC-4031 (2) Jazz Arranging 1

Study of notation, score layout, transpositions, basic harmonic and melodic analysis, basic chord voicings, and composition for a small and large jazz ensemble. Use of notation software such as Finale or Sibelius. Prereqs., MUSC 2111 and 2131. Recommended prereq., MUSC 3081. Offered fall of odd-numbered years. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Theory and Composition

MUSC-4041 (2) Orchestration

Studies advanced orchestration techniques through score analysis and student projects. Prereq., MUSC 2071 or instructor consent. Offered fall only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Theory and Composition

MUSC-4061 (2) Tonal Analysis

Surveys tonal analytical techniques and forms of tonal music, including binary forms, sonata forms, ternary forms, rondo (and others) through study of selected works from the 18th and 19th centuries. Prereqs., MUSC 2111 and 2131. Offered fall only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Theory and Composition

MUSC-4071 (2) Post-Tonal Theory and Analysis

Focus on theory and analysis of post-tonal literature pre-1945. Prereqs., MUSC 2111 and 2131. Offered every other fall. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Theory and Composition

MUSC-4081 (3) Introduction to Music Technology

Topics include basic synthesis, musical instrument digital interface (MIDI) sequencing, and music notation by computer. Offered fall and spring. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Theory and Composition

MUSC-4091 (2) Jazz Arranging 2

Continuation and expansion of studies in MUSC 4031. Survey and analysis of major composers and arrangers of the idiom. Course focuses on creating several arranging projects for a large jazz ensemble. Prereq., MUSC 4031. Recommended prereq., MUSC 3081. Restricted to College of Music majors only. Offered fall of even-numbered years. Prerequisites: Restricted to College of Music undergraduate students only.

PMUS-1184 (1) Voice Class

Involves basic vocal technique and easy solo repertoire taught through a group medium, for beginner and intermediate level students. May be repeated up to 6 total credit hours. Restricted to MUSC majors. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Voice

MUSC-1544 (1) Italian Diction

Designed for the understanding of lyric Italian diction, the international phonetic alphabet, and its application to classical singing. Required for freshmen BM voice majors. Offered fall only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Voice

MUSC-1554 (1) English Diction

Designed for the understanding of lyric English diction, the international phonetic alphabet, and its application to classical singing as well as various musical styles of English classical voice literature. Prereq., MUSC 1544. Restricted to College of Music majors only. Required for Freshmen BM voice majors. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Voice

PMUS-2184 (1) Voice Class.

Continuation of Pmus 1184, with more advanced repertoire and vocal techniques. May be repeated up to 6 total credit hours. Prereq., Pmus 1184. Restricted to Musc majors. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Voice

PMUS-3167 (3) Opera Theatre Stagecraft

Introduction to the processes, materials, and equipment used in theatrical production. Lecture and lab requirements. Lab experiences include introductory work in the opera scenery, property, costume, and electrical shops. Prerequisites: Restricted to Music majors or graduate students only.

College of Music | Music | Voice

MUSC-3444 (1) French Diction

Designed for the understanding of lyric French diction, the international phonetic alphabet, and its application to classical singing, as well as various musical styles of French classical vocal literature. Prereq., MUSC 1554. Recommended prereq., MUSC 3464. Required of Junior BM voice majors. Prerequisites: Restricted to Music majors or graduate students only.

College of Music | Music | Voice

MUSC-3464 (1) German Diction

Designed for the understanding of lyric German diction, the international phonetic alphabet, and its application to classical singing, as well as various musical styles of German classical vocal literature. Prereq., MUSC 1554. Restricted to College of Music majors only. Required of sophomore BM voice majors. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Voice

PMUS-4137 (1) Opera Theatre 1

Addresses issues related to young artist development. Areas of concentration include (but are not limited to) acting technique, resume preparation, audition technique, scene analysis, and role preparation. The acting technique is addressed in this course through textbook reading and exercise. May be repeated up to 12 total credit hours. Prerequisites: Restricted to Music majors or graduate students only.

College of Music | Music | Voice

PMUS-4147 (1) Opera Theatre 2

Continuation of PMUS 4137. Further scene analysis and movement exercises are addressed in this class. May be repeated up to 12 total credit hours. Prereq., PMUS 4137. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Voice

PMUS-4157 (1-3) Opera Practicum

Prerequisites: Restricted to Music majors or graduate students only.

College of Music | Music | Voice

PMUS-4167 (1-3) Opera Theatre Lab

Advanced work in the scenery, property, costume, and electrical shops in opera performance. Additional experiences may include positions with opera run crews, the box office, or other supporting areas. May be repeated up to 12 total credit hours. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Voice

PMUS-4497 (1-2) Vocal Repertoire Coaching

Group coaching class to prepare for voice recitals as well as to learn vocal repertoire including historical background, composers, styles, and poetic interpretation. May be repeated up to 12 credit hours. Prerequisites: Restricted to Music majors or graduate students only.

College of Music | Music | Voice

PMUS-5137 (2) Opera Theatre 1

Addresses issues related to young artist development at the graduate level. Areas of concentration will include (but are not limited to) acting technique for singers, resume preparation and scene and character analysis. Students will participate in acting and improvisation exercises. Substantial classical voice study is required and this course is recommended for voice majors only. May be repeated up to 12 total credit hours. Prerequisites: Restricted to Graduate Students only.

College of Music | Music | Voice

PMUS-5147 (2) Opera Theatre 2

Continuation of PMUS 5137. May be repeated up to 12 total credit hours. Prereq., PMUS 5137.

College of Music | Music | Voice

PMUS-5184 (1) Graduate Voice Class

Teaches solo and choral singing and vocal modeling. Designed for choral and music education graduate students. Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Music | Music | Voice

MUSC-5444 (2) Vocal Pedagogy

In depth study of the physiology, acoustics, and health aspects of the singing voice. Recommended for all graduate students in voice. Prerequisites: Restricted to Graduate Students only.

College of Music | Music | Voice

MUSC-5454 (2) Repertory for Young Voices

Survey of the solo repertoire for young voices, the physiological aspects of mutational voices, techniques of vocalizing young voices, and class voice procedure. Prerequisites: Restricted to Graduate Students only.

College of Music | Music | Voice

MUSC-5464 (2) French Song Literature

Provides an extensive analytical and historical discussion of French song literature styles, from the 12th century to the present.

College of Music | Music | Voice

MUSC-5484 (2) Graduate Seminar in Vocal Pedagogy

A thorough investigation of the challenges of studio voice pedagogy, including corrective techniques, psychological philosophies, and video analysis of student teaching. Examination and evaluation of comparative methodologies of vocal technique. Prereq., MUSC 5444 or instructor consent required.

College of Music | Music | Voice

PMUS-5497 (1-2) Vocal Repertoire Coaching

Group coaching class to prepare for voice recitals as well as to learn vocal repertoire including historical background, composers, styles, and poetic interpretation. Class may fulfill voice literature requirements when appropriate classes are not offered. Also available: weekly individual coaching to prepare for voice recitals and other projects. Diction, musical styles, and interpretation (music and text) are the main focus of this course. May be repeated up to 12 credit hours. for graduate voice students and collaborative pianists. Prerequisites: Restricted to Graduate Students only.

College of Music | Music | Voice

MUSC-5564 (2) German Song Literature

Provides an extensive analytical and historical discussion of German song literature styles, from the 18th century to the present.

Provides an overview of the recording process from the performer's perspective from soundcheck through final mastering. Uses recorded material from in-class sessions. Examines differing approaches to recording as well as current technologies. Prerequisites: Restricted to College of Music undergraduate students only.

[College of Music](#) | [Music](#) | [Theory and Composition](#)

MUEL-2091 (2) Intro to Audio Recording

Introduces and explores basic concepts in audio recording from microphones to digital audio workstations. Also focuses on development of critical listening skills. Restricted to non-College of Music majors only. Prerequisites: Restricted to non-College of Music majors only.

[College of Music](#) | [Elective Music](#)

MUSC-2091 (2) Recording Techniques

Provides hands-on training in various audio recording techniques, acoustics, and sound reinforcement, studio maintenance, and troubleshooting. Real-world experience is gained through individual recording projects and College of Music events. Prereq., MUSC 2081 or instructor consent. Restricted to College of Music majors only. Prerequisites: Restricted to College of Music undergraduate students only.

| | | |
|------------------|-------|------------------------|
| College of Music | Music | Theory and Composition |
|------------------|-------|------------------------|

MUSC-2101 (2) Semester 3 Theory

Continuation of MUSC 1111. Reviews secondary dominants, secondary leading-tone chords, and modulation. Covers dissonance and chromaticism, including modal mixture, seventh chords with added dissonance, Neapolitan sixth chord, and augmented sixth chords. Provides structural analysis of musical excerpts. Prereq., MUSC 1111. Offered fall only. Prerequisites: Restricted to Music majors or graduate students only.

| | | |
|------------------|-------|------------------------|
| College of Music | Music | Theory and Composition |
|------------------|-------|------------------------|

MUSC-2103 (3) Introduction to Music Education

Provides an overview of basic principles and practices of the music education profession. Explores public school music teaching through class discussions, directed observations, and a supervised field experience. Offered fall only. Prerequisites: Restricted to College of Music undergraduate students only.

| | | |
|------------------|-------|-----------------|
| College of Music | Music | Music Education |
|------------------|-------|-----------------|

PMUS-2105 (1) Keyboard-Musicianship 3

Continuation of PMUS 1205. May be repeated up to 12 total credit hours. Prereq., PMUS 1205 or instructor consent required. Prerequisites: Restricted to Music majors or graduate students only.

| | | |
|------------------|-------|-----------------------|
| College of Music | Music | Keyboard Musicianship |
|------------------|-------|-----------------------|

MUSC-2111 (2) Semester 4 Theory

Continuation of MUSC 2101. Focuses on advanced chromaticism including modal mixture, altered dominants, voice leading, and chromatic harmony in larger contexts. Examines impressionism and jazz. Also involves composition projects. Prereq., MUSC 2101. Restricted to College of Music majors only. Offered spring only. Prerequisites: Requires prerequisite course of MUSC 2101. Restricted to College of Music undergraduate students only.

| | | |
|------------------|-------|------------------------|
| College of Music | Music | Theory and Composition |
|------------------|-------|------------------------|

MUSC-2121 (1) Aural Skills Lab, Semester 3

Continuation of MUSC 1131. Studies sight singing of chromatic melodies in major and minor keys (in four clefs). Includes dictation of one- through three-voice examples. Studies harmonic dictation using vocabulary from MUSC 2101. Considers detection of pitch and rhythm performance errors. Prereq., MUSC 1131. Offered fall only. Prerequisites: Restricted to Music majors or graduate students only.

| | | |
|------------------|-------|------------------------|
| College of Music | Music | Theory and Composition |
|------------------|-------|------------------------|

MUSC-2131 (1) Aural Skills Lab, Semester 4

Continuation of MUSC 2121. Studies sight singing of chromatic and atonal melodies. Includes dictation of one- through three-voice examples. Identifies sonorities studied in MUSC 2111. Considers detection of pitch and rhythm performance errors. Prereq., MUSC 2121. Restricted to College of Music majors only. Offered spring only. Prerequisites: Requires prerequisite course of MUSC 2121. Restricted to College of Music undergraduate students only.

College of Music | Music | Theory and Composition

MUEL-2184 (1) Voice Class

Continuation of MUEL 1184, with more advanced repertoire and vocal techniques. May be repeated up to 6 total credit hours. Prereq., MUEL 1184. Restricted to non-College of Music majors only. Formerly EMUS 2184. Prerequisites: Restricted to non-College of Music majors only.

College of Music | Elective Music

PMUS-2184 (1) Voice Class.

Continuation of Pmus 1184, with more advanced repertoire and vocal techniques. May be repeated up to 6 total credit hours. Prereq., Pmus 1184. Restricted to Musc majors. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Voice

PMUS-2205 (1) Keyboard-Musicianship 4

Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Keyboard Musicianship

MUSC-2325 (2) Applied Harmony for the Keyboard

Provides an intensive study and application of the harmonic structure of music in a variety of keyboard skills: figured bass realization, chord progressions, harmonization, improvisation, transposition, on-sight harmonic analysis, and playing by ear. Prereqs., MUSC 1111, 1131, and 1325. Offered fall only. Prerequisites: Restricted to Music majors or graduate students only.

College of Music | Music | Keyboard

MUSC-2365 (2) Introduction to Accompanying

An overall study in the art of working with instrumentalists and singers including repertoire and orchestral reductions. Requires performance with a student instrumentalist or singer to be critiqued and coached by class and instructor. Prereq., piano major or instructor consent. Restricted to College of Music majors only. Offered spring only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Keyboard

MUSC-2366 (2) Guitar Accompanying

Survey of accompanying repertoire for guitar with solo instruments (flute, violin, voice, etc.), including introductory work in basso continuo, playing/improvising from chord charts, and arranging accompaniments from musical scores. Prereq., MUSC 1326. Restricted to College of Music majors only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Choral and Instrumental Music

MUSC-2608 (1) Alexander Technique

Investigates the discoveries and writings of F. M. Alexander regarding kinesthetic perception and coordination. Applies these contexts to specific musical activities. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Interdepartmental Courses

MUEL-2752 (3) Music in American Culture

Offers a stylistic and historical examination of trends that have influenced present-day music in the U.S. Formerly EMUS 2752. Approved for arts and sciences core curriculum: United States context. Prerequisites: Restricted to non-College of Music majors only.

College of Music | Elective Music

MUEL-2772 (3) World Musics

Highlights music outside Western art tradition, using current ethnomusicological materials. Spring semester focuses on musical cultures of the Americas, Africa, and Europe; fall semester focuses on musical cultures of Asia and Oceania. May be repeated up to 6 total credit hours. Formerly EMUS 2772. Approved for arts and sciences core curriculum: human diversity. Prerequisites: Restricted to non-College of Music majors only.

College of Music | Elective Music

MUSC-2772 (3) World Musics

Study of music outside western art tradition, using current ethnomusicological materials and methodologies. Spring semester focuses on musical cultures of Africa, the Americas, and Europe; fall semester focuses on musical cultures of Asia and Oceania. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Musicology

MUSC-2782 (3) World Musics Survey--Africa, Europe, and the Americas

Use current ethnomusicological materials and methods in the study of music outside the Western art tradition. Usually taught in the spring, MUSC 2782 focuses on music cultures of Africa, Europe, and the Americas. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Musicology

MUEL-2842 (3) American Musical Theatre

Provides an overview of the role of musical theatre in U.S. culture, emphasizing the 20th century Broadway musical. Restricted to non-College of Music majors only. Formerly EMUS 2842.
Prerequisites: Restricted to non-College of Music majors only.

College of Music | Elective Music

MUEL-2852 (3) Music of the Rock Era

Examines popular music, concentrating on the U.S. after 1950. Considers precursor styles (e.g., blues folk) and contributions to the new rock style; discusses the evolution of rock style from 1960 through the 1990s. Formerly EMUS 2852. Approved for the arts and sciences core curriculum: literature and the arts. Offered spring only. Prerequisites: Restricted to non-College of Music majors only.

College of Music | Elective Music

MUEL-2862 (3) American Film Musical, 1926-1954

Examines the development of filmed musicals from the beginning of sound movies through the Golden Age of Musicals. Emphasizes analysis and relationships of characters, songs, and incidental music. Restricted to non-College of Music majors only. Formerly EMUS 2862. Approved for arts and sciences core curriculum: literature and the arts. Prerequisites: Restricted to non-College of Music majors only.

College of Music | Elective Music

MUEL-2872 (3) Music in the Rock Era: Special Topics in Heavy Metal

Explores, discuss, debate and develop deeper understanding of Heavy Metal. Included are study of musical style characteristics and lyrical content, innovative performers, unifying elements of Heavy Metal culture and the diversity within it, and its role in the larger Rock and societal contexts. Issues of gender, religion, and sexuality in the Heavy Metal construct are also discussed. Restricted to non-College of Music majors only. Prerequisites: Restricted to non-College of Music majors only.

 [Music Entrepreneurship](#)

MUSC-2988 (1) Introduction to Music Research

Introduces music research and writing skills to provide tools necessary for successful composition of formal research papers. Applies interests and curricular goals to specific topics of student choice. May be repeated up to 12 total credit hours. Prerequisites: Restricted to College of Music undergraduate students only.

[College of Music](#) |
 [Music](#) |
 [Interdepartmental Courses](#)

MUSC-2997 (0) Sophomore Proficiency

To be completed by the second semester of the sophomore year. Restricted to College of Music majors only. Prerequisites: Restricted to College of Music undergraduate students only.

[College of Music](#) |
 [Music](#) |
 [Theses and Recitals](#)

MUSC-3013 (1) String Class

For music education majors with choral/general emphasis. Develops basic performance skills on two or more string instruments. Addresses teaching strategies and other specialized topics related to string instruction. Offered fall only. Prerequisites: Restricted to Music majors or graduate students only.

College of Music | Music | Music Education

MUSC-3023 (1) Woodwind Class

For music education majors with choral or choral/general emphasis. Develops basic performance skills on two or more woodwind instruments. Addresses teaching strategies and other specialized topics related to beginning and intermediate woodwind instruction. Restricted to College of Music majors only. Offered spring only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Music Education

MUSC-3033 (1) Brass Class

For music education majors with choral or choral/general emphasis. Develops basic performance skills on two or more brass instruments. Addresses teaching strategies and other specialized topics related to beginning and intermediate brass instruction. Restricted to College of Music majors only. Offered spring only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Music Education

MUEL-3051 (2) Basic Composition

Introduces the processes, materials, and forms of composition through the writing and performance of short musical works. Open to any student who already has rudimentary musical knowledge. Restricted to non-College of Music majors only. Formerly EMUS 3051. Prerequisites: Restricted to non-College of Music majors only.

College of Music | Elective Music

MUSC-3051 (2) Beginning Composition

For noncomposition majors. Introduction to the craft of musical composition with analysis and writing in various styles. Restricted to College of Music majors only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Theory and Composition

MUSC-3061 (2) Jazz Improvisation I

Develops skills in jazz improvisation through practical application of chord/scale relationship, transcription, repertoire, and analysis. Open to all instruments. Offered fall only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Theory and Composition

MUSC-3071 (2) Jazz Improvisation II

Continues and expands upon the material presented in MUSC 3061. Reinforcement of ability to create an improvised melody in a range of harmonic contexts including blues, bebop, modal jazz, free jazz, and other styles. Prereq., MUSC 3061 or instructor consent. Restricted to College of Music majors only. Offered fall only. Prerequisites: Restricted to College of Music undergraduate

students only.

College of Music | Music | Theory and Composition

MUSC-3081 (3) Jazz Theory and Aural Foundations

Presents the grammar and syntax of jazz. Acquaints the student with the language of jazz improvisation and various jazz styles. The musician's most valuable tool---the ear---is developed through an in-depth analytical study of jazz masters through harmonic dictation/identification. Prereq., MUSC 2101. Restricted to College of Music majors only. Offered spring only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Theory and Composition

MUSC-3133 (2) Teaching General Music I

Provides an overview of general music teaching with emphasis on developmentally appropriate strategies and materials. Required for all music education majors as partial fulfillment of course work leading to K-12 music licensure. Prereq., MUSC 2103. Restricted to College of Music majors only. Offered spring only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Music Education

MUSC-3153 (2) Teaching Woodwind Instruments

For music education majors with instrumental or instrumental/general emphasis. Develops basic performance skills on three or more woodwind instruments. Addresses teaching strategies and other specialized topics related to beginning and intermediate woodwind instruction. Restricted to College of Music majors only. Offered spring only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Music Education

MUSC-3163 (2) Teaching String Instruments

For music education majors with instrumental or instrumental/general emphasis. Develops basic performance skills on three or more string instruments. Addresses teaching strategies and other specialized topics related to beginning and intermediate string instruction. Offered fall only. Prerequisites: Restricted to Music majors or graduate students only.

College of Music | Music | Music Education

PMUS-3167 (3) Opera Theatre Stagecraft

Introduction to the processes, materials, and equipment used in theatrical production. Lecture and lab requirements. Lab experiences include introductory work in the opera scenery, property, costume, and electrical shops. Prerequisites: Restricted to Music majors or graduate students only.

College of Music | Music | Voice

MUSC-3176 (2) Conducting 1

Introduces conducting and rehearsal techniques. Coreq., performance participation in the appropriate ensemble (band, choir, or orchestra). Offered fall only. Prerequisites: Restricted to Music majors or graduate students only.

College of Music | Music | Choral and Instrumental Music

MUSC-3186 (2) Conducting II

Introduces conducting and rehearsal techniques. Coreq., performance participation in the appropriate ensemble (band, choir, or orchestra). Prereq., MUSC 3176. Restricted to College of Music majors only. Offered spring only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Choral and Instrumental Music

MUSC-3193 (2) Vocal Pedagogy and Literature for Young Voices

Provides an overview of vocal anatomy/function, care of the voice, vocal repertoire, teaching strategies, and other specialized topics related to singing instruction in both private studio and public school choral settings. Fall section for instrumentalists; spring section for vocalists. Prerequisites: Restricted to Music majors or graduate students only.

College of Music | Music | Music Education

EMUS-3217 (1) University Singers

Restricted to Juniors or Seniors only. Prerequisites: Restricted to students with 57-180 credits (Juniors or Seniors).

College of Music | Music Ensembles

MUSC-3223 (2) Teaching Brass Instruments

For music education majors with instrumental or instrumental/general emphasis. Develops basic performance skills on three or more brass instruments. Addresses teaching strategies and other specialized topics related to beginning and intermediate brass instruction. Restricted to College of Music majors only. Offered spring only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Music Education

EMUS-3227 (1) University Choir

Restricted to Juniors or Seniors only. Prerequisites: Restricted to students with 57-180 credits (Juniors or Seniors).

College of Music | Music Ensembles

EMUS-3237 (1) Women's Chorus

Restricted to Juniors or Seniors only. Prerequisites: Restricted to students with 57-180 credits (Juniors or Seniors).

College of Music | Music Ensembles

EMUS-3247 (1) Men's Chorus

Restricted to Juniors or Seniors only. Prerequisites: Restricted to students with 57-180 credits (Juniors or Seniors).

College of Music | Music Ensembles

MUSC-3253 (2) Jazz Techniques for the Music Educator

Prepares the music educator for successful experiences teaching jazz at the secondary level. Students gain insights into performance and rehearsal techniques for the instrumental jazz ensemble. Explores approaches for teaching jazz theory, improvisation, and selecting literature for young students. Own instrument required for certain classes. Recommended prereqs., MUSC 1111 and 2103. Restricted to College of Music majors only. Offered spring only.

College of Music | Music | Music Education

EMUS-3257 (1) Collegiate Chorale

Restricted to Juniors or Seniors only. Prerequisites: Restricted to students with 57-180 credits (Juniors or Seniors).

MUEL-3642 (3) History of Jazz

Studies the distinctly American art form of jazz music from its origins to the present, including the various traditions, practices, historical events, and people most important to its evolution. For nonmusic majors. Formerly EMUS 3642. Offered fall and spring. Prerequisites: Restricted to non-College of Music majors only.

College of Music | Elective Music

MUSC-3642 (3) History of Jazz

Studies the distinctly American art form of jazz music from its origins to the present, including the various traditions, practices, historical events and people most important to its evolution. Offered fall only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Musicology

MUEL-3772 (3) West African Music and Culture in Ghana

Provides hands-on and experiential enrichment for students to interact at several levels with a local community in Ghana. Classroom lectures will be combined with direct participation in drumming and dancing, field trips to participate in festivals and court ceremonies, field trips to kente weaving village, adinkra cloth making, wood carving villages, and museums. Prereq., MUSC 2782/MUEL 2772. Restricted to sophomore, non-College of Music majors only or instructor consent required. MUSC 3772 and MUEL 3772 are the same course.

College of Music | Elective Music

MUSC-3772 (3) West African Music and Culture in Ghana

Provides hands-on and experiential enrichment for students to interact at several levels with a local community in Ghana. Classroom lectures will be combined with direct participation in drumming and dancing, field trips to participate in festivals and court ceremonies, field trips to kente weaving village, adinkra cloth making, wood carving villages, and museums. Prereq., MUSC 2782/MUEL 2772. Restricted to sophomore, non-College of Music majors only or instructor consent required. MUSC 3772 and MUEL 3772 are the same course. Prerequisites: Restricted to sophomore non-College of Music majors only.

College of Music | Music | Musicology

MUSC-3802 (3) History of Music 1

Surveys Western art music with stylistic analysis of representative works from all major periods through the Baroque. See also MUSC 3812. Prereq., MUSC 2111. Prerequisites: Requires pre-requisite course of MUSC 2111. Restricted to Music majors or graduate students only.

College of Music | Music | Musicology

MUSC-3812 (3) History of Music 2

Surveys Western art music with stylistic analysis of representative works from all major periods after the Baroque. See also MUSC 3802. Prereq., MUSC 2111. Restricted to College of Music majors only. Prerequisites: Requires prerequisite course of MUSC 2111. Restricted to College of Music undergraduate students only.

College of Music | Music | Musicology

MUEL-3822 (3) Words and Music

Explores the interaction between words and music in song. Students will consider how such features as rhyme, rhythm, tone, and the connotations of particular words contribute to meaning in poetry; how rhythm, tempo, dynamics, mood, and instrumentation contribute to meaning in music; and how words and music coalesce in song to make a new meaning. Restricted to non-College of Music majors only. Formerly EMUS 3822. Approved for arts and sciences core curriculum: literature and the arts. Prerequisites: Restricted to non-College of Music majors only.

College of Music | Elective Music

MUEL-3832 (3) Music in Literature

Addresses literature that seeks either to explore the meaning of music or to make music out of words. Students will consider how musical concepts and techniques can be incorporated into poetry and prose, and will analyze the roles that writers have attributed to music in society, politics, and the life of the individual. Restricted to non-College of Music majors only. Formerly EMUS 3832. Approved for arts and sciences core curriculum: literature and the arts. Prerequisites: Restricted to non-College of Music majors only.

College of Music | Elective Music

MUEL-3872 (3) Music in the Rock Era: Special Topics in Heavy Metal

Explore, discuss, debate and develop deeper understanding of Heavy metal. Included are study of musical style characteristics and lyrical content, innovative performers, unifying elements of Heavy Metal culture and the diversity within it, and its role in the larger Rock and societal contexts. Issues of gender, religion, and sexuality in the Heavy Metal construct area also discussed.

College of Music | Elective Music

MUSC-3997 (1) Junior Recital

Prereq., MUSC 2997. Prerequisites: Restricted to Music majors or graduate students only.

College of Music | Music | Theses and Recitals

MUSC-4001 (2) New Musical Styles and Practices

Studies the style of Palestrina and his contemporaries through analysis, species counterpoint exercises, and composing in the style. Prereqs., MUSC 2111 and 2131. Restricted to College of Music majors only. Offered every other year. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Theory and Composition

MUSC-4011 (2) 16th Century Counterpoint

Studies the style of Palestrina and his contemporaries through analysis, species counterpoint exercises, and composing in the style. Prereqs., Musc 2111 and 2131. Restricted to College of Music majors only. Offered fall of even-numbered years. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Theory and Composition

MUEL-4012 (3-6) African Music

Studies the musics, dances, and cultures of various peoples of Africa. Includes African diaspora music and Afro-pop. Restricted to non-College of Music majors only. Formerly EMUS 4012. Prerequisites: Restricted to non-College of Music majors only.

College of Music | Elective Music

MUSC-4012 (3) African Music

Studies the musics, dances, and cultures of various peoples of Africa. Includes African diaspora music and Afro-pop. Offered fall only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Musicology

MUSC-4021 (2) 18th Century Counterpoint

Provides a stylistic study of main contrapuntal genres of the period including invention, suite, and fugue. Provides a foundation in species counterpoint; stresses analysis and composing in the style. Prereqs., MUSC 2111 and 2131. Restricted to College of Music majors only. Offered spring of even-numbered years. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Theory and Composition

MUSC-4031 (2) Jazz Arranging 1

Study of notation, score layout, transpositions, basic harmonic and melodic analysis, basic chord voicings, and composition for a small and large jazz ensemble. Use of notation software such as Finale or Sibelius. Prereqs., MUSC 2111 and 2131. Recommended prereq., MUSC 3081. Offered fall of odd-numbered years. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Theory and Composition

MUSC-4041 (2) Orchestration

Studies advanced orchestration techniques through score analysis and student projects. Prereq., MUSC 2071 or instructor consent. Offered fall only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Theory and Composition

MUSC-4061 (2) Tonal Analysis

Surveys tonal analytical techniques and forms of tonal music, including binary forms, sonata forms, ternary forms, rondo (and others) through study of selected works from the 18th and 19th centuries. Prereqs., MUSC 2111 and 2131. Offered fall only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Theory and Composition

MUSC-4071 (2) Post-Tonal Theory and Analysis

Focus on theory and analysis of post-tonal literature pre-1945. Prereqs., MUSC 2111 and 2131. Offered every other fall. Prerequisites: Restricted to College of Music undergraduate students only.

MUSC-4078 (1) Piano Technician for Pianists

Familiarizes pianists with the development of the modern grand piano, its construction, and the proper terminology of parts and specifications. Trains pianists in minor repairs and adjustments of the grand piano action, and in minor tuning tasks. Recommended restriction, piano majors. Restricted to College of Music majors only. Same as MUSC 5078. Prerequisites: Restricted to College of Music undergraduate students only.

[College of Music](#) [Music](#) [Interdepartmental Courses](#)

MUEL-4081 (3) Introducton to Music Technology

Surveys the various tools and techniques in the field of music technology. Topics include an introduction to basic synthesis, musical instrument digital interface (MIDI) sequencing, audio sequencing, digital signal processing, music notation, and a historical perspective on electronic music. For non-music majors only. Prerequisites: Restricted to non-College of Music majors only.

[College of Music](#) [Elective Music](#)

MUSC-4081 (3) Introduction to Music Technology

Topics include basic synthesis, musical instrument digital interface (MIDI) sequencing, and music notation by computer. Offered fall and spring. Prerequisites: Restricted to College of Music undergraduate students only.

[College of Music](#) [Music](#) [Theory and Composition](#)

MUSC-4091 (2) Jazz Arranging 2

Continuation and expansion of studies in MUSC 4031. Survey and analysis of major composers and arrangers of the idiom. Course focuses on creating several arranging projects for a large jazz ensemble. Prereq., MUSC 4031. Recommended prereq., MUSC 3081. Restricted to College of Music majors only. Offered fall of even-numbered years. Prerequisites: Restricted to College of

Music undergraduate students only.

College of Music Music Theory and Composition

MUSC-4101 (1-3) Theory and Aural Skills Review

Reviews tonal harmony, voice leading, and essential aural skills. Includes diatonic triads and seventh chords, modulation, chromaticism, and structural analysis of representative compositions. Prepares graduate students for more advanced work in music theory. Students may register for aural skills only (1 credit), theory only (2 credits), or both theory and aural skills (3 credits). May not be taken pass/fail. For graduate students only. Offered summer and fall. Prerequisites: Restricted to College of Music graduate students only.

College of Music Music Theory and Composition

MUSC-4103 (1) Introduction to Student Teaching

Represents the first half of the professional internship year. Familiarizes students with the schools and music programs in which they plan to student teach. Music placements may consist of elementary and high school, elementary and middle school, or middle school and high school. Prereqs., MUSC 4113, 4313, or 4443; and EDUC 3023. Prerequisites: Requires prerequisite courses of MUSC 4113, 4313, or 4443 and EDUC 3023 or 4023. Restricted to College of Music undergraduate students only.

College of Music Music Music Education

PMUS-4105 (1) Supervised Accompanying

Assigned projects, both vocal and instrumental, are coached by collaborative piano faculty and others. May involve recital, jury, or master class performances. Prereq., MUSC 1325 and MUSC 2365 or instructor consent. Prerequisites: Requires pre-requisite course of MUSC 1325 and MUSC 2365). Restricted to Music majors or graduate students only.

College of Music Music Keyboard Musicianship

MUSC-4106 (2) Guitar Literature

An analytical and historical survey of the repertory of the guitar and its antecedents from the renaissance to the present day. Restricted to College of Music majors only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music Music Choral and Instrumental Music

MUSC-4111 (2) Composing at the Computer

Discover strategies and techniques for generating and manipulating sound at the computer. Student projects will include compositions, soundscapes, ambient environments, and soundtracks for multimedia. Available to students without prior experience with computer music or composition. Prereq., MUSC 4081. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music Music Theory and Composition

MUSC-4112 (3) Ethnomusicology

Examines the definition, scope, and methods of ethnomusicology, the discipline that focuses on approaches to the study of music theory, history, and performance practices of world cultures. Prereq., MUSC 2772. Restricted to junior or senior College of Music majors only. Prerequisites: Requires pre-requisite class of MUSC 2772. Restricted to students with 57-180 credits (Junior or Senior) College of Music majors only.

College of Music | Music | Musicology

MUSC-4113 (3) Teaching General Music 2

Provides an in-depth examination of teaching and learning processes in the elementary general music classroom, based on the integration of child development and musical development theories with content and delivery skills appropriate for K-5 general music classrooms. Students implement and evaluate music instruction, design curricular projects, and build a repertoire of vocal, instrumental, and speech-based arrangements. Prereqs., MUSC 2103 and 3133. Restricted to College of Music majors only. Offered fall only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Music Education

MUEL-4121 (3) Topics in Music Technology

Exploration of issues, techniques and tools of music technology. Topics vary from term to term and may include: interactive system for performance, teaching, and learning; computer music instrument design; digital synthesis and signal processing; music in intermedia; sound design and analysis. Lectures and work sessions will support student projects. Prereqs., MUSC 4081 or MUEL 4081 or instructor consent required. For non-music majors only. Prerequisites: Restricted to non-College of Music majors only.

College of Music | Elective Music

MUSC-4121 (3) Topics in Music Technology

Exploration of issues, techniques, and tools of music technology. Topics vary from term to term and may include: interactive systems for performance; teaching and learning; computer music instrument design; digital synthesis and signal processing; music in intermedia; sound design and analysis. Lectures on work sessions will support student projects. May be repeated up to 9 total credit hours. Prereq., MUSC 4081. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Theory and Composition

MUSC-4133 (3) Student Teaching Practicum

Offers practice teaching under the guidance of a master music teacher. Secondary level. Prereq., MUSC 4103. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Music Education

PMUS-4137 (1) Opera Theatre 1

Addresses issues related to young artist development. Areas of concentration include (but are not limited to) acting technique, resume preparation, audition technique, scene analysis, and role preparation. The acting technique is addressed in this course through textbook reading and exercise. May be repeated up to 12 total credit hours. Prerequisites: Restricted to Music majors or graduate students only.

College of Music | Music | Voice

MUSC-4142 (3) American Indian Music

Examines Native North American musical cultures, with an emphasis on music as an integral part of religious expression and community life. Restricted to junior or senior College of Music majors only. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) College of Music majors only.

College of Music | Music | Musicology

MUSC-4143 (2) Developing Children's Choirs

Examines the musical skills, teaching techniques, and administrative procedures necessary for developing a children's choir. Prereq., MUSC 2103. Restricted to College of Music majors only. Same as MUSC 5143. Offered fall of even-numbered years. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Music Education

PMUS-4147 (1) Opera Theatre 2

Continuation of PMUS 4137. Further scene analysis and movement exercises are addressed in this class. May be repeated up to 12 total credit hours. Prereq., PMUS 4137. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Voice

MUSC-4152 (3) East Asian Music

Surveys the development of music in Japan, China and Korea through the in-depth study of particular styles of traditional music. The course emphasizes the study of music and culture, particularly music's relationship to religion, politics, language, literature, dance and theatre. Recommended prereq., MUSC 2772. Restricted to College of Music majors only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Musicology

MUSC-4153 (1) Percussion Class and Pedagogy

Required of all music education majors. Presents knowledge and skills necessary for music educators to teach young students, including a general understanding of the techniques used in playing and teaching percussion instruments in the school music program. Offered fall only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Music Education

PMUS-4157 (1-3) Opera Practicum

Prerequisites: Restricted to Music majors or graduate students only.

College of Music | Music | Voice

MUSC-4163 (2) Choral Literature for School Ensembles

Examination of literature, materials, and methods appropriate for teaching choral music in secondary schools. Prereq., MUSC 2103. Restricted to College of Music majors only. Offered fall of odd-numbered years. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Music Education

PMUS-4167 (1-3) Opera Theatre Lab

Advanced work in the scenery, property, costume, and electrical shops in opera performance. Additional experiences may include positions with opera run crews, the box office, or other supporting areas. May be repeated up to 12 total credit hours. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Voice

MUSC-4168 (3) World Music Theories

Examines music and social elements, rules, and concepts that musicians use to structure and synthesize musical sound, with emphasis on music practices and pedagogies from a variety of world traditions; observing shared principles and making cross-cultural comparisons and investigating a shared (not universal) discourse as well as resources for a new pedagogy that supports the substantive study of global musics. Recommended prereqs., MUSC 2772 or 2782 or 4112. Same as MUSC 5168. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) College of Music majors only.

College of Music | Music | Theory and Composition

MUSC-4191 (2) Advanced Recording

Study of advanced recording techniques and concepts beyond those covered in MUSC 2091 involving multiple microphones for ensemble concerts and recording sessions within and outside of the College of Music. Prereq., MUSC 2091. Restricted to College of Music majors only. Offered spring of even-numbered years. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Theory and Composition

MUSC-4193 (1) Student Teaching Seminar

Required for all music student teachers. Addresses topics of concern to beginning teachers including classroom management, interpersonal skills, legal issues, job search strategies, and teaching portfolio development. Prereq., MUSC 4103. Prerequisites: Restricted to College of Music undergraduate students only.

[College of Music](#) [Music](#) [Music Education](#)

MUSC-4203 (1) Music Methods Practicum

Taken concurrently with either MUSC 4113, 4313, or 4443. Provides students with opportunities to observe and practice the use of various teaching techniques and relate them to concepts presented in the methods course. Students consult with the instructor to determine appropriate placements in schools. Prereq., MUSC 2103. Coreq., MUSC 4113, 4313, or 4443. Restricted to College of Music majors only. Prerequisites: Restricted to College of Music undergraduate students only.

[College of Music](#) [Music](#) [Music Education](#)

MUSC-4255 (2) Service Playing Techniques

Study of church music for liturgical and non-liturgical denominations; includes hymn playing, anthem accompaniments, basics of conducting from the organ console and improvisation, and selection of organ music appropriate to the requirements of the church year and other special services. Same as MUSC 5255.

[College of Music](#) [Music](#) [Keyboard](#)

MUSC-4285 (3) Organ Survey

Survey of organ repertoire and the history of organ building from the sixteenth century to the present. See also MUSC 4295. Same as MUSC 5285.

College of Music | Music | Keyboard

MUSC-4288 (2-3) Macintosh-based Web Server Fundamentals for Musicians and Educators

Designed for music students. Teaches concepts and skills necessary to develop, host, and maintain Macintosh-based web servers and to create and serve multimedia files including video, MP3, MIDI, and PDF.

College of Music | Music | Interdepartmental Courses

MUSC-4295 (3) Organ Survey

Survey of organ repertoire and the history of organ building from the sixteenth century to the present. See also MUSC 4285. Same as MUSC 5295.

College of Music | Music | Keyboard

MUSC-4313 (3) Teaching Choral Music

Examines choral music curricula, instructional materials, and teaching techniques appropriate for secondary choral settings. Also addresses administrative strategies for choral music programs. Prereq., MUSC 2103. Restricted to College of Music majors only. Same as MUSC 5313. Offered spring only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Music Education

MUSC-4325 (2) Keyboard Literature 1

Surveys keyboard music from 1600 to 1830. Restricted to College of Music majors only. Offered fall semester of even-numbered years. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Keyboard

MUSC-4335 (2) Keyboard Literature 2

Surveys keyboard music from 1830 to the present. Restricted to College of Music majors only. Offered spring semester of even-numbered years. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Keyboard

TMUS-4403 (1-3) Special Studies

Offers advanced studies in specific areas or special projects in selected areas. For undergraduate majors only. See current online Schedule Planner for specific course number. May be repeated

for additional credit. Restricted to College of Music majors only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music Thesis Music

MUSC-4405 (2) Basso-Continuo Accompaniment

Studies the history, theory, and practice of Basso-continuo accompaniment. Provides practical instruction in realizing harmony from a given bass line (figured or unfigured), projecting affect, and creating dynamics at the harpsichord. Emphasizes individual cognition and creativity. Recommended prereqs., MUSC 2325 and PMUS 1586. Same as MUSC 5405. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music Music Keyboard

MUSC-4443 (3) Teaching Instrumental Music

Examines instrumental music curricula, instructional materials, and teaching techniques appropriate for rehearsal, class, and lesson settings. Also addresses administration strategies for instrumental music programs. Prereq., MUSC 2103. Restricted to College of Music majors only. Same as MUSC 5442. Offered spring only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music Music Music Education

TMUS-4493 (1-3) Special Studies

Offers advanced studies in specific areas or special projects in selected areas. For undergraduate majors only. See current online Schedule Planner for specific course number. Numbered TMUS 4403--4493. May be repeated for additional credit. Restricted to College of Music majors only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music Thesis Music

PMUS-4497 (1-2) Vocal Repertoire Coaching

Group coaching class to prepare for voice recitals as well as to learn vocal repertoire including historical background, composers, styles, and poetic interpretation. May be repeated up to 12 credit hours. Prerequisites: Restricted to Music majors or graduate students only.

College of Music Music Voice

PMUS-4517 (2) Orchestral Repertoire

Trains practice techniques for String Players to master orchestral excerpts needed for all orchestra and festival auditions. Through careful listening students learn to improve the four basic elements of orchestral excerpt preparation: Rhythm, Intonation, Tone Quality, Interpretation. Prerequisites: Restricted to Music majors or graduate students only.

College of Music Music Choral and Instrumental Music

MUSC-4583 (2) Inclusive Music Classroom

Surveys strategies necessary for teaching music to all students, including those with special needs. Offered fall of even-numbered years. Prereqs., MUSC 2103 and 3133. Recommended prereq., MUSC 4113. Restricted to College of Music majors only. Same as MUSC 5583. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Music Education

MUSC-4608 (1) Advanced Studies in the Alexander Technique

Continue of MUSC 2608 with greater concentration on utilizing Alexander principles in specialized activity. Prereq., MUSC 2608 or instructor consent. Prerequisites: Requires prerequisite course of MUSC 2608. Restricted to College of Music undergraduate students only.

College of Music | Music | Interdepartmental Courses

MUSC-4712 (3) Renaissance Music

Provides repertory and analysis of polyphonic music 1400-1600. Prereq., MUSC 3802. Restricted to College of Music majors only. Same as MUSC 5712. Prerequisites: Requires pre-requisite class of MUSC 3802. Restricted to College of Music undergraduate students only.

College of Music | Music | Musicology

MUSC-4752 (3) Women in Music

Examines the role of women as creators and performers of Western Music. Explores related issues in musicology, including canon formation, reception history, and feminist aesthetics. Restricted to junior or senior College of Music majors only. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) College of Music majors only.

College of Music | Music | Musicology

MUSC-4772 (3) History of Opera

Examines representative operas from the 17th century. Emphasizes historical and stylistic analysis and surveys related musicological literature. Prereq., MUSC 3812. Restricted to College of Music majors only. Same as MUSC 5772. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Musicology

MUSC-4802 (3) Studies in 20th Century Music

Offers intensified work in history of music in the 20th century. Topics vary from year to year. Prereq., MUSC 3812. Restricted to junior or senior College of Music majors only. Same as MUSC 5802. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) College of Music majors only.

College of Music | Music | Musicology

MUSC-4852 (3) 17th and Early 18th Century Music

Examines music and writings about music from the Baroque era. Emphasizes historical and stylistic analysis and current musicological literature. Prereq., MUSC 3812 or instructor consent.

Restricted to College of Music majors only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Musicology

MUSC-4872 (3) Late 18th and 19th Century Music

Examines music and writings about music during the Classic and Romantic eras of the Western tradition, 1750-1900. Emphasizes historical and stylistic analysis and current musicological research. Recommended prereq. or coreq., MUSC 3812. Restricted to College of Music majors only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Musicology

MUSC-4892 (3) Latin American Music

Explores music of cultures south of the United States, emphasizing the relationships of music and culture in folk, popular, and art styles. Same as MUSC 5892. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) College of Music majors only.

College of Music | Music | Musicology

MUSC-4908 (1-3) Internship in Music Business

Engage with music/music business organizations in the community (for profit or non-profit) to pursue specific tasks or projects relevant to the student's career goals. A minimum of 48 hours is required per semester for one credit. May be repeated up to 3 total credit hours. Recommended prereq., Masters standing. MUSC 4908 and 5908 are the same course. Prerequisites: Restricted to College of Music undergraduate students only.

MUSC-4958 (2) Community Performances

Designed for the aspiring professional performer. Through classroom theory and off-campus application, acquire skills in programming for and communicating with diverse audiences, marketing & PR, and new paradigms of concert presentation. Will result in an actual musical presentation in the community. Restricted to College of Music majors only. Prerequisites: Restricted to College of Music undergraduate students only.

[College of Music](#)
[Music](#)
[Music Entrepreneurship](#)

MUSC-4988 (3) The Entrepreneurial Artist

Learn the core principles of entrepreneurship, such as idea formation, venture models, opportunity assessment, market analysis, and strategies for launching a venture, and apply them to their own entrepreneurial ideas. Lectures, projects, entrepreneur interviews, and case studies will culminate in a feasibility study for an original entrepreneurial concept. Recommended prereq., MUSC 4918. Same as MUSC 5988.

[College of Music](#)
[Music](#)
[Music Entrepreneurship](#)

MUSC-4997 (1) Senior Recital

Prereq., MUSC 3997. Prerequisites: Requires pre-requisite class of MUSC 3997. Restricted to College of Music undergraduate students only.

College of Music | Music | Theses and Recitals

MUSC-5002 (3) Proseminar in Historical Musicology

Prepares students to pursue independent research in the history of music. Meeting as a seminar, the course focuses on the nature of evidence, methods and tools of research, and theoretical or historiographic issues. Prerequisites: Restricted to Graduate Students only.

College of Music | Music | Musicology

MUSC-5011 (2) 16th Century Counterpoint

Provides a stylistic study of main contrapuntal genres of the period including FREE, TWO- and THREE-part imitative counterpoint in the style of Palestrina. Provides a foundation in species counterpoint, working towards free counterpoint; stresses analysis and composing in 16th-century styles. Prerequisites: Restricted to College of Music graduate students only.

College of Music | Music | Theory and Composition

MUSC-5012 (3) West African Music and Dance

Studies musical and dance traditions and current practices. Prereq., MUSC 4012 or instructor consent. Same as DNCE 5054. Prerequisites: Restricted to Graduate Students only.

College of Music | Music | Musicology

MUSC-5021 (2) 18th Century Counterpoint

Provides a stylistic study of main contrapuntal genres of the period including INVENTION, SUITE, and FUGUE. Provides a foundation in species counterpoint; stresses analysis and composing in the styles. Prerequisites: Restricted to College of Music graduate students only.

College of Music | Music | Theory and Composition

MUSC-5026 (2) Percussion Literature

In-depth investigation of major original solo works for percussion, significant ensemble literature including chamber and large ensembles, and selected transcriptions. Prereqs., graduate standing in music and instructor consent.

College of Music | Music | Choral and Instrumental Music

MUSC-5036 (2) Brass Literature

Investigates major original solo works for trumpet, horn, trombone, euphonium, and tuba, and ensemble literature including chamber and large settings. Offered every other spring semester.

College of Music | Music | Choral and Instrumental Music

MUSC-5041 (2) Advanced Orchestration

Provides an advanced study of orchestration techniques through score analysis and student projects. Offered fall only.

College of Music | Music | Theory and Composition

MUSC-5061 (3) Advanced Tonal Analysis

Surveys tonal analytical techniques. Prereq., passed general written theory and aural skills prelim exam, or completed remediation. Offered fall only. Prerequisites: Restricted to Graduate Students only.

College of Music | Music | Theory and Composition

MUSC-5071 (3) Post-tonal Theory and Analysis I

Focuses on theory and analysis of post-tonal literature pre-1945. Prereq., passed general written theory and aural skills prelim exam, or completed remediation. Offered fall and every other spring. Prerequisites: Restricted to Graduate Students only.

College of Music | Music | Theory and Composition

MUSC-5078 (1) Piano Technician for Pianists

Same as MUSC 4078. Prerequisites: Restricted to Graduate Students only.

College of Music | Music | Interdepartmental Courses

MUSC-5081 (3) Applications in Music Technology

Presents advanced strategies for applying computer technology in several musical disciplines. Emphasizes the use of technology in composition, music theory, and music education. Offered fall only. Prerequisites: Restricted to Graduate Students only.

College of Music | Music | Theory and Composition

MUSC-5091 (3) Contemporary Jazz Theory

Studies contemporary approaches to jazz improvisation and composition. Analysis of innovative composition and improvisation and strategies for integration of the material into a personal vocabulary are explored. Prereq., MUSC 3081. Offered spring only.

College of Music | Music | Theory and Composition

MUSC-5103 (3) Teaching General Music

Provides an in-depth examination of teaching and learning processes in the elementary general music classroom, based on the integration of child development and musical development theories with content and delivery skills appropriate for K-5 general music classrooms. Students implement and evaluate music instruction, design curricular projects, and build a repertoire of vocal, instrumental, and speech-based arrangements. Restricted to graduate students in music education. Offered fall only. Prerequisites: Restricted to Music or Music Education graduate students only.

College of Music | Music | Music Education

MUSC-5106 (2) Guitar Literature

An analytical and historical survey of the repertory of the guitar and its antecedents from the renaissance to the present day. For graduate students. Same as MUSC 4106.

College of Music | Music | Choral and Instrumental Music

MUSC-5112 (3) Proseminar in Ethnomusicology

Examines the definition, scope, and methods of ethnomusicology, the discipline that focuses on approaches to the study of music theory, history, and performance practices of world cultures. Restricted to graduate students who have passed or remediated the World Music portion of their Musicology preliminary exams. Prerequisites: Restricted to College of Music graduate students only.

College of Music | Music | Musicology

MUSC-5121 (3) Advanced Topics in Music Technology

Conducts advanced research in techniques and tools of music technology. Topics vary from term to term and may include: user interfaces for computer music; advanced sound design; digital modeling of acoustic sounds; computer-aided analysis of sound; modeling music intelligence in real time. Lectures and work sessions will support student projects. May be repeated up to 9 total credit hours. Prereq., MUSC 5081 or instructor consent required.

College of Music | Music | Theory and Composition

MUSC-5136 (2) Advanced Conducting

Offers advanced work in conducting. May be repeated up to 12 total credit hours. Prerequisites: Restricted to Graduate Students only.

College of Music | Music | Choral and Instrumental Music

PMUS-5137 (2) Opera Theatre 1

Addresses issues related to young artist development at the graduate level. Areas of concentration will include (but are not limited to) acting technique for singers, resume preparation and scene and character analysis. Students will participate in acting and improvisation exercises. Substantial classical voice study is required and this course is recommended for voice majors only. May be repeated up to 12 total credit hours. Prerequisites: Restricted to Graduate Students only.

[College of Music](#) | [Music](#) | [Voice](#)

MUSC-5142 (3) American Indian Music

Examines Native North American musical cultures, emphasizing music as an integral part of religious expression and community life. Restricted to graduate music majors. Prerequisites: Restricted to Graduate Students only.

MUSC-7832 (3) Seminar in Musicology

Required of all musicology majors before completion of comprehensive examinations. A different research area is designated each semester. See also MUSC 7822. Offered spring only.

College of Music | Music | Musicology

TMUS-8019 (1) Precandidate for Doctor of Musical Arts

Prerequisites: Restricted to Graduate Students only.

College of Music | Thesis Music

TMUS-8029 (1) Candidate for Doctor of Musical Arts

Prerequisites: Restricted to Graduate Students only.

College of Music | Thesis Music

TMUS-8119 (1-4) Composition Project 1

Students compose works in a variety of genres, totaling at least 30 minutes of music. Students meet weekly with a composition teacher to discuss and develop their works. Restricted to DMA composition students. Prerequisites: Restricted to Graduate Students only.

College of Music | Thesis Music

TMUS-8129 (1-4) Composition Project 2

Students compose works in a variety of genres, totaling at least 30 minutes of music. Students meet weekly with a composition teacher to discuss and develop their works. Prereq., TMUS 8119. Restricted to DMA composition students. May be repeated up to 4 total credit hours. Prerequisites: Restricted to Graduate Students only.

College of Music | Thesis Music

TMUS-8219 (3) Dissertation Project 1 (Solo Recital, Choral Concert, Composition)

Prerequisites: Restricted to Graduate Students only.

College of Music | Thesis Music

TMUS-8229 (3) Dissertation Project 2 (Solo Recital, Choral Concert, Composition, Vocal Pedagogy)

Prerequisites: Restricted to Graduate Students only.

College of Music | Thesis Music

TMUS-8239 (3) Diss Proj 3 (Chamber Music Recital, Vocal Pedagogy Project, Choral Project, Composition Recital)

Prerequisites: Restricted to Graduate Students only.

College of Music | Thesis Music

TMUS-8249 (3) Diss Proj 4 (Chamber Music Recital, Choral Project, Composition Recital, Wind/Percussion Practicum).

Prerequisites: Restricted to Graduate Students only.

College of Music | Thesis Music

TMUS-8259 (3) Dissertation Project 5 (Research Lecture)

Prerequisites: Restricted to Graduate Students only.

College of Music | Thesis Music

TMUS-8269 (3) Dissertation Project 6 (Research Lecture)

Prerequisites: Restricted to Graduate Students only.

College of Music | Thesis Music

TMUS-8279 (1-3) Performance Research Document 1

Prerequisites: Restricted to Graduate Students only.

College of Music | Thesis Music

TMUS-8289 (1) Performance Research Document 2

Prerequisites: Restricted to Graduate Students only.

College of Music | Thesis Music

TMUS-8299 (1) Performance Research Document 3

Prerequisites: Restricted to Graduate Students only.

College of Music | Thesis Music

TMUS-8309 (1) Performance Research Document 4

Prerequisites: Restricted to Graduate Students only.

College of Music | Thesis Music

TMUS-8319 (3) Repertoire Project

Prerequisites: Restricted to Graduate Students only.

College of Music | Thesis Music

TMUS-8329 (2-6) Document/Pedagogy Project

Prerequisites: Restricted to Graduate Students only.

College of Music | Thesis Music

TMUS-8339 (3-6) Major Composition

Prerequisites: Restricted to Graduate Students only.

College of Music | Thesis Music

TMUS-8998 (1-10) PhD Thesis

Prerequisites: Restricted to Graduate Students only.

AIRR-1010 (1) Foundations of the United States Air Force 1

One 1-hour lecture and one 2-hour lab per week. Introduces students to the U.S. Air Force and the USAF officer profession. Uses instructor lectures, films and videos, and group activities to examine Air Force issues, officership qualities, and military customs and courtesies. Emphasizes the communication skills necessary for an Air Force officer.

[Cross College Programs](#)
[Reserve Office Training Corp](#)
[Air Force Aerospace Studies](#)

NAVR-1010 (2) Introduction to Naval Science

Introduces the structure, missions, and functions of the United States Navy and Marine Corps. Also covers military law, leadership, naval history, and concepts of sea power.

[Cross College Programs](#)
[Reserve Office Training Corp](#)
[Naval Science](#)

MILR-1011 (2) Adventures in Leadership 1

Introduces fundamentals of leadership and the United States Army. Examines its organization, customs, and history as well as its current relevance and purpose. Students also investigate basic leadership and management skills necessary to be successful in both military and civilian settings. Includes fundamentals of Army leadership doctrine, team-building concepts, time and stress management, an introduction to cartography and land navigation, marksmanship, briefing techniques, and some basic military tactics.

[Cross College Programs](#)
[Reserve Office Training Corp](#)
[Military Science \(U.S. Army\)](#)

AIRR-1020 (1) Foundations of the United States Air Force 2

A continuation of AIRR 1010-1. One 1-hour lecture and one 2-hour lab per week.

Cross College Programs Reserve Office Training Corp Air Force Aerospace Studies

MILR-1021 (2) Adventures in Leadership 2

Continues the investigation of leadership in small organizations. Covers selected topics such as basic troop leading procedures, military first aid and casualty evacuation concepts, creating ethical work climates, an introduction to Army organizations and installations, and a further examination of basic military tactics. Introduces students to effective military writing styles.

Cross College Programs Reserve Office Training Corp Military Science (U.S. Army)

AIRR-2010 (1) The Evolution of USAF Air and Space Power 1

One 1-hour lecture and one 2-hour lab per week. Studies air power from balloons and dirigibles through the jet age and historically reviews air power employment in military and nonmilitary operations in support of national objectives. Looks at the evolution of air power concepts and doctrine and introduces the development of communicative skills.

Cross College Programs Reserve Office Training Corp Air Force Aerospace Studies

AIRR-2020 (1) The Evolution of USAF Air and Space Power 2

a continuation of Airr 2010. One 1-hour lecture and one 2-hour lab per week.

Cross College Programs Reserve Office Training Corp Air Force Aerospace Studies

NAVR-2020 (3) Seapower and Maritime Affairs

Studies the importance of seapower in history including naval, maritime, and other commercial uses of the sea. Emphasizes significant milestones in the history of the U.S. Navy and Marine Corps and their role in the national strategies and policies of the United States.

Cross College Programs Reserve Office Training Corp Naval Science

MILR-2031 (3) Methods of Leadership and Management 1

Comprehensively reviews advanced leadership and management concepts including motivation, attitudes, communication skills, problem solving, human needs and behavior, and leadership self development. Students continue to refine effective written and oral communications skills and to explore topics such as the basic branches of the Army, and officer and NCO duties. Students conduct classroom and practical exercises in small unit light infantry tactics and are prepared to perform as midlevel leaders in the cadet organization.

Cross College Programs | Reserve Office Training Corp | Military Science (U.S. Army)

MILR-2041 (3) Methods of Leadership and Management 2

Focuses on leadership and management functions in military and corporate environments. Studies various components of Army leadership doctrine to include the four elements of leadership, leadership principles, risk management and planning theory, the be-know-do framework, and the Army leadership evaluation program. Continue to refine communication skills.

Cross College Programs | Reserve Office Training Corp | Military Science (U.S. Army)

AIRR-3010 (3) Air Force Leadership Studies I

Two 1 1/2-hour seminars plus one 2-hour lab per week. Provides an integrated management course emphasizing concepts and skills required by the successful manager and leader. Includes individual motivational and behavioral processes, leadership, communication, and group dynamics while providing foundation for the development of the junior officer's professional skills (officership). Emphasizes decision making and use of analytic aids in planning, organizing and controlling in a changing environment. Discusses organizational and personal values (ethics), management of change, organizational power, politics, managerial strategy, and tactics within the context of military organization. Uses actual Air Force case studies throughout the course to enhance the learning and communication process.

Cross College Programs | Reserve Office Training Corp | Air Force Aerospace Studies

AIRR-3020 (3) Air Force Leadership Studies II

Two 1 1/2-hour seminars and one 2-hour lab per week. Continuation of AIRR 3010. Emphasizes basic managerial processes while employing group discussions, case studies, and role playing as learning devices. Continues to emphasize the development of communicative skills.

Cross College Programs | Reserve Office Training Corp | Air Force Aerospace Studies

NAVR-3020 (3) Naval Operations and Seamanship

Examines the Inland and International Rules of the Nautical Road, including court interpretations, principles of relative motion and vector analysis with the maneuvering board, ship handling procedures, weather, communications, tactical operations, and maritime law.

Cross College Programs | Reserve Office Training Corp | Naval Science

NAVR-3030 (3) Naval Engineering Systems

Studies in detail ship propulsion and related auxiliary systems. Emphasizes fossil fuel and nuclear steam and gas turbine systems. Stresses design constraints imposed by unique marine environment.

Cross College Programs | Reserve Office Training Corp | Naval Science

NAVR-3040 (3) Weapons and Systems Analysis

Introduces theoretical concepts upon which modern naval weapons systems are designed and constructed. Specific areas of study include physics of underwater sound propagation, pulse radar theory, automatic tracking principles, and fundamentals of missile guidance.

Cross College Programs Reserve Office Training Corp Naval Science

MILR-3052 (3) Military Operations and Training 1

Further explores the theory of managing and leading small military units with an emphasis on practical applications at the squad and platoon levels. Students examine various leadership styles and techniques as they relate to advanced small unit tactics. Familiarizes students with a variety of topics such as cartography, land navigation, field craft, and weapons systems. Involves multiple, evaluated leadership opportunities in field settings and hands-on experience with actual military equipment. Students are given maximum leadership opportunities in weekly labs. Prereq., consent of the Professor of Military Science.

Cross College Programs Reserve Office Training Corp Military Science (U.S. Army)

MILR-3062 (3) Military Operations and Training 2

Studies theoretical and practical applications of small unit leadership principles. Focuses on managing personnel and resources, the military decision making process, the operations order, and oral communications. Exposes the student to tactical unit leadership in a variety of environments with a focus on preparation for the summer advance camp experience. Prereq., consent of the Professor of Military Science.

Cross College Programs Reserve Office Training Corp Military Science (U.S. Army)

NAVR-3101 (3) Evolution of Warfare

Traces the development of warfare, focusing on the impact of military theorists and technical developments. Assists students to acquire a sense of strategy, develop an understanding of military alternatives, and see the impact of historical precedent on military actions.

Cross College Programs Reserve Office Training Corp Naval Science

AIRR-4010 (3) National Security Affairs/Preparation for Active Duty

Two 1 1/2-hour seminars and one 2-hour lab per week. Studies U.S. national security policy which examines the formulation, organization, and implementation of national security policy; context of national security; evolution of strategy; management of conflict; and civil-military interaction. Also includes blocks of instruction on the military profession/officership, the military justice system, and communicative skills. Provides future Air Force officers with the background of U.S. national security policy so they can effectively function in today's Air Force.

Cross College Programs Reserve Office Training Corp Air Force Aerospace Studies

NAVR-4010 (3) Leadership and Management 1

Comprehensively studies organizational leadership. Emphasizes motivation, communication, empowerment, and needs of subordinates. Studies the role of professional and personal ethics in organizational leadership.

Cross College Programs Reserve Office Training Corp Naval Science

AIRR-4020 (3) National Security Forces in Contemporary American Society 2

Two 1 1/2-hour seminars and one 2-hour lab per week. a continuation of AIRR 4010. Includes defense strategy conflict management, formulation/implementation of U.S. defense policy, and organizational factors and case studies in policy making, military law, uniform code of military justice, and communication skills.

Cross College Programs Reserve Office Training Corp Air Force Aerospace Studies

NAVR-4020 (3) Leadership and Ethics

Studies the ethics and laws of armed conflict, analyzing the leadership responsibilities of officers in conflict. Studies the military justice system and Naval legal administrative procedures, comparing military law with civilian criminal and civil law. Defines the responsibilities of junior officers within the military justice system.

Cross College Programs Reserve Office Training Corp Naval Science

NAVR-4030 (3) Navigation

Offers theory and practical application in the art of navigation: charts, publications, piloting, dead reckoning, navigation aids and instruments, time, sextant use, electronic fixing, global positioning system, and voyage planning.

Cross College Programs Reserve Office Training Corp Naval Science

MILR-4072 (3) Officer Leadership and Development 1

Examines management and leadership concepts and techniques associated with planning and executing military training and operations at company and higher echelons. Includes analyses of professional ethics and values, effective training principles and procedures, subordinate counseling, and effective staff officer briefing techniques. Also investigates other subjects such as counter terrorism, modern peacekeeping missions, and the impact of the information revolution on the art of land warfare. Conducted both in and out of classroom setting and with multiple practical leadership opportunities to organize cadet training and activities. Prereq., consent of the Professor of Military Science.

Cross College Programs Reserve Office Training Corp Military Science (U.S. Army)

MILR-4082 (3) Officer Leadership and Development 2

Continues Milr 4072 study of management and leadership concepts and techniques, providing practical leadership experiences in the classroom and during multiple cadet-run activities. Also examines varied topics such as theory and practice of the military justice system, law of war, military-media relations, support mechanisms for soldiers and their families, operational security considerations, and historical case studies in military leadership in the context of 21st century land warfare. Prereq., consent of the Professor of Military Science.

ATLS-1220 (4) Virtual Worlds: An Introduction to Computer Science

Introduces the fundamental principles of computer science using an on-line virtual world called Second Life as the "Laboratory" for the course. Students will learn how to program by creating objects of interest in Second Life. In-class and in-world discussions and readings will introduce the student to important ideas and concepts that shape the field of computer science. Same as CSCI 1220.

[Cross College Programs](#) [Alliance for Technology, Learning, and Society \(ATLAS\)](#)

ATLS-1240 (3) The Computational World

Introduces and explores the "Computational style of thinking" and its influence in science, mathematics, engineering and the arts. The course does not focus on the nuts and bolts of any particular programming language, but rather on the way in which computing has affected human culture and thought in the past half century. Same as CSCI 1240.

[Cross College Programs](#) [Alliance for Technology, Learning, and Society \(ATLAS\)](#)

ATLS-1710 (3) Tools and Methods for Engineering Computing

Designed for students with little or no programming background. Students learn procedural and object-oriented programming through development of games, simulations, and animations using Flash/Actionscript, VB/Excel, Java, MATLAB, and real-world applications. Activities are oriented toward smaller projects that address topics in beginning science, engineering, and mathematics courses. Students gain practical, applicable skills. Same as APPM 1710.

[Cross College Programs](#) [Alliance for Technology, Learning, and Society \(ATLAS\)](#)

ATLS-2000 (3) The Meaning of Information Technology

Surveys the history of information technologies and modern techniques of information production, storage, transmission, and retrieval. Emphasizes understanding not only the technological transformations in interpersonal, organizational, and mass communication, but also the technological, social and political changes that underlie the movement toward a digital society. HUEN 2020 is restricted to ENGR majors only. ATLS 2000 is restricted to TAM students. ATLS 2000 and HUEN 2020 are the same course.

Cross College Programs | Alliance for Technology, Learning, and Society (ATLAS)

ATLS-2036 (3) Introduction to Media Studies

Serves as an introduction to media studies, including theories and methodologies for undertaking media scholarship within the humanities. Topics may include the history of the book, text messaging, blogging, and gaming, as well as digital fiction and poetry. Same as ENGL 2036.

Cross College Programs | Alliance for Technology, Learning, and Society (ATLAS)

ATLS-3010 (3) Digital Media 1

Introduces techniques, software, and related concepts of digital design and image making through individual and group projects. Emphasizes digital animation, digital audio, digital video and website design and development as a means to formal and expressive ends. Introduces students to critical readings and theories related to digital media practice. May be repeated up to 6 total credit hours. Prereq., ATLS 2000. Restricted to TAM students.

Cross College Programs | Alliance for Technology, Learning, and Society (ATLAS)

ATLS-3020 (3) Digital Media 2

A continuation of Digital Media 1 (ATLS 3010), this course introduces students to advanced digital media development including interactive programming, scripting, and database functionality. Emphasizes a historical and conceptual understanding of programming and computational theories. May be repeated for a total of 6 credit hours. Prereq., ATLS 2000 and ATLS 3010. Restricted to students with minor in Technology, Arts & Media (MTAM). Prerequisites: Restricted to students with minor in Technology, Arts, and Media (MTAM).

Cross College Programs | Alliance for Technology, Learning, and Society (ATLAS)

ATLS-3030 (3) Fundamentals of Digital Design

The fundamental goal of this course is to teach students how to use digital design tools effectively and compellingly. Through lectures, class discussions, projects and critiques, this course will cover the critical, theoretical, and technical skill sets necessary to become a more engaging, thoughtful, and articulate designer. Prereqs., ATLS 2000 and 3010. Restricted to students with minor in Technology, Arts & Media (MTAM). Prerequisites: Restricted to students with minor in Technology, Arts, and Media (MTAM).

Cross College Programs | Alliance for Technology, Learning, and Society (ATLAS)

ATLS-3110 (3) Motion Design

An animation-based projects course that advances student understanding of motion design in today's culture. Through active production and critical analysis, students will create new media

projects and critically examine the history, social implications, and impacts of these forms of mass media. Prereq., ATLS 2000. Recommended prereq., ATLS 3010.

Cross College Programs | Alliance for Technology, Learning, and Society (ATLAS)

ATLS-3112 (1-3) Digital and Social Systems Professional Development

Supports students in developing professional skills and practices in human computer interaction, design of interactive systems, computer supported cooperative work, computer supported collaborative learning, educational technology, tools that support creativity, user-developed knowledge collections, and gaming. May be repeated up to 10 total credit hours. Same as CSCI 3112.

Cross College Programs | Alliance for Technology, Learning, and Society (ATLAS)

ATLS-3120 (3) Net Presence

An Internet-based projects course that advances student understanding of Internet culture. Through active production and critical analysis, students will explore their individual roles in the digital landscape and critically examine the social implications and impacts of digital communities. Prereqs., ATLS 2000 and 3010. Recommended prereq., ATLS 3020.

Cross College Programs | Alliance for Technology, Learning, and Society (ATLAS)

ATLS-3500 (1-3) Client Projects in Technology, Arts and Media

Allows undergraduate students to work on collaborative projects with faculty and with external organizations under faculty supervision. The course will focus on teamwork, conceptual planning, technical design and development, and working within real-world client environments. Critical skills include project research, planning, design, development, trouble-shooting, and presentation. Prereqs., ATLS 2000, 3010, or instructor consent. Recommended prereq., ATLS 3020. May be repeated up to 6 total credit hours.

Cross College Programs | Alliance for Technology, Learning, and Society (ATLAS)

ATLS-3519 (1-3) Special Topics in Technology, Arts, and Media

Analyzes special interest areas of multidisciplinary technology, arts and media research and practice. May be repeated up to 12 total credit hours for different topics. Prereq., ATLS 2000. Recommended prereq., ATLS 3010. Same as ATLS 3519, 5519 and 6519.

Cross College Programs | Alliance for Technology, Learning, and Society (ATLAS)

ATLS-4010 (3) Capstone Projects

The focus of this advanced practicum course is the development of an individual thesis project. Specific class sessions will feature a combination of lectures, demonstrations, guest speakers, lab sessions, and critiques. This course also entails group work, portfolio development, critical theoretical readings, and a significant written component. May be repeated up to 6 total credit hours. Prereqs., ATLS 2000, 3010, and 3020. Restricted to students with minor in Technology, Arts & Media (MTAM). Prerequisites: Restricted to students with minor in Technology, Arts, and Media (MTAM).

Cross College Programs | Alliance for Technology, Learning, and Society (ATLAS)

ATLS-4519 (1-3) Advanced Special Topics in Technology, Arts, and Media

Analyzes special interest areas of multidisciplinary technology, arts and media research and practice. May be repeated up to 9 total credit hours. Prereq., instructor consent. Recommended prereqs., ATLS 2000, ATLS 3010, and ATLS 3020. Same as ATLS 3519, 5519 and 6519.

Cross College Programs | Alliance for Technology, Learning, and Society (ATLAS)

ATLS-4809 (3) Computer Animation

Develops a firm understanding of the general principles of computer animation. Lectures cover the creation of models, materials, textures, surfaces, and lighting. Path and key frame animation, particle dynamics, and rendering are introduced. Students are assigned a number of animation tutorials to carry out. CSCI 4809/5809 and ATLS 4809/5809 are all the same course.

Cross College Programs | Alliance for Technology, Learning, and Society (ATLAS)

ATLS-4900 (1-6) Undergraduate Independent Study

Provides opportunities for independent study at the upper-division undergraduate level. Students work on research or a creative project guided by faculty. May be repeated up to 9 total credit hours. Prereqs., ATLS 3010, 3020, and consent of instructor.

Cross College Programs | Alliance for Technology, Learning, and Society (ATLAS)

ATLS-5150 (1) Managing Effectively in a Changing Telecommunications Environment

Provides students with an opportunity to join international managers and policy makers from around the world in an intensive seminar focused on the challenges of managing in a telecommunications environment in an era of technological change. Guest lecturers provide an effective overview of the cutting-edge issues managers face in telecom and technology companies around the world. TLEN 5150 and ATLS 5150 are the same course.

Cross College Programs | Alliance for Technology, Learning, and Society (ATLAS)

ATLS-5210 (3) Global Development I

Introduces students to the theories and policy of international development. The course will examine the role of multilateral agencies, foundations, aid organizations, corporate entities and academia in development as both an industry and a research field. The course will focus on development movements and their outcomes, the inter-related nature of development and its effect on policies and programs, and critiques. Prerequisites: Restricted to Graduate Students only.

Cross College Programs | Alliance for Technology, Learning, and Society (ATLAS)

ATLS-5220 (3) Global Development II

Explores the impact of economic, geographical and social/cultural conditions on development outcomes through standalone course components taught by subject matter experts in region and in residency at ATLAS. Components may include, but are not limited to, development economics, environmental sustainability, public health, climate change, globalization and migration, religion, and gender as these broad themes relate to development. Prereq., ATLS 5210. Prerequisites: Restricted to Graduate Students only.

Cross College Programs | Alliance for Technology, Learning, and Society (ATLAS)

ATLS-5230 (3) Case Studies in Information and Communication Technology for Development

Serves as foundation course for MS-ICTD program. Students will evaluate case studies across a range of technologies and applications. Students will learn how to match available technologies to human and environmental needs and resources, be introduced to the seminal work and leaders in the field, and discuss the future of ICTD as an emerging area of academic focus. Prerequisites: Restricted to Graduate Students only.

Cross College Programs | Alliance for Technology, Learning, and Society (ATLAS)

ATLS-5240 (3) Information and Communication Technology for Development Laboratory

Prepares students for the semester-long practicum. Students work in teams to design ICTD interventions that address unique socio-economic and environmental development issues. Teams will design a variety of ICTD interventions, including telehealth and distance education programs, communication networks, and pro-development ICTD policies. Topics will be chosen by teams and guided by program faculty and external domain experts. Prereq., ATLS 5230. Prerequisites: Restricted to Graduate Students only.

Cross College Programs | Alliance for Technology, Learning, and Society (ATLAS)

ATLS-5250 (3) Fieldwork Methods for ICTD Practitioners

Introduces methods and models that can be employed in ICTD program development and deployment. Examines the applications of participatory research, value-centric design, program scale, cross-disciplinary work, and appropriate monitoring and evaluation. The goal of this course is to build student confidence around existing evaluation toolkits and methods, while advancing multi-method approaches to designing and analyzing ICTD initiatives. Prerequisites: Restricted to Graduate Students only.

Cross College Programs | Alliance for Technology, Learning, and Society (ATLAS)

ATLS-5519 (1-3) Advanced Special Topics in Technology, Arts, and Media

Same as ATLS 3519, 4519. Prerequisites: Restricted to Graduate Students only.

Cross College Programs | Alliance for Technology, Learning, and Society (ATLAS)

ATLS-5610 (6) Startup Practicum

Presumes that entrepreneurship can be learned through the conception, build, and launch of an original product or service by student teams within a single semester. Immerses students in the daily leadership and innovation challenges of the startup environment and serves as a clinic in thinking, decision making and mental agility that will benefit any area of business--not just startups. Prerequisites: Restricted to Graduate Students only.

PRLC-1810 (3) Ethical Leadership

Introduces fundamental principles of leadership and ethics. Emphasizes application of the principles for self-development and organizational effectiveness. Approved for arts and sciences core curriculum: ideals and values.

[Cross College Programs](#)
[Leadership Residential Academic Program](#)

PRLC-1820 (3) Community Issues in Leadership

Explores challenges to leadership at the community level such as drug abuse, poverty, decline of infrastructure, care of the aged, etc. Gives particular attention to the development of effective leadership responses to community difficulties at university, city, state, and national levels. Approved for GT-SS3. Approved for arts and sciences core curriculum: contemporary societies.

[Cross College Programs](#)
[Leadership Residential Academic Program](#)

PRLC-2810 (3) Global Issues in Leadership

Examines the challenges of leadership posed by change and major global issues affecting everyone. Explores issues such as human rights, hunger, disease, large-scale collective violence, and environmental deterioration with a special emphasis on effective, long-term leadership strategies.

[Cross College Programs](#)
[Leadership Residential Academic Program](#)

PRLC-2820 (3) Multilevel Issues in Leadership

Studies multilevel issues that originate in organizational settings but carry community and global implications. Encourages students to fully explore the complexity and interrelatedness of issues with a special emphasis on leadership and ethical implications. Same as LDSP 2820.

Cross College Programs | Leadership Residential Academic Program

PRLC-2930 (3) Leadership Internship

Students analyze the leadership styles within a host organization, examine how successfully an organization fulfills its mission, and further refine their own theories of what constitutes effective leadership. Students also complete a meaningful project over the course of the internship. Prereqs., PRLC 1810, PRLC 1820, and PRLC 2820.

Cross College Programs | Leadership Residential Academic Program

PRLC-3810 (3) Global Issues in Leadership

Examines the challenges to leadership posed by major global issues. Problems in the areas of human rights, hunger, disease, large-scale collective violence, and environmental deterioration are explored with a special emphasis on the development of effective, long-term leadership strategies. Prereqs., PRLC 1810, PRLC 1820, and PRLC 2820.

Cross College Programs | Leadership Residential Academic Program

PRLC-4010 (4) 21st Century Leadership

An advanced course that focuses on critical analysis of leadership principles and techniques. Designed to provide theoretical and hands-on experience for individuals who wish to function in leadership roles at high levels of competence in the workplace and in the civic arena.

Cross College Programs | Leadership Residential Academic Program

PRLC-4081 (3) Icons of the American Republic

Examines the founding period of the United States through the events, political concepts and individuals depicted in the art exhibited in the U.S. Capitol Building in Washington, D.C. The course includes a visit to the U.S. Capitol Building, the floor of the U.S. House of Representatives, the floor of the U.S. Senate, and an exploration of the legislative process. Prereq., PSCI 1101 or 2012 or 2223 or 2004. Restricted to students with a minimum 3.4 GPA and 60 credit hours completed. PSCI 4081 and PRLC 4081 are the same course.

Cross College Programs | Leadership Residential Academic Program

MILR-1021 (2) Adventures in Leadership 2

Continues the investigation of leadership in small organizations. Covers selected topics such as basic troop leading procedures, military first aid and casualty evacuation concepts, creating ethical work climates, an introduction to Army organizations and installations, and a further examination of basic military tactics. Introduces students to effective military writing styles.

ATLS-1220 (4) Virtual Worlds: An Introduction to Computer Science

Introduces the fundamental principles of computer science using an on-line virtual world called Second Life as the "Laboratory" for the course. Students will learn how to program by creating objects of interest in Second Life. In-class and in-world discussions and readings will introduce the student to important ideas and concepts that shape the field of computer science. Same as CSCI 1220.

ATLS-1240 (3) The Computational World

Introduces and explores the "Computational style of thinking" and its influence in science, mathematics, engineering and the arts. The course does not focus on the nuts and bolts of any particular programming language, but rather on the way in which computing has affected human culture and thought in the past half century. Same as CSCI 1240.

ATLS-1710 (3) Tools and Methods for Engineering Computing

Designed for students with little or no programming background. Students learn procedural and object-oriented programming through development of games, simulations, and animations using Flash/Actionscript, VB/Excel, Java, MATLAB, and real-world applications. Activities are oriented toward smaller projects that address topics in beginning science, engineering, and mathematics courses. Students gain practical, applicable skills. Same as APPM 1710.

ATLS-2000 (3) The Meaning of Information Technology

Surveys the history of information technologies and modern techniques of information production, storage, transmission, and retrieval. Emphasizes understanding not only the technological transformations in interpersonal, organizational, and mass communication, but also the technological, social and political changes that underlie the movement toward a digital society. HUEN 2020 is restricted to ENGR majors only. ATLS 2000 is restricted to TAM students. ATLS 2000 and HUEN 2020 are the same course.

AIRR-2010 (1) The Evolution of USAF Air and Space Power 1

One 1-hour lecture and one 2-hour lab per week. Studies air power from balloons and dirigibles through the jet age and historically reviews air power employment in military and nonmilitary operations in support of national objectives. Looks at the evolution of air power concepts and doctrine and introduces the development of communicative skills.

[Cross College Programs](#) [Reserve Office Training Corp](#) [Air Force Aerospace Studies](#)

MILR-2031 (3) Methods of Leadership and Management 1

Comprehensively reviews advanced leadership and management concepts including motivation, attitudes, communication skills, problem solving, human needs and behavior, and leadership self development. Students continue to refine effective written and oral communications skills and to explore topics such as the basic branches of the Army, and officer and NCO duties. Students conduct classroom and practical exercises in small unit light infantry tactics and are prepared to perform as midlevel leaders in the cadet organization.

ATLS-2036 (3) Introduction to Media Studies

Serves as an introduction to media studies, including theories and methodologies for undertaking media scholarship within the humanities. Topics may include the history of the book, text messaging, blogging, and gaming, as well as digital fiction and poetry. Same as ENGL 2036.

[Cross College Programs](#) | [Alliance for Technology, Learning, and Society \(ATLAS\)](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

MILR-2041 (3) Methods of Leadership and Management 2

Focuses on leadership and management functions in military and corporate environments. Studies various components of Army leadership doctrine to include the four elements of leadership, leadership principles, risk management and planning theory, the be-know-do framework, and the Army leadership evaluation program. Continue to refine communication skills.

AIRR-3010 (3) Air Force Leadership Studies I

Two 1 1/2-hour seminars plus one 2-hour lab per week. Provides an integrated management course emphasizing concepts and skills required by the successful manager and leader. Includes individual motivational and behavioral processes, leadership, communication, and group dynamics while providing foundation for the development of the junior officer's professional skills (officership). Emphasizes decision making and use of analytic aids in planning, organizing and controlling in a changing environment. Discusses organizational and personal values (ethics), management of change, organizational power, politics, managerial strategy, and tactics within the context of military organization. Uses actual Air Force case studies throughout the course to enhance the learning and communication process.

Subject

Number

ATLS-3030 (3) Fundamentals of Digital Design

The fundamental goal of this course is to teach students how to use digital design tools effectively and compellingly. Through lectures, class discussions, projects and critiques, this course will cover the critical, theoretical, and technical skill sets necessary to become a more engaging, thoughtful, and articulate designer. Prereqs., ATLS 2000 and 3010. Restricted to students with minor in Technology, Arts & Media (MTAM). Prerequisites: Restricted to students with minor in Technology, Arts, and Media (MTAM).

[Cross College Programs](#) | [Alliance for Technology, Learning, and Society \(ATLAS\)](#)

NAVR-3030 (3) Naval Engineering Systems

Studies in detail ship propulsion and related auxiliary systems. Emphasizes fossil fuel and nuclear steam and gas turbine systems. Stresses design constraints imposed by unique marine environment.

[Cross College Programs](#) | [Reserve Office Training Corp](#) | [Naval Science](#)

NAVR-3040 (3) Weapons and Systems Analysis

Introduces theoretical concepts upon which modern naval weapons systems are designed and constructed. Specific areas of study include physics of underwater sound propagation, pulse radar theory, automatic tracking principles, and fundamentals of missile guidance.

[Cross College Programs](#) | [Reserve Office Training Corp](#) | [Naval Science](#)

MILR-3052 (3) Military Operations and Training 1

Further explores the theory of managing and leading small military units with an emphasis on practical applications at the squad and platoon levels. Students examine various leadership styles and techniques as they relate to advanced small unit tactics. Familiarizes students with a variety of topics such as cartography, land navigation, field craft, and weapons systems. Involves multiple, evaluated leadership opportunities in field settings and hands-on experience with actual military equipment. Students are given maximum leadership opportunities in weekly labs. Prereq., consent of the Professor of Military Science.

Cross College Programs | Reserve Office Training Corp | Military Science (U.S. Army)

MILR-3062 (3) Military Operations and Training 2

Studies theoretical and practical applications of small unit leadership principles. Focuses on managing personnel and resources, the military decision making process, the operations order, and oral communications. Exposes the student to tactical unit leadership in a variety of environments with a focus on preparation for the summer advance camp experience. Prereq., consent of the Professor of Military Science.

Cross College Programs | Reserve Office Training Corp | Military Science (U.S. Army)

NAVR-3101 (3) Evolution of Warfare

Traces the development of warfare, focusing on the impact of military theorists and technical developments. Assists students to acquire a sense of strategy, develop an understanding of military alternatives, and see the impact of historical precedent on military actions.

Cross College Programs | Reserve Office Training Corp | Naval Science

ATLS-3110 (3) Motion Design

An animation-based projects course that advances student understanding of motion design in today's culture. Through active production and critical analysis, students will create new media projects and critically examine the history, social implications, and impacts of these forms of mass media. Prereq., ATLS 2000. Recommended prereq., ATLS 3010.

Cross College Programs | Alliance for Technology, Learning, and Society (ATLAS)

ATLS-3112 (1-3) Digital and Social Systems Professional Development

Supports students in developing professional skills and practices in human computer interaction, design of interactive systems, computer supported cooperative work, computer supported collaborative learning, educational technology, tools that support creativity, user-developed knowledge collections, and gaming. May be repeated up to 10 total credit hours. Same as CSCI 3112.

Cross College Programs | Alliance for Technology, Learning, and Society (ATLAS)

ATLS-3120 (3) Net Presence

An Internet-based projects course that advances student understanding of Internet culture. Through active production and critical analysis, students will explore their individual roles in the digital

landscape and critically examine the social implications and impacts of digital communities. Prereqs., ATLS 2000 and 3010. Recommended prereq., ATLS 3020.

Cross College Programs | Alliance for Technology, Learning, and Society (ATLAS)

ATLS-3500 (1-3) Client Projects in Technology, Arts and Media

Allows undergraduate students to work on collaborative projects with faculty and with external organizations under faculty supervision. The course will focus on teamwork, conceptual planning, technical design and development, and working within real-world client environments. Critical skills include project research, planning, design, development, trouble-shooting, and presentation. Prereqs., ATLS 2000, 3010, or instructor consent. Recommended prereq., ATLS 3020. May be repeated up to 6 total credit hours.

Cross College Programs | Alliance for Technology, Learning, and Society (ATLAS)

ATLS-3519 (1-3) Special Topics in Technology, Arts, and Media

Analyzes special interest areas of multidisciplinary technology, arts and media research and practice. May be repeated up to 12 total credit hours for different topics. Prereq., ATLS 2000. Recommended prereq., ATLS 3010. Same as ATLS 3519, 5519 and 6519.

Cross College Programs | Alliance for Technology, Learning, and Society (ATLAS)

PRLC-3810 (3) Global Issues in Leadership

Examines the challenges to leadership posed by major global issues. Problems in the areas of human rights, hunger, disease, large-scale collective violence, and environmental deterioration are explored with a special emphasis on the development of effective, long-term leadership strategies. Prereqs., PRLC 1810, PRLC 1820, and PRLC 2820.

Cross College Programs | Leadership Residential Academic Program

AIRR-4010 (3) National Security Affairs/Preparation for Active Duty

Two 1 1/2-hour seminars and one 2-hour lab per week. Studies U.S. national security policy which examines the formulation, organization, and implementation of national security policy; context of national security; evolution of strategy; management of conflict; and civil-military interaction. Also includes blocks of instruction on the military profession/officership, the military justice system, and communicative skills. Provides future Air Force officers with the background of U.S. national security policy so they can effectively function in today's Air Force.

Cross College Programs | Reserve Office Training Corp | Air Force Aerospace Studies

ATLS-4010 (3) Capstone Projects

The focus of this advanced practicum course is the development of an individual thesis project. Specific class sessions will feature a combination of lectures, demonstrations, guest speakers, lab sessions, and critiques. This course also entails group work, portfolio development, critical theoretical readings, and a significant written component. May be repeated up to 6 total credit hours. Prereqs., ATLS 2000, 3010, and 3020. Restricted to students with minor in Technology, Arts & Media (MTAM). Prerequisites: Restricted to students with minor in Technology, Arts, and Media (MTAM).

Cross College Programs Alliance for Technology, Learning, and Society (ATLAS)

NAVR-4010 (3) Leadership and Management 1

Comprehensively studies organizational leadership. Emphasizes motivation, communication, empowerment, and needs of subordinates. Studies the role of professional and personal ethics in organizational leadership.

Cross College Programs Reserve Office Training Corp Naval Science

PRLC-4010 (4) 21st Century Leadership

An advanced course that focuses on critical analysis of leadership principles and techniques. Designed to provide theoretical and hands-on experience for individuals who wish to function in leadership roles at high levels of competence in the workplace and in the civic arena.

Cross College Programs Leadership Residential Academic Program

AIRR-4020 (3) National Security Forces in Contemporary American Society 2

Two 1 1/2-hour seminars and one 2-hour lab per week. a continuation of AIRR 4010. Includes defense strategy conflict management, formulation/implementation of U.S. defense policy, and organizational factors and case studies in policy making, military law, uniform code of military justice, and communication skills.

Cross College Programs Reserve Office Training Corp Air Force Aerospace Studies

NAVR-4020 (3) Leadership and Ethics

Studies the ethics and laws of armed conflict, analyzing the leadership responsibilities of officers in conflict. Studies the military justice system and Naval legal administrative procedures, comparing military law with civilian criminal and civil law. Defines the responsibilities of junior officers within the military justice system.

Cross College Programs Reserve Office Training Corp Naval Science

NAVR-4030 (3) Navigation

Offers theory and practical application in the art of navigation: charts, publications, piloting, dead reckoning, navigation aids and instruments, time, sextant use, electronic fixing, global positioning system, and voyage planning.

Cross College Programs Reserve Office Training Corp Naval Science

MILR-4072 (3) Officer Leadership and Development 1

Examines management and leadership concepts and techniques associated with planning and executing military training and operations at company and higher echelons. Includes analyses of professional ethics and values, effective training principles and procedures, subordinate counseling, and effective staff officer briefing techniques. Also investigates other subjects such as counter terrorism, modern peacekeeping missions, and the impact of the information revolution on the art of land warfare. Conducted both in and out of classroom setting and with multiple practical leadership opportunities to organize cadet training and activities. Prereq., consent of the Professor of Military Science.

Cross College Programs Reserve Office Training Corp Military Science (U.S. Army)

PRLC-4081 (3) Icons of the American Republic

Examines the founding period of the United States through the events, political concepts and individuals depicted in the art exhibited in the U.S. Capitol Building in Washington, D.C. The course includes a visit to the U.S. Capitol Building, the floor of the U.S. House of Representatives, the floor of the U.S. Senate, and an exploration of the legislative process. Prereq., PSCI 1101 or 2012 or 2223 or 2004. Restricted to students with a minimum 3.4 GPA and 60 credit hours completed. PSCI 4081 and PRLC 4081 are the same course.

Cross College Programs Leadership Residential Academic Program

MILR-4082 (3) Officer Leadership and Development 2

Continues Milr 4072 study of management and leadership concepts and techniques, providing practical leadership experiences in the classroom and during multiple cadet-run activities. Also examines varied topics such as theory and practice of the military justice system, law of war, military-media relations, support mechanisms for soldiers and their families, operational security considerations, and historical case studies in military leadership in the context of 21st century land warfare. Prereq., consent of the Professor of Military Science.

Cross College Programs Reserve Office Training Corp Military Science (U.S. Army)

NAVR-4101 (3) Amphibious Warfare

Surveys the development of amphibious doctrine. Emphasizes the evolution of amphibious warfare in the 20th century and beyond. Explores present-day potential and limitations on amphibious operations, including the rapid force deployment concept.

Cross College Programs Reserve Office Training Corp Naval Science

RSEI-4150 (3) Energy Policy Project

Provides students with an opportunity to apply their knowledge of energy technologies, systems, and policies to energy policy issues. Specific topical coverage varies by semester. Example topics include natural gas fracking, automotive fuel economy standards, and natural gas exports. Students work in teams to research, prepare, and present a detailed and specific energy project proposal. Prereq., ENVS 3621. Prerequisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Cross College Programs Renewable and Sustainable Energy Institute

ATLS-4519 (1-3) Advanced Special Topics in Technology, Arts, and Media

Analyzes special interest areas of multidisciplinary technology, arts and media research and practice. May be repeated up to 9 total credit hours. Prereq., instructor consent. Recommended prereqs., ATLS 2000, ATLS 3010, and ATLS 3020. Same as ATLS 3519, 5519 and 6519.

Cross College Programs | Alliance for Technology, Learning, and Society (ATLAS)

ATLS-4809 (3) Computer Animation

Develops a firm understanding of the general principles of computer animation. Lectures cover the creation of models, materials, textures, surfaces, and lighting. Path and key frame animation, particle dynamics, and rendering are introduced. Students are assigned a number of animation tutorials to carry out. CSCI 4809/5809 and ATLS 4809/5809 are all the same course.

[Cross College Programs](#) | [Alliance for Technology, Learning, and Society \(ATLAS\)](#)

ATLS-4900 (1-6) Undergraduate Independent Study

Provides opportunities for independent study at the upper-division undergraduate level. Students work on research or a creative project guided by faculty. May be repeated up to 9 total credit hours. Prereqs., ATLS 3010, 3020, and consent of instructor.

[Cross College Programs](#) | [Alliance for Technology, Learning, and Society \(ATLAS\)](#)

RSEI-5000 (3) Energy Science and Technology

Examines the basics of energy science and technology. Covers both conventional energy sources such as oil, natural gas, coal, nuclear and hydroelectric; and renewable/sustainable energy technologies including wind, solar, biomass, geothermal, and end-use efficiency. Investigates the technological promise and progress of each technology, as well as its limitations and challenges. Prerequisites: Restricted to Graduate Students only.

[Cross College Programs](#) | [Renewable and Sustainable Energy Institute](#)

RSEI-5001 (3) Renewable Energy Policy

Examines the technology, policy and politics of renewables. Technology includes the resource, science, and engineering aspects of renewables. Policy includes various policy levers used to influence renewables. Politics refers to political settings of renewables: how decision-makers perceive them, who supports/opposes policies, and how policies progress through the political process. Prereq., an introductory energy science and technology course. Prerequisites: Restricted to Graduate Students only.

Cross College Programs | Renewable and Sustainable Energy Institute

RSEI-5002 (3) The Business of Renewable Energy

Addresses the business of renewable energy, including opportunities and challenges with renewable electricity, renewable transportation fuels, and energy efficiency. Topics include energy markets, opportunity identification, life cycle analysis, economic analysis, policy impacts, and project financing of sustainable renewable energy business models. Prereqs., RSEI 5000 and 5001. Prerequisites: Restricted to Graduate Students only.

Cross College Programs | Renewable and Sustainable Energy Institute

RSEI-5100 (1) Renewable and Sustainable Energy Seminar

Examines a wide range of energy issues in seminar format. Students attend energy-related seminars and critique/evaluate the presented material. Open to graduate students from all disciplines. Prerequisites: Restricted to Graduate Students only.

Cross College Programs | Renewable and Sustainable Energy Institute

ATLS-5150 (1) Managing Effectively in a Changing Telecommunications Environment

Provides students with an opportunity to join international managers and policy makers from around the world in an intensive seminar focused on the challenges of managing in a telecommunications environment in an era of technological change. Guest lecturers provide an effective overview of the cutting-edge issues managers face in telecom and technology companies around the world. TLEN 5150 and ATLS 5150 are the same course.

Cross College Programs | Alliance for Technology, Learning, and Society (ATLAS)

RSEI-5200 (3) Energy Topics Course

Covers timely topics related to renewable and sustainable energy. Specific offerings vary by semester. Prerequisites: Restricted to Graduate Students only.

Cross College Programs | Renewable and Sustainable Energy Institute

ATLS-5210 (3) Global Development I

Introduces students to the theories and policy of international development. The course will examine the role of multilateral agencies, foundations, aid organizations, corporate entities and academia in development as both an industry and a research field. The course will focus on development movements and their outcomes, the inter-related nature of development and its effect on policies and programs, and critiques. Prerequisites: Restricted to Graduate Students only.

Cross College Programs | Alliance for Technology, Learning, and Society (ATLAS)

ATLS-5220 (3) Global Development II

Explores the impact of economic, geographical and social/cultural conditions on development outcomes through standalone course components taught by subject matter experts in region and in residency at ATLAS. Components may include, but are not limited to, development economics, environmental sustainability, public health, climate change, globalization and migration, religion, and gender as these broad themes relate to development. Prereq., ATLS 5210. Prerequisites: Restricted to Graduate Students only.

Cross College Programs | Alliance for Technology, Learning, and Society (ATLAS)

ATLS-5230 (3) Case Studies in Information and Communication Technology for Development

Serves as foundation course for MS-ICTD program. Students will evaluate case studies across a range of technologies and applications. Students will learn how to match available technologies to human and environmental needs and resources, be introduced to the seminal work and leaders in the field, and discuss the future of ICTD as an emerging area of academic focus. Prerequisites: Restricted to Graduate Students only.

Cross College Programs | Alliance for Technology, Learning, and Society (ATLAS)

ATLS-5240 (3) Information and Communication Technology for Development Laboratory

Prepares students for the semester-long practicum. Students work in teams to design ICTD interventions that address unique socio-economic and environmental development issues. Teams will design a variety of ICTD interventions, including telehealth and distance education programs, communication networks, and pro-development ICTD policies. Topics will be chosen by teams and guided by program faculty and external domain experts. Prereq., ATLS 5230. Prerequisites: Restricted to Graduate Students only.

Cross College Programs | Alliance for Technology, Learning, and Society (ATLAS)

ATLS-5250 (3) Fieldwork Methods for ICTD Practitioners

Introduces methods and models that can be employed in ICTD program development and deployment. Examines the applications of participatory research, value-centric design, program scale, cross-disciplinary work, and appropriate monitoring and evaluation. The goal of this course is to build student confidence around existing evaluation toolkits and methods, while advancing multi-method approaches to designing and analyzing ICTD initiatives. Prerequisites: Restricted to Graduate Students only.

Cross College Programs | Alliance for Technology, Learning, and Society (ATLAS)

ATLS-5519 (1-3) Advanced Special Topics in Technology, Arts, and Media

Same as ATLS 3519, 4519. Prerequisites: Restricted to Graduate Students only.

Cross College Programs | Alliance for Technology, Learning, and Society (ATLAS)

ATLS-5610 (6) Startup Practicum

Presumes that entrepreneurship can be learned through the conception, build, and launch of an original product or service by student teams within a single semester. Immerses students in the daily leadership and innovation challenges of the startup environment and serves as a clinic in thinking, decision making and mental agility that will benefit any area of business--not just startups. Prerequisites: Restricted to Graduate Students only.

Cross College Programs | Alliance for Technology, Learning, and Society (ATLAS)

ATLS-5620 (3) User Centered Design 1

Emphasizes that user-centered design is the first and primary consideration in the design process. UCD teaches how to design successful interactions from research into users' behaviors, attitudes and expectations via three key elements to designing successful user experiences: 1) Listen, Observe, and Research; 2) Concept and Design for Your Users; 3) Deliver/Launch. Prerequisites: Restricted to Graduate Students only.

Cross College Programs | Alliance for Technology, Learning, and Society (ATLAS)

ATLS-5630 (3) Front-End Development

Covers the front end environment--HTML 5, CSS3, JS. Introduces students to HTML and emphasizes semantic use of elements and standards-based, valid code. CSS use focuses on separating content from presentation in order to decrease maintenance time, speed up development, improve download speed, and design capabilities. Prerequisites: Restricted to Graduate Students only.

Cross College Programs | Alliance for Technology, Learning, and Society (ATLAS)

ATLS-5640 (4) Design Thinking

Explores design thinking and how it can be applied conceptually and practically to innovation in areas as diverse as business organization and product development to topics and areas including but not limited to, story, design, UX, interaction design, communication strategy and presentation. Fast-paced, project-based, and immersive, students will work in small teams to discover solutions to real-world problems. Prerequisites: Restricted to Graduate Students only.

Cross College Programs | Alliance for Technology, Learning, and Society (ATLAS)

ATLS-5650 (3) Introduction to Programming

Provides a hands-on introduction to programming logic, environments, and execution using Ruby as the primary programming language. Covers basic programming principle, syntax, design patterns, and best industry practices while focusing on developing elegant, problem-solving skills through code. Prerequisites: Restricted to Graduate Students only.

Cross College Programs | Alliance for Technology, Learning, and Society (ATLAS)

ATLS-5660 (3) Creative Code

Exposes students to front-end, web-based design and development processes and best practices. WordPress will be used as the back end CMS. Students will learn how to design and develop using WordPress as a framework. At the end of the semester, students will present a final project to illustrate what they have learned and the logic of their build. Recommended prereqs., exposure to HTML, CSS, JavaScript, PHP and MySQL, and previous experience with WordPress for blogging and/or content publication. Prerequisites: Restricted to Graduate Students only.

Cross College Programs | Alliance for Technology, Learning, and Society (ATLAS)

ATLS-5670 (3) Content Strategies

Experiments with different frameworks on how to combine messaging with creative to communicate complex ideas, brand story, product, and finally measure success. Gain experience and

expertise with the various content types and channels, with an understanding of how to apply them and the capabilities to do so in solving creative and business problems. Prerequisites: Restricted to Graduate Students only.

Cross College Programs | Alliance for Technology, Learning, and Society (ATLAS)

ATLS-5809 (3) Computer Animation

Develops a firm understanding of the general principles of computer animation. Lectures cover the creation of models, materials, textures, surfaces, and lighting. Path and key frame animation, particle dynamics, and rendering are introduced. Students are assigned a number of animation tutorials to carry out. CSCI 4809/5809 and ATLS 4809/5809 are all the same course.

Prerequisites: Restricted to Graduate Students only.

Cross College Programs | Alliance for Technology, Learning, and Society (ATLAS)

ATLS-5900 (1-6) Masters Level Independent Study

Provides opportunities for independent study and research at the Masters level. Students work on research project guided by faculty. May be repeated up to 6 total credit hours. Prereq., instructor consent. Restricted to ATLS graduate students in good academic standing. Prerequisites: Restricted to Graduate Students only.

Cross College Programs | Alliance for Technology, Learning, and Society (ATLAS)

ATLS-6519 (1-3) Advanced Special Topics in Technology, Arts, and Media

Same as ATLS 3519, 4519. Prerequisites: Restricted to Graduate Students only.

Cross College Programs | Alliance for Technology, Learning, and Society (ATLAS)

ATLS-6910 (6) Information and Communication Technology for Development Practicum

This practicum allows MS-ICTD students to synthesize what they have learned and test their readiness for a career in ICTD. Practicum assignments are arranged under the supervision of the MS-ICTD Program Director and involve work with a non-governmental organization, development agency or technology/policy entity. Successful completion is required for graduation from the MS-ICTD Program. Prereqs., ATLS 5210, 5220, 5230, 5240 and 5250.

ATLS-7000 (1) ATLAS Seminar

This student/faculty seminar critically examines issues in technology, media and society from the multiple interdisciplinary perspective of the gathered participants. Topics may include: IT and business, security, ethics, globalization, digital divide, IT and education, human computer interaction and others. May be repeated up to 8 total credit hours. Instructor permission required.

Prerequisites: Restricted to Graduate Students only.

[Cross College Programs](#) | [Alliance for Technology, Learning, and Society \(ATLAS\)](#)

ATLS-7800 (2) Online Course Design for the Foreign Languages

Learn about the challenges and affordances of designing online foreign languages courses. Read research articles and book chapters pertaining to instructional design issues and online teaching strategies. Experiment with the latest forms of educational technologies. Students enrolled in the course will design and teach a two-week online language course. Prereq., two years of language teaching experience at the college level.

[Cross College Programs](#) | [Alliance for Technology, Learning, and Society \(ATLAS\)](#)

ATLS-7900 (1-6) Doctoral Level Independent Study

Provides opportunities for independent study and research at the Doctoral level. Students perform independent research under faculty supervision. May be repeated up to 6 total credit hours.

Prereq., instructor consent. Restricted to ATLS PHD students in good academic standing. Prerequisites: Restricted to Graduate Students only.

[Cross College Programs](#) | [Alliance for Technology, Learning, and Society \(ATLAS\)](#)

ATLS-8990 (1-10) Doctoral Dissertation

Approved research conducted under the supervision of members of the graduate faculty. Investigates some specialized topic or field in the area of interdisciplinary information and communication technology. All doctoral students must register for at least 30 hours of dissertation credit as part of the requirement for the ATLAS doctoral degree. Prereq., instructor consent. Restricted to ATLS PHD students in good academic standing. Prerequisites: Restricted to Graduate Students only.

JOUR-1001 (3) Contemporary Media Analysis

An introduction to the role of media in contemporary society, focusing on the cultural, political, economic, and historical context within which print and media technologies developed and how audiences interact with and influence the use of media. Restricted to Journalism & Mass Communication (JOUR) or Arts and Sciences Open Option majors (XXAS) majors only. Prerequisites: Restricted to Journalism and Mass Communication (JOUR) or Arts and Sciences Open Option majors (XXAS) majors only.

[Journalism & Mass Communication Program](#)
[Journalism](#)
[Core Curr. & General Electives](#)

JOUR-1871 (1-3) Special Topics for First-Year Students

Special studies in media that are specific for first-year students. May be repeated for a maximum of three credit hours.

[Journalism & Mass Communication Program](#)
[Journalism](#)
[Core Curr. & General Electives](#)

JOUR-2011 (3) Media and Public Culture

Introduces the rise and development of mediated communication and its impact on and role within the formation of modern culture and public life. Restricted to JOUR majors.

[Journalism & Mass Communication Program](#)
[Journalism](#)
[Core Curr. & General Electives](#)

JOUR-2403 (3) Principles of Advertising and Consumer Culture

Explores creative and strategic thinking plus the nature and functions of promotions, event-marketing, public relations, and advertising and their growing interdependence in a changing media landscape. Considers technology's impact and the effect of commercial culture on an increasingly diverse society. Restricted to School of Journalism and Mass Communication (JOUR) or

Marketing (MKTG) majors only. Prerequisites: Restricted to School of Journalism and Mass Communication (JOUR) or Marketing (MKTG) majors only.

Journalism & Mass Communication Program | Journalism | Core Curr & General Electives

JOUR-2601 (3) Principles of Journalism and Networked Communication

Surveys the history, practices and responsibilities of journalism in a democracy. Examines ethics, best practices in institutional and network settings, reporting and writing, international news systems, personal branding, and strategies for creating and distributing content across media platforms. Promotes the highest professional values and encourages students to be leaders who recognize the possibilities of journalism in a democratic society. Restricted to Journalism and Mass Communication (JOUR) majors only. Prerequisites: Restricted to Journalism and Mass Communication (JOUR) majors only.

Journalism & Mass Communication Program | Journalism | Core Curr & General Electives

JOUR-3001 (3) Public Affairs Reporting

Grounds students in the basic newsgathering skills needed to work for news enterprises. Students learn techniques central to researching, reporting and writing stories for various media formats, including print, online, and broadcast journalism. Prereq., JOUR 2601 or 1002. Prerequisites: Requires prerequisite course of JOUR 2601 or 1002. Restricted to News Editorial (NSED-BSJR or JNED-BSJR) majors and with a minimum of 57 hours taken.

Journalism & Mass Communication Program | Journalism | Print & Online Journalism

JOUR-3002 (3) Multimedia Reporting and Production

Equips students with the tools and techniques needed to produce multimedia content. Classroom instruction offers students historical, social and cultural contexts for the emergence of new media forms. Skills and practices covered include website design and construction, nonlinear video editing, digital graphics design, interactive information presentation, and multimedia reporting. Restricted to juniors/seniors. May be limited to JOUR majors. Prerequisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Journalism & Mass Communication Program | Journalism | Print & Online Journalism

JOUR-3102 (3) Photojournalism I

Introduces the basic elements of visual communication. Covers the use of camera systems, digital imaging techniques and other aspects of photojournalism including law, ethics, history and critical decision-making. Prereq., JOUR 2601. Prerequisites: Restricted to Program in Journalism and Mass Communication students with a minimum of 57 hours taken.

Journalism & Mass Communication Program | Journalism | Print & Online Journalism

JOUR-3403 (3) Branding and Positioning

Examines the theory and practice of branding, target segmentation and how the digital space and the rapid rise of consumer generated content have impacted brand management. Students analyze audience research, and the competitive set to develop brand positions and benefits. Prereq., JOUR 2403. Prerequisites: Requires pre-requisite course of JOUR 2403. Restricted to Advertising (ADVT-BSJR or JADV-BSJR) or Marketing (MKTG) majors only with a minimum of 45 hours taken.

Journalism & Mass Communication Program | Journalism | Advertising & Media Design

JOUR-3453 (3) Introduction to Creative Concepts

Provides an opportunity to explore approaches to creative problem solving and visual thinking. Students draw on this theoretical foundation to develop advertising ideas in a variety of media for both commercial clients and non-profit organizations. Prereq., JOUR 2403. Prerequisites: Requires pre-requisite course of JOUR 2403. Restricted to Advertising (ADVT-BSJR or JADV-BSJR) or Marketing (MKTG) majors only with a minimum of 45 hours taken.

Journalism & Mass Communication Program | Journalism | Advertising & Media Design

JOUR-3463 (3) Advertising Media

Studies media, markets, and audiences, and their relationships to advertising messages. Prereqs., JOUR 3403 and 3453. Prerequisites: Requires pre-requisite courses of JOUR 3403 and 3453. Restricted to students with 57-180 credits (Junior or Senior) Advertising (ADVT-BSJR or JADV-BSJR) or Marketing (MKTG) majors only.

Journalism & Mass Communication Program | Journalism | Advertising & Media Design

JOUR-3473 (3) Advertising Research

Introduces students to applied research methods and provides practice in using research in marketing and advertising decision making. Prereqs., JOUR 3403 and 3453. Restricted to junior/senior JOUR, MKTG and ADVT majors.

Journalism & Mass Communication Program | Journalism | Advertising & Media Design

JOUR-3503 (3) Intermediate Creative Concepts

Explores both strategic and creative thinking and examines approaches to narrative storytelling as a tool for telling overarching brand stories. Students use the foundation to develop creative briefs and advertising campaigns. Prereqs., JOUR 3403, 3453 and instructor consent. Coreq., JOUR 4513. Prerequisites: Prereq., JOUR 3453 and instructor consent. Coreq., JOUR 4513.

Journalism & Mass Communication Program | Journalism | Advertising & Media Design

JOUR-3552 (3) Editing and Presentation

Explores copy editing, graphic principles and processes, new media technology. Prereq., JOUR 3001. Prerequisites: Requires pre-requisite course of JOUR 3001. Restricted to students with 57-180 credits (Junior or Senior) News Editorial (NSED-BSJR or JNED-BSJR) majors only.

Journalism & Mass Communication Program | Journalism | Print & Online Journalism

JOUR-3604 (3) Radio and Television News

Covers principles and techniques involved in the preparation of news for broadcasting. Prereq., JOUR 2601. Restricted to Broadcast News or Broadcast Production majors only with a minimum of 57 hours taken. Prerequisites: Requires pre-requisite course of JOUR 2601. Restricted to Broadcast News (BCNS-BSJR or JBCN-BSJR) or Broadcast Production (BCPM-BSJR or JBCP-BSJR) majors only with a minimum of 57 hours taken.

Journalism & Mass Communication Program | Journalism | Broadcast Journalism

JOUR-3614 (3) Principles of Audio Production

Introduces audio production techniques using digital technologies. Students learn to apply fundamental principles to create professional radio and online programs including podcasting. Restricted to Journalism majors with a minimum of 45 hours taken. Prerequisites: Restricted to School of Journalism and Mass Communication majors with a minimum of 45 hours taken.

Journalism & Mass Communication Program | Journalism | Broadcast Journalism

JOUR-3644 (3) Principles of Television Production

Emphasizes the use of video technologies in both field and studio production, camera and editing work, producing and directing for professional program production. Prereq., JOUR 2601. Restricted to Broadcast News or Broadcast Production majors only with a minimum of 57 hours taken. Prerequisites: Requires pre-requisite course of JOUR 2601. Restricted to Broadcast News (BCNS-BSJR or JBCN-BSJR) or Broadcast Production (BCPM-BSJR or JBCP-BSJR) majors only with a minimum of 57 hours taken.

Journalism & Mass Communication Program | Journalism | Broadcast Journalism

JOUR-3674 (3) Television Production 2

Covers studio productions for "Newsteam Boulder." Students also do field projects to sharpen their writing, video production, and editing skills. Prereq., JOUR 3644. Prerequisites: Requires pre-requisite course of JOUR 3644. Restricted to students with 57-180 credits (Junior or Senior) Broadcast News (BCNS-BSJR or JBCN-BSJR) or Broadcast Production (BCPM-BSJR or JBCP-BSJR) majors only.

Journalism & Mass Communication Program | Journalism | Broadcast Journalism

JOUR-3771 (3) Media and Communication History

Examines the historical development of various communication technologies (printing press, photography, film, radio, television, computers, Internet); their impact on culture (forms of expression and social relationships); and their relation to various conceptions of the public (citizens, audiences, consumers, markets). Draws on history to explore current issues in media, popular culture and their relation to public life. Prereq., junior or senior standing. May be limited to majors.

Journalism & Mass Communication Program | Journalism | Core Curr & General Electives

JOUR-3902 (1-3) Newspaper Practicum

Gives students the opportunity to participate in newswork on Campus Press. May be repeated up to 6 total credit hours. Instructor consent required.

Journalism & Mass Communication Program | Journalism | Print & Online Journalism

JOUR-3913 (1-3) Advertising Practicum

Provides the opportunity to do advertising work outside existing classes. May be repeated up to 6 total credit hours. Instructor consent required.

Journalism & Mass Communication Program Journalism Advertising & Media Design

JOUR-4002 (3) Reporting 2

Assumes mastery of basic reporting and writing skills. Students produce more sophisticated stories on a variety of topics. Prereq., JOUR 3001. Prerequisites: Requires pre-requisite course of JOUR 3001. Restricted to students with 57-180 credits (Junior or Senior) News Editorial (NSED-BSJR or JNED-BSJR) or Journalism and Mass Communication (JOUR) majors only.

Journalism & Mass Communication Program Journalism Print & Online Journalism

JOUR-4102 (3) Photojournalism Portfolio

Advanced course intended to give students a forum in which technical skills will be brought to professional standards. Build a polished portfolio of work to present to editors and buyers. Prereq., JOUR 3102. Prerequisites: Requires a prerequisite course of JOUR 3102.

Journalism & Mass Communication Program Journalism Print & Online Journalism

JOUR-4201 (3) Media, Culture and Globalization

Surveys the political and economic structures of media system in developed and developing countries and discusses the impact of privatization, ownership consolidation, and globalization on the flow of information across national borders. Also looks at how global media flows and counter-flows affect conceptions of nationhood and cultural identity. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) Journalism & Mass Communication (JOUR) or International Affairs (IAFS) majors only.

Journalism & Mass Communication Program Journalism Core Curr & General Electives

JOUR-4211 (3) East Asian Media and Culture

Offers an understanding of the various people, cultures and nations of East Asia through their media systems. Provides a critical overview of the historical, cultural, social, political and economic dimensions of East Asian communication systems in today's digitally connected/disconnected world. Restricted to junior/senior SJMC majors. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) School of Journalism & Mass Communication majors only.

JOUR-4301 (3) Media Ethics

Provides students with an overview of the theories, ethics codes, and analytical models that are used in journalism, public relations, and advertising. Introduces students to a variety of ethical issues that can arise across media professions, as well as the industry practices that can lead to ethical lapses, and teaches students how to challenge those practices. Same as JOUR 5301.

Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) School of Journalism & Mass Communication majors only.

| | | |
|---|------------|-------------------------------|
| Journalism & Mass Communication Program | Journalism | Core Curr & General Electives |
|---|------------|-------------------------------|

JOUR-4311 (3) Media Criticism

Introduces the critical perspectives most often employed in qualitative media analysis: semiology, structuralism, Marxism, psychoanalytical criticism, sociological criticism, etc. Texts from contemporary print and broadcast media. JOUR 4311 and 5311 are the same course.

Journalism & Mass Communication Program | Journalism | Core Curr & General Electives

JOUR-4321 (3) Media Institutions and Economics

Focuses on the institutions and practices of the media industries. Surveys the histories, structures, and activities of these organizations and the contemporary issues surrounding them. Same as JOUR 5321. Prerequisites: Restricted to School of Journalism and Mass Communication majors with a minimum of 75 hours taken.

Journalism & Mass Communication Program | Journalism | Core Curr & General Electives

JOUR-4331 (3) Gender, Race, Class, and Sexuality in Popular Culture

Studies the construction, interconnections, and replications of gender, race, class, and sexuality in popular culture and how these constructs become cultural norms and mores. Uses critical methods with a focus on producing responsible viewers and readers. Same as JOUR 5331, WMST 4331. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) School of Journalism & Mass Communication majors only.

Journalism & Mass Communication Program | Journalism | Core Curr & General Electives

JOUR-4341 (3) International Media and Global Crises

Examines strengths and limits on medias role in globalized crises (e.g. financial, climate change, health) in light of changing distribution of global power. Introduction to current crises; context-analytical approach to media technologies, financing and uses; application to national cases. Restricted to JOUR and IAFS juniors/seniors. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) Journalism & Mass Communication (JOUR) or International Affairs (IAFS) majors only.

Journalism & Mass Communication Program | Journalism | Core Curr & General Electives

JOUR-4351 (3) Reporting Wars, Disasters, and Peace

Explores how journalists report international breaking news with a focus on war, disaster and peace and how these news events affect peoples' lives, governmental decisions and news media operations. Prerequisites: Restricted to Program in Journalism and Mass Communication students with a minimum of 73 hours taken.

Journalism & Mass Communication Program | Journalism | Core Curr & General Electives

JOUR-4361 (3) TV and the Family in American Culture and Society

Examines the history and character of two central institutions in American society--the family and television--to gain deeper understanding of their formative and enduring roles. Topics include: intersecting histories of the family and television; economic logic of the TV industry and programming; representations of the family in television programming; how families use and interact with television. Prerequisites: Restricted to Program in Journalism and Mass Communication students with a minimum of 73 hours taken.

| | | |
|---|------------|-------------------------------|
| Journalism & Mass Communication Program | Journalism | Core Curr & General Electives |
|---|------------|-------------------------------|

JOUR-4651 (3) Media Law

Studies state and federal laws and court decisions that affect the media in order to develop knowledge of media rights and responsibilities and an understanding of the legal system. Prerequisites: Restricted to School of Journalism and Mass Communication majors with a minimum of 75 hours taken.

| | | |
|---|------------|-------------------------------|
| Journalism & Mass Communication Program | Journalism | Core Curr & General Electives |
|---|------------|-------------------------------|

JOUR-4711 (3) Media and Culture

Examines culture in the form of discourse, symbols, and texts transmitted through the media. Explores the relationship between such mediated culture and social myth and ideology. Same as JOUR 5711.

| | | |
|---|------------|-------------------------------|
| Journalism & Mass Communication Program | Journalism | Core Curr & General Electives |
|---|------------|-------------------------------|

JOUR-4791 (3) Media and the Public

Provides an overview of how publishing in print and electronic forms has been tied closely to democratic ideals for centuries. Explores how the idea of the public is central to the theory and practice of media politics, and how the contested concepts of "the public sphere" and "public opinion" have long been linked to debates about the proper relationship between media and democratic citizenship. Restricted to Journalism majors with a minimum of 75 hours taken. Same as JOUR 5791. Prerequisites: Restricted to School of Journalism and Mass Communication majors with a minimum of 75 hours taken.

JOUR-3001 (3) Public Affairs Reporting

Grounds students in the basic newsgathering skills needed to work for news enterprises. Students learn techniques central to researching, reporting and writing stories for various media formats, including print, online, and broadcast journalism. Prereq., JOUR 2601 or 1002. Prerequisites: Requires prerequisite course of JOUR 2601 or 1002. Restricted to News Editorial (NSED-BSJR or JNED-BSJR) majors and with a minimum of 57 hours taken.

[Journalism & Mass Communication Program](#) [Journalism](#) [Print & Online Journalism](#)

JOUR-3002 (3) Multimedia Reporting and Production

Equips students with the tools and techniques needed to produce multimedia content. Classroom instruction offers students historical, social and cultural contexts for the emergence of new media forms. Skills and practices covered include website design and construction, nonlinear video editing, digital graphics design, interactive information presentation, and multimedia reporting. Restricted to juniors/seniors. May be limited to JOUR majors. Prerequisites: Restricted to students with 57-180 credits (Juniors or Seniors).

[Journalism & Mass Communication Program](#) [Journalism](#) [Print & Online Journalism](#)

JOUR-3102 (3) Photojournalism I

Introduces the basic elements of visual communication. Covers the use of camera systems, digital imaging techniques and other aspects of photojournalism including law, ethics, history and critical decision-making. Prereq., JOUR 2601. Prerequisites: Restricted to Program in Journalism and Mass Communication students with a minimum of 57 hours taken.

[Journalism & Mass Communication Program](#) [Journalism](#) [Print & Online Journalism](#)

JOUR-3552 (3) Editing and Presentation

Explores copy editing, graphic principles and processes, new media technology. Prereq., JOUR 3001. Prerequisites: Requires pre-requisite course of JOUR 3001. Restricted to students with

57-180 credits (Junior or Senior) News Editorial (NSED-BSJR or JNED-BSJR) majors only.

Journalism & Mass Communication Program Journalism Print & Online Journalism

JOUR-3902 (1-3) Newspaper Practicum

Gives students the opportunity to participate in newswork on Campus Press. May be repeated up to 6 total credit hours. Instructor consent required.

Journalism & Mass Communication Program Journalism Print & Online Journalism

JOUR-4002 (3) Reporting 2

Assumes mastery of basic reporting and writing skills. Students produce more sophisticated stories on a variety of topics. Prereq., JOUR 3001. Prerequisites: Requires pre-requisite course of JOUR 3001. Restricted to students with 57-180 credits (Junior or Senior) News Editorial (NSED-BSJR or JNED-BSJR) or Journalism and Mass Communication (JOUR) majors only.

Journalism & Mass Communication Program Journalism Print & Online Journalism

JOUR-4102 (3) Photojournalism Portfolio

Advanced course intended to give students a forum in which technical skills will be brought to professional standards. Build a polished portfolio of work to present to editors and buyers. Prereq., JOUR 3102. Prerequisites: Requires a prerequisite course of JOUR 3102.

Journalism & Mass Communication Program Journalism Print & Online Journalism

JOUR-4272 (3) Principles of Public Relations

Introduces the economics, ethics, history, impact, practice, and social context of the public relations industry in America. Includes an analysis of public relations in agencies, corporations, political campaigns, social service organizations, universities, and other venues. Emphasizes writing for public relations, including fact sheets, press releases, reports, and speeches. Same as JOUR 5272. Restricted to Journalism majors with a minimum of 57 hours taken. Prerequisites: Restricted to Program in Journalism and Mass Communication students with a minimum of 57 hours taken.

Journalism & Mass Communication Program Journalism Print & Online Journalism

JOUR-4282 (3) Public Relations Strategy and Campaigns

Develops and applies public relations programs, from identification of the problem through execution of public relations techniques. Prereq., JOUR 4272. Same as JOUR 5282. Prerequisites: Requires a prerequisite course of JOUR 4272.

Journalism & Mass Communication Program Journalism Print & Online Journalism

JOUR-4502 (3) Reporting 3

Involves writing news and features about actual events for publication under deadline pressure. Lab to be arranged. Prereqs., JOUR 3552 and 4002. Restricted to News Editorial majors and with a minimum of 85 hours taken. Same as JOUR 5502. Prerequisites: Requires pre-requisite courses of JOUR 3552 and 4002. Restricted to News Editorial (NSED-BSJR or JNED-BSJR) majors and with a minimum of 85 hours taken.

Journalism & Mass Communication Program | Journalism | Print & Online Journalism

JOUR-4562 (3) Digital Journalism

Builds upon digital production skills through the creation of multimedia project. Applies media theory to evaluate digital media content and explore how digital forms influence the news industry, politics, culture, and society. Prereq., JOUR 3002. Same as JOUR 5562. Prerequisites: Restricted to School of Journalism and Mass Communication majors with a minimum of 75 hours taken.

Journalism & Mass Communication Program | Journalism | Print & Online Journalism

JOUR-4602 (3) Editorial, Commentary and Opinion Writing

Concentrates on several of the subjective areas of journalism. Emphasizes editorial and column writing, editorial pages and blogging. Prereq., JOUR 3001. Same as JOUR 5602. Prerequisites: Requires a prerequisite course of JOUR 3001.

Journalism & Mass Communication Program | Journalism | Print & Online Journalism

JOUR-4702 (3) Arts/Cultural Reporting and Criticism

Emphasizes composition of criticism for the performing arts and other areas of entertainment. Prereq., JOUR 3001. Same as JOUR 5702.

Journalism & Mass Communication Program | Journalism | Print & Online Journalism

JOUR-4802 (3) Magazine and Feature Writing

Provides practice in writing freelance articles. Considers types, sources, methods, titles, illustrations, and freelance markets. Students submit work for publication. Prereq., JOUR 3001. Restricted to Journalism majors with a minimum of 75 hours taken. Same as JOUR 5802. Prerequisites: Requires prerequisite course of JOUR 3001. Restricted to Journalism and Mass Communication (JOUR) majors with a minimum of 75 hours taken.

Journalism & Mass Communication Program | Journalism | Print & Online Journalism

JOUR-4822 (3) Reporting on the Environment

Involves reporting and writing about the environment by taking into account the scientific, technological, political, economic, and cultural dimensions of environmental subjects. Same as JOUR 5822.

Journalism & Mass Communication Program | Journalism | Print & Online Journalism

JOUR-4872 (1-3) Special Topics: Print

Same as JOUR 5872. Prerequisites: Restricted to News-Editorial (NSED-BSJR or JNED-BSJR) students with 87-180 credits (Senior, Fifth Year Senior).

Journalism & Mass Communication Program | Journalism | Print & Online Journalism

JOUR-5102 (3) Photojournalism Portfolio

Same as JOUR 4102.

JOUR-3403 (3) Branding and Positioning

Examines the theory and practice of branding, target segmentation and how the digital space and the rapid rise of consumer generated content have impacted brand management. Students analyze audience research, and the competitive set to develop brand positions and benefits. Prereq., JOUR 2403. Prerequisites: Requires pre-requisite course of JOUR 2403. Restricted to Advertising (ADVT-BSJR or JADV-BSJR) or Marketing (MKTG) majors only with a minimum of 45 hours taken.

[Journalism & Mass Communication Program](#) [Journalism](#) [Advertising & Media Design](#)

JOUR-3453 (3) Introduction to Creative Concepts

Provides an opportunity to explore approaches to creative problem solving and visual thinking. Students draw on this theoretical foundation to develop advertising ideas in a variety of media for both commercial clients and non-profit organizations. Prereq., JOUR 2403. Prerequisites: Requires pre-requisite course of JOUR 2403. Restricted to Advertising (ADVT-BSJR or JADV-BSJR) or Marketing (MKTG) majors only with a minimum of 45 hours taken.

[Journalism & Mass Communication Program](#) [Journalism](#) [Advertising & Media Design](#)

JOUR-3463 (3) Advertising Media

Studies media, markets, and audiences, and their relationships to advertising messages. Prereqs., JOUR 3403 and 3453. Prerequisites: Requires pre-requisite courses of JOUR 3403 and 3453. Restricted to students with 57-180 credits (Junior or Senior) Advertising (ADVT-BSJR or JADV-BSJR) or Marketing (MKTG) majors only.

[Journalism & Mass Communication Program](#) [Journalism](#) [Advertising & Media Design](#)

JOUR-3473 (3) Advertising Research

Introduces students to applied research methods and provides practice in using research in marketing and advertising decision making. Prereqs., JOUR 3403 and 3453. Restricted to

junior/senior JOUR, MKTG and ADVT majors.

Journalism & Mass Communication Program Journalism Advertising & Media Design

JOUR-3503 (3) Intermediate Creative Concepts

Explores both strategic and creative thinking and examines approaches to narrative storytelling as a tool for telling overarching brand stories. Students use the foundation to develop creative briefs and advertising campaigns. Prereqs., JOUR 3403, 3453 and instructor consent. Coreq., JOUR 4513. Prerequisites: Prereq., JOUR 3453 and instructor consent. Coreq., JOUR 4513.

Journalism & Mass Communication Program Journalism Advertising & Media Design

JOUR-3913 (1-3) Advertising Practicum

Provides the opportunity to do advertising work outside existing classes. May be repeated up to 6 total credit hours. Instructor consent required.

Journalism & Mass Communication Program Journalism Advertising & Media Design

JOUR-4403 (4) Advertising Campaigns

Gives students the opportunity to work in small groups to develop material for an actual client. Students examine basic principles of group dynamics and effective teamwork while conducting research, developing strategies and creating a multimedia campaign. All work is presented to the client. Prereq., JOUR 3463 or 3503. Prerequisites: Requires pre-requisite course of JOUR 3463 or 3503. Restricted to Advertising (ADVT-BSJR or JADV-BSJR) or Marketing (MKTG) majors with a minimum of 85 hours.

Journalism & Mass Communication Program Journalism Advertising & Media Design

JOUR-4453 (3) Advertising and Society

Examines criticisms and contributions of advertising in society and the economy. Same as JOUR 5453.

Journalism & Mass Communication Program Journalism Advertising & Media Design

JOUR-4503 (3) Advanced Creative Concepts

Builds on skills acquired in JOUR 3503 and 4513 to help students enhance their conceptual abilities and generate both print and integrated multimedia campaigns. Students work in teams to develop an extensive body of work that's exhibited in an awards show judged by advertising professionals. Prereqs., JOUR 3503 and 4513 and instructor consent.

Journalism & Mass Communication Program Journalism Advertising & Media Design

JOUR-4513 (3) Art Direction

Explores theories of visual communication, the visual imagination, and key principles of design. Develops students ability to express ideas through images and to create both effective visual concepts and layouts for a variety of media. Prereq., JOUR 3453 and instructor consent. Coreq. JOUR 3503.

Journalism & Mass Communication Program Journalism Advertising & Media Design

JOUR-4523 (3) Portfolio

Gives students an opportunity to develop an extensive body of work. Students create integrated campaigns, which include print, digital and guerilla ideas. Final portfolios are critiqued by both faculty and outside reviewers. JOUR 4503 and instructor consent.

Journalism & Mass Communication Program Journalism Advertising & Media Design

JOUR-4533 (3) Applied Consumer Insights

Provides an opportunity to use and master quantitative and qualitative research methods. Students conduct research and analyze data to determine the targets relationship with specific product categories and identify the emotional and practical needs that motivate purchase. Prereqs., JOUR 3403, 3453. Restricted to Advertising or Marketing majors only with a minimum of 57 hours taken. Prerequisites: Restricted to Advertising (ADVT-BSJR or JADV-BSJR) or Marketing (MKTG) majors only with a minimum of 57 hours taken.

Journalism & Mass Communication Program Journalism Advertising & Media Design

JOUR-4543 (3) Strategic Brand Management

Examines the theory of branding: what brands are, how brands are created and measured, as well as strategies for managing brands and brand communication. Prereq., JOUR 3463. Restricted to Advertising or Marketing majors only with a minimum of 57 hours taken. Prerequisites: Restricted to Advertising (ADVT-BSJR or JADV-BSJR) or Marketing (MKTG) majors only with a minimum of 57 hours taken.

Journalism & Mass Communication Program Journalism Advertising & Media Design

JOUR-4873 (1-3) Special Topics

JOUR-3604 (3) Radio and Television News

Covers principles and techniques involved in the preparation of news for broadcasting. Prereq., JOUR 2601. Restricted to Broadcast News or Broadcast Production majors only with a minimum of 57 hours taken. Prerequisites: Requires pre-requisite course of JOUR 2601. Restricted to Broadcast News (BCNS-BSJR or JBCN-BSJR) or Broadcast Production (BCPM-BSJR or JBCP-BSJR) majors only with a minimum of 57 hours taken.

[Journalism & Mass Communication Program](#) [Journalism](#) [Broadcast Journalism](#)

JOUR-3614 (3) Principles of Audio Production

Introduces audio production techniques using digital technologies. Students learn to apply fundamental principles to create professional radio and online programs including podcasting. Restricted to Journalism majors with a minimum of 45 hours taken. Prerequisites: Restricted to School of Journalism and Mass Communication majors with a minimum of 45 hours taken.

[Journalism & Mass Communication Program](#) [Journalism](#) [Broadcast Journalism](#)

JOUR-3644 (3) Principles of Television Production

Emphasizes the use of video technologies in both field and studio production, camera and editing work, producing and directing for professional program production. Prereq., JOUR 2601. Restricted to Broadcast News or Broadcast Production majors only with a minimum of 57 hours taken. Prerequisites: Requires pre-requisite course of JOUR 2601. Restricted to Broadcast News (BCNS-BSJR or JBCN-BSJR) or Broadcast Production (BCPM-BSJR or JBCP-BSJR) majors only with a minimum of 57 hours taken.

[Journalism & Mass Communication Program](#) [Journalism](#) [Broadcast Journalism](#)

JOUR-3674 (3) Television Production 2

Covers studio productions for "Newsteam Boulder." Students also do field projects to sharpen their writing, video production, and editing skills. Prereq., JOUR 3644. Prerequisites: Requires pre-

requisite course of JOUR 3644. Restricted to students with 57-180 credits (Junior or Senior) Broadcast News (BCNS-BSJR or JBCN-BSJR) or Broadcast Production (BCPM-BSJR or JBCP-BSJR) majors only.

Journalism & Mass Communication Program Journalism Broadcast Journalism

JOUR-4344 (3) Video Documentary Production

Designed to give students the experience of researching, writing, shooting and editing their own documentaries. Prereq., JOUR 3644. Same as JOUR 5344. Prerequisites: Requires a prerequisite course of JOUR 3644.

Journalism & Mass Communication Program Journalism Broadcast Journalism

JOUR-4354 (3) TV Reporting

Students learn basic broadcast reporting skills---where to find news and how to cover it, how to analyze and organize news stories. Skills are linked with advanced concepts of shooting and editing videotape in order to produce news stories on deadline. Prereqs., JOUR 3604 and 3644. Prerequisites: Requires pre-requisite courses of JOUR 3604 and 3644. Restricted to students with 57-180 credits (Junior or Senior) Broadcast News (BCNS-BSJR or JBCN-BSJR) majors only.

Journalism & Mass Communication Program Journalism Broadcast Journalism

JOUR-4614 (1-3) Advanced Audio Practices

Applies advanced skills in producing in-depth audio programming for radio stations in Colorado and for weekly discussion-critique sessions. Prereq., JOUR 3614.

Journalism & Mass Communication Program Journalism Broadcast Journalism

JOUR-4624 (4) News Team

Students participate in Newsteam Boulder a program broadcast live over the Boulder cable television system. Prereq., JOUR 4354. Same as JOUR 5624. Prerequisites: Requires pre-requisite course of JOUR 4354. Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Broadcast News (BCNS) majors only.

Journalism & Mass Communication Program Journalism Broadcast Journalism

JOUR-4634 (1-3) Broadcast Projects

Covers interpretation, preparation, and/or reporting in programs for broadcast media. Prepares radio or television documentaries and informational/entertainment programs. Prereqs., JOUR 3604 and 3644, or instructor consent.

Journalism & Mass Communication Program Journalism Broadcast Journalism

JOUR-4674 (1-3) Television Production 3

Provides in-depth experience in directing and producing television programs. Prereq., JOUR 3674. Restricted to Broadcast News or Broadcast Production majors only with a minimum of 85 hours taken. Prerequisites: Restricted to Broadcast News (BCNS-BSJR or JBCN-BSJR) or Broadcast Production (BCPM-BSJR or JBCP-BSJR) majors only with a minimum of 85 hours taken.

JOUR-4272 (3) Principles of Public Relations

Introduces the economics, ethics, history, impact, practice, and social context of the public relations industry in America. Includes an analysis of public relations in agencies, corporations, political campaigns, social service organizations, universities, and other venues. Emphasizes writing for public relations, including fact sheets, press releases, reports, and speeches. Same as JOUR 5272. Restricted to Journalism majors with a minimum of 57 hours taken. Prerequisites: Restricted to Program in Journalism and Mass Communication students with a minimum of 57 hours taken.

[Journalism & Mass Communication Program](#)
[Journalism](#)
[Print & Online Journalism](#)

JOUR-4282 (3) Public Relations Strategy and Campaigns

Develops and applies public relations programs, from identification of the problem through execution of public relations techniques. Prereq., JOUR 4272. Same as JOUR 5282. Prerequisites: Requires a prerequisite course of JOUR 4272.

[Journalism & Mass Communication Program](#)
[Journalism](#)
[Print & Online Journalism](#)

JOUR-4301 (3) Media Ethics

Provides students with an overview of the theories, ethics codes, and analytical models that are used in journalism, public relations, and advertising. Introduces students to a variety of ethical issues that can arise across media professions, as well as the industry practices that can lead to ethical lapses, and teaches students how to challenge those practices. Same as JOUR 5301. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) School of Journalism & Mass Communication majors only.

[Journalism & Mass Communication Program](#)
[Journalism](#)
[Core Curr & General Electives](#)

JOUR-4311 (3) Media Criticism

Introduces the critical perspectives most often employed in qualitative media analysis: semiology, structuralism, Marxism, psychoanalytical criticism, sociological criticism, etc. Texts from contemporary print and broadcast media. JOUR 4311 and 5311 are the same course.

Journalism & Mass Communication Program | Journalism | Core Curr & General Electives

JOUR-4321 (3) Media Institutions and Economics

Focuses on the institutions and practices of the media industries. Surveys the histories, structures, and activities of these organizations and the contemporary issues surrounding them. Same as JOUR 5321. Prerequisites: Restricted to School of Journalism and Mass Communication majors with a minimum of 75 hours taken.

Journalism & Mass Communication Program | Journalism | Core Curr & General Electives

JOUR-4331 (3) Gender, Race, Class, and Sexuality in Popular Culture

Studies the construction, interconnections, and replications of gender, race, class, and sexuality in popular culture and how these constructs become cultural norms and mores. Uses critical methods with a focus on producing responsible viewers and readers. Same as JOUR 5331, WMST 4331. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) School of Journalism & Mass Communication majors only.

Journalism & Mass Communication Program | Journalism | Core Curr & General Electives

JOUR-4341 (3) International Media and Global Crises

Examines strengths and limits on media's role in globalized crises (e.g. financial, climate change, health) in light of changing distribution of global power. Introduction to current crises; context-analytical approach to media technologies, financing and uses; application to national cases. Restricted to JOUR and IAFS juniors/seniors. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) Journalism & Mass Communication (JOUR) or International Affairs (IAFS) majors only.

Journalism & Mass Communication Program | Journalism | Core Curr & General Electives

JOUR-4344 (3) Video Documentary Production

Designed to give students the experience of researching, writing, shooting and editing their own documentaries. Prereq., JOUR 3644. Same as JOUR 5344. Prerequisites: Requires a prerequisite course of JOUR 3644.

Journalism & Mass Communication Program | Journalism | Broadcast Journalism

JOUR-4351 (3) Reporting Wars, Disasters, and Peace

Explores how journalists report international breaking news with a focus on war, disaster and peace and how these news events affect peoples' lives, governmental decisions and news media operations. Prerequisites: Restricted to Program in Journalism and Mass Communication students with a minimum of 73 hours taken.

Journalism & Mass Communication Program | Journalism | Core Curr & General Electives

JOUR-4354 (3) TV Reporting

Students learn basic broadcast reporting skills---where to find news and how to cover it, how to analyze and organize news stories. Skills are linked with advanced concepts of shooting and editing videotape in order to produce news stories on deadline. Prereqs., JOUR 3604 and 3644. Prerequisites: Requires pre-requisite courses of JOUR 3604 and 3644. Restricted to students with 57-180 credits (Junior or Senior) Broadcast News (BCNS-BSJR or JBCN-BSJR) majors only.

Journalism & Mass Communication Program | Journalism | Broadcast Journalism

JOUR-4361 (3) TV and the Family in American Culture and Society

Examines the history and character of two central institutions in American society--the family and television--to gain deeper understanding of their formative and enduring roles. Topics include: intersecting histories of the family and television; economic logic of the TV industry and programming; representations of the family in television programming; how families use and interact with television. Prerequisites: Restricted to Program in Journalism and Mass Communication students with a minimum of 73 hours taken.

Journalism & Mass Communication Program | Journalism | Core Curr. & General Electives

JOUR-4403 (4) Advertising Campaigns

Gives students the opportunity to work in small groups to develop material for an actual client. Students examine basic principles of group dynamics and effective teamwork while conducting research, developing strategies and creating a multimedia campaign. All work is presented to the client. Prereq., JOUR 3463 or 3503. Prerequisites: Requires pre-requisite course of JOUR 3463 or 3503. Restricted to Advertising (ADVT-BSJR or JADV-BSJR) or Marketing (MKTG) majors with a minimum of 85 hours.

Journalism & Mass Communication Program | Journalism | Advertising & Media Design

JOUR-4453 (3) Advertising and Society

Examines criticisms and contributions of advertising in society and the economy. Same as JOUR 5453.

Journalism & Mass Communication Program | Journalism | Advertising & Media Design

JOUR-4502 (3) Reporting 3

Involves writing news and features about actual events for publication under deadline pressure. Lab to be arranged. Prereqs., JOUR 3552 and 4002. Restricted to News Editorial majors and with a minimum of 85 hours taken. Same as JOUR 5502. Prerequisites: Requires pre-requisite courses of JOUR 3552 and 4002. Restricted to News Editorial (NSED-BSJR or JNED-BSJR) majors and with a minimum of 85 hours taken.

Journalism & Mass Communication Program | Journalism | Print & Online Journalism

JOUR-4503 (3) Advanced Creative Concepts

Builds on skills acquired in JOUR 3503 and 4513 to help students enhance their conceptual abilities and generate both print and integrated multimedia campaigns. Students work in teams to develop an extensive body of work that's exhibited in an awards show judged by advertising professionals. Prereqs., JOUR 3503 and 4513 and instructor consent.

Journalism & Mass Communication Program | Journalism | Advertising & Media Design

JOUR-4513 (3) Art Direction

Explores theories of visual communication, the visual imagination, and key principles of design. Develops students ability to express ideas through images and to create both effective visual concepts and layouts for a variety of media. Prereq., JOUR 3453 and instructor consent. Coreq. JOUR 3503.

Journalism & Mass Communication Program | Journalism | Advertising & Media Design

JOUR-4523 (3) Portfolio

Gives students an opportunity to develop an extensive body of work. Students create integrated campaigns, which include print, digital and guerilla ideas. Final portfolios are critiqued by both faculty and outside reviewers. JOUR 4503 and instructor consent.

Journalism & Mass Communication Program | Journalism | Advertising & Media Design

JOUR-4533 (3) Applied Consumer Insights

Provides an opportunity to use and master quantitative and qualitative research methods. Students conduct research and analyze data to determine the targets relationship with specific product categories and identify the emotional and practical needs that motivate purchase. Prereqs., JOUR 3403, 3453. Restricted to Advertising or Marketing majors only with a minimum of 57 hours taken. Prerequisites: Restricted to Advertising (ADVT-BSJR or JADV-BSJR) or Marketing (MKTG) majors only with a minimum of 57 hours taken.

Journalism & Mass Communication Program | Journalism | Advertising & Media Design

JOUR-4543 (3) Strategic Brand Management

Examines the theory of branding: what brands are, how brands are created and measured, as well as strategies for managing brands and brand communication. Prereq., JOUR 3463. Restricted to Advertising or Marketing majors only with a minimum of 57 hours taken. Prerequisites: Restricted to Advertising (ADVT-BSJR or JADV-BSJR) or Marketing (MKTG) majors only with a minimum of 57 hours taken.

Journalism & Mass Communication Program | Journalism | Advertising & Media Design

JOUR-4562 (3) Digital Journalism

Builds upon digital production skills through the creation of multimedia project. Applies media theory to evaluate digital media content and explore how digital forms influence the news industry, politics, culture, and society. Prereq., JOUR 3002. Same as JOUR 5562. Prerequisites: Restricted to School of Journalism and Mass Communication majors with a minimum of 75 hours taken.

Journalism & Mass Communication Program | Journalism | Print & Online Journalism

JOUR-4602 (3) Editorial, Commentary and Opinion Writing

Concentrates on several of the subjective areas of journalism. Emphasizes editorial and column writing, editorial pages and blogging. Prereq., JOUR 3001. Same as JOUR 5602. Prerequisites: Requires a prerequisite course of JOUR 3001.

Journalism & Mass Communication Program Journalism Print & Online Journalism

JOUR-4614 (1-3) Advanced Audio Practices

Applies advanced skills in producing in-depth audio programming for radio stations in Colorado and for weekly discussion-critique sessions. Prereq., JOUR 3614.

Journalism & Mass Communication Program Journalism Broadcast Journalism

JOUR-4624 (4) News Team

Students participate in Newsteam Boulder a program broadcast live over the Boulder cable television system. Prereq., JOUR 4354. Same as JOUR 5624. Prerequisites: Requires pre-requisite course of JOUR 4354. Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Broadcast News (BCNS) majors only.

Journalism & Mass Communication Program Journalism Broadcast Journalism

JOUR-4634 (1-3) Broadcast Projects

Covers interpretation, preparation, and/or reporting in programs for broadcast media. Prepares radio or television documentaries and informational/entertainment programs. Prereqs., JOUR 3604 and 3644, or instructor consent.

Journalism & Mass Communication Program Journalism Broadcast Journalism

JOUR-4651 (3) Media Law

Studies state and federal laws and court decisions that affect the media in order to develop knowledge of media rights and responsibilities and an understanding of the legal system. Prerequisites: Restricted to School of Journalism and Mass Communication majors with a minimum of 75 hours taken.

Journalism & Mass Communication Program Journalism Core Curr & General Electives

|---|------------|----------------------|
| Journalism & Mass Communication Program | Journalism | Broadcast Journalism |
|---|------------|----------------------|

JOUR-5634 (1-3) Broadcast Projects

Prereq., instructor consent. Same as JOUR 4634. Prerequisites: Restricted to Journalism & Mass Communication graduate students only.

Journalism & Mass Communication Program Journalism Broadcast Journalism

JOUR-5651 (3) Mass Communication Law

Studies state and federal laws and court decisions that affect mass communication in order to develop knowledge of mass media rights and responsibilities and an understanding of the legal system.

Journalism & Mass Communication Program Journalism Core Curr & General Electives

JOUR-5684 (3) Advanced Camera and Editing

Emphasizes the advanced techniques in digital video camera usage and digital editing for professional broadcast video production. Prereq., JOUR 3644. Restricted to Broadcast News or Broadcast Production majors only with a minimum of 75 hours taken. JOUR 4684 and 5684 are the same course. Prerequisites: Restricted to Graduate Students only.

Journalism & Mass Communication Program Journalism Broadcast Journalism

JOUR-5702 (3) Arts/Cultural Reporting and Criticism

Prereq., JOUR 5511. Same as JOUR 4702. Prerequisites: Requires a prerequisite course of JOUR 5511.

Journalism & Mass Communication Program Journalism Print & Online Journalism

JOUR-5711 (3) Media and Culture

Same as Jour 4711.

Journalism & Mass Communication Program Journalism Core Curr & General Electives

JOUR-5791 (3) Media and the Public

Same as JOUR 4791.

Journalism & Mass Communication Program Journalism Core Curr & General Electives

JOUR-5802 (3) Magazine and Feature Writing

Prereq., JOUR 5511. Same as JOUR 4802. Prerequisites: Requires a prerequisite course of JOUR 5511.

Journalism & Mass Communication Program | Journalism | Print & Online Journalism

JOUR-5812 (3) Science Writing

Helps students acquire the basic skills and knowledge required of science journalists. Also examines issues of scientific importance such as climate change, the nature of scientific knowledge, and how science is covered in various media. Prerequisites: Restricted to students with 87-180 credits (Seniors) or graduate students only.

Journalism & Mass Communication Program | Journalism | Print & Online Journalism

JOUR-5822 (3) Reporting on the Environment

Same as JOUR 4822.

Journalism & Mass Communication Program | Journalism | Print & Online Journalism

JOUR-5841 (1-3) Graduate Independent Study

Journalism & Mass Communication Program | Journalism | Core Curr & General Electives

JOUR-5851 (1-6) Graduate Professional Project

Journalism & Mass Communication Program | Journalism | Core Curr & General Electives

JOUR-5861 (3) Visual Communication

Visual communication involves understanding both perception of messages and construction of them. Students analyze their visual thinking abilities and develop habits of visual analysis and criticism, as well as visual communication skills. Prerequisites: Restricted to Graduate Students only.

Journalism & Mass Communication Program | Journalism | Core Curr & General Electives

JOUR-5871 (1-3) Special Topics

Prerequisites: Restricted to Journalism & Mass Communication (JOUR) or Communication (COMC) graduate students only.

JOUR-6071 (3) Critical Theories of Media and Culture

Introduction to critical theories and analysis of media and popular culture. Examines major theoretical traditions and/or theorists that significantly inform media studies (e.g., culturalism, structuralism, Marxism, critical theory, feminism, psychoanalysis, post-structuralism) and applies these to media analysis and criticism. Prerequisites: Restricted to Graduate Students only.

Journalism & Mass Communication Program | Journalism | Core Curr & General Electives

JOUR-6201 (3) Global Media and Culture

Covers mass communication within the international system, including similarities and differences in functions, facilities, and content; social theories of the press; and the international flow of mass communication. Prerequisites: Restricted to Graduate Students only.

Journalism & Mass Communication Program | Journalism | Core Curr & General Electives

JOUR-6211 (3) Communication and International Development

Studies and analyzes communications technologies and techniques used in addressing social problems in developing countries.

Journalism & Mass Communication Program | Journalism | Core Curr & General Electives

JOUR-6301 (3) Communication, Media, and Concepts of the Public

Introduces students to historical and contemporary uses of fundamental concepts in research and theory about media institutions, particularly public, community, mass, publicity, public space, public opinion, public interest, and the public sphere.

Journalism & Mass Communication Program | Journalism | Core Curr & General Electives

JOUR-6311 (3) Seminar: Freedom of Expression

Studies free-speech issues in the context of current and historical philosophical foundations for freedom of expression.

Journalism & Mass Communication Program | Journalism | Core Curr & General Electives

JOUR-6321 (3) Literary Journalism

Analyzes the work of journalists who became some of the greatest fiction writers of the 19th and 20th centuries, and examines the increasingly indistinct lines between journalism and narrative fiction. Prerequisites: Restricted to Graduate Students only.

Journalism & Mass Communication Program | Journalism | Core Curr & General Electives

JOUR-6331 (3) Political Communication

Explores the dynamic relationships involving media and politics, focusing primarily on the American political system. Readings and seminar discussion incorporate normative and empirical perspectives on the media-politics complex. Areas covered include media effects on public opinion and policy, uses of media in governance, journalism sociology, coverage of elections, and implications of interactive media for governance and civic participation. Prerequisites: Restricted to Graduate Students only.

Journalism & Mass Communication Program | Journalism | Core Curr & General Electives

JOUR-6341 (3) Children and the Media

Examining the concepts of children and childhood from the historical, social, cultural, economic and political perspectives, this course explores the interaction between mass media and the socialization and cultivation process of children and youth. Many theoretical traditions are used as a framework to study a variety of issues, such as multicultural literature for children and Disney's role in storytelling, and tween movies and the tweens. Prerequisites: Restricted to Graduate Students only.

Journalism & Mass Communication Program | Journalism | Core Curr & General Electives

JOUR-6551 (3) Telecommunication Policy

Surveys historical and contemporary developments in telecommunications policy, emphasizing social and cultural dimensions, and focusing primarily on the context of the United States.

Journalism & Mass Communication Program | Journalism | Core Curr & General Electives

JOUR-6651 (3) Media Law

Graduate seminar in communications law. Studies changing law and applied legal research techniques. Prerequisites: Restricted to Graduate Students only.

Journalism & Mass Communication Program | Journalism | Core Curr & General Electives

JOUR-6661 (3) Media Ethics and Responsibility

Develops a theoretical framework with which to recognize and analyze ethical issues as they arise in the media. Prerequisites: Restricted to Graduate Students only.

Journalism & Mass Communication Program | Journalism | Core Curr & General Electives

JOUR-6671 (3) Media, Myth, and Ritual

Anthropological and interpretative exploration of cultural practices of media audiences. Addresses theoretical and methodological implications of studying audiences from a culturalist perspective, with particular focus on media audience practices. Students engage in field research projects related to course content. Prerequisites: Restricted to Graduate Students only.

Journalism & Mass Communication Program | Journalism | Core Curr & General Electives

JOUR-6711 (3) Mass Media and Pop Culture

Inquiry into relationship of the arts and the mass media, including study of critics, their function, and their works. Prerequisites: Restricted to Graduate Students only.

Journalism & Mass Communication Program | Journalism | Core Curr & General Electives

JOUR-6721 (3) Message Effectiveness

Investigates how mass media messages work in terms of such effects as perception, learning and comprehension, and persuasion. Effectiveness is analyzed in terms of how well mass communication messages meet their objectives.

Journalism & Mass Communication Program | Journalism | Core Curr & General Electives

JOUR-6771 (3) History of Mass Communication

Examines specialized areas in the history of mass communication. Prerequisites: Restricted to Graduate Students only.

Journalism & Mass Communication Program | Journalism | Core Curr & General Electives

JOUR-6781 (3) Economic and Political Aspects of Mass Communication

Discusses economic problems and political issues relevant to newspapers, magazines, broadcasting, and CATV. Examines problems of telecommunications and the impact of future technology on mass communication.

Journalism & Mass Communication Program | Journalism | Core Curr & General Electives

JOUR-6940 (1) Master's Degree Candidate

Journalism & Mass Communication Program | Journalism | Broadcast Journalism

JOUR-6951 (1-6) Master's Thesis

Journalism & Mass Communication Program | Journalism | Core Curr & General Electives

JOUR-7011 (3) Proseminar in Communication Theory 1

Introduces the principal concepts, literature, and theoretical and paradigmatic perspectives of media studies and mass communication and their ties and contributions to parallel domains in the social sciences and humanities. Prerequisites: Restricted to Communication (COMM or COMC) graduate students only.

Journalism & Mass Communication Program | Journalism | Core Curr & General Electives

JOUR-7021 (3) Proseminar in Communication Theory 2

Continuation of JOUR 7011. Prereq., JOUR 7011.

Journalism & Mass Communication Program | Journalism | Core Curr & General Electives

JOUR-7051 (3) Qualitative Research Methods in Mass Communication

Examines various methods of qualitative data gathering and analysis in the mass media context. Prerequisites: Restricted to Graduate Students only.

LAWS-5103 (1) Legal Ethics & Professionalism: What Kind of Lawyer Do You Want to Be?

Explores both the kind of law students might decide to practice and the ethical, personal, and professional commitments central to the practice of law. Students who elect to participate in this 1-unit elective are committing to enroll in the fall of the 2nd year in LAWS 6133 for 2 units, focusing on the Model Rules of Professional Conduct. Prerequisites: Restricted to Law students only.

[Law School](#) [Law](#) [Jurisprudence and Perspective](#)

LAWS-5121 (4) Contracts.

Covers basic principles of contract liability, offer, acceptance and consideration, statute of frauds, contract remedies, the parole evidence rule, performance of contracts, conditions, effect of changed circumstances, third-party beneficiaries, assignment, and specific performance.

[Law School](#) [Law](#) [Business](#)

LAWS-5201 (1) Entrepreneurship, Innovation and Public Policy

Explores cutting edge questions around entrepreneurship, including being an entrepreneur, leadership and what makes a great founding team, building and scaling a business, entrepreneurial communities, financing entrepreneurial companies, leadership in government, entrepreneurship and innovation policy. Restricted to Law students only. Prerequisites: Restricted to Law students only.

[Law School](#) [Law](#) [Business](#)

LAWS-5205 (3) Legislation and Regulation

Introduces lawmaking in the modern administrative state. Examines the way Congress and administrative agencies adopt binding rules of law (statutes and regulations, respectively) and the way

that implementing institutions--courts and administrative agencies--interpret and apply these laws. Considers the structure of the modern administrative state, the incentives that influence the behavior of the various actors, and the legal rules that help to structure the relationships among Congress, the agencies, and the courts. Restricted to LAWS students. Prerequisites: Restricted to Law students only.

Law School | Law | Government and Public

LAWS-5211 (1) Framing and Legal Narrative

Explores the role of framing effects in constructing a legal argument. From an appellate court opinion to closing statement to a jury to a white paper to a regulatory agency to a public campaign for a ballot proposition, the role of an overarching narrative is critical to effective persuasion. Prerequisites: Restricted to Law students only.

Law School | Law

LAWS-5223 (2) Legal Writing II

Students prepare appellate briefs and related documents and deliver oral arguments before a three-judge court composed of faculty, upper-division students, and practicing attorneys. Practice arguments are videotaped and critiqued.

Law School | Law | Litigation and Procedure

LAWS-5226 (2) Legal Writing I

Provides an intensive introduction to the resources available for legal research. Students also prepare written material of various kinds designed to develop research skills, legal writing style, and analysis of legal problems. Prerequisites: Restricted to Law students only.

Law School | Law | Research and Writing

LAWS-5303 (4) Civil Procedure

Studies modern practice in civil suits, including rules governing pleading, joinder of parties, discovery, jurisdiction of courts over the subject matter and parties, right to jury trial, appeals, and res judicata and collateral estoppel, with emphasis on the Federal Rules of Civil Procedure and their Colorado counterpart. Prerequisites: Restricted to Law students only.

Law School | Law | Litigation and Procedure

LAWS-5313 (3) Civil Procedure 2

Studies modern practice in civil suits, including rules governing pleading, joinder of parties, discovery, jurisdiction of courts over the subject matter and parties, right to jury trial, appeals, and res judicata and collateral estoppel, with emphasis on the Federal Rules of Civil Procedure and their Colorado counterpart.

Law School | Law | Litigation and Procedure

LAWS-5323 (1) Courtroom Observation Civil

An elective that requires fifteen hours observing actual civil proceedings in a courtroom(s), attending a two-hour class meeting every other week, preparing and submitting a journal of recorded observations. Figuring out how to gain access to appropriate proceedings is part of the student's work, although the professor is available for advice and guidance. Course is offered for Pass/Fail only. Prerequisites: Restricted to Law students only.

Law School | Law | Jurisprudence and Perspective

LAWS-5425 (3) Torts

Studies nonconsensual allocation of losses for civil wrongs, focusing primarily on concepts of negligence and strict liability. Prerequisites: Restricted to Law students only.

Law School | Law | Government and Public

LAWS-5503 (4) Criminal Law

Studies statutory and common law of crimes and defenses, the procedures by which the law makes judgments as to criminality of conduct, the purposes of criminal law, and the constitutional limits upon it.

Law School | Law | Litigation and Procedure

LAWS-5513 (1) Courtroom Observation Criminal

An elective that requires fifteen hours observing actual criminal proceedings in a courtroom(s), attending a two-hour class meeting every other week, preparing and submitting a journal of recorded observations. Figuring out how to gain access to appropriate proceedings is part of the student's work, although the professor is available for advice and guidance. Course is offered for Pass/Fail only. Prerequisites: Restricted to Law students only.

Law School | Law | Jurisprudence and Perspective

LAWS-5624 (4) Property

Topics include personal property, estates and interests in land, landlord-tenant, basic land conveyancing, and private land use controls. Prerequisites: Restricted to Law students only.

Law School | Law | Property

LAWS-5634 (2-3) Property 2

Topics include personal property, estates and interests in land, landlord-tenant, basic land conveyancing, and private land use controls.

Law School | Law | Property

LAWS-5803 (1) Courtroom Observation International

An elective that requires fifteen hours observing proceedings before an international tribunal(s), attending a two-hour class meeting every other week, preparing and submitting a journal of recorded observations. The proceedings observed will be available streaming online and the professor will provide information about how to gain access to them. Prerequisites: Restricted to Law students only.

Law School | Law | Jurisprudence and Perspective

LAWS-6002 (3) Public Land Law

Deals with the legal status and management of resources on federal lands, including national forests, parks, and BLM lands. Explores federal law, policy, and agency practice affecting the use of mineral, timber, range, water, wildlife, and wilderness resources on public lands. Prereq., LAWS 6112.

Law School | Law | Envir, Nat Resources, Amer Ind

LAWS-6004 (3) Real Estate Transactions

Focuses on legal issues that arise in all phases of real estate transactions, with an emphasis on the role of the lawyer in the business of real estate as well as on the regulation of real estate markets.

Law School | Law | Property

LAWS-6005 (4) Constitutional Law

Studies constitutional structure: judicial review, federalism, separation of powers; and constitutional rights of due process and equal protection.

Law School | Law | Government and Public

LAWS-6007 (4) Income Taxation

Emphasizes the fundamentals of the federal income tax system and examines its impact on the individual. Prerequisites: Restricted to Professional Year 1, 2, or 3 Law students only.

Law School | Law | Taxation

LAWS-6008 (3) The International Legal Order: History & Foundations (1500-1950)

Examines the structural and historical aspects of the international legal system. Examines contemporary attitudes, doctrines, and theories of international law by exploring the fundamental questions since the discipline's inception in the Sixteenth Century. Provides a working familiarity with the origins of Public International Law, International Human Rights Law, International Criminal Law, International Organizations, International Trade Law, Law and Development, and Conflict of Laws. Prerequisites: Restricted to Law students only.

Law School | Law | International

LAWS-6009 (4) Legal Aid Civil Practice 1

Emphasizes procedural and practical remedies and defenses available in civil litigation. Assigns civil cases related to the course material. Develops working knowledge of courtroom skills. Prereq. or coreq., LAWS 6353. Prerequisites: Restricted to Law students only.

Law School | Law | Practice: Clinical & Simulation

LAWS-6011 (3) Payment Systems

Examines the methodology and policies of Articles 3 and 4 of the Uniform Commercial Code, dealing with such topics as negotiable instruments, bank deposits, collections, letters of credit, and electronic fund transfers.

Law School | Law | Business

LAWS-6019 (4) Civil Practice Clinic 2

Emphasizes procedural and practical remedies and defenses available in civil litigation. Assigns civil cases related to the course material. Develops working knowledge of courtroom skills. Prereq. or coreq., LAWS 6353.

Law School | Law | Practice: Clinical & Simulation

LAWS-6021 (3) Secured Transactions

Explores the methodology and policies of Article 9 of the Uniform Commercial Code, dealing with financing transactions in personal property.

Law School | Law | Business

LAWS-5803 (1) Courtroom Observation International

An elective that requires fifteen hours observing proceedings before an international tribunal(s), attending a two-hour class meeting every other week, preparing and submitting a journal of

recorded observations. The proceedings observed will be available streaming online and the professor will provide information about how to gain access to them. Prerequisites: Restricted to Law students only.

Law School | Law | Jurisprudence and Perspective

LAWS-6103 (2-3) Legal Ethics Professionalism

Examines the legal profession as an institution, its history and traditions, and the ethics of the bar with particular emphasis on the professional responsibilities of the lawyer. Discusses the Model Rules of Professional Conduct. Prerequisites: Restricted to Professional Year 1, 2, or 3 Law students only.

Law School | Law | Jurisprudence and Perspective

LAWS-6108 (3) Conflict of Laws

Addresses the conflicts that arise when the significant facts of a case are connected with more than one jurisdiction, whether that jurisdiction belongs to a state, the federal government, or a foreign government. The subject is studied in its theoretical and historical context, with special emphasis on the international aspects of extraterritorial jurisdiction.

Law School | Law | Jurisprudence and Perspective

LAWS-6113 (2) Legal Ethics and Professionalism: Ethics and the Law of Lawyering

Continuation of LAWS 5103. Focuses on the Model Rules of Professional Conduct. Provides the nuts and bolts of the ethical rules needed to begin to explore externships, clinics, pro bono projects and other practice experiences during law school. Prereq., LAWS 5103. Prerequisites: Restricted to Law students only.

Law School | Law | Jurisprudence and Perspective

LAWS-6308 (2) Law and Neuroscience

Covers neuroscience basics, and explores the relationship between the law and recent neuroscientific discoveries in domains including pain, memory, lie detection, psychopathy and criminal responsibility.

Law School | Law | Jurisprudence and Perspective

LAWS-6318 (3) Economic Analysis of Law

Introduces the basic elements of economic theory and emphasizes demand and utility, cost, and optimality. Prerequisites: Restricted to Law students only.

Law School | Law | Jurisprudence and Perspective

LAWS-6328 (3) Financial Decision-Making

Applies concepts, ideas, insights, and principles of modern finance to real-world situations that lawyers will face in many areas of law. Analyzes present discounted value (time value of money), risk versus return, asset diversification, portfolio theory, efficient markets hypothesis, arbitrage, financial options, real options, financial signals, human capital, behavioral finance, socially responsible investing, neurofinance, happiness finance, and financial bubbles and crashes. Restricted to Law students only. Prerequisites: Restricted to Law students only.

Law School Law Jurisprudence and Perspective

LAWS-6338 (1) Understanding the Global Financial Crisis

Explores the causes and consequences of the global financial crisis. Analyzes financial instruments and institutions at the heart of the crisis -- including asset-backed securities, credit derivatives, government-sponsored entities, credit rating agencies, hedge funds, and financial conglomerates -- and places them in the context of a larger "shadow banking system". Examines the building blocks of financial reform.

Law School Law Jurisprudence and Perspective

LAWS-6503 (3) Law and Social Sciences

Explores disparities in criminal sentencing and death penalty cases; quality and effectiveness of legal representation for indigent criminal defendants; relationship between modifications in traditional steps in legal process; connection between alternative tort doctrines and volume of litigation, trial rates, plaintiff success rates and award size; impact of congressional statutes and US Supreme Court decisions on handling and outcomes of habeas corpus petitions.

Law School Law Jurisprudence and Perspective

LAWS-6508 (1) The Philosophy of Law

Questions the nature of law, characteristics and considerations of a legal system, rights and from where they come; thinking like a lawyer, basic techniques of legal reasoning, difference between doctrinal and normative legal analysis. Explores law's frontier and what distinguishes law from morality or politics. Focuses on influential texts from the end of WWII to the end of the Cold War. Prerequisites: Restricted to Law students only.

Law School Law Jurisprudence and Perspective

LAWS-6528 (3) Capital Punishment in America

Surveys the history and current status of capital punishment in the United States, with a critical examination of arguments both for and against the death penalty.

Law School Law Jurisprudence and Perspective

LAWS-6708 (1-3) Special Topics

Explores special topics in law. Prerequisites: Restricted to Law students only.

Law School Law Jurisprudence and Perspective

LAWS-7085 (2) Law and Religion

Uses judicial decisions as well as historical and theoretical materials to explore significant aspects of the relationship between law and religion. The religion clauses of the First Amendment are a central but not exclusive subject of study. Offered in alternate years.

Law School | Law | Jurisprudence and Perspective

LAWS-7128 (2-4) Jurisprudence

Addresses a number of fundamental questions, such as: What is law? What should it be? How is it created? Our readings consist of cutting-edge articles from leading modernist/postmodernist schools of thought including legal formalism, legal realism, interpretive theory, law and economics, feminist jurisprudence, critical legal studies, and law and literature. Same as LAWS 8128.

Law School | Law | Jurisprudence and Perspective

LAWS-8318 (2) Seminar: Law and Economics

Introduces the uses and limitations of microeconomic theory for understanding and resolving legal problems. Emphasizes concepts prominent in the law and economics literature such as cost, transaction costs, utility, and rational self interest.

Law School | Law | Jurisprudence and Perspective

LAWS-8505 (2) Sem Interdisciplinary Perspectives on Law and Social Change

Introduces legal institutions engaged in social change, from courts, to Congress, to bureaucracies and organizations. Posits tension between tasks of dispute resolution and public policy development and institutional adaptations. Considers the role of public opinion and the classics of legal formalism to more critical accounts. Considers postmodern theory and empirical legal scholarship. Presents alternatives to court-centered approaches to change, including community lawyering and organizing, law and social movements, and legislation. Prerequisites: Restricted to Law students only.

Law School | Law | Jurisprudence and Perspective

LAWS-8538 (2) Seminar: Modern Legal Theory Core Ideas

Explores key ideas that have shaped American law and legal thought, such as Holmes' bad man, the Coase Theorem, the "Hunch" theory of law, and others. Focuses on researching and writing many short papers.

Law School | Law | Jurisprudence and Perspective

LAWS-8548 (2) Seminar: Theory of Punishment

Explores the various justifications that philosophers have developed to explain why we have the right to punish. Examines the historical evolution of our punishment system and focuses on the

death penalty as a critical contemporary issue in the debate about the proper role of punishment in our society.

Law School | Law | Jurisprudence and Perspective

LAWS-8608 (2) Seminar: Power, Ethics, and Professionalism

Examines critically the possibility and character of ethical reasoning within the legal profession in light of its institutional structures. Explores descriptive/normative accounts of the profession's structure, "Professionalism," and individual conscience. Put simply, the seminar explores whether it is possible to be a good lawyer and ethical person.

Law School | Law | Jurisprudence and Perspective

LAWS-8728 (2) Seminar: Critical Theory Colloquium

Surveys critical legal theory; introduces the discipline of analytical engagement with law review literature; feminist legal theory, and critical race theory. Offers a deeper understanding of the purposes behind legal reforms, the interaction between law on the books and law in action, how different groups experience the law in different ways, and difficult yet rewarding nature of working through seemingly intractable and emotionally charged race, sex, and class issues. Restricted to Law students only. Prerequisites: Restricted to Law students only.

[LAWS-5121 \(4\) Contracts.](#)

Covers basic principles of contract liability, offer, acceptance and consideration, statute of frauds, contract remedies, the parole evidence rule, performance of contracts, conditions, effect of changed circumstances, third-party beneficiaries, assignment, and specific performance.

[Law School](#) [Law](#) [Business](#)

[LAWS-5201 \(1\) Entrepreneurship, Innovation and Public Policy](#)

Explores cutting edge questions around entrepreneurship, including being an entrepreneur, leadership and what makes a great founding team, building and scaling a business, entrepreneurial communities, financing entrepreneurial companies, leadership in government, entrepreneurship and innovation policy. Restricted to Law students only. Prerequisites: Restricted to Law students only.

[Law School](#) [Law](#) [Business](#)

[LAWS-6011 \(3\) Payment Systems](#)

Examines the methodology and policies of Articles 3 and 4 of the Uniform Commercial Code, dealing with such topics as negotiable instruments, bank deposits, collections, letters of credit, and electronic fund transfers.

[Law School](#) [Law](#) [Business](#)

[LAWS-6021 \(3\) Secured Transactions](#)

Explores the methodology and policies of Article 9 of the Uniform Commercial Code, dealing with financing transactions in personal property.

Law School Law Business

LAWS-6201 (3-4) Agency, Partnership, and the LLC

Surveys agency law whose principles are important in many other areas of law. Studies the legal organizations commonly used by small businesses: partnerships and limited liability companies (LLCs). Prerequisites: Restricted to Professional Year 1, 2, or 3 Law students only.

Law School Law Business

LAWS-6211 (3) Corporations

Covers formation of corporations and their management; relations among shareholders, officers, and directors; the impact of federal legislation on directors' duties; and the special problems of closed corporations. Prerequisites: Restricted to Professional Year 1, 2, or 3 Law students only.

Law School Law Business

LAWS-6221 (3) Principles of Auditing, Compliance, and Risk Management

Introduces the fundamental legal and business rules and processes involved in performing audit, compliance, and risk management. Investigates understanding and measuring risk, establishing standards for aggregating disparate information, gathering market data, calculating risk measures, and creating timely reporting tools for managing risk. Covers important regulations including Sarbanes-Oxley, HIPAA, and FISMA. Prerequisites: Restricted to Law students only.

Law School Law Business

LAWS-6281 (3) Accounting Issues for Lawyers

Studies accounting and auditing problems in the form they are placed before the lawyer, including a succinct study of basic bookkeeping, in-depth legal analysis of the major current problems of financial accounting, and consideration of the conduct of the financial affairs of business.

Law School Law Business

LAWS-6511 (3) Labor Law

Includes the subjects of evolution of labor relations laws; how a collective bargaining relationship is established; negotiation of the collective bargaining agreement; labor and the antitrust laws; and rights of the individual worker. Course materials frame the issue of how a developed or postindustrial democracy deals with the problems that arise out of the employment relationship: of the choices between laissez-faire, substantive regulation, and the private ordering of the employment relationship through the collective bargaining process.

Law School Law Business

LAWS-6521 (3) Employment Law

Entails a survey of employment-at-will, workplace safety, workplace torts; ERISA and retirement, workers' compensation; controls on hours and wages; health insurance; disability and unemployment compensation.

Law School | Law | Business

LAWS-6541 (2) Colorado Worker's Compensation Theory and Practice

Introduces the legal theories that underlie the no-fault compensation system, its historical evolution, policy conundrums, and ethical quandaries. Teaches the application of the procedural rules most frequently utilized in administrative setting. Studies the Workers' Compensation Act, the Workers' Compensation Rules of Procedure, and the Office of Administrative Courts Rules of Procedure. Prerequisites: Restricted to Law students only.

Law School | Law | Business

LAWS-6551 (3) Employee Benefits and Compensation Law

Examines past and present employee benefits and compensation practices among private and public employers. Covers ERISA and defined benefit, defined contribution, and welfare benefit plans; equity awards granted by corporations; equity awards granted by LLCs and partnerships; nonqualified deferred compensation and Section 409A of the IRS; golden parachutes and Sections 280G and 4999 of the IRC. Restricted to Law students only. Prerequisites: Restricted to Law students only.

Law School | Law | Business

LAWS-7011 (3) Creditors' Remedies and Debtors' Protection

Examines typical state rights and procedures for the enforcement of claims and federal and state law limitations providing protection to debtors in the process. Includes prejudgment remedies, statutory and equitable remedies, fraudulent conveyance principles, and exemptions and other judicial protections afforded debtors. Prerequisites: Restricted to Law students only.

Law School | Law | Business

LAWS-7021 (3-4) Bankruptcy

Briefly examines nonbankruptcy business rehabilitation devices, followed by basic principles of federal bankruptcy law and the bankruptcy court system. Concludes with attention to business reorganizations under Chapter 11 of the Bankruptcy Code. Recommended prereq., LAWS 6001 and 7011.

Law School | Law | Business

LAWS-7031 (3) Regulation of Financial Institutions

Focuses on the core banking law and works outward to cover a broader spectrum of bank-like financial institutions. Covers bank licensing, restrictions on bank business, regulating safety and soundness of banks, consumer protection of depositors and other bank customers, and regulatory examination and enforcement. Prerequisites: Restricted to Law students only.

Law School | Law | Business

LAWS-7061 (1) Contract Drafting

Begins with value creation by transactional lawyers, and emphasizes the opportunity for lawyers to reduce information and agency costs, and mitigate strategic behavior by using tools such as disclosure, representation and warranties, incentive compensation and earnouts. Shifts to negotiation and drafting, focusing on basic drafting principles and strategies to advance one's clients' interests. Introduces the basic framework of contracts (recitals, reps, and warranties, capitalized terms, definitions, indemnifications and escrow). Prerequisites: Restricted to Law students only.

Law School | Law | Business

LAWS-7101 (4) Deals: Engineering Financial Transactions

Explores the business lawyer's role in creating value by helping clients identify, assess, and manage business risks through efficient contract design while achieving the optimal legal, tax or regulatory treatment for the deal. Includes case studies of actual transactions.

Law School | Law | Business

LAWS-7111 (3) Contract Theory: Collisions of Contracting and Culture

Explores various contract theories and principles emanating from classical and neoclassical law, legal realism, law and economics, critical legal studies, law and society, relational theory, and others. Considers and critiques these theories as applied to particular contracting cultures, especially as applied to construction contracts.

Law School | Law | Business

LAWS-7121 (3) Advanced Contracts: Commercial Transactions

Studies Article 2 and Article 2A of the Uniform Commercial Code, together with the Convention and the International Sale of Goods. Advanced contracts topics are explored in depth. Among other subjects, warranties, title, remedies, and risk of loss in the sale of lease of goods will be studied.

Law School | Law | Business

LAWS-7201 (3) Antitrust

Studies American competition policy: collaborations among competitors, including agreements on price and boycotts, definition of agreement, monopolization, vertical restraints such as resale price maintenance, and territorial confinement of dealers. Same as TLEN 5270. Offered in alternate years.

Law School | Law | Business

LAWS-7211 (3) Business Planning

Focuses on the development and use of concepts derived from a number of legal areas in the context of business planning and counseling. Topics such as formation of business entities, sale of a business, recapitalization, division, reorganization, and dissolution are considered. Prereqs., LAWS 6007,6201, and 6251 or 6211.

Law School Law Business

LAWS-7221 (2-3) Government Regulation of Business.

Covers themes that explore the nature of the regulatory state and the realities of how businesses react to regulation. Provides an understanding of regulatory institutions; the tools of governmental regulation; and a critical perspective on regulation.

Law School Law Business

LAWS-7261 (3) Corporate Finance

Examines a variety of important legal issues related to the funding and financing corporations including creditor protection laws, the Trust Indenture Act of 1939, fiduciary duties, bond indenture provisions, securities laws, and rights of equity holders. Covers efficient capitalization structures, corporated valuation techniques, capital markets and the efficient market theory, and cost of capital concept. Prereq., LAWS 6211 or 6251.

Law School Law Business

LAWS-7271 (3) Venture Capital and Private Equity

Provides overview of the legal and financial principles to represent privately held companies, their founders and managers, and their investors. Emphasizes transaction structuring rather than judicial opinions. Includes the organization and financing of start-ups, structuring buyout transactions, exit strategies, legal organization of investment funds and other financial intermediaries. Discusses the relevant regulatory landscape, including securities law, bankruptcy, ERISA, and tax law.

Law School Law Business

LAWS-7331 (2) Sports Law

Covers the application of rules from agency, antitrust, contracts, constitutional law (including sex discrimination), labor law, property, torts, unincorporated associations, and other subjects to those persons involved in the production and delivery of athletic competition to consumers. Explores the development of the application of these rules to a sports setting and related economic issues. Prerequisites: Restricted to Law students only.

LAWS-5205 (3) Legislation and Regulation

Introduces lawmaking in the modern administrative state. Examines the way Congress and administrative agencies adopt binding rules of law (statutes and regulations, respectively) and the way that implementing institutions--courts and administrative agencies--interpret and apply these laws. Considers the structure of the modern administrative state, the incentives that influence the behavior of the various actors, and the legal rules that help to structure the relationships among Congress, the agencies, and the courts. Restricted to LAWS students. Prerequisites: Restricted to Law students only.

LAWS-5205 (3) Legislation and Regulation

Introduces lawmaking in the modern administrative state. Examines the way Congress and administrative agencies adopt binding rules of law (statutes and regulations, respectively) and the way that implementing institutions--courts and administrative agencies--interpret and apply these laws. Considers the structure of the modern administrative state, the incentives that influence the behavior of the various actors, and the legal rules that help to structure the relationships among Congress, the agencies, and the courts. Restricted to LAWS students. Prerequisites: Restricted to Law students only.

[Law School](#)
[Law](#)
[Government and Public](#)

LAWS-5425 (3) Torts

Studies nonconsensual allocation of losses for civil wrongs, focusing primarily on concepts of negligence and strict liability. Prerequisites: Restricted to Law students only.

[Law School](#)
[Law](#)
[Government and Public](#)

LAWS-6005 (4) Constitutional Law

Studies constitutional structure: judicial review, federalism, separation of powers; and constitutional rights of due process and equal protection.

[Law School](#)
[Law](#)
[Government and Public](#)

LAWS-6065 (3) Media, Popular Culture, and the Law

Examines how the institutions, practices, and the very identity of the law are in part affected by the media through which law is apprehended and communicated. Hence the general question posed in this course: To what extent and how are the forms and methods of the new media having an effect on the perception, role, and identity of law? Prerequisites: Restricted to Law students

only.

Law School | Law | Government and Public

LAWS-6128 (1-3) Legal Interpretation and the Legislative Process

Examines theories of legislation and the relation between legislatures and courts, emphasizing problems of statutory interpretation and other issues in the judicial use or misuse of statutes.

Prerequisites: Restricted to Law students only.

Law School | Law | Government and Public

LAWS-6205 (3) Lawyers for Social Change

Helps students expand their perspective to understand the ways in which lawyers more broadly participate in social change work in this service learning class. Analyzes case histories of cause lawyering. The service learning component is based on the precept that one of the most effective ways to learn a role is to perform that role. Students will participate as social change lawyers by working with a local community to help it develop projects that the community believes will help it better itself. Prerequisites: Restricted to Law students only.

Law School | Law | Government and Public

LAWS-7015 (3) First Amendment

Examines speech and religion clauses of the First Amendment. Includes the philosophical foundation of free expression, analytical problems in First Amendment jurisprudence, and the relationships between free exercise of religion and the separation of church and state. Prerequisites: Restricted to Law students only.

Law School | Law | Government and Public

LAWS-7025 (3) Civil Rights Legislation

Presents a comprehensive study of federal civil rights statutes briefly reviewed in other courses (e.g., Constitutional Law or Federal Courts). Studies federal civil rights statutes, their judicial application, and their interrelationships as a discretely significant body of law of increasing theoretical interest and practical importance.

Law School | Law | Government and Public

LAWS-7055 (3) Education Law

Considers issues raised by the interaction of law and education. Issues may include the legitimacy of compulsory schooling, alternatives to public schools, socialization and discipline in the schools, and questions of equal educational opportunities.

Law School | Law | Government and Public

LAWS-7205 (3) Administrative Law

Covers practices and procedures of administrative agencies and limitations thereon, including the Federal Administrative Procedure Act, and the relationship between courts and agencies.

Law School | Law | Government and Public

LAWS-7255 (3) Local Government

Studies state legislative and judicial control of the activities, powers, and duties of local governmental units, including home-rule cities and counties, and some problems of federal, state, and local constitutional and statutory limitations on governmental powers when exercised by local governmental units (e.g., the powers to regulate private activities, tax, spend, borrow money, and condemn private property for public uses). Offered in alternate years.

Law School | Law | Government and Public

LAWS-7285 (2-3) Education and the Constitution

Teaches the substantive constitutional law governing public education. Students will teach constitutional materials to high school students in the local Denver Metro area high schools. Interested students must apply and requires a commitment to a full-year curriculum. Encourages individual development as teachers, writers, and critical thinkers and provides an opportunity to grow as colleagues and teammates. Recommended prereq. LAWS 7055. Prerequisites: Restricted to Law students only.

Law School | Law | Government and Public

LAWS-7325 (3) Election Law

Examines the rapidly evolving field of election law: the right to vote, voting procedures, redistricting, candidate selection, campaign finance laws, and direct democracy. Emphasizes federal law, including applicable constitutional jurisprudence.

Law School | Law | Government and Public

LAWS-7475 (2) Advanced Torts

Studies selected tort actions and theories. Topics covered may include "Dignitary torts" (e.g., defamation, privacy, etc.), business torts, and product liability. Offered in alternate years.

Law School | Law | Government and Public

LAWS-7515 (3) Poverty Law

Explores the legal and policy responses to poverty in the United States and addresses how the law shapes the lives of poor people and communities. Examines the extent of poverty in the United States, the root causes, and the historical development of social welfare policy. Focuses on the rights-based aspect of poverty law and various policies that attempt to ameliorate poverty.

Prerequisites: Restricted to Law students only.

Law School | Law | Government and Public

LAWS-7525 (3) Race and American Law

Examines the judiciary's approach to racial discrimination from America's colonial period to the present day. Concludes with an analysis of the contemporary status of racial subordination in the legal system and considers recent scholarly critiques of the law's limitations in effecting racial justice. Employs an interdisciplinary approach and covers the experiences of American Indians, African Americans, Asian Pacific Americans, and Chicana/os.

Law School | Law | Government and Public

LAWS-8005 (2) Seminar: Advanced Constitutional Law Equality and Privacy

Addresses "Equal Protection" rights under the Fourteenth Amendment and "Privacy" rights to personal autonomy. Analyzes varied constitutional grounds for recognizing or rejecting abortion rights; limits on Congressional power to pass civil rights laws granting broader rights than the Fourteenth Amendment does; treatment of sexual orientation-related laws and government actions as "Privacy" versus "Equality" matters; and "Benign"/"remedial" race- and sex-based government decisions such as affirmative action and same-sex schools.

Law School | Law | Government and Public

LAWS-8015 (1-3) Seminar: Constitutional Theory

Examines the role of the courts and the other branches of government in defining and enforcing constitutional values. Relevant readings are from philosophy, social sciences, and legal scholarship, as well as cases. Prerequisites: Restricted to Law students only.

Law School | Law | Government and Public

LAWS-8025 (2) Seminar: Advanced Topics in Federalism

Explores the development of "Our Federalism", the relationship between federal and state governments, from the founding period of the US Supreme Court's recent New Federalism jurisprudence. Studies historical material, commentary, and case law, and addresses how federalism is defined; the values that federalism serves; the role of federalism in our interconnected, global society; the Supreme Court's boundaries of federalism; the direction of New Federalism.

Law School | Law | Government and Public

LAWS-8035 (2) Seminar: Intersection of Antidiscrimination and First Amendment Law

Addresses past and continuing debates involving potential tensions between antidiscrimination principles and free speech, free exercise, and establishment clause values. Examines constitutional protections under the First Amendment and the equal protection clause, together with an array of existing and proposed federal and state antidiscrimination laws regulating employment, housing, and public accommodations, among other areas.

Law School | Law | Government and Public

LAWS-8045 (2) Seminar: Comparative Constitutional Law

Examines legal structures and concepts typically found in constitutions, including judicial review, distinction between legislative and executive authority, federalism and the principle of subsidiarity, the relationship between church and state, free speech and press, and social welfare rights. Examines differences between constitutional law and other domestic law, role of comparative constitutional law in domestic constitutional law adjudication. Emphasizes American and Swedish perspectives.

Law School | Law | Government and Public

LAWS-8055 (1-2) Seminar: Media, Popular Culture, and the Law

Examines how the institutions, practices, and the very identity of law are in part affected by the media through which law is apprehended and communicated. Hence the general question posed in this seminar: To what extent and how are the forms and methods of the new media having an effect on the perception, role, and identity of law? This is a year-long seminar.

Law School | Law | Government and Public

LAWS-8095 (2) Seminar: Problems in Constitutional Law

Explores how theories of social freedom and self-governance developed in the United States. Analyzes the most controversial socio-legal issues as they relate to privacy, equal protection and other questions of substantive due process. Discusses recent trends in national security and information privacy to evaluate their overall relevance to civil liberties and nascent influence on the fundamental rights debate in the US and abroad.

Law School | Law | Government and Public

LAWS-8205 (3) Seminar: Law and Democratic Governance

Explores cutting-edge debates in election law. Studies different perspectives on the current controversies in the field, in addition to select opportunities to engage scholars directly about their work. Develops students' understanding of the law of democracy, exposing students to some of the best scholarship, and improving students' ability to evaluate and critique legal scholarship. Recommended prereq., LAWS 7325. Same as PSI 7171. Prerequisites: Restricted to Law students only.

Law School | Law | Government and Public

LAWS-8285 (2-3) Seminar: Education and the Constitution

Teaches the substantive constitutional law governing public education. Students will teach constitutional materials to high school students in the local Denver Metro area high schools. Interested students must apply, and requires a commitment to a full-year curriculum. Encourages individual development as teachers, writers, and critical thinkers, and provides an opportunity to grow as colleagues and teammates. Requires extra time outside of class. Recommended prereq., LAWS 7055. Prerequisites: Restricted to Law students only.

LAWS-5223 (2) Legal Writing II

Students prepare appellate briefs and related documents and deliver oral arguments before a three-judge court composed of faculty, upper-division students, and practicing attorneys. Practice arguments are videotaped and critiqued.

[Law School](#) [Law](#) [Litigation and Procedure](#)

LAWS-5303 (4) Civil Procedure

Studies modern practice in civil suits, including rules governing pleading, joinder of parties, discovery, jurisdiction of courts over the subject matter and parties, right to jury trial, appeals, and res judicata and collateral estoppel, with emphasis on the Federal Rules of Civil Procedure and their Colorado counterpart. Prerequisites: Restricted to Law students only.

[Law School](#) [Law](#) [Litigation and Procedure](#)

LAWS-5313 (3) Civil Procedure 2

Studies modern practice in civil suits, including rules governing pleading, joinder of parties, discovery, jurisdiction of courts over the subject matter and parties, right to jury trial, appeals, and res judicata and collateral estoppel, with emphasis on the Federal Rules of Civil Procedure and their Colorado counterpart.

[Law School](#) [Law](#) [Litigation and Procedure](#)

LAWS-5503 (4) Criminal Law

Studies statutory and common law of crimes and defenses, the procedures by which the law makes judgments as to criminality of conduct, the purposes of criminal law, and the constitutional

limits upon it.

Law School Law Litigation and Procedure

LAWS-6035 (3) White Collar Crime

Examines distinctions between white collar crime and other types of criminal activity and the needs for and arguments against white collar laws and law enforcement. Studies securities fraud, mail and wire fraud, insider trading, money laundering, false statements, conspiracy and criminal forfeiture statutes. Includes use of the grand jury, privileges applicable in the corporate setting, immunity, discovery and the impact of parallel civil proceedings. Examines effect of government policy on corporations and their counsel, pre-trial and trial strategy, jury selection, and victim notification and restitution options. Prerequisites: Restricted to Law students only.

Law School Law Litigation and Procedure

LAWS-6045 (3) Criminal Procedure

Focuses primarily on the constitutional limitations applicable to such police investigative techniques as arrest, search, seizure, electronic surveillance, interrogation, and lineup identification. Prerequisites: Restricted to Law students only.

Law School Law Litigation and Procedure

LAWS-6055 (3) Post-Conviction Criminal Procedure

Addresses sentencing process and schemes, direct appeals, probation modification and revocation, parole revocation, pardon and commutation processes, post-conviction litigation and appeal in both state and federal court, federal review of state convictions through habeas and/or the AEDPA, and ethical issues that arise in post-conviction proceedings. Prerequisites: Restricted to Law students only.

Law School Law Litigation and Procedure

LAWS-6213 (2) Advanced Appellate Advocacy

Advanced study and practice of written and oral appellate advocacy. Builds on the foundation established in the required first-year course in appellate advocacy, but provides more extensive coverage, practice, and evaluation. Personalized instruction in brief writing, including detailed, one-on-one critique of their work. Include advanced techniques for organizing and writing a brief, and advanced instruction on the strategy and process of oral argument. Required to research, write, and rewrite an appellate brief, and conduct several oral arguments. Attend oral arguments of the United States Court of Appeals for the Tenth Circuit and the Colorado Court of Appeals. Prereq., LAWS 7106. Prerequisites: Restricted to Law students only.

Law School Law Litigation and Procedure

LAWS-6353 (3) Evidence

Studies the methods and forms of proof in litigation, including detailed consideration of hearsay, impeachment of witnesses, relevancy and certain restrictions on authentication and best evidence doctrines, and privileges. Prerequisites: Restricted to Law students only.

Law School Law Litigation and Procedure

LAWS-6373 (3) Federal Litigation: Everything but the Trial

Litigates through all pretrial phases as plaintiff's counsel, a mock federal case: an employee's challenge to compensation and termination, with possible claims including breach of contract, breach of the implied covenant of good faith and fair dealing, violation of wage payment statutory and regulatory requirements, and fraudulent inducement to contract. Prereq., LAWS 6353. Restricted to Law students only. Prerequisites: Restricted to Law students only.

Law School | Law | Litigation and Procedure

LAWS-6803 (3) Quantitative Methods

Equips students to deal effectively with experts, whether as consultants or as adverse witnesses, and to enable the identification of a quantitative issue. Helps students to become multi-dimensional in quantitative literacy. Enables students to be comfortable reading statistical arguments, performing basic analyses, writing about statistics, expressing quantitative ideas in graphs, questioning an expert, and understanding the power of computer programming.

Law School | Law | Litigation and Procedure

LAWS-7003 (3) Federal Courts

Looks at structure and jurisdiction of the federal courts, emphasizing problems of federalism and separation of powers and their relationship to resolution of substantive disputes.

Law School | Law | Litigation and Procedure

LAWS-7013 (2) Supreme Court Decision Making

Students deliberate over several important cases as "Justices" of the Supreme Court. Class is divided into three "Courts" with the first hour spent in deliberation and the second hour in discussion of the deliberative process as well as the substantive issues.

Law School | Law | Litigation and Procedure

LAWS-7023 (2) Jury Selection and History

Studies the history of the jury from ancient times through the implications of *Aprendi*, the grand jury from the time of Henry II through modern federal practice, and current jury selection procedures, both federal and Colorado, both civil and criminal. Experienced trial attorneys will work with students to demonstrate jury selection.

Law School | Law | Litigation and Procedure

LAWS-7045 (3) Criminal Procedure: Adjudicative Process

Focuses primarily on criminal procedure at and after trial. Looks at bail, prosecutorial discretion, discovery, plea bargaining, speedy trial, jury trial, the right to counsel at trial, double jeopardy, appeal, and federal habeas corpus.

| | | |
|------------|-----|--------------------------|
| Law School | Law | Litigation and Procedure |
|------------|-----|--------------------------|

LAWS-7303 (3) Complex Civil Litigation

Covers civil procedure in modern complex multiparty suits, including class actions in such settings as employment discrimination and mass torts, and problems in discovery, joinder, res judicata, collateral estoppel, and judicial management in such suits. Offered in alternate years.

| | | |
|------------|-----|--------------------------|
| Law School | Law | Litigation and Procedure |
|------------|-----|--------------------------|

LAWS-7333 (2) Advanced Evidence: Forensic Science and the Criminal Courts

Explores the admissibility of forensic science opinion and expert testimony, its use as evidence at a trial, and the challenges that such evidence may pose for the courts and the entire criminal justice system in the future.

| | | |
|------------|-----|--------------------------|
| Law School | Law | Litigation and Procedure |
|------------|-----|--------------------------|

LAWS-7345 (2) Comparative Criminal Procedure

Takes an in-depth look at some of the basic features of modern criminal justice systems that share the civil law tradition with the hope that such study will provide a vehicle for a deeper understanding of the strengths and weaknesses of the American system of criminal justice. Prereq., LAWS 6045.

| | | |
|------------|-----|--------------------------|
| Law School | Law | Litigation and Procedure |
|------------|-----|--------------------------|

LAWS-8335 (2) Seminar: Advanced Criminal Procedure

Focuses on a particular topic in criminal procedure. Topics include the privilege against self-incrimination, juries, and defense and prosecution ethics.

| | | |
|------------|-----|--------------------------|
| Law School | Law | Litigation and Procedure |
|------------|-----|--------------------------|

LAWS-8409 (2) Seminar Special Problems in Conflict Resolution and Management

Develops a comprehensive description of dispute; creates a conflict assessment of the stakeholders in and dynamics of dispute; assess obstacles to and opportunities for mediation; recommend strategy for addressing and managing the dispute. Prerequisites: Restricted to Law students only.

| | | |
|------------|-----|--------------------------|
| Law School | Law | Litigation and Procedure |
|------------|-----|--------------------------|

LAWS-8533 (2) Seminar: Criminal Law in Context: Legal and Social Images of Victims and Perpetrators

Contextualizes criminal law by engaging in an in depth study of the legal and social characterizations of victims and perpetrators in U.S. law, politics, and popular culture. Prerequisites: Restricted to Law students only.

LAWS-5226 (2) Legal Writing I

Provides an intensive introduction to the resources available for legal research. Students also prepare written material of various kinds designed to develop research skills, legal writing style, and analysis of legal problems. Prerequisites: Restricted to Law students only.

[Law School](#) [Law](#) [Research and Writing](#)

LAWS-6206 (3) Litigation Drafting

Examines the intersection of civil procedure and legal writing. Emphasizes the drafting of persuasive adversarial litigation documents, including complaints, answers, motions in limine, motions to dismiss, motions of summary judgment, and jury instructions. Intensive writing and workshop format.

[Law School](#) [Law](#) [Research and Writing](#)

LAWS-6226 (2-3) Advanced Legal Research and Writing

Focuses on improvement of legal writing skills including organizing, drafting, and revising legal writing. Improves research and analysis skills. Prerequisites: Restricted to Law students only.

[Law School](#) [Law](#) [Research and Writing](#)

LAWS-6236 (2) Judicial Opinion Writing

Places contemporary American judicial opinion in historical and comparative context. Analyzes individual and institutional writing choices that authors of judicial opinions must make and ethical dilemmas they must confront. Builds upon the first-year legal-writing curriculum. Challenges students to develop and defend their own opinion-writing approaches and styles as well as to write from approaches and in styles that are not their own.

Law School Law Research and Writing

LAWS-6458 (2) Creative Writing for Lawyers

Requires substantial writing and reading. Begins with participants bringing to class a piece of creative writing consisting of three to five thousand words. Each session consists of one hour of discussion and critique of an assigned writing exercise that everyone has prepared for the class, and one hour of workshop critique of each participant's longer work, in turn.

Law School Law Research and Writing

LAWS-6856 (2) Advanced Legal Research

Offers an in-depth look at research resources and methods. Includes sources from the judicial, legislative, and executive branches of federal and state government; research in topical areas such as environmental law, taxation, and international law; and extensive coverage of secondary and nonlaw resources. Covers both print and electronic sources. Students will have several assignments and a final project.

Law School Law Research and Writing

LAWS-6866 (1) Colorado Legal Research

Surveys resources and methods to effectively research Colorado law. Covers primary and secondary resources including Colorado statutes, cases and digests, regulations, and constitution and practice materials. Covers how to research Colorado municipal law and other Colorado topics. Prerequisites: Restricted to Law students only.

Law School Law Research and Writing

LAWS-6876 (2) Legal Research Skills for Practice

Approaches legal research from a practice-focused perspective using hands-on sessions in the library. Instructs: how to find and use resources specific to a particular practice area; how to evaluate and weigh strengths and weaknesses of the various legal resources available; and, how to use legal resources efficiently. Includes research strategies and methods, primary and secondary resources, and research using library catalogs and Westlaw, Lexis, and other vendors. Prerequisites: Restricted to Law students only.

Law School Law Research and Writing

LAWS-6886 (3) Advanced Legal Research and Analysis

Develops students' ability to think critically about and solve current legal problems. Evaluates the benefits and detriments of both print and on-line legal resources, and how to create an efficient research plan. Formulates and applies research strategies to real-world legal problems, and uses legal analysis to refine and improve research results. Note: students who have taken LAWS 6856 Advanced Legal Research course may not enroll in this course. Prerequisites: Restricted to Law students only.

Law School Law Research and Writing

LAWS-6896 (3) Advanced Legal Research and Writing for Practice

Advances and improves legal research and writing skills learned in first year. Proposes variety of assignment types across substantive and procedural areas to prepare for experiences as summer associates or new attorneys. Prerequisites: Restricted to Law students only.

Law School Law Research and Writing

LAWS-7846 (1-3) Independent Legal Research

Involves independent study and preparation of a research paper under faculty supervision. Students produce a research paper equivalent to a seminar research paper. a draft is submitted, subjected to critique by the faculty member, and redrafted. Available during or after the fifth semester of law school. Prereq., instructor consent. Prerequisites: Restricted to Law students only.

Law School Law Research and Writing

LAWS-7896 (1) Independent Legal Research: Law Review

Gives students the opportunity to participate in the research, writing, and editing activities involved in publishing the University of Colorado Law Review. Prerequisites: Restricted to Law students only.

Law School Law Research and Writing

LAWS-7906 (2) Independent Legal Research: Law Review

Gives students the opportunity to participate in the research, writing, and editing activities involved in publishing the University of Colorado Law Review. Prerequisites: Restricted to Law students only.

Law School Law Research and Writing

LAWS-7916 (1) Independent Legal Research: Journal of International Environmental Law and Policy

Gives students the opportunity to participate in the research, writing, and editing activities involved in publishing the Colorado Journal of International Environmental Law and Policy. Prerequisites: Restricted to Law students only.

Law School Law Research and Writing

LAWS-7926 (2) Independent Legal Research: Journal of International Environmental Law and Policy

Gives students the opportunity to participate in the research, writing, and editing activities involved in publishing the Colorado Journal of International Environmental Law and Policy. Prerequisites: Restricted to Law students only.

Law School Law Research and Writing

LAWS-7936 (1) Independent Legal Research: Journal of Telecommunications and High Technology

Gives students the opportunity to participate in the research, writing, and editing activities involved in publishing the Journal of Telecommunications and High Technology Law. Prerequisites: Restricted to Law students only.

Law School | Law | Research and Writing

LAWS-7946 (2) Independent Legal Research: Journal of Telecommunications and High Technology

Gives students the opportunity to participate in the research, writing, and editing activities involved in publishing the Journal of Telecommunications and High Technology Law. Prerequisites: Restricted to Law students only.

Law School | Law | Research and Writing

LAWS-8458 (2) Seminar: Law and Literature

Focuses on the question of what literature can teach lawyers through a variety of literary works and films. Covers traditional works by Shakespeare, Tolstoy, Camus, Kafka, and Melville, as well as more contemporary works by Toni Morrison and Norman Mailer. Several short reflection papers, a journal, and a final paper will be required.

Law School | Law | Research and Writing

LAWS-9846 (1-2) LLM Seminar

LLM students study academic legal writing in this 1-credit per semester yearlong course. Topics covered will include: the purpose of academic legal writing; how academic legal writing differs from other forms of legal writing; topic selection; legal research (methods and ethics); first drafts; editing; academic workshops; and publishing. In addition, guest speakers will talk to LLM students about career planning and job seeking. International LLM students will learn about the American legal system. Restricted to Law students only. Prerequisites: Restricted to Law students only.

Law School | Law | Research and Writing

LAWS-9856 (1-4) LL.M Thesis

LL.M students are required to write a thesis in order to graduate. Requires significant work of original research on a topic chosen in close consultation with advisors and other law school faculty, and assignments include due dates for topic selection, drafts, and workshop delivery. Thesis is worth two credits. In exceptional circumstances and only after pre-approval, an LL.M student may enroll for a third or fourth credit. Prerequisites: Restricted to Law students only.

Law School | Law | Research and Writing

LAWS-5211 (1) Framing and Legal Narrative

Explores the role of framing effects in constructing a legal argument. From an appellate court opinion to closing statement to a jury to a white paper to a regulatory agency to a public campaign for a ballot proposition, the role of an overarching narrative is critical to effective persuasion. Prerequisites: Restricted to Law students only.

[Law](#)
[Property](#)

LAWS-6004 (3) Real Estate Transactions

Focuses on legal issues that arise in all phases of real estate transactions, with an emphasis on the role of the lawyer in the business of real estate as well as on the regulation of real estate markets.

[Law School](#)
[Law](#)
[Property](#)

LAWS-6104 (3) Wills and Trusts

Covers intestate succession; family protection; execution of wills; revocation and revival; will contracts and will substitutes; creation of trusts; modification and termination; charitable trusts; fiduciary administration, including probate and contest of wills; and construction problems in estate distribution. Prerequisites: Restricted to Professional Year 1, 2, or 3 Law students only.

[Law School](#)
[Law](#)
[Property](#)

Law School | Law | Property

LAWS-6114 (2) Construction Law

Focuses on the basic principles and practices of construction law. Provides an overview of construction industry participants and players (engineers, contractors, insurers, etc.) and discusses and analyzes the various obligations and liabilities of these parties. Covers construction and design contracting, construction claims, professional negligence, construction insurance and suretyship, and ADR in construction. Provides transactional-practice oriented exercises.

Law School | Law | Property

LAWS-7024 (2-3) Real Estate Planning

Considers various contemporary legal problems involved in the ownership, use, development, and operation of real estate. Emphasizes the income tax and financing aspects of commercial and residential use and development such as shopping plazas and apartment buildings. Same as ACCT 6730.

Law School | Law | Property

LAWS-7154 (3) Land Use Planning

Explores mechanisms for public control of private land uses, such as planning, zoning, and regulation of land development; including consideration of federal and state constitutional and statutory limitations on local governments. Offered in alternate years.

Law School | Law | Property

LAWS-7164 (2) Land Conservation Law

Focuses on private land conservation efforts in the United States, and particularly Colorado, and also considers public land conservation programs. Analyzes real property principles and instruments used to protect land, and the development and acceptance of conservation easements in gross as a mechanism for protection, financing mechanisms for land conservation, including direct government funding and indirect funding through tax incentives at the federal, state and local levels. Understanding of Real Property and Tax concepts helpful.

Law School | Law | Property

LAWS-8104 (2) Seminar: Cities, Suburbs, and the Law

Explores dynamics that play out in the relationship between cities, suburbs, exurbs and other patterns of urban development. Explores the nature of local power, relations between local jurisdictions, and metropolitan and regional approaches to governance. Includes fiscal disparities, ethnic and racial segregation, sprawl and growth controls, affordable housing, transportation, and the urban/rural divide.

Law School | Law | Property

LAWS-9104 (3) Wills and Trusts

Covers intestate succession; family protection; execution of wills; revocation and revival; will contracts and will substitutes; creation of trusts; modification and termination; charitable trusts; fiduciary administration, including probate and contest of wills; construction problems in estate distribution. Restricted to Law students only. Prerequisites: Restricted to Law students only.

LAWS-6002 (3) Public Land Law

Deals with the legal status and management of resources on federal lands, including national forests, parks, and BLM lands. Explores federal law, policy, and agency practice affecting the use of mineral, timber, range, water, wildlife, and wilderness resources on public lands. Prereq., LAWS 6112.

[Law School](#) | [Law](#) | [Envir, Nat Resources, Amer Ind](#)

LAWS-6112 (3) Foundations of American Natural Resources Law

Introduces students to the law of natural resources. Examines the legal, historical, political, and intellectual influences that shape resources development and conservation. Same as ENVS 6112. Prerequisites: Restricted to Professional Year 1, 2, or 3 Law students only.

[Law School](#) | [Law](#) | [Envir, Nat Resources, Amer Ind](#)

LAWS-6302 (3) Water Resources

Analyzes regional and national water problems, including the legal methods by which surface and ground water supplies are allocated, managed, and protected. Prerequisites: Restricted to Law students only.

[Law School](#) | [Law](#) | [Envir, Nat Resources, Amer Ind](#)

LAWS-6502 (2) Wildlife and the Law

Examines the law that protects wildlife, its habitat, and biodiversity. Explores human-caused threats including habitat destruction, illegal trade, and climate change. Focuses on statutes, case law, environmental ethics, and current controversies to highlight legal, scientific, and political strategies for protecting biodiversity. Particular emphasis is placed on the U.S. Endangered Species Act.

Law School | Law | Envir, Nat Resources, Amer Ind

LAWS-6602 (3) Cultural Property Law

Concerns domestic and International regulation of property that expresses group identity and experience. Organized around traditional categories of property (real, personal, and intellectual), the course covers historic preservation, archeological resources, art and museum law, with attention to indigenous people's advocacy on burial sites, traditional lands, ceremonies, music, symbols, ethnobotany, genetic information, and language. May satisfy upper-level writing requirement. Prerequisites: Restricted to Law students only.

Law School | Law | Envir, Nat Resources, Amer Ind

LAWS-6712 (3) Climate Change Law and Policy

Examines the science of climate change and the broader role of science in public policymaking. Reviews the changing legal landscape to abate greenhouse gas emissions, and key issues in policy design. Reviews the Supreme Court's April 2, 2007, decision in Massachusetts v. EPA, overturning EPA's refusal to regulate greenhouse gas pollution from motor vehicle tailpipes, and the aftermath in the courts, Executive Branch and Congress.

Law School | Law | Envir, Nat Resources, Amer Ind

LAWS-6722 (3) Energy Law and Regulation

Provides an introduction to energy law and regulation in the United States. Covers basic principles of rate regulation and public utilities, the division of jurisdiction between federal and state governments, and the key federal statutes and regulatory regimes governing natural gas, electricity, and nuclear power. Focuses on the basic federal frameworks for natural gas and electricity regulation, with an emphasis on understanding the messy and uneven transition to wholesale competition in these sectors and, in the electricity context, the experience with state restructuring and retail competition. Prerequisites: Restricted to Law students only.

Law School | Law | Envir, Nat Resources, Amer Ind

LAWS-6732 (3) Renewable Energy Project Finance and Development

Examines renewable energy and how legal topics impact financing projects. Reviews structure, regulation, and functioning of electric energy industry and laws applicable to development, ownership and operation of renewable energy projects across technologies. Addresses legal policy, economic and financing issues associated with expansion and improvement of the transmission grid to support renewable energy development. Prerequisites: Restricted to Law students only.

Law School | Law | Envir, Nat Resources, Amer Ind

LAWS-7102 (2-3) Oil and Gas

Deals with the legal problems associated with private arrangements for the ownership and development of oil and gas: deeds and leases to oil and gas rights, trespass, adverse possession, implied covenants in leases, conveyances of fractional interests, and the interaction of private rights and conservation regulation. Prerequisites: Restricted to Law students only.

Law School | Law | Envir, Nat Resources, Amer Ind

LAWS-7122 (2-3) Mining and Energy Law

Addresses major issues affecting the development of mineral resources through mining activity. Includes the regulation of the impacts of mining on the environment on both public and private land. Covers the Mining Law of 1872, the Federal Coal Leasing Amendments, and state regulation of the impacts of mining on the environment.

Law School | Law | Envir, Nat Resources, Amer Ind

LAWS-7132 (3) Energy, Insecurity, Sustainable Law

Examines why national security deals not only with armed aggression and the ability to thwart military invasions or subversion, but also includes critical threats to vital national and international support systems such as the economy, energy, and the environment.

Law School | Law | Envir, Nat Resources, Amer Ind

LAWS-7202 (3) Environmental Law

Examines and analyzes important federal pollution control statutes, including the National Environmental Policy Act, the Clean Air Act and Clean Water Act, Solid Waste Act, and Superfund. Considers related economic theory, ethics, and policy issues.

Law School | Law | Envir, Nat Resources, Amer Ind

LAWS-7212 (2) Environmental Litigation

Examines the litigation strategies and procedures used to enforce and defend against enforcement under environmental protection statutes, such as the Clean Water Act, Clean Air Act, Resource Conservation and Recovery Act, the Comprehensive Environmental Response, Compensation and Liability Act of 1980, and the Toxic Substances Control Act. Covers civil enforcement, and citizen's suits.

Law School | Law | Envir, Nat Resources, Amer Ind

LAWS-7222 (2-3) Environmental Decision-Making

Explores the foundational issues that underlie agency decision-making, including environmental ethics, cost-benefit analysis, risk assessment, constitutional law, and administrative law. Compares and contrasts National Environmental Policy Act and the National Historic Preservation Act and the Endangered Species Act.

Law School | Law | Envir, Nat Resources, Amer Ind

LAWS-7232 (3) Energy Justice

Establishes why nearly a third of the world populated by the energy oppressed poor, presents a major national and international "legislative" or socio political problem calling for answers from

governments and civil societies in the developed and developing world. Explains and elucidates the concept of energy justice, its jurisprudential heritage, and its meaning and relevance in contemporary society. Case studies present problem solving frameworks spanning the political, social, behavioral, engineering, natural sciences, and law. Prerequisites: Restricted to Law students only.

Law School Law Envir, Nat Resources, Amer Ind

LAWS-7402 (2) The Law of Toxic and Hazardous Wastes

Examines the EPA's federal hazardous waste statutes, including the Resource Conservation and Recovery Act of 1976 (RCRA), and the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA). Analyzes the RCRA "Cradle-to-grave" hazardous waste program, and addresses the evolving CERCLA liability scheme and cleanup process.

Law School Law Envir, Nat Resources, Amer Ind

LAWS-7725 (3) American Indian Law I

Investigates the federal statutory, decisional, and constitutional law that bears upon American Indians, tribal governments, and Indian reservation transactions. Prerequisites: Restricted to Law students only.

Law School Law Envir, Nat Resources, Amer Ind

LAWS-7735 (3) American Indian Law II

Investigates the legal history and current legal status of Alaska Natives and Native Hawaiians. Addresses other current topics such as tribal water rights, tribal fishing and hunting rights, tribal justice systems, religious freedom, and tribal natural resource and environmental management. Prereq., LAWS 7725.

Law School Law Envir, Nat Resources, Amer Ind

LAWS-7745 (2-3) Jurisdiction in Indian Country

Examines the current state of the justice system within Indian nations today. Includes understanding the respective roles of tribal and state law enforcement authorities, as well as the Bureau of Indian Affairs' Office of Justice Services, the Federal Bureau of Investigation, and the Drug Enforcement Administration. Examines relationship between federal and tribal courts; substantive laws; and advocates who appear before them. Prerequisites: Restricted to Law students only.

Law School Law Envir, Nat Resources, Amer Ind

LAWS-8112 (2-3) Seminar: Advanced Natural Resources Law

Provides in-depth study and analysis of current problems in natural resources law, using historical, literary, and scientific materials. Includes field-trip, and requires additional field trip expenses. LAWS 6112 is strongly recommended as a prerequisite, however students must have taken or be concurrently enrolled in any three of the following: LAWS 6002, 6112, 6302 or 7725. May be repeated up to 6 total credit hours.

Law School Law Envir, Nat Resources, Amer Ind

LAWS-8725 (2) Seminar: Advanced Topics in American Indian Law

Examines a variety of current issues related to American Indian Law. The topics will change to reflect the subjects that emerge at each time that the seminar is offered. Some examples of topics considered in this seminar include legal protections for American Indian religion and culture, cultural property, Tribal law, gaming law, and Native American natural and cultural resources law. Coreq., LAWS 7725.

Law School | Law | Envir, Nat Resources, Amer Ind

LAWS-9002 (3) Public Land Law

Deals with the legal status and management of resources on federal lands, including national forests, parks, and BLM lands. Explores federal law, policy, and agency practice affecting the use of mineral, timber, range, water, wildlife, and wilderness resources on public lands. Restricted to Law students only. Prereq., LAWS 6112. Prerequisites: Restricted to Law students only.

Law School | Law | Envir, Nat Resources, Amer Ind

LAWS-9112 (2-3) Advanced Natural Resources Law

Provides in-depth study and analysis of current problems in natural resources law, using historical, literary, and scientific materials. Includes field-trip and requires additional field trip expenses. May be repeated up to 5 total credit hours. Restricted to Law students only. Recommended prereq., LAWS 6112 or students must have taken or be currently enrolled in any three of the following: LAWS 6002, 6112, 6302 or 7725. Prerequisites: Restricted to Law students only.

Law School | Law | Envir, Nat Resources, Amer Ind

LAWS-9712 (3) Climate Change Law and Policy

Examines the science of climate change and the broader role of science in public policymaking. Reviews the changing legal landscape to abate greenhouse gas emissions, and key issues in policy design. Reviews the Supreme Court's April 2, 2007 decision in *Massachusetts v. EPA*, overturning EPA's refusal to regulate greenhouse gas pollution from motor vehicle tailpipes, and the aftermath in the courts, Executive Branch and Congress. Restricted to Law students only. Prerequisites: Restricted to Law students only.

Law School | Law | Envir, Nat Resources, Amer Ind

LAWS-9722 (3) Energy Law and Regulation

Provides an introduction to energy law and regulation in the United States. Covers basic principles of rate regulation and public utilities, the division of jurisdiction between federal and state governments, and the key federal statutes and regulatory regimes governing natural gas, electricity, and nuclear power. Focuses on the basic federal frameworks for natural gas and electricity regulation, with an emphasis on understanding the messy and uneven transition to wholesale competition in these sectors and, in the electricity context, the experience with state restructuring and retail completion. Restricted to Law students only. Prerequisites: Restricted to Law students only.

LAWS-6007 (4) Income Taxation

Emphasizes the fundamentals of the federal income tax system and examines its impact on the individual. Prerequisites: Restricted to Professional Year 1, 2, or 3 Law students only.

[Law School](#)
[Law](#)
[Taxation](#)

LAWS-6138 (2-3) Federal Tax Politics

Studies the tax system as the nexus of politics and economics. Examines how various interests and entities use the many tools of political power to shape the tax system. Intended for those interested in politics and legislation, rather than for the tax specialist.

[Law School](#)
[Law](#)
[Taxation](#)

LAWS-6157 (3) Corporate Taxation

Studies federal income taxation related to taxable corporations, the entities through which a large part of the economic activity in the U.S. is conducted. Includes creation, operation, distributions, sale of interests, and liquidation. Prerequisites: Restricted to Law students only.

[Law School](#)
[Law](#)
[Taxation](#)

LAWS-6167 (3) Partnership Taxation

Studies federal income taxation of pass-through entities such as are used by most small businesses in the U.S. Includes creation, operation, distributions, sale of interests, and liquidation. Prereq., LAWS 6007.

[Law School](#) [Law](#) [Taxation](#)

LAWS-7207 (3) Federal Estate and Gift Tax

Analyzes federal estate and gift taxation of inter vivos and testamentary transfers, introduces income taxation of estates and trusts, and involves elementary estate planning. Prerequisites: Restricted to Law students only.

[Law School](#) [Law](#) [Taxation](#)

LAWS-7217 (2) Estate Planning

Discusses problems and solutions for owners of various-sized estates and different types of assets including jointly-held property, stock in closely-held corporations and farms, analysis of federal taxation of generation-skipping transfers in trust, postmortem estate planning, and drafting of trusts and wills. Prerequisites: Requires pre-requisite course of LAWS 7207.

[Law School](#) [Law](#) [Taxation](#)

LAWS-7617 (3) International Taxation

Covers basic aspects of the United States taxation of income earned abroad by its citizens and the taxation of income derived by foreign persons from U.S. sources, including the implications of income tax treaties. Prereq., LAWS 6007 or 6157. Same as ACCT 6780.

[Law School](#) [Law](#) [Taxation](#)

LAWS-8407 (2) Seminar: Tax Policy

Explores current issues in tax policy. Topics may include the tax legislative process, consumption taxes, taxes and distributive justice, the tax exemption for nonprofits, carbon taxes, corporate taxes and integration, and taxes and entrepreneurship. Prereqs., Federal Income Tax and LAWS 6109. Prerequisites: Restricted to Law students only.

[Law School](#) [Law](#) [Taxation](#)

LAWS-9167 (3) Partnership Taxation

Studies federal income taxation of pass-through entities such as are used by most small businesses in the U.S. Includes creation, operation, distributions, sales of interests, and liquidation. Restricted to Law students only. Prerequisites: Restricted to Law students only.

[LAWS-6008 \(3\) The International Legal Order: History & Foundations \(1500-1950\)](#)

Examines the structural and historical aspects of the international legal system. Examines contemporary attitudes, doctrines, and theories of international law by exploring the fundamental questions since the discipline's inception in the Sixteenth Century. Provides a working familiarity with the origins of Public International Law, International Human Rights Law, International Criminal Law, International Organizations, International Trade Law, Law and Development, and Conflict of Laws. Prerequisites: Restricted to Law students only.

[Law School](#) [Law](#) [International](#)

[LAWS-6210 \(2-3\) Comparative Law](#)

Considers foreign solutions to certain key legal problems. Focuses on general problems of legal process, rather than on substantive rules. Topics include the role of lawyers, civil dispute resolution, criminal procedure, and employment discrimination. Covers different legal systems in different years.

[Law School](#) [Law](#) [International](#)

[LAWS-6220 \(3\) Introduction to Jewish/Israeli Law](#)

Outlines the history and basic principles of Jewish Law, Halakic system that encompasses Biblical law and the Rabbinic law. Covers Legal Sources of the Jewish laws, interpretation, legislation, custom, precedence and legal reasoning. Explores the study of modern legal system of the state of Israel and examines the problematic nature of the incorporation of the Law of personal status in the Rabbinical and in general courts. Prerequisites: Restricted to Law students only.

[Law School](#) [Law](#) [International](#)

[LAWS-6400 \(3\) International Law](#)

Examines the nature, structure, and sources of international law, the relationship between international law and domestic U.S. law, the role of international organizations such as the United Nations, the methods of resolving international disputes, the bases of international jurisdiction, and select substantive areas of international law that may change from semester to semester. Prerequisites: Restricted to Law students only.

Law School Law International

LAWS-6410 (3) International Trade Law

Examines the law of the World Trade Organization and the General Agreement on Tariffs and Trade. Examines rules restraining national restrictions on trade that addresses tariff and non-tariff barriers, discrimination, regionalism, anti-dumping, countervailing duties, and safeguards. Considers the relationship between trade and other regulatory areas or social values, such as environmental protection, health and safety standards, human rights, intellectual property protection. Prerequisites: Restricted to Law students only.

Law School Law International

LAWS-6420 (1) Law and the Holocaust

Explores comparative law, jurisprudence, conflicts of laws and international law. Examines the Nazi philosophy of law emanating from its egregious racial ideology, and how it was used to pervert Germany's legal system to discriminate against, ostracize, dehumanize, and eliminate certain classes of people. Studies the role of international law in rectifying the damage by bringing perpetrators to justice and constructing a legal system designed to prevent a repetition.

Law School Law International

LAWS-6510 (2-3) International Environmental Law

Examines international environmental law, including transboundary impacts and global issues. Addresses such issues as intergenerational equities, principles of compensation, and if international environmental norms should receive special environmental norm consideration. A course in public international law is not a prerequisite, but students who have not taken such a course will probably find it useful to do some additional background reading. Offered in alternate years.

Law School Law International

LAWS-6518 (3) Introduction to Islamic Law

Examines the Formative Era of Islamic Law, through its sources and methodologies. Examines the Established Era of the Schools of Law including differences between Sunni and Shiite Islamic Law. Examines human rights, terrorism, political Islam, women's rights and rights of religious minorities, criminal law, and finance law, and the growing role of fundamentalism in these areas. Examines the relevance of Islam and Islamic law in today's world.

Law School Law International

LAWS-6531 (3) Comparative Employment Law

In today's globalized world, lawyers are increasingly likely to encounter issues involving foreign employment. The course will provide substantive knowledge about foreign employment law and its relation to American law, as well as a comparative framework to assess the relative merits of the American approach to employment law.

Law School Law International

LAWS-7065 (3-4) Immigration and Citizenship Law

Covers legal issues pertaining to noncitizens of the United States, especially their right to enter and remain as immigrants and nonimmigrants. Topics include admission and exclusion, deportation, and refugees and political asylum. Approaches topics from various perspectives, including constitutional law, statutory interpretation, planning, ethics, history, and policy. Prerequisites: Restricted to Law students only.

Law School Law International

LAWS-7100 (2-3) International Criminal Law: Theory and Practice

Exposes students to the rapidly growing body of jurisprudence, both international and national, wherein international humanitarian and human rights law are being applied for the purposes of prosecution, trial and punishment of individuals alleged to be responsible for the commission of war crimes, crimes against humanity, genocide and, more recently, terrorism. Prereq., LAWS 6400.

Law School Law International

LAWS-7310 (3) International Dispute Settlement

Examines various mechanisms for the settlement of international disputes. Includes negotiation, inquiry, mediation, conciliation, arbitration, and adjudication. Focuses on intergovernmental dispute resolution.

Law School Law International

LAWS-7320 (3) International Criminal Law

Surveys international human rights law and international crime and punishment. Addresses idea of rights from a historical, philosophical, conceptual and analytical perspective; explores the "Primary rules of conduct" as well as adjudication and remedies, and selected rights from a comparative perspective. Recommended prereq., LAWS 6400.

Law School Law International

LAWS-7440 (3) International Human Rights and Humanitarian Law

Surveys international human rights both in law and in philosophy, both current and historical.

Law School Law International

LAWS-7605 (2) Refugee and Asylum Law

Focuses on protections offered under international and domestic law for persons who are threatened by persecution or other adverse conditions in their country of origin. Covers who is a refugee and the protections they have or do not have under United States and international law.

Law School Law International

LAWS-7611 (2-3) International Business Transactions

Examines the sources of international business law, the relationship between such law and the U.S. legal system, the choice of law in international business disputes, the special issues that arise when doing business with foreign governments, the law governing international sales and the shipment of goods, and international intellectual property protection. Offered in alternate years.

Law School Law International

LAWS-7615 (4) Immigration Law and Immigrants' Rights

Addresses four broad questions: Who is a citizen of the United States? Who else can come to this country? When and why can noncitizens be forced to leave? Who has the authority to answer these questions? These questions prompt us to examine the history of U.S. immigration, the constitutional-statutory-regulatory framework that governs immigration and citizenship law, and the federal agencies that administer it. Also addresses contemporary challenges to, and assertions of, immigrants' rights. Same as PSCI 7181. Prerequisites: Restricted to Law students only.

Law School Law International

LAWS-8310 (2) Seminar: International Crimes Punishment

Addresses issues in international criminal law in three parts: 1) basic contents of international law, 2) international criminal tribunals that enforce international criminal law, and 3) national efforts to bring international criminal prosecutions. Recommended prereqs., LAWS 6400 and 7440. Prerequisites: Restricted to Law students only.

Law School Law International

LAWS-8320 (2) Seminar: Oil and International Relations

Addresses the extent to which the international community of nations is oil dependent. Assesses the impact and the geopolitical dangers to international relations arising from the expanding demand for scarce oil from developing, as well as developed, economies.

Law School Law International

LAWS-8430 (2) Seminar: Comparative Public Health Law and Ethics

Compares public health law systems to those in other countries. Studies the goals, legal structures, and services provided, together with such issues of coercion as quarantines, monitoring, mandates and prohibitions, and forcing pharmaceutical companies to make available inexpensive generic drugs.

Law School Law International

Law School Law International

LAWS-9410 (3) International Trade Law

Examines the law of the World Trade Organization and the General Agreement on Tariffs and Trade. Examines rules restraining national restrictions on trade that addresses tariff and non-tariff barriers, discrimination, regionalism, anti-dumping, countervailing duties, and safeguards. Considers the relationship between trade and other regulatory areas or social values, such as environmental protection, health and safety standards, human rights, intellectual property protection. Restricted to Law students only. Prerequisites: Restricted to Law students only.

LAWS-6009 (4) Legal Aid Civil Practice 1

Emphasizes procedural and practical remedies and defenses available in civil litigation. Assigns civil cases related to the course material. Develops working knowledge of courtroom skills. Prereq. or coreq., LAWS 6353. Prerequisites: Restricted to Law students only.

[Law School](#)
[Law](#)
[Practice:Clinical & Simulation](#)

LAWS-6019 (4) Civil Practice Clinic 2

Emphasizes procedural and practical remedies and defenses available in civil litigation. Assigns civil cases related to the course material. Develops working knowledge of courtroom skills. Prereq. or coreq., LAWS 6353.

[Law School](#)
[Law](#)
[Practice:Clinical & Simulation](#)

LAWS-6029 (4) Legal Aid Criminal Practice 1

Provides thorough grounding in problems of criminal defense. Students defend indigent misdemeanants in Boulder courts. Develops working knowledge of courtroom skills. Prereq. or coreq., LAWS 6353. Prerequisites: Restricted to Law students only.

[Law School](#)
[Law](#)
[Practice:Clinical & Simulation](#)

LAWS-6039 (4) Criminal Defense Clinic 2

Provides thorough grounding in problems of criminal defense. Students defend indigent misdemeanants in Boulder courts. Develops working knowledge of courtroom skills. Prereq. or coreq., LAWS 6353.

Law School | Law | Practice: Clinical & Simulation

LAWS-6079 (4) Criminal Defense Clinic

Provides thorough grounding in problems of criminal defense. Students defend indigent misdemeanants. Develops working knowledge of courtroom skills, advocacy, and evidence presentation. Concludes with full mock trial. Prereq. or coreq., LAWS 6353. Prerequisites: Restricted to Law students only.

Law School | Law | Practice: Clinical & Simulation

LAWS-6109 (2) Trial Advocacy

Focuses on voir dire, opening statement, direct examination of witnesses, and cross examination. Prerequisites: Restricted to Professional Year 1, 2, or 3 Law students only.

Law School | Law | Practice: Clinical & Simulation

LAWS-6119 (1) Deposition Skills

Provides valuable skills to assume active roles in the deposition process. Explores why and when to take depositions; drafting and objecting to deposition notices for individual deponents, non-party witnesses, and corporate designees; drafting successful outlines, proper questions and objections; using exhibits; furthering case theory, making and using stipulations; using depositions in pretrial motions and at trial. Prerequisites: Restricted to Law students only.

Law School | Law | Practice: Clinical & Simulation

LAWS-7019 (1-2) Advanced Clinical Practicum

Enables a clinical student an optional 1-2 credit course to complete an ongoing clinic project that does not reach its natural conclusion during the regular term of the clinic. The practicum may be used in connection with any existing clinical course, but only with permission, and under the supervision of the clinical faculty member. A clinical student must complete a minimum of 50 hours of work per credit taken. Prerequisites: Restricted to Law students only.

Law School | Law | Practice: Clinical & Simulation

LAWS-7029 (3) Appellate Advocacy Clinic

Provides a clinical course that enables students to work on briefs of criminal cases being handled by the Appellate Division of the Public Defender or Attorney General's Office. Instruction in oral advocacy is given. Enrollment limited to eight students.

Law School | Law | Practice: Clinical & Simulation

LAWS-7106 (1-2) Moot Court Competition

Offers an intensive involvement in legal research, appellate brief writing, and oral arguments in a competitive context. Student finalists may continue involvement in regional and national competitions. Prerequisites: Restricted to Law students only.

Law School Law Practice: Clinical & Simulation

LAWS-7159 (2) Advanced Trial Advocacy

Offers an advanced course covering trial practice elements. Open only to students who have taken LAWS 6109. Prerequisites: Restricted to Law students only.

Law School Law Practice: Clinical & Simulation

LAWS-7169 (2) Motions Advocacy

Provides practical training in preparing and arguing pretrial, post-trial, and chambers motions to an experienced federal judge based on materials from actual case files. Assigns some research papers. Limited to 15 third-year students with interest in trial advocacy and willingness to participate in confrontational exercises. Counts as practice hours. Prerequisites: Restricted to Law students only.

Law School Law Practice: Clinical & Simulation

LAWS-7209 (4) Natural Resources Law Clinic

Offers hands-on experience in the practice of natural resources law in the Rocky Mountain region to a select number of clinic students. The clinic's docket of active cases focuses on public land law and the environmental statutes protecting those lands and their resources. Students participate in projects that test the full range of lawyering skills, including traditional litigation, administrative advocacy, legislative drafting, and the conduct of complex negotiations and settlements. Prerequisites: Restricted to Law students only.

Law School Law Practice: Clinical & Simulation

LAWS-7309 (2-4) American Indian Law Clinic

Offers a clinical education course involving participation in the representation and advocacy of Indian causes---land or water claims, Indian religious freedom, job or other discrimination based on race, and issues implicating tribal sovereignty. Recommended prereq., LAWS 7725. Prerequisites: Restricted to Law students only.

Law School Law Practice: Clinical & Simulation

LAWS-7406 (1) International Moot Court Competition

Open only to students who actively participate in the seminar preparing for the competition, in the preparation of memorials for the competition, and in the practice of oral arguments or regional oral arguments.

Law School Law Practice: Clinical & Simulation

LAWS-7409 (3) Legal Negotiation

Explores the fundamentals of effective negotiation techniques and policies for lawyers. Students engage in mock negotiations of several legal disputes. Credit is not given for both LAWS 7419 Legal Negotiation and Dispute Resolution and this course.

Law School | Law | Practice:Clinical & Simulation

LAWS-7429 (2) Alternative Dispute Resolution

Examines a variety of dispute resolution processes, such as mediation, arbitration, minitrials, and court-annexed settlement procedures, as alternatives to traditional court adjudication. Credit not given for both LAWS 7419 Legal Negotiation and Dispute Resolution and this course. Prerequisites: Restricted to Law students only.

Law School | Law | Practice:Clinical & Simulation

LAWS-7439 (2-3) Mediation

Explores mediation, one of the more important methods of alternative dispute resolution, and the legal issues that may arise related to mediation. Considers what kinds of persons and disputes are most appropriate for mediation. Includes role playing.

Law School | Law | Practice:Clinical & Simulation

LAWS-7449 (2-4) Juvenile Law Clinic

Examines the world of child welfare from the view of the child client, by representing their best interests in abuse and neglect cases. As Guardians ad litem, students will represent children in abuse and neglect cases from the beginning, at the temporary shelter hearing, through the conclusion of the case at a permanency orders hearing. Prereq., LAWS 6353. May be repeated up to 8 total credit hours.

Law School | Law | Practice:Clinical & Simulation

LAWS-7509 (1) Mock Trial Competition

Student teams further develop trial and advocacy skills in a competitive mock-trial format involving two or more rounds of trials. Requires preparation of trial briefs and drafting other court pleadings and documents. Credit is limited to the top two teams (six students). Student finalists may continue involvement in regional and national competitions. May be repeated within the term up to 4 total credit hours. Prerequisites: Restricted to Law students only.

Law School | Law | Practice:Clinical & Simulation

LAWS-7609 (1-2) Law Practice Management

Studies the establishment of a solo or small-firm legal practice. Topics include the business structure (PC, LLC, etc.), office systems, marketing and development, staffing, liability insurance, managing time, technology, and billing. (This practice course counts toward the 14 credit hour maximum of practice hours.) Course supported by the Section of Law Practice Management of the ABA in memory of Harold A. Feder, CU Law '59.

| Law School | Law | Practice:Clinical & Simulation |
|------------|-----|--------------------------------|

LAWS-7619 (2) Entrepreneurial Law Clinic

Advise indigent clients who need legal services in the founding of their business or not-for-profit firms, registering LLCs, and drafting employment and intellectual property agreements. Prereq., two of the following courses: Agency Partnership and the LLC, Corporations, Securities, Seminar on Corporate Law, Law and Finance for Entrepreneurs, Accounting Issues for Lawyers, Patent Law, Trademark, and International Business Transactions. Prerequisites: Restricted to Law students only.

| | | |
|------------|-----|--------------------------------|
| Law School | Law | Practice:Clinical & Simulation |
|------------|-----|--------------------------------|

LAWS-7629 (1) Introduction to the In-House Practice of Law

Explores cutting edge questions around the practice of law as an employee of a business. Demonstrates how the combination of law and business can be valuable to businesses and also innovative, challenging and rewarding to legal professionals. Legal services to corporate America is changing dramatically with more entities relying on in-house counsel, compared to private practitioners, to obtain legal advice and counsel. Prerequisites: Restricted to Law students only.

| | | |
|------------|-----|--------------------------------|
| Law School | Law | Practice:Clinical & Simulation |
|------------|-----|--------------------------------|

LAWS-7751 (3) Arbitration

Discusses the nature of arbitration, tactical considerations in whether to use this form or another form of dispute resolution, the drafting of effective contracts to arbitrate the enforceability of these contracts, and the enforcement of arbitration awards. Covers the preclusive effect of arbitration proceedings, multiparty arbitration, and choice of law. Students conduct simulated arbitrations.

LAWS-6024 (3) Real Property Security

Examines basic mortgage law, including use of mortgage substitutes (e.g., deeds of trusts and installment land contracts). Covers foreclosure and redemption and related problems; special priority problems in land acquisitions and construction financing; special financing devices, including variable-interest and wraparound mortgages; and problems relating to the transfer of the mortgagor's and mortgagee's respective interests.

[Law School](#) [Law](#)

LAWS-6029 (4) Legal Aid Criminal Practice 1

Provides thorough grounding in problems of criminal defense. Students defend indigent misdemeanants in Boulder courts. Develops working knowledge of courtroom skills. Prereq. or coreq., LAWS 6353. Prerequisites: Restricted to Law students only.

[Law School](#) [Law](#) [Practice:Clinical & Simulation](#)

LAWS-6031 (2) Consumer Protection Laws and Policies

Focuses on deceptive trade practices and consumer rights. Reviews the law of deception/misrepresentation at common law, and federal and state laws regarding unfair acts and practices. Covers credit practices, environmental and health claims, and telecommunications and privacy. Discusses remedies, including governmental enforcement actions, and individual and class actions.

[Law School](#) [Law](#)

LAWS-6035 (3) White Collar Crime

Examines distinctions between white collar crime and other types of criminal activity and the needs for and arguments against white collar laws and law enforcement. Studies securities fraud, mail and wire fraud, insider trading, money laundering, false statements, conspiracy and criminal forfeiture statutes. Includes use of the grand jury, privileges applicable in the corporate setting, immunity, discovery and the impact of parallel civil proceedings. Examines effect of government policy on corporations and their counsel, pre-trial and trial strategy, jury selection, and victim notification and restitution options. Prerequisites: Restricted to Law students only.

Law School | Law | Litigation and Procedure

LAWS-6039 (4) Criminal Defense Clinic 2

Provides thorough grounding in problems of criminal defense. Students defend indigent misdemeanants in Boulder courts. Develops working knowledge of courtroom skills. Prereq. or coreq., LAWS 6353.

Law School | Law | Practice: Clinical & Simulation

LAWS-6045 (3) Criminal Procedure

Focuses primarily on the constitutional limitations applicable to such police investigative techniques as arrest, search, seizure, electronic surveillance, interrogation, and lineup identification. Prerequisites: Restricted to Law students only.

Law School | Law | Litigation and Procedure

LAWS-6049 (4) Legal Assistance 1: Federal Courts

Studies evidence and procedural issues, discovery (including document management), pretrial preparation, motions, pretrial conferences, and jury selection. Focuses on opening and closing statement strategies, elements of direct and cross-examination, and impeachment; how to present evidence using technology, including presentation software. Students participate in preparing and arguing motions in federal court and may participate in trial proceedings.

Law School | Law

LAWS-6055 (3) Post-Conviction Criminal Procedure

Addresses sentencing process and schemes, direct appeals, probation modification and revocation, parole revocation, pardon and commutation processes, post-conviction litigation and appeal in both state and federal court, federal review of state convictions through habeas and/or the AEDPA, and ethical issues that arise in post-conviction proceedings. Prerequisites: Restricted to Law students only.

Law School | Law | Litigation and Procedure

LAWS-6059 (2-3) Legal Aid and Defender

Law School | Law

LAWS-6065 (3) Media, Popular Culture, and the Law

Examines how the institutions, practices, and the very identity of the law are in part affected by the media through which law is apprehended and communicated. Hence the general question posed in this course: To what extent and how are the forms and methods of the new media having an effect on the perception, role, and identity of law? Prerequisites: Restricted to Law students only.

Law School | Law | Government and Public

LAWS-6069 (4) Immigration Clinic

Emphasizes practice skills in immigration cases. Includes litigation before Federal Immigration judges, Board of Immigration Appeals, and Federal Circuit Court of Appeals. Prereq. or coreq., LAWS 6353.

Law School | Law

LAWS-6079 (4) Criminal Defense Clinic

Provides thorough grounding in problems of criminal defense. Students defend indigent misdemeanants. Develops working knowledge of courtroom skills, advocacy, and evidence presentation. Concludes with full mock trial. Prereq. or coreq., LAWS 6353. Prerequisites: Restricted to Law students only.

Law School | Law | Practice:Clinical & Simulation

LAWS-6089 (4) Legal Assistance 2: Federal Courts

Studies evidence and procedural issues, discovery (including document management), pretrial preparation, motions, pretrial conferences, and jury selection. Focuses on opening and closing statement strategies, elements of direct and cross-examination, and impeachment; how to present evidence using technology, including presentation software. Students participate in preparing and arguing motions in federal court and may participate in trial proceedings.

Law School | Law

LAWS-6099 (4) Family Law Clinic

Represents low-income clients in family law cases in local state district court. Students will gain court-based experience in dissolution's and allocations of parental responsibilities. Seminar component includes instruction on substantive family law, related ethical issues, and theoretical backgrounds of poverty lawyering.

Law School | Law

LAWS-6103 (2-3) Legal Ethics Professionalism

Examines the legal profession as an institution, its history and traditions, and the ethics of the bar with particular emphasis on the professional responsibilities of the lawyer. Discusses the Model Rules of Professional Conduct. Prerequisites: Restricted to Professional Year 1, 2, or 3 Law students only.

Law School | Law | Jurisprudence and Perspective

LAWS-6104 (3) Wills and Trusts

Covers intestate succession; family protection; execution of wills; revocation and revival; will contracts and will substitutes; creation of trusts; modification and termination; charitable trusts; fiduciary administration, including probate and contest of wills; and construction problems in estate distribution. Prerequisites: Restricted to Professional Year 1, 2, or 3 Law students only.

Law School | Law | Property

LAWS-6105 (2) Defending Immigrants in Criminal and Immigration Courts

Addresses legal procedures, pleadings and client advocacy matters involved in the representation of Spanish-speaking clients who have been arrested for criminal offenses and who have been issued a detainer by Immigration and Customs Enforcement for possible immigration removal proceedings. Provides overview of criminal defense concepts, and how criminal defense attorneys must be prepared to competently counsel their clients who are facing removal proceedings in the federal immigration system. Prerequisites: Restricted to Law students only.

Law School | Law | Family, Gender, and Health

LAWS-6108 (3) Conflict of Laws

Addresses the conflicts that arise when the significant facts of a case are connected with more than one jurisdiction, whether that jurisdiction belongs to a state, the federal government, or a foreign government. The subject is studied in its theoretical and historical context, with special emphasis on the international aspects of extraterritorial jurisdiction.

Law School | Law | Jurisprudence and Perspective

LAWS-6109 (2) Trial Advocacy

Focuses on voir dire, opening statement, direct examination of witnesses, and cross examination. Prerequisites: Restricted to Professional Year 1, 2, or 3 Law students only.

Law School | Law | Practice: Clinical & Simulation

LAWS-6112 (3) Foundations of American Natural Resources Law

Introduces students to the law of natural resources. Examines the legal, historical, political, and intellectual influences that shape resources development and conservation. Same as ENVS 6112. Prerequisites: Restricted to Professional Year 1, 2, or 3 Law students only.

Law School | Law | Envir, Nat Resources, Amer Ind

LAWS-6113 (2) Legal Ethics and Professionalism: Ethics and the Law of Lawyering

Continuation of LAWS 5103. Focuses on the Model Rules of Professional Conduct. Provides the nuts and bolts of the ethical rules needed to begin to explore externships, clinics, pro bono projects and other practice experiences during law school. Prereq., LAWS 5103. Prerequisites: Restricted to Law students only.

Law School | Law | Jurisprudence and Perspective

LAWS-6114 (2) Construction Law

Focuses on the basic principles and practices of construction law. Provides an overview of construction industry participants and players (engineers, contractors, insurers, etc.) and discusses and analyzes the various obligations and liabilities of these parties. Covers construction and design contracting, construction claims, professional negligence, construction insurance and suretyship, and ADR in construction. Provides transactional-practice oriented exercises.

Law School | Law | Property

LAWS-6117 (3) Survey of Business Enterprise Tax

Makes a comparative survey of federal income taxation of C corporations, S corporations, and partnership/limited liability companies, the principal entity choices for conducting business in the United States. Includes formation, operations, distributions, sales of interests, and liquidation. Suitable for students seeking introductory background for business or real estate practice, without the detail required for a tax specialist. Prereq., LAWS 6007.

Law School | Law

LAWS-6119 (1) Deposition Skills

Provides valuable skills to assume active roles in the deposition process. Explores why and when to take depositions; drafting and objecting to deposition notices for individual deponents, non-party witnesses, and corporate designees; drafting successful outlines, proper questions and objections; using exhibits; furthering case theory, making and using stipulations; using depositions in pretrial motions and at trial. Prerequisites: Restricted to Law students only.

Law School | Law | Practice:Clinical & Simulation

LAWS-6122 (2) International Natural Resources Law and Policy

Examines the suite of policy issues and legal ramifications associated with sustainable natural resource development. Examines most recent research on the "resource curse" theory. Examines recent policy developments and discussions that have occurred among industry, NGOs, multilateral development agencies and governments. Examines issues related to bribery and corruption in developing country environments, and dispute resolution mechanisms at national and local levels. Prerequisites: Restricted to Law students only.

LAWS-6128 (1-3) Legal Interpretation and the Legislative Process

Examines theories of legislation and the relation between legislatures and courts, emphasizing problems of statutory interpretation and other issues in the judicial use or misuse of statutes.

Prerequisites: Restricted to Law students only.

[Law School](#) [Law](#) [Government and Public](#)

LAWS-6138 (2-3) Federal Tax Politics

Studies the tax system as the nexus of politics and economics. Examines how various interests and entities use the many tools of political power to shape the tax system. Intended for those interested in politics and legislation, rather than for the tax specialist.

[Law School](#) [Law](#) [Taxation](#)

LAWS-6157 (3) Corporate Taxation

Studies federal income taxation related to taxable corporations, the entities through which a large part of the economic activity in the U.S. is conducted. Includes creation, operation, distributions, sale of interests, and liquidation. Prerequisites: Restricted to Law students only.

[Law School](#) [Law](#) [Taxation](#)

LAWS-6167 (3) Partnership Taxation

Studies federal income taxation of pass-through entities such as are used by most small businesses in the U.S. Includes creation, operation, distributions, sale of interests, and liquidation. Prereq., LAWS 6007.

Law School Law Taxation

LAWS-6179 (2) Trial Practice

Students apply the rules and doctrine of evidence in simulated trial settings. Must be taken with the corresponding section of Evidence. Enrollment is to 24. Satisfies the trial practice requirement and counts 2 hours toward the 14 credit hour maximum of clinical hours counted toward graduation. Graded course; not pass/fail.

Law School Law

LAWS-6201 (3-4) Agency, Partnership, and the LLC

Surveys agency law whose principles are important in many other areas of law. Studies the legal organizations commonly used by small businesses: partnerships and limited liability companies (LLCs). Prerequisites: Restricted to Professional Year 1, 2, or 3 Law students only.

Law School Law Business

LAWS-6205 (3) Lawyers for Social Change

Helps students expand their perspective to understand the ways in which lawyers more broadly participate in social change work in this service learning class. Analyzes case histories of cause lawyering. The service learning component is based on the precept that one of the most effective ways to learn a role is to perform that role. Students will participate as social change lawyers by working with a local community to help it develop projects that the community believes will help it better itself. Prerequisites: Restricted to Law students only.

Law School Law Government and Public

LAWS-6206 (3) Litigation Drafting

Examines the intersection of civil procedure and legal writing. Emphasizes the drafting of persuasive adversarial litigation documents, including complaints, answers, motions in limine, motions to dismiss, motions of summary judgment, and jury instructions. Intensive writing and workshop format.

Law School Law Research and Writing

LAWS-6210 (2-3) Comparative Law

Considers foreign solutions to certain key legal problems. Focuses on general problems of legal process, rather than on substantive rules. Topics include the role of lawyers, civil dispute resolution, criminal procedure, and employment discrimination. Covers different legal systems in different years.

Law School Law International

LAWS-6211 (3) Corporations

Covers formation of corporations and their management; relations among shareholders, officers, and directors; the impact of federal legislation on directors' duties; and the special problems of closed corporations. Prerequisites: Restricted to Professional Year 1, 2, or 3 Law students only.

Law School Law Business

LAWS-6213 (2) Advanced Appellate Advocacy

Advanced study and practice of written and oral appellate advocacy. Builds on the foundation established in the required first-year course in appellate advocacy, but provides more extensive coverage, practice, and evaluation. Personalized instruction in brief writing, including detailed, one-on-one critique of their work. Include advanced techniques for organizing and writing a brief, and advanced instruction on the strategy and process of oral argument. Required to research, write, and rewrite an appellate brief, and conduct several oral arguments. Attend oral arguments of the United States Court of Appeals for the Tenth Circuit and the Colorado Court of Appeals. Prereq., LAWS 7106. Prerequisites: Restricted to Law students only.

Law School Law Litigation and Procedure

LAWS-6220 (3) Introduction to Jewish/Israeli Law

Outlines the history and basic principles of Jewish Law, Halakhic system that encompasses Biblical law and the Rabbinic law. Covers Legal Sources of the Jewish laws, interpretation, legislation, custom, precedence and legal reasoning. Explores the study of modern legal system of the state of Israel and examines the problematic nature of the incorporation of the Law of personal status in the Rabbinical and in general courts. Prerequisites: Restricted to Law students only.

Law School Law International

LAWS-6221 (3) Principles of Auditing, Compliance, and Risk Management

Introduces the fundamental legal and business rules and processes involved in performing audit, compliance, and risk management. Investigates understanding and measuring risk, establishing standards for aggregating disparate information, gathering market data, calculating risk measures, and creating timely reporting tools for managing risk. Covers important regulations including Sarbanes-Oxley, HIPAA, and FISMA. Prerequisites: Restricted to Law students only.

Law School Law Business

LAWS-6226 (2-3) Advanced Legal Research and Writing

Focuses on improvement of legal writing skills including organizing, drafting, and revising legal writing. Improves research and analysis skills. Prerequisites: Restricted to Law students only.

Law School Law Research and Writing

LAWS-6236 (2) Judicial Opinion Writing

Places contemporary American judicial opinion in historical and comparative context. Analyzes individual and institutional writing choices that authors of judicial opinions must make and ethical dilemmas they must confront. Builds upon the first-year legal-writing curriculum. Challenges students to develop and defend their own opinion-writing approaches and styles as well as to write from approaches and in styles that are not their own.

Law School Law Research and Writing

LAWS-6246 (2) Introduction to United States Legal System/Legal Reasoning, Research and Writing

Introduces students without a law degree to the basic structure and content of the United States legal system, examining how the three branches of government at the state and federal levels make law and policy in the United States. The course will provide a basic introductory overview of the following: the various sources of law, including an understanding of how statutes are enacted by legislative institutions; the role of the United States court system in interpreting laws; application of judicial precedent in common-law systems; trial and appellate court procedures; and judicial review standards. The course will also introduce students to the methodology of American law, including legal reasoning, research, and writing, through a variety of in-class and outside research and writing assignments.

Law School | Law

LAWS-6251 (4) Corporations

Covers formation of corporations and their management; relations between shareholders, officers, and directors; the impact of federal legislation on directors' duties; and the special problems of closed corporations.

Law School | Law

LAWS-6281 (3) Accounting Issues for Lawyers

Studies accounting and auditing problems in the form they are placed before the lawyer, including a succinct study of basic bookkeeping, in-depth legal analysis of the major current problems of financial accounting, and consideration of the conduct of the financial affairs of business.

Law School | Law | Business

LAWS-6301 (3) Introduction to Intellectual Property

Provides an overview of our nation's intellectual property laws, including patents, copyrights, trademarks, and trade secrets. Discusses other matters related to intellectual property, including licensing, competition policy issues, and remedies. Same as TLEN 5245. Prerequisites: Restricted to Law students only.

Law School | Law | Intell Prop, Tech, and Telecom

LAWS-6302 (3) Water Resources

Analyzes regional and national water problems, including the legal methods by which surface and ground water supplies are allocated, managed, and protected. Prerequisites: Restricted to Law students only.

Law School | Law | Envir, Nat Resources, Amer Ind

LAWS-6308 (2) Law and Neuroscience

Covers neuroscience basics, and explores the relationship between the law and recent neuroscientific discoveries in domains including pain, memory, lie detection, psychopathy and criminal responsibility.

Law School | Law | Jurisprudence and Perspective

LAWS-6311 (1) National Security and Privacy Law

Introduces national security and privacy law and relevant law, regulations, rules, policies, and guidelines.

Law School | Law

LAWS-6318 (3) Economic Analysis of Law

Introduces the basic elements of economic theory and emphasizes demand and utility, cost, and optimality. Prerequisites: Restricted to Law students only.

Law School | Law | Jurisprudence and Perspective

LAWS-6321 (3) Computer Crime

Explores legal issues that judges, legislators, prosecutors, and defense attorneys confront as they respond to recent explosions in computer-related crime. Includes the Fourth Amendment in cyberspace, the law of electronic surveillance, computer hacking and other computer crimes, encryption, online economic espionage, cyberterrorism, First Amendment in cyberspace, federal/state relations in enforcement of computer crime laws, and civil liberties online. Same as TLEN 5255. Prerequisites: Restricted to Law students only.

Law School | Law | Intell Prop, Tech, and Telecom

LAWS-6328 (3) Financial Decision-Making

Applies concepts, ideas, insights, and principles of modern finance to real-world situations that lawyers will face in many areas of law. Analyzes present discounted value (time value of money), risk versus return, asset diversification, portfolio theory, efficient markets hypothesis, arbitrage, financial options, real options, financial signals, human capital, behavioral finance, socially responsible investing, neurofinance, happiness finance, and financial bubbles and crashes. Restricted to Law students only. Prerequisites: Restricted to Law students only.

LAWS-6331 (1) The Technology of Privacy

Explores the escalating debates by policymakers, scholars, advocates, and industry representatives about the growing spread of tracking and surveillance in society. Debates are being spurred by the pace of changes to technology and particularly of changes to Internet and mobile technology. Practitioners in information privacy law or technology policy must understand the past, present, and likely future of the technology of privacy. Prerequisites: Restricted to Law students only.

[Law School](#) | [Law](#) | [Intell Prop, Tech, and Telecom](#)

LAWS-6338 (1) Understanding the Global Financial Crisis

Explores the causes and consequences of the global financial crisis. Analyzes financial instruments and institutions at the heart of the crisis -- including asset-backed securities, credit derivatives, government-sponsored entities, credit rating agencies, hedge funds, and financial conglomerates -- and places them in the context of a larger "shadow banking system". Examines the building blocks of financial reform.

[Law School](#) | [Law](#) | [Jurisprudence and Perspective](#)

LAWS-6353 (3) Evidence

Studies the methods and forms of proof in litigation, including detailed consideration of hearsay, impeachment of witnesses, relevancy and certain restrictions on authentication and best evidence doctrines, and privileges. Prerequisites: Restricted to Law students only.

[Law School](#) | [Law](#) | [Litigation and Procedure](#)

LAWS-6363 (5) Evidence and Trial Practice

Studies methods and forms of proof in litigation, including detailed consideration of hearsay, impeachment of witnesses, relevancy and certain restrictions on authentication and best evidence doctrines, and privileges. Applies rules and doctrine of evidence in simulated trial settings. Combined Evidence and Trial Practice course. Satisfies the trial practice requirement and counts two hours toward the 14 credit hour maximum in clinical hours.

Law School Law

LAWS-6373 (3) Federal Litigation: Everything but the Trial

Litigates through all pretrial phases as plaintiff's counsel, a mock federal case: an employee's challenge to compensation and termination, with possible claims including breach of contract, breach of the implied covenant of good faith and fair dealing, violation of wage payment statutory and regulatory requirements, and fraudulent inducement to contract. Prereq., LAWS 6353. Restricted to Law students only. Prerequisites: Restricted to Law students only.

Law School Law Litigation and Procedure

LAWS-6400 (3) International Law

Examines the nature, structure, and sources of international law, the relationship between international law and domestic U.S. law, the role of international organizations such as the United Nations, the methods of resolving international disputes, the bases of international jurisdiction, and select substantive areas of international law that may change from semester to semester. Prerequisites: Restricted to Law students only.

Law School Law International

LAWS-6410 (3) International Trade Law

Examines the law of the World Trade Organization and the General Agreement on Tariffs and Trade. Examines rules restraining national restrictions on trade that addresses tariff and non-tariff barriers, discrimination, regionalism, anti-dumping, countervailing duties, and safeguards. Considers the relationship between trade and other regulatory areas or social values, such as environmental protection, health and safety standards, human rights, intellectual property protection. Prerequisites: Restricted to Law students only.

Law School Law International

LAWS-6415 (2-3) Drug Product Liability Litigation: Principles and Practice

Explores product liability lawsuits and litigation. Explores law of product liability and the tools necessary to successfully litigate these cases. Considers the theory and practice of lawsuits now and after the Supreme Courts landmark decision in Wyeth v. Levine (2009). Focuses on similarities and differences between the special context of FDA regulation. Considers the legal principles governing such lawsuits such as inadequate warning, the Learned intermediary Doctrine and medical causation.

Law School Law

LAWS-6420 (1) Law and the Holocaust

Explores comparative law, jurisprudence, conflicts of laws and international law. Examines the Nazi philosophy of law emanating from its egregious racial ideology, and how it was used to pervert Germany's legal system to discriminate against, ostracize, dehumanize, and eliminate certain classes of people. Studies the role of international law in rectifying the damage by bringing perpetrators to justice and constructing a legal system designed to prevent a repetition.

Law School Law International

LAWS-6458 (2) Creative Writing for Lawyers

Requires substantial writing and reading. Begins with participants bringing to class a piece of creative writing consisting of three to five thousand words. Each session consists of one hour of discussion and critique of an assigned writing exercise that everyone has prepared for the class, and one hour of workshop critique of each participant's longer work, in turn.

Law School Law Research and Writing

LAWS-6501 (2-3) The Practice of Labor and Employment Law

Focuses on aspects of the practice of employment law, rather than the examination of legal doctrines. Discusses typical issues presented in advising and litigating on behalf of employers and employees. Topics include special attention to ethical issues.

Law School Law

LAWS-6502 (2) Wildlife and the Law

Examines the law that protects wildlife, its habitat, and biodiversity. Explores human-caused threats including habitat destruction, illegal trade, and climate change. Focuses on statutes, case law, environmental ethics, and current controversies to highlight legal, scientific, and political strategies for protecting biodiversity. Particular emphasis is placed on the U.S. Endangered Species Act.

Law School Law Envir, Nat Resources, Amer Ind

LAWS-6503 (3) Law and Social Sciences

Explores disparities in criminal sentencing and death penalty cases; quality and effectiveness of legal representation for indigent criminal defendants; relationship between modifications in traditional steps in legal process; connection between alternative tort doctrines and volume of litigation, trial rates, plaintiff success rates and award size; impact of congressional statutes and US Supreme Court decisions on handling and outcomes of habeas corpus petitions.

Law School Law Jurisprudence and Perspective

LAWS-6508 (1) The Philosophy of Law

Questions the nature of law, characteristics and considerations of a legal system, rights and from where they come; thinking like a lawyer, basic techniques of legal reasoning, difference between doctrinal and normative legal analysis. Explores law's frontier and what distinguishes law from morality or politics. Focuses on influential texts from the end of WWII to the end of the Cold War. Prerequisites: Restricted to Law students only.

Law School Law Jurisprudence and Perspective

LAWS-6510 (2-3) International Environmental Law

Examines international environmental law, including transboundary impacts and global issues. Addresses such issues as intergenerational equities, principles of compensation, and if international environmental norms should receive special environmental norm consideration. A course in public international law is not a prerequisite, but students who have not taken such a course will probably find it useful to do some additional background reading. Offered in alternate years.

Law School | Law | International

LAWS-6511 (3) Labor Law

Includes the subjects of evolution of labor relations laws; how a collective bargaining relationship is established; negotiation of the collective bargaining agreement; labor and the antitrust laws; and rights of the individual worker. Course materials frame the issue of how a developed or postindustrial democracy deals with the problems that arise out of the employment relationship: of the choices between laissez-faire, substantive regulation, and the private ordering of the employment relationship through the collective bargaining process.

Law School | Law | Business

LAWS-6513 (2) Crime Victims Rights and Victim Counseling and Advocacy

Involves highly experiential and participatory form of learning related to the rights and needs of victims of crime. Legal and constitutional aspects of crime victims' rights and advocacy are considered. Includes a training component by Moving to End Sexual Assault, a Boulder based organization. After training by MESA, students will complete 120 hours of volunteer service on the MESA hotline as well as attend various meetings. Prerequisites: Restricted to Law students only.

Law School | Law | Family, Gender, and Health

LAWS-6518 (3) Introduction to Islamic Law

Examines the Formative Era of Islamic Law, through its sources and methodologies. Examines the Established Era of the Schools of Law including differences between Sunni and Shiite Islamic Law. Examines human rights, terrorism, political Islam, women's rights and rights of religious minorities, criminal law, and finance law, and the growing role of fundamentalism in these areas. Examines the relevance of Islam and Islamic law in today's world.

Law School | Law | International

LAWS-6521 (3) Employment Law

Entails a survey of employment-at-will, workplace safety, workplace torts; ERISA and retirement, workers' compensation; controls on hours and wages; health insurance; disability and unemployment compensation.

Law School | Law | Business

LAWS-6528 (3) Capital Punishment in America

Surveys the history and current status of capital punishment in the United States, with a critical examination of arguments both for and against the death penalty.

Law School | Law | Jurisprudence and Perspective

LAWS-6531 (3) Comparative Employment Law

In today's globalized world, lawyers are increasingly likely to encounter issues involving foreign employment. The course will provide substantive knowledge about foreign employment law and its relation to American law, as well as a comparative framework to assess the relative merits of the American approach to employment law.

Law School | Law | International

LAWS-6541 (2) Colorado Worker's Compensation Theory and Practice

Introduces the legal theories that underlie the no-fault compensation system, its historical evolution, policy conundrums, and ethical quandaries. Teaches the application of the procedural rules most frequently utilized in administrative setting. Studies the Workers' Compensation Act, the Workers' Compensation Rules of Procedure, and the Office of Administrative Courts Rules of Procedure. Prerequisites: Restricted to Law students only.

Law School | Law | Business

LAWS-6551 (3) Employee Benefits and Compensation Law

Examines past and present employee benefits and compensation practices among private and public employers. Covers ERISA and defined benefit, defined contribution, and welfare benefit plans; equity awards granted by corporations; equity awards granted by LLCs and partnerships; nonqualified deferred compensation and Section 409A of the IRS; golden parachutes and Sections 280G and 4999 of the IRC. Restricted to Law students only. Prerequisites: Restricted to Law students only.

Law School | Law | Business

LAWS-6601 (3) Corporate Transactions in Latin America

Introduces students to an overview of Latin American commercial and civil law systems, looking closely at Napoleonic and Chilean law. Explores the choice legal structures available for Latin American corporations; contract law that regulates business transactions in Latin America; and exploration of the way in which Latin American countries have joined international business trade agreements that pertain to Latin American nations such as the Vienna Convention and Gatt.

Law School | Law

LAWS-6602 (3) Cultural Property Law

Concerns domestic and International regulation of property that expresses group identity and experience. Organized around traditional categories of property (real, personal, and intellectual), the course covers historic preservation, archeological resources, art and museum law, with attention to indigenous people's advocacy on burial sites, traditional lands, ceremonies, music, symbols, ethnobotany, genetic information, and language. May satisfy upper-level writing requirement. Prerequisites: Restricted to Law students only.

[LAWS-6708 \(1-3\) Special Topics](#)

Explores special topics in law. Prerequisites: Restricted to Law students only.

[Law School](#) [Law](#) [Jurisprudence and Perspective](#)

[LAWS-6712 \(3\) Climate Change Law and Policy](#)

Examines the science of climate change and the broader role of science in public policymaking. Reviews the changing legal landscape to abate greenhouse gas emissions, and key issues in policy design. Reviews the Supreme Court's April 2, 2007, decision in *Massachusetts v. EPA*, overturning EPA's refusal to regulate greenhouse gas pollution from motor vehicle tailpipes, and the aftermath in the courts, Executive Branch and Congress.

[Law School](#) [Law](#) [Envir, Nat Resources, Amer Ind](#)

[LAWS-6722 \(3\) Energy Law and Regulation](#)

Provides an introduction to energy law and regulation in the United States. Covers basic principles of rate regulation and public utilities, the division of jurisdiction between federal and state governments, and the key federal statutes and regulatory regimes governing natural gas, electricity, and nuclear power. Focuses on the basic federal frameworks for natural gas and electricity regulation, with an emphasis on understanding the messy and uneven transition to wholesale competition in these sectors and, in the electricity context, the experience with state restructuring and retail competition. Prerequisites: Restricted to Law students only.

[Law School](#) [Law](#) [Envir, Nat Resources, Amer Ind](#)

[LAWS-6732 \(3\) Renewable Energy Project Finance and Development](#)

Examines renewable energy and how legal topics impact financing projects. Reviews structure, regulation, and functioning of electric energy industry and laws applicable to development, ownership and operation of renewable energy projects across technologies. Addresses legal policy, economic and financing issues associated with expansion and improvement of the transmission grid to support renewable energy development. Prerequisites: Restricted to Law students only.

Law School | Law | Envir, Nat Resources, Amer Ind

LAWS-6803 (3) Quantitative Methods

Equips students to deal effectively with experts, whether as consultants or as adverse witnesses, and to enable the identification of a quantitative issue. Helps students to become multi-dimensional in quantitative literacy. Enables students to be comfortable reading statistical arguments, performing basic analyses, writing about statistics, expressing quantitative ideas in graphs, questioning an expert, and understanding the power of computer programming.

Law School | Law | Litigation and Procedure

LAWS-6856 (2) Advanced Legal Research

Offers an in-depth look at research resources and methods. Includes sources from the judicial, legislative, and executive branches of federal and state government; research in topical areas such as environmental law, taxation, and international law; and extensive coverage of secondary and nonlaw resources. Covers both print and electronic sources. Students will have several assignments and a final project.

Law School | Law | Research and Writing

LAWS-6866 (1) Colorado Legal Research

Surveys resources and methods to effectively research Colorado law. Covers primary and secondary resources including Colorado statutes, cases and digests, regulations, and constitution and practice materials. Covers how to research Colorado municipal law and other Colorado topics. Prerequisites: Restricted to Law students only.

Law School | Law | Research and Writing

LAWS-6876 (2) Legal Research Skills for Practice

Approaches legal research from a practice-focused perspective using hands-on sessions in the library. Instructs: how to find and use resources specific to a particular practice area; how to evaluate and weigh strengths and weaknesses of the various legal resources available; and, how to use legal resources efficiently. Includes research strategies and methods, primary and secondary resources, and research using library catalogs and Westlaw, Lexis, and other vendors. Prerequisites: Restricted to Law students only.

Law School | Law | Research and Writing

LAWS-6886 (3) Advanced Legal Research and Analysis

Develops students' ability to think critically about and solve current legal problems. Evaluates the benefits and detriments of both print and on-line legal resources, and how to create an efficient research plan. Formulates and applies research strategies to real-world legal problems, and uses legal analysis to refine and improve research results. Note: students who have taken LAWS 6856 Advanced Legal Research course may not enroll in this course. Prerequisites: Restricted to Law students only.

Law School | Law | Research and Writing

LAWS-6896 (3) Advanced Legal Research and Writing for Practice

Advances and improves legal research and writing skills learned in first year. Proposes variety of assignment types across substantive and procedural areas to prepare for experiences as summer associates or new attorneys. Prerequisites: Restricted to Law students only.

Law School | Law | Research and Writing

LAWS-7003 (3) Federal Courts

Looks at structure and jurisdiction of the federal courts, emphasizing problems of federalism and separation of powers and their relationship to resolution of substantive disputes.

Law School | Law | Litigation and Procedure

LAWS-7005 (3) Media Law

Surveys common, statutory, and regulatory law as applied to the mass media. Focuses on the law as it affects the gathering and publishing of news. Also examines the regulation of the electronic media.

Law School | Law

LAWS-7011 (3) Creditors' Remedies and Debtors' Protection

Examines typical state rights and procedures for the enforcement of claims and federal and state law limitations providing protection to debtors in the process. Includes prejudgment remedies, statutory and equitable remedies, fraudulent conveyance principles, and exemptions and other judicial protections afforded debtors. Prerequisites: Restricted to Law students only.

Law School | Law | Business

LAWS-7013 (2) Supreme Court Decision Making

Students deliberate over several important cases as "Justices" of the Supreme Court. Class is divided into three "Courts" with the first hour spent in deliberation and the second hour in discussion of the deliberative process as well as the substantive issues.

Law School | Law | Litigation and Procedure

LAWS-7015 (3) First Amendment

Examines speech and religion clauses of the First Amendment. Includes the philosophical foundation of free expression, analytical problems in First Amendment jurisprudence, and the relationships between free exercise of religion and the separation of church and state. Prerequisites: Restricted to Law students only.

Law School | Law | Government and Public

LAWS-7019 (1-2) Advanced Clinical Practicum

Enables a clinical student an optional 1-2 credit course to complete an ongoing clinic project that does not reach its natural conclusion during the regular term of the clinic. The practicum may be used in connection with any existing clinical course, but only with permission, and under the supervision of the clinical faculty member. A clinical student must complete a minimum of 50 hours of work per credit taken. Prerequisites: Restricted to Law students only.

Law School | Law | Practice: Clinical & Simulation

LAWS-7021 (3-4) Bankruptcy

Briefly examines nonbankruptcy business rehabilitation devices, followed by basic principles of federal bankruptcy law and the bankruptcy court system. Concludes with attention to business reorganizations under Chapter 11 of the Bankruptcy Code. Recommended prereq., LAWS 6001 and 7011.

Law School | Law | Business

LAWS-7023 (2) Jury Selection and History

Studies the history of the jury from ancient times through the implications of Apprendi, the grand jury from the time of Henry II through modern federal practice, and current jury selection procedures, both federal and Colorado, both civil and criminal. Experienced trial attorneys will work with students to demonstrate jury selection.

Law School | Law | Litigation and Procedure

LAWS-7024 (2-3) Real Estate Planning

Considers various contemporary legal problems involved in the ownership, use, development, and operation of real estate. Emphasizes the income tax and financing aspects of commercial and residential use and development such as shopping plazas and apartment buildings. Same as ACCT 6730.

Law School | Law | Property

LAWS-7025 (3) Civil Rights Legislation

Presents a comprehensive study of federal civil rights statutes briefly reviewed in other courses (e.g., Constitutional Law or Federal Courts). Studies federal civil rights statutes, their judicial application, and their interrelationships as a discretely significant body of law of increasing theoretical interest and practical importance.

Law School | Law | Government and Public

LAWS-7029 (3) Appellate Advocacy Clinic

Provides a clinical course that enables students to work on briefs of criminal cases being handled by the Appellate Division of the Public Defender or Attorney General's Office. Instruction in oral advocacy is given. Enrollment limited to eight students.

Law School | Law | Practice: Clinical & Simulation

LAWS-7031 (3) Regulation of Financial Institutions

Focuses on the core banking law and works outward to cover a broader spectrum of bank-like financial institutions. Covers bank licensing, restrictions on bank business, regulating safety and soundness of banks, consumer protection of depositors and other bank customers, and regulatory examination and enforcement. Prerequisites: Restricted to Law students only.

Law School | Law | Business

LAWS-7045 (3) Criminal Procedure: Adjudicative Process

Focuses primarily on criminal procedure at and after trial. Looks at bail, prosecutorial discretion, discovery, plea bargaining, speedy trial, jury trial, the right to counsel at trial, double jeopardy, appeal, and federal habeas corpus.

Law School | Law | Litigation and Procedure

LAWS-7055 (3) Education Law

Considers issues raised by the interaction of law and education. Issues may include the legitimacy of compulsory schooling, alternatives to public schools, socialization and discipline in the schools, and questions of equal educational opportunities.

Law School | Law | Government and Public

LAWS-7061 (1) Contract Drafting

Begins with value creation by transactional lawyers, and emphasizes the opportunity for lawyers to reduce information and agency costs, and mitigate strategic behavior by using tools such as disclosure, representation and warranties, incentive compensation and earnouts. Shifts to negotiation and drafting, focusing on basic drafting principles and strategies to advance one's clients' interests. Introduces the basic framework of contracts (recitals, reps, and warranties, capitalized terms, definitions, indemnifications and escrow). Prerequisites: Restricted to Law students only.

LAWS-7065 (3-4) Immigration and Citizenship Law

Covers legal issues pertaining to noncitizens of the United States, especially their right to enter and remain as immigrants and nonimmigrants. Topics include admission and exclusion, deportation, and refugees and political asylum. Approaches topics from various perspectives, including constitutional law, statutory interpretation, planning, ethics, history, and policy. Prerequisites: Restricted to Law students only.

[Law School](#)
[Law](#)
[International](#)

LAWS-7079 (2) Wrongful Convictions

Focuses on the issues and remedies in cases of people who have been convicted, whose traditional appellate remedies have been exhausted, and who continue to claim actual innocence. Preference given to those who have taken or are taking more criminal procedure courses.

[Law School](#)
[Law](#)

LAWS-7085 (2) Law and Religion

Uses judicial decisions as well as historical and theoretical materials to explore significant aspects of the relationship between law and religion. The religion clauses of the First Amendment are a central but not exclusive subject of study. Offered in alternate years.

[Law School](#)
[Law](#)
[Jurisprudence and Perspective](#)

LAWS-7095 (2) Women in Law

Explores the role of women in the legal system by looking at women as parties, jurors, witnesses, lawyers, law professors, and judges. Explores the relationship of law and society to women as victims and offenders. Investigates law and society's response to adoption, lesbian/gay issues, rape, surrogate and bad mothers, and sexual harassment.

Law School Law

LAWS-7100 (2-3) International Criminal Law: Theory and Practice

Exposes students to the rapidly growing body of jurisprudence, both international and national, wherein international humanitarian and human rights law are being applied for the purposes of prosecution, trial and punishment of individuals alleged to be responsible for the commission of war crimes, crimes against humanity, genocide and, more recently, terrorism. Prereq., LAWS 6400.

Law School Law International

LAWS-7101 (4) Deals: Engineering Financial Transactions

Explores the business lawyer's role in creating value by helping clients identify, assess, and manage business risks through efficient contract design while achieving the optimal legal, tax or regulatory treatment for the deal. Includes case studies of actual transactions.

Law School Law Business

LAWS-7102 (2-3) Oil and Gas

Deals with the legal problems associated with private arrangements for the ownership and development of oil and gas: deeds and leases to oil and gas rights, trespass, adverse possession, implied covenants in leases, conveyances of fractional interests, and the interaction of private rights and conservation regulation. Prerequisites: Restricted to Law students only.

Law School Law Envir, Nat Resources, Amer Ind

LAWS-7105 (3) Family Law

Focuses on nature of marriage, actions for annulment and divorce, problems of alimony and property division, separation agreements, and custody of children. Also considers illegitimacy, abortion, contraception, the status of married women in common law and under modern statutes, and relations of parent and child. Prerequisites: Restricted to Law students only.

Law School Law Family, Gender, and Health

LAWS-7106 (1-2) Moot Court Competition

Offers an intensive involvement in legal research, appellate brief writing, and oral arguments in a competitive context. Student finalists may continue involvement in regional and national competitions. Prerequisites: Restricted to Law students only.

Law School Law Practice: Clinical & Simulation

LAWS-7111 (3) Contract Theory: Collisions of Contracting and Culture

Explores various contract theories and principles emanating from classical and neoclassical law, legal realism, law and economics, critical legal studies, law and society, relational theory, and others. Considers and critiques these theories as applied to particular contracting cultures, especially as applied to construction contracts.

Law School | Law | Business

LAWS-7115 (2) Juvenile Justice

Covers a wide array of issues dealing with the legal rights of the unborn, children, and juveniles. Covers the legal status of parent-child abuse, delinquency and crime, and emancipation. Prerequisites: Restricted to Law students only.

Law School | Law | Family, Gender, and Health

LAWS-7116 (1) Barristers Council

Law School | Law

LAWS-7121 (3) Advanced Contracts: Commercial Transactions

Studies Article 2 and Article 2A of the Uniform Commercial Code, together with the Convention and the International Sale of Goods. Advanced contracts topics are explored in depth. Among other subjects, warranties, title, remedies, and risk of loss in the sale of lease of goods will be studied.

Law School | Law | Business

LAWS-7122 (2-3) Mining and Energy Law

Addresses major issues affecting the development of mineral resources through mining activity. Includes the regulation of the impacts of mining on the environment on both public and private land. Covers the Mining Law of 1872, the Federal Coal Leasing Amendments, and state regulation of the impacts of mining on the environment.

Law School | Law | Envir, Nat Resources, Amer Ind

LAWS-7125 (2) Advanced Domestic Relations

Offers advanced study of several domestic relations subjects, including both theoretical and lawyering issues. Tentative subjects include discovery, client interviewing and deposition preparation, asset valuation, working with expert witnesses, children as clients, and alternative dispute resolution. Recommended prereq., LAWS 7105.

Law School | Law

LAWS-7128 (2-4) Jurisprudence

Addresses a number of fundamental questions, such as: What is law? What should it be? How is it created? Our readings consist of cutting-edge articles from leading modernist/postmodernist schools of thought including legal formalism, legal realism, interpretive theory, law and economics, feminist jurisprudence, critical legal studies, and law and literature. Same as LAWS 8128.

Law School | Law | Jurisprudence and Perspective

LAWS-7132 (3) Energy, Insecurity, Sustainable Law

Examines why national security deals not only with armed aggression and the ability to thwart military invasions or subversion, but also includes critical threats to vital national and international support systems such as the economy, energy, and the environment.

Law School | Law | Envir, Nat Resources, Amer Ind

LAWS-7135 (3) Parent, Child, and State

Examines the legal rights of parents and children in a constitutional framework, as well as the state's authority to define and regulate the parent-child relationship. Addresses rights of parents and children to freedom of expression and religious exercise, termination of parental rights and adoption, paternity orientation, and culture in defining the family.

Law School | Law | Family, Gender, and Health

LAWS-7145 (3) Comparative Family Law

Examines and critiques law, legal institutions and traditions of the country of focus and the US as they affect children, families, and work. Enhances research and writing skills, including field and international research. Contributes to host country through scholarship and service. Increases cultural competence through active engagement with peers and with social justice issues in another country. Includes required field study component and service learning project over spring break. Prerequisites: Restricted to Law students only.

Law School | Law | Family, Gender, and Health

LAWS-7154 (3) Land Use Planning

Explores mechanisms for public control of private land uses, such as planning, zoning, and regulation of land development; including consideration of federal and state constitutional and statutory limitations on local governments. Offered in alternate years.

Law School | Law | Property

LAWS-7159 (2) Advanced Trial Advocacy

Offers an advanced course covering trial practice elements. Open only to students who have taken LAWS 6109. Prerequisites: Restricted to Law students only.

Law School | Law | Practice: Clinical & Simulation

LAWS-7164 (2) Land Conservation Law

Focuses on private land conservation efforts in the United States, and particularly Colorado, and also considers public land conservation programs. Analyzes real property principles and instruments used to protect land, and the development and acceptance of conservation easements in gross as a mechanism for protection, financing mechanisms for land conservation, including direct government funding and indirect funding through tax incentives at the federal, state and local levels. Understanding of Real Property and Tax concepts helpful.

Law School | Law | Property

LAWS-7169 (2) Motions Advocacy

Provides practical training in preparing and arguing pretrial, post-trial, and chambers motions to an experienced federal judge based on materials from actual case files. Assigns some research papers. Limited to 15 third-year students with interest in trial advocacy and willingness to participate in confrontational exercises. Counts as practice hours. Prerequisites: Restricted to Law students only.

Law School | Law | Practice: Clinical & Simulation

LAWS-7200 (3) Anthropology of Law

Reviews the relationship between the social and cultural features of both developed and developing country societies and the formal and informal legal institutions within them. Considers the nature of social control and constraint, judicial reasoning, fact finding, conciliation, mediation and arbitration, and legal discourse.

Law School | Law

LAWS-7201 (3) Antitrust

Studies American competition policy: collaborations among competitors, including agreements on price and boycotts, definition of agreement, monopolization, vertical restraints such as resale price maintenance, and territorial confinement of dealers. Same as TLEN 5270. Offered in alternate years.

LAWS-7202 (3) Environmental Law

Examines and analyzes important federal pollution control statutes, including the National Environmental Policy Act, the Clean Air Act and Clean Water Act, Solid Waste Act, and Superfund. Considers related economic theory, ethics, and policy issues.

[Law School](#)
[Law](#)
[Envir, Nat Resources, Amer Ind](#)

LAWS-7205 (3) Administrative Law

Covers practices and procedures of administrative agencies and limitations thereon, including the Federal Administrative Procedure Act, and the relationship between courts and agencies.

[Law School](#)
[Law](#)
[Government and Public](#)

LAWS-7207 (3) Federal Estate and Gift Tax

Analyzes federal estate and gift taxation of inter vivos and testamentary transfers, introduces income taxation of estates and trusts, and involves elementary estate planning. Prerequisites: Restricted to Law students only.

[Law School](#)
[Law](#)
[Taxation](#)

LAWS-7209 (4) Natural Resources Law Clinic

Offers hands-on experience in the practice of natural resources law in the Rocky Mountain region to a select number of clinic students. The clinic's docket of active cases focuses on public land law and the environmental statutes protecting those lands and their resources. Students participate in projects that test the full range of lawyering skills, including traditional litigation, administrative

advocacy, legislative drafting, and the conduct of complex negotiations and settlements. Prerequisites: Restricted to Law students only.

Law School Law Practice: Clinical & Simulation

LAWS-7211 (3) Business Planning

Focuses on the development and use of concepts derived from a number of legal areas in the context of business planning and counseling. Topics such as formation of business entities, sale of a business, recapitalization, division, reorganization, and dissolution are considered. Prereqs., LAWS 6007, 6201, and 6251 or 6211.

Law School Law Business

LAWS-7212 (2) Environmental Litigation

Examines the litigation strategies and procedures used to enforce and defend against enforcement under environmental protection statutes, such as the Clean Water Act, Clean Air Act, Resource Conservation and Recovery Act, the Comprehensive Environmental Response, Compensation and Liability Act of 1980, and the Toxic Substances Control Act. Covers civil enforcement, and citizen's suits.

Law School Law Envir, Nat Resources, Amer Ind

LAWS-7217 (2) Estate Planning

Discusses problems and solutions for owners of various-sized estates and different types of assets including jointly-held property, stock in closely-held corporations and farms, analysis of federal taxation of generation-skipping transfers in trust, postmortem estate planning, and drafting of trusts and wills. Prerequisites: Requires pre-requisite course of LAWS 7207.

Law School Law Taxation

LAWS-7221 (2-3) Government Regulation of Business.

Covers themes that explore the nature of the regulatory state and the realities of how businesses react to regulation. Provides an understanding of regulatory institutions; the tools of governmental regulation; and a critical perspective on regulation.

Law School Law Business

LAWS-7222 (2-3) Environmental Decision-Making

Explores the foundational issues that underlie agency decision-making, including environmental ethics, cost-benefit analysis, risk assessment, constitutional law, and administrative law. Compares and contrasts National Environmental Policy Act and the National Historic Preservation Act and the Endangered Species Act.

Law School Law Envir, Nat Resources, Amer Ind

LAWS-7228 (2) Intellectual Origins of the Constitution

Examines the views of the Constitution's framers as expressed in contemporaneous and antecedent writings and debates. Offered in alternate years.

Law School Law

LAWS-7232 (3) Energy Justice

Establishes why nearly a third of the world populated by the energy oppressed poor, presents a major national and international "legislative" or socio political problem calling for answers from governments and civil societies in the developed and developing world. Explains and elucidates the concept of energy justice, its jurisprudential heritage, and its meaning and relevance in contemporary society. Case studies present problem solving frameworks spanning the political, social, behavioral, engineering, natural sciences, and law. Prerequisites: Restricted to Law students only.

Law School Law Envir, Nat Resources, Amer Ind

LAWS-7241 (3) Telecommunications Law and Policy

Examines laws governing telecommunications industries, including federal and state regulation and international aspects. Includes telephone, cable, satellite, cellular, and other wireless systems, and the Internet. Same as TLEN 5240. Prerequisites: Restricted to Law students only.

Law School Law Intell Prop, Tech, and Telecom

LAWS-7248 (3) History of Criminal Justice

Explores the social, cultural, and legal history of Anglo-American criminal justice from the 17th to the 20th centuries. Also examines tensions between various methods that historians employ to study crime and law.

Law School Law

LAWS-7251 (3) Non-Profit Law

Examines the creation of a non-profit organization, in particular whether to choose a trust or a corporate form, how to qualify for federal tax exemption, and differences between private foundations and public charities. Examines fiduciary duty issues, restrictions on political activity and private benefit, and unrelated business income tax. Addresses tax incentives for charitable giving and state fundraising laws.

Law School Law

LAWS-7255 (3) Local Government

Studies state legislative and judicial control of the activities, powers, and duties of local governmental units, including home-rule cities and counties, and some problems of federal, state, and local constitutional and statutory limitations on governmental powers when exercised by local governmental units (e.g., the powers to regulate private activities, tax, spend, borrow money, and condemn private property for public uses). Offered in alternate years.

Law School | Law | Government and Public

LAWS-7261 (3) Corporate Finance

Examines a variety of important legal issues related to the funding and financing corporations including creditor protection laws, the Trust Indenture Act of 1939, fiduciary duties, bond indenture provisions, securities laws, and rights of equity holders. Covers efficient capitalization structures, corporated valuation techniques, capital markets and the efficient market theory, and cost of capital concept. Prereq., LAWS 6211 or 6251.

Law School | Law | Business

LAWS-7271 (3) Venture Capital and Private Equity

Provides overview of the legal and financial principles to represent privately held companies, their founders and managers, and their investors. Emphasizes transaction structuring rather than judicial opinions. Includes the organization and financing of start-ups, structuring buyout transactions, exit strategies, legal organization of investment funds and other financial intermediaries. Discusses the relevant regulatory landscape, including securities law, bankruptcy, ERISA, and tax law.

Law School | Law | Business

LAWS-7285 (2-3) Education and the Constitution

Teaches the substantive constitutional law governing public education. Students will teach constitutional materials to high school students in the local Denver Metro area high schools. Interested students must apply and requires a commitment to a full-year curriculum. Encourages individual development as teachers, writers, and critical thinkers and provides an opportunity to grow as colleagues and teammates. Recommended prereq. LAWS 7055. Prerequisites: Restricted to Law students only.

Law School | Law | Government and Public

LAWS-7300 (2-3) International Litigation

Examines the special issues that arise in litigation in U.S. courts when one or more of the parties is a foreign individual, corporation, or government, or when the subject of the litigation concerns events occurring wholly or partly outside of this country. Includes personal jurisdiction over foreign defendants, extraterritorial service of process and evidence gathering, choice of forum, foreign sovereign immunity, the act of state doctrine, extraterritorial application of U.S. law, and recognition of enforcement of foreign judgments.

Law School | Law

LAWS-7301 (2-3) Copyright

Examines state and federal laws relating to the protection of works of authorship ranging from traditional works to computer programs. Studies the 1976 Copyright Act as well as relevant earlier acts. Gives attention to state laws, such as interference with contractual relations, the right of publicity, moral right, protection of ideas, and misappropriation of trade values, that supplement federal copyright. Same as TLEN 5265.

Law School Law Intell Prop, Tech, and Telecom

LAWS-7303 (3) Complex Civil Litigation

Covers civil procedure in modern complex multiparty suits, including class actions in such settings as employment discrimination and mass torts, and problems in discovery, joinder, res judicata, collateral estoppel, and judicial management in such suits. Offered in alternate years.

Law School Law Litigation and Procedure

LAWS-7307 (3) Taxation of Natural Resources

Considers the federal income tax aspects applicable to the exploration for, the development of, and the operation of natural resources, as well as the financing thereof. Also considers oil and gas, hard minerals, timber, and water. Offered in alternate years. Recommended prereq., LAWS 6007.

Law School Law

LAWS-7309 (2-4) American Indian Law Clinic

Offers a clinical education course involving participation in the representation and advocacy of Indian causes---land or water claims, Indian religious freedom, job or other discrimination based on race, and issues implicating tribal sovereignty. Recommended prereq., LAWS 7725. Prerequisites: Restricted to Law students only.

Law School Law Practice:Clinical & Simulation

LAWS-7310 (3) International Dispute Settlement

Examines various mechanisms for the settlement of international disputes. Includes negotiation, inquiry, mediation, conciliation, arbitration, and adjudication. Focuses on intergovernmental dispute resolution.

Law School Law International

LAWS-7311 (2-3) Patent Law

Covers selected topics, such as patentable subject matter, patentability, and utilization of patent rights through licensing and infringement litigation. Covers practice and procedure of the patent and trademark office.

LAWS-7320 (3) International Criminal Law

Surveys international human rights law and international crime and punishment. Addresses idea of rights from a historical, philosophical, conceptual and analytical perspective; explores the "Primary rules of conduct" as well as adjudication and remedies, and selected rights from a comparative perspective. Recommended prereq., LAWS 6400.

[Law School](#)
[Law](#)
[International](#)

LAWS-7321 (1-2) IP and Technology Contracting

Covers transactions, and often high-tech deals involving intellectual property rights. Studies IP ownership; assignment or rights; commercialization transactions (licensing, distribution, strategic); antitrust; and emerging issues. Gives students essential tools to draft and analyze technology contracts. Prereqs., LAWS 6301 or 7301.

[Law School](#)
[Law](#)
[Intell Prop, Tech, and Telecom](#)

LAWS-7323 (2) Patent Litigation

Focuses on unique aspects of patent litigation: substantive patent law, civil procedure, federal jurisdiction, and litigation strategy; includes claim construction, infringement, anticipation and obviousness defenses, unenforceability challenges, declaratory judgments, injunctions, damages, settlements, licenses, and trial strategy. Of interest and useful to those interested in intellectual property generally, not just patents or in litigation.

[Law School](#)
[Law](#)
[Intell Prop, Tech, and Telecom](#)

LAWS-7325 (3) Election Law

Examines the rapidly evolving field of election law: the right to vote, voting procedures, redistricting, candidate selection, campaign finance laws, and direct democracy. Emphasizes federal law, including applicable constitutional jurisprudence.

Law School | Law | Government and Public

LAWS-7331 (2) Sports Law

Covers the application of rules from agency, antitrust, contracts, constitutional law (including sex discrimination), labor law, property, torts, unincorporated associations, and other subjects to those persons involved in the production and delivery of athletic competition to consumers. Explores the development of the application of these rules to a sports setting and related economic issues. Prerequisites: Restricted to Law students only.

Law School | Law | Business

LAWS-7333 (2) Advanced Evidence: Forensic Science and the Criminal Courts

Explores the admissibility of forensic science opinion and expert testimony, its use as evidence at a trial, and the challenges that such evidence may pose for the courts and the entire criminal justice system in the future.

Law School | Law | Litigation and Procedure

LAWS-7335 (1) The Law of Presidential Elections

Examines the laws and regulations that uniquely shape presidential selection, analyzing practical applications as well as the broader constitutional and policy considerations. A combination of federal, state, and local laws shapes how Americans select their president. But more than ever before, Americans are questioning the rules that influence presidential selection, such as the major party primary system, ballot access, presidential campaign financing, and the electoral college.

Law School | Law

LAWS-7341 (3) Trademark and Unfair Competition Law

Examines trademark protection, the interaction of trademark and unfair competition law with other intellectual property doctrines, the requirements for acquiring and retaining federal trademark rights, false advertising and other misrepresentations, the right of publicity and related claims, remedies for infringement, and international aspects of trademark protection.

Law School | Law | Intell Prop, Tech, and Telecom

LAWS-7345 (2) Comparative Criminal Procedure

Takes an in-depth look at some of the basic features of modern criminal justice systems that share the civil law tradition with the hope that such study will provide a vehicle for a deeper understanding of the strengths and weaknesses of the American system of criminal justice. Prereq., LAWS 6045.

| | | |
|------------|-----|--------------------------|
| Law School | Law | Litigation and Procedure |
|------------|-----|--------------------------|

LAWS-7361 (2) Privacy, Security, and Digital Rights Management

Introduces students to the laws that regulate the basic technologies of the Internet and the management of information in the digital age. It examines the most significant statutes, regulations, and common law principles that comprise this emerging legal framework, including the Federal Wiretap Act, the HIPAA Privacy Rule, and the Digital Millennium Copyright Act.

| | | |
|------------|-----|--------------------------------|
| Law School | Law | Intell Prop, Tech, and Telecom |
|------------|-----|--------------------------------|

LAWS-7371 (3) Standardization and Standards Wars

Examines current issues in the standardization of telecommunications and information technologies. Covers the importance of standards, government and private sector perspectives, and the impact of information age technologies on standards of development. Emphasizes key national and international organizations.

| | | |
|------------|-----|--------------------------------|
| Law School | Law | Intell Prop, Tech, and Telecom |
|------------|-----|--------------------------------|

LAWS-7375 (3) U.S. Races and Justice Systems

Examines the unique but related legal, social, and economic problems and accomplishments of those persons in this country whose ancestry originated in Africa, Asia, Latin America, or North America, and explores the developing literature on whites and whiteness.

| | |
|------------|-----|
| Law School | Law |

LAWS-7381 (3) Intellectual Property Counseling and Prosecution

Introduces strategic development and procurement of IP, including patents, trademarks, copyrights, and trade secrets. Evaluates the latest cases and legal trends from a practical and strategic perspective. Focuses on widely accepted best practices and critical thinking in these areas. Prerequisites: Restricted to Law students only.

| | |
|------------|-----|
| Law School | Law |
|------------|-----|

LAWS-7401 (3) Securities Regulation

Stresses statutory interpretation of the various federal statutes regulating the issue of corporate securities and the cases and regulations that have arisen out of those statutes.

| | | |
|------------|-----|----------|
| Law School | Law | Business |
|------------|-----|----------|

LAWS-7402 (2) The Law of Toxic and Hazardous Wastes

Examines the EPA's federal hazardous waste statutes, including the Resource Conservation and Recovery Act of 1976 (RCRA), and the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA). Analyzes the RCRA "Cradle-to-grave" hazardous waste program, and addresses the evolving CERCLA liability scheme and cleanup process.

Law School | Law | Envir, Nat Resources, Amer Ind

LAWS-7405 (2-3) Health Law 2: Medical Malpractice and Quality Regulation

Explores (1) the law controlling ethical issues that arise during the delivery of medical care, (2) the substantive law of medical malpractice and tort reform aimed at reducing the frequency and severity of medical malpractice verdicts, and (3) the practical aspects of litigating a medical malpractice case. Cross-listed at the Health Sciences Center; will include field trips there.

Law School | Law | Family, Gender, and Health

LAWS-7406 (1) International Moot Court Competition

Open only to students who actively participate in the seminar preparing for the competition, in the preparation of memorials for the competition, and in the practice of oral arguments or regional oral arguments.

Law School | Law | Practice:Clinical & Simulation

LAWS-7409 (3) Legal Negotiation

Explores the fundamentals of effective negotiation techniques and policies for lawyers. Students engage in mock negotiations of several legal disputes. Credit is not given for both LAWS 7419 Legal Negotiation and Dispute Resolution and this course.

Law School | Law | Practice:Clinical & Simulation

LAWS-7411 (2-3) Mergers, Acquisitions, and Reorganizations

Studies the planning of corporate mergers, acquisitions, and reorganizations, examining the application and integration of state corporate law, federal securities law, accounting principles, tax law, labor law, products liability law, environmental law, ERISA, and antitrust law.

Law School | Law | Business

LAWS-7420 (2) European Union Law

Covers all the essential aspects of the EU law: EU institutions, competences, the making and the application of EU law, and the content of the fundamental principles of EU law and the common market.

Law School | Law

LAWS-7425 (2-3) Health Law

Acquaints students with the issues arising at the interface between law and medicine through analysis of cases and other materials. Critically analyzes methods used by courts and legislatures to address medical/legal problems in an effort to determine whether the legal resolution was reasonable and appropriate in light of medical, social, and political considerations. Offered in alternate years.

Law School | Law | Family, Gender, and Health

LAWS-7428 (3) Bioethics Law and Literature

Interdisciplinary study of law, medicine, and bioethics. Addresses such issues as confidentiality in medical treatment, rejecting life-sustaining treatment, death and dying, reproductive law and genetic technology, human experimentation, and access to health care.

Law School | Law

LAWS-7429 (2) Alternative Dispute Resolution

Examines a variety of dispute resolution processes, such as mediation, arbitration, minitrials, and court-annexed settlement procedures, as alternatives to traditional court adjudication. Credit not given for both LAWS 7419 Legal Negotiation and Dispute Resolution and this course. Prerequisites: Restricted to Law students only.

Law School | Law | Practice:Clinical & Simulation

LAWS-7439 (2-3) Mediation

Explores mediation, one of the more important methods of alternative dispute resolution, and the legal issues that may arise related to mediation. Considers what kinds of persons and disputes are most appropriate for mediation. Includes role playing.

Law School | Law | Practice:Clinical & Simulation

LAWS-7440 (3) International Human Rights and Humanitarian Law

Surveys international human rights both in law and in philosophy, both current and historical.

LAWS-7449 (2-4) Juvenile Law Clinic

Examines the world of child welfare from the view of the child client, by representing their best interests in abuse and neglect cases. As Guardians ad litem, students will represent children in abuse and neglect cases from the beginning, at the temporary shelter hearing, through the conclusion of the case at a permanency orders hearing. Prereq., LAWS 6353. May be repeated up to 8 total credit hours.

[Law School](#)
[Law](#)
[Practice: Clinical & Simulation](#)

LAWS-7451 (3) Law and Finance for Entrepreneurs

Studies unique legal problems faced by entrepreneurs, including formation issues (choice of entity, rights of the founders, initial investors), operation issues (governance, key employees, intellectual property, financing), IPOs, and buy-outs.

[Law School](#)
[Law](#)
[Business](#)

LAWS-7458 (2) Law and Literature

Focuses on the question of what literature can teach lawyers through a variety of literary works and films. Covers traditional works by Shakespeare, Tolstoy, Camus, Kafka, and Melville, as well as more contemporary works by Toni Morrison and Norman Mailer. Several short reflection papers, a journal, and a final eight page paper are required.

[Law School](#)
[Law](#)

LAWS-7475 (2) Advanced Torts

Studies selected tort actions and theories. Topics covered may include "Dignitary torts" (e.g., defamation, privacy, etc.), business torts, and product liability. Offered in alternate years.

Law School | Law | Government and Public

LAWS-7505 (2) Sexuality and the Law

Examines the regulation of sexuality in local, state, and federal law, with particular emphasis on sexual orientation. Explores how sexuality shapes, and is shaped by, an array of laws and policies, which may include family law, military regulations, tax law, employment law, trusts and estates, obscenity law, and criminal law.

Law School | Law | Family, Gender, and Health

LAWS-7507 (2-3) State and Local Taxation

Examines the operation of the income, property and sales tax used to finance our state and local governments. Includes requirements of equal protection and due process. Covers jurisdiction to tax allocation of the tax base among different state and local governments. Same as ACCT 6760.

Law School | Law

LAWS-7509 (1) Mock Trial Competition

Student teams further develop trial and advocacy skills in a competitive mock-trial format involving two or more rounds of trials. Requires preparation of trial briefs and drafting other court pleadings and documents. Credit is limited to the top two teams (six students). Student finalists may continue involvement in regional and national competitions. May be repeated within the term up to 4 total credit hours. Prerequisites: Restricted to Law students only.

Law School | Law | Practice: Clinical & Simulation

LAWS-7513 (3) Domestic Violence

Explores the law, policy, history, and theory of domestic violence. Examines the limits of legal methods and remedies for holding batterers accountable and keeping victims safe; the dynamics of abusive relationships; the history of the criminal justice system's response to domestic violence; the defenses available to battered persons who kill their abusers; the legal paradigm of the sympathetic victim; psychological and feminist theories about abusive relationships; civil rights and tort liability for batterers and third parties; and the intersection of domestic violence with international human rights.

Law School | Law | Family, Gender, and Health

LAWS-7515 (3) Poverty Law

Explores the legal and policy responses to poverty in the United States and addresses how the law shapes the lives of poor people and communities. Examines the extent of poverty in the United States, the root causes, and the historical development of social welfare policy. Focuses on the rights-based aspect of poverty law and various policies that attempt to ameliorate poverty. Prerequisites: Restricted to Law students only.

Law School Law Government and Public

LAWS-7523 (2) Juvenile Law

Takes a critical look at the juvenile justice system and how it responds to the needs of juveniles who are either delinquents and/or victims of abuse. Issues include the rights and responsibility of parents, parental responsibility programs, delinquents, and the future of our juvenile courts.

Law School Law

LAWS-7525 (3) Race and American Law

Examines the judiciary's approach to racial discrimination from America's colonial period to the present day. Concludes with an analysis of the contemporary status of racial subordination in the legal system and considers recent scholarly critiques of the law's limitations in effecting racial justice. Employs an interdisciplinary approach and covers the experiences of American Indians, African Americans, Asian Pacific Americans, and Chicana/os.

Law School Law Government and Public

LAWS-7529 (1) Appellate Advocacy Competition

Gives students the opportunity to participate in an intermural appellate advocacy competition, in which a brief must be filed and reviewed, critiqued, and deemed credit-worthy by a member of the faculty. (Law School Rule 3-2-9 (b) should be consulted prior to enrollment.)

Law School Law

LAWS-7541 (2-3) Employment Discrimination

Examines statutory and constitutional prohibitions of discrimination in employment on the basis of race, gender, age, religion, national origin, and disability.

Law School Law Business

LAWS-7601 (2-3) Business Transactions

Provides a practical understanding of how to apply the law in both transactional and litigation settings. Gives an interdisciplinary look at how various areas of the law are brought together in common factual settings. Teaches students to negotiate, document, and close the acquisition of a business covering the areas of practice of corporate, contracts, real property, secured transactions, and bankruptcy law. Tests, in a litigation setting, the decisions made during the acquisition stage.

Law School Law Business

LAWS-7605 (2) Refugee and Asylum Law

Focuses on protections offered under international and domestic law for persons who are threatened by persecution or other adverse conditions in their country of origin. Covers who is a refugee and the protections they have or do not have under United States and international law.

Law School Law International

LAWS-7609 (1-2) Law Practice Management

Studies the establishment of a solo or small-firm legal practice. Topics include the business structure (PC, LLC, etc.), office systems, marketing and development, staffing, liability insurance, managing time, technology, and billing. (This practice course counts toward the 14 credit hour maximum of practice hours.) Course supported by the Section of Law Practice Management of the ABA in memory of Harold A. Feder, CU Law '59.

Law School Law Practice:Clinical & Simulation

LAWS-7611 (2-3) International Business Transactions

Examines the sources of international business law, the relationship between such law and the U.S. legal system, the choice of law in international business disputes, the special issues that arise when doing business with foreign governments, the law governing international sales and the shipment of goods, and international intellectual property protection. Offered in alternate years.

Law School Law International

LAWS-7615 (4) Immigration Law and Immigrants' Rights

Addresses four broad questions: Who is a citizen of the United States? Who else can come to this country? When and why can noncitizens be forced to leave? Who has the authority to answer these questions? These questions prompt us to examine the history of U.S. immigration, the constitutional-statutory-regulatory framework that governs immigration and citizenship law, and the federal agencies that administer it. Also addresses contemporary challenges to, and assertions of, immigrants' rights. Same as PSCI 7181. Prerequisites: Restricted to Law students only.

Law School Law International

LAWS-7617 (3) International Taxation

Covers basic aspects of the United States taxation of income earned abroad by its citizens and the taxation of income derived by foreign persons from U.S. sources, including the implications of income tax treaties. Prereq., LAWS 6007 or 6157. Same as ACCT 6780.

Law School Law Taxation

LAWS-7619 (2) Entrepreneurial Law Clinic

Advise indigent clients who need legal services in the founding of their business or not-for-profit firms, registering LLCs, and drafting employment and intellectual property agreements. Prereq.,

two of the following courses: Agency Partnership and the LLC, Corporations, Securities, Seminar on Corporate Law, Law and Finance for Entrepreneurs, Accounting Issues for Lawyers, Patent Law, Trademark, and International Business Transactions. Prerequisites: Restricted to Law students only.

Law School | Law | Practice:Clinical & Simulation

LAWS-7629 (1) Introduction to the In-House Practice of Law

Explores cutting edge questions around the practice of law as an employee of a business. Demonstrates how the combination of law and business can be valuable to businesses and also innovative, challenging and rewarding to legal professionals. Legal services to corporate America is changing dramatically with more entities relying on in-house counsel, compared to private practitioners, to obtain legal advice and counsel. Prerequisites: Restricted to Law students only.

Law School | Law | Practice:Clinical & Simulation

LAWS-7725 (3) American Indian Law I

Investigates the federal statutory, decisional, and constitutional law that bears upon American Indians, tribal governments, and Indian reservation transactions. Prerequisites: Restricted to Law students only.

Law School | Law | Envir, Nat Resources, Amer Ind

LAWS-7735 (3) American Indian Law II

Investigates the legal history and current legal status of Alaska Natives and Native Hawaiians. Addresses other current topics such as tribal water rights, tribal fishing and hunting rights, tribal justice systems, religious freedom, and tribal natural resource and environmental management. Prereq., LAWS 7725.

Law School | Law | Envir, Nat Resources, Amer Ind

LAWS-7745 (2-3) Jurisdiction in Indian Country

Examines the current state of the justice system within Indian nations today. Includes understanding the respective roles of tribal and state law enforcement authorities, as well as the Bureau of Indian Affairs' Office of Justice Services, the Federal Bureau of Investigation, and the Drug Enforcement Administration. Examines relationship between federal and tribal courts; substantive laws; and advocates who appear before them. Prerequisites: Restricted to Law students only.

Law School | Law | Envir, Nat Resources, Amer Ind

LAWS-7751 (3) Arbitration

Discusses the nature of arbitration, tactical considerations in whether to use this form or another form of dispute resolution, the drafting of effective contracts to arbitrate the enforceability of these contracts, and the enforcement of arbitration awards. Covers the preclusive effect of arbitration proceedings, multiparty arbitration, and choice of law. Students conduct simulated arbitrations.

LAWS-9209 (4) Natural Resources Law Clinic

Engages in litigation and advocacy aimed at protecting the natural resources of the Rocky Mountain region. Students will represent clients in matters involving public lands, wildlife, and other resources. The seminar component will focus on practical aspects of environmental litigation, including administrative practice and decision-making, client representation, citizen suits, and ethical issues. Restricted to Law students only. Prerequisites: Restricted to Law students only.

[Law School](#) [Law](#) [Practice: Clinical & Simulation](#)

LAWS-9341 (3) Law and Economics of the Information Age

Examines basic regulatory and legal challenges of our information economy and digital age. Emphasizes the "Networked" information industries, the proper role of "Unbundling" policies to advance competition, and how intellectual property and antitrust rules should be developed. Restricted to Law students only. Prereq., LAWS 7201, 7241 or 7301. Same as TLEN 5620. Prerequisites: Restricted to Law students only.

[Law School](#) [Law](#) [Business](#)

LAWS-9401 (3) Securities Regulation

Stresses statutory interpretation of the various federal statutes regulating the issue of corporate securities and the cases and regulations that have arisen out of those statutes. Restricted to Law students only. Prerequisites: Restricted to Law students only.

[Law School](#) [Law](#) [Business](#)

LAWS-9409 (3) Legal Negotiation

Explores the fundamentals of effective negotiation techniques and policies for lawyers. Students engage in mock negotiations of several legal disputes. Restricted to Law students only. Credit is not

given for LAWS 741 and this course. Prerequisites: Restricted to Law students only.

Law School | Law | Practice: Clinical & Simulation

LAWS-9410 (3) International Trade Law

Examines the law of the World Trade Organization and the General Agreement on Tariffs and Trade. Examines rules restraining national restrictions on trade that addresses tariff and non-tariff barriers, discrimination, regionalism, anti-dumping, countervailing duties, and safeguards. Considers the relationship between trade and other regulatory areas or social values, such as environmental protection, health and safety standards, human rights, intellectual property protection. Restricted to Law students only. Prerequisites: Restricted to Law students only.

Law School | Law | International

LAWS-9701 (2) Counseling Families in Business

Explores the legal aspects of owning, managing, and participating in a successful family business system, including corporate structure, legal issues, succession planning and estate management, internal capital markets in private enterprise, ownership issues in private businesses, how lawyers can assist with family governance, planning for and managing family philanthropy, gender issues in family business, and conflict resolution. Restricted to Law students only. Recommended prereqs., LAWS 6104, 6157, 6211, and/or 7409 Prerequisites: Restricted to Law students only.

Law School | Law | Business

LAWS-9712 (3) Climate Change Law and Policy

Examines the science of climate change and the broader role of science in public policymaking. Reviews the changing legal landscape to abate greenhouse gas emissions, and key issues in policy design. Reviews the Supreme Court's April 2, 2007 decision in *Massachusetts v. EPA*, overturning EPA's refusal to regulate greenhouse gas pollution from motor vehicle tailpipes, and the aftermath in the courts, Executive Branch and Congress. Restricted to Law students only. Prerequisites: Restricted to Law students only.

Law School | Law | Envir, Nat Resources, Amer Ind

LAWS-9722 (3) Energy Law and Regulation

Provides an introduction to energy law and regulation in the United States. Covers basic principles of rate regulation and public utilities, the division of jurisdiction between federal and state governments, and the key federal statutes and regulatory regimes governing natural gas, electricity, and nuclear power. Focuses on the basic federal frameworks for natural gas and electricity regulation, with an emphasis on understanding the messy and uneven transition to wholesale competition in these sectors and, in the electricity context, the experience with state restructuring and retail completion. Restricted to Law students only. Prerequisites: Restricted to Law students only.

Law School | Law | Envir, Nat Resources, Amer Ind

LAWS-9735 (3) American Indian Law II

Investigates the legal history and current legal status of Alaska Natives and Native Hawaiians. Addresses other current topics such as tribal water rights, tribal fishing and hunting rights, tribal justice systems, religious freedom, and tribal natural resource and environmental management. Restricted to Law students only. Prereq., LAWS 7725. Prerequisites: Restricted to Law students only.

Law School | Law | Envir, Nat Resources, Amer Ind

LAWS-9846 (1-2) LLM Seminar

LLM students study academic legal writing in this 1-credit per semester yearlong course. Topics covered will include: the purpose of academic legal writing; how academic legal writing differs from other forms of legal writing; topic selection; legal research (methods and ethics); first drafts; editing; academic workshops; and publishing. In addition, guest speakers will talk to LLM students about career planning and job seeking. International LLM students will learn about the American legal system. Restricted to Law students only. Prerequisites: Restricted to Law students only.

Law School | Law | Research and Writing

LAWS-9856 (1-4) LL.M Thesis

LL.M students are required to write a thesis in order to graduate. Requires significant work of original research on a topic chosen in close consultation with advisors and other law school faculty, and assignments include due dates for topic selection, drafts, and workshop delivery. Thesis is worth two credits. In exceptional circumstances and only after pre-approval, an LL.M student may enroll for a third or fourth credit. Prerequisites: Restricted to Law students only.

BCOR-1010 (3) Introduction to Business

Provides an overview of how business works through the application and integration of the fundamental business functions of accounting, finance, management, marketing, and systems. Weekly discussion of current events will focus on entrepreneurship, international business, business and society, and career topics. Restricted to freshmen business majors. Prerequisites: Restricted to Business majors with less than 53 units.

[Leeds School of Business](#)
[Business Core](#)

BCOR-1020 (3) Business Statistics

Covers descriptive statistics, basic probability theory, statistical inference and hypothesis testing, correlation and simple linear regression analysis. Students learn decision making and solving business problems by using data. Uses statistical features of commonly used business spreadsheet software. Formerly BCOR 2010. Credit not granted for this course and MATH 2510. Prerequisites: Requires pre-requisite course of MATH 1071 or ECON 1078 or MATH 1001 or MATH 1011 or MATH 1150 or MATH 1300 or MATH 3130 or APPM 3310 or APPM 2360 or APPM 2380. Restricted to Business, ADVT or IAFS Majors only.

[Leeds School of Business](#)
[Business Core](#)

BCOR-2000 (4) Accounting and Financial Analysis

Builds a basic understanding of how information regarding a firm's resources and obligations is conveyed to decision makers both outside and within the firm. Prerequisites: Requires pre-requisite course of BCOR 1020 or MATH 2510 or ECON 3818 or APPM 3570 or 4570 or CHEN 3010 or CVEN 3227 or IPHY 2800 or MATH 4510 or PSCI 2075 or PSYC 3101. Restricted to majors in Business, SPPR-PRO, IAFS, or students with WBE subplan.

[Leeds School of Business](#)
[Business Core](#)

BCOR-2200 (3) Introductory Finance

Emphasizes the concepts and skills needed to make sound financial decisions. Topics include financial statement analysis, time value of money, interest rates, bond valuation and bond markets, stock valuation and stock markets, cost of capital and capital structure, capital budgeting, financial forecasting, and working capital management. Formerly BCOR 2100. Prerequisites: Requires pre-req course of BCOR1020 or MATH2510 or ECON3818 or APPM3570 or 4570 or CHEN3010 or CVEN3227 or IPHY2800 or MATH4510 or PSCI2075 or PSYC3101 and BCOR2000. Restricted to Bus., IAFS majors, students w/WBE subplan and 26-180 units completed.

Leeds School of Business Business Core

BCOR-2300 (3) Adding Value with Management

Focuses on how modern business firms compete in the global marketplace by adding value. Examines the value-chain of a firm and how firms use people, organizations, operations, and information systems to compete and win in world markets. Also covers contemporary issues such as total quality management, process reengineering, teams and team building, employee empowerment, and horizontal organizations. Prereq., BCOR 1010. Restricted to Business, SPPR-PRO majors, or students with a subplan of WBE only and 26-180 units completed. Formerly BCOR 2150. Prerequisites: Restricted to Business majors, SPPR-PRO majors, or students with a subplan of WBE only and 26-180 units completed.

Leeds School of Business Business Core

BCOR-2400 (3) Fundamentals of Marketing

Examines how activities in organizations provide value to the purchasers of its products and services. Includes gathering information about consumers and competitors through research and information systems, applying knowledge and technology to the design of products and services, communicating information to consumers and organizational units, and pricing and distributing products and services. Also includes issues in global marketing, ethics and diversity, relationship marketing, and integrating marketing with financial analyses. Prerequisites: Requires pre-req course of BCOR1020 or MATH2510 or ECON3818 or APPM3570 or 4570 or CHEN3010 or CVEN3227 or IPHY2800 or MATH4510 or PSCI2075 or PSYC3101. Restricted to Bus., SPPR-PRO, IAFS, or ADVT majors, students w/WBE subplan and 26-180 units.

Leeds School of Business Business Core

BCOR-2500 (3) Introduction to Operations and Information Management

Takes a systems perspective in exploring the use of information, processes, and models used by businesses to produce goods and services and to effectively manage accounting, finance, human resources, strategy, supply chains/inventory, and other activities in a business. Focuses on making better business decisions faster through better business intelligence by using the right information, at the right time, provided to the right managers. Prerequisites: Requires pre-requisite course of BCOR 1020 or MATH 2510 or ECON 3818 or APPM 3570 or 4570 or CHEN 3010 or CVEN 3227 or IPHY 2800 or MATH 4510 or PSCI 2075 or PSYC 3101. Restricted to Business majors with 13-180 units completed.

Leeds School of Business Business Core

BCOR-3000 (3) Business Law, Ethics, and Public Policy

Surveys major topics and case studies in business law, business ethics, and government policy. Business law topics include the American legal system, constitutional law, common law, contract principles, criminal and tort law, intellectual property, employment law, and personal and real property law. Ethics topics include the philosophy of law, legal versus moral issues, and professional responsibility. Public policy topics include the roles of business and government, types of government intervention, and the nature and theory of governmental policy formulation. Prerequisites: Restricted to Business majors, Spanish (SPPR) majors, students with a subplan of WBE, and 52-180 units completed.

Leeds School of Business Business Core

BCOR-3010 (3) Business Applications of Social Responsibility

Explores alternative views of the role of business in our global society through detailed case analyses, beginning with the free market view. This is a cross-functional area course that helps students to isolate and articulate their personal values that will shape business conduct. Emphasizes individual and organizational responsibility for business behavior in the broader social context.

Prerequisites: Requires pre-requisite courses of BCOR 2000, 2200, 2300, 2400 & 2500. Restricted to Business majors with 60-180 units completed.

BADM-1250 (1) First Year Seminar for Business

Surveys the entire undergraduate experience and includes topics, issues, and practices that focus on the professional, academic, and leadership growth of a business student. It addresses how to make an effective transition to college and puts students on a path to become well-rounded, engaged and globally-minded. Students will acquire the knowledge and skills to take advantage of all the opportunities and support services available to them while learning to balance the challenges and expectations of their business degree. A sample of the topics covered include: transition to college, dealing with academic rigor, developing a professional tool kit--resume and cover letter preparation, interview skills, project management, working in teams and public speaking--and preparing for the role as a global business leader. Prerequisites: Restricted to College of Business majors only.

[Leeds School of Business](#) [Business Administration](#)

BADM-1260 (2) First-Year Global Experience

In today's world of increased mobility, globally aware students have more choices for employment upon graduation and are immediately ready to contribute in global environments. They are aware of global issues and cultural differences, and their global mindset allows them to recognize good ideas from whenever they might come and new market/product opportunities wherever they might exist. This course is the first step toward the development of a global mindset. It provides a meaningful global experience to first-year business students through an in-depth perspective of a specific country or region outside the United States and a short academic trip to the region. Prerequisites: Restricted to College of Business majors only.

[Leeds School of Business](#) [Business Administration](#)

BADM-2010 (1) Excel Lab

Teaches beginner to intermediate level Excel skills, emphasizing efficient use of Excel to make sense of substantial data sets. The course is designed to increase students' proficiency with Excel through a series of hands-on workshops. The workshops have a business problem solving orientation and use real data from Leeds' corporate partners. The workshops emphasize the most important skills that employers value. Prerequisites: Restricted to College of Business majors only.

[Leeds School of Business](#) [Business Administration](#)

BADM-2050 (3) Honors/Special Topics

Variable topics in business, drawing from a variety of disciplines. Prereq., 3.50 minimum cumulative GPA.

Leeds School of Business | Business Administration

BADM-2880 (3) Special Topics

Explores historical developments, contemporary issues, industry trends, and best practices pertinent to the business of sports. The course examines how sports enterprises are managed, and the impacts that such enterprises have on the economic and social fabric of communities. The course is designed to provide sufficient background for educated consumption of this literature and pursuit of further study if desired. Restricted to sophomores/juniors/seniors.

Leeds School of Business | Business Administration

BADM-3100 (1) Professional Development

Designed to provide opportunities to understand and develop professional competencies for successful careers in business. Designed to increase knowledge of job search strategies and formulate a career management plan for transitioning to the workplace. Topics such as resumes, cover letters, personal branding, job search strategies, internships, career choices, networking and social media will be covered. A Self-Marketing Plan will be developed to help focus on long-term career goals. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) Leeds School of Business (BUSN) majors only.

Leeds School of Business | Business Administration

BADM-3880 (3) Special Topics

Introduces students to the many facets of the marketing of sport and marketing through sport. Theoretical and practical applications of marketing sport are examined. The course will provide students with an understanding of current marketing concepts, and best business practices, related to sports enterprises and a foundation for pursuit of further study and work in sports and event marketing. Restricted to juniors/seniors.

Leeds School of Business | Business Administration

BADM-3930 (1-6) Internship

Student training and participation in government or industry environment under faculty supervision. Prereqs., BCOR 1000, 2000, 2010, 2050, GPA 2.50, junior standing and instructor consent.

Leeds School of Business | Business Administration

BADM-4820 (1-6) Special Topics

Variable topics in business drawing from a variety of business disciplines. Prerequisites: Restricted to Business majors with 52-180 units completed.

Leeds School of Business Business Administration

BADM-4825 (3) Experimental Seminar

Offered irregularly to provide opportunity for investigation of new frontiers in Business Administration. Restricted to juniors/seniors.

Leeds School of Business Business Administration

BADM-4830 (1-3) Special Topics

Various topics in business and society drawing from a variety of business disciplines. Restricted to junior/senior BU majors. Prerequisites: Restricted to College of Business majors only.

Leeds School of Business Business Administration

BADM-4910 (2) VITA-Volunteer Tax Assistance

Offers students the opportunity to gain professional work experience in an accounting position while still in school. Provides academically relevant work experience that complements students' studies and enhances their career potential. Prereqs., BCOR 2000 and ACCT 4440 or ACCT 5440. Prerequisites: Restricted to Business majors with 52-180 units completed.

Leeds School of Business Business Administration

BADM-6820 (1-3) Topics in Business Administration

Offered irregularly to provide opportunity to investigate new topics in business administration.

Leeds School of Business Business Administration

BADM-6930 (3) Commercializing Sustainable Energy Technologies

Addresses the opportunities and problems of commercializing new renewable energy technologies. Focuses on energy markets, opportunity identification, life cycle analysis, policy economics, project financing, and economic analysis as they relate to bringing renewable energy technologies to market.

ACCT-2820 (3) Introduction to Personal Financial Planning

Introduces the concepts, tools, and applications of personal financial planning. Provides the students with tools and techniques for managing their personal finances. With these skills, students gain the ability to effectively deal with their ever-changing financial environment. Restricted to students with at least 26 hours completed.

Leeds School of Business | Accounting

ACCT-3220 (3) Corporate Financial Reporting 1

First of a two-course sequence intended to provide students with increased fluency in the language of business. Focuses on U.S. and international accounting concepts and methods that underlie financial statements and the related implications for interpreting financial accounting information. Prereqs., BCOR 2000 and BCOR 2200. Restricted to 52 hours completed. Prerequisites: Restricted to Business majors with 52-180 units completed.

Leeds School of Business | Accounting

ACCT-3225 (6) Corporate Financial Reporting

Intended to provide students with increased fluency in the language of business. Focuses on U.S. and international accounting concepts and methods that underlie financial statements and the related implications for interpreting financial accounting information. Builds and extends detailed knowledge of preparation, analysis, and use of financial statements. Prereqs., BCOR 2000 and 2200. Prerequisites: Restricted to Business majors with 52-180 units completed.

Leeds School of Business | Accounting

ACCT-3230 (3) Corporate Financial Reporting 2

Second in a two-course sequence building and extending detailed knowledge of preparation, analysis, and use of financial statements. Prereqs., ACCT 3220 and 52 hours completed.
Prerequisites: Restricted to Business majors with 52-180 units completed.

Leeds School of Business | Accounting

ACCT-3320 (3) Cost Management

Provides cost analysis for the support of management decision making. Analyzes activities, cost behavior, role of accounting in planning, financial modeling, and managerial uses of cost data.
Prereq., BCOR 2000 and 2200. Prerequisites: Restricted to Business majors with 52-180 units completed.

Leeds School of Business | Accounting

ACCT-4240 (3) Advanced Financial Accounting

Examines advanced financial accounting theory and practice, emphasizing U.S. and international accounting for business combinations, consolidated financial statements, and accounting for partnerships. Prereqs., ACCT 3230. Restricted to Accounting or Finance majors with 52-180 units completed. Same as ACCT 5240. Prerequisites: Restricted to Accounting or Finance majors with 52-180 units completed.

Leeds School of Business | Accounting

ACCT-4250 (3) Financial Statement Analysis

Focuses on the use of U.S. and international accounting information by decision-makers external to the firm. Considers judgments made by investors, security analysts, bank lending officers, and auditors. Emphasizes equity valuation and risk analysis. Prereq., ACCT 3220. Prerequisites: Restricted to Accounting, Finance or Accounting Concurrent Degree majors only with 52-180 units completed.

Leeds School of Business | Accounting

ACCT-4330 (3) Advanced Cost Management

Critically analyzes advanced topics in cost management. Uses cases and current readings. Prereqs., ACCT 3220, 3230, and 3320. Same as ACCT 5330. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior).

Leeds School of Business | Accounting

ACCT-4430 (3) Personal Financial Planning

Extends the concepts, tools, and applications of personal finance and investments beyond ACCT 2820. Focuses on the development of a financial plan to achieve financial goals. Restricted to 52 hours completed.

Leeds School of Business | Accounting

ACCT-4440 (3) Income Taxation of Individuals

Examines concepts and structure of the United States income tax system. Focuses on concepts affecting all taxpayers, with emphasis on individual taxation. Prereq., ACCT 3220. Same as ACCT 5440. Prerequisites: Restricted to Accounting or Accounting Concurrent Degree majors 52-180 units completed.

Leeds School of Business | Accounting

ACCT-4540 (3) Accounting Information Systems

Considers the interaction of accountants with information systems and the role of accounting information systems in business processes. Focuses on the tools used by accountants and provides an understanding of accounting as an information system. Prereq., ACCT 3220. Same as ACCT 5540. Prerequisites: Restricted to Accounting or Accounting Concurrent Degree majors 52-180 units completed.

Leeds School of Business | Accounting

ACCT-4620 (3) Auditing and Assurance Services

Emphasizes the value of assurance services, including the market for financial-statement audits, and the audit decision process, from obtaining a client through planning and testing, to issuance of the audit report. Focuses on making judgments and decisions under conditions of uncertainty and continually evaluating the substance of business transactions over their form. Prereq., ACCT 3230. Same as ACCT 5620. Prerequisites: Restricted to Accounting or Accounting Concurrent Degree majors 52-180 units completed.

Leeds School of Business | Accounting

ACCT-4800 (3) Accounting for Government and Nonprofit Organizations

Reporting, planning and control of government and nonprofit organizations. Includes program budgets, responsibility accounting, and fund accounting. Restricted to Accounting or Accounting Concurrent Degree majors 52-180 units completed. Prereq., ACCT 3220. Same as ACCT 5800. Prerequisites: Restricted to Accounting or Accounting Concurrent Degree majors 52-180 units completed.

Leeds School of Business | Accounting

ACCT-4820 (3) Topics in Business

Offered irregularly to provide opportunity for investigation of new frontiers in accounting. Prereq., ACCT 3220. Same as ACCT 5820. Prerequisites: Restricted to Accounting or Accounting Concurrent Degree majors 52-180 units completed.

Leeds School of Business | Accounting

ACCT-4825 (3) Experimental Seminar

Offered irregularly to provide opportunity for investigation of new frontiers in Accounting. Restricted to juniors/seniors. Same as ACCT 5825.

Leeds School of Business | Accounting

ACCT-4827 (3) Integrated Reporting for Socially Responsible Strategies

Explores the growing global trend of companies to measure, disclose and report for socially responsible initiatives. Integrated reporting combines financial, environmental, social and governance information into a single report. Current practices in sustainability and integrated reporting in the US and across the world will be examined/learned through case studies, guest speakers, current literature and projects. Can be taken concurrently with BCOR 3010 and ACCT 3220. Same as CESR 4827. Prerequisites: Requires pre-req course of BCOR 2000 and 2200. Restricted to students with 57-180 credits (Juniors or Seniors).

Leeds School of Business | Accounting

ACCT-4850 (3) Senior Seminar in Accounting

This seminar examines the nature of accounting theory and practice from perspectives of economics, law, globalization, accounting, ethics, and moral reasoning. This course also explores issues including implications of institutional factors, such as Sarbanes-Oxley, SEC, FASB, IFRS, and capital markets. Prereqs., ACCT 3230, one 4000-level ACCT course. Restricted to 102 hours completed and to graduating senior ACCT majors. Formerly BCOR 4001. Prerequisites: Restricted to Accounting majors with 102-180 units completed.

Leeds School of Business | Accounting

ACCT-4900 (1-3) Independent Study

Requires prior consent of dean and instructor under whose direction study is taken. Intended only for exceptionally well-qualified business seniors. Departmental form required.

Leeds School of Business | Accounting

ACCT-5240 (3) Advanced Financial Accounting

Examines advanced financial accounting theory and practice, emphasizing U.S. and international accounting for business combinations, consolidated financial statements, and accounting for partnerships. Prereq., ACCT 3230. Restricted to Accounting, Finance/Accounting, Information Systems/Accounting, Systems/Accounting Concurrent Degree students or Accounting, Accounting/Taxation or Business Administration graduate students only. Prerequisites: Restricted to Accounting, Finance/Accounting, Information Systems/Accounting, Systems/Accounting Concurrent Degree students or Accounting, Accounting/Taxation or Business Administration graduate students only.

Leeds School of Business | Accounting

Restricted to Accounting, Finance/Accounting, Information Systems/Accounting, Systems/Accounting Concurrent Degree students or Accounting, Accounting/Taxation or Business Administration graduate students only. Prereqs., ACCT 3220 and MBAC 6020. Same as ACCT 4250. Prerequisites: Restricted to Accounting, Finance/Accounting, Information Systems/Accounting, Systems/Accounting Concurrent Degree students or Accounting, Accounting/Taxation or Business Administration graduate students only.

Leeds School of Business | Accounting

ACCT-5330 (3) Advanced Cost Management

Critically analyzes advanced topics in cost management. Uses cases and current readings. Prereq., ACCT 3320. Restricted to Accounting, Finance/Accounting, Information Systems/Accounting,

Systems/Accounting Concurrent Degree students or Accounting, Accounting/Taxation or Business Administration graduate students only. Prerequisites: Restricted to Accounting, Finance/Accounting, Information Systems/Accounting, Systems/Accounting Concurrent Degree students or Accounting, Accounting/Taxation or Business Administration graduate students only.

Leeds School of Business | Accounting

ACCT-5440 (3) Income Taxation of Individuals

Prereq., ACCT 3220. Restricted to Accounting, Finance/Accounting, Information Systems/Accounting, Systems/Accounting Concurrent Degree students or Accounting, Accounting/Taxation or Business Administration graduate students only. Same as ACCT 4440. Prerequisites: Restricted to Accounting, Finance/Accounting, Information Systems/Accounting, Systems/Accounting Concurrent Degree students or Accounting, Accounting/Taxation or Business Administration graduate students only.

Leeds School of Business | Accounting

ACCT-5540 (3) Accounting Information Systems

Prereq., ACCT 3220 or equivalent. Restricted to Accounting, Finance/Accounting, Information Systems/Accounting, Systems/Accounting Concurrent Degree students or Accounting, Accounting/Taxation or Business Administration graduate students only. Same as ACCT 4540. Prerequisites: Restricted to Accounting, Finance/Accounting, Information Systems/Accounting, Systems/Accounting Concurrent Degree students or Accounting, Accounting/Taxation or Business Administration graduate students only.

Leeds School of Business | Accounting

ACCT-5620 (3) Auditing and Assurance Services

Emphasizes the value of assurance services, including the market for financial-statement audits, and the audit decision process, from obtaining a client through planning and testing, to issuance of the audit report. Focuses on making judgments and decisions under conditions of uncertainty and continually evaluating the substance of business transactions over their form. Prereq., ACCT 3230. Restricted to Accounting, Finance/Accounting, Information Systems/Accounting, Systems/Accounting Concurrent Degree students or Accounting, Accounting/Taxation or Business Administration graduate students only. Same as ACCT 4620. Prerequisites: Restricted to Accounting, Finance/Accounting, Information Systems/Accounting, Systems/Accounting Concurrent Degree students or Accounting, Accounting/Taxation or Business Administration graduate students only.

Leeds School of Business | Accounting

ACCT-5700 (3) International Accounting

Intensive focus on international financial statement analysis, cultural and economic differences that affect financial reporting in various countries. Examples include international financial reporting standards and accounting for foreign currency transactions. Prereq., ACCT 3230. Restricted to Accounting, Finance/Accounting, Information Systems/Accounting, Systems/Accounting Concurrent Degree students or Accounting, Accounting/Taxation or Business Administration graduate students only. Same as ACCT 4700. Prerequisites: Restricted to Accounting, Finance/Accounting, Information Systems/Accounting, Systems/Accounting Concurrent Degree students or Accounting, Accounting/Taxation or Business Administration graduate students only.

REAL-3000 (3) Principles of Real Estate

Introduction to real estate as an asset with associated property rights, an industry, profession, and investment. Covers a broad spectrum of real estate principles and terms including legal concepts, regulation and land use, industry issues, valuation, financing methods and sources, and investment analysis. Excellent elective for all students and provides the foundation for other real estate courses. Prereq., BCOR 1010, 1020, 2000, 2200, and 52 hours completed. Prerequisites: Requires pre-requisite course of BCOR 2200. Restricted to Business majors with 52-180 units completed.

[Leeds School of Business](#) [Real Estate](#)

REAL-4000 (3) Real Estate Law

Building upon the legal concepts and issues introduced in REAL 3000, the course provides a deeper study of the laws and legal issues impacting and governing real property rights and interests including the acquisition, ownership, possession, use and transfer of real property. Incorporates both a lecture and case study approach fostering regular classroom discussions. Prereq., REAL 3000. Prerequisites: Requires pre-requisite course of REAL 3000. Restricted to Business majors with 52-180 units completed.

[Leeds School of Business](#) [Real Estate](#)

REAL-4100 (3) Real Estate Finance and Investment Analysis

Covers: 1) traditional and alternative financing of residential and commercial real estate; 2) pro forma cash flows and valuation of income generating properties; 3) real estate decisions of non-real estate corporations; and 4) mortgage backed securities and real estate investment trusts (REITs). Prereq., REAL 3000. Prerequisites: Requires pre-requisite course of REAL 3000. Restricted to Business majors with 52-180 units completed.

[Leeds School of Business](#) [Real Estate](#)

REAL-4810 (3) Real Estate Internship

As the capstone course for the Real Estate Certificate program, students complete approximately 150 internship hours with a real estate company over the semester (approximately 10 hours per week). The class will meet biweekly and focus on career options and opportunities in real estate. Contact the Real Estate Center for internship and registration information.

Leeds School of Business | Real Estate

REAL-4820 (3) Topics: Real Estate Development

Surveys the process of real estate development with a focus on the market analysis, urban dynamics and financing. Students will understand the complexities of the development process as it creates the communities in which we live and the many roles the student can play as a real estate professional. Prereq., REAL 3000. Prerequisites: Restricted to Business majors with 52-180 units completed.

Leeds School of Business | Real Estate

REAL-4825 (3) Experimental Seminar

Offered irregularly to provide opportunity for investigation of new frontiers in Real Estate. Restricted to juniors/seniors.

Leeds School of Business | Real Estate

REAL-4900 (1-3) Independent Study

Intended for exceptionally well-qualified business seniors who desire to study an advanced topic. Must be in Real Estate Certificate Program. Prereq., dean and instructor consent.

Leeds School of Business | Real Estate

REAL-6820 (3-6) Graduate Seminar

Experimental seminar offered irregularly to provide opportunity for investigation of new frontiers in real estate.

Leeds School of Business | Real Estate

REAL-6900 (1-3) Independent Study

Students must have consent of instructor under whose direction study is taken. Departmental form required.

FNCE-3010 (3) Corporate Finance

Covers the theory and practices governing the management of capital in a business firm. Examines the determinants of capital requirements, methods of obtaining capital, problems of internal financial management, and methods of financial analysis. Prerequisites: Requires pre-requisite courses of BCOR 2000 and 2200. Restricted to Business Majors with 52-180 units completed.

[Leeds School of Business](#)
[Finance](#)

FNCE-4000 (3) Financial Institutions Management

Analyzes the structure, markets, and regulations of financial institutions. Studies problems and policies of internal management of funds, loan practices and procedures, investment behavior, deposit and capital adequacy, liquidity, and solvency. Prereq., FNCE 3010. Prerequisites: Requires pre-requisite course of FNCE 3010. Restricted to Business majors with 52-180 units completed.

[Leeds School of Business](#)
[Finance](#)

FNCE-4030 (3) Investment and Portfolio Management

Develops modern portfolio theory and applies it to pricing both individual assets and portfolios of assets. Topics include Markowitz portfolio selection model, capital asset pricing model, arbitrage pricing theory, options, futures, bonds, portfolio performance measurement, and issues of market efficiency. Prereq., FNCE 3010. Prerequisites: Requires pre-requisite course of FNCE 3010. Restricted to Business majors with 52-180 units completed.

[Leeds School of Business](#)
[Finance](#)

FNCE-4040 (3) Derivative Securities

Develops the modern theory of contingent claims in a mathematical framework oriented toward applications. Examines how to use derivatives for risk management and to tailor portfolio payoffs.

Provides an in-depth analysis of the properties of options. Prereq., FNCE 3010. Prerequisites: Requires pre-requisite course of FNCE 3010. Restricted to Business majors with 52-180 units completed.

Leeds School of Business Finance

FNCE-4050 (3) Capital Investment Analysis

Focuses on capital budgeting and investment issues. Emphasizes issues relating to cash flows, capital rationing, the investment versus financing decision, leasing, fluctuating rates of output, investment timing, capital budgeting under uncertainty, and investment decisions with additional information. Prereq., FNCE 3010. Prerequisites: Restricted to Business majors with 52-180 units completed.

Leeds School of Business Finance

FNCE-4060 (1-6) Special Topics in Finance

Presents new subject matter in finance. The summer offering is the London Seminar in International Finance and Business. Prereqs. vary depending upon course offering. See advising office.

Leeds School of Business Finance

FNCE-4070 (3) Financial Markets and Institutions

Examines the economics of financial markets and the management of financial institutions, both domestic and international. Topics include an overview of U.S. and international financial markets, pricing and risk factors, interest rates, markets for securities and financial services, and markets for derivative financial instruments. Prereq., BCOR 2200. Restricted to students with 52 hours completed. Formerly FNCE 3020. Prerequisites: Requires pre-requisite course of BCOR 2200. Restricted to Business majors with 52-180 units completed.

Leeds School of Business Finance

FNCE-4820 (3) Topics in Finance

Offered irregularly to provide opportunity for investigation into new frontiers in finance. May be repeated up to 6 total credit hours. Restricted to 52 hours completed. Prerequisites: Restricted to Business majors with 52-180 units completed.

Leeds School of Business Finance

FNCE-4825 (3) Experimental Seminar

Offered irregularly to provide opportunity for investigation of new frontiers in Finance. Restricted to juniors/seniors. Prerequisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Leeds School of Business Finance

FNCE-4830 (3) Seminar in Investment Banking

Introduces the student to a career in investment banking and provides specific modeling skills necessary and important during the first phase of such a career. Prereq., BCOR 2200. Recommended prereq., FNCE 3010. Restricted to students with 52 hours completed. Prerequisites: Requires pre-requisite course of BCOR 2200. Restricted to Business majors with 52-180 units completed.

Leeds School of Business Finance

FNCE-4831 (3) Seminar in Investment Management

The purpose of this course is for students to understand the investment management profession. The course is designed to be a blend of theory and practice. Extends the basic principles of security analysis, asset pricing theory, portfolio construction, and portfolio performance evaluation. Students will apply these principles in determining, over the semester, how to manage the CU investment fund. Prereqs., BCOR 2000, 2300, and FNCE 3010. Prerequisites: Restricted to Business majors with 52-180 units completed.

Leeds School of Business Finance

FNCE-4832 (3) Microfinance

In the last two decades, microfinance initiatives have provided the primary worldwide impetus to promote economic independence for the poor (1.4 billion). Microfinance seminar links the financial markets with entrepreneurship to create a platform for building a microfinance institution that facilitates financial inclusion to the poor. The students in a semester long project build a hypothetical financial institution that provides access to credit, saving, insurance and more to a segmented poor population, somewhere in the world including the U.S. CESR 4010 and FNCE 4832 are the same course. Prerequisites: Requires pre-requisite course of BCOR 2200. Restricted to Business majors with 90-180 units completed.

Leeds School of Business Finance

FNCE-4850 (3) Business Senior Seminar in Finance

Develops analytical and decision making skills necessary to address real-world business finance situations. Topics include financial analysis and forecasting, capital budgeting, valuation, capital structure policy, international finance, and financial ethics. Uses a combination of lecture and cases; team and individual work. Prereqs., ACCT 3220, FNCE 3010, 4030, and 102 hours completed. Restricted to graduating senior FNCE majors. Formerly BCOR 4002. Prerequisites: Requires pre-requisite course of FNCE 3010. Restricted to Finance majors with 102 to 180 units completed.

Leeds School of Business Finance

FNCE-4900 (1-6) Independent Study

Intended only for exceptionally well qualified business seniors. Prereq., prior consent of dean and instructor under whose direction study is taken, and departmental form.

Leeds School of Business Finance

FNCE-6820 (1-3) Graduate Seminar

Experimental seminar offered irregularly to provide opportunity for investigation of new frontiers in finance.

Leeds School of Business Finance

FNCE-6900 (1-6) Independent Study

Requires consent of instructor under whose direction study is taken. Departmental form required.

Leeds School of Business Finance

FNCE-6950 (1-6) Master's Thesis

Leeds School of Business Finance

FNCE-7100 (3) Doctoral Seminar: Finance Theory

Develops the foundations for the study of modern financial economics by analyzing individuals' consumption and portfolio decisions in the context of risk and then traces the implications to market valuation of traded securities. Topics include the meaning and measurement of risk, portfolio theory, the Capital Asset Pricing Model, and arbitrage pricing arguments like those employed in Modigliani and Miller's capital structure theory and the Black-Scholes option pricing model. Prerequisites: Restricted to Business Administration graduate students only.

Leeds School of Business Finance

FNCE-7200 (3) Doctoral Seminar: Empirical Research Methods in Finance

Develops an understanding of current empirical methods used to examine research issues related to corporate finance and the capital markets.

Leeds School of Business Finance

FNCE-7330 (3) Doctoral Seminar: Corporate Finance, Theoretical, and Empirical Issues

Develops and examines theories and issues in corporate finance. Topics may include corporate control, capital structure, financial signaling, and payout policy.

Leeds School of Business Finance

FNCE-7550 (3) Doctoral Seminar: Special Topics in Finance

Closely examines areas of specific interest to academic research in finance. Subjects vary and may include game theory, stochastic processes in finance, continuous-time modeling, derivative security pricing, the microstructure of securities markets and financial institutions, innovation, and engineering.

Leeds School of Business Finance

FNCE-7800 (3) Doctoral Proseminar: Finance

Provides finance doctoral students with an orientation to the finance field; introduces contemporary research perspectives and priorities. Students discuss papers that illustrate academic researchers' use of various disciplinary theoretical and empirical tools to address finance problems.

Leeds School of Business | Finance

FNCE-7830 (1) Doctoral Seminar: Dissertation Research

Assists doctoral students in integrating courses and fields of study in order to apply their knowledge and skills to problems in finance. Gives special attention to development of thesis topics. Continuous enrollment required of all finance doctoral students while doing course work.

Leeds School of Business | Finance

FNCE-8820 (3) Graduate Seminar

Experimental seminar offered irregularly to provide opportunity for investigation of new frontiers in finance.

Leeds School of Business | Finance

FNCE-8900 (1-3) Independent Study

Instructor consent and departmental form required.

MGMT-3030 (3) Critical Leadership Skills

Provides an opportunity to learn about and practice the skills required of all managers. These skills include leadership, negotiation, conducting performance appraisals, delegation, effective communication, interviewing and making hiring decisions, and managing employees with problem behaviors. Objectives include developing self-awareness of strengths and weaknesses as a manager, gaining familiarity with theory-based skills, and developing proficiency in the use of these skills. Prereq., BCOR 2300. Restricted to students with 52 hours completed. Prerequisites: Restricted to Business majors with 52-180 units completed.

[Leeds School of Business](#) | [Management](#)

MGMT-3100 (3) Management of Service Operations

Examines concepts, tools and techniques used in the management of service operations. Focuses on how firms add value and compete with high quality and efficient services. Emphasizes the use of models for designing new services and improving the effectiveness of service processes. Studies the application of technology in the context of productivity, growth and the globalization of services. Restricted to Business (BUSN) majors with 52-180 units completed. Prereq., BCOR 2500. Formerly SYST 3030, OPIM 3030. Prerequisites: Restricted to Business (BUSN) majors with 52-180 units completed.

[Leeds School of Business](#) | [Management](#)

MGMT-3200 (3) Business Intelligence

Focuses on acquiring accurate and timely knowledge to make effective operational, tactical and strategic decisions. This course focuses on how to create and use such knowledge. Topics include problem definition; critical factor isolation; data collection, storage, and querying; transformation of data into knowledge through appropriate analyses and aggregation; and the presentation of the knowledge to decision makers in meaningful ways. Restricted to Business (BUSN) majors with 52-180 units completed. Prereq., BCOR 2500. Formerly SYST 3100, OPIM 3100. Prerequisites: Restricted to Business (BUSN) majors with 52-180 units completed.

[Leeds School of Business](#) | [Management](#)

MGMT-3210 (3) Business Application Programming

Uses computer programming to teach a complex problem solving skill. Its two main course objectives are: (1) learn to use a structured problem decomposition method, designed to help decompose a complex problem into manageable sub-problems. This method is best exemplified in programming but is applicable to any complex business problem. (2) understand the core concepts of programming--such as variable, object model, and control flow--that will help you not only appreciate the power of programming behind modern technologies but also better understand business process models. Formerly SYST 2010, OPIM 2010 and MGMT 2010.

Leeds School of Business | Management

MGMT-4010 (3) Redefining the Employee-Employer Relationship

Explores developments in such areas as employee relations law and procedures, employee and employer rights, worker involvement programs, environmental safety and health, and the effects of technology on emerging organization forms. Prereq., BCOR 2300. Restricted to students with 52 hours completed. Prerequisites: Restricted to Business majors with 52-180 units completed.

Leeds School of Business | Management

MGMT-4020 (3) Hiring and Retaining Critical Human Resources

Allows students the opportunity to practice conducting job analyses and then use this information to develop employee selection and performance appraisal systems. Provides thorough coverage of employers' equal employment opportunity and affirmative action obligations, as well as various approaches to gender, cultural, and ethnic diversity. Prereq., BCOR 2300. Restricted to students with 52 hours completed. Prerequisites: Restricted to Business majors with 52-180 units completed.

Leeds School of Business | Management

MGMT-4030 (3) Managing Employee Reward Systems

Examines theories of work motivation and relates them to the strategic use of compensation and other reward systems. Topics include procedures for managing base pay; linking pay incentives to productivity at the individual, group, and organizational levels; developing cost-effective programs of employee benefits; and the use of nonfinancial reward systems. Prereq., BCOR 2150 or BCOR 2300. Restricted to students with 52 hours completed. Prerequisites: Restricted to Business majors with 52-180 units completed.

Leeds School of Business | Management

MGMT-4040 (3) Individual, Team, and Organizational Development

Explores how to determine where an organization needs to focus its development efforts, how to develop and deliver an effective training program, and how to evaluate the impact of development programs on organizational effectiveness. Explores individual, team, and organization-wide development, including such topics as skills training, team building, and managing change. Prereq., BCOR 2150 or BCOR 2300. Restricted to students with 52 hours completed. Prerequisites: Restricted to Business majors with 52-180 units completed.

Leeds School of Business | Management

MGMT-4090 (3) IT and Business Strategy

Although some companies are very successful in discovering and cultivating innovative technology-enabled business strategies, many fail in the process. Combines theories and frameworks with practical approaches to provide students with the skills required to help companies identify business opportunities, find appropriate information related technologies, and lead adoption efforts to

success. Prereqs., BCOR 2200 or BCOR 2300. Restricted to business majors with 52 hours completed. Prerequisites: Restricted to Business majors with 52-180 units completed.

Leeds School of Business | Management

MGMT-4110 (3) Supply Chain Management

Explores the key issues related to the design and management of supply chains. Covers the efficient integration of suppliers, production facilities, warehouses, and stores so that the right products in the right quantity reach customers at the right time. Focuses on the minimization of the total supply chain cost subject to service requirements imposed by a variety of industries. Restricted to Business (BUSN) majors with 52-180 units completed. Prereq., BCOR 2500. Formerly SYST 4050, OPIM 4050. Prerequisites: Restricted to Business (BUSN) majors with 52-180 units completed.

Leeds School of Business | Management

MGMT-4120 (3) Managing Business Processes

Covers the concepts and tools to design and manage business processes. Emphasizes modeling an analysis, information technology support for process activities, and management of process flows. Graphical simulation software is used to create dynamic models of business processes and predict the effect of changes. Prepares students for a strong management or consulting career path in business processes. MGMT 4120 is restricted to Business (BUSN) majors with 52-180 units completed. Prereq., BCOR 2500. MGMT 4120 and 5120 are the same course. Formerly SYST 4060, OPIM 4060. Prerequisites: Restricted to Business (BUSN) majors with 52-180 units completed.

Leeds School of Business | Management

MGMT-4130 (3) Sustainable Operations

Operational sustainability is not just an obligation, as set of strategies or a niche market to explore, but a critical shift in mindset of how businesses function. Sustainable operations examines business strategies in response to environmental and social challenges. The course takes a pragmatic business perspective on improving operations across the supply chain. Grounded in resource efficiency, life-cycle thinking and a dose of investigative skepticism, the course assists students to thoroughly understand the scope of costs, benefits and risks associated with driving businesses toward sustainable operations. Prereqs., BCOR 2500, 3010 and 60 hours completed. MGMT 4130 and CESR 4130 are the same course. Prerequisites: Restricted to Business, AEBU, ARBU, CEBU, CVBU, CSBU, ECBU, MEBU, EVBU, ADBU, BNBU, NEBU or MUBU Majors with 52-180 units completed.

Leeds School of Business | Management

MGMT-4140 (3) Project Management

Introduces multidisciplinary project management concepts, skills, and tools, including the relationship between project definition, organization, planning, scheduling, resource and risk management, control, costing, and performance. Presents both qualitative and quantitative tools for better project management. Prereq., BCOR 2500 and 52 hours completed. Formerly OPIM 4080 and MGMT 4085. Prerequisites: Restricted to Business majors with 52-180 units completed.

Leeds School of Business | Management

MGMT-4150 (3) International Operations Management

Compares systems of production/operations management in the United States with those in Japan, Europe, and Asia. Contrasts various regional and national approaches to business, quality management, labor practices, management styles, international competitiveness, productivity, distribution systems, trade practices, and strategies for penetrating foreign markets. Examines different sociocultural environments, government-business relationships, banking industries, operations strategies, and the potential for transferring industrial management practices and techniques

between countries. Prereq., BCOR 2500. Restricted to students with 52 hours completed. Formerly OPIM 4065 and MGMT 4070. Prerequisites: Restricted to Business majors with 52-180 units completed.

Leeds School of Business | Management

MGMT-4210 (3) Systems Thinking

Analysis of systems thinking and understanding the complex interactions of collections of people, processes, organizations, and technologies. Students learn to be creative and critical thinkers who can conceptually model the very complex systems we encounter in our world today. Restricted to Business (BUSN) majors with 52-180 units completed. Prereq., BCOR 2500. Formerly SYST 3000, OPIM 3000. Prerequisites: Restricted to Business (BUSN) majors with 52-180 units completed.

Leeds School of Business | Management

MGMT-4220 (3) Business Technologies

Covers the use and configuration of ERP (enterprise resource planning) technologies in businesses. Emphasizes the understanding of the usage of technology in facilitating business processes within firms. Covers many modules/functional areas, including sales, marketing, distribution, manufacturing, etc. Students learn the importance of technology to organizations through hands-on use of multiple ERP software, focusing on both business processes as well as technology. Restricted to students with 52-180 units completed. Prereq., BCOR 2500. Formerly SYST 3101, OPIM 3101. Prerequisites: Restricted to students with 52-180 units completed.

Leeds School of Business | Management

MGMT-4230 (3) Design of Usable Business Systems

Focuses on the usefulness and usability of systems in organizations. Examines the bottom line implications of information systems and how to create systems that are easy to use for all potential users. Creative and critical thinking to design and build systems are stressed through individual and team exercises. MGMT 4230 is restricted to Business (BUSN) majors with 52-180 units completed. Prereq., BCOR 2500. MGMT 4230 and 5230 are the same course. Formerly SYST 4510, OPIM 4510. Prerequisites: Restricted to Business (BUSN) majors with 52-180 units completed.

Leeds School of Business | Management

MGMT-4820 (3) Topics in Business

Experimental course offered irregularly for purpose presenting new subject matter in organization management. Same as MGMT 5820.

Leeds School of Business | Management

MGMT-4825 (3) Experimental Seminar

Offered irregularly to provide opportunity for investigation of new frontiers in Management. Restricted to Business (BUSN) majors with 52-180 units completed. Prerequisites: Restricted to Business (BUSN) majors with 52-180 units completed.

Leeds School of Business | Management

MGMT-4850 (3) Senior Seminar in Management

Covers the issues and challenges of running a firm in a competitive environment. It integrates and builds upon coursework in other functional areas. Discusses principles, frameworks, and techniques that helps understand how to analyze the competitive environment; firm sources of competitive advantage; competitive dynamics; and, specific types of strategies to promote firm performance. Focuses on specific company examples. Prereqs., BCOR 2300, 2500, MGMT 3030. Restricted to students with 102-180 units completed. Formerly MGMT 4000.

Prerequisites: Restricted to students with 102-180 units completed.

Leeds School of Business | Management

MGMT-4900 (1-3) Independent Study

Intended only for exceptionally well qualified business seniors. Departmental form required. Prereq., dean and instructor consent.

Leeds School of Business | Management

MGMT-4910 (1-3) Academic Internship in Management

Offers students the opportunity to gain professional work experience in a management position while still in school. Provides academically relevant work experience that complements students' studies and enhances their career potential. Includes 100 hours per credit and a course paper. Instructor consent is required. Pass/Fail grading only. Restricted to students with 52-180 units completed. Prereq., BCOR 2500. Formerly SYST 4910, OPIM 4910. Prerequisites: Restricted to students with 52-180 units completed.

Leeds School of Business | Management

MGMT-5120 (3) Managing Business Processes

Covers the concepts and tools to design and manage business processes. Emphasizes modeling an analysis, information technology support for process activities, and management of process flows. Graphical simulation software is used to create dynamic models of business processes and predict the effect of changes. Prepares students for a strong management or consulting career path in business processes. MGMT 4120 is restricted to Business (BUSN) majors with 52-180 units completed. Prereq., BCOR 2500. MGMT 4120 and 5120 are the same course.

Formerly SYST 4060, OPIM 4060. Prerequisites: Restricted to Graduate Students only.

Leeds School of Business | Management

MGMT-5230 (3) Design of Usable Business Systems

Focuses on the usefulness and usability of systems in organizations. Examines the bottom line implications of information systems and how to create systems that are easy to use for all potential users. Creative and critical thinking to design and build systems are stressed through individual and team exercises. MGMT 4230 is restricted to Business (BUSN) majors with 52-180 units completed. Prereq., BCOR 2500. MGMT 4230 and 5230 are the same course. Formerly SYST 4510, OPIM 4510. Prerequisites: Restricted to Graduate Students only.

ESBM-3100 (3) Introduction to Entrepreneurship

Introduces non-business students to the multiple facets of entrepreneurship and the entrepreneurial process. Entrepreneurship is a process of fundamental transformation: from innovative idea to enterprise and from enterprise to value, entrepreneurship is more than a business practice. Innovation is central to this process and students will be challenged to develop creative solutions to a problem or need. Restricted to non-Business majors with 60-180 units completed. Prerequisites: Restricted to non-Business majors with 60-180 units completed.

[Leeds School of Business](#) | [Entrepreneurship and Small Business Management](#)

ESBM-3200 (3) Principles of Business for Entrepreneurs

Provides non-business students with a basic understanding of the business principles required to start and grow an entrepreneurial venture. It is intended for individuals who have not taken a marketing, accounting or finance course. This course will focus on two aspects of business that are critical to the success of any new venture: marketing and financial management. Restricted to non-Business majors with 60-180 units completed. Prerequisites: Restricted to non-Business majors with 60-180 units completed.

[Leeds School of Business](#) | [Entrepreneurship and Small Business Management](#)

ESBM-3700 (3) Entrepreneurial Environments

Introduces entrepreneurship. Addresses opportunity recognition, target markets, industry analysis, business model identification, sources of funding, managing rapid growth, and writing feasibility studies. Examines alternative forms of entrepreneurship such as franchising, corporate entrepreneurship, family business, and social entrepreneurship. Prereqs., BCOR 2000, 2050, 2100, 2150, or BCOR 2000, 2200, 2300, 2400. Restricted to students with 52 hours completed. Prerequisites: Restricted to Business majors with 52-180 units completed.

[Leeds School of Business](#) | [Entrepreneurship and Small Business Management](#)

ESBM-4100 (3) Writing a Venture Plan

Requires non-business students to engage in a rigorous, thoughtful and challenging process essential to planning a new venture. Using their own concept, students will develop a strategy to start and grow a venture. Communicating the plan is an essential element of this course and students will learn when and how to write a plan and make effective presentations. Restricted to non-Business majors with 60-180 units completed. Prerequisites: Restricted to non-Business majors with 60-180 units completed.

Leeds School of Business | Entrepreneurship and Small Business Management

ESBM-4570 (3) Entrepreneurial Finance.

Focuses on the financial concepts, issues, methods, and industry practices relevant to entrepreneurial decision makers. Addresses a variety of topics including financial valuation, various sources of funds, structures and legal issues in arranging financing, the private and public venture capital markets, and preparation for, and execution of, an initial public securities offering. Provides an understanding of the segments of the capital markets specializing in start-ups and growth financing. Prereq., BCOR 2200. Restricted to Business majors with 52-180 units completed. Prerequisites: Restricted to Business majors with 52-180 units completed.

Leeds School of Business | Entrepreneurship and Small Business Management

ESBM-4820 (3) Special Topics in Entrepreneurship

Leeds School of Business | Entrepreneurship and Small Business Management

ESBM-4825 (3) Experimental Seminar

Offered irregularly to provide opportunity for investigation of new frontiers in Entrepreneurship and Small Business Management. Restricted to juniors/seniors.

Leeds School of Business | Entrepreneurship and Small Business Management

ESBM-4826 (3) Exp. Sem-Social Entrepreneurship: Designing a Better World

See the future through the eyes of entrepreneurs who are addressing global and social environmental problems such as poverty and deforestation. Can the social ventures they create to solve these problems survive over time and will they achieve the impact they seek? We will meet some of these social entrepreneurs and, in teams, write case studies to tell their stories. Restricted to non-Business majors with 60-180 units completed. CESR 4826 and ESBM 4826 are the same course. Prerequisites: Restricted to non-Business majors with 60-180 units completed.

Leeds School of Business | Entrepreneurship and Small Business Management

ESBM-4830 (3) Entrepreneurship Business Planning and Preparation

Work as part of a small team, with the focus on the process of creating a plan from the business concept and model through all of the elements of a professionally written business plan document. Prereqs., ESBM 3700 and 4570. Same as EMEN 4825. Prerequisites: Restricted to Business majors with 52-180 units completed.

Leeds School of Business | Entrepreneurship and Small Business Management

ESBM-4900 (1-3) Projects in Entrepreneurial Companies

Complete projects in preselected entrepreneurial companies. Prereq., instructor consent.

Offered irregularly. Provides opportunity for investigation into new frontiers in marketing. Prereq., BCOR 2400. Restricted to BUSN majors with minimum 52 units completed. Prerequisites: Restricted to Business majors with 52-180 units completed.

Leeds School of Business | Marketing

MKTG-4250 (3) Product Strategy

Covers major topics in managing long-term customer relationships that derive from products. Focuses on concepts, analyses, and strategies for existing and new products. Topics include concept development and testing, conjoint analysis, product positioning, brand image measurements and brand management, and product issues in public policy and ethics. Methods of instruction include lectures, case discussions, student group papers and projects, and examinations. Prereqs., MKTG 3250 and 3350. Prerequisites: Requires pre-requisite courses of MKTG 3250 and 3350. Restricted to Leeds School of Business (BUSN) majors with 52 minimum units required.

Leeds School of Business | Marketing

MKTG-4300 (3) Pricing and Channels of Distribution

Offered regularly to examine pricing and channel management, the two key components of companys' marketing strategies. Help students to understand the common types of pricing and channel strategies, the rationales behind these strategies. Train students to think analytically in order to apply these strategies. Prereqs., MKTG 3250 and 3350. Restricted to BUSN students with minimum 52 units completed. Prerequisites: Requires pre-requisite courses MKTG 3250 and 3350. Restricted to Business majors with minimum 52 units completed.

Leeds School of Business | Marketing

MKTG-4350 (3) Services Marketing Strategy

Designed for those students interested in working in the service industries. Addresses the distinct needs and problems of service organizations in the area of marketing and service quality. Service organizations (i.e., banks, transportation companies, hotels, hospitals, educational institutions, professional services, etc.) require a distinctive approach to marketing strategy--both in its development and execution. Builds and expands on marketing ideas and how to make them work in service settings. Prereqs., MKTG 3250 and 3350.

Leeds School of Business | Marketing

MKTG-4500 (3) Advertising Management

Prereqs., MKTG 3250 and 3350. Restricted to students with 52 hours completed.

Leeds School of Business | Marketing

MKTG-4550 (3) Advertising and Promotion Management

Analyzes advertising and promotion principles and practices from the marketing manager's point of view. Considers the decision to advertise, market analysis as a planning phase of the advertising program, media selection, public relations, sales promotion, promotion budgets, campaigns, evaluation of results, and agency relations. Prereqs., MKTG 3250 and 3350. Prerequisites: Requires prerequisite courses of MKTG 3250 and 3350. Restricted to Leeds School of Business (BUSN) majors with 52 minimum units required.

Leeds School of Business | Marketing

Leeds School of Business | Marketing

MKTG-4650 (3) Institutional Relationships and Strategy

Focuses on the management of a firm's relationships with other businesses. Addresses business-to-business marketing strategies, relationships with channel members, and strategic alliances/partnerships. Topics include relationship structures, power, conflict, negotiation, industry analysis, selection of business partners, and managing for long-term stability. Prereqs., MKTG 3250 and 3350.

Leeds School of Business | Marketing

MKTG-4810 (3) Honors Seminar

Social responsibilities of the business executive, business ethics, business-government relations, and business in literature. Open to seniors who have completed at least 30 semester hours of business courses with not less than a 3.30 GPA and have instructor consent. Prereq., BCOR 2400.

Leeds School of Business | Marketing

MKTG-4820 (3) Special Topics in Marketing

Offered irregularly. Provides opportunity for investigation into new frontiers in marketing.

Leeds School of Business | Marketing

MKTG-4825 (1-3) Pricing and Channels of Distribution

Offered irregularly to provide opportunity for investigation of new frontiers in Marketing. Requires prerequisite courses of MKTG 3250 and 3350. Restricted to students with 57-180 credits (Junior or Senior). Prerequisites: Requires prerequisite courses of MKTG 3250 and 3350. Restricted to students with 57-180 credits (Junior or Senior).

Leeds School of Business | Marketing

MKTG-4850 (3) Senior Seminar in Marketing

Capstone marketing course that integrates and further develops what students have learned in other courses. Provides students with the insight and skills necessary to formulate and implement sound socially responsible marketing strategies, product line management strategies, promotional and product/service communication strategies, pricing, and distribution strategies. Prereqs., MKTG 3250, 3350, two additional 4000-level MKTG courses from either MKTG 4250, 4300 or 4550 with the third serving as a co-requisite, and 102 hours completed. Restricted to graduating MKTG majors. Formerly BCOR 4004. Prerequisites: Requires pre-requisite courses of MKTG 3250 and 3350 and either MKTG 4250 or 4300 or 4550. Restricted to MKTG Majors with 102 to 180 units completed.

Leeds School of Business | Marketing

MKTG-4900 (1-6) Independent Study

Intended only for exceptionally well qualified business seniors. Instructor and division chair consent required.

Leeds School of Business | Marketing

MKTG-6900 (1-3) Independent Study

Requires consent of instructor under whose direction study is taken. Departmental form required.

Leeds School of Business | Marketing

MKTG-6940 (1) Master's Candidate

Departmental form required.

Leeds School of Business | Marketing

MKTG-6950 (1-6) Master's Thesis

Leeds School of Business | Marketing

MKTG-7000 (3) Seminar in Consumer Behavior

Studies the nature and determinants of consumer buying behavior. In-depth investigation of contributions of behavioral sciences (especially psychology, sociology, and cultural anthropology) toward understanding consumer behavior. Influence of demographic factors, motivation, personality, culture, and purchasing behavior. Prereq., instructor consent.

Leeds School of Business | Marketing

MKTG-7200 (3) Experimental Research Methods in Marketing

Provides a detailed exposure to the design of laboratory/field experiments and quasi-experiments for marketing and consumer research. Emphasizes the choice of design options, data collection methods, statistical analysis, and substantive interpretation of experimental results.

Leeds School of Business | Marketing

MKTG-7300 (3) Multivariable Methods in Marketing Research

Includes Manova designs, causal models, cluster analysis, discriminant function analysis, factor analysis, and latent structure analysis. Emphasizes computer applications. Prereqs., graduate courses in regression and Manova.

Leeds School of Business | Marketing

MKTG-7305 (3) Qualitative and Survey Research Methods in Business

Detailed exposure to qualitative and survey research methods in business. Qualitative methods include participant observation, depth interviews, focus-group interviews and ethnography. Survey methods include measurement theory, survey design and sampling, survey implementation, data analysis, and substantive interpretation.

Leeds School of Business | Marketing

MKTG-7310 (3) Design and Analysis of Experiments in Business

Detailed exposure to experimental research methods for business applications. Emphasizes the choice of design options, data collection methods, statistical analysis, and substantive interpretation of experimental results.

Leeds School of Business | Marketing

MKTG-7400 (2) Doctoral Seminar: Channels of Distribution

Study of marketing literature in channels of distribution. Includes topics of channel structure, channel power, channel conflict and leadership, physical distribution systems, and regulation.

Leeds School of Business | Marketing

MKTG-7500 (2) Doctoral Seminar: Promotion

Study of marketing literature dealing with advertising, selling, sales promotion, and sales management. Includes topics of advertising decision models, advertising effects, sales-force performance models, and promotion management.

MGMT-3210 (3) Business Application Programming

Uses computer programming to teach a complex problem solving skill. Its two main course objectives are: (1) learn to use a structured problem decomposition method, designed to help decompose a complex problem into manageable sub-problems. This method is best exemplified in programming but is applicable to any complex business problem. (2) understand the core concepts of programming--such as variable, object model, and control flow--that will help you not only appreciate the power of programming behind modern technologies but also better understand business process models. Formerly SYST 2010, OPIM 2010 and MGMT 2010.
