HIST-4643 (3) Poland since the 16th Century: Democracy and Nation

Traces themes of democracy and nationalism in Polish history from the "Noble Republic" of the early modern era, through the struggles with fascism and communism in the 20th century, to Poland's current position on the eastern edge of Western Europe. Restricted to sophomores/juniors/seniors.

College of Arts & Sciences | History | Europe: Specific Countries

HIST-4713 (3) History of Russia through the 17th Century

Introduces the history and culture of Russia from the 9th to the 17th century. Emphasizes selected topics in social, economic, religious, and cultural history, including the formation of the Russian state conversion to Orthodox Christianity, the Mongol invasion, and the reign of Ivan the Terrible. Restricted to juniors and seniors.

College of Arts & Sciences | History | Europe: Specific Countries

HIST-4723 (3) Imperial Russia

Surveys major cultural, social, and economic changes from the reign of Peter the Great through World War I. Restricted to juniors and seniors. Prerequisites: Restricted to students with 57-180 credits (Juniors or Seniors).

College of Arts & Sciences | History | Europe: Specific Countries

HIST-4733 (3) The Russian Revolution and the Soviet Regime

Covers in detail the significant social, economic, and political events of Soviet Russia from the February Revolution of 1917 to the present. Prereq., junior or senior standing. Prerequisites: Restricted to students with 57-180 credits (Juniors or Seniors).

College of Arts & Sciences | History | Europe: Specific Countries

CLAS-1115 (3) Masterpieces of Greek Literature in Translation

Students read about mythological heroes and historical individuals from Achilles to Socrates in Greek literature. Class discusses why the Greeks told stories the way they did and what those stories might have meant to them and might mean to us. Approved for arts and sciences core curriculum: literature and the arts.

CHEM-1114 (1) Laboratory in General Chemistry 1

Lab. Intended for first-semester students whose academic plans require advanced work in chemistry. Instruction in experimental techniques which coordinate with lecture topics in CHEM 1113. Prereqs., one year high school chemistry or CHEM 1021 (min grade C-); high school math through pre-calculus. Not recommended for students with grades below B- in CHEM 1021. Coreq., CHEM 1113. Not open to engineering students with exception of EPEN majors. Credit not granted for this course and CHEM 1111, 1251, 1351, or CHEM 1221/CHEM 1211. Approved for arts and sciences core curriculum: natural science. Prerequisites: AMEN, AREN, ASEN, CHEN, CSEN, CVEN, ECEN, EEEN, EVEN, MCEN, OPEN or CBEN majors are not allowed to take this class.

[Privacy](#) • [Legal & Trademarks](#)

MATH-1130 (3) Mathematics from the Visual Arts

Introduces mathematical concepts through the study of visual arts. Credit not granted for this course and QRMS 1130. Approved for arts and sciences core curriculum: quantitative reasoning and mathematical skills.

[College of Arts & Sciences](#) | [Mathematics](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

CHEM-1133 (4) General Chemistry 2

Lect., rec. Intended for second-semester students whose academic plans require advanced work in chemistry. Subjects: acid-base equilibria, buffers and titrations, thermodynamics, redox reactions, electrochemistry, transition elements and their coordination compounds, solubility/solubility equilibria, crystal field theory, kinetics, nuclear chemistry. Prereq., CHEM 1113/1114 or equivalent (min grade C-). Coreq., CHEM 1134. Credit not granted for this course and CHEM 1131, 1271 or 1371. Approved for arts and sciences core curriculum: natural science. Prerequisites: Requires pre-requisite courses of CHEM 1111 or CHEM 1113/1114 or CHEM 1251 or CHEM 1351 or CHEN 1211/CHEM1221.

[College of Arts & Sciences](#) | [Chemistry](#)

ANTH-1135 (3) Exploring a Non-Western Culture: TBA

Examines the geography, kinship, politics and religious values of a particular non-Western people in historical and contemporary context through an anthropological perspective. Approved for arts and sciences core curriculum: human diversity.

[College of Arts & Sciences](#) | [Anthropology](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

ANTH-1140 (3) Exploring a Non-Western Culture: The Maya

Explores the culture of the Maya of Central America, emphasizing their material adaptations, social organizations, ideals and values, and artistic achievements in the past and the present. Approved for arts and sciences core curriculum: human diversity.

[College of Arts & Sciences](#) [Anthropology](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

CLAS-1140 (3) Bread and Circuses: Society and Culture in the Roman World

Surveys the outstanding achievements of Roman culture and society as reflected in literature; philosophy and art; private and official religion; and legal and political thought. No Greek or Latin required. Approved for GT-AH2. Approved for arts and sciences core curriculum: historical context.

[College of Arts & Sciences](#) | [Classics](#) | [Literature, Culture, & Thought](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

ANTH-1145 (3) Exploring a Non-Western Culture: The Aztecs

Explores the culture of the Aztec people of Central Mexico: their subsistence, society, religion, and achievements, as well as the impact of the Aztec empire in Mesoamerica. Also reviews the clash of a non-western society with the western world with the arrival of the Spanish conquistadors. Approved for arts and sciences core curriculum: human diversity.

ENGL-1500 (3) Masterpieces of British Literature

Introduces students to a range of major works of British literature, including at least one play by Shakespeare, a pre-20th century English novel, and works by Chaucer and/or Milton. Approved for arts and sciences core curriculum: literature and the arts.

[College of Arts & Sciences](#) [English](#) [General Literature & Language](#)

FREN-1500 (3) Literature and Politics in the Age of Enlightenment

Introduces political dimensions of 18th century French literature. Surveys political and social preoccupations that manifest themselves across genres (novels, scientific treatises, dialogues, erotic literature, etc.). Examines contributions made by 18th century French writers to the sociological and political imagination of Western tradition. Taught in English.

[College of Arts & Sciences](#) [French & Italian](#) [French](#)

GRMN-1500 (3) German for Reading Knowledge

Designed especially for graduate students. Emphasizes analytical skills for acquiring reading proficiency in specialized and technical German in one's field of research. Recommended for pass/fail registration. Does not satisfy the arts and sciences foreign language requirement. Does not count towards the German major.

[College of Arts & Sciences](#) [Germanic & Slavic Languages & Literature](#) [German](#)

GSAP-1500 (1) Community Engagement

Facilitates community-level service and volunteer opportunities in the University, Boulder-Denver area, and Colorado communities for first-year students. Participants will learn how to conduct basic community research and will design their own volunteer, service, or internship plan in conjunction with the instructor and the class, targeting a university center, community nonprofit, local business, government agency, or international institution.

College of Arts & Sciences | Global Studies Residential Academic Program

ITAL-1500 (3) That's Amore: Introduction to Italian Culture

Introduces students to representations of Italian society that have persisted through the ages. The course readings allow students to better understand how certain stereotypes about Italian society (e.g., Latin lover, Mafia) were born and persist in the present. Taught in English. Approved for GT-AH2. Approved for arts and sciences core curriculum: contemporary societies.

College of Arts & Sciences | French & Italian | Italian

LIBB-1500 (3) The Dialogue of Art and Religion

Focuses on interdisciplinary study of visual art from diverse cultural traditions. Addresses role and training of the artist; aesthetic issues related to the object; the audience or viewer for which the work is intended; and the context of the work, especially religious and social history. Cultural traditions include Russian Orthodox icons, Himalayan Buddhist thangkas, and Navaho sandpaintings. (In different semesters, the content may shift to include other traditions such as Islamic or Celtic manuscripts, or Haida totem poles.) Approved for arts and sciences core curriculum: ideals and values. Restricted to Libby RAP students. Prerequisites: Restricted to Libby Residential Academic Program students only.

College of Arts & Sciences | Libby Residential Academic Program

LING-1500 (3) Understanding Grammar

Presents fundamentals of grammar in the Western tradition. Emphasizes making concepts and uses of grammar (as exemplified in English and closely related foreign languages) understandable to the nonspecialist.

College of Arts & Sciences | Linguistics

PHIL-1500 (3) Reading, Writing and Reasoning

Teaches students how to write argumentative papers. Each seminar will focus narrowly on some controversial topic. For example, one seminar might focus on the existence of God, whereas another might question whether we have free will. In all cases, a significant portion of the course will be devoted to learning how to write cogent argumentative papers about controversial topics. Approved for arts and sciences core curriculum: written communication.

College of Arts & Sciences | Philosophy

FILM-1502 (3) Introduction to Film Studies

Introduces the technical and aesthetic principles behind the production, consumption, analysis, and interpretation of films. The purpose of this class is to help us understand and think about movies critically, as technological, cultural, and artistic products. We will study films in different contexts and discuss the importance of movies as cultural expression.

College of Arts & Sciences | Film Studies | Genre and Movements

ARTH-1509 (4) Trash and Treasure, Temples and Tombs: Art and Archaeology of the Ancient World

Introduces the art and archaeology of ancient Egypt, Mesopotamia, Greece, and Rome, examining various ancient approaches to power, religion, death, and the human body. Analyzes art, architecture, and everyday trash to learn about ancient humanity. Same as CLAS 1509. Approved for arts and science core curriculum: historical context or literature and the arts.

College of Arts & Sciences | Art & Art History | Art History

CLAS-1509 (4) Trash and Treasure, Temples and Tombs: Art and Archaeology of the Ancient World

Introduces the art and archaeology of ancient Egypt, Mesopotamia, Greece and Rome, examining various ancient approaches to power, religion, death and the human body. Analyzes art, architecture, and everyday trash to learn about ancient humanity. Same as ARTH 1509. Approved for arts and sciences core curriculum: historical context or literature and the arts.

College of Arts & Sciences | Classics | Art and Archaeology

INVS-1513 (3) Civic Engagement: Using the Electoral Process as a Tool for Social Change

Designed to educate and inspire civic engagement primarily in the area of electoral politics. Examines various explanations of why people participate in the electoral process and whom they choose to support. Develops the practical skills necessary to participate successfully in the electoral arena. Through a service component, the course provides experience working on a campaign and mobilizing others to participate in the electoral process.

College of Arts & Sciences | INVST Community Studies

ARTS-1514 (3) Sculpture for Non-Majors

Offers an orientation involving three-dimensional form and application. Studies expressive problems based on non-objective form relationships in various sculptural materials. May not be repeated.

College of Arts & Sciences | Art & Art History | Sculpture

HIST-1518 (3) Introduction to South Asian History to 1757

Introduces the history of South Asia, providing a general acquaintance with the narratives and interpretations of ancient and medieval history of the Indian subcontinent from the rise of the Indus Valley Civilization in 3500 BCE to the end of the Mughal Empire in 1757 CE. It is intended for students with little or no prior knowledge of the region. Credit not granted for this course and HIST 1408. Approved for arts and sciences core curriculum: historical context.

College of Arts & Sciences | History | World Areas: Specific Regions

INVS-1523 (3) Civic Engagement: Democracy as a Tool for Social Change

Educates and inspires students for civic engagement by exploring democratic values and the rights and responsibilities of citizenship. Develops theoretical knowledge and practical skills for participating in a diverse democratic society, especially at the state level, through analyzing legislative issues, making policy recommendations, and advocating for change. Approved for GT-SS3. Approved for arts and sciences core curriculum: United States context.

College of Arts & Sciences | INVST Community Studies

HIST-1528 (3) Introduction to South Asian History since 1757

Introduces the history of modern South Asia from 1757 to the present. Examines themes such as the nature of British colonial state formation in South Asia, social transformation under British rule, modes of anticolonial resistance movements, particularly Mahatma Gandhi's nonviolent civil disobedience movement, Muslim nationalism and the formation of Pakistan, and current political conflicts involving India, Pakistan and Afghanistan. Formerly HIST 1408. Approved for arts and sciences core curriculum: historical context.

College of Arts & Sciences | History | World Areas: Specific Regions

FARR-1561 (1) Nonviolence for Everyday: Meditation and Other Helpful Habits

Focuses on the challenge of achieving nonviolence on a day-to-day basis by maintaining a peaceful, focused frame of mind. Explores ways to train the mind, including methods that may aid healing.

College of Arts & Sciences | Farrand Residential Academic Program

LDSP-1561 (1) Compassionate Leadership and Mindfulness

Explores various practices and traditions that lead to a balanced, physical, mental, emotional, and spiritual life critical to the practice of effective leadership. May be repeated up to 3 total credit hours.

College of Arts & Sciences | Chancellor Leaderships Residential Academic Program

FARR-1562 (3) Gandhi's Satyagraha: Love in Action for Humans and Other Creatures

Class texts and films explore social justice and structural violence in regard to humans, animals, and the environment in the light of a Gandhian approach to these issues. Outreach work in the community is included.

College of Arts & Sciences | Farrand Residential Academic Program

LDSP-1571 (1) Topics in Leadership

Examines the complex nature of leadership by applying knowledge and practice to contemporary and social issues. May be repeated up to 3 total credit hours.

College of Arts & Sciences | Chancellor Leadership Residential Academic Program

ARSC-1600 (1) The University of Colorado Experience

Provides an effective transition to the university by giving students a solid base for developing scholarship, citizenship, decision making, and involvement in their university community. Topics include academic and campus resources, safety, health, and diversity.

College of Arts & Sciences | Arts & Sciences Admin | Special Curricula

BAKR-1600 (3) Creating a Sustainable Future

Explores opportunities for moving toward a sustainable 21st century U.S. society. Evaluates socio-economic institutions, values and forces in late 20th century U.S. society that are unsustainable, given 21st century environmental, economic and social challenges. Contemplates societal progress from reflective perspectives and leading visionaries, including CU-generated documents. Explores actions you can adopt now that empower you to live a more sustainable lifestyle. Approved for arts and sciences core curriculum: contemporary societies.

College of Arts & Sciences | Baker Residential Academic Program

COMM-1600 (3) Group Interaction

Covers basic theories, concepts, and characteristics that underlie face-to-face interactions in interpersonal, small group, and organizational settings. Activities stress the development of both task and relational skills in these settings. Required for COMM majors.

College of Arts & Sciences | Communication

ENGL-1600 (3) Masterpieces of American Literature

Enhances student understanding of the American literary and artistic heritage through an intensive study of a few centrally significant texts, emphasizing works written before the 20th century. Approved for arts and sciences core curriculum: literature and the arts.

College of Arts & Sciences | English | General Literature & Language

ITAL-1600 (3) Strategies of Fear: Introduction to Italian Fantastic Literature

Traces the development of the fantastic theme in Italian Literature from its origins (late nineteenth century) to contemporary times. Analyzes the modes of reception and appropriation of non-Italian gothic and fantastic narrative traditions through which Italian writers have subverted the national literary model proposed by realist narrative. Approved for arts and sciences core curriculum: literature and the arts. Taught in English.

MATH-1150 (4) Precalculus Mathematics

Develops techniques and concepts prerequisite to calculus through the study of trigonometric, exponential, logarithmic, polynomial, and other functions. Prereq., one and a half years of high school algebra. Students having credit for college algebra and trigonometry may not receive additional credit for MATH 1150. Students with credit for college algebra receive only 2 additional hours of credit for MATH 1150. Similar to MATH 1000, 1010, 1020, 1011, 1021, 1030, and 1040. Approved for GT-MA1. Meets MAPS requirement for mathematics. Approved for arts and sciences core curriculum: quantitative reasoning and mathematical skills.

[Privacy](#) • [Legal & Trademarks](#)

MCDB-1150 (3) Introduction to Cellular and Molecular Biology

Covers biologically important macromolecules and biological processes, together with an introduction to cell structure, function, and physiology. Provides the foundation for advanced MCDB courses to majors, and a rigorous overview of modern biology to nonmajors. MCDB 1151 must be taken concurrently by MCDB and biochemistry majors and prehealth science students. Prereq., high school chemistry and algebra. Coreq., MCDB 1151 for majors. Credit not granted for this course and MCDB 1111. Approved for GT-SC1. Meets MAPS requirement for natural sciences: lab. Approved for arts and science core curriculum: natural science.

[College of Arts & Sciences](#) | [Molecular, Cellular, & Development Biology](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

WRTG-1150 (3) First-Year Writing and Rhetoric

Rhetorically informed introduction to college writing. Focuses on critical analysis, argument, inquiry, and information literacy. Taught as a writing workshop, the course places a premium on invention, drafting, and thoughtful revision. For placement criteria, see the arts and sciences advising office. May be repeated up to 6 total credit hours. Approved for GT-C01 and GT-C02. Meets MAPS requirement for English. Approved for arts and sciences core curriculum: written communication.

[College of Arts & Sciences](#) | [Program for Writing & Rhetoric](#)

MCDB-1152 (1) Problem Solving Co-Seminar for Introduction to Molecular and Cellular Biology

Uses problem solving and other interactive group work to aid student learning in co-requisite course MCDB 1150. Students will work in small groups on learning and practicing how to solve difficult conceptual problems, as well as using hands-on activities and concept mapping to help learn content. Coreq., MCDB 1150.

[College of Arts & Sciences](#) | [Molecular, Cellular, & Development Biology](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

ANTH-1160 (3) The Ancient Egyptian Civilization

Emphasizes the origin of the Egyptian culture, its importance, and its impact on other cultures. In addition, the different points of view of various scholars are discussed with a comparative study of the ancient Egyptian culture and modern culture of Egypt and the Middle East. Approved for arts and sciences core curriculum: human diversity.

[College of Arts & Sciences](#) | [Anthropology](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

MCDB-1161 (2) From Dirt to DNA: Phage Genomics Laboratory I

Provides laboratory experience working on a bacteriophage genomics research project. Students will study novel bacteriophage they isolate from the environment. Topics covered include phage biology, bacteria and phage culturing and amplification, DNA isolation, restriction digest analysis, agarose gel electrophoresis, and electron microscopy. Coreq., MCDB 1150 or successful completion of 2 semesters of General Biology AP credit.

[College of Arts & Sciences](#) | [Molecular, Cellular, & Development Biology](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

ANTH-1170 (3) Exploring Culture and Gender through Film

Uses films and written texts to explore the concepts of culture and gender, as well as ethnicity and race. By looking at gender, ethnicity, and race cross-culturally, students will know how these concepts are constructed in their own society, as well as in others. Approved for arts and sciences core curriculum: human diversity.

[College of Arts & Sciences](#) | [Anthropology](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

ANTH-1180 (3) Maritime People: Fishers and Seafarers

Explores important milestones in the development of human societies and cultures that live from the sea. Emphasizes the evolution of maritime adaptations associated with fishing and seafaring from more than 10,000 years ago through the present. Approved for arts and sciences core curriculum; historical context.

[College of Arts & Sciences](#) | [Anthropology](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

ANTH-1190 (3) Origins of Ancient Civilizations

Examines origins of the world's first civilizations in Mesopotamia, Egypt, the Indus Valley, Mesoamerica, and the Andes. Covers archaeology of ancient cities, trade, economy, politics, warfare, religion, and ideology. Seeks insights into general processes of cultural evolution. Approved for arts and sciences core curriculum: historical context.

[College of Arts & Sciences](#) | [Anthropology](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

ANTH-1200 (3) Culture and Power

Compares contemporary sociopolitical systems across cultures, from non-Western tribal groups to modern states. Introduces students to anthropological approaches for understanding and analyzing political forces, processes, and institutions that affect cultures such as colonialism, warfare, violence, ethnicity, migration, and globalization. Approved for arts and sciences core curriculum: contemporary societies.

[College of Arts & Sciences](#) | [Anthropology](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

FREN-1200 (3) Medieval Epic and Romance

Covers the most important works of medieval literature, in English translation. Among the texts studied are the Nibelungenlied, the Song of Roland, and Arthurian romances, including the stories of Lancelot and Guinevere and Tristan and Isolde. Offers a general introduction for nonmajors to medieval literature and society. Taught in English. Approved for arts and sciences core curriculum: literature and the arts.

SCAN-2202 (3) The Vikings

Examines the social, cultural, technological, and artistic backgrounds of the Viking experience, charting the history of the period both within the Nordic region and Europe as well as North America. Additionally, looks at some of the lasting influences of the Vikings on Western civilization. Taught in English. Approved for arts and sciences core curriculum: historical context.

College of Arts & Sciences | Germanic & Slavic Languages & Literature | Nordic Study Course English

SCAN-2900 (1-6) Independent Study

May be repeated up to 6 total credit hours.

College of Arts & Sciences | Germanic & Slavic Languages & Literature | Nordic Study Course English

SCAN-3201 (3) Contemporary Nordic Society and Culture

Explores contemporary Nordic culture and society with special focus on Iceland. Emphasis is on the relationship between historical, geographic, artistic, and political forces in Iceland and their effects on culture and society. Provides insight into the life and attitudes of contemporary Icelanders and stresses their place in the global culture of today. Taught in English. Recommended prereq., SCAN 2201. Approved for arts and sciences core curriculum: contemporary societies.

College of Arts & Sciences | Germanic & Slavic Languages & Literature | Nordic Study Course English

SCAN-3202 (3) Old Norse Mythology

Surveys the mythology and heathen cult practices of the Old Norse world. Students learn to read mythological texts and study the major gods (Odin, Thor, Frey and Freyja, among others), along with other mythological beings. The course examines and evaluates evidence for beliefs and cult practices in texts, art, archeological finds, and other sources. Taught in English. Approved for arts and sciences core curriculum: literature and the arts.

College of Arts & Sciences | Germanic & Slavic Languages & Literature | Nordic Study Course English

SCAN-3203 (3) 19th & 20th Century Nordic Literature

Examines the Nordic region's influence on social realism, expressionism, and postwar literature, including such themes as women in society, nature and industrialization, and identity and angst. May include works by Ibsen, Strindberg, Dinesen, and Nobel Prize winners Lagerlof, Hamsun, Undset, and Lagerkvist. Taught in English. Approved for arts and sciences core curriculum: literature and the arts.

College of Arts & Sciences | Germanic & Slavic Languages & Literature | Nordic Study Course English

SCAN-3204 (3) Medieval Icelandic Sagas

Advanced introduction to medieval Icelandic saga with readings in the family, outlaw, skald, and legendary sagas as well as the main scholarly approaches to this unique literature. Topics include honor, blood feud, fate, sexuality/gender, oral composition, and legend. Taught in English. Approved for arts and sciences core curriculum: literature and the arts.

| | | |
|----------------------------|--|-----------------------------|
| College of Arts & Sciences | Germanic & Slavic Languages & Literature | Nordic Study Course English |
|----------------------------|--|-----------------------------|

SCAN-3205 (3) Scandinavian Folk Narrative

Introduces the rich tradition of Scandinavian oral narrative. Looks at relationships between the various genres of oral narrative and their historical, social, and cultural contexts. Genres studied may include ballad, fairy tale, rural legend, and urban legend. Explores various interpretive methodologies. Taught in English. Approved for arts and sciences core curriculum: literature and the arts.

| | | |
|----------------------------|--|-----------------------------|
| College of Arts & Sciences | Germanic & Slavic Languages & Literature | Nordic Study Course English |
|----------------------------|--|-----------------------------|

SCAN-3206 (3) Nordic Colonialisms

Examines Nordic colonial enterprise and the relationship between the Scandinavian center and colonial peripheries from the Arctic to the Caribbean, Africa, and India. Studies colonial and postcolonial cultures, and postcolonial criticism and theory. Taught in English. Approved for arts and sciences core curriculum: human diversity.

| | | |
|----------------------------|--|-----------------------------|
| College of Arts & Sciences | Germanic & Slavic Languages & Literature | Nordic Study Course English |
|----------------------------|--|-----------------------------|

SCAN-3208 (3) Women in Nordic Society: Modern States of Welfare

Examines the role and status of women and marginalized social classes in the Nordic countries, whose societies have been heralded as egalitarian models since the twentieth century. Texts include a variety of media, from literature to sociological works to artifacts of political and popular culture. Taught in English. Same as WMST 3208. Approved for arts and sciences core curriculum: human diversity.

| | | |
|----------------------------|--|-----------------------------|
| College of Arts & Sciences | Germanic & Slavic Languages & Literature | Nordic Study Course English |
|----------------------------|--|-----------------------------|

SCAN-3209 (3) Contemporary Nordic Literature and Film

Advanced introduction to contemporary Nordic literature and film. Readings/screenings of recent translated Nordic texts and films, presenting a broad spectrum of contemporary issues, along with current critique and theoretical approaches. Topics: history, culture, translation, gender/sexuality, national identity, minority issues, etc. Taught in English.

| | | |
|----------------------------|--|-----------------------------|
| College of Arts & Sciences | Germanic & Slavic Languages & Literature | Nordic Study Course English |
|----------------------------|--|-----------------------------|

SCAN-3506 (3) Scandinavian Drama

Examines the many contributions of Scandinavian dramatists to world theater from the 18th century to the present. With emphasis on Holberg, Bjornson, Ibsen, Strindberg, and Bjorneboe, surveys Enlightenment comedy, national romanticism, realism, naturalism, symbolism, expressionism, and Brechtian epic theater. Taught in English. Approved for arts and sciences core

curriculum: literature and the arts.

College of Arts & Sciences | Germanic & Slavic Languages & Literature | Nordic Study Course English

SCAN-3900 (1-6) Independent Study

LIBB-1600 (3) Gender and Film

Explores a wide variety of cinematic forms and styles and discusses the treatment of femininity, masculinity, sexuality, and how gender is represented as an artifact of mass culture. Although the course title privileges issues of gender, the course also includes the study of issues of race and ethnicity in film and the inherent connections between the cinematic representations of race and gender. Approved for GT-AH1. Approved for arts and sciences core curriculum: human diversity. Prerequisites: Restricted to Libby Residential Academic Program students only.

[College of Arts & Sciences](#) | [Libby Residential Academic Program](#)

PHIL-1600 (3) Philosophy and Religion

Philosophical introduction to some of the central concepts and beliefs of religious traditions, focusing particularly on the question of the existence of God and on the relation between religious beliefs and moral beliefs. Approved for GT-AH3. Approved for arts and sciences core curriculum: ideals and values.

[College of Arts & Sciences](#) | [Philosophy](#)

GRMN-1601 (3) Germany Today

Introduces the culture of contemporary German-speaking central Europe, examining historical processes, social and political patterns, and the intellectual and artistic responses to problems of the 20th and 21st centuries. Taught in English. Approved for arts and sciences core curriculum: contemporary societies.

[College of Arts & Sciences](#) | [Germanic & Slavic Languages & Literature](#) | [German Courses Taught in Engl](#)

GRMN-1602 (3) Metropolis and Modernity

An interdisciplinary introduction to the modern industrial city in Europe and the USA, with particular attention to the representation of urbanism in the visual arts. Taught in English. Approved for arts and sciences core curriculum: literature and the arts.

College of Arts & Sciences | Germanic & Slavic Languages & Literature | German Courses Taught in Engl

FREN-1610 (3) How to Be French, 1: The Ancien Regime

Explores medieval and early modern French culture in the widest sense, encompassing masterpieces of French literature, architecture, and visual art as a key to the habits, customs, and practices of everyday life. Major themes are "living and dying," "heroes, villains, and kings," "courtliness, civility, and the art of love," and "crafty little guys." Approved for arts and sciences core curriculum: literature and the arts.

College of Arts & Sciences | French & Italian | French

HIST-1618 (3) Introduction to Chinese History to 1644

Introduces students to the history of China from Neolithic period to Ming period (1368-1644). Investigates the social patterns, gender relations, economic structure, intellectual trends, and political developments of China. Pays special attention to China's long-standing interaction with the rest of the world, which played a crucial role in the historical development of Chinese society. Approved for arts and sciences core curriculum: historical context.

College of Arts & Sciences | History | World Areas: Specific Regions

FREN-1620 (3) How To Be French? 2: Modernity

Introduces students to French culture in its widest sense and in particular to reflect on major social and cultural contradictions inherited from the French Revolution, which still define "Frenchness" today. Taught in English. Approved for arts and sciences core curriculum: literature and the arts.

College of Arts & Sciences | French & Italian | French

RLST-1620 (3) Religious Dimension in Human Experience

Studies religion as individual experience and social phenomenon. Examines varieties of religious language (symbol, myth, ritual, scripture) and of religious experience (Asian, Western, archaic). Approved for arts and sciences core curriculum: ideals and values.

College of Arts & Sciences | Religious Studies

HIST-1628 (3) Introduction to Modern Chinese History

Introduces students to modern Chinese history and culture, from the 17th century to the present. The course considers the pertinent aspects of modern China, focusing on its social patterns, economic structure, intellectual trends, and political developments. Similar to HIST 1608. Credit not granted for this course and HIST 1608. Approved for arts and sciences core curriculum: historical context.

| | | |
|----------------------------|---------|-------------------------------|
| College of Arts & Sciences | History | World Areas: Specific Regions |
|----------------------------|---------|-------------------------------|

FREN-1700 (3) Francophone Literature in Translation

Studies the literary expression of French-speaking peoples of Africa, the Caribbean, and Canada. Gives special attention to oral tradition, identity, question, and cultural conflict. Taught in English. Approved for GT-AH2.

| | | |
|----------------------------|------------------|--------|
| College of Arts & Sciences | French & Italian | French |
|----------------------------|------------------|--------|

LIBB-1700 (3) The History of Communication from Caves to Cyberspace

Surveys the history, evolution, and nature of communication and communication technologies. Students learn about the ongoing media revolution and its broader context, considering the interdependence of communication, culture, and society. They critically examine utopian, deterministic, and pessimistic arguments about the influence of new technologies and arts. Course combines lecture, discussion, and group work in a seminar format. Approved for arts and sciences core curriculum: historical context. Restricted to Libby RAP students. Prerequisites: Restricted to Libby Residential Academic Program students only.

| | |
|----------------------------|------------------------------------|
| College of Arts & Sciences | Libby Residential Academic Program |
|----------------------------|------------------------------------|

PHIL-1700 (3) Philosophy and the Arts

Considers philosophic questions involved in the analysis and assessment of artistic experiences and of the objects with which the arts, including the literary arts, are concerned.

| | |
|----------------------------|------------|
| College of Arts & Sciences | Philosophy |
|----------------------------|------------|

GRMN-1701 (3) Nature and Environment in German Literature and Thought

Critically examines titles in German literature and thought. Nature and environment are used to explore alienation, artistic inspiration, nihilism, exploitation, sexuality, rural versus urban, meaning of the earth, cultural renewal, identity and gender. This "Green" survey of German classics spans Romanticism's conception of nature as unconscious spirit to the politics and values of contemporary Germany's Green Party. Taught in English. Same as HUMN 1701. Approved for arts and sciences core curriculum: ideals and values.

| | | |
|----------------------------|--|-------------------------------|

HIST-1708 (3) Introduction to Japanese History

A broad interdisciplinary survey of the history of Japan from earliest times to the 20th century. Explores the development of political institutions, social structures, cultural and religious life, economic development, and foreign relations in an historical perspective. Approved for GT-H1. Approved for arts and sciences core curriculum: historical context.

College of Arts & Sciences | History | World Areas: Specific Regions

ARTH-1709 (3) Freshmem Seminar: Critical Introduction to Art History

Provides a broad introduction to understanding and appreciating art and art history within a critical lecture seminar and discussion format. The focus of this course is a selected Particularity directed to nonmajors. Formerly FINE 1709. Approved for arts and science core curriculum: literature and the arts.

College of Arts & Sciences | Art & Art History | Art History

APPM-1710 (3) Tools and Methods for Engineering Computing

Designed for students with little or no programming background. Students learn procedural and object-oriented programming through development of games, simulations, and animations using Flash/ActionScript, VB/Excel, Java, MATLAB, and real-world applications. Activities are oriented toward smaller projects that address topics in beginning science, engineering, and mathematics courses. Students gain practical, applicable skills. Same as ATLS 1710.

College of Arts & Sciences | Applied Mathematics

ARSC-1710 (1) Calculus Bridge Course

Provides motivated pre-calculus students with more in-depth and more challenging coverage of material assumed in calculus. Students complete advanced problems that cannot be covered in pre-calculus courses due to time constraints. Mastery of material is emphasized. Prereq., proficiency in high school mathematics. Coreq., MATH 1001/1021.

College of Arts & Sciences | Arts & Sciences Admin | Special Curricula

ARSC-1720 (1) SASC Coseminar: Calculus Work Group

This 1-credit seminar provides motivated calculus students with more in-depth and more challenging coverage of material assumed in calculus. Students complete advanced problems that cannot be covered in calculus courses due to time constraints. Mastery of material is emphasized. Prereq., proficiency in pre-calculus mathematics. Recommended prereq., A/B average in pre-calculus sequence. Coreq., MATH1300.

College of Arts & Sciences | Arts & Sciences Admin | Special Curricula

FREN-1750 (3) French Colonialism: North Africa and the Middle East

Offers a general introduction to French and Francophone literature and visual arts (painting, photography, film) from the nineteenth century to the present depicting cultures and societies of the Middle East and North Africa. In English with English translations of French texts. Approved for GT-AH2. Approved for arts and sciences core curriculum: human diversity.

College of Arts & Sciences French & Italian French

PHIL-1750 (3) Philosophy through Literature

Introduces philosophy through literature. Selected novels, plays, and short stories that exemplify traditional problems in philosophy are read and discussed.

College of Arts & Sciences Philosophy

ARSC-1800 (3) Methods of Inquiry

Introduces students to methodologies used in different academic disciplines, e.g., how a paleographer dates a manuscript. Course is team-taught. Students must also enroll in two of four co-requisite course sections, all in different areas of the core curriculum. The co-requisite course sections are listed in the online Schedule Planner.

College of Arts & Sciences Arts & Sciences Admin Special Curricula

BAKR-1800 (3) Exploring Opportunities in the Natural and Environmental Sciences

Engaging students to explore and discover exciting internships, careers, and research opportunities in fields associated with natural science and environmental studies. The class will include seminars, lectures, student presentations, and the exploration of places like the Denver Zoo, natural science museums (Denver and CU campus), Mountain Research Station, Campus Greenhouse, Butterfly Pavillion and Rocky Mountain National Park.

College of Arts & Sciences Baker Residential Academic Program

COMR-1800 (3) Visual Literacy: Images and Ideologies

Explores the relationship between visual images and cultural values, including how we process visual information, the evolution of conventions in various media, common visual portrayals, and ethical issues. Restricted to students in the Communication Residential Academic Program. Approved for arts and sciences core curriculum: literature and the arts.

College of Arts & Sciences Communication Residential Academic Program

ENGL-1800 (3) American Ethnic Literatures

Introduces significant fiction by ethnic Americans. Explores both the literary and the cultural elements that distinguish work by these writers. Emphasizes materials from Native American, African American, and Chicano traditions. Approved for arts and sciences core curriculum: human diversity.

PSCI-2012 (3) Introduction to Comparative Politics

Most countries confront a variety of common political problems, including how to gain popular support, what kinds of political institutions are most appropriate, and how to distribute burdens and benefits to different segments of the population. Concentrates on learning how to compare different political systems and provides illustrative examples from several countries in both the industrialized and nonindustrialized world. Approved for GT-SS1. Approved for arts and sciences core curriculum: contemporary societies.

[College of Arts & Sciences](#)
[Political Science](#)
[Comparative](#)

PSCI-3022 (3) Russian Politics

Examines the development of Russian politics from the late Soviet period to the present. Topics covered include political culture, democratic transition, economic reform, and social problems in Russia. Approved for arts and sciences core curriculum: contemporary societies.

[College of Arts & Sciences](#)
[Political Science](#)
[Comparative](#)

PSCI-3032 (3) Latin American Political Systems

Stresses different perspectives on Latin American politics and understanding key political actors and processes. Country focus varies. Prereq., PSCI 2012, IAFS 1000, IAFS major, Latin American studies major, or instructor consent. Approved for arts and sciences core curriculum: contemporary societies. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

[College of Arts & Sciences](#)
[Political Science](#)
[Comparative](#)

PSCI-3052 (3) Women and Politics in Latin America

Examines ways Latin American women have engaged in politics and their participation in social movements, war, peace processes and elections. Focuses on why women "Do politics" in certain ways, the role of the State in women's politics, the (dis)advantages of various political strategies, and how political, economic and social changes have affected women's political opportunities and interests. Prereq., WMST 2000 or instructor consent. Recommended prereqs., WMST 2400, 2600, 3600 or 3730. Same as WMST 3650. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences | Political Science | Comparative

PSCI-3062 (3) Revolution and Political Violence

Studies and evaluates alternative theoretical frameworks for the analysis of revolution and political violence. Theoretical material is firmly couched in case situations, such as ethnic, class, colonial, urban, racial, and religious conflicts. Prereq., PSCI 1101, 2012, or IAFS 1000. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences | Political Science | Comparative

PSCI-3072 (3) Government and Politics in Southeast Asia

Surveys historical and contemporary forces shaping politics in Southeast Asia. Gives special attention to comparative political economy, including development strategies and transitions to democracy. Prereqs., PSCI 2012 or IAFS 1000. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences | Political Science | Comparative

PSCI-3082 (3) Political Systems of Sub-Saharan Africa

Analyzes post-independence and post-Cold War change in sub-Saharan Africa and provides intensive case studies of selected countries exemplifying each type with South Africa seen as a special case. Prereq., PSCI 2012 or IAFS 1000. Approved for arts and sciences core curriculum: contemporary societies. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences | Political Science | Comparative

PSCI-3092 (3) Comparative Political Economy

Presents theories on the interaction between policies and economics, economic models of politics, and familiarizes students with an approach that will prove useful in understanding current developments in both economics and politics. Explores relationships between financial markets, currency regimes, and politics with some special consideration of the behavioral foundations of political and economic developments. Prereq., PSCI 2012.

College of Arts & Sciences | Political Science | Comparative

PSCI-3102 (3) South Asian Politics

Examine the diverse political trajectories of four South Asian countries: India, Pakistan, Nepal, and Sri Lanka. Using a comparative lens, we will take into account historical, cultural, and economic, in addition to political, factors in deciphering this diversity of political paths. Prereqs., ASIA 1000, HIND 1011, HIST 1408, and PSCI 2012.

| | | |
|----------------------------|-------------------|-------------|
| College of Arts & Sciences | Political Science | Comparative |
|----------------------------|-------------------|-------------|

PSCI-4002 (3) Western European Politics

Comparatively analyzes development of the political systems and processes of European democracies. Emphasizes contemporary institutions, decision making patterns, and policy issues. Special attention to challenges of welfare systems. Prereq., PSCI 2012 or IAFS 1000. Approved for arts and sciences core curriculum: contemporary societies. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

| | | |
|----------------------------|-------------------|-------------|
| College of Arts & Sciences | Political Science | Comparative |
|----------------------------|-------------------|-------------|

PSCI-4012 (3) Global Development

Analyzes development theory, case studies in development strategies, and the problems and promises of development: specifically issues of gender, environment, labor, corruption and poverty. The primary focus is on explanations for variation in level of development over time and across countries. Prereq., PSCI 2012, ECON 2020, IAFS 1000, or one upper-division PSCI course. Approved for arts and sciences core curriculum: contemporary societies. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

| | | |
|----------------------------|-------------------|-------------|
| College of Arts & Sciences | Political Science | Comparative |
|----------------------------|-------------------|-------------|

PSCI-4022 (3) Chinese Foreign Policy

History of China's external relations and theories of foreign policy decision making. Explores two vital bilateral relations (Sino-U.S. and Sino-Japanese) and several key issues (like Taiwan) in China's 21st century foreign policy. Prereq., PSCI 2012. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

| | | |
|----------------------------|-------------------|-------------|
| College of Arts & Sciences | Political Science | Comparative |
|----------------------------|-------------------|-------------|

PSCI-4052 (3) Chinese Politics

Explores the politics of 20th century China to speculate on China's future in the 21st century. Begins with an extensive look at the political history of the People's Republic, before turning to social, cultural, economic, and political issues today. Concludes with an examination of Chinese foreign policy, with a focus on Sino-American relations. Prereq., PSCI 2012 or IAFS 1000. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

| | | |
|----------------------------|-------------------|-------------|
| College of Arts & Sciences | Political Science | Comparative |
|----------------------------|-------------------|-------------|

PSCI-4062 (3) The Emerging Democracies of Central and Eastern Europe

Studies developments in the former Soviet satellites and Yugoslavia, their governmental organizations, and their relation to the former Soviet Union and the West. Prereq., PSCI 2012 or IAFS 1000. Approved for arts and sciences core curriculum: contemporary societies. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

| | | |
|----------------------------|-------------------|-------------|
| College of Arts & Sciences | Political Science | Comparative |
|----------------------------|-------------------|-------------|

PSCI-4092 (3) Comparative Urban Politics

Comparatively analyzes major urban systems in different political/economic settings and Third-World countries. Gives special attention to political and economic factors shaping urbanization processes and distinctive policy issues in these different settings. Recommended prereq., PSCI 1101 and 3071. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences | Political Science | Comparative

PSCI-4122 (3) The Military in Politics: Latin America and the U.S.

Analyzes the causes and consequences of military intervention in politics, contrasting patterns of civil-military relations, and the problem of democratic control of the armed forces. Focuses on the Latin American military, with secondary attention to U.S. military. Prereq., PSCI 2012 or IAFS 1000, and PSCI or ROTC major. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences | Political Science | Comparative

PSCI-4242 (3) Middle Eastern Politics

Explores the domestic politics of various Middle Eastern countries as well as the development and globalization of the region. Includes topics such as the ongoing prevalence of dictatorships, political Islamism, oil politics, economic growth and stagnation, and relations with the U.S. Prereq., PSCI 2012.

College of Arts & Sciences | Political Science | Comparative

PSCI-4252 (3) Politics of Ethnicity and Nationalism

Analyzes ethnic identity as a factor in contemporary politics. Deals extensively with the role of ethnic groups in political mobilization, the development of national collective consciousness, nation building, and international relations. Explores the influence of religion, language, history, culture and class on ethnic group formation and behavior. Prereq., PSCI 2012. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences | Political Science | Comparative

PSCI-4302 (3) European Union Politics

Explores the development, functioning, focus and future of the European Union. Examines history, institutions, policies and politics as well as governance theories that have been developed to explain origins and evolution of the EU. Prereq., PSCI 2012.

College of Arts & Sciences | Political Science | Comparative

PSCI-4312 (3) Politics and Language

Examines the politics of language. Topics covered include the primordial versus instrumental role of languages, the politics over minority language recognition, and the trade-offs surrounding the use of a lingua franca. Course will start with a regional focus on Asia then shift to the European Union and conclude in the United States. Prereq., PSCI 2012.

College of Arts & Sciences | Political Science | Comparative

| | | |
|----------------------------|-------------------|-------------|
| College of Arts & Sciences | Political Science | Comparative |
|----------------------------|-------------------|-------------|

PSCI-4732 (3) Critical Thinking in Development

Exposes students to current issues in the political economy of development. Subjects range from globalization, democratization, and economic development. Specifically, the course explores the international and domestic determinants of economic development with special reference to currency markets, foreign direct investment, trade, and democratization. Prereqs., PSCI 2012 or IAFS 1000, ECON 2010 and 2020, and one upper-division PSCI course. Same as INVS 4302. Approved for arts and sciences core curriculum: contemporary societies. Prerequisites: Restricted to students with 57-180 credits (Juniors or Seniors).

| | | |
|----------------------------|-------------------|-------------|
| College of Arts & Sciences | Political Science | Comparative |
|----------------------------|-------------------|-------------|

PSCI-4792 (3) Issues in Latin American Politics

Studies several Latin American countries in some depth including history and contemporary politics. Teaches students to listen to and evaluate different sides of political controversies, and critically evaluate arguments. Prereqs., PSCI 2012 or IAFS 1000, and junior or senior standing. Prerequisites: Restricted to students with 57-180 credits (Juniors or Seniors).

| | | |
|----------------------------|-------------------|-------------|
| College of Arts & Sciences | Political Science | Comparative |
|----------------------------|-------------------|-------------|

PSCI-4842 (1-3) Independent Study in Comparative Politics

Subjects chosen and arrangements made to suit needs of each student. Independent study is for upper-division students who have completed 9 credit hours of political science and who have an overall GPA of at least 3.00. Not more than 6 credit hours of independent study may be credited toward the minimum requirements in the political science major. Special independent study approval agreement form must be obtained from the department. May be repeated up to 7 total credit hours. Prereq., PSCI 2012 or IAFS 1000.

| | | |
|----------------------------|-------------------|-------------|
| College of Arts & Sciences | Political Science | Comparative |
|----------------------------|-------------------|-------------|

PSCI-6902 (1-3) Graduate Research Topic

Guides independent research on a topic of special interest. Arrangements made to suit needs of each student. Not a free option; must be approved by student's advisor and department chair. Does not count as a seminar. May be repeated up to 7 total credit hours. Same as PSCI 8902.

| | | |
|----------------------------|-------------------|-------------|
| College of Arts & Sciences | Political Science | Comparative |
|----------------------------|-------------------|-------------|

PSCI-6952 (1-6) Master's Thesis

May be repeated up to 6 total credit hours. Prerequisites: Restricted to Graduate Students only.

[International Relations](#)

PSCI-3123 (3) War, Peace, and Strategic Defense

Analyzes employment, or the threat of employing force, in securing American interests in the post-Cold War world. Gives special attention to utilities claimed for nuclear weapons, and alternatively, to weapons control and disarmament. Prereq., PSCI 2223.

[College of Arts & Sciences](#)
[Political Science](#)
[International Relations](#)

PSCI-3143 (3) Problems in International Relations

Analyzes the various theoretical and policy challenges facing the post-Cold War world, with an emphasis on examining alternative conceptions of and approaches to such challenges. Prereq., PSCI 2223. Approved for arts and sciences core curriculum: contemporary societies. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

[College of Arts & Sciences](#)
[Political Science](#)
[International Relations](#)

PSCI-3163 (3) American Foreign Policy

Examines foundations, assumptions, objectives, dynamics, and methods of U.S. foreign policy since WWII. Gives special attention to domestic and external problems of adapting U.S. policy to the changing world environment. Prereq., PSCI 2223. Approved for arts and sciences core curriculum: United States context. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences | Political Science | International Relations

PSCI-3193 (3) International Behavior

Presents alternate theoretical frameworks for the explanation of international processes. Applies theories of conflict behavior and social organization to problems of war and peace. Prereq., PSCI 2223. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences | Political Science | International Relations

PSCI-4173 (3) International Organization

Analyzes international organizations to determine whether they are an effective instrument for achieving peace and security and for the promotion of human welfare. Prereq., PSCI 2223. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences | Political Science | International Relations

PSCI-4183 (3) International Law

Investigates the body of law that regulates relations between nation states and provides a framework for the solving of common problems. Explores its nature and effectiveness as well as its adaptability to a changing environment. Prereq., PSCI 2223. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences | Political Science | International Relations

PSCI-4193 (3) International Political Economy

Analyzes issues at the intersection of international politics and international economics. Utilizes theories and concepts from both economics and political science to understand issues in trade, finance, development and migration. Prereq., PSCI 2223.

College of Arts & Sciences | Political Science | International Relations

PSCI-4213 (3) Europe in the International System

Covers European and Atlantic regionalism. Discusses such communities as the Council of Europe, NATO, EFTA, and OECD, and provides a detailed examination of the European Union. Looks at theories of integration, problems of partnership and interdependence, rival nationalisms and strategic doctrines, and problems of the post-Cold War era. Prereq., PSCI 2223.

College of Arts & Sciences | Political Science | International Relations

PSCI-4243 (3) Modern Warfare: Terrorism, Ideology, Identity

Explores the evolution of warfare and origins of terrorism. Ideological and identity differences have come to the forefront of violent political conflicts while the emerging doctrine of warfare has placed civilians in the middle of modern conflicts. Tracks potential changes in the means of and reasons for fighting, roles of civilians and media, and rules of war. Prereq., PSCI 2223. Recommended prereq., PSCI 3193. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences | Political Science | International Relations

PSCI-4703 (3) Alternative World Futures

Aims to help students think about the future of the world in a systematic way. Focuses on alternative projections and policies dealing with major problems. Prereq., PSCI 2223 and junior or senior standing. Prerequisites: Restricted to students with 57-180 credits (Juniors or Seniors).

College of Arts & Sciences | Political Science | International Relations

PSCI-4783 (3) Global Issues

Studies the principal issues confronting humanity that affect stability and survivability and their economic, social, and political implications. Prereq., PSCI 2012 or 2223. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Political Science (PSCI), International Affairs (IAFS) or Environmental Studies (ENVS) majors only.

College of Arts & Sciences | Political Science | International Relations

PSCI-4843 (1-3) Independent Study in International Relations

Subjects chosen and arrangements made to suit needs of each student. Independent study is for upper-division students who have completed 9 credit hours of political science and who have an overall average of at least 3.00. Not more than 6 credit hours of independent study may be credited toward the minimum requirements in the political science major. Special independent study approval agreement form must be obtained from the department. May be repeated up to 7 total credit hours. Prereq., PSCI 2223.

College of Arts & Sciences | Political Science | International Relations

PSCI-6903 (1-3) Graduate Research Topic

Independent research in a topic of special interest. Arrangements made to suit needs of each student. Not a free option; must be approved by student's advisor and department chair. Does not count as a seminar. May be repeated up to 7 total credit hours. Same as PSCI 8903.

College of Arts & Sciences | Political Science | International Relations

PSCI-6953 (1-6) Master's Thesis

May be repeated up to 6 total credit hours. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Political Science | International Relations

PSCI-7013 (3) Seminar: International Relations

Reviews salient literature on international relations, and subsequent presentation and critical discussion of analytical studies. Allows students wide latitude in substantive and methodological approaches. Emphasizes changing trends and efforts to understand the bases for cooperation and conflict. Restricted to graduate students or instructor consent required.

College of Arts & Sciences | Political Science | International Relations

PSCI-7023 (1) Foreign Policy

Examines sources of foreign policy in terms of international pressures, economic interests, bureaucratic politics, cognitive process, public opinion, elections, congress, and presidential leadership. Examines uses and limitations of economic statecraft, military intervention, and current foreign policy issues. Recommended prereq., PSCI 7013.

College of Arts & Sciences | Political Science | International Relations

PSCI-7043 (3) Seminar: Problems of International Organization

Studies selected problems concerning administration and operation of public international organizations, including the United Nations and its specialized agencies. Considers decision making, executive leadership, internal organization, personnel policies, coordination of activities, and financing. Restricted to graduate students or instructor consent required. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Political Science | International Relations

PSCI-7053 (3) War and Peace

Provides systematic treatment of theories, concepts, and data addressing the conditions and processes of international conflict, violence, and stability, with attention to historical and contemporary cases. Restricted to graduate students or instructor consent required.

College of Arts & Sciences | Political Science | International Relations

PSCI-7073 (3) Seminar: Global Political Economy

Introduces graduate students to concepts, theories, and data used to study the global system from a political-economic framework. Examines world systems analysis, regime change theory, and dependency theory with respect to operation of the exchange and power relationship within the contemporary world system. Restricted to graduate students or instructor consent required. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Political Science | International Relations

PSCI-7123 (3) Seminar: Conflict Behavior - The Politics of Violence

Surveys historical, theoretical, and empirical analyses of violent conflict behavior, including causes and consequences of riots, terrorism, revolution, international war, and intervention. Restricted to graduate students or instructor consent required. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Political Science | International Relations

PSCI-7903 (1-3) Independent Study

Not a free option; must be approved by the student's advisor and program chair. Does not count as seminar. Not more than 6 hours of independent study may be credited toward PhD degree in political science. Special independent study approval agreement form must be completed by student and signed by faculty advisor. May be repeated up to 6 total credit hours.

College of Arts & Sciences | Political Science | International Relations

PSCI-8903 (1-3) Graduate Research Topic

Provides an opportunity for independent research in a topic of special interest. Arrangements are made to suit the needs of each particular student. Not a free option; must be approved by student's advisor and department chair. Does not count as a seminar. May be repeated up to 7 total credit hours. Same as PSCI 6903.

College of Arts & Sciences | Political Science | International Relations

PSCI-8993 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

PSCI-2004 (3) Survey of Western Political Thought

Studies main political philosophies and political issues of Western culture, from antiquity to 20th century. Approved for GT-SS1. Approved for arts and sciences core curriculum: ideals and values.

[College of Arts & Sciences](#)
[Political Science](#)
[Political Theory](#)

PSCI-3054 (3) American Political Thought

Highlights the development of American political theories and ideas from colonial period to present. Can also be taken for American field credit. Recommended prereq., PSCI 2004. Approved for arts and sciences core curriculum: United States context or ideals and values. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

[College of Arts & Sciences](#)
[Political Science](#)
[Political Theory](#)

PSCI-3064 (3) Environmental Political Theory

Examines environmental discourses as conceptual means for theorizing environmental politics, and applies normative political theories to contemporary environmental policy issues. Considers the roles of political actors (individuals, groups, the state) in defining and addressing environmental problems on local, national, and global levels. Recommended prereq., PSCI 2004. Approved for arts and sciences core curriculum: ideals and values.

[College of Arts & Sciences](#)
[Political Science](#)
[Political Theory](#)

PSCI-3074 (3) Dimensions of Citizenship in the US and the EU

Studies theories and problems related to citizenship in the US and the EU. This includes rights and restrictions of citizenship, issues of immigration, multicultural citizenship, globalization and citizenship. In the EU the relation between member nation citizenship and EU citizenship is a special problem. Examines how the US and EU compare. Approved for arts and sciences core curriculum: contemporary societies.

College of Arts & Sciences | Political Science | Political Theory

PSCI-3084 (3) Diversity, Disagreement, and Democracy: an Introduction to the Theory and Practice of Democracy

Examines the justification and limits for moral, political, and religious pluralism. The students will be trained in the practice of dialogue. They will research the historical context of a subject that would be appropriate for a dialogue and interview members of the community who have different perspectives on the subject. Restricted to students with minimum 26 hours completed.

College of Arts & Sciences | Political Science | Political Theory

PSCI-4024 (3) Senior Seminar in Political Theory

Intensively analyzes and discusses major theories and issues of both contemporary political thought and the history of political philosophy. The topic is announced by the instructor, but might include analysis of concepts (justice, human rights, democracy, etc.) or major theories. Emphasizes advanced discussion plus individual research. Prereq., PSCI 2004.

College of Arts & Sciences | Political Science | Political Theory

PSCI-4714 (3) Liberalism and Its Critics

Examines contemporary arguments for and against liberalism. Focuses on the analysis, evaluation, and understanding of the philosophical contributions to this debate. Gives special attention to the concepts of justice, freedom, equality, and individualism. Prereq., PSCI 2004. Prerequisites: Restricted to students with 57-180 credits (Juniors or Seniors).

College of Arts & Sciences | Political Science | Political Theory

PSCI-4734 (3) Politics and Literature

Broadly examines political topics as they are presented in important literary works and analyzes the possibilities involved in using the literary mode to present political teachings. Prereq., PSCI 2004. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

College of Arts & Sciences | Political Science | Political Theory

PSCI-4774 (3) Liberal Democracy and the First Amendment

Examines in depth various philosophical and legal justifications of First Amendment rights of speech, press, association, and religion. Assesses these justifications in relation to broader normative theories of liberal democracy. Prereq., PSCI 2004. Recommended prereq., PSCI 2481. Restricted to juniors/seniors. Prerequisites: Restricted to students with 57-180 credits (Juniors or Seniors).

| | | |

|----------------------------|-------------------|------------------|
| College of Arts & Sciences | Political Science | Political Theory |
|----------------------------|-------------------|------------------|

PSCI-6904 (1-3) Graduate Research Topic

Independent research in a topic of special interest. Arrangements made to suit needs of each student. Not a free option; must be approved by student's advisor and department chair. Does not count as a seminar. Maybe repeated up to 7 total credit hours. Same as PSCI 8904.

| | | |
|----------------------------|-------------------|------------------|
| College of Arts & Sciences | Political Science | Political Theory |
|----------------------------|-------------------|------------------|

PSCI-6954 (1-6) Master's Thesis

May be repeated up to 6 total credit hours. Prerequisites: Restricted to Graduate Students only.

| | | |
|----------------------------|-------------------|------------------|
| College of Arts & Sciences | Political Science | Political Theory |
|----------------------------|-------------------|------------------|

PSCI-7004 (3) Seminar: Political Theory

Allows for intensive research in and presentation of selected topics. Introduces students to the broad context within which political ideas arise. Deals with classical and modern thought. Restricted to graduate students or instructor consent required. Prerequisites: Restricted to Graduate Students only.

| | | |
|----------------------------|-------------------|------------------|
| College of Arts & Sciences | Political Science | Political Theory |
|----------------------------|-------------------|------------------|

PSCI-7024 (3) Seminar: Selected Political Theories

Familiarizes students with selected political philosophies or theories in classical or modern political thought. Restricted to graduate students or instructor consent required.

| | | |
|----------------------------|-------------------|------------------|
| College of Arts & Sciences | Political Science | Political Theory |
|----------------------------|-------------------|------------------|

PSCI-7114 (3) Survey of Historical and Contemporary Political Theory

Examines major texts of Western political thought from the ancients through the 21st century. Introduces students to major schools of contemporary political theory, while situating these in their

larger political context. Professionalizes students through presentations and research projects. Texts vary each semester. May be repeated up to 6 total credit hours. Recommended prereq., some previous coursework in political theory or philosophy. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Political Science | Political Theory

PSCI-7124 (3) Contemporary Democratic Theory

Surveys major schools of contemporary democratic theory and introduces students to current scholarly debates about democracy and democratic politics. Professionalizes students through class presentations and research projects. Specific controversies and texts vary each semester. Recommended prereq., some previous coursework in political theory or philosophy. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Political Science | Political Theory

PSCI-8904 (1-3) Graduate Research Topic

Provides an opportunity for independent research in a topic of special interest. Arrangements are made to suit the needs of each particular student. Not a free option; must be approved by student's advisor and department chair. Does not count as a seminar. May be repeated up to 7 total credit hours. Same as PSCI 6904.

College of Arts & Sciences | Political Science | Political Theory

PSCI-8994 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

PSCI-2075 (3) Quantitative Research Methods

Introduces quantitative research methods used in political science. Focuses on basic tools of analysis: data collection, processing, and evaluation, with special attention to survey techniques. Includes elite and case study analysis; aggregate, cluster, and content analysis; and the use of computers in political research. Restricted to students with 6 completed hours of political science course work. Approved for arts and sciences core curriculum: quantitative reasoning and mathematical skills.

[College of Arts & Sciences](#)
[Political Science](#)
[Empirical Thry & Research Mthd](#)

PSCI-3105 (3) Designing Social Inquiry: An Introduction to Analyzing Political Phenomena

This course is designed to survey the wide range of research designs and methods employed in political science research, including normative analysis, interpretive analysis and causal analysis. It will provide an introduction to students planning to write honors theses and will be useful for any student planning to do research in political science as part of a senior seminar or capstone course. Approved for arts and sciences core curriculum: quantitative reasoning and mathematics. Prerequisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors).

[College of Arts & Sciences](#)
[Political Science](#)
[Empirical Thry & Research Mthd](#)

PSCI-3225 (3) Rationality, Democracy, and Public Policy

Focuses on the rational choice approach to understanding social decision making. Examines possibilities for choosing rational courses of social action and concrete problems of rational decision making. Prereqs., PSCI 1101 or 2012. Restricted to sophomores/juniors/seniors.

[College of Arts & Sciences](#)
[Political Science](#)
[Empirical Thry & Research Mthd](#)

PSCI-4715 (3) Honors Political Science Seminar

Involves writing and discussion of selected topics in political science. Critically reviews the major methodological and conceptual features of the discipline. Students begin their honors papers in the seminar. Prereq., GPA of at least 3.50. Formerly PSCI 4718. Generally offered in fall term only.

| | | |
|----------------------------|-------------------|--------------------------------|
| College of Arts & Sciences | Political Science | Empirical Thry & Research Mthd |
|----------------------------|-------------------|--------------------------------|

PSCI-6905 (1-3) Graduate Research Topic

Independent research in a topic of special interest. Arrangements made to suit needs of each student. Not a free option; must be approved by student's advisor and department chair. Does not count as a seminar. May be repeated up to 7 total credit hours. Same as PSCI 8905. Prerequisites: Restricted to Graduate Students only.

| | | |
|----------------------------|-------------------|--------------------------------|
| College of Arts & Sciences | Political Science | Empirical Thry & Research Mthd |
|----------------------------|-------------------|--------------------------------|

PSCI-6955 (1-6) Master's Thesis

May be repeated up to 6 total credit hours. Prerequisites: Restricted to Graduate Students only.

| | | |
|----------------------------|-------------------|--------------------------------|
| College of Arts & Sciences | Political Science | Empirical Thry & Research Mthd |
|----------------------------|-------------------|--------------------------------|

PSCI-7055 (3) Introductory Game Theory

Develops competence in engaging formal theories of politics and in constructing and solving basic game-theoretic models of political behavior. Restricted to graduate students or instructor consent required. Prerequisites: Restricted to Graduate Students only.

| | | |
|----------------------------|-------------------|--------------------------------|
| College of Arts & Sciences | Political Science | Empirical Thry & Research Mthd |
|----------------------------|-------------------|--------------------------------|

PSCI-7075 (3) Introduction to Professional Political Science

Introduces graduate students to intellectual foundations and historical development of political science; epistemologies, subfields, intellectual approaches, methodological strategies of the discipline; and ethics and norms of professional conduct. Restricted to graduate students or instructor consent required. Prerequisites: Restricted to Graduate Students only.

| | | |
|----------------------------|-------------------|--------------------------------|
| College of Arts & Sciences | Political Science | Empirical Thry & Research Mthd |
|----------------------------|-------------------|--------------------------------|

PSCI-7085 (4) Introduction to Political Science Data Analysis

Provides intensive experience with quantitative techniques commonly employed in political science research; builds on a review of multivariate regression, inferential statistics, and causal modeling. Students undertake substantive research projects, requiring lab instruction in the use of the computer in quantitative applications of political science research. Prereq., graduate standing in PSCI or instructor consent. Prerequisites: Restricted to Political Science (PSCI) graduate students only.

| | | |
|----------------------------|-------------------|--------------------------------|
| College of Arts & Sciences | Political Science | Empirical Thry & Research Mthd |
|----------------------------|-------------------|--------------------------------|

PSCI-7095 (3) Advanced Political Data Analysis

Provides advanced training in empirical and analytic methods of political analysis. Covers general multivariate linear (regression) model as employed in political science. Also covers a variety of dynamic approaches to empirical analysis (stochastic models, time series, and simulation). Prereq., PSCI 7085. Restricted to graduate students. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Political Science | Empirical Thry & Research Mthd

PSCI-7115 (3) Qualitative Methods

Develop proficiency in constructing research designs with qualitative methods. The goal is to understand and be able to justify research designs involving relatively small numbers of observations as good political science given the fact that such designs may limit our ability to generalize. Restricted to graduate students or instructor consent required. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Political Science | Empirical Thry & Research Mthd

PSCI-7145 (3) Basic Formal Methods in Political Science

Introduces the application and role of models in political science (domestic and international politics), in areas such as voting, committees, power, decision making, and war and peace. Models include applications of set theory, elementary probability, games, and systems analysis. Restricted to graduate students or instructor consent required.

College of Arts & Sciences | Political Science | Empirical Thry & Research Mthd

PSCI-7175 (3) Dissertation Seminar

Help students make progress towards (1) in the short term: focusing in on a dissertation topic, crafting a dissertation prospectus, and identifying potential funding sources; and (2) in the long term: sending papers out for review, developing a package for the job market, and understanding the academic job market and the tenure process. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Political Science | Empirical Thry & Research Mthd

PSCI-7905 (1-3) Independent Study

Not a free option; must be approved by the student's advisor and program chair. Does not count as seminar. Not more than 6 hours of independent study may be credited toward PhD degree in political science. Special independent study approval agreement form must be completed by student and signed by faculty advisor. May be repeated up to 6 total credit hours.

College of Arts & Sciences | Political Science | Empirical Thry & Research Mthd

PSCI-8905 (1-3) Graduate Research Topic

Provides an opportunity for independent research in a topic of special interest. Arrangements are made to suit the needs of each particular student. Not a free option; must be approved by student's advisor and department chair. Does not count as a seminar. May be repeated up to 7 total credit hours. Same as PSCI 6905.

College of Arts & Sciences | Political Science | Empirical Thry & Research Mthd

PSCI-8995 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

PSCI-2106 (3) Introduction to Public Policy Analysis

Studies policymaking processes in American government, factors shaping public decision, and issues and questions relevant to political inquiry.

[College of Arts & Sciences](#)
[Political Science](#)
[Public Policy](#)

PSCI-2116 (3) Introduction to Environmental Policy and Policy Analysis

Teaches a systematic general framework for the analysis of environmental policy issues. Analyzes the interaction of environmental sciences, ethics, and policy across a range of environmental policy problems. Stresses critical thinking and practical applications. Recommended prereq., ENVS 1000.

[College of Arts & Sciences](#)
[Political Science](#)
[Public Policy](#)

PSCI-3206 (3) The Environment and Public Policy

Considers constitutional, political, and geographic factors in development of public policy affecting the use of natural resources and management of the environment; organization, procedures, and programs for use of natural resources; and administration of environmental policies. Prereq., PSCI 1101. Prerequisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

[College of Arts & Sciences](#)
[Political Science](#)
[Public Policy](#)

PSCI-4716 (3) Selected Policy Problems

Integrates general principles of policy inquiry with documents and other literature on specific problems in public policy, in order to evaluate courses of action. May be repeated up to 6 total credit hours on different topics. Prereq., PSCI 1101. Restricted to juniors and seniors. Prerequisites: Restricted to students with 57-180 credits (Juniors or Seniors).

| | | |

|----------------------------|-------------------|---------------|
| College of Arts & Sciences | Political Science | Public Policy |
|----------------------------|-------------------|---------------|

PSCI-7016 (3) Introduction to the Policy Sciences

Provides an introduction to the policy sciences as a distinctive tradition within the policy field. Emphasizes the use of conceptual tools to improve analysis of complex problems. Teaches problem solving framework that students apply to an issue of their choice. Restricted to graduate students or instructor consent required. Same as ENVS 5710. Prerequisites: Restricted to Graduate Students only.

| | | |
|----------------------------|-------------------|---------------|
| College of Arts & Sciences | Political Science | Public Policy |
|----------------------------|-------------------|---------------|

PSCI-7026 (3) The Problem Orientation

Teaches basic problem solving framework for policy analysis. Emphasizes applications to develop policy recommendations for issues selected by students. Includes group projects. Restricted to graduate students or instructor consent required. Same as ENVS 5720.

| | | |
|----------------------------|-------------------|---------------|
| College of Arts & Sciences | Political Science | Public Policy |
|----------------------------|-------------------|---------------|

PSCI-7036 (3) Introduction to the Policy Sciences: The Decision Process

Provides policy sciences frameworks for analyzing policy processes and designing political strategies to influence those processes in the direction of the preferred alternative. Emphasizes applications to problems selected by students for term projects. Restricted to graduate students or instructor consent required. Same as ENVS 5730. Prerequisites: Restricted to Graduate Students only.

| | | |
|----------------------------|-------------------|---------------|
| College of Arts & Sciences | Political Science | Public Policy |
|----------------------------|-------------------|---------------|

PSCI-7046 (3) Seminar: Urban Public Policy

Focuses on formulation, revision, and outcomes of public policy in American urban communities. Also uses some comparative Canadian and European literature. Restricted to graduate students or instructor consent required.

College of Arts & Sciences | Political Science | Public Policy

PSCI-7056 (3) Readings in Public Policy

Explores diverse approaches to policy choice, change, and learning processes. Overviews literature on policy determinants and typologies, policy subsystems, innovation and diffusion, agenda setting, implementation, problem definition and social construction, policy design, institutional analysis, and policy and democratic values. Restricted to graduate students or instructor consent required. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Political Science | Public Policy

PSCI-7116 (3) Context-Sensitive Research Methods

Prepares students to conduct research on topics where data is not obvious or not easily available. Encompasses variations in context and setting as part of data observations. Methods include interviewing protocols, interpretive methods, cluster analyses, case study methodologies, and textual analyses. Restricted to graduate students or instructor consent required. Same as ENVS 5740.

College of Arts & Sciences | Political Science | Public Policy

PSCI-7906 (1-3) Independent Study

Not a free option; must be approved by the student's advisor and program chair. Does not count as seminar. Not more than 6 hours of independent study may be credited toward PhD degree in political science. Special independent study approval agreement form must be completed by student and signed by faculty advisor. May be repeated up to 6 total credit hours.

College of Arts & Sciences | Political Science | Public Policy

PSCI-8906 (1-3) Graduate Research Topic

Provides an opportunity for independent research in a topic of special interest. Arrangements are made to suit the needs of each particular student. Not a free option; must be approved by student's advisor and department chair. Does not count as a seminar. May be repeated up to 7 total credit hours. Same as PSCI 6906.

College of Arts & Sciences | Political Science | Public Policy

PSCI-8996 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the

Graduate School section.

ECON-4309 (3) Economics Honors Seminar 1

For information consult the department's director of honors. Open only to qualified seniors. Prerequisites: Restricted to students with 57-180 credits (Juniors or Seniors).

[College of Arts & Sciences](#)
[Economics](#)
[Independent Study and Other](#)

ECON-4339 (3) Economics Honors Seminar 2

For information consult the department's director of honors. This course does not count toward major requirements. Prereq., ECON 4309. Prerequisites: Restricted to students with 57-180 credits (Juniors or Seniors).

[College of Arts & Sciences](#)
[Economics](#)
[Independent Study and Other](#)

ECON-4909 (3) Independent Study

May be repeated up to 6 total credit hours, but only 3 credit hours count for economics major. Prereqs., ECON 2010 and 2020; completion of at least 12 hours of ECON classes and instructor and department consent required. Offered only to students with a GPA of 3.00 or better.

[College of Arts & Sciences](#)
[Economics](#)
[Independent Study and Other](#)

ECON-4939 (2-6) Internship/Seminar

Offers students the opportunity to integrate theoretical concepts of economics with practical experience in economics-related institutions. The theoretical portion arises from seminars and readings, the practical from activities in organizations related to the economics field. A maximum of 3 credit hours counts toward major requirements. Prereqs., ECON 3070 and 3080 and instructor consent. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) Economic (ECON) majors only.

College of Arts & Sciences | Economics | Independent Study and Other

ECON-4999 (3) Economics in Action: A Capstone Course

Students read current periodicals, picking out topics in which economics plays a role in understanding events. Background reading is assigned on topics chosen. May not be taken more than once for credit. Prereqs., ECON 3070 and 3080, and junior or senior standing. Prerequisites: Restricted to students with 57-180 credits (Juniors or Seniors).

College of Arts & Sciences | Economics | Independent Study and Other

ECON-6209 (3) Research Methods in Economics

Trains graduate students in scientific methodology and research in economics. Culminates in a research project that normally leads directly to thesis work. Prereqs., ECON 6070, 6080, 6808, and 6818.

College of Arts & Sciences | Economics | Independent Study and Other

ECON-6949 (1) Master's Candidate

College of Arts & Sciences | Economics | Independent Study and Other

ECON-6959 (1-6) Master's Thesis

College of Arts & Sciences | Economics | Independent Study and Other

ECON-8209 (3) Economics Research Methods Workshop 1

Assists students starting their doctoral thesis by discussing methodology and evaluation of economic research. Presents and discusses student research proposals. Prereqs., two ECON courses at the 8000 level. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Economics | Independent Study and Other

ECON-8219 (3) Economics Research Methods Workshop 2

Continuation of ECON 8209. Assists students starting their doctoral thesis by discussing relevant economic research. Presents and discusses research papers. Prereq., ECON 8209.

College of Arts & Sciences | Economics | Independent Study and Other

College of Arts & Sciences | Economics | Independent Study and Other

ECON-8909 (1-3) Independent Study

May be repeated up to 7 total credit hours. Prereq., instructor and department consent.

College of Arts & Sciences | Economics | Independent Study and Other

ECON-8999 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section. Prerequisites: Economic (ECON) graduate students are restricted from taking this course.

ENGL-5019 (3) Survey of Contemporary Literary and Cultural Theory

Introduces a variety of critical and theoretical practices informing contemporary literary and cultural studies. May be repeated up to 6 total credit hours. Prerequisites: Restricted to English (ENGL) MA-Lit graduate students only.

[College of Arts & Sciences](#) [English](#) [Graduate Courses](#)

ENGL-5029 (3) British Literature and Culture Before 1800

Introduces graduate level study of medieval and early modern writing through the long eighteenth century. Emphasizes a wide range of genres, forms, historical background, and secondary criticism. Cultivates research skills necessary for advanced graduate study. Topics will vary. May be repeated up to 6 total credit hours. Prerequisites: Restricted to English and English Lit- Creative Writing graduate students only.

[College of Arts & Sciences](#) [English](#) [Graduate Courses](#)

ENGL-5059 (3) British Literature and Culture After 1800

Introduces graduate level study of Romantic, Victorian, Modern, and Postmodern writing. Emphasizes a wide range of genres, forms, historical background, and secondary criticism. Cultivates research skills necessary for advanced graduate study. Topics will vary. May be repeated up to 6 total credit hours. Same as ENGL 5079. Prerequisites: Restricted to English and English Lit- Creative Writing graduate students only.

[College of Arts & Sciences](#) [English](#) [Graduate Courses](#)

ENGL-5079 (3) British Literature and Culture After 1800.

Same as ENGL 5059.

College of Arts & Sciences | English | Graduate Courses

ENGL-5109 (3) Literature and Culture of the United States

Introduces graduate level study of writing of the United States from its inception to the present. Emphasizes a wide range of genres, forms, historical background, and secondary criticism. Topics will vary. May be repeated up to 6 total credit hours. Prerequisites: Restricted to English and English Lit- Creative Writing graduate students only.

College of Arts & Sciences | English | Graduate Courses

ENGL-5139 (3) Global Literature and Culture

Introduces graduate level study of recent writing in English from around the world. Emphasizes a wide range of genres, forms, new media, and secondary criticism. Cultivates research skills necessary for advanced graduate study. Topics will vary. May be repeated up to 6 total credit hours. Prerequisites: Restricted to English Lit-Creative Writing (CRWR), English Literature (ENLT), English (ENGL) or Comparative Literature (CMLT) graduate students only.

College of Arts & Sciences | English | Graduate Courses

ENGL-5169 (3) Multicultural/Postcolonial Studies.

Introduces graduate level study of ethnic American and/or postcolonial writing in English, including relevant theoretical discourse. Emphasizes a wide range of genres, forms, historical background, and secondary criticism. Cultivates research skills necessary for advanced graduate study. Topics will vary. May be repeated up to 6 total credit hours. Prerequisites: Restricted to English and English Lit- Creative Writing graduate students only.

College of Arts & Sciences | English | Graduate Courses

ENGL-5199 (3) Studies in Special Topics

See ENGL 5109 for description.

College of Arts & Sciences | English | Graduate Courses

ENGL-5229 (3) Poetry Workshop

Designed to give students time and impetus to generate poetry and discussion of it in an atmosphere at once supportive and critically serious. Admission to graduate creative writing students or by instructor's approval of an application manuscript. May be repeated up to 9 total credit hours. Prerequisites: Restricted to English and English Lit- Creative Writing graduate students only.

College of Arts & Sciences | English | Graduate Courses

ENGL-5239 (3) Fiction Workshop

Designed to give students time and impetus to generate fiction and discussion of it in an atmosphere at once supportive and critically serious. Admission to graduate creative writing students or by instructor's approval of an application manuscript. May be repeated up to 9 total credit hours. Prerequisites: Restricted to English and English Lit- Creative Writing graduate students only.

College of Arts & Sciences English Graduate Courses

ENGL-5259 (3) Nonfiction Workshop

Designed to give students time and impetus to generate nonfiction and discussion of it in an atmosphere at once supportive and critically serious. Admission to graduate creative writing students or by instructor's approval of an application manuscript. May be repeated up to 9 total credit hours. Prerequisites: Restricted to English and English Lit- Creative Writing graduate students only.

College of Arts & Sciences English Graduate Courses

ENGL-5269 (3) Publishing Workshop

Provides practical experience in the editorial, design, and business procedures of desktop publishing. Prerequisites: Restricted to English and English Lit- Creative Writing graduate students only.

College of Arts & Sciences English Graduate Courses

ENGL-5279 (3) Studies in Poetry

Addresses modern poetry, written since World War II. May be repeated up to 6 total credit hours. Prerequisites: Restricted to English and English Lit- Creative Writing graduate students only.

College of Arts & Sciences English Graduate Courses

ENGL-5299 (3) Studies in Fiction

Addresses modern fiction written since World War II. May be repeated up to 6 total credit hours. Prerequisites: Restricted to English and English Lit- Creative Writing graduate students only.

College of Arts & Sciences English Graduate Courses

ENGL-5309 (3) Playwriting

Prerequisites: Restricted to English and English Lit- Creative Writing graduate students only.

College of Arts & Sciences English Graduate Courses

ENGL-5319 (3) Studies in Literary Movements

Studies styles, trends, innovations, and major writers in significant literary movements, particularly those after 1900, such as modernism and objectivism. May be repeated up to 9 total credit hours. Restricted to graduate CRWR, ENLT, and ENGL majors. Prerequisites: Restricted to English Literature-Creative Writing, English Literature or English graduate students only.

College of Arts & Sciences English Graduate Courses

APPM-7400 (1-3) Topics in Applied Mathematics

Provides a vehicle for the development and presentation of new topics with the potential of being incorporated into the core courses in applied mathematics. May be repeated up to 6 total credit hours. Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Applied Mathematics

SPAN-7400 (2-4) Seminar: Spanish Phonology

Same as SPAN 5400.

College of Arts & Sciences | Spanish | Spanish

CHEM-7401 (1) Seminar in Photochemical Reaction Control

Discusses progress towards control of molecular reactivity using light, including synthetic methods for creating control subjects. Emphasizes new methods to achieve coherent control. May be repeated up to 2 total credit hours. Prereq., graduate standing or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Chemistry

LING-7410 (3) Phonological Theory

Phonetic and morphophonological representations: distinctive features, segments, prosodic structures, morphological structures. Phonological processes and their interaction. Naturalness conditions. Prereq., LING 5410 or equivalent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Linguistics

SPAN-7410 (2-4) Seminar: Spanish Syntax

Same as SPAN 5410.

College of Arts & Sciences | Spanish | Spanish

HIST-7415 (3) Graduate Seminar in Modern United States History

Introduces students to various research approaches and methods in modern U.S. historiography and requires them to produce a substantial and original research paper using both primary and secondary sources. Prereq., graduate standing. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | History | US: Chronological Periods

LING-7415 (2) Cognitive Science Research Practicum

Independent, interdisciplinary research project in cognitive science for advanced graduate students pursuing a joint PhD in an approved core discipline and cognitive science. Research projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students need commitments from two mentors for their project. Prereq., CSCI 6402 or EDUC 6504 or LING 6200 or PHIL 6310 or PSYC 6200. Recommended prereq., CSCI 7762 or EDUC 6505 or LING 7762 or PHIL 7310 or PSYC 7762. Same as PSYC 7415, CSCI 7412, PHIL 7415, and EDUC 6506. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Linguistics

PHIL-7415 (2) Cognitive Science Research Practicum.

Independent, interdisciplinary research project in cognitive science for graduate students pursuing a joint PhD in an approved core discipline and cognitive science. Projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students should obtain commitments from two mentors for their project. Prereqs., CSCI 6402 or EDUC 6504 or LING 6200 or PHIL 6310 or PSYC 6200. Recommended prereqs., CSCI 7762 or EDUC 6505 or LING 7762 or PSYC 7765. Same as LING 7415, PSYC 7415, CSCI 7412, and EDUC 6506.

College of Arts & Sciences | Philosophy

PSYC-7415 (2) Cognitive Science Research Practicum

Independent, interdisciplinary research project in cognitive science for advanced graduate students pursuing a joint PhD in an approved core discipline and cognitive science. Research projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students need commitments from two mentors for their project. Prereq., CSCI 6402 or EDUC 6504 or LING 6200 or PHIL 6310 or PSYC 6200. Recommended prereq., CSCI 7762 or EDUC 6505 or LING 7762 or PHIL 7310 or PSYC 7762. Same as LING 7415, CSCI 7412, PHIL 7415, and EDUC 6506. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Psychology | Experimental

LING-7420 (3) Syntactic Theory

Covers various topics in syntactic theory. May be repeated up to 9 total credit hours with instructor consent. Prereq., LING 5420 or equivalent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Linguistics

SPAN-7420 (2-4) Seminar: History of the Spanish Language

Same as SPAN 5420.

College of Arts & Sciences | Spanish | Spanish

CHEM-7421 (2) Seminar: Negative Ion Chemistry

Chemistry of negative ions; experimental methods and designs; laser spectroscopy of ions; theoretical methods; reactive dynamics of ions in the gas phase. May be repeated up to 6 total credit hours. Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Chemistry

HIST-7424 (3) Research Methods in Medieval/Early Modern European History

Introduces students to research skills needed to work with historical manuscripts. Students learn to read late medieval/early modern handwriting, explore CU's microfilmed collections of manuscripts, and write a research paper based on the manuscript materials. Prereq., graduate standing or instructor consent.

College of Arts & Sciences | History | Europe: Topical

LING-7425 (2) Cognitive Science Research Practicum 2

Independent, interdisciplinary research project in cognitive science for advanced graduate students pursuing a joint Phd in an approved core discipline and cognitive science. Research projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students need commitments from two mentors for their project. Prereq., LING 7415 or PSCY 7415 or CSCI 7412 or EDUC 6506. Same as PSYC 7425, CSCI 7422, PHIL 7425, and EDUC 6516. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Linguistics

PHIL-7425 (2) Cognitive Science Research Practicum 2.

Prereq., CSCI 6402 or EDUC 6504 or LING 6200 or PHIL 6310 or PSYC 6200. Recommended prereq., CSCI 7762 or EDUC 6505 or LING 7762 or PHIL 6310 or PSYC 7762. Same as CSCI 7422, EDUC 6516, LING 7425, PSYC 7425.

College of Arts & Sciences | Philosophy

PSYC-7425 (2) Cognitive Science Research Practicum 2

Independent, interdisciplinary research project in cognitive science for advanced graduate students pursuing a joint PhD in an approved core discipline and cognitive science. Research projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students need commitments from two mentors for their project. Prereq., LING 7415 or PSCY 7415 or CSCI 7412 or EDUC 6506. Same as LING 7425, CSCI 7422, PHIL 7425, and EDUC 6516. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Psychology | Experimental

LING-7430 (3) Semantic Theory

Current developments in the theory of linguistic semantics. Topics include truth-conditional theories, generative linguistic theories, semantic theories of communicative competence, and integration of these theories in development of a combined theory of semantics and pragmatics. Prereq., LING 5430 or instructor consent.

College of Arts & Sciences | Linguistics

SPAN-7430 (1-3) Seminar: Hispanic Linguistics

Same as SPAN 5430.

College of Arts & Sciences | Spanish | Spanish

CHEM-7431 (1) Seminar: Topics in Theoretical Chemical Physics

Seminars presented on a variety of topics in theoretical chemical physics. Molecular collisions and unimolecular dynamics predominantly featured. May be repeated up to 6 total credit hours. Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Chemistry

PHYS-7440 (3) Theory of the Solid State

Stresses application to the solid state of physical concepts basic to much of modern physics, single-particle approximation, and the energy-band description of electron states in solids, pseudopotential theory applied to ordered and disordered systems, dynamical behavior of electrons in solids, lattice dynamics, Hartree-Fock and random-phase approximation in solids, many-body aspects of magnetism, and superconductivity. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Physics

SPAN-7440 (3) Seminar: Trends in Hispanic Linguistics

Same as SPAN 5440. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Spanish | Spanish

CHEM-7441 (2) Research Seminar: Theoretical Chemistry

Studies theoretical description of molecular dynamics as related to rate processes. Focuses on chemical reactions in liquids, absorption-desorption on surfaces, nucleation reactions, and energy flow in molecules. May be repeated up to 6 total credit hours. Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Chemistry

PHYS-7450 (3) Theory of Solid State 2

The second semester of condensed matter physics covers topics in soft condensed matter physics, liquid crystals, semiconductors, Quantum Hall effect, Fractional Quantum Hall effect, superconductivity, and other topics at the discretion of the instructor.

College of Arts & Sciences | Physics

SLHS-7450 (3) Audiology Capstone Project

Provides an individualized project for AUD, completed prior to initiation of final clinical year. May be in the form of research-based investigation, an evidence-based position paper, a clinical protocol based on peer-reviewed literature, a grant proposal, or another format approved by AUD committee. Project requires approved proposal by AUD committee and focused study supervised by capstone advisor. Restricted to students enrolled in the AUD graduate program. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Speech, Language, & Hearing Sciences | Didactic: All-Department

SPAN-7460 (3) Topics in Spanish Language Acquisition and Applied Linguistics

Same as SPAN 5460.

College of Arts & Sciences | Spanish | Spanish

CHEM-7461 (1) Seminar: Gas Phase Ion Chemistry

Studies gas phase ion chemistry relevant to thermochemical measurements and atmospheric, interstellar, and biomedical applications. Prerequisites: Restricted to Graduate Students only.

[College of Arts & Sciences](#) [Chemistry](#)

HIST-7464 (3) Seminar: European Intellectual History

[College of Arts & Sciences](#) [History](#) [Europe: Topical](#)

CHEM-7471 (1) Seminar in Ultrafast Spectroscopy of Proteins

Discusses advances and developments in biomolecular dynamics, and considers the connection of protein dynamics with function. Emphasizes experimental studies via ultrafast laser spectroscopy. May be repeated up to 2 total credit hours. Prereq., graduate standing or instructor consent. Prerequisites: Restricted to Graduate Students only.

[College of Arts & Sciences](#) [Chemistry](#)

CHEM-7481 (2) Seminar: Molecular Spectroscopy and Photochemistry

Discussion and presentation of current research in spectroscopy and photochemistry of organic as well as organometallic systems. Reviews state of the art techniques available for the theoretical and experimental characterization of excited states. May be repeated up to 6 total credit hours. Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

[College of Arts & Sciences](#) [Chemistry](#)

HIST-7485 (3) Seminar: United States History, 1948-Present

College of Arts & Sciences | History | US: Chronological Periods

ENGL-7489 (3) Advanced Special Topics

Studies special topics in theory, culture, and literature of any period. Topics will vary. May be repeated up to 9 total credit hours. Prereq., ENGL 5019; Ph.D. exempted. Prerequisites: Restricted to English and English Lit- Creative Writing graduate students only.

College of Arts & Sciences | English | Graduate Courses

CHEM-7491 (1) Seminar: Molecular Vibrational Dynamics

Topics pertaining to vibrational dynamics of small molecules are discussed, with particular emphasis upon IR laser spectroscopy, van der Waals' clusters, vibrationally induced dipole moments, and predissociation. Discussion of current research and recently published literature. May be repeated up to 6 total credit hours. Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Chemistry

ASTR-7500 (1-3) Special Topics in Astrophysical and Planetary Sciences

Acquaints students with current research in astrophysical and planetary sciences. Topics vary each semester. May be repeated up to 9 total credit hours. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Astrophysical & Planetary Sciences

ATOC-7500 (1-3) Special Topics in Atmospheric and Oceanic Sciences

Acquaints students with current research in atmospheres, oceans, and climate. Topics may vary each semester. May be repeated up to 9 total credit hours. Students may register for more than one section of this course in the same semester. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Atmospheric & Oceanic Sciences

CHEM-7501 (1) Seminar: Theoretical Molecular Dynamics

Variety of topics in theoretical chemical physics, emphasizing dynamics of molecules in dissipative environments or in radiation fields. May be repeated up to 6 total credit hours. Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Chemistry

CHEM-7511 (1) Seminar: Reaction Dynamics in Condensed Phases

Studies elementary steps in chemical reactions and their observation by ultrafast spectroscopy. May be repeated up to 6 total credit hours. Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Chemistry

SLHS-7520 (3) Auditory Processes: Medical and Genetic Bases

Discusses current developments in epidemiology, pathogenesis, and symptomatology of hearing loss. Investigates the genetic bases of hearing loss and deafness. Incorporates clinical decision theory in assessment and intervention. Explores cross-disciplinary topics from genetics, radiology, pharmacology, pathology, and otology. Prerequisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

College of Arts & Sciences | Speech, Language, & Hearing Sciences | Didactic: Audiology

CHEM-7521 (1) Seminar: Atmospheric Kinetics and Photochemistry

Discusses laboratory studies of degradation mechanisms. Applies these studies to atmospheric phenomena such as global warming and stratospheric ozone loss. May be repeated up to 6 total credit hours. Prereqs., instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Chemistry

SLHS-7530 (3) Auditory Processes: Theory and Application in the School Environment

Focuses on application of routine audiological practices such as screening, assessment, rehabilitation, and instrumentation to children in educational settings. Emphasizes federal education regulations and pertinent case law. Prerequisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

College of Arts & Sciences | Speech, Language, & Hearing Sciences | Didactic: Audiology

CHEM-7531 (1) Seminar: Surface Chemistry and Thin Film Growth

Topics in surface chemistry and thin film growth with focus on atomic layer deposition (ALD) and molecular layer deposition (MLD). Properties of thin films grown using ALD and MLD. Applications of thin films in areas including flexible displays, energy storage and catalysis. May be repeated up to 6 total credit hours. Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Chemistry

PSYC-7536 (3) Personality and Social Psychology

Selected topics in the area of social-personality psychology. Students may register for more than one section of this course within the term and/or within their graduate career. These seminars may be on one of the following topics: stereotyping and person perception, social psychology and self, social psychology of problem behavior, health and social psychology, race and ethnic identity, or groups and small group organization. May be repeated up to 8 total credit hours. Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Psychology | Social

SLHS-7540 (3) Auditory Processes: Physiology, Assessment, and Management of the Vestibular System

Emphasizes current research on physiology of the vestibular system, including both structure and function. Considers the etiology of both peripheral and central pathologies of the vestibular system. Discusses ways to assess function of the vestibular system as well as theoretical and practical considerations of vestibular rehabilitation. Prerequisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

College of Arts & Sciences | Speech, Language, & Hearing Sciences | Didactic: Audiology

PHYS-7550 (3) Atomic and Molecular Spectra

Covers theory of atomic structure and spectra, including coupling of angular momenta, tensor operators, energy levels, fine and hyperfine structure, transition probabilities, Zeeman and Stark effects. Molecular spectra: electronic, vibrational, and rotational states. Rotation matrices, symmetric top.

College of Arts & Sciences | Physics

SLHS-7550 (2) Mgmt and Prev of Noise and Noise Induced Hearing Loss

Discusses effects of noise and other damaging agents on the physiology of the auditory system. Highlights principles of hearing conservation programs. Focuses on prevention, identification, and management of occupational hearing loss and current legislation as it pertains to occupational safety and hazards. Prerequisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

College of Arts & Sciences | Speech, Language, & Hearing Sciences | Didactic: Audiology

CHEM-7551 (1) Selected Topics in Ion Spectroscopy

Treats current topics in the spectroscopy of ions. Seminar lectures are given by graduate students on their research and on literature topics, and the results of both in-house and external research groups are studied. Additionally, ideas for interesting directions of research and new experiments are proposed and discussed. May be repeated up to 2 total credit hours. Prereq., graduate standing or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Chemistry

HIST-7551 (3) Seminar: Medieval History

College of Arts & Sciences | History | Europe: Ancient and Medieval

SLHS-7554 (1) Audiometric Instrumentation and Calibration

Introduces students to the basic concepts of electroacoustic transduction, and demonstrates the application of these concepts to the measurement and calibration of audiometric instrumentation. Students will become familiar with standard measurement equipment including multimeters, oscilloscopes, and sound level meters; and will become familiar with calibration standards for instruments including the audiometer, tympanometer, and electrophysiological amplifiers. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Speech, Language, & Hearing Sciences | Didactic: Audiology

HIST-7556 (3) Seminar: American Society and Thought

Prereq., graduate standing.

College of Arts & Sciences | History | US: Topical Courses 1

HIST-7566 (3) Research Seminar in Labor History

Explores various issues in U.S. labor history through readings and research projects. Most of the readings are taken from writings on U.S. labor history. Special attention is given to women, immigration, and regional patterns. Research skills emphasized. Prereq., HIST 6536 or instructor consent.

College of Arts & Sciences | History | US: Topical Courses 1

LING-7570 (3) Advanced Diachronic Linguistics

Presents theories of language change. Discusses mechanisms of language change, its trajectories over linguistic categories and items, and its relation to theories of grammar and of language variation. Prereqs., LING 5410, 5420, and 5570, or equivalent. .

College of Arts & Sciences | Linguistics

HIST-7581 (3) Latin Paleography

Discusses the development of formal scripts from the late Roman Empire to the 15th century. Provides practice in identification, transliteration, and translation of medieval manuscripts. Prereq., graduate standing and reading knowledge of Latin.

[College of Arts & Sciences](#) [History](#) [Europe: Ancient and Medieval](#)

CHEM-7601 (2) Seminar: Nucleic Acid Chemistry

Topics in various aspects of current research; emphasizes student readings and presentations. May be repeated up to 6 total credit hours. Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

[College of Arts & Sciences](#) [Chemistry](#)

CHEM-7611 (1) Seminar: Structures and Dynamics of Biopolymers in Solution

Discussion of experimental and theoretical approaches for probing structures and dynamics of proteins, peptides, and nucleic acids; and computations in molecular dynamics simulation, modeling, and geometry. May be repeated up to 6 total credit hours. Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

[College of Arts & Sciences](#) [Chemistry](#)

SLHS-7614 (3) Implantable Devices: Technology and Clinical Application

Examines technological aspects and clinical applications of implantable prostheses such as cochlear implants, brainstem implants, hybrid cochlear implants, Baha devices and middle ear implants. Topics will include: history of implantable devices, anatomy and histopathology of the inner ear, speech processing in implants, mapping devices, candidacy criteria, behavioral and

electrophysiologic techniques for assessment and outcomes in implanted children and adults. Prereq., good standing in SLHS graduate program or instructor consent. Prerequisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

College of Arts & Sciences | Speech, Language, & Hearing Sciences | Didactic: Audiology

ANTH-7620 (3) Seminar: Ethnography and Cultural Theory

Explores how ethnographic writing has evolved over the past century to incorporate different forms of cross-cultural representation and to accommodate new theoretical paradigms. Includes ethnographic authority and reflexivity, as well as embedded theories and blurred genres of cultural research.

College of Arts & Sciences | Anthropology

CHEM-7621 (1) Seminar: Biochemistry and Molecular Biology of Signal Transduction

Discusses and reviews the current literature and experimental results in signal transduction, cell cycle and tumor suppressor gene regulation. Emphasizes the understandings of molecular and biochemical mechanisms of the origin of human tumor cells. Prereq., graduate standing or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Chemistry

SLHS-7640 (3) Communication Processes and Hearing Loss: Birth through Six

Provides in-depth study of current research literature and its implications for clinical practice regarding development of communication processes in the first six years of life and impact of hearing loss. Investigates development of language, auditory perception, speech production, social-emotional abilities, and cognition. Prerequisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

College of Arts & Sciences | Speech, Language, & Hearing Sciences | Didactic: Audiology

CHEM-7651 (2) Seminar: Environmental Biochemistry

Topics in various aspects of current biochemical and environmental research. May be repeated up to 6 total credit hours. Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Chemistry

HIST-7656 (3) Seminar: Women's History

Prereq., one 6000-level readings course in women's history.

College of Arts & Sciences | History | US: Topical Courses 1

CHEM-7661 (1) Structure/Function of Human Mediator Transcription Complexes

Study of the mechanisms of eukaryotic gene expression with an emphasis on the structure and function of human mediator transcription complexes. Restricted to graduate students or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Chemistry

PSYC-7663 (1) Intellectual Assessment Laboratory

Practice administration of common intellectual tests. Prereq., instructor consent. Coreq., PSYC 7683. Restricted to clinical psychology graduate students. Prerequisites: Restricted to Psychology Graduate Students only.

College of Arts & Sciences | Psychology | Clinical

CHEM-7671 (1) Seminar: Topics in Designing Probes for Signaling Reactions

Discussion of advances and developments in biomolecular dynamics, with emphasis on experimental studies via ultrafast laser spectroscopy. The connection of protein dynamics with function will also be considered. Restricted to graduate students or instructor consent required. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Chemistry

PSYC-7673 (3) Adult Psychotherapy

Discusses selected topics in the field of psychotherapy, including content consideration and pertinent research. Topics vary from semester to semester. Prereq., instructor consent.

College of Arts & Sciences | Psychology | Clinical

PSYC-7683 (1-3) Intellectual Assessment, with Practicum, in Clinical Psychology

Focuses on administering and interpreting objective test results commonly used in clinical psychology practice. Probable inventories used are MMPI, SCII, WISC, WAIS, plus other objective measures where relevant. Includes case study approach and direct clinical experience. May be repeated up to 8 total credit hours. Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Psychology | Clinical

CHEM-7691 (1) Seminar: Protein Dynamics and the Mechanism of Sensory Proteins

Discusses recent results and current literature in the areas of the mechanism of sensory proteins, internal motions of proteins, and protein folding. May be repeated up to 6 total credit hours. Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Chemistry

PSYC-7693 (3) Personality Measurement

Covers theory and practice primarily in areas of individual personality testing. Involves intensive field work and report writing. Prereq., instructor consent.

College of Arts & Sciences | Psychology | Clinical

CHEM-7701 (1) Seminar: Enzyme Mechanisms and Kinetics

Studies experimental approaches to understand the mechanisms of enzymic catalysis. Techniques include steady-state and pre-steady-state kinetics, isotope trapping and partitioning, inhibition by substrate analogues, and covalent modification of proteins. May be repeated up to 6 total credit hours. Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Chemistry

PSYC-7703 (3) Seminar: Clinical Psychology

Offers selected topics in the area of clinical psychology. May be repeated up to 12 total credit hours. Prereq., instructor consent. Prerequisites: Restricted to Psychology Graduate Students only.

College of Arts & Sciences | Psychology | Clinical

CHEM-7711 (1) RNA Mediated Inorganic and Organic Reactions

Discussion of advances and developments in biomolecular dynamics, with emphasis on experimental studies via ultrafast laser spectroscopy. The connection of protein dynamics with function will also be considered. Restricted to graduate students or instructor consent required. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Chemistry

PSYC-7713 (1-3) Practicum in Clinical Psychology

Provides direct clinical experience for Phd candidates in clinical psychology only. May be repeated up to 18 total credit hours. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Psychology | Clinical

SLHS-7714 (3) Advanced Topics in Amplification

Discusses advanced issues in the design and fitting of hearing aid technology, including advanced signal processing, outcomes assessment, evidence-based practice and specialized fitting protocols for pediatric and geriatric populations. Current research is integrated with clinical case studies to guide the development of evidence-based practice in hearing aid fittings. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Speech, Language, & Hearing Sciences | Didactic: Audiology

PHYS-7730 (3) Theory of Elementary Particles

Systematics of elementary particles, leptons, quarks, gauge bosons, symmetries and symmetry breaking, scattering cross sections, decay rates, electron-positron annihilation, lepton scattering and

hadron structure, quantum chromodynamics, electroweak interactions, gauge theories.

College of Arts & Sciences | Physics

CHEM-7741 (1) Seminar: Signal Transduction and Protein Phosphorylation

Devoted to experimental methods for understanding mechanisms of signal transduction in mammalian cells through pathways involving regulation of protein phosphorylation. May be repeated up to 6 total credit hours. Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Chemistry

CHEM-7751 (1) Seminar: Protein Structure and Folding

Studies structure and folding of proteins and protein complexes using biophysical methods, including nuclear magnetic resonance (NMR), circular dichroism, and fluorescence spectroscopies. May be repeated up to 6 total credit hours. Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Chemistry

CHEM-7761 (1) Seminar: Eukaryotic Transcriptional Regulation

Studies the regulation of transcription by RNA Polymerase II from human promoters. May be repeated up to 6 total credit hours. Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

LING-7762 (1-2) Readings and Research in Cognitive Science

Interdisciplinary reading of innovative theories and methodologies of cognitive science. Participants share interdisciplinary perspectives through in-class and online discussion and analysis of controversial texts and of their own research in cognitive science. Prereq., graduate standing. Same as CSCI 7762, EDUC 6505, and PSYC 7765.

[College of Arts & Sciences](#) | [Linguistics](#)

PSYC-7765 (1-2) Readings and Research in Cognitive Science

Interdisciplinary reading of innovative theories and methodologies of cognitive science. Participants share interdisciplinary perspectives through in-class and online discussion and analysis of controversial texts and of their own research in cognitive science. Required for joint PhD in cognitive science. Prereq., graduate standing. Same as CSCI 7762, EDUC 6505, and LING 7762.

[College of Arts & Sciences](#) | [Psychology](#) | [Experimental](#)

LING-7775 (1-2) Topics in Cognitive Science

Reading of interdisciplinary innovative theories and methodologies of cognitive science. Students participate in the ICS Distinguished Speakers series that hosts internationally recognized cognitive scientists who share and discuss their current research. Session discussions include analysis of leading edge and controversial new approaches in cognitive science. Restricted to students enrolled in ICS Cognitive Science Academic Programs. Same as PSYC 7775, CSCI 7772, EDUC 7775, SLHS 7775, and PHIL 7810. Prerequisites: Restricted to Graduate Students only.

[College of Arts & Sciences](#) | [Linguistics](#)

PSYC-7775 (1-2) Topics in Cognitive Science

Reading of interdisciplinary innovative theories and methodologies of cognitive science. Students participate in the LCS Distinguished Speakers series that hosts internationally recognized cognitive scientists who share and discuss their current research. Session discussions include analysis of leading edge and controversial new approaches in cognitive science. Restricted to students enrolled in LCS Cognitive Science Academic Programs. Same as LING 7775, CSCI 7772, EDUC 7775, SLHS 7775, and PHIL 7810.

College of Arts & Sciences Psychology Experimental

SLHS-7775 (1-2) Topics in Cognitive Science

Reading of interdisciplinary innovative theories and methodologies of cognitive science. Students participate in the ICS Distinguished Speakers series that hosts internationally recognized cognitive scientists who share and discuss their current research. Session discussions include analysis of leading edge and controversial new approaches in cognitive science. Restricted to students enrolled in ICS Cognitive Science Academic Programs. Same as LING 7775, CSCI 7772, EDUC 7775, PSYC 7775, and PHIL 7810. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Speech, Language, & Hearing Sciences Didactic: All-Department

CHEM-7781 (1) Seminar: Topics in Structural Biology

Discussion of advances and developments in structural biology with emphasis on new methods for protein expression, purification and crystallization; and structure solution implementation. Prereq., graduate standing or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Chemistry

CHEM-7791 (1) Seminar: Topics in Ribonucleoprotein Assemblies

Studies aspects of the biochemical and structural analysis of ribonucleic acid (RNA) and its interactions with proteins and assemblies into functional ribonucleoprotein (RNP) enzymes. Techniques focus on x-ray crystallography, spectroscopic methods, and biochemical probing. Prereq., graduate standing or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Chemistry

LING-7800 (3) Open Topics in Linguistics

Various topics not normally covered in the curriculum; offered intermittently depending on student demand and availability of instructors. Contact the department office for information. Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Linguistics

PHIL-7810 (1-2) Topics in Cognitive Science

Reading of interdisciplinary innovative theories and methodologies of cognitive science. Students participate in the ICS Distinguished Speakers series that hosts internationally recognized cognitive scientists who share and discuss their current research. Session discussions include analysis of leading edge and controversial new approaches in cognitive science. Restricted to students enrolled in ICS Cognitive Science Academic Programs. Same as LING 7775, CSCI 7772, EDUC 7775, PSYC 7775 and SLHS 7775. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Philosophy

PHYS-7810 (1-3) Special Topics in Physics

Various topics not normally covered in the curriculum; offered intermittently depending on student demand and availability of instructors. May be repeated up to 7 total credit hours. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Physics

ECON-7818 (3) Mathematical Statistics for Economists

Provides the mathematical foundation for Ph.D. level statistical inference in economic research. The primary topics of the course are probability theory and mathematical statistics including hypothesis testing and classical estimation with an emphasis on the method of maximum likelihood. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Economics | Quantitative Economics

ECON-7828 (3) Econometrics

Continuation of ECON 7818. Topics include regression analysis and extensions of the linear regression model to generalized least squares, time series data, and systems of equations. Prereq., ECON 7818.

College of Arts & Sciences | Economics | Quantitative Economics

ANTH-7840 (1-6) Independent Research

Research aimed at developing a solution to an originally conceived research problem. May be repeated up to 6 total credit hours.

College of Arts & Sciences | Anthropology

CLAS-7840 (1-3) Graduate Independent Study

No Greek or Latin required. May be repeated up to 7 total credit hours. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Classics | Literature, Culture, & Thought

COML-7840 (1-3) Independent Study

May be repeated up to 7 total credit hours. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Comparative Literature

EBIO-7840 (1-6) Independent Study (Doctoral Level)

May be repeated up to 6 total credit hours. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Ecology & Evolutionary Biology

GEOG-7840 (1-3) Graduate Independent Study

Offers independent research for doctoral students only. Restricted to graduate students. May be repeated up to 6 total credit hours. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Geography

HIST-7840 (1-3) Independent Study

College of Arts & Sciences History Methods, Comparative, Global

MCDB-7840 (1-6) Graduate Independent Study

Instructor consent and independent study contract required. May be repeated up to 7 total credit hours.

College of Arts & Sciences Molecular, Cellular, & Development Biology

PHYS-7840 (1-3) Selected Topics for Graduate Independent Study

Subject matter to be arranged. May be repeated up to 7 total credit hours. Same as PHYS 7850.

College of Arts & Sciences Physics

PSCI-7906 (1-3) Independent Study

Not a free option; must be approved by the student's advisor and program chair. Does not count as seminar. Not more than 6 hours of independent study may be credited toward PhD degree in political science. Special independent study approval agreement form must be completed by student and signed by faculty advisor. May be repeated up to 6 total credit hours.

College of Arts & Sciences | Political Science | Public Policy

PSCI-7908 (1-3) Independent Study

Not a free option; must be approved by the student's advisor and program chair. Does not count as seminar. Not more than 6 hours of independent study may be credited toward PhD degree in political science. Special independent study approval agreement form must be completed by student and signed by faculty advisor. May be repeated up to 6 total credit hours. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Political Science | General

MCDB-7910 (1) Seminar Practicum

Designed for graduate students to give oral presentations on their thesis research, field questions, respond to critiques, and present background information. May be repeated up to 3 total credit hours. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Molecular, Cellular, & Development Biology

PHYS-7915 (1) Seminar Topics in Physics

Various seminar topics not normally covered in the curriculum: offered intermittently depending on student demand and availability of instructors. May be repeated up to 3 hours per semester.
Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Physics

SLHS-7918 (3) Practicum 3: Clinical Supervision

Prerequisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

College of Arts & Sciences | Speech, Language, & Hearing Sciences | Practica

ASTR-7920 (1-6) Reading and Research in Astrophysical and Planetary Sciences

May be repeated up to 6 total credit hours. Instructor consent required. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Astrophysical & Planetary Sciences

APPM-8000 (1) Colloquium in Applied Mathematics

Introduces graduate students to the major research foci of the Department of Applied Mathematics. Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Applied Mathematics

APPM-8100 (1) Seminar in Dynamical Systems

Introduces advanced topics and research in dynamical systems. Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Applied Mathematics

MATH-8114 (3) Topics in Number Theory

May include the theory of automorphic forms, elliptic curves, or any of a variety of advanced topics in analytic and algebraic number theory. Prereq., MATH 6110. Undergraduates must have approval of the instructor. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Mathematics

MATH-8174 (3) Topics in Algebra I

Prereqs., MATH 6130 and 6140. Undergraduates must have approval of the instructor.

College of Arts & Sciences | Mathematics

SLHS-8206 (3) Perception/Production Theories in Human Communication Sciences and Disorders

Provides an advanced seminar in perception/production theories in human communication sciences and disorders. Familiarizes students with current perception theories related to the auditory/visual system and production theories related to the motor/auditory/visual system. Prereq., doctoral student standing or instructor consent.

College of Arts & Sciences | Speech, Language, & Hearing Sciences | Didactic: Speech-Hearing Sci

ECON-8209 (3) Economics Research Methods Workshop 1

Assists students starting their doctoral thesis by discussing methodology and evaluation of economic research. Presents and discusses student research proposals. Prereqs., two ECON courses at the 8000 level. Prerequisites: Restricted to Graduate Students only.

[College of Arts & Sciences](#) [Economics](#) [Independent Study and Other](#)

ECON-8211 (3) Public Economics: Fundamental Principles

Presents the fundamental principles of public goods, externalities, public choice, excess burden, optimal taxation, and tax incidence. Prereq., ECON 6211 or 7010. Prerequisites: Restricted to Graduate Students only.

[College of Arts & Sciences](#) [Economics](#) [Public Economics](#)

ECON-8219 (3) Economics Research Methods Workshop 2

Continuation of ECON 8209. Assists students starting their doctoral thesis by discussing relevant economic research. Presents and discusses research papers. Prereq., ECON 8209.

[College of Arts & Sciences](#) [Economics](#) [Independent Study and Other](#)

ECON-8221 (3) Public Economics: Topics in Public Expenditures and Taxation

Explores advanced topics in public economics such as decentralization, state and local government, program analysis, taxation, international tax issues, political economy issues, and market failure. Prereqs., ECON 6211 or 7010, and 8211.

College of Arts & Sciences | Economics | Public Economics

ECON-8231 (3) Local Public Economics

Examines subnational governments and systems of governments, the effects of inter-governmental competition, appropriate tax and expenditure responsibilities, and variations in governing institutions. Covers congestible public goods, Tiebout mechanisms, and tax capitalization. Prereq., ECON 6211 or 7010.

College of Arts & Sciences | Economics | Public Economics

MATH-8250 (3) Mathematical Theory of Relativity 1

Focuses on Maxwell equations, Lorentz force, Minkowski space-time, Lorentz, Poincare, and conformal groups, metric manifolds, covariant differentiation, Einstein space-time, cosmologies, and unified field theories. Prereq., instructor consent. Undergraduates must have approval of the instructor.

College of Arts & Sciences | Mathematics

ECON-8252 (3) Seminar: Urban and Regional Economics 1

Covers basic theories in spatial location of economic activity and land use and the survey techniques developed to analyze, measure, and predict regional and urban structure and growth, such as economic base studies, regional social accounts, and input-output analysis. Prereq., ECON 6070 or 7010.

College of Arts & Sciences | Economics | Urban & Regional Economics

ECON-8262 (3) Topics in Urban and Regional Economics

Investigates various theoretical topics in urban and regional economics, focusing on policy issues. Involves student research and presentations. Prereq., ECON 6070 or 7010.

College of Arts & Sciences | Economics | Urban & Regional Economics

APPM-8300 (1-3) PDE and Analysis Seminar

Introduces the core methods in the analysis of nonlinear partial differential and integral equations or systems to graduate students. Provides a vehicle for the development, presentation, and cooperative research of new topics in PDE and analysis. Prereq., APPM 5440. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Applied Mathematics

MATH-8304 (3) Topics in Analysis 1

Presents advanced topics in analysis including Lie groups, Banach algebras, operator theory, ergodic theory, representation theory, etc. Prereqs., MATH 8330 and 8340, or instructor consent. Undergraduates must have approval of the instructor. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Mathematics

MATH-8330 (3) Functional Analysis 1

Introduces such topics as Banach spaces (Hahn-Banach theorem, open mapping theorem, etc.), operator theory (compact operators and integral equations, and spectral theorem for bounded self-adjoint operators), and Banach algebras (the Gelfand theory). See also MATH 8340. Prereqs., MATH 6310 and 6320. Undergraduates must have approval of the instructor. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Mathematics

ECON-8333 (3) Globalization and Democratization: An Introduction

Introduces research on globalization and democratization from an interdisciplinary perspective. Examines ongoing interdisciplinary research on the global political economy. Students learn about ongoing research, critique current efforts, and design their own research project. Prereq., graduate standing in PSCI, ECON, GEOG, or SOCY. Same as PSCI 7333, SOCY 6031, and GEOG 5332.

College of Arts & Sciences Economics International Trade & Finance

MATH-8340 (3) Functional Analysis 2

Introduces such topics as Banach spaces (Hahn-Banach theorem, open mapping theorem, etc.), operator theory (compact operators and integral equations, and spectral theorem for bounded self-adjoint operators), and Banach algebras (the Gelfand theory). See also MATH 8330. Prereq., MATH 8330. Undergraduates must have approval of the instructor.

College of Arts & Sciences Mathematics

MATH-8370 (3) Harmonic Analysis 1

Examines trigonometric series, periodic functions, diophantine approximation, and Fourier series. Also covers Bohr and Stepanoff almost periodic functions, positive definite functions, and the L1 and L2 theory of the Fourier integral. Applications to group theory and differential equations. See also MATH 8380. Prereq., MATH 5150 and 6320. Undergraduates must have approval of the instructor.

College of Arts & Sciences Mathematics

ECON-8413 (3) Seminar: International Trade Theory

Covers theories of comparative advantage, including the classical, factor-proportions, fixed-factor, and noncompetitive markets models. Examines trade policy including trade barriers, market distortions, strategic policy, regional integration, political economy, and factor migration. Prereq., ECON 6413 or 7010. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences Economics International Trade & Finance

ECON-8423 (3) Seminar: International Finance

Highlights foreign exchange markets, past and current international monetary mechanisms, and processes of adjustment. Examines the role of international financial markets for the behavior of consumption, investment, saving, and production. Also considers international transmission of business cycles. Prereq., ECON 6423 or 7020.

College of Arts & Sciences | Economics | International Trade & Finance

ECON-8433 (3) Seminar: Topics in Money and International Economics

Explores advanced work in various aspects of international economics, such as empirical trade analysis, public choice, and interactions between real and monetary phenomena in the world economy. Prereq., ECON 6413, 6423, 8413, or 8423. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Economics | International Trade & Finance

ECON-8534 (3) Economic History of North America

Examines North America's past from the perspective of economics. Topics include growth and welfare in the colonial period; staple products, agricultural development, and the emerging industrialism in the antebellum period; transformation of the North American economy to 1914; the interwar years and the Great Depression; and economic integration since 1945. Prereqs., ECON 6070 and 6080, or ECON 7010.

College of Arts & Sciences | Economics | Economic History

ECON-8535 (3) Environmental Economics I

Considers the allocation of society's scarce environmental resources and government attempts to achieve more efficient and equitable allocations. It is a course in applied welfare economics with an emphasis on market failure and valuation. Prereq., ECON 6535 and 6808; or ECON 7010. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Economics | Natural Resources & Environ

ECON-8545 (3) Environmental Economics II

Provides advanced study of recent advances in environmental economics and explores opportunities for new research. Topics vary with interests of instructor and students. Prereqs., ECON 6535 and 6808, or ECON 7010 and ECON 8535. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Economics | Natural Resources & Environ

ECON-8555 (3) Water Resources Development and Management

Offers a research seminar in joint hydrologic-economic modeling and systems analysis. Addresses problems of joint water quantity-water quality management and joint surface-ground water management. Prereq., ECON 6555.

College of Arts & Sciences | Economics | Natural Resources & Environ

APPM-8600 (1) Seminar in Computational Mathematics

Introduces advanced topics and research in computational mathematics. Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Applied Mathematics

ECON-8666 (1-3) Economic Demography

Investigates economic determinants and consequences of demographic behavior in developing and developed countries. Issues include fertility and female labor supply interactions, the demographic transition, the effect of population growth on income distribution, family investments in children, and intergenerational mobility. Prereqs., ECON 3070 and 3080.

College of Arts & Sciences | Economics | Labor and Human Resources

ECON-8676 (3) Seminar: Labor Economics 1

Focuses on the demand side of labor markets. Topics include standard static and dynamic models of labor demand, labor market discrimination, composition of compensation, labor hierarchies within enterprises, unionization, efficient contracts, and macroeconomics of labor markets. Prereq., ECON 6070 or 7010.

College of Arts & Sciences | Economics | Labor and Human Resources

ECON-8686 (3) Seminar: Labor Economics 2

Focuses on special topics in labor economics: dynamic theories of labor supply, employment, and unemployment; labor supply in a household framework; and labor market activity and income distribution. Explores both theoretical models and empirical tests in each area. Prereq., ECON 6070 or 7010. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Economics | Labor and Human Resources

MATH-8714 (3) Topics in Logic 1 and 2

[College of Arts & Sciences](#) [Mathematics](#)

ECON-8747 (3) Industrial Organization Theory

Highlights economics of regulation of industry and markets, industry studies, and the application of lab methods to industrial organization. Prereq., ECON 7010. Prerequisites: Restricted to Graduate Students only.

[College of Arts & Sciences](#) [Economics](#) [Industrial Organization](#)

ECON-8757 (3) Industrial Organization and Public Policy

Addresses the theory of interaction of firms within markets and industries, emphasizing importance of the number, relative size of firms, market institution, firm strategies, and nature of consumer demand. Examines neoclassical and game theoretic models, empirical industry studies, and laboratory tests of theoretical models and policies. Prereq., ECON 7010. Prerequisites: Restricted to Graduate Students only.

[College of Arts & Sciences](#) [Economics](#) [Industrial Organization](#)

ECON-8764 (3) History of Economic Development

Covers in historical perspective the causes of economic development including why some areas develop faster than others and why development occurs more rapidly in some eras than others. Prereq., ECON 6070 and 6080, or ECON 7010. Same as HIST 7214. Prerequisites: Restricted to Graduate Students only.

[College of Arts & Sciences](#) [Economics](#) [Economic History](#)

ECON-8774 (3) Seminar in Transition Economies

Focuses on the problems encountered in countries evolving from planned to market economies. Emphasizes applications of new and traditional models of economic growth and analysis of problems unique to formerly planned economies. Prereq., ECON 6774 or 7010.

College of Arts & Sciences | Economics | Economic Development

ECON-8784 (3) Economic Development

Explores empirical, theoretical, and policy issues in economic development. Examines political economy, income distribution and poverty, demographic change, labor force employment and migration, human capital, physical capital, natural resources and the environment, industrial structure, international trade and finance, stabilization policy, and structural adjustment. Prereqs., ECON 6774 or 7010. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Economics | Economic Development

MATH-8815 (1-3) Ulam Seminar

May be repeated up to 3 total credit hours. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Mathematics

ECON-8828 (3) Seminar: Econometrics 1

First semester of two-semester sequence in econometrics for PhD students. Studies least squares and generalized least squares estimation of linear econometric models. Asymptotic (large sample) theory of inference. Some topics in the estimation of microdata. Prereq., ECON 7818. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Economics | Quantitative Economics

ECON-8838 (3) Seminar: Econometrics 2

Teaches the advanced level of econometrics theory. Topics include asymptotic theory, maximum likelihood estimation, limited dependent variables analysis and other frontier areas of econometrics such as the method of moment estimation, semiparametric and nonparametric estimation procedure. Prereq., ECON 7828.

College of Arts & Sciences | Economics | Quantitative Economics

COMM-8840 (1-6) Doctoral Independent Study

May be repeated up to 18 total credit hours.

College of Arts & Sciences | Communication

EBIO-8840 (1-6) Independent Research (Doctoral Level)

May be repeated up to 6 total credit hours. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Ecology & Evolutionary Biology

SPAN-8840 (1-3) Independent Study

May be repeated up to 7 total credit hours. Prereq., graduate standing in Spanish or departmental approval.

College of Arts & Sciences | Spanish | Spanish

ECON-8848 (3) Applied Microeconometrics

Presents a "User's guide" to conducting empirical research in applied microeconomics. Begins with a primer on an industry-standard econometric software package including programming techniques and data management. Introduces advanced econometric techniques including panel data methods, IV, matching models, regression discontinuity, and limited dependent variables models. Concludes with a research project requiring a replication and/or extension of an existing published paper. Prereqs., ECON 7818 and 7828. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Economics | Quantitative Economics

ECON-8858 (3) Computational and Structural Estimation Methods

Teaches students to construct a variety of applied economic models, obtain parameter values through calibration or estimation techniques, and uses the resulting models to conduct policy simulations. Prereqs., ECON 7010 and 7818. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Economics | Quantitative Economics

MATH-8900 (1-3) Independent Study

Undergraduates must have approval of the instructor. May be repeated up to 6 total credit hours.

College of Arts & Sciences | Mathematics

PSCI-8901 (1-3) Graduate Research Topic

Provides an opportunity for independent research in a topic of special interest. Arrangements are made to suit the needs of each particular student. Not a free option; must be approved by student's advisor and department chair. Does not count as a seminar. May be repeated up to 7 total credit hours. Same as PSCI 6901. Prerequisites: Restricted to Graduate Students only.

College of Arts & Sciences | Political Science | American

PSCI-8902 (1-3) Graduate Research Topic

Provides an opportunity for independent research in a topic of special interest. Arrangements are made to suit the needs of each particular student. Not a free option; must be approved by student's advisor and department chair. Does not count as a seminar. May be repeated up to 7 total credit hours. Same as PSCI 6902.

College of Arts & Sciences | Political Science | Comparative

PSCI-8903 (1-3) Graduate Research Topic

Provides an opportunity for independent research in a topic of special interest. Arrangements are made to suit the needs of each particular student. Not a free option; must be approved by student's advisor and department chair. Does not count as a seminar. May be repeated up to 7 total credit hours. Same as PSCI 6903.

College of Arts & Sciences | Political Science | International Relations

PSCI-8904 (1-3) Graduate Research Topic

Provides an opportunity for independent research in a topic of special interest. Arrangements are made to suit the needs of each particular student. Not a free option; must be approved by student's advisor and department chair. Does not count as a seminar. May be repeated up to 7 total credit hours. Same as PSCI 6904.

College of Arts & Sciences | Political Science | Political Theory

PSCI-8905 (1-3) Graduate Research Topic

Provides an opportunity for independent research in a topic of special interest. Arrangements are made to suit the needs of each particular student. Not a free option; must be approved by student's advisor and department chair. Does not count as a seminar. May be repeated up to 7 total credit hours. Same as PSCI 6905.

College of Arts & Sciences | Political Science | Empirical Thry & Research Mthd

PSCI-8906 (1-3) Graduate Research Topic

Provides an opportunity for independent research in a topic of special interest. Arrangements are made to suit the needs of each particular student. Not a free option; must be approved by student's advisor and department chair. Does not count as a seminar. May be repeated up to 7 total credit hours. Same as PSCI 6906.

College of Arts & Sciences | Political Science | Public Policy

PSCI-8908 (1-3) Graduate Research Topic

Provides an opportunity for independent research in a topic of special interest. Arrangements are made to suit the needs of each particular student. Not a free option; must be approved by student's advisor and department chair. Does not count as a seminar. May be repeated up to 7 total credit hours. Same as PSCI 6908.

College of Arts & Sciences | Political Science | General

ECON-8909 (1-3) Independent Study

May be repeated up to 7 total credit hours. Prereq., instructor and department consent.

College of Arts & Sciences | Economics | Independent Study and Other

SLHS-8918 (3) Practicum 3: Classroom Instruction

Prerequisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

College of Arts & Sciences | Speech, Language, & Hearing Sciences | Practica

SLHS-8928 (3) Practicum 3: Research Coordination

Prerequisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

College of Arts & Sciences | Speech, Language, & Hearing Sciences | Practica

Subject**Number**

ASEN-2001 (4) Aerospace 1: Introduction to Statics, Structures, and Materials

Introduces models and analytical/numerical methods for statics and structural analysis. Topics include force/moment equilibrium, truss analysis, beam theory, stress/strain, failure criteria, and structural design. Matlab proficiency required. Prereqs., APPM 1360, GEEN 1300 or CSCI 1300 or ECEN 1030 and PHYS 1110 (min. grade C). Coreq., ASEN 2002, 2012 or APPM 2350. Offered fall only. Prerequisites: Restricted to Aerospace Engineering (ASEN) majors only.

[College of Engineering & Applied Science](#)
[Aerospace Engineering](#)
[Structures, Mat, & Struc Dynam](#)

ASEN-3112 (4) Structures

Teaches Mechanics of Materials methods of stress and deformation analysis applicable to the design and verification of aircraft and space structures. It offers an introduction to matrix and finite element methods for truss structures, and to mechanical vibrations. Prereq., ASEN 2001, 2003, 2004, and APPM 2360 (min. grade C). Restricted to ASEN majors. Offered fall only. Prerequisites: Restricted to Aerospace Engineering (ASEN) majors only.

[College of Engineering & Applied Science](#)
[Aerospace Engineering](#)
[Structures, Mat, & Struc Dynam](#)

ASEN-4012 (3) Aerospace Materials

Studies aerospace grade aluminum, magnesium, nickel, and titanium alloys. Covers heat treatment, defect structures, failure mechanisms, corrosion and its prevention, the effect of space radiation on materials, and high and low temperature effects. Introduces composite materials with a lab design and experiment. Emphasizes the selection of materials in design with procedures for choosing materials rationally. Case studies include aerogels, carbides, composites, powder metallurgy, nanomaterials, and advanced materials manufacturing technologies. Prerequisites: Requires pre-requisite course of ASEN 2001 (min grade C). Restricted to Aerospace Engineering (ASEN) majors only.

[College of Engineering & Applied Science](#)
[Aerospace Engineering](#)
[Structures, Mat, & Struc Dynam](#)

ASEN-4123 (3) Vibration Analysis

Highlights free and forced vibration of discrete and continuous systems. Examines Lagrange's equation, Fourier series, Laplace transforms, and matrix and computational methods. Applies knowledge to practical engineering problems. Prereq., ASEN 3112 or MCEN 3030. MCEN 4123 and ASEN 4123 are the same course.

| | | |
|--|-----------------------|--------------------------------|
| College of Engineering & Applied Science | Aerospace Engineering | Structures, Mat, & Struc Dynam |
|--|-----------------------|--------------------------------|

ASEN-4222 (3) Materials Science for Composite Manufacturing

Studies common matrix materials and the modifications and improvements of properties which can be achieved by adding second phase reinforcements. Properties will be significantly affected by the design approach and by requirements, and by the procedure of adding reinforcements. Investigates polymer, ceramic and metallic materials. Explores manufacturing, fabrication and processing techniques. Evaluates future developments. Prereq., ASEN 3112 or equivalent, or instructor consent. Coreq., ASEN 4012 or instructor consent. Same as ASEN 5222.

Prerequisites: Requires pre-requisite course of ASEN 3112 and pre-requisite or co-requisite course of ASEN 4012.

| | | |
|--|-----------------------|--------------------------------|
| College of Engineering & Applied Science | Aerospace Engineering | Structures, Mat, & Struc Dynam |
|--|-----------------------|--------------------------------|

ASEN-4338 (3) Computer Analysis of Structures

Covers basic structural design concepts and finite element modeling techniques. Emphasizes use of finite element static and dynamic analysis to validate and refine an initial design. Introduces basic design optimization and tailoring. Proficiency in Matlab required. Prereq., ASEN 3112. Prerequisites: Requires pre-requisite course of ASEN 3112.

| | | |
|--|-----------------------|--------------------------------|
| College of Engineering & Applied Science | Aerospace Engineering | Structures, Mat, & Struc Dynam |
|--|-----------------------|--------------------------------|

ASEN-5007 (3) Introduction to Finite Elements

Introduces finite element methods used for solving linear problems in structural and continuum mechanics. Covers modeling, mathematical formulation, and computer implementation. Prereq., matrix algebra. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

| | | |
|--|-----------------------|--------------------------------|
| College of Engineering & Applied Science | Aerospace Engineering | Structures, Mat, & Struc Dynam |
|--|-----------------------|--------------------------------|

ASEN-5012 (3) Mechanics of Aerospace Structures

Applies fundamental concepts of continuum mechanics, theory of elasticity, and energy methods to the analysis of structures. Prereqs., APPM 2360 and ASEN 2001, 2003, and 3112, or equivalent. Similar to MCEN 5023. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

| | | |
|--|-----------------------|--------------------------------|
| College of Engineering & Applied Science | Aerospace Engineering | Structures, Mat, & Struc Dynam |
|--|-----------------------|--------------------------------|

ASEN-5022 (3) Dynamics of Aerospace Structures

Applies concepts covered in undergraduate dynamics, structures, and mathematics to the dynamics of aerospace structural components, including methods of dynamic analysis, vibrational characteristics, vibration measurements, and dynamic stability. Prereqs., ASEN 5012, 5227, or equivalent. Recommended prereq., MATH 3130. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

| | | |
|--|-----------------------|--------------------------------|
| College of Engineering & Applied Science | Aerospace Engineering | Structures, Mat, & Struc Dynam |
|--|-----------------------|--------------------------------|

| | | |
|--|-----------------------|--------------------------------|
| College of Engineering & Applied Science | Aerospace Engineering | Structures, Mat. & Struc Dynam |
|--|-----------------------|--------------------------------|

ASEN-5111 (3) Introduction to Aeroelasticity

Introduces static and dynamic aeroelasticity of airfoils and wings. Covers the classical aeroelasticity theory and introduces computational methods for aeroelastic problems. Prereqs., ASEN 3111, MATH 3130, and MATH 4430, or equivalent, or instructor consent. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

| | | |
|--|-----------------------|--------------------------------|
| College of Engineering & Applied Science | Aerospace Engineering | Structures, Mat. & Struc Dynam |
|--|-----------------------|--------------------------------|

ASEN-5122 (3) Control of Aerospace Structures 1

Introduces the basic problems in dynamic modeling and active control of large spacecraft and satellites. Includes system descriptions, model reduction, controller design, and closed-loop stability analysis. Prereq., ASEN 3200, graduate standing, or instructor consent. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

| | | |
|--|-----------------------|--------------------------------|
| College of Engineering & Applied Science | Aerospace Engineering | Structures, Mat. & Struc Dynam |
|--|-----------------------|--------------------------------|

ASEN-5212 (3) Composite Structures and Materials

Develops the macromechanical and micromechanical theory of the elastic behavior and failure of composite laminates. Applies basic theory to a broad range of practical problems including the buckling and vibration of composite plates, columns, and shells. Prereq., senior standing in aerospace or mechanical engineering, or instructor consent. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

| | | |
|--|-----------------------|--------------------------------|
| College of Engineering & Applied Science | Aerospace Engineering | Structures, Mat. & Struc Dynam |
|--|-----------------------|--------------------------------|

ASEN-5222 (3) Materials Science for Composite Manufacturing

Prereqs., ASEN 3112 and 4012 or equivalent, or instructor consent. Same as ASEN 4222. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

| | | |
|--|-----------------------|--------------------------------|
| College of Engineering & Applied Science | Aerospace Engineering | Structures, Mat. & Struc Dynam |
|--|-----------------------|--------------------------------|

ASEN-5347 (3) Math Methods in Dynamics

Two-part graduate-level course on dynamics. Covers both flexible and rigid multibody analytical dynamics and finite element method for dynamics. Emphasizes formulations that naturally lead to easy computer implementation and stability, linearization, and modern rotational kinematics. Prereqs., graduate standing and instructor consent. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

| | | |
|--|-----------------------|--------------------------------|
| College of Engineering & Applied Science | Aerospace Engineering | Structures, Mat. & Struc Dynam |
|--|-----------------------|--------------------------------|

ASEN-6367 (3) Advanced Finite Element Methods for Plates, Shells, and Solids

Continues ASEN 5007. Covers more advanced FEM applications to linear static problems in structural and continuum mechanics. Focuses on modeling, formulation, and numerical solutions of problems modeled as plates, shells, and solids. Includes an overview of advanced variational formulations. Prereqs., introductory graduate level course in FEM and familiarity with linear algebra. Formerly ASEN 5367. Credit not granted for this course and ASEN 5367. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Aerospace Engineering | Structures, Mat. & Struc Dynam

ASEN-6517 (3) Computational Methods In Dynamics

Covers modeling, computational algorithms and their computer implementation for both linear and nonlinear dynamical systems. Topics covered include transient analysis, wave propagation, multiphysics analysis, and their significant engineering applications. Prereq., ASEN 5022. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Aerospace Engineering | Structures, Mat. & Struc Dynam

ASEN-2001 (4) Aerospace 1: Introduction to Statics, Structures, and Materials

Introduces models and analytical/numerical methods for statics and structural analysis. Topics include force/moment equilibrium, truss analysis, beam theory, stress/strain, failure criteria, and structural design. Matlab proficiency required. Prereqs., APPM 1360, GEEN 1300 or CSCI 1300 or ECEN 1030 and PHYS 1110 (min. grade C). Coreq., ASEN 2002, 2012 or APPM 2350. Offered fall only. Prerequisites: Restricted to Aerospace Engineering (ASEN) majors only.

ASEN-2002 (4) Aerospace 2: Introduction to Thermodynamics and Aerodynamics

Introduces the fundamental principals and concepts of thermodynamics and fluid dynamic systems. Emphasizes the synthesis of basic science (physics), mathematics, and experimental methods that form the basis for quantitative and qualitative analyses of general aerospace technology systems. Proficiency in Matlab required. Prereqs., APPM 1360, GEEN 1300, CSCI 1300, or ECEN 1030 and PHYS 1110 (min. grade C). Coreqs., ASEN 2001, 2012 and APPM 2350. Offered fall only. Prerequisites: Restricted to Aerospace Engineering (ASEN) majors only.

[College of Engineering & Applied Science](#) | [Aerospace Engineering](#) | [Aerodynamics & Fluid Mechanics](#)

ASEN-3111 (4) Aerodynamics

Develops the fundamental concepts of aerodynamics and provides a working knowledge for their application to the design of aircraft and launch vehicles operating at various speeds and altitudes, as well as the atmospheric forces on satellites. Prereqs., APPM 2350, ASEN 2002 and 2004 (min. grade C). Restricted to ASEN majors. Offered fall only. Prerequisites: Restricted to Aerospace Engineering (ASEN) majors only.

[College of Engineering & Applied Science](#) | [Aerospace Engineering](#) | [Aerodynamics & Fluid Mechanics](#)

ASEN-5051 (3) Fluid Mechanics

Highlights physical properties of gases and liquids; kinematics of flow fields; and equations describing viscous, heat-conducting Newtonian fluids. Emphasizes exact solutions and rational approximations for low and high speed dissipative flows, surface and internal waves, acoustics, stability, and potential flows. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

[College of Engineering & Applied Science](#) | [Aerospace Engineering](#) | [Aerodynamics & Fluid Mechanics](#)

ASEN-5151 (3) High Speed Aerodynamics

Provides aerodynamic theory applicable to the high speed flight of subsonic, transonic, and supersonic aircraft, and hypersonic vehicles. Topics include linear theory of subsonic and supersonic speeds, the nonlinear theories of transonic and hypersonic speeds, and compressible boundary layers. Prereq., graduate standing or instructor consent. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Aerospace Engineering | Aerodynamics & Fluid Mechanics

ASEN-6021 (3) Viscous Flow

Studies low Reynolds number flows, including incompressible and compressible laminar boundary layer theory; similarity theory; and separation, transition, and turbulent boundary layers. Prereq., ASEN 5051 or equivalent, or instructor consent. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Aerospace Engineering | Aerodynamics & Fluid Mechanics

ASEN-6037 (3) Turbulent Flows

Studies turbulent closure methods and computational procedures used to solve practical turbulent flows. Emphasizes multi-equation models used with time-averaged equations to calculate free-turbulent shear-flows and turbulent boundary layers. Employs spectral methods in direct and large-eddy simulation of turbulence. Prereq., ASEN 5051 or equivalent. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Aerospace Engineering | Aerodynamics & Fluid Mechanics

ASEN-6061 (3) Molecular Gas Dynamics and DSMC

Describes the composition and flow of gases on a microscopic level to examine the behavior of the molecules that make up a macroscopic flow system. Thermodynamic properties, transport phenomena, and the governing Boltzmann Equation are derived from molecular collision dynamics and the kinetic theory. The Direct Simulation Monte Carlo method is introduced with applications. Restricted to graduate students or instructor consent. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Aerospace Engineering | Aerodynamics & Fluid Mechanics

ASEN-6327 (3) Computational Fluid Mechanics

Introduction to advanced computational methods for the solution of fluid mechanics problems on the computer with emphasis on nonlinear flow phenomena. Prereq., ASEN 5417 or instructor consent. Formerly ASEN 5327. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Aerospace Engineering | Aerodynamics & Fluid Mechanics

ASEN-6427 (3) Advanced Computational Fluid Dynamics

Introduces computational techniques particularly applicable to high-speed gas flows that contain shocks. Complicated numerical methods are developed from relatively simple numerical modules. Prereq., ASEN 5417 or instructor consent. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

ASEN-2003 (5) Aerospace 3: Introduction to Dynamics and Systems

Introduces the principles of particle and planar rigid body dynamics, systems, and controls. Topics include kinematics, kinetics, momentum and energy methods, system modeling, and simple feedback control. Class includes experimental and design laboratory exercises for aerospace applications of dynamic principles. Offered spring only. Prerequisites: Requires pre-requisite courses of ASEN 2001, ASEN 2012 and APPM 2350 (all min grade C). Requires co-requisite courses of APPM 2360 and ASEN 2004. Restricted to Aerospace Engineering (ASEN) majors only.

[College of Engineering & Applied Science](#) [Aerospace Engineering](#) [Systems and Control](#)

ASEN-3300 (4) Aerospace Electronics and Communications

Provides the fundamentals of electronics and communications widely used in aerospace engineering. Includes analog instrumentation electronics, data acquisition, digital electronics, and radio communication. Offered spring only. Prerequisites: Requires pre-requisite courses of ASEN 2003, PHYS 1120 and APPM 2360 (all min grade C). Restricted to Aerospace Engineering (ASEN) majors only.

[College of Engineering & Applied Science](#) [Aerospace Engineering](#) [Systems and Control](#)

ASEN-4114 (3) Automatic Control Systems

Methods of analysis and design of feedback control for dynamic systems. Covers nyquist, bode, and linear quadratic methods based on frequency domain and state space models. Laboratory experiments provide exposure to computation for simulation and real time control, and typical control system sensors and actuators. Same as ASEN 5114. Prerequisites: Requires pre-requisite courses of ASEN 3128 and ASEN 3200 (all min grade C). Restricted to Aerospace Engineering (ASEN) majors only.

[College of Engineering & Applied Science](#) [Aerospace Engineering](#) [Systems and Control](#)

ASEN-5014 (3) Linear Control Systems

Introduces the theory of linear systems, including vector spaces, linear equations, structure of linear operators, state space descriptions of dynamic systems, and state feedback control methods. Prereq., ASEN 3200. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Aerospace Engineering | Systems and Control

ASEN-5114 (3) Automatic Control Systems

Methods of analysis and design of feedback control for dynamic systems. Covers nyquist, bode, and linear quadratic methods based on frequency domain and state space models. Laboratory experiments provide exposure to computation for simulation and real time control, and typical control system sensors and actuators. Same as ASEN 4114. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Aerospace Engineering | Systems and Control

ASEN-6014 (3) Spacecraft Formation Flying

Studies the dynamic modeling and control of spacecraft formations orbiting about a planet. Investigate linear and nonlinear relative motion descriptions, rectilinear and curvilinear coordinates, orbit element difference based descriptions, J2-invariant relative orbits, as well as Lyapunov-based relative motion control strategies. Prereq., ASEN 5050 or equivalent, or instructor consent. May be repeated up to 6 total credit hours.

College of Engineering & Applied Science | Aerospace Engineering | Systems and Control

ASEN-6024 (3) Nonlinear Control Systems

Introduces the analysis and control design methods for nonlinear systems, including Lyapunov and Describing Function methods. Prereq., ASEN 5014. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

ASEN-5849 (1-6) Independent Study

Study of special projects. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Aerospace Engineering | Specialized Courses

ASEN-5940 (3-6) Engineering Research Internship

Grants credit to foreign visiting graduate students for conducting research within the Aerospace Engineering Sciences department. Credits can be transferred to the student's home institution. CU-Boulder students may also receive credit for conducting research outside of the university, either overseas or in the US. Restricted to students in final year of undergraduate work and graduate students from CU-Boulder or foreign institutions. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science Aerospace Engineering Specialized Courses

ASEN-6009 (1-2) Special Topics Seminar

Presents research and developments in each department's focus areas. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science Aerospace Engineering Specialized Courses

ASEN-6107 (3) Nonlinear Finite Element Methods

Continuation of ASEN 5007. Covers the formulation and numerical solution of nonlinear static structural problems by finite element methods. Emphasizes the treatment of geometric nonlinearities and structural stability. Prereq., ASEN 5007. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science Aerospace Engineering Specialized Courses

ASEN-6519 (1-3) Special Topics

Reflects upon specialized aspects of aerospace engineering sciences. Course content is indicated in the online Schedule Planner. Prereq., varies. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

ASEN-3036 (3) Introduction to Human Spaceflight

Introduces students to the challenges of human space flight. Historical and current space programs and spacecraft are discussed with emphasis on those systems specific to sustaining human crews. Other topics include space environment with respect to sustaining human life and health, physiological and psychological concerns in a space habitat, astronaut selection and training, anomalies, mission operations motivation, costs rationale for human space exploration, and future program directions. Not accepted as a Professional Area Elective for ASEN majors. Approved for upper-division Humanities and Social Science elective for engineering students.

[College of Engineering & Applied Science](#)
[Aerospace Engineering](#)
[Bioastronautics & Microgravity](#)

ASEN-3046 (3) Introduction to Humans in Aviation

Investigates the history of manned aviation accomplished through a review of the history of flight, the physiological and psychological limitations facing aviators, and investigates the human related causal factors in aviation accidents. The course also looks at the social and economic impacts of aviation in modern society. Not accepted as a Professional Area Elective for ASEN majors. Approved for upper-division Humanities and Social Science elective for engineering students.

[College of Engineering & Applied Science](#)
[Aerospace Engineering](#)
[Bioastronautics & Microgravity](#)

ASEN-3116 (3) Introduction to Biomedical Engineering

Addresses human responses to environment and physical stimuli. Makes use of engineering and physical principles in the study of human dynamics, arriving at reasonable solutions to 15 major areas of biomedical consent. Prereq., instructor consent.

[College of Engineering & Applied Science](#)
[Aerospace Engineering](#)

ASEN-4216 (3) Neural Signals and Functional Brain Imaging

Explores bioelectric and metabolic signals generated by the nervous system from two stand points: 1) their biophysical genesis and role in neural integration and 2) neurotechnologies such as electroencephalography, magnetoencephalography, deep brain stimulation, and functional magnetic resonance imaging. Prereqs., ECEN 2260 or 3030, ASEN 3300, or instructor consent. Same as ASEN 5216 and ECEN 4811. Prerequisites: Requires pre-requisite course of ASEN 3300 or ECEN 2260 or ECEN 3030.

| | | |
|--|-----------------------|--------------------------------|
| College of Engineering & Applied Science | Aerospace Engineering | Bioastronautics & Microgravity |
|--|-----------------------|--------------------------------|

ASEN-4426 (3) Neural Systems and Physiological Control

A biophysical exploration of human physiology from the standpoints of control systems and neural information processing. Topics include: neural control of movement and cardiovascular performance, tissue growth and repair, carcinogenesis, and physiological responses to microgravity. Prereqs., ECEN 2260 or 3030, ASEN 3300, or instructor consent. Same as ASEN 4426 and ECEN 4821/5821. Prerequisites: Requires pre-requisite course of ASEN 3300 or ECEN 2260 or ECEN 3030.

| | | |
|--|-----------------------|--------------------------------|
| College of Engineering & Applied Science | Aerospace Engineering | Bioastronautics & Microgravity |
|--|-----------------------|--------------------------------|

ASEN-4436 (3) Brains, Minds, Computers

An introductory, integrative survey of brain science, cognitive science, artificial intelligence, and their interrelations. Considers central concepts and principles from each of these areas and the similarities and difference of brain, minds, computers, robots, etc. Same as ASEN 5436 and ECEN 4831/5831. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Engineering majors only.

| | | |
|--|-----------------------|--------------------------------|
| College of Engineering & Applied Science | Aerospace Engineering | Bioastronautics & Microgravity |
|--|-----------------------|--------------------------------|

ASEN-5016 (3) Space Life Sciences

Familiarizes students with factors affecting living organisms in the reduced-gravity environment of space flight. Covers basic life support requirements, human physiological adaptations, and cellular-level gravity dependent processes with emphasis on technical writing and research proposal preparation. Prereq., graduate standing in engineering or senior with 3.25 GPA. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

| | | |
|--|-----------------------|--------------------------------|
| College of Engineering & Applied Science | Aerospace Engineering | Bioastronautics & Microgravity |
|--|-----------------------|--------------------------------|

ASEN-5116 (3) Spacecraft Life Support Systems

Provides a working knowledge of the systems needed to sustain human life in a spacecraft environment. Emphasis is on understanding functional requirements of a life support system; operational details of subsystem technologies; new concepts currently being considered in NASA's advanced programs; and conducting a technical trade study. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

| | | |
|--|-----------------------|--------------------------------|
| College of Engineering & Applied Science | Aerospace Engineering | Bioastronautics & Microgravity |
|--|-----------------------|--------------------------------|

ASEN-5216 (3) Neural Signals and Functional Brain Imaging

Same as ASEN 4216 and ECEN 5811. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Aerospace Engineering | Bioastronautics & Microgravity

ASEN-5426 (3) Neural Systems and Physiological Control

Same as ASEN 4426 and ECEN 4821/5821. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Aerospace Engineering | Bioastronautics & Microgravity

ASEN-5436 (3) Brains, Minds, Computers

Prereq., graduate standing. Same as ASEN 4436, ECEN 4831/5831. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Aerospace Engineering | Bioastronautics & Microgravity

ASEN-5506 (1-2) Bioastronautics Seminar

Focuses on current topics related to space habitat systems design and research aimed at understanding the effects of spaceflight on living organisms ranging from humans down to microbes. Literature analysis and scientific presentations are expected. Emphasis is on biophysical mechanisms, comprehensive models, and related technology development. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

ASEN-3113 (4) Thermodynamics and Heat Transfer

Focuses on the applications of the first and second laws of thermodynamics to control volumes and teaches the fundamental concepts of different modes of energy and heat transfer. Learn to use these concepts in gas dynamics, high-speed vehicle spacecraft design, environmental systems, and energy analysis. Offered fall only. Prerequisites: Requires pre-requisite courses of ASEN 2002 and APPM 2350 (all min grade C). Restricted to Aerospace Engineering (ASEN) majors only.

[College of Engineering & Applied Science](#) | [Aerospace Engineering](#) | [Thermodynamics and Propulsion](#)

ASEN-4013 (3) Foundations of Propulsion

Describes aerothermodynamics and design of both rocket and air-breathing engines. Includes ramjets, turbojets, turbofans, and turboprop engines, as well as liquid, solid, and hybrid rockets. Prerequisites: Requires pre-requisite courses of ASEN 3113 and APPM 2360 (all min grade C). Restricted to Aerospace Engineering (ASEN) majors only.

[College of Engineering & Applied Science](#) | [Aerospace Engineering](#) | [Thermodynamics and Propulsion](#)

ASEN-5053 (3) Rocket Propulsion

An in depth presentation of the theory, analysis, and design of rocket propulsion systems. Liquid and solid propellant systems are emphasized with an introduction to advanced propulsion concepts. Nozzle and fluid flow relationships are reviewed for background. Prereq., senior standing in ASEN or MCEN, or instructor consent. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

[College of Engineering & Applied Science](#) | [Aerospace Engineering](#) | [Thermodynamics and Propulsion](#)

ASEN-5063 (3) Gas Turbine Propulsion

Designed to teach the theory, analysis and design of modern gas turbine engines used for aircraft propulsion. Will deal with cycle and performance analyses, and analysis and design of compressors, turbines, intakes, nozzles and combustors as well as component matching. Prereq., ASEN 4013 or equivalent. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Aerospace Engineering | Thermodynamics and Propulsion

ASEN-6013 (3) High Speed Propulsion

Covers air-breathing and rocket propulsion cycles, their relative performance trade-offs, and how they fit within the context of a vehicle system. Specific emphasis will be placed on fundamental cycle analyses, component level design, and propulsion/airframe integration for rockets, turbojets, ramjets, scramjets, combined cycles, and other advanced propulsion concepts. Prereq., ASEN 4013 or instructor consent. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

ASEN-5010 (3) Spacecraft Attitude Dynamics and Control

Includes rigid body kinematics and spacecraft attitude descriptions, torque-free attitude dynamics, static attitude determination, motion and stability due to gravity gradient torque and spinning craft, passive and active methods of attitude control, nonlinear regulator and attitude tracking feedback control laws. Prereq., ASEN 3200 or equivalent. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

[College of Engineering & Applied Science](#)
[Aerospace Engineering](#)
[Astrodynamics & Orbital Mech](#)

ASEN-5050 (3) Space Flight Dynamics

Includes celestial mechanics, space navigation, and orbit determination; trajectory design and mission analysis trajectory requirements; and orbital transfer and rendezvous. Prereq., ASEN 3200 or instructor consent. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Aerospace Engineering | Astrodynamics & Orbital Mech

ASEN-5070 (3) Introduction to Statistical Orbit Determination 1

Develops the theory of batch and sequential (Kalman) filtering, including a review of necessary concepts of probability and statistics. Course work includes a term project that allows students to apply classroom theory to an actual satellite orbit determination problem. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Aerospace Engineering | Astrodynamics & Orbital Mech

ASEN-6008 (3) Interplanetary Mission Design

Exploration of principles and methods related to the design and construction of trajectories for interplanetary mission design. Some topics covered include: two-and three-body motion, gravity assists, maneuver computation, navigation, numerical integration, and construction of orbits. The main focus is on simple ballistic mission designs, such as Galileo or Cassini, however, libration point trajectories will also be covered. Prereq., ASEN 5050 or instructor consent. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Aerospace Engineering | Astrodynamics & Orbital Mech

ASEN-6010 (3) Advanced Spacecraft Dynamics and Control

Studies the dynamic modeling and control of spacecraft containing multiple momentum exchange devices, and/or flexible spacecraft components. Will develop nonlinear feedback control algorithms, explore singularity avoidance strategies. The second half of the course derives analytical methods (D'Alembert's equations, Lagrange's equations, Boltzmann Hamel equations) to model a hybrid rigid/flexible spacecraft system. Restricted to Engineering (ENGR) graduate students or Aerospace Engineering-Concurrent Degree (C-ASEN) students. Prereq., ASEN 5010 or equivalent or instructor consent. Repeatable for credit up to 6 total credit hours. Prerequisites: Restricted to Engineering (ENGR) graduate students or Aerospace Engineering-Concurrent Degree (C-ASEN) students.

College of Engineering & Applied Science | Aerospace Engineering | Astrodynamics & Orbital Mech

ASEN-6020 (3) Optimal Trajectories

Introduces the theory and practice of trajectory optimization. The general theory behind optimization and optimal control will be introduced with an emphasis on the properties of optimal trajectories. The main application will be to space trajectories, but other applications will also be considered. Prereq., ASEN 5050 or instructor consent. Recommended prereq., ASEN 5014. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Aerospace Engineering | Astrodynamics & Orbital Mech

ASEN-6060 (3) Advanced Astrodynamics

Covers Lagrangian and Hamiltonian formalisms for astrodynamics problems, the computation and characterization of space trajectories in highly dynamic environments, computation of periodic orbits, stability analysis of orbital motion, and development of analytical theories for dynamics. Prereq., ASEN 5050 or instructor consent. Prerequisites: Restricted to College of Engineering

graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Aerospace Engineering | Astrodynamics & Orbital Mech

ASEN-6070 (3) Satellite Geodesy

Focuses on the measurement of the Earth's gravitational field, rotational characteristics, and shape using Earth and space-based tracking of artificial satellites. Particular emphasis on satellite altimetry and satellite gravity measurements. Prereq., ASEN 3200 or instructor consent. Credit not granted for this course and ASEN 5060. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Aerospace Engineering | Astrodynamics & Orbital Mech

ASEN-6080 (3) Introduction to Statistical Orbit Determination 2

Continuation of ASEN 5070. Emphasizes orthogonal transformation techniques such as Givens and Householder, square root filtering and smoothing, and considers covariance analysis. Also nonlinear filters and dynamic model compensation techniques. Requires term project that involves the application of many of the techniques required for precise orbit determination. Prereq., ASEN 5070. Formerly ASEN 5080. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Aerospace Engineering | Astrodynamics & Orbital Mech

ASEN-3128 (4) Aircraft Dynamics

Develops the fundamental concepts of aircraft dynamics. Covers flight mechanics, performance, dynamics and control of aircraft, and how they impact aircraft design. Prereqs., ASEN 2002, 2003, 2004, and APPM 2360 (min. grade C). Restricted to ASEN majors. Offered spring only. Prerequisites: Requires pre-requisite courses of ASEN 2002, 2003, 2004 & APPM 2360 (all min grade C). Restricted to Aerospace Engineering (ASEN) majors only.

ASEN-3200 (4) Orbital Mechanics/Attitude Dynamics and Control

Presents the fundamentals of orbital mechanics, 3D rigid body dynamics, and satellite attitude dynamics and controls. Prereqs., ASEN 2003, 2004, and APPM 2360 (min. grade C). Restricted to ASEN majors. Offered spring only. Prerequisites: Requires pre-requisite courses of ASEN 2003, ASEN 2004, & APPM 2360 (all min grade C). Restricted to Aerospace Engineering (ASEN) majors only.

ASEN-3300 (4) Aerospace Electronics and Communications

Provides the fundamentals of electronics and communications widely used in aerospace engineering. Includes analog instrumentation electronics, data acquisition, digital electronics, and radio communication. Offered spring only. Prerequisites: Requires pre-requisite courses of ASEN 2003, PHYS 1120 and APPM 2360 (all min grade C). Restricted to Aerospace Engineering (ASEN) majors only.

ASEN-4010 (3) Introduction to Space Dynamics

Includes central force fields, satellite orbits, rocket dynamics, orbital transfer, interplanetary mission analysis, and perturbation due to atmospheric drag and Earth oblateness. Prereq., ASEN 3200 or equivalent, or instructor consent required. Prerequisites: Requires pre-requisite course of ASEN 3200. Restricted to Aerospace Engineering (ASEN) majors only.

[College of Engineering & Applied Science](#) | [Aerospace Engineering](#) | [Astrodynamics & Orbital Mech](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

ASEN-4012 (3) Aerospace Materials

Studies aerospace grade aluminum, magnesium, nickel, and titanium alloys. Covers heat treatment, defect structures, failure mechanisms, corrosion and its prevention, the effect of space radiation on materials, and high and low temperature effects. Introduces composite materials with a lab design and experiment. Emphasizes the selection of materials in design with procedures for choosing materials rationally. Case studies include aerogels, carbides, composites, powder metallurgy, nanomaterials, and advanced materials manufacturing technologies. Prerequisites: Requires pre-requisite course of ASEN 2001 (min grade C). Restricted to Aerospace Engineering (ASEN) majors only.

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

ASEN-4013 (3) Foundations of Propulsion

Describes aerothermodynamics and design of both rocket and air-breathing engines. Includes ramjets, turbojets, turbofans, and turboprop engines, as well as liquid, solid, and hybrid rockets. Prerequisites: Requires pre-requisite courses of ASEN 3113 and APPM 2360 (all min grade C). Restricted to Aerospace Engineering (ASEN) majors only.

ASEN-4018 (4) Senior Projects 1: Design Synthesis

Focuses on the synthesis of technical knowledge, project management, design process, leadership, and communications within a team environment. Students progress through the design process beginning with requirements development, then preliminary design and culminating with critical design. Offered fall only. Prerequisites: Requires pre-requisite courses of ASEN, 3111, 3112, 3113, 3128, 3200, and 3300 (all min grade C). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Aerospace Engineering (ASEN) majors only.

College/School

Department

Category

Search by Course Number

Subject

Number

ASEN-4047 (3) Probability and Statistics for Aerospace Engineering Sciences

Considers probability concepts and theory for better design and control of aerospace engineering systems. Includes descriptive and inferential statistical methods for experimental analysis. Also covers discrete and continuous random variable distributions, estimators, confidence intervals, regression, analysis of variance, hypothesis testing, nonparametric statistics, random processes, and quality control, including software models of same. Prereq., junior or graduate standing or instructor consent. Same as ASEN 5047.

[College of Engineering & Applied Science](#) [Aerospace Engineering](#) [Computational & Analytic Meth](#)

ASEN-4090 (3) Global Positioning Systems Applications

Focuses on GPS technology, software development, and applications. Lectures will cover the principal concepts used in GPS, and weekly laboratories will apply that knowledge. The course will culminate in student design projects using GPS. Prereqs., APPM 2360 and GEEN 1300 or equivalent. Recommended junior/senior standing in engineering.

[College of Engineering & Applied Science](#) [Aerospace Engineering](#) [Global Positioning Systems](#)

ASEN-4114 (3) Automatic Control Systems

Methods of analysis and design of feedback control for dynamic systems. Covers nyquist, bode, and linear quadratic methods based on frequency domain and state space models. Laboratory experiments provide exposure to computation for simulation and real time control, and typical control system sensors and actuators. Same as ASEN 5114. Prerequisites: Requires pre-requisite courses of ASEN 3128 and ASEN 3200 (all min grade C). Restricted to Aerospace Engineering (ASEN) majors only.

[College of Engineering & Applied Science](#) [Aerospace Engineering](#) [Systems and Control](#)

ASEN-4123 (3) Vibration Analysis

Highlights free and forced vibration of discrete and continuous systems. Examines Lagrange's equation, Fourier series, Laplace transforms, and matrix and computational methods. Applies knowledge to practical engineering problems. Prereq., ASEN 3112 or MCEN 3030. MCEN 4123 and ASEN 4123 are the same course.

College of Engineering & Applied Science | Aerospace Engineering | Structures, Mat. & Struc Dynam

ASEN-4128 (3) Human Factors in Engineering and Design

Introduces the field of human factors engineering and investigates human psychological, physiological and performance limitations in complex systems and why it is vital for engineers to understand human operational limitations when designing complex systems. Course includes studies of real accidents caused by human error, good and bad designs, latent conditions and accident-producing designs. Goal is an understanding of how to conduct engineering design with consideration of human factors. Prerequisites: Restricted to students with 57-180 credits (Juniors or Seniors).

College of Engineering & Applied Science | Aerospace Engineering | Aerospace Design & System Engr

ASEN-4138 (3) Aircraft Design

Two lectures and one lab per week. Examines principles of aircraft configuration and design to meet given performance specifications, taking into account aerodynamic, stability and control, and flying quality considerations, as well as airworthiness regulations. Includes preliminary design of the major elements of an aircraft. Prereq., ASEN 3128. Restricted to ASEN majors. Prerequisites: Requires pre-requisite course of ASEN 3128. Restricted to Aerospace Engineering (ASEN) majors only.

College of Engineering & Applied Science | Aerospace Engineering | Aerospace Design & System Engr

ASEN-4215 (3) Descriptive Physical Oceanography

Introduces descriptive and dynamical physical oceanography, focusing on the nature and dynamics of ocean currents and their role in the distribution of heat and other aspects of ocean physics related to the Earth's climate. Dynamical material limited to mathematical descriptions of oceanic physical systems. Restricted to seniors and graduate students. Same as ASEN 5215 and ATOC 4215. Prerequisites: Restricted to students with 87-180 credits (Seniors) or graduate students only.

College of Engineering & Applied Science | Aerospace Engineering | Atmospheric, Oceanic & Space S

ASEN-4216 (3) Neural Signals and Functional Brain Imaging

Explores bioelectric and metabolic signals generated by the nervous system from two stand points: 1) their biophysical genesis and role in neural integration and 2) neurotechnologies such as electroencephalography, magnetoencephalography, deep brain stimulation, and functional magnetic resonance imaging. Prereqs., ECEN 2260 or 3030, ASEN 3300, or instructor consent. Same as ASEN 5216 and ECEN 4811. Prerequisites: Requires pre-requisite course of ASEN 3300 or ECEN 2260 or ECEN 3030.

College of Engineering & Applied Science | Aerospace Engineering | Bioastronautics & Microgravity

ASEN-4218 (3) Large Space Structures Design

Develops the necessary structural analysis skills for conducting conceptual and preliminary designs of large space structures with a practical emphasis on structures considered by NASA over the

past 20 years. Applies analysis skills to a broad range of space missions requiring large space structures, emphasizing low cost and practical design. Prereq., senior standing in ASEN or MCEN, or instructor consent. Same as ASEN 5218.

College of Engineering & Applied Science | Aerospace Engineering | Aerospace Design & System Engr

ASEN-4222 (3) Materials Science for Composite Manufacturing

Studies common matrix materials and the modifications and improvements of properties which can be achieved by adding second phase reinforcements. Properties will be significantly affected by the design approach and by requirements, and by the procedure of adding reinforcements. Investigates polymer, ceramic and metallic materials. Explores manufacturing, fabrication and processing techniques. Evaluates future developments. Prereq., ASEN 3112 or equivalent, or instructor consent. Coreq., ASEN 4012 or instructor consent. Same as ASEN 5222. Prerequisites: Requires pre-requisite course of ASEN 3112 and pre-requisite or co-requisite course of ASEN 4012.

College of Engineering & Applied Science | Aerospace Engineering | Structures, Mat, & Struc Dynam

ASEN-4238 (3) Computer-Aided Control Systems Design

Covers Matlab and Simulink software, and multivariable control system synthesis and analysis techniques for typical aerospace control problems. Students formulate control problems and synthesize control functions using lineage quadratic techniques. Includes numerical integration of differential equations and nonlinear simulation of orbit and attitude dynamics. Prereq., APPM 2360.

College of Engineering & Applied Science | Aerospace Engineering | Aerospace Design & System Engr

ASEN-4248 (3) Computer-Aided Control System Design 2

Studies theory and engineering applications of Kalman filter techniques. Covers discrete and continuous filters, the extended Kalman filter, and their application to guidance, navigation, and control, including satellite orbit and attitude problems, inertial and control navigation, and the Global Positioning System. Prerequisites: Requires pre-requisite course of ASEN 4238.

College of Engineering & Applied Science | Aerospace Engineering | Aerospace Design & System Engr

ASEN-4255 (3) Environmental Aerodynamics

a review of the properties and causes of hazards posed by the environment, ranging from atmospheric wind shear to tornadic flows. Involves a multidisciplinary approach combining analytical, numerical, scale modeling studies with extensive field measurements, wind energy, and biophysical aerodynamics. Prereq., senior standing in ASEN. Same as ASEN 5255.

College of Engineering & Applied Science | Aerospace Engineering | Atmospheric, Oceanic & Space S

ASEN-4338 (3) Computer Analysis of Structures

Covers basic structural design concepts and finite element modeling techniques. Emphasizes use of finite element static and dynamic analysis to validate and refine an initial design. Introduces basic design optimization and tailoring. Proficiency in Matlab required. Prereq., ASEN 3112. Prerequisites: Requires pre-requisite course of ASEN 3112.

College of Engineering & Applied Science | Aerospace Engineering | Structures, Mat, & Struc Dynam

ASEN-4426 (3) Neural Systems and Physiological Control

A biophysical exploration of human physiology from the standpoints of control systems and neural information processing. Topics include: neural control of movement and cardiovascular performance, tissue growth and repair, carcinogenesis, and physiological responses to microgravity. Prereqs., ECEN 2260 or 3030, ASEN 3300, or instructor consent. Same as ASEN 4426 and ECEN 4821/5821. Prerequisites: Requires pre-requisite course of ASEN 3300 or ECEN 2260 or ECEN 3030.

College of Engineering & Applied Science | Aerospace Engineering | Bioastronautics & Microgravity

ASEN-4436 (3) Brains, Minds, Computers

An introductory, integrative survey of brain science, cognitive science, artificial intelligence, and their interrelations. Considers central concepts and principles from each of these areas and the similarities and difference of brain, minds, computers, robots, etc. Same as ASEN 5436 and ECEN 4831/5831. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Engineering majors only.

College of Engineering & Applied Science | Aerospace Engineering | Bioastronautics & Microgravity

ASEN-4519 (1-3) Special Topics

Studies specialized aspects of the aerospace engineering sciences or innovative treatment of required subject matter at the upper-division level. Course content is indicated in the online Schedule Planner. Prereq., varies. Prerequisites: Restricted to College of Engineering majors only.

College of Engineering & Applied Science | Aerospace Engineering | Specialized Courses

ASEN-4849 (1-6) Independent Study

Special projects agreed upon by student and instructor. Instructor consent required.

College of Engineering & Applied Science | Aerospace Engineering | Specialized Courses

ASEN-4859 (1-6) Undergraduate Research

Assigns a research problem on an individual basis. Instructor consent required.

College of Engineering & Applied Science | Aerospace Engineering | Specialized Courses

ASEN-5007 (3) Introduction to Finite Elements

Introduces finite element methods used for solving linear problems in structural and continuum mechanics. Covers modeling, mathematical formulation, and computer implementation. Prereq., matrix algebra. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Aerospace Engineering | Structures, Mat. & Struc Dynam

ASEN-5010 (3) Spacecraft Attitude Dynamics and Control

Includes rigid body kinematics and spacecraft attitude descriptions, torque-free attitude dynamics, static attitude determination, motion and stability due to gravity gradient torque and spinning craft, passive and active methods of attitude control, nonlinear regulator and attitude tracking feedback control laws. Prereq., ASEN 3200 or equivalent. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Aerospace Engineering | Astrodynamics & Orbital Mech

ASEN-5012 (3) Mechanics of Aerospace Structures

Applies fundamental concepts of continuum mechanics, theory of elasticity, and energy methods to the analysis of structures. Prereqs., APPM 2360 and ASEN 2001, 2003, and 3112, or equivalent. Similar to MCEN 5023. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Aerospace Engineering | Structures, Mat. & Struc Dynam

ASEN-5014 (3) Linear Control Systems

Introduces the theory of linear systems, including vector spaces, linear equations, structure of linear operators, state space descriptions of dynamic systems, and state feedback control methods. Prereq., ASEN 3200. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Aerospace Engineering | Systems and Control

ASEN-5016 (3) Space Life Sciences

Familiarizes students with factors affecting living organisms in the reduced-gravity environment of space flight. Covers basic life support requirements, human physiological adaptations, and cellular-level gravity dependent processes with emphasis on technical writing and research proposal preparation. Prereq., graduate standing in engineering or senior with 3.25 GPA. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Aerospace Engineering | Bioastronautics & Microgravity

ASEN-5018 (3) Graduate Projects I

Exposes MS and PhD students to project management and systems engineering disciplines while working a complex aerospace engineering project as part of a project team. The project team may perform some or all of the following project activities during this first semester of the two-semester course sequence: requirements, definition, design and design review, build, test, and verification. Recommended prereqs., ASEN 4138, or 5148, or 5158.

ASEN-5022 (3) Dynamics of Aerospace Structures

Applies concepts covered in undergraduate dynamics, structures, and mathematics to the dynamics of aerospace structural components, including methods of dynamic analysis, vibrational characteristics, vibration measurements, and dynamic stability. Prereqs., ASEN 5012, 5227, or equivalent. Recommended prereq., MATH 3130. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

[College of Engineering & Applied Science](#)
[Aerospace Engineering](#)
[Structures, Mat, & Struc Dynam](#)

ASEN-5034 (3) Stochastic Methods for Systems Engineering

Same as ASEN 4034. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

[College of Engineering & Applied Science](#)
[Aerospace Engineering](#)
[Aerospace Design & System Engr](#)

ASEN-5047 (3) Probability and Statistics for Aerospace Engineering Sciences

Same as ASEN 4047. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

[College of Engineering & Applied Science](#)
[Aerospace Engineering](#)
[Computational & Analytic Meth](#)

ASEN-5050 (3) Space Flight Dynamics

Includes celestial mechanics, space navigation, and orbit determination; trajectory design and mission analysis trajectory requirements; and orbital transfer and rendezvous. Prereq., ASEN 3200 or

instructor consent. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Aerospace Engineering | Astrodynamics & Orbital Mech

ASEN-5051 (3) Fluid Mechanics

Highlights physical properties of gases and liquids; kinematics of flow fields; and equations describing viscous, heat-conducting Newtonian fluids. Emphasizes exact solutions and rational approximations for low and high speed dissipative flows, surface and internal waves, acoustics, stability, and potential flows. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Aerospace Engineering | Aerodynamics & Fluid Mechanics

ASEN-5053 (3) Rocket Propulsion

An in depth presentation of the theory, analysis, and design of rocket propulsion systems. Liquid and solid propellant systems are emphasized with an introduction to advanced propulsion concepts. Nozzle and fluid flow relationships are reviewed for background. Prereq., senior standing in ASEN or MCEN, or instructor consent. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Aerospace Engineering | Thermodynamics and Propulsion

ASEN-5063 (3) Gas Turbine Propulsion

Designed to teach the theory, analysis and design of modern gas turbine engines used for aircraft propulsion. Will deal with cycle and performance analyses, and analysis and design of compressors, turbines, intakes, nozzles and combustors as well as component matching. Prereq., ASEN 4013 or equivalent. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Aerospace Engineering | Thermodynamics and Propulsion

ASEN-5070 (3) Introduction to Statistical Orbit Determination 1

Develops the theory of batch and sequential (Kalman) filtering, including a review of necessary concepts of probability and statistics. Course work includes a term project that allows students to apply classroom theory to an actual satellite orbit determination problem. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Aerospace Engineering | Astrodynamics & Orbital Mech

ASEN-5090 (3) Introduction to Global Navigation Satellite Systems

Global Navigation Satellite Systems (GNSS) are important tools for navigation, science, and engineering. Introduces GNSS hardware, signal structure, algorithms, error sources, and modeling techniques. Programming experience is required. Restricted to Engineering (ENGR) graduate students or Aerospace Engineering-Concurrent Degree (C-ASEN) students. Prerequisites: Restricted to Engineering (ENGR) graduate students or Aerospace Engineering-Concurrent Degree (C-ASEN) students.

College of Engineering & Applied Science | Aerospace Engineering | Global Positioning Systems

ASEN-5111 (3) Introduction to Aeroelasticity

Introduces static and dynamic aeroelasticity of airfoils and wings. Covers the classical aeroelasticity theory and introduces computational methods for aeroelastic problems. Prereqs., ASEN 3111, MATH 3130, and MATH 4430, or equivalent, or instructor consent. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Aerospace Engineering | Structures, Mat, & Struc Dynam

ASEN-5114 (3) Automatic Control Systems

Methods of analysis and design of feedback control for dynamic systems. Covers nyquist, bode, and linear quadratic methods based on frequency domain and state space models. Laboratory experiments provide exposure to computation for simulation and real time control, and typical control system sensors and actuators. Same as ASEN 4114. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Aerospace Engineering | Systems and Control

ASEN-5116 (3) Spacecraft Life Support Systems

Provides a working knowledge of the systems needed to sustain human life in a spacecraft environment. Emphasis is on understanding functional requirements of a life support system; operational details of subsystem technologies; new concepts currently being considered in NASA's advanced programs; and conducting a technical trade study. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Aerospace Engineering | Bioastronautics & Microgravity

ASEN-5122 (3) Control of Aerospace Structures 1

Introduces the basic problems in dynamic modeling and active control of large spacecraft and satellites. Includes system descriptions, model reduction, controller design, and closed-loop stability analysis. Prereq., ASEN 3200, graduate standing, or instructor consent. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Aerospace Engineering | Structures, Mat, & Struc Dynam

ASEN-5148 (3) Spacecraft Design

Integrates the design elements and fundamental analyses necessary to complete the conceptual (Phase A) design of an unmanned spacecraft. Lecture and discussion explore mission design, propulsion, power, structure, thermal, attitude control, communication, command, and data handling and attitude control systems. The role of project management and systems engineering are examined. Resource estimating and lessons learned in satellite programs are reviewed. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Aerospace Engineering | Aerospace Design & System Engr

ASEN-5151 (3) High Speed Aerodynamics

Provides aerodynamic theory applicable to the high speed flight of subsonic, transonic, and supersonic aircraft, and hypersonic vehicles. Topics include linear theory of subsonic and supersonic speeds, the nonlinear theories of transonic and hypersonic speeds, and compressible boundary layers. Prereq., graduate standing or instructor consent. Prerequisites: Restricted to College of

Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

| | | |
|--|-----------------------|--------------------------------|
| College of Engineering & Applied Science | Aerospace Engineering | Aerodynamics & Fluid Mechanics |
|--|-----------------------|--------------------------------|

ASEN-5158 (3) Space Habitat Design

Utilizes systems engineering methods for designing a spacecraft intended for human occupancy and provides a working knowledge of the technologies used to sustain life. Emphasis is placed on deriving functional requirements from stated mission objectives, developing integrated vehicle schematics, and comparing design options by trade study. Prereq., graduate standing in engineering or senior with 3.25 GPA. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

| | | |
|--|-----------------------|--------------------------------|
| College of Engineering & Applied Science | Aerospace Engineering | Aerospace Design & System Engr |
|--|-----------------------|--------------------------------|

ASEN-5168 (3) Remote Sensing Instrumentation Design

Reviews and makes a detailed analysis of satellite instrumentation techniques and systems to understand the components, limitations, and overall capabilities. Emphasis on optical systems with in-depth treatment of conventional radiometry. Introduces both passive and microwave methods. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

| | | |
|--|-----------------------|--------------------------------|
| College of Engineering & Applied Science | Aerospace Engineering | Aerospace Design & System Engr |
|--|-----------------------|--------------------------------|

ASEN-5188 (3) Space Systems Engineering

Develop an understanding and appreciation for the fundamentals and pragmatic principles of systems engineering and their application to space missions. This course establishes a working knowledge of the primary techniques systems engineers use to guide the development of complex systems, including: requirements development, system synthesis, good design practices, system optimization, exception handling, interface management and trade studies. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

| | | |
|--|-----------------------|--------------------------------|
| College of Engineering & Applied Science | Aerospace Engineering | Aerospace Design & System Engr |
|--|-----------------------|--------------------------------|

ASEN-5212 (3) Composite Structures and Materials

Develops the macromechanical and micromechanical theory of the elastic behavior and failure of composite laminates. Applies basic theory to a broad range of practical problems including the buckling and vibration of composite plates, columns, and shells. Prereq., senior standing in aerospace or mechanical engineering, or instructor consent. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

ASEN-5216 (3) Neural Signals and Functional Brain Imaging

Same as ASEN 4216 and ECEN 5811. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Aerospace Engineering | Bioastronautics & Microgravity

ASEN-5218 (3) Large Space Structures Design

Same as ASEN 4218. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Aerospace Engineering | Aerospace Design & System Engr

ASEN-5222 (3) Materials Science for Composite Manufacturing

Prereqs., ASEN 3112 and 4012 or equivalent, or instructor consent. Same as ASEN 4222. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Aerospace Engineering | Structures, Mat, & Struc Dynam

ASEN-5227 (3) Mathematics for Aerospace Engineering Sciences 1

Provides an introduction to the methods and mathematics of advanced engineering analysis tailored to aerospace engineering applications. Topics include vector and tensor calculus, ordinary differential equations, and an introduction to the calculus of variations. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Aerospace Engineering | Computational & Analytic Meth

ASEN-5235 (3) Introduction to Atmospheric Radiative Transfer and Remote Sensing

Examines fundamentals of radiative transfer and remote sensing with primary emphasis on the Earth's atmosphere; emission, absorption and scattering by molecules and particles; multiple scattering; polarization; radiometry and photometry; principles of inversion theory; extinction- and emission-based passive remote sensing; principles of active remote sensing; lidar and radar; additional applications such as the greenhouse effect and Earth's radiative energy budget. Same as ATOC 5235. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Aerospace Engineering | Remote Sensing

Subject**Number**

ASEN-5245 (3) Radar and Remote Sensing

Examines active techniques of remote sensing, with emphasis on radar fundamentals, radar wave propagation, scattering processes, and radar measurement techniques and design. Examines specific radar systems and applications, such as synthetic aperture radar phased arrays for atmosphere, space, land, and sea applications. Restricted to seniors or graduate students in engineering. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

[College of Engineering & Applied Science](#) [Aerospace Engineering](#) [Remote Sensing](#)

ASEN-5255 (3) Environmental Aerodynamics

Reviews the properties and causes of hazards posed by the environment, ranging from atmospheric wind shear to tornadic flows. Involves a multidisciplinary approach, combining analytical, numerical, and scale modeling studies with extensive field measurements, wind energy, and biophysical aerodynamics. Prereq., senior standing in aerospace engineering. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

[College of Engineering & Applied Science](#) [Aerospace Engineering](#) [Atmospheric, Oceanic & Space S](#)

ASEN-5307 (3) Engineering Data Analysis Methods

Gives students broad exposure to a variety of traditional and modern statistical methods for filtering and analyzing data. Topics include estimation methods, principal component analyses and spectral analyses. Introduces these methods and provides practical experience with their use. Students carry out problem assignments. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

[College of Engineering & Applied Science](#) [Aerospace Engineering](#) [Computational & Analytic Meth](#)

ASEN-5315 (3) Ocean Modeling

Introduces students to basic principles behind, and the current practices in, ocean modeling. Discusses different prevailing approaches. Offers students hands-on experience with the use of supercomputers and work stations for model running and pre- and post-processing. Prereqs., graduate standing or instructor consent. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Aerospace Engineering | Atmospheric, Oceanic & Space S

ASEN-5325 (3) Small Scale Processes in Geophysical Fluids

Provides an overview of mixing and wave processes in the oceans and the atmosphere. Topics include turbulent boundary layers in the lower atmosphere and the upper ocean, air-sea interactions, and surface and internal waves. Prereq., graduate standing or instructor consent. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Aerospace Engineering | Atmospheric, Oceanic & Space S

ASEN-5335 (3) Aerospace Environment

Examines the components of the solar-terrestrial system and their interactions to provide an understanding of the re-entry and orbital environments within which aerospace vehicles operate. Includes the sun, solar wind, magnetosphere, ionosphere, thermosphere, radiation belts, energetic particles, comparative environments (Mars, Venus, etc.), orbital debris, spacecraft charging, particle effects on systems, shielding, and satellite drag. Prereq., senior or graduate standing in engineering or related physical sciences. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Aerospace Engineering | Atmospheric, Oceanic & Space S

ASEN-5347 (3) Math Methods in Dynamics

Two-part graduate-level course on dynamics. Covers both flexible and rigid multibody analytical dynamics and finite element method for dynamics. Emphasizes formulations that naturally lead to easy computer implementation and stability, linearization, and modern rotational kinematics. Prereqs., graduate standing and instructor consent. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Aerospace Engineering | Structures, Mat, & Struc Dynam

ASEN-5417 (3) Numerical Methods for Differential Equations

Provides computational skills and basic knowledge of numerical methods for advanced courses in engineering/scientific computation using Fortran, C, or Matlab. Prereq., APPM 2360 and instructor consent. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Aerospace Engineering | Computational & Analytic Meth

ASEN-5426 (3) Neural Systems and Physiological Control

Same as ASEN 4426 and ECEN 4821/5821. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Aerospace Engineering | Bioastronautics & Microgravity

ASEN-5436 (3) Brains, Minds, Computers

Prereq., graduate standing. Same as ASEN 4436, ECEN 4831/5831. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Aerospace Engineering | Bioastronautics & Microgravity

ASEN-5506 (1-2) Bioastronautics Seminar

Focuses on current topics related to space habitat systems design and research aimed at understanding the effects of spaceflight on living organisms ranging from humans down to microbes. Literature analysis and scientific presentations are expected. Emphasis is on biophysical mechanisms, comprehensive models, and related technology development. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Aerospace Engineering | Bioastronautics & Microgravity

ASEN-5519 (1-3) Selected Topics

Reflects upon specialized aspects of aerospace engineering sciences. Course content is indicated in the online Class Search. Prereq., varies. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Aerospace Engineering | Specialized Courses

ASEN-5849 (1-6) Independent Study

Study of special projects. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Aerospace Engineering | Specialized Courses

ASEN-5940 (3-6) Engineering Research Internship

Grants credit to foreign visiting graduate students for conducting research within the Aerospace Engineering Sciences department. Credits can be transferred to the student's home institution. CU-Boulder students may also receive credit for conducting research outside of the university, either overseas or in the US. Restricted to students in final year of undergraduate work and graduate students from CU-Boulder or foreign institutions. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Aerospace Engineering | Specialized Courses

ASEN-6008 (3) Interplanetary Mission Design

Exploration of principles and methods related to the design and construction of trajectories for interplanetary mission design. Some topics covered include: two-and three-body motion, gravity assists, maneuver computation, navigation, numerical integration, and construction of orbits. The main focus is on simple ballistic mission designs, such as Galileo or Cassini, however, libration point trajectories will also be covered. Prereq., ASEN 5050 or instructor consent. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science Aerospace Engineering Astrodynamics & Orbital Mech

ASEN-6009 (1-2) Special Topics Seminar

Presents research and developments in each department's focus areas. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science Aerospace Engineering Specialized Courses

ASEN-6010 (3) Advanced Spacecraft Dynamics and Control

Studies the dynamic modeling and control of spacecraft containing multiple momentum exchange devices, and/or flexible spacecraft components. Will develop nonlinear feedback control algorithms, explore singularity avoidance strategies. The second half of the course derives analytical methods (D'Alembert's equations, Lagrange's equations, Boltzmann Hamel equations) to model a hybrid rigid/flexible spacecraft system. Restricted to Engineering (ENGR) graduate students or Aerospace Engineering-Concurrent Degree (C-ASEN) students. Prereq., ASEN 5010 or equivalent or instructor consent. Repeatable for credit up to 6 total credit hours. Prerequisites: Restricted to Engineering (ENGR) graduate students or Aerospace Engineering-Concurrent Degree (C-ASEN) students.

College of Engineering & Applied Science Aerospace Engineering Astrodynamics & Orbital Mech

ASEN-6013 (3) High Speed Propulsion

Covers air-breathing and rocket propulsion cycles, their relative performance trade-offs, and how they fit within the context of a vehicle system. Specific emphasis will be placed on fundamental cycle analyses, component level design, and propulsion/airframe integration for rockets, turbojets, ramjets, scramjets, combined cycles, and other advanced propulsion concepts. Prereq., ASEN 4013 or instructor consent. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science Aerospace Engineering Thermodynamics and Propulsion

ASEN-6014 (3) Spacecraft Formation Flying

Studies the dynamic modeling and control of spacecraft formations orbiting about a planet. Investigate linear and nonlinear relative motion descriptions, rectilinear and curvilinear coordinates, orbit element difference based descriptions, J2-invariant relative orbits, as well as Lyapunov-based relative motion control strategies. Prereq., ASEN 5050 or equivalent, or instructor consent. May be repeated up to 6 total credit hours.

College of Engineering & Applied Science Aerospace Engineering Systems and Control

ASEN-6020 (3) Optimal Trajectories

Introduces the theory and practice of trajectory optimization. The general theory behind optimization and optimal control will be introduced with an emphasis on the properties of optimal trajectories. The main application will be to space trajectories, but other applications will also be considered. Prereq., ASEN 5050 or instructor consent. Recommended prereq., ASEN 5014. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science Aerospace Engineering Astrodynamics & Orbital Mech

ASEN-6021 (3) Viscous Flow

Studies low Reynolds number flows, including incompressible and compressible laminar boundary layer theory; similarity theory; and separation, transition, and turbulent boundary layers. Prereq., ASEN 5051 or equivalent, or instructor consent. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science Aerospace Engineering Aerodynamics & Fluid Mechanics

ASEN-6024 (3) Nonlinear Control Systems

Introduces the analysis and control design methods for nonlinear systems, including Lyapunov and Describing Function methods. Prereq., ASEN 5014. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science Aerospace Engineering Systems and Control

ASEN-6028 (3) Graduate Projects II

Exposes MS and PhD students to leadership positions in project management and systems engineering while working a complex aerospace engineering project as part of a project team. The project team may perform some or all of the following project activities during this second semester of the two-semester course sequence: requirements definition, design and design review, build, test, and verification. Prereq., ASEN 5018. Recommended prereq., ASEN 4138, or 5148, or 5158. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science Aerospace Engineering Aerospace Design & System Engr

ASEN-6037 (3) Turbulent Flows

Studies turbulent closure methods and computational procedures used to solve practical turbulent flows. Emphasizes multi-equation models used with time-averaged equations to calculate free-turbulent shear-flows and turbulent boundary layers. Employs spectral methods in direct and large-eddy simulation of turbulence. Prereq., ASEN 5051 or equivalent. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science Aerospace Engineering Aerodynamics & Fluid Mechanics

ASEN-6060 (3) Advanced Astrodynamics

Covers Lagrangian and Hamiltonian formalisms for astrodynamics problems, the computation and characterization of space trajectories in highly dynamic environments, computation of periodic orbits, stability analysis of orbital motion, and development of analytical theories for dynamics. Prereq., ASEN 5050 or instructor consent. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

ASEN-6061 (3) Molecular Gas Dynamics and DSMC

Describes the composition and flow of gases on a microscopic level to examine the behavior of the molecules that make up a macroscopic flow system. Thermodynamic properties, transport phenomena, and the governing Boltzmann Equation are derived from molecular collision dynamics and the kinetic theory. The Direct Simulation Monte Carlo method is introduced with applications. Restricted to graduate students or instructor consent. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

[College of Engineering & Applied Science](#) [Aerospace Engineering](#) [Aerodynamics & Fluid Mechanics](#)

ASEN-6070 (3) Satellite Geodesy

Focuses on the measurement of the Earth's gravitational field, rotational characteristics, and shape using Earth and space-based tracking of artificial satellites. Particular emphasis on satellite altimetry and satellite gravity measurements. Prereq., ASEN 3200 or instructor consent. Credit not granted for this course and ASEN 5060. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

[College of Engineering & Applied Science](#) [Aerospace Engineering](#) [Astrodynamics & Orbital Mech](#)

ASEN-6080 (3) Introduction to Statistical Orbit Determination 2

Continuation of ASEN 5070. Emphasizes orthogonal transformation techniques such as Givens and Householder, square root filtering and smoothing, and considers covariance analysis. Also nonlinear filters and dynamic model compensation techniques. Requires term project that involves the application of many of the techniques required for precise orbit determination. Prereq., ASEN 5070. Formerly ASEN 5080. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

[College of Engineering & Applied Science](#) [Aerospace Engineering](#) [Astrodynamics & Orbital Mech](#)

ASEN-6090 (3) Advanced Global Navigation Satellite Systems: Software and Applications

Focuses on high-precision applications of Global Navigation Satellite Systems (GNSS) and the software tools that are needed to achieve these precisions. Topics include precise orbital determination, reference frames, atmospheric delays, relativity, clock models, ambiguity resolution, and scientific applications. Prereq., ASEN 5090. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Aerospace Engineering | Global Positioning Systems

ASEN-6091 (3) Global Navigation Satellite System (GNSS) Receiver Architecture

Investigates the overall architecture of satellite navigation receivers: including both the analog radio frequency conditioning (antenna to the analog-to-digital converter) and the various signal processing algorithms. Such treatment of the operation of the receiver will provide insight into the trade-offs that go into GNSS as well as the more broad generic spread spectrum receiver design. Recommended prereq., ASEN 5090. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Aerospace Engineering | Global Positioning Systems

ASEN-6107 (3) Nonlinear Finite Element Methods

Continuation of ASEN 5007. Covers the formulation and numerical solution of nonlinear static structural problems by finite element methods. Emphasizes the treatment of geometric nonlinearities and structural stability. Prereq., ASEN 5007. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Aerospace Engineering | Specialized Courses

ASEN-6210 (1-3) Remote Sensing Seminar

Covers subjects pertinent to remote sensing of the Earth, including oceanography, meteorology, vegetation monitoring, and geology. Emphasizes techniques for extracting geophysical information from satellite data. Course requirement for Remote Sensing Certificate. Restricted to graduate students. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Aerospace Engineering | Remote Sensing

ASEN-6220 (3) Topics in Remote Sensing

Covers infrared and microwave techniques for remote sensing, emphasizing oceanographic applications, fundamentals of electromagnetic radiation, remote sensing instrumentation (radars and radiometers), and conversion of sensory data to geophysical parameters, including sea surface topography, temperature, and atmospheric moisture. Prereq., graduate standing and instructor consent. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Aerospace Engineering | Remote Sensing

ASEN-6327 (3) Computational Fluid Mechanics

Introduction to advanced computational methods for the solution of fluid mechanics problems on the computer with emphasis on nonlinear flow phenomena. Prereq., ASEN 5417 or instructor consent. Formerly ASEN 5327. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science Aerospace Engineering Aerodynamics & Fluid Mechanics

ASEN-6337 (3) Remote Sensing Data Analysis

Reviews satellite remote sensing instrumentation and methods. Student teamwork involves real satellite data for applications in oceanography, atmospheric science, and terrestrial physics. Students develop problem-solving skills and use the internet to gather satellite and in situ data to address chosen problems. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science Aerospace Engineering Remote Sensing

ASEN-6367 (3) Advanced Finite Element Methods for Plates, Shells, and Solids

Continues ASEN 5007. Covers more advanced FEM applications to linear static problems in structural and continuum mechanics. Focuses on modeling, formulation, and numerical solutions of problems modeled as plates, shells, and solids. Includes an overview of advanced variational formulations. Prereqs., introductory graduate level course in FEM and familiarity with linear algebra. Formerly ASEN 5367. Credit not granted for this course and ASEN 5367. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science Aerospace Engineering Structures, Mat, & Struc Dynam

ASEN-6427 (3) Advanced Computational Fluid Dynamics

Introduces computational techniques particularly applicable to high-speed gas flows that contain shocks. Complicated numerical methods are developed from relatively simple numerical modules. Prereq., ASEN 5417 or instructor consent. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science Aerospace Engineering Aerodynamics & Fluid Mechanics

ASEN-6517 (3) Computational Methods In Dynamics

Covers modeling, computational algorithms and their computer implementation for both linear and nonlinear dynamical systems. Topics covered include transient analysis, wave propagation, multiphysics analysis, and their significant engineering applications. Prereq., ASEN 5022. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science Aerospace Engineering Structures, Mat, & Struc Dynam

ASEN-6519 (1-3) Special Topics

Reflects upon specialized aspects of aerospace engineering sciences. Course content is indicated in the online Schedule Planner. Prereq., varies. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science Aerospace Engineering Specialized Courses

ASEN-6849 (1-6) Independent Study

Studies special projects agreed upon by student and instructor.

College of Engineering & Applied Science | Aerospace Engineering | Specialized Courses

ASEN-6950 (1-6) Master's Thesis

College of Engineering & Applied Science | Aerospace Engineering | Specialized Courses

ASEN-4128 (3) Human Factors in Engineering and Design

Introduces the field of human factors engineering and investigates human psychological, physiological and performance limitations in complex systems and why it is vital for engineers to understand human operational limitations when designing complex systems. Course includes studies of real accidents caused by human error, good and bad designs, latent conditions and accident-producing designs. Goal is an understanding of how to conduct engineering design with consideration of human factors. Prerequisites: Restricted to students with 57-180 credits (Juniors or Seniors).

ASEN-4138 (3) Aircraft Design

Two lectures and one lab per week. Examines principles of aircraft configuration and design to meet given performance specifications, taking into account aerodynamic, stability and control, and flying quality considerations, as well as airworthiness regulations. Includes preliminary design of the major elements of an aircraft. Prereq., ASEN 3128. Restricted to ASEN majors. Prerequisites: Requires pre-requisite course of ASEN 3128. Restricted to Aerospace Engineering (ASEN) majors only.

ASEN-4218 (3) Large Space Structures Design

Develops the necessary structural analysis skills for conducting conceptual and preliminary designs of large space structures with a practical emphasis on structures considered by NASA over the past 20 years. Applies analysis skills to a broad range of space missions requiring large space structures, emphasizing low cost and practical design. Prereq., senior standing in ASEN or MCEN, or instructor consent. Same as ASEN 5218.

ASEN-5148 (3) Spacecraft Design

Integrates the design elements and fundamental analyses necessary to complete the conceptual (Phase A) design of an unmanned spacecraft. Lecture and discussion explore mission design, propulsion, power, structure, thermal, attitude control, communication, command, and data handling and attitude control systems. The role of project management and systems engineering are examined. Resource estimating and lessons learned in satellite programs are reviewed. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

ASEN-5158 (3) Space Habitat Design

Utilizes systems engineering methods for designing a spacecraft intended for human occupancy and provides a working knowledge of the technologies used to sustain life. Emphasis is placed on deriving functional requirements from stated mission objectives, developing integrated vehicle schematics, and comparing design options by trade study. Prereq., graduate standing in engineering or senior with 3.25 GPA. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

CHEN-3210 (3) Chemical Engineering Heat Transfer

Examines conservation and transfer of thermal energy. Focuses on conduction and convection of heat in the context of chemical processes, with a special focus on heat exchangers. Also studies thermal radiation. Prerequisites: Requires pre-requisite courses of either CHEN 3200 or MCEN 3021 (all min grade C-).

[College of Engineering & Applied Science](#) | [Chemical Engineering](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

CHEN-3220 (3) Chemical Engineering Separations and Mass Transfer

Studies separation methods including distillation, absorption, and extraction, and graphical and computer-based solutions to separation problems. Also studies mass transfer rate processes, including diffusion, microscopic material balances, and correlations for mass transfer coefficients. Applies mass transfer rate theory to packed and tray columns. Prerequisites: Requires prerequisite courses of CHEN 3200 (or MCEN 3021 or GEEN 3853) and CHEN 3320.

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

CHEN-3320 (3) Chemical Engineering Thermodynamics

Applies thermodynamic principles to nonideal systems, phase equilibrium, chemical equilibrium, power generation, refrigeration, and chemical processes. Prereqs., CHEN 2120 (min. grade C) and either CHEM 4511 or 4521 (min. grade C-). Prerequisites: Requires pre-requisite courses of CHEN 2120 and either CHEM 4511 or 4521 (all min grade C-).

CHEN-3840 (1-4) Independent Study

Available to juniors with approval of the Department of Chemical Engineering. Subject arranged to fit needs of the student.

[College of Engineering & Applied Science](#) | [Chemical Engineering](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

CHEN-3930 (6) Chemical Engineering Cooperative Education

Students enrolled in this course participate in a previously arranged, department-sponsored cooperative education program. Prereqs., CHEN 2120 (min. grade C) and GPA higher than 2.85. GPA higher than 3.00 strongly recommended.

[College of Engineering & Applied Science](#) | [Chemical Engineering](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

CHEN-4010 (2) Chemical Engineering Senior Thesis 1

Provides an opportunity for advanced students to conduct exploratory research in chemical engineering.

[College of Engineering & Applied Science](#) | [Chemical Engineering](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

CHEN-4020 (2) Chemical Engineering Senior Thesis 2

Continuation of CHEN 4010. CHEN 4010 and 4020 can substitute for CHEN 4130.

[College of Engineering & Applied Science](#) | [Chemical Engineering](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

CHEN-4090 (1) Senior Seminar

Provides chemical engineering career and professional information, facilitates contact with faculty and industry representatives, and improves communication and leadership skills. Consists of a series of seminars and field trips and requires a research project involving a written and oral report. Prerequisites: Restricted to Chemical (CHEN) Engineering or Chemical and Biological (CBEN) Engineering majors only.

[College of Engineering & Applied Science](#) | [Chemical Engineering](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

CHEN-4130 (2) Chemical Engineering Laboratory 2

Involves planning and execution of chemical engineering experiments on mass transfer operations, separations, and chemical reactors. Interprets experimental data with theoretical principles and statistical analysis. Emphasizes communication with written memos, full reports, and oral presentations. Prerequisites: Requires pre-requisite courses of CHEN 3130, 3220, 3320, 4330 (all min grade C-).

[College of Engineering & Applied Science](#) | [Chemical Engineering](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

CHEN-4330 (3) Chemical Engineering Reaction Kinetics

Introduces chemical kinetics and chemical reactor design. Involves mass and energy balances for steady-state and transient reactor systems. Also covers residence time distribution, mass transfer, catalytic reactions, and multiple steady states in reactors. Prerequisites: Requires pre-requisite courses of CHEN 3320 and APPM 2360.

[College of Engineering & Applied Science](#) | [Chemical Engineering](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

CHEN-4440 (3) Chemical Engineering Materials

Introduces materials engineering, including properties of polymers, metals, ceramics, and semiconductors, especially as related to chemical engineering processes. Prereq., CHEN 3320 and CHEM 3311 (min grade C-).

[College of Engineering & Applied Science](#) | [Chemical Engineering](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

CHEN-4450 (3) Polymer Chemistry

Introduces polymer science with a focus on polymer chemistry and polymerization reactions. Focuses on polymerization reaction engineering and how polymer properties depend on structure. Same as CHEN 5450. Prerequisites: Requires pre-requisite courses of CHEN 4830 or CHEM 3311 and CHEN 4330 (all min grade C-).

[College of Engineering & Applied Science](#) | [Chemical Engineering](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

CHEN-4460 (3) Polymer Engineering

Introductory polymer engineering course reviewing basic terminology and definitions; the properties and synthetic routes of important industrial polymers; and processing of polymers and their applications. Prereq., CHEM 3311 and CHEN 3320 (min. grade C-). Same as CHEN 5460. Prerequisites: Requires pre-requisite courses of CHEM 3311 and CHEN 3320.

[College of Engineering & Applied Science](#) | [Chemical Engineering](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

CHEN-4520 (3) Chemical Process Synthesis

Studies applied chemical process design including equipment specification and economic evaluation. Prerequisites: Requires pre-requisite courses of CHEN 3210, 3220, and 4330 or 4830 (all min grade C-).

[College of Engineering & Applied Science](#) | [Chemical Engineering](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

CHEN-4530 (2) Chemical Engineering Design Project

Provides a team-based capstone design experience for chemical engineering students. Projects are sponsored by industry and student design teams collaborate with industrial consultants. Projects consider chemical process and product design with emphasis on economic analysis. Deliverables include an oral mid-project design review, a final oral presentation and final written design report. Prereq., CHEN 4520 (min. grade C-). Prerequisites: Requires pre-requisite course of CHEN 4520.

[College of Engineering & Applied Science](#) | [Chemical Engineering](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

CHEN-4570 (4) Instrumentation and Process Control

Examines principles of control theory and their application to chemical processes. Focuses on single-loop feedback and feedforward control. Laboratory sessions cover measurement fundamentals, signal transmission, dynamic testing, control system synthesis, and implementation and adjustment. Prereqs., CHEN 3220, 4330 or 4830, and APPM 2360 (all min. grade C-). Prerequisites: Requires pre-requisite courses of CHEN 3220 and CHEN 4330 (or CHEN 4830) and APPM 2360 (all min grade C-).

Courses

Search by College, Department & Category

College/School

Department

Search by Course Number

Subject

Number

CHEN-4630 (1) Intellectual Property Law and Engineering

Learn the fundamentals of the various types of intellectual property, obtain the ability to search the USPTO database for patents, learn the difference between provisional patents, utility patents and foreign patents, and learn the timing requirements related to the filing of patents and public disclosure, use, and/or sale of an invention. Restricted to seniors. Same as CHEN 5630.

[College of Engineering & Applied Science](#)
[Chemical Engineering](#)

CHEN-4650 (3) Particle Technology

Aims to identify the important physical mechanisms occurring in processes involving particles, formulate and solve mathematical descriptions of such processes, and analyze experimental and theoretical results in both a qualitative and quantitative manner. Teaches students to apply this knowledge to the design of particulate systems. Conveys the breadth and depth of natural and industrial applications involving particulates. Prereq., APPM 2360 and CHEN 3200 or MCEN 3021 (all min. grade C-). Same as CHEN 5650.

[College of Engineering & Applied Science](#)
[Chemical Engineering](#)

CHEN-4670 (3) Environmental Separations

Lect. Covers traditional, as well as new, chemical separations processes that have environmental applications. Includes chemically benign processing (pollution prevention) as well as approaches to address existing pollution problems. Same as CHEN 5670. Prerequisites: Requires pre-requisite course of CHEN 3220. Restricted to students with 57-180 credits (Junior or Senior) or graduate students only.

[College of Engineering & Applied Science](#)
[Chemical Engineering](#)

CHEN-4800 (3) Bioprocess Engineering

Reviews the recent developments in the fields of microbiology, molecular genetics, and genetic engineering that are of commercial value and benefit to mankind. Covers engineering implementation of such biological processes. Restricted to students with 87-180 credits (Senior, Fifth Year Senior) or graduate students in engineering. Same as CHEN 5800.

College of Engineering & Applied Science | Chemical Engineering

CHEN-4801 (3) Pharmaceutical Biotechnology

Focuses on the engineering needed to bring therapeutic products derived from living organisms (e.g., proteins, peptides, DNA, RNA) from the production plant to the patient. Covers the challenges of keeping these products "active" as they are stored, shipped, and administered to patients. Prereq., CHEN 3320 (min. grade C-). Coreq., CHEN 4330 or 4830. Prerequisites: Requires pre-requisite courses of CHEN 3320 and pre-requisite or co-requisite courses of CHEN 4830 or CHEN 4330.

College of Engineering & Applied Science | Chemical Engineering

CHEN-4803 (3) Metabolic Engineering

Introduces basic concepts in metabolic engineering and explores modern approaches in metabolic and strain engineering. Application areas that will be discussed will include the use of metabolic engineering approaches in biofuels and biorefining as well as biopharmaceutical production. CHEN 4803 and 5803 are the same course. Prerequisites: Requires pre-requisite course of CHEM 4711 or CHEM 4611.

College of Engineering & Applied Science | Chemical Engineering

CHEN-4805 (3) Biomaterials

Provides an overview of biomaterials. Covers major classes of materials used in medical applications, properties, degradation mechanisms, and characterization methods, foreign body response, methods to control physiological response to biomaterial surfaces, biocompatibility, biomaterials used in soft and hard tissue replacements, drug delivery devices and tissue engineering, and design criteria for developing a material for a given biological application. Prereq., CHEM 3311 (min. grade C-). Same as CHEN 5805. Prerequisites: Requires a pre-requisite course of CHEN 2810 or MCDB 1150 or EBIO 1220 and 1230.

College of Engineering & Applied Science | Chemical Engineering

CHEN-4810 (2) Biological Engineering Laboratory

Involves planning and execution of chemical engineering experiments on mass transfer operations, bioseparations, and biological reactors. Interprets experimental data with theoretical principles and statistical analysis. Emphasizes communication with written memos, full reports and oral presentations. Prerequisites: Requires pre-requisite courses of CHEN 2810 and CHEN 4830 and requires a co-requisite course of CHEN 4820.

College of Engineering & Applied Science | Chemical Engineering

CHEN-4820 (3) Biochemical Separations

Lect. and lab. Presents purification methods, mass transfer coefficients, problems specific to biologicals, and scale-up of processes. Also covers chromatography, phase extraction, supercritical fluids, sedimentation, precipitation, electrophoresis, dialysis, affinity techniques, cell separation, application of separations to bioreactors, and comparison of batch and continuous processes. Prereq., senior standing or above in engineering or science. Same as CHEN 5820. Prerequisites: Requires pre-requisite course of CHEN 3220.

College of Engineering & Applied Science | Chemical Engineering

CHEN-4830 (3) Chemical Engineering Biokinetics

Introduces chemical kinetics, chemical reactor design, and biological kinetics. Involves mass and energy balances for steady-state and transient reactor systems. Also covers residence time distribution, mass transfer, catalytic reactions, multiple steady states in reactors, enzyme kinetics, metabolic networks, and cell growth kinetics. Prerequisites: Requires pre-requisite course of CHEN 3320.

College of Engineering & Applied Science | Chemical Engineering

CHEN-4836 (3) Nanomaterials

Presents fundamental chemical and physical concepts that give rise to the unique optical, electronic and magnetic properties of nanoscale materials. Introduces important synthetic routes for producing nanomaterials, and interparticle forces governing colloidal behavior and self-assembly. Discusses current and potential applications in catalysis, biomedicine, renewable energy, and other fields. Restricted to students with 87-180 credits (Senior, Fifth Year Senior) or graduate students only. CHEN 4836 and 5836 are the same course. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior).

College of Engineering & Applied Science | Chemical Engineering

CHEN-4838 (1-3) Special Topics in Chemical Engineering

Prerequisites: Restricted to students with 57-180 credits (Juniors or Seniors).

College of Engineering & Applied Science | Chemical Engineering

CHEN-4840 (1-4) Independent Study

Available to seniors with approval of chemical engineering department. Subject arranged to fit needs of student.

College of Engineering & Applied Science | Chemical Engineering

CHEN-5090 (1) Seminar in Chemical Engineering

Required of all chemical engineering graduate students. Includes reports on research activities and on special current topics. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Chemical Engineering

CHEN-5127 (3) Applied Statistics for the Manufacturing and Process Industries

Discusses the concepts and techniques of applied statistics essential to quality control and product/process improvement. Includes computer control (SQC/SPC), sampling methods and time series analysis, and methods of experimental design. Prereq., MCEN 4120. Same as CVEN 5127 and MCEN 5126.

College of Engineering & Applied Science | Chemical Engineering

CHEN-5128 (3) Applied Statistics In Research and Development

Students learn current and emerging statistical methods that are appropriate to experimentation in research and development activities. Statistical design of experiments and model fitting is emphasized. Prereq., one introductory probability/statistics course. Same as MCEN 5146.

College of Engineering & Applied Science | Chemical Engineering

CHEN-5210 (4) Transport Phenomena

Considers continuum mechanics, emphasizing fundamental relationships for fluid mechanics and heat transfer and their applications to engineering problems. Prereq., senior or graduate standing and undergraduate courses in fluid mechanics, heat transfer, and differential equations.

College of Engineering & Applied Science | Chemical Engineering

CHEN-5220 (3) Mass Transport

Examines fundamentals of mass transport with particular attention to microscopic balances in complex systems, such as those involving multiple components, chemical reaction, simultaneous heat and mass transport, and/or high mass flux. Prereq., CHEN 5210, undergraduate mass transfer, and familiarity with vector and tensor calculus.

College of Engineering & Applied Science | Chemical Engineering

CHEN-5333 (3) Research Methods and Ethics

Prepares graduate students to carry out independent research. Research ethics, laboratory skills, experimental methods, critical thinking, presentations, proposal preparation and career planning are discussed. Independent research project carried out under direction of chemical engineering faculty. Prereq., graduate standing.

College of Engineering & Applied Science | Chemical Engineering

CHEN-5343 (1) Research Methods and Ethics Seminar

Prepares graduate students to carry out independent research. Focuses on topics such as safety, ethics, communication skills, data analysis, intellectual property considerations, and time management. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Chemical Engineering

CHEN-5360 (3) Catalysis and Kinetics

Studies principles of chemical kinetics and catalytic reactions, emphasizing heterogeneous catalysis. Coreq., CHEN 4330, or prereq., CHEM 4551 and instructor consent, or graduate standing in CHEM or CHEN.

College of Engineering & Applied Science | Chemical Engineering

CHEN-5370 (3) Intermediate Chemical Engineering Thermodynamics

Reviews fundamentals of thermodynamics, application to pure fluids and mixtures, and physical equilibrium and changes of state. Examines the equation of state and computation of fluid properties for pure fluids, mixtures, and solutions. Also looks at relations between thermodynamics and statistical mechanics. Prereq., undergraduate thermodynamics (CHEN 3320 or equivalent). Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Chemical Engineering

CHEN-5390 (3) Chemical Reactor Engineering

Studies ideal and nonideal chemical reactors, including unsteady state behavior, mixing effects, reactor stability, residence time distribution, and diffusion effects. Prereq., undergraduate course in chemical reactor design/kinetics.

College of Engineering & Applied Science | Chemical Engineering

CHEN-5420 (3) Physical Chemistry and Fluid Mechanics of Interfaces

Covers thermodynamics of interfaces and surface tension measurement; adsorption at liquid-gas, liquid-liquid, and solid-gas interfaces; monolayers; conservation equations for a fluid interface; rheology of interfaces; surface tension driven flows; contact angle and wettability; and double layer phenomena. Prereq., CHEN 3200 or equivalent.

College of Engineering & Applied Science | Chemical Engineering

CHEN-5450 (3) Polymer Chemistry

Same as CHEN 4450.

CHEN-5460 (3) Polymer Engineering

Same as CHEN 4460.

College of Engineering & Applied Science | Chemical Engineering

CHEN-5630 (1) Intellectual Property Law and Engineering

Restricted to graduate students. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Chemical Engineering

CHEN-5650 (3) Particle Technology

Extra work required for graduate course. Same as CHEN 4650.

College of Engineering & Applied Science | Chemical Engineering

CHEN-5670 (3) Environmental Separations

Lect. Covers traditional, as well as new, chemical separations processes that have environmental applications. Includes chemically benign processing (pollution prevention) as well as approaches to address existing pollution problems. Extra work required for graduate course. Same as CHEN 4670.

College of Engineering & Applied Science | Chemical Engineering

CHEN-5740 (3) Analytical Methods in Chemical Engineering

Presents applied analytical and numerical mathematical methods in the context of chemical engineering problems. Topics include modeling techniques, algebraic equations, and ordinary and partial differential equations. Prereq., senior or graduate standing; working knowledge of computing, calculus, differential equations, linear algebra, and vector operations; and undergraduate courses in physics, fluid mechanics, heat transfer, and reaction engineering. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Chemical Engineering

CHEN-5750 (3) Numerical Methods in Chemical Engineering

Covers numerical methods for solving ordinary differential, partial differential, and integral equations. These principles are employed to develop, test, and assess computer programs for solving problems of interest to chemical engineers. Prereq., graduate standing or instructor consent.

College of Engineering & Applied Science | Chemical Engineering

CHEN-5800 (3) Bioprocess Engineering

Same as CHEN 4800, except that a major term report is required.

College of Engineering & Applied Science | Chemical Engineering

CHEN-5803 (3) Metabolic Engineering

Introduces basic concepts in metabolic engineering and explores modern approaches in metabolic and strain engineering. Application areas that will be discussed will include the use of metabolic engineering approaches in biofuels and biorefining as well as biopharmaceutical production. CHEN 4803 and 5803 are the same course. Prerequisites: Requires pre-requisite courses of APPM 2360 and CHEM 4731 or CHEM 4611.

College of Engineering & Applied Science | Chemical Engineering

CHEN-5805 (3) Biomaterials

Same as CHEN 4805.

College of Engineering & Applied Science | Chemical Engineering

CHEN-5820 (3) Biochemical Separations

Extra work required for graduate course. Same as CHEN 4820. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Chemical Engineering

CHEN-5830 (1) Introduction to Modern Biotechnology

Introduces students to the biotechnology enterprise. Topics include the biotechnology industry and profession, the various academic disciplines of biotechnology, intellectual property, financing, and ethics.

College of Engineering & Applied Science | Chemical Engineering

CHEN-5831 (2) Biotechnology Case Studies

Capstone course required of all graduate students in the interdisciplinary graduate biotechnology certificate program. Reviews molecular genetics, product synthesis and purification, economics, intellectual property, and business planning. Working in teams, students present a biotechnology product plan. Prereq., CHEN 5830.

College of Engineering & Applied Science | Chemical Engineering

CHEN-5835 (3) Colloids and Interfaces

Provides a deep exploration of the fundamental principles of colloid and interface science and of related applications. Core topics include fundamental equations of interfacial science, capillary phenomena, interfacial thermodynamics interfaces, molecular monolayers, electrical surface properties, and interfacial forces. Advanced topics include wetting phenomena, adsorption isotherms, dynamic interfacial behavior, surface modification, tribology, surfactant self-assembly, and foams/emulsions among others. Prereq., CHEN 3320 (min. grade C-).

College of Engineering & Applied Science | Chemical Engineering

CHEN-5836 (3) Nanomaterials

Presents fundamental chemical and physical concepts that give rise to the unique optical, electronic and magnetic properties of nanoscale materials. Introduces important synthetic routes for producing nanomaterials, and interparticle forces governing colloidal behavior and self-assembly. Discusses current and potential applications in catalysis, biomedicine, renewable energy, and other fields. Restricted to students with 87-180 credits (Senior, Fifth Year Senior) or graduate students only. CHEN 4836 and 5836 are the same course. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Chemical Engineering

CHEN-5838 (1-3) Special Topics in Chemical Engineering

Graduate-selected topics courses offered upon demand. Prereq., graduate standing or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Chemical Engineering

CHEN-5840 (1-4) Independent Study

Available to MS and PHD students.

College of Engineering & Applied Science | Chemical Engineering

CHEN-5900 (3) Pharmaceutical Biotechnology

Incorporates biochemistry, pharmaceutical science, and engineering for application in the pharmaceutical industry. Emphasizes microscale mechanisms affecting drug delivery, bioavailability, and stability. Specific topics include thermodynamics of macromolecular conformational stability, crystallization kinetics, interfacial phenomena, and industrial protein folding. Prereq., graduate standing.

College of Engineering & Applied Science | Chemical Engineering

CHEN-6210 (3) Microhydrodynamics of Suspensions and Colloids

Focuses on fluid mechanics and colloid science of suspensions of particles, cells, and drops. Covers fundamentals, applications, and research frontiers. Prereq., CHEN 5210 or equivalent.

College of Engineering & Applied Science | Chemical Engineering

CHEN-6820 (3) Biochemical Engineering Fundamentals

Covers design and operation of fermentation processes, microbial and enzyme kinetics, multiple substrate and multiple species of fermentation, regulation of enzyme activity, energetics of cellular growth, immobilized enzyme and cell reactors, and transport phenomena in microbial systems and downstream processing. Prereq., graduate standing in CHEM, CHEN, or MCDB, or instructor consent.

CSCI-2824 (3) Discrete Structures

Covers foundational materials for computer science that is often assumed in advanced courses. Topics include set theory, Boolean algebra, functions and relations, graphs, propositional and predicate calculus, proofs, mathematical induction, recurrence relations, combinatorics, discrete probability. Focuses on examples based on diverse applications of computer science.

Prerequisites: Requires pre-requisite course of CSCI 2270 (minimum grade C-).

[College of Engineering & Applied Science](#)
[Computer Science](#)
[Theory of Computation](#)

CSCI-3104 (4) Algorithms

Covers advanced data structures, computational geometry, cryptography, dynamic programming, greedy algorithms, divide-and-conquer, graph algorithms (e.g., depth-first search), network algorithms (e.g., shortest paths), approximation algorithms. Prerequisites: Requires pre-requisite course of CSCI 2824 (minimum grade C-).

[College of Engineering & Applied Science](#)
[Computer Science](#)
[Theory of Computation](#)

CSCI-3434 (3) Theory of Computation

Introduces the foundations of formal language theory, computability, and complexity. Shows relationship between automata and various classes of languages. Addresses the issue of which problems can be solved by computational means, and studies complexity of solutions. Prereq., CSCI 3104 and 3155. Prerequisites: Requires pre-requisite courses of CSCI 3104 and CSCI 3155 (minimum grade C-).

[College of Engineering & Applied Science](#)
[Computer Science](#)
[Theory of Computation](#)

CSCI-4314 (3) Algorithms for Molecular Biology

Surveys combinatorial algorithms used to understand DNA, RNA, and proteins. Introduces students to methods used to process genomic data. Topics covered include a review of algorithms and molecular biology, sequence analysis, RNA and protein structure analysis, and comparative genomics. Students will get hands-on experience processing recent genomic data. Prereqs., CSCI 2270 and CSCI 3104, or CHEM 4711, or MCDB3500 or Iphy 4200. Same as CSCI 5314 and MCDB 4314.

College of Engineering & Applied Science | Computer Science | Theory of Computation

CSCI-5314 (3) Algorithms for Molecular Biology

Same as CSCI 4314 and MCDB 5314. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science | Computer Science | Theory of Computation

CSCI-5444 (3) Introduction to Theory of Computation

Reviews regular expressions and finite automata. Studies Turing machines and equivalent models of computation, the Chomsky hierarchy, context-free grammars, push-down automata, and computability. Prereq., graduate standing or instructor consent. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science | Computer Science | Theory of Computation

CSCI-5454 (3) Design and Analysis of Algorithms

Techniques for algorithm design, analysis of correctness and efficiency; divide and conquer, dynamic programming, etc. Advanced data structures, algorithms in graph theory, geometry, Vlsi, linear algebra, etc. Lower bounds, Np-completeness, intractability. Prereqs., CSCI 2270 or equivalent. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science | Computer Science | Theory of Computation

CSCI-5654 (3) Linear Programming

Presents algorithms, simplex, and modifications. Examines theory---duality and complementary slackness. Involves network flow algorithms. Introduces integer programming. Prereq., linear algebra. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science | Computer Science | Theory of Computation

CSCI-5714 (3) Formal Languages

Explores context-free languages: pumping lemma and variants, closure properties, and decision properties. Involves parsing algorithms, including general and special languages, e.g., LR. Additional topics chosen by instructor. Prereq., CSCI 5444 or instructor consent. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science | Computer Science | Theory of Computation

CSCI-6454 (3) Advanced Algorithms

Topics include matching and network flows, matroids, computational geometry, parallel computation (PRAM, hypercube, mesh). Also includes Vlsi, database theory, distributed computation, cryptography, robotics, scheduling, probabilistic algorithms, approximation algorithms, average case, and amortized analysis, time permitting. Prereq., CSCI 5454. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Computer Science | Theory of Computation

CSCI-7154 (3) Topics in Theory of Computation

Selected topics of current interest in theory of computation. Prereq., CSCI 5454. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Computer Science | Theory of Computation

CSCI-2270 (4) Computer Science 2: Data Structures

Studies data abstractions (e.g., stacks, queues, lists, trees) and their representation techniques (e.g., linking, arrays). Introduces concepts used in algorithm design and analysis including criteria for selecting data structures to fit their applications. Prereqs., CSCI 1300, and one of APPM 1350 or MATH 1300. Prerequisites: Requires pre-requisite courses of CSCI 1300 and either APPM 1350 or MATH 1300 (minimum grade C-).

CSCI-3002 (3) Human-Centered Computing Foundations

Introduces practice and research in human-computer interaction, design of interactive systems, computer supported cooperative work, computer supported collaborative learning, educational technology, tools that support creativity, user-developed knowledge collections, and gaming.

[College of Engineering & Applied Science](#)
[Computer Science](#)
[Artificial Intelligence](#)

CSCI-3112 (1-3) Human-Centered Computing Professional Development

Supports students in developing professional skills and practices in human-computer interaction, design of interactive systems, computer supported cooperative work, computer supported collaborative learning, educational technology, tools that support creativity, user-developed knowledge collections, and gaming. May be repeated up to 10 total credit hours. Same as ATLS 3112.

[College of Engineering & Applied Science](#)
[Computer Science](#)
[Artificial Intelligence](#)

CSCI-3202 (3) Introduction to Artificial Intelligence

Surveys artificial intelligence techniques of search, knowledge representation and reasoning, probabilistic inference, machine learning, and natural language processing. Introduces artificial intelligence programming. Prerequisites: Requires pre-requisite course of CSCI 2824 (minimum grade C-).

[College of Engineering & Applied Science](#)
[Computer Science](#)
[Artificial Intelligence](#)

CSCI-3302 (3) Introduction to Robotics

Introduces students to fundamental concepts in autonomous, mobile robotics: mechanisms, locomotion, kinematics, control, perception and planning. The course consists of lectures and lab sessions that are geared toward developing a complex robot controller in a realistic, physics-based multi-robot simulator. Prereqs., CSCI 2270 and 2824. CSCI 3302 and ECEN 3303 are the same course.

College of Engineering & Applied Science | Computer Science | Artificial Intelligence

CSCI-3702 (3) Cognitive Science

Introduces cognitive science, drawing from psychology, philosophy, artificial intelligence, neuroscience, and linguistics. Studies the linguistic relativity hypothesis, consciousness, categorization, linguistic rules, the mind-body problems, nature versus nurture, conceptual structure and metaphor, logic/problem solving, and judgment. Emphasizes the nature, implications, and limitations of the computational model of mind. Prereqs., two of the following: PSYC 2145, LING 2000, CSCI 1300, and PHIL 2440. Same as LING 3005, PHIL 3310, and PSYC 3005.

College of Engineering & Applied Science | Computer Science | Artificial Intelligence

CSCI-4202 (3) Artificial Intelligence 2

Second course in artificial intelligence. Topics may vary, but typically cover neural networks, natural language processing, and artificial life. Prereq., CSCI 3202 or instructor consent.

College of Engineering & Applied Science | Computer Science | Artificial Intelligence

CSCI-4302 (3) Advanced Robotics

Exposes students to current research topics in the field of robotics and provides hands-on experience in solving a grand challenge program. Prereq., CSCI 3302 or instructor consent required. Same as CSCI 5302.

College of Engineering & Applied Science | Computer Science | Artificial Intelligence

CSCI-4312 (3) Health Informatics

Teaches students essential skills necessary for developing usable assistive and performance support systems, which include consideration of the academic and professional interdisciplinary issues that govern the work. An overview of ongoing and emerging topics in medical informatics will be presented. Prereq., CSCI 2270. Recommended prereq., CSCI 3002. Same as CSCI 5312.

College of Engineering & Applied Science | Computer Science | Artificial Intelligence

CSCI-4342 (3) Groupware and Workflow Systems

Supports students in developing professional skills and knowledge concerning the use of computer technologies to support collaborative activities. Also covers the impact of digital collaboration

technologies on users, groups, organizations and society. Students will gain practical experience with Business Process Management and the use of Workflow Management Systems. Same as CSCI 5342.

College of Engineering & Applied Science | Computer Science | Artificial Intelligence

CSCI-4412 (3) Design, Creativity, and New Media

Explores the design of new media and technologies to support design and creativity. Analyzes design and creativity as human activities of fundamental importance in the networked information culture and economy. Provides theoretical and practical analysis of new media. Instructor consent required. Recommended prereq., CSCI 3002. Instructor consent required. Same as CSCI 5412.

College of Engineering & Applied Science | Computer Science | Artificial Intelligence

CSCI-4502 (3) Data Mining

Introduces basic data mining concepts and techniques for discovering interesting patterns hidden in large-scale data sets, focusing on issues relating to scalability and efficiency. Topics covered include data preprocessing, data warehouse, association, classification, clustering, and mining specific data types such as time-series, social networks, multimedia, and Web data. Prereq., CSCI 2270 or instructor consent. CSCI 4502 and 5502 are the same course.

College of Engineering & Applied Science | Computer Science | Artificial Intelligence

CSCI-5302 (3) Advanced Robotics

Exposes students to current research topics in the field of robotics and provides hands-on experience in solving a grand challenge program. Prereq., CSCI 3302 or instructor consent required. Same as CSCI 4302.

College of Engineering & Applied Science | Computer Science | Artificial Intelligence

CSCI-5312 (3) Health Informatics

Same as CSCI 4312. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science | Computer Science | Artificial Intelligence

CSCI-5342 (3) Groupware and Workflow Systems

Same as CSCI 4342. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science | Computer Science | Artificial Intelligence

CSCI-5412 (3) Design, Creativity, and New Media

Same as CSCI 4412. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science | Computer Science | Artificial Intelligence

CSCI-5502 (3) Data Mining

Introduces basic data mining concepts and techniques for discovering interesting patterns hidden in large-scale data sets, focusing on issues relating to scalability and efficiency. Topics covered include data preprocessing, data warehouse, association, classification, clustering, and mining specific data types such as time-series, social networks, multimedia, and Web data. Prereq., CSCI 2270 or instructor consent. CSCI 4502 and 5502 are the same course. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Computer Science | Artificial Intelligence

CSCI-5582 (3) Artificial Intelligence

Surveys artificial intelligence methods, theories, and applications. Studies the relationship between artificial intelligence and psychology, linguistics, and philosophy. Introduces artificial intelligence programming. Prereq., CSCI 3155 or equivalent. Same as ECEN 5583. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science | Computer Science | Artificial Intelligence

CSCI-5622 (3) Machine Learning

Trains students to build computer systems that learn from experience. Includes the three main subfields: supervised learning, reinforcement learning and unsupervised learning. Emphasizes practical and theoretical understanding of the most widely used algorithms (neural networks, decision trees, support vector machines, Q-learning). Covers connections to data mining and statistical modeling. A strong foundation in probability, statistics, multivariate calculus, and linear algebra is highly recommended. Prereq., graduate standing or instructor consent. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science | Computer Science | Artificial Intelligence

CSCI-5722 (3) Computer Vision

Explores algorithms that can extract information about the world from images or sequences of images. Topics covered include: imaging models and camera calibration, early vision (filters, edges, texture, stereo, optical flow), mid-level vision (segmentation, tracking), vision-based control, and object recognition. Recommended prereq., probability, multivariate calculus, and linear algebra. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science | Computer Science | Artificial Intelligence

CSCI-5832 (3) Natural Language Processing

Explores the field of natural language processing as it is concerned with the theoretical and practical issues that arise in getting computers to perform useful and interesting tasks with natural language. Covers the problems of understanding complex language phenomena and building practical programs. Prereq., graduate standing or instructor consent. Same as LING 5832. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science | Computer Science | Artificial Intelligence

CSCI-6302 (3) Speech Recognition and Synthesis

Introduction to automatic speech recognition and understanding, conversational agents, dialogue systems, and speech synthesis/text-to-speech. Topics include the noisy channel model, Hidden Markov Models, A* and Viterbi decoding, language modeling (N-grams, entropy), concatenative synthesis, text normalization, dialogue and conversation modeling. Prereqs., CSCI 5582 or 5832, or LING 5200, and graduate standing or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Computer Science | Artificial Intelligence

CSCI-6402 (3) Issues and Methods in Cognitive Science

Interdisciplinary introduction to cognitive science, examining ideas from cognitive psychology, philosophy, education, and linguistics via computational modeling and psychological experimentation. Includes philosophy of mind; learning; categorization; vision and mental imagery; consciousness; problem solving; decision making, and game-theory; language processing; connectionism. Prereqs., graduate standing, or at least one course at the 3000-level or higher in computer science, linguistics, philosophy, or psychology. No background in computer science will be presumed. Same as EDUC 6504, LING 6200, PHIL 6310, and PSYC 6200. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Computer Science | Artificial Intelligence

CSCI-6622 (3) Advanced Machine Learning

Covers advanced theoretical and practical topics in machine learning and latest developments in the field. Students conduct original research, either applied or theoretical, and present their results. Prereq., CSCI 5622 or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Computer Science | Artificial Intelligence

CSCI-7212 (3) Topics in Symbolic Artificial Intelligence

Topics vary from year to year. Possible topics include search; knowledge representation and natural language understanding; deduction, planning, problem solving, and automatic programming; instruction and cognitive models; vision and speech; and learning, induction, and concept formation. Prereq., CSCI 5582 or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Computer Science | Artificial Intelligence

CSCI-7222 (3) Topics in Nonsymbolic Artificial Intelligence

Topics vary from year to year. Possible topics include human and machine vision, signal and speech processing, artificial life, mathematical foundations of connectionism, and computational learning theory. Prereq., CSCI 5622 or instructor consent. Prerequisites: Restricted to Graduate Students only.

CSCI-3155 (4) Principles of Programming Languages

Study fundamental concepts on which programming of languages are based, and execution models supporting them. Topics include values, variables, bindings, type systems, control structures, exceptions, concurrency, and modularity. Learn how to select a language and to adapt to a new language. Prerequisites: Requires pre-requisite courses of CSCI 2270 and either CSCI 2400 or ECEN 3350 (minimum grade C-).

[College of Engineering & Applied Science](#) | [Computer Science](#) | [Programming Languages](#)

CSCI-4555 (3) Compiler Construction

Introduces the basic techniques used in translating programming languages: scanning, parsing, definition table management, operator identification and coercion, code selection and register allocation, error recovery. Students build a complete compiler for a simple language. Prereqs., CSCI 2400 or ECEN 3350 and CSCI 2824. Same as ECEN 4553 and CSCI 5525.

[College of Engineering & Applied Science](#) | [Computer Science](#) | [Programming Languages](#)

CSCI-5525 (3) Compiler Construction

Offers practical experience using state-of-the-art CAD tools on high-performance workstations. Provides skills needed to rapidly create little languages for specific problem domains and familiarizes students with automated software development. Prereqs., CSCI 2824 or ECEN 3703 and CSCI 2400 or ECEN 2120. Same as ECEN 5523 and CSCI 4555. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

[College of Engineering & Applied Science](#) | [Computer Science](#) | [Programming Languages](#)

CSCI-5535 (3) Fundamental Concepts of Programming Languages

Considers concepts common to a variety of programming languages--how they are described (both formally and informally) and how they are implemented. Provides a firm basis for comprehending new languages and gives insight into the relationship between languages and machines. Prereq., CSCI 3155, or instructor consent. Same as ECEN 5533. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science | Computer Science | Programming Languages

CSCI-7135 (3) Topics in Programming Languages

Topics selected by instructor. Possible topics are syntax, semantics, metacompilers, compiler design, and translator writing systems. Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Computer Science | Programming Languages

CSCI-3104 (4) Algorithms

Covers advanced data structures, computational geometry, cryptography, dynamic programming, greedy algorithms, divide-and-conquer, graph algorithms (e.g., depth-first search), network algorithms (e.g., shortest paths), approximation algorithms. Prerequisites: Requires pre-requisite course of CSCI 2824 (minimum grade C-).

CSCI-3287 (3) Database and Information Systems

Surveys data management, including file systems, database management systems design, physical data organizations, data models, query languages, concurrency, and database protection. Prereq., CSCI 3104. Prerequisites: CSCI 3287 PREREQ

[College of Engineering & Applied Science](#)
[Computer Science](#)
[Database Systems](#)

CSCI-4317 (3) Genome Databases: Mining and Management

Develops essential skills for performing genomic analyses, with focus on developing practical research tools. Introduces human genome and microbiome projects, Python/SQL scripting, accessing and understanding genomic data, sequence alignment and search, evolutionary models, expression data, biological networks, and macromolecular structure. Prereqs., MCDB 3500, CSCI 3104, or CHEM 4711; coreq., CSCI 2270. Same as CSCI 5317. Credit not granted for this course and CHEM 4621 or MCDB 4621.

[Computer Science](#)
[Database Systems](#)

CSCI-5317 (3) Genome Databases: Mining and Management

Same as CSCI 4317. Credit not granted for this course and CHEM 5621 or MCDB 5621. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

[College of Engineering & Applied Science](#)
[Computer Science](#)
[Database Systems](#)

CSCI-5417 (3) Information Retrieval Systems

Addresses practical issues in the design, implementation and analysis of modern information retrieval systems. The major focus is on Web-based applications including ad hoc retrieval, classification, and clustering. Introduces the use of open source retrieval systems, standard evaluation metrics and gold-standard evaluation collections. Formerly CSCI 7000. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science | Computer Science | Database Systems

CSCI-5817 (3) Database Systems

Provides an advanced treatment of basic database concepts. Prereq., CSCI 2270. Recommended prereq., CSCI 3287 and 3753. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science | Computer Science | Database Systems

CSCI-7717 (3) Topics in Database Systems

Studies topics such as distributed databases, database interfaces, data models, database theory, and performance measurement in depth. Prereq., CSCI 5817 or instructor consent. Prerequisites: Restricted to Graduate Students only.

CSCI-3308 (3) Software Engineering Methods and Tools

Focuses on software engineering methods and tools for application development, including design and system organization; using and creating reusable libraries; building, testing, and debugging; and performance evaluation. Prerequisites: Requires pre-requisite course of CSCI 2270 (minimum grade C-).

[College of Engineering & Applied Science](#) [Computer Science](#) [Software Engineering](#)

CSCI-4308 (4) Software Engineering Project 1

Advanced practicum in which students design, implement, document and test software systems for use in industry, non-profits, government and research institutions. Also offers extensive experience in oral and written communication throughout the software lifecycle. Students must take CSCI 4308 and 4318 contiguously, as the project spans the entire academic year. Prereqs., successful completion of a minimum of 36 credit hours of Computer Science Foundation, Track Foundation, Track Core, Computer Science electives, and WRTG 3030. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Computer Science (CSCI) majors or Computer Science Concurrent Degree majors only.

[College of Engineering & Applied Science](#) [Computer Science](#) [Software Engineering](#)

CSCI-4318 (4) Software Engineering Project 2

Second semester of an advanced practicum in computer science. Students must take CSCI 4308 and 4318 contiguously as the project spans the entire academic year. Prereq., CSCI 4308.

[College of Engineering & Applied Science](#) [Computer Science](#) [Software Engineering](#)

CSCI-4448 (3) Object-Oriented Analysis and Design

An applied analysis and design class addressing the use of object-oriented techniques. Topics include domain modeling, use cases, architectural design, and modeling notations. Students apply the techniques in analysis and design projects. Prereq., CSCI 3155 or expertise in one or more object-oriented programming languages, such as C++ or Java. Same as CSCI 5448.

College of Engineering & Applied Science | Computer Science | Software Engineering

CSCI-5448 (3) Object-Oriented Analysis and Design

Same as CSCI 4448. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science | Computer Science | Software Engineering

CSCI-5548 (3) Software Engineering of Standalone Programs

Applies engineering principles to phases of software product development, project planning, requirements definition, design, implementation, validation, and maintenance. Emphasizes practical methods for communicating and verifying definitions and designs---prototyping, inspections, and modeling. Includes relation to RTS and object-oriented programming. Prereqs., CSCI 1300, CSCI 2270, or instructor consent. Same as ECEN 5543. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science | Computer Science | Software Engineering

CSCI-5608 (3) Software Project Management

Presents topics and techniques critical to the management of software product development, including estimating, planning, quality, tracking, reporting, team organization, people management, and legal issues. Gives special attention to problems unique to software projects. Prereqs., ECEN 4583, CSCI 5548 and 4318, or equivalent industrial experience. Same as ECEN 5603 and EMEN 5031. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science | Computer Science | Software Engineering

CSCI-5828 (3) Foundations of Software Engineering

Explores techniques, languages, and tools for development and maintenance of software systems. Topics include specification languages, configuration modeling, testing techniques, process modeling, program annotations, and program proofs. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science | Computer Science | Software Engineering

CSCI-6268 (3) Foundations of Computer and Network Security

Studies methods to protect information, and the ability to process and move information, from theft, misuse, tampering, destruction, and unauthorized access. Introduces foundational topics of computer and network security, including security models, cryptography, and authentication protocols. Prereq., CSCI 5273. Same as TLEN 5550. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Computer Science | Software Engineering

CSCI-7818 (3) Topics in Software Engineering

Studies selected topics of current interest in software engineering. Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

CSCI-3656 (3) Numerical Computation

Covers development, computer implementation, and analysis of numerical methods for applied mathematical problems. Topics include floating point arithmetic, numerical solution of linear systems of equations, root finding, numerical interpolation, differentiation, and integration. Prereqs., two semesters of calculus, linear algebra, and either CSCI 1200 or 1300.

[College of Engineering & Applied Science](#) [Computer Science](#) [Numerical Computation](#)

CSCI-4446 (3) Chaotic Dynamics

Explores chaotic dynamics theoretically and through computer simulations. Covers the standard computational and analytical tools used in nonlinear dynamics and concludes with an overview of leading-edge chaos research. Topics include time and phase-space dynamics, surfaces of section, bifurcation diagrams, fractal dimension, and Lyapunov exponents. Prereqs., two semesters calculus, CSCI 1200, 1300 or equivalent, and PHYS 1110. Recommended prereqs., PHYS 1120, CSCI 3656, and MATH 3130. Same as CSCI 5446 and ECEN 4423. Prerequisites: Requires pre-requisite course of CSCI 1200 or 1300 and PHYS 1110 (minimum grade C-).

[College of Engineering & Applied Science](#) [Computer Science](#) [Numerical Computation](#)

CSCI-4576 (4) High-Performance Scientific Computing

Introduces computing systems, software, and methods used to solve large-scale problems in science and engineering. Students use high-performance workstations and a supercomputer. First course in a two-semester sequence. Recommended prereq., CSCI 3656. Same as CSCI 5576.

[College of Engineering & Applied Science](#) [Computer Science](#) [Numerical Computation](#)

CSCI-4586 (4) High-Performance Scientific Computing 2

Introduces computing systems, software, and methods to solve large-scale problems in science and engineering. Students use high-performance workstations and a supercomputer. Second course in a two-semester sequence. Prereq., CSCI 4576.

College of Engineering & Applied Science | Computer Science | Numerical Computation

CSCI-5446 (3) Chaotic Dynamics

Same as CSCI 4446 and ECEN 5423. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science | Computer Science | Numerical Computation

CSCI-5576 (4) High-Performance Scientific Computing

Same as CSCI 4576. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science | Computer Science | Numerical Computation

CSCI-5606 (3) Principles of Numerical Computation

Highlights computer arithmetic, solution of linear systems, least-squares approximations, nonlinear algebraic equations, interpolation, and quadrature. Prereqs., CSCI 3656 and three semesters of calculus, or equivalent. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science | Computer Science | Numerical Computation

CSCI-5636 (3) Numerical Solution of Partial Differential Equations

Focuses on finite difference solution for partial differential equations, methods of SoR, ADI, conjugate gradients, finite element method, nonlinear problems, and applications. Prereqs., CSCI 5606. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science | Computer Science | Numerical Computation

CSCI-5646 (3) Numerical Linear Algebra

Offers direct and iterative solutions of linear systems. Also covers eigen value and eigenvector calculations, error analysis, and reduction by orthogonal transformation. A sound knowledge of basic linear algebra, experience with numerical computation, and programming experience is required. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science | Computer Science | Numerical Computation

CSCI-6676 (3) Numerical Methods for Unconstrained Optimization

Looks at modern computational methods for solution of unconstrained optimization problems, nonlinear leastsquares, and systems of nonlinear equations. Techniques for building algorithms to solve problems with special structure. Prereq., CSCI 5606. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Computer Science | Numerical Computation

CSCI-6686 (3) Numerical Methods for Constrained Optimization

Covers computational methods for constrained optimization. Topics include basic theory, methods for quadratic programming, active set strategies for linear constraints, and penalty and successive quadratic programming methods for nonlinearly constrained problems. Prereq., CSCI 5606. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Computer Science | Numerical Computation

CSCI-7176 (3) Topics in Numerical Computation

Topics selected by instructor. Possible topics are numerical linear algebra, solution of differential equations, nonlinear algebra and optimization, data fitting, linear and nonlinear programming, and solution of large problems. Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

CSCI-3434 (3) Theory of Computation

Introduces the foundations of formal language theory, computability, and complexity. Shows relationship between automata and various classes of languages. Addresses the issue of which problems can be solved by computational means, and studies complexity of solutions. Prereq., CSCI 3104 and 3155. Prerequisites: Requires pre-requisite courses of CSCI 3104 and CSCI 3155 (minimum grade C-).

CSCI-3753 (4) Operating Systems

Examines software comprising computing systems as it builds upon hardware to provide a programming environment. Looks at structure and function of editors, compilers/assemblers, linkers, etc. Basic operating systems concepts and systems programming in high-level languages. Prereqs., CSCI 2700 and 2400 or ECEN 3350. Prerequisites: Requires pre-requisite courses of CSCI 2270 and either CSCI 2400 or ECEN 3350 (minimum grade C-).

[College of Engineering & Applied Science](#) [Computer Science](#) [Operating Systems and Hardware](#)

CSCI-4113 (3) Unix System Administration

Introduces UNIX (Linux) system administration and related topics, including trouble-shooting system and network problems, hardware and software configuration and installation, basic scripting, and security aspects of Internet hosts. Students build a Linux server from the ground up, using provided computing resources, and must maintain and secure the server themselves. Prereqs., CSCI 2270 or instructor consent. Recommended prereq., CSCI 3308. Prerequisites: Requires pre-requisite course of CSCI 2270 (minimum grade C-).

[College of Engineering & Applied Science](#) [Computer Science](#) [Operating Systems and Hardware](#)

CSCI-4123 (3) Network Laboratory

Develops enterprise level design and configuration skills on local area networking via switching and routing, as well as the provisioning of remote data communications across diverse Wan technologies, using the latest available transport and security services. Prereq., CSCI 4273. Credit not granted for this course and TLEN 5460. Prerequisites: Requires pre-requisite course of CSCI 4273 (minimum grade C-).

[College of Engineering & Applied Science](#) [Computer Science](#) [Operating Systems and Hardware](#)

CSCI-4133 (3) Security Laboratory

Allows students to gain practical experience with network security in a simulated network environment. Topics to be covered include system hardening, firewalls, intrusion detection, vulnerability assessment, and investigation. Prereq., CSCI 4273. Credit not granted for this course and TLEN 5540. Prerequisites: Requires pre-requisite course of CSCI 4273 (minimum grade C-).

College of Engineering & Applied Science | Computer Science | Operating Systems and Hardware

CSCI-4143 (2) Principles of Telecommunications Policy

Learn the key issues and principles that guide the decisions of policymakers with respect to the regulatory treatment of voice, video, and data communications. Engage in critical debate, and develop instincts for anticipating the likely regulatory models that may be applied to new technologies. This introductory course covers technical, economic, legal, political, and institutional considerations. Coreq., CSCI 4123 or 4133. Same as TLEN 5210 Prerequisites: Requires pre-requisite or co-requisite course of CSCI 4123 or CSCI 4133 (minimum grade C-).

College of Engineering & Applied Science | Computer Science | Operating Systems and Hardware

CSCI-4273 (3) Network Systems

Focuses on design and implementation of network programs and systems, including topics in network protocols, file transfer, client-server computing, remote procedure call, and other contemporary network system design and programming techniques. Prereqs., CSCI 3753 or equivalent, and familiarity with C and Unix. Same as CSCI 5273.

College of Engineering & Applied Science | Computer Science | Operating Systems and Hardware

CSCI-4593 (3) Computer Organization

Studies computer design at the gate level. Discusses instruction set architecture design, arithmetic and logic unit design, control logic, memory design and caches, simple pipelining, I/O, and peripheral devices. Briefly covers aspects of modern computer architecture, such as multicore processors and cache coherence for these. Prereq., ECEN 3350 and ECEN 2350. Same as ECEN 4593. Prerequisites: Requires pre-requisite courses of ECEN 2350 and ECEN 3350 (minimum grade C-). Restricted to Electrical Engineering (EEEN), Electrical and Computer Engineering (ECEN) Computer Science (CSEN), Engineering Physics (EPEN) or Applied Mathematics (APPM).

College of Engineering & Applied Science | Computer Science | Operating Systems and Hardware

CSCI-4753 (3) Computer Performance Modeling

Presents a broad range of system measurement and modeling techniques, emphasizing applications to computer systems. Topics include system measurement, work load characterization, and analysis of data; design of experiments; simulation; and queuing theory and queuing network models. Prereq., CSCI 3753 or equivalent, and second-semester calculus. Recommended prereq., a course in statistics. Same as CSCI 5753 and ECEN 4753/5753.

College of Engineering & Applied Science | Computer Science | Operating Systems and Hardware

CSCI-5273 (3) Network Systems

Same as CSCI 4273. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science | Computer Science | Operating Systems and Hardware

| | | |
|--|------------------|--------------------------------|
| College of Engineering & Applied Science | Computer Science | Operating Systems and Hardware |
|--|------------------|--------------------------------|

CSCI-5473 (3) Applied Operating Systems

Examines design and implementation of contemporary operating systems. Significant laboratory component applies practice with OS use, analysis, and internal design. Topics include OS organization and structure, process and thread management, memory management, file management, device management, network and distributed systems, and modern runtime systems. Prereq., two years programming and instructor consent. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

| | | |
|--|------------------|--------------------------------|
| College of Engineering & Applied Science | Computer Science | Operating Systems and Hardware |
|--|------------------|--------------------------------|

CSCI-5573 (3) Advanced Operating Systems

Intended to create a foundation for operating systems research or advanced professional practice. Examines the design and implementation of a number of research and commercial operating systems and their components, system organization and structure, threads, communication and synchronization, virtual memory, distribution, file systems, security and authentication, availability, and Internet services. Prereqs., CSCI 3753, 4593, equivalent undergraduate coursework in operating systems and computer architecture, or instructor consent. Same as ECEN 5573. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

| | | |
|--|------------------|--------------------------------|
| College of Engineering & Applied Science | Computer Science | Operating Systems and Hardware |
|--|------------------|--------------------------------|

CSCI-5593 (3) Advanced Computer Architecture

Provides a broad-scope treatment of important concepts in the design and implementation of high-performance computer systems. Discusses important issues in the pipelining of a machine and the design of cache memory systems. Also studies current and historically important computer architectures. Prereq., CSCI 4593 or instructor consent. Same as ECEN 5593. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

| | | |
|--|------------------|--------------------------------|
| College of Engineering & Applied Science | Computer Science | Operating Systems and Hardware |
|--|------------------|--------------------------------|

CSCI-5673 (3) Distributed Systems

Examines systems that span multiple autonomous computers. Topics include system structuring techniques, scalability, heterogeneity, fault tolerance, load sharing, distributed file and information systems, naming, directory services, resource discovery, resource and network management, security, privacy, ethics, and social issues. Recommended prereqs., CSCI 5573 or a course in computer networks. Same as ECEN 5673. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

| | | |
|--|------------------|--------------------------------|
| College of Engineering & Applied Science | Computer Science | Operating Systems and Hardware |
|--|------------------|--------------------------------|

CSCI-5753 (3) Computer Performance Modeling

Same as CSCI 4753. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

| | | |
|--|------------------|--------------------------------|
| College of Engineering & Applied Science | Computer Science | Operating Systems and Hardware |
|--|------------------|--------------------------------|

CSCI-7123 (3) Topics in Operating Systems

Topics selected by instructor. Possible topics are system design, measurement and evaluation, simulation, mathematical modeling, and parallelism. Prereq., CSCI 5573. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Computer Science | Operating Systems and Hardware

CSCI-7143 (3) Topics in Computer Systems

Topics selected by instructor. Possible topics are online systems, multiprocessing, microprogramming, architecture, data communications, and computing networks. May be repeated up to 6 total credit hours. Instructor consent required. Prerequisites: Restricted to Graduate Students only.

CSCI-4000 (3) Entrepreneurship in Computing

Examines the development of new venture creation from the entrepreneur's perspective. Provides an understanding of the entire process including opportunity identification, feasibility study, fundraising, organization, team creation, and exit strategies through case studies, oral and written presentations, and outside speakers. Taught by an experienced entrepreneur. Prereq., CSCI 2270. Restricted to juniors/seniors.

[College of Engineering & Applied Science](#) [Computer Science](#) [Operating Systems and Hardware](#)

CSCI-4202 (3) Artificial Intelligence 2

Second course in artificial intelligence. Topics may vary, but typically cover neural networks, natural language processing, and artificial life. Prereq., CSCI 3202 or instructor consent.

[College of Engineering & Applied Science](#) [Computer Science](#) [Artificial Intelligence](#)

CSCI-4229 (3) Computer Graphics

Studies design, analysis, and implementation of computer graphics techniques. Topics include interactive techniques, 2D and 3D viewing, clipping, segmentation, translation, rotation, and projection. Also involves removal of hidden edges, shading, and color. Prereqs., knowledge of basic linear algebra and CSCI 2270. Same as CSCI 5229.

[College of Engineering & Applied Science](#) [Computer Science](#) [Graphics](#)

CSCI-4239 (3) Advanced Computer Graphics

Studies design, analysis and implementation of advanced computer graphics techniques. Topics include shaders, using the GPU for high performance computing, graphics programming on embedded devices such as mobile phones; advanced graphics techniques such as ray tracing. Prereq., CSCI 4229 or instructor consent required. Same as CSCI 5239.

College of Engineering & Applied Science | Computer Science | Graphics

CSCI-4273 (3) Network Systems

Focuses on design and implementation of network programs and systems, including topics in network protocols, file transfer, client-server computing, remote procedure call, and other contemporary network system design and programming techniques. Prereqs., CSCI 3753 or equivalent, and familiarity with C and Unix. Same as CSCI 5273.

College of Engineering & Applied Science | Computer Science | Operating Systems and Hardware

CSCI-4302 (3) Advanced Robotics

Exposes students to current research topics in the field of robotics and provides hands-on experience in solving a grand challenge program. Prereq., CSCI 3302 or instructor consent required. Same as CSCI 5302.

College of Engineering & Applied Science | Computer Science | Artificial Intelligence

CSCI-4308 (4) Software Engineering Project 1

Advanced practicum in which students design, implement, document and test software systems for use in industry, non-profits, government and research institutions. Also offers extensive experience in oral and written communication throughout the software lifecycle. Students must take CSCI 4308 and 4318 contiguously, as the project spans the entire academic year. Prereqs., successful completion of a minimum of 36 credit hours of Computer Science Foundation, Track Foundation, Track Core, Computer Science electives, and WRTG 3030. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Computer Science (CSCI) majors or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science | Computer Science | Software Engineering

CSCI-4312 (3) Health Informatics

Teaches students essential skills necessary for developing usable assistive and performance support systems, which include consideration of the academic and professional interdisciplinary issues that govern the work. An overview of ongoing and emerging topics in medical informatics will be presented. Prereq., CSCI 2270. Recommended prereq., CSCI 3002. Same as CSCI 5312.

College of Engineering & Applied Science | Computer Science | Artificial Intelligence

CSCI-4314 (3) Algorithms for Molecular Biology

Surveys combinatorial algorithms used to understand DNA, RNA, and proteins. Introduces students to methods used to process genomic data. Topics covered include a review of algorithms and molecular biology, sequence analysis, RNA and protein structure analysis, and comparative genomics. Students will get hands-on experience processing recent genomic data. Prereqs., CSCI

2270 and CSCI 3104, or CHEM 4711, or MCDB3500 or lphy 4200. Same as CSCI 5314 and MCDB 4314.

College of Engineering & Applied Science Computer Science Theory of Computation

CSCI-4317 (3) Genome Databases: Mining and Management

Develops essential skills for performing genomic analyses, with focus on developing practical research tools. Introduces human genome and microbiome projects, Python/SQL scripting, accessing and understanding genomic data, sequence alignment and search, evolutionary models, expression data, biological networks, and macromolecular structure. Prereqs., MCDB 3500, CSCI 3104, or CHEM 4711; coreq., CSCI 2270. Same as CSCI 5317. Credit not granted for this course and CHEM 4621 or MCDB 4621.

College of Engineering & Applied Science Computer Science Database Systems

CSCI-4318 (4) Software Engineering Project 2

Second semester of an advanced practicum in computer science. Students must take CSCI 4308 and 4318 contiguously as the project spans the entire academic year. Prereq., CSCI 4308.

College of Engineering & Applied Science Computer Science Software Engineering

CSCI-4342 (3) Groupware and Workflow Systems

Supports students in developing professional skills and knowledge concerning the use of computer technologies to support collaborative activities. Also covers the impact of digital collaboration technologies on users, groups, organizations and society. Students will gain practical experience with Business Process Management and the use of Workflow Management Systems. Same as CSCI 5342.

College of Engineering & Applied Science Computer Science Artificial Intelligence

CSCI-4412 (3) Design, Creativity, and New Media

Explores the design of new media and technologies to support design and creativity. Analyzes design and creativity as human activities of fundamental importance in the networked information culture and economy. Provides theoretical and practical analysis of new media. Instructor consent required. Recommended prereq., CSCI 3002. Instructor consent required. Same as CSCI 5412.

College of Engineering & Applied Science Computer Science Artificial Intelligence

CSCI-4446 (3) Chaotic Dynamics

Explores chaotic dynamics theoretically and through computer simulations. Covers the standard computational and analytical tools used in nonlinear dynamics and concludes with an overview of leading-edge chaos research. Topics include time and phase-space dynamics, surfaces of section, bifurcation diagrams, fractal dimension, and Lyapunov exponents. Prereqs., two semesters calculus, CSCI 1200, 1300 or equivalent, and PHYS 1110. Recommended prereqs., PHYS 1120, CSCI 3656, and MATH 3130. Same as CSCI 5446 and ECEN 4423. Prerequisites: Requires pre-requisite course of CSCI 1200 or 1300 and PHYS 1110 (minimum grade C-).

College of Engineering & Applied Science | Computer Science | Numerical Computation

CSCI-4448 (3) Object-Oriented Analysis and Design

An applied analysis and design class addressing the use of object-oriented techniques. Topics include domain modeling, use cases, architectural design, and modeling notations. Students apply the techniques in analysis and design projects. Prereq., CSCI 3155 or expertise in one or more object-oriented programming languages, such as C++ or Java. Same as CSCI 5448.

College of Engineering & Applied Science | Computer Science | Software Engineering

CSCI-4502 (3) Data Mining

Introduces basic data mining concepts and techniques for discovering interesting patterns hidden in large-scale data sets, focusing on issues relating to scalability and efficiency. Topics covered include data preprocessing, data warehouse, association, classification, clustering, and mining specific data types such as time-series, social networks, multimedia, and Web data. Prereq., CSCI 2270 or instructor consent. CSCI 4502 and 5502 are the same course.

College of Engineering & Applied Science | Computer Science | Artificial Intelligence

CSCI-4555 (3) Compiler Construction

Introduces the basic techniques used in translating programming languages: scanning, parsing, definition table management, operator identification and coercion, code selection and register allocation, error recovery. Students build a complete compiler for a simple language. Prereqs., CSCI 2400 or ECEN 3350 and CSCI 2824. Same as ECEN 4553 and CSCI 5525.

College of Engineering & Applied Science | Computer Science | Programming Languages

CSCI-4576 (4) High-Performance Scientific Computing

Introduces computing systems, software, and methods used to solve large-scale problems in science and engineering. Students use high-performance workstations and a supercomputer. First course in a two-semester sequence. Recommended prereq., CSCI 3656. Same as CSCI 5576.

College of Engineering & Applied Science | Computer Science | Numerical Computation

CSCI-4586 (4) High-Performance Scientific Computing 2

Introduces computing systems, software, and methods to solve large-scale problems in science and engineering. Students use high-performance workstations and a supercomputer. Second course in a two-semester sequence. Prereq., CSCI 4576.

College of Engineering & Applied Science | Computer Science | Numerical Computation

CSCI-4593 (3) Computer Organization

Studies computer design at the gate level. Discusses instruction set architecture design, arithmetic and logic unit design, control logic, memory design and caches, simple pipelining, I/O, and peripheral devices. Briefly covers aspects of modern computer architecture, such as multicore processors and cache coherence for these. Prereq., ECEN 3350 and ECEN 2350. Same as ECEN 4593. Prerequisites: Requires pre-requisite courses of ECEN 2350 and ECEN 3350 (minimum grade C-). Restricted to Electrical Engineering (EEEN), Electrical and Computer Engineering (ECEN) Computer Science (CSEN), Engineering Physics (EPEN) or Applied Mathematics (APPM).

College of Engineering & Applied Science | Computer Science | Operating Systems and Hardware

CSCI-4753 (3) Computer Performance Modeling

Presents a broad range of system measurement and modeling techniques, emphasizing applications to computer systems. Topics include system measurement, work load characterization, and analysis of data; design of experiments; simulation; and queuing theory and queuing network models. Prereq., CSCI 3753 or equivalent, and second-semester calculus. Recommended prereq., a course in statistics. Same as CSCI 5753 and ECEN 4753/5753.

College of Engineering & Applied Science | Computer Science | Operating Systems and Hardware

CSCI-4809 (3) Computer Animation

Develops a firm understanding of the general principles of computer animation. Lectures cover the creation of models, materials, textures, surfaces, and lighting. Path and key frame animation, particle dynamics, and rendering are introduced. Students are assigned a number of animation tutorials to carry out. CSCI 4809/5809 and ATLS 4809/5809 are all the same course.

College of Engineering & Applied Science | Computer Science | Graphics

CSCI-4810 (1) Seminar in Computational Biology

Provides an overview of current research topics in computational biology and health informatics, with a focus on research conducted on campus. Each week students will attend an on-campus seminar or a presentation by an on-campus research group. Prepares students to participate in a research project. Prereqs., CSCI 4312 or 4314 or 4317. CSCI 4810 and 6810 are the same course.

College of Engineering & Applied Science | Computer Science | General Computer Science

CSCI-4830 (1-3) Special Topics in Computer Science

Covers topics of interest in computer science at the senior undergraduate level. Content varies from semester to semester. May be repeated up to 9 total credit hours.

College of Engineering & Applied Science | Computer Science | General Computer Science

CSCI-4839 (3) User-Centered Design

Develops the skills and practices necessary to apply user-centered approaches to software requirements analysis, and the design and evaluation of computer applications. Same as CSCI 5839.

CSCI-4900 (1-3) Upper Division, Undergraduate Level Independent Study

Provides opportunities for independent study at the upper-division undergraduate level. Students work on a small research problem or tutor lower-division computer science students. Prereq., CSCI 1200 or 1300.

[College of Engineering & Applied Science](#)
[Computer Science](#)
[General Computer Science](#)

CSCI-4950 (2-4) Senior Thesis

Provides an opportunity for senior computer science majors to conduct exploratory research in computer science. Prereqs., successful completion of a minimum of 36 credit hours of Computer Science Foundation, Track Foundation, Track Core, and Computer Science electives, and WRTG 3030. Restricted to seniors. May be repeated up to 8 total credit hours. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior).

[College of Engineering & Applied Science](#)

[Computer Science](#)
[Graphics](#)

CSCI-5239 (3) Advanced Computer Graphics

Prereq., CSCI 5229. Restricted to graduate students only. Same as CSCI 4239. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Computer Science | Graphics

CSCI-5273 (3) Network Systems

Same as CSCI 4273. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science | Computer Science | Operating Systems and Hardware

CSCI-5302 (3) Advanced Robotics

Exposes students to current research topics in the field of robotics and provides hands-on experience in solving a grand challenge program. Prereq., CSCI 3302 or instructor consent required. Same as CSCI 4302.

College of Engineering & Applied Science | Computer Science | Artificial Intelligence

CSCI-5312 (3) Health Informatics

Same as CSCI 4312. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science | Computer Science | Artificial Intelligence

CSCI-5314 (3) Algorithms for Molecular Biology

Same as CSCI 4314 and MCDB 5314. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science | Computer Science | Theory of Computation

CSCI-5317 (3) Genome Databases: Mining and Management

Same as CSCI 4317. Credit not granted for this course and CHEM 5621 or MCDB 5621. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science | Computer Science | Database Systems

CSCI-5342 (3) Groupware and Workflow Systems

Same as CSCI 4342. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science | Computer Science | Artificial Intelligence

CSCI-5412 (3) Design, Creativity, and New Media

Same as CSCI 4412. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science | Computer Science | Artificial Intelligence

CSCI-5417 (3) Information Retrieval Systems

Addresses practical issues in the design, implementation and analysis of modern information retrieval systems. The major focus is on Web-based applications including ad hoc retrieval, classification, and clustering. Introduces the use of open source retrieval systems, standard evaluation metrics and gold-standard evaluation collections. Formerly CSCI 7000. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science | Computer Science | Database Systems

CSCI-5444 (3) Introduction to Theory of Computation

Reviews regular expressions and finite automata. Studies Turing machines and equivalent models of computation, the Chomsky hierarchy, context-free grammars, push-down automata, and computability. Prereq., graduate standing or instructor consent. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science | Computer Science | Theory of Computation

CSCI-5446 (3) Chaotic Dynamics

Same as CSCI 4446 and ECEN 5423. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science | Computer Science | Numerical Computation

CSCI-5448 (3) Object-Oriented Analysis and Design

Same as CSCI 4448. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science | Computer Science | Software Engineering

CSCI-5454 (3) Design and Analysis of Algorithms

Techniques for algorithm design, analysis of correctness and efficiency; divide and conquer, dynamic programming, etc. Advanced data structures, algorithms in graph theory, geometry, Vlsi, linear algebra, etc. Lower bounds, Np-completeness, intractability. Prereqs., CSCI 2270 or equivalent. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science | Computer Science | Theory of Computation

CSCI-5473 (3) Applied Operating Systems

Examines design and implementation of contemporary operating systems. Significant laboratory component applies practice with OS use, analysis, and internal design. Topics include OS organization and structure, process and thread management, memory management, file management, device management, network and distributed systems, and modern runtime systems. Prereq., two years programming and instructor consent. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science | Computer Science | Operating Systems and Hardware

CSCI-5502 (3) Data Mining

Introduces basic data mining concepts and techniques for discovering interesting patterns hidden in large-scale data sets, focusing on issues relating to scalability and efficiency. Topics covered include data preprocessing, data warehouse, association, classification, clustering, and mining specific data types such as time-series, social networks, multimedia, and Web data. Prereq., CSCI 2270 or instructor consent. CSCI 4502 and 5502 are the same course. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Computer Science | Artificial Intelligence

CSCI-5525 (3) Compiler Construction

Offers practical experience using state-of-the-art CAD tools on high-performance workstations. Provides skills needed to rapidly create little languages for specific problem domains and familiarizes students with automated software development. Prereqs., CSCI 2824 or ECEN 3703 and CSCI 2400 or ECEN 2120. Same as ECEN 5523 and CSCI 4555. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science | Computer Science | Programming Languages

CSCI-5535 (3) Fundamental Concepts of Programming Languages

Considers concepts common to a variety of programming languages--how they are described (both formally and informally) and how they are implemented. Provides a firm basis for comprehending new languages and gives insight into the relationship between languages and machines. Prereq., CSCI 3155, or instructor consent. Same as ECEN 5533. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science | Computer Science | Programming Languages

CSCI-5548 (3) Software Engineering of Standalone Programs

Applies engineering principles to phases of software product development, project planning, requirements definition, design, implementation, validation, and maintenance. Emphasizes practical methods for communicating and verifying definitions and designs--prototyping, inspections, and modeling. Includes relation to RTS and object-oriented programming. Prereqs., CSCI 1300, CSCI 2270, or instructor consent. Same as ECEN 5543. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science | Computer Science | Software Engineering

CSCI-5551 (3) Parallel Processing

Examines a range of topics involved in using parallel operations to improve computational performance. Discusses parallel architectures, parallel algorithms and parallel programming languages. Architectures covered include vector computers, multiprocessors, network computers, and data flow machines. Prereq., background in computer organization, introduction to programming languages, elementary numerical analysis, ECEN 4593 and CSCI 3656, or instructor consent. Same as ECEN 5553. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science | Computer Science | Parallel Processing

CSCI-5573 (3) Advanced Operating Systems

Intended to create a foundation for operating systems research or advanced professional practice. Examines the design and implementation of a number of research and commercial operating systems and their components, system organization and structure, threads, communication and synchronization, virtual memory, distribution, file systems, security and authentication, availability, and Internet services. Prereqs., CSCI 3753, 4593, equivalent undergraduate coursework in operating systems and computer architecture, or instructor consent. Same as ECEN 5573.

Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science | Computer Science | Operating Systems and Hardware

CSCI-5576 (4) High-Performance Scientific Computing

Same as CSCI 4576. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science | Computer Science | Numerical Computation

CSCI-5582 (3) Artificial Intelligence

Surveys artificial intelligence methods, theories, and applications. Studies the relationship between artificial intelligence and psychology, linguistics, and philosophy. Introduces artificial intelligence programming. Prereq., CSCI 3155 or equivalent. Same as ECEN 5583. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

CSCI-5593 (3) Advanced Computer Architecture

Provides a broad-scope treatment of important concepts in the design and implementation of high-performance computer systems. Discusses important issues in the pipelining of a machine and the design of cache memory systems. Also studies current and historically important computer architectures. Prereq., CSCI 4593 or instructor consent. Same as ECEN 5593. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

[College of Engineering & Applied Science](#) [Computer Science](#) [Operating Systems and Hardware](#)

CSCI-5606 (3) Principles of Numerical Computation

Highlights computer arithmetic, solution of linear systems, least-squares approximations, nonlinear algebraic equations, interpolation, and quadrature. Prereq., CSCI 3656 and three semesters of calculus, or equivalent. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

[College of Engineering & Applied Science](#) [Computer Science](#) [Numerical Computation](#)

CSCI-5608 (3) Software Project Management

Presents topics and techniques critical to the management of software product development, including estimating, planning, quality, tracking, reporting, team organization, people management, and legal issues. Gives special attention to problems unique to software projects. Prereq., ECEN 4583, CSCI 5548 and 4318, or equivalent industrial experience. Same as ECEN 5603 and EMEN 5031. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

[College of Engineering & Applied Science](#) [Computer Science](#) [Software Engineering](#)

CSCI-5622 (3) Machine Learning

Trains students to build computer systems that learn from experience. Includes the three main subfields: supervised learning, reinforcement learning and unsupervised learning. Emphasizes practical and theoretical understanding of the most widely used algorithms (neural networks, decision trees, support vector machines, Q-learning). Covers connections to data mining and statistical modeling. A strong foundation in probability, statistics, multivariate calculus, and linear algebra is highly recommended. Prereq., graduate standing or instructor consent. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science | Computer Science | Artificial Intelligence

CSCI-5636 (3) Numerical Solution of Partial Differential Equations

Focuses on finite difference solution for partial differential equations, methods of SoR, ADI, conjugate gradients, finite element method, nonlinear problems, and applications. Prereqs., CSCI 5606. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science | Computer Science | Numerical Computation

CSCI-5646 (3) Numerical Linear Algebra

Offers direct and iterative solutions of linear systems. Also covers eigen value and eigenvector calculations, error analysis, and reduction by orthogonal transformation. A sound knowledge of basic linear algebra, experience with numerical computation, and programming experience is required. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science | Computer Science | Numerical Computation

CSCI-5654 (3) Linear Programming

Presents algorithms, simplex, and modifications. Examines theory---duality and complementary slackness. Involves network flow algorithms. Introduces integer programming. Prereq., linear algebra. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science | Computer Science | Theory of Computation

CSCI-5673 (3) Distributed Systems

Examines systems that span multiple autonomous computers. Topics include system structuring techniques, scalability, heterogeneity, fault tolerance, load sharing, distributed file and information systems, naming, directory services, resource discovery, resource and network management, security, privacy, ethics, and social issues. Recommended prereqs., CSCI 5573 or a course in computer networks. Same as ECEN 5673. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science | Computer Science | Operating Systems and Hardware

CSCI-5714 (3) Formal Languages

Explores context-free languages: pumping lemma and variants, closure properties, and decision properties. Involves parsing algorithms, including general and special languages, e.g., LR. Additional topics chosen by instructor. Prereq., CSCI 5444 or instructor consent. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science | Computer Science | Theory of Computation

CSCI-5722 (3) Computer Vision

Explores algorithms that can extract information about the world from images or sequences of images. Topics covered include: imaging models and camera calibration, early vision (filters, edges, texture, stereo, optical flow), mid-level vision (segmentation, tracking), vision-based control, and object recognition. Recommended prereq., probability, multivariate calculus, and linear algebra. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science | Computer Science | Artificial Intelligence

CSCI-5753 (3) Computer Performance Modeling

Same as CSCI 4753. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science | Computer Science | Operating Systems and Hardware

CSCI-5809 (3) Computer Animation

Same as CSCI 4809 and ATLS 4809/5809. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science | Computer Science | Graphics

CSCI-5817 (3) Database Systems

Provides an advanced treatment of basic database concepts. Prereq., CSCI 2270. Recommended prereq., CSCI 3287 and 3753. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science | Computer Science | Database Systems

CSCI-5828 (3) Foundations of Software Engineering

Explores techniques, languages, and tools for development and maintenance of software systems. Topics include specification languages, configuration modeling, testing techniques, process modeling, program annotations, and program proofs. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science | Computer Science | Software Engineering

CSCI-5832 (3) Natural Language Processing

Explores the field of natural language processing as it is concerned with the theoretical and practical issues that arise in getting computers to perform useful and interesting tasks with natural language. Covers the problems of understanding complex language phenomena and building practical programs. Prereq., graduate standing or instructor consent. Same as LING 5832. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science | Computer Science | Artificial Intelligence

CSCI-5839 (3) User-Centered Design

Restricted to graduate students or instructor consent. Same as CSCI 4839. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science | Computer Science | Graphics

CSCI-5900 (1-6) Master's Level Independent Study

Provides opportunities for independent study at the master's level. Prerequisites: Restricted to Computer Science (CSEN) graduate students only or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science | Computer Science | General Computer Science

CSCI-5919 (3) Human-Computer Interaction: Survey and Synthesis

Examines interdisciplinary field of human-computer interaction through a comprehensive content and historical survey. Considers new trajectories of inquiry and how the field merges with others. "Social computing" is emphasized as a central topic. Students across disciplines will find the course foundational for understanding human-centered technology matters, including computer scientists; social scientists; and business and media arts students. Recommended prereq., CSCI 4839 or 5839. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science | Computer Science | Graphics

CSCI-5929 (3) Human-Computer Interaction: Survey and Synthesis 2

Studies recent advances in human-computer interaction through critical analysis of influential papers and self-guided research. Examines new paradigms in input, output, and visualization for technology design and interaction. Considers innovative methods to assess various population design and technological needs. Studies in computer-related fields, social science, business, media arts, and communications benefit learning about human-centered computing research. Recommended prereq., CSCI 5919.

College of Engineering & Applied Science | Computer Science | Graphics

CSCI-6000 (1) Introduction to the Computer Science PhD Program

Instructs new Ph.D students in Computer Science how to obtain a Ph.D and how to become an effective member of the computer science research community. Makes students aware of formal requirements, educational objectives, and research themes. Provides evaluative criteria and guidelines for all objectives to be achieved. Restricted to new Ph.D students in Computer Science. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Computer Science | General Computer Science

CSCI-6268 (3) Foundations of Computer and Network Security

Studies methods to protect information, and the ability to process and move information, from theft, misuse, tampering, destruction, and unauthorized access. Introduces foundational topics of computer and network security, including security models, cryptography, and authentication protocols. Prereq., CSCI 5273. Same as TLEN 5550. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Computer Science | Graphics

College of Engineering & Applied Science Computer Science Software Engineering

CSCI-6302 (3) Speech Recognition and Synthesis

Introduction to automatic speech recognition and understanding, conversational agents, dialogue systems, and speech synthesis/text-to-speech. Topics include the noisy channel model, Hidden Markov Models, A* and Viterbi decoding, language modeling (N-grams, entropy), concatenative synthesis, text normalization, dialogue and conversation modeling. Prereqs., CSCI 5582 or 5832, or LING 5200, and graduate standing or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science Computer Science Artificial Intelligence

CSCI-6402 (3) Issues and Methods in Cognitive Science

Interdisciplinary introduction to cognitive science, examining ideas from cognitive psychology, philosophy, education, and linguistics via computational modeling and psychological experimentation. Includes philosophy of mind; learning; categorization; vision and mental imagery; consciousness; problem solving; decision making, and game-theory; language processing; connectionism. Prereqs., graduate standing, or at least one course at the 3000-level or higher in computer science, linguistics, philosophy, or psychology. No background in computer science will be presumed. Same as EDUC 6504, LING 6200, PHIL 6310, and PSYC 6200. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science Computer Science Artificial Intelligence

CSCI-6454 (3) Advanced Algorithms

Topics include matching and network flows, matroids, computational geometry, parallel computation (PRAM, hypercube, mesh). Also includes Vlsi, database theory, distributed computation, cryptography, robotics, scheduling, probabilistic algorithms, approximation algorithms, average case, and amortized analysis, time permitting. Prereq., CSCI 5454. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science Computer Science Theory of Computation

CSCI-6622 (3) Advanced Machine Learning

Covers advanced theoretical and practical topics in machine learning and latest developments in the field. Students conduct original research, either applied or theoretical, and present their results. Prereq., CSCI 5622 or instructor consent. Prerequisites: Restricted to Graduate Students only.

CSCI-6676 (3) Numerical Methods for Unconstrained Optimization

Looks at modern computational methods for solution of unconstrained optimization problems, nonlinear leastsquares, and systems of nonlinear equations. Techniques for building algorithms to solve problems with special structure. Prereq., CSCI 5606. Prerequisites: Restricted to Graduate Students only.

[College of Engineering & Applied Science](#) [Computer Science](#) [Numerical Computation](#)

CSCI-6686 (3) Numerical Methods for Constrained Optimization

Covers computational methods for constrained optimization. Topics include basic theory, methods for quadratic programming, active set strategies for linear constraints, and penalty and successive quadratic programming methods for nonlinearly constrained problems. Prereq., CSCI 5606. Prerequisites: Restricted to Graduate Students only.

[College of Engineering & Applied Science](#) [Computer Science](#) [Numerical Computation](#)

CSCI-6800 (1-6) Master of Engineering Project

Students seeking the master of engineering degree must complete a creative investigation project, including a written report, supervised by a member of the graduate faculty. Prereq., completion of 21 hours towards the ME degree. Prerequisites: Restricted to graduate student Computer Sciences students only.

[College of Engineering & Applied Science](#) [Computer Science](#) [General Computer Science](#)

CSCI-6810 (1) Seminar in Computational Biology

Provides an overview of current research topics in computational biology and health informatics, with a focus on research conducted on campus. Each week students will attend an on-campus seminar or a presentation by an on-campus research group. Prepares students to participate in a research project. Prereqs., CSCI 4312 or 4314 or 4317. CSCI 4810 and 6810 are the same course.

College of Engineering & Applied Science | Computer Science | General Computer Science

CSCI-6940 (1) Master's Degree Candidacy

For students who need to be registered for the purpose of taking the master's comprehensive exam and who are not otherwise registered. Credit does not count toward degree requirements. Graded on a pass/fail basis. Prerequisites: Restricted to Computer Science (CSEN) graduate students only or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science | Computer Science | General Computer Science

CSCI-6950 (1-6) Master's Thesis

Prerequisites: Restricted to Computer Science (CSEN) graduate students only or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science | Computer Science | General Computer Science

CSCI-7000 (1-4) Current Topics in Computer Science

Covers research topics of current interest in computer science that do not fall into a standard subarea. May be repeated up to 8 total credit hours. Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Computer Science | General Computer Science

CSCI-7111 (3) Topics in Parallel Processing

Content varies, but subjects include parallel machine architecture, parallel algorithms, languages for parallel computation, and applications. Takes subject matter from current research. Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Computer Science | Parallel Processing

CSCI-7123 (3) Topics in Operating Systems

Topics selected by instructor. Possible topics are system design, measurement and evaluation, simulation, mathematical modeling, and parallelism. Prereq., CSCI 5573. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Computer Science | Operating Systems and Hardware

CSCI-7135 (3) Topics in Programming Languages

Topics selected by instructor. Possible topics are syntax, semantics, metacompilers, compiler design, and translator writing systems. Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Computer Science | Programming Languages

CSCI-7143 (3) Topics in Computer Systems

Topics selected by instructor. Possible topics are online systems, multiprocessing, microprogramming, architecture, data communications, and computing networks. May be repeated up to 6 total credit hours. Instructor consent required. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Computer Science | Operating Systems and Hardware

CSCI-7154 (3) Topics in Theory of Computation

Selected topics of current interest in theory of computation. Prereq., CSCI 5454. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Computer Science | Theory of Computation

CSCI-7176 (3) Topics in Numerical Computation

Topics selected by instructor. Possible topics are numerical linear algebra, solution of differential equations, nonlinear algebra and optimization, data fitting, linear and nonlinear programming, and solution of large problems. Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Computer Science | Numerical Computation

CSCI-7212 (3) Topics in Symbolic Artificial Intelligence

Topics vary from year to year. Possible topics include search; knowledge representation and natural language understanding; deduction, planning, problem solving, and automatic programming; instruction and cognitive models; vision and speech; and learning, induction, and concept formation. Prereq., CSCI 5582 or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Computer Science | Artificial Intelligence

CSCI-7222 (3) Topics in Nonsymbolic Artificial Intelligence

Topics vary from year to year. Possible topics include human and machine vision, signal and speech processing, artificial life, mathematical foundations of connectionism, and computational learning theory. Prereq., CSCI 5622 or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Computer Science | Artificial Intelligence

CSCI-7412 (2) Cognitive Science Research Practicum

Independent, interdisciplinary research project in cognitive science for graduate students pursuing a joint Ph.D in an approved core discipline and cognitive science. Projects integrate at least two

areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students should obtain commitments from two mentors for their project. Prereqs., CSCI 6402 or EDUC 6504 or LING 6200 or PHIL 6310 or PSYC 6200. Recommended prereqs., CSCI7762 or EDUC 6505 or LING 7762 or PSYC 7765. Same as LING 7415, PSYC 7415, PHIL 7415, and EDUC 6506. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Computer Science | Artificial Intelligence

CSCI-7422 (2) Cognitive Science Research Practicum 2

Independent, interdisciplinary research project in cognitive science for advanced graduate students pursuing a joint Ph.D in an approved core discipline and cognitive science. Research projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students need commitments from two mentors for their project. Prereq., LING 7415 or PSYC 7415 or CSCI 7412 or EDUC 6506. Same as PSYC 7425, LING 7425, PHIL 7425, and EDUC 6516. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Computer Science | Artificial Intelligence

CSCI-7717 (3) Topics in Database Systems

Studies topics such as distributed databases, database interfaces, data models, database theory, and performance measurement in depth. Prereq., CSCI 5817 or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Computer Science | Database Systems

CSCI-7762 (1-2) Readings and Research in Cognitive Science

Interdisciplinary reading of innovative theories and methodologies of cognitive science. Participants share interdisciplinary perspectives through in-class and online discussion and analysis of controversial texts and of their own research in cognitive science. Required for joint Ph.D in cognitive science. Prereq., graduate standing. Same as EDUC 6505, LING 7762, and PSYC 7765. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Computer Science | Artificial Intelligence

CSCI-7772 (1-2) Topics in Cognitive Science

Reading of interdisciplinary innovative theories and methodologies of cognitive science. Students participate in the ICS Distinguished Speakers series that hosts internationally recognized cognitive scientists who share and discuss their current research. Session discussions include analysis of leading edge and controversial new approaches in cognitive science. Restricted to students enrolled in ICS Cognitive Science Academic Programs. Same as LING 7775, PSYC 7775, EDUC 7775, SLHS 7775, and PHIL 7810. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Computer Science | Artificial Intelligence

CSCI-7782 (3) Topics in Cognitive Science

Addresses a different set of one to three topics each year. For each topic, one or two faculty members of the Institute of Cognitive Science present background material and current research. Prereq., graduate standing or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Computer Science | Artificial Intelligence

CSCI-7818 (3) Topics in Software Engineering

Studies selected topics of current interest in software engineering. Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Computer Science | Software Engineering

CSCI-7900 (1-6) Doctoral Level Independent Study

For doctoral students.

College of Engineering & Applied Science | Computer Science | General Computer Science

CSCI-8990 (1-10) Doctoral Dissertation

Investigates some specialized field of computer science. Approved and supervised by faculty members. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Computer Science | General Computer Science

CSCI-4810 (1) Seminar in Computational Biology

Provides an overview of current research topics in computational biology and health informatics, with a focus on research conducted on campus. Each week students will attend an on-campus seminar or a presentation by an on-campus research group. Prepares students to participate in a research project. Prereqs., CSCI 4312 or 4314 or 4317. CSCI 4810 and 6810 are the same course.

MCEN-2023 (3) Statics and Structures

Covers statics of particles, equivalent force systems, rigid bodies, equilibrium of rigid bodies in two and three dimensions, analysis of truss and frame structures, uniaxially-loaded members, deformation and stress, distributed force systems, friction. Lectures and homework assignments involve computer work and hands-on laboratory work in the ITLL, documented by written reports. Prereq., APPM 1360. Prerequisites: Requires prerequisite course of APPM 1360 or MATH 2300. Restricted to students with 27-180 credits (Sophomores/Juniors/Seniors) MCEN or EVEN majors or Civil & Envrn Engr Concurrent Degree majors or Mechanical Engr Concurrent Degree majors.

[College of Engineering & Applied Science](#)
[Mechanical Engineering](#)
[Solids](#)

MCEN-2043 (3) Dynamics

Covers dynamic behavior of particle systems and rigid bodies; 2-D and 3-D kinematics and kinetics; impulse, momentum, potential, and kinetic energy; and work, collision, and vibration. Lectures and homework assignments involve computer work and hands-on laboratory work in the ITLL, documented by written reports. Prereq., MCEN 2023. Formerly MCEN 3043. Prerequisites: Requires prerequisite courses of MCEN 2023 (or CVEN 2121 or GEEN 3851). Restricted to students with 27-180 credits (Sophomores/Juniors/Seniors) MCEN or EVEN majors or concurrent degree majors in CVEN&EVEN or MCEN.

[College of Engineering & Applied Science](#)
[Mechanical Engineering](#)
[Solids](#)

MCEN-2063 (3) Mechanics of Solids

Covers shear force and bending moment, torsion, stresses in beams, deflection of beams, matrix analysis of frame structures, analysis of stress and strain in 2-D and 3-D (field equations, transformations), energy methods, stress concentrations, and columns. Lectures and homework assignments involve computer work and hands-on laboratory work in the ITLL, documented by written reports. Credit not granted for this course and CVEN 3161. Prerequisites: Requires prerequisite courses of MCEN 2023 or CVEN 2121 or GEEN 3851. Restricted to students with 27-180 credits (Sophomores/Juniors/Seniors) MCEN or EVEN majors or concurrent degree majors in CVEN&EVEN or MCEN.

[College of Engineering & Applied Science](#)
[Mechanical Engineering](#)
[Solids](#)

MCEN-4043 (3) System Dynamics

Covers linear dynamic systems and mathematical tools for understanding them, input-output relationships, modeling templates, complex variables, Laplace transform, time-harmonic forcing and response, Fourier series and discrete Fourier transform, and coupled systems. Prereqs., ECEN 3010 and MCEN 2043 or 3043. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical Engineering (MCEN) majors or Mechanical Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Mechanical Engineering | Solids

MCEN-4123 (3) Vibration Analysis

Highlights free and forced vibration of discrete and continuous systems. Examines Lagrange's equation, Fourier series, Laplace transforms, and matrix and computational methods. Applies knowledge to practical engineering problems. Prereq., ASEN 3112 or MCEN 3030. MCEN 4123 and ASEN 4123 are the same course. Prerequisites: Restricted to College of Engineering majors only.

College of Engineering & Applied Science | Mechanical Engineering | Solids

MCEN-4173 (3) Finite Element Analysis

Introductory course covering the theory behind and applications of the finite element method as a general and powerful tool to model a variety of phenomena in mechanical engineering. Applications include structural mechanics, mechanics of elastic continua, and heat conduction. Prereq., MCEN 2023 and 2063, or equivalents. Same as MCEN 5173. Prerequisites: Restricted to Mechanical (MCEN or MCMR) majors or students with a plan of Mechanical Engineering Concurrent Degree majors.

College of Engineering & Applied Science | Mechanical Engineering | Solids

MCEN-4183 (3) Mechanics of Composite Materials

Introduces various kinds of composite materials, composite fabrication techniques, the physical and mechanical behavior of composites, and analytical and experimental methodologies. Prereqs., MCEN 2024 and 2063, or equivalents. Same as MCEN 5183.

College of Engineering & Applied Science | Mechanical Engineering | Solids

MCEN-5023 (3) Solid Mechanics 1

Introduces stress, strain, and motion of a continuous system. Discusses material derivative; fundamental laws of mass, momentum, energy, and entropy; constitutive equations and applications to elastic and plastic materials. Prereq., MCEN 2063 or equivalent; coreq., MCEN 5020 or equivalent. Similar to ASEN 5012. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students. Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

College of Engineering & Applied Science | Mechanical Engineering | Solids

MCEN-5123 (3) Theory of Vibration

Same as MCEN 4123. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students. Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

College of Engineering & Applied Science Mechanical Engineering Solids

MCEN-5173 (3) Finite Element Analysis

Same as MCEN 4173. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students. Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

College of Engineering & Applied Science Mechanical Engineering Solids

MCEN-5183 (3) Mechanics of Composite Materials

Same as MCEN 4183. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students. Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

College of Engineering & Applied Science Mechanical Engineering Solids

MCEN-6163 (3) Elastic Waves

Effect of transient localized sources or dislocations in an elastic medium is studied. . Modeling and application of waves in rods, beams, and plates is emphasized. In addition, ultrasonic, nondestructive evaluation and seismological problems are discussed. Prereq., MCEN 5023 or equivalent. Recommended MCEN 5040 or equivalent. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students. Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

College of Engineering & Applied Science Mechanical Engineering Solids

MCEN-7123 (3) Dynamics of Continuous Media

Reflects upon derivation of wave equations from the basic equations of dynamic elasticity. Topics include propagation of elastic waves in infinite and partially bounded media, Rayleigh waves and Love waves, Pochhammer solution for a rod, and waves in plates and in layered and anisotropic media. Prereq., MCEN 5020, 5040, and 5043, or equivalents. Same as PHYS 6680 and GEOL 6680. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students. Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

MCEN-2024 (3) Materials Science

Structure, properties, and processing of metallic, polymeric, ceramic, and composite materials. Perfect and imperfect solids; phase equilibria; transformation kinetics; mechanical behavior; material degradation. Approach incorporates both materials science and materials engineering components. Prereqs., CHEN 1211, CHEM 1221 and PHYS 1110. Prerequisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) Mechanical Engineering (MCEN) or Environmental Engineering (EVEN) majors or Civil & Environmental Engineering Concurrent Degree or Mechanical Engineering Concurrent Degree majors

[College of Engineering & Applied Science](#) [Mechanical Engineering](#) [Materials](#)

MCEN-4124 (3) Mechanical Behavior of Materials

Addresses the relationship between material structure and the fundamental processes of deformation, yield, and fracture. Examines elements of elasticity theory, introduction to plasticity, and formulation of failure criteria. Studies basic deformation processes in terms of dislocation mechanics and macroscopic mechanical behavior. Takes into consideration the influence of compositional and processing strengthening mechanisms on mechanical properties. Prereqs., MCEN 2024 and 2063.

[College of Engineering & Applied Science](#) [Mechanical Engineering](#) [Materials](#)

MCEN-4133 (3) Biomechanics of Solids

Considers the mechanical behavior of biological materials and emphasizes the relationship between structural characteristics and macroscopic behavior. Focuses first on the mechanical behavior of microscopic protein and polysaccharide elements and then on larger scale soft and hard tissue structures. Prereqs., MCEN 2024, 2063, and 3021 or equivalent. Prerequisites: Restricted to College of Engineering and Applied Science graduate students or senior BS/MS Mechanical Engineering or Concurrent Degree students.

[College of Engineering & Applied Science](#) [Mechanical Engineering](#) [Materials](#)

MCEN-4174 (3) Failure of Engineering Materials

Examines the failure of materials used in engineering design through a series of real world case studies. Example failure modes considered include overload, fatigue, creep, and corrosion. Example case studies include failure of aircraft, mountaineering ropes, weight training frames, and toilets. Prereqs., MCEN 2024 and 2063. Same as MCEN 5174.

College of Engineering & Applied Science | Mechanical Engineering | Materials

MCEN-5024 (3) Materials Chemistry and Structures

Provides graduate level students with a comprehensive overview of the chemistry and structure of material systems, with a focus on chemical bonding., the resulting material structures and their properties. This course is intended to become one of the four core courses offered in the new Materials Science curriculum. Course topics include: bonding in solids, crystalline and amorphous states, basic group theory, diffraction, metals and alloys, ceramics, and an intro to mat. characterization. Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

College of Engineering & Applied Science | Mechanical Engineering | Materials

MCEN-5034 (3) Thermodynamics of Materials

Provides a unified presentation of fundamental concepts applicable to the thermodynamics of engineering materials. Develops quantitative tools for understanding the physical principles that govern phase equilibrium and transformation. Generates binary and ternary phase diagrams and determine the resulting materials structures and corresponding physical and mechanical properties. Recommended prereqs., MCEN 2024 and 3012.

College of Engineering & Applied Science | Mechanical Engineering | Materials

MCEN-5044 (3) Mechanical Behavior of Materials

This introductory-level graduate course incorporates relevant aspects of materials science, solid mechanics, thermodynamics and mathematics, and applies them to achieve a fundamental understanding of the mechanical behavior of crystalline and non-crystalline engineering materials. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students. Prereq., MCEN 2024 and 2063 or equivalent. Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

College of Engineering & Applied Science | Mechanical Engineering | Materials

MCEN-5045 (3) Design for Manufacturability

Topics include general design guidelines for manufacturability; aspects of manufacturing processes that affect design decisions; design rules to maximize manufacturability; statistical considerations; value engineering and design for assembly (manual, robotic, and automatic). Presents case studies of successful products exhibiting Dfm. Prereq., MCEN 4026 or equivalent. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students. Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

College of Engineering & Applied Science | Mechanical Engineering | Materials

MCEN-5164 (3) Fracture

Focuses on basic mechanisms controlling fracture in brittle materials, reduction of capacity for plastic deformation in engineering materials used at high-strength levels, and selection of materials in terms of toughness as well as strength. Prereq., MCEN 4124 and 5044, or equivalent.

College of Engineering & Applied Science | Mechanical Engineering | Materials

MCEN-5174 (3) Failure of Engineering Materials

Same as MCEN 4174. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students. Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

College of Engineering & Applied Science | Mechanical Engineering | Materials

MCEN-6184 (3) Structure and Properties of Polymers

Emphasizes the relationship between molecular structure and macroscopic properties. Structural aspects include chain conformation, configuration, and the crystalline and amorphous states.

Discusses physical and mechanical properties with a focus on solution and phase behavior, transitions of bulk polymers, and rubber and viscoelastic behavior. Prereq., graduate standing and MCEN 5024 and 5044, or equivalent. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students.

Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

MCEN-3012 (3) Thermodynamics

Explores fundamental concepts and basic theory, including first and second laws of thermodynamics, properties, states, thermodynamic functions and cycles. Prereq., APPM 2350. Same as GEEN 3852. Prerequisites: Requires prerequisite course of APPM 2350 or MATH 2400. Restricted to students with 57-180 credits (Junior/Senior) MCEN or EVEN majors or concurrent degree majors in CVEN/EVEN or MCEN.

[College of Engineering & Applied Science](#)
[Mechanical Engineering](#)
[Thermal](#)

MCEN-3022 (3) Heat Transfer

Studies fundamentals of heat transfer by conduction, convection, and radiation. Provides applications to heat exchangers, solar panels, and boiling and mass transfer. Also covers numerical methods for solving heat transfer problems and design of engineering equipment involving heat transfer processes. Prerequisites: Requires prereq courses of MCEN 3012 (or GEEN 3852, or CHEN 3320, or ASEN 2002, or AREN 2110) & MCEN 3021 (or GEEN 3853, or CHEN 3200, or CVEN 3313) & MCEN 3030. Restricted to students w/ 57-180 credits (Jr or Sr) MCEN or EVEN majors.

[College of Engineering & Applied Science](#)
[Mechanical Engineering](#)
[Thermal](#)

MCEN-3032 (3) Thermodynamics 2

Offers advanced topics and applications, including thermodynamics of state, entropy and probability, thermodynamic cycles, and reacting and nonreacting mixtures. Provides application to engines and power generation by conventional and alternative energy technologies. Most assignments are design oriented. Prereqs., MCEN 3012 and 3021. Prerequisites: Requires prerequisite course of MCEN 3021 (or CHEN 3200 or CVEN 3313 or GEEN 3853) and MCEN 3012 (or AREN 2110 or GEEN 3852). Restricted to students with 57-180 credits (Junior/Senior) Mechanical Engineering or Environmental Engineering majors only.

[College of Engineering & Applied Science](#)
[Mechanical Engineering](#)
[Thermal](#)

MCEN-4152 (3) Introduction to Combustion

Description of the mechanisms by which fuel and oxidizers are converted into combustion products. Application to practical combustion devices such as Otto, Diesel, gas turbine, and power plant combustion systems. Consideration of combustion-generated air pollution, fire safety, and combustion efficiency. Prereq., MCEN 3012. Recommended prereqs., MCEN 3021 and 3022. Same as MCEN 5152.

College of Engineering & Applied Science | Mechanical Engineering | Thermal

MCEN-4162 (3) Energy Conversion

Examines common energy-conversion methods and devices. Topics include power-cycle thermodynamics, turbocompressor and expander processes, combustion systems, and applications and limitations of direct energy-conversion systems. Prereq., MCEN 3012.

College of Engineering & Applied Science | Mechanical Engineering | Thermal

MCEN-5022 (3) Classical Thermodynamics

First and second laws of thermodynamics. Entropy and availability. Cycle analysis. Thermodynamic properties of pure substances and mixtures. Property relations. Chemical reactions and chemical availability. Energy systems analysis. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students. Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

College of Engineering & Applied Science | Mechanical Engineering | Thermal

MCEN-5042 (3) Heat Transfer

Studies development of equations governing transport of heat by conduction, convection, and radiation, and their solution. Includes analytical and numerical solution of initial and boundary value problems representative of heat conduction in solids. Describes heat transfer in free and forced convection, including laminar and turbulent flow. Also involves radiation properties of solids, liquids, and gases and transport of heat by radiation. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students. Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

College of Engineering & Applied Science | Mechanical Engineering | Thermal

MCEN-5122 (3) Statistical Thermodynamics

Axiomatic formulation of macroscopic thermodynamics. Quantum mechanical description of atomic and molecular structure. Statistical mechanics description of thermodynamic properties of gases, liquids and solids. Elementary kinetic theory of gases and evaluation of transport properties. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students. Prereq., undergraduate thermodynamics. Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

College of Engineering & Applied Science | Mechanical Engineering | Thermal

MCEN-5142 (3) Computational Fluid Dynamics, Heat Transfer, and Combustion

Finite difference, finite volume, finite element, and spectral methods, consistency, stability and convergence of numerical schemes, governing equations for reacting flows, convection, diffusion, convection-diffusion problems, matrix solution methods-cyclic reduction, Fourier, Jacobin, Gauss Siedel, Sor, Adi, Chebschev acceleration, Lax-Wendroff scheme, Mccormack scheme, transonic small disturbance equation solution, staggered grids, simple scheme, discrete Fourier transform. Students work on two substantial projects using commercial software. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students. Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

College of Engineering & Applied Science | Mechanical Engineering | Thermal

MCEN-5152 (3) Introduction to Combustion

Same as MCEN 4152. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students. Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

College of Engineering & Applied Science | Mechanical Engineering | Thermal

MCEN-7122 (3) Combustion Phenomena

Applies multicomponent fluid equations of motion and chemical thermodynamics to a variety of combustion problems. Covers droplet combustion, premixed and diffusion flames, boundary layer combustion, detonation wave theory, topics related to internal combustion engines, and liquid and solid rockets. Prereq., MCEN 3012 and 3021. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students. Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

MCEN-2023 (3) Statics and Structures

Covers statics of particles, equivalent force systems, rigid bodies, equilibrium of rigid bodies in two and three dimensions, analysis of truss and frame structures, uniaxially-loaded members, deformation and stress, distributed force systems, friction. Lectures and homework assignments involve computer work and hands-on laboratory work in the ITLL, documented by written reports. Prereq., APPM 1360. Prerequisites: Requires prerequisite course of APPM 1360 or MATH 2300. Restricted to students with 27-180 credits (Sophomores/Juniors/Seniors) MCEN or EVEN majors or Civil & Envrn Engr Concurrent Degree majors or Mechanical Engr Concurrent Degree majors.

MCEN-3017 (3) Circuits and Electronics

Introductory course covers analysis of electric circuits by use of Ohm's law, network reduction, node and loop analysis, Thevenin's and Norton's theorems, DC and AC signals, transient response of simple circuits, transfer functions, basic diode and transistor circuits, and operational amplifiers. Prereqs., APPM 2360 and PHYS 1140. Same as ECEN 3010. Prerequisites: Restricted to students in the MSC/CU-Boulder Mechanical Engineering Partnership Program only.

[College of Engineering & Applied Science](#)
[Mechanical Engineering](#)
[Miscellaneous](#)

MCEN-3037 (2) Data Analysis

Learn to plan and carry out experiments. Coverage includes measurement fundamentals, basic statistical concepts, and uncertainty analysis. Use of statistics for the purpose of analyzing data, including regression, correlation, hypothesis testing, classification, time series analysis, and design of experiments. Prereq., APPM 2360. Prerequisites: Restricted to graduate students in College of Engineering and Applied Science or to students with 57-180 credits (Junior or Senior) or Mechanical Engineering Concurrent Degree students.

[College of Engineering & Applied Science](#)
[Mechanical Engineering](#)
[Miscellaneous](#)

MCEN-4037 (2) Measurements Lab

Carry out several experiments designed to teach methods of experimentation and data analysis. Experiments taken from solid mechanics, fluid mechanics, thermal science, and materials science. Emphasizes planning an experiment, applying sound procedures, keeping proper records, and communicating results orally and in written reports. Gives students the opportunity to participate in projects that extend over two or more weeks. Prerequisites: Requires prerequisites of ECEN3010 & MCEN2063 (or CVEN3161 or ASEN3112) & MCEN3037 (or APPM4520 or 4570 or CVEN3227 or CHEN3010) & WRTG3030 (or WTRG3035 or HUEN3100 or PHYS3050). Restricted to MCEN majors w/57-180 credits (juniors/seniors).

[College of Engineering & Applied Science](#)
[Mechanical Engineering](#)
[Miscellaneous](#)

MCEN-4047 (2) Measurements 2

Four hours of lab per week. Student teams perform laboratory projects that extend over several weeks. Takes experiments from solid mechanics, acoustics, electronics, and other ME-related disciplines. Emphasizes planning an experiment, applying sound experimental procedures, using statistics, keeping proper records, and communicating results orally, on posters, and in written documents. Prerequisites: Requires prerequisite courses of MCEN 2024 and MCEN 4037. Restricted to College of Engineering and Applied Science graduate students or senior BS/MS Mechanical Engineering or Concurrent Degree students.

College of Engineering & Applied Science | Mechanical Engineering | Miscellaneous

MCEN-4117 (3) Anatomy and Physiology for Engineers

Understanding human physiological function from an engineering, specifically mechanical engineering, viewpoint. Introduction to human anatomy and physiology with a focus on learning fundamental concepts and applying engineering (mass transfer, fluid dynamics, mechanics, modeling) analysis. Same as MCEN 5117. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Engineering majors only.

College of Engineering & Applied Science | Mechanical Engineering | Miscellaneous

MCEN-4208 (3) Special Topics in Mechanical Engineering

Subject matter to be selected from topics of current interest. Credit to be arranged. Numbered MCEN 4208-4298. Prereq., instructor consent.

College of Engineering & Applied Science | Mechanical Engineering | Miscellaneous

MCEN-4228 (1-4) Special Topics

May be repeated up to 15 credit hours. Prereqs., MCEN 2024 and 2063. Same as MCEN 5228. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical Engineering (MCEN) or Environmental Engineering (EVEN) majors only.

College of Engineering & Applied Science | Mechanical Engineering | Miscellaneous

MCEN-4848 (1-6) Independent Study

Subjects arranged in consultation with undergraduate advisor to fit the needs of the particular student. Numbered MCEN 4848-4898. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical Engineering (MCEN or MCMR) majors or students with a plan of Mechanical Engineering Concurrent Degree.

College of Engineering & Applied Science | Mechanical Engineering | Miscellaneous

MCEN-5027 (1) Graduate Seminar

Offers weekly presentations by visiting speakers, faculty, and students. May be repeated up to 6 total credit hours. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students. Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

College of Engineering & Applied Science | Mechanical Engineering | Miscellaneous

College of Engineering & Applied Science Mechanical Engineering Miscellaneous

MCEN-5117 (3) Anatomy and Physiology for Engineers

Same as MCEN 4117. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students. Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

College of Engineering & Applied Science Mechanical Engineering Miscellaneous

MCEN-5208 (1-4) Special Topics

Credit hours and subject matter to be arranged. Numbered MCEN 5208-5298. Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

College of Engineering & Applied Science Mechanical Engineering Miscellaneous

MCEN-5228 (1-4) Special Topics

May repeated up to 15 total credit hours. Same as MCEN 4228. Prerequisites: Restricted to graduate students in College of Engineering and Applied Science or to students with 57-180 credits (Junior or Senior) or Mechanical Engineering Concurrent Degree students.

College of Engineering & Applied Science Mechanical Engineering Miscellaneous

MCEN-5268 (3) Special Topics

Same as MCEN 4278.

College of Engineering & Applied Science Mechanical Engineering Miscellaneous

MCEN-5848 (1-6) Independent Study

Available only through approval of graduate advisor. Subjects arranged to fit the needs of the particular student. Numbered MCEN 5848--5898. Prereq., graduate standing.

Subject**Number**

MCEN-3021 (3) Fluid Mechanics

Examines fundamentals of fluid flow with application to engineering problems. Explores fluid statics and kinematics; conservation equations for mass, momentum, and energy; Bernoulli and Euler equations; potential flow; laminar and turbulent viscous boundary layers; laminar and turbulent pipe flow; and compressible fluid flow. Prereqs., APPM 2360 and MCEN 2023. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) Mechanical Engineering (MCEN or MCMR) or Environmental Engineering (EVEN) majors or Civil/Environmental Engineering or Mechanical Engineering Concurrent Degree majors only.

[College of Engineering & Applied Science](#)
[Mechanical Engineering](#)
[Fluids](#)

MCEN-4131 (3) Air Pollution Control Engineering

Introduces air quality regulations, meteorology, and modeling; methods for controlling major classes of air pollutants, including particulate matter and oxides of sulfur and nitrogen; and control technology for industrial sources and motor vehicles. Requires interdisciplinary design projects. Prereq., MCEN 3021 or equivalent. Same as MCEN 5131. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical Engineering (MCEN) or Environmental Engineering (EVEN) majors only.

[College of Engineering & Applied Science](#)
[Mechanical Engineering](#)
[Fluids](#)

MCEN-4141 (3) Indoor Air Pollution

Air pollutants cause material damage and adversely affect human health. People spend over 80 per cent of their time indoors; often, air pollutant levels are higher indoors than outdoors. In this course we study air pollution in indoor environments and design appropriate control technologies. Prereqs., MCEN3021 and 3022. Same as MCEN 5141. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical Engineering (MCEN) or Environmental Engineering (EVEN) majors only.

[College of Engineering & Applied Science](#)
[Mechanical Engineering](#)
[Fluids](#)

MCEN-4151 (3) Flow Visualization

Explores techniques for the visualization of the physics of fluid flows including seeding with dyes, particles and bubbles, and shadowgraphy and schlieren. Reviews optics and fluid physics, especially atmospheric clouds. Assignments are student-driven, to individuals and mixed teams of grad, undergrad, engineering majors and photography/video majors. Please see <http://flowvis.colorado.edu>. Prereq., MCEN 3021 or equivalent, or significant imaging experience (photography/video). FILM 4200 and ARTF 5200 are the same course. Same as MCEN 4151/5151.

College of Engineering & Applied Science | Mechanical Engineering | Fluids

MCEN-5021 (3) Introduction to Fluid Dynamics

Focuses on physical properties of gases and liquids, and kinematics of flow fields. Analyzes stress; viscous, heat-conducting Newtonian fluids; and capillary effects and surface-tension-driven flow. Other topics include vorticity and circulation, ideal fluid flow theory in two and three dimensions, Schwartz-Christoffel transformations, free streamline theory, and internal and free-surface waves. Coreq., MCEN 5020 or equivalent. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students. Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

College of Engineering & Applied Science | Mechanical Engineering | Fluids

MCEN-5041 (3) Viscous Flow

Highlights exact solution of Navier-Stokes equations and fundamentals of rotating fluids. Considers Low Reynolds number flow; similarity solutions; viscous boundary layers, jets, and wakes; and unsteady viscous flow. Prereq., MCEN 5021 or equivalent. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students. Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

College of Engineering & Applied Science | Mechanical Engineering | Fluids

MCEN-5121 (3) Compressible Flow

Applies energy, continuity, and momentum principles to compressible flow. Topics include normal and oblique shocks; Prandtl-Meyer expansion; methods of characteristics; and one-, two-, and three-dimensional subsonic, supersonic, and hypersonic flows. Prereq., MCEN 5021 or equivalent. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students. Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

College of Engineering & Applied Science | Mechanical Engineering | Fluids

MCEN-5131 (3) Air Pollution Control Engineering

Same as MCEN 4131. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students. Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

College of Engineering & Applied Science | Mechanical Engineering | Fluids

MCEN-5141 (3) Indoor Air Pollution

Same as MCEN 4141. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students. Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

College of Engineering & Applied Science | Mechanical Engineering | Fluids

MCEN-5151 (3) Flow Visualization

Explores techniques for the visualization of the physics of fluid flows including seeding with dyes, particles and bubbles, and shadowgraphy and schlieren. Reviews optics and fluid physics, especially atmospheric clouds. Assignments are student-driven, to individuals and mixed teams of grad, undergrad, engineering majors and photography/video majors. Please see <http://flowvis.colorado.edu>. Prereq., MCEN 3021 or equivalent, or significant imaging experience (photography/video). FILM 4200 and ARTF 5200 are the same course. Same as MCEN 4151/5151.

College of Engineering & Applied Science | Mechanical Engineering | Fluids

MCEN-5161 (3) Aerosols

Introduces atmospheric aerosols and properties of their distributions, followed by fundamental descriptions of single particle dynamics, thermodynamics, nucleation, coagulation, mass transfer and populations dynamics. During the second half of the course, the focus will shift to sources and sinks of atmospheric aerosols, their impacts on atmospheric chemistry and radiation, and the impacts of these processes on air quality and climate. Prereq., graduate standing or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Mechanical Engineering | Fluids

MCEN-7221 (3) Turbulence

Hydrodynamic stability theory, equations for turbulent flows, free shear flows and boundary layers, homogeneous and isotropic turbulence, overview of turbulent combustion, reaction kinetics, energy equation, Favre averaging, Pdfs, premixed and nonpremixed flame modeling, and recent developments. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students. Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

MCEN-3017 (3) Circuits and Electronics

Introductory course covers analysis of electric circuits by use of Ohm's law, network reduction, node and loop analysis, Thevenin's and Norton's theorems, DC and AC signals, transient response of simple circuits, transfer functions, basic diode and transistor circuits, and operational amplifiers. Prereqs., APPM 2360 and PHYS 1140. Same as ECEN 3010. Prerequisites: Restricted to students in the MSC/CU-Boulder Mechanical Engineering Partnership Program only.

[College of Engineering & Applied Science](#) [Mechanical Engineering](#) [Miscellaneous](#)

University of Colorado Boulder

[Privacy](#) • [Legal & Trademarks](#)

MCEN-3021 (3) Fluid Mechanics

Examines fundamentals of fluid flow with application to engineering problems. Explores fluid statics and kinematics; conservation equations for mass, momentum, and energy; Bernoulli and Euler equations; potential flow; laminar and turbulent viscous boundary layers; laminar and turbulent pipe flow; and compressible fluid flow. Prereqs., APPM 2360 and MCEN 2023. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) Mechanical Engineering (MCEN or MCMR) or Environmental Engineering (EVEN) majors or Civil/Environmental Engineering or Mechanical Engineering Concurrent Degree majors only.

MCEN-3022 (3) Heat Transfer

Studies fundamentals of heat transfer by conduction, convection, and radiation. Provides applications to heat exchangers, solar panels, and boiling and mass transfer. Also covers numerical methods for solving heat transfer problems and design of engineering equipment involving heat transfer processes. Prerequisites: Requires prereq courses of MCEN 3012 (or GEEN 3852, or CHEN 3320, or ASEN 2002, or AREN 2110) & MCEN 3021 (or GEEN 3853, or CHEN 3200, or CVEN 3313) & MCEN 3030. Restricted to students w/ 57-180 credits (Jr or Sr) MCEN or EVEN majors.

[College of Engineering & Applied Science](#) | [Mechanical Engineering](#) | [Thermal](#)

MCEN-3025 (3) Component Design

Application of mechanics and materials science to the detailed design of various machine elements including shafts bearings, gears, brakes, springs, and fasteners. Emphasizes application and open-ended design problems. Prereq., MCEN 2063. Prerequisites: Requires pre-requisite course of MCEN 2063 (or CVEN 3161, or ASEN 3112).

[College of Engineering & Applied Science](#) [Mechanical Engineering](#) [Design](#)

University of Colorado Boulder

MCEN-3030 (3) Computational Methods

Studies fundamental numerical techniques for the solution of commonly encountered engineering problems. Includes methods for linear and nonlinear algebraic equations, data analysis, numerical differentiation and integration, ordinary and partial differential equations. Prereqs., GEEN 1300 and APPM 2360, or equivalent, including a working knowledge of Matlab. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering, Mechanical (MCEN or MCMR) or Environmental Engineering (EVEN) or Mechanical Engineering Concurrent Degree majors only.

[College of Engineering & Applied Science](#) [Mechanical Engineering](#) [Math](#)

MCEN-3032 (3) Thermodynamics 2

Offers advanced topics and applications, including thermodynamics of state, entropy and probability, thermodynamic cycles, and reacting and nonreacting mixtures. Provides application to engines and power generation by conventional and alternative energy technologies. Most assignments are design oriented. Prereqs., MCEN 3012 and 3021. Prerequisites: Requires prerequisite course of MCEN 3021 (or CHEN 3200 or CVEN 3313 or GEEN 3853) and MCEN 3012 (or AREN 2110 or GEEN 3852). Restricted to students with 57-180 credits (Junior/Senior) Mechanical Engineering or Environmental Engineering majors only.

MCEN-4026 (3) Manufacturing Processes and Systems

Engineering-science design course that examines manufacturing processes for metals, polymers, and composites as well as manufacturing systems that integrate these processes. Lecture topics include: forming, machining, joining, assembling, process integration, computer-aided manufacturing, and manufacturing system engineering. Prereq., MCEN 2024. Prerequisites: Requires prerequisite course of MCEN 2024. Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical Engineering (MCEN) majors or Mechanical Engineering Concurrent Degree majors only.

[College of Engineering & Applied Science](#)
[Mechanical Engineering](#)
[Manufacturing and Systems](#)

MCEN-5066 (3) Principles and Practices of World Class Manufacturing

Introduces manufacturing principles and practices that are essential to competing successfully in a global environment. Topics include manufacturing as a competitive tool, total quality management, process control, benchmarking, total productive maintenance, just in time, design of experiments, flexible manufacturing, and case studies.

[College of Engineering & Applied Science](#)
[Mechanical Engineering](#)
[Manufacturing and Systems](#)

MCEN-5126 (3) Applied Statistics for the Manufacturing and Process Industries

Discusses the concepts and techniques of applied statistics essential to quality control and product/process improvement. Includes computer control (SQC/SPC), sampling methods and time series analysis, and methods of experimental design. Prereq., MCEN 4120. Same as CHEN 5127 and CVEN 5127. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students. Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

[College of Engineering & Applied Science](#)
[Mechanical Engineering](#)
[Manufacturing and Systems](#)

MCEN-5146 (3) Applied Statistics in Research and Development

Same as CHEN 5128. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students. Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

College of Engineering & Applied Science | Mechanical Engineering | Manufacturing and Systems

MCEN-5166 (3) Electronics Packaging and Manufacturing

To provide basic knowledge of the technologies and processes required for the packaging and manufacturing of electronic products. Topics covered include wafer fabrication, different levels of packaging, thermal management, life cycle engineering, printed wiring board assembly processes, and process control. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students. Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

College of Engineering & Applied Science | Mechanical Engineering | Manufacturing and Systems

MCEN-5636 (3) Micro-Electro-Mechanical Systems 1

Addresses issues of micro-electro-mechanical systems (MEMS) modeling, design, and fabrication. Emphasizes the design and fabrication of sensors and actuators due to significance of these devices in optics, medical instruments, navigation components, communications, and robotics. Prereq., instructor consent. Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

College of Engineering & Applied Science | Mechanical Engineering | Manufacturing and Systems

University of Colorado Boulder

© Regents of the University of Colorado

Privacy • Legal & Trademarks

MCEN-3037 (2) Data Analysis

Learn to plan and carry out experiments. Coverage includes measurement fundamentals, basic statistical concepts, and uncertainty analysis. Use of statistics for the purpose of analyzing data, including regression, correlation, hypothesis testing, classification, time series analysis, and design of experiments. Prereq., APPM 2360. Prerequisites: Restricted to graduate students in College of Engineering and Applied Science or to students with 57-180 credits (Junior or Senior) or Mechanical Engineering Concurrent Degree students.

MCEN-4037 (2) Measurements Lab

Carry out several experiments designed to teach methods of experimentation and data analysis. Experiments taken from solid mechanics, fluid mechanics, thermal science, and materials science. Emphasizes planning an experiment, applying sound procedures, keeping proper records, and communicating results orally and in written reports. Gives students the opportunity to participate in projects that extend over two or more weeks. Prerequisites: Requires prerequisites of ECEN3010 & MCEN2063 (or CVEN3161 or ASEN3112) & MCEN3037 (or APPM4520 or 4570 or CVEN3227 or CHEN3010) & WRTG3030 (or WTRG3035 or HUEN3100 or PHYS3050). Restricted to MCEN majors w/57-180 credits (juniors/seniors).

[College of Engineering & Applied Science](#) [Mechanical Engineering](#) [Miscellaneous](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

MCEN-4043 (3) System Dynamics

Covers linear dynamic systems and mathematical tools for understanding them, input-output relationships, modeling templates, complex variables, Laplace transform, time-harmonic forcing and response, Fourier series and discrete Fourier transform, and coupled systems. Prereqs., ECEN 3010 and MCEN 2043 or 3043. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical Engineering (MCEN) majors or Mechanical Engineering Concurrent Degree majors only.

[College of Engineering & Applied Science](#) [Mechanical Engineering](#) [Solids](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

MCEN-4045 (3) Mechanical Engineering Design Project 1

First part of a two-course capstone design experience in mechanical engineering. Covers problem definition, determining design requirements, alternative design concepts, engineering analysis, proof-of-concept prototype, and CAD drawings. Students make several oral design reviews, a final design presentation, and prepare a written report. Coreq., MCEN 4026. Prerequisites: Requires prerequisite courses of MCEN 3025 & 3032 & 3022 (or CHEN 3210) and GEEN 1400 (or ECEN 1400 or GEEN 3400). Restricted to students with 87-180 credits (Senior) Mechanical Engineering majors or Mechanical Engineering Concurrent Degree majors only.

MCEN-4047 (2) Measurements 2

Four hours of lab per week. Student teams perform laboratory projects that extend over several weeks. Takes experiments from solid mechanics, acoustics, electronics, and other ME-related disciplines. Emphasizes planning an experiment, applying sound experimental procedures, using statistics, keeping proper records, and communicating results orally, on posters, and in written documents. Prerequisites: Requires prerequisite courses of MCEN 2024 and MCEN 4037. Restricted to College of Engineering and Applied Science graduate students or senior BS/MS Mechanical Engineering or Concurrent Degree students.

[College of Engineering & Applied Science](#) [Mechanical Engineering](#) [Miscellaneous](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

MCEN-4085 (4) Mechanical Engineering Design Project 2

Second part of a two-course capstone design experience in mechanical engineering. Includes refinement of prototype, design optimization, fabrication, testing, and evaluation. Students orally present the final design and prepare a written report and operation manual for the product. Prereq., MCEN 4026 and 4045. Prerequisites: Requires prerequisite courses of MCEN 4026 and MCEN 4045. Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical Engineering (MCEN) majors or Mechanical Engineering Concurrent Degree (C-MCEN) majors only.

[Privacy](#) • [Legal & Trademarks](#)

MCEN-4115 (3) Mechantronics and Robotics I

Focuses on design and construction of microprocessor-controlled electro-mechanical systems. Lectures review critical circuit topics, introduce microprocessor architecture and programming, discuss sensor and actuator component selection, robotic systems, and design strategies for complex, multi-system devices. Lab work reinforces lectures and allows hands-on experience with robotic design. Students must design and build an autonomous robotic device. Project expenses may be incurred (\$50 maximum). Prereqs., ECEN 3010 or equivalent and GEEN 1300 or equivalent. Same as MCEN 5115. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical Engineering (MCEN) majors or Mechanical Engineering Concurrent Degree (C-MCEN) majors only.

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

MCEN-4117 (3) Anatomy and Physiology for Engineers

Understanding human physiological function from an engineering, specifically mechanical engineering, viewpoint. Introduction to human anatomy and physiology with a focus on learning fundamental concepts and applying engineering (mass transfer, fluid dynamics, mechanics, modeling) analysis. Same as MCEN 5117. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Engineering majors only.

[College of Engineering & Applied Science](#) [Mechanical Engineering](#) [Miscellaneous](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

MCEN-4120 (3) Engineering Statistics

Focuses on probability and statistics, emphasizing engineering applications. Studies frequency distributions; statistical hypotheses and estimation; nonparametric, linear regression, and correlation; nonlinear and multiple regression; analysis of variance; and quality control. Prereq., APPM 2360.

MCEN-4123 (3) Vibration Analysis

Highlights free and forced vibration of discrete and continuous systems. Examines Lagrange's equation, Fourier series, Laplace transforms, and matrix and computational methods. Applies knowledge to practical engineering problems. Prereq., ASEN 3112 or MCEN 3030. MCEN 4123 and ASEN 4123 are the same course. Prerequisites: Restricted to College of Engineering majors only.

[College of Engineering & Applied Science](#)
[Mechanical Engineering](#)
[Solids](#)

MCEN-4124 (3) Mechanical Behavior of Materials

Addresses the relationship between material structure and the fundamental processes of deformation, yield, and fracture. Examines elements of elasticity theory, introduction to plasticity, and formulation of failure criteria. Studies basic deformation processes in terms of dislocation mechanics and macroscopic mechanical behavior. Takes into consideration the influence of compositional and processing strengthening mechanisms on mechanical properties. Prereqs., MCEN 2024 and 2063.

[College of Engineering & Applied Science](#)
[Mechanical Engineering](#)
[Materials](#)

MCEN-4128 (3) Special Topics

Prereq., MCEN 4025 or equivalent.

[College of Engineering & Applied Science](#)
[Mechanical Engineering](#)
[Special Topics](#)

MCEN-4131 (3) Air Pollution Control Engineering

Introduces air quality regulations, meteorology, and modeling; methods for controlling major classes of air pollutants, including particulate matter and oxides of sulfur and nitrogen; and control technology for industrial sources and motor vehicles. Requires interdisciplinary design projects. Prereq., MCEN 3021 or equivalent. Same as MCEN 5131. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical Engineering (MCEN) or Environmental Engineering (EVEN) majors only.

College of Engineering & Applied Science | Mechanical Engineering | Fluids

MCEN-4133 (3) Biomechanics of Solids

Considers the mechanical behavior of biological materials and emphasizes the relationship between structural characteristics and macroscopic behavior. Focuses first on the mechanical behavior of microscopic protein and polysaccharide elements and then on larger scale soft and hard tissue structures. Prereqs., MCEN 2024, 2063, and 3021 or equivalent. Prerequisites: Restricted to College of Engineering and Applied Science graduate students or senior BS/MS Mechanical Engineering or Concurrent Degree students.

College of Engineering & Applied Science | Mechanical Engineering | Materials

MCEN-4135 (3) Wind Energy and Wind Turbine Design

Provides an excellent opportunity for students to learn about a current technology, wind energy, that is of high interest both technically and commercially. Students can then apply various technical courses they have had (e.g. fluid dynamics, dynamics and electric circuits, economics, etc.) to design a wind turbine and determine through economic analysis if their design is financially viable. Prereqs. for MCEN 4135 are two of MCEN 3021, 4043 or 3010 (min. grade C-) or equivalent. MCEN 5135 is restricted to MCEN, ASEN, or CVEN grad students only. MCEN 4135 and 5135 are the same course. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical Engineering (MCEN) or Environmental Engineering (EVEN) majors only.

College of Engineering & Applied Science | Mechanical Engineering | Design

MCEN-4141 (3) Indoor Air Pollution

Air pollutants cause material damage and adversely affect human health. People spend over 80 per cent of their time indoors; often, air pollutant levels are higher indoors than outdoors. In this course we study air pollution in indoor environments and design appropriate control technologies. Prereqs., MCEN3021 and 3022. Same as MCEN 5141. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical Engineering (MCEN) or Environmental Engineering (EVEN) majors only.

College of Engineering & Applied Science | Mechanical Engineering | Fluids

MCEN-4151 (3) Flow Visualization

Explores techniques for the visualization of the physics of fluid flows including seeding with dyes, particles and bubbles, and shadowgraphy and schlieren. Reviews optics and fluid physics, especially atmospheric clouds. Assignments are student-driven, to individuals and mixed teams of grad, undergrad, engineering majors and photography/video majors. Please see <http://flowvis.colorado.edu>. Prereq., MCEN 3021 or equivalent, or significant imaging experience (photography/video). FILM 4200 and ARTF 5200 are the same course. Same as MCEN 4151/5151.

College of Engineering & Applied Science | Mechanical Engineering | Fluids

MCEN-4152 (3) Introduction to Combustion

Description of the mechanisms by which fuel and oxidizers are converted into combustion products. Application to practical combustion devices such as Otto, Diesel, gas turbine, and power plant combustion systems. Consideration of combustion-generated air pollution, fire safety, and combustion efficiency. Prereq., MCEN 3012. Recommended prereqs., MCEN 3021 and 3022. Same as MCEN 5152.

College of Engineering & Applied Science Mechanical Engineering Thermal

MCEN-4162 (3) Energy Conversion

Examines common energy-conversion methods and devices. Topics include power-cycle thermodynamics, turbocompressor and expander processes, combustion systems, and applications and limitations of direct energy-conversion systems. Prereq., MCEN 3012.

College of Engineering & Applied Science Mechanical Engineering Thermal

MCEN-4173 (3) Finite Element Analysis

Introductory course covering the theory behind and applications of the finite element method as a general and powerful tool to model a variety of phenomena in mechanical engineering. Applications include structural mechanics, mechanics of elastic continua, and heat conduction. Prereq., MCEN 2023 and 2063, or equivalents. Same as MCEN 5173. Prerequisites: Restricted to Mechanical (MCEN or MCMR) majors or students with a plan of Mechanical Engineering Concurrent Degree majors.

College of Engineering & Applied Science Mechanical Engineering Solids

MCEN-4174 (3) Failure of Engineering Materials

Examines the failure of materials used in engineering design through a series of real world case studies. Example failure modes considered include overload, fatigue, creep, and corrosion. Example case studies include failure of aircraft, mountaineering ropes, weight training frames, and toilets. Prereqs., MCEN 2024 and 2063. Same as MCEN 5174.

College of Engineering & Applied Science Mechanical Engineering Materials

MCEN-4183 (3) Mechanics of Composite Materials

Introduces various kinds of composite materials, composite fabrication techniques, the physical and mechanical behavior of composites, and analytical and experimental methodologies. Prereqs., MCEN 2024 and 2063, or equivalents. Same as MCEN 5183.

College of Engineering & Applied Science Mechanical Engineering Solids

MCEN-4208 (3) Special Topics in Mechanical Engineering

Subject matter to be selected from topics of current interest. Credit to be arranged. Numbered MCEN 4208-4298. Prereq., instructor consent.

College of Engineering & Applied Science Mechanical Engineering Miscellaneous

MCEN-4228 (1-4) Special Topics

May be repeated up to 15 credit hours. Prereqs., MCEN 2024 and 2063. Same as MCEN 5228. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical Engineering (MCEN) or Environmental Engineering (EVEN) majors only.

College of Engineering & Applied Science Mechanical Engineering Miscellaneous

MCEN-4278 (3) Special Topics

Same as MCEN 5268.

College of Engineering & Applied Science Mechanical Engineering Special Topics

MCEN-4848 (1-6) Independent Study

Subjects arranged in consultation with undergraduate advisor to fit the needs of the particular student. Numbered MCEN 4848-4898. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical Engineering (MCEN or MCMR) majors or students with a plan of Mechanical Engineering Concurrent Degree.

College of Engineering & Applied Science Mechanical Engineering Miscellaneous

MCEN-5020 (3) Methods of Engineering Analysis 1

Studies selected topics from linear algebra, ordinary differential equations, and Fourier series. Assigns computer exercises. Correlates with analysis topics in other mechanical engineering graduate courses, and emphasizes applications. Prereq., APPM 2360 or equivalent. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students. Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

College of Engineering & Applied Science Mechanical Engineering Math

MCEN-5021 (3) Introduction to Fluid Dynamics

Focuses on physical properties of gases and liquids, and kinematics of flow fields. Analyzes stress; viscous, heat-conducting Newtonian fluids; and capillary effects and surface-tension-driven flow. Other topics include vorticity and circulation, ideal fluid flow theory in two and three dimensions, Schwartz-Christoffel transformations, free streamline theory, and internal and free-surface waves. Coreq., MCEN 5020 or equivalent. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students. Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

College of Engineering & Applied Science Mechanical Engineering Fluids

MCEN-5022 (3) Classical Thermodynamics

First and second laws of thermodynamics. Entropy and availability. Cycle analysis. Thermodynamic properties of pure substances and mixtures. Property relations. Chemical reactions and chemical

availability. Energy systems analysis. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students. Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

College of Engineering & Applied Science Mechanical Engineering Thermal

MCEN-5023 (3) Solid Mechanics 1

Introduces stress, strain, and motion of a continuous system. Discusses material derivative; fundamental laws of mass, momentum, energy, and entropy; constitutive equations and applications to elastic and plastic materials. Prereq., MCEN 2063 or equivalent; coreq., MCEN 5020 or equivalent. Similar to ASEN 5012. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students. Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

College of Engineering & Applied Science Mechanical Engineering Solids

MCEN-5024 (3) Materials Chemistry and Structures

Provides graduate level students with a comprehensive overview of the chemistry and structure of material systems, with a focus on chemical bonding, the resulting material structures and their properties. This course is intended to become one of the four core courses offered in the new Materials Science curriculum. Course topics include: bonding in solids, crystalline and amorphous states, basic group theory, diffraction, metals and alloys, ceramics, and an intro to mat. characterization. Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

College of Engineering & Applied Science Mechanical Engineering Materials

MCEN-5025 (3) Computer-Aided Design of Mechanical Systems

Instructs students in displacement, velocity, and accelerations matrix formulation of mechanisms. Emphasizes numerical methods to solve simultaneous nonlinear algebraic and differential equations modeling mechanical devices. Involves analysis and synthesis of mechanical components and systems, including planar and spatial linkages, cams, springs, shafts, and gear trains. Prereqs., MCEN 3030 or equivalent, and MCEN 3025. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students. Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

College of Engineering & Applied Science Mechanical Engineering Design

MCEN-5027 (1) Graduate Seminar

Offers weekly presentations by visiting speakers, faculty, and students. May be repeated up to 6 total credit hours. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students. Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

College of Engineering & Applied Science Mechanical Engineering Miscellaneous

MCEN-5034 (3) Thermodynamics of Materials

Provides a unified presentation of fundamental concepts applicable to the thermodynamics of engineering materials. Develops quantitative tools for understanding the physical principles that govern phase equilibrium and transformation. Generates binary and ternary phase diagrams and determine the resulting materials structures and corresponding physical and mechanical properties. Recommended prereqs., MCEN 2024 and 3012.

MCEN-5040 (3) Methods of Engineering Analysis 2

Studies selected topics from the theory of complex variables, integral transform methods, partial differential equations, and variational methods. Assigns computer exercises. Correlates with analysis topics in other mechanical engineering graduate courses, and emphasizes applications. Prereq., MCEN 5020 or equivalent. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students. Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

[Math](#)

MCEN-5041 (3) Viscous Flow

Highlights exact solution of Navier-Stokes equations and fundamentals of rotating fluids. Considers Low Reynolds number flow; similarity solutions; viscous boundary layers, jets, and wakes; and unsteady viscous flow. Prereq., MCEN 5021 or equivalent. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students. Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

[College of Engineering & Applied Science](#)
[Mechanical Engineering](#)
[Fluids](#)

MCEN-5042 (3) Heat Transfer

Studies development of equations governing transport of heat by conduction, convection, and radiation, and their solution. Includes analytical and numerical solution of initial and boundary value problems representative of heat conduction in solids. Describes heat transfer in free and forced convection, including laminar and turbulent flow. Also involves radiation properties of solids, liquids, and gases and transport of heat by radiation. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students. Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

[Mechanical Engineering](#)
[Thermal](#)

MCEN-5044 (3) Mechanical Behavior of Materials

This introductory-level graduate course incorporates relevant aspects of materials science, solid mechanics, thermodynamics and mathematics, and applies them to achieve a fundamental understanding of the mechanical behavior of crystalline and non-crystalline engineering materials. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students. Prereq., MCEN 2024 and 2063 or equivalent. Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

College of Engineering & Applied Science | Mechanical Engineering | Materials

MCEN-5045 (3) Design for Manufacturability

Topics include general design guidelines for manufacturability; aspects of manufacturing processes that affect design decisions; design rules to maximize manufacturability; statistical considerations; value engineering and design for assembly (manual, robotic, and automatic). Presents case studies of successful products exhibiting Dfm. Prereq., MCEN 4026 or equivalent. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students. Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

College of Engineering & Applied Science | Mechanical Engineering | Materials

MCEN-5066 (3) Principles and Practices of World Class Manufacturing

Introduces manufacturing principles and practices that are essential to competing successfully in a global environment. Topics include manufacturing as a competitive tool, total quality management, process control, benchmarking, total productive maintenance, just in time, design of experiments, flexible manufacturing, and case studies.

College of Engineering & Applied Science | Mechanical Engineering | Manufacturing and Systems

MCEN-5115 (3) Mechantronics and Robotics I

Same as MCEN 4115. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students. Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

College of Engineering & Applied Science | Mechanical Engineering | Design

MCEN-5117 (3) Anatomy and Physiology for Engineers

Same as MCEN 4117. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students. Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

College of Engineering & Applied Science | Mechanical Engineering | Miscellaneous

MCEN-5121 (3) Compressible Flow

Applies energy, continuity, and momentum principles to compressible flow. Topics include normal and oblique shocks; Prandtl-Meyer expansion; methods of characteristics; and one-, two-, and

three-dimensional subsonic, supersonic, and hypersonic flows. Prereq., MCEN 5021 or equivalent. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students. Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

College of Engineering & Applied Science | Mechanical Engineering | Fluids

MCEN-5122 (3) Statistical Thermodynamics

Axiomatic formulation of macroscopic thermodynamics. Quantum mechanical description of atomic and molecular structure. Statistical mechanics description of thermodynamic properties of gases, liquids and solids. Elementary kinetic theory of gases and evaluation of transport properties. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students. Prereq., undergraduate thermodynamics. Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

College of Engineering & Applied Science | Mechanical Engineering | Thermal

MCEN-5123 (3) Theory of Vibration

Same as MCEN 4123. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students. Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

College of Engineering & Applied Science | Mechanical Engineering | Solids

MCEN-5125 (3) Optimal Design of Mechanical Components

Applies linear and nonlinear optimization methods to the design of mechanical components and systems. Examines unconstrained and constrained optimization as well as formulation of objective functions, including cost, weight, response time, and deflection. Applies knowledge to gears, springs, cams, and linkages. Prereq., MCEN 3025 and 3030 or equivalent. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students. Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

College of Engineering & Applied Science | Mechanical Engineering | Design

MCEN-5126 (3) Applied Statistics for the Manufacturing and Process Industries

Discusses the concepts and techniques of applied statistics essential to quality control and product/process improvement. Includes computer control (SQC/SPC), sampling methods and time series analysis, and methods of experimental design. Prereq., MCEN 4120. Same as CHEN 5127 and CVEN 5127. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students. Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

College of Engineering & Applied Science | Mechanical Engineering | Manufacturing and Systems

MCEN-5131 (3) Air Pollution Control Engineering

Same as MCEN 4131. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students. Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

College of Engineering & Applied Science | Mechanical Engineering | Fluids

MCEN-5135 (3) Wind Energy and Wind Turbine Design

Provides an excellent opportunity for students to learn about a current technology, wind energy, that is of high interest both technically and commercially. Students can then apply various technical courses they have had (e.g. fluid dynamics, dynamics and electric circuits, economics, etc.) to design a wind turbine and determine through economic analysis if their design is financially viable. Prereqs. for MCEN 4135 are two of MCEN 3021, 4043 or 3010 (min. grade C-) or equivalent. MCEN 5135 is restricted to MCEN, ASEN, or CVEN grad students only. MCEN 4135 and 5135 are the same course. Prerequisites: Restricted to Mechanical Engineering, Civil Engineering or Aerospace Engineering graduate students only.

College of Engineering & Applied Science | Mechanical Engineering | Design

MCEN-5141 (3) Indoor Air Pollution

Same as MCEN 4141. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students. Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

College of Engineering & Applied Science | Mechanical Engineering | Fluids

MCEN-5142 (3) Computational Fluid Dynamics, Heat Transfer, and Combustion

Finite difference, finite volume, finite element, and spectral methods, consistency, stability and convergence of numerical schemes, governing equations for reacting flows, convection, diffusion, convection-diffusion problems, matrix solution methods-cyclic reduction, Fourier, Jacobin, Gauss Siedel, Sor, Adi, Chebschev acceleration, Lax-Wendroff scheme, McCormack scheme, transonic small disturbance equation solution, staggered grids, simple scheme, discrete Fourier transform. Students work on two substantial projects using commercial software. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students. Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

College of Engineering & Applied Science | Mechanical Engineering | Thermal

MCEN-5146 (3) Applied Statistics in Research and Development

Same as CHEN 5128. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students. Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

College of Engineering & Applied Science | Mechanical Engineering | Manufacturing and Systems

MCEN-5151 (3) Flow Visualization

Explores techniques for the visualization of the physics of fluid flows including seeding with dyes, particles and bubbles, and shadowgraphy and schlieren. Reviews optics and fluid physics, especially atmospheric clouds. Assignments are student-driven, to individuals and mixed teams of grad, undergrad, engineering majors and photography/video majors. Please see <http://flowvis.colorado.edu>. Prereq., MCEN 3021 or equivalent, or significant imaging experience (photography/video). FILM 4200 and ARTF 5200 are the same course. Same as MCEN 4151/5151.

College of Engineering & Applied Science | Mechanical Engineering | Fluids

MCEN-5152 (3) Introduction to Combustion

Same as MCEN 4152. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students. Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

College of Engineering & Applied Science Mechanical Engineering Thermal

MCEN-5161 (3) Aerosols

Introduces atmospheric aerosols and properties of their distributions, followed by fundamental descriptions of single particle dynamics, thermodynamics, nucleation, coagulation, mass transfer and populations dynamics. During the second half of the course, the focus will shift to sources and sinks of atmospheric aerosols, their impacts on atmospheric chemistry and radiation, and the impacts of these processes on air quality and climate. Prereq., graduate standing or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science Mechanical Engineering Fluids

MCEN-5164 (3) Fracture

Focuses on basic mechanisms controlling fracture in brittle materials, reduction of capacity for plastic deformation in engineering materials used at high-strength levels, and selection of materials in terms of toughness as well as strength. Prereq., MCEN 4124 and 5044, or equivalent.

College of Engineering & Applied Science Mechanical Engineering Materials

MCEN-5166 (3) Electronics Packaging and Manufacturing

To provide basic knowledge of the technologies and processes required for the packaging and manufacturing of electronic products. Topics covered include wafer fabrication, different levels of packaging, thermal management, life cycle engineering, printed wiring board assembly processes, and process control. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students. Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

College of Engineering & Applied Science Mechanical Engineering Manufacturing and Systems

MCEN-5173 (3) Finite Element Analysis

Same as MCEN 4173. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students. Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

College of Engineering & Applied Science Mechanical Engineering Solids

MCEN-5174 (3) Failure of Engineering Materials

Same as MCEN 4174. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students. Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

College of Engineering & Applied Science | Mechanical Engineering | Miscellaneous

MCEN-5636 (3) Micro-Electro-Mechanical Systems 1

Addresses issues of micro-electro-mechanical systems (MEMS) modeling, design, and fabrication. Emphasizes the design and fabrication of sensors and actuators due to significance of these devices in optics, medical instruments, navigation components, communications, and robotics. Prereq., instructor consent. Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

College of Engineering & Applied Science | Mechanical Engineering | Manufacturing and Systems

MCEN-5848 (1-6) Independent Study

Available only through approval of graduate advisor. Subjects arranged to fit the needs of the particular student. Numbered MCEN 5848--5898. Prereq., graduate standing.

College of Engineering & Applied Science | Mechanical Engineering | Special Topics

MCEN-6163 (3) Elastic Waves

Effect of transient localized sources or dislocations in an elastic medium is studied. . Modeling and application of waves in rods, beams, and plates is emphasized. In addition, ultrasonic, nondestructive evaluation and seismological problems are discussed. Prereq., MCEN 5023 or equivalent. Recommended MCEN 5040 or equivalent. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students. Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

College of Engineering & Applied Science | Mechanical Engineering | Solids

MCEN-6184 (3) Structure and Properties of Polymers

Emphasizes the relationship between molecular structure and macroscopic properties. Structural aspects include chain conformation, configuration, and the crystalline and amorphous states. Discusses physical and mechanical properties with a focus on solution and phase behavior, transitions of bulk polymers, and rubber and viscoelastic behavior. Prereq., graduate standing and MCEN 5024 and 5044, or equivalent. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students. Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

College of Engineering & Applied Science | Mechanical Engineering | Materials

College of Engineering & Applied Science | Mechanical Engineering | Thesis

MCEN-6959 (1-6) Master's Thesis

College of Engineering & Applied Science | Mechanical Engineering | Thesis

MCEN-7120 (3) Perturbation Methods

Teaches regular and singular perturbation methods for solving ordinary and partial differential equations and for evaluating integrals. Emphasizes formulation of mathematical models in fluid mechanics, combustion, heat transfer, solid mechanics, dynamics, and wave propagation. Prereq., MCEN 5020 and 5040, or equivalent. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students. Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

College of Engineering & Applied Science Mechanical Engineering Math

MCEN-7122 (3) Combustion Phenomena

Applies multicomponent fluid equations of motion and chemical thermodynamics to a variety of combustion problems. Covers droplet combustion, premixed and diffusion flames, boundary layer combustion, detonation wave theory, topics related to internal combustion engines, and liquid and solid rockets. Prereq., MCEN 3012 and 3021. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students. Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

College of Engineering & Applied Science Mechanical Engineering Thermal

MCEN-7123 (3) Dynamics of Continuous Media

Reflects upon derivation of wave equations from the basic equations of dynamic elasticity. Topics include propagation of elastic waves in infinite and partially bounded media, Rayleigh waves and Love waves, Pochhammer solution for a rod, and waves in plates and in layered and anisotropic media. Prereq., MCEN 5020, 5040, and 5043, or equivalents. Same as PHYS 6680 and GEOL 6680. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students. Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

College of Engineering & Applied Science Mechanical Engineering Solids

MCEN-7208 (1-4) Special Topics

Credit and subject matter to be arranged. Numbered MCEN 7208-7298.

College of Engineering & Applied Science Mechanical Engineering Special Topics

MCEN-7221 (3) Turbulence

Hydrodynamic stability theory, equations for turbulent flows, free shear flows and boundary layers, homogeneous and isotropic turbulence, overview of turbulent combustion, reaction kinetics, energy equation, Favre averaging, Pdfs, premixed and nonpremixed flame modeling, and recent developments. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students. Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

HUEN-1850 (3) Engineering in History: The Social Impact of Technology

Explores how engineering has shaped who we are, how we think, and what we think about, by examining preconceived notions of progress, property, time, and work. Textbook readings plus original sources in philosophy, literature, psychology, and economics provide a rich and stimulating tour of engineering history. Prerequisites: Restricted to students with 0-56 (Freshmen or Sophomore) College of Engineering majors only.

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

HUEN-2020 (3) The Meaning of Information Technology

Surveys the history of information technologies and modern techniques of information production, storage, transmission, and retrieval. Emphasizes understanding not only the technological transformations in interpersonal, organizational, and mass communication, but also the technological, social and political changes that underlie the movement toward a digital society. HUEN 2020 is restricted to ENGR majors only. ATLS 2000 is restricted to TAM students. ATLS 2000 and HUEN 2020 are the same course. Prerequisites: Restricted to College of Engineering majors only.

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

HUEN-2120 (3) History of Modern Science from Newton to Einstein

Surveys the great discoveries and theoretical disputes from Newtonian celestial mechanics to the theory of relativity. Includes physics, astronomy, chemistry, geology, and biology; closely examines scientific method, evolution, light and quantum theory. Uses original sources by Newton, Faraday, Lavoisier, Darwin, etc., for immediate contact with the great minds in science. Prerequisites: Restricted to College of Engineering majors only.

HUEN-2130 (3) History of Modern Technology from 1750 to the Atomic Bomb

Surveys the great innovations from the Steam Age to the Atomic Age: transportation, modern construction, communications, internal combustion, etc. Supplements textbook accounts with drawings, patents, and original selections by Edison, Carnegie, Tesla, Bell, etc. Studies the sociological impact of social change via contemporary sources in literature, philosophy, painting and film. Prerequisites: Restricted to College of Engineering majors only.

[College of Engineering & Applied Science](#) | [Humanities for Engineers](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

HUEN-2210 (3) Engineering, Science, and Society

Explores challenges that engineering and science pose for society plus the ways that societies shape or impede science and engineering. Case studies range from contemporary issues (global warming, nuclear weapons, and genetic engineering) to classic cases (the execution of Socrates). Core texts in the Western Tradition supplement contemporary articles and films. Prerequisites: Restricted to College of Engineering majors only.

MCEN-5025 (3) Computer-Aided Design of Mechanical Systems

Instructs students in displacement, velocity, and accelerations matrix formulation of mechanisms. Emphasizes numerical methods to solve simultaneous nonlinear algebraic and differential equations modeling mechanical devices. Involves analysis and synthesis of mechanical components and systems, including planar and spatial linkages, cams, springs, shafts, and gear trains. Prereqs., MCEN 3030 or equivalent, and MCEN 3025. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students. Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

MCEN-5125 (3) Optimal Design of Mechanical Components

Applies linear and nonlinear optimization methods to the design of mechanical components and systems. Examines unconstrained and constrained optimization as well as formulation of objective functions, including cost, weight, response time, and deflection. Applies knowledge to gears, springs, cams, and linkages. Prereqs., MCEN 3025 and 3030 or equivalent. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students. Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

MCEN-5135 (3) Wind Energy and Wind Turbine Design

Provides an excellent opportunity for students to learn about a current technology, wind energy, that is of high interest both technically and commercially. Students can then apply various technical courses they have had (e.g. fluid dynamics, dynamics and electric circuits, economics, etc.) to design a wind turbine and determine through economic analysis if their design is financially viable. Prereqs. for MCEN 4135 are two of MCEN 3021, 4043 or 3010 (min. grade C-) or equivalent. MCEN 5135 is restricted to MCEN, ASEN, or CVEN grad students only. MCEN 4135 and 5135 are the same course. Prerequisites: Restricted to Mechanical Engineering, Civil Engineering or Aerospace Engineering graduate students only.

CVEN-2012 (3) Introduction to Geomatics

Observes, analyzes, and presents basic linear, angular, area, and volume field measurements common to civil engineering endeavors with application of GPS and GIS technology. Prereq., APPM 1350 or equivalent. Prerequisites: Restricted to Architectural (AREN) or Civil (CVEN) Engineering majors only.

[College of Engineering & Applied Science](#)
[Civil Engineering](#)
[Surveying and Transportation](#)

CVEN-3022 (3) Construction Surveying

Studies construction and highway surveying, horizontal and vertical curves, earthwork, and analysis of data. Prereq., CVEN 2012.

[College of Engineering & Applied Science](#)
[Civil Engineering](#)
[Surveying and Transportation](#)

CVEN-3032 (3) Photogrammetry

Familiarizes students with characteristics of aerial photographs. Measures and interprets aerial photos for planimetric, topographic, hydrological, soil, and land use surveys. Analyzes and presents field measurements over extensive reaches. Prereq., instructor consent.

[College of Engineering & Applied Science](#)
[Civil Engineering](#)
[Surveying and Transportation](#)

CVEN-3602 (3) Transportation Systems

Introduces technology, operating characteristics, and relative merits of highway, airway, waterway, railroad, pipeline, and convey or transportation systems. Focuses on evaluation of urban transportation systems and recent transportation innovations. Prerequisites: Restricted to College of Engineering majors only.

College of Engineering & Applied Science | Civil Engineering | Surveying and Transportation

CVEN-4822 (3) Geographical Information Systems for Civil and Environmental Systems

Theory and use of geographical information systems in civil engineering, environmental studies, natural resources, and other related disciplines. Topics include spatial data models, data capture, global positioning system, database linkage, use in design, analysis and implementation. Laboratory work includes applications of Arc-View and Arc-GIS software. Prereq., CVEN 2012 or instructor consent. Same as CVEN 5822.

College of Engineering & Applied Science | Civil Engineering | Surveying and Transportation

CVEN-5822 (3) Geographical Information Systems for Civil and Environmental Systems

Same as CVEN 4822.

AREN-2050 (3) Engineering Systems for Buildings

Provides an overview of the building mechanical and electrical systems, including HVAC, plumbing, solar, power distribution, illumination, life safety, transportation, and noise control systems. Emphasizes sustainable (green) building practices. Includes a team investigation of existing commercial building. Prereqs., AREN 1027 and 2406. Prerequisites: Restricted to Architectural (AREN) or Civil (CVEN) Engineering majors only.

[College of Engineering & Applied Science](#) [Civil Engineering](#) [Building Systems Engineering](#)

AREN-2110 (3) Thermodynamics

Explores fundamental principles of thermodynamics, including first and second law of thermodynamics, thermophysical properties, power and refrigeration cycles, gas mixtures and psychrometrics. Computing in the context of engineering problems is introduced. Prereq., PHYS 1110 or equivalent. Coreq., APPM 1360 or equivalent. Approved for arts and sciences core curriculum: natural science. Prerequisites: Restricted to Architectural (AREN), Civil (CVEN), or Environmental (EVEN) Engineering majors or Civil/Environmental (C-EVENCVEN) Engineering Concurrent Degree majors only.

[College of Engineering & Applied Science](#) [Civil Engineering](#) [Building Systems Engineering](#)

AREN-2120 (3) Fluid Mechanics and Heat Transfer

Explores fundamental principles of fluid dynamics and heat transfer. Topics include fluid statics, momentum, and energy conservation, laminar and turbulent viscous flow, convection heat transfer, conduction heat transfer, heat exchangers, and heat transfer. Prereqs., APPM 2350 and AREN 2110. Coreq., APPM 2360.

[College of Engineering & Applied Science](#) [Civil Engineering](#) [Building Systems Engineering](#)

AREN-3010 (3) Mechanical Systems for Buildings

Lecture course on the analysis and design of buildings and their systems to satisfy the requirements for a comfortable and healthy indoor environment. Examines psychometrics, thermal comfort, building heating and cooling loads, fluid flow basics, and HVAC components and systems. Prereqs., AREN 2120 (or MCEN 3021 & 3022) and AREN 2110 (or GEEN 3852, or MCEN 3012, or ASEN 2002) and AREN 2050. Restricted to Architectural or Civil Engineering majors only. Prerequisites: Requires pre-requisite courses of AREN 2120 (or MCEN 3021 & 3022) and AREN 2110 (or GEEN 3852 or MCEN 3012 or ASEN 2002) and AREN 2050. Restricted to Architectural (AREN) or Civil (CVEN) Engineering majors only.

College of Engineering & Applied Science | Civil Engineering | Building Systems Engineering

AREN-3050 (3) Environmental Systems for Buildings 1

Introduces the operation and design of building systems for climate control, water and drainage, life safety, electrical supply, illumination, transportation (elevators and escalators), and noise control. For non-engineering majors. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Environmental Design majors only.

College of Engineering & Applied Science | Civil Engineering | Building Systems Engineering

AREN-3060 (3) Environmental Systems for Buildings 2

Continues the operation and design of building systems for climate control, water and drainage, life safety, electrical supply, illumination, transportation (elevators and escalators), and noise control. For non-engineering majors.

College of Engineering & Applied Science | Civil Engineering | Building Systems Engineering

AREN-3130 (3) Building Energy Laboratory

Laboratory course offering both hands-on experience with building and renewable energy systems and exposing students to the fundamentals of measurements, instrumentation, data acquisition, and statistical data analysis. Measurements and experiments will allow evaluation of building construction material, electrical equipment, lighting systems, heating and cooling systems, and solar energy devices, among others. Prereq., AREN 3010.

College of Engineering & Applied Science | Civil Engineering | Building Systems Engineering

AREN-3140 (3) Illumination Laboratory

Introduces the measurement of photometric and psychophysical quantities used in lighting. Experience is acquired in using light measurement instruments to evaluate lighting equipment and luminous environments. Prereq., AREN 3540.

College of Engineering & Applied Science | Civil Engineering | Building Systems Engineering

AREN-3540 (3) Illumination I

Studies the fundamentals of architectural illumination. Introduces and applies basic principles and vocabulary to elementary problems in the lighting of environments for the performance of visual

work and the proper interaction with architecture. Prerequisites: Requires pre-requisite courses of GEEN 1300 or CSCI 1300 (min grade C-).

College of Engineering & Applied Science Civil Engineering Building Systems Engineering

AREN-4010 (3) HVAC System Modeling and Control

Engineering course devoted to building automation and control systems. Topics include HVAC control technology and strategies, measurement and device technologies, analysis and modeling of dynamic systems, simulation of conventional and advanced control approaches, assessment of control loop performance, and hands-on direct digital control (DDC) programming exercises as used in current building control practice. Prereq., AREN 4110. Same as CVEN 5010.

College of Engineering & Applied Science Civil Engineering Building Systems Engineering

AREN-4110 (3) HVAC Design 1

Applies engineering principles to the design of heating, ventilating, and air conditioning (HVAC) systems for buildings. Covers HVAC systems description, load estimating, applied psychometrics, coils and heat exchangers, air and water distribution systems, and primary equipment and systems. Prereq., AREN 3010. Same as CVEN 5110.

College of Engineering & Applied Science Civil Engineering Building Systems Engineering

AREN-4540 (3) Exterior Lighting Systems

Engages students in exploring and solving lighting problems for exterior environments. Provides an understanding of the design criteria and lighting equipment used in three primary exterior applications: parking lots and roadways, floodlighting of buildings, and sports facilities. Prereq., AREN 3540. Recommended prereqs., AREN 3140 and 4550. Same as CVEN 5540. Taught intermittently.

College of Engineering & Applied Science Civil Engineering Building Systems Engineering

AREN-4550 (3) Illumination 2

Applies the principles studied in Illumination 1. Provides further study in architectural lighting design methods. Uses lighting studio work to develop a broad knowledge of lighting equipment, design methods, and their application in a series of practical design problems in modern buildings. Prereq., AREN 3540. Prerequisites: Requires pre-requisite course of AREN 3540 (min grade C-).

College of Engineering & Applied Science Civil Engineering Building Systems Engineering

AREN-4560 (3) Luminous Radiative Transfer

Teaches fundamentals of radiative exchange as applied to illumination engineering. Describes and uses principal numerical techniques for radiative transfer analysis. Applies techniques to lighting design and analysis. Taught intermittently. Prerequisites: Requires pre-requisite course of AREN 3540.

College of Engineering & Applied Science Civil Engineering Building Systems Engineering

AREN-4570 (3) Building Electrical Systems Design 1

Introduces the generation and distribution of electrical power. Focuses on understanding the loads, control, and protection of secondary electrical distribution systems in building. Applies the national electric code to residential and commercial buildings. Prereq., ECEN 3030. Prerequisites: Requires pre-requisite course of ECEN 3030 (min grade C-).

College of Engineering & Applied Science | Civil Engineering | Building Systems Engineering

AREN-4580 (3) Daylighting

Applies the fundamental principles of illumination engineering to architectural daylighting design, exploring the quantitative methods and tools used to develop daylighting designs and evaluate their performance. Topics include solar and sky modeling, luminous radiative transfer, design methods, and controls for integration with electric lighting systems. Prereq., AREN 3540. Prerequisites: Requires pre-requisite course of AREN 3540 (min grade C-).

College of Engineering & Applied Science | Civil Engineering | Building Systems Engineering

AREN-4590 (3) Computer Graphics in Lighting Engineering

Studies the numerical methods and computer implementation of computer graphics visualization for architectural lighting engineering and design. Implements finite element radiative transfer and ray-tracing in computer programs. Studies the use of computer graphics visualization in lighting analysis. Taught intermittently. Prerequisites: Requires pre-requisite courses of AREN 3540 and 4560.

CVEN-2121 (3) Analytical Mechanics 1

Covers forces acting on rigid bodies at rest. Equilibrium is the central concept that will be applied repeatedly to different situations. In each case, the object of interest will be isolated along with all the forces acting on it; a free body diagram. Equilibrium will be applied to analyze trusses, frames, machines, cables and hydrostatic forces on dams. Prereq., PHYS 1110. Prereq. or coreq., APPM 2350. Same as GEEN 3851. Restricted to freshmen or sophomore Civil, Environmental, or Architectural Engineering majors only. Prerequisites: Restricted to students with 0-56 (Freshmen or Sophomore) Civil (CVEN), Environmental (EVEN), or Architectural (AREN) Engineering majors only.

CVEN-2121 (3) Analytical Mechanics 1

Covers forces acting on rigid bodies at rest. Equilibrium is the central concept that will be applied repeatedly to different situations. In each case, the object of interest will be isolated along with all the forces acting on it; a free body diagram. Equilibrium will be applied to analyze trusses, frames, machines, cables and hydrostatic forces on dams. Prereq., PHYS 1110. Prereq. or coreq., APPM 2350. Same as GEEN 3851. Restricted to freshmen or sophomore Civil, Environmental, or Architectural Engineering majors only. Prerequisites: Restricted to students with 0-56 (Freshmen or Sophomore) Civil (CVEN), Environmental (EVEN), or Architectural (AREN) Engineering majors only.

[College of Engineering & Applied Science](#)
[Civil Engineering](#)
[Mechanics](#)

CVEN-3111 (3) Analytical Mechanics 2

Studies the motion (kinematics) of particles and rigid bodies, and the forces that cause the motion (kinetics). Newton's laws as well as energy methods are used to study the motion of particles and rigid bodies in two and three dimensions. Prerequisites: Requires pre-requisite courses of CVEN 2121. Requires a co-requisite course of APPM 2360.

[College of Engineering & Applied Science](#)
[Civil Engineering](#)
[Mechanics](#)

CVEN-3161 (3) Mechanics of Materials 1

Addresses concepts of stress and strain; material properties, axial loading, torsion, simple bending, and transverse shear; analysis of stress and strain; and deflections of beams. Includes selected experimental and computational laboratories. Prereq., CVEN 2121. Coreq., APPM 2360. Restricted to Architectural or Civil Engineering majors only. Credit not granted for this course and MCEN 2063. Prerequisites: Restricted to Architectural (AREN) or Civil (CVEN) Engineering majors only.

[College of Engineering & Applied Science](#)
[Civil Engineering](#)
[Mechanics](#)

CVEN-4161 (3) Mechanics of Materials 2

Covers advanced topics in the mechanics of solids. Some topics such as asymmetric bending of beams, torsion of non-circular cross-sections etc. are extensions of topics seen in CVEN 3161. Others like buckling and plate bending theory are new. The course presents unifying themes that underlie the study of mechanics. The course includes selected laboratory experiments. Prereq., CVEN 3161. Prerequisites: Requires pre-requisite course of CVEN 3161 (min grade C-).

College of Engineering & Applied Science | Civil Engineering | Mechanics

CVEN-4511 (3) Introduction to Finite Element Analysis

Systematic formulation of finite element approximation and isoparametric interpolation (weighted residual and energy methods, triangular and quadrilateral elements). Includes computation applications to the solution of one- and two-dimensional stress-deformation problems, steady and transient heat conduction, and viscous flow. Prereqs., CVEN 3161, 3525, and Appm 2360. Same as CVEN 5511.

College of Engineering & Applied Science | Civil Engineering | Mechanics

CVEN-5111 (3) Structural Dynamics

Introduces dynamic response of linear elastic single and multiple degree of freedom systems. Includes time and frequency domain analysis. Also analyzes building structures. Undergraduate students may contact the instructor for permission to be enrolled. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Civil Engineering | Mechanics

CVEN-5131 (3) Continuum Mechanics and Elasticity

Provides foundation for advanced study of structural and material behavior and continuum theories in mechanics. Topics include Cartesian tensors, elements of continuum mechanics, constitutive laws for elastic solids, energy principles, methods of potentials, formulations of 2D and 3D elastostatic problems, and general analytical and numerical solutions.

College of Engineering & Applied Science | Civil Engineering | Mechanics

CVEN-5161 (3) Advanced Mechanics of Materials I

Covers 3-D stress and strain, failure theories, torsion of open and noncircular sections, thick-wall pressure vessels, non-symmetric bending, shell in thin-walled sections, stability of frames and beam-column behavior. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Civil Engineering | Mechanics

CVEN-5511 (3) Introduction to Finite Element Analysis

Prereq., graduate standing. Same as Cven 4511. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Civil Engineering | Mechanics

CVEN-6161 (3) Advanced Mechanics of Materials 2

Fundamentals of continuum mechanics, finite deformations, Lagrangian finite strains, Cauchy and Piola Kirchoff stress tensors, plasticity and thermo-elasticity, elements of damage mechanics, elements of fracture mechanics, rheological and viscoelastic theories, and modern experimental techniques. Recommended prereq., CVEN 5161.

College of Engineering & Applied Science | Civil Engineering | Mechanics

CVEN-6511 (3) Nonlinear Finite Element Analysis of Solids and Porous Media

Explores fundamental principles of thermodynamics, including first and second law of thermodynamics, thermophysical properties, power and refrigeration cycles, gas mixtures and psychrometrics. Prereq., PHYS 1110. coreq., APPM1360.

College of Engineering & Applied Science | Civil Engineering | Mechanics

CVEN-7111 (3) Advanced Structural Dynamics

Includes general vibrations of civil engineering structures and their response to various types of time-dependent loads. Prereq., CVEN 5111.

College of Engineering & Applied Science | Civil Engineering | Mechanics

CVEN-7141 (3) Plates and Shells

Teaches mathematical theories of plate and shell structures and their applications. Involves numerical finite element solutions of plates and shells of various shapes under static and dynamic loadings. Prereq., CVEN 5121 or 7131.

College of Engineering & Applied Science | Civil Engineering | Mechanics

CVEN-7161 (3) Fracture Mechanics

This course has three parts. The first covers fundamentals through rigorous mathematical formulations of linear and nonlinear elastic fracture mechanics. The second focuses on materials: theoretical strength, metals, granular materials, polymers, and steel. The third covers numerical (finite element) methods in fracture mechanics. Heavy emphasis is placed on project and independent work. Prereq., CVEN 5121.

College of Engineering & Applied Science | Civil Engineering | Mechanics

CVEN-7511 (3) Computational Mechanics of Solids and Structures

Looks at finite element methodology for geometric and material nonlinearities. Involves incremental formulations and iterative solution strategies for truly finite increments and quasistatic and

dynamic applications to large deformation and inelastic problems. Prereqs., CVEN 5511 or 6525.

CVEN-3161 (3) Mechanics of Materials 1

Addresses concepts of stress and strain; material properties, axial loading, torsion, simple bending, and transverse shear; analysis of stress and strain; and deflections of beams. Includes selected experimental and computational laboratories. Prereq., CVEN 2121. Coreq., APPM 2360. Restricted to Architectural or Civil Engineering majors only. Credit not granted for this course and MCEN 2063. Prerequisites: Restricted to Architectural (AREN) or Civil (CVEN) Engineering majors only.

CVEN-3246 (3) Introduction to Construction

Broad view of concerns, activities, and objectives of people involved in construction: the owner, architect/engineer, contractor, labor, and inspector. Interactive gaming situation relates these people to the construction contract, plans/specifications, estimates/bids, scheduling, law, and financial management. Restricted to junior or senior Civil or Architectural Engineering majors only. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) Civil (CVEN) or Architectural (AREN) Engineering majors only.

[College of Engineering & Applied Science](#)
[Civil Engineering](#)
[Construction](#)

CVEN-3256 (3) Construction Equipment and Methods

Integrated study of construction equipment, methods, and economics. Topics include equipment productivity, equipment selection, and construction engineering design within economic constraints. Examples include earthmoving, concrete formwork, and temporary construction. Recommended prereq., CVEN 3246. Restricted to Architectural or Civil Engineering majors only. Prerequisites: Restricted to Architectural (AREN) or Civil (CVEN) Engineering majors only.

[College of Engineering & Applied Science](#)
[Civil Engineering](#)
[Construction](#)

CVEN-5206 (3) Design Development

Investigates the interrelationship between design decisions and building costs, and the impact of each major building system and building trade on project budgets and schedules. Gives students the opportunity to prepare technical, marketing, and financial packages for investors as well as regulatory and financial institutions. Culminates with detailed presentations of student-developed project prospectuses. Instructor consent required. Restricted to graduate student Civil Engineering (CVEN) or Civil Engineering Concurrent Degree majors only. Taught intermittently. Prerequisites: Restricted to graduate student Civil (CVEN) or Civil Engineering (C-CVEN) Concurrent Degree majors only.

[College of Engineering & Applied Science](#)
[Civil Engineering](#)
[Construction](#)

CVEN-5216 (3) Applied Construction Financial Management

Interpreting commonly used financial reports in the construction engineering industry sector will be taught. Skills developed in this course will better prepare students to become competent consumers of financial information utilizing the same to influence future results the construction business. Models for financing public and private sector projects will also be explored. Taught intermittently. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science Civil Engineering Construction

CVEN-5226 (3) Safety and Quality

Comprehensively studies quality and safety in the construction industry. Statistical techniques for quality assurance and control will be reviewed and applied. The course also extensively focuses on advanced safety management issues such as accident causation theory, economic modeling, safety risk quantification and analysis, design for safety, and emerging technologies. Skills developed in this course will prepare graduate students to be effective quality and safety managers or researchers.

College of Engineering & Applied Science Civil Engineering Construction

CVEN-5246 (3) Legal Aspects of Construction

Applies law in engineering practice; contracts, construction contract documents, construction specification writing, agency, partnership, and property; types of construction contracts; and legal responsibilities and ethical requirements of the professional engineer. Prereq., graduate standing or instructor consent required. Same as CVEN 4087. Taught intermittently. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science Civil Engineering Construction

CVEN-5276 (3) Engineering Risk and Decision Analysis

Acquaints students with the fundamental principles and techniques of risk and decision analysis. Oriented toward project-level decisions in which risk or uncertainty plays a central role. Introduces students to Monte Carlo analyses, influence diagrams, and various types of multicriteria decision analyses. Culminates in a larger term project. Recommended prereq., CVEN 3227. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science Civil Engineering Construction

CVEN-5286 (3) Design Construction Operations

Considers topics associated with the effective and efficient design of construction operations. Topics include: front end planning; construction labor relations; productivity management. The course will emphasize construction productivity improvement by group field studies and discrete event simulation modeling. In-depth study of the way overtime, changes, weather, and staffing levels influence productivity. Industrial engineering techniques are applied to the construction environment to improve the use of equipment, human, and material resources. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science Civil Engineering Construction

CVEN-5326 (3) Construction Project Controls

Examines tools and techniques employed to control design processes and construction operations. Students apply advanced scheduling and estimating techniques, culminating in the concept of earned value project management. Introduces high tech project control tools. Recommended prereqs., AREN 4420 and 4466. Taught intermittently.

College of Engineering & Applied Science | Civil Engineering | Construction

CVEN-5346 (3) Managing Construction and Engineering Projects and Organizations

Explores organizational and managerial issues and concerns facing executives in engineering and construction organizations. Through readings, case studies, simulation exercises, and projects, students are introduced to and apply concepts of strategy, core competencies, vision, innovation, team dynamics, interpersonal influence, organizational design issues, and global projects to engineering and construction organizations. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Civil Engineering | Construction

CVEN-5836 (1-3) Special Topics for Seniors/Grads

Supervised study of special topics of interest to students under instructor guidance. May be repeated up to 6 total credit hours. Prereq., Instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Civil Engineering | Construction

CVEN-7206 (1) CEM PhD Seminar

Examines emerging research in construction engineering and management. Students will consider and comment on research methods and designs based on their own work and that of CU faculty and other leading researchers. Aims to make CEM Ph.D students better researchers and evaluators of research methods and processes.

Subject

Number

CVEN-3313 (3) Theoretical Fluid Mechanics

Basic principles of fluid mechanic. Covers fluid properties, hydrostatics, fluid flow concepts, including continuity, energy, momentum, dimensional analysis and similitude, and flow in closed conduits. Prereq., CVEN 2121. Prerequisites: Requires pre-requisite course of CVEN 2121 (or GEEN 3851, or ASEN 2001, or MCEN 2023).

[College of Engineering & Applied Science](#)
[Civil Engineering](#)
[Fluid Mechanics & Water Resour](#)

CVEN-3323 (3) Hydraulic Engineering

Studies hydraulic engineering theory and applications. Topics include incompressible flow in conduits, pipe system analysis and design, open channel flow, flow measurement, analysis and design of hydraulic machinery. Prereq., CVEN 3313 (or MCEN 3021, or GEEN 3853, or AREN 2120). Restricted to Civil, Environmental, or Architectural Engineering majors only. Prerequisites: Requires pre-requisite course of CVEN 3313 (or MCEN 3021, or GEEN 3853, or AREN 2120). Restricted to Civil (CVEN), Environmental (EVEN), or Architectural (ARCH) Engineering majors only.

[College of Engineering & Applied Science](#)
[Civil Engineering](#)
[Fluid Mechanics & Water Resour](#)

CVEN-4323 (3) Water Resource Engineering Design

Design of urban water supply, wastewater, and supply stormwater management system, with demand management as an option. Exploration of the feasibility of recycling and reuse of treated wastewater and stormwater. Prereqs., CVEN 3227 and 4147. Same as CVEN 5423.

[College of Engineering & Applied Science](#)
[Civil Engineering](#)
[Fluid Mechanics & Water Resour](#)

CVEN-4333 (3) Engineering Hydrology

Studies engineering applications of principles of hydrology, including hydrologic cycle, rainfall and runoff, groundwater, storm frequency and duration studies, stream hydrography, flood frequency, and flood routing. Prerequisites: Requires pre-requisite course of CVEN 3313 (or AREN 2120 or CHEN 3200 or GEEN 3853 or MCEN 3021; all min grade C-). Requires co-requisite course of CVEN 3227 (or APPM 4570 or MCEN 3037).

College of Engineering & Applied Science | Civil Engineering | Fluid Mechanics & Water Resour

CVEN-4353 (3) Groundwater Engineering

Studies the occurrence, movement, extraction for use, and quantity and quality aspects of groundwater. Introduces and uses basic concepts to solve engineering and geohydrologic problems. Prereq., Cven 3313. Prerequisites: Restricted to College of Engineering majors only.

College of Engineering & Applied Science | Civil Engineering | Fluid Mechanics & Water Resour

CVEN-4383 (3) Groundwater Modeling

Studies mathematical and numerical techniques needed to develop models to solve problems in water flow and chemical transport in aquifers. Emphasizes the learning of modeling techniques from fundamentals and the application of models to solve problems in groundwater engineering. Recommended prereq., CVEN 4353. Same as CVEN 5383.

College of Engineering & Applied Science | Civil Engineering | Fluid Mechanics & Water Resour

CVEN-5313 (3) Environmental Fluid Mechanics

Analysis of viscous incompressible flows, with first-principle solutions for environmental fluid flows in oceans, rivers, lakes and the atmosphere. Topics include the Navier-Stokes equations, kinematics, vorticity dynamics, geophysical fluid dynamics, and density stratification. Prereqs., APPM 2350, 2360, CVEN 3313, or equivalents. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Civil Engineering | Fluid Mechanics & Water Resour

CVEN-5333 (3) Multiscale Hydrology

Observations show that peak flows in rainfall-runoff events, and the quantities of annual peak flows, have a power-law dependence on basin area. Physical basis of power laws in peak flows will be explained from mass and momentum conservation equations governing stream flows in self-similar channel networks. Potential engineering applications to predicting floods under a changing climate will be covered. Prereqs., CVEN 4333, 5454 and 5537. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Civil Engineering | Fluid Mechanics & Water Resour

CVEN-5343 (3) Transport and Dispersion in Surface Water

Studies transport and dispersion of introduced contaminants in turbulent surface water flows. Emphasizes developing a physical understanding of fluid processes responsible for turbulent dispersion. Includes analytical development, numerical modeling, and experimental approaches to the problem.

| | | |
|--|-------------------|--------------------------------|
| College of Engineering & Applied Science | Civil Engineering | Fluid Mechanics & Water Resour |
|--|-------------------|--------------------------------|

CVEN-5353 (3) Groundwater Hydrology

Studies the occurrence, movement, extraction for use, and quantity and quality aspects of groundwater. Introduces and uses basic concepts to solve engineering and geohydrologic problems. Prereqs., CVEN 3313 and APPM 2360, or equivalent, or instructor consent. Prerequisites: Restricted to Graduate Students only.

| | | |
|--|-------------------|--------------------------------|
| College of Engineering & Applied Science | Civil Engineering | Fluid Mechanics & Water Resour |
|--|-------------------|--------------------------------|

CVEN-5363 (3) Modeling of Hydrologic Systems

Introduces students to the techniques used in modeling various processes in the hydrologic cycle. Helps students develop numeric models and computer programs for use in conjunction with existing simulation modes such as HEC1 and HEC2 in a design project. Prerequisites: Requires pre-requisite course of CVEN 3323. Requires a co-requisite course of CVEN 4333.

| | | |
|--|-------------------|--------------------------------|
| College of Engineering & Applied Science | Civil Engineering | Fluid Mechanics & Water Resour |
|--|-------------------|--------------------------------|

CVEN-5373 (3) Water Law, Policy, and Institutions

Discusses contemporary issues in water management based on legal doctrine. Identifies legal issues in water resources problems and discusses in close relationship with technical, economic, and political considerations. Prereq., senior or graduate standing.

| | | |
|--|-------------------|--------------------------------|
| College of Engineering & Applied Science | Civil Engineering | Fluid Mechanics & Water Resour |
|--|-------------------|--------------------------------|

CVEN-5383 (3) Applied Groundwater Modeling

Studies mathematical and numerical techniques needed to develop models to solve problems in water flow and chemical transport in the saturated and unsaturated zones of aquifers. Not only emphasizes the learning of modeling techniques from fundamentals, but also the application of models and modeling methods to solve problems in groundwater engineering, geo-environmental engineering, hazardous waste management, aquifer remediation design, and aquifer clean-up. Prereqs., CVEN 5353, 5454, or equivalent, and APPM 2360 or equivalent. Same as CVEN 4383.

| | | |
|--|-------------------|--------------------------------|
| College of Engineering & Applied Science | Civil Engineering | Fluid Mechanics & Water Resour |
|--|-------------------|--------------------------------|

CVEN-5393 (3) Water Resources Development and Management

Explores the principles governing water resources planning and development. Emphasizes the sciences of water (physical, engineering, chemical, biological, and social) and their interrelationships. Prereq., senior or graduate standing. Same as ECON 6555.

| | | |
|--|-------------------|--------------------------------|
| College of Engineering & Applied Science | Civil Engineering | Fluid Mechanics & Water Resour |
|--|-------------------|--------------------------------|

CVEN-5423 (3) Water Resource Engineering Design

Same as CVEN 4323.

College of Engineering & Applied Science | Civil Engineering | Fluid Mechanics & Water Resour

CVEN-6323 (3) Urban Stormwater Infrastructure Systems

Evaluation and design of more sustainable urban stormwater infrastructure systems including street inlets, on-line and off-line surface storage and infiltration systems. Integrated design for major, minor, and micro storms to provide flood control and drainage as well as control of pollution from stormwater runoff. Simulation and optimization models will be used.

College of Engineering & Applied Science | Civil Engineering | Fluid Mechanics & Water Resour

CVEN-6333 (3) Introduction to Multi-Scale Variability and Scaling in Hydrology

Provides a foundational physical understanding of channel networks, runoff, precipitation, and evapotranspiration at multiple spatial scales of drainage basins using modern analytical concepts for understanding non-linear phenomena, e.g., fractals, multifractals, statistical scaling, criticality, and renormalization. Prereq., CVEN 3313, 5333, 5454, and an upper-division course in probability, or equivalents.

College of Engineering & Applied Science | Civil Engineering | Fluid Mechanics & Water Resour

CVEN-6383 (3) Flow and Transport through Porous Media

Studies basic physics of flow and transport of water, air, and other fluid mixtures through a porous medium. Course topics are relevant to applications in contaminant hydrology, contaminant transport in aquifers, hazardous waste management, geohydrology, soil physics, and geoenvironmental engineering.

College of Engineering & Applied Science | Civil Engineering | Fluid Mechanics & Water Resour

CVEN-6393 (1) Hydrologic Sciences and Water Resources Engineering Seminar

Provides a broad introduction to a variety of research topics from hydrologic sciences and water resources engineering. Offered as a one-hour weekly seminar by the departmental water faculty, graduate students, and external speakers. Restricted to graduate students in engineering. Prerequisites: Restricted to graduate student Civil (CVEN) Engineering students only.

College of Engineering & Applied Science | Civil Engineering | Fluid Mechanics & Water Resour

CVEN-3227 (3) Probability, Statistics and Decision

Introduces uncertainty based analysis concepts and applications in the planning and design of civil engineering systems emphasizing probabilistic, statistics, and design concepts and methods. Restricted to juniors/seniors.

CVEN-3414 (3) Fundamentals of Environmental Engineering

Emphasizes chemical, ecological, and hydrological fundamentals and importance of mass and energy balances in solving environmental engineering problems related to water quality, water and wastewater treatment, air pollution, solid and hazardous waste management, sustainability, and risk assessment. Prerequisites: Requires pre-requisite courses of CHEN 1211 and CHEM 1211 (or CHEM 1113 and CHEM 1114 or CHEM 1251 or CHEM 1351) and APPM 1360 (or MATH 2300). Restricted to Civil, Architectural, Environmental, Mechanical or Chemical Engineering majors only.

[College of Engineering & Applied Science](#)
[Civil Engineering](#)
[Environmental](#)

CVEN-3424 (3) Water and Wastewater Treatment

Introduces design and operation of facilities for treatment of municipal water supplies and wastewater. Provides an engineering application of physical, chemical, and biological unit processes and operations for removal of impurities and pollutants. Involves an integrated design of whole treatment systems combining process elements. Prereq., CVEN 3414. Prerequisites: Requires pre-requisite course of CVEN 3414 (min grade C-).

[College of Engineering & Applied Science](#)
[Civil Engineering](#)
[Environmental](#)

CVEN-3434 (3) Introduction to Applied Ecology

Emphasizes the integration of physical, chemical, and biological processes in controlling terrestrial and aquatic ecosystems. Ecosystem concepts are applied to current environmental and water quality problems. Includes field trips and a group project. Same as ENVS 3434. Prerequisites: Requires pre-requisite courses of CHEN 1211 and CHEM 1211 (or CHEM 1113 and CHEM 1114 or CHEM 1251 or CHEM 1351). Restricted to students with 57-180 credits (Junior or Senior) Civil (CVEN), Environmental (EVEN) or Architectural Engineering (AREN) majors.

[College of Engineering & Applied Science](#)
[Civil Engineering](#)
[Environmental](#)

CVEN-3525 (3) Structural Analysis

Studies structural analysis of statically determinate and indeterminate systems, deflections, energy methods, and force method. Prereq., CVEN 3161 or MCEN 2063. Restricted to Architectural or Civil Engineering majors only. Prerequisites: Requires pre-requisite course of CVEN 3161 or MCEN 2063. Restricted to Civil (CVEN), Environmental (EVEN), or Architectural (AREN) Engineering majors only.

College of Engineering & Applied Science Civil Engineering Structures

AREN-3540 (3) Illumination I

Studies the fundamentals of architectural illumination. Introduces and applies basic principles and vocabulary to elementary problems in the lighting of environments for the performance of visual work and the proper interaction with architecture. Prerequisites: Requires pre-requisite courses of GEEN 1300 or CSCI 1300 (min grade C-).

College of Engineering & Applied Science Civil Engineering Building Systems Engineering

CVEN-3602 (3) Transportation Systems

Introduces technology, operating characteristics, and relative merits of highway, airway, waterway, railroad, pipeline, and convey or transportation systems. Focuses on evaluation of urban transportation systems and recent transportation innovations. Prerequisites: Restricted to College of Engineering majors only.

College of Engineering & Applied Science Civil Engineering Surveying and Transportation

CVEN-3698 (3) Engineering Geology

Highlights the role of geology in engineering minerals; rocks; surficial deposits; rocks and soils as engineering materials; distribution of rocks at and below the surface; hydrologic influences; geologic exploration of engineering sites; mapping; and geology of underground excavations, slopes, reservoirs, and dam sites. Includes field trips.

College of Engineering & Applied Science Civil Engineering Geotechnical

CVEN-3708 (3) Geotechnical Engineering 1

Studies basic characteristics of geological materials; soil and rock classifications; site investigation; physical, mechanical, and hydraulic properties of geologic materials; the effective stress principle; soil and rock improvement; seepage analysis; stress distribution; and consolidation and settlement analyses. Selected experimental and computational laboratories. Prereq., CVEN 3161 or MCEN 2063. Prerequisites: Requires pre-requisite course of CVEN 3161 or MCEN 2063. Restricted to Civil (CVEN), Environmental (EVEN), or Architectural (AREN) Engineering majors only.

College of Engineering & Applied Science Civil Engineering Geotechnical

CVEN-3718 (3) Geotechnical Engineering 2

Discusses shear strength, bearing capacity, lateral earth pressures, slope stability, and underground construction. Analyzes and looks at the design of shallow and deep foundations, retaining walls, tunnels, and other earth and rock structures. Selected experimental and computational laboratories. Prereq., CVEN 3708. Prerequisites: Requires pre-requisite course of CVEN 3708 (minimum grade C-). Restricted to College of Engineering majors only.

College of Engineering & Applied Science Civil Engineering Geotechnical

College of Engineering & Applied Science | Civil Engineering | Geotechnical

AREN-4010 (3) HVAC System Modeling and Control

Engineering course devoted to building automation and control systems. Topics include HVAC control technology and strategies, measurement and device technologies, analysis and modeling of dynamic systems, simulation of conventional and advanced control approaches, assessment of control loop performance, and hands-on direct digital control (DDC) programming exercises as used in current building control practice. Prereq., AREN 4110. Same as CVEN 5010.

College of Engineering & Applied Science | Civil Engineering | Building Systems Engineering

AREN-4035 (3) Architectural Structures 1

Analyzes basic structural systems. Covers principles of mechanics and mechanical properties of materials and analysis and design of trusses, arches, and cable structures. For nonengineering students; does not apply toward an engineering degree. Prereq., PHYS1110, and APPM 1350 or MATH 1300. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) Environmental Design majors only.

College of Engineering & Applied Science | Civil Engineering | Structures

AREN-4045 (3) Architectural Structures 2

Analyzes basic structural systems. Covers principles of mechanics as applied to the design of flexural members, columns, continuous beams, and rigid frames. For nonengineering students; does not apply toward an engineering degree. Prereq., AREN 4035.

College of Engineering & Applied Science | Civil Engineering | Structures

CVEN-4087 (3) Construction Contract Administration

Students will develop a working understanding of the various types of contracts, key contract provisions, how to evaluate contract risk, ethical requirements, and most importantly explore effective contract administration. Construction and engineering contracts are at the core of all project relationships. Through lecture, group dialog and case studies students will develop confidence in their ability to assess, understand and deploy contract administration in a construction setting. Prereq., senior standing in civil or architectural engineering or instructor consent.

College of Engineering & Applied Science | Civil Engineering | Miscellaneous

AREN-4110 (3) HVAC Design 1

Applies engineering principles to the design of heating, ventilating, and air conditioning (HVAC) systems for buildings. Covers HVAC systems description, load estimating, applied psychometrics, coils and heat exchangers, air and water distribution systems, and primary equipment and systems. Prereq., AREN 3010. Same as CVEN 5110.

College of Engineering & Applied Science | Civil Engineering | Building Systems Engineering

CVEN-4147 (3) Civil Engineering Systems

Theory and application of the principles of engineering economics, and classical and metaheuristic optimization techniques for evaluating problems in civil and environmental engineering. Same as CVEN 5147. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Engineering majors only.

College of Engineering & Applied Science | Civil Engineering | Miscellaneous

CVEN-4161 (3) Mechanics of Materials 2

Covers advanced topics in the mechanics of solids. Some topics such as asymmetric bending of beams, torsion of non-circular cross-sections etc. are extensions of topics seen in CVEN 3161. Others like buckling and plate bending theory are new. The course presents unifying themes that underlie the study of mechanics. The course includes selected laboratory experiments. Prereq., CVEN 3161. Prerequisites: Requires pre-requisite course of CVEN 3161 (min grade C-).

College of Engineering & Applied Science | Civil Engineering | Mechanics

AREN-4315 (3) Design of Masonry Structures

Covers modern masonry construction; properties and behavior of the reinforced masonry component materials, clay and concrete masonry units, mortar, grout, and steel reinforcement; vertical and lateral load types and intensities; and design of reinforced masonry walls, beams, and columns by working stress and strength design methods. Prereq., CVEN 3525.

College of Engineering & Applied Science | Civil Engineering | Structures

AREN-4317 (5) Architectural Engineering Design

Provides a capstone experience to AREN students. Students design a modest commercial building and complete an integrated engineering design of the building systems executed for the conceptual, schematic, and design development phases. Students' teams work on structural, mechanical, electrical/lighting, and construction engineering management design. Each stage produce a professional-quality design document. Faculty and industry mentors participate in the teaching and evaluation of designs. Prerequisites: Requires pre-requisite courses of AREN 3010, CVEN 3246, CVEN 3525, and AREN 3540 (all min grade C-). Requires a pre-requisite or co-requisite course of AREN 4570.

College of Engineering & Applied Science | Civil Engineering | Miscellaneous

CVEN-4323 (3) Water Resource Engineering Design

Design of urban water supply, wastewater, and supply stormwater management system, with demand management as an option. Exploration of the feasibility of recycling and reuse of treated wastewater and stormwater. Prereqs., CVEN 3227 and 4147. Same as CVEN 5423.

College of Engineering & Applied Science | Civil Engineering | Fluid Mechanics & Water Resour

CVEN-4333 (3) Engineering Hydrology

Studies engineering applications of principles of hydrology, including hydrologic cycle, rainfall and runoff, groundwater, storm frequency and duration studies, stream hydrography, flood frequency, and flood routing. Prerequisites: Requires pre-requisite course of CVEN 3313 (or AREN 2120 or CHEN 3200 or GEEN 3853 or MCEN 3021; all min grade C-). Requires co-requisite course

of CVEN 3227 (or APPM 4570 or MCEN 3037).

College of Engineering & Applied Science Civil Engineering Fluid Mechanics & Water Resour

CVEN-4353 (3) Groundwater Engineering

Studies the occurrence, movement, extraction for use, and quantity and quality aspects of groundwater. Introduces and uses basic concepts to solve engineering and geohydrologic problems. Prereq., Cven 3313. Prerequisites: Restricted to College of Engineering majors only.

College of Engineering & Applied Science Civil Engineering Fluid Mechanics & Water Resour

CVEN-4383 (3) Groundwater Modeling

Studies mathematical and numerical techniques needed to develop models to solve problems in water flow and chemical transport in aquifers. Emphasizes the learning of modeling techniques from fundamentals and the application of models to solve problems in groundwater engineering. Recommended prereq., CVEN 4353. Same as CVEN 5383.

College of Engineering & Applied Science Civil Engineering Fluid Mechanics & Water Resour

CVEN-4404 (3) Water Chemistry

Introduces chemical fundamentals of inorganic aqueous compounds and contaminants in lecture and laboratory. Lecture topics include thermodynamics and kinetics of acids and base reactions, carbonate chemistry, air-water exchange, precipitation, dissolution, complexation, oxidation-reduction, and sorption. Prereqs., CHEN 1211 and CVEN 3414, or CHEM 1111 and 1131 for non-engineers. Restricted to CVEN and EVEN majors only. Formerly CVEN 3454. Prerequisites: Restricted to Civil (CVEN) or Environmental (EVEN) Engineering majors only.

College of Engineering & Applied Science Civil Engineering Environmental

CVEN-4414 (1) Water Chemistry Laboratory

Reinforces chemical fundamentals of inorganic aqueous compounds and contaminants from CVEN 4404 Water Chemistry in laboratory experiments and reports. Topics include acids and bases, carbonate chemistry (alkalinity), and other water chemistry characteristics (hardness, dissolved oxygen); precipitation, complexation, and oxidation-reduction reactions; and laboratory techniques and reporting. Prereqs., CHEN 1211 and CVEN 3414 or CHEN 1111 and 1131 for non-engineers. Coreq., CVEN 4404. Restricted to CVEN or EVEN majors only. Prerequisites: Restricted to Civil (CVEN) or Environmental (EVEN) Engineering majors only.

College of Engineering & Applied Science Civil Engineering Environmental

AREN-4420 (3) Cost Engineering

Focuses on conceptual cost estimating and evaluation techniques to support engineering design. Topics include assemblies estimating, probabilistic estimating, value engineering, constructability concepts, and life-cycle costing. Prereq., CVEN 3246. Prerequisites: Requires pre-requisite course of CVEN 3246 (min grade C-).

CVEN-4424 (3) Environmental Organic Chemistry

Examines the fundamental physical and chemical transformations affecting the fate and transport of organic contaminants in natural and treated waters. Emphasizes quantitative approach to solubility, vapor pressure, air-water exchange, sorption, hydrolysis and redox reactions, and photodegradation. Prerequisites: Requires pre-requisite courses of CHEN 1211 and CHEM 1211 (or CHEM 1113 and CHEM 1114 or CHEM 1271 or CHEM 1371).

[College of Engineering & Applied Science](#) [Civil Engineering](#) [Environmental](#)

CVEN-4434 (4) Environmental Engineering Design

Examines the design of facilities for the treatment of municipal water and wastewater, hazardous industrial waste, contaminated environmental sites, and sustainable sanitation in developing countries. Economic, societal, and site specific criteria impacting designs are emphasized. Prereq., CVEN 3414. Restricted to seniors. Prerequisites: Requires pre-requisite course of CVEN 3414 (min grade C-).

[College of Engineering & Applied Science](#) [Civil Engineering](#) [Environmental](#)

CVEN-4464 (3) Environmental Engineering Processes

Develops and utilizes analytic solutions for environmental process models that can be used in a) reactor design for processes used in the treatment of water, wastewater and hazardous waste and b) process analysis of natural systems, such as streams and groundwater flow. Models facilitate the tracking of contaminants in engineered and natural systems. Prereq. or coreq., CVEN 3414 or equivalent and Fluid Mechanics. CVEN 4464 and 5464 are the same course.

[College of Engineering & Applied Science](#) [Civil Engineering](#) [Environmental](#)

AREN-4466 (3) Construction Planning and Scheduling

Comprehensively studies project management activities for scheduling and delivering construction projects, including the contractor's role in preconstruction and construction activities and the application of CPM/PERT techniques to the planning, scheduling, and control of a construction project. Prereq., CVEN 3246. Restricted to Architectural or Civil Engineering majors only.

Prerequisites: Restricted to Architectural (AREN) or Civil (CVEN) Engineering majors only.

College of Engineering & Applied Science | Civil Engineering | Construction

CVEN-4474 (3) Hazardous and Industrial Waste Management

Evaluates processes used for treatment of wastes requiring special handling and disposal: toxic organic chemicals, heavy metals, and acidic, caustic, and radioactive waste material. Discusses techniques for destruction, immobilization, and resource recovery and assessment of environmental impact of treatment process end products. Prereq., CVEN 3414. Same as CVEN 5474.

Prerequisites: Restricted to College of Engineering majors only.

College of Engineering & Applied Science | Civil Engineering | Environmental

CVEN-4484 (3) Introduction to Environmental Microbiology

Surveys microbiology topics germane to modern civil and environmental engineering. Provides fundamentals needed to understand microbial processes and ecology in engineered and natural systems and reviews applications emphasizing the interface between molecular biology and classical civil engineering. Prerequisites: Requires pre-requisite courses of CHEN 1211 and CHEM 1211 (or CHEM 1113 and CHEM 1114 or CHEM 1251 or CHEM 1351) and APPM 2350 (or MATH 2400).

College of Engineering & Applied Science | Civil Engineering | Environmental

CVEN-4511 (3) Introduction to Finite Element Analysis

Systematic formulation of finite element approximation and isoparametric interpolation (weighted residual and energy methods, triangular and quadrilateral elements). Includes computation applications to the solution of one- and two-dimensional stress-deformation problems, steady and transient heat conduction, and viscous flow. Prereqs., CVEN 3161, 3525, and Appm 2360. Same as CVEN 5511.

College of Engineering & Applied Science | Civil Engineering | Mechanics

CVEN-4525 (3) Analysis of Framed Structures

Studies matrix formulation of principles of structural analysis and development of direct stiffness and flexibility methods for analysis of frame and truss structures. Topics include support settlements, thermal loads, and energy formulations of force-displacement relationships. Prereq., CVEN 3525. Same as CVEN 5525.

College of Engineering & Applied Science | Civil Engineering | Structures

CVEN-4537 (3) Numerical Methods in Civil Engineering

Introduces the use of numerical methods in the solution of civil engineering problems, emphasizing obtaining solutions with high-speed electronic computers. Applies methods to all types of civil

engineering problems. Prereq., senior standing. Same as CVEN 5537.

College of Engineering & Applied Science Civil Engineering Miscellaneous

AREN-4540 (3) Exterior Lighting Systems

Engages students in exploring and solving lighting problems for exterior environments. Provides an understanding of the design criteria and lighting equipment used in three primary exterior applications: parking lots and roadways, floodlighting of buildings, and sports facilities. Prereq., AREN 3540. Recommended prereqs., AREN 3140 and 4550. Same as CVEN 5540. Taught intermittently.

College of Engineering & Applied Science Civil Engineering Building Systems Engineering

CVEN-4545 (3) Steel Design

Applies basic principles to design of steel structures; design of tension members, columns, beams, open-web joists, steel decks, bolts, bolted connections, welding processes, and welded connections. Prereq., CVEN 3525. Prerequisites: Requires pre-requisite course of CVEN 3525 (min grade C-).

College of Engineering & Applied Science Civil Engineering Structures

AREN-4550 (3) Illumination 2

Applies the principles studied in Illumination 1. Provides further study in architectural lighting design methods. Uses lighting studio work to develop a broad knowledge of lighting equipment, design methods, and their application in a series of practical design problems in modern buildings. Prereq., AREN 3540. Prerequisites: Requires pre-requisite course of AREN 3540 (min grade C-).

College of Engineering & Applied Science Civil Engineering Building Systems Engineering

CVEN-4554 (3) Fundamentals of Air Quality Management

Introduces engineering methods for the study of air quality. Topics include: indoor air quality, greenhouse gases, dispersion modeling, acidification of lakes, sources apportionment modeling, chemistry of combustion, pollution sources and controls, and human exposure to air pollutants. Under consideration as requirement for EVEN students in air quality track or concentration course in environmental engineering for undergraduate CVEN students. Prereqs., APPM 2360 (or MATH 3130 and 4430) and CVEN 3313 (or CHEN 3200 or MCEN 3021). Same as CVEN 5554. Prerequisites: Requires pre-requisite courses of APPM 2360 (or MATH 3130 and 4430) and CHEN 3313 (or CHEN 3200 or MCEN 3021).

College of Engineering & Applied Science Civil Engineering Environmental

CVEN-4555 (3) Reinforced Concrete Design

Focuses on applications to the design of reinforced concrete structures, including design of beams, columns, slabs, and footings; continuous beams and frames; cast-in-place buildings. Prereq., CVEN 3525.

College of Engineering & Applied Science Civil Engineering Structures

AREN-4560 (3) Luminous Radiative Transfer

Teaches fundamentals of radiative exchange as applied to illumination engineering. Describes and uses principal numerical techniques for radiative transfer analysis. Applies techniques to lighting design and analysis. Taught intermittently. Prerequisites: Requires pre-requisite course of AREN 3540.

College of Engineering & Applied Science | Civil Engineering | Building Systems Engineering

CVEN-4565 (3) Timber Design

Applies design methods to beams, columns, trusses, and connections using timber and glued, laminated members. Prerequisites: Requires pre-requisite course of CVEN 3525.

College of Engineering & Applied Science | Civil Engineering | Structures

AREN-4570 (3) Building Electrical Systems Design 1

Introduces the generation and distribution of electrical power. Focuses on understanding the loads, control, and protection of secondary electrical distribution systems in building. Applies the national electric code to residential and commercial buildings. Prereq., ECEN 3030. Prerequisites: Requires pre-requisite course of ECEN 3030 (min grade C-).

College of Engineering & Applied Science | Civil Engineering | Building Systems Engineering

AREN-4580 (3) Daylighting

Applies the fundamental principles of illumination engineering to architectural daylighting design, exploring the quantitative methods and tools used to develop daylighting designs and evaluate their performance. Topics include solar and sky modeling, luminous radiative transfer, design methods, and controls for integration with electric lighting systems. Prereq., AREN 3540. Prerequisites: Requires pre-requisite course of AREN 3540 (min grade C-).

College of Engineering & Applied Science | Civil Engineering | Building Systems Engineering

AREN-4590 (3) Computer Graphics in Lighting Engineering

Studies the numerical methods and computer implementation of computer graphics visualization for architectural lighting engineering and design. Implements finite element radiative transfer and ray-tracing in computer programs. Studies the use of computer graphics visualization in lighting analysis. Taught intermittently. Prerequisites: Requires pre-requisite courses of AREN 3540 and 4560.

College of Engineering & Applied Science | Civil Engineering | Building Systems Engineering

CVEN-4700 (3) Sustainability and the Built Environment

Introduces fundamental concepts of sustainability and sustainable development. Special emphasis on understanding the interaction of the built environment with natural systems and the role of technical and non-technical issues in engineering decisions. Open to engineering and non-engineering students. Same as CVEN 5700.

College of Engineering & Applied Science | Civil Engineering | Building Systems

CVEN-4718 (3) Mechanics and Dynamics of Glaciers

Focuses on geotechnical design of shallow and deep foundations, including spread footings, mats, driven piles, and drilled piers. Coverage includes bearing capacity, settlement, group effects, and lateral load capacity of the various foundation types. Additional topics include subsurface exploration, construction of deep foundations, and analysis of pile behavior using wave equation and dynamic monitoring methods. Prereqs., CVEN 3718 or instructor consent. Same as CVEN 5728.

College of Engineering & Applied Science | Civil Engineering | Geotechnical

CVEN-4728 (3) Foundation Engineering

Focuses on geotechnical design of shallow and deep foundations, including spread footings, mats, driven piles, and drilled piers. Coverage includes bearing capacity, settlement, group effects, and lateral load capacity of the various foundation types. Additional topics include subsurface exploration, construction of deep foundations, and analysis of pile behavior using wave equation and dynamic monitoring methods. Prereqs., CVEN 3718 or instructor consent. Same as CVEN 5728.

College of Engineering & Applied Science | Civil Engineering | Geotechnical

CVEN-4822 (3) Geographical Information Systems for Civil and Environmental Systems

Theory and use of geographical information systems in civil engineering, environmental studies, natural resources, and other related disciplines. Topics include spatial data models, data capture, global positioning system, database linkage, use in design, analysis and implementation. Laboratory work includes applications of Arc-View and Arc-GIS software. Prereq., CVEN 2012 or instructor consent. Same as CVEN 5822.

College of Engineering & Applied Science | Civil Engineering | Surveying and Transportation

AREN-4830 (1-3) Special Topics for Seniors/Grads.

Supervised study of special topics of interest to students under instructor guidance. May be repeated up to 12 total credit hours. Prereq., instructor consent required.

College of Engineering & Applied Science | Civil Engineering | Special Topics

CVEN-4834 (1-3) Special Topics

Prereq., instructor consent. May be repeated up to 6 total credit hours provided topics are different.

CVEN-4839 (3-6) Special Topics for Seniors

Offers a supervised study of special topics, under instructor guidance. May be repeated up to 6 total credit hours. Prereq., instructor consent.

College of Engineering & Applied Science | Civil Engineering | Special Topics

AREN-4849 (1-3) Independent Study

Offers an independent, in-depth study, research, or design in a selected area of architectural engineering. Offerings are coordinated with individual faculty. Students should consult the Department of Civil, Environmental, and Architectural Engineering. Numbered AREN 4840 through AREN 4849.

College of Engineering & Applied Science | Civil Engineering | Special Topics

CVEN-4878 (1-3) Independent Study

Involves an independent, in-depth study, research, or design in a selected area of civil or environmental engineering. Offerings are coordinated with individual faculty. Students should consult the Department of Civil, Environmental, and Architectural Engineering. Numbered CVEN 4840 through CVEN 4878.

College of Engineering & Applied Science | Civil Engineering | Geotechnical

CVEN-4899 (4) Civil Engineering Senior Project Design

Provides a simulated real world design and construction planning experience with multiple constraints including budget, schedule, technical, regulatory, and societal. Teams integrate the multiple civil engineering sub-disciplines. Requires gathering relevant data, understanding client needs, identifying constraints, and applying applicable regulations, codes and standards. Final deliverables include: detailed design drawings, specifications, cost estimate, project schedule, construction plan, oral and written presentation. Prereq., senior standing.

College of Engineering & Applied Science | Civil Engineering | Special Topics

CVEN-5010 (3) HVAC System Modeling and Control

Engineering course devoted to building automation and control systems. Topics include HVAC control technology and strategies, measurement and device technologies, analysis and modeling of dynamic systems, simulation of conventional and advanced control approaches, assessment of control loop performance, and hands-on direct digital control (DDC) programming exercises as used in current building control practice. Same as AREN 4010.

College of Engineering & Applied Science | Civil Engineering | Building Systems

CVEN-5020 (3) Building Energy Audits

Analyzes and measures performance of HVAC systems, envelopes, lighting and hot water systems, and modifications to reduce energy use. Emphasizes existing buildings. Prereq., AREN 3010 or equivalent. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Civil Engineering | Building Systems

CVEN-5030 (3) Architectural Lighting Equipment Design

Covers the specification and design of nonimaging optical systems for architectural lighting equipment reflector design. Develops and uses computer software to design optics that are prototyped and tested in the laboratory. Prereq., AREN 3540 or CVEN 5830. Taught intermittently.

College of Engineering & Applied Science | Civil Engineering | Building Systems

CVEN-5040 (3) Lighting Systems Engineering

Introduces architectural lighting, including vision and perception, lighting equipment and its characteristics, calculations and analysis, and the process of lighting design. Taught intermittently.

College of Engineering & Applied Science | Civil Engineering | Building Systems

CVEN-5050 (3) Advanced Solar Design

Predicts performance and analyzes economics of high temperature, photovoltaic, and other innovative solar systems. Also includes performance prediction methods for solar processes. Prereqs., AREN 2120, coursework in thermodynamics, fluid mechanics and heat transfer. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Civil Engineering | Building Systems

CVEN-5070 (3) Thermal Analysis of Building

Examines response factors, conduction transfer functions, and weighting factors for dynamic analysis of building envelopes. Also studies radiative and convective exchange in buildings, internal gains, and infiltration analysis as modeled in hourly simulations. Prereq., AREN 3010 or equivalent.

College of Engineering & Applied Science | Civil Engineering | Building Systems

CVEN-5080 (3) Computer Simulation of Building Energy Systems

Introduces major simulation programs for analysis of building energy loads and system performance. Focuses on one hourly simulation program to develop capability for analysis of multizone structure. Prereq., AREN 4110 or CVEN 5110. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Civil Engineering | Building Systems

CVEN-5110 (3) HVAC Design 1

Explores design of heating, ventilating, and air conditioning (HVAC) systems for buildings. Covers HVAC systems description, load estimating, code compliance, duct design, fan systems, applied psychrometrics, cooling and heating coils, filters, hydronic systems, piping, and pumps. Prereq., AREN 3010 or equivalent. Same as AREN 4110.

College of Engineering & Applied Science | Civil Engineering | Building Systems

CVEN-5111 (3) Structural Dynamics

Introduces dynamic response of linear elastic single and multiple degree of freedom systems. Includes time and frequency domain analysis. Also analyzes building structures. Undergraduate students may contact the instructor for permission to be enrolled. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Civil Engineering | Mechanics

CVEN-5131 (3) Continuum Mechanics and Elasticity

Provides foundation for advanced study of structural and material behavior and continuum theories in mechanics. Topics include Cartesian tensors, elements of continuum mechanics, constitutive laws for elastic solids, energy principles, methods of potentials, formulations of 2D and 3D elastostatic problems, and general analytical and numerical solutions.

College of Engineering & Applied Science | Civil Engineering | Mechanics

CVEN-5147 (3) Civil Engineering Systems

Same as CVEN 4147. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Civil Engineering | Miscellaneous

CVEN-5161 (3) Advanced Mechanics of Materials I

Covers 3-D stress and strain, failure theories, torsion of open and noncircular sections, thick-wall pressure vessels, non-symmetric bending, shell in thin-walled sections, stability of frames and beam-column behavior. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Civil Engineering | Mechanics

CVEN-5206 (3) Design Development

Investigates the interrelationship between design decisions and building costs, and the impact of each major building system and building trade on project budgets and schedules. Gives students the opportunity to prepare technical, marketing, and financial packages for investors as well as regulatory and financial institutions. Culminates with detailed presentations of student-developed project prospectuses. Instructor consent required. Restricted to graduate student Civil Engineering (CVEN) or Civil Engineering Concurrent Degree majors only. Taught intermittently. Prerequisites: Restricted to graduate student Civil (CVEN) or Civil Engineering (C-CVEN) Concurrent Degree majors only.

College of Engineering & Applied Science | Civil Engineering | Construction

CVEN-5216 (3) Applied Construction Financial Management

Interpreting commonly used financial reports in the construction engineering industry sector will be taught. Skills developed in this course will better prepare students to become competent consumers of financial information utilizing the same to influence future results the construction business. Models for financing public and private sector projects will also be explored. Taught intermittently. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Civil Engineering | Construction

CVEN-5226 (3) Safety and Quality

Comprehensively studies quality and safety in the construction industry. Statistical techniques for quality assurance and control will be reviewed and applied. The course also extensively focuses on advanced safety management issues such as accident causation theory, economic modeling, safety risk quantification and analysis, design for safety, and emerging technologies. Skills developed in this course will prepare graduate students to be effective quality and safety managers or researchers.

College of Engineering & Applied Science | Civil Engineering | Construction

CVEN-5246 (3) Legal Aspects of Construction

Applies law in engineering practice; contracts, construction contract documents, construction specification writing, agency, partnership, and property; types of construction contracts; and legal responsibilities and ethical requirements of the professional engineer. Prereq., graduate standing or instructor consent required. Same as CVEN 4087. Taught intermittently. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Civil Engineering | Construction

CVEN-5276 (3) Engineering Risk and Decision Analysis

Acquaints students with the fundamental principles and techniques of risk and decision analysis. Oriented toward project-level decisions in which risk or uncertainty plays a central role. Introduces students to Monte Carlo analyses, influence diagrams, and various types of multicriteria decision analyses. Culminates in a larger term project. Recommended prereq., CVEN 3227. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Civil Engineering | Construction

CVEN-5286 (3) Design Construction Operations

Considers topics associated with the effective and efficient design of construction operations. Topics include: front end planning; construction labor relations; productivity management. The course will emphasize construction productivity improvement by group field studies and discrete event simulation modeling. In-depth study of the way overtime, changes, weather, and staffing levels influence productivity. Industrial engineering techniques are applied to the construction environment to improve the use of equipment, human, and material resources. Prerequisites: Restricted to Graduate Students only.

CVEN-5313 (3) Environmental Fluid Mechanics

Analysis of viscous incompressible flows, with first-principle solutions for environmental fluid flows in oceans, rivers, lakes and the atmosphere. Topics include the Navier-Stokes equations, kinematics, vorticity dynamics, geophysical fluid dynamics, and density stratification. Prereqs., APPM 2350, 2360, CVEN 3313, or equivalents. Prerequisites: Restricted to Graduate Students only.

[College of Engineering & Applied Science](#)
[Civil Engineering](#)
[Fluid Mechanics & Water Resour](#)

CVEN-5323 (3) Applied Stream Ecology

Emphasizes the integration of hydrologic, chemical, and biological processes in controlling river, stream, and reservoir ecosystems at several spatial scales. Students apply ecosystem concepts to current environmental and water quality problems and learn field methods in field trips and a team project. Prereqs., general chemistry, physics. Recommended prereqs., hydrology, ecology, or environmental chemistry. Prerequisites: Restricted to Graduate Students only.

[College of Engineering & Applied Science](#)
[Civil Engineering](#)
[Environmental](#)

CVEN-5326 (3) Construction Project Controls

Examines tools and techniques employed to control design processes and construction operations. Students apply advanced scheduling and estimating techniques, culminating in the concept of earned value project management. Introduces high tech project control tools. Recommended prereqs., AREN 4420 and 4466. Taught intermittently.

[College of Engineering & Applied Science](#)
[Civil Engineering](#)
[Construction](#)

CVEN-5333 (3) Multiscale Hydrology

Observations show that peak flows in rainfall-runoff events, and the quantities of annual peak flows, have a power-law dependence on basin area. Physical basis of power laws in peak flows will be explained from mass and momentum conservation equations governing stream flows in self-similar channel networks. Potential engineering applications to predicting floods under a changing climate will be covered. Prereqs., CVEN 4333, 5454 and 5537. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Civil Engineering | Fluid Mechanics & Water Resour

CVEN-5343 (3) Transport and Dispersion in Surface Water

Studies transport and dispersion of introduced contaminants in turbulent surface water flows. Emphasizes developing a physical understanding of fluid processes responsible for turbulent dispersion. Includes analytical development, numerical modeling, and experimental approaches to the problem.

College of Engineering & Applied Science | Civil Engineering | Fluid Mechanics & Water Resour

CVEN-5346 (3) Managing Construction and Engineering Projects and Organizations

Explores organizational and managerial issues and concerns facing executives in engineering and construction organizations. Through readings, case studies, simulation exercises, and projects, students are introduced to and apply concepts of strategy, core competencies, vision, innovation, team dynamics, interpersonal influence, organizational design issues, and global projects to engineering and construction organizations. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Civil Engineering | Construction

CVEN-5353 (3) Groundwater Hydrology

Studies the occurrence, movement, extraction for use, and quantity and quality aspects of groundwater. Introduces and uses basic concepts to solve engineering and geohydrologic problems. Prereqs., CVEN 3313 and APPM 2360, or equivalent, or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Civil Engineering | Fluid Mechanics & Water Resour

CVEN-5363 (3) Modeling of Hydrologic Systems

Introduces students to the techniques used in modeling various processes in the hydrologic cycle. Helps students develop numeric models and computer programs for use in conjunction with existing simulation modes such as HEC1 and HEC2 in a design project. Prerequisites: Requires pre-requisite course of CVEN 3323. Requires a co-requisite course of CVEN 4333.

College of Engineering & Applied Science | Civil Engineering | Fluid Mechanics & Water Resour

CVEN-5373 (3) Water Law, Policy, and Institutions

Discusses contemporary issues in water management based on legal doctrine. Identifies legal issues in water resources problems and discusses in close relationship with technical, economic, and political considerations. Prereq., senior or graduate standing.

College of Engineering & Applied Science | Civil Engineering | Fluid Mechanics & Water Resour

CVEN-5383 (3) Applied Groundwater Modeling

Studies mathematical and numerical techniques needed to develop models to solve problems in water flow and chemical transport in the saturated and unsaturated zones of aquifers. Not only emphasizes the learning of modeling techniques from fundamentals, but also the application of models and modeling methods to solve problems in groundwater engineering, geo-environmental engineering, hazardous waste management, aquifer remediation design, and aquifer clean-up. Prereqs., CVEN 5353, 5454, or equivalent, and APPM 2360 or equivalent. Same as CVEN 4383.

College of Engineering & Applied Science | Civil Engineering | Fluid Mechanics & Water Resour

CVEN-5393 (3) Water Resources Development and Management

Explores the principles governing water resources planning and development. Emphasizes the sciences of water (physical, engineering, chemical, biological, and social) and their interrelationships. Prereq., senior or graduate standing. Same as ECON 6555.

College of Engineering & Applied Science | Civil Engineering | Fluid Mechanics & Water Resour

CVEN-5404 (3) Water Chemistry

Introduces chemical fundamentals governing the chemistry of natural and treated waters in lecture and laboratory. Lecture topics include thermodynamics and kinetics of acids and base reactions, carbonate chemistry, air-water exchange, precipitation, dissolution, complexation, oxidation-reduction, and sorption. Laboratory experiments emphasize lecture concepts with measurements on local waters. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Civil Engineering | Environmental

CVEN-5414 (3) Water Chemistry Laboratory

Uses experimental and analytical laboratory techniques to develop a better understanding of the concepts of aquatic chemistry and to investigate water chemistry in treated and natural water systems. Techniques include titration, spectrophotometry, gas chromatography, other advanced instrumentation, sampling, portable analyses, and basic statistics and experimental design. Course focuses on water chemistry of Boulder Creek and other local waters. Prereq., CVEN 5404 or GEOL 5280. Coreq., CVEN 5424.

College of Engineering & Applied Science | Civil Engineering | Environmental

CVEN-5423 (3) Water Resource Engineering Design

Same as CVEN 4323.

College of Engineering & Applied Science | Civil Engineering | Fluid Mechanics & Water Resour

CVEN-5424 (3) Environmental Organic Chemistry

Examines the fundamental physical and chemical transformations affecting the fate and transport of organic contaminants in natural and treated waters. Emphasizes solubility, vapor pressure, air-water exchange, sorption, abiotic and biotic reactions, and photodegradation.

College of Engineering & Applied Science Civil Engineering Environmental

CVEN-5434 (3) Environmental Engineering Design

Team-based design of facilities or processes for water or wastewater or solid waste treatment or remediation under multiple real-world constraints. Prereq., instructor consent. Recommended prereq., CVEN 5524, 5534, or 5474.

College of Engineering & Applied Science Civil Engineering Environmental

CVEN-5454 (3) Quantitative Methods

Introduces the use of digital simulation in the analysis of water resources and environmental systems. Develops computer programs for the simulation of reservoir operations, watershed runoff, stream quality, and lake quality, and uses existing software to analyze more complex problems. Prereq., instructor consent.

College of Engineering & Applied Science Civil Engineering Environmental

CVEN-5464 (3) Environmental Engineering Processes

Develops and utilizes analytic solutions for environmental process models that can be used in a) reactor design for processes used in the treatment of water, wastewater and hazardous waste and b) process analysis of natural systems, such as streams and groundwater flow. Models facilitate the tracking of contaminants in engineered and natural systems. Prereq. or coreq., CVEN 3414 or equivalent and Fluid Mechanics. CVEN 4464 and 5464 are the same course. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science Civil Engineering Environmental

CVEN-5474 (3) Hazardous and Industrial Waste Management

Same as CVEN 4474. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science Civil Engineering Environmental

CVEN-5484 (3) Introduction to Environmental Microbiology

Same as CVEN 4484.

College of Engineering & Applied Science Civil Engineering Environmental

CVEN-5494 (3) Surface Water Quality Modeling

Examines the relationships among air, water, and land pollution, water quality, and beneficial uses. Using models, develops the ability to quantify and predict the impacts of pollutants in the aquatic environment, and to develop approaches to minimize unfavorable water quality conditions. Prereq., instructor consent.

College of Engineering & Applied Science | Civil Engineering | Environmental

CVEN-5511 (3) Introduction to Finite Element Analysis

Prereq., graduate standing. Same as Cven 4511. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Civil Engineering | Mechanics

CVEN-5514 (3) Bioremediation

Advanced study on biological processes used to treat toxic organic and inorganic compounds contained in contaminated water, air, and soil; design and evaluation of in situ toxic compound biotransformation; fundamentals of phytoremediation; critical reviews of current literature on bioremediation. Prereq., CVEN 4484 or 5484 or instructor consent. Recommended prereq., CVEN 5424.

College of Engineering & Applied Science | Civil Engineering | Environmental

CVEN-5524 (3) Drinking Water Treatment

Provides advanced study on theory-of-treatment processes, including design and operation of municipal water supplies. Prereq., environmental engineering processes, graduate standing, or instructor consent required.

College of Engineering & Applied Science | Civil Engineering | Environmental

CVEN-5525 (3) Analysis of Framed Structures

Same as CVEN 4525. Prerequisites: Restricted to Graduate Students only.

CVEN-5540 (3) Exterior Lighting Systems

Engages students in exploring and solving lighting problems for exterior environments. Provides an understanding of the design criteria and lighting equipment used in three primary exterior applications: parking lots and roadways, floodlighting of buildings, and sports facilities. Prereq., AREN 3540. Recommended prereqs., AREN 3140 and 4550. Same as AREN 4540. Taught intermittently.

[College of Engineering & Applied Science](#)
[Civil Engineering](#)
[Building Systems](#)

CVEN-5544 (3) Solid Waste Management and Resource Recovery

Covers the scope of the nonhazardous solid waste problem and regulations that drive its management; discussions of nonengineering factors that impact waste management and recycling; design of incinerators, composting facilities, and landfills used to treat and dispose of solid waste. Recommended prereq., CVEN 3414.

College of Engineering & Applied Science | Civil Engineering | Environmental

CVEN-5554 (3) Fundamentals of Air Quality Management

Introduces engineering methods for the study of air quality. Topics include: indoor air quality, greenhouse gases, dispersion modeling, acidification of lakes, sources apportionment modeling, chemistry of combustion, pollution sources and controls, and human exposure to air pollutants. Same as CVEN 4554.

College of Engineering & Applied Science | Civil Engineering | Environmental

CVEN-5555 (3) Structural Reliability

Explores principles and methods of structural reliability, and formulates bases for design to insure adequate safety and performance of elements and structural systems. Prerequisites: Requires pre-requisite course of CVEN 4525.

College of Engineering & Applied Science | Civil Engineering | Structures

CVEN-5565 (3) Life-Cycle Engineering of Civil Infrastructure Systems

Philosophical and analytical issues for lifetime design and operation of civil systems. Optimization tradeoffs of construction, management, and sustainability. Utility of operation and service, including present-value economic analysis. Decision-making alternatives of safety and performance, including hazards consideration. Recommended prereq., CVEN 3227 or equivalent.

College of Engineering & Applied Science | Civil Engineering | Structures

CVEN-5575 (3) Advanced Topics in Steel Design

Covers steel structure design and analysis. Includes plate girders, moment connections for beams, design of multistory frames, and other topics determined by class interest. Prereq., CVEN 4545 or equivalent. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Civil Engineering | Structures

CVEN-5585 (3) Advanced Topics in Reinforced Concrete Design

Covers design and analysis topics for prestressed concrete and/or reinforced concrete structures. Includes review of the current ACI design code, slabs, prestressed concrete, seismic design, folded plates and shells, finite element analysis, and other topics determined by class interest. Prereq., CVEN 4555 or equivalent. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Civil Engineering | Structures

CVEN-5628 (3) Seepage and Slopes

Covers fundamental principles of seepage in soils under both saturated and unsaturated conditions and limit equilibrium solution to slope stability problems. The seepage effects on slope stability are analyzed in detail and both conventional slope stability method and the finite element technique are applied to solving the engineering problems. Prereqs., CVEN 3708 and 3718 or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science Civil Engineering Geotechnical

CVEN-5678 (3) Soil Improvement and Reinforcement

Provides students with principles and working knowledge of design and construction procedures in soil stabilization, retaining structures, geosynthetics, and soil reinforcement. Prereq., CVEN 3718 or instructor consent.

College of Engineering & Applied Science Civil Engineering Geotechnical

CVEN-5688 (3) Environmental Geotechnics

Provides an understanding of the use of geotechnical concepts in the analysis and design of environmental systems. Focus is placed on the evaluation of waste containment facilities. Including relevant saturated, unsaturated, and multiphase flow mechanisms in cover and liner systems. Includes stability analyses for landfills and geosynthetic interface shear strength. Covers relevant aspects of mining geotechnics and remediation technologies of contaminated sites.

College of Engineering & Applied Science Civil Engineering Geotechnical

CVEN-5700 (3) Sustainability and the Built Environment

Same as CVEN 4700.

College of Engineering & Applied Science Civil Engineering Building Systems

CVEN-5708 (3) Soil Mechanics

Offers an advanced course in principles of soil mechanics. Coverage includes topics in continuum mechanics; elasticity, viscoelasticity, and plasticity theories applied to soils; the effective stress principle; consolidation; shear strength; critical state concepts; and constitutive, numerical, and centrifuge modeling. Prereq., CVEN 3718. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science Civil Engineering Geotechnical

CVEN-5718 (3) Mechanics and Dynamics of Glaciers

Same as CVEN 4718.

College of Engineering & Applied Science Civil Engineering Geotechnical

College of Engineering & Applied Science | Civil Engineering | Geotechnical

CVEN-5728 (3) Foundation Engineering

Same as CVEN 4728. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Civil Engineering | Geotechnical

CVEN-5738 (3) Applied Geotechnical Analysis

Studies applications of limiting equilibrium and limit plasticity analysis methods to stability problems in geotechnical engineering, such as slopes, lateral earth pressures on retaining structures, and bearing capacities of foundations. Also includes elastic and consolidation analysis of deformations in soil structures. Prereq., CVEN 5708 or instructor consent.

College of Engineering & Applied Science | Civil Engineering | Geotechnical

CVEN-5748 (3) Design of Earth Structures

Covers theory, design, and construction of earth embankments and waste facilities, including isolation systems. Uses published data, field exploration, and laboratory tests on soils and rock in investigating foundations and construction materials. Involves principles of compaction and settlement, permeability analysis, landslide recognition and control, use of composite clay, and liner systems. Prereq., CVEN 5708 or instructor consent.

College of Engineering & Applied Science | Civil Engineering | Geotechnical

CVEN-5758 (3) Flow Processes in Soils

Examines fundamental principles of flow through porous media and related engineering problems. Topics include the saturated seepage theory and flow nets; the unsaturated flow theory; suction-saturation and saturation-hydraulic conductivity relationships; nonlinear finite strain consolidation and desiccation theory; laboratory and field testing methods for determining material characteristics; and numerical models for flow-related engineering problems. Prereq., CVEN 3718 or instructor consent.

College of Engineering & Applied Science | Civil Engineering | Geotechnical

CVEN-5768 (3) Introduction to Rock Mechanics

Nature of rocks and rock masses; engineering properties of rock and rock mass; rock mass classifications; planes of weakness; application of rock mechanics to design of rock slopes, underground excavations, and foundations. Prereqs., CVEN 3708 and 3718, or instructor consent.

College of Engineering & Applied Science | Civil Engineering | Geotechnical

CVEN-5788 (3) Computational Modeling in Geotechnical Engineering

Introduces computational modeling for geotechnical engineering applications such as the Discrete Element Method (DEM) for granular materials, nonlinear Finite Element Analysis (FEA) of seepage, coupled soil elastoplastic consolidation, elastoplasticity models for soil and rock, and advanced computational methods for failure in soil and rock. Uses DEM, FEA, and other software programs for analysis. Prereq., CVEN 5708, or instructor consent.

College of Engineering & Applied Science Civil Engineering Geotechnical

CVEN-5798 (3) Dynamics of Soils and Foundations

Examines the behavior of soils and foundations subjected to self-excited vibrations and earthquake ground motions. Looks at principles of wave propagation in geologic media; in situ and laboratory determination of engineering properties for dynamic analysis; and applications of these principles and properties in design and analysis of foundations and earth structures subjected to dynamic loading. Prereq., CVEN 5708 or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science Civil Engineering Geotechnical

CVEN-5818 (3) Geotechnical Earthquake Engineering

Familiarizes students with the fundamentals of engineering seismology, soil and structural dynamics, and the modern practice of geotechnical earthquake engineering. Focuses on describing earthquake hazards and methods for seismic analysis and design. Recommended prereq., CVEN 5798. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science Civil Engineering Geotechnical

CVEN-5822 (3) Geographical Information Systems for Civil and Environmental Systems

Same as CVEN 4822.

College of Engineering & Applied Science Civil Engineering Surveying and Transportation

CVEN-5830 (3) Special Topics for Seniors/Grads

Prereq., instructor consent. May be repeated up to 9 total credit hours. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science Civil Engineering Building Systems

CVEN-5837 (3) Special Topics for Seniors/Grads

Supervised study of special topics of interest to students under instructor guidance. Prereq., instructor consent.

College of Engineering & Applied Science | Civil Engineering | Miscellaneous

CVEN-5849 (1-3) Independent Study

Available only through approval of graduate advisor. Subject arranged to fit needs of student. May be repeated up to 6 total credit hours.

College of Engineering & Applied Science | Civil Engineering | Special Topics

CVEN-5919 (3) Sustainable Community Development 1

Focuses on the fundamental tools necessary to address sustainable community development projects in low-income communities (LICs). Topics include: human development, sustainable development, and presentation of an integrative and participatory framework for development projects in LICs. The framework consists of a combination of development and engineering project management tools. Framework is illustrated through case studies and student-driven team projects. Restricted to senior or graduate students. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Civil Engineering | Special Topics

CVEN-5929 (3) Sustainable Community Development 2

Covers the principles, practices and strategies of appropriate technology as part of an integrated and systems approach to community-based development. Course content areas include technical issues in development, environmental health and communicable disease, appropriate and sustainable technologies with hands-on workshops, and global cooperation in development. Prereq., CVEN 5919. Restricted to seniors and graduate students.

College of Engineering & Applied Science | Civil Engineering | Special Topics

CVEN-5939 (3) Sustainable Community Development Field Practicum

Provides a supervised in-field practicum experience in which the student applies theories and concepts learned in Sustainable Community Development I and II (CVEN 5919 and 5929). Prereqs., CVEN 5919 and 5929 or instructor consent. Restricted to students with EDC sub-plan. Prerequisites: Restricted to students with EDC Sub-Plan.

College of Engineering & Applied Science | Civil Engineering | Miscellaneous

CVEN-6161 (3) Advanced Mechanics of Materials 2

Fundamentals of continuum mechanics, finite deformations, Lagrangian finite strains, Cauchy and Piola Kirchoff stress tensors, plasticity and thermo-elasticity, elements of damage mechanics, elements of fracture mechanics, rheological and viscoelastic theories, and modern experimental techniques. Recommended prereq., CVEN 5161.

College of Engineering & Applied Science | Civil Engineering | Mechanics

CVEN-6323 (3) Urban Stormwater Infrastructure Systems

Evaluation and design of more sustainable urban stormwater infrastructure systems including street inlets, on-line and off-line surface storage and infiltration systems. Integrated design for major, minor, and micro storms to provide flood control and drainage as well as control of pollution from stormwater runoff. Simulation and optimization models will be used.

College of Engineering & Applied Science | Civil Engineering | Fluid Mechanics & Water Resour

CVEN-6333 (3) Introduction to Multi-Scale Variability and Scaling in Hydrology

Provides a foundational physical understanding of channel networks, runoff, precipitation, and evapotranspiration at multiple spatial scales of drainage basins using modern analytical concepts for understanding non-linear phenomena, e.g., fractals, multifractals, statistical scaling, criticality, and renormalization. Prereq., CVEN 3313, 5333, 5454, and an upper-division course in probability, or equivalents.

College of Engineering & Applied Science | Civil Engineering | Fluid Mechanics & Water Resour

CVEN-6383 (3) Flow and Transport through Porous Media

Studies basic physics of flow and transport of water, air, and other fluid mixtures through a porous medium. Course topics are relevant to applications in contaminant hydrology, contaminant transport in aquifers, hazardous waste management, geohydrology, soil physics, and geoenvironmental engineering.

College of Engineering & Applied Science | Civil Engineering | Fluid Mechanics & Water Resour

CVEN-6393 (1) Hydrologic Sciences and Water Resources Engineering Seminar

Provides a broad introduction to a variety of research topics from hydrologic sciences and water resources engineering. Offered as a one-hour weekly seminar by the departmental water faculty, graduate students, and external speakers. Restricted to graduate students in engineering. Prerequisites: Restricted to graduate student Civil (CVEN) Engineering students only.

College of Engineering & Applied Science | Civil Engineering | Fluid Mechanics & Water Resour

CVEN-6404 (3) Advanced Aquatic Chemistry

Examines aquatic equilibria, corrosion, colloid and polymer chemistry, behavior of natural organic matter in engineered systems, and application of personal computers to model aquatic equilibria. Requires a term project. Prereq., CVEN 5402. Offered in the spring every other year. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Civil Engineering | Environmental

CVEN-6414 (3) Aquatic Surfaces and Particles

Examines the role of surfaces and particles in the fate and transport of contaminants in the aquatic environment. Emphasizes modeling of absorption, dissolution, precipitation, surface-catalyzed reactions, and coagulation and filtration kinetics. Prereqs., CVEN 5404 or GEOL 5280.

College of Engineering & Applied Science | Civil Engineering | Environmental

CVEN-6511 (3) Nonlinear Finite Element Analysis of Solids and Porous Media

Explores fundamental principles of thermodynamics, including first and second law of thermodynamics, thermophysical properties, power and refrigeration cycles, gas mixtures and psychrometrics. Prereq., PHYS 1110. coreq., APPM1360.

College of Engineering & Applied Science | Civil Engineering | Mechanics

CVEN-6525 (3) Nonlinear Analysis of Framed Structures

Motivated by Performance Based Engineering, this course provides students with the proper theoretical underpinnings of nonlinear static and dynamic analysis of framed structures along with, exposure to the corresponding programming techniques in Matlab. First part covers traditional topics related to plasticity; second part focuses on the finite element formulation (with emphasis on flexibility based ones) for geometric and Material nonlinearities; nonlinear pushover and transient analysis of frame structures. Prereq., CVEN 4525/5525 or equivalent; proficiency in Matlab.

College of Engineering & Applied Science | Civil Engineering | Structures

CVEN-6595 (3) Earthquake Engineering

Analyzes and designs structures for earthquake loadings. Gives attention to earthquake ground motions, attenuation laws, and seismic hazard analysis. Also involves numerical methods for time-domain and frequency-domain analysis, response of linear and nonlinear structures, elastic and inelastic response spectra, construction of design spectra, soil-structure interaction analysis, and seismic design methods and building code requirements. Prereq., CVEN 5111 or equivalent. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Civil Engineering | Structures

CVEN-6834 (1-3) Special Topics

College of Engineering & Applied Science | Civil Engineering | Environmental

CVEN-6940 (1) Master's Degree Candidate

College of Engineering & Applied Science | Civil Engineering | Building Systems

CVEN-7111 (3) Advanced Structural Dynamics

Includes general vibrations of civil engineering structures and their response to various types of time-dependent loads. Prereq., CVEN 5111.

College of Engineering & Applied Science | Civil Engineering | Mechanics

CVEN-7141 (3) Plates and Shells

Teaches mathematical theories of plate and shell structures and their applications. Involves numerical finite element solutions of plates and shells of various shapes under static and dynamic loadings. Prereq., CVEN 5121 or 7131.

College of Engineering & Applied Science | Civil Engineering | Mechanics

CVEN-7161 (3) Fracture Mechanics

This course has three parts. The first covers fundamentals through rigorous mathematical formulations of linear and nonlinear elastic fracture mechanics. The second focuses on materials: theoretical strength, metals, granular materials, polymers, and steel. The third covers numerical (finite element) methods in fracture mechanics. Heavy emphasis is placed on project and independent work. Prereq., CVEN 5121.

College of Engineering & Applied Science | Civil Engineering | Mechanics

CVEN-7206 (1) CEM PhD Seminar

Examines emerging research in construction engineering and management. Students will consider and comment on research methods and designs based on their own work and that of CU faculty and other leading researchers. Aims to make CEM Ph.D students better researchers and evaluators of research methods and processes.

College of Engineering & Applied Science | Civil Engineering | Construction

CVEN-7511 (3) Computational Mechanics of Solids and Structures

Looks at finite element methodology for geometric and material nonlinearities. Involves incremental formulations and iterative solution strategies for truly finite increments and quasistatic and dynamic applications to large deformation and inelastic problems. Prereqs., CVEN 5511 or 6525.

College of Engineering & Applied Science | Civil Engineering | Mechanics

CVEN-7565 (3) Inelastic Theory of Structures

Examines inelastic behavior of materials, including calculation of ultimate capacity of perfectly plastic structures by use of upper- and lower-bound theorems. Looks at theories of inelastic action as applied to structural design in steel and concrete and elements of theory of plasticity with applications in ultimate analysis of plates, shells, and continuous bodies. Prereq., CVEN 3505.

[College of Engineering & Applied Science](#)
[Civil Engineering](#)
[Structures](#)

CVEN-7595 (3) Earthquake Engineering

Analysis and design of structures for earthquake loadings. Earthquake ground motions, attenuation laws, and seismic hazard analysis. Numerical methods for time-domain and frequency-domain analysis response of linear and nonlinear structures. Elastic and inelastic response spectra, and construction of design spectra. Soil-structure interaction analysis. Seismic design methods and building code requirements. Prereq., CVEN 5111 or equivalent.

[College of Engineering & Applied Science](#)
[Civil Engineering](#)
[Structures](#)

CVEN-7718 (3) Engineering Properties of Soils

Considers constitutive behavior of cohesive and cohesionless soils including stress-strain, strength, pore water pressure, and volume change behavior under drained and undrained loading conditions. Also includes linear and nonlinear analysis techniques and determination of constitutive properties in the laboratory. Prereq., CVEN 5708 or instructor consent.

[College of Engineering & Applied Science](#)
[Civil Engineering](#)
[Geotechnical](#)

CVEN-7788 (3) Soil Behavior

Topics include soil mineralogy, formation of soils through sedimentary processes and weathering, determination of soil composition, soil water, colloidal phenomena in soils, fabric property relationships, analysis of mechanical behavior including compressibility, strength and deformation, and conduction phenomena in terms of physicochemical principles. Involves applications for stabilization and improvement of soils, and disposal of waste materials. Prereq., CVEN 3718 or instructor consent.

College of Engineering & Applied Science | Civil Engineering | Geotechnical

CVEN-8990 (1-10) Doctoral Thesis

A minimum of 30 credit hours is required.

AREN-4317 (5) Architectural Engineering Design

Provides a capstone experience to AREN students. Students design a modest commercial building and complete an integrated engineering design of the building systems executed for the conceptual, schematic, and design development phases. Students' teams work on structural, mechanical, electrical/lighting, and construction engineering management design. Each stage produce a professional-quality design document. Faculty and industry mentors participate in the teaching and evaluation of designs. Prerequisites: Requires pre-requisite courses of AREN 3010, CVEN 3246, CVEN 3525, and AREN 3540 (all min grade C-). Requires a pre-requisite or co-requisite course of AREN 4570.

ECEN-1400 (3) Introduction to Digital and Analog Electronics

Introduces fundamental concepts in electrical and computer engineering such as Ohm's Law, capacitors, Leds and 7-segment displays, transformers and rectifiers, digital logic, Fourier decomposition, frequency analysis. Lab work exposes students to commonly used instrumentation. Includes a final project. Skills in wiring, soldering and wire-wrapping are developed. Coreq., APPM 1350.

ECEN-1500 (3) Sustainable Energy

Explores how energy is created and used in today's society. Through collaborative discussion and hands-on data collection, students will analyze the engineering challenges, fundamental limits, and potential solutions to meeting our energy needs sustainably. Students will learn to analyze numerical data, estimate orders, of magnitude, and apply mathematical methods in their own lives and in the ongoing energy debate. Basic algebra required. Restricted to non-engineering majors. Approved for arts and sciences core curriculum: quantitative reasoning and mathematical skills.

ECEN-2250 (3) Introduction to Circuits and Electronics

Introduces linear circuit analysis and design, including extensive use of OP amps. Presents DC networks, including node and mesh analysis with controlled sources. Analysis of RL and RC circuits for both transient and sinusoidal steady-state responses using phasors. Prereq., APPM 1360. Coreq., APPM 2360. Prerequisites: Restricted to College of Engineering majors only.

ECEN-4423 (3) Chaotic Dynamics

Explores chaotic dynamics theoretically and through computer simulations. Covers the standard computational and analytical tools used in nonlinear dynamics and concludes with an overview of leading-edge chaos research. Topics include time and phase-space dynamics, surfaces of section, bifurcation diagrams, fractal dimension, and Lyapunov exponents. Prereqs., two semesters calculus, ECEN 1030 or CSCI 1300 or equivalent, and PHYS 1110. Recommended prereqs., PHYS 1120, CSCI 3656, and MATH 3130. Same as CSCI 4446 and ECEN 5423.

| | | |
|--|-----------------------------------|------------------------------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | Computer and Digital Systems |
|--|-----------------------------------|------------------------------|

ECEN-4553 (3) Compiler Construction

Introduces the principles and techniques for compiling high-level programming languages to assembly code. Topics include parsing, instruction selection, register allocation, and compiling high-level features such as polymorphism, first-class functions, and objects. Students build a complete compiler for a simple language. Prereqs., ECEN 2703 and ECEN 3350. Same as CSCI 4555 and ECEN 5523. Prerequisites: Restricted to College of Engineering majors only.

| | | |
|--|-----------------------------------|------------------------------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | Computer and Digital Systems |
|--|-----------------------------------|------------------------------|

ECEN-4583 (3) Software System Development

Lectures deal with techniques for product requirements definition, project planning, coding, verification, validation, performance evaluation, and maintenance of medium-scale (2-3000 line) systems. Primary emphasis is on practical application of these techniques to a specified software project. Students work in teams to produce appropriate documents for each phase and are responsible for project completion according to specification and schedule. Course project is written in C on a Unix look-alike system; prior knowledge of C or Unix is not required. Prereq., CSCI 2270 or instructor consent.

| | | |
|--|-----------------------------------|------------------------------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | Computer and Digital Systems |
|--|-----------------------------------|------------------------------|

ECEN-4613 (3) Embedded System Design

Introduces system hardware and firmware design for embedded applications. Students independently design and develop a hardware platform encompassing a microcontroller and peripherals. Firmware is developed in C and assembly. A significant final project is designed, developed, documented, and presented. Prereqs., ECEN 2350 and 3350, or instructor consent. Recommended prereqs., ECEN 3250 and 4593. Same as ECEN 5613. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Engineering majors only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Computer and Digital Systems

ECEN-4623 (3) Real-Time Embedded Systems

Design and build a microprocessor-based embedded system application requiring integration of sensor/actuator devices, a real-time operating system and application firmware and software. Real-time rate monotonic theory and embedded architecture are covered. Prereq., ECEN 2350 and ECEN 3350, or instructor consent. Recommended prereq., ECEN 4613. Same as ECEN 5623. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Engineering majors only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Computer and Digital Systems

ECEN-4633 (3) Hybrid Embedded Systems

Introduces system hardware and design techniques for embedded and hybrid reconfigurable systems. Intended for those interested in developing projects using hardware description languages to build application-specific computing systems. Industry standards are used for design, development, and debugging. Prereqs., ECEN 2350, 3350, and 4593, or equivalent. Same as ECEN 5633. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Engineering majors only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Computer and Digital Systems

ECEN-4643 (3) SW Engineering of Concurrent Systems

Addresses engineering of applications requiring multiple software processes running concurrently, sharing data, and communicating as a system in a single environment. Topics include performance analysis of architecture design; analysis of requirements, design and testing of synchronization and communication; the interplay of system design and performance with the impact of memory management, input/output, and file system support. Prereq., ECEN 4583 or 5543. ECEN 4643 and 5643 are the same course. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior).

College of Engineering & Applied Science | Electrical & Computer Engineering | Computer and Digital Systems

ECEN-4653 (3) Real-Time Digital Media

Learn how to design and build Linux-based real-time system applications for digital media encode/decode and transport. Course focus is on the process as well as fundamentals of designing, coding, and testing Linux-based real-time systems often used in industry for digital media systems. Students use POSIX kernel-mapped threads and drivers to implement real-time digital media solutions. Prereqs., ECEN 1030 or CSCI 1300, and CSCI 3753 or equivalent. Restricted to engineering students. ECEN 4653 and 5653 are the same course.

College of Engineering & Applied Science | Electrical & Computer Engineering | Computer and Digital Systems

ECEN-4743 (3) SW Engineering of Distributed Systems

Addresses engineering of networked applications and self-contained embedded system products involving multiple processors. The fundamental concepts of software engineering are complicated by an application running simultaneously and asynchronously on multiple processors over a network. Topics: specification, analysis, design, and testing of distributed components including concerns of security, synchronization, transaction coordination, data replication, web services, and service oriented architectures. Prereq., ECEN 4583 or 5543 or CSCI 5548. Recommended prereq., ECEN 5643. ECEN 4743 and 5743 are the same course. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior).

| | | |
|--|-----------------------------------|------------------------------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | Computer and Digital Systems |
|--|-----------------------------------|------------------------------|

ECEN-4753 (3) Computer Performance Modeling

Presents a broad range of system modeling techniques, emphasizing applications to computer systems. Covers stochastic processes, queuing network models, stochastic Petri nets, and simulation (including parallel processing techniques). Prereq., CSCI 3753 or equivalent and second-semester calculus. Recommended prereq., a course in statistics. Same as CSCI 4753, 5753, and ECEN 5753.

|--|-----------------------------------|------------------------------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | Computer and Digital Systems |
|--|-----------------------------------|------------------------------|

ECEN-5322 (3) Search Engine & Analysis of High-dimensional Dataset

Provides students with an exposition of the novel algorithmic methods for searching and analyzing big data. The class includes a project: students design a content-based music information retrieval system similar to those used by Gracenote, Shazam, or Pandora. Restricted to graduate students. Prerequisites: Restricted to Graduate Students only.

| | | |
|--|-----------------------------------|------------------------------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | Computer and Digital Systems |
|--|-----------------------------------|------------------------------|

ECEN-5423 (3) Chaotic Dynamics

Same as ECEN 4423 and CSCI 5446.

| | | |
|--|-----------------------------------|------------------------------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | Computer and Digital Systems |
|--|-----------------------------------|------------------------------|

ECEN-5503 (3) Computer Systems Design and Architecture

Covers digital logic circuits, assembly language programming, and gate-level computer design and architecture. Also discusses computer arithmetic algorithms, I/O, peripheral device performance, networking, and the Internet. Limited to graduate students. For ECE/CS majors with nontraditional backgrounds.

College of Engineering & Applied Science | Electrical & Computer Engineering | Computer and Digital Systems

ECEN-5523 (3) Compiler Construction

Same as ECEN 4553 and CSCI 5525. Prerequisites: Restricted to any graduate students or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Computer and Digital Systems

ECEN-5533 (3) Fundamental Concepts of Programming Languages

Considers concepts common to a variety of programming languages--how they are described (both formally and informally) and how they are implemented. Provides a firm basis for comprehending new languages and gives insight into the relationship between languages and machines. Prereq., CSCI 3155 or instructor consent. Same as CSCI 5535.

College of Engineering & Applied Science | Electrical & Computer Engineering | Computer and Digital Systems

ECEN-5543 (3) Software Engineering of Standalone Programs

Applies engineering principles to phases of software product development, project planning, requirements definition, design, design patterns, validation, and maintenance. Emphasizes practical methods for communicating and verifying definitions and designs--prototyping, inspections, and modeling (primarily UML). Includes relation to embedded systems and object-oriented design. Prereqs., ECEN 1030/CSCI 1300, CSCI 2270, or instructor consent. Same as CSCI 5548. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Computer and Digital Systems

ECEN-5553 (3) Parallel Processing

Examines a range of topics involved in using parallel operations to improve computational performance. Discusses parallel architectures, parallel algorithms and parallel programming languages. Architectures covered include vector computers, multiprocessors, network computers, and data flow machines. Prereq., background in computer organization, introduction to programming languages, elementary numerical analysis, ECEN 4593 and CSCI 3656, or instructor consent. Same as CSCI 5551.

ECEN-2270 (3) Electronics Design Lab

Provides an introduction to analysis, modeling, design, and testing of analog electronic circuits in a practical laboratory setting. The laboratory is centered around a robot platform and includes design, Spice simulations, prototyping and testing of circuits necessary to drive and remote control the robot. Coreq., ECEN 2260. Prerequisites: Restricted to College of Engineering majors only.

[College of Engineering & Applied Science](#) [Electrical & Computer Engineering](#) [General](#)

[Privacy](#) • [Legal & Trademarks](#)

ECEN-2350 (3) Digital Logic

Covers the design and applications of digital logic circuits, including combinational and sequential logic circuits. Laboratory component introduces simulation and synthesis software and hands-on hardware design. Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) College of Engineering students only. Prereq., ECEN 1030 or CSCI 1300. Prerequisites: Requires pre-requisite course of ECEN 1030 or CSCI 1300 (minimum grade C-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) College of Engineering students only.

ECEN-2420 (3) Electronics for Wireless Systems

Explores fundamental principles behind the operation of a radio, including a practical introduction to circuit elements. The course covers the components and operation of a radio (transmitter and receiver) with simple signals. Students learn through demos the practical basic properties of all needed components with an introduction to principles of operation. Prereqs., PHYS 1120, and APPM 1360 or MATH 2300. Restricted to EN majors. Prerequisites: Restricted to Electrical and Computer Engineering or Electrical Engineering majors only.

ECEN-4242 (3) Communication Theory

Covers modern digital and analog communication systems, Fourier analysis of signals and systems, signal transmission, amplitude modulation, angle modulation, digital communication systems, and behavior of communication systems in the presence of noise, including both analog and digital systems. Prereqs., ECEN 3300 and ECEN 3810 or equivalent. Prerequisites: Restricted to College of Engineering majors only.

[College of Engineering & Applied Science](#)
[Electrical & Computer Engineering](#)
[Communications](#)

ECEN-4532 (3) Digital Signal Processing Laboratory

Develops experience in code development, debugging, and testing of real-time digital signal processing algorithms using dedicated hardware. Applications include filtering, signal synthesis, audio special effects, and frequency domain techniques based on the Fast Fourier Transform. Prereq., ECEN 3300. Coreq., ECEN 4632. Same as ECEN 5532.

College of Engineering & Applied Science | Electrical & Computer Engineering | Communications

ECEN-4593 (3) Computer Organization

Studies computer design at the gate level. Discusses instruction set architecture design, arithmetic and logic unit design, control logic, memory design and caches, simple pipelining, I/O, and peripheral devices. Briefly covers aspects of modern computer architecture, such as multicore processors and cache coherence for these. Prereq., ECEN 2350, and ECEN 3350 or CSCI 2400. Same as CSCI 4593. Prerequisites: Restricted to College of Engineering majors only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Communications

ECEN-4632 (3) Introduction to Digital Filtering

Covers both the analysis and design of FIR and IIR digital filters. Discusses implementations in both software and hardware. Emphasizes use of the FFT as an analysis tool. Includes examples in speech processing, noise canceling, and communications. Prereq., ECEN 3300. Restricted to seniors.

College of Engineering & Applied Science | Electrical & Computer Engineering | Communications

ECEN-4652 (3) Communication Laboratory

Involves laboratory experiments demonstrating material taught in ECEN 4242. Uses spectrum analysis to study baseband signals and signal processors. Topics include noise, AM, FM, PM, sampling, quantizing/encoding, TDM, FDM, equalizers, and a complete communication system. Prereq. or coreq., ECEN 4242. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Engineering majors only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Communications

ECEN-5012 (3) Special Topics

Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Communications

ECEN-5122 (3) Wireless Local Area Networks

Examines small-scale wireless networks particularly personal and local area networks. Covers licensed and unlicensed spectrum, indoor and small-scale radio propagation, modulation techniques, network topologies, ad hoc and infrastructure networks, protocol design, TCP/IP-wireless interactions, and protocol standards. Prereq., ECEN 3810 or APPM 3570 or MATH 4510. Recommended prereq., TLEN 5430. Same as TLEN 5520.

| | | |
|--|-----------------------------------|----------------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | Communications |

ECEN-5532 (3) Digital Signal Processing Laboratory

Same as ECEN 4532.

| | | |
|--|-----------------------------------|----------------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | Communications |
|--|-----------------------------------|----------------|

ECEN-5612 (3) Noise and Random Processes

Reviews probability theory, convergence and probability bounds, multivariable normal theory, sequences of random variables and stochastic processes, Bernoulli and Poisson processes, wide-sense stationary processes, and correlation functions and power spectra. Also includes linear systems with random inputs and Gauss-Markov processes, first- and second-order properties of Arma processes, and Markov chains. Prereqs., ECEN 3300 and 3810 or MATH 4510. Prerequisites: Restricted to any graduate students or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

| | | |
|--|-----------------------------------|----------------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | Communications |
|--|-----------------------------------|----------------|

ECEN-5622 (3) Information Theory and Coding

Entropy rates of information sources, fundamental limits of data compression, Huffman and arithmetic codes; mutual information, fundamental limits of information transmission over noisy communication channels with/without feedback. Selected topics in information storage, lossy data compression, and network information theory. Prereqs., ECEN 3810 or equivalent, or instructor consent. Prerequisites: Restricted to any graduate students or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

| | | |
|--|-----------------------------------|----------------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | Communications |
|--|-----------------------------------|----------------|

ECEN-5632 (3) Theory and Application of Digital Filtering

Digital signal processing and its applications are of interest to a wide variety of scientists and engineers. The course covers such topics as characterization of linear discrete-time circuits by unit pulse response, transfer functions, and difference equations, use of z-transforms and Fourier analysis, discrete Fourier transform and fast algorithms (FFT), design of finite and infinite impulse response filters, frequency transformations, study of optimized filters for deterministic signals. Prerequisites: Restricted to any graduate students or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

| | | |
|--|-----------------------------------|----------------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | Communications |
|--|-----------------------------------|----------------|

ECEN-5652 (3) Detection and Extraction of Signals from Noise

Introduces detection, estimation, and time series analysis. Topics include hypothesis testing, detection of known form and random signals, least squares parameter estimation, maximum likelihood theory, minimum mean-squared error estimation, Kalman-Wiener filtering, prediction in stationary time series, and modal analysis. Applications include studies in communications, control, and experimental modeling. Prereq., ECEN 5612.

| | | |
|--|-----------------------------------|----------------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | Communications |
|--|-----------------------------------|----------------|

ECEN-5672 (3) Digital Image Processing

Course objective is to present the fundamental techniques available for image representation and compression (e.g., wavelets), filtering (e.g., Wiener and nonlinear filter), and segmentation (e.g., anisotropic diffusion). Prereq., ECEN 5632 or instructor consent.

College of Engineering & Applied Science | Electrical & Computer Engineering | Communications

ECEN-5682 (3) Theory and Practice of Error Control Codes

Block and convolutional codes for reliable transmission of digital data over unreliable noisy channels. Algebraic and dsp characterizations of cyclic codes such as Bch/Rs codes. Decoding algorithms for block codes and the Viterbi algorithm. Graph codes and iterative decoding. Prereq., ECEN 3300.

College of Engineering & Applied Science | Electrical & Computer Engineering | Communications

ECEN-5692 (3) Principles of Digital Communication

Techniques for efficient and reliable transmission of information over bandwidth and power constrained communication channels; digital modulation methods, power spectral density calculations, optimum receiver principles, error rate analysis, channel coding potential in wired/wireless media, trellis coded modulation, and equalization. Prereqs., ECEN 3300 and 5612 or equivalents. Recommended prereqs., ECEN 5622 and 5632.

Same as ECEN 5024.

[College of Engineering & Applied Science](#)
[Electrical & Computer Engineering](#)
[Electromagnetics](#)

ECEN-4224 (3) High Speed Digital Design

Covers fundamentals of high-speed properties of: logic gates, measurement techniques, transmission lines, ground planes and layer stacking, terminations, vias, power systems, connectors, ribbon cables, clock distribution and clock oscillators. Prereq., ECEN 3400. Recommended prereq., ECEN 3410. Same as ECEN 5224.

[College of Engineering & Applied Science](#)
[Electrical & Computer Engineering](#)
[Electromagnetics](#)

ECEN-4324 (3) Fundamentals of Microsystem Packaging

Introduction to the fundamentals of microsystems packaging. This is a seminar style course which surveys topics in microsystem packaging such as: electrical package design, design for reliability,

thermal management, multichip packaging, IC Assembly, sealing and encapsulation, and board assembly. Coreq., ECEN 3410 or instructor consent. Same as ECEN 5324. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Engineering majors only.

| | | |
|--|-----------------------------------|------------------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | Electromagnetics |
|--|-----------------------------------|------------------|

ECEN-4634 (3) Microwave and RF Laboratory

Introduce RF and microwave measurement methods. A laboratory course whose experiments build on material learned in ECEN 3410 (Electromagnetic Waves and Transmission): electromagnetic waves, transmission lines, waveguides, time-domain reflection, frequency-domain measurement, microwave networks, impedance matching, antenna pattern measurement, radar, and simple nonlinear concepts such as harmonics, square-law detection, mixing and transmitter/receiver applications. Prereq., ECEN 3410. Same as ECEN 5634. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

| | | |
|--|-----------------------------------|------------------|

|--|-----------------------------------|------------------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | Electromagnetics |
|--|-----------------------------------|------------------|

ECEN-5104 (3) Computer-Aided Microwave Circuit Design

Emphasizes the design of strip-line and microstrip circuits, using a CAD package. Discusses design of impedance transformers, amplifiers, switches, phase-shifters, etc. Assignments include design of typical circuits and their analysis using a microwave circuit analysis program. Laboratory includes measurements using a network analyzer facility on a typical circuit designed and fabricated by students. Prereq., ECEN 3410. Prerequisites: Restricted to graduate students in Electrical Engineering (EEEN) or Electrical/Computer Engineering (ECEN) or Electrical Engineering Concurrent or Electrical/Computer Engineering Concurrent Degree students only.

| | | |
|--|-----------------------------------|------------------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | Electromagnetics |
|--|-----------------------------------|------------------|

ECEN-5114 (3) Waveguides and Transmission Lines

Intermediate course dealing with guided-wave systems at HF, microwave, and optical frequencies. Modern waveguiding structures, including circular metallic waveguides, microstrip transmission lines, and optical waveguides are treated. Additional material may include waveguide losses, excitation of waveguides, microwave network theory, coupled-mode theory, resonators, and pulse propagation in waveguides. Prereq., ECEN 3410.

| | | |
|--|-----------------------------------|------------------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | Electromagnetics |
|--|-----------------------------------|------------------|

ECEN-5134 (3) Electromagnetic Radiation and Antennas

Covers elementary sources and antennas, cylindrical wire antennas, loop antennas, radiation patterns and antenna gain, aperture sources such as horns and dishes, specialized antennas such as microstrip patches, linear and circular arrays, mutual coupling and ground effects, ray and numerical formulations, transmission formulas, and antenna applications. Prereq., ECEN 3410. Prerequisites: Restricted to any graduate students or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

| | | |
|--|-----------------------------------|------------------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | Electromagnetics |
|--|-----------------------------------|------------------|

ECEN-5154 (3) Computational Electromagnetics

Provides a computational study of microwave circuits and antennas, using finite-difference, finite-element, and moment methods. Requires students to develop algorithms, write and execute programs, and prepare reports analyzing results. Circuits include waveguides, microstrip lines, and center-fed dipole antennas. Prereq., ECEN 3410.

College of Engineering & Applied Science | Electrical & Computer Engineering | Electromagnetics

ECEN-5224 (3) High Speed Digital Design

Same as ECEN 4224.

College of Engineering & Applied Science | Electrical & Computer Engineering | Electromagnetics

ECEN-5254 (3) Remote Sensing Signals and Systems

Examines passive and active techniques for remote sensing with emphasis on fundamental noise and detection issues from radio to optical frequencies. Emphasis is placed on electromagnetic wave detection, statistical signal and noise analysis, remote sensing system architecture, and hardware for remote sensing systems. Systems studied include radiometers, radars (real and synthetic aperture), interferometers, and lidars. Applications to detection and surveillance, Earth remote sensing, astronomy, and imaging systems are covered. Prereqs., ECEN 3300 and 3400, or instructor consent.

College of Engineering & Applied Science | Electrical & Computer Engineering | Electromagnetics

ECEN-5264 (3) Electromagnetic Absorption, Scattering, and Propagation

Electromagnetic waves in communication, navigation, and remote sensing systems from radio to optical frequencies, including propagation in deterministic and random media. Topics include absorption and refraction by gases, discrete scattering by precipitation, clouds, and aerosols, continuous scattering by refractivity fluctuations, earth-space propagation and Faraday rotation in plasmas, and radiative transfer theory.

College of Engineering & Applied Science | Electrical & Computer Engineering | Electromagnetics

ECEN-5274 (3) Radar Science and Techniques

Studies atmospheric radar fundamentals. Examines scattering by precipitation and atmospheric turbulence; long-wavelength radars and the dynamics of the middle and upper atmosphere; design of meteorological and clear-air radars; profiling tropospheric winds, temperature, and humidity by radar and radiometry; and ionospheric sounding using ionosondes and incoherent-scatter radars. Prereq., ECEN 5254 or instructor consent.

College of Engineering & Applied Science | Electrical & Computer Engineering | Electromagnetics

ECEN-5324 (3) Fundamentals of Microsystem Packaging

Same as ECEN 4324. Prerequisites: Restricted to any graduate students or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Electromagnetics

ECEN-5634 (3) Graduate Microwave and RF Laboratory

Introduce RF and microwave measurement methods. A laboratory course whose experiments build on material learned in ECEN 3410 (Electromagnetic Waves and Transmission): electromagnetic waves, transmission lines, waveguides, time-domain reflection, frequency-domain measurement, microwave networks, impedance matching, antenna pattern measurement, radar, and simple nonlinear concepts such as harmonics, square-law detection, mixing and transmitter/receiver applications. Prereq., ECEN 3410. Restricted to graduate students. Same as ECEN 4634.

Prerequisites: Restricted to any graduate students or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Electromagnetics

ECEN-6144 (3) Electromagnetic Boundary Problems

Provides mathematical and physical fundamentals necessary for the systematic analysis of electromagnetic fields problems. Covers basic properties of Maxwell's equations, potentials and jump conditions; scattering and diffraction by canonical structures; Green's functions, integral equations and approximate methods. Requires some maturity in electromagnetics. Prereq., ECEN 5114 or 5134 or instructor consent. Prerequisites: Restricted to graduate students in Electrical Engineering (EEEN) or Electrical/Computer Engineering (ECEN) or Electrical Engineering Concurrent or Electrical/Computer Engineering Concurrent Degree students only.

ECEN-3010 (3) Circuits and Electronics for Mechanical Engineers

Covers analysis of electrical circuits by use of Ohm's law, network reduction, node and loop analysis, Thevenin's and Norton's theorems, DC and AC signals, transient response of simple circuits, transfer functions, basic diode and transistor circuits, and operational amplifiers. Includes introductory digital electronics and microprocessors/microcontrollers. Prereqs., APPM 2360 and PHYS 1140. Same as MCEN 3017. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) Mechanical Engineering (MCEN) or Environmental Engineering (EVEN) majors.

ECEN-3030 (3) Electrical/Electronic Circuits Non-Major

For students not majoring in electrical engineering. Covers analysis of electric circuits by use of Ohm's law; network reduction; super position; node and loop analysis; Thevenin's and Norton's theorems; sinusoidal signals; phasors; power in ac circuits; transient response of simple circuits; operational amplifiers; logic circuits; and flip-flops. Prereq., APPM 2360. Restricted to nonmajors. Same as GEEN 3854. Prerequisites: Electrical/Computer Engineering Majors, Electrical Engineering Majors or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree Majors are restricted from taking this course.

ECEN-3070 (3) Edges of Science

Examines the evidence for paranormal phenomena, reasons for skepticism, and physical models that could account for the data. Reviews controversial scientific theories that overcame barriers to acceptance, and how worldviews shift. Considers the scientific method and ways uncontrolled factors might influence experiments. Develops skills in statistical analysis of data. Includes group projects testing for anomalous and parapsychological effects. Not accepted as a technical elective for engineering majors. Prereq., MATH 1011 or equivalent.

[College of Engineering & Applied Science](#) [Electrical & Computer Engineering](#) [General](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

ECEN-3170 (3) Energy Conversion 1

Introduces block diagrams, conventional/renewable energy sources, power electronics, magnetic circuits, transformers and power systems, forces/torques of electric machines. Employs a top-down approach to present applications first and then discuss components. Uses Pspice, Mathematica, Matlab. Prereq., PHYS 1120. Coreq., ECEN 3250. Prerequisites: Restricted to College of Engineering majors only.

[College of Engineering & Applied Science](#) [Electrical & Computer Engineering](#) [General](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

ECEN-3250 (3) Microelectronics

Develops a basic understanding of active semiconductor devices. Focuses on building an understanding of BJT and CMOS devices in both digital and analog application. Prereq., ECEN 2260. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

[College of Engineering & Applied Science](#) [Electrical & Computer Engineering](#) [General](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

ECEN-3300 (3) Linear Systems

Characterization of linear and time-invariant systems in time and frequency domains. Continuous time systems are analyzed using differential equations and Laplace and Fourier transforms. Discrete time systems, which can be implemented using a modern digital signal processing framework, use difference equations, z-transforms and discrete time Fourier transforms for their analysis and design. Applications of linear systems include communications, signal processing, and control systems. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

ECEN-3303 (3) Introduction to Robotics

Introduces students to fundamental concepts in autonomous, mobile robotics: mechanisms, locomotion, kinematics, control, perception and planning. The course consists of lectures and lab sessions that are geared toward developing a complex robot controller in a realistic, physics-based multi-robot simulator. Prereqs., CSCI 2270 and 2824. CSCI 3302 and ECEN 3303 are the same course.

[College of Engineering & Applied Science](#)
[Electrical & Computer Engineering](#)
[Computer and Digital Systems](#)

ECEN-3320 (3) Semiconductor Devices

Highlights the fundamentals of semiconductor materials and devices. Topics include the electrical and optical properties of semiconductors, the theory of Pn junctions, bipolar and field-effect transistors, and optoelectronic devices. Prereq., ECEN 3250. Prerequisites: Restricted to College of Engineering majors only.

[College of Engineering & Applied Science](#)
[Electrical & Computer Engineering](#)
[General](#)

ECEN-3350 (3) Programming Digital Systems

Covers computer usage in system implementation, central processor capabilities, and managing concurrency. Includes computer architecture, instruction sets, programming, input/output, interrupts, block transfers, semaphores, shared procedures, multiple processors, and memory management. Prereq., ECEN 2350. Formerly ECEN 2120. Prerequisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) College of Engineering students only.

[College of Engineering & Applied Science](#)
[Electrical & Computer Engineering](#)
[General](#)

ECEN-3400 (3) Electromagnetic Fields and Waves

Electromagnetic fields are covered at an introductory level, starting with electrostatics and continuing with DC current, magnetostatics, time-varying magnetic fields, waves on transmission lines, Maxwell's equations and the basics of plane waves. The use of fields in inductors, capacitors, resistors, transformers, and energy and power concepts are studied. Prereqs., APPM 2350, PHYS 1110, and ECEN 2250. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

College of Engineering & Applied Science | Electrical & Computer Engineering | General

ECEN-3410 (3) Electromagnetic Waves and Transmission

Covers reflected and transmitted plane waves in layered media, Poynting's theorem of electromagnetic power, two-conductor transmission line theory and practice, Smith chart usage and impedance matching, and elements of antenna theory. Prereq., ECEN 3400. Restricted to juniors/seniors. Prerequisites: Restricted to students with 57-180 credits (Juniors or Seniors).

College of Engineering & Applied Science | Electrical & Computer Engineering | General

ECEN-3810 (3) Introduction to Probability Theory

Covers the fundamentals of probability theory, and treats the random variables and random processes of greatest importance in electrical engineering. Provides a foundation for study of communication theory, control theory, reliability theory, optics, and portfolio analysis. Prereqs., APPM 2350 and 2360. Credit not granted for this course and MATH 4510 or APPM 3570. Prerequisites: Restricted to College of Engineering majors only.

College of Engineering & Applied Science | Electrical & Computer Engineering | General

ECEN-3840 (1-6) Independent Study

Offers an opportunity for juniors to do independent, creative work. Numbered ECEN 3840-3849. Prereq., instructor consent.

College of Engineering & Applied Science | Electrical & Computer Engineering | General

ECEN-3930 (6) ECE Co-op Education

Participate in a cooperative education program working with a corporate or government entity. Individual assignments are arranged between the department and the outside employer. This course is offered only through Continuing Education. May be repeated up to 24 credit hours. Prereq., ECEN 2120, 2260, minimum GPA of 2.85 required. Restricted to sophomore, junior and senior EEEN and ECEN majors.

College of Engineering & Applied Science | Electrical & Computer Engineering | General

ECEN-4000 (3) Special Topics

College of Engineering & Applied Science | Electrical & Computer Engineering | General

ECEN-4001 (1-4) Special Topics

Credit and subject matter to be arranged. Numbered ECEN 4001-4049. Prerequisites vary.

College of Engineering & Applied Science | Electrical & Computer Engineering | Bioengineering

ECEN-4002 (1-4) Special Topics

College of Engineering & Applied Science | Electrical & Computer Engineering | Communications

ECEN-4006 (1-4) Special Topics

College of Engineering & Applied Science | Electrical & Computer Engineering | Optics

ECEN-4009 (1-4) Special Topics

College of Engineering & Applied Science | Electrical & Computer Engineering | VLSI CAD Methods

ECEN-4011 (1-4) Special Topics

Same as ECEN 5011.

College of Engineering & Applied Science | Electrical & Computer Engineering | Bioengineering

ECEN-4012 (1-4) Special Topics

College of Engineering & Applied Science | Electrical & Computer Engineering | Communications

ECEN-4013 (1-4) Special Topics

College of Engineering & Applied Science | Electrical & Computer Engineering | Computer and Digital Systems

ECEN-4016 (1-4) Special Topics

College of Engineering & Applied Science | Electrical & Computer Engineering | Optics

ECEN-4017 (1-4) Special Topics

College of Engineering & Applied Science | Electrical & Computer Engineering | Power

ECEN-4018 (1-4) Special Topics

College of Engineering & Applied Science | Electrical & Computer Engineering | Dynamical Systems and Control

ECEN-4021 (1-4) Special Topics

Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Engineering majors only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Bioengineering

ECEN-4023 (1-4) Special Topics

Same as ECEN 5023.

College of Engineering & Applied Science | Electrical & Computer Engineering | Computer and Digital Systems

ECEN-4024 (1-4) Special Topics

Same as ECEN 5024.

College of Engineering & Applied Science | Electrical & Computer Engineering | Electromagnetics

ECEN-4028 (1-4) Special Topics

College of Engineering & Applied Science | Electrical & Computer Engineering | Dynamical Systems and Control

ECEN-4049 (1-4) Special Topics

College of Engineering & Applied Science | Electrical & Computer Engineering | VLSI CAD Methods

ECEN-4053 (1-4) Special Topics

Same as ECEN 5053.

College/School**Department****Category**

Search by Course Number

Subject**Number**

ECEN-4106 (3) Photonics

Deals with the generation, transmission, modification and detection of light. Applications include fiber optics communications, data storage, sensing, and imaging. Leads to understanding of fundamental physical principles used in the analysis and design of modern photonic systems. Prereqs., ECEN 3400. Coreq., ECEN 3300. Restricted to seniors. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior).

[College of Engineering & Applied Science](#) | [Electrical & Computer Engineering](#) | [Optics](#)

ECEN-4116 (3) Introduction to Optical Communications

Given data rates, distance, reliability or bit error rates, the information required to specify the type of fiber, the source, the wave length, type of modulation, repeater or optical amplifiers, and detectors will be presented. Prereq., ECEN 3400 or equivalent. Same as TLEN 5480.

[College of Engineering & Applied Science](#) | [Electrical & Computer Engineering](#) | [Optics](#)

ECEN-4120 (3) Neural Network Design

Introduces basic (artificial) neural network architectures and learning rules. Emphasizes mathematical analysis of these networks, methods of training them, and application to practical problems such as pattern recognition, signal processing, and control systems. Shows how to construct a network of "Neurons" and train them to serve a useful function. Prereqs., APPM 2360 or MATH 3130, and CSCI 1300 or equivalent. Same as ECEN 5120.

[College of Engineering & Applied Science](#) | [Electrical & Computer Engineering](#) | [General](#)

ECEN-4138 (3) Control Systems Analysis

Analysis and design of continuous time control systems using classical and state space methods. Laplace transforms, transfer functions and block diagrams. Stability, dynamic response, and steady-state analysis. Analysis and design of control systems using root locus and frequency response methods. Computer aided design and analysis. Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only. Prereq., ECEN 3300, background in Laplace transforms, linear algebra, and ordinary differential equations. Same as ECEN 5138. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Dynamical Systems and Control

ECEN-4167 (3) Energy Conversion 2

Studies the derivation of the dynamic equations of motion of electromechanical systems, linear and rotary motion machines based on variational principles and basic force laws. Looks at equivalent circuits in abc and dqo coordinates for Ac and Dc machines. Discusses conditions under which an electromagnetic torque can be produced. Applies theory to the most important modes of steady-state and transient operation of electrical energy converters. Prereq., ECEN 3170.

College of Engineering & Applied Science | Electrical & Computer Engineering | Power

ECEN-4224 (3) High Speed Digital Design

Covers fundamentals of high-speed properties of: logic gates, measurement techniques, transmission lines, ground planes and layer stacking, terminations, vias, power systems, connectors, ribbon cables, clock distribution and clock oscillators. Prereq., ECEN 3400. Recommended prereq., ECEN 3410. Same as ECEN 5224.

College of Engineering & Applied Science | Electrical & Computer Engineering | Electromagnetics

ECEN-4242 (3) Communication Theory

Covers modern digital and analog communication systems, Fourier analysis of signals and systems, signal transmission, amplitude modulation, angle modulation, digital communication systems, and behavior of communication systems in the presence of noise, including both analog and digital systems. Prereqs., ECEN 3300 and ECEN 3810 or equivalent. Prerequisites: Restricted to College of Engineering majors only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Communications

ECEN-4324 (3) Fundamentals of Microsystem Packaging

Introduction to the fundamentals of microsystems packaging. This is a seminar style course which surveys topics in microsystem packaging such as: electrical package design, design for reliability, thermal management, multichip packaging, IC Assembly, sealing and encapsulation, and board assembly. Coreq., ECEN 3410 or instructor consent. Same as ECEN 5324. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Engineering majors only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Electromagnetics

ECEN-4341 (3) Bioelectromagnetics

Effects of electric and magnetic fields on biological systems are described with applications to therapy and safety. The complexity of biological systems is described to provide a better understanding of the distribution of fields inside the body. Risk analysis is also introduced. Prereqs., ECEN 3400 and 3810. Same as ECEN 5341.

College of Engineering & Applied Science | Electrical & Computer Engineering | Bioengineering

ECEN-4375 (3) Microstructures Laboratory

Offers experience in monolithic silicon integrated circuit fabrication techniques, including Ic layout, pattern compiling and generation, mask making, oxidation, photolithography, diffusion, implantation, metallization, bonding, process analysis, and testing. Includes design project. Prereq., ECEN 3320. Same as ECEN 5375.

College of Engineering & Applied Science | Electrical & Computer Engineering | Nanostructures and Devices

ECEN-4423 (3) Chaotic Dynamics

Explores chaotic dynamics theoretically and through computer simulations. Covers the standard computational and analytical tools used in nonlinear dynamics and concludes with an overview of leading-edge chaos research. Topics include time and phase-space dynamics, surfaces of section, bifurcation diagrams, fractal dimension, and Lyapunov exponents. Prereqs., two semesters calculus, ECEN 1030 or CSCI 1300 or equivalent, and PHYS 1110. Recommended prereqs., PHYS 1120, CSCI 3656, and MATH 3130. Same as CSCI 4446 and ECEN 5423.

College of Engineering & Applied Science | Electrical & Computer Engineering | Computer and Digital Systems

ECEN-4517 (3) Power Electronics and Photovoltaic Power Systems Laboratory

Focuses on analysis, modeling, design, and testing of electrical energy processing systems in a practical laboratory setting. Studies power electronics converters for efficient utilization of available energy sources, including solar panels and utility. The experimental projects involve design, fabrication, and testing of a solar power system. Prereq., ECEN 4797. Restricted to seniors. Same as ECEN 5517.

College of Engineering & Applied Science | Electrical & Computer Engineering | Power

ECEN-4532 (3) Digital Signal Processing Laboratory

Develops experience in code development, debugging, and testing of real-time digital signal processing algorithms using dedicated hardware. Applications include filtering, signal synthesis, audio special effects, and frequency domain techniques based on the Fast Fourier Transform. Prereq., ECEN 3300. Coreq., ECEN 4632. Same as ECEN 5532.

College of Engineering & Applied Science | Electrical & Computer Engineering | Communications

ECEN-4553 (3) Compiler Construction

Introduces the principles and techniques for compiling high-level programming languages to assembly code. Topics include parsing, instruction selection, register allocation, and compiling high-level features such as polymorphism, first-class functions, and objects. Students build a complete compiler for a simple language. Prereqs., ECEN 2703 and ECEN 3350. Same as CSCI 4555 and ECEN 5523. Prerequisites: Restricted to College of Engineering majors only.

| | | |
|--|-----------------------------------|------------------------------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | Computer and Digital Systems |
|--|-----------------------------------|------------------------------|

ECEN-4555 (3) Principles of Energy Systems & Devices

Develops principles underlying electronic, optical and thermal devices, materials and nanostructures for renewable energy. Course provides a foundation in statistical thermodynamics, and uses it to analyze the operation and efficiency limits of devices for photovoltaics, energy storage (batteries & ultra-capacitors), chemical conversion (fuel cells and engines), solid state lighting, heat pumps, cooling, and potentially harvesting zero-point energy from the vacuum. Prereq., ECEN 3810. Prereq. or coreq., PHYS 2130 or 2170 or instructor consent. Same as ECEN 5555.

| | | |
|--|-----------------------------------|----------------------------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | Nanostructures and Devices |
|--|-----------------------------------|----------------------------|

ECEN-4583 (3) Software System Development

Lectures deal with techniques for product requirements definition, project planning, coding, verification, validation, performance evaluation, and maintenance of medium-scale (2-3000 line) systems. Primary emphasis is on practical application of these techniques to a specified software project. Students work in teams to produce appropriate documents for each phase and are responsible for project completion according to specification and schedule. Course project is written in C on a Unix look-alike system; prior knowledge of C or Unix is not required. Prereq., CSCI 2270 or instructor consent.

| | | |
|--|-----------------------------------|------------------------------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | Computer and Digital Systems |
|--|-----------------------------------|------------------------------|

ECEN-4593 (3) Computer Organization

Studies computer design at the gate level. Discusses instruction set architecture design, arithmetic and logic unit design, control logic, memory design and caches, simple pipelining, I/O, and peripheral devices. Briefly covers aspects of modern computer architecture, such as multicore processors and cache coherence for these. Prereq., ECEN 2350, and ECEN 3350 or CSCI 2400. Same as CSCI 4593. Prerequisites: Restricted to College of Engineering majors only.

| | | |
|--|-----------------------------------|----------------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | Communications |
|--|-----------------------------------|----------------|

ECEN-4606 (3) Undergraduate Optics Laboratory

Introduces fundamental concepts, techniques, and technology of modern optical and photonic systems. Individual labs cover particular fields of optical technology, including light sources such as lasers and LEDs, interferometers, fiber-optic communications, photodetection, spectrometers, and holography. Practical skills such as how to align an optical system will also be emphasized. Prereq. ECEN 3400. Coreq. ECEN 4106 or equivalent. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

| | | |
|--|-----------------------------------|--------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | Optics |
|--|-----------------------------------|--------|

ECEN-4610 (2) Capstone Laboratory Part 1

Hands-on laboratory experience utilizing teams in the systematic proposal, design, integration, and testing of an electronic/computer based system. The result will be the prototype of a stand-alone analog/digital system. Must taken ECEN 4620 to complete the sequence. Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Electrical and Computer Engineering (ECEN), Electrical Engineering (EEEN) majors or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only. Prereqs., ECEN 2260, 2270, 3350, 3360 and 3810. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Electrical and Computer Engineering (ECEN), Electrical Engineering (EEEN) majors or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

| | | |
|--|-----------------------------------|---------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | General |
|--|-----------------------------------|---------|

ECEN-4613 (3) Embedded System Design

Introduces system hardware and firmware design for embedded applications. Students independently design and develop a hardware platform encompassing a microcontroller and peripherals. Firmware is developed in C and assembly. A significant final project is designed, developed, documented, and presented. Prereq., ECEN 2350 and 3350, or instructor consent. Recommended prereqs., ECEN 3250 and 4593. Same as ECEN 5613. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Engineering majors only.

| | | |
|--|-----------------------------------|------------------------------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | Computer and Digital Systems |
|--|-----------------------------------|------------------------------|

ECEN-4616 (3) Optoelectronic System Design

Examines optical components and electro-optic devices with the goal of integrating into well design optoelectronic systems. Sample systems include optical storage, zoom lenses, and telescopes. Prereq. ECEN 3400.

| | | |
|--|-----------------------------------|--------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | Optics |
|--|-----------------------------------|--------|

ECEN-4620 (3) Capstone Lab, Part 2

Hands-on laboratory experience for teams in the systematic proposal, design, build integration, test, and documentation of an electronic/computer based system. The result will be a reliably operating, stand-alone analog/digital system, with publication quality technical documentation. Prereq., ECEN 4610. Prerequisites: Restricted to Electrical and Computer Engineering or Electrical Engineering majors only.

| | | |
|--|-----------------------------------|---------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | General |
|--|-----------------------------------|---------|

ECEN-4623 (3) Real-Time Embedded Systems

Design and build a microprocessor-based embedded system application requiring integration of sensor/actuator devices, a real-time operating system and application firmware and software. Real-time rate monotonic theory and embedded architecture are covered. Prereq., ECEN 2350 and ECEN 3350, or instructor consent. Recommended prereq., ECEN 4613. Same as ECEN 5623. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Engineering majors only.

| | | |
|--|-----------------------------------|------------------------------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | Computer and Digital Systems |
|--|-----------------------------------|------------------------------|

ECEN-4632 (3) Introduction to Digital Filtering

Covers both the analysis and design of FIR and IIR digital filters. Discusses implementations in both software and hardware. Emphasizes use of the FFT as an analysis tool. Includes examples in speech processing, noise canceling, and communications. Prereq., ECEN 3300. Restricted to seniors.

| | | |
|--|-----------------------------------|----------------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | Communications |
|--|-----------------------------------|----------------|

ECEN-4633 (3) Hybrid Embedded Systems

Introduces system hardware and design techniques for embedded and hybrid reconfigurable systems. Intended for those interested in developing projects using hardware description languages to build application-specific computing systems. Industry standards are used for design, development, and debugging. Prereqs., ECEN 2350, 3350, and 4593, or equivalent. Same as ECEN 5633. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Engineering majors only.

ECEN-4634 (3) Microwave and RF Laboratory

Introduce RF and microwave measurement methods. A laboratory course whose experiments build on material learned in ECEN 3410 (Electromagnetic Waves and Transmission): electromagnetic waves, transmission lines, waveguides, time-domain reflection, frequency-domain measurement, microwave networks, impedance matching, antenna pattern measurement, radar, and simple nonlinear concepts such as harmonics, square-law detection, mixing and transmitter/receiver applications. Prereq., ECEN 3410. Same as ECEN 5634. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

[College of Engineering & Applied Science](#)
[Electrical & Computer Engineering](#)
[Electromagnetics](#)

ECEN-4638 (3) Control Systems Laboratory

Provides experience in control system design and analysis, using both real hardware and computer simulation. Covers the entire control system design cycle: modeling the system, synthesizing a controller, conducting simulations, analyzing the design to suggest modifications and improvements, and implementing the design for actual testing. Prereq., ECEN 3300. Coreq., ECEN 4138. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

[College of Engineering & Applied Science](#)
[Electrical & Computer Engineering](#)
[Dynamical Systems and Control](#)

ECEN-4643 (3) SW Engineering of Concurrent Systems

Addresses engineering of applications requiring multiple software processes running concurrently, sharing data, and communicating as a system in a single environment. Topics include performance analysis of architecture design; analysis of requirements, design and testing of synchronization and communication; the interplay of system design and performance with the impact of memory management, input/output, and file system support. Prereq., ECEN 4583 or 5543. ECEN 4643 and 5643 are the same course. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior).

[College of Engineering & Applied Science](#)
[Electrical & Computer Engineering](#)
[Computer and Digital Systems](#)

ECEN-4652 (3) Communication Laboratory

Involves laboratory experiments demonstrating material taught in ECEN 4242. Uses spectrum analysis to study baseband signals and signal processors. Topics include noise, AM, FM, PM, sampling, quantizing/encoding, TDM, FDM, equalizers, and a complete communication system. Prereq. or coreq., ECEN 4242. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Engineering majors only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Communications

ECEN-4653 (3) Real-Time Digital Media

Learn how to design and build Linux-based real-time system applications for digital media encode/decode and transport. Course focus is on the process as well as fundamentals of designing, coding, and testing Linux-based real-time systems often used in industry for digital media systems. Students use POSIX kernel-mapped threads and drivers to implement real-time digital media solutions. Prereqs., ECEN 1030 or CSCI 1300, and CSCI 3753 or equivalent. Restricted to engineering students. ECEN 4653 and 5653 are the same course.

College of Engineering & Applied Science | Electrical & Computer Engineering | Computer and Digital Systems

ECEN-4743 (3) SW Engineering of Distributed Systems

Addresses engineering of networked applications and self-contained embedded system products involving multiple processors. The fundamental concepts of software engineering are complicated by an application running simultaneously and asynchronously on multiple processors over a network. Topics: specification, analysis, design, and testing of distributed components including concerns of security, synchronization, transaction coordination, data replication, web services, and service oriented architectures. Prereq., ECEN 4583 or 5543 or CSCI 5548. Recommended prereq., ECEN 5643. ECEN 4743 and 5743 are the same course. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior).

College of Engineering & Applied Science | Electrical & Computer Engineering | Computer and Digital Systems

ECEN-4753 (3) Computer Performance Modeling

Presents a broad range of system modeling techniques, emphasizing applications to computer systems. Covers stochastic processes, queuing network models, stochastic Petri nets, and simulation (including parallel processing techniques). Prereq., CSCI 3753 or equivalent and second-semester calculus. Recommended prereq., a course in statistics. Same as CSCI 4753, 5753, and ECEN 5753.

College of Engineering & Applied Science | Electrical & Computer Engineering | Computer and Digital Systems

ECEN-4797 (3) Introduction to Power Electronics

An introduction to switched-mode converters. Includes steady-state converter modeling and analysis, switch realization, discontinuous conduction mode, and transformer-isolated converters. Ac modeling of converters using averaged methods, small-signal transfer functions, feedback loop design, and transformer design. Prereq., ECEN 3250. Same as ECEN 5797. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Power

ECEN-4811 (3) Neural Signals and Functional Brain Imaging

Explores bioelectric and metabolic signals generated by the nervous system from two standpoints: 1) their biophysical genesis and role in neural integration and 2) neurotechnologies such as electroencephalography, magnetoencephalography, deep brain stimulation, and functional magnetic resonance imaging. Prereqs., ECEN 2260 or 3030, ASEN 3300, or instructor consent. Same as ECEN 5811 and ASEN 4216.

| | | |
|--|-----------------------------------|----------------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | Bioengineering |
|--|-----------------------------------|----------------|

ECEN-4821 (3) Neural Systems and Physiological Control

A biophysical exploration of human physiology from the standpoints of control systems and neural information processing. Topics include: neural control of movement and cardiovascular performance, tissue growth and repair, carcinogenesis, and physiological responses to microgravity. Prereqs., ECEN 2260 or 3030, ASEN 3300, or instructor consent. Same as ECEN 5821 and ASEN 4426/5426.

| | | |
|--|-----------------------------------|----------------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | Bioengineering |
|--|-----------------------------------|----------------|

ECEN-4827 (3) Analog IC Design

Covers the fundamentals of transistor-level analog integrated circuit design. Starting with motivations from application circuits, the course develops principles of dc biasing, device models, amplifier stages, frequency response analysis and feedback and compensation techniques for multi-stage operational amplifiers. Prereq., ECEN 3250. Same as ECEN 5827. Prerequisites: Restricted to College of Engineering majors only.

| | | |
|--|-----------------------------------|-------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | Power |
|--|-----------------------------------|-------|

ECEN-4831 (3) Brains, Minds, and Computers

Provides background for the design of artificially intelligent systems based upon our present knowledge of the human brain. Includes similarities and differences between the brain and computers, robots, and common computer models of brain and mind. Emphasizes the neuron as an information processor, and organization of natural as well as synthetic neural networks. Prereq., ECEN 2260 or 3030, or instructor consent. Same as ECEN 5831, ASEN 4436/5436.

| | | |
|--|-----------------------------------|----------------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | Bioengineering |
|--|-----------------------------------|----------------|

ECEN-4840 (1-6) Independent Study

Offers an opportunity for seniors to do independent, creative work. Numbered ECEN 4840-4849. Prereq., instructor consent.

| | | |
|--|-----------------------------------|---------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | General |

ECEN-5053 (1-4) Special Topics

Same as ECEN 4053.

[College of Engineering & Applied Science](#) [Electrical & Computer Engineering](#) [Computer and Digital Systems](#)

ECEN-5104 (3) Computer-Aided Microwave Circuit Design

Emphasizes the design of strip-line and microstrip circuits, using a CAD package. Discusses design of impedance transformers, amplifiers, switches, phase-shifters, etc. Assignments include design of typical circuits and their analysis using a microwave circuit analysis program. Laboratory includes measurements using a network analyzer facility on a typical circuit designed and fabricated by students. Prereq., ECEN 3410. Prerequisites: Restricted to graduate students in Electrical Engineering (EEEN) or Electrical/Computer Engineering (ECEN) or Electrical Engineering Concurrent or Electrical/Computer Engineering Concurrent Degree students only.

[College of Engineering & Applied Science](#) [Electrical & Computer Engineering](#) [Electromagnetics](#)

ECEN-5107 (3) Electric Power Grid

Examines the electrical grid, including conventional generation, transmission/ distribution, and new renewable generation technologies. Issues including grid stability, the increase in variable generation on the grid, and how the electrical grid will change in the future will be addressed. Intended for students with an engineering background from outside electrical engineering who desire an introduction to the power grid. Prerequisites: Excludes graduate students in Electrical Engineering or Electrical Engineering Concurrent degree plans.

[College of Engineering & Applied Science](#) [Electrical & Computer Engineering](#) [General](#)

ECEN-5114 (3) Waveguides and Transmission Lines

Intermediate course dealing with guided-wave systems at HF, microwave, and optical frequencies. Modern waveguiding structures, including circular metallic waveguides, microstrip transmission lines, and optical waveguides are treated. Additional material may include waveguide losses, excitation of waveguides, microwave network theory, coupled-mode theory, resonators, and pulse propagation in waveguides. Prereq., ECEN 3410.

College of Engineering & Applied Science | Electrical & Computer Engineering | Electromagnetics

ECEN-5120 (3) Neural Network Design

Same as ECEN 4120.

College of Engineering & Applied Science | Electrical & Computer Engineering | General

ECEN-5122 (3) Wireless Local Area Networks

Examines small-scale wireless networks particularly personal and local area networks. Covers licensed and unlicensed spectrum, indoor and small-scale radio propagation, modulation techniques, network topologies, ad hoc and infrastructure networks, protocol design, TCP/IP-wireless interactions, and protocol standards. Prereq., ECEN 3810 or APPM 3570 or MATH 4510. Recommended prereq., TLEN 5430. Same as TLEN 5520.

College of Engineering & Applied Science | Electrical & Computer Engineering | Communications

ECEN-5134 (3) Electromagnetic Radiation and Antennas

Covers elementary sources and antennas, cylindrical wire antennas, loop antennas, radiation patterns and antenna gain, aperture sources such as horns and dishes, specialized antennas such as microstrip patches, linear and circular arrays, mutual coupling and ground effects, ray and numerical formulations, transmission formulas, and antenna applications. Prereq., ECEN 3410. Prerequisites: Restricted to any graduate students or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Electromagnetics

ECEN-5138 (3) Control Systems Analysis

Topics covered in ECEN 4138 will be investigated in more depth, require external readings, additional homework will be assigned and the exams will be more difficult. Restricted to graduate students in Electrical Engineering (EEEN) or Electrical/Computer Engineering (ECEN) or Electrical Engineering Concurrent or Electrical/Computer Engineering Concurrent Degree students only. Prereq., ECEN 3300 or equivalent. Same as ECEN 4138. Prerequisites: Restricted to graduate students in Electrical Engineering (EEEN) or Electrical/Computer Engineering (ECEN) or Electrical Engineering Concurrent or Electrical/Computer Engineering Concurrent Degree students only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Dynamical Systems and Control

ECEN-5139 (3) Formal Verification of VLSI Systems

Covers two-level and multilevel minimization, optimization via expert systems, algebraic and Boolean decomposition, layout methodologies, state assignment, encoding and minimization, silicon

compilation. Prereqs., ECEN 2703 and general proficiency in discrete mathematics and programming.

College of Engineering & Applied Science | Electrical & Computer Engineering | VLSI CAD Methods

ECEN-5154 (3) Computational Electromagnetics

Provides a computational study of microwave circuits and antennas, using finite-difference, finite-element, and moment methods. Requires students to develop algorithms, write and execute programs, and prepare reports analyzing results. Circuits include waveguides, microstrip lines, and center-fed dipole antennas. Prereq., ECEN 3410.

College of Engineering & Applied Science | Electrical & Computer Engineering | Electromagnetics

ECEN-5156 (3) Physical Optics

Covers the application of Maxwell's equations to optical wave propagation in free space and in media. Topics include polarization, dispersion, geometrical optics, interference, partial coherence, and diffraction. Prereq. ECEN 3410.

College of Engineering & Applied Science | Electrical & Computer Engineering | Optics

ECEN-5166 (3) Guided Wave Optics

Builds up the concepts necessary to understand guided wave optical systems. Topics include slab wave-guides, semiconductor lasers, fiber optics, and integrated optics. Prereqs., ECEN 4645 or 5645, and ECEN 5156.

College of Engineering & Applied Science | Electrical & Computer Engineering | Optics

ECEN-5224 (3) High Speed Digital Design

Same as ECEN 4224.

College of Engineering & Applied Science | Electrical & Computer Engineering | Electromagnetics

ECEN-5254 (3) Remote Sensing Signals and Systems

Examines passive and active techniques for remote sensing with emphasis on fundamental noise and detection issues from radio to optical frequencies. Emphasis is placed on electromagnetic wave detection, statistical signal and noise analysis, remote sensing system architecture, and hardware for remote sensing systems. Systems studied include radiometers, radars (real and synthetic aperture), interferometers, and lidars. Applications to detection and surveillance, Earth remote sensing, astronomy, and imaging systems are covered. Prereqs., ECEN 3300 and 3400, or instructor consent.

College of Engineering & Applied Science | Electrical & Computer Engineering | Electromagnetics

ECEN-5264 (3) Electromagnetic Absorption, Scattering, and Propagation

Electromagnetic waves in communication, navigation, and remote sensing systems from radio to optical frequencies, including propagation in deterministic and random media. Topics include absorption and refraction by gases, discrete scattering by precipitation, clouds, and aerosols, continuous scattering by refractivity fluctuations, earth-space propagation and Faraday rotation in plasmas, and radiative transfer theory.

College of Engineering & Applied Science | Electrical & Computer Engineering | Electromagnetics

ECEN-5274 (3) Radar Science and Techniques

Studies atmospheric radar fundamentals. Examines scattering by precipitation and atmospheric turbulence; long-wavelength radars and the dynamics of the middle and upper atmosphere; design of meteorological and clear-air radars; profiling tropospheric winds, temperature, and humidity by radar and radiometry; and ionospheric sounding using ionosondes and incoherent-scatter radars. Prereq., ECEN 5254 or instructor consent.

College of Engineering & Applied Science | Electrical & Computer Engineering | Electromagnetics

ECEN-5322 (3) Search Engine & Analysis of High-dimensional Dataset

Provides students with an exposition of the novel algorithmic methods for searching and analyzing big data. The class includes a project: students design a content-based music information retrieval system similar to those used by Gracenote, Shazam, or Pandora. Restricted to graduate students. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Computer and Digital Systems

ECEN-5324 (3) Fundamentals of Microsystem Packaging

Same as ECEN 4324. Prerequisites: Restricted to any graduate students or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Electromagnetics

ECEN-5341 (3) Bioelectromagnetics

Effects of electric and magnetic fields on biological systems are described with applications to therapy and safety. The complexity of biological systems is described to provide a better understanding of the distribution of fields inside the body. Risk analysis is also introduced. Same as ECEN 4341. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Bioengineering

ECEN-5345 (3) Introduction to Solid State Physics

Course provides an introduction to the electronic, photonic and phononic properties of solid state materials and devices. Covers optical constants, free electron gas, plasmons, energy bands, semiconductors and doping, excitons, quantum wells, phonons, and electrooptical effects. The course makes use of quantum mechanical methods. Prereqs., ECEN 3400 and basic quantum

mechanics or instructor consent. Prerequisites: Restricted to any graduate students or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Nanostructures and Devices

ECEN-5355 (3) Principles of Electronic Devices 1

Relates performance and limitations of solid state devices to their structures and technology. Examines semiconductor physics and technology. Includes Pn-junction, Mos, and optoelectronic devices. For both advance circuit and device engineers. Prereq., ECEN 3320 or instructor consent. Prerequisites: Restricted to any graduate students or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Nanostructures and Devices

ECEN-5358 (3) Optimization and Optimal Control

Introduces the theory and practice of optimization and optimal control. Topics include basic theory, nonlinear system trajectories and regulation, function space operators and derivatives, optimality conditions, barrier functionals, and Newton's method in function space. Recommended prereq., ECEN 5448. Restricted to graduate students in Electrical Engineering (EEEN) or Electrical/Computer Engineering (ECEN) or Electrical Engineering Concurrent or Electrical/Computer Engineering Concurrent Degree students only. Prerequisites: Restricted to graduate students in Electrical Engineering (EEEN) or Electrical/Computer Engineering (ECEN) or Electrical Engineering Concurrent or Electrical/Computer Engineering Concurrent Degree students only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Dynamical Systems and Control

ECEN-5365 (3) Semiconductor Materials and Devices 1

Includes an introduction to time-independent quantum mechanics and perturbation theory, tunneling, application to quantum-well electronic and optical devices, electrons in a crystalline solid, Bloch's theorem, energy bands and energy gaps, the effective mass approximation, a survey of energy bands forreal crystals: Si, Ge, Gaas, Inp, Algaas, etc., band structure engineering, and the electrical and optical properties of compound semiconductors. Prereq., ECEN 3320 and 5345.

College of Engineering & Applied Science | Electrical & Computer Engineering | Nanostructures and Devices

ECEN-5375 (3) Microstructures Laboratory

Same as ECEN 4375.

College of Engineering & Applied Science | Electrical & Computer Engineering | Nanostructures and Devices

ECEN-5418 (3) Automatic Control Systems 1

Coverage of principles of control systems with Multiple Inputs and Multiple Outputs (MIMO). Topics include Mimo state-space theory, applications of the singular value decomposition (SVD), coprime factorization methods, frequency domain topics, and an introduction to H-infinity design. Prereqs., ECEN 3300, 4138, and 5448, or equivalents.

ECEN-5423 (3) Chaotic Dynamics

Same as ECEN 4423 and CSCI 5446.

[College of Engineering & Applied Science](#)
[Electrical & Computer Engineering](#)
[Computer and Digital Systems](#)

ECEN-5438 (3) Robot Control

Provides a comprehensive treatment of the mathematical modeling of robot mechanisms and the analysis methods used to design control laws for these mechanisms. Prereqs., ECEN 4138 and PHYS 1110.

[College of Engineering & Applied Science](#)
[Electrical & Computer Engineering](#)
[Dynamical Systems and Control](#)

ECEN-5448 (3) Advanced Linear Systems

Offers a state space approach to analysis and synthesis of linear systems, state transition matrix, controllability and observability, system transformation, minimal realization, and analysis and synthesis of multi-input and multi-output systems. Prereq., ECEN 3300 and 4138. Prerequisites: Restricted to any graduate students or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

[College of Engineering & Applied Science](#)
[Electrical & Computer Engineering](#)
[Dynamical Systems and Control](#)

ECEN-5458 (3) Sampled Data and Digital Control Systems

Provides an analysis and synthesis of discrete-time systems. Studies sampling theorem and sampling process characterization, z-transform theory and z-transferfunction, and stability theory. Involves data converters (A/D and D/A), dead-beat design, and digital controller design. Prereq., ECEN 3300 and 4138. Prerequisites: Restricted to Graduate Students only.

| | | |
|--|-----------------------------------|-------------------------------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | Dynamical Systems and Control |
|--|-----------------------------------|-------------------------------|

ECEN-5503 (3) Computer Systems Design and Architecture

Covers digital logic circuits, assembly language programming, and gate-level computer design and architecture. Also discusses computer arithmetic algorithms, I/O, peripheral device performance, networking, and the Internet. Limited to graduate students. For ECE/CS majors with nontraditional backgrounds.

| | | |
|--|-----------------------------------|------------------------------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | Computer and Digital Systems |
|--|-----------------------------------|------------------------------|

ECEN-5517 (3) Power Electronics and Photovoltaic Power Systems Laboratory

Prereq., ECEN 5797. Same as ECEN 4517.

| | | |
|--|-----------------------------------|-------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | Power |
|--|-----------------------------------|-------|

ECEN-5523 (3) Compiler Construction

Same as ECEN 4553 and CSCI 5525. Prerequisites: Restricted to any graduate students or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

| | | |
|--|-----------------------------------|------------------------------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | Computer and Digital Systems |
|--|-----------------------------------|------------------------------|

ECEN-5532 (3) Digital Signal Processing Laboratory

Same as ECEN 4532.

| | | |
|--|-----------------------------------|----------------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | Communications |
|--|-----------------------------------|----------------|

ECEN-5533 (3) Fundamental Concepts of Programming Languages

Considers concepts common to a variety of programming languages--how they are described (both formally and informally) and how they are implemented. Provides a firm basis for comprehending new languages and gives insight into the relationship between languages and machines. Prereq., CSCI 3155 or instructor consent. Same as CSCI 5535.

| | | |
|--|-----------------------------------|------------------------------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | Computer and Digital Systems |
|--|-----------------------------------|------------------------------|

ECEN-5543 (3) Software Engineering of Standalone Programs

Applies engineering principles to phases of software product development, project planning, requirements definition, design, design patterns, validation, and maintenance. Emphasizes practical methods for communicating and verifying definitions and designs---prototyping, inspections, and modeling (primarily UML). Includes relation to embedded systems and object-oriented design. Prereqs., ECEN 1030/CSCI 1300, CSCI 2270, or instructor consent. Same as CSCI 5548. Prerequisites: Restricted to Graduate Students only.

| | | |
|--|-----------------------------------|------------------------------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | Computer and Digital Systems |
|--|-----------------------------------|------------------------------|

ECEN-5553 (3) Parallel Processing

Examines a range of topics involved in using parallel operations to improve computational performance. Discusses parallel architectures, parallel algorithms and parallel programming languages. Architectures covered include vector computers, multiprocessors, network computers, and data flow machines. Prereq., background in computer organization, introduction to programming languages, elementary numerical analysis, ECEN 4593 and CSCI 3656, or instructor consent. Same as CSCI 5551.

| | | |
|--|-----------------------------------|------------------------------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | Computer and Digital Systems |
|--|-----------------------------------|------------------------------|

ECEN-5555 (3) Principles of Energy Systems & Devices

Same as ECEN 4555. Prerequisites: Restricted to students with 57-180 credits (Juniors or Seniors) or Graduate students only.

| | | |
|--|-----------------------------------|----------------------------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | Nanostructures and Devices |
|--|-----------------------------------|----------------------------|

ECEN-5573 (3) Advanced Operating Systems

Same as CSCI 5573.

| | | |
|--|-----------------------------------|------------------------------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | Computer and Digital Systems |
|--|-----------------------------------|------------------------------|

ECEN-5583 (3) Artificial Intelligence

Prereq., CSCI 3245 or equivalent. Same as CSCI 5582.

| | | |
|--|-----------------------------------|------------------------------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | Computer and Digital Systems |
|--|-----------------------------------|------------------------------|

ECEN-5593 (3) Advanced Computer Architecture

Provides a broad-scope treatment of important concepts in the design and implementation of high-performance computer systems. Discusses important issues in the pipelining of a processor, out-of-order instruction issue and superscalar designs, design of cache memory systems for such systems, and architectural features required for multicore processor designs. Also studies current and historically important computer architectures. Prereq., ECEN 4593 or instructor consent. Same as CSCI 5593. Prerequisites: Restricted to any graduate students or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

| | | |
|--|-----------------------------------|------------------------------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | Computer and Digital Systems |
|--|-----------------------------------|------------------------------|

ECEN-5603 (3) Software Project Management

Presents topics and techniques critical to the management of software product development, including estimating, planning, quality, tracking, reporting, team organization, people management, and legal issues. Gives special attention to problems unique to software projects. Prereqs., ECEN 4583, 5543, and CSCI 4318, or equivalent industrial experience. Same as CSCI 5608 and EMEN 5031. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Computer and Digital Systems

ECEN-5606 (3) Optics Laboratory

Provides advanced training in experimental optics. Consists of optics experiments that introduce the techniques and devices essential to modern optics, including characterization of sources, photodetectors, modulators, use of interferometers, spectrometers, and holograms, and experimentation of fiber optics and Fourier optics. Prereq., undergraduate optics course such as PHYS 4510. Same as PHYS 5606.

College of Engineering & Applied Science | Electrical & Computer Engineering | Optics

ECEN-5612 (3) Noise and Random Processes

Reviews probability theory, convergence and probability bounds, multivariable normal theory, sequences of random variables and stochastic processes, Bernoulli and Poisson processes, wide-sense stationary processes, and correlation functions and power spectra. Also includes linear systems with random inputs and Gauss-Markov processes, first- and second-order properties of Arma processes, and Markov chains. Prereqs., ECEN 3300 and 3810 or MATH 4510. Prerequisites: Restricted to any graduate students or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Communications

ECEN-5613 (3) Embedded System Design

Same as ECEN 4613. Prerequisites: Restricted to any graduate students or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Computer and Digital Systems

ECEN-5616 (3) Optoelectric System Design

Same as ECEN 4616. Prerequisites: Restricted to any graduate students or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Optics

ECEN-5622 (3) Information Theory and Coding

Entropy rates of information sources, fundamental limits of data compression, Huffman and arithmetic codes; mutual information, fundamental limits of information transmission over noisy communication channels with/without feedback. Selected topics in information storage, lossy data compression, and network information theory. Prereqs., ECEN 3810 or equivalent, or instructor consent. Prerequisites: Restricted to any graduate students or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

| | | |
|--|-----------------------------------|----------------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | Communications |
|--|-----------------------------------|----------------|

ECEN-5623 (3) Real-Time Embedded Systems

Same as ECEN 4623. Prerequisites: Restricted to any graduate students or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

| | | |
|--|-----------------------------------|------------------------------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | Computer and Digital Systems |
|--|-----------------------------------|------------------------------|

ECEN-5626 (3) Active Optical Devices

Analysis of active optical devices such as semiconductor laser, detector and flat panel display by clearly defining and interconnecting the fundamental physical mechanism, device design and operating principles and device performance. Recommended prereq., ECEN 5355.

| | | |
|--|-----------------------------------|--------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | Optics |
|--|-----------------------------------|--------|

ECEN-5632 (3) Theory and Application of Digital Filtering

Digital signal processing and its applications are of interest to a wide variety of scientists and engineers. The course covers such topics as characterization of linear discrete-time circuits by unit pulse response, transfer functions, and difference equations, use of z-transforms and Fourier analysis, discrete Fourier transform and fast algorithms (FFT), design of finite and infinite impulse response filters, frequency transformations, study of optimized filters for deterministic signals. Prerequisites: Restricted to any graduate students or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

| | | |
|--|-----------------------------------|----------------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | Communications |
|--|-----------------------------------|----------------|

ECEN-5633 (3) Hybrid Embedded Systems

Same as ECEN 4633. Prerequisites: Restricted to any graduate students or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

ECEN-5634 (3) Graduate Microwave and RF Laboratory

Introduce RF and microwave measurement methods. A laboratory course whose experiments build on material learned in ECEN 3410 (Electromagnetic Waves and Transmission): electromagnetic waves, transmission lines, waveguides, time-domain reflection, frequency-domain measurement, microwave networks, impedance matching, antenna pattern measurement, radar, and simple nonlinear concepts such as harmonics, square-law detection, mixing and transmitter/receiver applications. Prereq., ECEN 3410. Restricted to graduate students. Same as ECEN 4634.

Prerequisites: Restricted to any graduate students or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

[College of Engineering & Applied Science](#) [Electrical & Computer Engineering](#) [Electromagnetics](#)

ECEN-5643 (3) SW Engineering of Concurrent Systems

Addresses engineering of applications requiring multiple software processes running concurrently, sharing data, and communicating as a system in a single environment. Topics include performance analysis of architecture design; analysis of requirements, design and testing of synchronization and communication; the interplay of system design and performance with the impact of memory management, input/output, and file system support. Prereq., ECEN 4583 or 5543. ECEN 4643 and 5643 are the same course. Prerequisites: Restricted to Graduate Students only.

[College of Engineering & Applied Science](#) [Electrical & Computer Engineering](#) [Computer and Digital Systems](#)

ECEN-5645 (3) Introduction to Optical Electronics

Introduces lasers, Gaussian optics, modulators, nonlinear optics, optical detectors, and other related devices. Prerequisites: Restricted to Graduate Students only.

[College of Engineering & Applied Science](#) [Electrical & Computer Engineering](#) [Nanostructures and Devices](#)

ECEN-5652 (3) Detection and Extraction of Signals from Noise

Introduces detection, estimation, and time series analysis. Topics include hypothesis testing, detection of known form and random signals, least squares parameter estimation, maximum likelihood theory, minimum mean-squared error estimation, Kalman-Wiener filtering, prediction in stationary time series, and modal analysis. Applications include studies in communications, control, and experimental modeling. Prereq., ECEN 5612.

| | | |
|--|-----------------------------------|----------------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | Communications |
|--|-----------------------------------|----------------|

ECEN-5653 (3) Real-Time Digital Media

Learn how to design and build Linux-based real-time system applications for digital media encode/decode and transport. Course focus is on the process as well as fundamentals of designing, coding, and testing Linux-based real-time systems often used in industry for digital media systems. Students use POSIX kernel-mapped threads and drivers to implement real-time digital media solutions. Prereqs., ECEN 1030 or CSCI 1300, and CSCI 3753 or equivalent. Restricted to engineering students. ECEN 4653 and 5653 are the same course.

| | | |
|--|-----------------------------------|------------------------------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | Computer and Digital Systems |
|--|-----------------------------------|------------------------------|

ECEN-5672 (3) Digital Image Processing

Course objective is to present the fundamental techniques available for image representation and compression (e.g., wavelets), filtering (e.g., Wiener and nonlinear filter), and segmentation (e.g., anisotropic diffusion). Prereq., ECEN 5632 or instructor consent.

| | | |
|--|-----------------------------------|----------------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | Communications |
|--|-----------------------------------|----------------|

ECEN-5673 (3) Distributed Systems

Examines systems that span multiple autonomous computers. Topics include system structuring techniques, scalability, heterogeneity, fault tolerance, load sharing, distributed file and information systems, naming, directory services, resource discovery, resource and network management, security, privacy, ethics, and social issues. Recommended prereq., CSCI 5573 or a course in computer networks. Same as CSCI 5673.

| | | |
|--|-----------------------------------|------------------------------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | Computer and Digital Systems |
|--|-----------------------------------|------------------------------|

ECEN-5682 (3) Theory and Practice of Error Control Codes

Block and convolutional codes for reliable transmission of digital data over unreliable noisy channels. Algebraic and dsp characterizations of cyclic codes such as Bch/Rs codes. Decoding algorithms for block codes and the Viterbi algorithm. Graph codes and iterative decoding. Prereq., ECEN 3300.

| | | |
|--|-----------------------------------|----------------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | Communications |
|--|-----------------------------------|----------------|

ECEN-5692 (3) Principles of Digital Communication

Techniques for efficient and reliable transmission of information over bandwidth and power constrained communication channels; digital modulation methods, power spectral density calculations,

optimum receiver principles, error rate analysis, channel coding potential in wired/wireless media, trellis coded modulation, and equalization. Prereqs., ECEN 3300 and 5612 or equivalents. Recommended prereqs., ECEN 5622 and 5632.

| | | |
|--|-----------------------------------|----------------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | Communications |
|--|-----------------------------------|----------------|

ECEN-5696 (3) Fourier Optics

Introduces a system level approach to the analysis and design of optical systems. Topics include holography, Fourier transform properties of lenses, two-dimensional convolution and correlation functions, spatial filtering, and optical computing techniques. Also covers coherent and incoherent imaging techniques, tomography, and synthetic aperture imaging. Prereqs., ECEN 3300 and 3410, or instructor consent. Prerequisites: Restricted to any graduate students or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

| | | |
|--|-----------------------------------|--------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | Optics |
|--|-----------------------------------|--------|

ECEN-5737 (3) Adjustable-Speed AC Drives

Presents unified treatment of complete electrical drive systems: mechanical load, electrical machine, power converter, and control equipment. Emphasizes induction, synchronous, and permanent-magnet drives. Uses simulation programs (e.g., SPICE, Finite Element/Difference Program) to simulate drive system components (e.g., gating, inverter, electric machine). Prereq., Ecen 3170.

| | | |
|--|-----------------------------------|-------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | Power |
|--|-----------------------------------|-------|

ECEN-5743 (3) SW Engineering of Distributed Systems

Addresses engineering of networked applications and self-contained embedded system products involving multiple processors. The fundamental concepts of software engineering are complicated by an application running simultaneously and asynchronously on multiple processors over a network. Topics: specification, analysis, design, and testing of distributed components including concerns of security, synchronization, transaction coordination, data replication, web services, and service oriented architectures. Prereq., ECEN 4583 or 5543 or CSCI 5548. Recommended prereq., ECEN 5643. ECEN 4743 and 5743 are the same course. Prerequisites: Restricted to Graduate Students only.

| | | |
|--|-----------------------------------|------------------------------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | Computer and Digital Systems |
|--|-----------------------------------|------------------------------|

ECEN-5753 (3) Computer Performance Modeling

Same as ECEN 4753 and CSCI 4753/5753.

| | | |
|--|-----------------------------------|------------------------------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | Computer and Digital Systems |
|--|-----------------------------------|------------------------------|

ECEN-5797 (3) Introduction to Power Electronics

Same as ECEN 4797. Prerequisites: Restricted to any graduate students or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

| | | |
|--|-----------------------------------|-------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | Power |
|--|-----------------------------------|-------|

ECEN-5807 (3) Modeling and Control of Power Electronic Systems

Studies modeling and control topics in power electronics. Averaged switch modeling of converters, computer simulation, ac modeling of the discontinuous conduction mode, the current programmed mode, null-double injection techniques in linear circuits, input filter design, and low-harmonic rectifiers. Prereq., ECEN 5797.

College of Engineering & Applied Science | Electrical & Computer Engineering | Power

ECEN-5811 (3) Neural Signals and Functional Brain Imaging

Same as ECEN 4811 and ASEN 4216

College of Engineering & Applied Science | Electrical & Computer Engineering | Bioengineering

ECEN-5817 (3) Resonant and Soft-Switching Techniques in Power Electronics

Covers resonant converters and inverters, and soft switching; sinusoidal approximations in analysis of series, parallel, LCC, and other resonant dc-dc and dc-ac converters; state-plane analysis of resonant circuits; switching transitions in hard-switched and soft-switched PWM converters; zero-voltage switching techniques, including resonant, quasi resonant, zero voltage transition, and auxiliary switch circuits. Prereq., ECEN 5797 or instructor consent required.

College of Engineering & Applied Science | Electrical & Computer Engineering | Power

ECEN-5821 (3) Neural Systems and Physiological Control

Same as ECEN 4821 and ASEN 4426/5426.

College of Engineering & Applied Science | Electrical & Computer Engineering | Bioengineering

ECEN-5827 (3) Analog IC Design

Same as ECEN 4827. Prerequisites: Restricted to any graduate students or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Power

ECEN-5830 (3) Special Topics

College of Engineering & Applied Science | Electrical & Computer Engineering | General

ECEN-5831 (3) Brains, Minds, and Computers

Same as ECEN 4831, and ASEN 4436/5436. Prerequisites: Restricted to any graduate students or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Bioengineering

ECEN-5837 (3) Mixed-Signal IC Design Lab

Software laboratory course extends the concepts developed in ECEN 4827 to full design and layout of mixed analog and digital custom integrated circuits. Assignments explore implementation of analog to digital and digital to analog converters, and final project develops a full custom IC for a target application. Prereq., ECEN 5827.

College of Engineering & Applied Science | Electrical & Computer Engineering | Power

ECEN-5840 (1-6) Independent Study

Offers an opportunity for students to do independent, creative work at the master's level. Numbered ECEN 5840-5849. Prereq., advisor consent.

College of Engineering & Applied Science | Electrical & Computer Engineering | General

ECEN-6016 (1-3) Special Topics

College of Engineering & Applied Science | Electrical & Computer Engineering | Optics

ECEN-6139 (3) Logic Synthesis of VLSI Systems

Studies synthesis and optimization of sequential circuits, including retiming transformations and don't care sequences. Gives attention to hardware description languages and their application to finite state systems. Also includes synthesis for testability and performance, algorithms for test generation, formal verification of sequential systems, and synthesis of asynchronous circuits. Prereqs., ECEN 5139 and CSCI 5454.

College of Engineering & Applied Science | Electrical & Computer Engineering | VLSI CAD Methods

ECEN-6144 (3) Electromagnetic Boundary Problems

Provides mathematical and physical fundamentals necessary for the systematic analysis of electromagnetic fields problems. Covers basic properties of Maxwell's equations, potentials and jump conditions; scattering and diffraction by canonical structures; Green's functions, integral equations and approximate methods. Requires some maturity in electromagnetics. Prereq., ECEN 5114 or 5134 or instructor consent. Prerequisites: Restricted to graduate students in Electrical Engineering (EEEN) or Electrical/Computer Engineering (ECEN) or Electrical Engineering Concurrent or Electrical/Computer Engineering Concurrent Degree students only.

ECEN-6950 (1-6) Master's Thesis

College of Engineering & Applied Science | Electrical & Computer Engineering | General

ECEN-7438 (3) Theory of Nonlinear Systems

Nonlinear systems and control. Introduction to nonlinear phenomena: multiple equilibria, limit cycles, bifurcations, complex dynamical behavior. Planar dynamical systems, analysis using phase plane techniques. Input-output analysis and stability. Passivity. Lyapunov stability theory. Feedback linearization. Exploration of examples and applications. Prereq., ECEN 5448.

College of Engineering & Applied Science | Electrical & Computer Engineering | Dynamical Systems and Control

ECEN-7840 (1-6) Independent Study

Offers an opportunity for students to do independent, creative work at the doctoral level. Numbered ECEN 7840-7849. Prereq., advisor consent.

College of Engineering & Applied Science | Electrical & Computer Engineering | General

ECEN-7849 (1-6) Independent Study

ECEN-3320 (3) Semiconductor Devices

Highlights the fundamentals of semiconductor materials and devices. Topics include the electrical and optical properties of semiconductors, the theory of Pn junctions, bipolar and field-effect transistors, and optoelectronic devices. Prereq., ECEN 3250. Prerequisites: Restricted to College of Engineering majors only.

ECEN-3400 (3) Electromagnetic Fields and Waves

Electromagnetic fields are covered at an introductory level, starting with electrostatics and continuing with DC current, magnetostatics, time-varying magnetic fields, waves on transmission lines, Maxwell's equations and the basics of plane waves. The use of fields in inductors, capacitors, resistors, transformers, and energy and power concepts are studied. Prereqs., APPM 2350, PHYS 1110, and ECEN 2250. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

ECEN-3810 (3) Introduction to Probability Theory

Covers the fundamentals of probability theory, and treats the random variables and random processes of greatest importance in electrical engineering. Provides a foundation for study of communication theory, control theory, reliability theory, optics, and portfolio analysis. Prereqs., APPM 2350 and 2360. Credit not granted for this course and MATH 4510 or APPM 3570. Prerequisites: Restricted to College of Engineering majors only.

[College of Engineering & Applied Science](#) | [Electrical & Computer Engineering](#) | [General](#)

ECEN-3840 (1-6) Independent Study

Offers an opportunity for juniors to do independent, creative work. Numbered ECEN 3840-3849. Prereq., instructor consent.

[College of Engineering & Applied Science](#) | [Electrical & Computer Engineering](#) | [General](#)

ECEN-3930 (6) ECE Co-op Education

Participate in a cooperative education program working with a corporate or government entity. Individual assignments are arranged between the department and the outside employer. This course is offered only through Continuing Education. May be repeated up to 24 credit hours. Prereq., ECEN 2120, 2260, minimum GPA of 2.85 required. Restricted to sophomore, junior and senior EEEN and ECEN majors.

[College of Engineering & Applied Science](#) | [Electrical & Computer Engineering](#) | [General](#)

ECEN-4000 (3) Special Topics

College of Engineering & Applied Science | Electrical & Computer Engineering | General

ECEN-4120 (3) Neural Network Design

Introduces basic (artificial) neural network architectures and learning rules. Emphasizes mathematical analysis of these networks, methods of training them, and application to practical problems such as pattern recognition, signal processing, and control systems. Shows how to construct a network of "Neurons" and train them to serve a useful function. Prereqs., APPM 2360 or MATH 3130, and CSCI 1300 or equivalent. Same as ECEN 5120.

College of Engineering & Applied Science | Electrical & Computer Engineering | General

ECEN-4610 (2) Capstone Laboratory Part 1

Hands-on laboratory experience utilizing teams in the systematic proposal, design, integration, and testing of an electronic/computer based system. The result will be the prototype of a stand-alone analog/digital system. Must taken ECEN 4620 to complete the sequence. Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Electrical and Computer Engineering (ECEN), Electrical Engineering (EEEN) majors or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only. Prereqs., ECEN 2260, 2270, 3350, 3360 and 3810. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Electrical and Computer Engineering (ECEN), Electrical Engineering (EEEN) majors or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Electrical & Computer Engineering | General

ECEN-4620 (3) Capstone Lab, Part 2

Hands-on laboratory experience for teams in the systematic proposal, design, build integration, test, and documentation of an electronic/computer based system. The result will be a reliably operating, stand-alone analog/digital system, with publication quality technical documentation. Prereq., ECEN 4610. Prerequisites: Restricted to Electrical and Computer Engineering or Electrical Engineering majors only.

College of Engineering & Applied Science | Electrical & Computer Engineering | General

ECEN-4840 (1-6) Independent Study

Offers an opportunity for seniors to do independent, creative work. Numbered ECEN 4840-4849. Prereq., instructor consent.

College of Engineering & Applied Science | Electrical & Computer Engineering | General

ECEN-5107 (3) Electric Power Grid

Examines the electrical grid, including conventional generation, transmission/ distribution, and new renewable generation technologies. Issues including grid stability, the increase in variable generation on the grid, and how the electrical grid will change in the future will be addressed. Intended for students with an engineering background from outside electrical engineering who desire an introduction to the power grid. Prerequisites: Excludes graduate students in Electrical Engineering or Electrical Engineering Concurrent degree plans.

College of Engineering & Applied Science | Electrical & Computer Engineering | General

ECEN-5120 (3) Neural Network Design

Same as ECEN 4120.

College of Engineering & Applied Science | Electrical & Computer Engineering | General

ECEN-5830 (3) Special Topics

College of Engineering & Applied Science | Electrical & Computer Engineering | General

ECEN-5840 (1-6) Independent Study

Offers an opportunity for students to do independent, creative work at the master's level. Numbered ECEN 5840-5849. Prereq., advisor consent.

College of Engineering & Applied Science | Electrical & Computer Engineering | General

ECEN-6800 (3) Master of Engineering Report

College of Engineering & Applied Science | Electrical & Computer Engineering | General

GEEN-1400 (3) Engineering Projects

First-year engineering students work to solve real engineering design problems in interdisciplinary teams. Completed projects are exhibited at an end-of-semester design expo. In lieu of a textbook (available online), each student is expected to contribute up to \$75 towards their design project and poster, and purchase his/her own pair of safety glasses. Restricted to Engineering majors with 75 or fewer cumulative hours. Prerequisites: Restricted to College of Engineering majors with 75 or less cumulative hours.

GEEN-1410 (3) Social Innovation and Design for Sustainable Communities

Learn to apply principles of sustainability to designs. Student teams design solutions integrating scientific and social science perspectives. Emphasis is on the design process applied to sustainable solutions to real world problems. Restricted to students in the Williams Village North RAPs. Prerequisites: Restricted to Sustainability by Design Residential Academic Program (PSBD) or Sustainability and Social Innovation (SSI) Residential Academic Program (PSEE) students only.

GEEN-1510 (1) Self Management and Leadership Principles 1

Develops group cohesiveness, mutual support, multicultural awareness, and leadership skills. Topics include collaborative learning, motivation, time management and study skills, personal assertiveness, and career awareness. Open to new freshmen and transfer students. Controlled enrollment. Fulfills one credit hour of the Engineering social science requirement. Prerequisites: Restricted to College of Engineering majors only.

GEEN-1550 (1) YOU'RE@CU: Undergraduate Career Seminar

Exposes first or second year undergraduate students to engineering research careers through a partner program (YOU'RE@CU), panel discussions with researchers in academics and industry, and exposure to research labs. Restricted to YOU'RE@CU participants. Restricted enrollment; offered pass/fail only.

[College of Engineering & Applied Science](#) | [Engineering Administration](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

GEEN-2050 (3) Engineering Leadership Gateway

Examines concepts of engineering leadership and the essential skills required to become an effective leader. Together students will explore leadership principles, creative and critical thinking, interpersonal skills (e.g. collaboration, conflict resolution, leading in diverse communities), intrapersonal development (e.g. self-appraisal, reflective practice, personal leadership philosophy), organizational competencies (e.g. planning, sustainability, climate), effective communication and ethical decision-making. Instructor consent required. Prerequisites: Restricted to College of Engineering majors only.

GEEN-2350 (1) Calculus 3 Work Group

Provides problem solving assistance to students enrolled in APPM 2350. This course is conducted in a collaborative learning environment. Student work groups solve calculus problems with the assistance of a facilitator. Grading only under pass/fail option. Prereq., APPM 1360. Coreq., APPM 2350.

[College of Engineering & Applied Science](#) [Engineering Administration](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

GEEN-3400 (3) Invention and Innovation

Introduction to invention and product innovation with a hands-on approach. Students explore the invention process, hone their engineering design skills, and explore entrepreneurship (patenting, intellectual property, marketing, raising capital). Student teams design, create, and test a potentially commercial product, and exhibit at an end-of-semester design expo. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

GEEN-3851 (3) Statics for Engineers

Examines vector treatment of force systems and their resultants; equilibrium of frames and machines, including internal forces and three-dimensional configurations; static friction; properties of surfaces, including first and second moments; hydrostatics; and minimum potential energy and stability. Prereq., PHYS 1110. Recommended coreq., APPM 2350. Same as CVEN 2121.

[College of Engineering & Applied Science](#) [Engineering Administration](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

GEEN-3852 (3) Thermodynamics for Engineers

Explores fundamental concepts and basic theory, including first and second laws of thermodynamics, properties, states, thermodynamic functions and cycles. Prereq., APPM 2350. Same as MCEN 3012.

[College of Engineering & Applied Science](#) [Engineering Administration](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

GEEN-3853 (3) Fluid Mechanics for Engineers

Introduces fluid mechanics and momentum transfer, emphasizing the application of these principles to engineering systems. Prereqs., APPM 2350 or 2360, and GEEN 1300 or CSCI 1300. Same as CHEN 3200.

[College of Engineering & Applied Science](#) [Engineering Administration](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

GEEN-3930 (6) Engineering Co-op

Students enrolled in this course participate in a previously arranged, department-sponsored cooperative education program with a university, government agency, or industry. This course is offered only through Continuing Education and may be repeated up to 24 credit hours (four co-op terms). GPA higher than 2.75 is required. GPA higher than 3.00 is strongly recommended.

[College of Engineering & Applied Science](#) [Engineering Administration](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

EHON-4051 (1) Dimensions of Leadership

Explores the many dimensions of leadership that exceed technical knowledge: the ethical, societal, cultural, interpersonal, and personal. Through seminars, workshops and exposure to leaders, students will reflect upon their engineering education in light of the multifaceted demands of effective leadership and their own personal career goals. Students will take an active role in shaping the course. Prereq., junior standing; honors standing or instructor consent. Repeatable for credit up to 3 credit hours.

CVEN-4087 (3) Construction Contract Administration

Students will develop a working understanding of the various types of contracts, key contract provisions, how to evaluate contract risk, ethical requirements, and most importantly explore effective contract administration. Construction and engineering contracts are at the core of all project relationships. Through lecture, group dialog and case studies students will develop confidence in their ability to assess, understand and deploy contract administration in a construction setting. Prereq., senior standing in civil or architectural engineering or instructor consent.

CVEN-3414 (3) Fundamentals of Environmental Engineering

Emphasizes chemical, ecological, and hydrological fundamentals and importance of mass and energy balances in solving environmental engineering problems related to water quality, water and wastewater treatment, air pollution, solid and hazardous waste management, sustainability, and risk assessment. Prerequisites: Requires pre-requisite courses of CHEN 1211 and CHEM 1211 (or CHEM 1113 and CHEM 1114 or CHEM 1251 or CHEM 1351) and APPM 1360 (or MATH 2300). Restricted to Civil, Architectural, Environmental, Mechanical or Chemical Engineering majors only.

[College of Engineering & Applied Science](#)
[Civil Engineering](#)
[Environmental](#)

CVEN-3424 (3) Water and Wastewater Treatment

Introduces design and operation of facilities for treatment of municipal water supplies and wastewater. Provides an engineering application of physical, chemical, and biological unit processes and operations for removal of impurities and pollutants. Involves an integrated design of whole treatment systems combining process elements. Prereq., CVEN 3414. Prerequisites: Requires pre-requisite course of CVEN 3414 (min grade C-).

[College of Engineering & Applied Science](#)
[Civil Engineering](#)
[Environmental](#)

CVEN-3434 (3) Introduction to Applied Ecology

Emphasizes the integration of physical, chemical, and biological processes in controlling terrestrial and aquatic ecosystems. Ecosystem concepts are applied to current environmental and water quality problems. Includes field trips and a group project. Same as ENVS 3434. Prerequisites: Requires pre-requisite courses of CHEN 1211 and CHEM 1211 (or CHEM 1113 and CHEM 1114 or CHEM 1251 or CHEM 1351). Restricted to students with 57-180 credits (Junior or Senior) Civil (CVEN), Environmental (EVEN) or Architectural Engineering (AREN) majors.

[College of Engineering & Applied Science](#)
[Civil Engineering](#)
[Environmental](#)

CVEN-4404 (3) Water Chemistry

Introduces chemical fundamentals of inorganic aqueous compounds and contaminants in lecture and laboratory. Lecture topics include thermodynamics and kinetics of acids and base reactions, carbonate chemistry, air-water exchange, precipitation, dissolution, complexation, oxidation-reduction, and sorption. Prereqs., CHEN 1211 and CVEN 3414, or CHEM 1111 and 1131 for non-engineers. Restricted to CVEN and EVEN majors only. Formerly CVEN 3454. Prerequisites: Restricted to Civil (CVEN) or Environmental (EVEN) Engineering majors only.

College of Engineering & Applied Science | Civil Engineering | Environmental

CVEN-4414 (1) Water Chemistry Laboratory

Reinforces chemical fundamentals of inorganic aqueous compounds and contaminants from CVEN 4404 Water Chemistry in laboratory experiments and reports. Topics include acids and bases, carbonate chemistry (alkalinity), and other water chemistry characteristics (hardness, dissolved oxygen); precipitation, complexation, and oxidation-reduction reactions; and laboratory techniques and reporting. Prereqs., CHEN 1211 and CVEN 3414 or CHEN 1111 and 1131 for non-engineers. Coreq., CVEN 4404. Restricted to CVEN or EVEN majors only. Prerequisites: Restricted to Civil (CVEN) or Environmental (EVEN) Engineering majors only.

College of Engineering & Applied Science | Civil Engineering | Environmental

CVEN-4424 (3) Environmental Organic Chemistry

Examines the fundamental physical and chemical transformations affecting the fate and transport of organic contaminants in natural and treated waters. Emphasizes quantitative approach to solubility, vapor pressure, air-water exchange, sorption, hydrolysis and redox reactions, and photodegradation. Prerequisites: Requires pre-requisite courses of CHEN 1211 and CHEM 1211 (or CHEM 1113 and CHEM 1114 or CHEM 1271 or CHEM 1371).

College of Engineering & Applied Science | Civil Engineering | Environmental

CVEN-4434 (4) Environmental Engineering Design

Examines the design of facilities for the treatment of municipal water and wastewater, hazardous industrial waste, contaminated environmental sites, and sustainable sanitation in developing countries. Economic, societal, and site specific criteria impacting designs are emphasized. Prereq., CVEN 3414. Restricted to seniors. Prerequisites: Requires pre-requisite course of CVEN 3414 (min grade C-).

College of Engineering & Applied Science | Civil Engineering | Environmental

CVEN-4464 (3) Environmental Engineering Processes

Develops and utilizes analytic solutions for environmental process models that can be used in a) reactor design for processes used in the treatment of water, wastewater and hazardous waste and b) process analysis of natural systems, such as streams and groundwater flow. Models facilitate the tracking of contaminants in engineered and natural systems. Prereq. or coreq., CVEN 3414 or equivalent and Fluid Mechanics. CVEN 4464 and 5464 are the same course.

College of Engineering & Applied Science | Civil Engineering | Environmental

CVEN-4474 (3) Hazardous and Industrial Waste Management

Evaluates processes used for treatment of wastes requiring special handling and disposal: toxic organic chemicals, heavy metals, and acidic, caustic, and radioactive waste material. Discusses techniques for destruction, immobilization, and resource recovery and assessment of environmental impact of treatment process end products. Prereq., CVEN 3414. Same as CVEN 5474. Prerequisites: Restricted to College of Engineering majors only.

College of Engineering & Applied Science Civil Engineering Environmental

CVEN-4484 (3) Introduction to Environmental Microbiology

Surveys microbiology topics germane to modern civil and environmental engineering. Provides fundamentals needed to understand microbial processes and ecology in engineered and natural systems and reviews applications emphasizing the interface between molecular biology and classical civil engineering. Prerequisites: Requires pre-requisite courses of CHEN 1211 and CHEM 1211 (or CHEM 1113 and CHEM 1114 or CHEM 1251 or CHEM 1351) and APPM 2350 (or MATH 2400).

College of Engineering & Applied Science Civil Engineering Environmental

CVEN-4554 (3) Fundamentals of Air Quality Management

Introduces engineering methods for the study of air quality. Topics include: indoor air quality, greenhouse gases, dispersion modeling, acidification of lakes, sources apportionment modeling, chemistry of combustion, pollution sources and controls, and human exposure to air pollutants. Under consideration as requirement for EVEN students in air quality track or concentration course in environmental engineering for undergraduate CVEN students. Prereqs., APPM 2360 (or MATH 3130 and 4430) and CVEN 3313 (or CHEN 3200 or MCEN 3021). Same as CVEN 5554. Prerequisites: Requires pre-requisite courses of APPM 2360 (or MATH 3130 and 4430) and CHEN 3313 (or CHEN 3200 or MCEN 3021).

College of Engineering & Applied Science Civil Engineering Environmental

CVEN-4834 (1-3) Special Topics

Prereq., instructor consent. May be repeated up to 6 total credit hours provided topics are different.

College of Engineering & Applied Science Civil Engineering Environmental

CVEN-5323 (3) Applied Stream Ecology

Emphasizes the integration of hydrologic, chemical, and biological processes in controlling river, stream, and reservoir ecosystems at several spatial scales. Students apply ecosystem concepts to current environmental and water quality problems and learn field methods in field trips and a team project. Prereqs., general chemistry, physics. Recommended prereqs., hydrology, ecology, or environmental chemistry. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science Civil Engineering Environmental

CVEN-5404 (3) Water Chemistry

Introduces chemical fundamentals governing the chemistry of natural and treated waters in lecture and laboratory. Lecture topics include thermodynamics and kinetics of acids and base reactions, carbonate chemistry, air-water exchange, precipitation, dissolution, complexation, oxidation-reduction, and sorption. Laboratory experiments emphasize lecture concepts with measurements on local waters. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science Civil Engineering Environmental

CVEN-5414 (3) Water Chemistry Laboratory

Uses experimental and analytical laboratory techniques to develop a better understanding of the concepts of aquatic chemistry and to investigate water chemistry in treated and natural water systems. Techniques include titration, spectrophotometry, gas chromatography, other advanced instrumentation, sampling, portable analyses, and basic statistics and experimental design. Course focuses on water chemistry of Boulder Creek and other local waters. Prereq., CVEN 5404 or GEOL 5280. Coreq., CVEN 5424.

College of Engineering & Applied Science Civil Engineering Environmental

CVEN-5424 (3) Environmental Organic Chemistry

Examines the fundamental physical and chemical transformations affecting the fate and transport of organic contaminants in natural and treated waters. Emphasizes solubility, vapor pressure, air-water exchange, sorption, abiotic and biotic reactions, and photodegradation.

College of Engineering & Applied Science Civil Engineering Environmental

CVEN-5434 (3) Environmental Engineering Design

Team-based design of facilities or processes for water or wastewater or solid waste treatment or remediation under multiple real-world constraints. Prereq., instructor consent. Recommended prereq., CVEN 5524, 5534, or 5474.

College of Engineering & Applied Science Civil Engineering Environmental

CVEN-5454 (3) Quantitative Methods

Introduces the use of digital simulation in the analysis of water resources and environmental systems. Develops computer programs for the simulation of reservoir operations, watershed runoff, stream quality, and lake quality, and uses existing software to analyze more complex problems. Prereq., instructor consent.

College of Engineering & Applied Science Civil Engineering Environmental

CVEN-5464 (3) Environmental Engineering Processes

Develops and utilizes analytic solutions for environmental process models that can be used in a) reactor design for processes used in the treatment of water, wastewater and hazardous waste and b) process analysis of natural systems, such as streams and groundwater flow. Models facilitate the tracking of contaminants in engineered and natural systems. Prereq. or coreq., CVEN 3414 or equivalent and Fluid Mechanics. CVEN 4464 and 5464 are the same course. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science Civil Engineering Environmental

CVEN-5474 (3) Hazardous and Industrial Waste Management

Same as CVEN 4474. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science Civil Engineering Environmental

CVEN-5484 (3) Introduction to Environmental Microbiology

Same as CVEN 4484.

College of Engineering & Applied Science Civil Engineering Environmental

CVEN-5494 (3) Surface Water Quality Modeling

Examines the relationships among air, water, and land pollution, water quality, and beneficial uses. Using models, develops the ability to quantify and predict the impacts of pollutants in the aquatic environment, and to develop approaches to minimize unfavorable water quality conditions. Prereq., instructor consent.

College of Engineering & Applied Science Civil Engineering Environmental

CVEN-5514 (3) Bioremediation

Advanced study on biological processes used to treat toxic organic and inorganic compounds contained in contaminated water, air, and soil; design and evaluation of in situ toxic compound biotransformation; fundamentals of phytoremediation; critical reviews of current literature on bioremediation. Prereq., CVEN 4484 or 5484 or instructor consent. Recommended prereq., CVEN 5424.

College of Engineering & Applied Science Civil Engineering Environmental

CVEN-5524 (3) Drinking Water Treatment

Provides advanced study on theory-of-treatment processes, including design and operation of municipal water supplies. Prereq., environmental engineering processes, graduate standing, or instructor consent required.

College of Engineering & Applied Science Civil Engineering Environmental

CVEN-5534 (3) Wastewater Treatment

Offers an advanced analysis of wastewater treatment systems; design and operation of treatment process reactors; factors affecting performance of facilities used for physical separation; and chemical and biological conversion of wastewater compounds, including nitrogen and phosphorus. Prereq., graduate standing or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science Civil Engineering Environmental

University of Colorado Boulder

CVEN-3414 (3) Fundamentals of Environmental Engineering

Emphasizes chemical, ecological, and hydrological fundamentals and importance of mass and energy balances in solving environmental engineering problems related to water quality, water and wastewater treatment, air pollution, solid and hazardous waste management, sustainability, and risk assessment. Prerequisites: Requires pre-requisite courses of CHEN 1211 and CHEM 1211 (or CHEM 1113 and CHEM 1114 or CHEM 1251 or CHEM 1351) and APPM 1360 (or MATH 2300). Restricted to Civil, Architectural, Environmental, Mechanical or Chemical Engineering majors only.

ECEN-4116 (3) Introduction to Optical Communications

Given data rates, distance, reliability or bit error rates, the information required to specify the type of fiber, the source, the wave length, type of modulation, repeater or optical amplifiers, and detectors will be presented. Prereq., ECEN 3400 or equivalent. Same as TLEN 5480.

[College of Engineering & Applied Science](#) [Electrical & Computer Engineering](#) [Optics](#)

MCEN-4117 (3) Anatomy and Physiology for Engineers

Understanding human physiological function from an engineering, specifically mechanical engineering, viewpoint. Introduction to human anatomy and physiology with a focus on learning fundamental concepts and applying engineering (mass transfer, fluid dynamics, mechanics, modeling) analysis. Same as MCEN 5117. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Engineering majors only.

[College of Engineering & Applied Science](#) [Mechanical Engineering](#) [Miscellaneous](#)

ECEN-4120 (3) Neural Network Design

Introduces basic (artificial) neural network architectures and learning rules. Emphasizes mathematical analysis of these networks, methods of training them, and application to practical problems such as pattern recognition, signal processing, and control systems. Shows how to construct a network of "Neurons" and train them to serve a useful function. Prereqs., APPM 2360 or MATH 3130, and CSCI 1300 or equivalent. Same as ECEN 5120.

[College of Engineering & Applied Science](#) [Electrical & Computer Engineering](#) [General](#)

MCEN-4120 (3) Engineering Statistics

Focuses on probability and statistics, emphasizing engineering applications. Studies frequency distributions; statistical hypotheses and estimation; nonparametric, linear regression, and correlation; nonlinear and multiple regression; analysis of variance; and quality control. Prereq., APPM 2360.

College of Engineering & Applied Science | Mechanical Engineering | Math

ASEN-4123 (3) Vibration Analysis

Highlights free and forced vibration of discrete and continuous systems. Examines Lagrange's equation, Fourier series, Laplace transforms, and matrix and computational methods. Applies knowledge to practical engineering problems. Prereq., ASEN 3112 or MCEN 3030. MCEN 4123 and ASEN 4123 are the same course.

College of Engineering & Applied Science | Aerospace Engineering | Structures, Mat, & Struc Dynam

CSCI-4123 (3) Network Laboratory

Develops enterprise level design and configuration skills on local area networking via switching and routing, as well as the provisioning of remote data communications across diverse Wan technologies, using the latest available transport and security services. Prereq., CSCI 4273. Credit not granted for this course and TLEN 5460. Prerequisites: Requires pre-requisite course of CSCI 4273 (minimum grade C-).

College of Engineering & Applied Science | Computer Science | Operating Systems and Hardware

MCEN-4123 (3) Vibration Analysis

Highlights free and forced vibration of discrete and continuous systems. Examines Lagrange's equation, Fourier series, Laplace transforms, and matrix and computational methods. Applies knowledge to practical engineering problems. Prereq., ASEN 3112 or MCEN 3030. MCEN 4123 and ASEN 4123 are the same course. Prerequisites: Restricted to College of Engineering majors only.

College of Engineering & Applied Science | Mechanical Engineering | Solids

MCEN-4124 (3) Mechanical Behavior of Materials

Addresses the relationship between material structure and the fundamental processes of deformation, yield, and fracture. Examines elements of elasticity theory, introduction to plasticity, and formulation of failure criteria. Studies basic deformation processes in terms of dislocation mechanics and macroscopic mechanical behavior. Takes into consideration the influence of compositional and processing strengthening mechanisms on mechanical properties. Prereqs., MCEN 2024 and 2063.

College of Engineering & Applied Science | Mechanical Engineering | Materials

ASEN-4128 (3) Human Factors in Engineering and Design

Introduces the field of human factors engineering and investigates human psychological, physiological and performance limitations in complex systems and why it is vital for engineers to understand human operational limitations when designing complex systems. Course includes studies of real accidents caused by human error, good and bad designs, latent conditions and accident-producing designs. Goal is an understanding of how to conduct engineering design with consideration of human factors. Prerequisites: Restricted to students with 57-180 credits (Juniors or

Seniors).

College of Engineering & Applied Science Aerospace Engineering Aerospace Design & System Engr

MCEN-4128 (3) Special Topics

Prereq., MCEN 4025 or equivalent.

College of Engineering & Applied Science Mechanical Engineering Special Topics

CHEN-4130 (2) Chemical Engineering Laboratory 2

Involves planning and execution of chemical engineering experiments on mass transfer operations, separations, and chemical reactors. Interprets experimental data with theoretical principles and statistical analysis. Emphasizes communication with written memos, full reports, and oral presentations. Prerequisites: Requires pre-requisite courses of CHEN 3130, 3220, 3320, 4330 (all min grade C-).

College of Engineering & Applied Science Chemical Engineering

MCEN-4131 (3) Air Pollution Control Engineering

Introduces air quality regulations, meteorology, and modeling; methods for controlling major classes of air pollutants, including particulate matter and oxides of sulfur and nitrogen; and control technology for industrial sources and motor vehicles. Requires interdisciplinary design projects. Prereq., MCEN 3021 or equivalent. Same as MCEN 5131. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical Engineering (MCEN) or Environmental Engineering (EVEN) majors only.

College of Engineering & Applied Science Mechanical Engineering Fluids

CSCI-4133 (3) Security Laboratory

Allows students to gain practical experience with network security in a simulated network environment. Topics to be covered include system hardening, firewalls, intrusion detection, vulnerability assessment, and investigation. Prereq., CSCI 4273. Credit not granted for this course and TLEN 5540. Prerequisites: Requires pre-requisite course of CSCI 4273 (minimum grade C-).

College of Engineering & Applied Science Computer Science Operating Systems and Hardware

MCEN-4133 (3) Biomechanics of Solids

Considers the mechanical behavior of biological materials and emphasizes the relationship between structural characteristics and macroscopic behavior. Focuses first on the mechanical behavior of microscopic protein and polysaccharide elements and then on larger scale soft and hard tissue structures. Prereqs., MCEN 2024, 2063, and 3021 or equivalent. Prerequisites: Restricted to College of Engineering and Applied Science graduate students or senior BS/MS Mechanical Engineering or Concurrent Degree students.

College of Engineering & Applied Science Mechanical Engineering Materials

MCEN-4135 (3) Wind Energy and Wind Turbine Design

Provides an excellent opportunity for students to learn about a current technology, wind energy, that is of high interest both technically and commercially. Students can then apply various technical courses they have had (e.g. fluid dynamics, dynamics and electric circuits, economics, etc.) to design a wind turbine and determine through economic analysis if their design is financially viable. Prereqs. for MCEN 4135 are two of MCEN 3021, 4043 or 3010 (min. grade C-) or equivalent. MCEN 5135 is restricted to MCEN, ASEN, or CVEN grad students only. MCEN 4135 and 5135 are the same course. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical Engineering (MCEN) or Environmental Engineering (EVEN) majors only.

College of Engineering & Applied Science Mechanical Engineering Design

ASEN-4138 (3) Aircraft Design

Two lectures and one lab per week. Examines principles of aircraft configuration and design to meet given performance specifications, taking into account aerodynamic, stability and control, and flying quality considerations, as well as airworthiness regulations. Includes preliminary design of the major elements of an aircraft. Prereq., ASEN 3128. Restricted to ASEN majors. Prerequisites: Requires pre-requisite course of ASEN 3128. Restricted to Aerospace Engineering (ASEN) majors only.

College of Engineering & Applied Science Aerospace Engineering Aerospace Design & System Engr

ECEN-4138 (3) Control Systems Analysis

Analysis and design of continuous time control systems using classical and state space methods. Laplace transforms, transfer functions and block diagrams. Stability, dynamic response, and steady-state analysis. Analysis and design of control systems using root locus and frequency response methods. Computer aided design and analysis. Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only. Prereq., ECEN 3300, background in Laplace transforms, linear algebra, and ordinary differential equations. Same as ECEN 5138. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

College of Engineering & Applied Science Electrical & Computer Engineering Dynamical Systems and Control

MCEN-4141 (3) Indoor Air Pollution

Air pollutants cause material damage and adversely affect human health. People spend over 80 per cent of their time indoors; often, air pollutant levels are higher indoors than outdoors. In this course we study air pollution in indoor environments and design appropriate control technologies. Prereqs., MCEN3021 and 3022. Same as MCEN 5141. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical Engineering (MCEN) or Environmental Engineering (EVEN) majors only.

College of Engineering & Applied Science Mechanical Engineering Fluids

CSCI-4143 (2) Principles of Telecommunications Policy

Learn the key issues and principles that guide the decisions of policymakers with respect to the regulatory treatment of voice, video, and data communications. Engage in critical debate, and develop instincts for anticipating the likely regulatory models that may be applied to new technologies. This introductory course covers technical, economic, legal, political, and institutional considerations. Coreq., CSCI 4123 or 4133. Same as TLEN 5210 Prerequisites: Requires pre-requisite or co-requisite course of CSCI 4123 or CSCI 4133 (minimum grade C-).

College of Engineering & Applied Science Computer Science Operating Systems and Hardware

CVEN-4147 (3) Civil Engineering Systems

Theory and application of the principles of engineering economics, and classical and metaheuristic optimization techniques for evaluating problems in civil and environmental engineering. Same as

CVEN 5147. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Engineering majors only.

College of Engineering & Applied Science | Civil Engineering | Miscellaneous

MCEN-4151 (3) Flow Visualization

Explores techniques for the visualization of the physics of fluid flows including seeding with dyes, particles and bubbles, and shadowgraphy and schlieren. Reviews optics and fluid physics, especially atmospheric clouds. Assignments are student-driven, to individuals and mixed teams of grad, undergrad, engineering majors and photography/video majors. Please see <http://flowvis.colorado.edu>. Prereq., MCEN 3021 or equivalent, or significant imaging experience (photography/video). FILM 4200 and ARTF 5200 are the same course. Same as MCEN 4151/5151.

College of Engineering & Applied Science | Mechanical Engineering | Fluids

MCEN-4152 (3) Introduction to Combustion

Description of the mechanisms by which fuel and oxidizers are converted into combustion products. Application to practical combustion devices such as Otto, Diesel, gas turbine, and power plant combustion systems. Consideration of combustion-generated air pollution, fire safety, and combustion efficiency. Prereq., MCEN 3012. Recommended prereqs., MCEN 3021 and 3022. Same as MCEN 5152.

College of Engineering & Applied Science | Mechanical Engineering | Thermal

CVEN-4161 (3) Mechanics of Materials 2

Covers advanced topics in the mechanics of solids. Some topics such as asymmetric bending of beams, torsion of non-circular cross-sections etc. are extensions of topics seen in CVEN 3161. Others like buckling and plate bending theory are new. The course presents unifying themes that underlie the study of mechanics. The course includes selected laboratory experiments. Prereq., CVEN 3161. Prerequisites: Requires pre-requisite course of CVEN 3161 (min grade C-).

College of Engineering & Applied Science | Civil Engineering | Mechanics

MCEN-4162 (3) Energy Conversion

Examines common energy-conversion methods and devices. Topics include power-cycle thermodynamics, turbocompressor and expander processes, combustion systems, and applications and limitations of direct energy-conversion systems. Prereq., MCEN 3012.

College of Engineering & Applied Science | Mechanical Engineering | Thermal

ECEN-4167 (3) Energy Conversion 2

Studies the derivation of the dynamic equations of motion of electromechanical systems, linear and rotary motion machines based on variational principles and basic force laws. Looks at equivalent circuits in abc and dqo coordinates for Ac and Dc machines. Discusses conditions under which an electromagnetic torque can be produced. Applies theory to the most important modes of steady-state and transient operation of electrical energy converters. Prereq., ECEN 3170.

University of Colorado Boulder

[Privacy](#) • [Legal & Trademarks](#)

CVEN-3424 (3) Water and Wastewater Treatment

Introduces design and operation of facilities for treatment of municipal water supplies and wastewater. Provides an engineering application of physical, chemical, and biological unit processes and operations for removal of impurities and pollutants. Involves an integrated design of whole treatment systems combining process elements. Prereq., CVEN 3414. Prerequisites: Requires prerequisite course of CVEN 3414 (min grade C-).

[College of Engineering & Applied Science](#) [Civil Engineering](#) [Environmental](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

CVEN-3434 (3) Introduction to Applied Ecology

Emphasizes the integration of physical, chemical, and biological processes in controlling terrestrial and aquatic ecosystems. Ecosystem concepts are applied to current environmental and water quality problems. Includes field trips and a group project. Same as ENVS 3434. Prerequisites: Requires pre-requisite courses of CHEN 1211 and CHEM 1211 (or CHEM 1113 and CHEM 1114 or CHEM 1251 or CHEM 1351). Restricted to students with 57-180 credits (Junior or Senior) Civil (CVEN), Environmental (EVEN) or Architectural Engineering (AREN) majors.

CVEN-3525 (3) Structural Analysis

Studies structural analysis of statically determinate and indeterminate systems, deflections, energy methods, and force method. Prereq., CVEN 3161 or MCEN 2063. Restricted to Architectural or Civil Engineering majors only. Prerequisites: Requires pre-requisite course of CVEN 3161 or MCEN 2063. Restricted to Civil (CVEN), Environmental (EVEN), or Architectural (AREN) Engineering majors only.

[College of Engineering & Applied Science](#)
[Civil Engineering](#)
[Structures](#)

CVEN-4525 (3) Analysis of Framed Structures

Studies matrix formulation of principles of structural analysis and development of direct stiffness and flexibility methods for analysis of frame and truss structures. Topics include support settlements, thermal loads, and energy formulations of force-displacement relationships. Prereq., CVEN 3525. Same as CVEN 5525.

[College of Engineering & Applied Science](#)
[Civil Engineering](#)
[Structures](#)

CVEN-4545 (3) Steel Design

Applies basic principles to design of steel structures; design of tension members, columns, beams, open-web joists, steel decks, bolts, bolted connections, welding processes, and welded connections. Prereq., CVEN 3525. Prerequisites: Requires pre-requisite course of CVEN 3525 (min grade C-).

[College of Engineering & Applied Science](#)
[Civil Engineering](#)
[Structures](#)

CVEN-4555 (3) Reinforced Concrete Design

Focuses on applications to the design of reinforced concrete structures, including design of beams, columns, slabs, and footings; continuous beams and frames; cast-in-place buildings. Prereq., CVEN 3525.

College of Engineering & Applied Science | Civil Engineering | Structures

CVEN-4565 (3) Timber Design

Applies design methods to beams, columns, trusses, and connections using timber and glued, laminated members. Prerequisites: Requires pre-requisite course of CVEN 3525.

College of Engineering & Applied Science | Civil Engineering | Structures

CVEN-5525 (3) Analysis of Framed Structures

Same as CVEN 4525. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Civil Engineering | Structures

CVEN-5555 (3) Structural Reliability

Explores principles and methods of structural reliability, and formulates bases for design to insure adequate safety and performance of elements and structural systems. Prerequisites: Requires pre-requisite course of CVEN 4525.

College of Engineering & Applied Science | Civil Engineering | Structures

CVEN-5565 (3) Life-Cycle Engineering of Civil Infrastructure Systems

Philosophical and analytical issues for lifetime design and operation of civil systems. Optimization tradeoffs of construction, management, and sustainability. Utility of operation and service, including present-value economic analysis. Decision-making alternatives of safety and performance, including hazards consideration. Recommended prereq., CVEN 3227 or equivalent.

College of Engineering & Applied Science | Civil Engineering | Structures

CVEN-5575 (3) Advanced Topics in Steel Design

Covers steel structure design and analysis. Includes plate girders, moment connections for beams, design of multistory frames, and other topics determined by class interest. Prereq., CVEN 4545 or equivalent. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Civil Engineering | Structures

CVEN-5585 (3) Advanced Topics in Reinforced Concrete Design

Covers design and analysis topics for prestressed concrete and/or reinforced concrete structures. Includes review of the current ACI design code, slabs, prestressed concrete, seismic design, folded plates and shells, finite element analysis, and other topics determined by class interest. Prereq., CVEN 4555 or equivalent. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Civil Engineering | Structures

CVEN-5835 (3) Special Topics for Seniors/Grads

Supervised study of special topics of interest to students under instructor guidance. Prereq., instructor consent.

College of Engineering & Applied Science | Civil Engineering | Structures

CVEN-6525 (3) Nonlinear Analysis of Framed Structures

Motivated by Performance Based Engineering, this course provides students with the proper theoretical underpinnings of nonlinear static and dynamic analysis of framed structures along with, exposure to the corresponding programming techniques in Matlab. First part covers traditional topics related to plasticity; second part focuses on the finite element formulation (with emphasis on flexibility based ones) for geometric and Material nonlinearities; nonlinear pushover and transient analysis of frame structures. Prereq., CVEN 4525/5525 or equivalent; proficiency in Matlab.

College of Engineering & Applied Science | Civil Engineering | Structures

CVEN-6595 (3) Earthquake Engineering

Analyzes and designs structures for earthquake loadings. Gives attention to earthquake ground motions, attenuation laws, and seismic hazard analysis. Also involves numerical methods for time-domain and frequency-domain analysis, response of linear and nonlinear structures, elastic and inelastic response spectra, construction of design spectra, soil-structure interaction analysis, and seismic design methods and building code requirements. Prereq., CVEN 5111 or equivalent. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Civil Engineering | Structures

CVEN-7565 (3) Inelastic Theory of Structures

Examines inelastic behavior of materials, including calculation of ultimate capacity of perfectly plastic structures by use of upper- and lower-bound theorems. Looks at theories of inelastic action as applied to structural design in steel and concrete and elements of theory of plasticity with applications in ultimate analysis of plates, shells, and continuous bodies. Prereq., CVEN 3505.

College of Engineering & Applied Science | Civil Engineering | Structures

CVEN-7595 (3) Earthquake Engineering

Analysis and design of structures for earthquake loadings. Earthquake ground motions, attenuation laws, and seismic hazard analysis. Numerical methods for time-domain and frequency-domain analysis response of linear and nonlinear structures. Elastic and inelastic response spectra, and construction of design spectra. Soil-structure interaction analysis. Seismic design methods and building code requirements. Prereq., CVEN 5111 or equivalent.

CVEN-3698 (3) Engineering Geology

Highlights the role of geology in engineering minerals; rocks; surficial deposits; rocks and soils as engineering materials; distribution of rocks at and below the surface; hydrologic influences; geologic exploration of engineering sites; mapping; and geology of underground excavations, slopes, reservoirs, and dam sites. Includes field trips.

[College of Engineering & Applied Science](#)
[Civil Engineering](#)
[Geotechnical](#)

CVEN-3708 (3) Geotechnical Engineering 1

Studies basic characteristics of geological materials; soil and rock classifications; site investigation; physical, mechanical, and hydraulic properties of geologic materials; the effective stress principle; soil and rock improvement; seepage analysis; stress distribution; and consolidation and settlement analyses. Selected experimental and computational laboratories. Prereq., CVEN 3161 or MCEN 2063. Prerequisites: Requires pre-requisite course of CVEN 3161 or MCEN 2063. Restricted to Civil (CVEN), Environmental (EVEN), or Architectural (AREN) Engineering majors only.

[College of Engineering & Applied Science](#)
[Civil Engineering](#)
[Geotechnical](#)

CVEN-3718 (3) Geotechnical Engineering 2

Discusses shear strength, bearing capacity, lateral earth pressures, slope stability, and underground construction. Analyzes and looks at the design of shallow and deep foundations, retaining walls, tunnels, and other earth and rock structures. Selected experimental and computational laboratories. Prereq., CVEN 3708. Prerequisites: Requires pre-requisite course of CVEN 3708 (minimum grade C-). Restricted to College of Engineering majors only.

[College of Engineering & Applied Science](#)
[Civil Engineering](#)
[Geotechnical](#)

CVEN-4718 (3) Mechanics and Dynamics of Glaciers

Focuses on geotechnical design of shallow and deep foundations, including spread footings, mats, driven piles, and drilled piers. Coverage includes bearing capacity, settlement, group effects, and lateral load capacity of the various foundation types. Additional topics include subsurface exploration, construction of deep foundations, and analysis of pile behavior using wave equation and dynamic monitoring methods. Prereqs., CVEN 3718 or instructor consent. Same as CVEN 5728.

College of Engineering & Applied Science Civil Engineering Geotechnical

CVEN-4728 (3) Foundation Engineering

Focuses on geotechnical design of shallow and deep foundations, including spread footings, mats, driven piles, and drilled piers. Coverage includes bearing capacity, settlement, group effects, and lateral load capacity of the various foundation types. Additional topics include subsurface exploration, construction of deep foundations, and analysis of pile behavior using wave equation and dynamic monitoring methods. Prereqs., CVEN 3718 or instructor consent. Same as CVEN 5728.

College of Engineering & Applied Science Civil Engineering Geotechnical

CVEN-4878 (1-3) Independent Study

Involves an independent, in-depth study, research, or design in a selected area of civil or environmental engineering. Offerings are coordinated with individual faculty. Students should consult the Department of Civil, Environmental, and Architectural Engineering. Numbered CVEN 4840 through CVEN 4878.

College of Engineering & Applied Science Civil Engineering Geotechnical

CVEN-5628 (3) Seepage and Slopes

Covers fundamental principles of seepage in soils under both saturated and unsaturated conditions and limit equilibrium solution to slope stability problems. The seepage effects on slope stability are analyzed in detail and both conventional slope stability method and the finite element technique are applied to solving the engineering problems. Prereqs., CVEN 3708 and 3718 or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science Civil Engineering Geotechnical

CVEN-5678 (3) Soil Improvement and Reinforcement

Provides students with principles and working knowledge of design and construction procedures in soil stabilization, retaining structures, geosynthetics, and soil reinforcement. Prereq., CVEN 3718 or instructor consent.

College of Engineering & Applied Science Civil Engineering Geotechnical

CVEN-5688 (3) Environmental Geotechnics

Provides an understanding of the use of geotechnical concepts in the analysis and design of environmental systems. Focus is placed on the evaluation of waste containment facilities. Including

relevant saturated, unsaturated, and multiphase flow mechanisms in cover and liner systems. Includes stability analyses for landfills and geosynthetic interface shear strength. Covers relevant aspects of mining geotechnics and remediation technologies of contaminated sites.

College of Engineering & Applied Science | Civil Engineering | Geotechnical

CVEN-5708 (3) Soil Mechanics

Offers an advanced course in principles of soil mechanics. Coverage includes topics in continuum mechanics; elasticity, viscoelasticity, and plasticity theories applied to soils; the effective stress principle; consolidation; shear strength; critical state concepts; and constitutive, numerical, and centrifuge modeling. Prereq., CVEN 3718. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Civil Engineering | Geotechnical

CVEN-5718 (3) Mechanics and Dynamics of Glaciers

Same as CVEN 4718.

College of Engineering & Applied Science | Civil Engineering | Geotechnical

CVEN-5728 (3) Foundation Engineering

Same as CVEN 4728. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Civil Engineering | Geotechnical

CVEN-5738 (3) Applied Geotechnical Analysis

Studies applications of limiting equilibrium and limit plasticity analysis methods to stability problems in geotechnical engineering, such as slopes, lateral earth pressures on retaining structures, and bearing capacities of foundations. Also includes elastic and consolidation analysis of deformations in soil structures. Prereq., CVEN 5708 or instructor consent.

College of Engineering & Applied Science | Civil Engineering | Geotechnical

CVEN-5748 (3) Design of Earth Structures

Covers theory, design, and construction of earth embankments and waste facilities, including isolation systems. Uses published data, field exploration, and laboratory tests on soils and rock in investigating foundations and construction materials. Involves principles of compaction and settlement, permeability analysis, landslide recognition and control, use of composite clay, and liner systems. Prereq., CVEN 5708 or instructor consent.

College of Engineering & Applied Science | Civil Engineering | Geotechnical

CVEN-5758 (3) Flow Processes in Soils

Examines fundamental principles of flow through porous media and related engineering problems. Topics include the saturated seepage theory and flow nets; the unsaturated flow theory; suction-saturation and saturation-hydraulic conductivity relationships; nonlinear finite strain consolidation and desiccation theory; laboratory and field testing methods for determining material characteristics; and numerical models for flow-related engineering problems. Prereq., CVEN 3718 or instructor consent.

College of Engineering & Applied Science Civil Engineering Geotechnical

CVEN-5768 (3) Introduction to Rock Mechanics

Nature of rocks and rock masses; engineering properties rock and rock mass; rock mass classifications; planes of weakness; application of rock mechanics to design of rock slopes, underground excavations, and foundations. Prereqs., CVEN 3708 and 3718, or instructor consent.

College of Engineering & Applied Science Civil Engineering Geotechnical

CVEN-5788 (3) Computational Modeling in Geotechnical Engineering

Introduces computational modeling for geotechnical engineering applications such as the Discrete Element Method (DEM) for granular materials, nonlinear Finite Element Analysis (FEA) of seepage, coupled soil elastoplastic consolidation, elastoplasticity models for soil and rock, and advanced computational methods for failure in soil and rock. Uses DEM, FEA, and other software programs for analysis. Prereq., CVEN 5708, or instructor consent.

College of Engineering & Applied Science Civil Engineering Geotechnical

CVEN-5798 (3) Dynamics of Soils and Foundations

Examines the behavior of soils and foundations subjected to self-excited vibrations and earthquake ground motions. Looks at principles of wave propagation in geologic media; in situ and laboratory determination of engineering properties for dynamic analysis; and applications of these principles and properties in design and analysis of foundations and earth structures subjected to dynamic loading. Prereq., CVEN 5708 or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science Civil Engineering Geotechnical

CVEN-5818 (3) Geotechnical Earthquake Engineering

Familiarizes students with the fundamentals of engineering seismology, soil and structural dynamics, and the modern practice of geotechnical earthquake engineering. Focuses on describing earthquake hazards and methods for seismic analysis and design. Recommended prereq., CVEN 5798. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science Civil Engineering Geotechnical

CVEN-7718 (3) Engineering Properties of Soils

Considers constitutive behavior of cohesive and cohesionless soils including stress-strain, strength, pore water pressure, and volume change behavior under drained and undrained loading conditions. Also includes linear and nonlinear analysis techniques and determination of constitutive properties in the laboratory. Prereq., CVEN 5708 or instructor consent.

College of Engineering & Applied Science | Civil Engineering | Geotechnical

CVEN-7788 (3) Soil Behavior

Topics include soil mineralogy, formation of soils through sedimentary processes and weathering, determination of soil composition, soil water, colloidal phenomena in soils, fabric property relationships, analysis of mechanical behavior including compressibility, strength and deformation, and conduction phenomena in terms of physicochemical principles. Involves applications for stabilization and improvement of soils, and disposal of waste materials. Prereq., CVEN 3718 or instructor consent.

CVEN-3525 (3) Structural Analysis

Studies structural analysis of statically determinate and indeterminate systems, deflections, energy methods, and force method. Prereq., CVEN 3161 or MCEN 2063. Restricted to Architectural or Civil Engineering majors only. Prerequisites: Requires pre-requisite course of CVEN 3161 or MCEN 2063. Restricted to Civil (CVEN), Environmental (EVEN), or Architectural (AREN) Engineering majors only.

[College of Engineering & Applied Science](#) [Civil Engineering](#) [Structures](#)

[Privacy](#) • [Legal & Trademarks](#)

AREN-3540 (3) Illumination I

Studies the fundamentals of architectural illumination. Introduces and applies basic principles and vocabulary to elementary problems in the lighting of environments for the performance of visual work and the proper interaction with architecture. Prerequisites: Requires pre-requisite courses of GEEN 1300 or CSCI 1300 (min grade C-).

[College of Engineering & Applied Science](#) [Civil Engineering](#) [Building Systems Engineering](#)

University of Colorado Boulder

CVEN-3698 (3) Engineering Geology

Highlights the role of geology in engineering minerals; rocks; surficial deposits; rocks and soils as engineering materials; distribution of rocks at and below the surface; hydrologic influences; geologic exploration of engineering sites; mapping; and geology of underground excavations, slopes, reservoirs, and dam sites. Includes field trips.

CVEN-3708 (3) Geotechnical Engineering 1

Studies basic characteristics of geological materials; soil and rock classifications; site investigation; physical, mechanical, and hydraulic properties of geologic materials; the effective stress principle; soil and rock improvement; seepage analysis; stress distribution; and consolidation and settlement analyses. Selected experimental and computational laboratories. Prereq., CVEN 3161 or MCEN 2063. Prerequisites: Requires pre-requisite course of CVEN 3161 or MCEN 2063. Restricted to Civil (CVEN), Environmental (EVEN), or Architectural (AREN) Engineering majors only.

CVEN-3718 (3) Geotechnical Engineering 2

Discusses shear strength, bearing capacity, lateral earth pressures, slope stability, and underground construction. Analyzes and looks at the design of shallow and deep foundations, retaining walls, tunnels, and other earth and rock structures. Selected experimental and computational laboratories. Prereq., CVEN 3708. Prerequisites: Requires pre-requisite course of CVEN 3708 (minimum grade C-). Restricted to College of Engineering majors only.

ECEN-3810 (3) Introduction to Probability Theory

Covers the fundamentals of probability theory, and treats the random variables and random processes of greatest importance in electrical engineering. Provides a foundation for study of communication theory, control theory, reliability theory, optics, and portfolio analysis. Prereqs., APPM 2350 and 2360. Credit not granted for this course and MATH 4510 or APPM 3570. Prerequisites: Restricted to College of Engineering majors only.

MCEN-4173 (3) Finite Element Analysis

Introductory course covering the theory behind and applications of the finite element method as a general and powerful tool to model a variety of phenomena in mechanical engineering. Applications include structural mechanics, mechanics of elastic continua, and heat conduction. Prereq., MCEN 2023 and 2063, or equivalents. Same as MCEN 5173. Prerequisites: Restricted to Mechanical (MCEN or MCMR) majors or students with a plan of Mechanical Engineering Concurrent Degree majors.

[College of Engineering & Applied Science](#) | [Mechanical Engineering](#) | [Solids](#)

MCEN-4174 (3) Failure of Engineering Materials

Examines the failure of materials used in engineering design through a series of real world case studies. Example failure modes considered include overload, fatigue, creep, and corrosion. Example case studies include failure of aircraft, mountaineering ropes, weight training frames, and toilets. Prereqs., MCEN 2024 and 2063. Same as MCEN 5174.

[College of Engineering & Applied Science](#) | [Mechanical Engineering](#) | [Materials](#)

MCEN-4183 (3) Mechanics of Composite Materials

Introduces various kinds of composite materials, composite fabrication techniques, the physical and mechanical behavior of composites, and analytical and experimental methodologies. Prereqs., MCEN 2024 and 2063, or equivalents. Same as MCEN 5183.

[College of Engineering & Applied Science](#) | [Mechanical Engineering](#) | [Solids](#)

HUEN-4200 (3) Humanities for Engineers 4

Continuation of HUEN 4100. Provides opportunity to pursue a variety of humanistic themes related to Herbst Humanities Program. Prereq., HUEN 4100.

College of Engineering & Applied Science Humanities for Engineers

CSCI-4202 (3) Artificial Intelligence 2

Second course in artificial intelligence. Topics may vary, but typically cover neural networks, natural language processing, and artificial life. Prereq., CSCI 3202 or instructor consent.

College of Engineering & Applied Science Computer Science Artificial Intelligence

MCEN-4208 (3) Special Topics in Mechanical Engineering

Subject matter to be selected from topics of current interest. Credit to be arranged. Numbered MCEN 4208-4298. Prereq., instructor consent.

College of Engineering & Applied Science Mechanical Engineering Miscellaneous

ASEN-4215 (3) Descriptive Physical Oceanography

Introduces descriptive and dynamical physical oceanography, focusing on the nature and dynamics of ocean currents and their role in the distribution of heat and other aspects of ocean physics related to the Earth's climate. Dynamical material limited to mathematical descriptions of oceanic physical systems. Restricted to seniors and graduate students. Same as ASEN 5215 and ATOC 4215. Prerequisites: Restricted to students with 87-180 credits (Seniors) or graduate students only.

College of Engineering & Applied Science Aerospace Engineering Atmospheric, Oceanic & Space S

ASEN-4216 (3) Neural Signals and Functional Brain Imaging

Explores bioelectric and metabolic signals generated by the nervous system from two stand points: 1) their biophysical genesis and role in neural integration and 2) neurotechnologies such as electroencephalography, magnetoencephalography, deep brain stimulation, and functional magnetic resonance imaging. Prereqs., ECEN 2260 or 3030, ASEN 3300, or instructor consent. Same as ASEN 5216 and ECEN 4811. Prerequisites: Requires pre-requisite course of ASEN 3300 or ECEN 2260 or ECEN 3030.

College of Engineering & Applied Science Aerospace Engineering Bioastronautics & Microgravity

ASEN-4218 (3) Large Space Structures Design

Develops the necessary structural analysis skills for conducting conceptual and preliminary designs of large space structures with a practical emphasis on structures considered by NASA over the past 20 years. Applies analysis skills to a broad range of space missions requiring large space structures, emphasizing low cost and practical design. Prereq., senior standing in ASEN or MCEN, or instructor consent. Same as ASEN 5218.

College of Engineering & Applied Science Aerospace Engineering Aerospace Design & System Engr

ASEN-4222 (3) Materials Science for Composite Manufacturing

Studies common matrix materials and the modifications and improvements of properties which can be achieved by adding second phase reinforcements. Properties will be significantly affected by the design approach and by requirements, and by the procedure of adding reinforcements. Investigates polymer, ceramic and metallic materials. Explores manufacturing, fabrication and processing techniques. Evaluates future developments. Prereq., ASEN 3112 or equivalent, or instructor consent. Coreq., ASEN 4012 or instructor consent. Same as ASEN 5222.

Prerequisites: Requires pre-requisite course of ASEN 3112 and pre-requisite or co-requisite course of ASEN 4012.

College of Engineering & Applied Science | Aerospace Engineering | Structures, Mat, & Struc Dynam

ECEN-4224 (3) High Speed Digital Design

Covers fundamentals of high-speed properties of: logic gates, measurement techniques, transmission lines, ground planes and layer stacking, terminations, vias, power systems, connectors, ribbon cables, clock distribution and clock oscillators. Prereq., ECEN 3400. Recommended prereq., ECEN 3410. Same as ECEN 5224.

College of Engineering & Applied Science | Electrical & Computer Engineering | Electromagnetics

MCEN-4228 (1-4) Special Topics

May be repeated up to 15 credit hours. Prereqs., MCEN 2024 and 2063. Same as MCEN 5228. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical Engineering (MCEN) or Environmental Engineering (EVEN) majors only.

College of Engineering & Applied Science | Mechanical Engineering | Miscellaneous

CSCI-4229 (3) Computer Graphics

Studies design, analysis, and implementation of computer graphics techniques. Topics include interactive techniques, 2D and 3D viewing, clipping, segmentation, translation, rotation, and projection. Also involves removal of hidden edges, shading, and color. Prereqs., knowledge of basic linear algebra and CSCI 2270. Same as CSCI 5229.

College of Engineering & Applied Science | Computer Science | Graphics

ASEN-4238 (3) Computer-Aided Control Systems Design

Covers Matlab and Simulink software, and multivariable control system synthesis and analysis techniques for typical aerospace control problems. Students formulate control problems and synthesize control functions using line quadratic techniques. Includes numerical integration of differential equations and nonlinear simulation of orbit and attitude dynamics. Prereq., APPM 2360.

College of Engineering & Applied Science | Aerospace Engineering | Aerospace Design & System Engr

CSCI-4239 (3) Advanced Computer Graphics

Studies design, analysis and implementation of advanced computer graphics techniques. Topics include shaders, using the GPU for high performance computing, graphics programming on embedded devices such as mobile phones; advanced graphics techniques such as ray tracing. Prereq., CSCI 4229 or instructor consent required. Same as CSCI 5239.

| | | |
|--|------------------|----------|
| College of Engineering & Applied Science | Computer Science | Graphics |
|--|------------------|----------|

ECEN-4242 (3) Communication Theory

Covers modern digital and analog communication systems, Fourier analysis of signals and systems, signal transmission, amplitude modulation, angle modulation, digital communication systems, and behavior of communication systems in the presence of noise, including both analog and digital systems. Prereqs., ECEN 3300 and ECEN 3810 or equivalent. Prerequisites: Restricted to College of Engineering majors only.

| | | |
|--|-----------------------------------|----------------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | Communications |
|--|-----------------------------------|----------------|

ASEN-4248 (3) Computer-Aided Control System Design 2

Studies theory and engineering applications of Kalman filter techniques. Covers discrete and continuous filters, the extended Kalman filter, and their application to guidance, navigation, and control, including satellite orbit and attitude problems, inertial and control navigation, and the Global Positioning System. Prerequisites: Requires pre-requisite course of ASEN 4238.

| | | |
|--|-----------------------|--------------------------------|
| College of Engineering & Applied Science | Aerospace Engineering | Aerospace Design & System Engr |
|--|-----------------------|--------------------------------|

ASEN-4255 (3) Environmental Aerodynamics

a review of the properties and causes of hazards posed by the environment, ranging from atmospheric wind shear to tornadic flows. Involves a multidisciplinary approach combining analytical, numerical, scale modeling studies with extensive field measurements, wind energy, and biophysical aerodynamics. Prereq., senior standing in ASEN. Same as ASEN 5255.

| | | |
|--|-----------------------|--------------------------------|
| College of Engineering & Applied Science | Aerospace Engineering | Atmospheric, Oceanic & Space S |
|--|-----------------------|--------------------------------|

CSCI-4273 (3) Network Systems

Focuses on design and implementation of network programs and systems, including topics in network protocols, file transfer, client-server computing, remote procedure call, and other contemporary network system design and programming techniques. Prereqs., CSCI 3753 or equivalent, and familiarity with C and Unix. Same as CSCI 5273.

| | | |
|--|------------------|--------------------------------|
| College of Engineering & Applied Science | Computer Science | Operating Systems and Hardware |
|--|------------------|--------------------------------|

MCEN-4278 (3) Special Topics

Same as MCEN 5268.

| | | |
|--|------------------------|----------------|
| College of Engineering & Applied Science | Mechanical Engineering | Special Topics |
|--|------------------------|----------------|

CSCI-4302 (3) Advanced Robotics

Exposes students to current research topics in the field of robotics and provides hands-on experience in solving a grand challenge program. Prereq., CSCI 3302 or instructor consent required. Same as CSCI 5302.

College of Engineering & Applied Science | Computer Science | Artificial Intelligence

CSCI-4308 (4) Software Engineering Project 1

Advanced practicum in which students design, implement, document and test software systems for use in industry, non-profits, government and research institutions. Also offers extensive experience in oral and written communication throughout the software lifecycle. Students must take CSCI 4308 and 4318 contiguously, as the project spans the entire academic year. Prereqs., successful completion of a minimum of 36 credit hours of Computer Science Foundation, Track Foundation, Track Core, Computer Science electives, and WRTG 3030. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Computer Science (CSCI) majors or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science | Computer Science | Software Engineering

CSCI-4312 (3) Health Informatics

Teaches students essential skills necessary for developing usable assistive and performance support systems, which include consideration of the academic and professional interdisciplinary issues that govern the work. An overview of ongoing and emerging topics in medical informatics will be presented. Prereq., CSCI 2270. Recommended prereq., CSCI 3002. Same as CSCI 5312.

College of Engineering & Applied Science | Computer Science | Artificial Intelligence

CSCI-4314 (3) Algorithms for Molecular Biology

Surveys combinatorial algorithms used to understand DNA, RNA, and proteins. Introduces students to methods used to process genomic data. Topics covered include a review of algorithms and molecular biology, sequence analysis, RNA and protein structure analysis, and comparative genomics. Students will get hands-on experience processing recent genomic data. Prereqs., CSCI 2270 and CSCI 3104, or CHEM 4711, or MCDB3500 or Iphy 4200. Same as CSCI 5314 and MCDB 4314.

College of Engineering & Applied Science | Computer Science | Theory of Computation

AREN-4315 (3) Design of Masonry Structures

Covers modern masonry construction; properties and behavior of the reinforced masonry component materials, clay and concrete masonry units, mortar, grout, and steel reinforcement; vertical and lateral load types and intensities; and design of reinforced masonry walls, beams, and columns by working stress and strength design methods. Prereq., CVEN 3525.

College of Engineering & Applied Science | Civil Engineering | Structures

ECEN-3930 (6) ECE Co-op Education

Participate in a cooperative education program working with a corporate or government entity. Individual assignments are arranged between the department and the outside employer. This course is offered only through Continuing Education. May be repeated up to 24 credit hours. Prereq., ECEN 2120, 2260, minimum GPA of 2.85 required. Restricted to sophomore, junior and senior EEEN and ECEN majors.

ECEN-4006 (1-4) Special Topics

College of Engineering & Applied Science | Electrical & Computer Engineering | Optics

ECEN-4016 (1-4) Special Topics

College of Engineering & Applied Science | Electrical & Computer Engineering | Optics

ECEN-4106 (3) Photonics

Deals with the generation, transmission, modification and detection of light. Applications include fiber optics communications, data storage, sensing, and imaging. Leads to understanding of fundamental physical principles used in the analysis and design of modern photonic systems. Prereq., ECEN 3400. Coreq., ECEN 3300. Restricted to seniors. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior).

College of Engineering & Applied Science | Electrical & Computer Engineering | Optics

ECEN-4116 (3) Introduction to Optical Communications

Given data rates, distance, reliability or bit error rates, the information required to specify the type of fiber, the source, the wave length, type of modulation, repeater or optical amplifiers, and detectors will be presented. Prereq., ECEN 3400 or equivalent. Same as TLEN 5480.

| | | |
|--|-----------------------------------|--------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | Optics |
|--|-----------------------------------|--------|

ECEN-4606 (3) Undergraduate Optics Laboratory

Introduces fundamental concepts, techniques, and technology of modern optical and photonic systems. Individual labs cover particular fields of optical technology, including light sources such as lasers and LEDs, interferometers, fiber-optic communications, photodetection, spectrometers, and holography. Practical skills such as how to align an optical system will also be emphasized.

Prereq. ECEN 3400. Coreq. ECEN 4106 or equivalent. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

| | | |
|--|-----------------------------------|--------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | Optics |
|--|-----------------------------------|--------|

ECEN-4616 (3) Optoelectronic System Design

Examines optical components and electro-optic devices with the goal of integrating into well design optoelectronic systems. Sample systems include optical storage, zoom lenses, and telescopes.

Prereq. ECEN 3400.

ECEN-5156 (3) Physical Optics

Covers the application of Maxwell's equations to optical wave propagation in free space and in media. Topics include polarization, dispersion, geometrical optics, interference, partial coherence, and diffraction. Prereq. ECEN 3410.

| | | |
|--|-----------------------------------|--------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | Optics |
|--|-----------------------------------|--------|

ECEN-5166 (3) Guided Wave Optics

Builds up the concepts necessary to understand guided wave optical systems. Topics include slab wave-guides, semiconductor lasers, fiber optics, and integrated optics. Prereqs., ECEN 4645 or 5645, and ECEN 5156.

| | | |
|--|-----------------------------------|--------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | Optics |
|--|-----------------------------------|--------|

ECEN-5606 (3) Optics Laboratory

Provides advanced training in experimental optics. Consists of optics experiments that introduce the techniques and devices essential to modern optics, including characterization of sources,

photodetectors, modulators, use of interferometers, spectrometers, and holograms, and experimentation of fiber optics and Fourier optics. Prereq., undergraduate optics course such as PHYS 4510. Same as PHYS 5606.

| | | |
|--|-----------------------------------|--------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | Optics |
|--|-----------------------------------|--------|

ECEN-5616 (3) Optoelectric System Design

Same as ECEN 4616. Prerequisites: Restricted to any graduate students or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

| | | |
|--|-----------------------------------|--------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | Optics |
|--|-----------------------------------|--------|

ECEN-5626 (3) Active Optical Devices

Analysis of active optical devices such as semiconductor laser, detector and flat panel display by clearly defining and interconnecting the fundamental physical mechanism, device design and operating principles and device performance. Recommended prereq., ECEN 5355.

| | | |
|--|-----------------------------------|--------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | Optics |
|--|-----------------------------------|--------|

ECEN-5696 (3) Fourier Optics

Introduces a system level approach to the analysis and design of optical systems. Topics include holography, Fourier transform properties of lenses, two-dimensional convolution and correlation functions, spatial filtering, and optical computing techniques. Also covers coherent and incoherent imaging techniques, tomography, and synthetic aperture imaging. Prereqs., ECEN 3300 and 3410, or instructor consent. Prerequisites: Restricted to any graduate students or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

ECEN-5049 (1-4) Special Topics

College of Engineering & Applied Science | Electrical & Computer Engineering | VLSI CAD Methods

ECEN-5139 (3) Formal Verification of VLSI Systems

Covers two-level and multilevel minimization, optimization via expert systems, algebraic and Boolean decomposition, layout methodologies, state assignment, encoding and minimization, silicon compilation. Prereqs., ECEN 2703 and general proficiency in discrete mathematics and programming.

College of Engineering & Applied Science | Electrical & Computer Engineering | VLSI CAD Methods

ECEN-6139 (3) Logic Synthesis of VLSI Systems

Studies synthesis and optimization of sequential circuits, including retiming transformations and don't care sequences. Gives attention to hardware description languages and their application to finite state systems. Also includes synthesis for testability and performance, algorithms for test generation, formal verification of sequential systems, and synthesis of asynchronous circuits.

Prereqs., ECEN 5139 and CSCI 5454.

College of Engineering & Applied Science | Electrical & Computer Engineering | VLSI CAD Methods

ECEN-7849 (1-6) Independent Study

Offers an opportunity for students to do independent, creative work at the doctoral level. Numbered ECEN 7840--7849. Prereq., advisor consent.

AREN-4010 (3) HVAC System Modeling and Control

Engineering course devoted to building automation and control systems. Topics include HVAC control technology and strategies, measurement and device technologies, analysis and modeling of dynamic systems, simulation of conventional and advanced control approaches, assessment of control loop performance, and hands-on direct digital control (DDC) programming exercises as used in current building control practice. Prereq., AREN 4110. Same as CVEN 5010.

ECEN-4017 (1-4) Special Topics

[College of Engineering & Applied Science](#) [Electrical & Computer Engineering](#) [Power](#)

ECEN-4167 (3) Energy Conversion 2

Studies the derivation of the dynamic equations of motion of electromechanical systems, linear and rotary motion machines based on variational principles and basic force laws. Looks at equivalent circuits in abc and dqo coordinates for Ac and Dc machines. Discusses conditions under which an electromagnetic torque can be produced. Applies theory to the most important modes of steady-state and transient operation of electrical energy converters. Prereq., ECEN 3170.

[College of Engineering & Applied Science](#) [Electrical & Computer Engineering](#) [Power](#)

ECEN-4517 (3) Power Electronics and Photovoltaic Power Systems Laboratory

Focuses on analysis, modeling, design, and testing of electrical energy processing systems in a practical laboratory setting. Studies power electronics converters for efficient utilization of available energy sources, including solar panels and utility. The experimental projects involve design, fabrication, and testing of a solar power system. Prereq., ECEN 4797. Restricted to seniors. Same as ECEN 5517.

[College of Engineering & Applied Science](#) [Electrical & Computer Engineering](#) [Power](#)

ECEN-4797 (3) Introduction to Power Electronics

An introduction to switched-mode converters. Includes steady-state converter modeling and analysis, switch realization, discontinuous conduction mode, and transformer-isolated converters. Ac modeling of converters using averaged methods, small-signal transfer functions, feedback loop design, and transformer design. Prereq., ECEN 3250. Same as ECEN 5797. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Power

ECEN-4827 (3) Analog IC Design

Covers the fundamentals of transistor-level analog integrated circuit design. Starting with motivations from application circuits, the course develops principles of dc biasing, device models, amplifier stages, frequency response analysis and feedback and compensation techniques for multi-stage operational amplifiers. Prereq., ECEN 3250. Same as ECEN 5827. Prerequisites: Restricted to College of Engineering majors only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Power

ECEN-5517 (3) Power Electronics and Photovoltaic Power Systems Laboratory

Prereq., ECEN 5797. Same as ECEN 4517.

College of Engineering & Applied Science | Electrical & Computer Engineering | Power

ECEN-5737 (3) Adjustable-Speed AC Drives

Presents unified treatment of complete electrical drive systems: mechanical load, electrical machine, power converter, and control equipment. Emphasizes induction, synchronous, and permanent-magnet drives. Uses simulation programs (e.g., SPICE, Finite Element/Difference Program) to simulate drive system components (e.g., gating, inverter, electric machine). Prereq., Ecen 3170.

College of Engineering & Applied Science | Electrical & Computer Engineering | Power

ECEN-5797 (3) Introduction to Power Electronics

Same as ECEN 4797. Prerequisites: Restricted to any graduate students or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Power

ECEN-5807 (3) Modeling and Control of Power Electronic Systems

Studies modeling and control topics in power electronics. Averaged switch modeling of converters, computer simulation, ac modeling of the discontinuous conduction mode, the current programmed mode, nulldouble injection techniques in linear circuits, input filter design, and low-harmonic rectifiers. Prereq., ECEN 5797.

College of Engineering & Applied Science | Electrical & Computer Engineering | Power

ECEN-5817 (3) Resonant and Soft-Switching Techniques in Power Electronics

Covers resonant converters and inverters, and soft switching; sinusoidal approximations in analysis of series, parallel, Lcc, and other resonant dc-dc and dc-ac converters; state-plane analysis of resonant circuits; switching transitions in hard-switched and soft-switched Pwm converters; zero-voltage switching techniques, including resonant, quasi resonant, zero voltage transition, and auxiliary switch circuits. Prereq., ECEN 5797 or instructor consent required.

College of Engineering & Applied Science | Electrical & Computer Engineering | Power

ECEN-5827 (3) Analog IC Design

Same as ECEN 4827. Prerequisites: Restricted to any graduate students or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Power

ECEN-5837 (3) Mixed-Signal IC Design Lab

Software laboratory course extends the concepts developed in ECEN 4827 to full design and layout of mixed analog and digital custom integrated circuits. Assignments explore implementation of analog to digital and digital to analog converters, and final project develops a full custom IC for a target application. Prereq., ECEN 5827.

[Dynamical Systems and Control](#)

ECEN-4138 (3) Control Systems Analysis

Analysis and design of continuous time control systems using classical and state space methods. Laplace transforms, transfer functions and block diagrams. Stability, dynamic response, and steady-state analysis. Analysis and design of control systems using root locus and frequency response methods. Computer aided design and analysis. Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only. Prereq., ECEN 3300, background in Laplace transforms, linear algebra, and ordinary differential equations. Same as ECEN 5138.

Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

[College of Engineering & Applied Science](#)
[Electrical & Computer Engineering](#)
[Dynamical Systems and Control](#)

ECEN-4638 (3) Control Systems Laboratory

Provides experience in control system design and analysis, using both real hardware and computer simulation. Covers the entire control system design cycle: modeling the system, synthesizing a controller, conducting simulations, analyzing the design to suggest modifications and improvements, and implementing the design for actual testing. Prereq., ECEN 3300. Coreq., ECEN 4138.

Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Dynamical Systems and Control

ECEN-5008 (1-4) Special Topics

Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Dynamical Systems and Control

Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Dynamical Systems and Control

ECEN-5028 (1-4) Special Topics

College of Engineering & Applied Science | Electrical & Computer Engineering | Dynamical Systems and Control

ECEN-5138 (3) Control Systems Analysis

Topics covered in ECEN 4138 will be investigated in more depth, require external readings, additional homework will be assigned and the exams will be more difficult. Restricted to graduate students in Electrical Engineering (EEEN) or Electrical/Computer Engineering (ECEN) or Electrical Engineering Concurrent or Electrical/Computer Engineering Concurrent Degree students only. Prereq., ECEN 3300 or equivalent. Same as ECEN 4138. Prerequisites: Restricted to graduate students in Electrical Engineering (EEEN) or Electrical/Computer Engineering (ECEN) or Electrical Engineering Concurrent or Electrical/Computer Engineering Concurrent Degree students only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Dynamical Systems and Control

ECEN-5358 (3) Optimization and Optimal Control

Introduces the theory and practice of optimization and optimal control. Topics include basic theory, nonlinear system trajectories and regulation, function space operators and derivatives, optimality conditions, barrier functionals, and Newton's method in function space. Recommended prereq., ECEN 5448. Restricted to graduate students in Electrical Engineering (EEEN) or Electrical/Computer Engineering (ECEN) or Electrical Engineering Concurrent or Electrical/Computer Engineering Concurrent Degree students only. Prerequisites: Restricted to graduate students in Electrical Engineering (EEEN) or Electrical/Computer Engineering (ECEN) or Electrical Engineering Concurrent or Electrical/Computer Engineering Concurrent Degree students only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Dynamical Systems and Control

ECEN-5418 (3) Automatic Control Systems 1

Coverage of principles of control systems with Multiple Inputs and Multiple Outputs (MIMO). Topics include MIMO state-space theory, applications of the singular value decomposition (SVD), coprime factorization methods, frequency domain topics, and an introduction to H-infinity design. Prereqs., ECEN 3300, 4138, and 5448, or equivalents.

| | | |
|--|-----------------------------------|-------------------------------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | Dynamical Systems and Control |
|--|-----------------------------------|-------------------------------|

ECEN-5438 (3) Robot Control

Provides a comprehensive treatment of the mathematical modeling of robot mechanisms and the analysis methods used to design control laws for these mechanisms. Prereqs., ECEN 4138 and PHYS 1110.

| | | |
|--|-----------------------------------|-------------------------------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | Dynamical Systems and Control |
|--|-----------------------------------|-------------------------------|

ECEN-5448 (3) Advanced Linear Systems

Offers a state space approach to analysis and synthesis of linear systems, state transition matrix, controllability and observability, system transformation, minimal realization, and analysis and synthesis of multi-input and multi-output systems. Prereq., ECEN 3300 and 4138. Prerequisites: Restricted to any graduate students or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

| | | |
|--|-----------------------------------|-------------------------------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | Dynamical Systems and Control |
|--|-----------------------------------|-------------------------------|

ECEN-5458 (3) Sampled Data and Digital Control Systems

Provides an analysis and synthesis of discrete-time systems. Studies sampling theorem and sampling process characterization, z-transform theory and z-transferfunction, and stability theory. Involves data converters (A/D and D/A), dead-beat design, and digital controller design. Prereqs., ECEN 3300 and 4138. Prerequisites: Restricted to Graduate Students only.

| | | |
|--|-----------------------------------|-------------------------------|
| College of Engineering & Applied Science | Electrical & Computer Engineering | Dynamical Systems and Control |
|--|-----------------------------------|-------------------------------|

ECEN-7438 (3) Theory of Nonlinear Systems

Nonlinear systems and control. Introduction to nonlinear phenomena: multiple equilibria, limit cycles, bifurcations, complex dynamical behavior. Planar dynamical systems, analysis using phase plane techniques. Input-output analysis and stability. Passivity. Lyapunov stability theory. Feedback linearization. Exploration of examples and applications. Prereq., ECEN 5448.

Subject

Number

AREN-4317 (5) Architectural Engineering Design

Provides a capstone experience to AREN students. Students design a modest commercial building and complete an integrated engineering design of the building systems executed for the conceptual, schematic, and design development phases. Students' teams work on structural, mechanical, electrical/lighting, and construction engineering management design. Each stage produce a professional-quality design document. Faculty and industry mentors participate in the teaching and evaluation of designs. Prerequisites: Requires pre-requisite courses of AREN 3010, CVEN 3246, CVEN 3525, and AREN 3540 (all min grade C-). Requires a pre-requisite or co-requisite course of AREN 4570.

[College of Engineering & Applied Science](#) [Civil Engineering](#) [Miscellaneous](#)

CSCI-4317 (3) Genome Databases: Mining and Management

Develops essential skills for performing genomic analyses, with focus on developing practical research tools. Introduces human genome and microbiome projects, Python/SQL scripting, accessing and understanding genomic data, sequence alignment and search, evolutionary models, expression data, biological networks, and macromolecular structure. Prereqs., MCDB 3500, CSCI 3104, or CHEM 4711; coreq., CSCI 2270. Same as CSCI 5317. Credit not granted for this course and CHEM 4621 or MCDB 4621.

[College of Engineering & Applied Science](#) [Computer Science](#) [Database Systems](#)

CSCI-4318 (4) Software Engineering Project 2

Second semester of an advanced practicum in computer science. Students must take CSCI 4308 and 4318 contiguously as the project spans the entire academic year. Prereq., CSCI 4308.

[College of Engineering & Applied Science](#) [Computer Science](#) [Software Engineering](#)

CVEN-4323 (3) Water Resource Engineering Design

Design of urban water supply, wastewater, and supply stormwater management system, with demand management as an option. Exploration of the feasibility of recycling and reuse of treated wastewater and stormwater. Prereqs., CVEN 3227 and 4147. Same as CVEN 5423.

College of Engineering & Applied Science | Civil Engineering | Fluid Mechanics & Water Resour

ECEN-4324 (3) Fundamentals of Microsystem Packaging

Introduction to the fundamentals of microsystems packaging. This is a seminar style course which surveys topics in microsystem packaging such as: electrical package design, design for reliability, thermal management, multichip packaging, IC Assembly, sealing and encapsulation, and board assembly. Coreq., ECEN 3410 or instructor consent. Same as ECEN 5324. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Engineering majors only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Electromagnetics

CHEN-4330 (3) Chemical Engineering Reaction Kinetics

Introduces chemical kinetics and chemical reactor design. Involves mass and energy balances for steady-state and transient reactor systems. Also covers residence time distribution, mass transfer, catalytic reactions, and multiple steady states in reactors. Prerequisites: Requires pre-requisite courses of CHEN 3320 and APPM 2360.

College of Engineering & Applied Science | Chemical Engineering

CVEN-4333 (3) Engineering Hydrology

Studies engineering applications of principles of hydrology, including hydrologic cycle, rainfall and runoff, groundwater, storm frequency and duration studies, stream hydrography, flood frequency, and flood routing. Prerequisites: Requires pre-requisite course of CVEN 3313 (or AREN 2120 or CHEN 3200 or GEEN 3853 or MCEN 3021; all min grade C-). Requires co-requisite course of CVEN 3227 (or APPM 4570 or MCEN 3037).

College of Engineering & Applied Science | Civil Engineering | Fluid Mechanics & Water Resour

ASEN-4338 (3) Computer Analysis of Structures

Covers basic structural design concepts and finite element modeling techniques. Emphasizes use of finite element static and dynamic analysis to validate and refine an initial design. Introduces basic design optimization and tailoring. Proficiency in Matlab required. Prereq., ASEN 3112. Prerequisites: Requires pre-requisite course of ASEN 3112.

College of Engineering & Applied Science | Aerospace Engineering | Structures, Mat, & Struc Dynam

ECEN-4341 (3) Bioelectromagnetics

Effects of electric and magnetic fields on biological systems are described with applications to therapy and safety. The complexity of biological systems is described to provide a better understanding of the distribution of fields inside the body. Risk analysis is also introduced. Prereqs., ECEN 3400 and 3810. Same as ECEN 5341.

College of Engineering & Applied Science | Electrical & Computer Engineering | Bioengineering

CSCI-4342 (3) Groupware and Workflow Systems

Supports students in developing professional skills and knowledge concerning the use of computer technologies to support collaborative activities. Also covers the impact of digital collaboration technologies on users, groups, organizations and society. Students will gain practical experience with Business Process Management and the use of Workflow Management Systems. Same as CSCI 5342.

College of Engineering & Applied Science | Computer Science | Artificial Intelligence

CVEN-4353 (3) Groundwater Engineering

Studies the occurrence, movement, extraction for use, and quantity and quality aspects of groundwater. Introduces and uses basic concepts to solve engineering and geohydrologic problems. Prereq., Cven 3313. Prerequisites: Restricted to College of Engineering majors only.

College of Engineering & Applied Science | Civil Engineering | Fluid Mechanics & Water Resour

ECEN-4375 (3) Microstructures Laboratory

Offers experience in monolithic silicon integrated circuit fabrication techniques, including Ic layout, pattern compiling and generation, mask making, oxidation, photolithography, diffusion, implantation, metallization, bonding, process analysis, and testing. Includes design project. Prereq., ECEN 3320. Same as ECEN 5375.

College of Engineering & Applied Science | Electrical & Computer Engineering | Nanostructures and Devices

CVEN-4383 (3) Groundwater Modeling

Studies mathematical and numerical techniques needed to develop models to solve problems in water flow and chemical transport in aquifers. Emphasizes the learning of modeling techniques from fundamentals and the application of models to solve problems in groundwater engineering. Recommended prereq., CVEN 4353. Same as CVEN 5383.

College of Engineering & Applied Science | Civil Engineering | Fluid Mechanics & Water Resour

CVEN-4404 (3) Water Chemistry

Introduces chemical fundamentals of inorganic aqueous compounds and contaminants in lecture and laboratory. Lecture topics include thermodynamics and kinetics of acids and base reactions, carbonate chemistry, air-water exchange, precipitation, dissolution, complexation, oxidation-reduction, and sorption. Prereqs., CHEN 1211 and CVEN 3414, or CHEM 1111 and 1131 for non-engineers. Restricted to CVEN and EVEN majors only. Formerly CVEN 3454. Prerequisites: Restricted to Civil (CVEN) or Environmental (EVEN) Engineering majors only.

College of Engineering & Applied Science | Civil Engineering | Environmental

CSCI-4412 (3) Design, Creativity, and New Media

Explores the design of new media and technologies to support design and creativity. Analyzes design and creativity as human activities of fundamental importance in the networked information

culture and economy. Provides theoretical and practical analysis of new media. Instructor consent required. Recommended prereq., CSCI 3002. Instructor consent required. Same as CSCI 5412.

College of Engineering & Applied Science Computer Science Artificial Intelligence

CVEN-4414 (1) Water Chemistry Laboratory

Reinforces chemical fundamentals of inorganic aqueous compounds and contaminants from CVEN 4404 Water Chemistry in laboratory experiments and reports. Topics include acids and bases, carbonate chemistry (alkalinity), and other water chemistry characteristics (hardness, dissolved oxygen); precipitation, complexation, and oxidation-reduction reactions; and laboratory techniques and reporting. Prereqs., CHEN 1211 and CVEN 3414 or CHEN 1111 and 1131 for non-engineers. Coreq., CVEN 4404. Restricted to CVEN or EVEN majors only. Prerequisites: Restricted to Civil (CVEN) or Environmental (EVEN) Engineering majors only.

College of Engineering & Applied Science Civil Engineering Environmental

AREN-4420 (3) Cost Engineering

Focuses on conceptual cost estimating and evaluation techniques to support engineering design. Topics include assemblies estimating, probabilistic estimating, value engineering, constructability concepts, and life-cycle costing. Prereq., CVEN 3246. Prerequisites: Requires pre-requisite course of CVEN 3246 (min grade C-).

College of Engineering & Applied Science Civil Engineering Construction

ECEN-4423 (3) Chaotic Dynamics

Explores chaotic dynamics theoretically and through computer simulations. Covers the standard computational and analytical tools used in nonlinear dynamics and concludes with an overview of leading-edge chaos research. Topics include time and phase-space dynamics, surfaces of section, bifurcation diagrams, fractal dimension, and Lyapunov exponents. Prereqs., two semesters calculus, ECEN 1030 or CSCI 1300 or equivalent, and PHYS 1110. Recommended prereqs., PHYS 1120, CSCI 3656, and MATH 3130. Same as CSCI 4446 and ECEN 5423.

College of Engineering & Applied Science Electrical & Computer Engineering Computer and Digital Systems

CVEN-4424 (3) Environmental Organic Chemistry

Examines the fundamental physical and chemical transformations affecting the fate and transport of organic contaminants in natural and treated waters. Emphasizes quantitative approach to solubility, vapor pressure, air-water exchange, sorption, hydrolysis and redox reactions, and photodegradation. Prerequisites: Requires pre-requisite courses of CHEN 1211 and CHEM 1211 (or CHEM 1113 and CHEM 1114 or CHEM 1271 or CHEM 1371).

College of Engineering & Applied Science Civil Engineering Environmental

ASEN-4426 (3) Neural Systems and Physiological Control

A biophysical exploration of human physiology from the standpoints of control systems and neural information processing. Topics include: neural control of movement and cardiovascular performance, tissue growth and repair, carcinogenesis, and physiological responses to microgravity. Prereqs., ECEN 2260 or 3030, ASEN 3300, or instructor consent. Same as ASEN 4426 and ECEN 4821/5821. Prerequisites: Requires pre-requisite course of ASEN 3300 or ECEN 2260 or ECEN 3030.

College of Engineering & Applied Science Aerospace Engineering Bioastronautics & Microgravity

CVEN-4434 (4) Environmental Engineering Design

Examines the design of facilities for the treatment of municipal water and wastewater, hazardous industrial waste, contaminated environmental sites, and sustainable sanitation in developing countries. Economic, societal, and site specific criteria impacting designs are emphasized. Prereq., CVEN 3414. Restricted to seniors. Prerequisites: Requires pre-requisite course of CVEN 3414 (min grade C-).

College of Engineering & Applied Science Civil Engineering Environmental

ASEN-4436 (3) Brains, Minds, Computers

An introductory, integrative survey of brain science, cognitive science, artificial intelligence, and their interrelations. Considers central concepts and principles from each of these areas and the similarities and difference of brain, minds, computers, robots, etc. Same as ASEN 5436 and ECEN 4831/5831. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Engineering majors only.

College of Engineering & Applied Science Aerospace Engineering Bioastronautics & Microgravity

CHEN-4440 (3) Chemical Engineering Materials

Introduces materials engineering, including properties of polymers, metals, ceramics, and semiconductors, especially as related to chemical engineering processes. Prereq., CHEN 3320 and CHEM 3311 (min grade C-).

College of Engineering & Applied Science Chemical Engineering

CSCI-4446 (3) Chaotic Dynamics

Explores chaotic dynamics theoretically and through computer simulations. Covers the standard computational and analytical tools used in nonlinear dynamics and concludes with an overview of leading-edge chaos research. Topics include time and phase-space dynamics, surfaces of section, bifurcation diagrams, fractal dimension, and Lyapunov exponents. Prereqs., two semesters calculus, CSCI 1200, 1300 or equivalent, and PHYS 1110. Recommended prereqs., PHYS 1120, CSCI 3656, and MATH 3130. Same as CSCI 5446 and ECEN 4423. Prerequisites: Requires pre-requisite course of CSCI 1200 or 1300 and PHYS 1110 (minimum grade C-).

College of Engineering & Applied Science Computer Science Numerical Computation

CSCI-4448 (3) Object-Oriented Analysis and Design

An applied analysis and design class addressing the use of object-oriented techniques. Topics include domain modeling, use cases, architectural design, and modeling notations. Students apply the techniques in analysis and design projects. Prereq., CSCI 3155 or expertise in one or more object-oriented programming languages, such as C++ or Java. Same as CSCI 5448.

EMEN-4030 (3) Project Management Systems

Acquaints the student with multidisciplinary aspects of project management, including the relationship between schedule, project cost, and performance. Uses qualitative and quantitative tools to facilitate project management skills. Restricted to junior or senior in the College of Engineering and Applied Science. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

[College of Engineering & Applied Science](#) [Engineering Management](#)

EMEN-4050 (3) Leadership and Professional Skills

Provides basic concepts of leadership and the essential skills required to become an effective leader/manager. Students will be provided the opportunity for personal development through exercises in communication and leadership effectiveness. Other major topics include leadership styles, managing commitments, change management, negotiation, conflict resolution, organizational culture, emotional intelligence, team dynamics, and business ethics. Restricted to seniors in the College of Engineering and Applied Science. Prerequisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Engineering majors only.

[College of Engineering & Applied Science](#) [Engineering Management](#)

EMEN-4100 (3) Business Methods and Economics for Engineers

Covers cost concepts, financial statements, and the company economic environment. Includes concepts and methods of analysis of the time value of money, comparison of project alternatives before and after taxes, cash flows, replacement analysis, risk management, and financial cash statements. Restricted to junior or senior in the College of Engineering and Applied Science. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

[College of Engineering & Applied Science](#) [Engineering Management](#)

EMEN-4800 (3) Technology Ventures and Marketing.

Acquiring basic management and marketing skills is essential to successfully participating in technology venture development whether in a start-up company or Fortune 500 company. In the course, students learn to evaluate a technology, consider its viability as product, and learn the basic tenets of marketing with emphasis on developing a technology innovation into a commercially successful product with a mind on customer development as a key aspect of product development. Restricted to junior or senior in the College of Engineering and Applied Science. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

College of Engineering & Applied Science Engineering Management

EMEN-4825 (3) Entrepreneurial Business Plan Preparation

Instructs students in the necessary elements of a business plan and how to prepare a complete well-written plan for an entrepreneurial business venture. Students work in interdisciplinary business-engineering five-person teams to create a business concept and take it through to business plan completion. Same as ESBM 4830. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

College of Engineering & Applied Science Engineering Management

EMEN-4830 (1-3) Special Topics

College of Engineering & Applied Science Engineering Management

EMEN-5000 (3) Engineering Analysis

Provides an introduction to the logical and systematic thinking required to evaluate and solve typical engineering problems in mechanics, electricity, thermodynamics, fluid mechanics, and light. Emphasizes understanding the physical behavior of systems and applying the principles and laws from the physical sciences to analyze these systems. Required for nonengineers seeking admission to the graduate technology management curriculum track. Not for degree credit. Non-EMP students require instructor permission. Prerequisites: Restricted to graduate students in Engineering Management Program (EMEN) only.

College of Engineering & Applied Science Engineering Management

EMEN-5005 (3) Introduction to Applied Statistical Methods

Covers foundations for statistical reasoning and statistical applications. Topics include descriptive statistics, introduction to probability, random variables, discrete and continuous probability distributions, sampling theory and sampling distributions, statistical inference (point and interval estimation and hypothesis testing), and simple regression. All material taught is based upon case studies from business and industry. Restricted to students with 57-180 credits (Junior or Senior) or graduate students only. Not for EMP degree credit. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) or graduate students only.

College of Engineering & Applied Science Engineering Management

EMEN-5010 (3) Introduction to Engineering Management

Provides a general introduction to the principles and methods of technical management covering a variety of topics in leadership, strategic planning, product management, entrepreneurship, finance, value chains, management of R&D, and economic environments. Industry guest speakers provide real-life examples and applications. Required for all degree students. Non-EMP students require instructor permission. Prerequisites: Restricted to graduate students in Engineering Management Program (EMEN) only.

College of Engineering & Applied Science Engineering Management

College of Engineering & Applied Science | Engineering Management

EMEN-5020 (3) Finance and Accounting for Engineering Managers

Provides the concepts and skills necessary to financially analyze project and assess financial performance and status of an organization. Includes the time value of money, comparison of alternatives, taxes, risk management, cash flow, and financial cash statements. Required for all degree students. Non-EMP students require instructor permission. Prerequisites: Restricted to graduate students in Engineering Management Program (EMEN) only.

College of Engineering & Applied Science | Engineering Management

EMEN-5025 (3) Entrepreneurial Finance for Engineers

Teaches students to prepare, interpret and use financial information, in the context of startup and early stage enterprises. Includes historical financial statements, budgets and the budgeting process, and the use of financial information in raising capital. Non-EMP students require instructor permission. Prerequisites: Restricted to graduate students in Engineering Management Program (EMEN) only.

College of Engineering & Applied Science | Engineering Management

EMEN-5030 (3) Project Management

Presents the basic skills required to manage a wide range of technical projects. Topics include selecting project alternatives, managing project teams, developing project plan elements, risk management, monitoring and controlling projects, and financial analysis of projects. Skills learned are applied to a representative project. Non-EMP students require instructor permission. Prerequisites: Restricted to graduate students in Engineering Management Program (EMEN) only.

College of Engineering & Applied Science | Engineering Management

EMEN-5031 (3) Software Project Management

Understand unique considerations of the software lifecycle that impact project management. Emphasize configuration management, code reviews, architectural influences, and quality assurance with automated testing. Explore Capability Maturity Model (CMM) and Unified Modeling Language (UML) impact on project success. Recommended prereq., some software development experience. Same as ECEN 5603 and CSCI 5608. Non-EMP students require instructor permission. Prerequisites: Restricted to graduate students in Engineering Management Program (EMEN) only.

College of Engineering & Applied Science | Engineering Management

EMEN-5032 (3) Advanced Topics in Project Management

Covers advanced topics in project management from a systems view based on the Project Management Body of Knowledge (PMBOK); spans the entire project life cycle. Prereq., EMEN 5030 or equivalent. Non-EMP students require instructor permission. Prerequisites: Restricted to graduate students in Engineering Management Program (EMEN) only.

College of Engineering & Applied Science | Engineering Management

EMEN-5040 (3) Quality, Strategy, and Value Creation

Introduces business performance excellence (BPE) including history of Quality Sciences, Six Sigma, and Deming's Theory of Profound Knowledge. Addresses use of strategic planning, policy deployment, and Total Asset Utilization to exceed customer requirements and maximize profitability. Addresses topics strategically and tactically through case analysis, field study, and experiential learning. Prereq., EMEN 5005 or equivalent. Non-EMP students require instructor permission. Similar to OPIM 6030. Prerequisites: Restricted to graduate students in Engineering Management Program (EMEN) only.

College of Engineering & Applied Science | Engineering Management

EMEN-5041 (3) Advanced Topics in Value Creation

Studies methods designed to maximize excellence in business performance. Advanced study includes interactions with the customers and suppliers, integrated manufacturing, and meeting customer requirements while focusing on maximizing profitability. These characteristics are addressed both strategically and tactically through the use of case analysis, field study, and experiential learning for both the production and service sectors. Prereq., EMEN 5040. Recommended prereq., EMEN 5042. Non-EMP students require instructor permission. Prerequisites: Restricted to graduate students in Engineering Management Program (EMEN) only.

College of Engineering & Applied Science | Engineering Management

EMEN-5042 (3) Methods for Quality Improvement

In-depth investigation of the concepts, tools, and techniques used in the management and measurement of quality and productivity. Topics include basic statistics and probability; process variation; statistical process control charting and capability analysis for process, product, and management systems; and an introduction to design of experiments (DOE) in business and industry. Prereq., EMEN 5040 or instructor consent. Non-EMP students require instructor permission. Prerequisites: Restricted to graduate students in Engineering Management Program (EMEN) only.

College of Engineering & Applied Science | Engineering Management

EMEN-5043 (3) Advanced Topics in Quality Systems/ Engineering

Advanced study of methods, tools, techniques, and systems associated with advanced quality applications. Includes a survey of advanced process control technologies, control schemes, and measurement system analysis. Prereq., EMEN 5042. Non-EMP students require instructor permission. Prerequisites: Restricted to graduate students in Engineering Management Program (EMEN) only.

College of Engineering & Applied Science | Engineering Management

EMEN-5050 (3) Leadership

Provides working engineers a background in leadership concepts and methods, and enables students to develop practical skills through numerous exercises. Topics include authentic leadership, increasing human performance and effectiveness, emotional intelligence, managing commitments, conflict resolution, leading change, and organizational culture. Required for all engineering management degree students. Same as TLEN 5050. Non-EMP students require instructor permission. Prerequisites: Restricted to graduate students in Engineering Management Program (EMEN) only.

College of Engineering & Applied Science | Engineering Management

EMEN-5080 (3) Ethical Decision-Making in Engineering Management

Provide students with the ability to recognize ethical issues and dilemmas affecting managers in the workplace; understand various models and practices offering solutions to these issues; and

understand how to create a culture of ethics and integrity in supporting and/or building a profitable, healthy, and responsible organization. Prerequisites: Restricted to students with 87-180 credits (Seniors) or graduate students only.

College of Engineering & Applied Science | Engineering Management

EMEN-5090 (3) Technology Ventures and Marketing

Acquiring marketing know-how is essential for engineers interested in technology and product development. Students learn the basic tenets of marketing with emphasis on developing a technology innovation into a commercially successful product. Special attention given to customer development as a key aspect of product development. Course designed to be of interest to engineers in existing companies and startups. Highlighted will be in-depth discussions of real-world case studies and providing the student with marketing strategies for the high tech environment. Non-EMP students require instructor permission. Restricted to graduate students in Engineering Management Program (EMEN) only. Prerequisites: Restricted to graduate students in Engineering Management Program (EMEN) only.

College of Engineering & Applied Science | Engineering Management

EMEN-5300 (3) Management of Research and Development

Provides practical, tested tools to manage research and development in industry and in university and government laboratories. R&D strategies are emphasized, as are innovation and creativity concepts and techniques. R&D portfolio techniques are emphasized and are the basis for a team project. Non-EMP students require instructor permission. Prerequisites: Restricted to graduate students in Engineering Management Program (EMEN) only.

College of Engineering & Applied Science | Engineering Management

EMEN-5400 (3) Product Development

Provides state-of-the-art techniques for improving the identification and creation of new products, services, and brands that provide an exceptional customer experience. Both proven and emerging management techniques in new product management are covered. Non-EMP students require instructor permission. Prerequisites: Restricted to graduate students in Engineering Management Program (EMEN) only.

College of Engineering & Applied Science | Engineering Management

EMEN-5405 (3) Systems Engineering: Requirements

Provides students with an understanding of how to prepare a program for effective and timely specification development and analytical methods for specification development. Management aspects covered include traceability, margins and budgets, requirements validation, specification publishing, and use of database systems. Non-EMP students require instructor permission. Prerequisites: Restricted to graduate students in Engineering Management Program (EMEN) only.

College of Engineering & Applied Science | Engineering Management

EMEN-5410 (3) Systems Engineering: Synthesis

Provides methods for transforming a set of requirements in a series of specifications into a physical reality through product design, material procurement, and manufacturing transforms. The solution is developed through integration and optimization. This is the second course in a three course systems engineering sequence. Non-EMP students require instructor permission. Prerequisites: Restricted to graduate students in Engineering Management Program (EMEN) only.

AREN-4035 (3) Architectural Structures 1

Analyzes basic structural systems. Covers principles of mechanics and mechanical properties of materials and analysis and design of trusses, arches, and cable structures. For nonengineering students; does not apply toward an engineering degree. Prereq., PHYS1110, and APPM 1350 or MATH 1300. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) Environmental Design majors only.

[College of Engineering & Applied Science](#) [Civil Engineering](#) [Structures](#)

AREN-4045 (3) Architectural Structures 2

Analyzes basic structural systems. Covers principles of mechanics as applied to the design of flexural members, columns, continuous beams, and rigid frames. For nonengineering students; does not apply toward an engineering degree. Prereq., AREN 4035.

[College of Engineering & Applied Science](#) [Civil Engineering](#) [Structures](#)

AREN-4315 (3) Design of Masonry Structures

Covers modern masonry construction; properties and behavior of the reinforced masonry component materials, clay and concrete masonry units, mortar, grout, and steel reinforcement; vertical and lateral load types and intensities; and design of reinforced masonry walls, beams, and columns by working stress and strength design methods. Prereq., CVEN 3525.

ASEN-4047 (3) Probability and Statistics for Aerospace Engineering Sciences

Considers probability concepts and theory for better design and control of aerospace engineering systems. Includes descriptive and inferential statistical methods for experimental analysis. Also covers discrete and continuous random variable distributions, estimators, confidence intervals, regression, analysis of variance, hypothesis testing, nonparametric statistics, random processes, and quality control, including software models of same. Prereq., junior or graduate standing or instructor consent. Same as ASEN 5047.

[Aerospace Engineering](#)
[Computational & Analytic Meth](#)

ASEN-5227 (3) Mathematics for Aerospace Engineering Sciences 1

Provides an introduction to the methods and mathematics of advanced engineering analysis tailored to aerospace engineering applications. Topics include vector and tensor calculus, ordinary differential equations, and an introduction to the calculus of variations. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

[College of Engineering & Applied Science](#)
[Aerospace Engineering](#)
[Computational & Analytic Meth](#)

ASEN-5307 (3) Engineering Data Analysis Methods

Gives students broad exposure to a variety of traditional and modern statistical methods for filtering and analyzing data. Topics include estimation methods, principal component analyses and spectral analyses. Introduces these methods and provides practical experience with their use. Students carry out problem assignments. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Aerospace Engineering | Computational & Analytic Meth

ASEN-5417 (3) Numerical Methods for Differential Equations

Provides computational skills and basic knowledge of numerical methods for advanced courses in engineering/scientific computation using Fortran, C, or Matlab. Prereq., APPM 2360 and instructor consent. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

ASEN-4090 (3) Global Positioning Systems Applications

Focuses on GPS technology, software development, and applications. Lectures will cover the principal concepts used in GPS, and weekly laboratories will apply that knowledge. The course will culminate instudent design projects using GPS. Prereqs., APPM 2360 and GEEN 1300 or equivalent. Recommended junior/senior standing in engineering.

[College of Engineering & Applied Science](#) [Aerospace Engineering](#) [Global Positioning Systems](#)

ASEN-5090 (3) Introduction to Global Navigation Satellite Systems

Global Navigation Satellite Systems (GNSS) are important tools for navigation, science, and engineering. Introduces GNSS hardware, signal structure, algorithms, error sources, and modeling techniques. Programming experience is required. Restricted to Engineering (ENGR) graduate students or Aerospace Engineering-Concurrent Degree (C-ASEN) students. Prerequisites: Restricted to Engineering (ENGR) graduate students or Aerospace Engineering-Concurrent Degree (C-ASEN) students.

[College of Engineering & Applied Science](#) [Aerospace Engineering](#) [Global Positioning Systems](#)

ASEN-6090 (3) Advanced Global Navigation Satellite Systems: Software and Applications

Focuses on high-precision applications of Global Navigation Satellite Systems (GNSS) and the software tools that are needed to achieve these precisions. Topics include precise orbital determination, reference frames, atmospheric delays, relativity, clock models, ambiguity resolution, and scientific applications. Prereq., ASEN 5090. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

[College of Engineering & Applied Science](#) [Aerospace Engineering](#) [Global Positioning Systems](#)

ASEN-6091 (3) Global Navigation Satellite System (GNSS) Receiver Architecture

Investigates the overall architecture of satellite navigation receivers: including both the analog radio frequency conditioning (antenna to the analog-to-digital converter) and the various signal processing algorithms. Such treatment of the operation of the receiver will provide insight into the trade-offs that go into GNSS as well as the more broad generic spread spectrum receiver design. Recommended prereq., ASEN 5090. Prerequisites: Restricted to Graduate Students only.

CHEN-4450 (3) Polymer Chemistry

Introduces polymer science with a focus on polymer chemistry and polymerization reactions. Focuses on polymerization reaction engineering and how polymer properties depend on structure. Same as CHEN 5450. Prerequisites: Requires pre-requisite courses of CHEN 4830 or CHEM 3311 and CHEN 4330 (all min grade C-).

[College of Engineering & Applied Science](#) | [Chemical Engineering](#)

CHEN-4460 (3) Polymer Engineering

Introductory polymer engineering course reviewing basic terminology and definitions; the properties and synthetic routes of important industrial polymers; and processing of polymers and their applications. Prereq., CHEM 3311 and CHEN 3320 (min. grade C-). Same as CHEN 5460. Prerequisites: Requires pre-requisite courses of CHEM 3311 and CHEN 3320.

[College of Engineering & Applied Science](#) | [Chemical Engineering](#)

CVEN-4464 (3) Environmental Engineering Processes

Develops and utilizes analytic solutions for environmental process models that can be used in a) reactor design for processes used in the treatment of water, wastewater and hazardous waste and b) process analysis of natural systems, such as streams and groundwater flow. Models facilitate the tracking of contaminants in engineered and natural systems. Prereq. or coreq., CVEN 3414 or equivalent and Fluid Mechanics. CVEN 4464 and 5464 are the same course.

[College of Engineering & Applied Science](#) | [Civil Engineering](#) | [Environmental](#)

AREN-4466 (3) Construction Planning and Scheduling

Comprehensively studies project management activities for scheduling and delivering construction projects, including the contractor's role in preconstruction and construction activities and the

application of CPM/PERT techniques to the planning, scheduling, and control of a construction project. Prereq., CVEN 3246. Restricted to Architectural or Civil Engineering majors only.
Prerequisites: Restricted to Architectural (AREN) or Civil (CVEN) Engineering majors only.

College of Engineering & Applied Science | Civil Engineering | Construction

CVEN-4474 (3) Hazardous and Industrial Waste Management

Evaluates processes used for treatment of wastes requiring special handling and disposal: toxic organic chemicals, heavy metals, and acidic, caustic, and radioactive waste material. Discusses techniques for destruction, immobilization, and resource recovery and assessment of environmental impact of treatment process end products. Prereq., CVEN 3414. Same as CVEN 5474.
Prerequisites: Restricted to College of Engineering majors only.

College of Engineering & Applied Science | Civil Engineering | Environmental

CVEN-4484 (3) Introduction to Environmental Microbiology

Surveys microbiology topics germane to modern civil and environmental engineering. Provides fundamentals needed to understand microbial processes and ecology in engineered and natural systems and reviews applications emphasizing the interface between molecular biology and classical civil engineering. Prerequisites: Requires pre-requisite courses of CHEN 1211 and CHEM 1211 (or CHEM 1113 and CHEM 1114 or CHEM 1251 or CHEM 1351) and APPM 2350 (or MATH 2400).

College of Engineering & Applied Science | Civil Engineering | Environmental

CSCI-4502 (3) Data Mining

Introduces basic data mining concepts and techniques for discovering interesting patterns hidden in large-scale data sets, focusing on issues relating to scalability and efficiency. Topics covered include data preprocessing, data warehouse, association, classification, clustering, and mining specific data types such as time-series, social networks, multimedia, and Web data. Prereq., CSCI 2270 or instructor consent. CSCI 4502 and 5502 are the same course.

College of Engineering & Applied Science | Computer Science | Artificial Intelligence

CVEN-4511 (3) Introduction to Finite Element Analysis

Systematic formulation of finite element approximation and isoparametric interpolation (weighted residual and energy methods, triangular and quadrilateral elements). Includes computation applications to the solution of one- and two-dimensional stress-deformation problems, steady and transient heat conduction, and viscous flow. Prereqs., CVEN 3161, 3525, and Appm 2360. Same as CVEN 5511.

College of Engineering & Applied Science | Civil Engineering | Mechanics

ECEN-4517 (3) Power Electronics and Photovoltaic Power Systems Laboratory

Focuses on analysis, modeling, design, and testing of electrical energy processing systems in a practical laboratory setting. Studies power electronics converters for efficient utilization of available energy sources, including solar panels and utility. The experimental projects involve design, fabrication, and testing of a solar power system. Prereq., ECEN 4797. Restricted to seniors. Same as ECEN 5517.

College of Engineering & Applied Science | Electrical & Computer Engineering | Power

ASEN-4519 (1-3) Special Topics

Studies specialized aspects of the aerospace engineering sciences or innovative treatment of required subject matter at the upper-division level. Course content is indicated in the online Schedule Planner. Prereq., varies. Prerequisites: Restricted to College of Engineering majors only.

College of Engineering & Applied Science | Aerospace Engineering | Specialized Courses

CHEN-4520 (3) Chemical Process Synthesis

Studies applied chemical process design including equipment specification and economic evaluation. Prerequisites: Requires pre-requisite courses of CHEN 3210, 3220, and 4330 or 4830 (all min grade C-).

College of Engineering & Applied Science | Chemical Engineering

CVEN-4525 (3) Analysis of Framed Structures

Studies matrix formulation of principles of structural analysis and development of direct stiffness and flexibility methods for analysis of frame and truss structures. Topics include support settlements, thermal loads, and energy formulations of force-displacement relationships. Prereq., CVEN 3525. Same as CVEN 5525.

College of Engineering & Applied Science | Civil Engineering | Structures

CHEN-4530 (2) Chemical Engineering Design Project

Provides a team-based capstone design experience for chemical engineering students. Projects are sponsored by industry and student design teams collaborate with industrial consultants. Projects consider chemical process and product design with emphasis on economic analysis. Deliverables include an oral mid-project design review, a final oral presentation and final written design report. Prereq., CHEN 4520 (min. grade C-). Prerequisites: Requires pre-requisite course of CHEN 4520.

College of Engineering & Applied Science | Chemical Engineering

ECEN-4532 (3) Digital Signal Processing Laboratory

Develops experience in code development, debugging, and testing of real-time digital signal processing algorithms using dedicated hardware. Applications include filtering, signal synthesis, audio special effects, and frequency domain techniques based on the Fast Fourier Transform. Prereq., ECEN 3300. Coreq., ECEN 4632. Same as ECEN 5532.

College of Engineering & Applied Science | Electrical & Computer Engineering | Communications

CVEN-4537 (3) Numerical Methods in Civil Engineering

Introduces the use of numerical methods in the solution of civil engineering problems, emphasizing obtaining solutions with high-speed electronic computers. Applies methods to all types of civil

engineering problems. Prereq., senior standing. Same as CVEN 5537.

College of Engineering & Applied Science Civil Engineering Miscellaneous

AREN-4540 (3) Exterior Lighting Systems

Engages students in exploring and solving lighting problems for exterior environments. Provides an understanding of the design criteria and lighting equipment used in three primary exterior applications: parking lots and roadways, floodlighting of buildings, and sports facilities. Prereq., AREN 3540. Recommended prereqs., AREN 3140 and 4550. Same as CVEN 5540. Taught intermittently.

College of Engineering & Applied Science Civil Engineering Building Systems Engineering

CVEN-4545 (3) Steel Design

Applies basic principles to design of steel structures; design of tension members, columns, beams, open-web joists, steel decks, bolts, bolted connections, welding processes, and welded connections. Prereq., CVEN 3525. Prerequisites: Requires pre-requisite course of CVEN 3525 (min grade C-).

College of Engineering & Applied Science Civil Engineering Structures

AREN-4550 (3) Illumination 2

Applies the principles studied in Illumination 1. Provides further study in architectural lighting design methods. Uses lighting studio work to develop a broad knowledge of lighting equipment, design methods, and their application in a series of practical design problems in modern buildings. Prereq., AREN 3540. Prerequisites: Requires pre-requisite course of AREN 3540 (min grade C-).

College of Engineering & Applied Science Civil Engineering Building Systems Engineering

ECEN-4553 (3) Compiler Construction

Introduces the principles and techniques for compiling high-level programming languages to assembly code. Topics include parsing, instruction selection, register allocation, and compiling high-level features such as polymorphism, first-class functions, and objects. Students build a complete compiler for a simple language. Prereqs., ECEN 2703 and ECEN 3350. Same as CSCI 4555 and ECEN 5523. Prerequisites: Restricted to College of Engineering majors only.

College of Engineering & Applied Science Electrical & Computer Engineering Computer and Digital Systems

CVEN-4554 (3) Fundamentals of Air Quality Management

Introduces engineering methods for the study of air quality. Topics include: indoor air quality, greenhouse gases, dispersion modeling, acidification of lakes, sources apportionment modeling, chemistry of combustion, pollution sources and controls, and human exposure to air pollutants. Under consideration as requirement for EVEN students in air quality track or concentration course in environmental engineering for undergraduate CVEN students. Prereqs., APPM 2360 (or MATH 3130 and 4430) and CVEN 3313 (or CHEN 3200 or MCEN 3021). Same as CVEN 5554. Prerequisites: Requires pre-requisite courses of APPM 2360 (or MATH 3130 and 4430) and CHEN 3313 (or CHEN 3200 or MCEN 3021).

College of Engineering & Applied Science Civil Engineering Environmental

CSCI-4555 (3) Compiler Construction

Introduces the basic techniques used in translating programming languages: scanning, parsing, definition table management, operator identification and coercion, code selection and register allocation, error recovery. Students build a complete compiler for a simple language. Prereqs., CSCI 2400 or ECEN 3350 and CSCI 2824. Same as ECEN 4553 and CSCI 5525.

College of Engineering & Applied Science Computer Science Programming Languages

CVEN-4555 (3) Reinforced Concrete Design

Focuses on applications to the design of reinforced concrete structures, including design of beams, columns, slabs, and footings; continuous beams and frames; cast-in-place buildings. Prereq., CVEN 3525.

College of Engineering & Applied Science Civil Engineering Structures

ECEN-4555 (3) Principles of Energy Systems & Devices

Develops principles underlying electronic, optical and thermal devices, materials and nanostructures for renewable energy. Course provides a foundation in statistical thermodynamics, and uses it to analyze the operation and efficiency limits of devices for photovoltaics, energy storage (batteries & ultra-capacitors), chemical conversion (fuel cells and engines), solid state lighting, heat pumps, cooling, and potentially harvesting zero-point energy from the vacuum. Prereq., ECEN 3810. Prereq. or coreq., PHYS 2130 or 2170 or instructor consent. Same as ECEN 5555.

College of Engineering & Applied Science Electrical & Computer Engineering Nanostructures and Devices

AREN-4560 (3) Luminous Radiative Transfer

Teaches fundamentals of radiative exchange as applied to illumination engineering. Describes and uses principal numerical techniques for radiative transfer analysis. Applies techniques to lighting design and analysis. Taught intermittently. Prerequisites: Requires pre-requisite course of AREN 3540.

College of Engineering & Applied Science Civil Engineering Building Systems Engineering

CVEN-4565 (3) Timber Design

Applies design methods to beams, columns, trusses, and connections using timber and glued, laminated members. Prerequisites: Requires pre-requisite course of CVEN 3525.

College of Engineering & Applied Science Civil Engineering Structures

CSCI-7782 (3) Topics in Cognitive Science

Addresses a different set of one to three topics each year. For each topic, one or two faculty members of the Institute of Cognitive Science present background material and current research. Prereq., graduate standing or instructor consent. Prerequisites: Restricted to Graduate Students only.

[College of Engineering & Applied Science](#) | [Computer Science](#) | [Artificial Intelligence](#)

University of Colorado Boulder

CVEN-7788 (3) Soil Behavior

Topics include soil mineralogy, formation of soils through sedimentary processes and weathering, determination of soil composition, soil water, colloidal phenomena in soils, fabric property relationships, analysis of mechanical behavior including compressibility, strength and deformation, and conduction phenomena in terms of physicochemical principles. Involves applications for stabilization and improvement of soils, and disposal of waste materials. Prereq., CVEN 3718 or instructor consent.

[College of Engineering & Applied Science](#) [Civil Engineering](#) [Geotechnical](#)

University of Colorado Boulder

CVEN-4700 (3) Sustainability and the Built Environment

Introduces fundamental concepts of sustainability and sustainable development. Special emphasis on understanding the interaction of the built environment with natural systems and the role of technical and non-technical issues in engineering decisions. Open to engineering and non-engineering students. Same as CVEN 5700.

[College of Engineering & Applied Science](#)
[Civil Engineering](#)
[Building Systems](#)

CVEN-5010 (3) HVAC System Modeling and Control

Engineering course devoted to building automation and control systems. Topics include HVAC control technology and strategies, measurement and device technologies, analysis and modeling of dynamic systems, simulation of conventional and advanced control approaches, assessment of control loop performance, and hands-on direct digital control (DDC) programming exercises as used in current building control practice. Same as AREN 4010.

[College of Engineering & Applied Science](#)
[Civil Engineering](#)
[Building Systems](#)

CVEN-5020 (3) Building Energy Audits

Analyzes and measures performance of HVAC systems, envelopes, lighting and hot water systems, and modifications to reduce energy use. Emphasizes existing buildings. Prereq., AREN 3010 or equivalent. Prerequisites: Restricted to Graduate Students only.

[College of Engineering & Applied Science](#)
[Civil Engineering](#)
[Building Systems](#)

CVEN-5030 (3) Architectural Lighting Equipment Design

Covers the specification and design of nonimaging optical systems for architectural lighting equipment reflector design. Develops and uses computer software to design optics that are prototyped and tested in the laboratory. Prereq., AREN 3540 or CVEN 5830. Taught intermittently.

College of Engineering & Applied Science | Civil Engineering | Building Systems

CVEN-5040 (3) Lighting Systems Engineering

Introduces architectural lighting, including vision and perception, lighting equipment and its characteristics, calculations and analysis, and the process of lighting design. Taught intermittently.

College of Engineering & Applied Science | Civil Engineering | Building Systems

CVEN-5050 (3) Advanced Solar Design

Predicts performance and analyzes economics of high temperature, photovoltaic, and other innovative solar systems. Also includes performance prediction methods for solar processes. Prereqs., AREN 2120, coursework in thermodynamics, fluid mechanics and heat transfer. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Civil Engineering | Building Systems

CVEN-5070 (3) Thermal Analysis of Building

Examines response factors, conduction transfer functions, and weighting factors for dynamic analysis of building envelopes. Also studies radiative and convective exchange in buildings, internal gains, and infiltration analysis as modeled in hourly simulations. Prereq., AREN 3010 or equivalent.

College of Engineering & Applied Science | Civil Engineering | Building Systems

CVEN-5080 (3) Computer Simulation of Building Energy Systems

Introduces major simulation programs for analysis of building energy loads and system performance. Focuses on one hourly simulation program to develop capability for analysis of multizone structure. Prereq., AREN 4110 or CVEN 5110. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Civil Engineering | Building Systems

CVEN-5110 (3) HVAC Design 1

Explores design of heating, ventilating, and air conditioning (HVAC) systems for buildings. Covers HVAC systems description, load estimating, code compliance, duct design, fan systems, applied psychrometrics, cooling and heating coils, filters, hydronic systems, piping, and pumps. Prereq., AREN 3010 or equivalent. Same as AREN 4110.

College of Engineering & Applied Science | Civil Engineering | Building Systems

CVEN-5540 (3) Exterior Lighting Systems

Engages students in exploring and solving lighting problems for exterior environments. Provides an understanding of the design criteria and lighting equipment used in three primary exterior applications: parking lots and roadways, floodlighting of buildings, and sports facilities. Prereq., AREN 3540. Recommended prereqs., AREN 3140 and 4550. Same as AREN 4540. Taught intermittently.

College of Engineering & Applied Science | Civil Engineering | Building Systems

CVEN-5700 (3) Sustainability and the Built Environment

Same as CVEN 4700.

College of Engineering & Applied Science | Civil Engineering | Building Systems

CVEN-5830 (3) Special Topics for Seniors/Grads

Prereq., instructor consent. May be repeated up to 9 total credit hours. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Civil Engineering | Building Systems

CVEN-6940 (1) Master's Degree Candidate

College of Engineering & Applied Science | Civil Engineering | Building Systems

CVEN-8990 (1-10) Doctoral Thesis

A minimum of 30 credit hours is required.

College of Engineering & Applied Science | Civil Engineering | Building Systems

ECEN-7849 (1-6) Independent Study

Offers an opportunity for students to do independent, creative work at the doctoral level. Numbered ECEN 7840--7849. Prereq., advisor consent.

TLEN-5010 (3) Network Economics and Finance I

Introduces students to the fundamental theoretical framework and tools used by economists to examine decision making under scarcity. Reviews mathematical economics and models. Examines consumer choice and firm supply. These two aspects of the market are brought together to examine how price and output are determined in competitive and imperfectly competitive markets. Introduces financial economics, network effects and public goods. Prerequisites: Restricted to students with 87-180 credits (Senior) or graduate students in the College of Engineering or Leeds School of Business only.

College of Engineering & Applied Science | Telecommunications

TLEN-5020 (3) Economics of Competition Policy in Network Industries

Develops methods to evaluate investments to account for uncertainty and dynamics. Examines approaches such as real options methodology, useful in a wide variety of applications including stock and project valuations, capital budgeting, and strategic planning. Prereq., TLEN 5010 or instructor consent.

College of Engineering & Applied Science | Telecommunications

TLEN-5050 (3) Leadership and Management

One year work experience is required. Same as EMEN 5050. Prerequisites: Restricted to Leeds School of Business or College of Engineering graduate students only.

College of Engineering & Applied Science | Telecommunications

TLEN-5106 (3) International Telecommunications

Examines the theoretical and practical identification, evaluation, and alternative strategies to establish a telecommunications venture in developed and developing countries. A semester-long project

will develop and present a business plan to a potential investor. Class topics include cultural issues, partnerships, pricing, marketing, operations, financial structure, and risk. National approaches to licensing, pricing, spectrum, interconnection, and competition law are emphasized. Prereq., TLEN 5010. Prerequisites: Restricted to students with 87-180 credits (Senior) or graduate students in the College of Engineering or Leeds School of Business only.

College of Engineering & Applied Science Telecommunications

TLEN-5130 (3) Telecommunications Business Strategy

Covers concepts, strategies, and practical implementation of market oriented business strategy in the telecom industry grounded with real world examples. Topics include positioning, segmentation/ targeting, technology adoption, advertising/outreach, communication strategies, product management, sales process and business intelligence. Prereq., TLEN 5010. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science Telecommunications

TLEN-5140 (3) IT and Business Strategy

Although some companies are very successful in discovering and cultivating innovative technology-enabled business strategies, many fail in the process. Combines theories and frameworks with practical approaches to provide students with the skills required to help companies identify business opportunities, find appropriate information related technologies, and lead adoption efforts to success. Prereq., TLEN 5010. Same as OPIM 4040/5040 and MGMT 4090.

College of Engineering & Applied Science Telecommunications

TLEN-5150 (1) Managing Effectively in a Changing Telecommunications Environment

Provides students with an opportunity to join international managers and policy makers from around the world in an intensive seminar focused on the challenges of managing in a telecommunications environment in an era of technological change. Guest lecturers provide an effective overview of the cutting-edge issues managers face in telecom and technology companies around the world. TLEN 5150 and ATLS 5150 are the same course.

College of Engineering & Applied Science Telecommunications

TLEN-5160 (3) Information Technologies and Communications

Provides a perspective of the basic and relevant issues of the communications and information technologies (CIT) industry, while gaining a wide picture overview of its main problems and trends. Students learn the technical, economic, management, and regulatory perspectives of CIT. The fundamental concepts and terminology associated with the communications industry is included in the course content. Recommended prereq., TLEN 5010.

College of Engineering & Applied Science Telecommunications

TLEN-5190 (3) Standardization and Standards Wars

Examines current issues and strategy in the standardization of telecommunications and information technologies. Covers topics on the importance of standards, government and private sector perspectives, and impact of information age technologies on standards development. Introduces students to relevance of antitrust and intellectual property law to the topic.

College of Engineering & Applied Science | Telecommunications

TLEN-5206 (3) International Telecommunication Policy and Best Practices

Addresses networking and telecommunication policy issues faced by countries around the world. Subjects include financing projects, service for underdeveloped/under served areas, managing spectrum effectively, licensing new service providers, and complying with international treaty obligations. Recommended prereqs., TLEN 5010 and 5210. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Telecommunications

TLEN-5210 (2) Principles of Telecommunications Policy

Learn the key issues and principles that guide the decisions of policy makers with respect to the regulatory treatment of voice, video, and data communications. Engage in critical debate, and develop instincts for anticipating the likely regulatory models that may be applied to new technologies. This introductory course covers technical, economic, legal, political, and institutional considerations. Prereq., TLEN 5010. Same as CSCI 4143.

College of Engineering & Applied Science | Telecommunications

TLEN-5230 (3) Spectrum Management and Policy

Studies how spectrum policy is developed and implemented. A general framework is developed for understanding telecommunications law and regulatory objectives. Course specifically analyzes international and domestic dimensions of spectrum policy. It also considers how economics, administrative processes, and innovative technologies affects management of the spectrum.

College of Engineering & Applied Science | Telecommunications

TLEN-5240 (3) Telecommunications Law and Policy

May be repeated up to 6 total credit hours. Same as LAWS 7241. Prerequisites: Restricted to students with 87-180 credits (Senior) or graduate students in the College of Engineering or Leeds School of Business only.

College of Engineering & Applied Science | Telecommunications

TLEN-5245 (3) Introduction to Intellectual Property Law

Provides an overview of our nation's intellectual property laws, including patent, copyright, trademark, trade secret, and also discusses other assorted matters related to intellectual property, including licensing, competition policy issues, and remedies. Same as LAWS 6301.

College of Engineering & Applied Science | Telecommunications

TLEN-5250 (2-4) Technology Law and Policy Clinic

Features technology law advocacy before administrative and legislative bodies. The mission of TLPC is: 1) to train and produce students equipped to conduct thoughtful analysis, and 2) provide unbiased assistance in the public interest concerning technology issues to regulatory entities, courts, legislatures and standard setting bodies. Recommended prereqs., LAWS 6301, 6318 or 7241. LAWS 7809 and TLEN 5250 are the same course.

College of Engineering & Applied Science Telecommunications

TLEN-5255 (3) Computer Crime

Explores legal issues that judges, legislators, prosecutors, and defense attorneys confront as they respond to recent explosions in computer-related crime. Includes the Fourth Amendment in cyberspace, the law of electronic surveillance, computer hacking and other computer crimes, encryption, online economic espionage, cyberterrorism, First Amendment in cyberspace, federal/state relations in enforcement of computer crime laws, and civil liberties online. Formerly TLEN 5535. Same as LAWS 6321.

College of Engineering & Applied Science Telecommunications

TLEN-5265 (3) Copyright

Examines state and federal laws relating to the protection of works of authorship ranging from traditional works to computer programs. Studies the 1976 Copyright Act as well as relevant earlier acts. Gives attention to state laws, such as interference with contractual relations, the right of publicity, moral right, protection of ideas, and misappropriation of trade values, that supplement federal copyright. Same as LAWS 7301. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science Telecommunications

TLEN-5270 (3) Antitrust

Studies American competition policy: collaborations among competitors, including agreements on price and boycotts, definition of agreement, monopolization, vertical restraints such as resale price maintenance, and territorial confinement of dealers. Recommended prereq., TLEN 5210. Same as LAWS 7201. Offered in alternate years. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science Telecommunications

TLEN-5300 (1-3) Telecommunications Theory and Applications

Examines the mathematical and physical theory of telecommunications. Deals with the fundamental concepts related to a wide range of topics including physical units, numbering systems, trigonometric functions, logarithms, indices, decibels, complex numbers, calculus, elementary probability, and power circuit analysis. May be repeated up to 3 credit hours. Prerequisites: Restricted to students with 87-180 credits (Senior) or graduate students in the College of Engineering or Leeds School of Business only.

College of Engineering & Applied Science Telecommunications

TLEN-5310 (3) Telecommunications Systems

Reviews fundamental technical concepts and terminology in telecommunications. Topics of focus include: decibels, noise analysis, transmission lines, electronic signals, radio spectrum

characteristics, link budgets, AM modulation, angle modulation, digital modulation, multiplexing, sampling and digital encoding, detection, and similar physical layer concepts. Systems for analysis include CATV, cellular wireless, WLAN, satellite systems, internet networking and related voice and data networks. Prerequisites: Restricted to students with 87-180 credits (Senior) or graduate students in the College of Engineering or Leeds School of Business only.

College of Engineering & Applied Science Telecommunications

TLEN-5330 (3) Data Communications 1

Provides a comprehensive technical survey of data and computer communications including Wireless, LAN, MAN, and WAN systems and standards. Covers packet switching, internetworking, addressing, routing, transport layers, TCP/IP internet, wired and wireless LAN technologies, congestion control and flow control schemes. Prereq. or coreq., TLEN 5310. Prerequisites: Restricted to students with 87-180 credits (Senior) or graduate students in the College of Engineering or Leeds School of Business only.

College of Engineering & Applied Science Telecommunications

TLEN-5340 (3) VOIP Network Design

Focuses on VoIP network design and optimization. The emphasis is on the convergence of VoIP, PSTN and cell phone networks and signaling. Topics include voice processing as well as IP and SS7 signaling. In addition there will be a review of ISDN, DSL, Sonet, ATM, SIP and MPLS. There will be a case problem for sizing a VoIP network using silence suppression. Coreq., TLEN 5310. Prerequisites: Restricted to students with 87-180 credits (Senior) or graduate students in the College of Engineering or Leeds School of Business only.

College of Engineering & Applied Science Telecommunications

TLEN-5350 (3) Satellite Communication Systems

Aimed at a high level fundamental understanding of broadcasting, communication and navigation satellite systems. Topics include orbital mechanics, orbit selection, spacecraft subsystems, spacecraft and earth station configurations, propagation issues, link budgets, modulation and multiplexing techniques, multiple access schemes (FDMA, TDMA, CDMA), error control coding, satellite network architecture, and economic, regulatory and business issues in Geo, Meo, and Leo systems. Co-req., TLEN 5330. Prerequisites: Restricted to students with 87-180 credits (Senior) or graduate students in the College of Engineering or Leeds School of Business only.

College of Engineering & Applied Science Telecommunications

TLEN-5370 (3) IP Routing Protocols

Breaks IP routing technologies into two fundamental pieces: an in-depth study of interior and then exterior gateway protocols. Prereq., TLEN 5330. Prerequisites: Restricted to students with 87-180 credits (Senior) or graduate students in the College of Engineering or Leeds School of Business only.

College of Engineering & Applied Science Telecommunications

TLEN-5380 (3) Future of Video: Technology, Policy, and Economics

Examines the issues that have been created by the shift from analog to digital technologies, the shift from narrowband/wideband systems to broadband systems, and the shift to converged networks (i.e. networks able to convey voice, data, image and video traffic on a common platform) based upon packet switching and Internet Protocol (IP) suite. Prereq., TLEN 5210. TLEN 5380 and ATLS 5380 are the same course. Prerequisites: Restricted to Graduate Students only.

MCEN-7120 (3) Perturbation Methods

Teaches regular and singular perturbation methods for solving ordinary and partial differential equations and for evaluating integrals. Emphasizes formulation of mathematical models in fluid mechanics, combustion, heat transfer, solid mechanics, dynamics, and wave propagation. Prereq., MCEN 5020 and 5040, or equivalent. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students. Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

[College of Engineering & Applied Science](#)
[Mechanical Engineering](#)
[Math](#)

MCEN-7122 (3) Combustion Phenomena

Applies multicomponent fluid equations of motion and chemical thermodynamics to a variety of combustion problems. Covers droplet combustion, premixed and diffusion flames, boundary layer combustion, detonation wave theory, topics related to internal combustion engines, and liquid and solid rockets. Prereq., MCEN 3012 and 3021. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students. Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

[College of Engineering & Applied Science](#)
[Mechanical Engineering](#)
[Thermal](#)

CSCI-7123 (3) Topics in Operating Systems

Topics selected by instructor. Possible topics are system design, measurement and evaluation, simulation, mathematical modeling, and parallelism. Prereq., CSCI 5573. Prerequisites: Restricted to Graduate Students only.

[College of Engineering & Applied Science](#)
[Computer Science](#)
[Operating Systems and Hardware](#)

MCEN-7123 (3) Dynamics of Continuous Media

Reflects upon derivation of wave equations from the basic equations of dynamic elasticity. Topics include propagation of elastic waves in infinite and partially bounded media, Rayleigh waves and Love waves, Pochhammer solution for a rod, and waves in plates and in layered and anisotropic media. Prereq., MCEN 5020, 5040, and 5043, or equivalents. Same as PHYS 6680 and GEOL 6680. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students. Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

College of Engineering & Applied Science | Mechanical Engineering | Solids

CSCI-7135 (3) Topics in Programming Languages

Topics selected by instructor. Possible topics are syntax, semantics, metacompilers, compiler design, and translator writing systems. Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Computer Science | Programming Languages

CVEN-7141 (3) Plates and Shells

Teaches mathematical theories of plate and shell structures and their applications. Involves numerical finite element solutions of plates and shells of various shapes under static and dynamic loadings. Prereq., CVEN 5121 or 7131.

College of Engineering & Applied Science | Civil Engineering | Mechanics

CSCI-7143 (3) Topics in Computer Systems

Topics selected by instructor. Possible topics are online systems, multiprocessing, microprogramming, architecture, data communications, and computing networks. May be repeated up to 6 total credit hours. Instructor consent required. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Computer Science | Operating Systems and Hardware

CSCI-7154 (3) Topics in Theory of Computation

Selected topics of current interest in theory of computation. Prereq., CSCI 5454. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Computer Science | Theory of Computation

CVEN-7161 (3) Fracture Mechanics

This course has three parts. The first covers fundamentals through rigorous mathematical formulations of linear and nonlinear elastic fracture mechanics. The second focuses on materials: theoretical strength, metals, granular materials, polymers, and steel. The third covers numerical (finite element) methods in fracture mechanics. Heavy emphasis is placed on project and independent work. Prereq., CVEN 5121.

College of Engineering & Applied Science | Civil Engineering | Mechanics

CSCI-7176 (3) Topics in Numerical Computation

Topics selected by instructor. Possible topics are numerical linear algebra, solution of differential equations, nonlinear algebra and optimization, data fitting, linear and nonlinear programming, and solution of large problems. Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Computer Science | Numerical Computation

CVEN-7206 (1) CEM PhD Seminar

Examines emerging research in construction engineering and management. Students will consider and comment on research methods and designs based on their own work and that of CU faculty and other leading researchers. Aims to make CEM Ph.D students better researchers and evaluators of research methods and processes.

College of Engineering & Applied Science | Civil Engineering | Construction

MCEN-7208 (1-4) Special Topics

Credit and subject matter to be arranged. Numbered MCEN 7208-7298.

College of Engineering & Applied Science | Mechanical Engineering | Special Topics

CSCI-7212 (3) Topics in Symbolic Artificial Intelligence

Topics vary from year to year. Possible topics include search; knowledge representation and natural language understanding; deduction, planning, problem solving, and automatic programming; instruction and cognitive models; vision and speech; and learning, induction, and concept formation. Prereq., CSCI 5582 or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Computer Science | Artificial Intelligence

MCEN-7221 (3) Turbulence

Hydrodynamic stability theory, equations for turbulent flows, free shear flows and boundary layers, homogeneous and isotropic turbulence, overview of turbulent combustion, reaction kinetics, energy equation, Favre averaging, Pdfs, premixed and nonpremixed flame modeling, and recent developments. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students. Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

College of Engineering & Applied Science | Mechanical Engineering | Fluids

CSCI-7222 (3) Topics in Nonsymbolic Artificial Intelligence

Topics vary from year to year. Possible topics include human and machine vision, signal and speech processing, artificial life, mathematical foundations of connectionism, and computational learning theory. Prereq., CSCI 5622 or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Computer Science | Artificial Intelligence

CSCI-7412 (2) Cognitive Science Research Practicum

Independent, interdisciplinary research project in cognitive science for graduate students pursuing a joint Ph.D in an approved core discipline and cognitive science. Projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students should obtain commitments from two mentors for their project. Prereqs., CSCI 6402 or EDUC 6504 or LING 6200 or PHIL 6310 or PSYC 6200. Recommended prereqs., CSCI7762 or EDUC 6505 or LING 7762 or PSYC 7765. Same as LING 7415, PSYC 7415, PHIL 7415, and EDUC 6506. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Computer Science | Artificial Intelligence

CSCI-7422 (2) Cognitive Science Research Practicum 2

Independent, interdisciplinary research project in cognitive science for advanced graduate students pursuing a joint Ph.D in an approved core discipline and cognitive science. Research projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students need commitments from two mentors for their project. Prereq., LING 7415 or PSYC 7415 or CSCI 7412 or EDUC 6506. Same as PSYC 7425, LING 7425, PHIL 7425, and EDUC 6516. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Computer Science | Artificial Intelligence

ECEN-7438 (3) Theory of Nonlinear Systems

Nonlinear systems and control. Introduction to nonlinear phenomena: multiple equilibria, limit cycles, bifurcations, complex dynamical behavior. Planar dynamical systems, analysis using phase plane techniques. Input-output analysis and stability. Passivity. Lyapunov stability theory. Feedback linearization. Exploration of examples and applications. Prereq., ECEN 5448.

College of Engineering & Applied Science | Electrical & Computer Engineering | Dynamical Systems and Control

CVEN-7511 (3) Computational Mechanics of Solids and Structures

Looks at finite element methodology for geometric and material nonlinearities. Involves incremental formulations and iterative solution strategies for truly finite increments and quasistatic and dynamic applications to large deformation and inelastic problems. Prereqs., CVEN 5511 or 6525.

College of Engineering & Applied Science | Civil Engineering | Mechanics

CVEN-7565 (3) Inelastic Theory of Structures

Examines inelastic behavior of materials, including calculation of ultimate capacity of perfectly plastic structures by use of upper- and lower-bound theorems. Looks at theories of inelastic action as applied to structural design in steel and concrete and elements of theory of plasticity with applications in ultimate analysis of plates, shells, and continuous bodies. Prereq., CVEN 3505.

College of Engineering & Applied Science | Civil Engineering | Structures

CVEN-7595 (3) Earthquake Engineering

Analysis and design of structures for earthquake loadings. Earthquake ground motions, attenuation laws, and seismic hazard analysis. Numerical methods for time-domain and frequency-domain analysis response of linear and nonlinear structures. Elastic and inelastic response spectra, and construction of design spectra. Soil-structure interaction analysis. Seismic design methods and building code requirements. Prereq., CVEN 5111 or equivalent.

College of Engineering & Applied Science | Civil Engineering | Structures

CSCI-7717 (3) Topics in Database Systems

Studies topics such as distributed databases, database interfaces, data models, database theory, and performance measurement in depth. Prereq., CSCI 5817 or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Computer Science | Database Systems

CVEN-7718 (3) Engineering Properties of Soils

Considers constitutive behavior of cohesive and cohesionless soils including stress-strain, strength, pore water pressure, and volume change behavior under drained and undrained loading conditions. Also includes linear and nonlinear analysis techniques and determination of constitutive properties in the laboratory. Prereq., CVEN 5708 or instructor consent.

College of Engineering & Applied Science | Civil Engineering | Geotechnical

CSCI-7762 (1-2) Readings and Research in Cognitive Science

Interdisciplinary reading of innovative theories and methodologies of cognitive science. Participants share interdisciplinary perspectives through in-class and online discussion and analysis of controversial texts and of their own research in cognitive science. Required for joint Ph.D in cognitive science. Prereq., graduate standing. Same as EDUC 6505, LING 7762, and PSYC 7765. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Computer Science | Artificial Intelligence

CSCI-7772 (1-2) Topics in Cognitive Science

Reading of interdisciplinary innovative theories and methodologies of cognitive science. Students participate in the ICS Distinguished Speakers series that hosts internationally recognized cognitive scientists who share and discuss their current research. Session discussions include analysis of leading edge and controversial new approaches in cognitive science. Restricted to students enrolled in ICS Cognitive Science Academic Programs. Same as LING 7775, PSYC 7775, EDUC 7775, SLHS 7775, and PHIL 7810. Prerequisites: Restricted to Graduate Students only.

ECEN-5626 (3) Active Optical Devices

Analysis of active optical devices such as semiconductor laser, detector and flat panel display by clearly defining and interconnecting the fundamental physical mechanism, device design and operating principles and device performance. Recommended prereq., ECEN 5355.

[College of Engineering & Applied Science](#)
[Electrical & Computer Engineering](#)
[Optics](#)

CVEN-5628 (3) Seepage and Slopes

Covers fundamental principles of seepage in soils under both saturated and unsaturated conditions and limit equilibrium solution to slope stability problems. The seepage effects on slope stability are analyzed in detail and both conventional slope stability method and the finite element technique are applied to solving the engineering problems. Prereqs., CVEN 3708 and 3718 or instructor consent. Prerequisites: Restricted to Graduate Students only.

[College of Engineering & Applied Science](#)
[Civil Engineering](#)
[Geotechnical](#)

CHEN-5630 (1) Intellectual Property Law and Engineering

Restricted to graduate students. Prerequisites: Restricted to Graduate Students only.

[College of Engineering & Applied Science](#)
[Chemical Engineering](#)

ECEN-5632 (3) Theory and Application of Digital Filtering

Digital signal processing and its applications are of interest to a wide variety of scientists and engineers. The course covers such topics as characterization of linear discrete-time circuits by unit pulse response, transfer functions, and difference equations, use of z-transforms and Fourier analysis, discrete Fourier transform and fast algorithms (FFT), design of finite and infinite impulse

response filters, frequency transformations, study of optimized filters for deterministic signals. Prerequisites: Restricted to any graduate students or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Communications

ECEN-5633 (3) Hybrid Embedded Systems

Same as ECEN 4633. Prerequisites: Restricted to any graduate students or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Computer and Digital Systems

ECEN-5634 (3) Graduate Microwave and RF Laboratory

Introduce RF and microwave measurement methods. A laboratory course whose experiments build on material learned in ECEN 3410 (Electromagnetic Waves and Transmission): electromagnetic waves, transmission lines, waveguides, time-domain reflection, frequency-domain measurement, microwave networks, impedance matching, antenna pattern measurement, radar, and simple nonlinear concepts such as harmonics, square-law detection, mixing and transmitter/receiver applications. Prereq., ECEN 3410. Restricted to graduate students. Same as ECEN 4634.

Prerequisites: Restricted to any graduate students or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Electromagnetics

CSCI-5636 (3) Numerical Solution of Partial Differential Equations

Focuses on finite difference solution for partial differential equations, methods of SoR, ADI, conjugate gradients, finite element method, nonlinear problems, and applications. Prereqs., CSCI 5606. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science | Computer Science | Numerical Computation

MCEN-5636 (3) Micro-Electro-Mechanical Systems 1

Addresses issues of micro-electro-mechanical systems (MEMS) modeling, design, and fabrication. Emphasizes the design and fabrication of sensors and actuators due to significance of these devices in optics, medical instruments, navigation components, communications, and robotics. Prereq., instructor consent. Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

College of Engineering & Applied Science | Mechanical Engineering | Manufacturing and Systems

ECEN-5643 (3) SW Engineering of Concurrent Systems

Addresses engineering of applications requiring multiple software processes running concurrently, sharing data, and communicating as a system in a single environment. Topics include performance analysis of architecture design; analysis of requirements, design and testing of synchronization and communication; the interplay of system design and performance with the impact of memory management, input/output, and file system support. Prereq., ECEN 4583 or 5543. ECEN 4643 and 5643 are the same course. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Computer and Digital Systems

ECEN-5645 (3) Introduction to Optical Electronics

Introduces lasers, Gaussian optics, modulators, nonlinear optics, optical detectors, and other related devices. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Nanostructures and Devices

CSCI-5646 (3) Numerical Linear Algebra

Offers direct and iterative solutions of linear systems. Also covers eigen value and eigenvector calculations, error analysis, and reduction by orthogonal transformation. A sound knowledge of basic linear algebra, experience with numerical computation, and programming experience is required. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science | Computer Science | Numerical Computation

CHEN-5650 (3) Particle Technology

Extra work required for graduate course. Same as CHEN 4650.

College of Engineering & Applied Science | Chemical Engineering

ECEN-5652 (3) Detection and Extraction of Signals from Noise

Introduces detection, estimation, and time series analysis. Topics include hypothesis testing, detection of known form and random signals, least squares parameter estimation, maximum likelihood theory, minimum mean-squared error estimation, Kalman-Wiener filtering, prediction in stationary time series, and modal analysis. Applications include studies in communications, control, and experimental modeling. Prereq., ECEN 5612.

College of Engineering & Applied Science | Electrical & Computer Engineering | Communications

ECEN-5653 (3) Real-Time Digital Media

Learn how to design and build Linux-based real-time system applications for digital media encode/decode and transport. Course focus is on the process as well as fundamentals of designing, coding, and testing Linux-based real-time systems often used in industry for digital media systems. Students use POSIX kernel-mapped threads and drivers to implement real-time digital media solutions. Prereqs., ECEN 1030 or CSCI 1300, and CSCI 3753 or equivalent. Restricted to engineering students. ECEN 4653 and 5653 are the same course.

College of Engineering & Applied Science | Electrical & Computer Engineering | Computer and Digital Systems

CSCI-5654 (3) Linear Programming

Presents algorithms, simplex, and modifications. Examines theory--duality and complementary slackness. Involves network flow algorithms. Introduces integer programming. Prereq., linear algebra. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science | Computer Science | Theory of Computation

CHEN-5670 (3) Environmental Separations

Lect. Covers traditional, as well as new, chemical separations processes that have environmental applications. Includes chemically benign processing (pollution prevention) as well as approaches to address existing pollution problems. Extra work required for graduate course. Same as CHEN 4670.

College of Engineering & Applied Science | Chemical Engineering

ECEN-5672 (3) Digital Image Processing

Course objective is to present the fundamental techniques available for image representation and compression (e.g., wavelets), filtering (e.g., Wiener and nonlinear filter), and segmentation (e.g., anisotropic diffusion). Prereq., ECEN 5632 or instructor consent.

College of Engineering & Applied Science | Electrical & Computer Engineering | Communications

CSCI-5673 (3) Distributed Systems

Examines systems that span multiple autonomous computers. Topics include system structuring techniques, scalability, heterogeneity, fault tolerance, load sharing, distributed file and information systems, naming, directory services, resource discovery, resource and network management, security, privacy, ethics, and social issues. Recommended prereqs., CSCI 5573 or a course in computer networks. Same as ECEN 5673. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science | Computer Science | Operating Systems and Hardware

ECEN-5673 (3) Distributed Systems

Examines systems that span multiple autonomous computers. Topics include system structuring techniques, scalability, heterogeneity, fault tolerance, load sharing, distributed file and information systems, naming, directory services, resource discovery, resource and network management, security, privacy, ethics, and social issues. Recommended prereq., CSCI 5573 or a course in computer networks. Same as CSCI 5673.

College of Engineering & Applied Science | Electrical & Computer Engineering | Computer and Digital Systems

CVEN-5678 (3) Soil Improvement and Reinforcement

Provides students with principles and working knowledge of design and construction procedures in soil stabilization, retaining structures, geosynthetics, and soil reinforcement. Prereq., CVEN 3718 or instructor consent.

College of Engineering & Applied Science | Civil Engineering | Geotechnical

ECEN-5682 (3) Theory and Practice of Error Control Codes

Block and convolutional codes for reliable transmission of digital data over unreliable noisy channels. Algebraic and dsp characterizations of cyclic codes such as Bch/Rs codes. Decoding algorithms for block codes and the Viterbi algorithm. Graph codes and iterative decoding. Prereq., ECEN 3300.

College of Engineering & Applied Science | Electrical & Computer Engineering | Communications

CVEN-5688 (3) Environmental Geotechnics

Provides an understanding of the use of geotechnical concepts in the analysis and design of environmental systems. Focus is placed on the evaluation of waste containment facilities. Including relevant saturated, unsaturated, and multiphase flow mechanisms in cover and liner systems. Includes stability analyses for landfills and geosynthetic interface shear strength. Covers relevant aspects of mining geotechnics and remediation technologies of contaminated sites.

College of Engineering & Applied Science | Civil Engineering | Geotechnical

ECEN-5692 (3) Principles of Digital Communication

Techniques for efficient and reliable transmission of information over bandwidth and power constrained communication channels; digital modulation methods, power spectral density calculations, optimum receiver principles, error rate analysis, channel coding potential in wired/wireless media, trellis coded modulation, and equalization. Prereqs., ECEN 3300 and 5612 or equivalents. Recommended prereqs., ECEN 5622 and 5632.

College of Engineering & Applied Science | Electrical & Computer Engineering | Communications

ECEN-5696 (3) Fourier Optics

Introduces a system level approach to the analysis and design of optical systems. Topics include holography, Fourier transform properties of lenses, two-dimensional convolution and correlation functions, spatial filtering, and optical computing techniques. Also covers coherent and incoherent imaging techniques, tomography, and synthetic aperture imaging. Prereqs., ECEN 3300 and 3410, or instructor consent. Prerequisites: Restricted to any graduate students or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Optics

CVEN-5700 (3) Sustainability and the Built Environment

Same as CVEN 4700.

College of Engineering & Applied Science | Civil Engineering | Building Systems

College/School

Department

Search by Course Number

Subject

Number

TLEN-5700 (2) Research Methods

Develop basic concepts and methods for pursuing quantitative and qualitative research. Students will develop a research proposal that will be completed in TLEN 5710 or as a Master's Thesis. Writing skills test required. Prerequisites: Restricted to students with 87-180 credits (Senior) or graduate students in the College of Engineering or Leeds School of Business only.

[College of Engineering & Applied Science](#) [Telecommunications](#)

CVEN-5708 (3) Soil Mechanics

Offers an advanced course in principles of soil mechanics. Coverage includes topics in continuum mechanics; elasticity, viscoelasticity, and plasticity theories applied to soils; the effective stress principle; consolidation; shear strength; critical state concepts; and constitutive, numerical, and centrifuge modeling. Prereq., CVEN 3718. Prerequisites: Restricted to Graduate Students only.

[College of Engineering & Applied Science](#) [Civil Engineering](#) [Geotechnical](#)

EMEN-5710 (3) Applied Business Decisions

Student teams launch a high-tech company over eight quarters in a simulated business environment. Decisions are made in all major business areas-e.g. product development, marketing, operations, finance- in competition with other teams. Given the results of the previous quarter, teams make decisions for the next quarter. After the first year (four quarters), students prepare an elevator pitch, executive summary, and PowerPoint pitch to justify additional venture capital or a bank loan. Non-EMP students require instructor permission. Prerequisites: Restricted to graduate students in Engineering Management Program (EMEN) only.

[College of Engineering & Applied Science](#) [Engineering Management](#)

TLEN-5710 (1) Capstone

Complete Capstone research project initiated in TLEN 5700, Research Methods. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Telecommunications

CSCI-5714 (3) Formal Languages

Explores context-free languages: pumping lemma and variants, closure properties, and decision properties. Involves parsing algorithms, including general and special languages, e.g., LR. Additional topics chosen by instructor. Prereq., CSCI 5444 or instructor consent. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science | Computer Science | Theory of Computation

CVEN-5718 (3) Mechanics and Dynamics of Glaciers

Same as CVEN 4718.

College of Engineering & Applied Science | Civil Engineering | Geotechnical

CSCI-5722 (3) Computer Vision

Explores algorithms that can extract information about the world from images or sequences of images. Topics covered include: imaging models and camera calibration, early vision (filters, edges, texture, stereo, optical flow), mid-level vision (segmentation, tracking), vision-based control, and object recognition. Recommended prereq., probability, multivariate calculus, and linear algebra. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science | Computer Science | Artificial Intelligence

CVEN-5728 (3) Foundation Engineering

Same as CVEN 4728. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Civil Engineering | Geotechnical

ECEN-5737 (3) Adjustable-Speed AC Drives

Presents unified treatment of complete electrical drive systems: mechanical load, electrical machine, power converter, and control equipment. Emphasizes induction, synchronous, and permanent-magnet drives. Uses simulation programs (e.g., SPICE, Finite Element/Difference Program) to simulate drive system components (e.g., gating, inverter, electric machine). Prereq., Ecen 3170.

College of Engineering & Applied Science | Electrical & Computer Engineering | Power

CVEN-5738 (3) Applied Geotechnical Analysis

Studies applications of limiting equilibrium and limit plasticity analysis methods to stability problems in geotechnical engineering, such as slopes, lateral earth pressures on retaining structures, and bearing capacities of foundations. Also includes elastic and consolidation analysis of deformations in soil structures. Prereq., CVEN 5708 or instructor consent.

College of Engineering & Applied Science | Civil Engineering | Geotechnical

CHEN-5740 (3) Analytical Methods in Chemical Engineering

Presents applied analytical and numerical mathematical methods in the context of chemical engineering problems. Topics include modeling techniques, algebraic equations, and ordinary and partial differential equations. Prereq., senior or graduate standing; working knowledge of computing, calculus, differential equations, linear algebra, and vector operations; and undergraduate courses in physics, fluid mechanics, heat transfer, and reaction engineering. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Chemical Engineering

ECEN-5743 (3) SW Engineering of Distributed Systems

Addresses engineering of networked applications and self-contained embedded system products involving multiple processors. The fundamental concepts of software engineering are complicated by an application running simultaneously and asynchronously on multiple processors over a network. Topics: specification, analysis, design, and testing of distributed components including concerns of security, synchronization, transaction coordination, data replication, web services, and service oriented architectures. Prereq., ECEN 4583 or 5543 or CSCI 5548. Recommended prereq., ECEN 5643. ECEN 4743 and 5743 are the same course. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Computer and Digital Systems

CVEN-5748 (3) Design of Earth Structures

Covers theory, design, and construction of earth embankments and waste facilities, including isolation systems. Uses published data, field exploration, and laboratory tests on soils and rock in investigating foundations and construction materials. Involves principles of compaction and settlement, permeability analysis, landslide recognition and control, use of composite clay, and liner systems. Prereq., CVEN 5708 or instructor consent.

College of Engineering & Applied Science | Civil Engineering | Geotechnical

CHEN-5750 (3) Numerical Methods in Chemical Engineering

Covers numerical methods for solving ordinary differential, partial differential, and integral equations. These principles are employed to develop, test, and assess computer programs for solving problems of interest to chemical engineers. Prereq., graduate standing or instructor consent.

College of Engineering & Applied Science | Chemical Engineering

TLEN-5750 (3) Research Techniques in Engineering Management

Same as EMEN 5900.

College of Engineering & Applied Science | Telecommunications

CSCI-5753 (3) Computer Performance Modeling

Same as CSCI 4753. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science Computer Science Operating Systems and Hardware

ECEN-5753 (3) Computer Performance Modeling

Same as ECEN 4753 and CSCI 4753/5753.

College of Engineering & Applied Science Electrical & Computer Engineering Computer and Digital Systems

CVEN-5758 (3) Flow Processes in Soils

Examines fundamental principles of flow through porous media and related engineering problems. Topics include the saturated seepage theory and flow nets; the unsaturated flow theory; suction-saturation and saturation-hydraulic conductivity relationships; nonlinear finite strain consolidation and desiccation theory; laboratory and field testing methods for determining material characteristics; and numerical models for flow-related engineering problems. Prereq., CVEN 3718 or instructor consent.

College of Engineering & Applied Science Civil Engineering Geotechnical

CVEN-5768 (3) Introduction to Rock Mechanics

Nature of rocks and rock masses; engineering properties rock and rock mass; rock mass classifications; planes of weakness; application of rock mechanics to design of rock slopes, underground excavations, and foundations. Prereqs., CVEN 3708 and 3718, or instructor consent.

College of Engineering & Applied Science Civil Engineering Geotechnical

CVEN-5788 (3) Computational Modeling in Geotechnical Engineering

Introduces computational modeling for geotechnical engineering applications such as the Discrete Element Method (DEM) for granular materials, nonlinear Finite Element Analysis (FEA) of seepage, coupled soil elastoplastic consolidation, elastoplasticity models for soil and rock, and advanced computational methods for failure in soil and rock. Uses DEM, FEA, and other software programs for analysis. Prereq., CVEN 5708, or instructor consent.

College of Engineering & Applied Science Civil Engineering Geotechnical

ECEN-5797 (3) Introduction to Power Electronics

Same as ECEN 4797. Prerequisites: Restricted to any graduate students or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

College of Engineering & Applied Science Electrical & Computer Engineering Power

CVEN-5798 (3) Dynamics of Soils and Foundations

Examines the behavior of soils and foundations subjected to self-excited vibrations and earthquake ground motions. Looks at principles of wave propagation in geologic media; in situ and laboratory determination of engineering properties for dynamic analysis; and applications of these principles and properties in design and analysis of foundations and earth structures subjected to dynamic loading. Prereq., CVEN 5708 or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Civil Engineering | Geotechnical

CHEN-5800 (3) Bioprocess Engineering

Same as CHEN 4800, except that a major term report is required.

College of Engineering & Applied Science | Chemical Engineering

CHEN-5803 (3) Metabolic Engineering

Introduces basic concepts in metabolic engineering and explores modern approaches in metabolic and strain engineering. Application areas that will be discussed will include the use of metabolic engineering approaches in biofuels and biorefining as well as biopharmaceutical production. CHEN 4803 and 5803 are the same course. Prerequisites: Requires pre-requisite courses of APPM 2360 and CHEM 4731 or CHEM 4611.

College of Engineering & Applied Science | Chemical Engineering

CHEN-5805 (3) Biomaterials

Same as CHEN 4805.

College of Engineering & Applied Science | Chemical Engineering

ECEN-5807 (3) Modeling and Control of Power Electronic Systems

Studies modeling and control topics in power electronics. Averaged switch modeling of converters, computer simulation, ac modeling of the discontinuous conduction mode, the current programmed mode, nulldouble injection techniques in linear circuits, input filter design, and low-harmonic rectifiers. Prereq., ECEN 5797.

[College of Engineering & Applied Science](#)
[Electrical & Computer Engineering](#)
[Power](#)

CSCI-5809 (3) Computer Animation

Same as CSCI 4809 and ATLS 4809/5809. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

[College of Engineering & Applied Science](#)
[Computer Science](#)
[Graphics](#)

ECEN-5811 (3) Neural Signals and Functional Brain Imaging

Same as ECEN 4811 and ASEN 4216

[College of Engineering & Applied Science](#)
[Electrical & Computer Engineering](#)
[Bioengineering](#)

CSCI-5817 (3) Database Systems

Provides an advanced treatment of basic database concepts. Prereq., CSCI 2270. Recommended prereq., CSCI 3287 and 3753. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

[College of Engineering & Applied Science](#)
[Computer Science](#)

College of Engineering & Applied Science | Computer Science | Database Systems

ECEN-5817 (3) Resonant and Soft-Switching Techniques in Power Electronics

Covers resonant converters and inverters, and soft switching; sinusoidal approximations in analysis of series, parallel, Lcc, and other resonant dc-dc and dc-ac converters; state-plane analysis of resonant circuits; switching transitions in hard-switched and soft-switched Pwm converters; zero-voltage switching techniques, including resonant, quasi resonant, zero voltage transition, and auxiliary switch circuits. Prereq., ECEN 5797 or instructor consent required.

College of Engineering & Applied Science | Electrical & Computer Engineering | Power

CVEN-5818 (3) Geotechnical Earthquake Engineering

Familiarizes students with the fundamentals of engineering seismology, soil and structural dynamics, and the modern practice of geotechnical earthquake engineering. Focuses on describing earthquake hazards and methods for seismic analysis and design. Recommended prereq., CVEN 5798. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Civil Engineering | Geotechnical

CHEN-5820 (3) Biochemical Separations

Extra work required for graduate course. Same as CHEN 4820. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Chemical Engineering

ECEN-5821 (3) Neural Systems and Physiological Control

Same as ECEN 4821 and ASEN 4426/5426.

College of Engineering & Applied Science | Electrical & Computer Engineering | Bioengineering

CVEN-5822 (3) Geographical Information Systems for Civil and Environmental Systems

Same as CVEN 4822.

College of Engineering & Applied Science | Civil Engineering | Surveying and Transportation

EMEN-5825 (3) Entrepreneurial Business Plan Preparation

Instructs students in the necessary elements of a business plan and how to prepare a complete, well-written plan for an entrepreneurial business venture. Students work in teams to create a business concept and take it through business plan completion. Recommended prereq., EMEN 5020 or equivalent. Non-EMP students require instructor permission. Prerequisites: Restricted to graduate students in Engineering Management Program (EMEN) only.

College of Engineering & Applied Science | Engineering Management

ECEN-5827 (3) Analog IC Design

Same as ECEN 4827. Prerequisites: Restricted to any graduate students or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Power

CSCI-5828 (3) Foundations of Software Engineering

Explores techniques, languages, and tools for development and maintenance of software systems. Topics include specification languages, configuration modeling, testing techniques, process modeling, program annotations, and program proofs. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science | Computer Science | Software Engineering

CHEN-5830 (1) Introduction to Modern Biotechnology

Introduces students to the biotechnology enterprise. Topics include the biotechnology industry and profession, the various academic disciplines of biotechnology, intellectual property, financing, and ethics.

College of Engineering & Applied Science | Chemical Engineering

CVEN-5830 (3) Special Topics for Seniors/Grads

Prereq., instructor consent. May be repeated up to 9 total credit hours. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Civil Engineering | Building Systems

ECEN-5830 (3) Special Topics

College of Engineering & Applied Science | Electrical & Computer Engineering | General

TLEN-5830 (1-6) Special Topics

Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Telecommunications

CHEN-5831 (2) Biotechnology Case Studies

Capstone course required of all graduate students in the interdisciplinary graduate biotechnology certificate program. Reviews molecular genetics, product synthesis and purification, economics, intellectual property, and business planning. Working in teams, students present a biotechnology product plan. Prereq., CHEN 5830.

College of Engineering & Applied Science | Chemical Engineering

ECEN-5831 (3) Brains, Minds, and Computers

Same as ECEN 4831, and ASEN 4436/5436. Prerequisites: Restricted to any graduate students or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Electrical & Computer Engineering | Bioengineering

TLEN-5831 (3) Special Topics

Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Telecommunications

CSCI-5832 (3) Natural Language Processing

Explores the field of natural language processing as it is concerned with the theoretical and practical issues that arise in getting computers to perform useful and interesting tasks with natural language. Covers the problems of understanding complex language phenomena and building practical programs. Prereq., graduate standing or instructor consent. Same as LING 5832.

Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science | Computer Science | Artificial Intelligence

CVEN-5834 (1-3) Special Topics

Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Civil Engineering | Environmental

CHEN-5835 (3) Colloids and Interfaces

Provides a deep exploration of the fundamental principles of colloid and interface science and of related applications. Core topics include fundamental equations of interfacial science, capillary phenomena, interfacial thermodynamics interfaces, molecular monolayers, electrical surface properties, and interfacial forces. Advanced topics include wetting phenomena, adsorption isotherms, dynamic interfacial behavior, surface modification, tribology, surfactant self-assembly, and foams/emulsions among others. Prereq., CHEN 3320 (min. grade C-).

College of Engineering & Applied Science | Chemical Engineering

CVEN-5835 (3) Special Topics for Seniors/Grads

Supervised study of special topics of interest to students under instructor guidance. Prereq., instructor consent.

College of Engineering & Applied Science | Civil Engineering | Structures

CHEN-5836 (3) Nanomaterials

Presents fundamental chemical and physical concepts that give rise to the unique optical, electronic and magnetic properties of nanoscale materials. Introduces important synthetic routes for producing nanomaterials, and interparticle forces governing colloidal behavior and self-assembly. Discusses current and potential applications in catalysis, biomedicine, renewable energy, and other fields. Restricted to students with 87-180 credits (Senior, Fifth Year Senior) or graduate students only. CHEN 4836 and 5836 are the same course. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Chemical Engineering

CVEN-5836 (1-3) Special Topics for Seniors/Grads

Supervised study of special topics of interest to students under instructor guidance. May be repeated up to 6 total credit hours. Prereq., Instructor consent. Prerequisites: Restricted to Graduate Students only.

ECEN-5837 (3) Mixed-Signal IC Design Lab

Software laboratory course extends the concepts developed in ECEN 4827 to full design and layout of mixed analog and digital custom integrated circuits. Assignments explore implementation of analog to digital and digital to analog converters, and final project develops a full custom IC for a target application. Prereq., ECEN 5827.

[College of Engineering & Applied Science](#)
[Electrical & Computer Engineering](#)
[Power](#)

CHEN-5838 (1-3) Special Topics in Chemical Engineering

Graduate-selected topics courses offered upon demand. Prereq., graduate standing or instructor consent. Prerequisites: Restricted to Graduate Students only.

[College of Engineering & Applied Science](#)
[Chemical Engineering](#)

CSCI-5839 (3) User-Centered Design

Restricted to graduate students or instructor consent. Same as CSCI 4839. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

[College of Engineering & Applied Science](#)
[Computer Science](#)
[Graphics](#)

CHEN-5840 (1-4) Independent Study

Available to MS and PHD students.

College of Engineering & Applied Science | Chemical Engineering

ECEN-5840 (1-6) Independent Study

Offers an opportunity for students to do independent, creative work at the master's level. Numbered ECEN 5840-5849. Prereq., advisor consent.

College of Engineering & Applied Science | Electrical & Computer Engineering | General

EMEN-5840 (1-3) Independent Study Project

Available only through approval of graduate advisor. Subjects arranged to fit the needs of the particular student. Non-EMP students require instructor permission. Prerequisites: Restricted to graduate students in Engineering Management Program (EMEN) only.

College of Engineering & Applied Science | Engineering Management

MCEN-5848 (1-6) Independent Study

Available only through approval of graduate advisor. Subjects arranged to fit the needs of the particular student. Numbered MCEN 5848--5898. Prereq., graduate standing.

College of Engineering & Applied Science | Mechanical Engineering | Miscellaneous

ASEN-5849 (1-6) Independent Study

Study of special projects. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Aerospace Engineering | Specialized Courses

CVEN-5849 (1-3) Independent Study

Available only through approval of graduate advisor. Subject arranged to fit needs of student. May be repeated up to 6 total credit hours.

College of Engineering & Applied Science | Civil Engineering | Special Topics

MCEN-5898 (1-4) Independent Study

Available only through approval of graduate advisor. Subjects arranged to fit the needs of the particular student. Numbered MCEN 5848-5898. Prereq., graduate standing.

College of Engineering & Applied Science | Mechanical Engineering | Special Topics

CHEN-5900 (3) Pharmaceutical Biotechnology

Incorporates biochemistry, pharmaceutical science, and engineering for application in the pharmaceutical industry. Emphasizes microscale mechanisms affecting drug delivery, bioavailability, and stability. Specific topics include thermodynamics of macromolecular conformational stability, crystallization kinetics, interfacial phenomena, and industrial protein folding. Prereq., graduate standing.

College of Engineering & Applied Science | Chemical Engineering

CSCI-5900 (1-6) Master's Level Independent Study

Provides opportunities for independent study at the master's level. Prerequisites: Restricted to Computer Science (CSEN) graduate students only or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science | Computer Science | General Computer Science

EMEN-5900 (3) Research Methods

Explores commonly used research methods including analytical, agreement, descriptive, and relational methods; experimental design including incorporation, nesting, blocking, and controlling; threats to the internal and external validity of research. Sampling procedures and considerations, measurement validity and reliability, and managing the research study are also reviewed. Prereq., EMEN 5005 or equivalent. Non-EMP students require instructor permission. Same as TLEN 5750. Prerequisites: Restricted to graduate students in Engineering Management Program (EMEN) only.

College of Engineering & Applied Science | Engineering Management

CSCI-5919 (3) Human-Computer Interaction: Survey and Synthesis

Examines interdisciplinary field of human-computer interaction through a comprehensive content and historical survey. Considers new trajectories of inquiry and how the field merges with others. "Social computing" is emphasized as a central topic. Students across disciplines will find the course foundational for understanding human-centered technology matters, including computer scientists; social scientists; and business and media arts students. Recommended prereq., CSCI 4839 or 5839. Prerequisites: Restricted to graduate students or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science | Computer Science | Graphics

CVEN-5919 (3) Sustainable Community Development 1

Focuses on the fundamental tools necessary to address sustainable community development projects in low-income communities (LICs). Topics include: human development, sustainable development, and presentation of an integrative and participatory framework for development projects in LICs. The framework consists of a combination of development and engineering project management tools. Framework is illustrated through case studies and student-driven team projects. Restricted to senior or graduate students. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Civil Engineering | Special Topics

TLEN-5920 (1-6) Independent Study

Prerequisites: Restricted to students with 87-180 credits (Senior) or graduate students in the College of Engineering or Leeds School of Business only.

College of Engineering & Applied Science | Telecommunications

CSCI-5929 (3) Human-Computer Interaction: Survey and Synthesis 2

Studies recent advances in human-computer interaction through critical analysis of influential papers and self-guided research. Examines new paradigms in input, output, and visualization for technology design and interaction. Considers innovative methods to assess various population design and technological needs. Studies in computer-related fields, social science, business, media arts, and communications benefit learning about human-centered computing research. Recommended prereq., CSCI 5919.

College of Engineering & Applied Science | Computer Science | Graphics

CVEN-5929 (3) Sustainable Community Development 2

Covers the principles, practices and strategies of appropriate technology as part of an integrated and systems approach to community-based development. Course content areas include technical issues in development, environmental health and communicable disease, appropriate and sustainable technologies with hands-on workshops, and global cooperation in development. Prereq., CVEN 5919. Restricted to seniors and graduate students.

College of Engineering & Applied Science | Civil Engineering | Special Topics

CVEN-5939 (3) Sustainable Community Development Field Practicum

Provides a supervised in-field practicum experience in which the student applies theories and concepts learned in Sustainable Community Development I and II (CVEN 5919 and 5929). Prereq., CVEN 5919 and 5929 or instructor consent. Restricted to students with EDC sub-plan. Prerequisites: Restricted to students with EDC Sub-Plan.

College of Engineering & Applied Science | Civil Engineering | Miscellaneous

ASEN-5940 (3-6) Engineering Research Internship

Grants credit to foreign visiting graduate students for conducting research within the Aerospace Engineering Sciences department. Credits can be transferred to the student's home institution. CU-Boulder students may also receive credit for conducting research outside of the university, either overseas or in the US. Restricted to students in final year of undergraduate work and graduate students from CU-Boulder or foreign institutions. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Aerospace Engineering | Specialized Courses

CSCI-6000 (1) Introduction to the Computer Science PhD Program

Instructs new Ph.D students in Computer Science how to obtain a Ph.D and how to become an effective member of the computer science research community. Makes students aware of formal requirements, educational objectives, and research themes. Provides evaluative criteria and guidelines for all objectives to be achieved. Restricted to new Ph.D students in Computer Science. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science Computer Science General Computer Science

ASEN-6008 (3) Interplanetary Mission Design

Exploration of principles and methods related to the design and construction of trajectories for interplanetary mission design. Some topics covered include: two-and three-body motion, gravity assists, maneuver computation, navigation, numerical integration, and construction of orbits. The main focus is on simple ballistic mission designs, such as Galileo or Cassini, however, libration point trajectories will also be covered. Prereq., ASEN 5050 or instructor consent. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science Aerospace Engineering Astrodynamics & Orbital Mech

ASEN-6009 (1-2) Special Topics Seminar

Presents research and developments in each department's focus areas. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science Aerospace Engineering Specialized Courses

ASEN-6010 (3) Advanced Spacecraft Dynamics and Control

Studies the dynamic modeling and control of spacecraft containing multiple momentum exchange devices, and/or flexible spacecraft components. Will develop nonlinear feedback control algorithms, explore singularity avoidance strategies. The second half of the course derives analytical methods (D'Alembert's equations, Lagrange's equations, Boltzmann Hamel equations) to model a hybrid rigid/flexible spacecraft system. Restricted to Engineering (ENGR) graduate students or Aerospace Engineering-Concurrent Degree (C-ASEN) students. Prereq., ASEN 5010 or equivalent or instructor consent. Repeatable for credit up to 6 total credit hours. Prerequisites: Restricted to Engineering (ENGR) graduate students or Aerospace Engineering-Concurrent Degree (C-ASEN) students.

College of Engineering & Applied Science Aerospace Engineering Astrodynamics & Orbital Mech

ASEN-6013 (3) High Speed Propulsion

Covers air-breathing and rocket propulsion cycles, their relative performance trade-offs, and how they fit within the context of a vehicle system. Specific emphasis will be placed on fundamental cycle analyses, component level design, and propulsion/airframe integration for rockets, turbojets, ramjets, scramjets, combined cycles, and other advanced propulsion concepts. Prereq., ASEN 4013 or instructor consent. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

[College of Engineering & Applied Science](#) [Aerospace Engineering](#) [Thermodynamics and Propulsion](#)

ASEN-6014 (3) Spacecraft Formation Flying

Studies the dynamic modeling and control of spacecraft formations orbiting about a planet. Investigate linear and nonlinear relative motion descriptions, rectilinear and curvilinear coordinates, orbit element difference based descriptions, J2-invariant relative orbits, as well as Lyapunov-based relative motion control strategies. Prereq., ASEN 5050 or equivalent, or instructor consent. May be repeated up to 6 total credit hours.

[College of Engineering & Applied Science](#) [Aerospace Engineering](#) [Systems and Control](#)

ECEN-6016 (1-3) Special Topics

[College of Engineering & Applied Science](#) [Electrical & Computer Engineering](#) [Optics](#)

ASEN-6020 (3) Optimal Trajectories

Introduces the theory and practice of trajectory optimization. The general theory behind optimization and optimal control will be introduced with an emphasis on the properties of optimal trajectories. The main application will be to space trajectories, but other applications will also be considered. Prereq., ASEN 5050 or instructor consent. Recommended prereq., ASEN 5014. Prerequisites:

Restricted to Graduate Students only.

College of Engineering & Applied Science Aerospace Engineering Astrodynamics & Orbital Mech

ASEN-6021 (3) Viscous Flow

Studies low Reynolds number flows, including incompressible and compressible laminar boundary layer theory; similarity theory; and separation, transition, and turbulent boundary layers. Prereq., ASEN 5051 or equivalent, or instructor consent. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science Aerospace Engineering Aerodynamics & Fluid Mechanics

ASEN-6024 (3) Nonlinear Control Systems

Introduces the analysis and control design methods for nonlinear systems, including Lyapunov and Describing Function methods. Prereq., ASEN 5014. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science Aerospace Engineering Systems and Control

ASEN-6028 (3) Graduate Projects II

Exposes MS and PhD students to leadership positions in project management and systems engineering while working a complex aerospace engineering project as part of a project team. The project team may perform some or all of the following project activities during this second semester of the two-semester course sequence: requirements definition, design and design review, build, test, and verification. Prereq., ASEN 5018. Recommended prereq., ASEN 4138, or 5148, or 5158. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science Aerospace Engineering Aerospace Design & System Engr

ASEN-6037 (3) Turbulent Flows

Studies turbulent closure methods and computational procedures used to solve practical turbulent flows. Emphasizes multi-equation models used with time-averaged equations to calculate free-turbulent shear-flows and turbulent boundary layers. Employs spectral methods in direct and large-eddy simulation of turbulence. Prereq., ASEN 5051 or equivalent. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science Aerospace Engineering Aerodynamics & Fluid Mechanics

ASEN-6060 (3) Advanced Astrodynamics

Covers Lagrangian and Hamiltonian formalisms for astrodynamics problems, the computation and characterization of space trajectories in highly dynamic environments, computation of periodic orbits, stability analysis of orbital motion, and development of analytical theories for dynamics. Prereq., ASEN 5050 or instructor consent. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science Aerospace Engineering Astrodynamics & Orbital Mech

ASEN-6061 (3) Molecular Gas Dynamics and DSMC

Describes the composition and flow of gases on a microscopic level to examine the behavior of the molecules that make up a macroscopic flow system. Thermodynamic properties, transport phenomena, and the governing Boltzmann Equation are derived from molecular collision dynamics and the kinetic theory. The Direct Simulation Monte Carlo method is introduced with applications. Restricted to graduate students or instructor consent. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Aerospace Engineering | Aerodynamics & Fluid Mechanics

ASEN-6070 (3) Satellite Geodesy

Focuses on the measurement of the Earth's gravitational field, rotational characteristics, and shape using Earth and space-based tracking of artificial satellites. Particular emphasis on satellite altimetry and satellite gravity measurements. Prereq., ASEN 3200 or instructor consent. Credit not granted for this course and ASEN 5060. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Aerospace Engineering | Astrodynamics & Orbital Mech

ASEN-6080 (3) Introduction to Statistical Orbit Determination 2

Continuation of ASEN 5070. Emphasizes orthogonal transformation techniques such as Givens and Householder, square root filtering and smoothing, and considers covariance analysis. Also nonlinear filters and dynamic model compensation techniques. Requires term project that involves the application of many of the techniques required for precise orbit determination. Prereq., ASEN 5070. Formerly ASEN 5080. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Aerospace Engineering | Astrodynamics & Orbital Mech

ASEN-6090 (3) Advanced Global Navigation Satellite Systems: Software and Applications

Focuses on high-precision applications of Global Navigation Satellite Systems (GNSS) and the software tools that are needed to achieve these precisions. Topics include precise orbital determination, reference frames, atmospheric delays, relativity, clock models, ambiguity resolution, and scientific applications. Prereq., ASEN 5090. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Aerospace Engineering | Global Positioning Systems

ASEN-6091 (3) Global Navigation Satellite System (GNSS) Receiver Architecture

Investigates the overall architecture of satellite navigation receivers: including both the analog radio frequency conditioning (antenna to the analog-to-digital converter) and the various signal processing algorithms. Such treatment of the operation of the receiver will provide insight into the trade-offs that go into GNSS as well as the more broad generic spread spectrum receiver design. Recommended prereq., ASEN 5090. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Aerospace Engineering | Global Positioning Systems

ASEN-6107 (3) Nonlinear Finite Element Methods

Continuation of ASEN 5007. Covers the formulation and numerical solution of nonlinear static structural problems by finite element methods. Emphasizes the treatment of geometric nonlinearities and structural stability. Prereq., ASEN 5007. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science Aerospace Engineering Specialized Courses

ECEN-6139 (3) Logic Synthesis of VLSI Systems

Studies synthesis and optimization of sequential circuits, including retiming transformations and don't care sequences. Gives attention to hardware description languages and their application to finite state systems. Also includes synthesis for testability and performance, algorithms for test generation, formal verification of sequential systems, and synthesis of asynchronous circuits. Prereqs., ECEN 5139 and CSCI 5454.

College of Engineering & Applied Science Electrical & Computer Engineering VLSI CAD Methods

ECEN-6144 (3) Electromagnetic Boundary Problems

Provides mathematical and physical fundamentals necessary for the systematic analysis of electromagnetic fields problems. Covers basic properties of Maxwell's equations, potentials and jump conditions; scattering and diffraction by canonical structures; Green's functions, integral equations and approximate methods. Requires some maturity in electromagnetics. Prereq., ECEN 5114 or 5134 or instructor consent. Prerequisites: Restricted to graduate students in Electrical Engineering (EEEN) or Electrical/Computer Engineering (ECEN) or Electrical Engineering Concurrent or Electrical/Computer Engineering Concurrent Degree students only.

College of Engineering & Applied Science Electrical & Computer Engineering Electromagnetics

CVEN-6161 (3) Advanced Mechanics of Materials 2

Fundamentals of continuum mechanics, finite deformations, Lagrangian finite strains, Cauchy and Piola Kirchoff stress tensors, plasticity and thermo-elasticity, elements of damage mechanics, elements of fracture mechanics, rheological and viscoelastic theories, and modern experimental techniques. Recommended prereq., CVEN 5161.

College of Engineering & Applied Science Civil Engineering Mechanics

MCEN-6163 (3) Elastic Waves

Effect of transient localized sources or dislocations in an elastic medium is studied. Modeling and application of waves in rods, beams, and plates is emphasized. In addition, ultrasonic, nondestructive evaluation and seismological problems are discussed. Prereq., MCEN 5023 or equivalent. Recommended MCEN 5040 or equivalent. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students. Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

College of Engineering & Applied Science Mechanical Engineering Solids

MCEN-6184 (3) Structure and Properties of Polymers

Emphasizes the relationship between molecular structure and macroscopic properties. Structural aspects include chain conformation, configuration, and the crystalline and amorphous states. Discusses physical and mechanical properties with a focus on solution and phase behavior, transitions of bulk polymers, and rubber and viscoelastic behavior. Prereq., graduate standing and MCEN 5024 and 5044, or equivalent. Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering Concurrent Degree students. Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

College of Engineering & Applied Science Mechanical Engineering Materials

ASEN-6210 (1-3) Remote Sensing Seminar

Covers subjects pertinent to remote sensing of the Earth, including oceanography, meteorology, vegetation monitoring, and geology. Emphasizes techniques for extracting geophysical information from satellite data. Course requirement for Remote Sensing Certificate. Restricted to graduate students. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Aerospace Engineering | Remote Sensing

CHEN-6210 (3) Microhydrodynamics of Suspensions and Colloids

Focuses on fluid mechanics and colloid science of suspensions of particles, cells, and drops. Covers fundamentals, applications, and research frontiers. Prereq., CHEN 5210 or equivalent.

College of Engineering & Applied Science | Chemical Engineering

ASEN-6220 (3) Topics in Remote Sensing

Covers infrared and microwave techniques for remote sensing, emphasizing oceanographic applications, fundamentals of electromagnetic radiation, remote sensing instrumentation (radars and radiometers), and conversion of sensory data to geophysical parameters, including sea surface topography, temperature, and atmospheric moisture. Prereq., graduate standing and instructor consent. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Aerospace Engineering | Remote Sensing

MCEN-6228 (3) Special Topics

Prerequisites: Restricted to College of Engineering and Applied Science Graduate Students or BS/MS Mechanical Engineering or Concurrent Degree students.

College of Engineering & Applied Science | Mechanical Engineering | Special Topics

CSCI-6268 (3) Foundations of Computer and Network Security

Studies methods to protect information, and the ability to process and move information, from theft, misuse, tampering, destruction, and unauthorized access. Introduces foundational topics of computer and network security, including security models, cryptography, and authentication protocols. Prereq., CSCI 5273. Same as TLEN 5550. Prerequisites: Restricted to Graduate Students only.

[Computer Science](#)
[Artificial Intelligence](#)

CVEN-6323 (3) Urban Stormwater Infrastructure Systems

Evaluation and design of more sustainable urban stormwater infrastructure systems including street inlets, on-line and off-line surface storage and infiltration systems. Integrated design for major, minor, and micro storms to provide flood control and drainage as well as control of pollution from stormwater runoff. Simulation and optimization models will be used.

[College of Engineering & Applied Science](#)
[Civil Engineering](#)
[Fluid Mechanics & Water Resour](#)

ASEN-6327 (3) Computational Fluid Mechanics

Introduction to advanced computational methods for the solution of fluid mechanics problems on the computer with emphasis on nonlinear flow phenomena. Prereq., ASEN 5417 or instructor consent. Formerly ASEN 5327. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

[College of Engineering & Applied Science](#)
[Aerospace Engineering](#)

College of Engineering & Applied Science Aerospace Engineering Aerodynamics & Fluid Mechanics

CVEN-6333 (3) Introduction to Multi-Scale Variability and Scaling in Hydrology

Provides a foundational physical understanding of channel networks, runoff, precipitation, and evapotranspiration at multiple spatial scales of drainage basins using modern analytical concepts for understanding non-linear phenomena, e.g., fractals, multifractals, statistical scaling, criticality, and renormalization. Prereq., CVEN 3313, 5333, 5454, and an upper-division course in probability, or equivalents.

College of Engineering & Applied Science Civil Engineering Fluid Mechanics & Water Resour

ASEN-6337 (3) Remote Sensing Data Analysis

Reviews satellite remote sensing instrumentation and methods. Student teamwork involves real satellite data for applications in oceanography, atmospheric science, and terrestrial physics. Students develop problem-solving skills and use the internet to gather satellite and in situ data to address chosen problems. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science Aerospace Engineering Remote Sensing

ASEN-6367 (3) Advanced Finite Element Methods for Plates, Shells, and Solids

Continues ASEN 5007. Covers more advanced FEM applications to linear static problems in structural and continuum mechanics. Focuses on modeling, formulation, and numerical solutions of problems modeled as plates, shells, and solids. Includes an overview of advanced variational formulations. Prereqs., introductory graduate level course in FEM and familiarity with linear algebra. Formerly ASEN 5367. Credit not granted for this course and ASEN 5367. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science Aerospace Engineering Structures, Mat. & Struc Dynam

CVEN-6383 (3) Flow and Transport through Porous Media

Studies basic physics of flow and transport of water, air, and other fluid mixtures through a porous medium. Course topics are relevant to applications in contaminant hydrology, contaminant transport in aquifers, hazardous waste management, geohydrology, soil physics, and geoenvironmental engineering.

College of Engineering & Applied Science Civil Engineering Fluid Mechanics & Water Resour

CVEN-6393 (1) Hydrologic Sciences and Water Resources Engineering Seminar

Provides a broad introduction to a variety of research topics from hydrologic sciences and water resources engineering. Offered as a one-hour weekly seminar by the departmental water faculty, graduate students, and external speakers. Restricted to graduate students in engineering. Prerequisites: Restricted to graduate student Civil (CVEN) Engineering students only.

College of Engineering & Applied Science Civil Engineering Fluid Mechanics & Water Resour

CSCI-6402 (3) Issues and Methods in Cognitive Science

Interdisciplinary introduction to cognitive science, examining ideas from cognitive psychology, philosophy, education, and linguistics via computational modeling and psychological experimentation. Includes philosophy of mind; learning; categorization; vision and mental imagery; consciousness; problem solving; decision making, and game-theory; language processing; connectionism. Prereqs., graduate standing, or at least one course at the 3000-level or higher in computer science, linguistics, philosophy, or psychology. No background in computer science will be presumed. Same as EDUC 6504, LING 6200, PHIL 6310, and PSYC 6200. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Computer Science | Artificial Intelligence

CVEN-6404 (3) Advanced Aquatic Chemistry

Examines aquatic equilibria, corrosion, colloid and polymer chemistry, behavior of natural organic matter in engineered systems, and application of personal computers to model aquatic equilibria. Requires a term project. Prereq., CVEN 5402. Offered in the spring every other year. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Civil Engineering | Environmental

CVEN-6414 (3) Aquatic Surfaces and Particles

Examines the role of surfaces and particles in the fate and transport of contaminants in the aquatic environment. Emphasizes modeling of absorption, dissolution, precipitation, surface-catalyzed reactions, and coagulation and filtration kinetics. Prereqs., CVEN 5404 or GEOL 5280.

College of Engineering & Applied Science | Civil Engineering | Environmental

ASEN-6427 (3) Advanced Computational Fluid Dynamics

Introduces computational techniques particularly applicable to high-speed gas flows that contain shocks. Complicated numerical methods are developed from relatively simple numerical modules. Prereq., ASEN 5417 or instructor consent. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Aerospace Engineering | Aerodynamics & Fluid Mechanics

CSCI-6454 (3) Advanced Algorithms

Topics include matching and network flows, matroids, computational geometry, parallel computation (PRAM, hypercube, mesh). Also includes Vlsi, database theory, distributed computation, cryptography, robotics, scheduling, probabilistic algorithms, approximation algorithms, average case, and amortized analysis, time permitting. Prereq., CSCI 5454. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Computer Science | Theory of Computation

CVEN-6511 (3) Nonlinear Finite Element Analysis of Solids and Porous Media

Explores fundamental principles of thermodynamics, including first and second law of thermodynamics, thermophysical properties, power and refrigeration cycles, gas mixtures and psychrometrics. Prereq., PHYS 1110. coreq., APPM1360.

College of Engineering & Applied Science | Civil Engineering | Mechanics

ASEN-6517 (3) Computational Methods In Dynamics

Covers modeling, computational algorithms and their computer implementation for both linear and nonlinear dynamical systems. Topics covered include transient analysis, wave propagation, multiphysics analysis, and their significant engineering applications. Prereq., ASEN 5022. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Aerospace Engineering | Structures, Mat, & Struc Dynam

ASEN-6519 (1-3) Special Topics

Reflects upon specialized aspects of aerospace engineering sciences. Course content is indicated in the online Schedule Planner. Prereq., varies. Prerequisites: Restricted to College of Engineering graduate students or Aerospace Engineering Concurrent Degree majors only.

College of Engineering & Applied Science | Aerospace Engineering | Specialized Courses

CVEN-6525 (3) Nonlinear Analysis of Framed Structures

Motivated by Performance Based Engineering, this course provides students with the proper theoretical underpinnings of nonlinear static and dynamic analysis of framed structures along with, exposure to the corresponding programming techniques in Matlab. First part covers traditional topics related to plasticity; second part focuses on the finite element formulation (with emphasis on flexibility based ones) for geometric and Material nonlinearities; nonlinear pushover and transient analysis of frame structures. Prereq., CVEN 4525/5525 or equivalent; proficiency in Matlab.

College of Engineering & Applied Science | Civil Engineering | Structures

CVEN-6595 (3) Earthquake Engineering

Analyzes and designs structures for earthquake loadings. Gives attention to earthquake ground motions, attenuation laws, and seismic hazard analysis. Also involves numerical methods for time-domain and frequency-domain analysis, response of linear and nonlinear structures, elastic and inelastic response spectra, construction of design spectra, soil-structure interaction analysis, and seismic design methods and building code requirements. Prereq., CVEN 5111 or equivalent. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Civil Engineering | Structures

CSCI-6622 (3) Advanced Machine Learning

Covers advanced theoretical and practical topics in machine learning and latest developments in the field. Students conduct original research, either applied or theoretical, and present their results. Prereq., CSCI 5622 or instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Computer Science | Artificial Intelligence

CSCI-6676 (3) Numerical Methods for Unconstrained Optimization

Looks at modern computational methods for solution of unconstrained optimization problems, nonlinear leastsquares, and systems of nonlinear equations. Techniques for building algorithms to

solve problems with special structure. Prereq., CSCI 5606. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Computer Science | Numerical Computation

CSCI-6686 (3) Numerical Methods for Constrained Optimization

Covers computational methods for constrained optimization. Topics include basic theory, methods for quadratic programming, active set strategies for linear constraints, and penalty and successive quadratic programming methods for nonlinearly constrained problems. Prereq., CSCI 5606. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Computer Science | Numerical Computation

CSCI-6800 (1-6) Master of Engineering Project

Students seeking the master of engineering degree must complete a creative investigation project, including a written report, supervised by a member of the graduate faculty. Prereq., completion of 21 hours towards the ME degree. Prerequisites: Restricted to graduate student Computer Sciences students only.

College of Engineering & Applied Science | Computer Science | General Computer Science

ECEN-6800 (3) Master of Engineering Report

College of Engineering & Applied Science | Electrical & Computer Engineering | General

EMEN-6805 (1) Capstone Preparation

Students determine capstone research question, conduct literature review, develop research methodology and project plan, write a proposal, and select capstone committee. Restricted to students who have completed 21 credit hours toward the EMEN degree. Prereq., either EMEN 5900 if choosing an applications-oriented capstone or EMEN 5825 if choosing a business plan capstone, and selection of a capstone advisor. Prerequisites: Restricted to graduate students in Engineering Management Program (EMEN) only.

CSCI-6810 (1) Seminar in Computational Biology

Provides an overview of current research topics in computational biology and health informatics, with a focus on research conducted on campus. Each week students will attend an on-campus seminar or a presentation by an on-campus research group. Prepares students to participate in a research project. Prereqs., CSCI 4312 or 4314 or 4317. CSCI 4810 and 6810 are the same course.

[College of Engineering & Applied Science](#)
[Computer Science](#)
[General Computer Science](#)

EMEN-6810 (2) Capstone Completion

Continues EMEN 6805 as the second half of a two-course sequence for the engineering management capstone project. Students conduct agreed-upon research, research and analyze results, develop recommendations, write a final report, and present the project to the committee for evaluation. Prereq., EMEN 6805. Prerequisites: Restricted to graduate students in Engineering Management Program (EMEN) only.

[College of Engineering & Applied Science](#)
[Engineering Management](#)

CHEN-6820 (3) Biochemical Engineering Fundamentals

Covers design and operation of fermentation processes, microbial and enzyme kinetics, multiple substrate and multiple species of fermentation, regulation of enzyme activity, energetics of cellular growth, immobilized enzyme and cell reactors, and transport phenomena in microbial systems and downstream processing. Prereq., graduate standing in CHEM, CHEN, or MCDB, or instructor consent.

[College of Engineering & Applied Science](#)
[Chemical Engineering](#)

EMEN-6830 (3) Project Management Capstone

Evaluate project management practices in the student's work unit, company, or in another organization. Identify strengths and weaknesses of the major product management processes as outlined in the Project Management Body of Knowledge (PMBOK). Opportunities for improvement and methods for implementation are expected. Prereqs., EMEN 5030 and 5032 and acceptance into the Project Management Certification option. Prerequisites: Restricted to graduate students in Engineering Management Program (EMEN) only.

College of Engineering & Applied Science | Engineering Management

CVEN-6834 (1-3) Special Topics

College of Engineering & Applied Science | Civil Engineering | Environmental

MCEN-6848 (1-6) Independent Study

Available only through approval of graduate advisor. Subjects arranged to fit the needs of the particular student. Numbered MCEN 6848-6898. Prereq., graduate standing.

College of Engineering & Applied Science | Mechanical Engineering | Special Topics

ASEN-6849 (1-6) Independent Study

Studies special projects agreed upon by student and instructor.

College of Engineering & Applied Science | Aerospace Engineering | Specialized Courses

MCEN-6898 (1-6) Independent Study

Available only through approval of graduate advisor. Subjects arranged to fit the needs of the particular student. Numbered MCEN 6848-6898. Prereq., graduate standing.

College of Engineering & Applied Science | Mechanical Engineering | Special Topics

CHEN-6940 (1) Master's Candidate

College of Engineering & Applied Science | Chemical Engineering

CSCI-6940 (1) Master's Degree Candidacy

For students who need to be registered for the purpose of taking the master's comprehensive exam and who are not otherwise registered. Credit does not count toward degree requirements. Graded on a pass/fail basis. Prerequisites: Restricted to Computer Science (CSEN) graduate students only or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science | Computer Science | General Computer Science

CVEN-6940 (1) Master's Degree Candidate

College of Engineering & Applied Science | Civil Engineering | Building Systems

ECEN-6940 (1) Master's Degree Candidate

Numbered ECEN 6940-6949.

College of Engineering & Applied Science | Electrical & Computer Engineering | General

TLEN-6940 (1) Candidate for Degree

Prerequisites: Restricted to Leeds School of Business or College of Engineering graduate students only.

College of Engineering & Applied Science | Telecommunications

MCEN-6949 (1) Master's Degree Candidacy

College of Engineering & Applied Science | Mechanical Engineering | Thesis

ASEN-6950 (1-6) Master's Thesis

College of Engineering & Applied Science | Aerospace Engineering | Specialized Courses

CHEN-6950 (1-6) Master's Thesis

College of Engineering & Applied Science | Chemical Engineering

CSCI-6950 (1-6) Master's Thesis

Prerequisites: Restricted to Computer Science (CSEN) graduate students only or Computer Science Concurrent Degree majors only.

College of Engineering & Applied Science | Computer Science | General Computer Science

ECEN-6950 (1-6) Master's Thesis

College of Engineering & Applied Science | Electrical & Computer Engineering | General

TLEN-6950 (1-6) Master's Thesis

Prerequisites: Restricted to Leeds School of Business or College of Engineering graduate students only.

College of Engineering & Applied Science | Telecommunications

MCEN-6959 (1-6) Master's Thesis

College of Engineering & Applied Science | Mechanical Engineering | Thesis

TLEN-6960 (1-4) Telecommunications Project

College of Engineering & Applied Science | Telecommunications

CSCI-7000 (1-4) Current Topics in Computer Science

Covers research topics of current interest in computer science that do not fall into a standard subarea. May be repeated up to 8 total credit hours. Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Computer Science | General Computer Science

TLEN-7000 (1-6) Current Topics in Telecommunications

Studies research topics of current interest in telecommunication and networking. May be repeated up to 8 total credit hours. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Telecommunications

CSCI-7111 (3) Topics in Parallel Processing

Content varies, but subjects include parallel machine architecture, parallel algorithms, languages for parallel computation, and applications. Takes subject matter from current research. Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Engineering & Applied Science | Computer Science | Parallel Processing

CVEN-7111 (3) Advanced Structural Dynamics

Includes general vibrations of civil engineering structures and their response to various types of time-dependent loads. Prereq., CVEN 5111.

College of Engineering & Applied Science | Civil Engineering | Mechanics

MUEL-1416 (2) Introduction to Hand Percussion

Studies the literature and technique of hand percussion. Emphasizes African and Latin percussion techniques. Designed for non-music majors. May be repeated up to 6 total credit hours. Restricted to non-College of Music majors only. Formerly EMUS1416. Prerequisites: Restricted to non-College of Music majors only.

[College of Music](#) | [Elective Music](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

MUEL-1832 (3) Appreciation of Music

Provides a basic knowledge of primarily Western music literature and development of discriminating listening habits. Restricted to nonmusic majors. Formerly EMUS 1832. Approved for arts and sciences core curriculum: literature and the arts. Offered fall and spring. Prerequisites: Restricted to non-College of Music majors only.

[College of Music](#) | [Elective Music](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

MUEL-2091 (2) Intro to Audio Recording

Introduces and explores basic concepts in audio recording from microphones to digital audio workstations. Also focuses on development of critical listening skills. Restricted to non-College of Music majors only. Prerequisites: Restricted to non-College of Music majors only.

[College of Music](#) | [Elective Music](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

MUEL-2184 (1) Voice Class

Continuation of MUEL 1184, with more advanced repertoire and vocal techniques. May be repeated up to 6 total credit hours. Prereq., MUEL 1184. Restricted to non-College of Music majors only. Formerly EMUS 2184. Prerequisites: Restricted to non-College of Music majors only.

[College of Music](#) | [Elective Music](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

MUEL-2752 (3) Music in American Culture

Offers a stylistic and historical examination of trends that have influenced present-day music in the U.S. Formerly EMUS 2752. Approved for arts and sciences core curriculum: United States context. Prerequisites: Restricted to non-College of Music majors only.

[College of Music](#) | [Elective Music](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

MUEL-2772 (3) World Musics

Highlights music outside Western art tradition, using current ethnomusicological materials. Spring semester focuses on musical cultures of the Americas, Africa, and Europe; fall semester focuses on musical cultures of Asia and Oceania. May be repeated up to 6 total credit hours. Formerly EMUS 2772. Approved for arts and sciences core curriculum: human diversity. Prerequisites: Restricted to non-College of Music majors only.

[College of Music](#) | [Elective Music](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

MUEL-2842 (3) American Musical Theatre

Provides an overview of the role of musical theatre in U.S. culture, emphasizing the 20th century Broadway musical. Restricted to non-College of Music majors only. Formerly EMUS 2842.

Prerequisites: Restricted to non-College of Music majors only.

[College of Music](#) | [Elective Music](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

MUEL-2852 (3) Music of the Rock Era

Examines popular music, concentrating on the U.S. after 1950. Considers precursor styles (e.g., blues folk) and contributions to the new rock style; discusses the evolution of rock style from 1960 through the 1990s. Formerly EMUS 2852. Approved for the arts and sciences core curriculum: literature and the arts. Offered spring only. Prerequisites: Restricted to non-College of Music majors only.

[College of Music](#) | [Elective Music](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

MUEL-2862 (3) American Film Musical, 1926-1954

Examines the development of filmed musicals from the beginning of sound movies through the Golden Age of Musicals. Emphasizes analysis and relationships of characters, songs, and incidental music. Restricted to non-College of Music majors only. Formerly EMUS 2862. Approved for arts and sciences core curriculum: literature and the arts. Prerequisites: Restricted to non-College of Music majors only.

[College of Music](#) | [Elective Music](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

MUEL-2872 (3) Music in the Rock Era: Special Topics in Heavy Metal

Explores, discuss, debate and develop deeper understanding of Heavy Metal. Included are study of musical style characteristics and lyrical content, innovative performers, unifying elements of Heavy Metal culture and the diversity within it, and its role in the larger Rock and societal contexts. Issues of gender, religion, and sexuality in the Heavy Metal construct are also discussed. Restricted to non-College of Music majors only. Prerequisites: Restricted to non-College of Music majors only.

[College of Music](#) [Elective Music](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

MUEL-3051 (2) Basic Composition

Introduces the processes, materials, and forms of composition through the writing and performance of short musical works. Open to any student who already has rudimentary musical knowledge. Restricted to non-College of Music majors only. Formerly EMUS 3051. Prerequisites: Restricted to non-College of Music majors only.

[College of Music](#) | [Elective Music](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

MUEL-3642 (3) History of Jazz

Studies the distinctly American art form of jazz music from its origins to the present, including the various traditions, practices, historical events, and people most important to its evolution. For nonmusic majors. Formerly EMUS 3642. Offered fall and spring. Prerequisites: Restricted to non-College of Music majors only.

[College of Music](#) | [Elective Music](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

MUEL-3772 (3) West African Music and Culture in Ghana

Provides hands-on and experiential enrichment for students to interact at several levels with a local community in Ghana. Classroom lectures will be combined with direct participation in drumming and dancing, field trips to participate in festivals and court ceremonies, field trips to kente weaving village, adinkra cloth making, wood carving villages, and museums. Prereq., MUSC 2782/MUEL 2772. Restricted to sophomore, non-College of Music majors only or instructor consent required. MUSC 3772 and MUEL 3772 are the same course.

[College of Music](#) | [Elective Music](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

MUEL-3822 (3) Words and Music

Explores the interaction between words and music in song. Students will consider how such features as rhyme, rhythm, tone, and the connotations of particular words contribute to meaning in poetry; how rhythm, tempo, dynamics, mood, and instrumentation contribute to meaning in music; and how words and music coalesce in song to make a new meaning. Restricted to non-College of Music majors only. Formerly EMUS 3822. Approved for arts and sciences core curriculum: literature and the arts. Prerequisites: Restricted to non-College of Music majors only.

[College of Music](#) | [Elective Music](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

MUEL-3832 (3) Music in Literature

Addresses literature that seeks either to explore the meaning of music or to make music out of words. Students will consider how musical concepts and techniques can be incorporated into poetry and prose, and will analyze the roles that writers have attributed to music in society, politics, and the life of the individual. Restricted to non-College of Music majors only. Formerly EMUS 3832. Approved for arts and sciences core curriculum: literature and the arts. Prerequisites: Restricted to non-College of Music majors only.

[College of Music](#) | [Elective Music](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

MUEL-3872 (3) Music in the Rock Era: Special Topics in Heavy Metal

Explore, discuss, debate and develop deeper understanding of Heavy metal. Included are study of musical style characteristics and lyrical content, innovative performers, unifying elements of Heavy Metal culture and the diversity within it, and its role in the larger Rock and societal contexts. Issues of gender, religion, and sexuality in the Heavy Metal construct area also discussed.

[College of Music](#) | [Elective Music](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

MUEL-4012 (3-6) African Music

Studies the musics, dances, and cultures of various peoples of Africa. Includes African diaspora music and Afro-pop. Restricted to non-College of Music majors only. Formerly EMUS 4012.

Prerequisites: Restricted to non-College of Music majors only.

[College of Music](#) | [Elective Music](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

MUEL-4081 (3) Introduction to Music Technology

Surveys the various tools and techniques in the field of music technology. Topics include an introduction to basic synthesis, musical instrument digital interface (MIDI) sequencing, audio sequencing, digital signal processing, music notation, and a historical perspective on electronic music. For non-music majors only. Prerequisites: Restricted to non-College of Music majors only.

[College of Music](#) | [Elective Music](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

MUEL-4121 (3) Topics in Music Technology

Exploration of issues, techniques and tools of music technology. Topics vary from term to term and may include: interactive system for performance, teaching, and learning; computer music instrument design; digital synthesis and signal processing; music in intermedia; sound design and analysis. Lectures and work sessions will support student projects. Prereqs., MUSC 4081 or MUEL 4081 or instructor consent required. For non-music majors only. Prerequisites: Restricted to non-College of Music majors only.

[College of Music](#) | [Elective Music](#)

MUSC-1325 (1) Piano Sight Reading

Studies techniques for improving sight-reading skills at the keyboard, with practical work in solo, ensemble, and choral literature. Also covers score reading and transposition. Restricted to piano majors instructor consent. Offered fall only. Prerequisites: Restricted to Music majors or graduate students only.

[College of Music](#)
[Music](#)
[Keyboard](#)

MUSC-2325 (2) Applied Harmony for the Keyboard

Provides an intensive study and application of the harmonic structure of music in a variety of keyboard skills: figured bass realization, chord progressions, harmonization, improvisation, transposition, on-sight harmonic analysis, and playing by ear. Prereqs., MUSC 1111, 1131, and 1325. Offered fall only. Prerequisites: Restricted to Music majors or graduate students only.

[College of Music](#)
[Music](#)
[Keyboard](#)

MUSC-2365 (2) Introduction to Accompanying

An overall study in the art of working with instrumentalists and singers including repertoire and orchestral reductions. Requires performance with a student instrumentalist or singer to be critiqued and coached by class and instructor. Prereq., piano major or instructor consent. Restricted to College of Music majors only. Offered spring only. Prerequisites: Restricted to College of Music undergraduate students only.

[College of Music](#)
[Music](#)
[Keyboard](#)

MUSC-3345 (2) Piano Pedagogy 1

Discusses teaching philosophies, objectives, and procedures. Examines and evaluates methods and materials. Studies practical aspects with which the private teacher is concerned. May be repeated up to 12 total credit hours. Restricted to College of Music majors only. Offered fall of even-numbered years. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Keyboard

MUSC-3355 (2) Piano Pedagogy 2

Materials and techniques for teaching piano with a focus on the intermediate level student. May be repeated up to 12 total credit hours. Restricted to College of Music majors only. Offered only in spring of odd-numbered years. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Keyboard

MUSC-3445 (1) Practicum in Piano Teaching: Elementary Level

Provides practical experience teaching piano at the elementary and early intermediate levels under faculty supervision. May be repeated up to 2 total credit hours. Recommended prereqs., MUSC 3345, 3355. Restricted to College of Music majors only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Keyboard

MUSC-4255 (2) Service Playing Techniques

Study of church music for liturgical and non-liturgical denominations; includes hymn playing, anthem accompaniments, basics of conducting from the organ console and improvisation, and selection of organ music appropriate to the requirements of the church year and other special services. Same as MUSC 5255.

College of Music | Music | Keyboard

MUSC-4285 (3) Organ Survey

Survey of organ repertoire and the history of organ building from the sixteenth century to the present. See also MUSC 4295. Same as MUSC 5285.

College of Music | Music | Keyboard

MUSC-4295 (3) Organ Survey

Survey of organ repertoire and the history of organ building from the sixteenth century to the present. See also MUSC 4285. Same as MUSC 5295.

College of Music | Music | Keyboard

MUSC-4325 (2) Keyboard Literature 1

Surveys keyboard music from 1600 to 1830. Restricted to College of Music majors only. Offered fall semester of even-numbered years. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Keyboard

MUSC-4335 (2) Keyboard Literature 2

Surveys keyboard music from 1830 to the present. Restricted to College of Music majors only. Offered spring semester of even-numbered years. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Keyboard

MUSC-4405 (2) Basso-Continuo Accompaniment

Studies the history, theory, and practice of Basso-continuo accompaniment. Provides practical instruction in realizing harmony from a given bass line (figured or unfigured), projecting affect, and creating dynamics at the harpsichord. Emphasizes individual cognition and creativity. Recommended prereqs., MUSC 2325 and PMUS 1586. Same as MUSC 5405. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Keyboard

MUSC-5215 (1-2) Studies in Piano Teaching

Studies the practical aspects and techniques for teaching piano at the intermediate and advanced levels in pre-college and college settings, as well as teaching group piano at the college level. May be repeated up to 2 total credit hours. Recommended prereqs., MUSC 5305 and 5315. Restricted to graduate piano majors. Prerequisites: Restricted to Graduate Students only.

College of Music | Music | Keyboard

MUSC-5255 (2) Service Playing Techniques

Same as MUSC 4255.

College of Music | Music | Keyboard

MUSC-5285 (3) Organ Survey

Same as MUSC 4285.

College of Music | Music | Keyboard

MUSC-5295 (3) Organ Survey

Same as MUSC 4295.

College of Music | Music | Keyboard

MUSC-5305 (2) Piano Pedagogy Group Techniques

Discusses materials and techniques for teaching beginning piano students of various ages in studio and class settings. Special attention given to adult classes. Includes an introduction to educational technology used in group instruction. Offered fall of odd-numbered years.

College of Music | Music | Keyboard

MUSC-5315 (2) Piano Pedagogy: Intermediate Literature

Surveys repertoire at the intermediate level and discusses teaching techniques. Explores issues related to intermediate and advanced piano performance, such as performance anxiety, physical and psychological well-being of the performer, and the development of technique. Introduces educational technology relevant to intermediate teaching. Offered spring of even-numbered years.

College of Music | Music | Keyboard

MUSC-5325 (2) Keyboard Literature 1

Examines areas of style, genre, and performance practice in selected keyboard music from 1600 to 1830. Emphasizes student presentation of specific topic areas. Offered fall semester of even-numbered years. Prerequisites: Restricted to Graduate Students only.

College of Music | Music | Keyboard

MUSC-5335 (2) Keyboard Literature 2

Examines areas of style, genre, and performance practice in selected areas of keyboard music from 1830 to the present. Emphasizes student presentation of specific topic areas. Offered spring semester of odd-numbered years.

College of Music | Music | Keyboard

MUSC-5345 (2) Research: Piano Literature and Pedagogy

Looks at individual or group research related to piano pedagogy or literature for piano. May be repeated upto 12 total credit hours. Prerequisites: Restricted to Graduate Students only.

College of Music | Music | Keyboard

MUSC-5365 (2) Advanced Accompanying

An in-depth study of both vocal and instrumental collaborative repertoire in individually assigned projects, coached by collaborative faculty and others. May be repeated up to 12 total credit hours.

Prerequisites: Restricted to Graduate Students only.

College of Music | Music | Keyboard

MUSC-5375 (2) Opera Coaching for Pianists

Teaches skills for opera coaches and rehearsal pianists. May be repeated up to 12 total credit hours. Prerequisites: Restricted to Graduate Students only.

College of Music | Music | Keyboard

MUSC-5405 (2) Basso-Continuo Accompaniment

Same as MUSC 4405. Prerequisites: Restricted to College of Music graduate students only.

College of Music | Music | Keyboard

MUSC-5425 (2) Collaborative Literature for Piano with Winds, Brass, and Percussion

Study of all forms of wind, brass and percussion repertoire involving collaboration with piano including sonatas, duos, short pieces and concerti. Focus will be on standard literature and reading and listening assignments will be supplemented by in-class performances and presentations. Prereq., instructor consent. Offered fall only.

MUSC-1326 (1) Guitar Musicianship

Activities in sight-reading, fretboard harmony and comprehension of harmony and texture. Some work will be tied to the repertoire being studied in studio lessons. Open only to students with an emphasis on guitar performance in their degree plan. Prerequisites: Restricted to College of Music undergraduate students only.

[College of Music](#) | [Music](#) | [Choral and Instrumental Music](#)

MUSC-2366 (2) Guitar Accompanying

Survey of accompanying repertoire for guitar with solo instruments (flute, violin, voice, etc.), including introductory work in basso continuo, playing/improvising from chord charts, and arranging accompaniments from musical scores. Prereq., MUSC 1326. Restricted to College of Music majors only. Prerequisites: Restricted to College of Music undergraduate students only.

[College of Music](#) | [Music](#) | [Choral and Instrumental Music](#)

MUSC-3176 (2) Conducting 1

Introduces conducting and rehearsal techniques. Coreq., performance participation in the appropriate ensemble (band, choir, or orchestra). Offered fall only. Prerequisites: Restricted to Music majors or graduate students only.

[College of Music](#) | [Music](#) | [Choral and Instrumental Music](#)

MUSC-3186 (2) Conducting II

Introduces conducting and rehearsal techniques. Coreq., performance participation in the appropriate ensemble (band, choir, or orchestra). Prereq., MUSC 3176. Restricted to College of Music majors only. Offered spring only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Choral and Instrumental Music

PMUS-3271 (2) Basic Improvisation

The exploration of basic music improvisation; performance in various musical styles. Prereq. MUSC 2111 or instructor consent. Offered spring of even-numbered years.

College of Music | Music | Choral and Instrumental Music

MUSC-4106 (2) Guitar Literature

An analytical and historical survey of the repertory of the guitar and its antecedents from the renaissance to the present day. Restricted to College of Music majors only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Choral and Instrumental Music

PMUS-4517 (2) Orchestral Repertoire

Trains practice techniques for String Players to master orchestral excerpts needed for all orchestra and festival auditions. Through careful listening students learn to improve the four basic elements of orchestral excerpt preparation: Rhythm, Intonation, Tone Quality, Interpretation. Prerequisites: Restricted to Music majors or graduate students only.

College of Music | Music | Choral and Instrumental Music

MUSC-5026 (2) Percussion Literature

In-depth investigation of major original solo works for percussion, significant ensemble literature including chamber and large ensembles, and selected transcriptions. Prereqs., graduate standing in music and instructor consent.

College of Music | Music | Choral and Instrumental Music

MUSC-5036 (2) Brass Literature

Investigates major original solo works for trumpet, horn, trombone, euphonium, and tuba, and ensemble literature including chamber and large settings. Offered every other spring semester.

College of Music | Music | Choral and Instrumental Music

MUSC-5106 (2) Guitar Literature

An analytical and historical survey of the repertory of the guitar and its antecedents from the renaissance to the present day. For graduate students. Same as MUSC 4106.

College of Music | Music | Choral and Instrumental Music

MUSC-5136 (2) Advanced Conducting

Offers advanced work in conducting. May be repeated up to 12 total credit hours. Prerequisites: Restricted to Graduate Students only.

College of Music | Music | Choral and Instrumental Music

MUSC-5156 (2) Symposium in Choral Musi.

Provides an advanced study of choral repertoire by style period. Required of all choral graduate students for a minimum of two semesters. Prerequisites: Restricted to College of Music graduate students only.

College of Music | Music | Choral and Instrumental Music

MUSC-5246 (3) Jazz Improvisation and Analysis

A study of improvisation through melodic and harmonic analysis of jazz compositions, transcriptions, and the study of historic jazz solos as played by jazz masters. Recommended prereq., MUSC 3071. Offered fall only. Prerequisites: Restricted to Graduate Students only.

College of Music | Music | Choral and Instrumental Music

MUSC-5256 (3) Jazz Studies Administration and Pedagogy

Studies the organization and administration of collegiate jazz programs. Topics include curriculum, program philosophy, teaching techniques, funding, teacher training, and evaluation. Recommended prereq., MUSC 3253. Offered fall only. Prerequisites: Restricted to College of Music graduate students only.

College of Music | Music | Choral and Instrumental Music

MUSC-5336 (2) Brass Pedagogy

Analyzes pedagogical techniques and philosophies of teaching brass instruments, and examines materials. Offered every other spring semester.

College of Music | Music | Choral and Instrumental Music

MUSC-5346 (3) Woodwind Pedagogy

Provides the knowledge and skills to teach woodwind instruments in both private studio and collegiate class settings. Considers pedagogical techniques addressing all levels of instruction. Prerequisites: Restricted to College of Music graduate students only.

College of Music | Music | Choral and Instrumental Music

MUSC-5356 (2) Jazz Studies Practicum

Studies strategies for developing and implementing academic programs in jazz studies. Includes demonstration teaching by class members. Recommended prereq., MUSC 5256. Offered Spring only. Prerequisites: Restricted to College of Music graduate students only.

College of Music | Music | Choral and Instrumental Music

MUSC-5666 (2) Chamber Music Literature: Woodwinds

Provides a stylistic-historical survey in various genres from Baroque era to present. May be repeated up to 12 total credit hours. Offered every other spring.

College of Music | Music | Choral and Instrumental Music

MUSC-7046 (3) Seminar in Jazz Literature

Provides advanced study in jazz literature and styles. Students present results of research on individually chosen topics or aspects of a topic central to the class. Requires class presentations and a major paper or project. May be repeated up to 6 total credit hours. Recommended prereqs., MUSC 5091 and 5642. Restricted to doctoral students. Offered every other year.

MUSC-1802 (3) Introduction to Musical Styles and Ideas

Introduces the study of music including bibliographic, listening, score reading, critical reading, and writing skills; music terminology; a survey of selected music genres (symphonic and chamber music); and building of general music repertory. Offered fall only. Prerequisites: Restricted to Music majors or graduate students only.

[College of Music](#)
[Music](#)
[Musicology](#)

MUSC-2772 (3) World Musics

Study of music outside western art tradition, using current ethnomusicological materials and methodologies. Spring semester focuses on musical cultures of Africa, the Americas, and Europe; fall semester focuses on musical cultures of Asia and Oceania. Prerequisites: Restricted to College of Music undergraduate students only.

[College of Music](#)
[Music](#)
[Musicology](#)

MUSC-2782 (3) World Musics Survey--Africa, Europe, and the Americas

Use current ethnomusicological materials and methods in the study of music outside the Western art tradition. Usually taught in the spring, MUSC 2782 focuses on music cultures of Africa, Europe, and the Americas. Prerequisites: Restricted to College of Music undergraduate students only.

[College of Music](#)
[Music](#)
[Musicology](#)

MUSC-3642 (3) History of Jazz

Studies the distinctly American art form of jazz music from its origins to the present, including the various traditions, practices, historical events and people most important to its evolution. Offered fall only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Musicology

MUSC-3772 (3) West African Music and Culture in Ghana

Provides hands-on and experiential enrichment for students to interact at several levels with a local community in Ghana. Classroom lectures will be combined with direct participation in drumming and dancing, field trips to participate in festivals and court ceremonies, field trips to kente weaving village, adinkra cloth making, wood carving villages, and museums. Prereq., MUSC 2782/MUEL 2772. Restricted to sophomore, non-College of Music majors only or instructor consent required. MUSC 3772 and MUEL 3772 are the same course. Prerequisites: Restricted to sophomore non-College of Music majors only.

College of Music | Music | Musicology

MUSC-3802 (3) History of Music 1

Surveys Western art music with stylistic analysis of representative works from all major periods through the Baroque. See also MUSC 3812. Prereq., MUSC 2111. Prerequisites: Requires pre-requisite course of MUSC 2111. Restricted to Music majors or graduate students only.

College of Music | Music | Musicology

MUSC-3812 (3) History of Music 2

Surveys Western art music with stylistic analysis of representative works from all major periods after the Baroque. See also MUSC 3802. Prereq., MUSC 2111. Restricted to College of Music majors only. Prerequisites: Requires prerequisite course of MUSC 2111. Restricted to College of Music undergraduate students only.

College of Music | Music | Musicology

MUSC-4012 (3) African Music

Studies the musics, dances, and cultures of various peoples of Africa. Includes African diaspora music and Afro-pop. Offered fall only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Musicology

MUSC-4112 (3) Ethnomusicology

Examines the definition, scope, and methods of ethnomusicology, the discipline that focuses on approaches to the study of music theory, history, and performance practices of world cultures. Prereq., MUSC 2772. Restricted to junior or senior College of Music majors only. Prerequisites: Requires pre-requisite class of MUSC 2772. Restricted to students with 57-180 credits (Junior or Senior) College of Music majors only.

College of Music | Music | Musicology

MUSC-4142 (3) American Indian Music

Examines Native North American musical cultures, with an emphasis on music as an integral part of religious expression and community life. Restricted to junior or senior College of Music majors only. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) College of Music majors only.

College of Music | Music | Musicology

MUSC-4152 (3) East Asian Music

Surveys the development of music in Japan, China and Korea through the in-depth study of particular styles of traditional music. The course emphasizes the study of music and culture, particularly music's relationship to religion, politics, language, literature, dance and theatre. Recommended prereq., MUSC 2772. Restricted to College of Music majors only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Musicology

MUSC-4712 (3) Renaissance Music

Provides repertory and analysis of polyphonic music 1400-1600. Prereq., MUSC 3802. Restricted to College of Music majors only. Same as MUSC 5712. Prerequisites: Requires pre-requisite class of MUSC 3802. Restricted to College of Music undergraduate students only.

College of Music | Music | Musicology

MUSC-4752 (3) Women in Music

Examines the role of women as creators and performers of Western Music. Explores related issues in musicology, including canon formation, reception history, and feminist aesthetics. Restricted to junior or senior College of Music majors only. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) College of Music majors only.

College of Music | Music | Musicology

MUSC-4772 (3) History of Opera

Examines representative operas from the 17th century. Emphasizes historical and stylistic analysis and surveys related musicological literature. Prereq., MUSC 3812. Restricted to College of Music majors only. Same as MUSC 5772. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Musicology

MUSC-4802 (3) Studies in 20th Century Music

Offers intensified work in history of music in the 20th century. Topics vary from year to year. Prereq., MUSC 3812. Restricted to junior or senior College of Music majors only. Same as MUSC 5802. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) College of Music majors only.

College of Music | Music | Musicology

MUSC-4852 (3) 17th and Early 18th Century Music

Examines music and writings about music from the Baroque era. Emphasizes historical and stylistic analysis and current musicological literature. Prereq., MUSC 3812 or instructor consent. Restricted to College of Music majors only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Musicology

MUSC-4872 (3) Late 18th and 19th Century Music

Examines music and writings about music during the Classic and Romantic eras of the Western tradition, 1750-1900. Emphasizes historical and stylistic analysis and current musicological research. Recommended prereq. or coreq., MUSC 3812. Restricted to College of Music majors only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Musicology

MUSC-4892 (3) Latin American Music

Explores music of cultures south of the United States, emphasizing the relationships of music and culture in folk, popular, and art styles. Same as MUSC 5892. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) College of Music majors only.

College of Music | Music | Musicology

MUSC-5002 (3) Proseminar in Historical Musicology

Prepares students to pursue independent research in the history of music. Meeting as a seminar, the course focuses on the nature of evidence, methods and tools of research, and theoretical or historiographic issues. Prerequisites: Restricted to Graduate Students only.

College of Music | Music | Musicology

MUSC-5012 (3) West African Music and Dance

Studies musical and dance traditions and current practices. Prereq., MUSC 4012 or instructor consent. Same as DNCE 5054. Prerequisites: Restricted to Graduate Students only.

College of Music | Music | Musicology

MUSC-5112 (3) Proseminar in Ethnomusicology

Examines the definition, scope, and methods of ethnomusicology, the discipline that focuses on approaches to the study of music theory, history, and performance practices of world cultures. Restricted to graduate students who have passed or remediated the World Music portion of their Musicology preliminary exams. Prerequisites: Restricted to College of Music graduate students only.

College of Music | Music | Musicology

MUSC-5142 (3) American Indian Music

Examines Native North American musical cultures, emphasizing music as an integral part of religious expression and community life. Restricted to graduate music majors. Prerequisites: Restricted to Graduate Students only.

College of Music | Music | Musicology

MUSC-5642 (3) Jazz History and Literature

Studies musical trends and cultural forces influencing jazz, with analysis of scales, improvisational styles, melodic and motivic variations, transcriptions, and orchestrations from significant periods in its history. Prereq., MUSC 3642 or instructor consent. Offered spring only.

College of Music | Music | Musicology

MUSC-5712 (3) Renaissance Music

Provides a repertory and analysis of polyphonic music 1400-1600. Same as MUSC 4712.

College of Music | Music | Musicology

MUSC-5722 (1) Sight-Reading Medieval and Renaissance Music Literature

Provides an opportunity to read through, sing, play, study, and discuss ancient repertoires more intensively than is normally possible in either music history lecture classes, seminars, or chamber music ensembles. Evaluation is based on active participation, out-of-class research, and final in-class group-performance projects. Recommended for graduate students in historical musicology and choral conducting. May be repeated up to 6 total credit hours.

MUSC-2103 (3) Introduction to Music Education

Provides an overview of basic principles and practices of the music education profession. Explores public school music teaching through class discussions, directed observations, and a supervised field experience. Offered fall only. Prerequisites: Restricted to College of Music undergraduate students only.

[College of Music](#)
[Music](#)
[Music Education](#)

MUSC-3013 (1) String Class

For music education majors with choral/general emphasis. Develops basic performance skills on two or more string instruments. Addresses teaching strategies and other specialized topics related to string instruction. Offered fall only. Prerequisites: Restricted to Music majors or graduate students only.

[College of Music](#)
[Music](#)
[Music Education](#)

MUSC-3023 (1) Woodwind Class

For music education majors with choral or choral/general emphasis. Develops basic performance skills on two or more woodwind instruments. Addresses teaching strategies and other specialized topics related to beginning and intermediate woodwind instruction. Restricted to College of Music majors only. Offered spring only. Prerequisites: Restricted to College of Music undergraduate students only.

[College of Music](#)
[Music](#)
[Music Education](#)

MUSC-3033 (1) Brass Class

For music education majors with choral or choral/general emphasis. Develops basic performance skills on two or more brass instruments. Addresses teaching strategies and other specialized topics related to beginning and intermediate brass instruction. Restricted to College of Music majors only. Offered spring only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Music Education

MUSC-3133 (2) Teaching General Music I

Provides an overview of general music teaching with emphasis on developmentally appropriate strategies and materials. Required for all music education majors as partial fulfillment of course work leading to K-12 music licensure. Prereq., MUSC 2103. Restricted to College of Music majors only. Offered spring only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Music Education

MUSC-3153 (2) Teaching Woodwind Instruments

For music education majors with instrumental or instrumental/general emphasis. Develops basic performance skills on three or more woodwind instruments. Addresses teaching strategies and other specialized topics related to beginning and intermediate woodwind instruction. Restricted to College of Music majors only. Offered spring only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Music Education

MUSC-3163 (2) Teaching String Instruments

For music education majors with instrumental or instrumental/general emphasis. Develops basic performance skills on three or more string instruments. Addresses teaching strategies and other specialized topics related to beginning and intermediate string instruction. Offered fall only. Prerequisites: Restricted to Music majors or graduate students only.

College of Music | Music | Music Education

MUSC-3193 (2) Vocal Pedagogy and Literature for Young Voices

Provides an overview of vocal anatomy/function, care of the voice, vocal repertoire, teaching strategies, and other specialized topics related to singing instruction in both private studio and public school choral settings. Fall section for instrumentalists; spring section for vocalists. Prerequisites: Restricted to Music majors or graduate students only.

College of Music | Music | Music Education

MUSC-3223 (2) Teaching Brass Instruments

For music education majors with instrumental or instrumental/general emphasis. Develops basic performance skills on three or more brass instruments. Addresses teaching strategies and other specialized topics related to beginning and intermediate brass instruction. Restricted to College of Music majors only. Offered spring only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Music Education

MUSC-3253 (2) Jazz Techniques for the Music Educator

Prepares the music educator for successful experiences teaching jazz at the secondary level. Students gain insights into performance and rehearsal techniques for the instrumental jazz ensemble. Explores approaches for teaching jazz theory, improvisation, and selecting literature for young students. Own instrument required for certain classes. Recommended prereqs., MUSC 1111 and 2103. Restricted to College of Music majors only. Offered spring only.

College of Music | Music | Music Education

MUSC-3273 (2) String Pedagogy and Literature

Examines instructional methods/materials and pedagogical approaches appropriate for beginning to advanced string students in private studio, small ensemble, or large ensemble contexts. Topics may include group teaching strategies, as well as contemporary approaches including Rolland and Suzuki. Recommended prereqs., MUSC 2103 and 3163. Restricted to College of Music majors only. Offered spring only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Music Education

MUSC-3363 (2) Marching Band Techniques

Helps develop the skills needed to administer and teach all aspects of a contemporary high school marching band. Includes drill conception and design, instruction, organization, and administration. Prereqs., MUSC 2103 and EMUS 1287. Offered fall only. Prerequisites: Restricted to Music majors or graduate students only.

College of Music | Music | Music Education

MUSC-4103 (1) Introduction to Student Teaching

Represents the first half of the professional internship year. Familiarizes students with the schools and music programs in which they plan to student teach. Music placements may consist of elementary and high school, elementary and middle school, or middle school and high school. Prereqs., MUSC 4113, 4313, or 4443; and EDUC 3023. Prerequisites: Requires prerequisite courses of MUSC 4113, 4313, or 4443 and EDUC 3023 or 4023. Restricted to College of Music undergraduate students only.

College of Music | Music | Music Education

MUSC-4113 (3) Teaching General Music 2

Provides an in-depth examination of teaching and learning processes in the elementary general music classroom, based on the integration of child development and musical development theories with content and delivery skills appropriate for K-5 general music classrooms. Students implement and evaluate music instruction, design curricular projects, and build a repertoire of vocal, instrumental, and speech-based arrangements. Prereqs., MUSC 2103 and 3133. Restricted to College of Music majors only. Offered fall only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Music Education

MUSC-4133 (3) Student Teaching Practicum

Offers practice teaching under the guidance of a master music teacher. Secondary level. Prereq., MUSC 4103. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Music Education

MUSC-4143 (2) Developing Children's Choirs

Examines the musical skills, teaching techniques, and administrative procedures necessary for developing a children's choir. Prereq., MUSC 2103. Restricted to College of Music majors only. Same as MUSC 5143. Offered fall of even-numbered years. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Music Education

MUSC-4153 (1) Percussion Class and Pedagogy

Required of all music education majors. Presents knowledge and skills necessary for music educators to teach young students, including a general understanding of the techniques used in playing and teaching percussion instruments in the school music program. Offered fall only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Music Education

MUSC-4163 (2) Choral Literature for School Ensembles

Examination of literature, materials, and methods appropriate for teaching choral music in secondary schools. Prereq., MUSC 2103. Restricted to College of Music majors only. Offered fall of odd-numbered years. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Music Education

MUSC-4193 (1) Student Teaching Seminar

Required for all music student teachers. Addresses topics of concern to beginning teachers including classroom management, interpersonal skills, legal issues, job search strategies, and teaching portfolio development. Prereq., MUSC 4103. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Music Education

MUSC-4203 (1) Music Methods Practicum

Taken concurrently with either MUSC 4113, 4313, or 4443. Provides students with opportunities to observe and practice the use of various teaching techniques and relate them to concepts presented in the methods course. Students consult with the instructor to determine appropriate placements in schools. Prereq., MUSC 2103. Coreq., MUSC 4113, 4313, or 4443. Restricted to College of Music majors only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Music Education

MUSC-4313 (3) Teaching Choral Music

Examines choral music curricula, instructional materials, and teaching techniques appropriate for secondary choral settings. Also addresses administrative strategies for choral music programs.

Prereq., MUSC 2103. Restricted to College of Music majors only. Same as MUSC 5313. Offered spring only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Music Education

MUSC-4443 (3) Teaching Instrumental Music

Examines instrumental music curricula, instructional materials, and teaching techniques appropriate for rehearsal, class, and lesson settings. Also addresses administration strategies for instrumental music programs. Prereq., MUSC 2103. Restricted to College of Music majors only. Same as MUSC 5442. Offered spring only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Music Education

MUSC-4583 (2) Inclusive Music Classroom

Surveys strategies necessary for teaching music to all students, including those with special needs. Offered fall of even-numbered years. Prereqs., MUSC 2103 and 3133. Recommended prereq., MUSC 4113. Restricted to College of Music majors only. Same as MUSC 5583. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Music Education

MUSC-5103 (3) Teaching General Music

Provides an in-depth examination of teaching and learning processes in the elementary general music classroom, based on the integration of child development and musical development theories with content and delivery skills appropriate for K-5 general music classrooms. Students implement and evaluate music instruction, design curricular projects, and build a repertoire of vocal, instrumental, and speech-based arrangements. Restricted to graduate students in music education. Offered fall only. Prerequisites: Restricted to Music or Music Education graduate students only.

College of Music | Music | Music Education

MUSC-5143 (2) Developing Children's Choirs

Restricted to College of Music graduate students only. Same as MUSC 4143. Prerequisites: Restricted to College of Music graduate students only.

College of Music | Music | Music Education

MUSC-2325 (2) Applied Harmony for the Keyboard

Provides an intensive study and application of the harmonic structure of music in a variety of keyboard skills: figured bass realization, chord progressions, harmonization, improvisation, transposition, on-sight harmonic analysis, and playing by ear. Prereqs., MUSC 1111, 1131, and 1325. Offered fall only. Prerequisites: Restricted to Music majors or graduate students only.

[College of Music](#) [Music](#) [Keyboard](#)

MUSC-2365 (2) Introduction to Accompanying

An overall study in the art of working with instrumentalists and singers including repertoire and orchestral reductions. Requires performance with a student instrumentalist or singer to be critiqued and coached by class and instructor. Prereq., piano major or instructor consent. Restricted to College of Music majors only. Offered spring only. Prerequisites: Restricted to College of Music undergraduate students only.

[College of Music](#) [Music](#) [Keyboard](#)

MUSC-2366 (2) Guitar Accompanying

Survey of accompanying repertoire for guitar with solo instruments (flute, violin, voice, etc.), including introductory work in basso continuo, playing/improvising from chord charts, and arranging accompaniments from musical scores. Prereq., MUSC 1326. Restricted to College of Music majors only. Prerequisites: Restricted to College of Music undergraduate students only.

[College of Music](#) [Music](#) [Choral and Instrumental Music](#)

MUSC-2608 (1) Alexander Technique

Investigates the discoveries and writings of F. M. Alexander regarding kinesthetic perception and coordination. Applies these contexts to specific musical activities. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Interdepartmental Courses

MUSC-2772 (3) World Musics

Study of music outside western art tradition, using current ethnomusicological materials and methodologies. Spring semester focuses on musical cultures of Africa, the Americas, and Europe; fall semester focuses on musical cultures of Asia and Oceania. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Musicology

MUSC-2782 (3) World Musics Survey--Africa, Europe, and the Americas

Use current ethnomusicological materials and methods in the study of music outside the Western art tradition. Usually taught in the spring, MUSC 2782 focuses on music cultures of Africa, Europe, and the Americas. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Musicology

MUSC-2918 (2) Building Your Music Career

Students acquire the practical skills they need to build their career as professional musicians, as well as explore the many options for putting their music education to work in the marketplace. Students will also explore the state of live music-making today and explore ways to maintain relevance for themselves and their art in an ever-changing world. Formerly MUSC 4918. Restricted to College of Music majors only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Music Entrepreneurship

MUSC-2988 (1) Introduction to Music Research

Introduces music research and writing skills to provide tools necessary for successful composition of formal research papers. Applies interests and curricular goals to specific topics of student choice. May be repeated up to 12 total credit hours. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Interdepartmental Courses

MUSC-2997 (0) Sophomore Proficiency

To be completed by the second semester of the sophomore year. Restricted to College of Music majors only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Theses and Recitals

MUSC-3013 (1) String Class

For music education majors with choral/general emphasis. Develops basic performance skills on two or more string instruments. Addresses teaching strategies and other specialized topics related to string instruction. Offered fall only. Prerequisites: Restricted to Music majors or graduate students only.

College of Music | Music | Music Education

MUSC-3023 (1) Woodwind Class

For music education majors with choral or choral/general emphasis. Develops basic performance skills on two or more woodwind instruments. Addresses teaching strategies and other specialized topics related to beginning and intermediate woodwind instruction. Restricted to College of Music majors only. Offered spring only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Music Education

MUSC-3033 (1) Brass Class

For music education majors with choral or choral/general emphasis. Develops basic performance skills on two or more brass instruments. Addresses teaching strategies and other specialized topics related to beginning and intermediate brass instruction. Restricted to College of Music majors only. Offered spring only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Music Education

MUSC-3051 (2) Beginning Composition

For noncomposition majors. Introduction to the craft of musical composition with analysis and writing in various styles. Restricted to College of Music majors only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Theory and Composition

MUSC-3061 (2) Jazz Improvisation I

Develops skills in jazz improvisation through practical application of chord/scale relationship, transcription, repertoire, and analysis. Open to all instruments. Offered fall only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Theory and Composition

MUSC-3071 (2) Jazz Improvisation II

Continues and expands upon the material presented in MUSC 3061. Reinforcement of ability to create an improvised melody in a range of harmonic contexts including blues, bebop, modal jazz, free jazz, and other styles. Prereq., MUSC 3061 or instructor consent. Restricted to College of Music majors only. Offered fall only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Theory and Composition

MUSC-3081 (3) Jazz Theory and Aural Foundations

Presents the grammar and syntax of jazz. Acquaints the student with the language of jazz improvisation and various jazz styles. The musician's most valuable tool---the ear---is developed through an in-depth analytical study of jazz masters through harmonic dictation/identification. Prereq., MUSC 2101. Restricted to College of Music majors only. Offered spring only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Theory and Composition

MUSC-3133 (2) Teaching General Music I

Provides an overview of general music teaching with emphasis on developmentally appropriate strategies and materials. Required for all music education majors as partial fulfillment of course work leading to K-12 music licensure. Prereq., MUSC 2103. Restricted to College of Music majors only. Offered spring only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Music Education

MUSC-3153 (2) Teaching Woodwind Instruments

For music education majors with instrumental or instrumental/general emphasis. Develops basic performance skills on three or more woodwind instruments. Addresses teaching strategies and other specialized topics related to beginning and intermediate woodwind instruction. Restricted to College of Music majors only. Offered spring only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Music Education

MUSC-3163 (2) Teaching String Instruments

For music education majors with instrumental or instrumental/general emphasis. Develops basic performance skills on three or more string instruments. Addresses teaching strategies and other specialized topics related to beginning and intermediate string instruction. Offered fall only. Prerequisites: Restricted to Music majors or graduate students only.

College of Music | Music | Music Education

PMUS-3167 (3) Opera Theatre Stagecraft

Introduction to the processes, materials, and equipment used in theatrical production. Lecture and lab requirements. Lab experiences include introductory work in the opera scenery, property, costume, and electrical shops. Prerequisites: Restricted to Music majors or graduate students only.

College of Music | Music | Voice

MUSC-3176 (2) Conducting 1

Introduces conducting and rehearsal techniques. Coreq., performance participation in the appropriate ensemble (band, choir, or orchestra). Offered fall only. Prerequisites: Restricted to Music majors or graduate students only.

College of Music | Music | Choral and Instrumental Music

MUSC-3186 (2) Conducting II

Introduces conducting and rehearsal techniques. Coreq., performance participation in the appropriate ensemble (band, choir, or orchestra). Prereq., MUSC 3176. Restricted to College of Music majors only. Offered spring only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Choral and Instrumental Music

MUSC-3193 (2) Vocal Pedagogy and Literature for Young Voices

Provides an overview of vocal anatomy/function, care of the voice, vocal repertoire, teaching strategies, and other specialized topics related to singing instruction in both private studio and public school choral settings. Fall section for instrumentalists; spring section for vocalists. Prerequisites: Restricted to Music majors or graduate students only.

College of Music | Music | Music Education

MUSC-3223 (2) Teaching Brass Instruments

For music education majors with instrumental or instrumental/general emphasis. Develops basic performance skills on three or more brass instruments. Addresses teaching strategies and other specialized topics related to beginning and intermediate brass instruction. Restricted to College of Music majors only. Offered spring only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Music Education

MUSC-3253 (2) Jazz Techniques for the Music Educator

Prepares the music educator for successful experiences teaching jazz at the secondary level. Students gain insights into performance and rehearsal techniques for the instrumental jazz ensemble. Explores approaches for teaching jazz theory, improvisation, and selecting literature for young students. Own instrument required for certain classes. Recommended prereqs., MUSC 1111 and 2103. Restricted to College of Music majors only. Offered spring only.

PMUS-3271 (2) Basic Improvisation

The exploration of basic music improvisation; performance in various musical styles. Prereq. MUSC 2111 or instructor consent. Offered spring of even-numbered years.

[College of Music](#)
[Music](#)
[Choral and Instrumental Music](#)

MUSC-3273 (2) String Pedagogy and Literature

Examines instructional methods/materials and pedagogical approaches appropriate for beginning to advanced string students in private studio, small ensemble, or large ensemble contexts. Topics may include group teaching strategies, as well as contemporary approaches including Rolland and Suzuki. Recommended prereqs., MUSC 2103 and 3163. Restricted to College of Music majors only. Offered spring only. Prerequisites: Restricted to College of Music undergraduate students only.

[College of Music](#)
[Music](#)
[Music Education](#)

MUSC-3345 (2) Piano Pedagogy 1

Discusses teaching philosophies, objectives, and procedures. Examines and evaluates methods and materials. Studies practical aspects with which the private teacher is concerned. May be repeated up to 12 total credit hours. Restricted to College of Music majors only. Offered fall of even-numbered years. Prerequisites: Restricted to College of Music undergraduate students only.

[College of Music](#)
[Music](#)
[Keyboard](#)

MUSC-3355 (2) Piano Pedagogy 2

Materials and techniques for teaching piano with a focus on the intermediate level student. May be repeated up to 12 total credit hours. Restricted to College of Music majors only. Offered only in spring of odd-numbered years. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Keyboard

MUSC-3363 (2) Marching Band Techniques

Helps develop the skills needed to administer and teach all aspects of a contemporary high school marching band. Includes drill conception and design, instruction, organization, and administration. Prereq., MUSC 2103 and EMUS 1287. Offered fall only. Prerequisites: Restricted to Music majors or graduate students only.

College of Music | Music | Music Education

MUSC-3444 (1) French Diction

Designed for the understanding of lyric French diction, the international phonetic alphabet, and its application to classical singing, as well as various musical styles of French classical vocal literature. Prereq., MUSC 1554. Recommended prereq., MUSC 3464. Required of Junior BM voice majors. Prerequisites: Restricted to Music majors or graduate students only.

College of Music | Music | Voice

MUSC-3445 (1) Practicum in Piano Teaching: Elementary Level

Provides practical experience teaching piano at the elementary and early intermediate levels under faculty supervision. May be repeated up to 2 total credit hours. Recommended prereqs., MUSC 3345, 3355. Restricted to College of Music majors only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Keyboard

MUSC-3464 (1) German Diction

Designed for the understanding of lyric German diction, the international phonetic alphabet, and its application to classical singing, as well as various musical styles of German classical vocal literature. Prereq., MUSC 1554. Restricted to College of Music majors only. Required of sophomore BM voice majors. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Voice

MUSC-3642 (3) History of Jazz

Studies the distinctly American art form of jazz music from its origins to the present, including the various traditions, practices, historical events and people most important to its evolution. Offered fall only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Musicology

MUSC-3772 (3) West African Music and Culture in Ghana

Provides hands-on and experiential enrichment for students to interact at several levels with a local community in Ghana. Classroom lectures will be combined with direct participation in drumming and dancing, field trips to participate in festivals and court ceremonies, field trips to kente weaving village, adinkra cloth making, wood carving villages, and museums. Prereq., MUSC 2782/MUEL 2772. Restricted to sophomore, non-College of Music majors only or instructor consent required. MUSC 3772 and MUEL 3772 are the same course. Prerequisites: Restricted to sophomore non-College of Music majors only.

College of Music | Music | Musicology

MUSC-3802 (3) History of Music 1

Surveys Western art music with stylistic analysis of representative works from all major periods through the Baroque. See also MUSC 3812. Prereq., MUSC 2111. Prerequisites: Requires prerequisite course of MUSC 2111. Restricted to Music majors or graduate students only.

College of Music | Music | Musicology

MUSC-3812 (3) History of Music 2

Surveys Western art music with stylistic analysis of representative works from all major periods after the Baroque. See also MUSC 3802. Prereq., MUSC 2111. Restricted to College of Music majors only. Prerequisites: Requires prerequisite course of MUSC 2111. Restricted to College of Music undergraduate students only.

College of Music | Music | Musicology

MUSC-3997 (1) Junior Recital

Prereq., MUSC 2997. Prerequisites: Restricted to Music majors or graduate students only.

College of Music | Music | Theses and Recitals

MUSC-4001 (2) New Musical Styles and Practices

Studies the style of Palestrina and his contemporaries through analysis, species counterpoint exercises, and composing in the style. Prereqs., MUSC 2111 and 2131. Restricted to College of Music majors only. Offered every other year. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Theory and Composition

MUSC-4011 (2) 16th Century Counterpoint

Studies the style of Palestrina and his contemporaries through analysis, species counterpoint exercises, and composing in the style. Prereqs., Musc 2111 and 2131. Restricted to College of Music majors only. Offered fall of even-numbered years. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Theory and Composition

MUSC-4012 (3) African Music

Studies the musics, dances, and cultures of various peoples of Africa. Includes African diaspora music and Afro-pop. Offered fall only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Musicology

MUSC-4021 (2) 18th Century Counterpoint

Provides a stylistic study of main contrapuntal genres of the period including invention, suite, and fugue. Provides a foundation in species counterpoint; stresses analysis and composing in the style. Prereqs., MUSC 2111 and 2131. Restricted to College of Music majors only. Offered spring of even-numbered years. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Theory and Composition

MUSC-4031 (2) Jazz Arranging 1

Study of notation, score layout, transpositions, basic harmonic and melodic analysis, basic chord voicings, and composition for a small and large jazz ensemble. Use of notation software such as Finale or Sibelius. Prereqs., MUSC 2111 and 2131. Recommended prereq., MUSC 3081. Offered fall of odd-numbered years. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Theory and Composition

MUSC-4041 (2) Orchestration

Studies advanced orchestration techniques through score analysis and student projects. Prereq., MUSC 2071 or instructor consent. Offered fall only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Theory and Composition

MUSC-4061 (2) Tonal Analysis

Surveys tonal analytical techniques and forms of tonal music, including binary forms, sonata forms, ternary forms, rondo (and others) through study of selected works from the 18th and 19th centuries. Prereqs., MUSC 2111 and 2131. Offered fall only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Theory and Composition

MUSC-4071 (2) Post-Tonal Theory and Analysis

Focus on theory and analysis of post-tonal literature pre-1945. Prereqs., MUSC 2111 and 2131. Offered every other fall. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Theory and Composition

MUSC-4078 (1) Piano Technician for Pianists

Familiarizes pianists with the development of the modern grand piano, its construction, and the proper terminology of parts and specifications. Trains pianists in minor repairs and adjustments of the grand piano action, and in minor tuning tasks. Recommended restriction, piano majors. Restricted to College of Music majors only. Same as MUSC 5078. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Interdepartmental Courses

MUSC-4081 (3) Introduction to Music Technology

Topics include basic synthesis, musical instrument digital interface (MIDI) sequencing, and music notation by computer. Offered fall and spring. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Theory and Composition

MUSC-4091 (2) Jazz Arranging 2

Continuation and expansion of studies in MUSC 4031. Survey and analysis of major composers and arrangers of the idiom. Course focuses on creating several arranging projects for a large jazz ensemble. Prereq., MUSC 4031. Recommended prereq., MUSC 3081. Restricted to College of Music majors only. Offered fall of even-numbered years. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Theory and Composition

MUSC-4101 (1-3) Theory and Aural Skills Review

Reviews tonal harmony, voice leading, and essential aural skills. Includes diatonic triads and seventh chords, modulation, chromaticism, and structural analysis of representative compositions. Prepares graduate students for more advanced work in music theory. Students may register for aural skills only (1 credit), theory only (2 credits), or both theory and aural skills (3 credits). May not be taken pass/fail. For graduate students only. Offered summer and fall. Prerequisites: Restricted to College of Music graduate students only.

MUSC-4103 (1) Introduction to Student Teaching

Represents the first half of the professional internship year. Familiarizes students with the schools and music programs in which they plan to student teach. Music placements may consist of elementary and high school, elementary and middle school, or middle school and high school. Prereqs., MUSC 4113, 4313, or 4443; and EDUC 3023. Prerequisites: Requires prerequisite courses of MUSC 4113, 4313, or 4443 and EDUC 3023 or 4023. Restricted to College of Music undergraduate students only.

[College of Music](#)
[Music](#)
[Music Education](#)

PMUS-4105 (1) Supervised Accompanying

Assigned projects, both vocal and instrumental, are coached by collaborative piano faculty and others. May involve recital, jury, or master class performances. Prereq., MUSC 1325 and MUSC 2365 or instructor consent. Prerequisites: Requires pre-requisite course of MUSC 1325 and MUSC 2365). Restricted to Music majors or graduate students only.

[College of Music](#)
[Music](#)
[Keyboard Musicianship](#)

MUSC-4106 (2) Guitar Literature

An analytical and historical survey of the repertory of the guitar and its antecedents from the renaissance to the present day. Restricted to College of Music majors only. Prerequisites: Restricted to College of Music undergraduate students only.

[College of Music](#)
[Music](#)
[Choral and Instrumental Music](#)

MUSC-4111 (2) Composing at the Computer

Discover strategies and techniques for generating and manipulating sound at the computer. Student projects will include compositions, soundscapes, ambient environments, and soundtracks for multimedia. Available to students without prior experience with computer music or composition. Prereq., MUSC 4081. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Theory and Composition

MUSC-4112 (3) Ethnomusicology

Examines the definition, scope, and methods of ethnomusicology, the discipline that focuses on approaches to the study of music theory, history, and performance practices of world cultures. Prereq., MUSC 2772. Restricted to junior or senior College of Music majors only. Prerequisites: Requires pre-requisite class of MUSC 2772. Restricted to students with 57-180 credits (Junior or Senior) College of Music majors only.

College of Music | Music | Musicology

MUSC-4113 (3) Teaching General Music 2

Provides an in-depth examination of teaching and learning processes in the elementary general music classroom, based on the integration of child development and musical development theories with content and delivery skills appropriate for K-5 general music classrooms. Students implement and evaluate music instruction, design curricular projects, and build a repertoire of vocal, instrumental, and speech-based arrangements. Prereqs., MUSC 2103 and 3133. Restricted to College of Music majors only. Offered fall only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Music Education

MUSC-4121 (3) Topics in Music Technology

Exploration of issues, techniques, and tools of music technology. Topics vary from term to term and may include: interactive systems for performance; teaching and learning; computer music instrument design; digital synthesis and signal processing; music in intermedia; sound design and analysis. Lectures on work sessions will support student projects. May be repeated up to 9 total credit hours. Prereq., MUSC 4081. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Theory and Composition

MUSC-4133 (3) Student Teaching Practicum

Offers practice teaching under the guidance of a master music teacher. Secondary level. Prereq., MUSC 4103. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Music Education

PMUS-4137 (1) Opera Theatre 1

Addresses issues related to young artist development. Areas of concentration include (but are not limited to) acting technique, resume preparation, audition technique, scene analysis, and role preparation. The acting technique is addressed in this course through textbook reading and exercise. May be repeated up to 12 total credit hours. Prerequisites: Restricted to Music majors or graduate students only.

College of Music | Music | Voice

MUSC-4142 (3) American Indian Music

Examines Native North American musical cultures, with an emphasis on music as an integral part of religious expression and community life. Restricted to junior or senior College of Music majors only. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) College of Music majors only.

College of Music | Music | Musicology

MUSC-4143 (2) Developing Children's Choirs

Examines the musical skills, teaching techniques, and administrative procedures necessary for developing a children's choir. Prereq., MUSC 2103. Restricted to College of Music majors only. Same as MUSC 5143. Offered fall of even-numbered years. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Music Education

PMUS-4147 (1) Opera Theatre 2

Continuation of PMUS 4137. Further scene analysis and movement exercises are addressed in this class. May be repeated up to 12 total credit hours. Prereq., PMUS 4137. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Voice

MUSC-4152 (3) East Asian Music

Surveys the development of music in Japan, China and Korea through the in-depth study of particular styles of traditional music. The course emphasizes the study of music and culture, particularly music's relationship to religion, politics, language, literature, dance and theatre. Recommended prereq., MUSC 2772. Restricted to College of Music majors only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Musicology

MUSC-4153 (1) Percussion Class and Pedagogy

Required of all music education majors. Presents knowledge and skills necessary for music educators to teach young students, including a general understanding of the techniques used in playing and teaching percussion instruments in the school music program. Offered fall only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Music Education

PMUS-4157 (1-3) Opera Practicum

Prerequisites: Restricted to Music majors or graduate students only.

College of Music | Music | Voice

MUSC-4163 (2) Choral Literature for School Ensembles

Examination of literature, materials, and methods appropriate for teaching choral music in secondary schools. Prereq., MUSC 2103. Restricted to College of Music majors only. Offered fall of odd-numbered years. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Music Education

PMUS-4167 (1-3) Opera Theatre Lab

Advanced work in the scenery, property, costume, and electrical shops in opera performance. Additional experiences may include positions with opera run crews, the box office, or other supporting areas. May be repeated up to 12 total credit hours. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Voice

MUSC-4168 (3) World Music Theories

Examines music and social elements, rules, and concepts that musicians use to structure and synthesize musical sound, with emphasis on music practices and pedagogies from a variety of world traditions; observing shared principles and making cross-cultural comparisons and investigating a shared (not universal) discourse as well as resources for a new pedagogy that supports the substantive study of global musics. Recommended prereqs., MUSC 2772 or 2782 or 4112. Same as MUSC 5168. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) College of Music majors only.

College of Music | Music | Theory and Composition

MUSC-4191 (2) Advanced Recording

Study of advanced recording techniques and concepts beyond those covered in MUSC 2091 involving multiple microphones for ensemble concerts and recording sessions within and outside of the College of Music. Prereq., MUSC 2091. Restricted to College of Music majors only. Offered spring of even-numbered years. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Theory and Composition

MUSC-4193 (1) Student Teaching Seminar

Required for all music student teachers. Addresses topics of concern to beginning teachers including classroom management, interpersonal skills, legal issues, job search strategies, and teaching portfolio development. Prereq., MUSC 4103. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Music Education

MUSC-4203 (1) Music Methods Practicum

Taken concurrently with either MUSC 4113, 4313, or 4443. Provides students with opportunities to observe and practice the use of various teaching techniques and relate them to concepts presented in the methods course. Students consult with the instructor to determine appropriate placements in schools. Prereq., MUSC 2103. Coreq., MUSC 4113, 4313, or 4443. Restricted to College of Music majors only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Music Education

MUSC-4255 (2) Service Playing Techniques

Study of church music for liturgical and non-liturgical denominations; includes hymn playing, anthem accompaniments, basics of conducting from the organ console and improvisation, and selection of organ music appropriate to the requirements of the church year and other special services. Same as MUSC 5255.

College of Music | Music | Keyboard

MUSC-4285 (3) Organ Survey

Survey of organ repertoire and the history of organ building from the sixteenth century to the present. See also MUSC 4295. Same as MUSC 5285.

College of Music | Music | Keyboard

MUSC-4288 (2-3) Macintosh-based Web Server Fundamentals for Musicians and Educators

Designed for music students. Teaches concepts and skills necessary to develop, host, and maintain Macintosh-based web servers and to create and serve multimedia files including video, MP3, MIDI, and PDF.

College of Music | Music | Interdepartmental Courses

MUSC-4295 (3) Organ Survey

Survey of organ repertoire and the history of organ building from the sixteenth century to the present. See also MUSC 4285. Same as MUSC 5295.

College of Music | Music | Keyboard

MUSC-4313 (3) Teaching Choral Music

Examines choral music curricula, instructional materials, and teaching techniques appropriate for secondary choral settings. Also addresses administrative strategies for choral music programs. Prereq., MUSC 2103. Restricted to College of Music majors only. Same as MUSC 5313. Offered spring only. Prerequisites: Restricted to College of Music undergraduate students only.

[College of Music](#) | [Music](#) | [Music Education](#)

MUSC-4325 (2) Keyboard Literature 1

Surveys keyboard music from 1600 to 1830. Restricted to College of Music majors only. Offered fall semester of even-numbered years. Prerequisites: Restricted to College of Music undergraduate students only.

[College of Music](#) | [Music](#) | [Keyboard](#)

MUSC-4335 (2) Keyboard Literature 2

Surveys keyboard music from 1830 to the present. Restricted to College of Music majors only. Offered spring semester of even-numbered years. Prerequisites: Restricted to College of Music undergraduate students only.

[College of Music](#) | [Music](#) | [Keyboard](#)

MUSC-4405 (2) Basso-Continuo Accompaniment

Studies the history, theory, and practice of Basso-continuo accompaniment. Provides practical instruction in realizing harmony from a given bass line (figured or unfigured), projecting affect, and creating dynamics at the harpsichord. Emphasizes individual cognition and creativity. Recommended prereqs., MUSC 2325 and PMUS 1586. Same as MUSC 5405. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Keyboard

MUSC-4443 (3) Teaching Instrumental Music

Examines instrumental music curricula, instructional materials, and teaching techniques appropriate for rehearsal, class, and lesson settings. Also addresses administration strategies for instrumental music programs. Prereq., MUSC 2103. Restricted to College of Music majors only. Same as MUSC 5442. Offered spring only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Music Education

PMUS-4497 (1-2) Vocal Repertoire Coaching

Group coaching class to prepare for voice recitals as well as to learn vocal repertoire including historical background, composers, styles, and poetic interpretation. May be repeated up to 12 credit hours. Prerequisites: Restricted to Music majors or graduate students only.

College of Music | Music | Voice

PMUS-4517 (2) Orchestral Repertoire

Trains practice techniques for String Players to master orchestral excerpts needed for all orchestra and festival auditions. Through careful listening students learn to improve the four basic elements of orchestral excerpt preparation: Rhythm, Intonation, Tone Quality, Interpretation. Prerequisites: Restricted to Music majors or graduate students only.

College of Music | Music | Choral and Instrumental Music

MUSC-4583 (2) Inclusive Music Classroom

Surveys strategies necessary for teaching music to all students, including those with special needs. Offered fall of even-numbered years. Prereqs., MUSC 2103 and 3133. Recommended prereq., MUSC 4113. Restricted to College of Music majors only. Same as MUSC 5583. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Music Education

MUSC-4608 (1) Advanced Studies in the Alexander Technique

Continue of MUSC 2608 with greater concentration on utilizing Alexander principles in specialized activity. Prereq., MUSC 2608 or instructor consent. Prerequisites: Requires prerequisite course of MUSC 2608. Restricted to College of Music undergraduate students only.

College of Music | Music | Interdepartmental Courses

MUSC-4712 (3) Renaissance Music

Provides repertory and analysis of polyphonic music 1400-1600. Prereq., MUSC 3802. Restricted to College of Music majors only. Same as MUSC 5712. Prerequisites: Requires pre-requisite class of MUSC 3802. Restricted to College of Music undergraduate students only.

College of Music | Music | Musicology

MUSC-4752 (3) Women in Music

Examines the role of women as creators and performers of Western Music. Explores related issues in musicology, including canon formation, reception history, and feminist aesthetics. Restricted to junior or senior College of Music majors only. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) College of Music majors only.

College of Music | Music | Musicology

MUSC-4772 (3) History of Opera

Examines representative operas from the 17th century. Emphasizes historical and stylistic analysis and surveys related musicological literature. Prereq., MUSC 3812. Restricted to College of Music majors only. Same as MUSC 5772. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Musicology

MUSC-4802 (3) Studies in 20th Century Music

Offers intensified work in history of music in the 20th century. Topics vary from year to year. Prereq., MUSC 3812. Restricted to junior or senior College of Music majors only. Same as MUSC 5802. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) College of Music majors only.

College of Music | Music | Musicology

MUSC-4852 (3) 17th and Early 18th Century Music

Examines music and writings about music from the Baroque era. Emphasizes historical and stylistic analysis and current musicological literature. Prereq., MUSC 3812 or instructor consent. Restricted to College of Music majors only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Musicology

MUSC-4872 (3) Late 18th and 19th Century Music

Examines music and writings about music during the Classic and Romantic eras of the Western tradition, 1750-1900. Emphasizes historical and stylistic analysis and current musicological research. Recommended prereq. or coreq., MUSC 3812. Restricted to College of Music majors only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Musicology

MUSC-4892 (3) Latin American Music

Explores music of cultures south of the United States, emphasizing the relationships of music and culture in folk, popular, and art styles. Same as MUSC 5892. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) College of Music majors only.

College of Music | Music | Musicology

MUSC-4908 (1-3) Internship in Music Business

Engage with music/music business organizations in the community (for profit or non-profit) to pursue specific tasks or projects relevant to the student's career goals. A minimum of 48 hours is required per semester for one credit. May be repeated up to 3 total credit hours. Recommended prereq., Masters standing. MUSC 4908 and 5908 are the same course. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Music Entrepreneurship

MUSC-4957 (1-4) Senior Thesis

Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Theses and Recitals

MUSC-4958 (2) Community Performances

Designed for the aspiring professional performer. Through classroom theory and off-campus application, acquire skills in programming for and communicating with diverse audiences, marketing & PR, and new paradigms of concert presentation. Will result in an actual musical presentation in the community. Restricted to College of Music majors only. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Music Entrepreneurship

MUSC-4988 (3) The Entrepreneurial Artist

Learn the core principles of entrepreneurship, such as idea formation, venture models, opportunity assessment, market analysis, and strategies for launching a venture, and apply them to their own entrepreneurial ideas. Lectures, projects, entrepreneur interviews, and case studies will culminate in a feasibility study for an original entrepreneurial concept. Recommended prereq., MUSC 4918. Same as MUSC 5988.

College of Music | Music | Music Entrepreneurship

MUSC-4997 (1) Senior Recital

Prereq., MUSC 3997. Prerequisites: Requires pre-requisite class of MUSC 3997. Restricted to College of Music undergraduate students only.

College of Music | Music | Theses and Recitals

MUSC-5002 (3) Proseminar in Historical Musicology

Prepares students to pursue independent research in the history of music. Meeting as a seminar, the course focuses on the nature of evidence, methods and tools of research, and theoretical or historiographic issues. Prerequisites: Restricted to Graduate Students only.

College of Music | Music | Musicology

MUSC-5011 (2) 16th Century Counterpoint

Provides a stylistic study of main contrapuntal genres of the period including FREE, TWO- and THREE-part imitative counterpoint in the style of Palestrina. Provides a foundation in species counterpoint, working towards free counterpoint; stresses analysis and composing in 16th-century styles. Prerequisites: Restricted to College of Music graduate students only.

College of Music | Music | Theory and Composition

MUSC-5012 (3) West African Music and Dance

Studies musical and dance traditions and current practices. Prereq., MUSC 4012 or instructor consent. Same as DNCE 5054. Prerequisites: Restricted to Graduate Students only.

College of Music | Music | Musicology

MUSC-5021 (2) 18th Century Counterpoint

Provides a stylistic study of main contrapuntal genres of the period including INVENTION, SUITE, and FUGUE. Provides a foundation in species counterpoint; stresses analysis and composing in the styles. Prerequisites: Restricted to College of Music graduate students only.

MUSC-5026 (2) Percussion Literature

In-depth investigation of major original solo works for percussion, significant ensemble literature including chamber and large ensembles, and selected transcriptions. Prereqs., graduate standing in music and instructor consent.

[College of Music](#)
[Music](#)
[Choral and Instrumental Music](#)

MUSC-5036 (2) Brass Literature

Investigates major original solo works for trumpet, horn, trombone, euphonium, and tuba, and ensemble literature including chamber and large settings. Offered every other spring semester.

[College of Music](#)
[Music](#)
[Choral and Instrumental Music](#)

MUSC-5041 (2) Advanced Orchestration

Provides an advanced study of orchestration techniques through score analysis and student projects. Offered fall only.

[College of Music](#)
[Music](#)
[Theory and Composition](#)

MUSC-5061 (3) Advanced Tonal Analysis

Surveys tonal analytical techniques. Prereq., passed general written theory and aural skills prelim exam, or completed remediation. Offered fall only. Prerequisites: Restricted to Graduate Students only.

College of Music | Music | Theory and Composition

MUSC-5071 (3) Post-tonal Theory and Analysis I

Focuses on theory and analysis of post-tonal literature pre-1945. Prereq., passed general written theory and aural skills prelim exam, or completed remediation. Offered fall and every other spring. Prerequisites: Restricted to Graduate Students only.

College of Music | Music | Theory and Composition

MUSC-5078 (1) Piano Technician for Pianists

Same as MUSC 4078. Prerequisites: Restricted to Graduate Students only.

College of Music | Music | Interdepartmental Courses

MUSC-5081 (3) Applications in Music Technology

Presents advanced strategies for applying computer technology in several musical disciplines. Emphasizes the use of technology in composition, music theory, and music education. Offered fall only. Prerequisites: Restricted to Graduate Students only.

College of Music | Music | Theory and Composition

MUSC-5091 (3) Contemporary Jazz Theory

Studies contemporary approaches to jazz improvisation and composition. Analysis of innovative composition and improvisation and strategies for integration of the material into a personal vocabulary are explored. Prereq., MUSC 3081. Offered spring only.

College of Music | Music | Theory and Composition

MUSC-5103 (3) Teaching General Music

Provides an in-depth examination of teaching and learning processes in the elementary general music classroom, based on the integration of child development and musical development theories with content and delivery skills appropriate for K-5 general music classrooms. Students implement and evaluate music instruction, design curricular projects, and build a repertoire of vocal, instrumental, and speech-based arrangements. Restricted to graduate students in music education. Offered fall only. Prerequisites: Restricted to Music or Music Education graduate students only.

College of Music | Music | Music Education

MUSC-5106 (2) Guitar Literature

An analytical and historical survey of the repertory of the guitar and its antecedents from the renaissance to the present day. For graduate students. Same as MUSC 4106.

College of Music | Music | Choral and Instrumental Music

MUSC-5112 (3) Proseminar in Ethnomusicology

Examines the definition, scope, and methods of ethnomusicology, the discipline that focuses on approaches to the study of music theory, history, and performance practices of world cultures. Restricted to graduate students who have passed or remediated the World Music portion of their Musicology preliminary exams. Prerequisites: Restricted to College of Music graduate students only.

College of Music | Music | Musicology

MUSC-5121 (3) Advanced Topics in Music Technology

Conducts advanced research in techniques and tools of music technology. Topics vary from term to term and may include: user interfaces for computer music; advanced sound design; digital modeling of acoustic sounds; computer-aided analysis of sound; modeling music intelligence in real time. Lectures and work sessions will support student projects. May be repeated up to 9 total credit hours. Prereq., MUSC 5081 or instructor consent required.

College of Music | Music | Theory and Composition

MUSC-5136 (2) Advanced Conducting

Offers advanced work in conducting. May be repeated up to 12 total credit hours. Prerequisites: Restricted to Graduate Students only.

College of Music | Music | Choral and Instrumental Music

PMUS-5137 (2) Opera Theatre 1

Addresses issues related to young artist development at the graduate level. Areas of concentration will include (but are not limited to) acting technique for singers, resume preparation and scene and character analysis. Students will participate in acting and improvisation exercises. Substantial classical voice study is required and this course is recommended for voice majors only. May be repeated up to 12 total credit hours. Prerequisites: Restricted to Graduate Students only.

College of Music | Music | Voice

MUSC-5142 (3) American Indian Music

Examines Native North American musical cultures, emphasizing music as an integral part of religious expression and community life. Restricted to graduate music majors. Prerequisites: Restricted to Graduate Students only.

College of Music | Music | Musicology

MUSC-5143 (2) Developing Children's Choirs

Restricted to College of Music graduate students only. Same as MUSC 4143. Prerequisites: Restricted to College of Music graduate students only.

College of Music | Music | Music Education

PMUS-5147 (2) Opera Theatre 2

Continuation of PMUS 5137. May be repeated up to 12 total credit hours. Prereq., PMUS 5137.

College of Music | Music | Voice

MUSC-5151 (3) Topics in Music Analysis

Analytical study of a specific topic to be determined by the instructor (e.g., German Lieder, Bartok quartets, tonal rhythm, Schenker, etc). Study published analyses representing a variety of methodologies, and produce original analyses. Prereq., passed general written theory and aural skills prelim exam, or completed remediation. Recommended prereqs., MUSC 5061, 5071, as appropriate to topic or instructor consent. Prerequisites: Restricted to College of Music graduate students only.

College of Music | Music | Theory and Composition

MUSC-5156 (2) Symposium in Choral Music

Provides an advanced study of choral repertoire by style period. Required of all choral graduate students for a minimum of two semesters. Prerequisites: Restricted to College of Music graduate students only.

College of Music | Music | Choral and Instrumental Music

MUSC-5168 (3) World Music Theories

Examines music and social elements, rules, and concepts that musicians use to structure and synthesize musical sound, with emphasis on music practices and pedagogies from a variety of world traditions; observing shared principles and making cross-cultural comparisons and investigating a shared (not universal) discourse as well as resources for a new pedagogy that supports the substantive study of global musics. Same as MUSC 4168. Prerequisites: Restricted to College of Music graduate students only.

College of Music | Music | Theory and Composition

MUSC-5183 (2) Research in Music Teaching

Introduces basic descriptive, experimental, and qualitative research methods, including sampling, design, data collection, and analysis. Students review published music research and conduct one original research study. Restricted to graduate students in music education. Offered fall only. Prerequisites: Restricted to Music or Music Education graduate students only.

College of Music | Music | Music Education

PMUS-5184 (1) Graduate Voice Class

Teaches solo and choral singing and vocal modeling. Designed for choral and music education graduate students. Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Music | Music | Voice

MUSC-5215 (1-2) Studies in Piano Teaching

Studies the practical aspects and techniques for teaching piano at the intermediate and advanced levels in pre-college and college settings, as well as teaching group piano at the college level. May be repeated up to 2 total credit hours. Recommended prereqs., MUSC 5305 and 5315. Restricted to graduate piano majors. Prerequisites: Restricted to Graduate Students only.

College of Music | Music | Keyboard

MUSC-5246 (3) Jazz Improvisation and Analysis

A study of improvisation through melodic and harmonic analysis of jazz compositions, transcriptions, and the study of historic jazz solos as played by jazz masters. Recommended prereq., MUSC 3071. Offered fall only. Prerequisites: Restricted to Graduate Students only.

College of Music | Music | Choral and Instrumental Music

MUSC-5255 (2) Service Playing Techniques

Same as MUSC 4255.

College of Music | Music | Keyboard

MUSC-5256 (3) Jazz Studies Administration and Pedagogy

Studies the organization and administration of collegiate jazz programs. Topics include curriculum, program philosophy, teaching techniques, funding, teacher training, and evaluation. Recommended prereq., MUSC 3253. Offered fall only. Prerequisites: Restricted to College of Music graduate students only.

[College of Music](#) | [Music](#) | [Choral and Instrumental Music](#)

MUSC-5273 (2) Comprehensive String Pedagogy

Comparative study and application of the principles of string teaching. In-depth analysis of individual instrument pedagogy and application to advanced studio and class teaching. Historical survey of major violin, viola, cello, and double bass pedagogues. Includes apprenticeship teaching. Restricted to graduate students. Offered fall of odd-numbered years. Prerequisites: Restricted to Graduate Students only.

[College of Music](#) | [Music](#) | [Music Education](#)

MUSC-5285 (3) Organ Survey

Same as MUSC 4285.

[College of Music](#) | [Music](#) | [Keyboard](#)

MUSC-5295 (3) Organ Survey

Same as MUSC 4295.

College of Music | Music | Keyboard

MUSC-5305 (2) Piano Pedagogy Group Techniques

Discusses materials and techniques for teaching beginning piano students of various ages in studio and class settings. Special attention given to adult classes. Includes an introduction to educational technology used in group instruction. Offered fall of odd-numbered years.

College of Music | Music | Keyboard

MUSC-5313 (3) Teaching Choral Music

Restricted to graduate students in music education. Same as MUSC 4313. Offered spring only.

College of Music | Music | Music Education

MUSC-5315 (2) Piano Pedagogy: Intermediate Literature

Surveys repertoire at the intermediate level and discusses teaching techniques. Explores issues related to intermediate and advanced piano performance, such as performance anxiety, physical and psychological well-being of the performer, and the development of technique. Introduces educational technology relevant to intermediate teaching. Offered spring of even-numbered years.

College of Music | Music | Keyboard

MUSC-5325 (2) Keyboard Literature 1

Examines areas of style, genre, and performance practice in selected keyboard music from 1600 to 1830. Emphasizes student presentation of specific topic areas. Offered fall semester of even-numbered years. Prerequisites: Restricted to Graduate Students only.

College of Music | Music | Keyboard

MUSC-5335 (2) Keyboard Literature 2

Examines areas of style, genre, and performance practice in selected areas of keyboard music from 1830 to the present. Emphasizes student presentation of specific topic areas. Offered spring semester of odd-numbered years.

College of Music | Music | Keyboard

MUSC-5336 (2) Brass Pedagogy

Analyzes pedagogical techniques and philosophies of teaching brass instruments, and examines materials. Offered every other spring semester.

College of Music | Music | Choral and Instrumental Music

MUSC-5345 (2) Research: Piano Literature and Pedagogy

Looks at individual or group research related to piano pedagogy or literature for piano. May be repeated upto 12 total credit hours. Prerequisites: Restricted to Graduate Students only.

College of Music | Music | Keyboard

MUSC-5346 (3) Woodwind Pedagogy

Provides the knowledge and skills to teach woodwind instruments in both private studio and collegiate class settings. Considers pedagogical techniques addressing all levels of instruction.

Prerequisites: Restricted to College of Music graduate students only.

College of Music | Music | Choral and Instrumental Music

MUSC-5356 (2) Jazz Studies Practicum

Studies strategies for developing and implementing academic programs in jazz studies. Includes demonstration teaching by class members. Recommended prereq., MUSC 5256. Offered Spring only. Prerequisites: Restricted to College of Music graduate students only.

College of Music | Music | Choral and Instrumental Music

MUSC-5365 (2) Advanced Accompanying

An in-depth study of both vocal and instrumental collaborative repertoire in individually assigned projects, coached by collaborative faculty and others. May be repeated up to 12 total credit hours.

Prerequisites: Restricted to Graduate Students only.

College of Music | Music | Keyboard

MUSC-5375 (2) Opera Coaching for Pianists

Teaches skills for opera coaches and rehearsal pianists. May be repeated up to 12 total credit hours. Prerequisites: Restricted to Graduate Students only.

College of Music | Music | Keyboard

MUSC-5405 (2) Basso-Continuo Accompaniment

Same as MUSC 4405. Prerequisites: Restricted to College of Music graduate students only.

College of Music | Music | Keyboard

MUSC-5425 (2) Collaborative Literature for Piano with Winds, Brass, and Percussion

Study of all forms of wind, brass and percussion repertoire involving collaboration with piano including sonatas, duos, short pieces and concerti. Focus will be on standard literature and reading and listening assignments will be supplemented by in-class performances and presentations. Prereq., instructor consent. Offered fall only.

College of Music | Music | Keyboard

MUSC-5435 (2) Collaborative Literature for Piano with Strings

Study of all forms string repertoire involving collaboration with piano including sonatas, duos, short pieces and concerti. Focus will be on standard literature and reading and listening assignments will be supplemented by in-class performances and presentations. Prereq., instructor consent. Offered spring only.

College of Music | Music | Keyboard

MUSC-5443 (3) Teaching Instrumental Music

For graduate music education majors. Same as MUSC 4443. Offered spring only.

College of Music | Music | Music Education

MUSC-5444 (2) Vocal Pedagogy

In depth study of the physiology, acoustics, and health aspects of the singing voice. Recommended for all graduate students in voice. Prerequisites: Restricted to Graduate Students only.

College of Music | Music | Voice

MUSC-5454 (2) Repertory for Young Voices

Survey of the solo repertoire for young voices, the physiological aspects of mutational voices, techniques of vocalizing young voices, and class voice procedure. Prerequisites: Restricted to Graduate Students only.

College of Music | Music | Voice

MUSC-5464 (2) French Song Literature

Provides an extensive analytical and historical discussion of French song literature styles, from the 12th century to the present.

College of Music | Music | Voice

MUSC-5484 (2) Graduate Seminar in Vocal Pedagogy

A thorough investigation of the challenges of studio voice pedagogy, including corrective techniques, psychological philosophies, and video analysis of student teaching. Examination and evaluation of comparative methodologies of vocal technique. Prereq., MUSC 5444 or instructor consent required.

College of Music | Music | Voice

PMUS-5497 (1-2) Vocal Repertoire Coaching

Group coaching class to prepare for voice recitals as well as to learn vocal repertoire including historical background, composers, styles, and poetic interpretation. Class may fulfill voice literature requirements when appropriate classes are not offered. Also available: weekly individual coaching to prepare for voice recitals and other projects. Diction, musical styles, and interpretation (music and text) are the main focus of this course. May be repeated up to 12 credit hours. for graduate voice students and collaborative pianists. Prerequisites: Restricted to Graduate Students only.

College of Music | Music | Voice

MUSC-5564 (2) German Song Literature

Provides an extensive analytical and historical discussion of German song literature styles, from the 18th century to the present.

[College of Music](#)
[Music](#)
[Music Education](#)

MUSC-5608 (1) Graduate Studies in the Alexander Technique

Study of the relationship of kinesthetic perception and postural reflexes to physical coordination in performance. Analysis and research regarding Alexander's principles. Prerequisites: Restricted to College of Music graduate students only.

[College of Music](#)
[Music](#)
[Interdepartmental Courses](#)

MUSC-5642 (3) Jazz History and Literature

Studies musical trends and cultural forces influencing jazz, with analysis of scales, improvisational styles, melodic and motivic variations, transcriptions, and orchestrations from significant periods in its history. Prereq., MUSC 3642 or instructor consent. Offered spring only.

[College of Music](#)
[Music](#)
[Musicology](#)

MUSC-5666 (2) Chamber Music Literature: Woodwinds

Provides a stylistic-historical survey in various genres from Baroque era to present. May be repeated up to 12 total credit hours. Offered every other spring.

College of Music | Music | Choral and Instrumental Music

MUSC-5708 (2) Introduction to Music Bibliography and Research

Explores basic informational sources about music and musicians; a study of bibliographic forms, research, and writing techniques employed in music research papers, theses, and dissertations. Required in all master's degree programs. Prerequisites: Restricted to Graduate Students only.

College of Music | Music | Interdepartmental Courses

MUSC-5712 (3) Renaissance Music

Provides a repertory and analysis of polyphonic music 1400-1600. Same as MUSC 4712.

College of Music | Music | Musicology

MUSC-5722 (1) Sight-Reading Medieval and Renaissance Music Literature

Provides an opportunity to read through, sing, play, study, and discuss ancient repertoires more intensively than is normally possible in either music history lecture classes, seminars, or chamber music ensembles. Evaluation is based on active participation, out-of-class research, and final in-class group-performance projects. Recommended for graduate students in historical musicology and choral conducting. May be repeated up to 6 total credit hours.

College of Music | Music | Musicology

MUSC-5742 (3) Performance Practice of Early Music

Examines instrumental and vocal performance practices through the 18th century. Topics may vary from year to year. Prerequisites: Restricted to College of Music graduate students only.

College of Music | Music | Musicology

MUSC-5752 (3) Women in Music

Examines the role of women as creators and performers of Western Music. Explores related issues in musicology, including canon formation, reception history, and feminist aesthetics.

College of Music | Music | Musicology

MUSC-5762 (3-4) History of Choral Literature

Provides a seminar in analysis of musical style and history of choral repertory . Those wishing review of literature and repertory may enroll for 4 credit hours.

College of Music | Music | Musicology

MUSC-5772 (3) History of Opera

Examines representative operas from the 17th century. Emphasizes historical and stylistic analysis and surveys related musicological literature. Restricted to graduate students. Same as MUSC 4772.

College of Music | Music | Musicology

MUSC-5802 (3) Studies in 20th Century Music

Same as MUSC 4802. Prereq., graduate standing.

College of Music | Music | Musicology

MUSC-5808 (1) Advanced Alexander Technique for Graduate Students

Continues investigation of the benefits of Alexander's principles regarding mind-body awareness begun in MUSC 5608. Increased emphasis on utilizing principles in specialized activity. Analysis and research regarding musical activities. May be repeated up to 3 total credit hours. Prereq., MUSC 5608 or instructor consent.

College of Music | Music | Interdepartmental Courses

MUSC-5812 (3) Symphonic Literature

Studies literature for orchestra, band, and other symphonic ensembles including pre-Classical, Classical, Romantic, and 20th century.

College of Music | Music | Musicology

MUSC-5822 (3) Ancient and Medieval Music

Surveys sources from the ancient Greeks to the early Christian era and music from the 8th to the 15th century.

College of Music | Music | Musicology

MUSC-5832 (3) Studies in American Music

Offers intensified work in folk, popular, and art music of the United States.

College of Music | Music | Musicology

MUSC-5842 (3) Aesthetics of Music

Surveys various philosophies of music in writings of philosophers, psychologists, sociologists, composers, critics, and historians. May be repeated up to 12 total credit hours. Prerequisites: Restricted to Graduate Students only.

College of Music | Music | Musicology

MUSC-5852 (3) 17th and Early 18th Century Music

Examines music and writings about music from the Baroque era. Emphasizes historical and stylistic analysis and current musicological literature.

College of Music | Music | Musicology

MUSC-5872 (3) Late 18th and 19th Century Music

May be repeated up to 12 total credit hours. Same as MUSC 4872.

College of Music | Music | Musicology

MUSC-5882 (3) Studies in 18th and 19th Century Music

Meets as a seminar and examines selected topics in Classic and Romantic music, 1750-1900. Topics vary from year to year.

College of Music | Music | Musicology

MUSC-5892 (3) Latin American Music

Restricted to graduate students. Same as MUSC 4892.

College of Music | Music | Musicology

MUSC-5908 (1-3) Internship in Music Business

Engage with music/music business organizations in the community (for profit or non-profit) to pursue specific tasks or projects relevant to the student's career goals. A minimum of 48 hours is required per semester for one credit. May be repeated up to 3 total credit hours. Recommended prereq., Masters standing. MUSC 4908 and 5908 are the same course. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Music Entrepreneurship

MUSC-5968 (2) Entrepreneurial Ventures in the Arts

Previously Topics in Arts Entrepreneurship, this course prepares students to evaluate opportunities in their specific arts field by analyzing existing arts organizations and then applying entrepreneurial concepts to create new enterprises. Topics for research and discussion include current issues in the arts, introduction to entrepreneurship, preparing a business feasibility study, market information for new ventures, and funding sources. Prerequisites: Restricted to Graduate Students only.

College of Music | Music | Music Entrepreneurship

MUSC-5988 (3) The Entrepreneurial Artist

Learn the core principles of entrepreneurship, such as idea formation, venture models, opportunity assessment, market analysis, and strategies for launching a venture, and apply them to their own entrepreneurial ideas. Lectures, projects, entrepreneur interviews, and case studies will culminate in a feasibility study for an original entrepreneurial concept. Recommended prereq., MUSC 4918. Same as MUSC 4998.

College of Music | Music | Music Entrepreneurship

MUSC-6041 (3) Orchestration since 1940

Studies significant and distinctive orchestration techniques of the 20th century, concentrating on works written since 1940. Restricted to doctoral students.

College of Music | Music | Theory and Composition

MUSC-6051 (3) Pedagogy of Music Theory

Studies methods and materials for teaching undergraduate music theory, aural skills, and analysis. Prereq., passed general written theory and aural skills prelim exam, or completed remediation.

[College of Music](#)
[Music](#)
[Theory and Composition](#)

MUSC-6113 (2) Foundations of Music Education

Surveys historical and philosophical bases of contemporary music education. Restricted to graduate students in music education. Offered fall only. Prerequisites: Restricted to Music or Music Education graduate students only.

[College of Music](#)
[Music](#)
[Music Education](#)

MUSC-6133 (2) Comprehensive Musicianship through Performance

Explores curricular models for music education. Emphasizes comprehensive musicianship and standards-based frameworks for curriculum and development. Restricted to graduate students in music education. Offered spring of even-numbered years.

[College of Music](#)
[Music](#)
[Music Education](#)

MUSC-6193 (1-3) Selected Studies in Music Education

May be repeated up to 12 total credit hours. Prereq., consent of instructor and music education chair. Prerequisites: Restricted to Music or Music Education graduate students only.

College of Music | Music | Music Education

MUSC-6203 (2) Psychology of Music Learning

Provides an overview of psychological concepts relevant to music teaching and learning. Topics include learning theories, selected individual difference variables (motivation, anxiety, creativity, and personality), physiological structures related to hearing, psychoacoustics, and approaches to examining musical ability (e.g. brain research, music aptitude, and skill acquisition). Restricted to graduate students. Offered spring only.

College of Music | Music | Music Education

MUSC-6213 (2) Assessment of Music Learning

Provides an overview of traditional and contemporary approaches to music assessment. Topics include psychometrics, standardized tests, test construction, grade reports, and student portfolios. Restricted to graduate students in music education. Offered spring of even-numbered years.

College of Music | Music | Music Education

MUSC-6223 (2) Sociology of Music Education

Studies sociological perspectives related to music education. Topics include functions and uses of music; teacher and student role/identity development; social aspects of music performance, and cultural perspectives on music learning. Recommended prereq., MUSC 6113. Restricted to graduate students in music education. Offered fall of even-numbered years. Prerequisites: Restricted to Graduate Students only.

College of Music | Music | Music Education

MUSC-6233 (2) Pedagogy of Music Teaching and Learning

Explores four topics (reflective/critical thinking, teacher effectiveness, cultural/program contexts, teachers' lives/career development) relevant to long-term teacher development. Includes individualized feedback on teaching. Open to graduate students in music education and performance-pedagogy. Offered spring of odd-numbered years. Restricted to MME+ students in their second or third year of the program. Recommended prereq., MUSC 6113 and/or significant teaching experience.

College of Music | Music | Music Education

MUSC-6325 (2) Seminar in Piano Literature

Provides an intensive study of a selected area of repertoire or history. May be repeated up to 6 total credit hours. Restricted to doctoral students or instructor consent required. Offered fall only. Prerequisites: Restricted to Graduate Students only.

College of Music | Music | Keyboard

MUSC-6801 (3) Advanced Topics in Music Theory

Intensive study of a specialized topic in theory and analysis. Students will be guided in critical reading and analysis, class presentations, and independent research. Prereqs., graduate preliminary exams passed, and 6 credit hours of graduate-level theory. Restricted to MUSD and MUAD students. Prerequisites: Restricted to Music (MUSD or MUAD) majors only.

College of Music | Music | Theory and Composition

MUSC-6822 (3) Advanced Studies in Musicology

Intensive study of a specialized topic in musicology. Students will be guided in critical reading, historical or ethnographic issues, analysis, oral presentations, and independent research. May be repeated up to 6 total credit hours. prereq., MUSC 5708. Restricted to MUAD or MUSD majors. Prerequisites: Restricted to Music (MUAD or MUSD) graduate students only.

College of Music | Music | Musicology

MUSC-7046 (3) Seminar in Jazz Literature

Provides advanced study in jazz literature and styles. Students present results of research on individually chosen topics or aspects of a topic central to the class. Requires class presentations and a major paper or project. May be repeated up to 6 total credit hours. Recommended prereqs., MUSC 5091 and 5642. Restricted to doctoral students. Offered every other year.

College of Music | Music | Choral and Instrumental Music

MUSC-7103 (3) Historical Research in Music Education

Topics include oral history, archival collections, data verification, and critiquing/publishing research. Students conduct one original research study. May be repeated up to 12 total credit hours. Restricted to doctoral students in music education. Offered spring of even-numbered years.

College of Music | Music | Music Education

MUSC-7113 (3) Quantitative Research in Music Education

Topics include sampling, questionnaire development, research design, intermediate and advanced statistics, presenting/publishing research, and research ethics. Students conduct an original research study. Restricted to doctoral students in music education. Offered fall of even-numbered years. Prerequisites: Restricted to Graduate Students only.

College of Music | Music | Music Education

MUSC-7138 (3) Contemporary Issues in College Teaching

Examines music teaching within colleges and universities, including the evolution of university music programs, undergraduate and graduate music curricula, music professors and their work, and sociopolitical issues. Offered spring of odd-numbered years.

College of Music | Music | Interdepartmental Courses

MUSC-7143 (3) Qualitative Research in Music Education

Topics include qualitative research traditions, site and participant selection, data collection and analysis methods, quality standards, and research ethics. Students conduct an original research study. Restricted to doctoral students in music education. Offered fall of odd-numbered years. Prerequisites: Restricted to Music (MMED or MUSD) graduate students only.

College of Music | Music | Music Education

MUSC-7203 (3) Doctoral Seminar in Music Education

Provides an advanced study of topics central to the music education profession. Requires class presentations and a major paper or project. Restricted to doctoral students in music education. Offered fall of even-numbered years. Prerequisites: Restricted to Music (MMED or MUSD) graduate students only.

College of Music | Music | Music Education

MUSC-7801 (3) Doctoral Seminar in Music Theory

Provides advanced study in theory. Students present results of research on individually chosen topics or aspects of a topic central to the class. Requires a major paper or project. Restricted to Music (MUSD) graduate students only. Prereq., passed general written theory and aural skills prelim exam, or completed remediation. Prerequisites: Restricted to Music (MUSD) graduate students only.

College of Music | Music | Theory and Composition

MUSC-7822 (3) Seminar in Musicology

Required of all musicology majors before completion of comprehensive examinations. A different research area is designated each semester. Restricted to MUSD majors. See also MUSC 7832. Offered fall only. Prerequisites: Restricted to Music (MUSD) graduate students only.

College of Music | Music | Musicology

MUSC-7832 (3) Seminar in Musicology

Required of all musicology majors before completion of comprehensive examinations. A different research area is designated each semester. See also MUSC 7822. Offered spring only.

MUSC-4031 (2) Jazz Arranging 1

Study of notation, score layout, transpositions, basic harmonic and melodic analysis, basic chord voicings, and composition for a small and large jazz ensemble. Use of notation software such as Finale or Sibelius. Prereqs., MUSC 2111 and 2131. Recommended prereq., MUSC 3081. Offered fall of odd-numbered years. Prerequisites: Restricted to College of Music undergraduate students only.

[College of Music](#) | [Music](#) | [Theory and Composition](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

MUSC-4041 (2) Orchestration

Studies advanced orchestration techniques through score analysis and student projects. Prereq., MUSC 2071 or instructor consent. Offered fall only. Prerequisites: Restricted to College of Music undergraduate students only.

[College of Music](#) [Music](#) [Theory and Composition](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

MUSC-4061 (2) Tonal Analysis

Surveys tonal analytical techniques and forms of tonal music, including binary forms, sonata forms, ternary forms, rondo (and others) through study of selected works from the 18th and 19th centuries. Prereqs., MUSC 2111 and 2131. Offered fall only. Prerequisites: Restricted to College of Music undergraduate students only.

[College of Music](#) [Music](#) [Theory and Composition](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

MUSC-4071 (2) Post-Tonal Theory and Analysis

Focus on theory and analysis of post-tonal literature pre-1945. Prereqs., MUSC 2111 and 2131. Offered every other fall. Prerequisites: Restricted to College of Music undergraduate students only.

[College of Music](#) [Music](#) [Theory and Composition](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

MUSC-4081 (3) Introduction to Music Technology

Topics include basic synthesis, musical instrument digital interface (MIDI) sequencing, and music notation by computer. Offered fall and spring. Prerequisites: Restricted to College of Music undergraduate students only.

[College of Music](#) | [Music](#) | [Theory and Composition](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

MUSC-4091 (2) Jazz Arranging 2

Continuation and expansion of studies in MUSC 4031. Survey and analysis of major composers and arrangers of the idiom. Course focuses on creating several arranging projects for a large jazz ensemble. Prereq., MUSC 4031. Recommended prereq., MUSC 3081. Restricted to College of Music majors only. Offered fall of even-numbered years. Prerequisites: Restricted to College of Music undergraduate students only.

MUSC-4101 (1-3) Theory and Aural Skills Review

Reviews tonal harmony, voice leading, and essential aural skills. Includes diatonic triads and seventh chords, modulation, chromaticism, and structural analysis of representative compositions. Prepares graduate students for more advanced work in music theory. Students may register for aural skills only (1 credit), theory only (2 credits), or both theory and aural skills (3 credits). May not be taken pass/fail. For graduate students only. Offered summer and fall. Prerequisites: Restricted to College of Music graduate students only.

[College of Music](#)
[Music](#)
[Theory and Composition](#)

MUSC-4111 (2) Composing at the Computer

Discover strategies and techniques for generating and manipulating sound at the computer. Student projects will include compositions, soundscapes, ambient environments, and soundtracks for multimedia. Available to students without prior experience with computer music or composition. Prereq., MUSC 4081. Prerequisites: Restricted to College of Music undergraduate students only.

[College of Music](#)
[Music](#)
[Theory and Composition](#)

MUSC-4121 (3) Topics in Music Technology

Exploration of issues, techniques, and tools of music technology. Topics vary from term to term and may include: interactive systems for performance; teaching and learning; computer music instrument design; digital synthesis and signal processing; music in intermedia; sound design and analysis. Lectures on work sessions will support student projects. May be repeated up to 9 total credit hours. Prereq., MUSC 4081. Prerequisites: Restricted to College of Music undergraduate students only.

[College of Music](#)
[Music](#)
[Theory and Composition](#)

MUSC-4168 (3) World Music Theories

Examines music and social elements, rules, and concepts that musicians use to structure and synthesize musical sound, with emphasis on music practices and pedagogies from a variety of world traditions; observing shared principles and making cross-cultural comparisons and investigating a shared (not universal) discourse as well as resources for a new pedagogy that supports the substantive study of global musics. Recommended prereqs., MUSC 2772 or 2782 or 4112. Same as MUSC 5168. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) College of Music majors only.

College of Music | Music | Theory and Composition

MUSC-4191 (2) Advanced Recording

Study of advanced recording techniques and concepts beyond those covered in MUSC 2091 involving multiple microphones for ensemble concerts and recording sessions within and outside of the College of Music. Prereq., MUSC 2091. Restricted to College of Music majors only. Offered spring of even-numbered years. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Theory and Composition

MUSC-5011 (2) 16th Century Counterpoint

Provides a stylistic study of main contrapuntal genres of the period including FREE, TWO- and THREE-part imitative counterpoint in the style of Palestrina. Provides a foundation in species counterpoint, working towards free counterpoint; stresses analysis and composing in 16th-century styles. Prerequisites: Restricted to College of Music graduate students only.

College of Music | Music | Theory and Composition

MUSC-5021 (2) 18th Century Counterpoint

Provides a stylistic study of main contrapuntal genres of the period including INVENTION, SUITE, and FUGUE. Provides a foundation in species counterpoint; stresses analysis and composing in the styles. Prerequisites: Restricted to College of Music graduate students only.

College of Music | Music | Theory and Composition

MUSC-5041 (2) Advanced Orchestration

Provides an advanced study of orchestration techniques through score analysis and student projects. Offered fall only.

College of Music | Music | Theory and Composition

MUSC-5061 (3) Advanced Tonal Analysis

Surveys tonal analytical techniques. Prereq., passed general written theory and aural skills prelim exam, or completed remediation. Offered fall only. Prerequisites: Restricted to Graduate Students only.

College of Music | Music | Theory and Composition

MUSC-5071 (3) Post-tonal Theory and Analysis I

Focuses on theory and analysis of post-tonal literature pre-1945. Prereq., passed general written theory and aural skills prelim exam, or completed remediation. Offered fall and every other spring. Prerequisites: Restricted to Graduate Students only.

College of Music | Music | Theory and Composition

MUSC-5081 (3) Applications in Music Technology

Presents advanced strategies for applying computer technology in several musical disciplines. Emphasizes the use of technology in composition, music theory, and music education. Offered fall only. Prerequisites: Restricted to Graduate Students only.

College of Music | Music | Theory and Composition

MUSC-5091 (3) Contemporary Jazz Theory

Studies contemporary approaches to jazz improvisation and composition. Analysis of innovative composition and improvisation and strategies for integration of the material into a personal vocabulary are explored. Prereq., MUSC 3081. Offered spring only.

College of Music | Music | Theory and Composition

MUSC-5121 (3) Advanced Topics in Music Technology

Conducts advanced research in techniques and tools of music technology. Topics vary from term to term and may include: user interfaces for computer music; advanced sound design; digital modeling of acoustic sounds; computer-aided analysis of sound; modeling music intelligence in real time. Lectures and work sessions will support student projects. May be repeated up to 9 total credit hours. Prereq., MUSC 5081 or instructor consent required.

College of Music | Music | Theory and Composition

MUSC-5151 (3) Topics in Music Analysis

Analytical study of a specific topic to be determined by the instructor (e.g., German Lieder, Bartok quartets, tonal rhythm, Schenker, etc). Study published analyses representing a variety of methodologies, and produce original analyses. Prereq., passed general written theory and aural skills prelim exam, or completed remediation. Recommended prereqs., MUSC 5061, 5071, as appropriate to topic or instructor consent. Prerequisites: Restricted to College of Music graduate students only.

College of Music | Music | Theory and Composition

MUSC-5168 (3) World Music Theories

Examines music and social elements, rules, and concepts that musicians use to structure and synthesize musical sound, with emphasis on music practices and pedagogies from a variety of world traditions; observing shared principles and making cross-cultural comparisons and investigating a shared (not universal) discourse as well as resources for a new pedagogy that supports the substantive study of global musics. Same as MUSC 4168. Prerequisites: Restricted to College of Music graduate students only.

College of Music | Music | Theory and Composition

MUSC-6041 (3) Orchestration since 1940

Studies significant and distinctive orchestration techniques of the 20th century, concentrating on works written since 1940. Restricted to doctoral students.

College of Music | Music | Theory and Composition

MUSC-6051 (3) Pedagogy of Music Theory

Studies methods and materials for teaching undergraduate music theory, aural skills, and analysis. Prereq., passed general written theory and aural skills prelim exam, or completed remediation.

College of Music | Music | Theory and Composition

MUSC-6801 (3) Advanced Topics in Music Theory

Intensive study of a specialized topic in theory and analysis. Students will be guided in critical reading and analysis, class presentations, and independent research. Prereq., graduate preliminary exams passed, and 6 credit hours of graduate-level theory. Restricted to MUSD and MUAD students. Prerequisites: Restricted to Music (MUSD or MUAD) majors only.

College of Music | Music | Theory and Composition

MUSC-7801 (3) Doctoral Seminar in Music Theory

Provides advanced study in theory. Students present results of research on individually chosen topics or aspects of a topic central to the class. Requires a major paper or project. Restricted to Music (MUSD) graduate students only. Prereq., passed general written theory and aural skills prelim exam, or completed remediation. Prerequisites: Restricted to Music (MUSD) graduate students only.

 [Interdepartmental Courses](#)

MUSC-4078 (1) Piano Technician for Pianists

Familiarizes pianists with the development of the modern grand piano, its construction, and the proper terminology of parts and specifications. Trains pianists in minor repairs and adjustments of the grand piano action, and in minor tuning tasks. Recommended restriction, piano majors. Restricted to College of Music majors only. Same as MUSC 5078. Prerequisites: Restricted to College of Music undergraduate students only.

[College of Music](#) |
 [Music](#) |
 [Interdepartmental Courses](#)

MUSC-4288 (2-3) Macintosh-based Web Server Fundamentals for Musicians and Educators

Designed for music students. Teaches concepts and skills necessary to develop, host, and maintain Macintosh-based web servers and to create and serve multimedia files including video, MP3, MIDI, and PDF.

College of Music | Music | Interdepartmental Courses

MUSC-4608 (1) Advanced Studies in the Alexander Technique

Continue of MUSC 2608 with greater concentration on utilizing Alexander principles in specialized activity. Prereq., MUSC 2608 or instructor consent. Prerequisites: Requires prerequisite course of MUSC 2608. Restricted to College of Music undergraduate students only.

College of Music | Music | Interdepartmental Courses

MUSC-5078 (1) Piano Technician for Pianists

Same as MUSC 4078. Prerequisites: Restricted to Graduate Students only.

College of Music | Music | Interdepartmental Courses

MUSC-5608 (1) Graduate Studies in the Alexander Technique

Study of the relationship of kinesthetic perception and postural reflexes to physical coordination in performance. Analysis and research regarding Alexander's principles. Prerequisites: Restricted to College of Music graduate students only.

College of Music | Music | Interdepartmental Courses

MUSC-5708 (2) Introduction to Music Bibliography and Research

Explores basic informational sources about music and musicians; a study of bibliographic forms, research, and writing techniques employed in music research papers, theses, and dissertations. Required in all master's degree programs. Prerequisites: Restricted to Graduate Students only.

College of Music | Music | Interdepartmental Courses

MUSC-5808 (1) Advanced Alexander Technique for Graduate Students

Continues investigation of the benefits of Alexander's principles regarding mind-body awareness begun in MUSC 5608. Increased emphasis on utilizing principles in specialized activity. Analysis and research regarding musical activities. May be repeated up to 3 total credit hours. Prereq., MUSC 5608 or instructor consent.

College of Music | Music | Interdepartmental Courses

MUSC-7138 (3) Contemporary Issues in College Teaching

Examines music teaching within colleges and universities, including the evolution of university music programs, undergraduate and graduate music curricula, music professors and their work, and sociopolitical issues. Offered spring of odd-numbered years.

MUSC-2918 (2) Building Your Music Career

Students acquire the practical skills they need to build their career as professional musicians, as well as explore the many options for putting their music education to work in the marketplace.

Students will also explore the state of live music-making today and explore ways to maintain relevance for themselves and their art in an ever-changing world. Formerly MUSC 4918. Restricted to College of Music majors only. Prerequisites: Restricted to College of Music undergraduate students only.

[College of Music](#) | [Music](#) | [Music Entrepreneurship](#)

MUSC-4908 (1-3) Internship in Music Business

Engage with music/music business organizations in the community (for profit or non-profit) to pursue specific tasks or projects relevant to the student's career goals. A minimum of 48 hours is required per semester for one credit. May be repeated up to 3 total credit hours. Recommended prereq., Masters standing. MUSC 4908 and 5908 are the same course. Prerequisites: Restricted to College of Music undergraduate students only.

[College of Music](#) | [Music](#) | [Music Entrepreneurship](#)

MUSC-4958 (2) Community Performances

Designed for the aspiring professional performer. Through classroom theory and off-campus application, acquire skills in programming for and communicating with diverse audiences, marketing & PR, and new paradigms of concert presentation. Will result in an actual musical presentation in the community. Restricted to College of Music majors only. Prerequisites: Restricted to College of Music undergraduate students only.

[College of Music](#) | [Music](#) | [Music Entrepreneurship](#)

MUSC-4988 (3) The Entrepreneurial Artist

Learn the core principles of entrepreneurship, such as idea formation, venture models, opportunity assessment, market analysis, and strategies for launching a venture, and apply them to their own entrepreneurial ideas. Lectures, projects, entrepreneur interviews, and case studies will culminate in a feasibility study for an original entrepreneurial concept. Recommended prereq., MUSC 4918. Same as MUSC 5988.

College of Music | Music | Music Entrepreneurship

MUSC-5908 (1-3) Internship in Music Business

Engage with music/music business organizations in the community (for profit or non-profit) to pursue specific tasks or projects relevant to the student's career goals. A minimum of 48 hours is required per semester for one credit. May be repeated up to 3 total credit hours. Recommended prereq., Masters standing. MUSC 4908 and 5908 are the same course. Prerequisites: Restricted to College of Music undergraduate students only.

College of Music | Music | Music Entrepreneurship

MUSC-5968 (2) Entrepreneurial Ventures in the Arts

Previously Topics in Arts Entrepreneurship, this course prepares students to evaluate opportunities in their specific arts field by analyzing existing arts organizations and then applying entrepreneurial concepts to create new enterprises. Topics for research and discussion include current issues in the arts, introduction to entrepreneurship, preparing a business feasibility study, market information for new ventures, and funding sources. Prerequisites: Restricted to Graduate Students only.

College of Music | Music | Music Entrepreneurship

MUSC-5988 (3) The Entrepreneurial Artist

Learn the core principles of entrepreneurship, such as idea formation, venture models, opportunity assessment, market analysis, and strategies for launching a venture, and apply them to their own entrepreneurial ideas. MUSC-5151 (3) Topics in Music Analysis

Analytical study of a specific topic to be determined by the instructor (e.g., German Lieder, Bartok quartets, tonal rhythm, Schenker, etc). Study published analyses representing a variety of methodologies, and produce original analyses. Prereq., passed general written theory and aural skills prelim exam, or completed remediation. Recommended prereqs., MUSC 5061, 5071, as appropriate to topic or instructor consent. Prerequisites: Restricted to College of Music graduate students only.

[College of Music](#) | [Music](#) | [Theory and Composition](#)

MUSC-5156 (2) Symposium in Choral Musi.

Provides an advanced study of choral repertoire by style period. Required of all choral graduate students for a minimum of two semesters. Prerequisites: Restricted to College of Music graduate students only.

[College of Music](#) | [Music](#) | [Choral and Instrumental Music](#)

MUSC-5168 (3) World Music Theories

Examines music and social elements, rules, and concepts that musicians use to structure and synthesize musical sound, with emphasis on music practices and pedagogies from a variety of world traditions; observing shared principles and making cross-cultural comparisons and investigating a shared (not universal) discourse as well as resources for a new pedagogy that supports the substantive study of global musics. Same as MUSC 4168. Prerequisites: Restricted to College of Music graduate students only.

[College of Music](#) | [Music](#) | [Theory and Composition](#)

MUSC-5183 (2) Research in Music Teaching

Introduces basic descriptive, experimental, and qualitative research methods, including sampling, design, data collection, and analysis. Students review published music research and conduct one

original research study. Restricted to graduate students in music education. Offered fall only. Prerequisites: Restricted to Music or Music Education graduate students only.

College of Music | Music | Music Education

PMUS-5184 (1) Graduate Voice Class

Teaches solo and choral singing and vocal modeling. Designed for choral and music education graduate students. Prereq., instructor consent. Prerequisites: Restricted to Graduate Students only.

College of Music | Music | Voice

MUSC-5215 (1-2) Studies in Piano Teaching

Studies the practical aspects and techniques for teaching piano at the intermediate and advanced levels in pre-college and college settings, as well as teaching group piano at the college level.

May be repeated up to 2 total credit hours. Recommended prereqs., MUSC 5305 and 5315. Restricted to graduate piano majors. Prerequisites: Restricted to Graduate Students only.

College of Music | Music | Keyboard

EMUS-5217 (1) University Singers

Prerequisites: Restricted to Graduate Students only.

College of Music | Music Ensembles

EMUS-5227 (1) University Choir

Prerequisites: Restricted to Graduate Students only.

College of Music | Music Ensembles

MUSC-5246 (3) Jazz Improvisation and Analysis

A study of improvisation through melodic and harmonic analysis of jazz compositions, transcriptions, and the study of historic jazz solos as played by jazz masters. Recommended prereq., MUSC 3071. Offered fall only. Prerequisites: Restricted to Graduate Students only.

College of Music | Music | Choral and Instrumental Music

MUSC-5255 (2) Service Playing Techniques

Same as MUSC 4255.

College of Music | Music | Keyboard

MUSC-5256 (3) Jazz Studies Administration and Pedagogy

Studies the organization and administration of collegiate jazz programs. Topics include curriculum, program philosophy, teaching techniques, funding, teacher training, and evaluation. Recommended prereq., MUSC 3253. Offered fall only. Prerequisites: Restricted to College of Music graduate students only.

College of Music | Music | Choral and Instrumental Music

MUSC-5273 (2) Comprehensive String Pedagogy

Comparative study and application of the principles of string teaching. In-depth analysis of individual instrument pedagogy and application to advanced studio and class teaching. Historical survey of major violin, viola, cello, and double bass pedagogues. Includes apprenticeship teaching. Restricted to graduate students. Offered fall of odd-numbered years. Prerequisites: Restricted to Graduate Students only.

College of Music | Music | Music Education

MUSC-5285 (3) Organ Survey

Same as MUSC 4285.

College of Music | Music | Keyboard

MUSC-5295 (3) Organ Survey

Same as MUSC 4295.

College of Music | Music | Keyboard

EMUS-5297 (1) Wind Symphony

2.0 credit hours offered CE Aspen Music School only. Prerequisites: Restricted to Graduate Students only.

College of Music | Music Ensembles

MUSC-5305 (2) Piano Pedagogy Group Techniques

Discusses materials and techniques for teaching beginning piano students of various ages in studio and class settings. Special attention given to adult classes. Includes an introduction to educational technology used in group instruction. Offered fall of odd-numbered years.

College of Music | Music | Keyboard

EMUS-5307 (1) Band

Prerequisites: Restricted to Graduate Students only.

College of Music | Music Ensembles

MUSC-5313 (3) Teaching Choral Music

Restricted to graduate students in music education. Same as MUSC 4313. Offered spring only.

College of Music | Music | Music Education

MUSC-5315 (2) Piano Pedagogy: Intermediate Literature

Surveys repertoire at the intermediate level and discusses teaching techniques. Explores issues related to intermediate and advanced piano performance, such as performance anxiety, physical and psychological well-being of the performer, and the development of technique. Introduces educational technology relevant to intermediate teaching. Offered spring of even-numbered years.

College of Music | Music | Keyboard

MUSC-5325 (2) Keyboard Literature 1

Examines areas of style, genre, and performance practice in selected keyboard music from 1600 to 1830. Emphasizes student presentation of specific topic areas. Offered fall semester of even-numbered years. Prerequisites: Restricted to Graduate Students only.

College of Music | Music | Keyboard

EMUS-5327 (1) Symphony Orchestra

2.0 hours offered CE Aspen Music School only. Prerequisites: Restricted to Graduate Students only.

College of Music | Music Ensembles

MUSC-5335 (2) Keyboard Literature 2

Examines areas of style, genre, and performance practice in selected areas of keyboard music from 1830 to the present. Emphasizes student presentation of specific topic areas. Offered spring semester of odd-numbered years.

College of Music | Music | Keyboard

MUSC-5336 (2) Brass Pedagogy

Analyzes pedagogical techniques and philosophies of teaching brass instruments, and examines materials. Offered every other spring semester.

College of Music | Music | Choral and Instrumental Music

EMUS-5337 (1) Chamber Orchestra

College of Music | Music Ensembles

MUSC-5345 (2) Research: Piano Literature and Pedagogy

Looks at individual or group research related to piano pedagogy or literature for piano. May be repeated upto 12 total credit hours. Prerequisites: Restricted to Graduate Students only.

College of Music | Music | Keyboard

MUSC-4078 (1) Piano Technician for Pianists

Familiarizes pianists with the development of the modern grand piano, its construction, and the proper terminology of parts and specifications. Trains pianists in minor repairs and adjustments of the grand piano action, and in minor tuning tasks. Recommended restriction, piano majors. Restricted to College of Music majors only. Same as MUSC 5078. Prerequisites: Restricted to College of Music undergraduate students only.

MUSC-5346 (3) Woodwind Pedagogy

Provides the knowledge and skills to teach woodwind instruments in both private studio and collegiate class settings. Considers pedagogical techniques addressing all levels of instruction.

Prerequisites: Restricted to College of Music graduate students only.

[College of Music](#) | [Music](#) | [Choral and Instrumental Music](#)

MUSC-5356 (2) Jazz Studies Practicum

Studies strategies for developing and implementing academic programs in jazz studies. Includes demonstration teaching by class members. Recommended prereq., MUSC 5256. Offered Spring only. Prerequisites: Restricted to College of Music graduate students only.

[College of Music](#) | [Music](#) | [Choral and Instrumental Music](#)

EMUS-5357 (1) Harp Ensemble

[College of Music](#) | [Music Ensembles](#)

MUSC-5365 (2) Advanced Accompanying

An in-depth study of both vocal and instrumental collaborative repertoire in individually assigned projects, coached by collaborative faculty and others. May be repeated up to 12 total credit hours.

Prerequisites: Restricted to Graduate Students only.

[College of Music](#) | [Music](#) | [Keyboard](#)

EMUS-5367 (1) Early Music Ensembles

Prerequisites: Restricted to College of Music graduate students only.

College of Music | Music Ensembles

MUSC-5375 (2) Opera Coaching for Pianists

Teaches skills for opera coaches and rehearsal pianists. May be repeated up to 12 total credit hours. Prerequisites: Restricted to Graduate Students only.

College of Music | Music | Keyboard

EMUS-5377 (1) Chamber Music-Brass

College of Music | Music Ensembles

EMUS-5387 (1) Chamber Music-Strings

College of Music | Music Ensembles

MUSC-5405 (2) Basso-Continuo Accompaniment

Same as MUSC 4405. Prerequisites: Restricted to College of Music graduate students only.

College of Music | Music | Keyboard

EMUS-5407 (1) Chamber Music-Woodwinds

College of Music | Music Ensembles

EMUS-5417 (1) Percussion Ensemble

Prerequisites: Restricted to College of Music graduate students only.

College of Music | Music Ensembles

MUSC-5425 (2) Collaborative Literature for Piano with Winds, Brass, and Percussion

Study of all forms of wind, brass and percussion repertoire involving collaboration with piano including sonatas, duos, short pieces and concerti. Focus will be on standard literature and reading and listening assignments will be supplemented by in-class performances and presentations. Prereq., instructor consent. Offered fall only.

College of Music | Music | Keyboard

EMUS-5427 (1) Jazz Ensemble

Students perform in a principal format for jazz expression. The large ensemble setting affords the opportunity to expand knowledge of jazz styles and repertoire as well as refine reading skills and improve spontaneous interaction with other musicians. Prereq., previous experience in large jazz ensembles. Recommended EMUS 3427 or equiv. Prerequisites: Restricted to College of Music graduate students only.

College of Music | Music Ensembles

MUSC-5435 (2) Collaborative Literature for Piano with Strings

Study of all forms string repertoire involving collaboration with piano including sonatas, duos, short pieces and concerti. Focus will be on standard literature and reading and listening assignments will be supplemented by in-class performances and presentations. Prereq., instructor consent. Offered spring only.

College of Music | Music | Keyboard

EMUS-5437 (1) Jazz Combo

Allows students the opportunity to perform in the principal format for jazz expression. The small group setting affords performers the opportunity to refine improvisation skills, improve spontaneous interaction with musicians and expand knowledge of jazz styles and repertoire. Prereq., previous performance experience in small jazz combos. Recommended EMUS 3437, or equiv. Prerequisites: Restricted to College of Music graduate students only.

College of Music | Music Ensembles

MUSC-5443 (3) Teaching Instrumental Music

For graduate music education majors. Same as MUSC 4443. Offered spring only.

College of Music | Music | Music Education

MUSC-5444 (2) Vocal Pedagogy

In depth study of the physiology, acoustics, and health aspects of the singing voice. Recommended for all graduate students in voice. Prerequisites: Restricted to Graduate Students only.

College of Music | Music | Voice

EMUS-5447 (1) Guitar Ensemble

Prerequisites: Restricted to College of Music graduate students only.

College of Music | Music Ensembles

MUSC-5454 (2) Repertory for Young Voices

Survey of the solo repertoire for young voices, the physiological aspects of mutational voices, techniques of vocalizing young voices, and class voice procedure. Prerequisites: Restricted to Graduate Students only.

College of Music | Music | Voice

EMUS-5457 (1) Electronic Music Ensemble

Explores performance, composition, and the history of electronic music, including 20th century art music on through to electronic music in contemporary popular culture. Prerequisites: Restricted to College of Music graduate students only.

College of Music | Music Ensembles

MUSC-5464 (2) French Song Literature

Provides an extensive analytical and historical discussion of French song literature styles, from the 12th century to the present.

College of Music | Music | Voice

EMUS-5467 (1) World Music Ensemble

Study and performance of music's of minority cultures in the United States, including Native American, African American, and Asian American, as well as music from the mother cultures of these groups. Prereq., graduate standing or instructor consent. Same as EMUS 1467 and 3467. Prerequisites: Restricted to College of Music graduate students only.

College of Music | Music Ensembles

EMUS-5477 (1) Vocal Jazz Ensemble

Study and performance of various vocal jazz styles, development of improvisational techniques, and investigation of the challenges of music making in a small group setting. Same as EMUS 1477 and EMUS 3477.

College of Music | Music Ensembles

MUSC-5484 (2) Graduate Seminar in Vocal Pedagogy

A thorough investigation of the challenges of studio voice pedagogy, including corrective techniques, psychological philosophies, and video analysis of student teaching. Examination and evaluation of comparative methodologies of vocal technique. Prereq., MUSC 5444 or instructor consent required.

College of Music | Music | Voice

PMUS-5497 (1-2) Vocal Repertoire Coaching

Group coaching class to prepare for voice recitals as well as to learn vocal repertoire including historical background, composers, styles, and poetic interpretation. Class may fulfill voice literature requirements when appropriate classes are not offered. Also available: weekly individual coaching to prepare for voice recitals and other projects. Diction, musical styles, and interpretation (music and text) are the main focus of this course. May be repeated up to 12 credit hours. for graduate voice students and collaborative pianists. Prerequisites: Restricted to Graduate Students only.

College of Music | Music | Voice

MUSC-4193 (1) Student Teaching Seminar

Required for all music student teachers. Addresses topics of concern to beginning teachers including classroom management, interpersonal skills, legal issues, job search strategies, and teaching portfolio development. Prereq., MUSC 4103. Prerequisites: Restricted to College of Music undergraduate students only.

MUSC-5078 (1) Piano Technician for Pianists

Same as MUSC 4078. Prerequisites: Restricted to Graduate Students only.

[College of Music](#) [Music](#) [Interdepartmental Courses](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

MUSC-5081 (3) Applications in Music Technology

Presents advanced strategies for applying computer technology in several musical disciplines. Emphasizes the use of technology in composition, music theory, and music education. Offered fall only. Prerequisites: Restricted to Graduate Students only.

[College of Music](#) [Music](#) [Theory and Composition](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

MUSC-5091 (3) Contemporary Jazz Theory

Studies contemporary approaches to jazz improvisation and composition. Analysis of innovative composition and improvisation and strategies for integration of the material into a personal vocabulary are explored. Prereq., MUSC 3081. Offered spring only.

[College of Music](#) | [Music](#) | [Theory and Composition](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

MUSC-5103 (3) Teaching General Music

Provides an in-depth examination of teaching and learning processes in the elementary general music classroom, based on the integration of child development and musical development theories with content and delivery skills appropriate for K-5 general music classrooms. Students implement and evaluate music instruction, design curricular projects, and build a repertoire of vocal, instrumental, and speech-based arrangements. Restricted to graduate students in music education. Offered fall only. Prerequisites: Restricted to Music or Music Education graduate students only.

[College of Music](#) | [Music](#) | [Music Education](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

MUSC-5106 (2) Guitar Literature

An analytical and historical survey of the repertory of the guitar and its antecedents from the renaissance to the present day. For graduate students. Same as MUSC 4106.

[College of Music](#) [Music](#) [Choral and Instrumental Music](#)

University of Colorado Boulder

© Regents of the University of Colorado

Number

MUSC-5882 (3) Studies in 18th and 19th Century Music

Meets as a seminar and examines selected topics in Classic and Romantic music, 1750-1900. Topics vary from year to year.

College of Music | Music | Musicology

MUSC-5892 (3) Latin American Music

Restricted to graduate students. Same as MUSC 4892.

College of Music | Music | Musicology

MUSC-5908 (1-3) Internship in Music Business

Engage with music/music business organizations in the community (for profit or non-profit) to pursue specific tasks or projects relevant to the student's career goals. A minimum of 48 hours is required per semester for one credit. May be repeated up to 3 total credit hours. Recommended prereq., Masters standing. MUSC 4908 and 5908 are the same course. Prerequisites:

Restricted to College of Music undergraduate students only.

College of Music | Music | Music Entrepreneurship

MUSC-5968 (2) Entrepreneurial Ventures in the Arts

Previously Topics in Arts Entrepreneurship, this course prepares students to evaluate opportunities in their specific arts field by analyzing existing arts organizations and then applying entrepreneurial concepts to create new enterprises. Topics for research and discussion include current issues in the arts, introduction to entrepreneurship, preparing a business feasibility study, market

information for new ventures, and funding sources. Prerequisites: Restricted to Graduate Students only.

College of Music | Music | Music Entrepreneurship

MUSC-5988 (3) The Entrepreneurial Artist

Learn the core principles of entrepreneurship, such as idea formation, venture models, opportunity assessment, market analysis, and strategies for launching a venture, and apply them to their own entrepreneurial ideas. Lectures, projects, entrepreneur interviews, and case studies will culminate in a feasibility study for an original entrepreneurial concept. Recommended prereq., MUSC 4918. Same as MUSC 4998.

College of Music | Music | Music Entrepreneurship

MUSC-6041 (3) Orchestration since 1940

Studies significant and distinctive orchestration techniques of the 20th century, concentrating on works written since 1940. Restricted to doctoral students.

College of Music | Music | Theory and Composition

MUSC-6051 (3) Pedagogy of Music Theory

Studies methods and materials for teaching undergraduate music theory, aural skills, and analysis. Prereq., passed general written theory and aural skills prelim exam, or completed remediation.

College of Music | Music | Theory and Composition

MUSC-6113 (2) Foundations of Music Education

Surveys historical and philosophical bases of contemporary music education. Restricted to graduate students in music education. Offered fall only. Prerequisites: Restricted to Music or Music Education graduate students only.

College of Music | Music | Music Education

MUSC-6133 (2) Comprehensive Musicianship through Performance

Explores curricular models for music education. Emphasizes comprehensive musicianship and standards-based frameworks for curriculum and development. Restricted to graduate students in music education. Offered spring of even-numbered years.

College of Music | Music | Music Education

MUSC-6193 (1-3) Selected Studies in Music Education

May be repeated up to 12 total credit hours. Prereq., consent of instructor and music education chair. Prerequisites: Restricted to Music or Music Education graduate students only.

College of Music | Music | Music Education

MUSC-6203 (2) Psychology of Music Learning

Provides an overview of psychological concepts relevant to music teaching and learning. Topics include learning theories, selected individual difference variables (motivation, anxiety, creativity, and personality), physiological structures related to hearing, psychoacoustics, and approaches to examining musical ability (e.g. brain research, music aptitude, and skill acquisition). Restricted to graduate students. Offered spring only.

College of Music | Music | Music Education

MUSC-6213 (2) Assessment of Music Learning

Provides an overview of traditional and contemporary approaches to music assessment. Topics include psychometrics, standardized tests, test construction, grade reports, and student portfolios. Restricted to graduate students in music education. Offered spring of even-numbered years.

College of Music | Music | Music Education

MUSC-6223 (2) Sociology of Music Education

Studies sociological perspectives related to music education. Topics include functions and uses of music; teacher and student role/identity development; social aspects of music performance, and cultural perspectives on music learning. Recommended prereq., MUSC 6113. Restricted to graduate students in music education. Offered fall of even-numbered years. Prerequisites: Restricted to Graduate Students only.

College of Music | Music | Music Education

MUSC-6233 (2) Pedagogy of Music Teaching and Learning

Explores four topics (reflective/critical thinking, teacher effectiveness, cultural/program contexts, teachers' lives/career development) relevant to long-term teacher development. Includes individualized feedback on teaching. Open to graduate students in music education and performance-pedagogy. Offered spring of odd-numbered years. Restricted to MME+ students in their second or third year of the program. Recommended prereq., MUSC 6113 and/or significant teaching experience.

College of Music | Music | Music Education

MUSC-6325 (2) Seminar in Piano Literature

Provides an intensive study of a selected area of repertoire or history. May be repeated up to 6 total credit hours. Restricted to doctoral students or instructor consent required. Offered fall only. Prerequisites: Restricted to Graduate Students only.

College of Music | Music | Keyboard

MUSC-6801 (3) Advanced Topics in Music Theory

Intensive study of a specialized topic in theory and analysis. Students will be guided in critical reading and analysis, class presentations, and independent research. Prereqs., graduate preliminary exams passed, and 6 credit hours of graduate-level theory. Restricted to MUSD and MUAD students. Prerequisites: Restricted to Music (MUSD or MUAD) majors only.

College of Music | Music | Theory and Composition

MUSC-6822 (3) Advanced Studies in Musicology

Intensive study of a specialized topic in musicology. Students will be guided in critical reading, historical or ethnographic issues, analysis, oral presentations, and independent research. May be repeated up to 6 total credit hours. prereq., MUSC 5708. Restricted to MUAD or MUSD majors. Prerequisites: Restricted to Music (MUAD or MUSD) graduate students only.

College of Music | Music | Musicology

TMUS-6947 (1) Candidate for Master of Music

Prerequisites: Restricted to Graduate Students only.

College of Music | Thesis Music

TMUS-6956 (2) Master's Thesis

Prerequisites: Restricted to Graduate Students only.

College of Music | Thesis Music

TMUS-6957 (2) Master's Thesis 2

Prerequisites: Restricted to Graduate Students only.

College of Music | Thesis Music

MUSC-7046 (3) Seminar in Jazz Literature

Provides advanced study in jazz literature and styles. Students present results of research on individually chosen topics or aspects of a topic central to the class. Requires class presentations and a major paper or project. May be repeated up to 6 total credit hours. Recommended prereqs., MUSC 5091 and 5642. Restricted to doctoral students. Offered every other year.

College of Music | Music | Choral and Instrumental Music

MUSC-7103 (3) Historical Research in Music Education

Topics include oral history, archival collections, data verification, and critiquing/publishing research. Students conduct one original research study. May be repeated up to 12 total credit hours. Restricted to doctoral students in music education. Offered spring of even-numbered years.

College of Music | Music | Music Education

MUSC-7113 (3) Quantitative Research in Music Education

Topics include sampling, questionnaire development, research design, intermediate and advanced statistics, presenting/publishing research, and research ethics. Students conduct an original research study. Restricted to doctoral students in music education. Offered fall of even-numbered years. Prerequisites: Restricted to Graduate Students only.

College of Music | Music | Music Education

MUSC-7138 (3) Contemporary Issues in College Teaching

Examines music teaching within colleges and universities, including the evolution of university music programs, undergraduate and graduate music curricula, music professors and their work, and sociopolitical issues. Offered spring of odd-numbered years.

College of Music | Music | Interdepartmental Courses

MUSC-7143 (3) Qualitative Research in Music Education

Topics include qualitative research traditions, site and participant selection, data collection and analysis methods, quality standards, and research ethics. Students conduct an original research study. Restricted to doctoral students in music education. Offered fall of odd-numbered years. Prerequisites: Restricted to Music (MMED or MUSD) graduate students only.

College of Music | Music | Music Education

MUSC-7203 (3) Doctoral Seminar in Music Education

Provides an advanced study of topics central to the music education profession. Requires class presentations and a major paper or project. Restricted to doctoral students in music education. Offered fall of even-numbered years. Prerequisites: Restricted to Music (MMED or MUSD) graduate students only.

MILR-3052 (3) Military Operations and Training 1

Further explores the theory of managing and leading small military units with an emphasis on practical applications at the squad and platoon levels. Students examine various leadership styles and techniques as they relate to advanced small unit tactics. Familiarizes students with a variety of topics such as cartography, land navigation, field craft, and weapons systems. Involves multiple, evaluated leadership opportunities in field settings and hands-on experience with actual military equipment. Students are given maximum leadership opportunities in weekly labs. Prereq., consent of the Professor of Military Science.

[Cross College Programs](#) [Reserve Office Training Corp](#) [Military Science \(U.S. Army\)](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

MILR-3062 (3) Military Operations and Training 2

Studies theoretical and practical applications of small unit leadership principles. Focuses on managing personnel and resources, the military decision making process, the operations order, and oral communications. Exposes the student to tactical unit leadership in a variety of environments with a focus on preparation for the summer advance camp experience. Prereq., consent of the Professor of Military Science.

AIRR-4010 (3) National Security Affairs/Preparation for Active Duty

Two 1 1/2-hour seminars and one 2-hour lab per week. Studies U.S. national security policy which examines the formulation, organization, and implementation of national security policy; context of national security; evolution of strategy; management of conflict; and civil-military interaction. Also includes blocks of instruction on the military profession/officership, the military justice system, and communicative skills. Provides future Air Force officers with the background of U.S. national security policy so they can effectively function in today's Air Force.

[Cross College Programs](#) [Reserve Officer Training Corp](#) [Air Force Aerospace Studies](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

NAVR-4010 (3) Leadership and Management 1

Comprehensively studies organizational leadership. Emphasizes motivation, communication, empowerment, and needs of subordinates. Studies the role of professional and personal ethics in organizational leadership.

[Cross College Programs](#) | [Reserve Office Training Corp](#) | [Naval Science](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

AIRR-4020 (3) National Security Forces in Contemporary American Society 2

Two 1 1/2-hour seminars and one 2-hour lab per week. a continuation of AIRR 4010. Includes defense strategy conflict management, formulation/implementation of U.S. defense policy, and organizational factors and case studies in policy making, military law, uniform code of military justice, and communication skills.

[Cross College Programs](#) [Reserve Office Training Corp](#) [Air Force Aerospace Studies](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

NAVR-4020 (3) Leadership and Ethics

Studies the ethics and laws of armed conflict, analyzing the leadership responsibilities of officers in conflict. Studies the military justice system and Naval legal administrative procedures, comparing military law with civilian criminal and civil law. Defines the responsibilities of junior officers within the military justice system.

[Cross College Programs](#) | [Reserve Office Training Corp](#) | [Naval Science](#)

ATLS-4010 (3) Capstone Projects

The focus of this advanced practicum course is the development of an individual thesis project. Specific class sessions will feature a combination of lectures, demonstrations, guest speakers, lab sessions, and critiques. This course also entails group work, portfolio development, critical theoretical readings, and a significant written component. May be repeated up to 6 total credit hours. Prereqs., ATLS 2000, 3010, and 3020. Restricted to students with minor in Technology, Arts & Media (MTAM). Prerequisites: Restricted to students with minor in Technology, Arts, and Media (MTAM).

ATLS-4809 (3) Computer Animation

Develops a firm understanding of the general principles of computer animation. Lectures cover the creation of models, materials, textures, surfaces, and lighting. Path and key frame animation, particle dynamics, and rendering are introduced. Students are assigned a number of animation tutorials to carry out. CSCI 4809/5809 and ATLS 4809/5809 are all the same course.

ATLS-5150 (1) Managing Effectively in a Changing Telecommunications Environment

Provides students with an opportunity to join international managers and policy makers from around the world in an intensive seminar focused on the challenges of managing in a telecommunications environment in an era of technological change. Guest lecturers provide an effective overview of the cutting-edge issues managers face in telecom and technology companies around the world. TLEN 5150 and ATLS 5150 are the same course.

[Privacy](#) • [Legal & Trademarks](#)

ATLS-5210 (3) Global Development I

Introduces students to the theories and policy of international development. The course will examine the role of multilateral agencies, foundations, aid organizations, corporate entities and academia in development as both an industry and a research field. The course will focus on development movements and their outcomes, the inter-related nature of development and its effect on policies and programs, and critiques. Prerequisites: Restricted to Graduate Students only.

[Privacy](#) • [Legal & Trademarks](#)

ATLS-5220 (3) Global Development II

Explores the impact of economic, geographical and social/cultural conditions on development outcomes through standalone course components taught by subject matter experts in region and in residency at ATLAS. Components may include, but are not limited to, development economics, environmental sustainability, public health, climate change, globalization and migration, religion, and gender as these broad themes relate to development. Prereq., ATLS 5210. Prerequisites: Restricted to Graduate Students only.

ATLS-5230 (3) Case Studies in Information and Communication Technology for Development

Serves as foundation course for MS-ICTD program. Students will evaluate case studies across a range of technologies and applications. Students will learn how to match available technologies to human and environmental needs and resources, be introduced to the seminal work and leaders in the field, and discuss the future of ICTD as an emerging area of academic focus. Prerequisites: Restricted to Graduate Students only.

[Cross College Programs](#) | [Alliance for Technology, Learning, and Society \(ATLAS\)](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

ATLS-5240 (3) Information and Communication Technology for Development Laboratory

Prepares students for the semester-long practicum. Students work in teams to design ICTD interventions that address unique socio-economic and environmental development issues. Teams will design a variety of ICTD interventions, including telehealth and distance education programs, communication networks, and pro-development ICTD policies. Topics will be chosen by teams and guided by program faculty and external domain experts. Prereq., ATLS 5230. Prerequisites: Restricted to Graduate Students only.

[Privacy](#) • [Legal & Trademarks](#)

ATLS-5250 (3) Fieldwork Methods for ICTD Practitioners

Introduces methods and models that can be employed in ICTD program development and deployment. Examines the applications of participatory research, value-centric design, program scale, cross-disciplinary work, and appropriate monitoring and evaluation. The goal of this course is to build student confidence around existing evaluation toolkits and methods, while advancing multi-method approaches to designing and analyzing ICTD initiatives. Prerequisites: Restricted to Graduate Students only.

ATLS-5610 (6) Startup Practicum

Presumes that entrepreneurship can be learned through the conception, build, and launch of an original product or service by student teams within a single semester. Immerses students in the daily leadership and innovation challenges of the startup environment and serves as a clinic in thinking, decision making and mental agility that will benefit any area of business--not just startups.

Prerequisites: Restricted to Graduate Students only.

ATLS-5620 (3) User Centered Design 1

Emphasizes that user-centered design is the first and primary consideration in the design process. UCD teaches how to design successful interactions from research into users' behaviors, attitudes and expectations via three key elements to designing successful user experiences: 1) Listen, Observe, and Research; 2) Concept and Design for Your Users; 3) Deliver/Launch. Prerequisites: Restricted to Graduate Students only.

[Cross College Programs](#) | [Alliance for Technology, Learning, and Society \(ATLAS\)](#)

ATLS-5630 (3) Front-End Development

Covers the front end environment--HTML 5, CSS3, JS. Introduces students to HTML and emphasizes semantic use of elements and standards-based, valid code. CSS use focuses on separating content from presentation in order to decrease maintenance time, speed up development, improve download speed, and design capabilities. Prerequisites: Restricted to Graduate Students only.

[Cross College Programs](#) | [Alliance for Technology, Learning, and Society \(ATLAS\)](#)

ATLS-5640 (4) Design Thinking

Explores design thinking and how it can be applied conceptually and practically to innovation in areas as diverse as business organization and product development to topics and areas including but not limited to, story, design, UX, interaction design, communication strategy and presentation. Fast-paced, project-based, and immersive, students will work in small teams to discover solutions to real-world problems. Prerequisites: Restricted to Graduate Students only.

[Cross College Programs](#) | [Alliance for Technology, Learning, and Society \(ATLAS\)](#)

ATLS-5650 (3) Introduction to Programming

Provides a hands-on introduction to programming logic, environments, and execution using Ruby as the primary programming language. Covers basic programming principle, syntax, design patterns, and best industry practices while focusing on developing elegant, problem-solving skills through code. Prerequisites: Restricted to Graduate Students only.

Cross College Programs | Alliance for Technology, Learning, and Society (ATLAS)

ATLS-5660 (3) Creative Code

Exposes students to front-end, web-based design and development processes and best practices. WordPress will be used as the back end CMS. Students will learn how to design and develop using WordPress as a framework. At the end of the semester, students will present a final project to illustrate what they have learned and the logic of their build. Recommended prereqs., exposure to HTML, CSS, JavaScript, PHP and MySQL, and previous experience with WordPress for blogging and/or content publication. Prerequisites: Restricted to Graduate Students only.

Cross College Programs | Alliance for Technology, Learning, and Society (ATLAS)

ATLS-5670 (3) Content Strategies

Experiments with different frameworks on how to combine messaging with creative to communicate complex ideas, brand story, product, and finally measure success. Gain experience and expertise with the various content types and channels, with an understanding of how to apply them and the capabilities to do so in solving creative and business problems. Prerequisites: Restricted to Graduate Students only.

Cross College Programs | Alliance for Technology, Learning, and Society (ATLAS)

ATLS-5809 (3) Computer Animation

Develops a firm understanding of the general principles of computer animation. Lectures cover the creation of models, materials, textures, surfaces, and lighting. Path and key frame animation, particle dynamics, and rendering are introduced. Students are assigned a number of animation tutorials to carry out. CSCI 4809/5809 and ATLS 4809/5809 are all the same course. Prerequisites: Restricted to Graduate Students only.

Cross College Programs | Alliance for Technology, Learning, and Society (ATLAS)

ATLS-5900 (1-6) Masters Level Independent Study

Provides opportunities for independent study and research at the Masters level. Students work on research project guided by faculty. May be repeated up to 6 total credit hours. Prereq., instructor consent. Restricted to ATLS graduate students in good academic standing. Prerequisites: Restricted to Graduate Students only.

Cross College Programs | Alliance for Technology, Learning, and Society (ATLAS)

ATLS-6519 (1-3) Advanced Special Topics in Technology, Arts, and Media

Same as ATLS 3519, 4519. Prerequisites: Restricted to Graduate Students only.

Cross College Programs | Alliance for Technology, Learning, and Society (ATLAS)

ATLS-6910 (6) Information and Communication Technology for Development Practicum

This practicum allows MS-ICTD students to synthesize what they have learned and test their readiness for a career in ICTD. Practicum assignments are arranged under the supervision of the MS-ICTD Program Director and involve work with a non-governmental organization, development agency or technology/policy entity. Successful completion is required for graduation from the MS-ICTD Program. Prereqs., ATLS 5210,5220, 5230, 5240 and 5250.

Cross College Programs | Alliance for Technology, Learning, and Society (ATLAS)

ATLS-7000 (1) ATLAS Seminar

This student/faculty seminar critically examines issues in technology, media and society from the multiple interdisciplinary perspective of the gathered participants. Topics may include: IT and business, security, ethics, globalization, digital divide, IT and education, human computer interaction and others. May be repeated up to 8 total credit hours. Instructor permission required. Prerequisites: Restricted to Graduate Students only.

Cross College Programs | Alliance for Technology, Learning, and Society (ATLAS)

ATLS-7800 (2) Online Course Design for the Foreign Languages

Learn about the challenges and affordances of designing online foreign languages courses. Read research articles and book chapters pertaining to instructional design issues and online teaching strategies. Experiment with the latest forms of educational technologies. Students enrolled in the course will design and teach a two-week online language course. Prereq., two years of language teaching experience at the college level.

Cross College Programs | Alliance for Technology, Learning, and Society (ATLAS)

ATLS-7900 (1-6) Doctoral Level Independent Study

Provides opportunities for independent study and research at the Doctoral level. Students perform independent research under faculty supervision. May be repeated up to 6 total credit hours. Prereq., instructor consent. Restricted to ATLS PHD students in good academic standing. Prerequisites: Restricted to Graduate Students only.

Cross College Programs | Alliance for Technology, Learning, and Society (ATLAS)

ATLS-8990 (1-10) Doctoral Dissertation

Approved research conducted under the supervision of members of the graduate faculty. Investigates some specialized topic or field in the area of interdisciplinary information and communication technology. All doctoral students must register for at least 30 hours of dissertation credit as part of the requirement for the ATLAS doctoral degree. Prereq., instructor consent. Restricted to ATLS PHD students in good academic standing. Prerequisites: Restricted to Graduate Students only.

RSEI-4150 (3) Energy Policy Project

Provides students with an opportunity to apply their knowledge of energy technologies, systems, and policies to energy policy issues. Specific topical coverage varies by semester. Example topics include natural gas fracking, automotive fuel economy standards, and natural gas exports. Students work in teams to research, prepare, and present a detailed and specific energy project proposal. Prereq., ENVS 3621. Prerequisites: Restricted to students with 57-180 credits (Juniors or Seniors).

[Cross College Programs](#) | [Renewable and Sustainable Energy Institute](#)

RSEI-5000 (3) Energy Science and Technology

Examines the basics of energy science and technology. Covers both conventional energy sources such as oil, natural gas, coal, nuclear and hydroelectric; and renewable/sustainable energy technologies including wind, solar, biomass, geothermal, and end-use efficiency. Investigates the technological promise and progress of each technology, as well as its limitations and challenges. Prerequisites: Restricted to Graduate Students only.

[Cross College Programs](#) | [Renewable and Sustainable Energy Institute](#)

RSEI-5001 (3) Renewable Energy Policy

Examines the technology, policy and politics of renewables. Technology includes the resource, science, and engineering aspects of renewables. Policy includes various policy levers used to influence renewables. Politics refers to political settings of renewables: how decision-makers perceive them, who supports/opposes policies, and how policies progress through the political process. Prereq., an introductory energy science and technology course. Prerequisites: Restricted to Graduate Students only.

[Cross College Programs](#) | [Renewable and Sustainable Energy Institute](#)

RSEI-5002 (3) The Business of Renewable Energy

Addresses the business of renewable energy, including opportunities and challenges with renewable electricity, renewable transportation fuels, and energy efficiency. Topics include energy markets, opportunity identification, life cycle analysis, economic analysis, policy impacts, and project financing of sustainable renewable energy business models. Prereqs., RSEI 5000 and 5001. Prerequisites: Restricted to Graduate Students only.

Cross College Programs | Renewable and Sustainable Energy Institute

RSEI-5100 (1) Renewable and Sustainable Energy Seminar

Examines a wide range of energy issues in seminar format. Students attend energy-related seminars and critique/evaluate the presented material. Open to graduate students from all disciplines. Prerequisites: Restricted to Graduate Students only.

Cross College Programs | Renewable and Sustainable Energy Institute

RSEI-5200 (3) Energy Topics Course

Covers timely topics related to renewable and sustainable energy. Specific offerings vary by semester. Prerequisites: Restricted to Graduate Students only.

JOUR-4272 (3) Principles of Public Relations

Introduces the economics, ethics, history, impact, practice, and social context of the public relations industry in America. Includes an analysis of public relations in agencies, corporations, political campaigns, social service organizations, universities, and other venues. Emphasizes writing for public relations, including fact sheets, press releases, reports, and speeches. Same as JOUR 5272. Restricted to Journalism majors with a minimum of 57 hours taken. Prerequisites: Restricted to Program in Journalism and Mass Communication students with a minimum of 57 hours taken.

[Journalism & Mass Communication Program](#) [Journalism](#) [Print & Online Journalism](#)

JOUR-4282 (3) Public Relations Strategy and Campaigns

Develops and applies public relations programs, from identification of the problem through execution of public relations techniques. Prereq., JOUR 4272. Same as JOUR 5282. Prerequisites: Requires a prerequisite course of JOUR 4272.

[Journalism & Mass Communication Program](#) [Journalism](#) [Print & Online Journalism](#)

JOUR-4301 (3) Media Ethics

Provides students with an overview of the theories, ethics codes, and analytical models that are used in journalism, public relations, and advertising. Introduces students to a variety of ethical issues that can arise across media professions, as well as the industry practices that can lead to ethical lapses, and teaches students how to challenge those practices. Same as JOUR 5301. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) School of Journalism & Mass Communication majors only.

[Journalism & Mass Communication Program](#) [Journalism](#) [Core Curr & General Electives](#)

JOUR-4311 (3) Media Criticism

Introduces the critical perspectives most often employed in qualitative media analysis: semiology, structuralism, Marxism, psychoanalytical criticism, sociological criticism, etc. Texts from contemporary print and broadcast media. JOUR 4311 and 5311 are the same course.

Journalism & Mass Communication Program | Journalism | Core Curr & General Electives

JOUR-4321 (3) Media Institutions and Economics

Focuses on the institutions and practices of the media industries. Surveys the histories, structures, and activities of these organizations and the contemporary issues surrounding them. Same as JOUR 5321. Prerequisites: Restricted to School of Journalism and Mass Communication majors with a minimum of 75 hours taken.

Journalism & Mass Communication Program | Journalism | Core Curr & General Electives

JOUR-4331 (3) Gender, Race, Class, and Sexuality in Popular Culture

Studies the construction, interconnections, and replications of gender, race, class, and sexuality in popular culture and how these constructs become cultural norms and mores. Uses critical methods with a focus on producing responsible viewers and readers. Same as JOUR 5331, WMST 4331. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) School of Journalism & Mass Communication majors only.

Journalism & Mass Communication Program | Journalism | Core Curr & General Electives

JOUR-4341 (3) International Media and Global Crises

Examines strengths and limits on media's role in globalized crises (e.g. financial, climate change, health) in light of changing distribution of global power. Introduction to current crises; context-analytical approach to media technologies, financing and uses; application to national cases. Restricted to JOUR and IAFS juniors/seniors. Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) Journalism & Mass Communication (JOUR) or International Affairs (IAFS) majors only.

Journalism & Mass Communication Program | Journalism | Core Curr & General Electives

JOUR-4344 (3) Video Documentary Production

Designed to give students the experience of researching, writing, shooting and editing their own documentaries. Prereq., JOUR 3644. Same as JOUR 5344. Prerequisites: Requires a prerequisite course of JOUR 3644.

Journalism & Mass Communication Program | Journalism | Broadcast Journalism

JOUR-4351 (3) Reporting Wars, Disasters, and Peace

Explores how journalists report international breaking news with a focus on war, disaster and peace and how these news events affect peoples' lives, governmental decisions and news media operations. Prerequisites: Restricted to Program in Journalism and Mass Communication students with a minimum of 73 hours taken.

Journalism & Mass Communication Program | Journalism | Core Curr & General Electives

JOUR-4354 (3) TV Reporting

Students learn basic broadcast reporting skills---where to find news and how to cover it, how to analyze and organize news stories. Skills are linked with advanced concepts of shooting and editing videotape in order to produce news stories on deadline. Prereqs., JOUR 3604 and 3644. Prerequisites: Requires pre-requisite courses of JOUR 3604 and 3644. Restricted to students with 57-180 credits (Junior or Senior) Broadcast News (BCNS-BSJR or JBCN-BSJR) majors only.

Journalism & Mass Communication Program | Journalism | Broadcast Journalism

JOUR-4361 (3) TV and the Family in American Culture and Society

Examines the history and character of two central institutions in American society--the family and television--to gain deeper understanding of their formative and enduring roles. Topics include: intersecting histories of the family and television; economic logic of the TV industry and programming; representations of the family in television programming; how families use and interact with television. Prerequisites: Restricted to Program in Journalism and Mass Communication students with a minimum of 73 hours taken.

Journalism & Mass Communication Program | Journalism | Core Curr. & General Electives

JOUR-4403 (4) Advertising Campaigns

Gives students the opportunity to work in small groups to develop material for an actual client. Students examine basic principles of group dynamics and effective teamwork while conducting research, developing strategies and creating a multimedia campaign. All work is presented to the client. Prereq., JOUR 3463 or 3503. Prerequisites: Requires pre-requisite course of JOUR 3463 or 3503. Restricted to Advertising (ADVT-BSJR or JADV-BSJR) or Marketing (MKTG) majors with a minimum of 85 hours.

Journalism & Mass Communication Program | Journalism | Advertising & Media Design

JOUR-4453 (3) Advertising and Society

Examines criticisms and contributions of advertising in society and the economy. Same as JOUR 5453.

Journalism & Mass Communication Program | Journalism | Advertising & Media Design

JOUR-4502 (3) Reporting 3

Involves writing news and features about actual events for publication under deadline pressure. Lab to be arranged. Prereqs., JOUR 3552 and 4002. Restricted to News Editorial majors and with a minimum of 85 hours taken. Same as JOUR 5502. Prerequisites: Requires pre-requisite courses of JOUR 3552 and 4002. Restricted to News Editorial (NSED-BSJR or JNED-BSJR) majors and with a minimum of 85 hours taken.

Journalism & Mass Communication Program | Journalism | Print & Online Journalism

JOUR-4503 (3) Advanced Creative Concepts

Builds on skills acquired in JOUR 3503 and 4513 to help students enhance their conceptual abilities and generate both print and integrated multimedia campaigns. Students work in teams to develop an extensive body of work that's exhibited in an awards show judged by advertising professionals. Prereqs., JOUR 3503 and 4513 and instructor consent.

Journalism & Mass Communication Program | Journalism | Advertising & Media Design

JOUR-4513 (3) Art Direction

Explores theories of visual communication, the visual imagination, and key principles of design. Develops students ability to express ideas through images and to create both effective visual concepts and layouts for a variety of media. Prereq., JOUR 3453 and instructor consent. Coreq. JOUR 3503.

Journalism & Mass Communication Program | Journalism | Advertising & Media Design

JOUR-4523 (3) Portfolio

Gives students an opportunity to develop an extensive body of work. Students create integrated campaigns, which include print, digital and guerilla ideas. Final portfolios are critiqued by both faculty and outside reviewers. JOUR 4503 and instructor consent.

Journalism & Mass Communication Program | Journalism | Advertising & Media Design

JOUR-4533 (3) Applied Consumer Insights

Provides an opportunity to use and master quantitative and qualitative research methods. Students conduct research and analyze data to determine the targets relationship with specific product categories and identify the emotional and practical needs that motivate purchase. Prereqs., JOUR 3403, 3453. Restricted to Advertising or Marketing majors only with a minimum of 57 hours taken. Prerequisites: Restricted to Advertising (ADVT-BSJR or JADV-BSJR) or Marketing (MKTG) majors only with a minimum of 57 hours taken.

Journalism & Mass Communication Program | Journalism | Advertising & Media Design

JOUR-4543 (3) Strategic Brand Management

Examines the theory of branding: what brands are, how brands are created and measured, as well as strategies for managing brands and brand communication. Prereq., JOUR 3463. Restricted to Advertising or Marketing majors only with a minimum of 57 hours taken. Prerequisites: Restricted to Advertising (ADVT-BSJR or JADV-BSJR) or Marketing (MKTG) majors only with a minimum of 57 hours taken.

Journalism & Mass Communication Program | Journalism | Advertising & Media Design

JOUR-4562 (3) Digital Journalism

Builds upon digital production skills through the creation of multimedia project. Applies media theory to evaluate digital media content and explore how digital forms influence the news industry, politics, culture, and society. Prereq., JOUR 3002. Same as JOUR 5562. Prerequisites: Restricted to School of Journalism and Mass Communication majors with a minimum of 75 hours taken.

Journalism & Mass Communication Program | Journalism | Print & Online Journalism

JOUR-4602 (3) Editorial, Commentary and Opinion Writing

Concentrates on several of the subjective areas of journalism. Emphasizes editorial and column writing, editorial pages and blogging. Prereq., JOUR 3001. Same as JOUR 5602. Prerequisites: Requires a prerequisite course of JOUR 3001.

Journalism & Mass Communication Program | Journalism | Print & Online Journalism

JOUR-4614 (1-3) Advanced Audio Practices

Applies advanced skills in producing in-depth audio programming for radio stations in Colorado and for weekly discussion-critique sessions. Prereq., JOUR 3614.

Journalism & Mass Communication Program | Journalism | Broadcast Journalism

JOUR-4624 (4) News Team

Students participate in Newsteam Boulder a program broadcast live over the Boulder cable television system. Prereq., JOUR 4354. Same as JOUR 5624. Prerequisites: Requires pre-requisite course of JOUR 4354. Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Broadcast News (BCNS) majors only.

Journalism & Mass Communication Program | Journalism | Broadcast Journalism

JOUR-4634 (1-3) Broadcast Projects

Covers interpretation, preparation, and/or reporting in programs for broadcast media. Prepares radio or television documentaries and informational/entertainment programs. Prereqs., JOUR 3604 and 3644, or instructor consent.

Journalism & Mass Communication Program | Journalism | Broadcast Journalism

JOUR-4651 (3) Media Law

Studies state and federal laws and court decisions that affect the media in order to develop knowledge of media rights and responsibilities and an understanding of the legal system. Prerequisites: Restricted to School of Journalism and Mass Communication majors with a minimum of 75 hours taken.

Journalism & Mass Communication Program | Journalism | Core Curr & General Electives

Continuation of JOUR 6051, emphasizing experimental and survey research methods.

[Journalism & Mass Communication Program](#) [Journalism](#) [Core Curr & General Electives](#)

JOUR-6071 (3) Critical Theories of Media and Culture

Introduction to critical theories and analysis of media and popular culture. Examines major theoretical traditions and/or theorists that significantly inform media studies (e.g., culturalism, structuralism, Marxism, critical theory, feminism, psychoanalysis, post-structuralism) and applies these to media analysis and criticism. Prerequisites: Restricted to Graduate Students only.

Journalism & Mass Communication Program | Journalism | Core Curr & General Electives

JOUR-6201 (3) Global Media and Culture

Covers mass communication within the international system, including similarities and differences in functions, facilities, and content; social theories of the press; and the international flow of mass communication. Prerequisites: Restricted to Graduate Students only.

Journalism & Mass Communication Program | Journalism | Core Curr & General Electives

JOUR-6211 (3) Communication and International Development

Studies and analyzes communications technologies and techniques used in addressing social problems in developing countries.

Journalism & Mass Communication Program | Journalism | Core Curr & General Electives

JOUR-6301 (3) Communication, Media, and Concepts of the Public

Introduces students to historical and contemporary uses of fundamental concepts in research and theory about media institutions, particularly public, community, mass, publicity, public space, public opinion, public interest, and the public sphere.

Journalism & Mass Communication Program | Journalism | Core Curr & General Electives

JOUR-6311 (3) Seminar: Freedom of Expression

Studies free-speech issues in the context of current and historical philosophical foundations for freedom of expression.

Journalism & Mass Communication Program | Journalism | Core Curr & General Electives

JOUR-6321 (3) Literary Journalism

Analyzes the work of journalists who became some of the greatest fiction writers of the 19th and 20th centuries, and examines the increasingly indistinct lines between journalism and narrative fiction. Prerequisites: Restricted to Graduate Students only.

Journalism & Mass Communication Program | Journalism | Core Curr & General Electives

JOUR-6331 (3) Political Communication

Explores the dynamic relationships involving media and politics, focusing primarily on the American political system. Readings and seminar discussion incorporate normative and empirical perspectives on the media-politics complex. Areas covered include media effects on public opinion and policy, uses of media in governance, journalism sociology, coverage of elections, and implications of interactive media for governance and civic participation. Prerequisites: Restricted to Graduate Students only.

Journalism & Mass Communication Program | Journalism | Core Curr & General Electives

JOUR-6341 (3) Children and the Media

Examining the concepts of children and childhood from the historical, social, cultural, economic and political perspectives, this course explores the interaction between mass media and the socialization and cultivation process of children and youth. Many theoretical traditions are used as a framework to study a variety of issues, such as multicultural literature for children and Disney's role in storytelling, and tween movies and the tweens. Prerequisites: Restricted to Graduate Students only.

Journalism & Mass Communication Program | Journalism | Core Curr & General Electives

JOUR-6551 (3) Telecommunication Policy

Surveys historical and contemporary developments in telecommunications policy, emphasizing social and cultural dimensions, and focusing primarily on the context of the United States.

Journalism & Mass Communication Program | Journalism | Core Curr & General Electives

JOUR-6651 (3) Media Law

Graduate seminar in communications law. Studies changing law and applied legal research techniques. Prerequisites: Restricted to Graduate Students only.

Journalism & Mass Communication Program | Journalism | Core Curr & General Electives

JOUR-6661 (3) Media Ethics and Responsibility

Develops a theoretical framework with which to recognize and analyze ethical issues as they arise in the media. Prerequisites: Restricted to Graduate Students only.

Journalism & Mass Communication Program | Journalism | Core Curr & General Electives

JOUR-6671 (3) Media, Myth, and Ritual

Anthropological and interpretative exploration of cultural practices of media audiences. Addresses theoretical and methodological implications of studying audiences from a culturalist perspective, with particular focus on media audience practices. Students engage in field research projects related to course content. Prerequisites: Restricted to Graduate Students only.

Journalism & Mass Communication Program | Journalism | Core Curr & General Electives

JOUR-6711 (3) Mass Media and Pop Culture

Inquiry into relationship of the arts and the mass media, including study of critics, their function, and their works. Prerequisites: Restricted to Graduate Students only.

Journalism & Mass Communication Program | Journalism | Core Curr & General Electives

JOUR-6721 (3) Message Effectiveness

Investigates how mass media messages work in terms of such effects as perception, learning and comprehension, and persuasion. Effectiveness is analyzed in terms of how well mass communication messages meet their objectives.

Journalism & Mass Communication Program | Journalism | Core Curr & General Electives

JOUR-6771 (3) History of Mass Communication

Examines specialized areas in the history of mass communication. Prerequisites: Restricted to Graduate Students only.

Journalism & Mass Communication Program | Journalism | Core Curr & General Electives

JOUR-6781 (3) Economic and Political Aspects of Mass Communication

Discusses economic problems and political issues relevant to newspapers, magazines, broadcasting, and CATV. Examines problems of telecommunications and the impact of future technology on mass communication.

Journalism & Mass Communication Program | Journalism | Core Curr & General Electives

JOUR-6940 (1) Master's Degree Candidate

Journalism & Mass Communication Program | Journalism | Broadcast Journalism

JOUR-6951 (1-6) Master's Thesis

Journalism & Mass Communication Program | Journalism | Core Curr & General Electives

JOUR-7011 (3) Proseminar in Communication Theory 1

Introduces the principal concepts, literature, and theoretical and paradigmatic perspectives of media studies and mass communication and their ties and contributions to parallel domains in the social sciences and humanities. Prerequisites: Restricted to Communication (COMM or COMC) graduate students only.

Journalism & Mass Communication Program | Journalism | Core Curr & General Electives

JOUR-7021 (3) Proseminar in Communication Theory 2

Continuation of JOUR 7011. Prereq., JOUR 7011.

Journalism & Mass Communication Program | Journalism | Core Curr & General Electives

JOUR-7051 (3) Qualitative Research Methods in Mass Communication

Examines various methods of qualitative data gathering and analysis in the mass media context. Prerequisites: Restricted to Graduate Students only.

[Journalism](#)
[Core Curr & General Electives](#)

JOUR-4301 (3) Media Ethics

Provides students with an overview of the theories, ethics codes, and analytical models that are used in journalism, public relations, and advertising. Introduces students to a variety of ethical issues that can arise across media professions, as well as the industry practices that can lead to ethical lapses, and teaches students how to challenge those practices. Same as JOUR 5301.

Prerequisites: Restricted to students with 57-180 credits (Junior or Senior) School of Journalism & Mass Communication majors only.

JOUR-4361 (3) TV and the Family in American Culture and Society

Examines the history and character of two central institutions in American society--the family and television--to gain deeper understanding of their formative and enduring roles. Topics include: intersecting histories of the family and television; economic logic of the TV industry and programming; representations of the family in television programming; how families use and interact with television. Prerequisites: Restricted to Program in Journalism and Mass Communication students with a minimum of 73 hours taken.

JOUR-4791 (3) Media and the Public

Provides an overview of how publishing in print and electronic forms has been tied closely to democratic ideals for centuries. Explores how the idea of the public is central to the theory and practice of media politics, and how the contested concepts of "the public sphere" and "public opinion" have long been linked to debates about the proper relationship between media and democratic citizenship. Restricted to Journalism majors with a minimum of 75 hours taken. Same as JOUR 5791. Prerequisites: Restricted to School of Journalism and Mass Communication majors with a minimum of 75 hours taken.

JOUR-6051 (3) Media Theory

Studies theories and perspectives of mass communication and explores the role of mass media in society. Prerequisites: Restricted to Journalism & Mass Communication (JOUR), Communication (COMM or COMC) or Telecommunications (TELE) graduate students only.

| | | |
|---|------------|-------------------------------|
| Journalism & Mass Communication Program | Journalism | Core Curr & General Electives |
|---|------------|-------------------------------|

JOUR-6061 (3) Mass Communication Research

Continuation of JOUR 6051, emphasizing experimental and survey research methods.

| | | |
|---|------------|-------------------------------|
| Journalism & Mass Communication Program | Journalism | Core Curr & General Electives |
|---|------------|-------------------------------|

JOUR-6071 (3) Critical Theories of Media and Culture

Introduction to critical theories and analysis of media and popular culture. Examines major theoretical traditions and/or theorists that significantly inform media studies (e.g., culturalism, structuralism, Marxism, critical theory, feminism, psychoanalysis, post-structuralism) and applies these to media analysis and criticism. Prerequisites: Restricted to Graduate Students only.

| | | |
|---|------------|-------------------------------|
| Journalism & Mass Communication Program | Journalism | Core Curr & General Electives |
|---|------------|-------------------------------|

JOUR-6201 (3) Global Media and Culture

Covers mass communication within the international system, including similarities and differences in functions, facilities, and content; social theories of the press; and the international flow of mass communication. Prerequisites: Restricted to Graduate Students only.

| | | |
|---|------------|-------------------------------|
| Journalism & Mass Communication Program | Journalism | Core Curr & General Electives |
|---|------------|-------------------------------|

JOUR-6211 (3) Communication and International Development

Studies and analyzes communications technologies and techniques used in addressing social problems in developing countries.

| | | |
|---|------------|-------------------------------|
| Journalism & Mass Communication Program | Journalism | Core Curr & General Electives |
|---|------------|-------------------------------|

JOUR-6301 (3) Communication, Media, and Concepts of the Public

Introduces students to historical and contemporary uses of fundamental concepts in research and theory about media institutions, particularly public, community, mass, publicity, public space, public opinion, public interest, and the public sphere.

| | | |
|---|------------|-------------------------------|
| Journalism & Mass Communication Program | Journalism | Core Curr & General Electives |
|---|------------|-------------------------------|

JOUR-6311 (3) Seminar: Freedom of Expression

Studies free-speech issues in the context of current and historical philosophical foundations for freedom of expression.

| | | |
|---|------------|-------------------------------|
| Journalism & Mass Communication Program | Journalism | Core Curr & General Electives |
|---|------------|-------------------------------|

JOUR-6321 (3) Literary Journalism

Analyzes the work of journalists who became some of the greatest fiction writers of the 19th and 20th centuries, and examines the increasingly indistinct lines between journalism and narrative fiction. Prerequisites: Restricted to Graduate Students only.

| | | |
|---|------------|-------------------------------|
| Journalism & Mass Communication Program | Journalism | Core Curr & General Electives |
|---|------------|-------------------------------|

JOUR-6331 (3) Political Communication

Explores the dynamic relationships involving media and politics, focusing primarily on the American political system. Readings and seminar discussion incorporate normative and empirical perspectives on the media-politics complex. Areas covered include media effects on public opinion and policy, uses of media in governance, journalism sociology, coverage of elections, and implications of interactive media for governance and civic participation. Prerequisites: Restricted to Graduate Students only.

| | | |
|---|------------|-------------------------------|
| Journalism & Mass Communication Program | Journalism | Core Curr & General Electives |
|---|------------|-------------------------------|

JOUR-6341 (3) Children and the Media

Examining the concepts of children and childhood from the historical, social, cultural, economic and political perspectives, this course explores the interaction between mass media and the socialization and cultivation process of children and youth. Many theoretical traditions are used as a framework to study a variety of issues, such as multicultural literature for children and Disney's role in storytelling, and tween movies and the tweens. Prerequisites: Restricted to Graduate Students only.

| | | |
|---|------------|-------------------------------|
| Journalism & Mass Communication Program | Journalism | Core Curr & General Electives |
|---|------------|-------------------------------|

JOUR-6551 (3) Telecommunication Policy

Surveys historical and contemporary developments in telecommunications policy, emphasizing social and cultural dimensions, and focusing primarily on the context of the United States.

Journalism & Mass Communication Program | Journalism | Core Curr & General Electives

JOUR-6651 (3) Media Law

Graduate seminar in communications law. Studies changing law and applied legal research techniques. Prerequisites: Restricted to Graduate Students only.

Journalism & Mass Communication Program | Journalism | Core Curr & General Electives

JOUR-6661 (3) Media Ethics and Responsibility

Develops a theoretical framework with which to recognize and analyze ethical issues as they arise in the media. Prerequisites: Restricted to Graduate Students only.

Subject

Number

LAWS-6024 (3) Real Property Security

Examines basic mortgage law, including use of mortgage substitutes (e.g., deeds of trusts and installment land contracts). Covers foreclosure and redemption and related problems; special priority problems in land acquisitions and construction financing; special financing devices, including variable-interest and wraparound mortgages; and problems relating to the transfer of the mortgagor's and mortgagee's respective interests.

[Law School](#) [Law](#)

LAWS-6029 (4) Legal Aid Criminal Practice 1

Provides thorough grounding in problems of criminal defense. Students defend indigent misdemeanants in Boulder courts. Develops working knowledge of courtroom skills. Prereq. or coreq., LAWS 6353. Prerequisites: Restricted to Law students only.

[Law School](#) [Law](#) [Practice:Clinical & Simulation](#)

LAWS-6031 (2) Consumer Protection Laws and Policies

Focuses on deceptive trade practices and consumer rights. Reviews the law of deception/misrepresentation at common law, and federal and state laws regarding unfair acts and practices. Covers credit practices, environmental and health claims, and telecommunications and privacy. Discusses remedies, including governmental enforcement actions, and individual and class actions.

[Law School](#) [Law](#)

LAWS-6035 (3) White Collar Crime

Examines distinctions between white collar crime and other types of criminal activity and the needs for and arguments against white collar laws and law enforcement. Studies securities fraud, mail and wire fraud, insider trading, money laundering, false statements, conspiracy and criminal forfeiture statutes. Includes use of the grand jury, privileges applicable in the corporate setting, immunity, discovery and the impact of parallel civil proceedings. Examines effect of government policy on corporations and their counsel, pre-trial and trial strategy, jury selection, and victim notification and restitution options. Prerequisites: Restricted to Law students only.

Law School | Law | Litigation and Procedure

LAWS-6039 (4) Criminal Defense Clinic 2

Provides thorough grounding in problems of criminal defense. Students defend indigent misdemeanants in Boulder courts. Develops working knowledge of courtroom skills. Prereq. or coreq., LAWS 6353.

Law School | Law | Practice: Clinical & Simulation

LAWS-6045 (3) Criminal Procedure

Focuses primarily on the constitutional limitations applicable to such police investigative techniques as arrest, search, seizure, electronic surveillance, interrogation, and lineup identification. Prerequisites: Restricted to Law students only.

Law School | Law | Litigation and Procedure

LAWS-6049 (4) Legal Assistance 1: Federal Courts

Studies evidence and procedural issues, discovery (including document management), pretrial preparation, motions, pretrial conferences, and jury selection. Focuses on opening and closing statement strategies, elements of direct and cross-examination, and impeachment; how to present evidence using technology, including presentation software. Students participate in preparing and arguing motions in federal court and may participate in trial proceedings.

Law School | Law

LAWS-6055 (3) Post-Conviction Criminal Procedure

Addresses sentencing process and schemes, direct appeals, probation modification and revocation, parole revocation, pardon and commutation processes, post-conviction litigation and appeal in both state and federal court, federal review of state convictions through habeas and/or the AEDPA, and ethical issues that arise in post-conviction proceedings. Prerequisites: Restricted to Law students only.

Law School | Law | Litigation and Procedure

LAWS-6059 (2-3) Legal Aid and Defender

Law School | Law

LAWS-6065 (3) Media, Popular Culture, and the Law

Examines how the institutions, practices, and the very identity of the law are in part affected by the media through which law is apprehended and communicated. Hence the general question posed in this course: To what extent and how are the forms and methods of the new media having an effect on the perception, role, and identity of law? Prerequisites: Restricted to Law students only.

Law School | Law | Government and Public

LAWS-6069 (4) Immigration Clinic

Emphasizes practice skills in immigration cases. Includes litigation before Federal Immigration judges, Board of Immigration Appeals, and Federal Circuit Court of Appeals. Prereq. or coreq., LAWS 6353.

Law School | Law

LAWS-6079 (4) Criminal Defense Clinic

Provides thorough grounding in problems of criminal defense. Students defend indigent misdemeanants. Develops working knowledge of courtroom skills, advocacy, and evidence presentation. Concludes with full mock trial. Prereq. or coreq., LAWS 6353. Prerequisites: Restricted to Law students only.

Law School | Law | Practice:Clinical & Simulation

LAWS-6089 (4) Legal Assistance 2: Federal Courts

Studies evidence and procedural issues, discovery (including document management), pretrial preparation, motions, pretrial conferences, and jury selection. Focuses on opening and closing statement strategies, elements of direct and cross-examination, and impeachment; how to present evidence using technology, including presentation software. Students participate in preparing and arguing motions in federal court and may participate in trial proceedings.

Law School | Law

LAWS-6099 (4) Family Law Clinic

Represents low-income clients in family law cases in local state district court. Students will gain court-based experience in dissolution's and allocations of parental responsibilities. Seminar component includes instruction on substantive family law, related ethical issues, and theoretical backgrounds of poverty lawyering.

Law School | Law

LAWS-6103 (2-3) Legal Ethics Professionalism

Examines the legal profession as an institution, its history and traditions, and the ethics of the bar with particular emphasis on the professional responsibilities of the lawyer. Discusses the Model Rules of Professional Conduct. Prerequisites: Restricted to Professional Year 1, 2, or 3 Law students only.

Law School | Law | Jurisprudence and Perspective

LAWS-6104 (3) Wills and Trusts

Covers intestate succession; family protection; execution of wills; revocation and revival; will contracts and will substitutes; creation of trusts; modification and termination; charitable trusts; fiduciary administration, including probate and contest of wills; and construction problems in estate distribution. Prerequisites: Restricted to Professional Year 1, 2, or 3 Law students only.

Law School | Law | Property

LAWS-6105 (2) Defending Immigrants in Criminal and Immigration Courts

Addresses legal procedures, pleadings and client advocacy matters involved in the representation of Spanish-speaking clients who have been arrested for criminal offenses and who have been issued a detainer by Immigration and Customs Enforcement for possible immigration removal proceedings. Provides overview of criminal defense concepts, and how criminal defense attorneys must be prepared to competently counsel their clients who are facing removal proceedings in the federal immigration system. Prerequisites: Restricted to Law students only.

Law School | Law | Family, Gender, and Health

LAWS-6108 (3) Conflict of Laws

Addresses the conflicts that arise when the significant facts of a case are connected with more than one jurisdiction, whether that jurisdiction belongs to a state, the federal government, or a foreign government. The subject is studied in its theoretical and historical context, with special emphasis on the international aspects of extraterritorial jurisdiction.

Law School | Law | Jurisprudence and Perspective

LAWS-6109 (2) Trial Advocacy

Focuses on voir dire, opening statement, direct examination of witnesses, and cross examination. Prerequisites: Restricted to Professional Year 1, 2, or 3 Law students only.

Law School | Law | Practice: Clinical & Simulation

LAWS-6112 (3) Foundations of American Natural Resources Law

Introduces students to the law of natural resources. Examines the legal, historical, political, and intellectual influences that shape resources development and conservation. Same as ENVS 6112. Prerequisites: Restricted to Professional Year 1, 2, or 3 Law students only.

Law School | Law | Envir, Nat Resources, Amer Ind

LAWS-6113 (2) Legal Ethics and Professionalism: Ethics and the Law of Lawyering

Continuation of LAWS 5103. Focuses on the Model Rules of Professional Conduct. Provides the nuts and bolts of the ethical rules needed to begin to explore externships, clinics, pro bono projects and other practice experiences during law school. Prereq., LAWS 5103. Prerequisites: Restricted to Law students only.

Law School | Law | Jurisprudence and Perspective

LAWS-6114 (2) Construction Law

Focuses on the basic principles and practices of construction law. Provides an overview of construction industry participants and players (engineers, contractors, insurers, etc.) and discusses and analyzes the various obligations and liabilities of these parties. Covers construction and design contracting, construction claims, professional negligence, construction insurance and suretyship, and ADR in construction. Provides transactional-practice oriented exercises.

Law School | Law | Property

LAWS-6117 (3) Survey of Business Enterprise Tax

Makes a comparative survey of federal income taxation of C corporations, S corporations, and partnership/limited liability companies, the principal entity choices for conducting business in the United States. Includes formation, operations, distributions, sales of interests, and liquidation. Suitable for students seeking introductory background for business or real estate practice, without the detail required for a tax specialist. Prereq., LAWS 6007.

Law School | Law

LAWS-6119 (1) Deposition Skills

Provides valuable skills to assume active roles in the deposition process. Explores why and when to take depositions; drafting and objecting to deposition notices for individual deponents, non-party witnesses, and corporate designees; drafting successful outlines, proper questions and objections; using exhibits; furthering case theory, making and using stipulations; using depositions in pretrial motions and at trial. Prerequisites: Restricted to Law students only.

Law School | Law | Practice:Clinical & Simulation

LAWS-6122 (2) International Natural Resources Law and Policy

Examines the suite of policy issues and legal ramifications associated with sustainable natural resource development. Examines most recent research on the "resource curse" theory. Examines recent policy developments and discussions that have occurred among industry, NGOs, multilateral development agencies and governments. Examines issues related to bribery and corruption in developing country environments, and dispute resolution mechanisms at national and local levels. Prerequisites: Restricted to Law students only.

LAWS-6128 (1-3) Legal Interpretation and the Legislative Process

Examines theories of legislation and the relation between legislatures and courts, emphasizing problems of statutory interpretation and other issues in the judicial use or misuse of statutes.

Prerequisites: Restricted to Law students only.

[Law School](#) [Law](#) [Government and Public](#)

LAWS-6138 (2-3) Federal Tax Politics

Studies the tax system as the nexus of politics and economics. Examines how various interests and entities use the many tools of political power to shape the tax system. Intended for those interested in politics and legislation, rather than for the tax specialist.

[Law School](#) [Law](#) [Taxation](#)

LAWS-6157 (3) Corporate Taxation

Studies federal income taxation related to taxable corporations, the entities through which a large part of the economic activity in the U.S. is conducted. Includes creation, operation, distributions, sale of interests, and liquidation. Prerequisites: Restricted to Law students only.

[Law School](#) [Law](#) [Taxation](#)

LAWS-6167 (3) Partnership Taxation

Studies federal income taxation of pass-through entities such as are used by most small businesses in the U.S. Includes creation, operation, distributions, sale of interests, and liquidation. Prereq., LAWS 6007.

Law School Law Taxation

LAWS-6179 (2) Trial Practice

Students apply the rules and doctrine of evidence in simulated trial settings. Must be taken with the corresponding section of Evidence. Enrollment is to 24. Satisfies the trial practice requirement and counts 2 hours toward the 14 credit hour maximum of clinical hours counted toward graduation. Graded course; not pass/fail.

Law School Law

LAWS-6201 (3-4) Agency, Partnership, and the LLC

Surveys agency law whose principles are important in many other areas of law. Studies the legal organizations commonly used by small businesses: partnerships and limited liability companies (LLCs). Prerequisites: Restricted to Professional Year 1, 2, or 3 Law students only.

Law School Law Business

LAWS-6205 (3) Lawyers for Social Change

Helps students expand their perspective to understand the ways in which lawyers more broadly participate in social change work in this service learning class. Analyzes case histories of cause lawyering. The service learning component is based on the precept that one of the most effective ways to learn a role is to perform that role. Students will participate as social change lawyers by working with a local community to help it develop projects that the community believes will help it better itself. Prerequisites: Restricted to Law students only.

Law School Law Government and Public

LAWS-6206 (3) Litigation Drafting

Examines the intersection of civil procedure and legal writing. Emphasizes the drafting of persuasive adversarial litigation documents, including complaints, answers, motions in limine, motions to dismiss, motions of summary judgment, and jury instructions. Intensive writing and workshop format.

Law School Law Research and Writing

LAWS-6210 (2-3) Comparative Law

Considers foreign solutions to certain key legal problems. Focuses on general problems of legal process, rather than on substantive rules. Topics include the role of lawyers, civil dispute resolution, criminal procedure, and employment discrimination. Covers different legal systems in different years.

Law School Law International

LAWS-6211 (3) Corporations

Covers formation of corporations and their management; relations among shareholders, officers, and directors; the impact of federal legislation on directors' duties; and the special problems of closed corporations. Prerequisites: Restricted to Professional Year 1, 2, or 3 Law students only.

Law School Law Business

LAWS-6213 (2) Advanced Appellate Advocacy

Advanced study and practice of written and oral appellate advocacy. Builds on the foundation established in the required first-year course in appellate advocacy, but provides more extensive coverage, practice, and evaluation. Personalized instruction in brief writing, including detailed, one-on-one critique of their work. Include advanced techniques for organizing and writing a brief, and advanced instruction on the strategy and process of oral argument. Required to research, write, and rewrite an appellate brief, and conduct several oral arguments. Attend oral arguments of the United States Court of Appeals for the Tenth Circuit and the Colorado Court of Appeals. Prereq., LAWS 7106. Prerequisites: Restricted to Law students only.

Law School Law Litigation and Procedure

LAWS-6220 (3) Introduction to Jewish/Israeli Law

Outlines the history and basic principles of Jewish Law, Halakhic system that encompasses Biblical law and the Rabbinic law. Covers Legal Sources of the Jewish laws, interpretation, legislation, custom, precedence and legal reasoning. Explores the study of modern legal system of the state of Israel and examines the problematic nature of the incorporation of the Law of personal status in the Rabbinical and in general courts. Prerequisites: Restricted to Law students only.

Law School Law International

LAWS-6221 (3) Principles of Auditing, Compliance, and Risk Management

Introduces the fundamental legal and business rules and processes involved in performing audit, compliance, and risk management. Investigates understanding and measuring risk, establishing standards for aggregating disparate information, gathering market data, calculating risk measures, and creating timely reporting tools for managing risk. Covers important regulations including Sarbanes-Oxley, HIPAA, and FISMA. Prerequisites: Restricted to Law students only.

Law School Law Business

LAWS-6226 (2-3) Advanced Legal Research and Writing

Focuses on improvement of legal writing skills including organizing, drafting, and revising legal writing. Improves research and analysis skills. Prerequisites: Restricted to Law students only.

Law School Law Research and Writing

LAWS-6236 (2) Judicial Opinion Writing

Places contemporary American judicial opinion in historical and comparative context. Analyzes individual and institutional writing choices that authors of judicial opinions must make and ethical dilemmas they must confront. Builds upon the first-year legal-writing curriculum. Challenges students to develop and defend their own opinion-writing approaches and styles as well as to write from approaches and in styles that are not their own.

Law School Law Research and Writing

LAWS-6246 (2) Introduction to United States Legal System/Legal Reasoning, Research and Writing

Introduces students without a law degree to the basic structure and content of the United States legal system, examining how the three branches of government at the state and federal levels make law and policy in the United States. The course will provide a basic introductory overview of the following: the various sources of law, including an understanding of how statutes are enacted by legislative institutions; the role of the United States court system in interpreting laws; application of judicial precedent in common-law systems; trial and appellate court procedures; and judicial review standards. The course will also introduce students to the methodology of American law, including legal reasoning, research, and writing, through a variety of in-class and outside research and writing assignments.

Law School Law

LAWS-6251 (4) Corporations

Covers formation of corporations and their management; relations between shareholders, officers, and directors; the impact of federal legislation on directors' duties; and the special problems of closed corporations.

Law School Law

LAWS-6281 (3) Accounting Issues for Lawyers

Studies accounting and auditing problems in the form they are placed before the lawyer, including a succinct study of basic bookkeeping, in-depth legal analysis of the major current problems of financial accounting, and consideration of the conduct of the financial affairs of business.

Law School Law Business

LAWS-6301 (3) Introduction to Intellectual Property

Provides an overview of our nation's intellectual property laws, including patents, copyrights, trademarks, and trade secrets. Discusses other matters related to intellectual property, including licensing, competition policy issues, and remedies. Same as TLEN 5245. Prerequisites: Restricted to Law students only.

Law School Law Intell Prop, Tech, and Telecom

LAWS-6302 (3) Water Resources

Analyzes regional and national water problems, including the legal methods by which surface and ground water supplies are allocated, managed, and protected. Prerequisites: Restricted to Law students only.

Law School Law Envir, Nat Resources, Amer Ind

LAWS-6308 (2) Law and Neuroscience

Covers neuroscience basics, and explores the relationship between the law and recent neuroscientific discoveries in domains including pain, memory, lie detection, psychopathy and criminal responsibility.

Law School | Law | Jurisprudence and Perspective

LAWS-6311 (1) National Security and Privacy Law

Introduces national security and privacy law and relevant law, regulations, rules, policies, and guidelines.

Law School | Law

LAWS-6318 (3) Economic Analysis of Law

Introduces the basic elements of economic theory and emphasizes demand and utility, cost, and optimality. Prerequisites: Restricted to Law students only.

Law School | Law | Jurisprudence and Perspective

LAWS-6321 (3) Computer Crime

Explores legal issues that judges, legislators, prosecutors, and defense attorneys confront as they respond to recent explosions in computer-related crime. Includes the Fourth Amendment in cyberspace, the law of electronic surveillance, computer hacking and other computer crimes, encryption, online economic espionage, cyberterrorism, First Amendment in cyberspace, federal/state relations in enforcement of computer crime laws, and civil liberties online. Same as TLEN 5255. Prerequisites: Restricted to Law students only.

Law School | Law | Intell Prop, Tech, and Telecom

LAWS-6328 (3) Financial Decision-Making

Applies concepts, ideas, insights, and principles of modern finance to real-world situations that lawyers will face in many areas of law. Analyzes present discounted value (time value of money), risk versus return, asset diversification, portfolio theory, efficient markets hypothesis, arbitrage, financial options, real options, financial signals, human capital, behavioral finance, socially responsible investing, neurofinance, happiness finance, and financial bubbles and crashes. Restricted to Law students only. Prerequisites: Restricted to Law students only.

Law School | Law | Jurisprudence and Perspective

Subject

Number

LAWS-6331 (1) The Technology of Privacy

Explores the escalating debates by policymakers, scholars, advocates, and industry representatives about the growing spread of tracking and surveillance in society. Debates are being spurred by the pace of changes to technology and particularly of changes to Internet and mobile technology. Practitioners in information privacy law or technology policy must understand the past, present, and likely future of the technology of privacy. Prerequisites: Restricted to Law students only.

[Law School](#) | [Law](#) | [Intell Prop, Tech, and Telecom](#)

LAWS-6338 (1) Understanding the Global Financial Crisis

Explores the causes and consequences of the global financial crisis. Analyzes financial instruments and institutions at the heart of the crisis -- including asset-backed securities, credit derivatives, government-sponsored entities, credit rating agencies, hedge funds, and financial conglomerates -- and places them in the context of a larger "shadow banking system". Examines the building blocks of financial reform.

[Law School](#) | [Law](#) | [Jurisprudence and Perspective](#)

LAWS-6353 (3) Evidence

Studies the methods and forms of proof in litigation, including detailed consideration of hearsay, impeachment of witnesses, relevancy and certain restrictions on authentication and best evidence doctrines, and privileges. Prerequisites: Restricted to Law students only.

[Law School](#) | [Law](#) | [Litigation and Procedure](#)

LAWS-6363 (5) Evidence and Trial Practice

Studies methods and forms of proof in litigation, including detailed consideration of hearsay, impeachment of witnesses, relevancy and certain restrictions on authentication and best evidence doctrines, and privileges. Applies rules and doctrine of evidence in simulated trial settings. Combined Evidence and Trial Practice course. Satisfies the trial practice requirement and counts two hours toward the 14 credit hour maximum in clinical hours.

Law School Law

LAWS-6373 (3) Federal Litigation: Everything but the Trial

Litigates through all pretrial phases as plaintiff's counsel, a mock federal case: an employee's challenge to compensation and termination, with possible claims including breach of contract, breach of the implied covenant of good faith and fair dealing, violation of wage payment statutory and regulatory requirements, and fraudulent inducement to contract. Prereq., LAWS 6353. Restricted to Law students only. Prerequisites: Restricted to Law students only.

Law School Law Litigation and Procedure

LAWS-6400 (3) International Law

Examines the nature, structure, and sources of international law, the relationship between international law and domestic U.S. law, the role of international organizations such as the United Nations, the methods of resolving international disputes, the bases of international jurisdiction, and select substantive areas of international law that may change from semester to semester. Prerequisites: Restricted to Law students only.

Law School Law International

LAWS-6410 (3) International Trade Law

Examines the law of the World Trade Organization and the General Agreement on Tariffs and Trade. Examines rules restraining national restrictions on trade that addresses tariff and non-tariff barriers, discrimination, regionalism, anti-dumping, countervailing duties, and safeguards. Considers the relationship between trade and other regulatory areas or social values, such as environmental protection, health and safety standards, human rights, intellectual property protection. Prerequisites: Restricted to Law students only.

Law School Law International

LAWS-6415 (2-3) Drug Product Liability Litigation: Principles and Practice

Explores product liability lawsuits and litigation. Explores law of product liability and the tools necessary to successfully litigate these cases. Considers the theory and practice of lawsuits now and after the Supreme Courts landmark decision in Wyeth v. Levine (2009). Focuses on similarities and differences between the special context of FDA regulation. Considers the legal principles governing such lawsuits such as inadequate warning, the Learned intermediary Doctrine and medical causation.

Law School Law

LAWS-6420 (1) Law and the Holocaust

Explores comparative law, jurisprudence, conflicts of laws and international law. Examines the Nazi philosophy of law emanating from its egregious racial ideology, and how it was used to pervert Germany's legal system to discriminate against, ostracize, dehumanize, and eliminate certain classes of people. Studies the role of international law in rectifying the damage by bringing perpetrators to justice and constructing a legal system designed to prevent a repetition.

Law School Law International

LAWS-6458 (2) Creative Writing for Lawyers

Requires substantial writing and reading. Begins with participants bringing to class a piece of creative writing consisting of three to five thousand words. Each session consists of one hour of discussion and critique of an assigned writing exercise that everyone has prepared for the class, and one hour of workshop critique of each participant's longer work, in turn.

Law School Law Research and Writing

LAWS-6501 (2-3) The Practice of Labor and Employment Law

Focuses on aspects of the practice of employment law, rather than the examination of legal doctrines. Discusses typical issues presented in advising and litigating on behalf of employers and employees. Topics include special attention to ethical issues.

Law School Law

LAWS-6502 (2) Wildlife and the Law

Examines the law that protects wildlife, its habitat, and biodiversity. Explores human-caused threats including habitat destruction, illegal trade, and climate change. Focuses on statutes, case law, environmental ethics, and current controversies to highlight legal, scientific, and political strategies for protecting biodiversity. Particular emphasis is placed on the U.S. Endangered Species Act.

Law School Law Envir, Nat Resources, Amer Ind

LAWS-6503 (3) Law and Social Sciences

Explores disparities in criminal sentencing and death penalty cases; quality and effectiveness of legal representation for indigent criminal defendants; relationship between modifications in traditional steps in legal process; connection between alternative tort doctrines and volume of litigation, trial rates, plaintiff success rates and award size; impact of congressional statutes and US Supreme Court decisions on handling and outcomes of habeas corpus petitions.

Law School Law Jurisprudence and Perspective

LAWS-6508 (1) The Philosophy of Law

Questions the nature of law, characteristics and considerations of a legal system, rights and from where they come; thinking like a lawyer, basic techniques of legal reasoning, difference between doctrinal and normative legal analysis. Explores law's frontier and what distinguishes law from morality or politics. Focuses on influential texts from the end of WWII to the end of the Cold War. Prerequisites: Restricted to Law students only.

Law School Law Jurisprudence and Perspective

LAWS-6510 (2-3) International Environmental Law

Examines international environmental law, including transboundary impacts and global issues. Addresses such issues as intergenerational equities, principles of compensation, and if international environmental norms should receive special environmental norm consideration. A course in public international law is not a prerequisite, but students who have not taken such a course will probably find it useful to do some additional background reading. Offered in alternate years.

Law School | Law | International

LAWS-6511 (3) Labor Law

Includes the subjects of evolution of labor relations laws; how a collective bargaining relationship is established; negotiation of the collective bargaining agreement; labor and the antitrust laws; and rights of the individual worker. Course materials frame the issue of how a developed or postindustrial democracy deals with the problems that arise out of the employment relationship: of the choices between laissez-faire, substantive regulation, and the private ordering of the employment relationship through the collective bargaining process.

Law School | Law | Business

LAWS-6513 (2) Crime Victims Rights and Victim Counseling and Advocacy

Involves highly experiential and participatory form of learning related to the rights and needs of victims of crime. Legal and constitutional aspects of crime victims' rights and advocacy are considered. Includes a training component by Moving to End Sexual Assault, a Boulder based organization. After training by MESA, students will complete 120 hours of volunteer service on the MESA hotline as well as attend various meetings. Prerequisites: Restricted to Law students only.

Law School | Law | Family, Gender, and Health

LAWS-6518 (3) Introduction to Islamic Law

Examines the Formative Era of Islamic Law, through its sources and methodologies. Examines the Established Era of the Schools of Law including differences between Sunni and Shiite Islamic Law. Examines human rights, terrorism, political Islam, women's rights and rights of religious minorities, criminal law, and finance law, and the growing role of fundamentalism in these areas. Examines the relevance of Islam and Islamic law in today's world.

Law School | Law | International

LAWS-6521 (3) Employment Law

Entails a survey of employment-at-will, workplace safety, workplace torts; ERISA and retirement, workers' compensation; controls on hours and wages; health insurance; disability and unemployment compensation.

Law School | Law | Business

LAWS-6528 (3) Capital Punishment in America

Surveys the history and current status of capital punishment in the United States, with a critical examination of arguments both for and against the death penalty.

Law School | Law | Jurisprudence and Perspective

LAWS-6531 (3) Comparative Employment Law

In today's globalized world, lawyers are increasingly likely to encounter issues involving foreign employment. The course will provide substantive knowledge about foreign employment law and its relation to American law, as well as a comparative framework to assess the relative merits of the American approach to employment law.

Law School | Law | International

LAWS-6541 (2) Colorado Worker's Compensation Theory and Practice

Introduces the legal theories that underlie the no-fault compensation system, its historical evolution, policy conundrums, and ethical quandaries. Teaches the application of the procedural rules most frequently utilized in administrative setting. Studies the Workers' Compensation Act, the Workers' Compensation Rules of Procedure, and the Office of Administrative Courts Rules of Procedure. Prerequisites: Restricted to Law students only.

Law School | Law | Business

LAWS-6551 (3) Employee Benefits and Compensation Law

Examines past and present employee benefits and compensation practices among private and public employers. Covers ERISA and defined benefit, defined contribution, and welfare benefit plans; equity awards granted by corporations; equity awards granted by LLCs and partnerships; nonqualified deferred compensation and Section 409A of the IRS; golden parachutes and Sections 280G and 4999 of the IRC. Restricted to Law students only. Prerequisites: Restricted to Law students only.

Law School | Law | Business

LAWS-6601 (3) Corporate Transactions in Latin America

Introduces students to an overview of Latin American commercial and civil law systems, looking closely at Napoleonic and Chilean law. Explores the choice legal structures available for Latin American corporations; contract law that regulates business transactions in Latin America; and exploration of the way in which Latin American countries have joined international business trade agreements that pertain to Latin American nations such as the Vienna Convention and Gatt.

Law School | Law

LAWS-6602 (3) Cultural Property Law

Concerns domestic and International regulation of property that expresses group identity and experience. Organized around traditional categories of property (real, personal, and intellectual), the course covers historic preservation, archeological resources, art and museum law, with attention to indigenous people's advocacy on burial sites, traditional lands, ceremonies, music, symbols, ethnobotany, genetic information, and language. May satisfy upper-level writing requirement. Prerequisites: Restricted to Law students only.

LAWS-6708 (1-3) Special Topics

Explores special topics in law. Prerequisites: Restricted to Law students only.

[Law School](#) [Law](#) [Jurisprudence and Perspective](#)

LAWS-6712 (3) Climate Change Law and Policy

Examines the science of climate change and the broader role of science in public policymaking. Reviews the changing legal landscape to abate greenhouse gas emissions, and key issues in policy design. Reviews the Supreme Court's April 2, 2007, decision in *Massachusetts v. EPA*, overturning EPA's refusal to regulate greenhouse gas pollution from motor vehicle tailpipes, and the aftermath in the courts, Executive Branch and Congress.

[Law School](#) [Law](#) [Envir, Nat Resources, Amer Ind](#)

LAWS-6722 (3) Energy Law and Regulation

Provides an introduction to energy law and regulation in the United States. Covers basic principles of rate regulation and public utilities, the division of jurisdiction between federal and state governments, and the key federal statutes and regulatory regimes governing natural gas, electricity, and nuclear power. Focuses on the basic federal frameworks for natural gas and electricity regulation, with an emphasis on understanding the messy and uneven transition to wholesale competition in these sectors and, in the electricity context, the experience with state restructuring and retail competition. Prerequisites: Restricted to Law students only.

[Law School](#) [Law](#) [Envir, Nat Resources, Amer Ind](#)

LAWS-6732 (3) Renewable Energy Project Finance and Development

Examines renewable energy and how legal topics impact financing projects. Reviews structure, regulation, and functioning of electric energy industry and laws applicable to development, ownership and operation of renewable energy projects across technologies. Addresses legal policy, economic and financing issues associated with expansion and improvement of the transmission grid to support renewable energy development. Prerequisites: Restricted to Law students only.

Law School | Law | Envir, Nat Resources, Amer Ind

LAWS-6803 (3) Quantitative Methods

Equips students to deal effectively with experts, whether as consultants or as adverse witnesses, and to enable the identification of a quantitative issue. Helps students to become multi-dimensional in quantitative literacy. Enables students to be comfortable reading statistical arguments, performing basic analyses, writing about statistics, expressing quantitative ideas in graphs, questioning an expert, and understanding the power of computer programming.

Law School | Law | Litigation and Procedure

LAWS-6856 (2) Advanced Legal Research

Offers an in-depth look at research resources and methods. Includes sources from the judicial, legislative, and executive branches of federal and state government; research in topical areas such as environmental law, taxation, and international law; and extensive coverage of secondary and nonlaw resources. Covers both print and electronic sources. Students will have several assignments and a final project.

Law School | Law | Research and Writing

LAWS-6866 (1) Colorado Legal Research

Surveys resources and methods to effectively research Colorado law. Covers primary and secondary resources including Colorado statutes, cases and digests, regulations, and constitution and practice materials. Covers how to research Colorado municipal law and other Colorado topics. Prerequisites: Restricted to Law students only.

Law School | Law | Research and Writing

LAWS-6876 (2) Legal Research Skills for Practice

Approaches legal research from a practice-focused perspective using hands-on sessions in the library. Instructs: how to find and use resources specific to a particular practice area; how to evaluate and weigh strengths and weaknesses of the various legal resources available; and, how to use legal resources efficiently. Includes research strategies and methods, primary and secondary resources, and research using library catalogs and Westlaw, Lexis, and other vendors. Prerequisites: Restricted to Law students only.

Law School | Law | Research and Writing

LAWS-6886 (3) Advanced Legal Research and Analysis

Develops students' ability to think critically about and solve current legal problems. Evaluates the benefits and detriments of both print and on-line legal resources, and how to create an efficient research plan. Formulates and applies research strategies to real-world legal problems, and uses legal analysis to refine and improve research results. Note: students who have taken LAWS 6856 Advanced Legal Research course may not enroll in this course. Prerequisites: Restricted to Law students only.

Law School | Law | Research and Writing

LAWS-6896 (3) Advanced Legal Research and Writing for Practice

Advances and improves legal research and writing skills learned in first year. Proposes variety of assignment types across substantive and procedural areas to prepare for experiences as summer associates or new attorneys. Prerequisites: Restricted to Law students only.

Law School | Law | Research and Writing

LAWS-7003 (3) Federal Courts

Looks at structure and jurisdiction of the federal courts, emphasizing problems of federalism and separation of powers and their relationship to resolution of substantive disputes.

Law School | Law | Litigation and Procedure

LAWS-7005 (3) Media Law

Surveys common, statutory, and regulatory law as applied to the mass media. Focuses on the law as it affects the gathering and publishing of news. Also examines the regulation of the electronic media.

Law School | Law

LAWS-7011 (3) Creditors' Remedies and Debtors' Protection

Examines typical state rights and procedures for the enforcement of claims and federal and state law limitations providing protection to debtors in the process. Includes prejudgment remedies, statutory and equitable remedies, fraudulent conveyance principles, and exemptions and other judicial protections afforded debtors. Prerequisites: Restricted to Law students only.

Law School | Law | Business

LAWS-7013 (2) Supreme Court Decision Making

Students deliberate over several important cases as "Justices" of the Supreme Court. Class is divided into three "Courts" with the first hour spent in deliberation and the second hour in discussion of the deliberative process as well as the substantive issues.

Law School | Law | Litigation and Procedure

LAWS-7015 (3) First Amendment

Examines speech and religion clauses of the First Amendment. Includes the philosophical foundation of free expression, analytical problems in First Amendment jurisprudence, and the relationships between free exercise of religion and the separation of church and state. Prerequisites: Restricted to Law students only.

Law School | Law | Government and Public

LAWS-7019 (1-2) Advanced Clinical Practicum

Enables a clinical student an optional 1-2 credit course to complete an ongoing clinic project that does not reach its natural conclusion during the regular term of the clinic. The practicum may be used in connection with any existing clinical course, but only with permission, and under the supervision of the clinical faculty member. A clinical student must complete a minimum of 50 hours of work per credit taken. Prerequisites: Restricted to Law students only.

Law School | Law | Practice: Clinical & Simulation

LAWS-7021 (3-4) Bankruptcy

Briefly examines nonbankruptcy business rehabilitation devices, followed by basic principles of federal bankruptcy law and the bankruptcy court system. Concludes with attention to business reorganizations under Chapter 11 of the Bankruptcy Code. Recommended prereq., LAWS 6001 and 7011.

Law School | Law | Business

LAWS-7023 (2) Jury Selection and History

Studies the history of the jury from ancient times through the implications of Apprendi, the grand jury from the time of Henry II through modern federal practice, and current jury selection procedures, both federal and Colorado, both civil and criminal. Experienced trial attorneys will work with students to demonstrate jury selection.

Law School | Law | Litigation and Procedure

LAWS-7024 (2-3) Real Estate Planning

Considers various contemporary legal problems involved in the ownership, use, development, and operation of real estate. Emphasizes the income tax and financing aspects of commercial and residential use and development such as shopping plazas and apartment buildings. Same as ACCT 6730.

Law School | Law | Property

LAWS-7025 (3) Civil Rights Legislation

Presents a comprehensive study of federal civil rights statutes briefly reviewed in other courses (e.g., Constitutional Law or Federal Courts). Studies federal civil rights statutes, their judicial application, and their interrelationships as a discretely significant body of law of increasing theoretical interest and practical importance.

Law School | Law | Government and Public

LAWS-7029 (3) Appellate Advocacy Clinic

Provides a clinical course that enables students to work on briefs of criminal cases being handled by the Appellate Division of the Public Defender or Attorney General's Office. Instruction in oral advocacy is given. Enrollment limited to eight students.

Law School | Law | Practice: Clinical & Simulation

LAWS-7031 (3) Regulation of Financial Institutions

Focuses on the core banking law and works outward to cover a broader spectrum of bank-like financial institutions. Covers bank licensing, restrictions on bank business, regulating safety and soundness of banks, consumer protection of depositors and other bank customers, and regulatory examination and enforcement. Prerequisites: Restricted to Law students only.

Law School | Law | Business

LAWS-7045 (3) Criminal Procedure: Adjudicative Process

Focuses primarily on criminal procedure at and after trial. Looks at bail, prosecutorial discretion, discovery, plea bargaining, speedy trial, jury trial, the right to counsel at trial, double jeopardy, appeal, and federal habeas corpus.

Law School | Law | Litigation and Procedure

LAWS-7055 (3) Education Law

Considers issues raised by the interaction of law and education. Issues may include the legitimacy of compulsory schooling, alternatives to public schools, socialization and discipline in the schools, and questions of equal educational opportunities.

Law School | Law | Government and Public

LAWS-7061 (1) Contract Drafting

Begins with value creation by transactional lawyers, and emphasizes the opportunity for lawyers to reduce information and agency costs, and mitigate strategic behavior by using tools such as disclosure, representation and warranties, incentive compensation and earnouts. Shifts to negotiation and drafting, focusing on basic drafting principles and strategies to advance one's clients' interests. Introduces the basic framework of contracts (recitals, reps, and warranties, capitalized terms, definitions, indemnifications and escrow). Prerequisites: Restricted to Law students only.

Number

LAWS-7065 (3-4) Immigration and Citizenship Law

Covers legal issues pertaining to noncitizens of the United States, especially their right to enter and remain as immigrants and nonimmigrants. Topics include admission and exclusion, deportation, and refugees and political asylum. Approaches topics from various perspectives, including constitutional law, statutory interpretation, planning, ethics, history, and policy. Prerequisites: Restricted to Law students only.

[Law School](#)
[Law](#)
[International](#)

LAWS-7079 (2) Wrongful Convictions

Focuses on the issues and remedies in cases of people who have been convicted, whose traditional appellate remedies have been exhausted, and who continue to claim actual innocence. Preference given to those who have taken or are taking more criminal procedure courses.

[Law School](#)
[Law](#)

LAWS-7085 (2) Law and Religion

Uses judicial decisions as well as historical and theoretical materials to explore significant aspects of the relationship between law and religion. The religion clauses of the First Amendment are a central but not exclusive subject of study. Offered in alternate years.

[Law School](#)
[Law](#)
[Jurisprudence and Perspective](#)

LAWS-7095 (2) Women in Law

Explores the role of women in the legal system by looking at women as parties, jurors, witnesses, lawyers, law professors, and judges. Explores the relationship of law and society to women as victims and offenders. Investigates law and society's response to adoption, lesbian/gay issues, rape, surrogate and bad mothers, and sexual harassment.

Law School Law

LAWS-7100 (2-3) International Criminal Law: Theory and Practice

Exposes students to the rapidly growing body of jurisprudence, both international and national, wherein international humanitarian and human rights law are being applied for the purposes of prosecution, trial and punishment of individuals alleged to be responsible for the commission of war crimes, crimes against humanity, genocide and, more recently, terrorism. Prereq., LAWS 6400.

Law School Law International

LAWS-7101 (4) Deals: Engineering Financial Transactions

Explores the business lawyer's role in creating value by helping clients identify, assess, and manage business risks through efficient contract design while achieving the optimal legal, tax or regulatory treatment for the deal. Includes case studies of actual transactions.

Law School Law Business

LAWS-7102 (2-3) Oil and Gas

Deals with the legal problems associated with private arrangements for the ownership and development of oil and gas: deeds and leases to oil and gas rights, trespass, adverse possession, implied covenants in leases, conveyances of fractional interests, and the interaction of private rights and conservation regulation. Prerequisites: Restricted to Law students only.

Law School Law Envir, Nat Resources, Amer Ind

LAWS-7105 (3) Family Law

Focuses on nature of marriage, actions for annulment and divorce, problems of alimony and property division, separation agreements, and custody of children. Also considers illegitimacy, abortion, contraception, the status of married women in common law and under modern statutes, and relations of parent and child. Prerequisites: Restricted to Law students only.

Law School Law Family, Gender, and Health

LAWS-7106 (1-2) Moot Court Competition

Offers an intensive involvement in legal research, appellate brief writing, and oral arguments in a competitive context. Student finalists may continue involvement in regional and national competitions. Prerequisites: Restricted to Law students only.

Law School Law Practice: Clinical & Simulation

LAWS-7111 (3) Contract Theory: Collisions of Contracting and Culture

Explores various contract theories and principles emanating from classical and neoclassical law, legal realism, law and economics, critical legal studies, law and society, relational theory, and others. Considers and critiques these theories as applied to particular contracting cultures, especially as applied to construction contracts.

Law School | Law | Business

LAWS-7115 (2) Juvenile Justice

Covers a wide array of issues dealing with the legal rights of the unborn, children, and juveniles. Covers the legal status of parent-child abuse, delinquency and crime, and emancipation. Prerequisites: Restricted to Law students only.

Law School | Law | Family, Gender, and Health

LAWS-7116 (1) Barristers Council

Law School | Law

LAWS-7121 (3) Advanced Contracts: Commercial Transactions

Studies Article 2 and Article 2A of the Uniform Commercial Code, together with the Convention and the International Sale of Goods. Advanced contracts topics are explored in depth. Among other subjects, warranties, title, remedies, and risk of loss in the sale of lease of goods will be studied.

Law School | Law | Business

LAWS-7122 (2-3) Mining and Energy Law

Addresses major issues affecting the development of mineral resources through mining activity. Includes the regulation of the impacts of mining on the environment on both public and private land. Covers the Mining Law of 1872, the Federal Coal Leasing Amendments, and state regulation of the impacts of mining on the environment.

Law School | Law | Envir, Nat Resources, Amer Ind

LAWS-7125 (2) Advanced Domestic Relations

Offers advanced study of several domestic relations subjects, including both theoretical and lawyering issues. Tentative subjects include discovery, client interviewing and deposition preparation, asset valuation, working with expert witnesses, children as clients, and alternative dispute resolution. Recommended prereq., LAWS 7105.

Law School | Law

LAWS-7128 (2-4) Jurisprudence

Addresses a number of fundamental questions, such as: What is law? What should it be? How is it created? Our readings consist of cutting-edge articles from leading modernist/postmodernist schools of thought including legal formalism, legal realism, interpretive theory, law and economics, feminist jurisprudence, critical legal studies, and law and literature. Same as LAWS 8128.

Law School | Law | Jurisprudence and Perspective

LAWS-7132 (3) Energy, Insecurity, Sustainable Law

Examines why national security deals not only with armed aggression and the ability to thwart military invasions or subversion, but also includes critical threats to vital national and international support systems such as the economy, energy, and the environment.

Law School | Law | Envir, Nat Resources, Amer Ind

LAWS-7135 (3) Parent, Child, and State

Examines the legal rights of parents and children in a constitutional framework, as well as the state's authority to define and regulate the parent-child relationship. Addresses rights of parents and children to freedom of expression and religious exercise, termination of parental rights and adoption, paternity orientation, and culture in defining the family.

Law School | Law | Family, Gender, and Health

LAWS-7145 (3) Comparative Family Law

Examines and critiques law, legal institutions and traditions of the country of focus and the US as they affect children, families, and work. Enhances research and writing skills, including field and international research. Contributes to host country through scholarship and service. Increases cultural competence through active engagement with peers and with social justice issues in another country. Includes required field study component and service learning project over spring break. Prerequisites: Restricted to Law students only.

Law School | Law | Family, Gender, and Health

LAWS-7154 (3) Land Use Planning

Explores mechanisms for public control of private land uses, such as planning, zoning, and regulation of land development; including consideration of federal and state constitutional and statutory limitations on local governments. Offered in alternate years.

Law School | Law | Property

LAWS-7159 (2) Advanced Trial Advocacy

Offers an advanced course covering trial practice elements. Open only to students who have taken LAWS 6109. Prerequisites: Restricted to Law students only.

Law School | Law | Practice: Clinical & Simulation

LAWS-7164 (2) Land Conservation Law

Focuses on private land conservation efforts in the United States, and particularly Colorado, and also considers public land conservation programs. Analyzes real property principles and instruments used to protect land, and the development and acceptance of conservation easements in gross as a mechanism for protection, financing mechanisms for land conservation, including direct government funding and indirect funding through tax incentives at the federal, state and local levels. Understanding of Real Property and Tax concepts helpful.

Law School | Law | Property

LAWS-7169 (2) Motions Advocacy

Provides practical training in preparing and arguing pretrial, post-trial, and chambers motions to an experienced federal judge based on materials from actual case files. Assigns some research papers. Limited to 15 third-year students with interest in trial advocacy and willingness to participate in confrontational exercises. Counts as practice hours. Prerequisites: Restricted to Law students only.

Law School | Law | Practice: Clinical & Simulation

LAWS-7200 (3) Anthropology of Law

Reviews the relationship between the social and cultural features of both developed and developing country societies and the formal and informal legal institutions within them. Considers the nature of social control and constraint, judicial reasoning, fact finding, conciliation, mediation and arbitration, and legal discourse.

Law School | Law

LAWS-7201 (3) Antitrust

Studies American competition policy: collaborations among competitors, including agreements on price and boycotts, definition of agreement, monopolization, vertical restraints such as resale price maintenance, and territorial confinement of dealers. Same as TLEN 5270. Offered in alternate years.

LAWS-7202 (3) Environmental Law

Examines and analyzes important federal pollution control statutes, including the National Environmental Policy Act, the Clean Air Act and Clean Water Act, Solid Waste Act, and Superfund. Considers related economic theory, ethics, and policy issues.

[Law School](#) | [Law](#) | [Envir, Nat Resources, Amer Ind](#)

LAWS-7205 (3) Administrative Law

Covers practices and procedures of administrative agencies and limitations thereon, including the Federal Administrative Procedure Act, and the relationship between courts and agencies.

[Law School](#) | [Law](#) | [Government and Public](#)

LAWS-7207 (3) Federal Estate and Gift Tax

Analyzes federal estate and gift taxation of inter vivos and testamentary transfers, introduces income taxation of estates and trusts, and involves elementary estate planning. Prerequisites: Restricted to Law students only.

[Law School](#) | [Law](#) | [Taxation](#)

LAWS-7209 (4) Natural Resources Law Clinic

Offers hands-on experience in the practice of natural resources law in the Rocky Mountain region to a select number of clinic students. The clinic's docket of active cases focuses on public land law and the environmental statutes protecting those lands and their resources. Students participate in projects that test the full range of lawyering skills, including traditional litigation, administrative

advocacy, legislative drafting, and the conduct of complex negotiations and settlements. Prerequisites: Restricted to Law students only.

Law School Law Practice: Clinical & Simulation

LAWS-7211 (3) Business Planning

Focuses on the development and use of concepts derived from a number of legal areas in the context of business planning and counseling. Topics such as formation of business entities, sale of a business, recapitalization, division, reorganization, and dissolution are considered. Prereqs., LAWS 6007, 6201, and 6251 or 6211.

Law School Law Business

LAWS-7212 (2) Environmental Litigation

Examines the litigation strategies and procedures used to enforce and defend against enforcement under environmental protection statutes, such as the Clean Water Act, Clean Air Act, Resource Conservation and Recovery Act, the Comprehensive Environmental Response, Compensation and Liability Act of 1980, and the Toxic Substances Control Act. Covers civil enforcement, and citizen's suits.

Law School Law Envir, Nat Resources, Amer Ind

LAWS-7217 (2) Estate Planning

Discusses problems and solutions for owners of various-sized estates and different types of assets including jointly-held property, stock in closely-held corporations and farms, analysis of federal taxation of generation-skipping transfers in trust, postmortem estate planning, and drafting of trusts and wills. Prerequisites: Requires pre-requisite course of LAWS 7207.

Law School Law Taxation

LAWS-7221 (2-3) Government Regulation of Business.

Covers themes that explore the nature of the regulatory state and the realities of how businesses react to regulation. Provides an understanding of regulatory institutions; the tools of governmental regulation; and a critical perspective on regulation.

Law School Law Business

LAWS-7222 (2-3) Environmental Decision-Making

Explores the foundational issues that underlie agency decision-making, including environmental ethics, cost-benefit analysis, risk assessment, constitutional law, and administrative law. Compares and contrasts National Environmental Policy Act and the National Historic Preservation Act and the Endangered Species Act.

Law School Law Envir, Nat Resources, Amer Ind

LAWS-7228 (2) Intellectual Origins of the Constitution

Examines the views of the Constitution's framers as expressed in contemporaneous and antecedent writings and debates. Offered in alternate years.

Law School Law

LAWS-7232 (3) Energy Justice

Establishes why nearly a third of the world populated by the energy oppressed poor, presents a major national and international "legislative" or socio political problem calling for answers from governments and civil societies in the developed and developing world. Explains and elucidates the concept of energy justice, its jurisprudential heritage, and its meaning and relevance in contemporary society. Case studies present problem solving frameworks spanning the political, social, behavioral, engineering, natural sciences, and law. Prerequisites: Restricted to Law students only.

Law School Law Envir, Nat Resources, Amer Ind

LAWS-7241 (3) Telecommunications Law and Policy

Examines laws governing telecommunications industries, including federal and state regulation and international aspects. Includes telephone, cable, satellite, cellular, and other wireless systems, and the Internet. Same as TLEN 5240. Prerequisites: Restricted to Law students only.

Law School Law Intell Prop, Tech, and Telecom

LAWS-7248 (3) History of Criminal Justice

Explores the social, cultural, and legal history of Anglo-American criminal justice from the 17th to the 20th centuries. Also examines tensions between various methods that historians employ to study crime and law.

Law School Law

LAWS-7251 (3) Non-Profit Law

Examines the creation of a non-profit organization, in particular whether to choose a trust or a corporate form, how to qualify for federal tax exemption, and differences between private foundations and public charities. Examines fiduciary duty issues, restrictions on political activity and private benefit, and unrelated business income tax. Addresses tax incentives for charitable giving and state fundraising laws.

Law School Law

LAWS-7255 (3) Local Government

Studies state legislative and judicial control of the activities, powers, and duties of local governmental units, including home-rule cities and counties, and some problems of federal, state, and local constitutional and statutory limitations on governmental powers when exercised by local governmental units (e.g., the powers to regulate private activities, tax, spend, borrow money, and condemn private property for public uses). Offered in alternate years.

Law School | Law | Government and Public

LAWS-7261 (3) Corporate Finance

Examines a variety of important legal issues related to the funding and financing corporations including creditor protection laws, the Trust Indenture Act of 1939, fiduciary duties, bond indenture provisions, securities laws, and rights of equity holders. Covers efficient capitalization structures, corporated valuation techniques, capital markets and the efficient market theory, and cost of capital concept. Prereq., LAWS 6211 or 6251.

Law School | Law | Business

LAWS-7271 (3) Venture Capital and Private Equity

Provides overview of the legal and financial principles to represent privately held companies, their founders and managers, and their investors. Emphasizes transaction structuring rather than judicial opinions. Includes the organization and financing of start-ups, structuring buyout transactions, exit strategies, legal organization of investment funds and other financial intermediaries. Discusses the relevant regulatory landscape, including securities law, bankruptcy, ERISA, and tax law.

Law School | Law | Business

LAWS-7285 (2-3) Education and the Constitution

Teaches the substantive constitutional law governing public education. Students will teach constitutional materials to high school students in the local Denver Metro area high schools. Interested students must apply and requires a commitment to a full-year curriculum. Encourages individual development as teachers, writers, and critical thinkers and provides an opportunity to grow as colleagues and teammates. Recommended prereq. LAWS 7055. Prerequisites: Restricted to Law students only.

Law School | Law | Government and Public

LAWS-7300 (2-3) International Litigation

Examines the special issues that arise in litigation in U.S. courts when one or more of the parties is a foreign individual, corporation, or government, or when the subject of the litigation concerns events occurring wholly or partly outside of this country. Includes personal jurisdiction over foreign defendants, extraterritorial service of process and evidence gathering, choice of forum, foreign sovereign immunity, the act of state doctrine, extraterritorial application of U.S. law, and recognition of enforcement of foreign judgments.

Law School | Law

LAWS-7301 (2-3) Copyright

Examines state and federal laws relating to the protection of works of authorship ranging from traditional works to computer programs. Studies the 1976 Copyright Act as well as relevant earlier acts. Gives attention to state laws, such as interference with contractual relations, the right of publicity, moral right, protection of ideas, and misappropriation of trade values, that supplement federal copyright. Same as TLEN 5265.

Law School Law Intell Prop, Tech, and Telecom

LAWS-7303 (3) Complex Civil Litigation

Covers civil procedure in modern complex multiparty suits, including class actions in such settings as employment discrimination and mass torts, and problems in discovery, joinder, res judicata, collateral estoppel, and judicial management in such suits. Offered in alternate years.

Law School Law Litigation and Procedure

LAWS-7307 (3) Taxation of Natural Resources

Considers the federal income tax aspects applicable to the exploration for, the development of, and the operation of natural resources, as well as the financing thereof. Also considers oil and gas, hard minerals, timber, and water. Offered in alternate years. Recommended prereq., LAWS 6007.

Law School Law

LAWS-7309 (2-4) American Indian Law Clinic

Offers a clinical education course involving participation in the representation and advocacy of Indian causes---land or water claims, Indian religious freedom, job or other discrimination based on race, and issues implicating tribal sovereignty. Recommended prereq., LAWS 7725. Prerequisites: Restricted to Law students only.

Law School Law Practice:Clinical & Simulation

LAWS-7310 (3) International Dispute Settlement

Examines various mechanisms for the settlement of international disputes. Includes negotiation, inquiry, mediation, conciliation, arbitration, and adjudication. Focuses on intergovernmental dispute resolution.

Law School Law International

LAWS-7311 (2-3) Patent Law

Covers selected topics, such as patentable subject matter, patentability, and utilization of patent rights through licensing and infringement litigation. Covers practice and procedure of the patent and trademark office.

LAWS-7320 (3) International Criminal Law

Surveys international human rights law and international crime and punishment. Addresses idea of rights from a historical, philosophical, conceptual and analytical perspective; explores the "Primary rules of conduct" as well as adjudication and remedies, and selected rights from a comparative perspective. Recommended prereq., LAWS 6400.

[Law School](#)
[Law](#)
[International](#)

LAWS-7321 (1-2) IP and Technology Contracting

Covers transactions, and often high-tech deals involving intellectual property rights. Studies IP ownership; assignment or rights; commercialization transactions (licensing, distribution, strategic); antitrust; and emerging issues. Gives students essential tools to draft and analyze technology contracts. Prereqs., LAWS 6301 or 7301.

[Law School](#)
[Law](#)
[Intell Prop, Tech, and Telecom](#)

LAWS-7323 (2) Patent Litigation

Focuses on unique aspects of patent litigation: substantive patent law, civil procedure, federal jurisdiction, and litigation strategy; includes claim construction, infringement, anticipation and obviousness defenses, unenforceability challenges, declaratory judgments, injunctions, damages, settlements, licenses, and trial strategy. Of interest and useful to those interested in intellectual property generally, not just patents or in litigation.

[Law School](#)
[Law](#)
[Intell Prop, Tech, and Telecom](#)

LAWS-7325 (3) Election Law

Examines the rapidly evolving field of election law: the right to vote, voting procedures, redistricting, candidate selection, campaign finance laws, and direct democracy. Emphasizes federal law, including applicable constitutional jurisprudence.

Law School | Law | Government and Public

LAWS-7331 (2) Sports Law

Covers the application of rules from agency, antitrust, contracts, constitutional law (including sex discrimination), labor law, property, torts, unincorporated associations, and other subjects to those persons involved in the production and delivery of athletic competition to consumers. Explores the development of the application of these rules to a sports setting and related economic issues. Prerequisites: Restricted to Law students only.

Law School | Law | Business

LAWS-7333 (2) Advanced Evidence: Forensic Science and the Criminal Courts

Explores the admissibility of forensic science opinion and expert testimony, its use as evidence at a trial, and the challenges that such evidence may pose for the courts and the entire criminal justice system in the future.

Law School | Law | Litigation and Procedure

LAWS-7335 (1) The Law of Presidential Elections

Examines the laws and regulations that uniquely shape presidential selection, analyzing practical applications as well as the broader constitutional and policy considerations. A combination of federal, state, and local laws shapes how Americans select their president. But more than ever before, Americans are questioning the rules that influence presidential selection, such as the major party primary system, ballot access, presidential campaign financing, and the electoral college.

Law School | Law

LAWS-7341 (3) Trademark and Unfair Competition Law

Examines trademark protection, the interaction of trademark and unfair competition law with other intellectual property doctrines, the requirements for acquiring and retaining federal trademark rights, false advertising and other misrepresentations, the right of publicity and related claims, remedies for infringement, and international aspects of trademark protection.

Law School | Law | Intell Prop, Tech, and Telecom

LAWS-7345 (2) Comparative Criminal Procedure

Takes an in-depth look at some of the basic features of modern criminal justice systems that share the civil law tradition with the hope that such study will provide a vehicle for a deeper understanding of the strengths and weaknesses of the American system of criminal justice. Prereq., LAWS 6045.

Law School Law Litigation and Procedure

LAWS-7361 (2) Privacy, Security, and Digital Rights Management

Introduces students to the laws that regulate the basic technologies of the Internet and the management of information in the digital age. It examines the most significant statutes, regulations, and common law principles that comprise this emerging legal framework, including the Federal Wiretap Act, the HIPAA Privacy Rule, and the Digital Millennium Copyright Act.

Law School Law Intell Prop, Tech, and Telecom

LAWS-7371 (3) Standardization and Standards Wars

Examines current issues in the standardization of telecommunications and information technologies. Covers the importance of standards, government and private sector perspectives, and the impact of information age technologies on standards of development. Emphasizes key national and international organizations.

Law School Law Intell Prop, Tech, and Telecom

LAWS-7375 (3) U.S. Races and Justice Systems

Examines the unique but related legal, social, and economic problems and accomplishments of those persons in this country whose ancestry originated in Africa, Asia, Latin America, or North America, and explores the developing literature on whites and whiteness.

Law School Law

LAWS-7381 (3) Intellectual Property Counseling and Prosecution

Introduces strategic development and procurement of IP, including patents, trademarks, copyrights, and trade secrets. Evaluates the latest cases and legal trends from a practical and strategic perspective. Focuses on widely accepted best practices and critical thinking in these areas. Prerequisites: Restricted to Law students only.

Law School Law

LAWS-7401 (3) Securities Regulation

Stresses statutory interpretation of the various federal statutes regulating the issue of corporate securities and the cases and regulations that have arisen out of those statutes.

Law School Law Business

LAWS-7402 (2) The Law of Toxic and Hazardous Wastes

Examines the EPA's federal hazardous waste statutes, including the Resource Conservation and Recovery Act of 1976 (RCRA), and the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA). Analyzes the RCRA "Cradle-to-grave" hazardous waste program, and addresses the evolving CERCLA liability scheme and cleanup process.

Law School | Law | Envir, Nat Resources, Amer Ind

LAWS-7405 (2-3) Health Law 2: Medical Malpractice and Quality Regulation

Explores (1) the law controlling ethical issues that arise during the delivery of medical care, (2) the substantive law of medical malpractice and tort reform aimed at reducing the frequency and severity of medical malpractice verdicts, and (3) the practical aspects of litigating a medical malpractice case. Cross-listed at the Health Sciences Center; will include field trips there.

Law School | Law | Family, Gender, and Health

LAWS-7406 (1) International Moot Court Competition

Open only to students who actively participate in the seminar preparing for the competition, in the preparation of memorials for the competition, and in the practice of oral arguments or regional oral arguments.

Law School | Law | Practice:Clinical & Simulation

LAWS-7409 (3) Legal Negotiation

Explores the fundamentals of effective negotiation techniques and policies for lawyers. Students engage in mock negotiations of several legal disputes. Credit is not given for both LAWS 7419 Legal Negotiation and Dispute Resolution and this course.

Law School | Law | Practice:Clinical & Simulation

LAWS-7411 (2-3) Mergers, Acquisitions, and Reorganizations

Studies the planning of corporate mergers, acquisitions, and reorganizations, examining the application and integration of state corporate law, federal securities law, accounting principles, tax law, labor law, products liability law, environmental law, ERISA, and antitrust law.

Law School | Law | Business

LAWS-7420 (2) European Union Law

Covers all the essential aspects of the EU law: EU institutions, competences, the making and the application of EU law, and the content of the fundamental principles of EU law and the common market.

Law School | Law

LAWS-7425 (2-3) Health Law

Acquaints students with the issues arising at the interface between law and medicine through analysis of cases and other materials. Critically analyzes methods used by courts and legislatures to address medical/legal problems in an effort to determine whether the legal resolution was reasonable and appropriate in light of medical, social, and political considerations. Offered in alternate years.

Law School | Law | Family, Gender, and Health

LAWS-7428 (3) Bioethics Law and Literature

Interdisciplinary study of law, medicine, and bioethics. Addresses such issues as confidentiality in medical treatment, rejecting life-sustaining treatment, death and dying, reproductive law and genetic technology, human experimentation, and access to health care.

Law School | Law

LAWS-7429 (2) Alternative Dispute Resolution

Examines a variety of dispute resolution processes, such as mediation, arbitration, minitrials, and court-annexed settlement procedures, as alternatives to traditional court adjudication. Credit not given for both LAWS 7419 Legal Negotiation and Dispute Resolution and this course. Prerequisites: Restricted to Law students only.

Law School | Law | Practice:Clinical & Simulation

LAWS-7439 (2-3) Mediation

Explores mediation, one of the more important methods of alternative dispute resolution, and the legal issues that may arise related to mediation. Considers what kinds of persons and disputes are most appropriate for mediation. Includes role playing.

Law School | Law | Practice:Clinical & Simulation

LAWS-7440 (3) International Human Rights and Humanitarian Law

Surveys international human rights both in law and in philosophy, both current and historical.

LAWS-7449 (2-4) Juvenile Law Clinic

Examines the world of child welfare from the view of the child client, by representing their best interests in abuse and neglect cases. As Guardians ad litem, students will represent children in abuse and neglect cases from the beginning, at the temporary shelter hearing, through the conclusion of the case at a permanency orders hearing. Prereq., LAWS 6353. May be repeated up to 8 total credit hours.

[Law School](#)
[Law](#)
[Practice: Clinical & Simulation](#)

LAWS-7451 (3) Law and Finance for Entrepreneurs

Studies unique legal problems faced by entrepreneurs, including formation issues (choice of entity, rights of the founders, initial investors), operation issues (governance, key employees, intellectual property, financing), IPOs, and buy-outs.

[Law School](#)
[Law](#)
[Business](#)

LAWS-7458 (2) Law and Literature

Focuses on the question of what literature can teach lawyers through a variety of literary works and films. Covers traditional works by Shakespeare, Tolstoy, Camus, Kafka, and Melville, as well as more contemporary works by Toni Morrison and Norman Mailer. Several short reflection papers, a journal, and a final eight page paper are required.

[Law School](#)
[Law](#)

LAWS-7475 (2) Advanced Torts

Studies selected tort actions and theories. Topics covered may include "Dignitary torts" (e.g., defamation, privacy, etc.), business torts, and product liability. Offered in alternate years.

Law School | Law | Government and Public

LAWS-7505 (2) Sexuality and the Law

Examines the regulation of sexuality in local, state, and federal law, with particular emphasis on sexual orientation. Explores how sexuality shapes, and is shaped by, an array of laws and policies, which may include family law, military regulations, tax law, employment law, trusts and estates, obscenity law, and criminal law.

Law School | Law | Family, Gender, and Health

LAWS-7507 (2-3) State and Local Taxation

Examines the operation of the income, property and sales tax used to finance our state and local governments. Includes requirements of equal protection and due process. Covers jurisdiction to tax allocation of the tax base among different state and local governments. Same as ACCT 6760.

Law School | Law

LAWS-7509 (1) Mock Trial Competition

Student teams further develop trial and advocacy skills in a competitive mock-trial format involving two or more rounds of trials. Requires preparation of trial briefs and drafting other court pleadings and documents. Credit is limited to the top two teams (six students). Student finalists may continue involvement in regional and national competitions. May be repeated within the term up to 4 total credit hours. Prerequisites: Restricted to Law students only.

Law School | Law | Practice: Clinical & Simulation

LAWS-7513 (3) Domestic Violence

Explores the law, policy, history, and theory of domestic violence. Examines the limits of legal methods and remedies for holding batterers accountable and keeping victims safe; the dynamics of abusive relationships; the history of the criminal justice system's response to domestic violence; the defenses available to battered persons who kill their abusers; the legal paradigm of the sympathetic victim; psychological and feminist theories about abusive relationships; civil rights and tort liability for batterers and third parties; and the intersection of domestic violence with international human rights.

Law School | Law | Family, Gender, and Health

LAWS-7515 (3) Poverty Law

Explores the legal and policy responses to poverty in the United States and addresses how the law shapes the lives of poor people and communities. Examines the extent of poverty in the United States, the root causes, and the historical development of social welfare policy. Focuses on the rights-based aspect of poverty law and various policies that attempt to ameliorate poverty.

Prerequisites: Restricted to Law students only.

Law School Law Government and Public

LAWS-7523 (2) Juvenile Law

Takes a critical look at the juvenile justice system and how it responds to the needs of juveniles who are either delinquents and/or victims of abuse. Issues include the rights and responsibility of parents, parental responsibility programs, delinquents, and the future of our juvenile courts.

Law School Law

LAWS-7525 (3) Race and American Law

Examines the judiciary's approach to racial discrimination from America's colonial period to the present day. Concludes with an analysis of the contemporary status of racial subordination in the legal system and considers recent scholarly critiques of the law's limitations in effecting racial justice. Employs an interdisciplinary approach and covers the experiences of American Indians, African Americans, Asian Pacific Americans, and Chicana/os.

Law School Law Government and Public

LAWS-7529 (1) Appellate Advocacy Competition

Gives students the opportunity to participate in an intermural appellate advocacy competition, in which a brief must be filed and reviewed, critiqued, and deemed credit-worthy by a member of the faculty. (Law School Rule 3-2-9 (b) should be consulted prior to enrollment.)

Law School Law

LAWS-7541 (2-3) Employment Discrimination

Examines statutory and constitutional prohibitions of discrimination in employment on the basis of race, gender, age, religion, national origin, and disability.

Law School Law Business

LAWS-7601 (2-3) Business Transactions

Provides a practical understanding of how to apply the law in both transactional and litigation settings. Gives an interdisciplinary look at how various areas of the law are brought together in common factual settings. Teaches students to negotiate, document, and close the acquisition of a business covering the areas of practice of corporate, contracts, real property, secured transactions, and bankruptcy law. Tests, in a litigation setting, the decisions made during the acquisition stage.

Law School Law Business

LAWS-7605 (2) Refugee and Asylum Law

Focuses on protections offered under international and domestic law for persons who are threatened by persecution or other adverse conditions in their country of origin. Covers who is a refugee and the protections they have or do not have under United States and international law.

Law School Law International

LAWS-7609 (1-2) Law Practice Management

Studies the establishment of a solo or small-firm legal practice. Topics include the business structure (PC, LLC, etc.), office systems, marketing and development, staffing, liability insurance, managing time, technology, and billing. (This practice course counts toward the 14 credit hour maximum of practice hours.) Course supported by the Section of Law Practice Management of the ABA in memory of Harold A. Feder, CU Law '59.

Law School Law Practice:Clinical & Simulation

LAWS-7611 (2-3) International Business Transactions

Examines the sources of international business law, the relationship between such law and the U.S. legal system, the choice of law in international business disputes, the special issues that arise when doing business with foreign governments, the law governing international sales and the shipment of goods, and international intellectual property protection. Offered in alternate years.

Law School Law International

LAWS-7615 (4) Immigration Law and Immigrants' Rights

Addresses four broad questions: Who is a citizen of the United States? Who else can come to this country? When and why can noncitizens be forced to leave? Who has the authority to answer these questions? These questions prompt us to examine the history of U.S. immigration, the constitutional-statutory-regulatory framework that governs immigration and citizenship law, and the federal agencies that administer it. Also addresses contemporary challenges to, and assertions of, immigrants' rights. Same as PSCI 7181. Prerequisites: Restricted to Law students only.

Law School Law International

LAWS-7617 (3) International Taxation

Covers basic aspects of the United States taxation of income earned abroad by its citizens and the taxation of income derived by foreign persons from U.S. sources, including the implications of income tax treaties. Prereq., LAWS 6007 or 6157. Same as ACCT 6780.

Law School Law Taxation

LAWS-7619 (2) Entrepreneurial Law Clinic

Advise indigent clients who need legal services in the founding of their business or not-for-profit firms, registering LLCs, and drafting employment and intellectual property agreements. Prereq.,

two of the following courses: Agency Partnership and the LLC, Corporations, Securities, Seminar on Corporate Law, Law and Finance for Entrepreneurs, Accounting Issues for Lawyers, Patent Law, Trademark, and International Business Transactions. Prerequisites: Restricted to Law students only.

Law School | Law | Practice:Clinical & Simulation

LAWS-7629 (1) Introduction to the In-House Practice of Law

Explores cutting edge questions around the practice of law as an employee of a business. Demonstrates how the combination of law and business can be valuable to businesses and also innovative, challenging and rewarding to legal professionals. Legal services to corporate America is changing dramatically with more entities relying on in-house counsel, compared to private practitioners, to obtain legal advice and counsel. Prerequisites: Restricted to Law students only.

Law School | Law | Practice:Clinical & Simulation

LAWS-7725 (3) American Indian Law I

Investigates the federal statutory, decisional, and constitutional law that bears upon American Indians, tribal governments, and Indian reservation transactions. Prerequisites: Restricted to Law students only.

Law School | Law | Envir, Nat Resources, Amer Ind

LAWS-7735 (3) American Indian Law II

Investigates the legal history and current legal status of Alaska Natives and Native Hawaiians. Addresses other current topics such as tribal water rights, tribal fishing and hunting rights, tribal justice systems, religious freedom, and tribal natural resource and environmental management. Prereq., LAWS 7725.

Law School | Law | Envir, Nat Resources, Amer Ind

LAWS-7745 (2-3) Jurisdiction in Indian Country

Examines the current state of the justice system within Indian nations today. Includes understanding the respective roles of tribal and state law enforcement authorities, as well as the Bureau of Indian Affairs' Office of Justice Services, the Federal Bureau of Investigation, and the Drug Enforcement Administration. Examines relationship between federal and tribal courts; substantive laws; and advocates who appear before them. Prerequisites: Restricted to Law students only.

Law School | Law | Envir, Nat Resources, Amer Ind

LAWS-7751 (3) Arbitration

Discusses the nature of arbitration, tactical considerations in whether to use this form or another form of dispute resolution, the drafting of effective contracts to arbitrate the enforceability of these contracts, and the enforcement of arbitration awards. Covers the preclusive effect of arbitration proceedings, multiparty arbitration, and choice of law. Students conduct simulated arbitrations.

LAWS-9209 (4) Natural Resources Law Clinic

Engages in litigation and advocacy aimed at protecting the natural resources of the Rocky Mountain region. Students will represent clients in matters involving public lands, wildlife, and other resources. The seminar component will focus on practical aspects of environmental litigation, including administrative practice and decision-making, client representation, citizen suits, and ethical issues. Restricted to Law students only. Prerequisites: Restricted to Law students only.

[Law School](#) [Law](#) [Practice:Clinical & Simulation](#)

LAWS-9341 (3) Law and Economics of the Information Age

Examines basic regulatory and legal challenges of our information economy and digital age. Emphasizes the "Networked" information industries, the proper role of "Unbundling" policies to advance competition, and how intellectual property and antitrust rules should be developed. Restricted to Law students only. Prereq., LAWS 7201, 7241 or 7301. Same as TLEN 5620. Prerequisites: Restricted to Law students only.

[Law School](#) [Law](#) [Business](#)

LAWS-9401 (3) Securities Regulation

Stresses statutory interpretation of the various federal statutes regulating the issue of corporate securities and the cases and regulations that have arisen out of those statutes. Restricted to Law students only. Prerequisites: Restricted to Law students only.

[Law School](#) [Law](#) [Business](#)

LAWS-9409 (3) Legal Negotiation

Explores the fundamentals of effective negotiation techniques and policies for lawyers. Students engage in mock negotiations of several legal disputes. Restricted to Law students only. Credit is not

given for LAWS 741 and this course. Prerequisites: Restricted to Law students only.

Law School | Law | Practice: Clinical & Simulation

LAWS-9410 (3) International Trade Law

Examines the law of the World Trade Organization and the General Agreement on Tariffs and Trade. Examines rules restraining national restrictions on trade that addresses tariff and non-tariff barriers, discrimination, regionalism, anti-dumping, countervailing duties, and safeguards. Considers the relationship between trade and other regulatory areas or social values, such as environmental protection, health and safety standards, human rights, intellectual property protection. Restricted to Law students only. Prerequisites: Restricted to Law students only.

Law School | Law | International

LAWS-9701 (2) Counseling Families in Business

Explores the legal aspects of owning, managing, and participating in a successful family business system, including corporate structure, legal issues, succession planning and estate management, internal capital markets in private enterprise, ownership issues in private businesses, how lawyers can assist with family governance, planning for and managing family philanthropy, gender issues in family business, and conflict resolution. Restricted to Law students only. Recommended prereqs., LAWS 6104, 6157, 6211, and/or 7409 Prerequisites: Restricted to Law students only.

Law School | Law | Business

LAWS-9712 (3) Climate Change Law and Policy

Examines the science of climate change and the broader role of science in public policymaking. Reviews the changing legal landscape to abate greenhouse gas emissions, and key issues in policy design. Reviews the Supreme Court's April 2, 2007 decision in *Massachusetts v. EPA*, overturning EPA's refusal to regulate greenhouse gas pollution from motor vehicle tailpipes, and the aftermath in the courts, Executive Branch and Congress. Restricted to Law students only. Prerequisites: Restricted to Law students only.

Law School | Law | Envir, Nat Resources, Amer Ind

LAWS-9722 (3) Energy Law and Regulation

Provides an introduction to energy law and regulation in the United States. Covers basic principles of rate regulation and public utilities, the division of jurisdiction between federal and state governments, and the key federal statutes and regulatory regimes governing natural gas, electricity, and nuclear power. Focuses on the basic federal frameworks for natural gas and electricity regulation, with an emphasis on understanding the messy and uneven transition to wholesale competition in these sectors and, in the electricity context, the experience with state restructuring and retail completion. Restricted to Law students only. Prerequisites: Restricted to Law students only.

Law School | Law | Envir, Nat Resources, Amer Ind

LAWS-9735 (3) American Indian Law II

Investigates the legal history and current legal status of Alaska Natives and Native Hawaiians. Addresses other current topics such as tribal water rights, tribal fishing and hunting rights, tribal justice systems, religious freedom, and tribal natural resource and environmental management. Restricted to Law students only. Prereq., LAWS 7725. Prerequisites: Restricted to Law students only.

Law School | Law | Envir, Nat Resources, Amer Ind

LAWS-9846 (1-2) LLM Seminar

LLM students study academic legal writing in this 1-credit per semester yearlong course. Topics covered will include: the purpose of academic legal writing; how academic legal writing differs from other forms of legal writing; topic selection; legal research (methods and ethics); first drafts; editing; academic workshops; and publishing. In addition, guest speakers will talk to LLM students about career planning and job seeking. International LLM students will learn about the American legal system. Restricted to Law students only. Prerequisites: Restricted to Law students only.

Law School | Law | Research and Writing

LAWS-9856 (1-4) LL.M Thesis

LL.M students are required to write a thesis in order to graduate. Requires significant work of original research on a topic chosen in close consultation with advisors and other law school faculty, and assignments include due dates for topic selection, drafts, and workshop delivery. Thesis is worth two credits. In exceptional circumstances and only after pre-approval, an LL.M student may enroll for a third or fourth credit. Prerequisites: Restricted to Law students only.

Law School | Law | Research and Writing

LAWS-6103 (2-3) Legal Ethics Professionalism

Examines the legal profession as an institution, its history and traditions, and the ethics of the bar with particular emphasis on the professional responsibilities of the lawyer. Discusses the Model Rules of Professional Conduct. Prerequisites: Restricted to Professional Year 1, 2, or 3 Law students only.

LAWS-7601 (2-3) Business Transactions

Provides a practical understanding of how to apply the law in both transactional and litigation settings. Gives an interdisciplinary look at how various areas of the law are brought together in common factual settings. Teaches students to negotiate, document, and close the acquisition of a business covering the areas of practice of corporate, contracts, real property, secured transactions, and bankruptcy law. Tests, in a litigation setting, the decisions made during the acquisition stage.

[Law School](#) [Law](#) [Business](#)

LAWS-8021 (3) Seminar: Consumer Empowerment

Considers contract theories and principles emanating from classical and neoclassical law, legal realism, law and economics, and critical legal studies. Explores and questions tensions among theories, focusing on how they interact with norms, goals, and functions of contract and consumer protection law. Observes these tensions "In action" through volunteer work with Heritage House, a home for young women who are "At risk" and cannot live with their families at this time for different reasons.

[Law School](#) [Law](#) [Business](#)

LAWS-8101 (3) Business Law Colloquium

Business law scholars from CU and around the country present research papers at this weekly colloquium. Topics may include contracts, corporate law, securities regulation, tax, intellectual property, venture capital and private equity, and the legal profession. No prior knowledge of law and economics is expected, although some knowledge of business organizations will be useful. Prereq., LAWS 6211 or 6201. Prerequisites: Restricted to Law students only.

[Law School](#) [Law](#) [Business](#)

LAWS-8351 (2) Seminar: Law and Economics of Utility Regulation

Discusses economics of regulation and matters ranging from neoclassical economic analysis to public choice theory to new institutional economics. Discusses several regulatory domains, including antitrust law, telecommunications regulation, and energy regulation. Highlights both economic and non-economic goals, including universal service, sustainability (e.g., renewable energy), and architecture (e.g., free speech concerns with regard to telecommunications networks). Prereqs., LAWS 6301 or 7201 or 7241 or TLEN 5835. Restricted to Law and TLEN students.

[Law School](#) [Law](#) [Business](#)

LAWS-8401 (2) Seminar: Securities Litigation and Enforcement

Designed for students interested in studying topics related to securities litigation. Covers civil liability under the Securities Act of 1933, proxy fraud, class actions (with special emphasis on the Private Securities Litigation Reform Act and the Securities Litigation Uniform Standards Act), market manipulation, SEC enforcement actions, enforcement issues involving attorneys and accountants, criminal enforcement, international securities fraud, and securities arbitration.

Law School Law Business

LAWS-8521 (2) Seminar: Comparative Labor Law

Explores the laws and economic transformations that affect labor relations on a global scale.

Law School Law Business

LAWS-8701 (2) Seminar: Counseling Families in Business

Explores the legal aspects of owning, managing, and participating in a successful family business system, including corporate structure, legal issues, succession planning and estate management, internal capital markets in private enterprise, ownership issues in private businesses, how lawyers can assist with family governance, planning for and managing family philanthropy, gender issues in family business, and conflict resolution. Recommended prereqs., LAWS 6104, 6157, 6211, and/or 7409.

Law School Law Business

LAWS-9061 (1) Contract Drafting

Begins with value creation by transactional lawyers, and emphasizes the opportunity for lawyers to reduce information and agency costs, and mitigate strategic behavior by using tools such as disclosure, representation and warranties, incentive compensation and earnouts. Shifts to negotiation and drafting, focusing on basic drafting principles and strategies to advance one's clients' interests. Introduces the basic framework of contracts (recitals, reps and warranties, capitalized terms, definitions, indemnifications and escrow). Restricted to Law students only. Prerequisites: Restricted to Law students only.

Law School Law Business

LAWS-9101 (4) Deals: Engineering Financial Transactions

Explores the business lawyer's role in creating value by helping clients identify, assess, and manage business risks through efficient contract design while achieving the optimal legal, tax or regulatory treatment for the deal. Includes case studies of actual transactions. Restricted to Law students only. Prerequisites: Restricted to Law students only.

Law School Law Business

LAWS-9111 (4) Business Law Colloquium

Business law scholars from CU and around the country present research papers at this weekly colloquium. Topics may include contracts, corporate law, securities regulation, tax, intellectual property, venture capital and private equity, and the legal profession. No prior knowledge of law and economics is expected, although some knowledge of business organizations will be useful. Restricted to Law students only. Prerequisites: Restricted to Law students only.

Law School Law Business

LAWS-9341 (3) Law and Economics of the Information Age

Examines basic regulatory and legal challenges of our information economy and digital age. Emphasizes the "Networked" information industries, the proper role of "Unbundling" policies to advance competition, and how intellectual property and antitrust rules should be developed. Restricted to Law students only. Prereq., LAWS 7201, 7241 or 7301. Same as TLEN 5620. Prerequisites: Restricted to Law students only.

Law School Law Business

LAWS-9401 (3) Securities Regulation

Stresses statutory interpretation of the various federal statutes regulating the issue of corporate securities and the cases and regulations that have arisen out of those statutes. Restricted to Law students only. Prerequisites: Restricted to Law students only.

Law School Law Business

LAWS-9701 (2) Counseling Families in Business

Explores the legal aspects of owning, managing, and participating in a successful family business system, including corporate structure, legal issues, succession planning and estate management, internal capital markets in private enterprise, ownership issues in private businesses, how lawyers can assist with family governance, planning for and managing family philanthropy, gender issues in family business, and conflict resolution. Restricted to Law students only. Recommended prereqs., LAWS 6104, 6157, 6211, and/or 7409 Prerequisites: Restricted to Law students only.

LAWS-6205 (3) Lawyers for Social Change

Helps students expand their perspective to understand the ways in which lawyers more broadly participate in social change work in this service learning class. Analyzes case histories of cause lawyering. The service learning component is based on the precept that one of the most effective ways to learn a role is to perform that role. Students will participate as social change lawyers by working with a local community to help it develop projects that the community believes will help it better itself. Prerequisites: Restricted to Law students only.

[Law School](#) [Law](#) [Government and Public](#)

University of Colorado Boulder

LAWS-8395 (2) Seminar: Separation of Powers

Explores the constitutional relationships among the three branches of the federal government in the sphere of domestic matters, omitting foreign affairs and war. Develops topics including executive orders, Congressional control of the executive and the courts, appointment and removal of officers, impeachment, executive privilege, use of military tribunals, and the election of 2000. a seminar paper will be required.

[Law School](#)
[Law](#)
[Government and Public](#)

LAWS-8405 (2) Seminar: Public Health Law and Ethics

Explores rules of law pertaining to the American public health care system and the ethical issues raised by the government's effort to protect the health of the American people. To be held at Health Sciences Campus.

[Law School](#)
[Law](#)
[Government and Public](#)

LAWS-8508 (2) Seminar: Constitutional Foundations Core Ideas

Focuses on core ideas in U.S. constitutional law, such as means/ends analysis, institutional competence, rights definitions, and juridical techniques for limiting governmental powers. Draws from historical writings, contemporary press accounts, learned treatises, oral arguments, law review articles, and key judicial opinions such as *Mccullough v. Maryland*, *Lochner v. New York*, *Brown v. Board of Education*.

[Law School](#)
[Law](#)
[Government and Public](#)

LAWS-8515 (2) Seminar: Forced Labor

Reviews several regimes of compulsory labor that have been central to the American experience: Black chattel slavery in the antebellum South; debt peonage, criminal surety, and related institutions of agricultural involuntary servitude; convict leasing and other forms of compulsory inmate labor; "White slavery" and prostitution; and forced labor among immigrants. Emphasizes the complicated role that the law has played, and in some respects continues to play, in both supporting and undermining such institutions.

Law School | Law | Government and Public

LAWS-8535 (2) Seminar: Class and Law

Explores issues relating social class to such areas as labor relations, law enforcement, controls on radical movements, and the distribution of wealth and power. Considers problems defining social class.

Law School | Law | Government and Public

LAWS-8555 (2) Seminar: Race, Education and American Law

Explores issues of equity, access, and reform in American public education, particularly as it pertains to race, including desegregation, diversity, equal protection and public education, tracking and high-stakes testing, courts or the political branches, charters and vouchers. Restricted to Law students only. Recommended prereq., LAWS 7525. Prerequisites: Restricted to Law students only.

Law School | Law | Government and Public

LAWS-8705 (2) Seminar: Affordable Housing

Explores the policy, legal, and practical dynamics that drive the development and preservation of privately owned, government subsidized affordable housing. Investigates the nature of the market for housing, with particular emphasis on multifamily rental housing, and debates about market failure in that context and then outline and contrast the major regulatory responses to such market failure. Explores how subsidy programs work in practice, focusing on model documents to frame sample transactions.

Law School | Law | Government and Public

LAWS-8755 (2) Seminar: Higher Education and the Law

Examines the goals, governance, norms, and ideals of American institutions of higher education, and how those policies are shaped by the legal system. Examines the legal relationship between institutions of higher education and its various constituents: faculty, presidents, governing boards, students, alumni, and staff. Spans several traditional doctrinal categories, including contract, torts, employment law, constitutional law, intellectual property, tax, and antitrust.

LAWS-6105 (2) Defending Immigrants in Criminal and Immigration Courts

Addresses legal procedures, pleadings and client advocacy matters involved in the representation of Spanish-speaking clients who have been arrested for criminal offenses and who have been issued a detainer by Immigration and Customs Enforcement for possible immigration removal proceedings. Provides overview of criminal defense concepts, and how criminal defense attorneys must be prepared to competently counsel their clients who are facing removal proceedings in the federal immigration system. Prerequisites: Restricted to Law students only.

[Law School](#) | [Law](#) | [Family, Gender, and Health](#)

LAWS-6513 (2) Crime Victims Rights and Victim Counseling and Advocacy

Involves highly experiential and participatory form of learning related to the rights and needs of victims of crime. Legal and constitutional aspects of crime victims' rights and advocacy are considered. Includes a training component by Moving to End Sexual Assault, a Boulder based organization. After training by MESA, students will complete 120 hours of volunteer service on the MESA hotline as well as attend various meetings. Prerequisites: Restricted to Law students only.

[Law School](#) | [Law](#) | [Family, Gender, and Health](#)

LAWS-7105 (3) Family Law

Focuses on nature of marriage, actions for annulment and divorce, problems of alimony and property division, separation agreements, and custody of children. Also considers illegitimacy, abortion, contraception, the status of married women in common law and under modern statutes, and relations of parent and child. Prerequisites: Restricted to Law students only.

[Law School](#) | [Law](#) | [Family, Gender, and Health](#)

LAWS-7115 (2) Juvenile Justice

Covers a wide array of issues dealing with the legal rights of the unborn, children, and juveniles. Covers the legal status of parent-child abuse, delinquency and crime, and emancipation.

Prerequisites: Restricted to Law students only.

Law School Law Family, Gender, and Health

LAWS-7135 (3) Parent, Child, and State

Examines the legal rights of parents and children in a constitutional framework, as well as the state's authority to define and regulate the parent-child relationship. Addresses rights of parents and children to freedom of expression and religious exercise, termination of parental rights and adoption, paternity orientation, and culture in defining the family.

Law School Law Family, Gender, and Health

LAWS-7145 (3) Comparative Family Law

Examines and critiques law, legal institutions and traditions of the country of focus and the US as they affect children, families, and work. Enhances research and writing skills, including field and international research. Contributes to host country through scholarship and service. Increases cultural competence through active engagement with peers and with social justice issues in another country. Includes required field study component and service learning project over spring break. Prerequisites: Restricted to Law students only.

Law School Law Family, Gender, and Health

LAWS-7405 (2-3) Health Law 2: Medical Malpractice and Quality Regulation

Explores (1) the law controlling ethical issues that arise during the delivery of medical care, (2) the substantive law of medical malpractice and tort reform aimed at reducing the frequency and severity of medical malpractice verdicts, and (3) the practical aspects of litigating a medical malpractice case. Cross-listed at the Health Sciences Center; will include field trips there.

Law School Law Family, Gender, and Health

LAWS-7425 (2-3) Health Law

Acquaints students with the issues arising at the interface between law and medicine through analysis of cases and other materials. Critically analyzes methods used by courts and legislatures to address medical/legal problems in an effort to determine whether the legal resolution was reasonable and appropriate in light of medical, social, and political considerations. Offered in alternate years.

Law School Law Family, Gender, and Health

LAWS-7505 (2) Sexuality and the Law

Examines the regulation of sexuality in local, state, and federal law, with particular emphasis on sexual orientation. Explores how sexuality shapes, and is shaped by, an array of laws and policies, which may include family law, military regulations, tax law, employment law, trusts and estates, obscenity law, and criminal law.

Law School Law Family, Gender, and Health

LAWS-7513 (3) Domestic Violence

Explores the law, policy, history, and theory of domestic violence. Examines the limits of legal methods and remedies for holding batterers accountable and keeping victims safe; the dynamics of abusive relationships; the history of the criminal justice system's response to domestic violence; the defenses available to battered persons who kill their abusers; the legal paradigm of the sympathetic victim; psychological and feminist theories about abusive relationships; civil rights and tort liability for batterers and third parties; and the intersection of domestic violence with international human rights.

Law School | Law | Family, Gender, and Health

LAWS-7775 (1) Gender Law and Public Policy

Examines the relationship of law and gender in criminal law, and constitutional law, using feminist theoretical perspectives as the organizing principle. Each perspective is applied to cases and material on such topics as violence against women, prostitution, pornography, and discrimination in education and athletics.

Law School | Law | Family, Gender, and Health

LAWS-8105 (3) Seminar: Comparative Family Law

Examines and critiques law, legal institutions and traditions of the country of focus and the U.S. as they affect children, families and work. Enhances research and writing skills, including field and international research. Contributes to the host country through scholarship and service. LAWS-6301 (3) Introduction to Intellectual Property

Provides an overview of our nation's intellectual property laws, including patents, copyrights, trademarks, and trade secrets. Discusses other matters related to intellectual property, including licensing, competition policy issues, and remedies. Same as TLEN 5245. Prerequisites: Restricted to Law students only.

[Law School](#) [Law](#) [Intell Prop, Tech, and Telecom](#)

LAWS-6321 (3) Computer Crime

Explores legal issues that judges, legislators, prosecutors, and defense attorneys confront as they respond to recent explosions in computer-related crime. Includes the Fourth Amendment in cyberspace, the law of electronic surveillance, computer hacking and other computer crimes, encryption, online economic espionage, cyberterrorism, First Amendment in cyberspace, federal/state relations in enforcement of computer crime laws, and civil liberties online. Same as TLEN 5255. Prerequisites: Restricted to Law students only.

[Law School](#) [Law](#) [Intell Prop, Tech, and Telecom](#)

LAWS-6331 (1) The Technology of Privacy

Explores the escalating debates by policymakers, scholars, advocates, and industry representatives about the growing spread of tracking and surveillance in society. Debates are being spurred by the pace of changes to technology and particularly of changes to Internet and mobile technology. Practitioners in information privacy law or technology policy must understand the past, present, and likely future of the technology of privacy. Prerequisites: Restricted to Law students only.

[Law School](#) [Law](#) [Intell Prop, Tech, and Telecom](#)

LAWS-7241 (3) Telecommunications Law and Policy

Examines laws governing telecommunications industries, including federal and state regulation and international aspects. Includes telephone, cable, satellite, cellular, and other wireless systems,

and the Internet. Same as TLEN 5240. Prerequisites: Restricted to Law students only.

Law School Law Intell Prop, Tech, and Telecom

LAWS-7301 (2-3) Copyright

Examines state and federal laws relating to the protection of works of authorship ranging from traditional works to computer programs. Studies the 1976 Copyright Act as well as relevant earlier acts. Gives attention to state laws, such as interference with contractual relations, the right of publicity, moral right, protection of ideas, and misappropriation of trade values, that supplement federal copyright. Same as TLEN 5265.

Law School Law Intell Prop, Tech, and Telecom

LAWS-7311 (2-3) Patent Law

Covers selected topics, such as patentable subject matter, patentability, and utilization of patent rights through licensing and infringement litigation. Covers practice and procedure of the patent and trademark office.

Law School Law Intell Prop, Tech, and Telecom

LAWS-7321 (1-2) IP and Technology Contracting

Covers transactions, and often high-tech deals involving intellectual property rights. Studies IP ownership; assignment or rights; commercialization transactions (licensing, distribution, strategic); antitrust; and emerging issues. Gives students essential tools to draft and analyze technology contracts. Prereqs., LAWS 6301 or 7301.

Law School Law Intell Prop, Tech, and Telecom

LAWS-7323 (2) Patent Litigation

Focuses on unique aspects of patent litigation: substantive patent law, civil procedure, federal jurisdiction, and litigation strategy; includes claim construction, infringement, anticipation and obviousness defenses, unenforceability challenges, declaratory judgments, injunctions, damages, settlements, licenses, and trial strategy. Of interest and useful to those interested in intellectual property generally, not just patents or in litigation.

Law School Law Intell Prop, Tech, and Telecom

LAWS-7341 (3) Trademark and Unfair Competition Law

Examines trademark protection, the interaction of trademark and unfair competition law with other intellectual property doctrines, the requirements for acquiring and retaining federal trademark rights, false advertising and other misrepresentations, the right of publicity and related claims, remedies for infringement, and international aspects of trademark protection.

Law School Law Intell Prop, Tech, and Telecom

LAWS-7361 (2) Privacy, Security, and Digital Rights Management

Introduces students to the laws that regulate the basic technologies of the Internet and the management of information in the digital age. It examines the most significant statutes, regulations, and common law principles that comprise this emerging legal framework, including the Federal Wiretap Act, the HIPAA Privacy Rule, and the Digital Millennium Copyright Act.

Law School | Law | Intell Prop, Tech, and Telecom

LAWS-7371 (3) Standardization and Standards Wars

Examines current issues in the standardization of telecommunications and information technologies. Covers the importance of standards, government and private sector perspectives, and the impact of information age technologies on standards of development. Emphasizes key national and international organizations.

Law School | Law | Intell Prop, Tech, and Telecom

LAWS-8311 (2) Seminar: Computer Crimes

Explores legal issues that judges, legislators, prosecutors, and defense attorneys confront with the recent explosion in computer related crime. Includes Fourth Amendment in cyberspace, law of electronic surveillance, computer hacking and other computer crimes, encryption, online economic espionage, cyberterrorism, First Amendment in cyberspace, federal and state relations in enforcement of computer crime laws, and civil liberties online.

Law School | Law | Intell Prop, Tech, and Telecom

LAWS-8321 (2) Seminar: Computers and Law

Explores a range of topics surrounding the juxtaposition of computers and law. Most are aware of the impact that law has on computers through the myriad of regulations that govern computers and related technologies. Less well known is the impact that computer technology is having on governance and on the practice of law. Explores both sides of this dynamic interplay between law impacting computing, and computing impacting law.

Law School | Law | Intell Prop, Tech, and Telecom

LAWS-8361 (2) Seminar: Information Privacy

Explores the laws that regulate the basic technologies of the Internet and the management of information in the digital age. It examines the most significant statutes, regulations, and common law principles that comprise this emerging legal framework, including the Federal Wiretap Act, the HIPAA Privacy Rule, and the Digital Millennium Copyright Act. Prerequisites: Restricted to Law students only.

LAWS-6246 (2) Introduction to United States Legal System/Legal Reasoning, Research and Writing

Introduces students without a law degree to the basic structure and content of the United States legal system, examining how the three branches of government at the state and federal levels make law and policy in the United States. The course will provide a basic introductory overview of the following: the various sources of law, including an understanding of how statutes are enacted by legislative institutions; the role of the United States court system in interpreting laws; application of judicial precedent in common-law systems; trial and appellate court procedures; and judicial review standards. The course will also introduce students to the methodology of American law, including legal reasoning, research, and writing, through a variety of in-class and outside research and writing assignments.

LAWS-7775 (1) Gender Law and Public Policy

Examines the relationship of law and gender in criminal law, and constitutional law, using feminist theoretical perspectives as the organizing principle. Each perspective is applied to cases and material on such topics as violence against women, prostitution, pornography, and discrimination in education and athletics.

[Law School](#) | [Law](#) | [Family, Gender, and Health](#)

LAWS-7809 (2-4) Technology Law and Policy Clinic

Features technology law advocacy before administrative and legislative bodies. The mission of TLPC is: 1) to train and produce students equipped to conduct thoughtful analysis, and 2) provide unbiased assistance in the public interest concerning technology issues to regulatory entities, courts, legislatures and standard setting bodies. Recommended prereqs., LAWS 6301, 6318 or 7241. LAWS 7809 and TLEN 5250 are the same course.

[Law School](#) | [Law](#) | [Practice: Clinical & Simulation](#)

LAWS-7846 (1-3) Independent Legal Research

Involves independent study and preparation of a research paper under faculty supervision. Students produce a research paper equivalent to a seminar research paper. A draft is submitted, subjected to critique by the faculty member, and redrafted. Available during or after the fifth semester of law school. Prereq., instructor consent. Prerequisites: Restricted to Law students only.

[Law School](#) | [Law](#) | [Research and Writing](#)

LAWS-7896 (1) Independent Legal Research: Law Review

Gives students the opportunity to participate in the research, writing, and editing activities involved in publishing the University of Colorado Law Review. Prerequisites: Restricted to Law students only.

Law School Law Research and Writing

LAWS-7906 (2) Independent Legal Research: Law Review

Gives students the opportunity to participate in the research, writing, and editing activities involved in publishing the University of Colorado Law Review. Prerequisites: Restricted to Law students only.

Law School Law Research and Writing

LAWS-7916 (1) Independent Legal Research: Journal of International Environmental Law and Policy

Gives students the opportunity to participate in the research, writing, and editing activities involved in publishing the Colorado Journal of International Environmental Law and Policy. Prerequisites: Restricted to Law students only.

Law School Law Research and Writing

LAWS-7926 (2) Independent Legal Research: Journal of International Environmental Law and Policy

Gives students the opportunity to participate in the research, writing, and editing activities involved in publishing the Colorado Journal of International Environmental Law and Policy. Prerequisites: Restricted to Law students only.

Law School Law Research and Writing

LAWS-7936 (1) Independent Legal Research: Journal of Telecommunications and High Technology

Gives students the opportunity to participate in the research, writing, and editing activities involved in publishing the Journal of Telecommunications and High Technology Law. Prerequisites: Restricted to Law students only.

Law School Law Research and Writing

LAWS-7939 (1-7) Extern Program

Extern credit may be earned for uncompensated work for a sponsor, which may be any lawyer, judge, or organization that employs lawyers or judges and is approved by the Academic and Student Affairs Committee. Work is done under the direction of a field instructor (a lawyer or judge as the sponsor) and a member of the law faculty. Requires a substantial writing component and 50 hours of working time per credit hour. a minimum of 1 and a maximum of 7 credit hours may be earned. Classified as practice credit. Prerequisites: Restricted to Law students only.

Law School Law Practice: Clinical & Simulation

LAWS-7946 (2) Independent Legal Research: Journal of Telecommunications and High Technology

Gives students the opportunity to participate in the research, writing, and editing activities involved in publishing the Journal of Telecommunications and High Technology Law. Prerequisites: Restricted to Law students only.

Law School | Law | Research and Writing

LAWS-8005 (2) Seminar: Advanced Constitutional Law Equality and Privacy

Addresses "Equal Protection" rights under the Fourteenth Amendment and "Privacy" rights to personal autonomy. Analyzes varied constitutional grounds for recognizing or rejecting abortion rights; limits on Congressional power to pass civil rights laws granting broader rights than the Fourteenth Amendment does; treatment of sexual orientation-related laws and government actions as "Privacy" versus "Equality" matters; and "Benign"/"remedial" race- and sex-based government decisions such as affirmative action and same-sex schools.

Law School | Law | Government and Public

LAWS-8011 (1-3) Seminar: Humanizing Contracts: Service Learning

Examines contract theory and policy, while providing community-based service. Students analyze and discuss readings exploring doctrinal and theoretical bases of contract law, and see "Contracts in action" through participating in a service project. Requires a final paper linking theory and doctrine with service experiences. Note: this is a year-long seminar (2 credits per semester); students must enroll in both semesters but receive only one grade at the end of the year. Students participate in a service project that may include off-campus and weekend participation.

Law School | Law

LAWS-8013 (2) Seminar: Habeas Corpus: The Great Writ of Liberty

Includes readings on the history of the writ, its constitutional status, and its use as a civil rights remedy, as well as case studies of important Supreme Court decisions, and a review of contemporary jurisdictional and procedural issues.

Law School | Law

LAWS-8015 (1-3) Seminar: Constitutional Theory

Examines the role of the courts and the other branches of government in defining and enforcing constitutional values. Relevant readings are from philosophy, social sciences, and legal scholarship, as well as cases. Prerequisites: Restricted to Law students only.

Law School | Law | Government and Public

LAWS-8021 (3) Seminar: Consumer Empowerment

Considers contract theories and principles emanating from classical and neoclassical law, legal realism, law and economics, and critical legal studies. Explores and questions tensions among theories, focusing on how they interact with norms, goals, and functions of contract and consumer protection law. Observes these tensions "In action" through volunteer work with Heritage House, a home for young women who are "At risk" and cannot live with their families at this time for different reasons.

Law School | Law | Business

LAWS-8025 (2) Seminar: Advanced Topics in Federalism

Explores the development of "Our Federalism", the relationship between federal and state governments, from the founding period of the US Supreme Court's recent New Federalism jurisprudence. Studies historical material, commentary, and case law, and addresses how federalism is defined; the values that federalism serves; the role of federalism in our interconnected, global society; the Supreme Court's boundaries of federalism; the direction of New Federalism.

Law School | Law | Government and Public

LAWS-8035 (2) Seminar: Intersection of Antidiscrimination and First Amendment Law

Addresses past and continuing debates involving potential tensions between antidiscrimination principles and free speech, free exercise, and establishment clause values. Examines constitutional protections under the First Amendment and the equal protection clause, together with an array of existing and proposed federal and state antidiscrimination laws regulating employment, housing, and public accommodations, among other areas.

Law School | Law | Government and Public

LAWS-8045 (2) Seminar: Comparative Constitutional Law

Examines legal structures and concepts typically found in constitutions, including judicial review, distinction between legislative and executive authority, federalism and the principle of subsidiarity, the relationship between church and state, free speech and press, and social welfare rights. Examines differences between constitutional law and other domestic law, role of comparative constitutional law in domestic constitutional law adjudication. Emphasizes American and Swedish perspectives.

Law School | Law | Government and Public

LAWS-8055 (1-2) Seminar: Media, Popular Culture, and the Law

Examines how the institutions, practices, and the very identity of law are in part affected by the media through which law is apprehended and communicated. Hence the general question posed in this seminar: To what extent and how are the forms and methods of the new media having an effect on the perception, role, and identity of law? This is a year-long seminar.

Law School | Law | Government and Public

LAWS-8075 (2) Seminar: Race, Racism, and American Law

Focuses on issues of race reform law, in particular the group of issues dealing with Black Americans. (Students of all hues and persuasions are welcome.) Offers an interpretive or critical dimension, rather than a litigation-oriented one. Helps students understand how race reform law works and how attitudes and historical forces have shaped that body of law.

Law School | Law

LAWS-8095 (2) Seminar: Problems in Constitutional Law

Explores how theories of social freedom and self-governance developed in the United States. Analyzes the most controversial socio-legal issues as they relate to privacy, equal protection and other questions of substantive due process. Discusses recent trends in national security and information privacy to evaluate their overall relevance to civil liberties and nascent influence on the fundamental rights debate in the US and abroad.

Law School | Law | Government and Public

LAWS-8101 (3) Business Law Colloquium

Business law scholars from CU and around the country present research papers at this weekly colloquium. Topics may include contracts, corporate law, securities regulation, tax, intellectual property, venture capital and private equity, and the legal profession. No prior knowledge of law and economics is expected, although some knowledge of business organizations will be useful. Prereq., LAWS 6211 or 6201. Prerequisites: Restricted to Law students only.

Law School | Law | Business

LAWS-8103 (2) Seminar: Alternative Dispute Resolution Ethics

Explores the ethics of mediators and other alternative dispute resolvers and facilitators, of attorneys representing clients in alternative dispute resolution processes, and of judges serving in alternative roles. Issues include confidentiality, providing appropriate notice to those concerned, and avoidance of conflicts of interest.

Law School | Law

LAWS-8104 (2) Seminar: Cities, Suburbs, and the Law

Explores dynamics that play out in the relationship between cities, suburbs, exurbs and other patterns of urban development. Explores the nature of local power, relations between local jurisdictions, and metropolitan and regional approaches to governance. Includes fiscal disparities, ethnic and racial segregation, sprawl and growth controls, affordable housing, transportation, and the urban/rural divide.

Law School | Law | Property

LAWS-8105 (3) Seminar: Comparative Family Law

Examines and critiques law, legal institutions and traditions of the country of focus and the U.S. as they affect children, families and work. Enhances research and writing skills, including field and international research. Contributes to the host country through scholarship and service. Increases cultural competence through active engagement with peers and with social justice issues in another country. Includes required field study component and service learning project over spring break. Prerequisites: Restricted to Law students only.

[Law](#)

LAWS-8122 (2) Seminar: Mineral Development

Deals with legal and policy issues surrounding mineral development and its environmental impacts. Emphasizes the problems associated with hard rock minerals and coal development, with some treatment of oil and gas leasing and development issues. Focuses on western public lands with some discussion of international and private lands issues.

[Law School](#)
[Law](#)

LAWS-8125 (2) Seminar: Law and the Politics of Family Law

Examines issues that have been raised under the United States Constitution with respect to state regulation of families. Topics include questions of family and individual privacy, the status of children, procreation, marriage and divorce, the definition of family relationships, and problems of federalism and the role of the Supreme Court in the regulation of families.

Law School | Law

LAWS-8128 (2-3) Jurisprudence

Same as LAWS 7128.

Law School | Law

LAWS-8135 (2) Seminar: Gender, Work, and Family

Explores the social and legal problems that develop at the intersection of work and family, and considers legal/non-legal solutions that have been and could be used to accommodate both women and men in their efforts to deal with these problems.

Law School | Law

LAWS-8138 (2) Seminar: The Rhetoric of Law

Considers how Anglo-American law operates rhetorically, how it persuades, builds character, offers proof, approximates the truth, establishes legitimacy, and makes things happen. It will also explore the ethics of rhetoric and note the relationship of rhetoric to other bodies of legal scholarship (e.g., law and literature, legal pragmatism, law and culture). It will hone student advocacy skills, prepare students to anticipate and defend against the rhetorical stratagems of different legal actors, and enrich students' sense of professional identity. Restricted to LAWS students.

Prerequisites: Restricted to Law students only.

Law School | Law

LAWS-8154 (2) Seminar: Land Use Planning

Discusses public control of private land uses through planning, zoning, and regulation of land development, including consideration of constitutional and statutory limitations on legislatively created techniques. Offered in alternate years.

Law School | Law

LAWS-8202 (2) Seminar: Environmental Policy

Examines issues of environmental justice, including the disparate impacts of pollution and land use controls on certain communities and ethnic groups. Topics may include concentration of waste facilities in neighborhoods occupied by poor and minority populations, adequate protection of migrant farmworkers from the impacts of pesticide hazards, and environmental controls that inhibit economic growth and development sought by Indian tribes.

[Law School](#) [Law](#)

LAWS-8205 (3) Seminar: Law and Democratic Governance

Explores cutting-edge debates in election law. Studies different perspectives on the current controversies in the field, in addition to select opportunities to engage scholars directly about their work. Develops students' understanding of the law of democracy, exposing students to some of the best scholarship, and improving students' ability to evaluate and critique legal scholarship.

Recommended prereq., LAWS 7325. Same as PSI 7171. Prerequisites: Restricted to Law students only.

[Law School](#) [Law](#) [Government and Public](#)

LAWS-8210 (2) Seminar: Comparative Law

Studies discrete topics in Jewish law such as family law, commercial law, criminal law, etc., using the text Jewish Law: Cases and Materials, and other sources such as guest lectures. The collection of books that we received from the Touro Law Center will provide a valuable resource for student research.

[Law School](#) [Law](#)

LAWS-8212 (2) Seminar: Environmental Law Practice and Policy

Focuses on the translation of environmental policies and purposes into environmental law and practice. Investigates policy issues on prevention of significant deterioration of air quality (PSD), the particulate matter national ambient air quality standard (PM NAAQS), and global climate changes. Emphasizes legal structure issues, including the role of national, state, and local governments in implementing environmental law and policy as well as counterpart global structures and mechanisms for responding to global or transboundary environmental problems. Prereq., LAWS 7202.

[Law School](#) [Law](#)

LAWS-8222 (2) Seminar: Environmental Philosophy and Law

Investigates the changing philosophical underpinnings of U.S. environmental law and policy and how philosophy and legal institutions interact.

[Law School](#) [Law](#)

LAWS-8251 (2) Seminar: Advanced Corporate Law

Explores current issues in corporate and securities law, including developments in fiduciary duties of officers and directors, corporate governance, executive compensation, revisions to the model business corporation act, and state and federal litigation reform.

[Law School](#) [Law](#)

LAWS-8285 (2-3) Seminar: Education and the Constitution

Teaches the substantive constitutional law governing public education. Students will teach constitutional materials to high school students in the local Denver Metro area high schools. Interested students must apply, and requires a commitment to a full-year curriculum. Encourages individual development as teachers, writers, and critical thinkers, and provides an opportunity to grow as colleagues and teammates. Requires extra time outside of class. Recommended prereq., LAWS 7055. Prerequisites: Restricted to Law students only.

Law School | Law | Government and Public

LAWS-8300 (3) Seminar: International Adjudication

Focuses on writing briefs and memoranda of law suitable for practice before tribunals such as the International Courts of Justice. Emphasis will be on students writing, legal analysis, and presentation of oral arguments. Instruction identifies how to research and analyze international materials, such as treaties, covenants, and international customary law.

Law School | Law

LAWS-8301 (2) Seminar: Innovation, Network Theory, Social Entrepreneurship

Covers topics related to the legal and public policy implications of innovation, entrepreneurship, and social networks including normative ideals of entrepreneurship, the concept of regional advantage, whether startups should be subsidized and the design of such subsidies, the role of universities in commercializing ideas, impact of the tax code on entrepreneurship, the role of corporate responsibility in startups, and more.

Law School | Law

LAWS-8302 (2) Seminar: Advanced Problems in Water Resources Law

Explores the use of watersheds as geographic and political entities for addressing water-related issues and how laws and institutions facilitate or impede watershed-based problem solving.

Law School | Law

LAWS-8310 (2) Seminar: International Crimes Punishment

Addresses issues in international criminal law in three parts: 1) basic contents of international law, 2) international criminal tribunals that enforce international criminal law, and 3) national efforts to bring international criminal prosecutions. Recommended prereqs., LAWS 6400 and 7440. Prerequisites: Restricted to Law students only.

Law School | Law | International

LAWS-8311 (2) Seminar: Computer Crimes

Explores legal issues that judges, legislators, prosecutors, and defense attorneys confront with the recent explosion in computer related crime. Includes Fourth Amendment in cyberspace, law of electronic surveillance, computer hacking and other computer crimes, encryption, online economic espionage, cyberterrorism, First Amendment in cyberspace, federal and state relations in enforcement of computer crime laws, and civil liberties online.

Law School Law Intell Prop, Tech, and Telecom

LAWS-8315 (2) Seminar: Advanced Criminal Justice

Studies policy and practice issues rather than case law. Focuses primarily on how American criminal justice is dispensed in cases that do not reach trial, including police behavior, prosecutorial discretion, defense services, bail, plea bargaining, and sentencing.

Law School Law

LAWS-8318 (2) Seminar: Law and Economics

Introduces the uses and limitations of microeconomic theory for understanding and resolving legal problems. Emphasizes concepts prominent in the law and economics literature such as cost, transaction costs, utility, and rational self interest.

Law School Law Jurisprudence and Perspective

LAWS-8320 (2) Seminar: Oil and International Relations

Addresses the extent to which the international community of nations is oil dependent. Assesses the impact and the geopolitical dangers to international relations arising from the expanding demand for scarce oil from developing, as well as developed, economies.

Law School Law International

LAWS-8321 (2) Seminar: Computers and Law

Explores a range of topics surrounding the juxtaposition of computers and law. Most are aware of the impact that law has on computers through the myriad of regulations that govern computers and related technologies. Less well known is the impact that computer technology is having on governance and on the practice of law. Explores both sides of this dynamic interplay between law impacting computing, and computing impacting law.

Law School Law Intell Prop, Tech, and Telecom

LAWS-8325 (2) Seminar: Reforming Criminal Trials

Starts from the premise that reform of our criminal trial system to make it less complicated, less expensive, and more reliable should be considered. Examines trial systems in other countries and U.S. changes over recent decades. Student papers make and defend proposals for reform.

LAWS-8335 (2) Seminar: Advanced Criminal Procedure

Focuses on a particular topic in criminal procedure. Topics include the privilege against self-incrimination, juries, and defense and prosecution ethics.

[Law School](#) [Law](#) [Litigation and Procedure](#)

LAWS-8341 (3) Seminar: Law and Economics of the Information Age

Examines basic regulatory and legal challenges of our information economy and digital age. Emphasizes the "Networked" information industries, the proper role of "Unbundling" policies to advance competition, and how intellectual property and antitrust rules should be developed. Prereq., LAWS 7201, 7241, or 7301. Same as TLEN 5260.

[Law School](#) [Law](#)

LAWS-8351 (2) Seminar: Law and Economics of Utility Regulation

Discusses economics of regulation and matters ranging from neoclassical economic analysis to public choice theory to new institutional economics. Discusses several regulatory domains, including antitrust law, telecommunications regulation, and energy regulation. Highlights both economic and non-economic goals, including universal service, sustainability (e.g., renewable energy), and architecture (e.g., free speech concerns with regard to telecommunications networks). Prereqs., LAWS 6301 or 7201 or 7241 or TLEN 5835. Restricted to Law and TLEN students.

[Law School](#) [Law](#) [Business](#)

LAWS-8355 (2) Seminar: Sentencing Law and Policy

Studies sentencing law against the backdrop of criminal justice policy and concerns of public policy. Covers theories of punishment, the merits of indeterminate sentencing, sentencing guidelines, and nonincarcerative sanctions. Confronts problems of race, class, and other disparities in criminal sentencing.

Law School Law

LAWS-8361 (2) Seminar: Information Privacy

Explores the laws that regulate the basic technologies of the Internet and the management of information in the digital age. It examines the most significant statutes, regulations, and common law principles that comprise this emerging legal framework, including the Federal Wiretap Act, the HIPAA Privacy Rule, and the Digital Millennium Copyright Act. Prerequisites: Restricted to Law students only.

Law School Law Intell Prop, Tech, and Telecom

LAWS-8375 (2) Seminar: Advanced Immigration and Citizenship

Explores the law and policy of citizenship in the United States, starting with legal questions regarding acquisition and loss of citizenship as well as the consequences of citizenship, but also examines the fundamental premises underlying American citizenship and the concept of citizenship generally.

Law School Law

LAWS-8395 (2) Seminar: Separation of Powers

Explores the constitutional relationships among the three branches of the federal government in the sphere of domestic matters, omitting foreign affairs and war. Develops topics including executive orders, Congressional control of the executive and the courts, appointment and removal of officers, impeachment, executive privilege, use of military tribunals, and the election of 2000. a seminar paper will be required.

Law School Law Government and Public

LAWS-8401 (2) Seminar: Securities Litigation and Enforcement

Designed for students interested in studying topics related to securities litigation. Covers civil liability under the Securities Act of 1933, proxy fraud, class actions (with special emphasis on the Private Securities Litigation Reform Act and the Securities Litigation Uniform Standards Act), market manipulation, SEC enforcement actions, enforcement issues involving attorneys and accountants, criminal enforcement, international securities fraud, and securities arbitration.

Law School Law Business

LAWS-8405 (2) Seminar: Public Health Law and Ethics

Explores rules of law pertaining to the American public health care system and the ethical issues raised by the government's effort to protect the health of the American people. To be held at Health Sciences Campus.

Law School | Law | Government and Public

LAWS-8407 (2) Seminar: Tax Policy

Explores current issues in tax policy. Topics may include the tax legislative process, consumption taxes, taxes and distributive justice, the tax exemption for nonprofits, carbon taxes, corporate taxes and integration, and taxes and entrepreneurship. Prereqs., Federal Income Tax and LAWS 6109. Prerequisites: Restricted to Law students only.

Law School | Law | Taxation

LAWS-8409 (2) Seminar Special Problems in Conflict Resolution and Management

Develops a comprehensive description of dispute; creates a conflict assessment of the stakeholders in and dynamics of dispute; assess obstacles to and opportunities for mediation; recommend strategy for addressing and managing the dispute. Prerequisites: Restricted to Law students only.

Law School | Law | Litigation and Procedure

LAWS-8415 (2) Seminar: Bioethics and Law

Focuses on legal, moral, and economic analyses of problems posed or soon to be posed by advances in biomedical technologies.

Law School | Law | Family, Gender, and Health

LAWS-8421 (2) Seminar: Duties of the Professional Advisor

Studies ethical and legal regulation of lawyers, auditors, and investment bankers, who have been described as "Gatekeepers" to the investment markets. Considers changes in ethical and legal regulation that can be adopted to restore a sense of integrity for these professionals.

Law School | Law

LAWS-8425 (2) Seminar: Advanced Torts

Explores how dignitary interests have influenced the development of and have been incorporated into law, using the common law of torts and the constitutional rights of life and liberty as a general (but not exclusive) focal point of discussion.

Law School | Law

LAWS-8428 (2) Seminar: Women in Law and Literature

Considers both legal and literary depictions of women and their legal and extralegal situations. Topics may include women as mothers, women as sexual beings, women's silence, women's

violence and women as criminals, women at work, and women as the "Other" in law and literature.

Law School Law

LAWS-8430 (2) Seminar: Comparative Public Health Law and Ethics

Compares public health law systems to those in other countries. Studies the goals, legal structures, and services provided, together with such issues of coercion as quarantines, monitoring, mandates and prohibitions, and forcing pharmaceutical companies to make available inexpensive generic drugs.

Law School Law International

LAWS-8440 (2) Seminar: International Human Rights

Investigates the sources of international human rights law and issues of jurisdiction to prescribe, adjudicate, and enforce norms. Students study treaties and reservations, customary law, declarations, resolutions, and the U.S. courts' and activists' use of materials. Topics include sovereignty and self-determination, culture, privacy, right to equality, language and speech rights, right to development, immigration, workers and globalization, and citizenship.

Law School Law

LAWS-8450 (2) Seminar: Law and Economic Development

Explores past and present debates over the role of the legal order in economic development. Studies the relationships among economic ideas, legal ideas and the development policies pursued at the national and international level in successive historical periods, beginning in the Seventeenth Century to the present. Focuses on the potential for an alliance of various traditions from economics, law and other disciplines to understand development.

Law School Law

LAWS-8458 (2) Seminar: Law and Literature

Focuses on the question of what literature can teach lawyers through a variety of literary works and films. Covers traditional works by Shakespeare, Tolstoy, Camus, Kafka, and Melville, as well as more contemporary works by Toni Morrison and Norman Mailer. Several short reflection papers, a journal, and a final paper will be required.

Law School Law Research and Writing

LAWS-8505 (2) Sem Interdisciplinary Perspectives on Law and Social Change

Introduces legal institutions engaged in social change, from courts, to Congress, to bureaucracies and organizations. Posits tension between tasks of dispute resolution and public policy development and institutional adaptations. Considers the role of public opinion and the classics of legal formalism to more critical accounts. Considers postmodern theory and empirical legal scholarship. Presents alternatives to court-centered approaches to change, including community lawyering and organizing, law and social movements, and legislation. Prerequisites: Restricted to Law students only.

Law School Law Jurisprudence and Perspective

LAWS-8508 (2) Seminar: Constitutional Foundations Core Ideas

Focuses on core ideas in U.S. constitutional law, such as means/ends analysis, institutional competence, rights definitions, and juridical techniques for limiting governmental powers. Draws from historical writings, contemporary press accounts, learned treatises, oral arguments, law review articles, and key judicial opinions such as *McCullough v. Maryland*, *Lochner v. New York*, *Brown v. Board of Education*.

Law School Law Government and Public

LAWS-8511 (2) Seminar: Wal-Mart

Examines issues raised by Wal-Mart's size, power, and business model. Considered issues bring numerous areas of law into play, including employment and labor law, social welfare legislation, class actions, antitrust, zoning, international labor and human rights regulation, and international trade. The course will show how different areas of the law are integrated in practice.

Law School Law

LAWS-8515 (2) Seminar: Forced Labor

Reviews several regimes of compulsory labor that have been central to the American experience: Black chattel slavery in the antebellum South; debt peonage, criminal surety, and related institutions of agricultural involuntary servitude; convict leasing and other forms of compulsory inmate labor; "White slavery" and prostitution; and forced labor among immigrants. Emphasizes the complicated role that the law has played, and in some respects continues to play, in both supporting and undermining such institutions.

Law School Law Government and Public

LAWS-8521 (2) Seminar: Comparative Labor Law

Explores the laws and economic transformations that affect labor relations on a global scale.

Law School Law Business

LAWS-8531 (2) Seminar: Labor and Employment in Transportation

Explores legal, social, and economic issues arising from labor relations in the industries transporting goods and people by road, rail, air, and water, among the most critical sectors of the economy.

Law School Law

[Law](#)
[Government and Public](#)

LAWS-8538 (2) Seminar: Modern Legal Theory Core Ideas

Explores key ideas that have shaped American law and legal thought, such as Holmes' bad man, the Coase Theorem, the "Hunch" theory of law, and others. Focuses on researching and writing many short papers.

[Law School](#)
[Law](#)
[Jurisprudence and Perspective](#)

LAWS-8545 (2) Seminar: Food Law and Policy

Introduces students to the laws and regulations that govern our food supply. The focus is federal law provided by the U.S. Food and Drug Administration, with additional readings, videos and

speakers. Topics to be covered include legal definitions for food, rules on food labeling, standards for food safety, biotechnology, international trade, organic and environmental regulation, hunger, farmer's markets and obesity. Prerequisites: Restricted to Law students only.

Law School | Law | Family, Gender, and Health

LAWS-8548 (2) Seminar: Theory of Punishment

Explores the various justifications that philosophers have developed to explain why we have the right to punish. Examines the historical evolution of our punishment system and focuses on the death penalty as a critical contemporary issue in the debate about the proper role of punishment in our society.

Law School | Law | Jurisprudence and Perspective

LAWS-8555 (2) Seminar: Race, Education and American Law

Explores issues of equity, access, and reform in American public education, particularly as it pertains to race, including desegregation, diversity, equal protection and public education, tracking and high-stakes testing, courts or the political branches, charters and vouchers. Restricted to Law students only. Recommended prereq., LAWS 7525. Prerequisites: Restricted to Law students only.

Law School | Law | Government and Public

LAWS-8608 (2) Seminar: Power, Ethics, and Professionalism

Examines critically the possibility and character of ethical reasoning within the legal profession in light of its institutional structures. Explores descriptive/normative accounts of the profession's structure, "Professionalism," and individual conscience. Put simply, the seminar explores whether it is possible to be a good lawyer and ethical person.

Law School | Law | Jurisprudence and Perspective

LAWS-8613 (2) Seminar: Civil Liberties Litigation

Studies issues unique to the prosecution and defense of civil liberties lawsuits. Discusses litigation strategies with reference to lawsuits currently pending in the federal courts.

Law School | Law

LAWS-8628 (2) Seminar: Law, Power, and Politics

Draws upon various works of political theory, social theory, and jurisprudence to examine different conceptualizations of politics, power, law, and their relations.

Law School | Law

LAWS-8648 (2) Seminar: The Law of Politics

Examines the legal framework that governs the political process, including such topics as the political question doctrine, the "Right to vote," the 2000 presidential election controversy, term limits, bicameralism and presentment, campaign finance, direct democracy, and the interpretation of the legislative product (i.e., statutes).

Law School Law

LAWS-8701 (2) Seminar: Counseling Families in Business

Explores the legal aspects of owning, managing, and participating in a successful family business system, including corporate structure, legal issues, succession planning and estate management, internal capital markets in private enterprise, ownership issues in private businesses, how lawyers can assist with family governance, planning for and managing family philanthropy, gender issues in family business, and conflict resolution. Recommended prereqs., LAWS 6104, 6157, 6211, and/or 7409.

Law School Law Business

LAWS-8705 (2) Seminar: Affordable Housing

Explores the policy, legal, and practical dynamics that drive the development and preservation of privately owned, government subsidized affordable housing. Investigates the nature of the market for housing, with particular emphasis on multifamily rental housing, and debates about market failure in that context and then outline and contrast the major regulatory responses to such market failure. Explores how subsidy programs work in practice, focusing on model documents to frame sample transactions.

Law School Law Government and Public

LAWS-8718 (2) Seminar: Modern Theorists and Law

Considers the work of Levi-Strauss, Steven Lukes, Pierre Bourdieu, Alfred Schutz, Anthony Giddens, Culler, David Harvey, Denis Cosgrove, Michel Foucault, and Emily Martin with respect to social control and law. Focuses on the way in which social control is exercised through the organization of space, time, and the human body. Topics include consideration of meaning, intersubjectivity in the law, social construction of time, and the body as a real and cultural artifact.

Law School Law

LAWS-8725 (2) Seminar: Advanced Topics in American Indian Law

Examines a variety of current issues related to American Indian Law. The topics will change to reflect the subjects that emerge at each time that the seminar is offered. Some examples of topics considered in this seminar include legal protections for American Indian religion and culture, cultural property, Tribal law, gaming law, and Native American natural and cultural resources law. Coreq., LAWS 7725.

Law School Law Envir, Nat Resources, Amer Ind

LAWS-8728 (2) Seminar: Critical Theory Colloquium

Surveys critical legal theory; introduces the discipline of analytical engagement with law review literature; feminist legal theory, and critical race theory. Offers a deeper understanding of the purposes behind legal reforms, the interaction between law on the books and law in action, how different groups experience the law in different ways, and difficult yet rewarding nature of working through seemingly intractable and emotionally charged race, sex, and class issues. Restricted to Law students only. Prerequisites: Restricted to Law students only.

Law School | Law | Jurisprudence and Perspective

LAWS-8755 (2) Seminar: Higher Education and the Law

Examines the goals, governance, norms, and ideals of American institutions of higher education, and how those policies are shaped by the legal system. Examines the legal relationship between institutions of higher education and its various constituents: faculty, presidents, governing boards, students, alumni, and staff. Spans several traditional doctrinal categories, including contract, torts, employment law, constitutional law, intellectual property, tax, and antitrust.

Law School | Law | Government and Public

LAWS-8765 (2) Seminar: Gender, Law, and Public Policy

Examines the relationship of law and gender in criminal law, and constitutional law, using feminist theoretical perspectives as the organizing principle. Each perspective is applied to cases and material on such topics as violence against women, prostitution, pornography, and discrimination in education and athletics. Prerequisites: Restricted to Law students only.

Law School | Law | Family, Gender, and Health

LAWS-8775 (2) Seminar: Advanced Topics in Health Law and Policy

Addresses advanced legal issues in representing physicians, long-term care institutions, hospitals, and other health providers. Issues range from economic policy, distributive justice, and bioethical questions to antitrust and regulatory issues. Recommended prereq., LAWS 7425. To be taught at Health Sciences Center.

Law School | Law

LAWS-9002 (3) Public Land Law

Deals with the legal status and management of resources on federal lands, including national forests, parks, and BLM lands. Explores federal law, policy, and agency practice affecting the use of mineral, timber, range, water, wildlife, and wilderness resources on public lands. Restricted to Law students only. Prereq., LAWS 6112. Prerequisites: Restricted to Law students only.

Law School | Law | Envir, Nat Resources, Amer Ind

LAWS-9061 (1) Contract Drafting

Begins with value creation by transactional lawyers, and emphasizes the opportunity for lawyers to reduce information and agency costs, and mitigate strategic behavior by using tools such as disclosure, representation and warranties, incentive compensation and earnouts. Shifts to negotiation and drafting, focusing on basic drafting principles and strategies to advance one's clients' interests. Introduces the basic framework of contracts (recitals, reps and warranties, capitalized terms, definitions, indemnifications and escrow). Restricted to Law students only. Prerequisites: Restricted to Law students only.

Law School Law Business

LAWS-9101 (4) Deals: Engineering Financial Transactions

Explores the business lawyer's role in creating value by helping clients identify, assess, and manage business risks through efficient contract design while achieving the optimal legal, tax or regulatory treatment for the deal. Includes case studies of actual transactions. Restricted to Law students only. Prerequisites: Restricted to Law students only.

Law School Law Business

LAWS-9104 (3) Wills and Trusts

Covers intestate succession; family protection; execution of wills; revocation and revival; will contracts and will substitutes; creation of trusts; modification and termination; charitable trusts; fiduciary administration, including probate and contest of wills; construction problems in estate distribution. Restricted to Law students only. Prerequisites: Restricted to Law students only.

Law School Law Property

LAWS-9111 (4) Business Law Colloquium

Business law scholars from CU and around the country present research papers at this weekly colloquium. Topics may include contracts, corporate law, securities regulation, tax, intellectual property, venture capital and private equity, and the legal profession. No prior knowledge of law and economics is expected, although some knowledge of business organizations will be useful. Restricted to Law students only. Prerequisites: Restricted to Law students only.

Law School Law Business

LAWS-9112 (2-3) Advanced Natural Resources Law

Provides in-depth study and analysis of current problems in natural resources law, using historical, literary, and scientific materials. Includes field-trip and requires additional field trip expenses. May be repeated up to 5 total credit hours. Restricted to Law students only. Recommended prereq., LAWS 6112 or students must have taken or be currently enrolled in any three of the following: LAWS 6002, 6112, 6302 or 7725. Prerequisites: Restricted to Law students only.

Law School Law Envir, Nat Resources, Amer Ind

LAWS-9167 (3) Partnership Taxation

Studies federal income taxation of pass-through entities such as are used by most small businesses in the U.S. Includes creation, operation, distributions, sales of interests, and liquidation. Restricted to Law students only. Prerequisites: Restricted to Law students only.

Leeds School of Business | Accounting

ACCT-6270 (3) Seminar: Income Determination

Critical analysis of problems and theory of measurement and reporting of periodic net income of business organizations. Net income models, research efforts, and role of professional accounting organizations. Current issues and problems given special attention. Prereq., ACCT 3230 or equivalent, or instructor consent.

Leeds School of Business | Accounting

ACCT-6350 (3) Current Issues in Professional Accounting

Examines the nature of accounting theory and practice from perspectives of economics, law, globalization, accounting, ethics, and moral reasoning. This course also explores issues including

implications of institutional factors, such as Sarbanes-Oxley, SEC, FASB, IFRS, and capital markets. Counts as senior seminar for Concurrent degree students. Restricted to Accounting, Finance/Accounting, Information Systems/Accounting, Systems/Accounting Concurrent Degree students or Accounting, Accounting/Taxation or Business Administration graduate students only. Prerequisites: Restricted to Accounting, Finance/Accounting, Information Systems/Accounting, Systems/Accounting Concurrent Degree students or Accounting, Accounting/Taxation or Business Administration graduate students only.

Leeds School of Business | Accounting

ACCT-6420 (3) Research and Writing in Income Taxation

Studies and applies the method used in tax research and tax planning, with the goal of developing tax research, technical writing, and tax planning skills. Topics include examining primary and secondary sources of federal tax law, evaluating the hierarchy of these sources, and developing technical writing skills using deductive legal reasoning. Prereq., ACCT 5440 or equivalent, or instructor consent. Prerequisites: Restricted to graduate students in Accounting, Finance, Mgt Sci-Information Systems, Organizational Management, Marketing, Business Administration, or Master of Business Administration.

Leeds School of Business | Accounting

ACCT-6430 (3) Taxation of Partnerships

Studies federal income taxation of pass-through entities such as those used by most small businesses in the U.S. Includes creation, operation, distributions, sale of interests, and liquidation. Prereq., ACCT 5440 or equivalent, or instructor consent. Coreqs., ACCT 6420 and 6700. Restricted to Accounting, Finance/Accounting, Information Systems/Accounting, Systems/Accounting Concurrent Degree students or Accounting, Accounting/Taxation or Business Administration graduate students only. Same as LAWS 6167. Prerequisites: Restricted to Accounting, Finance/Accounting, Information Systems/Accounting, Systems/Accounting Concurrent Degree students or Accounting, Accounting/Taxation or Business Administration graduate students only.

Leeds School of Business | Accounting

ACCT-6440 (2-3) Tax Policy

Offers a research seminar exploring policy issues of taxation including recent legislative proposals. Students prepare a publishable research paper on a tax policy topic agreed upon with the instructor. Prereq., ACCT 5440 or equivalent, or instructor consent. Coreqs., ACCT 6420 and 6700.

Leeds School of Business | Accounting

ACCT-6450 (3) Taxation of Corporations

Studies federal income taxation related to taxable corporations, the entities through which a large part of the economic activity in the U.S. is conducted. Includes creation, operation, distributions, sale of interests, and liquidation. Prereq., ACCT 5440 or instructor consent. Coreqs., ACCT 6420 and 6700. Same as LAWS 6157. Prerequisites: Restricted to Business Administration, Accounting, Accounting-Taxation, Accounting-Information Systems, Mgt Sci-Information Systems, Finance, Marketing or Master of Business Admin graduate students only.

Leeds School of Business | Accounting

ACCT-6490 (3) Taxation of Natural Resources

Concerned with tax problems encountered in acquisition, operation, and disposition of natural resource properties. Topics include depletion, lease bonuses, intangible drilling costs, depreciation,

and financing arrangements. Prereqs., admission to the graduate tax program, ACCT 6700 or equivalent, or instructor consent.

Leeds School of Business | Accounting

ACCT-6500 (3) Special Topics in Taxation

Covers a diverse array of issues in taxation. Highlights areas of current interest and draws on the strengths of leading outside authorities as guest lecturers in various topic areas. Prereq., ACCT 6420 and 6700.

Leeds School of Business | Accounting

ACCT-6620 (3) Advanced Auditing: Business Risk and Decision Analysis

Explores contemporary issues, historical developments, and selected topics pertinent to business assurance services by independent accountants. Emphasizes improving both the decision behavior of decision makers and the quality of information, or its context, for decision makers. Prereq., ACCT 5620 or equivalent.

Leeds School of Business | Accounting

ACCT-6700 (4) Income Taxation

Emphasizes the fundamentals of the federal income tax system and examines its impact on the individual. Prereq., ACCT 5440 or equivalent. Same as LAWS 6007. Prerequisites: Restricted to Accounting (ACCT), Accounting-Information Systems (ACIS), Accounting - Taxation (ACTX), Master of Business Admin (MBA) or Business Administration (BUAD) graduate students only.

Leeds School of Business | Accounting

ACCT-6710 (3) Federal Estate and Gift Tax

Analyzes federal estate and gift taxation of inter vivos and testamentary transfers, introduces income taxation of estates and trusts, and involves elementary estate planning. Prereq., ACCT 5440 or equivalent. Coreqs., ACCT 6420 and 6700. Same as LAWS 7207. Prerequisites: Restricted to Accounting (ACCT), Accounting-Information Systems (ACIS), Accounting - Taxation (ACTX), Master of Business Admin (MBA) or Business Administration (BUAD) graduate students only.

Leeds School of Business | Accounting

ACCT-6720 (2) Estate Planning

Discusses problems and solutions for owners of various-sized estates and different types of assets including jointly-held property, stock in closely-held corporations and farms, analysis of federal taxation of generation-skipping transfers in trust, postmortem estate planning, and drafting of trusts and wills. Prereq., ACCT 6710 or equivalent. Same as LAWS 7217.

Leeds School of Business | Accounting

ACCT-6780 (3) International Taxation

Covers basic aspects of the United States taxation of income earned abroad by its citizens and the taxation income derived by foreign persons from U.S. sources, including the implications of income tax treaties. Restricted to Accounting, Finance/Accounting, Information Systems/Accounting, Systems/Accounting Concurrent Degree students or Accounting, Accounting/Taxation or Business Administration graduate students only. Same as LAWS 7617. Prerequisites: Restricted to Accounting, Finance/Accounting, Information Systems/Accounting, Systems/Accounting Concurrent Degree students or Accounting, Accounting/Taxation or Business Administration graduate students only.

Leeds School of Business | Accounting

ACCT-6820 (1-3) Graduate Seminar

Experimental seminar offered irregularly to provide opportunity for investigation of new frontiers in accounting. Prereq. varies.

Leeds School of Business | Accounting

ACCT-6900 (1-6) Independent Study

Requires prior consent of instructor under whose direction study is taken. Departmental form required. Prerequisites: Restricted to Accounting, Finance/Accounting, Information Systems/Accounting, Systems/Accounting Concurrent Degree students or Accounting, Accounting/Taxation or Business Administration graduate students only.

Leeds School of Business | Accounting

ACCT-6940 (1) Master's Degree Candidacy

Departmental form required. Prerequisites: Restricted to Business graduate students only.

Leeds School of Business | Accounting

ACCT-6950 (1-4) Master's Thesis

Prerequisites: Restricted to Business graduate students only.

Leeds School of Business | Accounting

ACCT-7300 (3) Doctoral Seminar: Introduction to Accounting Research

Introduces students to seminal accounting research, covering a variety of topics and research methods. Provides students with instruction and experience in reading, critiquing and discussing accounting research. Provides a framework for understanding the financial reporting choice from both contracting and valuation perspectives.

ACCT-7320 (3) Doctoral Seminar: Accounting and Capital Markets I

One semester of a two-semester course in accounting-related capital markets and research, spanning topics such as: information intermediaries; earning management; auditing and other monitoring mechanisms; efficient versus opportunistic accounting choice related to contracts between the firm and its stakeholders; cost of capital; and market efficiency with respect to accounting information. Papers covered apply primarily economics-based archival and empirical research methods. Prereq., ACCT 7300.

Leeds School of Business | Accounting

ACCT-7330 (3) Doctoral Seminar: Accounting and Capital Markets 2

The second semester of a two-semester course in accounting-related capital markets research. See ACCT 7320 for a description of the course content which is allocated evenly between ACCT 7320 and 7330.

Leeds School of Business | Accounting

ACCT-7340 (3) Doctoral Seminar: Managerial Accounting Research

Survey of managerial accounting research, emphasizing a variety of methodologies including economics-based archival empirical and experimental approaches. Topics include: management performance measurement; management incentives; non-financial performance measures; management control systems; cost behavior and cost structure; intra-firm transfer pricing; inter-firm relations and knowledge sharing; risk preferences; risk taking and risk sharing; strategic performance measurement; agency theory; and budgetary slack and performance. Prereq., Acct 7300. Prerequisites: Restricted to Graduate Students only.

Leeds School of Business | Accounting

ACCT-7800 (3) Doctoral Seminar: Accounting Theory

Follows the evolution of game-theoretical analytical research and application of analytical methods to topics including: accounting-based valuation, discretionary disclosure, stewardship role of accounting, insider trading and imperfect capital market models, signaling through accounting choice, deferred tax accounting, audit sampling, auditor rotation, and low balling. Describes implications of analytical results for primarily economics-based empirical research designs. Open only to doctoral students.

Leeds School of Business | Accounting

ACCT-7830 (3) Doctoral Seminar: Accounting Research

Designed to assist the doctoral student in integrating courses and fields of study in order to be able to apply knowledge and skills to problems in accounting. Special attention given to the development of thesis topics.

Leeds School of Business | Accounting

ACCT-8820 (1-6) Graduate Seminar

Provides opportunity for investigation of new frontiers in accounting through an experimental seminar. May be repeated up to 6 total credit hours. Prereq. varies. Offered irregularly.

Leeds School of Business | Accounting

ACCT-8900 (1-3) Independent Study

Requires instructor's consent and departmental form (taught as doctoral seminar). Prerequisites: Restricted to Business graduate students only.

Leeds School of Business | Accounting

ACCT-8990 (1-10) Doctoral Thesis

Prerequisites: Restricted to Business graduate students only.

Leeds School of Business | Accounting

REAL-4000 (3) Real Estate Law

Building upon the legal concepts and issues introduced in REAL 3000, the course provides a deeper study of the laws and legal issues impacting and governing real property rights and interests including the acquisition, ownership, possession, use and transfer of real property. Incorporates both a lecture and case study approach fostering regular classroom discussions. Prereq., REAL 3000. Prerequisites: Requires pre-requisite course of REAL 3000. Restricted to Business majors with 52-180 units completed.

[Leeds School of Business](#) | [Real Estate](#)

University of Colorado Boulder

FNCE-4000 (3) Financial Institutions Management

Analyzes the structure, markets, and regulations of financial institutions. Studies problems and policies of internal management of funds, loan practices and procedures, investment behavior, deposit and capital adequacy, liquidity, and solvency. Prereq., FNCE 3010. Prerequisites: Requires pre-requisite course of FNCE 3010. Restricted to Business majors with 52-180 units completed.

[Leeds School of Business](#) [Finance](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

FNCE-4030 (3) Investment and Portfolio Management

Develops modern portfolio theory and applies it to pricing both individual assets and portfolios of assets. Topics include Markowitz portfolio selection model, capital asset pricing model, arbitrage pricing theory, options, futures, bonds, portfolio performance measurement, and issues of market efficiency. Prereq., FNCE 3010. Prerequisites: Requires pre-requisite course of FNCE 3010. Restricted to Business majors with 52-180 units completed.

[Leeds School of Business](#) [Finance](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

FNCE-4040 (3) Derivative Securities

Develops the modern theory of contingent claims in a mathematical framework oriented toward applications. Examines how to use derivatives for risk management and to tailor portfolio payoffs. Provides an in-depth analysis of the properties of options. Prereq., FNCE 3010. Prerequisites: Requires pre-requisite course of FNCE 3010. Restricted to Business majors with 52-180 units completed.

[Leeds School of Business](#) [Finance](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

FNCE-4050 (3) Capital Investment Analysis

Focuses on capital budgeting and investment issues. Emphasizes issues relating to cash flows, capital rationing, the investment versus financing decision, leasing, fluctuating rates of output, investment timing, capital budgeting under uncertainty, and investment decisions with additional information. Prereq., FNCE 3010. Prerequisites: Restricted to Business majors with 52-180 units completed.

FNCE-4832 (3) Microfinance

In the last two decades, microfinance initiatives have provided the primary worldwide impetus to promote economic independence for the poor (1.4 billion). Microfinance seminar links the financial markets with entrepreneurship to create a platform for building a microfinance institution that facilitates financial inclusion to the poor. The students in a semester long project build a hypothetical financial institution that provides access to credit, saving, insurance and more to a segmented poor population, somewhere in the world including the U.S. CESR 4010 and FNCE 4832 are the same course. Prerequisites: Requires pre-requisite course of BCOR 2200. Restricted to Business majors with 90-180 units completed.

[Leeds School of Business](#) [Finance](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

FNCE-4850 (3) Business Senior Seminar in Finance

Develops analytical and decision making skills necessary to address real-world business finance situations. Topics include financial analysis and forecasting, capital budgeting, valuation, capital structure policy, international finance, and financial ethics. Uses a combination of lecture and cases; team and individual work. Prereqs., ACCT 3220, FNCE 3010, 4030, and 102 hours completed. Restricted to graduating senior FNCE majors. Formerly BCOR 4002. Prerequisites: Requires pre-requisite course of FNCE 3010. Restricted to Finance majors with 102 to 180 units completed.

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

MGMT-4020 (3) Hiring and Retaining Critical Human Resources

Allows students the opportunity to practice conducting job analyses and then use this information to develop employee selection and performance appraisal systems. Provides thorough coverage of employers' equal employment opportunity and affirmative action obligations, as well as various approaches to gender, cultural, and ethnic diversity. Prereq., BCOR 2300. Restricted to students with 52 hours completed. Prerequisites: Restricted to Business majors with 52-180 units completed.

[Leeds School of Business](#) | [Management](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

MGMT-4030 (3) Managing Employee Reward Systems

Examines theories of work motivation and relates them to the strategic use of compensation and other reward systems. Topics include procedures for managing base pay; linking pay incentives to productivity at the individual, group, and organizational levels; developing cost-effective programs of employee benefits; and the use of nonfinancial reward systems. Prereq., BCOR 2150 or BCOR 2300. Restricted to students with 52 hours completed. Prerequisites: Restricted to Business majors with 52-180 units completed.

[Leeds School of Business](#) | [Management](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

MGMT-4040 (3) Individual, Team, and Organizational Development

Explores how to determine where an organization needs to focus its development efforts, how to develop and deliver an effective training program, and how to evaluate the impact of development programs on organizational effectiveness. Explores individual, team, and organization-wide development, including such topics as skills training, team building, and managing change. Prereq., BCOR 2150 or BCOR 2300. Restricted to students with 52 hours completed. Prerequisites: Restricted to Business majors with 52-180 units completed.

[Leeds School of Business](#) | [Management](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

MGMT-4090 (3) IT and Business Strategy

Although some companies are very successful in discovering and cultivating innovative technology-enabled business strategies, many fail in the process. Combines theories and frameworks with practical approaches to provide students with the skills required to help companies identify business opportunities, find appropriate information related technologies, and lead adoption efforts to success. Prereqs., BCOR 2200 or BCOR 2300. Restricted to business majors with 52 hours completed. Prerequisites: Restricted to Business majors with 52-180 units completed.

[Leeds School of Business](#) | [Management](#)

University of Colorado Boulder

[Privacy](#) • [Legal & Trademarks](#)

MGMT-4130 (3) Sustainable Operations

Operational sustainability is not just an obligation, as set of strategies or a niche market to explore, but a critical shift in mindset of how businesses function. Sustainable operations examines business strategies in response to environmental and social challenges. The course takes a pragmatic business perspective on improving operations across the supply chain. Grounded in resource efficiency, life-cycle thinking and a dose of investigative skepticism, the course assists students to thoroughly understand the scope of costs, benefits and risks associated with driving businesses toward sustainable operations. Prereqs., BCOR 2500, 3010 and 60 hours completed. MGMT 4130 and CESR 4130 are the same course. Prerequisites: Restricted to Business, AEBU, ARBU, CEBU, CVBU, CSBU, ECBU, MEBU, EVBU, ADBU, BNBU, NEBU or MUBU Majors with 52-180 units completed.

[Leeds School of Business](#) | [Management](#)

University of Colorado Boulder

[Privacy](#) • [Legal & Trademarks](#)

MGMT-4140 (3) Project Management

Introduces multidisciplinary project management concepts, skills, and tools, including the relationship between project definition, organization, planning, scheduling, resource and risk management, control, costing, and performance. Presents both qualitative and quantitative tools for better project management. Prereq., BCOR 2500 and 52 hours completed. Formerly OPIM 4080 and MGMT 4085. Prerequisites: Restricted to Business majors with 52-180 units completed.

[Leeds School of Business](#) | [Management](#)

University of Colorado Boulder

© Regents of the University of Colorado

[Privacy](#) • [Legal & Trademarks](#)

MGMT-4150 (3) International Operations Management

Compares systems of production/operations management in the United States with those in Japan, Europe, and Asia. Contrasts various regional and national approaches to business, quality management, labor practices, management styles, international competitiveness, productivity, distribution systems, trade practices, and strategies for penetrating foreign markets. Examines different sociocultural environments, government-business relationships, banking industries, operations strategies, and the potential for transferring industrial management practices and techniques between countries. Prereq., BCOR 2500. Restricted to students with 52 hours completed. Formerly OPIM 4065 and MGMT 4070. Prerequisites: Restricted to Business majors with 52-180 units completed.

MKTG-7600 (3) Doctoral Seminar: Services Marketing

Study of marketing literature dealing with services. Includes such topics as service management, theoretical issues in the study of services, and strategies in travel, tourism, recreation, and financial services industries.

[Leeds School of Business](#) | [Marketing](#)

MKTG-7800 (3) Doctoral Proseminar: Marketing

Provides marketing doctoral students with an orientation to the marketing field and introduces contemporary research perspectives and priorities. Students discuss papers that illustrate academic researchers' use of various disciplinary perspectives to address marketing problems and the range of theoretical and empirical methods used.

[Leeds School of Business](#) | [Marketing](#)

MKTG-7805 (3) Doctoral Seminar: Economic and Administrative Science Approaches to Research

Examines marketing management and consumer behavior issues from the vantage of economics and organizational theory. One segment of the course focuses on theoretical and empirical analysis of the means by which utility-maximizing consumers learn about consumption environment and respond to firms' marketing decisions. Another segment examines research on firms' competitive strategy and marketing mix decisions and explores how organizational sociological factors influence these decisions.

[Leeds School of Business](#) | [Marketing](#)

MKTG-7810 (3) Doctoral Seminar: Psychological Approaches to Research in Marketing

Examines the basic psychological processes that underlie common marketing phenomena. Topics include memory and judgment, persuasion, attitude-behavior consistency, information processing, automatic and controlled processes, learning, motivation and cognition, social judgment, and the role of affect and mood on judgment. Discusses topics in consumer behavior and marketing management contexts, in conjunction with related methodological issues. Prerequisites: Restricted to Graduate Students only.

Leeds School of Business | Marketing

MKTG-7815 (3) Doctoral Seminar: Consumer and Managerial Decision Making in Marketing

Examines judgment and decision making research pertinent to understanding how consumers and marketing managers make decisions. Uses economic models as a normative backdrop for examining research on decision heuristics, judgment and choice anomalies, and contingent decision behavior. Examines processes of causal judgment and inference and the influence of a variety of contextual factors (including time) on judgment and decision.

Leeds School of Business | Marketing

MKTG-7820 (3) Doctoral Seminar: Sociological and Anthropological Approaches to Research in Market

Inquires into substantive and methodological issues concerning postmodern consumer research. Attains depth in a few areas while also providing a framework in which to situate other substreams of research. Uses ethnography, semiotics, literary analysis, and other interpretive methods to examine topics such as brand and store loyalty, atmospheric and shopping dynamics, creation of brand meanings, and other marketplace behaviors.

Leeds School of Business | Marketing

MKTG-7825 (3) Doctoral Seminar: Empirical Models in Marketing

Presents state-of-the-art empirical modeling techniques (both reduced-form and structural) used by marketing scientists, as well as discuss the key findings generated from major empirical studies. Acquaint the class participants with the systematic process of conducting rigorous empirical marketing research, enable them to read and critically review empirical papers in leading marketing journals and, ultimately, start doing independent empirical research. Prereq., a graduate course in regression.

Leeds School of Business | Marketing

MKTG-7830 (3) Doctoral Seminar: Dissertation Research

Assists doctoral students in integrating courses and fields of study in order to be able to apply knowledge and skills to problems in marketing. Gives special attention to development of thesis topics.

Leeds School of Business | Marketing

MKTG-8820 (1-6) Doctoral Seminar: Special Topics

Studies marketing literature on a topic or topics selected by instructor. Examples include marketing history, international marketing management, marketing environment, marketing of high

technology products, and marketing models.

Leeds School of Business | Marketing

MKTG-8900 (1-3) Independent Study

Requires consent of instructor under whose direction study is taken. Departmental form required.

INBU-3300 (3) International Business and Management

This survey course takes a broad and comprehensive perspective on managing and operating in a rapidly growing global economy. Explores regional and national approaches to international management, including trade practices, country penetration strategies, international finance and accounting, marketing across cultures, global service and manufacturing operations, cultural and legal differences, ethical and sustainability issues, and global competitive strategy. Prereq., 52 hours completed. Formerly INBU 4300. Prerequisites: Restricted to Business or International Affairs majors with 52-180 units completed.

[Leeds School of Business](#) [International Business](#)

INBU-3450 (3) International Marketing

Describes the economic, geographic, political, and social forces that have shaped and continue to define global markets. Examines topics critical to success in international markets, including assessment of a firm's international capabilities, techniques for gauging the potential of international markets, international segmentation approaches, and alternative arrangements for entering foreign markets. Compares and contrasts product, price, distribution, logistics, promotion, and research decisions made in global versus domestic markets. Introduces students to financial arrangements characteristic of international marketing, including exchange rates and controls, balance-of-payment principles, import licensing agreements and tariffs. Restricted to Business (BUSN), Advertising (ADVT) or International Affairs (IAFS) majors with 52-180 units completed. Prereq., BCOR 2400. Same as INBU 5100. Formerly MKTG 3450. Prerequisites: Requires pre-requisite class of BCOR 2400. Restricted to Business (BUSN), Advertising (ADVT) or International Affairs (IAFS) majors with 52-180 units completed.

[Leeds School of Business](#) [International Business](#)

INBU-4200 (3) International Financial Management

Examines the financial policies and problems associated with firms doing business internationally. Topics include the foreign exchange environment, country risk, managing foreign exchange exposure, international working capital management, international capital budgeting, and international financial markets. Prereqs., BCOR 1020, 2000, and 2200. Restricted to students with 52 hours completed. Prerequisites: Requires pre-requisite courses of BCOR 2200. Restricted to Business or IAFS Majors with 52-180 units completed.

[Leeds School of Business](#) [International Business](#)

INBU-4825 (1-6) Experimental Seminar

Offered irregularly to provide opportunity for investigation of new frontiers in International Business Entrepreneurship. Prerequisites: Restricted to students with 57-86 credits (Junior).

INBU-3450 (3) International Marketing

Describes the economic, geographic, political, and social forces that have shaped and continue to define global markets. Examines topics critical to success in international markets, including assessment of a firm's international capabilities, techniques for gauging the potential of international markets, international segmentation approaches, and alternative arrangements for entering foreign markets. Compares and contrasts product, price, distribution, logistics, promotion, and research decisions made in global versus domestic markets. Introduces students to financial arrangements characteristic of international marketing, including exchange rates and controls, balance-of-payment principles, import licensing agreements and tariffs. Restricted to Business (BUSN), Advertising (ADVT) or International Affairs (IAFS) majors with 52-180 units completed. Prereq., BCOR 2400. Same as INBU 5100. Formerly MKTG 3450. Prerequisites: Requires pre-requisite class of BCOR 2400. Restricted to Business (BUSN), Advertising (ADVT) or International Affairs (IAFS) majors with 52-180 units completed.

CESR-4000 (1) Leadership Challenges I: Exercises in Moral Courage

Part one of a year-long course that focuses on values and leadership at the top level of organizations. The course is based on an interactive model that brings in six high-level executives to share their experiences and present critical business dilemmas, to which students prepare solutions for the executives to evaluate. Recommended prereq., BCOR 3010. By instructor recommendation only. Prerequisites: Restricted to students with 57-180 credits (Juniors or Seniors).

[Leeds School of Business](#) | [Curriculum Emphasis on Social Responsibility](#)

CESR-4001 (2) Leadership Challenges II: Exercises in Moral Courage

Continuation of a year-long course that focuses on values and leadership at the top level of organizations. The course is based on an interactive model that brings in six high-level executives to share their experiences and present critical business dilemmas, to which students prepare solutions for the executives to evaluate. Prereq., CESR 4000. Recommended prereq., BCOR 3010. By instructor recommendation only. Prerequisites: Restricted to students with 57-180 credits (Juniors or Seniors).

[Leeds School of Business](#) | [Curriculum Emphasis on Social Responsibility](#)

CESR-4005 (3) Business Solutions for the Developing World: Learning through Service

Students work in teams to provide business advice to social entrepreneurs, social ventures and Peace Corps volunteers who are working to solve global social and environmental problems. The primary objective of the class is to provide student with practical knowledge and experience in developing proactive, sustainable business strategies to meet the needs of the poor and to encourage students to think critically about how business can make an impact on global poverty. Prereq. or coreq., BCOR 3010. Prerequisites: Restricted to Business (BUSN) majors with 52-180 units completed.

[Leeds School of Business](#) | [Curriculum Emphasis on Social Responsibility](#)

CESR-4010 (3) Microfinance

In the last two decades, microfinance initiatives have provided the primary worldwide impetus to promote economic independence for the poor (1.4 billion). Microfinance seminar links the financial markets with entrepreneurship to create a platform for building a microfinance institution that facilitates financial inclusion to the poor. The students in a semester long project build a hypothetical financial institution that provides access to credit, saving, insurance and more to a segmented poor population, somewhere in the world including the U.S. CESR 4010 and FNCE 4832 are the same course. Prerequisites: Requires pre-requisite course of BCOR 2200. Restricted to Business majors with 90-180 units completed.

Leeds School of Business | Curriculum Emphasis on Social Responsibility

CESR-4130 (3) Sustainable Operations

Operational sustainability is not just an obligation, as set of strategies or a niche market to explore, but a critical shift in mindset of how businesses function. Sustainable operations examines business strategies in response to environmental and social challenges. The course takes a pragmatic business perspective on improving operations across the supply chain. Grounded in resource efficiency, life-cycle thinking and a dose of investigative skepticism, the course assists students to thoroughly understand the scope of costs, benefits and risks associated with driving businesses toward sustainable operations. Prereqs., BCOR 2500, 3010 and 60 hours completed. MGMT 4130 and CESR 4130 are the same course. Prerequisites: Restricted to students with 60-180 units completed.

Leeds School of Business | Curriculum Emphasis on Social Responsibility

CESR-4821 (3) Values & Power of the Consumer in Society

As a critical stakeholder group, consumers have substantial power to shape business behavior. Students will develop an understanding of the roles business can play in society, and the options and limitations that consumers have to influence business by exerting their purchasing power. This class is exclusively for non-business majors and will not count toward the business major or business minor. Prerequisites: Open to Non Business and Non Sponsored Students.

Leeds School of Business | Curriculum Emphasis on Social Responsibility

CESR-4825 (3) Experimental Seminar

Offered irregularly to provide opportunity for investigation of new frontiers in Social Responsibility. Prereq., BCOR 3010. Restricted to BUSN majors with minimum 52 units completed. Prerequisites: Restricted to Business majors with 52-180 units completed.

Leeds School of Business | Curriculum Emphasis on Social Responsibility

CESR-4826 (3) Exp. Sem-Social Entrepreneurship: Designing a Better World

See the future through the eyes of entrepreneurs who are addressing global and social environmental problems such as poverty and deforestation. Can the social ventures they create to solve these problems survive over time and will they achieve the impact they seek? We will meet some of these social entrepreneurs and, in teams, write case studies to tell their stories. Restricted to non-Business majors with 60-180 units completed. CESR 4826 and ESBM 4826 are the same course. Prerequisites: Restricted to non-Business majors with 60-180 units completed.

Leeds School of Business | Curriculum Emphasis on Social Responsibility

CESR-4827 (3) Integrated Reporting for Socially Responsible Strategies

Explores the growing global trend of companies to measure, disclose and report for socially responsible initiatives. Integrated reporting combines financial, environmental, social and governance information into a single report. Current practices in sustainability and integrated reporting in the US and across the world will be examined/learned through case studies, guest speakers, current

literature and projects. Can be taken concurrently with BCOR 3010 and ACCT 3220. Same as ACCT 4827. Prerequisites: Requires pre-req course of BCOR 2000 and 2200. Restricted to students with 57-180 credits (Juniors or Seniors).

MBAC-6000 (3) Socially Responsible Enterprise

Prepares future managers for confronting the truly difficult situations that arise when deploying economic resources, altering the physical environment, and making decisions that affect the lives of investors, employees, community members and other stakeholders. Case-based challenges will be examined in a broad range of contexts, and essential ethical concepts will be explored by drawing on theories from ethics, sociology, economics, political science and philosophy. Prerequisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

[Leeds School of Business](#)
[Master of Business Administration](#)
[MBA: Core Courses](#)

MBAC-6010 (3) Managerial Economics

Studies the elements of the business firm's fundamental problem---how to maximize profits. Develops for each element managerial theory based upon introductory and intermediate-level microeconomics. Analyzes various applications and misapplications of relevant concept, primarily through case studies. Differential calculus and statistics are used throughout the course. Prerequisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

[Leeds School of Business](#)
[Master of Business Administration](#)
[MBA: Core Courses](#)

MBAC-6011 (2) Managerial Economics 1

Studies the elements of the business firm's fundamental problem---how to maximize profits. Develops for each element managerial theory based upon introductory and intermediate-level microeconomics. Analyzes various applications and misapplications of the relevant concept, primarily through case studies. Differential calculus and statistics are used throughout the course. Prerequisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

[Leeds School of Business](#)

[MBA: Core Courses](#)

MBAC-6012 (2) Managerial Economics 2

See MBAC 6011. Prerequisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Leeds School of Business | Master of Business Administration | MBA: Core Courses

MBAC-6020 (3) Financial Accounting

Introduces the financial reporting system used by business organizations to convey information about their economic affairs. Develops an understanding of financial reports and what they tell about a business enterprise. Focuses on how alternative accounting measurement rules represent different economic events in financial reports. Prerequisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Leeds School of Business | Master of Business Administration | MBA: Core Courses

MBAC-6030 (3) Quantitative Methods

Covers foundations for statistical reasoning and statistical applications in business. Topics include graduate-level treatment of descriptive statistics, probability, probability distributions, sampling theory and sampling distributions, and statistical inference (estimation and hypothesis testing). Provides an introduction to regression analysis, analysis of variance, time series forecasting, decision analysis, index numbers, and nonparametric methods. Prerequisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Leeds School of Business | Master of Business Administration | MBA: Core Courses

MBAC-6031 (2) Quantitative Methods

Covers foundations for statistical reasoning and statistical applications in business. Topics include graduate-level treatment of descriptive statistics, probability, probability distributions, sampling theory, sampling distributions, and statistical inference (estimation and hypothesis testing). Provides an introduction to regression analysis, analysis of variance, time series forecasting, decision analysis, index numbers and nonparametric methods. Prerequisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Leeds School of Business | Master of Business Administration | MBA: Core Courses

MBAC-6050 (3) Strategy

Analyzes how firms can attain and sustain competitive advantage in today's competitive environment. Focuses on industry dynamics, competitive positioning, firm capabilities, and corporate innovation. Introduces a set of tools for assisting managers in solving complex, real-world business problems in strategy development. Integrates MBA learning in functional areas, and emphasizes the fit between competitive analysis and the role of management and organization. Prerequisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Leeds School of Business | Master of Business Administration | MBA: Core Courses

MBAX-6051 (2) Strategy

Analyzes how firms can attain and sustain competitive advantage in today's competitive environment. Focuses on industry dynamics, competitive positioning, firm capabilities, and corporate innovation. Introduces a set of tools for assisting managers in solving complex, real-world business problems in strategy development. Integrates MBA learning in functional areas, and emphasizes the fit between competitive analysis and the role of management and organization.

Leeds School of Business | Master of Business Administration | MBA: Management

MBAC-6052 (3) Capstone Projects

Provides students with an opportunity to focus on a specific project which would have a positive strategic impact on the company for which they work. For those who have entrepreneurial aspirations, this project could result in a business plan for a new venture. Final deliverable should address marketing, financial, operational, and management implications and strategic impact. Prerequisites: Restricted to Professional MBA Program (PMBA) majors only.

Leeds School of Business | Master of Business Administration | MBA: Core Courses

MBAC-6060 (3) Corporate Finance

Analyzes the implications of modern finance theory for the major decisions faced by corporate financial managers. Develops the basic skills necessary to apply financial concepts to the various problems faced by a firm. Includes capital budgeting, capital structure, long term financing, short term financial management, and financial planning topics. Prereq., MBAC 6020. Prerequisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Leeds School of Business | Master of Business Administration | MBA: Core Courses

MBAC-6080 (3) Decision Modeling and Applications

Integrates topics from decision analysis and operations management as they relate to modeling management decisions. Field projects involve the university, local companies, and/or government agencies. Prereq., MBAC 6030. Prerequisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Leeds School of Business | Master of Business Administration | MBA: Core Courses

MBAC-6090 (3) Marketing Management

Provides a solid foundation of marketing knowledge by focusing on principles of marketing. Introduces the role that marketing cases play in advancing understanding and skill development in the field of marketing. Case discussions illustrate concepts discussed, and case studies are used to introduce the marketing decision making process. Emphasizes the international nature of marketing, as well as the importance of analysis and the understanding of the economic, demographic, political-legal-regulatory, sociocultural, technological, and natural environments. Prereq., MBAC 6030. Prerequisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Leeds School of Business | Master of Business Administration | MBA: Core Courses

MBAC-6098 (1) Business Writing

Develops business writing skills, with specific focus on style rather than content. Assists students in improving their writing skills in order to be effective communicators in their professional careers. Prerequisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

| | | |
|--------------------------|-----------------------------------|-------------------|
| Leeds School of Business | Master of Business Administration | MBA: Core Courses |
|--------------------------|-----------------------------------|-------------------|

MBAC-6099 (2) Professional Development

Develops presentation and interview skills to help students become effective communicators in their professional careers and to acquaint themselves well in the job placement process.

Prerequisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

| | | |
|--------------------------|-----------------------------------|-------------------|
| Leeds School of Business | Master of Business Administration | MBA: Core Courses |
|--------------------------|-----------------------------------|-------------------|

MBAX-6100 (3) Entrepreneurship

Examines the environments of entrepreneurial firms from start-up to development of ventures. Allows students to assess their fit with entrepreneurial firms. Key element is learning the process of determining the difference between ideas and commercializable opportunities through feasibility analysis and plans. Prereq., MBAC 6020 or instructor consent. Prerequisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

| | | |
|--------------------------|-----------------------------------|-----------------------|
| Leeds School of Business | Master of Business Administration | MBA: Entrepreneurship |
|--------------------------|-----------------------------------|-----------------------|

MBAX-6101 (2) Entrepreneurship

Examines the environments of entrepreneurial firms from start-up to development of ventures; allows students to assess their "fit" with entrepreneurial firms. A key element is learning the process of determining the difference between ideas and commercializable opportunities through feasibility analysis and plans. Prereqs., MBA core courses. Prerequisites: Restricted to Professional MBA Program (PMBA) majors only.

| | | |
|--------------------------|-----------------------------------|-----------------------|
| Leeds School of Business | Master of Business Administration | MBA: Entrepreneurship |
|--------------------------|-----------------------------------|-----------------------|

MBAX-6110 (3) Entrepreneurial Finance

Addresses a variety of topics including financial valuation, various sources of funds, structures and legal issues in arranging financing, the private and public venture capital markets, and preparation for, and execution of, an initial public securities offering. Prereq., MBAC 6020. Prerequisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

| | | |
|--------------------------|-----------------------------------|-----------------------|
| Leeds School of Business | Master of Business Administration | MBA: Entrepreneurship |
|--------------------------|-----------------------------------|-----------------------|

MBAX-6111 (2) Entrepreneurial Finance

Addresses a variety of topics including financial valuation, various sources of funds, structures and legal issues in arranging financing, the private and public venture capital markets, and preparation for, and execution of, an initial public securities offering. Prereqs., MBA core courses. Prerequisites: Restricted to Professional MBA Program (PMBA) majors only.

| | | |
|--------------------------|-----------------------------------|-----------------------|
| Leeds School of Business | Master of Business Administration | MBA: Entrepreneurship |
|--------------------------|-----------------------------------|-----------------------|

MBAX-6120 (3) Entrepreneurial Marketing

Addresses the marketing challenges that face the entrepreneur or start up firm with a limited budget. From initially positioning the company and its products to marketing that position to key

shareholders for a new venture, to establishing channels of distribution and reaching the consumer, take a specialized look at the development and implementation of a marketing plan. Prerequisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Leeds School of Business | Master of Business Administration | MBA: Entrepreneurship

MBAX-6170 (3) Business Plan Preparation

Completion of a sophisticated business plan within task groups from concept through all the elements of a professionally written business plan. Provides students high interaction with businesses and entrepreneurs. Prereq., MBAC 6020 and MBAX 6100, or instructor consent. Prerequisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Leeds School of Business | Master of Business Administration | MBA: Entrepreneurship

MBAX-6171 (2) Business Plan Preparation

In this course students will be responsible for the completion of a sophisticated business plan within task groups from the concept through all the elements of a professionally written business plan. The course provides students high interaction with businesses and entrepreneurs. Prereqs., MBAC core courses and MBAX 6100, or instructor consent. Prerequisites: Restricted to Professional MBA Program (PMBA) majors only.

Leeds School of Business | Master of Business Administration | MBA: Entrepreneurship

MBAX-6180 (3) Startup Execution

Covers a variety of topics in applied entrepreneurship, including the steps required to legally launch a business and procedures for executing standard business functions (organization, marketing, sales, advertising, operations, team building, and finance) with minimal resources (cash, personnel, and equipment). Prerequisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Leeds School of Business | Master of Business Administration | MBA: Entrepreneurship

MBAX-6190 (3) Projects in Entrepreneurial Companies

Limited to 12 students per section, each student is matched with an entrepreneurial company to complete a project that is key to company strategy. Students experience total company environment from the top management level through attending management meetings and interacting with cross-functional managers and employees. E-mail and face-to-face meetings result in discussing opportunities and issues resulting from experiences in companies. Prereq., MBAX 6100. Prerequisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Leeds School of Business | Master of Business Administration | MBA: Entrepreneurship

MBAX-6200 (3) Advanced Corporate Finance

Covers the theory of asset pricing, which is then applied to capital budgeting, capital structure choice, mergers and acquisitions, and risk management. Prereq., MBAC 6060. Prerequisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

MBAC-6012 (2) Managerial Economics 2

See MBAC 6011. Prerequisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Leeds School of Business | Master of Business Administration | MBA: Core Courses

MBAC-6020 (3) Financial Accounting

Introduces the financial reporting system used by business organizations to convey information about their economic affairs. Develops an understanding of financial reports and what they tell about a business enterprise. Focuses on how alternative accounting measurement rules represent different economic events in financial reports. Prerequisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Leeds School of Business | Master of Business Administration | MBA: Core Courses

MBAC-6030 (3) Quantitative Methods

Covers foundations for statistical reasoning and statistical applications in business. Topics include graduate-level treatment of descriptive statistics, probability, probability distributions, sampling theory and sampling distributions, and statistical inference (estimation and hypothesis testing). Provides an introduction to regression analysis, analysis of variance, time series forecasting, decision analysis, index numbers, and nonparametric methods. Prerequisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Leeds School of Business | Master of Business Administration | MBA: Core Courses

MBAC-6031 (2) Quantitative Methods

Covers foundations for statistical reasoning and statistical applications in business. Topics include graduate-level treatment of descriptive statistics, probability, probability distributions, sampling theory, sampling distributions, and statistical inference (estimation and hypothesis testing). Provides an introduction to regression analysis, analysis of variance, time series forecasting, decision analysis, index numbers and nonparametric methods. Prerequisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Leeds School of Business | Master of Business Administration | MBA: Core Courses

MBAC-6050 (3) Strategy

Analyzes how firms can attain and sustain competitive advantage in today's competitive environment. Focuses on industry dynamics, competitive positioning, firm capabilities, and corporate innovation. Introduces a set of tools for assisting managers in solving complex, real-world business problems in strategy development. Integrates MBA learning in functional areas, and emphasizes the fit between competitive analysis and the role of management and organization. Prerequisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Leeds School of Business | Master of Business Administration | MBA: Core Courses

MBAC-6052 (3) Capstone Projects

Provides students with an opportunity to focus on a specific project which would have a positive strategic impact on the company for which they work. For those who have entrepreneurial aspirations, this project could result in a business plan for a new venture. Final deliverable should address marketing, financial, operational, and management implications and strategic impact.

Prerequisites: Restricted to Professional MBA Program (PMBA) majors only.

| | | |
|--------------------------|-----------------------------------|-------------------|
| Leeds School of Business | Master of Business Administration | MBA: Core Courses |
|--------------------------|-----------------------------------|-------------------|

MBAC-6060 (3) Corporate Finance

Analyzes the implications of modern finance theory for the major decisions faced by corporate financial managers. Develops the basic skills necessary to apply financial concepts to the various problems faced by a firm. Includes capital budgeting, capital structure, long term financing, short term financial management, and financial planning topics. Prereq., MBAC 6020. Prerequisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

| | | |
|--------------------------|-----------------------------------|-------------------|
| Leeds School of Business | Master of Business Administration | MBA: Core Courses |
|--------------------------|-----------------------------------|-------------------|

MBAC-6080 (3) Decision Modeling and Applications

Integrates topics from decision analysis and operations management as they relate to modeling management decisions. Field projects involve the university, local companies, and/or government agencies. Prereq., MBAC 6030. Prerequisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

| | | |
|--------------------------|-----------------------------------|-------------------|
| Leeds School of Business | Master of Business Administration | MBA: Core Courses |
|--------------------------|-----------------------------------|-------------------|

MBAC-6090 (3) Marketing Management

Provides a solid foundation of marketing knowledge by focusing on principles of marketing. Introduces the role that marketing cases play in advancing understanding and skill development in the field of marketing. Case discussions illustrate concepts discussed, and case studies are used to introduce the marketing decision making process. Emphasizes the international nature of marketing, as well as the importance of analysis and the understanding of the economic, demographic, political-legal-regulatory, sociocultural, technological, and natural environments. Prereq., MBAC 6030. Prerequisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

| | | |
|--------------------------|-----------------------------------|-------------------|
| Leeds School of Business | Master of Business Administration | MBA: Core Courses |
|--------------------------|-----------------------------------|-------------------|

MBAC-6098 (1) Business Writing

Develops business writing skills, with specific focus on style rather than content. Assists students in improving their writing skills in order to be effective communicators in their professional careers. Prerequisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

| | | |
|--------------------------|-----------------------------------|-------------------|
| Leeds School of Business | Master of Business Administration | MBA: Core Courses |
|--------------------------|-----------------------------------|-------------------|

MBAC-6099 (2) Professional Development

Develops presentation and interview skills to help students become effective communicators in their professional careers and to acquaint themselves well in the job placement process. Prerequisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

MBAX-6421 (2) IT & Business Strategy

Although some companies are very successful in discovering and cultivating innovative technology-enabled business strategies, many fail in the process. This course combines theories and frameworks with practical approaches to provide students with the skills required to help companies identify business opportunities, find appropriate information related technologies, and lead adoption efforts to success. Prereqs., MBA core courses. Prerequisites: Restricted to Professional MBA Program (PMBA) majors only.

[Leeds School of Business](#)
[Master of Business Administration](#)
[MBA: Management](#)

MBAX-6440 (3) Project Management

Acquaints students with multidisciplinary aspects of project management, including the relationship between schedule, cost and performance. The course uses a hands-on project where the student interacts with a real customer, providing an opportunity to utilize the qualitative and quantitative tools taught in the classroom. At the conclusion of the course, the student may be eligible to apply for a project management certification from Project Management Institute based on previous work experience. Prerequisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

[Leeds School of Business](#)
[Master of Business Administration](#)
[MBA: Management](#)

MBAX-6441 (2) Project Management

Acquaints the student with multidisciplinary aspects of project management, including the relationship between scope, schedule, cost and performance. Uses a hands-on project from your own company, providing an opportunity to utilize the qualitative and quantitative tools taught in the classroom. During the course students will earn hours toward project management certification from the Project Management Institute. Prereqs., MBA core courses. Prerequisites: Restricted to Professional MBA Program (PMBA) majors only.

| | | |
|--------------------------|-----------------------------------|-----------------|
| Leeds School of Business | Master of Business Administration | MBA: Management |
|--------------------------|-----------------------------------|-----------------|

MBAX-6450 (3) International Operations Management

Takes a broad comprehensive perspective on managing and operating in a rapidly growing global economy. Explores regional and national approaches to international operations including trade practices; penetration strategies; financial, marketing, services, and manufacturing operations; ethical and sustainability issues; and global competitive strategy. Compares global business practices in Asia, South America, Europe, and Africa. Prerequisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

| | | |
|--------------------------|-----------------------------------|-----------------|
| Leeds School of Business | Master of Business Administration | MBA: Management |
|--------------------------|-----------------------------------|-----------------|

MBAX-6500 (3) Management of Organizational Change

Explores ways to improve organizations to meet demands of changing environments. Emphasizes theoretical framework and models of organization change, barriers to implementing change and ways to overcome them, and the roles of the change agent and/or consultant. Prereq., MBAC 6040. Prerequisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

| | | |
|--------------------------|-----------------------------------|-----------------|
| Leeds School of Business | Master of Business Administration | MBA: Management |
|--------------------------|-----------------------------------|-----------------|

MBAX-6530 (3) Negotiating and Conflict Management

Explores and builds skills for conflict management and negotiation problems faced by managers (e.g., dealing with subordinates, peers, superiors, or clients). Content is relevant to all MBA students, especially those interested in management, accounting, entrepreneurship, finance, and marketing. Prereq., MBAC 6040. Prerequisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

| | | |
|--------------------------|-----------------------------------|-----------------|
| Leeds School of Business | Master of Business Administration | MBA: Management |
|--------------------------|-----------------------------------|-----------------|

MBAX-6531 (2) Negotiations

MBAX-6550 (3) Management of Technology and Innovation

Examines a variety of issues common to management of technology, such as technology strategies, methods of technology transfer, selecting technology standards, managing the research and development process, and encouraging and rewarding innovation. Prerequisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

| | | |
|--------------------------|-----------------------------------|-----------------|
| Leeds School of Business | Master of Business Administration | MBA: Management |
|--------------------------|-----------------------------------|-----------------|

MBAX-6560 (3) Executive Leadership

Examines organizational leadership from the executive perspective, including private and public sector firms, and non-profits. Studies how executives lead change and innovation, interact with the top management team, and deal with the board of directors. Topics include governance of the firm, strategies for enhancing executive influence, assessing and understanding diverse leadership styles, and the ethics and responsibilities of an executive. Formerly MBAX 6890. Prerequisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

| | | |
|--------------------------|-----------------------------------|-----------------|
| Leeds School of Business | Master of Business Administration | MBA: Management |
|--------------------------|-----------------------------------|-----------------|

MBAX-6561 (2) Executive Leadership

Provides an opportunity to examine leadership from the executive perspective in organizations including private and public sector firms and non-profits. Topics covered include how executives lead change and innovation in organizations, interact with the top management team, deal with the board of directors, leadership issues involved with governance of the firm and strategies for enhancing executive influence. Prereqs., MBA core courses. Prerequisites: Restricted to Professional MBA Program (PMBA) majors only.

| | | |
|--------------------------|-----------------------------------|-----------------|
| Leeds School of Business | Master of Business Administration | MBA: Management |
|--------------------------|-----------------------------------|-----------------|

MBAX-6801 (3) Global Perspectives Seminar

Provides students with an in-depth perspective about a specific country or region outside the United States. The course can focus on a different region or country each time it is offered. If demand for this type of experience is strong, multiple sections of the course could be offered in a given semester, each focusing on a different region or country. The choice of region and the specific focus of each course would depend on the faculty member teaching the course. May be repeated up to 6 total credit hours. Prereqs., MBAC 6010, 6060 and 6090. Prerequisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

| | | |
|--------------------------|-----------------------------------|-----------------|
| Leeds School of Business | Master of Business Administration | MBA: Management |
|--------------------------|-----------------------------------|-----------------|

MBAX-6802 (3) Pricing Strategy and Tactics

Pricing provides the means to capture value. The course covers theories, analytical tools and conceptual frameworks needed for devising price strategy as part of the value proposition for products and services. It draws upon principles from economics, marketing and psychology. Primary and secondary data based analysis is used to understand price response and competitive pricing. Substantive topics include customized pricing, price negotiations, bidding and auctions, price discounting, trade promotion, bundling, behavioral pricing, among others. Prereqs., all MBA core courses. Prerequisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

| | | |
|--------------------------|-----------------------------------|-----------------|

|--------------------------|-----------------------------------|-----------------|

MBAX-6804 (3) Leading Effectively in Today's Environment

Explores a set of concepts, models and tools that you can use to lead and manage effectively in today's environment. Covers three key topics: leading change, building success through people, working effectively in a global environment. Provides better understanding of challenges managers face when leading change.

Leeds School of Business | Master of Business Administration | MBA: Management

MBAX-6841 (2) Decision Making for Managers

Covers both behavioral/psychological aspects and analytical approaches to making decisions with multiple objectives. The focus is learning to frame decisions that involve multiple stakeholders with multiple objectives and then learning the various techniques used to evaluate the choices. Influence diagrams, decision heuristics using spreadsheets, and decision trees will all be explored with user-friendly decision tree software. Prereqs., MBA core courses. Prerequisites: Restricted to Professional MBA Program (PMBA) majors only.

Leeds School of Business | Master of Business Administration | MBA: Management

MBAX-6844 (2) Operations Management

Producing a quality product or delivering a quality service is a fundamental task for any company or organization. Managing the transformation of inputs (raw materials, labor, capital) into outputs (goods and services) falls under the heading of Operations Management. In most organizations, operations comprise 80 percent of the costs, 80 percent of the personnel, 80 percent of the capital employed --the effective and efficient use of these resources is consequently central to the success of the firm. This course is about using operations to compete and win sustainable competitive advantage in your marketplace. Prerequisites: Restricted to Professional MBA Program (PMBA) majors only.

Explores a set of concepts, models and tools that you can use to lead and manage effectively in today's environment. Covers three key topics: leading change, building success through people, working effectively in a global environment. Provides better understanding of challenges managers face when leading change.

Leeds School of Business | Master of Business Administration | MBA: Management

MBAX-6805 (3) Entrepreneurship and the Venture Capital Process

This course will be articulated into two main parts, tightly interrelated: Entrepreneurship and the Venture Capital Process. The first part has the objective to lead the students to understand what venture capital is, how it works, how you structure capital raising, and how it helps entrepreneurial initiatives. The second part concerns how venture capitalists manage their operations, secure investment deals, and maintain their portfolios. Prereqs., MBAC 6011, 6020, 6031, 6040, 6060, 6080, and 6090. Restricted to LAWS students and graduate students in business.

Prerequisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Leeds School of Business | Master of Business Administration | MBA: Entrepreneurship

MBAX-6815 (3) Sustainable Real Estate

Explores techniques, processes, tools, and capabilities required to manage growth and land use change in the light of shifts beginning to transform the way we approach land use and real estate development. Prerequisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Leeds School of Business | Master of Business Administration | MBA: Real Estate

ACCT-6820 (1-3) Graduate Seminar

Experimental seminar offered irregularly to provide opportunity for investigation of new frontiers in accounting. Prereq. varies.

Leeds School of Business | Accounting

BADM-6820 (1-3) Topics in Business Administration

Offered irregularly to provide opportunity to investigate new topics in business administration.

Leeds School of Business | Business Administration

FNCE-6820 (1-3) Graduate Seminar

Experimental seminar offered irregularly to provide opportunity for investigation of new frontiers in finance.

Leeds School of Business | Finance

OPIM-6820 (3) Special Topics in Systems

Offered irregularly to provide opportunity for investigation into new frontiers in systems. May be repeated up to 6 total credit hours. Formerly SYST 6820.

Leeds School of Business | Operations and Information Management

REAL-6820 (3-6) Graduate Seminar

Experimental seminar offered irregularly to provide opportunity for investigation of new frontiers in real estate.

Leeds School of Business | Real Estate

MBAX-6825 (3) Topics in Sustainable Business

Provides a comprehensive overview of the core concepts, strategies and practices of sustainable business, emphasizing innovative business practices and entrepreneurial opportunities created by the sustainability "movement". The topic of sustainability will be approached from the unique perspectives of seven core disciplines of business administration: economics, strategy, ethics, organizational behavior, operations, finance and accounting, and marketing. Prereq., 1st semester MBA core courses. Prerequisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Leeds School of Business | Master of Business Administration | MBA: Social Responsibility

MBAX-6841 (2) Decision Making for Managers

Covers both behavioral/psychological aspects and analytical approaches to making decisions with multiple objectives. The focus is learning to frame decisions that involve multiple stakeholders with multiple objectives and then learning the various techniques used to evaluate the choices. Influence diagrams, decision heuristics using spreadsheets, and decision trees will all be explored with user-friendly decision tree software. Prereqs., MBA core courses. Prerequisites: Restricted to Professional MBA Program (PMBA) majors only.

Leeds School of Business | Master of Business Administration | MBA: Management

MBAX-6843 (3) Supply Chain and Operations Analytics

Analyzes key issues related to the design and management of operations and supply chains using quantitative tools such as linear, integer, and non-linear programming, regression, and statistical analysis. Covers important topics such as forecasting, aggregate planning, inventory theory, transportation, risk pooling, production control and scheduling, and facilities location, among others. Uses mathematical modeling, spreadsheet analysis, case studies, and pedagogical simulations to deliver material. Prereqs., MBAC 6031 and 6080. Prerequisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Leeds School of Business | Master of Business Administration | MBA: Operations & Prod Mgmt

MBAX-6844 (2) Operations Management

Producing a quality product or delivering a quality service is a fundamental task for any company or organization. Managing the transformation of inputs (raw materials, labor, capital) into outputs

(goods and services) falls under the heading of Operations Management. In most organizations, operations comprise 80 percent of the costs, 80 percent of the personnel, 80 percent of the capital employed --the effective and efficient use of these resources is consequently central to the success of the firm. This course is about using operations to compete and win sustainable competitive advantage in your marketplace. Prerequisites: Restricted to Professional MBA Program (PMBA) majors only.

Leeds School of Business | Master of Business Administration | MBA: Management

MBAX-6845 (3) Social Entrepreneurship in Emerging Markets

Social entrepreneurs adopt business approaches to solving global, social and environmental problems that have not been effectively addressed by government, business or traditional nonprofits. The course provides a framework for student teams to assist social entrepreneurs in developing countries, helping them achieve their social mission while operating sustainably and with measurable impact. Prereqs., MBAC 6010, 6060, and 6090. Recommended prereq., MBAX 6170. Prerequisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Leeds School of Business | Master of Business Administration | MBA: Social Responsibility

MBAX-6885 (3) Interpreting the Economic Environment

The macroeconomic environment is vitally important to business managers regardless of their area of focus. Most macroeconomic events portend future economic changes that influence business and/or industry. Develops a basic understanding of the macroeconomy and its relationship to an individual business or industry through understanding macroeconomic concepts and data sources, developing a basic model, understanding relevant policy instruments, and integrating this information into the global economy. Prereq., MBAC 6010. Prerequisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Leeds School of Business | Master of Business Administration | MBA: Finance

ACCT-6900 (1-6) Independent Study

Requires prior consent of instructor under whose direction study is taken. Departmental form required. Prerequisites: Restricted to Accounting, Finance/Accounting, Information Systems/Accounting, Systems/Accounting Concurrent Degree students or Accounting, Accounting/Taxation or Business Administration graduate students only.

Leeds School of Business | Accounting

BSLW-6900 (1-6) Independent Study

Prerequisites: Restricted to Business graduate students only.

Leeds School of Business | Business Law

FNCE-6900 (1-6) Independent Study

Requires consent of instructor under whose direction study is taken. Departmental form required.

Leeds School of Business | Finance

MKTG-6900 (1-3) Independent Study

Requires consent of instructor under whose direction study is taken. Departmental form required.

Leeds School of Business | Marketing

OPIM-6900 (1-3) Independent Study

Requires prior consent of dean and instructor under whose direction study is taken. Intended only for exceptionally well-qualified business seniors who desire to study an advanced topic. Departmental form required. Formerly SYST 6900.

Leeds School of Business | Operations and Information Management

OPMG-6900 (1-3) Independent Study

Leeds School of Business | Master of Business Administration | MBA: Operations & Prod Mgmt

REAL-6900 (1-3) Independent Study

Students must have consent of instructor under whose direction study is taken. Departmental form required.

Leeds School of Business | Real Estate

BADM-6930 (3) Commercializing Sustainable Energy Technologies

Addresses the opportunities and problems of commercializing new renewable energy technologies. Focuses on energy markets, opportunity identification, life cycle analysis, policy economics, project financing, and economic analysis as they relate to bringing renewable energy technologies to market.

OPIM-6070 (3) Survey of Operations Research

Applications oriented survey of operations research topics including linear and integer programming, network analysis, dynamic programming, nonlinear programming, decision analysis, Markov chain and Markovian decision models, queuing theory, and simulation. Same as EMEN 5600. Formerly SYST 6070.

[Leeds School of Business](#) [Operations and Information Management](#)

OPIM-6080 (3) Operations Management

Covers demand forecasting, capacity management, scheduling, inventory planning and management, production planning and control, materials requirements planning, just-in-time production systems, product design and process selection, elements of statistical process control, service operations, and quantitative techniques for operations decision making. Similar to EMEN 5500. Formerly SYST 6080.

[Leeds School of Business](#) [Operations and Information Management](#)

OPIM-6820 (3) Special Topics in Systems

Offered irregularly to provide opportunity for investigation into new frontiers in systems. May be repeated up to 6 total credit hours. Formerly SYST 6820.

[Leeds School of Business](#) [Operations and Information Management](#)

OPIM-6900 (1-3) Independent Study

Requires prior consent of dean and instructor under whose direction study is taken. Intended only for exceptionally well-qualified business seniors who desire to study an advanced topic. Departmental form required. Formerly SYST 6900.

Leeds School of Business | Operations and Information Management

OPIM-6930 (3) Assessing Sustainable Energy Technologies

Focuses on the commercialization prospects of emerging energy technologies, including solar, wind, biomass, oceanic, geothermal, hydropower, fuel cell (hydrogen), nuclear, and other more exotic energy sources. Investigates the technology feasibility, economic viability and progress of each technology, as well as its economic opportunities and challenges.

Leeds School of Business | Operations and Information Management

OPIM-6940 (1) Masters Candidate

Leeds School of Business | Operations and Information Management

OPIM-6950 (1-6) Master's Thesis

Leeds School of Business | Operations and Information Management

OPIM-7110 (3) Simulation Modeling and Analysis

Introduces the concepts of simulation modeling. Provides practical experience with real examples using popular commercial simulation packages such as Arena or Extend. Emphasizes discrete-event simulation but also covers topics in Monte Carlo simulation and system dynamics. Practical examples from operations management, manufacturing, and services are used to give students an appreciation for the wide scope of application and the robust nature of simulation modeling in the context of decision making. Formerly SYST 7110.

Leeds School of Business | Operations and Information Management

OPIM-7120 (3) Discrete Optimization

Covers the modeling and solution of discrete problems that arise in business and engineering. Classical techniques such as cutting planes and branch and bound are covered. Emphasizes the application of metaheuristic procedures, such as tabu search and evolutionary approaches, to the solution of practical combinatorial optimization problems. Formerly SYST 7120.

Leeds School of Business | Operations and Information Management

OPIM-7330 (3) Advanced Operations Management Modeling

Covers concepts, models, and solution techniques relevant to the management of the processes required to provide goods or services to consumers. Emphasizes supply chain systems topics such as production, inventory, distribution, and scheduling. Management science and operations research methodology is also applied to problems such as facility capacity planning, facility design, and location analysis. Formerly SYST 7330.

Leeds School of Business | Operations and Information Management

OPIM-7400 (3) Stochastic Dynamic Programming with Applications

Covers the basic models and solution techniques for stochastic dynamic programs with finite or infinite number of stages. Application domains include, among other, revenue management and pricing, manufacturing, supply chains, service systems, and economics. Approximate solution techniques for problems involving large state/decision spaces and/or complex dynamics over time will also be discussed. Recommended prereq., an introductory course in Optimization and Probability. Restricted to Ph.D students Prerequisites: Restricted to Graduate Students only.

Leeds School of Business | Operations and Information Management

OPIM-7800 (3) Doctoral Proseminar in Systems

Provides systems doctoral students with an orientation to current research and the academic discipline in operations and information systems. Familiarizes students with key schools of thought in the field, provides background on reference disciplines, examines significant research streams, and helps students begin developing their own area of interest. Formerly SYST 7800.

Leeds School of Business | Operations and Information Management

OPIM-7805 (3) Foundations of Research in Information Systems

Examines foundations of information systems research, including classic readings in information systems and its reference disciplines, different research approaches, processes of research, and classic and contemporary readings in major topics in information systems. Prereq., PhD standing or instructor consent. Formerly SYST 7805.

Leeds School of Business | Operations and Information Management

OPIM-7810 (3) Technical Topics in Information Systems Research

Examines in depth a selection of topics in technical areas of information systems. Includes theoretical perspectives for technical topics, critical perspectives on past and current research, appropriate methods for examining technical topics, and development of students' ability to identify and develop research topics in technical areas. Prereq., PhD standing or instructor consent. Formerly SYST 7810.

Leeds School of Business | Operations and Information Management

OPIM-7815 (3) Behavioral Topics in Information Systems Research

Covers both basic and advanced topics. Develops skill in designing, evaluating, and understanding both quantitative and qualitative research methods. Includes the development of research proposals, making and justifying methodological choices, writing research reports, and understanding how to publish in information systems. Prereq., PhD standing or instructor consent. Formerly SYST 7815. Prerequisites: Restricted to Graduate Students only.

Leeds School of Business | Operations and Information Management

OPIM-7820 (3) Advanced Research in Information Systems

Examines advanced topics in information systems research, focusing on the electronic era and ebusiness. Examines foundations of ebusiness, including basic technical, organizational, and behavioral foundations. Covers leading edge research from both topical and methodological perspectives. Focuses on methods appropriate for studying ebusiness and examines future research directions. Prereq., PhD standing or instructor consent. Formerly SYST 7820.

MBAC-6052 (3) Capstone Projects

Provides students with an opportunity to focus on a specific project which would have a positive strategic impact on the company for which they work. For those who have entrepreneurial aspirations, this project could result in a business plan for a new venture. Final deliverable should address marketing, financial, operational, and management implications and strategic impact.

Prerequisites: Restricted to Professional MBA Program (PMBA) majors only.

MBAC-6060 (3) Corporate Finance

Analyzes the implications of modern finance theory for the major decisions faced by corporate financial managers. Develops the basic skills necessary to apply financial concepts to the various problems faced by a firm. Includes capital budgeting, capital structure, long term financing, short term financial management, and financial planning topics. Prereq., MBAC 6020. Prerequisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

MBAX-6100 (3) Entrepreneurship

Examines the environments of entrepreneurial firms from start-up to development of ventures. Allows students to assess their fit with entrepreneurial firms. Key element is learning the process of determining the difference between ideas and commercializable opportunities through feasibility analysis and plans. Prereq., MBAC 6020 or instructor consent. Prerequisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

[Leeds School of Business](#)
[Master of Business Administration](#)
[MBA: Entrepreneurship](#)

MBAX-6101 (2) Entrepreneurship

Examines the environments of entrepreneurial firms from start-up to development of ventures; allows students to assess their "fit" with entrepreneurial firms. A key element is learning the process of determining the difference between ideas and commercializable opportunities through feasibility analysis and plans. Prereqs., MBA core courses. Prerequisites: Restricted to Professional MBA Program (PMBA) majors only.

[Leeds School of Business](#)
[Master of Business Administration](#)
[MBA: Entrepreneurship](#)

MBAX-6110 (3) Entrepreneurial Finance

Addresses a variety of topics including financial valuation, various sources of funds, structures and legal issues in arranging financing, the private and public venture capital markets, and preparation for, and execution of, an initial public securities offering. Prereq., MBAC 6020. Prerequisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

[Leeds School of Business](#)
[Master of Business Administration](#)
[MBA: Entrepreneurship](#)

MBAX-6111 (2) Entrepreneurial Finance

Addresses a variety of topics including financial valuation, various sources of funds, structures and legal issues in arranging financing, the private and public venture capital markets, and preparation for, and execution of, an initial public securities offering. Prereqs., MBA core courses. Prerequisites: Restricted to Professional MBA Program (PMBA) majors only.

Leeds School of Business | Master of Business Administration | MBA: Entrepreneurship

MBAX-6120 (3) Entrepreneurial Marketing

Addresses the marketing challenges that face the entrepreneur or start up firm with a limited budget. From initially positioning the company and its products to marketing that position to key shareholders for a new venture, to establishing channels of distribution and reaching the consumer, take a specialized look at the development and implementation of a marketing plan.

Prerequisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Leeds School of Business | Master of Business Administration | MBA: Entrepreneurship

MBAX-6170 (3) Business Plan Preparation

Completion of a sophisticated business plan within task groups from concept through all the elements of a professionally written business plan. Provides students high interaction with businesses and entrepreneurs. Prereq., MBAC 6020 and MBAX 6100, or instructor consent. Prerequisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Leeds School of Business | Master of Business Administration | MBA: Entrepreneurship

MBAX-6171 (2) Business Plan Preparation

In this course students will be responsible for the completion of a sophisticated business plan within task groups from the concept through all the elements of a professionally written business plan. The course provides students high interaction with businesses and entrepreneurs. Prereqs., MBAC core courses and MBAX 6100, or instructor consent. Prerequisites: Restricted to Professional MBA Program (PMBA) majors only.

Leeds School of Business | Master of Business Administration | MBA: Entrepreneurship

MBAX-6180 (3) Startup Execution

Covers a variety of topics in applied entrepreneurship, including the steps required to legally launch a business and procedures for executing standard business functions (organization, marketing, sales, advertising, operations, team building, and finance) with minimal resources (cash, personnel, and equipment). Prerequisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Leeds School of Business | Master of Business Administration | MBA: Entrepreneurship

MBAX-6190 (3) Projects in Entrepreneurial Companies

Limited to 12 students per section, each student is matched with an entrepreneurial company to complete a project that is key to company strategy. Students experience total company environment from the top management level through attending management meetings and interacting with cross-functional managers and employees. E-mail and face-to-face meetings result in discussing opportunities and issues resulting from experiences in companies. Prereq., MBAX 6100. Prerequisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Leeds School of Business | Master of Business Administration | MBA: Entrepreneurship

MBAX-6200 (3) Advanced Corporate Finance

Covers the theory of asset pricing, which is then applied to capital budgeting, capital structure choice, mergers and acquisitions, and risk management. Prereq., MBAC 6060. Prerequisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

[Leeds School of Business](#)
[Master of Business Administration](#)
[MBA: Finance](#)

MBAX-6210 (3) Applied Financial Management

Analyzes the financial condition, planning, and control of current assets, current liabilities, and long-term financial arrangements. Topics include financial planning, managing working capital, short- and long-term financing, capital budgeting, valuation, and capital structure policies. Case studies are emphasized. Prereq., MBAC 6060. Prerequisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

[Leeds School of Business](#)
[Master of Business Administration](#)
[MBA: Finance](#)

MBAX-6211 (2) Applied Financial Management

Focuses on how to apply key concepts in finance to real-world situations. Topics include valuation, capital structure, highly leveraged transactions, and financial distress and bankruptcy. Heavy emphasis on how to perform various kinds of valuations. Mixture of lectures and case discussions. Prereq., MBAC 6060. Prerequisites: Restricted to Professional MBA Program (PMBA) majors only.

[Leeds School of Business](#)
[Master of Business Administration](#)
[MBA: Finance](#)

MBAX-6220 (3) Investment Management and Analysis

Covers managing investment portfolios by blending academic theories and evidence with practitioner experience. Topics include risk and return relationships, securities, value theory (capital asset, arbitrage, and option pricing), portfolios, and performance evaluations. Prereq., MBAC 6060. Prerequisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Leeds School of Business | Master of Business Administration | MBA: Finance

MBAX-6221 (2) Investment Management & Analysis

Covers managing investment portfolios by blending academic theories and evidence with practitioner experience. Topics include risk and return relationships, securities, value theory (capital asset, arbitrage, and option pricing), portfolios, and performance evaluations. Prereqs., MBAC core courses. Prerequisites: Restricted to Professional MBA Program (PMBA) majors only.

Leeds School of Business | Master of Business Administration | MBA: Finance

MBAX-6230 (3) International Financial Management

Examines the financial procedures, policies, and risks faced by firms conducting business internationally. Topics include examining the international finance environment, managing foreign exchange risk exposure, managing international working capital, conducting analysis, and developing an understanding of international financial markets. Prereq., MBAC 6060. Prerequisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Leeds School of Business | Master of Business Administration | MBA: Finance

MBAX-6240 (3) Financial Markets and Institutions

Deals with the economics of financial markets and the management of financial institutions. Covers factors influencing the cost and availability of capital for financing business firms. Examines both domestic and international markets and institutions. Prereq., MBAC 6060. Prerequisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Leeds School of Business | Master of Business Administration | MBA: Finance

MBAX-6250 (3) Derivative Securities

Derivatives, like options, futures, forwards, and swaps, encompass all aspects of finance. Topics cover the characteristics, valuation, and trading strategies associated with derivatives as well as their use in risk management. Prereq., MBAC 6060. Prerequisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Leeds School of Business | Master of Business Administration | MBA: Finance

MBAX-6260 (3) Fixed Income Investing

Fixed income securities are those that nominally promise a fixed stream of payments. They include government and corporate long and short term debt issues that far exceed the amount of corporate stock issues, as well as long term personal debt (i.e., home mortgages). Develops practical analytical tools for describing these securities, the markets where they are traded, and their purchase and management by financial intermediaries. Stresses the huge market for U.S. government debt, because it provides a foundation for the development of more specialized tools used in other markets. Prereq., MBAC 6060. Prerequisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

MBAX-6350 (3) Digital Marketing

Covers a variety of ways an organization uses online presence to support its goals. The main approaches covered are search engine optimization (SEO); online advertising, especially search ads (also called search engine marketing, SEM); and social media. SEO is setting up your website so that the right people can find you. Emphasis placed on selecting keywords and tracking responses to changes to a website. SEM refers to paid ("sponsored") ads on search engines. We will focus on AdWords. Prerequisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

MBAX-6360 (3) New Product Development

Provides a better understanding of the new-product development process, highlighting the inherent risks and strategies for overcoming them. Using a combination of lectures, cases, and a project, this course examines the process of designing, testing, and launching new products. Emphasizes the interplay between creativity and analytical marketing research throughout the development process. Also covers branding issues, such as brand extensions and their impact on brand equity. Prereq., MBAC 6090. Prerequisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Leeds School of Business | Master of Business Administration | MBA: Finance

MBAX-6803 (3) Microfinance

Links financial markets with entrepreneurship to create a platform for the poor to start their own business. Participants learn how to combine technical knowledge of finance and international business development with the socially and ethically important microfinance field to help with sustainable economic development and reduce poverty worldwide, including the United States. Prerequisites: Restricted to Graduate Students only.

Leeds School of Business | Master of Business Administration | MBA: Finance

MBAX-6885 (3) Interpreting the Economic Environment

The macroeconomic environment is vitally important to business managers regardless of their area of focus. Most macroeconomic events portend future economic changes that influence business and/or industry. Develops a basic understanding of the macroeconomy and its relationship to an individual business or industry through understanding macroeconomic concepts and data sources, developing a basic model, understanding relevant policy instruments, and integrating this information into the global economy. Prereq., MBAC 6010. Prerequisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.
