ABOUT CU BOULDER

General Information
As one of only 36 U.S. public research institutions in the Association for American Universities (AAU), the University of Colorado Boulder is all about realizing the positive impacts of new knowledge. From offering dozens of exciting programs in a range of academic fields, to serving as one of the world’s most dynamic research and innovation hubs, to working closely through hundreds of public outreach efforts with communities across Colorado and the world, we take pride in helping our students, faculty, staff and partners turn new ideas into productive outcomes that change lives.

Students
With an enrollment of more than 35,000 students, CU Boulder is the largest of the four-campus University of Colorado system. The student population comes from every state in the nation and from more than 100 foreign countries. Many different ethnic, religious, academic and social backgrounds are represented, fostering the development of a multicultural academic community that enriches each student’s educational experience.

Faculty
CU Boulder has more than 1,200 tenured and tenure-track faculty, with 98 percent holding doctorates or appropriate terminal degrees. The faculty includes nationally and internationally recognized scholars with many academic honors and awards:

• David Wineland won the 2012 Nobel Prize in physics.
• Several CU Boulder research faculty from the National Snow and Ice Data Center shared the 2007 Nobel Peace Prize with former Vice President Al Gore for their contributions to the international report of the Intergovernmental Panel on Climate Change.
• John Hall won the 2005 Nobel Prize in physics.
• Carl Wieman and Eric Cornell won the 2001 Nobel Prize in physics.
• Tom Cech won the 1989 Nobel Prize in chemistry.
• Eight faculty have received MacArthur Fellowships, the so-called "Genius Grant."
• Twenty-four active or retired faculty are members of the National Academy of Sciences, all of whom are included in the membership of the American Academy of Arts and Sciences.
• Seventeen faculty are members of the National Academy of Engineering.
• Four faculty are members of the National Academy of Education.

Most faculty members, including full professors, teach both undergraduate and graduate classes. Faculty members incorporate their research and creative activities directly into instructional programs. Faculty participate in campus governance through the Faculty Senate and the Faculty Assembly. Students participate through the University of Colorado Student Government (CUSG) and the United Government of Graduate Students (UGGS).

Academic Offerings
The Boulder campus offers approximately 4,000 different courses in approximately 120 distinct fields of study and 235 degree programs across the baccalaureate, master’s, doctoral and professional levels. These courses represent a full range of disciplines in the humanities, the social sciences, the physical and biological sciences, the fine and performing arts, and the professions.

Research
CU Boulder is home to more than 2,000 nationally and internationally recognized research faculty who have earned a global reputation for outstanding teaching, research and creative work across more than 150 academic disciplines. While the classroom is the location for most instructional activities, laboratories, seminars and field work also are important features of the undergraduate and graduate experience. Students can get involved in research and creative work as early as their freshman year.

CU Boulder's sponsored research portfolio continues to grow. Since fiscal year 2009, CU Boulder has experienced 51 percent growth in research awards. Federal agency funding remains the mainstay of CU research, with 72 percent of awards coming directly from federal agencies. Five federal agencies are consistently the largest funding sources for CU Boulder awards:

• NASA
• National Science Foundation
• Department of Commerce
• National Institutes of Health
• Department of Defense

CU Boulder remains the number one public university recipient of NASA research awards, and continues to be a national leader in aerospace and space research. Additionally, university researchers are expanding their impact through collaborative projects with industry, other universities, nonprofits and international partners.

CU Boulder’s research institutes and research centers significantly contribute to the university’s research and education missions, as well as the regional economy. Research faculty in academic departments, institutes and centers are continually expanding CU Boulder’s research capabilities and collaborations, resulting in new knowledge, technologies and creative work for the benefit of Colorado, the nation and the world.

For more information, see the Research (p. 17) section.

Statutory Mission
CU Boulder’s vision is grounded in its statutory mission as a national public research university. In Colorado statute, the university is defined as the "comprehensive graduate research university with selective admissions standards . . . offer(ing) a comprehensive array of undergraduate, master and doctoral degree programs" of what is now designated the University of Colorado System.

CU Boulder recognizes the exceptional opportunities associated with its role as a research university, and values the unique strength and character research achievements bring to undergraduate education. It is keenly aware of its responsibility for educating the next generation of citizens and leaders, and for fostering the spirit of discovery through research. Indeed, CU Boulder believes that its students, both graduate and undergraduate, benefit from the comprehensive mix of programs and research excellence that characterize a flagship university. Thus, CU Boulder’s statutory mission is relevant today and will remain relevant tomorrow.

Since 2007, CU Boulder’s strategic plan, Flagship 2030, has been guiding near-term actions and investments that will sustain CU’s quality
and competitiveness and, through visionary "flagship initiatives," will transform the university within the next quarter-century.

**University of Colorado History**

At its first session in 1861, Colorado's territorial legislature passed an act providing for a university in Boulder. Between 1861 and 1876, Boulder citizens donated land south of town and made gifts from $15 to $1,000 to match the $15,000 the state legislature appropriated for the university's construction. In 1875, Colorado citizens laid the cornerstone for the university’s first building, Old Main, and officially founded CU in 1876, the same year Colorado joined the union. The university opened its doors the following year with 44 students, a president, and one instructor.

Today, the University of Colorado is a four-campus system that includes the University of Colorado Boulder, the University of Colorado Colorado Springs, the University of Colorado Denver and the University of Colorado Anschutz Medical Campus. The campuses have a combined enrollment of more than 67,000 students. To meet the needs of its students, the university system offers an extensive number of undergraduate, graduate and professional degree programs, as well as opportunities to study abroad, engage in public service and conduct research.

CU Boulder has a strong sponsored research portfolio, and the university also relies on revenues from tuition and fees, contracts and grants, investments and interest income, health services and the generous support of private foundations and donors.

An elected nine-member Board of Regents governs CU and is charged by the state constitution with the general supervision of the university and the exclusive control and direction of all its funds and appropriations, unless otherwise provided by law. The board conducts its business at regular meetings open to the public and through committees. The president is the chief administrative officer and is responsible for providing leadership to the university.

For more information, visit the CU Board of Regents (http://www.cu.edu/ regents/) webpage, or the CU System (http://www.cu.edu) website.

**Enrollment and Graduation Rates**

CU Boulder's fall 2019 undergraduate enrollment was 29,624 of which 7,113 were entering first-year students. Of these, 49 percent identified as female, 53 percent as residents of Colorado and 28 percent as racially/ethnically diverse (Black/African Americans, Asian Americans, Hispanics/Latinos, American Indians and Pacific Islanders). Forty-five percent enrolled in the College of Arts and Sciences, 24 percent in the new cross-college Program in Exploratory Studies, 13 percent in the College of Engineering and Applied Science, 9 percent in the Leeds School of Business, and 9 percent, combined, enrolled in the College of Media, Communication and Information, the Program in Environmental Design, the College of Music and the School of Education. The number of new undergraduate transfer students who enrolled in fall 2019 was 1,555.

Of the first-year students entering in summer or fall 2013 who enrolled full time, 46 percent graduated within four years; 65 percent graduated within five years; and 69 percent graduated within six years. Of the students who entered in fall 2018, 87 percent returned for their second fall semester.

CU Boulder enrolled 5,904 graduate and professional students in fall 2019. Of these, 43% were females. The five most enrolled majors were Aerospace Engineering Sciences, Computer Science, Electrical Engineering, Master of Business Administration, and Master of the Environment. The most enrolled doctorate majors were Physics, Aerospace Engineering Sciences, Computer Science, Chemistry and Mechanical Engineering.

**CU Boulder Accreditation and Affiliation**

CU Boulder is accredited by the Higher Learning Commission (http://www.hlcommission.org/) (800-621-7440 or 312-263-0456). See individual colleges and schools for program specific accreditation information.

For information on the content of academic programs and official degree designations, refer to the appropriate catalog sections.

As one of 36 U.S. public research institutions belonging to the prestigious Association of American Universities (AAU), a goal at CU Boulder is to directly affect Colorado communities through collaborative research, innovation and entrepreneurship. CU Boulder faculty, staff and students work with the broader community to establish unique connections that have lasting outcomes across Colorado and around the world.

**From the Office of the Chancellor (https://www.colorado.edu/chancellor/)**

As we enter a new decade facing a new reality with unprecedented challenges, it’s important to reflect on CU's reach and mission.

We have three imperatives: create tomorrow’s leaders, be the top university for innovation, and positively impact humanity.

That’s why we’re tailoring today’s degrees with tomorrow’s careers. We’re creating a holistic, safe and healthy learning environment. We’re more diverse than ever, with more international partnerships than ever, sparking breakthroughs in almost every field.

And these innovative pursuits don’t stop with faculty. More than 2,000 undergraduate students are directly involved in groundbreaking research. They have studied the relationship between climate and conflict, created software for space exploration and tested the connection between cranial fluids and traumatic brain injury.

Our campus community is working hard to help us get through the COVID-19 pandemic. They are 3D-printing parts of protective face shields for health care workers and developing an affordable over-the-counter test that can tell if someone has coronavirus before they develop symptoms.

Our students, faculty, staff and alumni are Rhodes Scholars, Nobel laureates, business and political leaders, theorists, composers, historians, actors, artists, athletes, scholars, astronauts and authors.

So it’s no surprise that we’re one of the best universities in the world for anything from sustainability and environmental law to aerospace, physics, and of course, innovation.

We do it while adhering to the Colorado Creed: to act with honor, integrity and accountability; to respect the rights of others and accept our differences; and contribute to the greater good of the community.

As a first-generation college graduate who benefits every day from my education, I’m committed to expanding this opportunity for anyone with the will to work for it and the passion to pursue it—wherever their dreams take them.

Be Boulder. And go Buffs!
About the Catalog

The 2020–2021 University of Colorado Boulder Catalog is an academic publication containing information about academic programs, policies and services, descriptions of colleges, schools and individual departments and degree requirements, course descriptions and faculty listings as of Spring 2020.

The catalog is published only online in an accessible format. In accordance with requirements under the Americans with Disability Act (ADA), alternate formats are available upon request.

Because the catalog is compiled in advance of the published academic year, changes in programs and policies may occur. All catalog information is subject to change without notice or obligation, and the University of Colorado Boulder reserves the right to change any rules or curriculum requirements at any time. Current information may be obtained by consulting departmental advisors and reviewing registration materials distributed each semester.

The catalog is produced by the Office of the Registrar (http://www.colorado.edu/registrar/) at the University of Colorado Boulder (http://www.colorado.edu). Previous academic catalogs can be found in the catalog archive (p. 2357). Questions concerning the catalog may be directed to catalog@colorado.edu.

Administration

Board of Regents

Glen Gallegos – Chair, District 3; term expires 2025
Irene Griego – Vice Chair, District 7; term expires 2021
John Carson – District 6; term expires 2021
John “Jack” Kroll – District 1; term expires 2023
Heidi Ganahl – At large; term expires 2023
Chance Hill – District 5; term expires 2025
Sue Sharkey – District 4; term expires 2023
Linda Shoemaker – District 2; term expires 2021
Lesley Smith – At large; term expires 2025

Administrative Officers

CU System

Mark Kennedy – President. BA, St. John’s University; MBA, University of Michigan.
Leonard Dinegar – Senior vice president and chief of staff. BA, Catholic University of America; MA, University of Colorado Denver.
Jack Finlaw – Special advisor to the president for advancement. BS, Georgetown University; JD, University of Denver College of Law.
Michael Lightner – Vice president for academic affairs. BS, MS, University of Florida; PhD, Carnegie-Mellon University.
Tanya Mares Kelly-Bowry – Vice president for government relations. BA, University of Colorado Boulder; MA, Regis University.
Ken McConnellogue – Vice president for university communication. BS, University of Colorado Boulder; MA, University of Northern Colorado.
Kathy Nesbitt – Vice president of administration. BA, University of Colorado; JD, Southern University Law Center.
Todd Saliman – Vice president and chief financial officer. BA, University of Colorado Boulder.

Dan Wilkerson – Vice president, university counsel and secretary of the Board of Regents.

CU Boulder

Philip P. DiStefano – Chancellor and professor of education. BS, PhD, Ohio State University; MA, West Virginia University.
Russell L. Moore – Provost and executive vice chancellor for academic affairs. BS, University of California, Davis; PhD, Washington State University.
Patrick T. O’Rourke – Interim executive vice chancellor and chief operating officer. BA, Creighton University; JD, Georgetown University Law Center.
Robert Boswell – Vice chancellor for diversity, equity and community engagement. BA, Marietta College; PhD, University of Colorado Boulder.
Deb Coffin – Vice chancellor for advancement. BS, MA, University of Northern Colorado.
Jon Leslie – Interim senior associate vice chancellor of strategic communications. BA, Towson University; MA, Johns Hopkins University and MA, University of Colorado Denver.
Terri Fiez – Vice chancellor for research and innovation. BS, MS, University of Idaho; PhD, Oregon State University.
Christina Gonzales – Vice chancellor for student affairs. BS, MA, New Mexico State University.
David Kang – Vice chancellor for infrastructure and sustainability. BS, University of California, San Diego; MS, University of California, Berkeley.
Catherine Shea – Chief of staff and director of ethics and compliance. BA, University of Notre Dame; JD, Catholic University Columbus School of Law.
Valerie Simons – Associate vice chancellor and Title IX coordinator, Office of Institutional Equity and Compliance. BA, University of California, Berkeley; JD, Georgetown University.
Elvira Strehle-Henson – Managing associate university counsel. BA, JD, University of Colorado Boulder.
Rick George – Athletic director. BA, University of Illinois.

Campus

The Campus Setting

CU Boulder (https://www.colorado.edu/map/) is located at the foot of the Rocky Mountains, at an altitude of 5,400 feet. The Flatirons geologic formation is visible from nearly everywhere on campus. The climate is temperate, with generally pleasant days and cool evenings. On average, Boulder enjoys about 300 sunny days each year. The main campus covers 600 acres and includes about 200 buildings constructed of rough-cut Colorado sandstone with red tile roofs. The rural Italian (or Tuscan vernacular) architectural style evolved from a master plan developed by Philadelphia architect Charles Klauder in 1919. The Norlin Quadrangle, including the original Old Main building, is listed in the State and National Register of Historic Places. The campus has been noted as one of the most aesthetically pleasing in the country.

Boulder County encompasses five ecological zones, from 5,000 feet above sea level (plains grassland) to 14,000 feet (alpine tundra). Downtown Boulder is only 20 miles from the Continental Divide and boasts some of the most spectacular scenery in the United States. The city of Boulder, population 103,000, is committed to preserving its beautiful natural environment and is surrounded by 45,000 acres of open space.

Denver, the state’s capital city, is 30 miles from Boulder. Denver offers the attractions and resources of a large metropolitan area and is accessible
from Boulder by traveling on U.S. 36, also known as the Denver–Boulder Turnpike. Denver’s international airport is served by most major carriers and is located approximately 60 minutes southeast of Boulder. Boulder and the Denver International Airport are connected by a public transportation system.

For an interactive version, visit the Campus Map (https://www.colorado.edu/map/) webpage.

Extension Campus Information
The VA extension/branch campus information for the University of Colorado Boulder is as follows:

Main Location – Facility Code 11B02106
University of Colorado Boulder
1725 Euclid Avenue
200 UCB
Boulder, CO 80309

Grand Junction Location – Facility Code 11X08106
Colorado Mesa University
1100 North Avenue
Grand Junction, CO 81501

South Denver Location – Facility Code 11X01506
10035 Peoria St.
Lone Tree, CO 80134

Gunnison Location – Facility Code Pending
Western Colorado University
1 Western Way
Gunnison, CO 80601

Brighton Center Location – Facility Code 11X04406
Community Reach Center
1850 Egbert St.
Brighton, CO 80601

Research
Research and innovation at CU Boulder is changing the world. While CU Boulder researchers, faculty and staff lead the charge, this transformational work includes increasing collaborations with undergraduate and graduate students, postdocs, entrepreneurs, and government and industry partners.

At the heart of this focus are the diverse contributions of a wide range of world-class experts, working together in new and innovative ways to accelerate ideas through the entire innovation life cycle, from idea to impact.

Explore the diverse avenues through which CU Boulder innovators are creating impact around the world—and learn how you can participate.

Major Research & Innovation Services and Initiatives
Office of Contracts and Grants
The Office of Contracts and Grants (http://www.colorado.edu/contracts/) partners with faculty and staff to prepare and submit proposals, including budgets, for external research funding. OCG is authorized to negotiate and accept sponsored research agreements on behalf of the Regents, monitor and provide guidance throughout the life of an award, and ensure final project closeout.

Office of Research Integrity
The Office of Research Integrity (http://www.colorado.edu/innovate/ori/) supports CU Boulder’s commitment to scientific and ethical integrity, as well as academic excellence in all research activities with which our students, faculty and staff are associated.

Office of Animal Resources
The Office of Animal Resources (http://www.colorado.edu/innovate/animalresources-oar/) is a service center responsible for providing high quality animal care, veterinary care and support for the research and teaching missions of CU Boulder.

Office of Postdoctoral Affairs
The Office of Postdoctoral Affairs (http://www.colorado.edu/postdoctoralaffairs/) enhances and supports postdoctoral training and career development, helps build a sense of community among postdocs, and serves as a resource to campus and affiliated national labs.

Research Development and Funding Opportunities
Research Development (http://www.colorado.edu/researchinnovation/fundingawards/) offers a variety of tools and resources to help faculty, students and staff identify and develop opportunities for scholarly activities.

Office of Industry Collaboration
The Office of Industry Collaboration (http://www.colorado.edu/industry/) promotes and supports synergistic opportunities for engagement between CU Boulder and industry and business, strengthening connections that provide benefits to partners, students and local, state and national economies.

Venture Partners at CU Boulder
As the commercialization arm of CU Boulder and UCCS, Venture Partners (https://www.colorado.edu/venturepartners/) prepares campus innovators to bring technologies and ideas to market through IP and licensing consultation, startup formation and support, early-stage funding and more.

AeroSpace Ventures
The CU Boulder AeroSpace Ventures (http://www.colorado.edu/aerospaceventures/) initiative creates a collaborative environment in which CU Boulder’s aerospace engineering and earth and space science faculty, students and industrial researchers work together to solve complex problems that lead to new discoveries and innovations.

Grand Challenge
CU Boulder’s response to the Grand Challenge (http://www.colorado.edu/grandchallenges/), Our Space. Our Future., fuses CU Boulder’s unique strengths in earth, space and social sciences with new technologies and partners to address the pace and pattern of changes for our environment, our resources and our planet.

Innovation & Entrepreneurship
CU Boulder fosters an environment for innovative thinking and the entrepreneurship spirit, offering a variety of programs and resources (http://www.colorado.edu/entrepreneurship/) developed to foster and support creative ideas for new initiatives. From academic programs and
student groups to community-wide support, you will find the resources and people to help you develop and launch ideas.

**Research Institutes**

CU Boulder’s 12 research institutes (http://www.colorado.edu/research/research-institutes/) account for more than half of all sponsored research dollars at the university—and they employ some of the most productive researchers in the country. With more than 900 researchers, students and supporting staff, the institutes make a major contribution to the university’s research and education missions as well as the local and area economy.

**Research Centers**

In addition to the large research institutes, there are nearly 90 research centers (http://www.colorado.edu/research/research-centers/) housed within academic departments or as subsets of the research institutes themselves. They can be found in all fields of the university, including humanities and the arts, social sciences, natural sciences, engineering, business and law.

**Research Computing**

Research Computing (https://rc.colorado.edu/) provides services for researchers that include large-scale computing resources, storage of research data, high-speed data transfer capabilities, and support for data sharing. Additionally, the Research Computing group provides consulting in computational science and data management, and will support grant proposals by partnering or providing letters of support.

**Corporate and Foundation Relations**

CU Boulder students and faculty benefit through the generosity of local and global companies, as well as foundations interested in supporting specific student programs or research areas. Every year, CU Boulder receives vital corporate and foundation support (https://www.colorado.edu/advancement/corporate-foundation-relations/) for scholarships, faculty research, event sponsorships and many other critical areas.

To learn more about our major research & innovation services and initiatives, visit the Research & Innovation Office (http://www.colorado.edu/researchinnovation/) webpage.
UNDERGRADUATE CATALOG

The Office of the Vice Provost for Undergraduate Education is charged with overseeing the entire undergraduate student experience, including assessing outcomes and launching and supporting student-facing campus initiatives. The Office of Undergraduate Education develops and oversees first-year seminars and first-year interest groups; coordinates undergraduate academic policy; coordinates the campus advising structure; and is responsible for the coordination and assessment of campus retention and persistence initiatives.

The vice provost for undergraduate education oversees a variety of programs and offices that aren't affiliated with any single college but that serve all students across campus, including Air Force, Army and Naval ROTC; the Office of International Education; the presidents leadership class; special undergraduate enrichment programs, including the Boettcher and Norlin Scholars and the undergraduate research opportunities program; and the Student Academic Success Center.

Academic policies governing undergraduate education are initiated by the faculty in accordance with the laws of the Board of Regents. The Boulder Faculty Assembly is the largest of the faculty governance organizations and it interfaces with additional faculty governance groups in the colleges through a series of liaison relationships. Several advisory bodies are in place for the vice provost for undergraduate education, comprised of students, faculty and administrators. The Office of Undergraduate Education works closely with the offices of the vice chancellor for student affairs and the associate vice chancellor for enrollment management. The vice provost for undergraduate education reports to the provost.

Academic Advising

Academic advising is a critical component in the success of undergraduate students. Its goal is to assist students in creating and achieving educational, career and life goals. Advising is more than offering information about academic courses and programs; it also involves encouraging students to formulate important questions about the nature and direction of their education. Advisors help students to explore their options and personalize their academic experience.

Advising Centers

There are several advising centers across the Boulder campus, primarily housed in colleges and schools. Academic advisors are professional staff or faculty members who have an expertise in navigating the entire curriculum and in developing mentoring relationships with students. Students are encouraged to meet with an advisor at least once each semester.

College of Arts & Sciences: Serving students pursuing the natural sciences, social sciences, and arts and humanities.

Leeds School of Business: Serving students pursuing accounting, finance, management and marketing.

School of Education: Serving students pursuing Bachelor of Arts in elementary education, Bachelor of Arts in leadership and community engagement, education minor, leadership studies minor and teacher licensure.

College of Engineering & Applied Science: Serving students pursuing aerospace engineering; chemical and biological engineering; civil, environmental and architectural engineering; electrical, computer and energy engineering; mechanical engineering; and computer science.

Program in Environmental Design: Serving students pursuing design studies, architecture, planning and landscape architecture.

Program in Exploratory Studies: Serving first-year students who are exploring across all colleges on campus.

College of Media, Communication and Information: Serving students pursuing advertising, PR and media design; communication; critical media practices; information science; intermedia art, writing and performance; journalism; and media studies.

College of Music: Serving students pursuing music and music performance.

Continuing Education: Serving degree-seeking and nondegree students enrolling in online, evening and summer classes.

Academic Calendar & Exams

Academic Calendar

The campus operates year round, with fall and spring semesters of 16 weeks each, a winter session in between fall and spring semesters, and a summer term that includes two three-week sessions (Maymester and Augmester), two five-week sessions, an eight-week session, a 10-week session and two intensive (one- or more-week) sessions.

For a complete calendar of academic and financial dates and deadlines, visit the Office of the Registrar’s Academic Calendar (http://www.colorado.edu/registrar/students/academic-calendar/) webpage.

The University of Colorado at Boulder has a legal and moral obligation to accommodate all students who must be absent from classes or miss scheduled exams in order to observe religious holidays; and takes care to not inhibit or penalize these students for exercising their rights to religious observance. For further information, see the university policy on the Observance of Religious Holidays and Absences from Classes and/or Exams (http://www.colorado.edu/policies/observance-religious-holidays-and-absences-classes-and-or-exams/).

### Final Examinations

It is the policy of the University of Colorado Boulder to adhere to the final examination schedule as published by the Office of the Registrar each semester. Unless notified otherwise in writing during the first week of classes, students enrolled in undergraduate courses should assume that an examination will be given. While it may be appropriate not to give a final in some undergraduate courses, such as independent studies, laboratory courses, seminars, project-based courses and colloquia, final examinations are integral parts of the instructional program and should be given in all other undergraduate courses. Graduating seniors are not exempt from final examinations. Students enrolled in graduate courses should consult with their instructors on whether final examinations will be administered.

1. The final examination in a course should be given as scheduled by the Office of the Registrar and not at other times, even if the instructor and all students in a course agree to such a change. An instructor may allow individual students to take the final examination at an earlier or later time if the instructor is satisfied that an exception is based on good and sufficient reasons and if such an exception is unlikely to materially advantage or disadvantage the interests of other students in the course.

2. Students should consult with their instructors and course syllabi for final examination information for courses that are scheduled at non-standard times and are not included in the published final examination schedule.

3. Final examinations in summer courses and in courses offered during special (variable length) sessions in fall and spring semesters are typically administered on the last regular meeting day of the course. No Common Exams for multiple sections of a single course may be scheduled for special session courses.

4. The week of classes preceding the scheduled final examination period should be used primarily for continued instruction and may include the introduction of new material. For courses in sessions of ten weeks or longer, no examinations may be given during the week of classes preceding the start of the campus’s final examination period; however, assignments listed in the syllabus such as papers, lab practicums, presentations, portfolios and projects may be due during that week.

5. Class sessions or graded assignments of any kind, including papers, lab practicums, presentations, portfolios and projects, may not take

</table>
place or be due on a day designated in the academic calendar as a Reading Day.

6. When students have three or more final examinations on the same day, they are entitled to arrange an alternative examination time for the last exam or exams scheduled on that day. When students have two final examinations scheduled to meet at the same time, they are entitled to arrange an alternative examination time for the course that meets later in the week during the term or, if the two courses meet on the same day during the term, the course that meets later in the day. Students must make arrangements with the instructor of the affected course(s) by the standard deadline to drop a course in that term and are expected to provide supporting written information of these situations to qualify for exceptions.

7. The submission deadline for grades each semester or special session is 98 hours after the conclusion of the final examination, excluding designated university holidays.

8. The Provost (or designee), in consultation with the Senior Vice Chancellor (or designee), may either reschedule or cancel final examinations in response to inclement weather or other emergencies that result in a campus closure during the final examination period. The administration’s determination of whether to reschedule or to cancel final examinations is based on the number of exam periods affected by the closure and the timing of the closure.

Rescheduled Exams
A final examination may be rescheduled within the final examination period. Students who do not participate in a rescheduled final examination are not guaranteed any make-up examination or alternative assignment, and in such cases students will be assigned course grades based on tests, assignments and other graded work completed up to the end of the term.

Canceled Exams
If a final examination is canceled, course grades will be assigned based on tests, assignments and other graded work completed up to the end of the term. Faculty may also offer a make-up examination and/or allow for an alternative assignment to be submitted after the final examination period. However, such opportunities must be made available to all students enrolled in the course, all final work must be received and graded no later than the end of the first week of the subsequent term (inclusive of summer session), and faculty must then submit change of record information for students whose course grades change due to their work on make-up examinations or alternative assignments.

Academic Integrity
The purpose of the Honor Code at the University of Colorado Boulder is to secure an environment where academic integrity can flourish. The Honor Code recognizes the importance of honesty, trust, fairness, respect, and responsibility and aims to instill these principles as essential features of the University of Colorado Boulder campus. The Honor Code allows all students to have responsibility for, and the ability to attain, appropriate recognition for their academic and personal achievements.

Honor Code
Academic Dishonesty includes any act in which a student gains, or attempts to gain, an unfair academic advantage over other students. These acts include, but are not limited to the following and also include any attempts to engage in the following:

1. Plagiarism. Portrayal of another’s work or ideas as one’s own; improper citation of another’s work, including, but not limited to, one’s own previous work.
2. Cheating.
   a. Unauthorized Use. Use of prohibited notes or study aids; allowing another party to do one’s work/exam and turning in that work/exam as one’s own; copying another student’s course work; collaborating on course work when prohibited; failing to abide by the specific written course instructions, including, but not limited to, exams, homework assignments, and syllabi; and/or use of electronic devices when not expressly permitted.
   b. Clicker Fraud. Using, or having someone else use, clicker technology improperly in an effort to receive academic credit.
3. Fabrication. Falsification or creation of data, research, or resources, altering a graded work without the prior consent of the course instructor.
4. Lying. Deliberate falsification with the intent to deceive in written or verbal form as applied to an academic submission of information.
5. Bribery. Providing, offering, or taking rewards in exchange for a grade, or, an assignment, or in the aid of Academic Dishonesty.
6. Threat. Acting to intimidate a student, staff, or faculty member for the purpose of affecting a grade or in an effort to prevent the reporting of an Honor Code violation, or in connection with any other form of Academic Dishonesty.
   a. Retaliation. Retaliating against or discouraging, directly or through third parties, an individual from participating in the Honor Code process. To be considered retaliation, there must be a causal connection between a materially adverse action and the act of reporting a violation or participating in an Honor Code process. A materially adverse action is one that would dissuade a reasonable person from reporting a violation, and includes, but is not limited to, intimidation, threats, or coercion. A determination of whether an action is materially adverse is a fact-dependent inquiry made on a case-by-case basis by SCCR staff.
7. Unauthorized Access. Gaining unauthorized access to, or use of, protected academic information including, but not limited to: CU-SIS; a faculty, student, or staff member’s computer, file, and/or physical space; or secure information on an online server.
8. Resubmission. Submitting the same or similar work for credit, including, but not limited to, homework, more than once without permission from all course instructors involved.
9. Aiding Academic Dishonesty. Facilitating any act which may help a student to gain an unfair academic advantage including, but not limited to, any of the aforementioned acts.

A student accused of violating the Honor Code has the right to due process through Student Conduct and Conflict Resolution. Students will receive notice through the Colorado.edu email address, and are encouraged to meet with a conduct coordinator to share their perspective on the allegations. Full details of the Honor Code adjudication process are on the Student Conduct & Conflict Resolution website (https://www.colorado.edu/scrc/honor-code/).

Academic Records
Diplomas
A diploma is issued for each degree earned at the University of Colorado Boulder. Doctoral candidates receive their diplomas at the spring commencement ceremony (diplomas may be picked up or mailed if not attending the ceremony or graduating in summer or fall term). Diplomas
are mailed to all other graduating students approximately eight weeks after the close of the semester in which degree requirements were completed and the student applied for graduation. All financial obligations with CU must be resolved before a diploma is issued.

CU Boulder also offers a certified electronic diploma (CeDiploma) (http://www.colorado.edu/registrar/students/graduation/cediploma/) for students who complete a university-approved certificate from Fall 2015 and onwards.

Graduating students with Federal Perkins/NDSL loans must complete a loan exit interview and clear all outstanding financial balances before leaving the university. Failure to do so results in a hold on the student’s record. The hold prevents registration for future terms and prevents the release of the diploma and academic transcript. Students can complete a loan exit interview by contacting Heartland ECSI at 1-888-549-3274 or via the Heartland ECSI (http://www.heartlandecsi.com/) website. Questions may be directed to University Student Loans & Debt Management in the Bursar’s Office at 303-492-5571, toll free at 800-925-9844.

Display diplomas or replacement diplomas may be ordered online after graduation. For more information, visit the Office of the Registrar’s Diplomas (http://www.colorado.edu/registrar/alumni/diplomas/)webpage.

Enrollment & Degree Certification

Through Buff Portal (https://buffportal.colorado.edu/), students may print an official enrollment certification at no charge. Certification of enrollment is available after the third week of classes of a semester. This certification may be for car insurance, loan deferments, medical coverage, scholarship purposes, etc. The Office of the Registrar can provide written confirmation of registration, enrollment or degree status upon request by current or former students.

CU Boulder has authorized the National Student Clearinghouse (NSC) to act as its agent for purposes of third party enrollment and degree verification. The NSC verifies degrees and enrollment for students who have not placed a privacy restriction on their academic record. The student’s name when enrolled, social security number or student ID, and date of birth will be required for identification purposes for enrollment or degree verification. All third parties should contact the National Student Clearinghouse by phone or visit its web site for current enrollment and degree verification. CU Boulder must be notified of the student’s career at CU Boulder, as this transcript does not carry the registrar’s signature, the seal of the university or other security features.

University policy determines the academic enrollment status and federal regulation determines the financial aid enrollment status. CU Boulder is required to report enrollment based on the financial aid enrollment status to the NSC. Please refer to the Office of the Registrar’s enrollment status grid on the Check Your Enrollment Status (https://www.colorado.edu/registrar/students/registration/register/status/) webpage to determine your academic/financial aid enrollment status.

Students may also obtain verification of degree by ordering an official transcript or requesting an official degree certification through the Office of the Registrar.

Transcripts

Official Transcripts

Current and former students may order transcripts online (https://exchange.parchment.com/send/adds/?main_page=login&s_id=7i3anAeWu6K3ErXO); no IdentiKey is required. Official transcripts are available in electronic PDF or paper format. Transcripts may be ordered as either a complete academic record of courses taken at all University of Colorado campuses or as a select career (undergraduate, graduate, law or noncredit) for coursework taken after 1988.

Transcripts can be withheld for ongoing financial obligations to the university or for disciplinary actions.

Official transcripts bear the signature of the registrar and the official seal of the university (not applicable to noncredit transcripts).

Unofficial Transcripts

Currently enrolled students and alumni who have access to the student portal may view and print unofficial transcripts free of charge through Buff Portal (https://buffportal.colorado.edu/). Unofficial transcripts display the complete academic record of courses taken at the University of Colorado. However, academic institutions and potential employers generally do not accept the unofficial transcript as evidence of a student’s career at CU Boulder, as this transcript does not carry the registrar’s signature, the seal of the university or other security features.

Unofficial transcripts are primarily used for advising and counseling in offices at University of Colorado campuses.

Degrees & Majors

In order to earn a baccalaureate degree from the University of Colorado Boulder, students must meet all degree and major requirements for their program of study and earn a minimum of 120 cumulative credit hours and a minimum of a 2.00 GPA. It is important to note that some degree and program requirements are higher than these minimum standards. See college and school sections of this catalog for specific degree policies and requirements.

In addition, students at CU Boulder may pursue dual degrees, concurrent degrees or additional majors, minors and/or certificates. See the Change or Add a Major, Minor or Certificate (https://www.colorado.edu/registrar/students/degree-planning/change-add-program/#business-522) webpage for more direction.

Dual Degrees

A dual degree at the baccalaureate level can be two different degrees from the same college or school (e.g., a BA and BFA from the College of Arts and Sciences), or two degrees from different colleges or schools (e.g., a BA from the College of Arts and Sciences and a BS from the College of Engineering and Applied Science). In order to earn dual baccalaureate degrees, students must meet all individual degree requirements and receive approval from the academic college or school for each degree. Both degrees must be confirmed with the same graduation date (degrees are awarded concurrently).

Students who wish to pursue an additional baccalaureate degree after graduating with a baccalaureate degree from CU Boulder must apply for readmission to the university. In addition, students should work with an academic advisor in the intended degree program to determine appropriate procedures and additional requirements (e.g., additional residency requirements may apply beyond course requirements for the second degree and major). Not every college and school permits students to complete an additional baccalaureate degree after graduation.

Bachelor’s–Accelerated Master’s Degrees

Bachelor’s–accelerated master’s (BAM) degree programs are offered in several departments. These programs allow a student to receive
both a bachelor’s and master’s degree in five years of study without compromising the academic integrity of either degree.

BAM programs are open only to highly qualified CU Boulder undergraduates. Students are typically admitted during the junior year with an intent application reviewed by their program. BAM students must apply online to graduate with their bachelor’s degree for the semester in which degree requirements are complete, and must also apply at that time to be formally admitted to continue with the accelerated master’s program. (Students who were admitted prior to July 2019 follow a concurrent bachelor’s/master’s structure, and the two degrees are awarded simultaneously when requirements for both degrees are met.) Students wishing to continue studying toward a doctorate must formally apply for admission to the Graduate School.

Students interested in a BAM program should inquire with their program of interest for information regarding admissions and detailed program guidelines and requirements.

Please see below for currently approved BAM degree programs offered, listed by college and school. Or, explore BAM program options in the Programs A-Z section (catalog.colorado.edu/programs-a-z/#filter=filter_53) of the catalog.

**College of Arts and Sciences**
- Art and Art History
- Chinese/Asian Languages and Civilizations
- Classics
- Ecology and Evolutionary Biology
- Ethnic Studies/Education
- Film Studies/Art History
- French
- German Studies/German
- Integrative Physiology
- Japanese/Asian Languages and Civilizations
- Linguistics
- Mathematics
- Mathematics/Applied Mathematics
- Philosophy
- Physics
- Religious Studies
- Russian Studies/Russian
- Theatre

**Leeds School of Business**
- Accounting
- Accounting/Accounting Taxation
- Finance/Accounting
- Finance/Accounting Taxation
- Management/Telecommunications

**School of Education**
- Ethnic Studies/Education

**College of Engineering and Applied Science**
- Aerospace Engineering
- Applied Mathematics
- Applied Mathematics/Telecommunications
- Architectural Engineering
- Chemical Engineering
- Chemical and Biological Engineering/Chemical Engineering
- Civil Engineering
- Civil Engineering/Architectural Engineering
- Computer Science
- Computer Science/Telecommunications
- Electrical Engineering
- Electrical and Computer Engineering/Electrical Engineering
- Electrical and Computer Engineering/Telecommunications
- Engineering Physics/Physics
- Environmental Engineering/Civil Engineering
- Management/Telecommunications
- Mechanical Engineering

**Additional Majors**
Some colleges and schools permit students pursuing a baccalaureate degree to graduate with more than one major (e.g., economics and French) under the same degree (e.g., BA) by completing all requirements for each major. The majors must be completed concurrently and will post to a degree record with the same graduation date. A minimum of 120 total credit hours is required for a degree with additional majors.

**Minors**
Students earning a baccalaureate degree may participate in a minor program. Minors are offered in a number of undergraduate colleges, schools and programs.

**Certificates**
Undergraduate students may pursue formal certificates in a variety of academic or interdisciplinary subjects. Each certificate program has unique requirements. Degree-seeking students who been verified to have completed certificate requirements will have the certificate/s posted to their academic record at the time of graduation. Nondegree students who are approved to pursue select certificate programs must be admitted through Continuing Education.

**Degree Audit**
Degree audit reports are available for most degree and certificate programs to help students and advisors track requirements and progress in order to help them graduate on time. The degree audit outlines courses needed for the degree and applies college or school-defined policies, including transfer credit applicability and repeated course rules. The audit also provides hypothetical "what if" degree information. Students and advisors can access the degree audit tool through Buff Portal (https://buffportal.colorado.edu/).

**Class Level**
Class level is based on the total number of credit hours passed, as follows:

<table>
<thead>
<tr>
<th>Class Level</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>Freshman</td>
<td>0–29.9</td>
</tr>
<tr>
<td>Sophomore</td>
<td>30–59.9</td>
</tr>
<tr>
<td>Junior</td>
<td>60–89.9</td>
</tr>
<tr>
<td>Senior</td>
<td>90–123.9</td>
</tr>
<tr>
<td>Fifth-Year Senior</td>
<td>124 and above</td>
</tr>
</tbody>
</table>
The normal course load for most undergraduates is 15 credit hours each semester.

**Course Load**

Full-time status for undergraduate students is 12 or more credit hours for fall, spring and summer semesters for financial aid purposes. For enrollment verification and academic purposes (not related to financial aid), 12 credit hours is considered a full-time load in the fall and spring semester, and 6 credit hours is considered full time in the summer. For further information, please consult the Office of Financial Aid (https://www.colorado.edu/financialaid/applying-aid/) website.

Students who receive financial aid or veterans benefits or who live in university housing should check with the appropriate office regarding course-load requirements for eligibility purposes.

**Intra-University Transfer Students**

Students wishing to change colleges or schools within the CU Boulder campus follow the intra-university transfer (IUT) guidelines from the college or school into which they wish to transfer.

For more information on recommended coursework in preparation for an IUT and other criteria, students need to consult college and school sections of this catalog or talk with an academic advisor in the program to which they plan to transfer. Some colleges and schools do not accept IUT students during the summer. It is important to note that admission to a college through the IUT process is competitive, and not all students who apply are admitted. Decisions are based on course preparation, credit hours completed, grade point average and other criteria required by the specific college or school. See the Change or Add a Major, Minor or Certificate (https://www.colorado.edu/registrar/students/degree-planning/change-add-program/#business-522) webpage for more information.

**Academic Standing**

Each college and school at CU Boulder has published minimum requirements for undergraduate students to remain in good academic standing. See respective college and school sections related to academic standards, including policies for probation and suspension.

In addition, federal regulations require students to make satisfactory academic progress in a program of study to be eligible for financial aid. For additional information, see the Satisfactory Academic Progress (SAP) Policy (http://www.colorado.edu/financialaid/policies/satisfactory-academic-progress-sap-policy/) webpage.

**Class Rank**

After an undergraduate student graduates, they can receive a document that indicates their class rank among graduating students within the last year. Students in the College of Arts and Sciences and the College of Engineering and Applied Science will have a ranking within their major degree program. Students in other schools, colleges and programs will have a ranking within their college. The request form is available in the student portal (https://www.colorado.edu/studentportal/).

**Admissions**

The Office of Admissions welcomes inquiries from prospective students regarding undergraduate admission. Through the admission process, the university seeks to identify applicants who will successfully complete a collegiate academic program. Admission is based on many criteria, including high school GPA or GED test scores, high school rank, the quality of coursework, college entrance test scores, personal essays and the extent to which the minimum academic preparation standards (MAPS) (p. 43) have been met.

For additional undergraduate admission information, visit the Admissions (http://www.colorado.edu/admissions/) web page.

**Visiting the Campus**

Prospective students and their families are welcome to visit the Office of Admissions in the Regent Administrative Center, room 125, between 9 a.m. and 5 p.m. (summer hours are 8:30 a.m. to 4:30 p.m.), Monday through Friday, except on holidays. Daily information sessions, walking tours of the campus and special all-day visit programs are offered. Although interviews are not used in the decision-making process, you are invited to visit the campus.

The best time to see the campus is when classes are in session (September through mid-December and mid-January to early May, with the exception of spring break); see the academic calendar (p. 19) for specific dates. There are dates when information sessions, campus tours and visit programs are not held due to holidays or university closures. It is important to check our website for the most current information.

**Reservations**

Reservations are required for all information sessions, tours and visit programs and can be made through our Admission Visit Programs (http://www.colorado.edu/visit/admissions/) webpage. There, you will also find complete visit program descriptions, dates, reservation forms and campus maps. Visit program dates for future academic years are added to the website as they become available (usually in August each year).

**Daily Information Sessions and Campus Tours**

Information sessions with an admission counselor are held Monday through Friday at 9:30 a.m. and 1:30 p.m. Following the information sessions are walking tours of the campus led by student guides, beginning at 10:30 a.m. and 2:30 p.m. Combined information sessions and tours are also held at 10:30 a.m. on most Saturdays.

**Campus Visit Programs**

An excellent way to become acquainted with the campus is to participate in one of the campus visit programs specially designed for prospective students and their families.

These programs are offered throughout the year and provide prospective students and their families the chance to participate in information sessions, take a campus tour, learn more about residence hall life, talk with student and parent panels and meet with campus representatives, as well as attend classes or listen to a sample lecture. For more information about any or all of these visit programs or instructions on how to register, go to the Admission Visit Programs (http://www.colorado.edu/visit/admissions/) webpage or call the Office of Admissions.
General Admission Information

Choosing a Program of Study

When applying for admission, students need to choose a major in one of CU Boulder’s colleges or schools. Applicants who have not decided on a major can select the Program in Exploratory Studies. This allows students to work with a group of highly-skilled advisors who can help them explore their various interests, set academic goals and customize their educational path. At the end of the first year, students transfer to one of the degree-granting academic options on campus or opt to continue with Exploratory Studies through their third semester. Students can also change their area of study, but this can result in additional course requirements that may add to the number of semesters necessary to complete a degree.

Although applicants can apply to only one CU Boulder college or school, after enrollment they can apply for transfer to another CU Boulder college or school through the intra-university transfer (IUT) process. Criteria for transferring from one college or school to another are competitive, and each college or school establishes its own standards.

Double Degrees, Double Majors, Minors and Certificate Programs

There are several programs that allow students to include additional areas of academic concentration beyond their chosen major. Two different degrees, either from the same college or school, or degrees from different colleges or schools, may be earned, providing certain conditions are met. Students are admitted to one major and degree program initially but may pursue a second degree as early as their first semester of enrollment. Minor programs are offered in a number of undergraduate departments and programs in the College of Arts and Sciences, the Leeds School of Business, the College of Engineering and Applied Science and the School of Education. Certificate programs in arts and sciences, business, engineering and music fields are also available.

Preprofessional Study

Preprofessional advisors are available to help students interested in medicine, dentistry, physical therapy, veterinary medicine, nursing, pharmacy, physician assistant and other health professions or law. Students interested in these fields may apply to any of the majors open to new undergraduates, including the open option major in the College of Arts and Sciences. Students interested in one of the undergraduate or graduate health sciences programs offered at the University of Colorado Anschutz Medical Campus may complete preprofessional work on the Boulder campus. Admission is competitive, but preference to all health sciences programs is given to Colorado residents.

For more information, see the Preprofessional Programs (p. 933) section or visit the Pre-Health (http://www.colorado.edu/advising/pre-health/) webpage.

Music Applicants

Prospective music majors must submit both an undergraduate application for admission to the Office of Admissions, and a College of Music supplemental application.

Direct applicants to the College of Music will not receive an early action decision regardless of when they submit their application, as they must audition before receiving a decision. These applicants can expect a decision by April 1. Direct applicants to other majors who have indicated an interest in a double degree in music are able to receive an early action decision to their primary majors if their application materials are received by the early action deadline. They will learn of their music decision after auditioning and will retain their admission to their primary major regardless of the music decision.

Live auditions are required for Colorado residents and are preferred for non-residents. Live auditions are scheduled for selected Saturdays in January and February. Other live audition times may be arranged; high quality recordings also may be submitted in lieu of a live audition.

College of Music scholarships are awarded to music majors only. High school and college transfer students are automatically considered for merit-based music scholarships upon completion of the application process, including the audition. Transfer students who are receiving a music scholarship from their current institution must submit a scholarship release form before they can be awarded a music scholarship.

The College of Music Supplemental Application can be accessed through the application status page after submitting an application to CU Boulder. To obtain more detailed information about audition requirements, faculty and degree programs, visit the College of Music’s Admissions (http://www.colorado.edu/music/admissions/) webpage.

Teacher Education Applicants

The School of Education offers multiple pathways for teacher candidates interested in transformative careers in education.

Undergraduate students interested in K–6 Elementary Education may either pursue the bachelor’s degree in elementary education or complete the teacher licensure requirements while earning a bachelor’s degree from another college on campus. Students interested in K–12 Music Education complete the teacher licensure requirements while earning a Music Education degree from the College of Music. Students interested in Secondary (7–12) teacher education will complete the teacher licensure requirements while earning a bachelor’s degree in a corresponding field. CU Boulder offers secondary programs in English Language Arts, Mathematics, Science, Social Studies and the following world languages: French, German, Japanese, Latin, Russian and Spanish.

Students interested in an undergraduate degree combined with teaching licensure must first apply to the CU Boulder undergraduate degree-granting program, and then submit their application and credentials to the School of Education. Undergraduate students who plan to pursue teacher education should declare this intent to the school’s Office of Student Services as soon as possible after enrolling at CU Boulder.

Teacher education applicants who have previously completed a four-year undergraduate degree program must submit their application to the Office of Admissions.

Refer to the School of Education section for more information about teacher education. For application and deadline information, interested students may also visit the School of Education (http://www.colorado.edu/education/) website, email EdAdvise@colorado.edu or call 303-492-6555.

College Readiness in English and Mathematics

The state of Colorado mandates that all undergraduate students entering public institutions of higher education in Colorado be screened for
college readiness in reading, writing and mathematics. To pass the screening requirements, students must present minimum test scores. Students who have successfully completed four years each of college preparatory English and college preparatory math courses are deemed to have met the respective requirements regardless of the test score.

Students who do not meet CU Boulder’s criteria for college readiness will be required to demonstrate readiness through an additional examination or to enroll in preparatory courses prior to completing the first 30 credit hours of coursework on the Boulder campus. Students who have not demonstrated reading, writing and/or mathematics readiness will receive additional details after they confirm their intent to enroll at CU Boulder.

Admission Requirements

First-Year Students

Students are first-year applicants if they are currently enrolled in high school, or if they have earned a high school diploma or its equivalent and have not enrolled in a college or university since graduation.

Admission Criteria

Many factors are considered in evaluating students' applications for admission to CU Boulder. Although academic performance in high school (high school GPA and the quality of coursework) is the most important indicator of success, other factors are also considered. These include students' college entrance test scores (either the SAT or ACT), the trend in their grades, the extent to which the minimum academic preparation standards (MAPS) are met, their personal essays and the potential contributions they may make to the campus community. For information on MAPS, see the MAPS table (p. 43) in this section.

Applicants whose records reflect nontraditional grading systems, unusual curricula or high school equivalency through the GED test will receive individual consideration.

College Entrance Tests

CU Boulder requires either the SAT or the ACT for admission consideration. We do not require the ACT Writing Test or the SAT Essay for CU Boulder admission consideration. The highest scores are used in the admission decision. If the same test is taken more than once, the scores are combined on each subsection to give the highest overall score. SAT subject test scores are not required. CU Boulder requires all visa holders graduating from a US high school to submit either an SAT or ACT score. We encourage all students to submit an SAT or ACT score to receive consideration for our automatic merit scholarships. For more information, see the Application Process (p. 30) section.

Minimum Academic Preparation Standards (MAPS)

Students who graduated from high school in 1988 or later are expected to have completed courses that meet certain minimum academic preparation standards (MAPS) before enrolling at CU Boulder. Students who attended a non-U.S. high school for two years or more are not subject to MAPS. Any MAPS deficiency will be considered during the admission review process. The MAPS for specific CU Boulder colleges and schools are listed in this section.

Students may be admitted to CU Boulder even though they have not met all the MAPS requirements. If that is the case, they are required to complete the appropriate MAPS courses once enrolled, and the credit hours may be applied toward graduation. All MAPS deficiencies must be completed prior to graduation from CU Boulder. Students may also complete missing MAPS coursework at other colleges or universities, through approved credit-by-examination programs or by testing out through the appropriate foreign language department.

Policies Concerning MAPS Deficiencies

The policies of the Boulder campus with respect to completing MAPS coursework after enrollment are as follows.

1. Appropriate missing MAPS coursework is generally included in the credit hours for graduation.
2. All coursework toward fulfillment of the MAPS must be taken for a letter grade.
3. It is strongly recommended that students enroll in and complete at least one MAPS course each term, beginning in the first term of enrollment, until such time as all MAPS are completed. This policy applies to new first-year students, transfer students and students transferring from other academic units on the Boulder campus and from other campuses of the university. Some colleges or schools may impose a sanction if the student does not complete one course per semester toward meeting MAPS deficiencies.
4. All students who first enroll in one academic unit at CU Boulder and subsequently transfer to another unit are required to meet the MAPS specified for the new unit, irrespective of their completion of MAPS units in their previous college or school.
5. Students in double-degree programs must meet MAPS requirements of both degree-granting units.
6. Students must consult with a CU Boulder academic advisor (or read their college or school’s academic publications) to determine which specific courses may be used to meet a MAPS requirement (p. 43).

Advanced Placement

CU Boulder participates in the Advanced Placement program of the College Board. More than one-third of Boulder’s entering first-year students submit Advanced Placement (AP) test scores each year. Official scores must be sent to the admissions office directly from the College Board for both first-year students and transfer students. For a guide to specific equivalencies, see the Advanced Placement (AP) Credit Table (p. 32).

For more information, write or call:

AP Exams
PO. Box 6671
Princeton, NJ 08541-6671
609-771-7300 or toll free 888-225-5427
aphighered.collegeboard.org (http://aphighered.collegeboard.org)

International Baccalaureate

The International Baccalaureate (IB) Diploma programs provide preuniversity study. IB examinations, whether leading to a full IB diploma or to an IB certificate often qualify students for advanced standing at CU Boulder. In general, credit hours are granted for approved IB examinations at the higher level with a score of 4 or better.

Students admitted to the University of Colorado Boulder who have graduated from high school having successfully completed an International Baccalaureate Diploma program shall be granted 24 hours of college credit. Students should check with their college or school to determine if or how the earned college credit hours apply toward degree requirements. No CU Boulder tuition shall be charged for these credit hours. These credit hours shall be granted, however, only if the student...
receives a score of 4 or better on an examination administered as part of the IB Diploma program. If the student scores less than 4 on any IB subject test, the credit hours granted shall be reduced accordingly.

An official copy of the diploma with test scores must be sent to the admissions office directly from the IB organization. For a guide to specific equivalencies, see International Baccalaureate (IB) Credit Table (p. 35). For the most current information on how CU Boulder evaluates IB credit hours, visit the Credit for Coursework or Exams section of the First-Year Student Selection Process (https://www.colorado.edu/admissions/transfer/) webpage.

For more information on test administration, write or call:

212-696-4464
www.ibo.org (http://www.ibo.org)

First-Year Applicants Not Granted Admission
Students who are not granted admission as entering first-year students may consider transferring to CU Boulder after successful study elsewhere. Students are encouraged to complete at least one full year of transferable college or university coursework, including any courses outlined in the MAPS table (p. 43) that were not met in high school.

Transfer Students
Applicants are considered transfer students if they enrolled in any college-level coursework (at another college or university, or other campus of the University of Colorado), full time or part time, since graduating from high school. Applicants are not considered transfer students if the only college-level classes they have taken were while enrolled in high school. To be considered for admission, transfer students must report all previous college work and have a high school diploma or its equivalent.

Competitive Admission Criteria
Transfer applicants are considered for admission on the basis of transfer as well as first-year student criteria, including minimum academic preparation standards (MAPS). All transfer applicants who graduated from high school in 1988 or later are expected to have completed MAPS requirements before enrolling at CU Boulder.

CU Boulder’s aim is to offer highly qualified and intellectually curious transfer students the opportunity to continue pursuing their educational goals. We practice a holistic admission review process, taking into account a variety of primary academic and secondary factors as they relate to your projected success in our competitive academic environment. You will be considered on an individual basis relative to a prediction of your academic success in the college to which you apply. For more information on competitive transfer admission guidelines, visit the Transfer Students (https://www.colorado.edu/admissions/transfer/) webpage.

College of Arts and Sciences
A cumulative college GPA of 2.50 or better in appropriate general education courses is required. Students who complete 30 credit hours of transfer-level work with a cumulative GPA of 2.70 at a Colorado community college and who apply by the equal consideration deadline are assured admission to the College of Arts and Sciences. Students must complete all of the Minimum Academic Preparation Standards (MAPS) to be guaranteed admission.

NOTE: This information applies to students who entered college after spring 1988. For those students who entered college prior to summer 1988, contact the Office of Admissions.

Leeds School of Business
A cumulative college GPA of 3.00 or higher and completion of microeconomics and macroeconomics and either statistics (business statistics strongly preferred) or calculus with competitive letter grades is required for admissions.

School of Education
The School of Education offers two bachelor’s degree programs in Elementary Education (plus a Culturally & Linguistically Diverse endorsement) and Leadership & Community Engagement. A cumulative college GPA of 2.75 or better as well as 24 completed college credits in general education requirements, as well as a prerequisite course such as School and Society.

The School of Education also offers licensure programs in elementary, secondary and K-12 music education. The licensure fields in secondary education include English, foreign language, mathematics, science and social studies. Teacher licensure at the undergraduate level must be combined with a bachelor's degree program. If applicants do not already have a bachelor's degree, they should apply to a major of interest that will supplement their teaching goals. Once enrolled at CU Boulder, students have the opportunity to apply for the licensure program through the School of Education.

Teacher education applicants who have previously completed a four-year undergraduate degree program must submit their application to the Office of Admissions.

Refer to the School of Education (p. 616) section for more information about teacher education. Interested students may also visit the School of Education (http://www.colorado.edu/education/) website.

Program in Environmental Design
A college GPA of 2.75 or higher is required. Preference is given to students who have had drafting, architecture and/or fine arts courses in college. A good math and science background is also essential.

College of Engineering and Applied Science
A cumulative college GPA of 3.0 or higher is required. Transfer applicants must have taken courses relevant to an engineering curriculum, including at least two semesters of college-level calculus and one semester of calculus-based physics or one semester of college-level chemistry. Chemical, Chemical and Biological and Environmental Engineering majors must take one semester of chemistry but are encouraged to take two semesters. (Exception: students [resident or nonresident] who apply for admission for a semester which occurs within 18 months of their high school graduation date may also be competitive without having taken the above coursework, as long as their high school academic record is competitive. In addition, if any college-level work has been completed, an overall GPA should be 3.0 or higher.)

Prerequisites must be completed with a grade of B or better.

The college guarantees admission to any of its baccalaureate degree programs to students transferring from Colorado public institutions of higher education who meet the College of Engineering and Applied
Science Guaranteed Admission Criteria for Colorado Transfers (http://www.colorado.edu/admissions/transfer/).

**College of Media, Communication and Information**
Transfer students are required to have an overall GPA of 3.0 or higher. Students with more than 36 credit hours must have completed an introductory course in the major they intend to pursue, with a GPA of 3.0 or higher:

- Communication majors: Public Speaking OR Group Communication
- Information Science majors: Intro to Computer Science OR Intro to Programming
- Journalism majors: Media News and Reporting OR New Media/Internet Media
- Media Production majors: Intro to Film Art
- Media Studies majors: Intro to Mass Media
- Strategic Communication majors: Intro to Public Relations OR an equivalent Principles of Public Relations course

**Minimum Academic Preparation Standards (MAPS)**
Effective for students who graduated from high school in spring 1988 or later, CU Boulder expects all transfer students to have completed courses that meet certain minimum academic preparation standards (MAPS). For MAPS requirements for specific CU Boulder colleges and schools, see the MAPS chart (p. 43).

MAPS requirements not met in high school may be met through equivalent college-level coursework before or after transfer to CU Boulder. A semester course completed at the college level substitutes for a year of work in high school. Students who attended a non-U.S. high school for two years or more are not subject to MAPS.

**International Students**

### International Degree-Seeking Students
The university invites applications from qualified international students. International applicants are those who already have, or will be applying for, a temporary U.S. visa such as F-1 and J-1. Applicants who are United States citizens, permanent residents, asylees or refugees are not considered international. These students should follow application and admission procedures for undergraduates or graduates as described elsewhere in this catalog.

More than 3,100 international students from more than 100 countries study at CU Boulder. Applications for admission are processed by the Office of Admissions. International students who wish to pursue a full-time program of study at the undergraduate or graduate level should visit the Admissions (https://www.colorado.edu/admissions/) website for admission information and online application forms.

Assistance after admission is provided by International Student and Scholar Services (https://www.colorado.edu/isss/), located in the Office of International Education. CU Boulder offers a full range of services to international students, including a host family program, orientation, special programs and activities for international students and personal attention to individual needs. For information, visit the International Student and Scholar Services Student Resources (https://www.colorado.edu/isss/student-resources/) webpage.

Intensive English language instruction is also offered by the International English Center (http://iec.colorado.edu/). For information, email ieccu@colorado.edu or call +1-303-492-5547.

Prospective graduate students should visit the Graduate School Admissions (https://www.colorado.edu/graduateschool/admissions/) website for information and application forms specific to the academic department in which they are interested. Prospective graduate students can also call the campus telephone operator at +1-303-492-1411 and ask to have the call transferred to the department of interest or write to the specific department, University of Colorado Boulder, Boulder, CO 80309.

### International Nondegree Students
The University of Colorado Boulder welcomes nondegree visiting international students from around the world. International students who are requesting a form I-20 (for an F-1 visa) are required to enroll full-time (6 credit hours in summer and 12 credit hours in fall and spring semesters). In order to maintain F-1 status, international students should not drop below full-time enrollment. Students on B-1/B-2 visas may be eligible to take one course. Visiting international students must meet academic prerequisites in order to enroll. Visiting international students who are not native speakers of English must also demonstrate English language proficiency by submitting valid TOEFL or IELTS scores, or by submitting proof that they completed at least one year of full-time academic study at a U.S. college or university or at an institution in a country where English is the native language (i.e., Australia, Canada).

Email ceadvise@colorado.edu (ceadvisor@colorado.edu) for additional information.

### Readmit Students
CU Boulder undergraduate degree-seeking students who have not attended the Boulder campus for three semesters (including summer) since their last graded semester must submit the undergraduate Application for Readmission (https://www.colorado.edu/admissions/apply/) to the Office of Admissions. No application fee is required. Students who have attended any other college or university since attending CU Boulder must submit official transcripts directly from the issuing institution(s) to the Office of Admissions.

Students seeking readmission into a different college or school than that in which they were previously enrolled must note the requested change on their application. Otherwise, the university assumes that students will return to the same field of study, if eligible to do so. Students who request a change in college or school for which they are not eligible must request reconsideration for their previous program.

Former students in the College of Arts and Sciences wishing to return to the college must apply to their previous major. Students who wish to
pursue a second undergraduate degree must apply to a major different from the one in which they received their degree. Students may not apply for a second bachelor’s degree in the Leeds School of Business or the College of Media, Communication and Information.

Continuing undergraduate degree-seeking students who do not attend for three or fewer semesters (including summer), and who were not academically suspended are automatically eligible to return without having to readmit (does not apply to graduate students). This policy includes degree-seeking undergraduates who are only taking classes through Continuing Education. During these semesters of non-enrollment, students' CU Boulder email and student portal accounts remain open. To return, students should register for classes during the regular enrollment period for the returning term. Students who received a refund of the confirmation deposit must repay it when returning. Consult the Withdrawal Return Chart (https://ce.colorado.edu/withdraw-cu/) for important details.

**Nondegree Students**

Students who wish to take CU Boulder courses but are not currently admitted to a degree program at the university are classified as "nondegree students." Students apply as nondegree students through the Division of Continuing Education (https://ce.colorado.edu/). Nondegree students may enroll in credit classes through the ACCESS (Available Credit Courses for Eligible Special Students) Program, the Evening Credit Program, the Online Credit Program, the Applied Music Program and Summer Session.

All nondegree students must have completed high school or have a high school equivalency diploma. Nondegree applicants under the age of 22 not enrolled in high school must meet criteria similar to first-year students entering CU Boulder. To determine eligibility, applicants must provide an unofficial copy of their high school transcripts and ACT/SAT scores.

If students have been denied admission to an undergraduate degree program, they may not enroll as nondegree students in the ACCESS Program for the semester for which they sought degree program admission. Nondegree student admission does not guarantee future admission to any degree program.

Nondegree students may also enroll for courses on a pass/fail basis. These courses are counted toward credit hours of pass/fail coursework permitted according to the rules of the college or school to which students are admitted once they achieve degree status.

Nondegree students must maintain a 2.00 cumulative GPA. Failure to maintain the required GPA will result in the inability to continue taking classes as a nondegree student.

High school students interested in taking courses at CU Boulder apply as nondegree students through the High School Dual Enrollment Program (https://ce.colorado.edu/programs/high-school-dual-enrollment/) administered by the Division of Continuing Education.

International students who want to apply to the university as nondegree students should read the International Students section above. Students interested in teacher licensure should refer to the School of Education section.

**Nondegree Students Transferring to a Degree Program**

Students who are currently enrolled or have been enrolled at any CU campus as nondegree students may apply for admission to an undergraduate degree program.

Students wishing to transfer to a graduate degree program should refer to the Graduate School section and individual college and school sections.

A degree-seeking applicant may transfer an unlimited number of credit hours taken as a nondegree student on any University of Colorado campus. However, applicability of these credit hours toward degree requirements is established by the colleges and schools. It is suggested that a student apply to a degree program as soon as admission requirements, including MAPS deficiencies, have been met. It is essential that former nondegree students actively seek academic advising from the appropriate dean's office once they have been accepted into a degree program.

**Second Undergraduate Degree Applicants**

Students may apply for a second undergraduate degree at the University of Colorado Boulder, but should explore the various options in graduate study available at the university before doing so. Students applying for a second undergraduate degree must follow transfer admission guidelines, and those students who are admitted must keep in mind that all college and major requirements must be met in order to complete degree programs satisfactorily. Restrictions mandated by general university policies, as well as specific college and school policies, include the following:

- Applicants may not apply to the major in which they received their first undergraduate degree.
- Applicants must apply to a specific major; applications for an open option or undetermined major cannot be considered.
- Second undergraduate degree applicants in the Program in Environmental Design are encouraged to investigate graduate programs.
- The Leeds School of Business and the College of Media, Communication and Information do not consider students who have already completed an undergraduate degree. These students are strongly encouraged to investigate graduate study.
- Students who already have an undergraduate degree from the College of Engineering and Applied Science and who desire a second undergraduate degree are strongly encouraged to investigate graduate study as an option.
- Credit hours earned as a nondegree student at the University of Colorado may not be used toward major degree requirements for a second degree in the College of Arts and Sciences.

**Students from Other CU Campuses**

Students who wish to transfer to Boulder from another University of Colorado campus (Colorado Springs, Denver or Anschutz), from CU Study Abroad or from CU Continuing Education should refer to the Transfer Applicants (p. 27) section. These students must send a high school transcript, SAT or ACT scores and an official transcript from each college or university attended (outside the University of Colorado system) to the Office of Admissions. Currently enrolled degree students are not required to pay the application fee. Special consideration is given to applicants transferring from degree programs at other campuses of the University of Colorado. Coursework completed at other campuses in the
University of Colorado System will be a part of the student’s cumulative university record and will not be considered as transfer credit hours. However, the applicability of this coursework toward specific CU Boulder degree requirements will be determined solely by CU Boulder colleges and schools. External transfer credit presented by students to other University of Colorado campuses will be evaluated by CU Boulder guidelines upon the student’s matriculation into a degree program at CU Boulder.

**Denied Admission as a First-Year Student**

Students who were not admissible to the University of Colorado Boulder based on high school academic records are encouraged to apply for transfer admission after at least 24 credit hours of transferable college-level coursework are completed or in progress. This includes any minimum academic preparation standards (MAPS) requirements not met in high school.

**Application Process**

**Application Priority Dates and Admission Notification**

Applications for degree candidates may be submitted beginning in August for the following spring, summer and fall terms.

The university reserves the right to deny admission to applicants whose total credentials reflect an inability to assume those obligations of performance and behavior deemed essential by the university and relevant to any of its lawful missions, processes and functions as an educational institution.

**First-Year Applicants**

Students can apply to CU Boulder using the Common Application. All candidates will be reviewed in the order their application file is completed (application is submitted and all required documents are received and official).

**Spring First-Year Applicants**

Spring applications are processed on a rolling basis. The Office of Admissions begins notifying applicants about admission decisions in October. Decisions are made approximately six to eight weeks after an application is complete. Full consideration is given to applications that are complete (including the application fee and all required credentials) by the Oct. 1 deadline.

**Summer and Fall First-Year Applicants**

There are two admission notification periods for fall and summer applicants. The first-year regular decision application deadline is Jan. 15. All applicants with completed files by Jan. 15 will be notified of their admission decision no later than April 1.

Students should, if they choose to attend, confirm their intent to enroll by May 1.

**Transfer Applicants**

If a student submits a complete application on or before the transfer application deadline, they will receive an admission decision within six to eight weeks. A complete application includes test scores (if you have less than 24 college credit hours post high school graduation), transcripts (high school and college), personal statement and application fee.

**Transfer Application Deadlines**

- Spring Term: Oct. 1
- Summer Term: March 15
- Fall Term Early Notification: March 15
- Fall Term Regular Decision: June 1

Applications are processed in the order in which they are received and completed. The earlier a complete application is submitted, the earlier a decision will be made.

**Where to Send the Application, Fee and Credentials**

Materials that cannot be submitted electronically, may be mailed to:

Office of Admissions
Regent Administrative Center 125
University of Colorado Boulder
552 UCB
Boulder, CO 80309-0552

**Mailing Address**

Applicants must keep their mailing address current at all times. It is used for mailings until the applicant arrives on campus. Notices are also sent to this address regarding admission, registration and New Student Welcome, as well as other information. If an address changes or is no longer valid, notify the Office of Admissions immediately at 303-492-6301.

**Application Checklist**

- Online application for admission
- $50 nonrefundable ($70 USD for international students) application fee, payable online (if a student cannot pay the fee online, contact the Office of Admission at 303-492-6301 or at admissions@colorado.edu)
- Official high school transcript
- Official college transcripts (if applicable)
- SAT or ACT test scores (if applicable)
- Two personal essays (first-year applicants) or one personal statement (transfer applicants)
- Letter of recommendation (first-year applicants only)
- Résumé or activities list (optional)
Confirmation Procedures
All admitted students are encouraged to confirm their intent to enroll through their application status page as soon as possible after receiving their admission notification. If a student cannot confirm their intent to enroll through their application status page, they must contact the Office of Admissions at 303-492-6301 or at admissions@colorado.edu.

Confirmation Deadlines
- First-Year Students
  - Summer: May 1
  - Fall: May 1
  - Spring: Dec. 1
- Transfers: varies; see confirmation instructions on application status page

If students register for classes and then decide not to attend, they may be assessed tuition depending upon the circumstances. For spring and fall semester policies, visit the Office of the Registrar’s Withdraw page; for summer, visit Summer Session’s Withdrawal page. Important policy differences exist for continuing students versus new, readmitted and transfer students.

The confirmation deposits are used as registration deposits each semester as long as registration is completed by the published deadline. Once students have attended CU Boulder, the deposit (minus any fees or other charges owed) will be returned when they graduate or officially withdraw from the university according to established deadlines.

Application Fees
Nonrefundable Application Fee ($50/$70 for international students)

University of Colorado Boulder Application
Pay online when submitting the application or by check or money order (made payable to the University of Colorado) after submission. If submitting a check or money order, include the student’s full legal name and birth date. We recognize that some students may be faced with financial constraints in paying the application fee. Waivers can be granted for documented hardships if the student submits an application fee waiver form.

Common Application
Pay online when submitting the application. We recognize that some students may be faced with financial constraints in paying the application fee. Waivers can be granted for documented hardships if the student submits an application fee waiver form.

Students currently enrolled in an undergraduate degree program at another University of Colorado campus who are applying to an undergraduate degree program on the Boulder campus are not required to pay the application fee.

Required Credentials
Credentials or information sent by fax cannot be accepted as official documentation. Do not submit samples or photographs of design or artwork. A portfolio is not used for admission purposes and cannot be returned.

Official Transcripts
Official transcripts must be sent directly to the Office of Admissions from the issuing institution and must have the appropriate seals and signatures.

Other transcripts are not considered official. Transcripts that are marked, for example, "student copy,""issued to student" or "unofficial" are not accepted as official.

Unofficial transcripts cannot be used for admission or transfer credit purposes.

High School Transcript
Students should request that their high school send an official transcript of all work completed, beginning with grade 9, directly to the Office of Admissions, regardless of the number of college hours the student has completed (if any) or the date of graduation from high school.

Students who have attended more than one high school and whose most recent transcript does not include the complete high school record must submit official transcripts from each school.

If any part of the high school record is missing from the transcript, the processing of the application will be delayed.

Students who have not graduated and do not plan to graduate from high school must request an official certificate of high school equivalency and official GED scores, plus an official transcript of any high school work (grades 9–12) completed, to be sent to the Office of Admissions.

Official transcripts must be sent to the Office of Admissions from the issuing institution either via email to transcripts@colorado.edu or by mail and must have the appropriate seals and signatures. All credentials written in languages other than English must be accompanied by a literal certified English translation.

College Transcripts
Students should request that their official transcripts from each collegiate institution attended (except any campus of the University of Colorado) be sent directly from the issuing institution to the Office of Admissions. Be sure to include all institutions, regardless of the length of attendance, whether or not courses were completed and whether or not the record might affect admission or transfer credit. Also include any institutions attended during summers, interim terms and during high school.

Failure to list and submit transcripts from all institutions previously attended before enrolling at CU Boulder is considered a violation of academic ethics and may result in the cancellation of admission or dismissal from the university.

SAT or ACT Test Scores
CU Boulder requires all first-year and transfer students (including U.S. citizens attending high school or college outside of the U.S) with fewer than 24 credits completed to submit an official score report for either the SAT or the ACT. International students only need to submit an SAT or ACT if they are graduating from a U.S. high school or wish to be considered for merit scholarships.

CU Boulder’s SAT code is 4841 and the ACT code is 0532.

Scores will be considered official if submitted electronically by the testing agency or if they are included on your official high school transcript.
The student’s highest scores are used in the admission decision. If a student takes the same test more than once, we combine their highest score from each subsection to give them the highest overall score. Results from SAT or ACT tests taken in December or later may not be received in time if the student wishes to be considered for summer or fall admission of the following year.

For further information:

• consult a high school counselor
• visit the SAT website (http://www.collegeboard.com/), call 609-771-7600 or write to the College Board (SAT), P.O. Box 6200, Princeton, NJ 08541-6200
• visit the ACT website (http://www.act.org/), call 319-337-1270 or write to ACT Registration, P.O. Box 414, Iowa City, IA 52243-0414

Personal Essays
CU Boulder requires first-year applicants to submit two short personal essays and transfer applicants to submit one personal statement. Applications without essays are considered incomplete and will not be reviewed. Personal essays are the best way for the Office of Admissions to learn about applicants as individuals and to evaluate a student’s academic performance within the appropriate context. There are no “correct” answers to the questions—responses should reflect the unique aspects and experiences of the applicant. The specific essay questions are available on the application.

Letters of Recommendation
One academic letter of recommendation will be required for all first-year applicants. The student’s full legal name should be included at the top of recommendation letters.

Optional Documents
Applicants may submit additional letters of recommendation if they wish, however, doing so is optional. Applicants may also choose to submit a resume or list of co-curricular activities, work experience, leadership positions and awards.

College of Music applicants must also complete a College of Music application after their admission application has been submitted, provide a letter of reference and schedule an audition.

Credit by Examination

Advanced Placement (AP) Credit
Credit for College Board Advanced Placement (AP) examinations cannot be evaluated from college or high school transcripts; score reports from the College Board must be submitted directly to the university for evaluation.

When the credit granted for a score of 3 on an AP exam is an Arts & Sciences credit that fulfills a specific Arts & Sciences General Education or CMCI Core category, CU Boulder advises students that they are likely to be more successful in their college career if they fulfill that Core category with a CU Boulder course and use their AP credit as elective credit. There is no guarantee that all AP credit will apply to a specific degree program. The dean’s office of each college and school makes the final determination for AP credits that apply toward degree requirements.

For more information and a guide to equivalencies, refer to First-year Applicants (p. 26) and the chart in this section or visit the Office of Admission’s Transfer Students (http://www.colorado.edu/admissions/transfer/) webpage.

</table>
Engineering Students: Check with academic advisor in major department. Students will need the ability to learn additional programming languages for further computer science courses.

Students who want to continue taking Spanish courses beyond their AP credit level must take the Spanish department placement test. If the results of this test place them below their AP level, the Spanish department strongly recommends enrolling at the lower of the two levels.

Does not apply toward degree requirements for students in the College of Engineering and Applied Science.

Note: This table was prepared based on spring 2019 exams. Credit awarded is subject to change based on faculty review of spring 2020 exams. The credit in this table is for students who began classes at CU Boulder in the 2020-2021 academic year. Students who started at CU Boulder in previous academic years must refer to the tables in the catalog for that year to find the appropriate credit.

### International Baccalaureate (IB) Credit

In general, credit is granted for approved International Baccalaureate (IB) examinations at the higher level with a score of 4 or better. Students admitted to the University of Colorado Boulder who have graduated from high school with an International Baccalaureate Diploma shall be granted 24 hours of college credit. This credit will be applied toward degree requirements only if approved by the college or school. Depending on the student’s degree program, some of the 24 credit hours may not be applicable toward degree requirements. No CU Boulder tuition will be charged for these credits and the 24 credits will only be granted if the student receives a score of 4 or better on an examination administered as part of the IB Diploma program. If the student scores less than 4 on each IB subject test, the credit hours granted will be reduced accordingly. Official scores must be sent to the admissions office directly from the IB organization.

When the credit granted for a Standard Level IB exam is an Arts & Sciences credit that fulfills a specific Arts & Sciences General Education or CMCI Core category, CU Boulder advises students that they are likely to be more successful in their college career if they fulfill that General Education or Core category with a CU Boulder course and use their IB credit as elective credit. There is no guarantee that all IB credit will apply to a specific degree program. The dean’s office of each college and school makes the final determination for IB credits that apply toward degree requirements.

For more information and a guide to equivalencies, refer to Freshman Applicants (p. 26). For more information and a guide to equivalencies, refer to First-year Applicants (p. 26) and the chart in this section or visit the Office of Admission’s Transfer Students (http://www.colorado.edu/admissions/transfer/) webpage.

</table>

1. Does not apply toward degree requirements for students in the College of Engineering and Applied Science.

Note: This table was prepared based on spring 2019 exams. Credit awarded is subject to change based on faculty review of spring 2020 exams. The credit in this table is for students who began classes at CU Boulder in the 2020-2021 academic year. Students who started at CU Boulder in previous academic years must refer to the tables in the catalog for that year to find the appropriate credit.

### College Level Examination Program (CLEP) - gtPathways

Credit for College Board College-Level Examination Program (CLEP) in subject areas of composition and literature, humanities, history and social sciences, biological and physical sciences, and mathematics may be granted for a score of 50 or above. Examinations in languages require minimum scores between 59–63. Credit award and course equivalency information listed in this table applies only to degree programs completed entirely at the Boulder Campus.

**Beginning Spring 2019, select exams taken January 1, 2019 and later will receive gtPathways designation.**

For exams taken in prior or future catalog years, consult those academic catalogs for exam equivalency information. Exams with a CU Boulder equivalent course of ARSC 1999TC will *not* fill a requirement in any major or minor at CU Boulder but will fulfill a requirement in the general education curriculum of most schools and colleges at CU Boulder.

For more information and a guide to equivalencies, refer to First-year Applicants (p. 26) and the chart in this section or visit the Office of Admission’s Transfer Students (http://www.colorado.edu/admissions/transfer/) webpage. CLEP tests are administered through Career Services, 303-492-5854.

Any credit earned from CLEP exams that counts toward the Arts and Humanities or Social Sciences requirements in A&S General Education will also count toward the Humanities and Social Sciences requirement in the College of Engineering and Applied Science.

For students in CMCI, translate the A&S General Education categories in the following way: Arts and Humanities = CMCI's Humanities and Arts; Social Sciences = CMCI's People and Society; Natural Sciences = CMCI's Natural World; QRMS = CMCI's Quantitative Thinking

**DSST Examinations - gtPathways**

Credit for DANTES Subject Standardized Tests (DSST) in the humanities, mathematics, physical science and social sciences areas may be granted for a score of 400 or above. Credit award and course equivalency information listed in this table applies only to degree programs completed entirely at the Boulder Campus.

*Beginning Spring 2019, select exams taken January 1, 2019 and later will receive gtPathways designation.*

Exams with a CU Boulder equivalent course of ARSC 1999TC will not fill a requirement in any major or minor at CU Boulder but will fulfill a requirement in the general education curriculum of most schools and colleges at CU Boulder.

For exams taken in prior or future catalog years, consult those academic catalogs for exam equivalency information.

For more information and a guide to equivalencies, refer to First-year Applicants (p. 26) and the chart in this section or visit the Office of Admission's Transfer Students (http://www.colorado.edu/admissions/transfer/) webpage.

Transfer of College-Level Credit

Evaluation of Credit

The Office of Admissions performs an initial evaluation of transfer credit after applicants have been admitted. A complete evaluation of transfer credit cannot be made until all official credentials have been received.

The evaluation is made using the official transcripts sent directly to the university from each one of the applicant's previous colleges. Official transcripts exhibit the official seal and signature of the registrar. Transcripts that are marked “student copy,” “issued to student,” or “unofficial” are not accepted as official. Faxed transcripts are not accepted.

Transferability is based on the practices of the leading university, as reported to the American Association of Collegiate Registrars and Admissions Officers (AACRAO), in the state where the institution is located. CU Boulder will make the decision on transferability based on the above criteria for institutions within the state of Colorado.

Coursework of comparable content and scope to the CU Boulder curriculum will generally be transferred if it was completed at colleges or universities accredited by the Higher Learning Commission, or other regional associations at the time the work was completed. For international colleges or universities, the international equivalent of regional accreditation or Ministry of Education recognition will be considered.

If coursework was completed at a school not regionally accredited, the student may specifically request that their coursework be considered for transfer. CU Boulder will utilize the recommendations of AACRAO when making its decision. These recommendations include but are not limited to:

- Educational quality of the sending institution.
- Comparability of credit to be transferred to CU Boulder.
- Applicability of the credit in relation to the programs being offered at CU Boulder.
- Additional documentation that students may be required to provide regarding the coursework for transferability.

Criteria for Acceptance of Credit

Only courses taken at a college or university of recognized standing with grades of C- (1.70) or better are accepted for transfer.

Each college and school at CU Boulder determines:

- How transferred course semester credit hours are applied toward graduation requirements in accordance with the policies of the college or school.
- The maximum number of semester credit hours that may transfer from a two-year or four-year post-secondary institution.
- The minimum number of semester credit hours that must be completed on the Boulder campus in order to receive a degree.
- The minimum number of semester credit hours that must be completed as a degree student in residence on the Boulder campus to receive an undergraduate degree.
- The maximum number of semester credit hours earned through correspondence or in a similar format that are accepted toward a baccalaureate degree.
Credit hours should have been earned no more than 10 years prior to transferring into an undergraduate degree program at CU Boulder. Any determination of acceptance of semester credit hours toward the degree based on the content and the age of the credit is made in the college or school dean's office or by the student's major department.

Coursework Requiring Additional Review
The following coursework will require additional information before a decision can be made on acceptance for transfer credit:

- Independent study courses
- Internships
- Workshops
- Graduate coursework
- Military credit
- Professional programs

Coursework Not Accepted for Transfer Credit
The following coursework will not be accepted for transfer credit and will not count toward a degree at CU Boulder:

- Any courses in which the grade earned is below a C- (1.70)
- Courses identified by CU Boulder as remedial, such as remedial English, mathematics, science and developmental reading
- Vocational-technical courses that are offered at two-year and proprietary institutions (exceptions may be granted only by the CU Boulder dean responsible for the student's curriculum—when exceptions appear to be warranted, appropriate department heads make recommendations to their respective deans regarding credit for such courses)
- Courses in religion that constitute specialized religious training or that are doctrinal in nature
- Credits earned for work experience or through a cooperative education program
- Outdoor leadership education coursework
- Credits earned in physical education activity courses
- Courses or programs identified as college orientation

Appeals Process
Students who wish to appeal the transferability of coursework must write a letter within the first semester after the work is posted on CU Boulder record or after receiving notice from the Office of Admissions that the coursework was not accepted for transfer credit. The letter must be addressed to the Transfer Credit Department, Office of Admissions, and include:

- The name(s) of the previous institution(s) attended, the course number and title of each course for which the student was denied transfer credit and the date(s) of enrollment in each course.
- A copy of the catalog description (from the appropriate year) for each course in question.
- A copy of the syllabus or course outline (from the appropriate year) for each course in question. This information can be obtained from the sending institution.
- A statement indicating why the credit(s) should be accepted.

The Office of Admissions will re-evaluate the course(s) for which the student is requesting reconsideration in consultation with the appropriate dean or chair. A written response will be delivered to the student in a timely manner once the appropriate faculties have reviewed the course materials, past practices and the student's specific circumstances.

Transfer Credit From University of Colorado Campuses
Coursework completed at other campuses in the University of Colorado system will be a part of the student's cumulative university record and, unlike other transfer credit, will be included in calculations of the overall University of Colorado grade point average (GPA). However, the applicability of this coursework towards specific CU Boulder degree requirements will be determined solely by CU Boulder colleges and schools. External transfer credit presented by students to other University of Colorado campuses will be evaluated by CU Boulder guidelines upon the student's matriculation into a degree program at CU Boulder.

Number of Credit Hours Required for Graduation
Transfer students are held to the same residency and degree requirements as students who begin their undergraduate degree program on the Boulder campus. This assumes that transfer credit hours are in courses comparable in level and content to those required for graduation from an undergraduate degree program at the Boulder campus. College or school residency requirements, meaning the number of credit hours required to be taken as a degree student once admitted on the Boulder campus, are the same for transferring and nontransferring students.
Credit for Correspondence and Online Work
Each college and school determines the maximum number of credits taken through correspondence and online programs that are accepted toward a baccalaureate degree.

Transfer Credit Conversion
CU Boulder operates on a semester system. Other campuses, including CU Boulder, operate on a two-term or semester system. Course credits from quarter system institutions must be converted from quarter hours to semester hours or credits. One quarter credit is equivalent to two-thirds of a semester credit. To convert quarter hours to semester hours, multiply the number of quarter hours by two-thirds and round off the total to the nearest tenth. For example, 4 quarter hours x 2/3 = 2.67 or 2.7 semester hours of credit, or 3 quarter hours x 2/3 = 2 semester hours of credit.

College-Level Work Taken during High School
College-level work taken during high school is evaluated in accordance with general guidelines for transfer credit at CU Boulder. Only courses taken at a college or university of recognized standing with grades of C- or better are accepted for transfer. College-level work taken concurrently with a high school program may be used to satisfy MAPS requirements. You must have an official college transcript sent directly to the Office of Admissions in order for transfer credit to be evaluated.

For more information and a guide to equivalencies for exam credit, see the charts in Credit by Examination (p. 32) section of this catalog, and refer to the First-year Applicants (p. 26) or Transfer Students (http://www.colorado.edu/admissions/transfer/) webpage.

Military Credit
Credit for military schooling, both for courses and for occupations, is evaluated upon receipt of Form DD 214, Service Separation Certificate, a Joint Services Transcript (JST) or a transcript from the Community College of the Air Force (CCAF). For military courses and occupations that have been approved for gtPathways credit by the Colorado Department of Higher Education students will be awarded gtPathways credit, which will fill General Education requirements in most, but not all, programs at CU Boulder. For qualifying scores at the American Council on Education (ACE) recommended cut scores on Defense Language Proficiency tests students will be awarded gtPathways World Language credit (GT-AH4), which will fill General Education requirements, usually as a humanities course, in most, but not all, programs at CU Boulder.

Students can also be awarded credit for other military courses and occupations listed on a JST or a transcript from the CCAF if ACE recommends that the work should be granted upper-division baccalaureate credit. This work, however, transfers to CU Boulder as lower-division elective credit. Foreign language courses taken through the State Department, Department of Defense or Defense Language Institute are assigned credit based on ACE’s recommendation, which usually results in credit for an equivalent foreign language course at CU Boulder. The applicability of military credit toward specific degree requirements beyond General Education requirements is determined by the dean’s office of the college/school to which a student has been admitted.

To receive credit for College-Level Examination Program (CLEP) or DANTES Subject Standardized Tests (DSST) that are listed on a JST or a transcript from the CCAF, students must have their test scores sent directly to the CU Boulder Office of Admissions from the College Board (CLEP) or Prometric (DSST).

For more information and a guide to equivalencies, see the charts in Credit by Examination (p. 32) section of this catalog, and refer to the First-year Applicants (p. 26) or Transfer Students (http://www.colorado.edu/admissions/transfer/) webpage.

Regardless of whether or not you anticipate receiving any credit, submission of a JST or a transcript from the CCAF is required if you plan to use any VA educational benefits for which you are eligible.

Reverse Transfer
The Colorado Reverse Transfer program allows students who have transferred from a Colorado community college to a Colorado university to combine and apply credits from both institutions toward an associate’s degree from the community college.

For transfer students, this means an associate's degree from their previously-attended community college may be awarded at no additional cost while they work toward a bachelor's degree at CU Boulder.

CU Boulder contact students eligible for Reverse Transfer each year, with more information about opting in to the program. For more information, visit the Colorado Reverse Transfer (https://highered.colorado.gov/Academics/reversetransfer/) website to learn more.

Minimum Academic Preparation Standards
One unit equals one year of high school study or one semester of college coursework.

**Credits & Grading**

**Grading System**

The following grading system is standardized for all colleges and schools of the university. Each instructor is responsible for determining the requirements for a class, determining the grading scale used, and for assigning grades on the basis of those requirements and grading scale by the grade submission deadline each term.

**Standard Grade Points per Hour of Credit**

</tbody>
</table>

**Explanation of an I (Incomplete) Grade**

An incomplete (I) grade indicates that the student did not complete the requirements for the class by the end of the grading period for that semester. If the student does not complete the class requirements within one year from the end of the semester in which the Incomplete was assigned, the I grade is converted to a failing (F) grade. When a final grade has been assigned, the transcript states, "Originally graded as Incomplete."

Requests for incomplete grades must be initiated by the student and only when, for reasons beyond their control, the student is unable to complete the class requirements within the semester of enrollment. A substantial amount of work must have been satisfactorily completed before approval for such an incomplete grade is given.

If an instructor grants a request for an incomplete, the instructor sets the conditions under which the coursework can be completed and the time limit for its completion or if the class should be retaken.

If an incomplete class is retaken, it must be completed on the Boulder campus or through Boulder Continuing Education coursework, and the student must re-register for the course and pay the appropriate tuition. The initial grade of I is not removed from the transcript if the course is retaken within one year.

**Grade Point Average**

The overall University of Colorado grade point average (GPA) is computed as follows: the credit hours and credit points are totaled for all courses and across all campuses within the same career (UGRD, GRAD or LAW); then the total credit points are divided by the total credit hours. Courses with grade symbols of P, P+, NC, *** (grade not yet entered), W, I and IP are excluded from calculations. All standard letter grades (A-F) are included in the GPA, including grades of F earned for courses graded on a pass/fail basis. Grades of I that are not completed within one year are converted to F grades and calculated in the GPA at the end of the one-year grace period. Below is an example GPA calculation for a hypothetical semester:

<table>
<thead>
<tr>
<th>Grade Earned</th>
<th>Credit Points per Hour</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>4.0; x Credit Hours: 4.0 = Credit Points in Course: 16.0</td>
</tr>
<tr>
<td>B+</td>
<td>3.3; x Credit Hours: 4.0 = Credit Points in Course: 13.2</td>
</tr>
<tr>
<td>P</td>
<td>3.0 = Credit Points in Course: 0</td>
</tr>
<tr>
<td>P+</td>
<td>— (excluded)</td>
</tr>
<tr>
<td>F</td>
<td>0</td>
</tr>
<tr>
<td>Total</td>
<td>15 credit hours with 44 credit points, so 44/15 = 2.93 GPA</td>
</tr>
</tbody>
</table>

For individual GPA calculations related to academic standing and graduation from a college or school, students should refer to their academic dean's office.

**Credit/No Credit**

Students who wish to take coursework for no credit must indicate this through the no-credit request form, after they register for classes. Changes in credit registration are not permitted after the third Friday of the regular 16-week fall or spring session, or after the add/drop deadline of any special fall or spring session or Summer Session. Tuition is the same whether or not credit is received in a class. Classes taken for no credit also won't fulfill degree requirements or count toward a student's enrollment totals for enrollment status or financial aid.

**Pass/Fail (P/F)**

Students should refer to the college and school sections of this catalog to determine the number of pass/fail credit hours that may be taken in a given semester or credited toward a specific bachelor's degree. Exceptions to the pass/fail regulations are permitted for certain courses that are offered only on a pass/fail basis.

The pass/fail option is only available if the department offering the course allows the pass/fail option. Students who wish to register for a class on a pass/fail basis should do so during registration.

Changes to or from a pass/fail basis are not permitted after the tenth Friday of the regular 16-week fall or spring session, or after the add/drop deadline of any special fall or spring session or Summer Session. Prior to that date, students wishing to change a class's grading status from graded to pass/fail can do so in Buff Portal (https://buffportal.colorado.edu/). From the change your schedule card, students can select the class they want to change and select "Edit This Class."

Passing grades (P or P+) are included in credit totals, but do not affect student GPAs. Grades of D+, D and D- are considered passing grades of P. Grades of C- and above are considered passing grades of P+.

**Variable Credit**

Select courses, such as independent study courses, are offered as variable credit. Students should consult their academic advisor and designate the number of credit hours they wish to receive for the class at the time of registration.

**Repeating Courses**

Students may repeat courses at any point in their academic career without invoking grade replacement. In those cases, the grade and credits earned in each attempt are included in student credit and GPA.
totals and calculations. Some academic programs have limits on the number of course repeats allowed for specific courses.

Grade Replacement
Under the grade replacement policy, degree-seeking undergraduate and graduate students may retake a course in which they earned a low grade in an attempt to improve their cumulative GPA.

When a student retakes a course for grade replacement, the grade earned in the most recent prior attempt remains on the transcript. Their semester and cumulative GPA and credit totals are updated to exclude the most recent prior attempt.

General Eligibility
Course Requirements
Only courses offered by and taken through CU Boulder are eligible for grade replacement. To qualify for grade replacement, the course also must:

• Be taken at CU Boulder for a letter grade (i.e., not taken pass/fail or for no credit).
• Not be a special topics course or any other course designated in the catalog as repeatable for credit (e.g., independent study, field experience, dissertation hours). Exceptions: Topics courses WRTG 1100, WRTG 1150, WRTG 1160, WRTG 1250, WRTG 3020, WRTG 3030, WRTG 3035 and WRTG 3040 are eligible for grade replacement regardless of topic.
• Not exceed the total grade replacement credit limit for an academic career.
  • Undergraduate: Up to 10 credit hours of grade-replacement coursework.
  • Graduate: Up to 6 credit hours of grade-replacement coursework.

Student Requirements
To apply for grade replacement, students must:

• Be a degree-seeking undergraduate or graduate student at CU Boulder (law and nondegree students are not eligible).
• Have earned a C- or lower (undergraduate students), or a C+ or lower (graduate students) in the most recent prior attempt of a course.

Invoke Grade Replacement
To request to retake a course for grade replacement, students must:

1. Register for the class for an upcoming semester.
2. Submit the grade replacement request form by the published deadline for the semester/session in which the class is being offered. There are no exceptions for late submissions.

After being reviewed for eligibility, students are notified via email whether their request was approved or denied.

Revoke or Cancel Request
Students who invoke grade replacement, but who no longer wish to retake courses for grade replacement must revoke or cancel their request by the published deadline for the semester/session in which the class is being offered. Once the deadline has passed, requests cannot be revoked or changed. The grade earned in the most recent attempt will be the final grade that calculates in GPA and credit totals, even if it’s lower than the grade earned in the most recent prior attempt.

Additional Information
For more information on course repetition and grade replacement, visit the Office of the Registrar website (https://www.colorado.edu/registrar/students/degree-planning/grade-replacement/) or view the grade replacement policy in full (https://www.colorado.edu/registrar/students/degree-planning/grade-replacement/policy/).

Financial Aid
The Office of Financial Aid’s primary goal is to ensure that students have access to available resources to fund their education. CU Boulder students may be eligible to receive financial aid from our office each year from federal, state, university and private sources.

Applying for Financial Aid
Students apply for financial aid by completing the Free Application for Federal Student Aid (FAFSA) (https://studentaid.gov/sa/fafsa/). Once the student lists CU Boulder on the FAFSA (using school code 001370), the Office of Financial Aid receives results electronically and uses them to help determine a student’s eligibility for grants, work-study and loans, as well as some scholarships.

FAFSAs are school-year specific. For financial aid for Fall 2020, Spring 2021, and Summer 2021, the 2020–21 FAFSA must be submitted. Students should apply as soon as possible after it opens on October 1, 2019, as some funds are limited and eventually run out. Students must apply for financial aid every year.

Eligibility
Financial aid eligibility is based on a variety of factors, such as the student’s FAFSA, the cost to attend CU Boulder and the availability of funding.

The FAFSA determines the Expected Family Contribution (EFC). This is a reference number schools use to best determine the family’s financial situation. It’s not the amount of money a family will pay for college, nor is it the amount of financial aid a student will receive.

Each year the Office of Financial Aid calculates the estimated Cost of Attendance (COA) for an academic year. This COA estimate includes both university-bill costs (tuition, fees, on-campus housing and dining) as well as out-of-pocket expenses (books and supplies, transportation, and personal expenses). The FAFSA EFC reference number is subtracted from the cost estimate to determine a student’s financial need. This financial need is considered when determining eligibility for aid.

View more information on cost and budget examples (https://www.colorado.edu/financialaid/node/51/).

Types of Financial Aid
Financial aid offers begin as early as February for the upcoming fall semester, but aid is continually offered as long as funds are available. First-year and transfer students applying for aid for the 2020–21 school year are encouraged to submit their Free Application for Federal Student Aid (FAFSA) (https://studentaid.gov/sa/fafsa/) and any additional documentation requested as soon as possible, as some funding is limited. In previous years, some funding has run out as early as late-February or early-March before the fall semester.

Types of financial aid available to CU Boulder students are listed below.
Grants
Grants ([https://www.colorado.edu/financialaid/node/71/](https://www.colorado.edu/financialaid/node/71/)) are a type of aid that don't have to be repaid. Students should submit the FAFSA to be considered for federal, state and institutional need-based grants (including Pell, Colorado Student Grant, etc.).

Loans
Students submit the FAFSA ([https://studentaid.gov/sa/fafsa/](https://studentaid.gov/sa/fafsa/)) to be considered for the following loan programs:

**Federal Direct Subsidized and Unsubsidized Loans**
Federal Direct Loans ([https://www.colorado.edu/financialaid/node/98/](https://www.colorado.edu/financialaid/node/98/)) are federal student loans that are offered and disbursed by CU Boulder. Undergraduate students may qualify for a combination of subsidized (i.e., federal government pays the interest) and unsubsidized loans. The interest rates for direct loans are determined annually. An origination/loan fee is charged based on when the loan is disbursed. Annual limits depend on the year in school: first-year students can be awarded up to $5,500, sophomores $6,500, and juniors and seniors $7,500. Independent students may borrow an additional amount of unsubsidized loans (first-year students and sophomores $4,000 and juniors and seniors $5,000).

Interest on unsubsidized loans can be repaid while the student is in school. Repayment begins six months after the student graduates or ceases to be enrolled at least half-time (6 credit hours for undergraduates; 4 credit hours for graduates).

**Federal Parent PLUS Loan**
Federal PLUS loans ([https://www.colorado.edu/financialaid/node/23/](https://www.colorado.edu/financialaid/node/23/)) are available to parents of dependent undergraduate students. The origination fee and interest rates are dependent on when the loan is paid to the student's university bill, but interest rates are fixed for the life of the loan.

Borrowers must complete a credit check, but it's possible for a borrower to qualify for a PLUS loan with a bad credit score, as long as they don't have an adverse credit history.

*Note: Parents borrowing a PLUS loan for their student will be regarded as parental support on in-state residency petitions for dependent students. Parents may request a deferment on payments until their student has finished with school.*

**Work-Study**
Students offered work-study ([https://www.colorado.edu/studentemployment/node/8/](https://www.colorado.edu/studentemployment/node/8/)) are provided an amount of money they can work to earn through approved on- or off-campus agencies. Students don't get the money up-front, nor is it applied to their tuition and fee bill; they will receive a paycheck for hours worked just like any other hourly job. Students should submit the FAFSA ([https://studentaid.gov/h/apply-for-aid/fafsa/](https://studentaid.gov/h/apply-for-aid/fafsa/)) to be considered for work-study, since it's based on financial need.

Students may apply for a variety of work-study jobs at competitive rates. Jobs can be found online through the CU Boulder Student Job ([https://ofa.colorado.edu/studentjobs/](https://ofa.colorado.edu/studentjobs/)) database.

**Scholarships**
Donations from private individuals, corporations, foundations and the University of Colorado are all sources for scholarships ([http://www.colorado.edu/scholarships/](http://www.colorado.edu/scholarships/)). Incoming students are automatically considered for some scholarships through their admissions application.

**CU Boulder Scholarship Application**
Students may apply for scholarships ([http://www.colorado.edu/scholarships/cuboulder-scholarship-app](http://www.colorado.edu/scholarships/cuboulder-scholarship-app)) offered by the Office of Financial Aid each year. For scholarships with a financial need requirement, applicants must have submitted a FAFSA ([https://studentaid.gov/sa/fafsa](https://studentaid.gov/sa/fafsa)) before the scholarship deadline in order to be considered. The scholarship application opens November 1 and most scholarship applications are due mid-February.

Prospective students don't need to wait to be accepted to CU Boulder before applying for financial aid or scholarships.

Scholarships are highly competitive at CU Boulder. The selection committee considers academic achievement, honors, leadership, school activities and service to the community. Students should also search for scholarship opportunities within their academic program, college, club or campus organization.

**Private External Scholarships**
Students who receive a private scholarship ([https://www.colorado.edu/scholarships/node/48/](https://www.colorado.edu/scholarships/node/48/)) from an organization outside the university must report the scholarship to CU Boulder in Buff Portal ([https://buffportal.colorado.edu/](https://buffportal.colorado.edu/)). To ensure fast processing, the check should be mailed or dropped off with a completed donor form ([https://www.colorado.edu/scholarships/node/90/attachment/](https://www.colorado.edu/scholarships/node/90/attachment/)). In addition, students are encouraged to write to their donors and express their gratitude.

When a scholarship donor does not specify how to disburse the funds through a donor form ([https://www.colorado.edu/scholarships/node/90/attachment/](https://www.colorado.edu/scholarships/node/90/attachment/)), the Office of Financial Aid equally divides scholarships of $1,000 or more between the fall and spring semesters. Private scholarships less than $1,000 are applied in full to the current semester bill.

Donors should mail their checks, payable to the University of Colorado, to:

University of Colorado Boulder
Office of Financial Aid, ATTN: Scholarship Services
77 UCB
Boulder, CO 80309-0077

Checks should be mailed at least one month prior to the university’s bill due date to avoid incurring late and service charges. If a student's scholarship check is not submitted before the bill due date, they should make other arrangements to pay the bill.

**Special Scholarships & Grants**
Students can apply directly to the following programs to be considered for their scholarships, grants and programming.

**Boettcher Scholars**
The Boettcher Scholarship is a merit-based, full-ride scholarship awarded annually to Colorado high school seniors who can apply those funds to any four-year institution in Colorado. With a history of scholars on campus dating from 1952, the University of Colorado Boulder has a large, vibrant Boettcher Scholar community.

Benefits of being a Boettcher Scholar include:

- An on-campus Boettcher Scholar Mentor
- The largest Boettcher Scholar peer community in the state
• The longest-standing Boettcher Scholar Alumni network in the state
• Individual, peer and group mentoring
• Academic, professional and personal support
• Social activities with Boettcher Scholars and Norlin Scholars
• Access to enrichment, research and Top Scholarship (https://www.colorado.edu/topscholarships/) advising
• A fifth-year tuition benefit for concurrent degree seekers

High school students apply for the scholarship directly through the Boettcher Foundation (http://boettcherfoundation.org/colorado-scholarships/) in the fall of their senior year of high school. Once selected, scholarship recipients have the opportunity to choose which campus they will attend.

Norlin Scholars
The interdisciplinary Norlin Scholars Program is geared toward students interested in a liberal education. Norlin Scholars develop expertise in their chosen fields through research, deep engagement and self-reflection. Upon graduation, they're in a strong position for whatever comes next: the job market, graduate and professional schools or fellowships.

Students can apply as high school seniors for a four-year scholarship or as second-year college students for a two-year scholarship. Norlin applicants must apply to CU first, though they do not need to be admitted to be considered.

Benefits of being a Norlin Scholar include:
• a $6,000 scholarship per academic year
• small, invigorating courses (NRLN 2000 and NRLN 3500)
• research or creative projects with faculty
• individual, group and peer mentoring
• access to top scholarship advising and guidance
• opportunities for professional training and development
• a stimulating, interdisciplinary peer group

The Norlin Scholars program builds community through shared experiences and support. Explore what it means to be a Norlin Scholar and the scholar support system on the Norlin Scholars (https://www.colorado.edu/boettcher-norlin-scholars/norlin-scholars/) website.

Visit the Norlin Scholars (https://www.colorado.edu/boettcher-norlin-scholars/norlin-scholars/) website for application information.

Professional and Academic Conference Endowment (PACE)
PACE provides funding, support and mentoring to qualified undergraduates to present their work at conferences. Conference presentations may be oral presentations, poster sessions, round-table discussions, or creative or performance pieces. Students from all majors, departments, colleges and schools are welcome to apply for PACE grants.

Aside from receiving funds toward conference expenses, recipients benefit from faculty and peer supported conference preparation and exposure to working professionals and cutting edge scholarship in the field. Additionally, conference presentations:
• Complement classroom learning
• Take undergraduate research to the next level
• Provide a range of professional credentials

To accommodate the year-round schedule of professional conferences, PACE deadlines are rolling. Consult the PACE website (https://www.colorado.edu/pace/) for more information.

Top Scholarships
Top Scholarships helps you prepare a thoughtful application to some of the most prestigious, nationally competitive scholarships offered, like the Rhodes, Marshall, Truman and Goldwater, among others. This office helps high-achieving students already enrolled at CU, usually in their sophomore, junior or senior years. For help with scholarships for incoming first-year students, or to inquire about scholarships already awarded, please contact the Office of Financial Aid (http://www.colorado.edu/financialaid/).

Top Scholarships provides:
• Guidance in selecting a fellowship or scholarship that fits your plans
• Expert advice on scholarship opportunities listed
• Individualized assistance preparing applications, essays, and proposals
• Practice interviews and interview strategies

Please see our Top Scholarships (https://www.colorado.edu/topscholarships/) website for more information, including benefits of making an application to Top Scholarships and how to apply.

Undergraduate Research Opportunities Program (UROP)
CU Boulder has a rich culture for cultivating undergraduates as emerging scholars, artists and practicing researchers. UROP provides consultation services, informational workshops and grants to promote undergraduate research as a high-impact learning practice for student success.

Each year UROP funds hundreds of students who produce new knowledge and creative work in partnership with CU's world-class faculty. We serve students and faculty whose learning and teaching goals include outside-the-classroom enrichment.

In a UROP project, students:
• Explore academic interests beyond the classroom
• Get hands-on experience with research or creative production
• Develop student-faculty relationships for professional references
• Acquire academic and professional skills and credentials
• Demonstrate successful grant-writing skills
• Refine their academic and career goals

From development of a research interest or question to completion of an application takes some time. UROP deadlines precede the academic year in which the research or creative work will be undertaken and students apply in partnership with the faculty mentor. Visit the UROP website (https://www.colorado.edu/urop/) for more information.

Policies
The Office of Financial Aid follows regulations provided by the Department of Education, the Higher Education Reconciliation Act of 2005, the Family Education Rights & Privacy Act (FERPA) and in-house policies to administer federal, state and university funding.

Adjustments to Financial Aid
There are a variety of circumstances that may require an adjustment to a student's financial aid (https://www.colorado.edu/financialaid/node/31/).
Students should understand how dropping and adding courses, receiving other aid, or corrections on their FAFSA will impact their aid.

**Education Abroad (Study Abroad)**

Students must be enrolled in a CU Boulder education abroad (https://www.colorado.edu/financialaid/node/81/) program to be eligible for financial aid. Students participating in an education abroad program through another university are not eligible.

**FERPA**

The Family Education Rights & Privacy Act (FERPA (https://www.colorado.edu/financialaid/node/25/)) is a Federal law that protects the privacy of student educational records (which includes financial aid).

**Repeat Coursework**

Students may only repeat a course (https://www.colorado.edu/financialaid/node/13/) once and be eligible to receive financial aid if they previously received a grade of “D-” or better in that course.

**Return to Title IV Funds and Refund Policy**

If a student enrolls at CU Boulder, receives financial aid, then withdraws, his or her financial aid is adjusted according to federal regulations (https://www.colorado.edu/financialaid/node/376/). The student may owe a bill to the university after the financial aid is adjusted.

**Satisfactory Academic Progress (SAP)**

Students who apply for financial aid are responsible for knowing and complying with the satisfactory academic progress policy (https://www.colorado.edu/financialaid/node/33/). Briefly, the policy outlines the requirements to maintain satisfactory progress (i.e., minimum grade point average [GPA], completion rate, etc.), the consequences of failing to meet the requirements, and the process for appealing if the student loses eligibility.

**Student Loan Code of Conduct**

The Office of Financial Aid has established a set of principles and policies to govern educational lending practices for undergraduate, graduate and professional students. Our staff will follow the Student Loan Code of Conduct (https://www.colorado.edu/financialaid/node/41/) to ensure the integrity of the student loan process.

**Students Rights and Responsibilities**

Students who receive any form of financial aid, have certain rights and responsibilities (https://www.colorado.edu/financialaid/node/43/). The university is also required to disclose certain information to all students. Also view CU Boulder Consumer Information (http://www.colorado.edu/about/your-right-know/).

**Verification**

Students may be asked to provide additional information as part of the verification (https://www.colorado.edu/financialaid/node/298/) process. Verification checks the accuracy of answers provided on a student's FAFSA.

**Drug Conviction**

In accordance with the Higher Education Reconciliation Act of 2005, students who have been convicted under federal or state law for possession or sale of a controlled substance (https://www.colorado.edu/financialaid/node/348/) will be suspended from Title IV aid eligibility if the offense occurred while the student was receiving Title IV aid.

A summary of the most pertinent policies are available as financial aid guides on the Office of Financial Aid’s policy webpage (https://www.colorado.edu/financialaid/node/13/).

**Student Employment**

Research studies indicate that students who work while attending college are as successful academically as those who do not. Jobs provide students with income, work experience and the opportunity to explore career options. Student Employment, within the Office of Financial Aid, supports students and employers with work-study employment, finding and posting job opportunities and providing guidance on student employment policy.

**Work-Study**

Students offered work-study (https://www.colorado.edu/studentemployment/node/8/) are provided an amount of money they can work to earn through approved on and off-campus agencies. Students don’t get the money up-front, nor is it applied to their tuition and fee bill. These students receive a paycheck for hours worked just like any other hourly job. Work-study students should submit the FAFSA (https://studentaid.gov/sa/fafsa/) to be considered for work-study, since it’s based on financial need.

Get a quick overview of the program with our work-study video (https://www.colorado.edu/studentemployment/node/66/).

**Find a Job**

Student Employment posts part-time on-campus and off-campus jobs (https://www.colorado.edu/studentemployment/node/4/) for both work-study and non-work-study students. In addition, an on-call temporary employment service allows students to register for occasional work including one-time child care, yard work and clerical jobs.

**Student Employee Work Hours Policy**

Undergraduate student employees are limited to working a maximum of 25 hours per week during the fall and spring semesters and 40 hours per week during the summer, per the Student Hourly Employee Work Hours Policy (https://www.colorado.edu/studentemployment/node/12/). The policy does not affect students working in non-university off-campus jobs, though we encourage students to prioritize their academics first when considering outside work commitments. View more information about this policy and other student employment policies on the Student Employment policy webpage (https://www.colorado.edu/studentemployment/node/12/).

**Contact Student Employment**

Student Employment is here to help connect students and employers. Visit Student Employment in Regent Administrative Center 205 (http://www.colorado.edu/campusmap/map.html?bldg=RNGT&x=24&y=9), call 303-492-7349 or email studentemployment@colorado.edu for more information.

**Graduation**

**Graduation**

Students are eligible to graduate at the close of the term in which they successfully complete all requirements for their degree program. Degrees are conferred at the close of fall semester, spring semester and summer session. Students must apply for graduation through Buff
Portal by the published deadline for the term in which they complete degree requirements. Instructions for applying and important dates and deadlines are available on the Office of the Registrar’s Graduation & Commencement (http://www.colorado.edu/registrar/students/graduation/) webpage. Individual colleges and schools may require additional processes for students completing their degrees.

**Academic Program Discontinuance**

In the event a degree program is discontinued, students currently enrolled in the program have a four-year period in which to complete their degree requirements. This four-year period starts at the end of the academic year in which the Colorado Department of Higher Education (CDHE) takes action to discontinue the program. No new or returning students will be admitted into a discontinued degree program. Students not completing the degree requirements in the four-year period are not permitted to receive the discontinued degree. In such cases, credit hours accumulated may be applied to the overall number of credit hours required toward graduation, but the student must seek the advice of their college or school to determine how these credit hours might apply to a new degree program.

**Commencement**

A general commencement ceremony is held in May for all students who have graduated or anticipate to graduate in a given academic year (fall, spring and summer). This ceremony is open to the public and no tickets are required. Many departments, colleges and schools hold recognition ceremonies in both fall and spring semesters. For details about the ceremony, visit CU Boulder’s Commencement (http://www.colorado.edu/commencement/) website.

**Diplomas**

Please see the Academic Records (p. 21) section.

**New Student & Family Programs**

New Student & Family Programs (NSFP) supports new students and families throughout their transition and involvement at the University of Colorado Boulder.

In order to aid in the transition to CU Boulder, all incoming undergraduate students must complete an online orientation program, the Online New Student Experience (https://www.colorado.edu/registration/online-experience/), in order to register for classes. The Online Experience requires activation of a student’s IdentiKey (https://oit.colorado.edu/services/identity-access-management/identikey/) and can be accessed in Buff Portal (https://buffportal.colorado.edu/). This program is critical to the college experience as it helps incoming students learn more about student success, advising, registration and campus resources. New students should check their CU Boulder email account (https://oit.colorado.edu/services/messaging-collaboration/gsuite/gmail/) for more information about the Online Experience and other important next steps.

New Student & Family Programs also collaborates with campus partners to plan fall and spring Welcome events surrounding the first day of classes. Students participate in programs and have opportunities to connect with current students, faculty and staff to create a healthy and positive transition to CU Boulder.

For more information, visit the New Student & Family Programs (http://www.colorado.edu/orientation/) website.

**Registration & Enrollment**

**Registration**

Visit the Office of the Registrar’s Academic Calendar (http://www.colorado.edu/registrar/students/academic-calendar/) webpage for specific academic and financial dates and deadlines. Students should also consult individual college and school sections of this catalog and their dean’s office for additional information on special requirements and deadlines. The following registration policies are intended to serve as general guidelines.

Students who require accommodations because of a disability should visit the Disability Services (http://www.colorado.edu/disabilityservices/) website or call 303-492-8671.

**Confirmation Deposit**

All new degree students pay a one-time $200 confirmation deposit when they first confirm their intent to enroll at CU Boulder. Students are not permitted to register if the university has not received the deposit.

Confirmation deposits are refunded to students upon graduation or official withdrawal from CU Boulder within established dates and procedures. All refunds are reduced by any outstanding financial obligations. Interest earned from confirmation deposits is used for student financial aid.

Questions regarding the confirmation deposit policy should be directed to the Office of Admissions, 303-492-6301.

**Buff Portal**

Student registration and other important information and services are available through Buff Portal (https://buffportal.colorado.edu/). Students access the portal using a secure CU login name and IdentiKey password. For more information and registration instructions, visit the Registration (http://www.colorado.edu/registrar/students/registration/) webpage.

**Registering for Classes**

All CU Boulder students register for classes through Buff Portal, where they can also check their assigned registration periods, view any holds that may prevent registration (see “Holds”), see to-do lists and obtain their advisor’s name and contact information.

New incoming students and transfer undergraduate students receive their registration instructions and information during the New Student Welcome Experience. Continuing students may consult the academic calendar or view their registration dates in Buff Portal; they are also notified by email each semester of upcoming registration periods.

If a student misses their assigned registration window, they must wait until the schedule adjustment period (fall only) or open enrollment to register for classes. No exceptions are made to this policy.

Registration instructions are also available on the Enroll in Classes (http://www.colorado.edu/registrar/students/registration/enroll/) webpage.

**Enrollment Dates**

Each term, students are assigned enrollment dates based on the number of credits they have completed. Accessible in Buff Portal, the enrollment assignment indicates the dates and times during which the student may enroll, as well as the maximum number of credits they can take. Students
who miss their assigned dates must wait until the schedule adjustment (fall only) or open enrollment periods to register for classes.

Priority registration has been formally approved for specific populations of students who have unique scheduling needs. Priority registration does not override university or departmental policies, holds, permission, etc., nor does it guarantee the provision of classes at specific times. Student populations with priority registration, which often occurs within the enrollment period specified for their class (i.e., freshmen, sophomores), may include students with disabilities, military veterans and student athletes.

Holds
A hold may be placed on a student’s record for a number of reasons, including but not limited to financial, advising, scholastic, conduct and health. A hold may prevent a student from registering, returning to school, obtaining an official transcript or receiving a diploma. Students should resolve holds as quickly as possible by contacting the appropriate campus office identified in the hold details in Buff Portal.

Special Registrations
Intercampus Enrollment Program
CU Boulder students enrolled in at least one Boulder main campus class may be allowed to register for up to two classes or 6 credit hours, whichever is greater, on another University of Colorado campus, excluding Anschutz Medical Campus.

Classes taken at other CU campuses must be required for graduation or unavailable on the Boulder campus in a given term, or the classes must conflict with another required class in which the student is enrolled.

Boulder students exercising this option pay tuition for their total credit hours at Boulder campus rates. Intercampus Enrollment forms and instructions are available on the Registration Programs (https://www.colorado.edu/registrar/students/registration/registration-programs/) webpage.

Intercampus students are registered in host campus classes after continuing home students have had the chance to enroll. Students must adhere to the add/drop deadlines of the host campus when making changes to their intercampus enrollment.

Boulder campus students who wish to take coursework on another campus of the University of Colorado, but not through the Intercampus Enrollment program, may be able to register on that campus independent of Boulder-campus registration. However, they must apply for admission to and follow the registration procedures established by the other campus. Students should check with their dean’s office for approval and course applicability to their degree program.

Late Registration
We recommend students register for classes as soon as their registration period begins. If a student enrolls after the third Friday of the semester (fall or spring), they will be assessed a $100 late-registration fee (this is different than charges assessed for late payments of the university bill). For more information, visit the Add a Class (https://www.colorado.edu/registrar/students/registration/register/add/) webpage.

University Employees and Dependents
CU Boulder offers a tuition benefit to eligible employees and their dependents. For current benefit information, visit Employee Services’ Employee Tuition Waiver Benefit (https://www.cu.edu/employee-services/employee-tuition-benefit/) website.

Auditing
Individuals who have not been admitted to the university and who wish to attend regular classes may do so by obtaining auditor’s status. Auditors must receive permission and obtain a signature from course instructors during the first week of class to be formally added to the roster.

Audited courses will not appear on any transcript, formal or informal, as no credit is awarded. Registered auditors receive class instruction, learning management system access and library privileges. Being an auditor at the University of Colorado Boulder does not guarantee eligibility for regular degree or nondegree status.

Note: Admitted degree students, either enrolled or suspended, are not permitted to audit courses. If an admitted degree student is interested in participating in a class without receiving credit, the student must enroll in the course for no credit. Courses taken for no credit are assessed the same tuition rate as courses taken for credit.

Community Auditors
Community members age 18–54 can register for the Community Auditors program through Continuing Education by completing the Community Auditor Registration Form on the Community Auditors (http://ce.colorado.edu/programs/community-auditors/) webpage. Contact ceregistration@colorado.edu or call 303-492-5148 for more information.

Community auditors pay for three credit hours at the in-state undergraduate tuition rate in the College of Arts and Sciences. The cost is a flat rate and, with instructor permission, auditors may audit as many classes as desired. Nonrefundable payment is due at the time of enrollment.

Senior Auditors Program
Individuals 55 years and older can register for the Senior Auditors Program through the CU Boulder Alumni Association and qualify for reduced rates. Registration and eligibility information is available on the Senior Auditors (http://www.colorado.edu/alumni/programs/senior-auditors/) webpage. Contact the Alumni Association at 303-492-8484 for more information about this program.

Dropping & Adding Classes Procedures
Students can add or drop classes in Buff Portal. For more information, visit the Enroll in Classes (https://www.colorado.edu/registrar/students/enroll/) webpage.

Deadlines
For specific drop and add deadlines for both the regular 16-week and special fall and spring sessions, visit the Academic Calendar (http://www.colorado.edu/registrar/students/academic-calendar/) webpage. For summer deadlines, visit the Summer Session Calendars (http://www.colorado.edu/summer/resources/calendars/) webpage.

Add a Class
• Students may add classes in Buff Portal during designated registration periods each term.
• After this time period, students must contact the instructor or the instructor’s department and request to be added to a class. Their request may be denied based on lack of attendance, fire
Students dropping all of their classes should see the Withdrawal section.

**Withdrawing from the Semester**

A withdrawal from a Main Campus semester occurs if the student:

- never registers for classes in a fall or spring semester; or
- drops all classes for a semester; or
- submits a withdrawal request to the Office of the Registrar.

A student who desires to withdraw from the university and drop all Main Campus classes should visit the Office of the Registrar’s Withdraw from the Semester (http://www.colorado.edu/registrar/students/withdraw-cu/) webpage and review the current term’s withdrawal calendar to understand the potential impacts of withdrawing. Failure to withdraw properly may result in failing grades recorded for every class and liability for the full amount of tuition and fees for that term.

**Rules for withdrawing may vary with each college and school.** Students anticipating a withdrawal should consult their advisor to understand the potential impacts to their degree requirements.

**Withdrawing students (including students applying for a graduate leave of absence)** with Federal Perkins/NDSL loans must complete a loan exit interview and clear all outstanding financial balances before leaving the university. Failure to do so results in a hold on the student’s record. This hold prevents receipt of a diploma or an academic transcript of work at the university and registration for future terms. Students can complete a loan exit interview by contacting University Student Loans & Debt Management in the Bursar’s Office at 303-492-5571, toll free at 800-925-9844 or TTY 303-492-3528.

Undergraduate students who withdraw and then wish to return to the university have two semesters (plus summer) from their last graded semester to return to the university without having to reapply for admission. Graduate students can apply for an approved leave of absence.

Details are available on the Withdraw from the Semester (http://www.colorado.edu/registrar/students/withdraw-cu/) webpage. For more information, contact the Office of the Registrar at 303-492-6970 or withdraw@colorado.edu. For information about tuition and fee obligations for withdrawing students, see either the Undergraduate Tuition and Fee Policies (p. 59) or the Graduate Tuition and Fee Policies (p. 961) sections.

**Active Duty**

Students who are military personnel, fire fighters and police officers called to active duty and/or to help with disasters may request to go on a leave of absence. These students should contact the Office of the Registrar. For more information, visit the Withdraw from the Semester (https://www.colorado.edu/registrar/students/withdraw-cu/#military_personnel_amp_emergency_workers-466) webpage.

**Undergraduate Leave of Absence**

Undergraduate students can take a leave of absence from the university for up to two semesters (plus summer) without having to reapply to CU Boulder. Eligible degree-seeking undergraduate students may maintain certain university benefits while taking leave from the university. Some benefits (such as Recreation Center access and health insurance through Health & Wellness Services) are only available for an additional fee.

Signing up for these elective benefits requires submitting an application.

For an application and more information, visit the Leave of Absence (https://www.colorado.edu/registrar/students/withdraw/leave-of-absence/) webpage.

**Retroactive Withdrawal**

In certain situations, colleges, schools and programs accept petitions for retroactive withdrawals from one or more completed semesters. Students must clearly demonstrate that they experienced unforeseen extenuating circumstances that prevented them from withdrawing by the deadline. These requests are infrequently granted and cover specifically mental health or physical health problems and family or financial problems that led to an abnormally poor academic performance. Students who believe they may be eligible for a retroactive withdrawal should speak with an academic advisor or coach and visit the Office of Undergraduate Education’s Retroactive Withdrawal (https://www.colorado.edu офис-undergraduate-education/retroactive-withdrawal/) webpage for more information.

Retroactive withdrawal petitions are only accepted in the case of unforeseen extenuating circumstances of debilitating health problems (mental or physical), a family emergency (such as the death of a guardian) and unexpected financial difficulties (such as a parent losing their job).

While there is no guaranteed timeframe for petitions to be reviewed, generally petition review takes between 30 to 60 days after the petition is marked as complete. Campus closures and holidays can also impact the review process timeline. For petitions that are approved, the student will be fully withdrawn from the semester(s) requested. Grades will be replaced with withdrawals (W) for all classes taken in the the semester(s) irrespective of the original grades.
Students who must withdraw within a given term due to extenuating circumstances should review the academic and financial considerations on the Withdraw from the Semester (https://www.colorado.edu/registrar/students/withdraw/#military_personnel_#military_personnel_#military_personnel_#military_personnel_amp_emergency_workers-466) webpage.

Credit for Prior Learning

Undergraduate students with prior educational experience in a particular field of study in the liberal arts may be interested in earning credit in one or more of the statewide Guaranteed Transfer (GT) Pathways (http://highered.colorado.gov/academics/transfers/gtPathways/curriculum.html) general education curriculum categories without taking a traditional course at CU Boulder. Students may earn GT Pathways credit without taking a course by passing a challenge exam.

Challenge Exam

Students may request a challenge exam for any one of the 14 categories in the GT Pathways general education curriculum. Students must take and pass a proctored examination (usually a CLEP exam) or other approved assessment to demonstrate their knowledge and mastery of the state-approved content and competencies for that GT Pathways category. By successfully challenging a GT Pathways category, a student will earn 3 or 4 generic credits toward the equivalent category in their CU Boulder general education requirements. They will not earn credit for a specific CU Boulder course.

Other Methods

Please note that students may also earn GT Pathways credit for prior learning via:

- Advanced Placement (AP) exams
- International Baccalaureate (IB) exams
- College-Level Examination Program (CLEP) exams
- DANTES Subject Standardized Tests (DSST)

Please see the Office of Admissions’ Credit for Coursework or Exams page for information about earning credit for those exams.

For more information, see our Credit for Prior Learning (https://www.colorado.edu/registrar/students/degree-planning/credit-prior-learning/) webpage.

Student Affairs

Health & Wellness

Medical Services

Medical Services is the primary health care resource for CU Boulder students. Through comprehensive care and education, we strive to give students the skills and knowledge they need to develop healthy lifelong habits. To learn more, visit Health and Wellness Services (http://www.colorado.edu/health/).

Counseling and Psychiatric Services

Counseling and Psychiatric Services (CAPS) offers confidential, on-campus and online mental health and psychiatric services for a variety of concerns including academics, anxiety, body image, depression, relationships, substance use and more. To learn more, visit CAPS (http://www.colorado.edu/health/counseling/).

Disability Services

Students with disabilities are one of the many groups that make up our campus community. Having a diverse community broadens our understanding and appreciation for the contributions of each individual. We provide leadership and guidance regarding accommodations and universal access. To learn more, visit Disability Services (http://www.colorado.edu/disabilityservices/).

CU Boulder Gold Student Health Insurance Plan (SHIP)

Students registered for 6+ undergraduate credit hours or 1+ graduate credit hours are eligible to enroll in CU’s Gold Student Health Insurance Plan (SHIP). Students also have the option to waive the Gold SHIP and use their own insurance.

Students using their own insurance qualify for the BuffCare Supplemental Plan, which provides coverage for out-of-pocket expenses incurred through Health and Wellness Services including co-payments, co-insurance and other expenses.

Exceptions to Gold SHIP enrollment: new summer students, non-degree seeking Continuing Education, Leave of Absence Program, Education Abroad, Evening MBA program, or exclusively Be Boulder Anywhere courses.

For more information, visit the Health Insurance Requirement (http://www.colorado.edu/health/insurance/health-insurance/) webpage.

Note: Plans available through the health insurance marketplace meet CU’s health insurance requirement. Colorado students may sign up through the Connect for Health Colorado (http://connectforhealthco.com/) website. Nonresident students may sign up through their home state health exchange or through the national HealthCare.gov (https://www.healthcare.gov/) website.

Housing

Residence Halls

Living on campus in a university residence hall is considered an important part of student life. Over 7,000 students are accommodated in double rooms, multiple occupancy rooms, singles and apartments in 24 residence halls. All halls are coeducational and range in sizes from 100 to 500 students. Each fall the residence halls provide a new home for more than 6,000 entering first-year students. Subject to the availability of space, all first-year students are required to live in a residence hall for two academic semesters (a summer term does not count as an academic semester), unless they are married or live with parents and have permission to commute. Requests for permission to reside off campus for other reasons are considered on their merits, taking into account individual circumstances.

The residence halls provide a range of services and programs designed to support the intellectual, social and personal growth of single student residents. All residence halls, for example, offer tutoring services to residents at no cost. Additionally, a variety of academic and social programs are sponsored by residence hall and other university staff.

The dining centers’ service hours are planned to be convenient for most students’ schedules. Campus Dining Services provides healthy food choices to diverse students which emphasizes convenience, value
and variety. The dining program permits students (regardless of hall assignment) to eat in any dining center.

For more information about university housing options and/or permission to reside off campus, prospective students may contact:

Occupancy Management
Center for Community, Room S300
159 UCB
Boulder, CO 80309-0159
Email: studenthousing@colorado.edu
Phone: 303-492-6673

Application for Residence Hall Housing
New first-year and transfer students receive information from Housing & Dining Services about applying for housing after they have confirmed their intent to attend the university. Housing assignments are made on a first-come, first-assigned basis. The earlier applications are submitted, the better chance students have of being assigned to the residence hall of their preference. (Please note that Housing & Dining Services does not guarantee assignment to a particular building or program, type of accommodation or specific roommate.)

Note: Application for admission to the university and application for housing are two separate transactions. For information regarding admission notification and confirmation procedures, see the undergraduate Admissions (p. 24) section.

All housing contracts are for the full two-semester academic year or remainder thereof. An early termination of contract is subject to financial penalties as stated in the residence halls contract.

Housing Security Deposit
All students who live in the residence halls are required to pay a one-time security deposit of $300 at the time of application. Of this security deposit, $50 is nonrefundable and is used to cover administrative costs. The remaining $250 is refundable, held by Housing & Dining Services and is released to the tuition and fee account within 60 days after the expiration of the housing contract. The refundable deposit amount is forfeited by students who cancel after May 31, or students who do not live in the residence halls for the entirety of the housing contract period.

The security deposit required for housing is in addition to the confirmation deposit required for admission to the university.

Room and Board Rates per Semester
Residence hall room and board rates per person, per semester, for the 2019–20 academic year are:

| Roommate(s & community bath | $7,209 |
| Roommate(s) & attached bath | $7,962 |
| Individual space & community bath | $7,962 |
| Individual space & attached bath | $8,188 |
| Roommate(s) & apartment | $8,330 |

Rates are per semester. Fall semester is August 20, 2019 to December 19, 2019 and spring semester is January 10, 2020 to May 7, 2020. Summer room types and rates available on the Housing & Dining Services website (https://living.colorado.edu/room-types-rates/).

Rates for 2020-21 will be available in July 2020. Please expect a 3-5% increase.

Undergraduate Residential Programs
A number of the residence halls are home to residential academic programs. Additionally, several communities offer themed housing in the form of living and learning communities. Visit the respective pages of the catalog to learn more about residential academic programs (p. ) and living and learning communities (p. ).

Off-Campus Housing
Off-Campus Housing & Neighborhood Relations (a service of CUSG) maintains listings of apartments, houses and rooms for rent in the Boulder area. Currently enrolled students may view listings and connect with potential roommates on Ralphie's List, CU's rental database, on the Off-Campus Housing & Neighborhood Relations (http://offcampushousing.colorado.edu/) website. The office also maintains a detailed list of apartments and property management companies available for download or pickup in the office.

The department has a staff attorney available on Tuesdays and Fridays to advise students about leases, security deposits, maintenance issues and roommate and landlord conflicts. Office assistants will help students locate properties and answer questions about the surrounding neighborhoods.

During the academic year, the office sponsors several off-campus housing fairs where landlords, property managers and related businesses offer their services to students in a trade-show format.

For additional information, visit the Off-Campus Housing & Neighborhood Relations (http://offcampushousing.colorado.edu/) website or call 303-492-7053. Office hours are 8 a.m.–5 p.m., Monday–Friday. Summer hours are 7:30 a.m.–4:30 p.m.

Note: First-year students must receive written permission from Housing & Dining Services before obtaining off-campus accommodations for the fall and spring semesters of their first year, as well as for the summer session preceding their fall start date.

Graduate & Family Housing
The University of Colorado Children's Center provides child care for the children of students, staff, faculty and Graduate & Family Housing residents.

Graduate & Family Housing offers an affordable, convenient and comfortable living environment that serves the needs of a diverse population of students at CU. We are home to residents from over 70 nations and offer a variety of apartment types and sizes, flexible leases and community-building programs and events. To learn more, visit the Housing & Dining Services (https://living.colorado.edu) website or call, write or email the Graduate & Family Housing Office at the address provided.

Graduate & Family Housing Office
1350 20th Street, #A10
University of Colorado Boulder
Boulder, CO 80302
T: 303-492-6384
graduatefamilyhousing@colorado.edu
Student Conduct & Colorado Creed

Student Conduct & Conflict Resolution

The purpose of Student Conduct & Conflict Resolution is to provide students with individualized responses to support community standards and conflict resolution that emphasize accountability and growth by:

- Fostering reflection on the impact of their behaviors.
- Promoting harm repair and responsible community membership.
- Cultivating the wellbeing and safety of the CU Boulder community.

Clarification of Values

1. The student will understand the effect of their behavior on others.
2. The student will demonstrate ethical development, will comply with institutional policy, and will commit no further violations of policy.
3. The student will gain understanding of the institutional values reflected in institutional policies.
4. The student will gain a better understanding of the importance of personal integrity.
5. Through the Student Conduct & Conflict Resolution process, the student will be asked to reflect on their beliefs, ethics, and values.
   a. The student will be able to articulate their personal ethics and values, will act in congruence with those ethics and values, and will make decisions that reflect their beliefs.
6. The student will contribute positively to the university community and beyond.
7. The student will gain a better understanding of the consequences and potential consequences of their personal actions and will learn the purposes of institutional policies.
8. The student will employ critical thinking in problem solving and ultimately obtain a degree.

Authority

Each campus develops a student code of conduct. Student Conduct & Conflict Resolution (SCCR) is authorized to establish and administer this policy. Any questions regarding interpretation of this code or any of its provisions should be directed to the Dean of Students or their designee for final determination.

Questions regarding behavioral problems should be directed to Student Conduct & Conflict Resolution, studentconduct@colorado.edu, University of Colorado Boulder, 10 UCB Boulder, CO 80309, phone 303-492-5550.

Jurisdiction

This policy governs:

- Student conduct that occurs on, or as it relates to, university property or at official functions and university-sponsored programs conducted away from the campus. University property is defined as land, buildings, digital space, and facilities in possession of or owned, used, or controlled by the university, or funded by university budgets.
- Student conduct that occurs off university property is subject to this policy if it: (1) adversely affects the health, safety, or security of any member of the university community or the mission of the university; or (2) involves any records or documents of the university.

For purposes of this policy, the university’s mission is broadly defined to include both its academic goals and the importance of developing civic responsibility in our students.

Student Conduct Process

Informal Resolution

- This process may generally include, but is not limited to, a meeting with a conduct officer, completion of the agreement, and/or participation in the Restorative Justice program as is referenced in Section H.5.
- During the meeting, if the conduct officer determines that the informal resolution process may be appropriate, the conduct officer will offer it as an option to the responding student and address any questions the responding student may have about the process. If the responding student accepts responsibility for the alleged prohibited conduct, agrees to, and completes the agreement developed during the meeting, then SCCR will consider the matter to be resolved informally.

Formal Resolution

- This process generally includes: (1) written notice of the factual allegations and alleged violations of the Student Code of Conduct; (2) the opportunity to meet with the conduct officer to address the allegations and provide information to the conduct officer; (3) the conduct officer reviewing the allegations and making factual and violation determinations based on preponderance of the evidence; and (4) written notice to the responding student of the conduct officer’s determinations.

All students residing in Housing & Dining Services facilities are subject to Residence Hall policies or any policy properly communicated through Housing & Dining Services staff. For more information, visit the What You Need to Know (https://living.colorado.edu/housing/what-you-need-know/) webpage.

Actions taken under the conduct process are separate and apart from any law enforcement or other court process or proceeding, such as a civil lawsuit or criminal prosecution, that may relate to the same underlying factual incident. SCCR’s jurisdiction does not depend on whether a responding student is criminally charged through the criminal justice system. The conduct process is not postponed while criminal or civil proceedings are pending unless otherwise determined by the conduct officer. Dismissal of criminal charges or acquittal in a criminal case does not prevent SCCR from investigating and adjudicating an incident.

The unexcused failure of a responding student to appear and/or respond to the conduct process does not prevent the university from proceeding with or completing the conduct process.

Cases involving sexual misconduct (including sexual assault, sexual harassment, intimate partner violence and gender/sex-based stalking), protected class discrimination and harassment and any related retaliation are subject to the Office of Institutional Equity and Compliance (OIEC) policies. For more information, visit the OIEC (https://www.colorado.edu/oiec/) website or call 303-492-2127.

Excerpts from the Colorado Revised Statutes regarding hazing, ethnic intimidation and riots are also presented. Colorado law prohibits persons convicted of rioting from enrolling in state-supported universities/colleges for 12 months following the date of a conviction.

For information about student classroom and course-related behavior, visit the Policies (https://www.colorado.edu/policies/student-classroom-and-course-related-behavior/) webpage.
Colorado Creed

The Colorado Creed, developed by students in 2003, is a social code of conduct and a lifestyle by which students at CU Boulder live. The text of the creed is:

As a member of the Boulder community and the University of Colorado, I agree to:

- Act with honor, integrity and accountability in my interactions with students, faculty, staff and neighbors.
- Respect the rights of others and accept our differences.
- Contribute to the greater good of this community.

I will strive to uphold these principles in all aspects of my collegiate experience and beyond.

For more information, visit the Colorado Creed (http://www.colorado.edu/creed/) website.

Student Resources

The Division of Student Affairs (http://www.colorado.edu/studentaffairs/) offers many on-campus resources for our students. Visit our offices to learn more.

Student Life & Involvement

- Center for Student Involvement (https://www.colorado.edu/involvement/): Be involved! Connect with clubs, fraternity and sorority life, student organizations and other events and opportunities.
- CU Student Government (https://custudentgov.org/): Make a difference! Get involved with your student government representatives, elected by students, for students. CUSG is your voice on campus.
- Environmental Center (https://www.colorado.edu/ecenter/): Helping CU Boulder become a global leader in sustainability through recycling, student bus pass, bicycle and educational programs.
- Housing & Dining (https://living.colorado.edu/): Explore information about on-campus life, including residence halls, meal plans and dining options! View housing or on-campus meal plan options.
- New Student & Family Programs (https://www.colorado.edu/orientation/): The campus resource for new students and families as they begin their journey at CU Boulder. Ask questions and be sure to join for welcome events throughout the year.
- Off-Campus Housing & Neighborhood Relations (https://www.colorado.edu/offcampus/): Explore off-campus rentals on Ralphie's List, register your party and learn about the legal aspects of off-campus living.
- Residence Life (https://living.colorado.edu/): Explore the opportunities that residence life provides, from on-campus housing and employment to student resources like free tutoring.
- University Memorial Center (https://www.colorado.edu/umc/): Home to the CU Bookstore and student offices, as well as plenty of entertainment and dining options.

Health & Wellness

- Counseling & Psychiatric Services (https://www.colorado.edu/counseling/): Offers confidential, on-campus mental health and psychiatric services including workshops, groups, individual counseling and medication management.
- CU Collegiate Recovery Center (https://www.colorado.edu/recoverycenter/): A supportive student community offering free support meetings, sober social events, recovery coaching and referrals for students.
- Health Promotion (https://www.colorado.edu/health/promotion/): Assists students in developing skills to make healthy decisions through outreach and education, including workshops, classes, events and conversations.
- Medical Services (https://www.colorado.edu/healthcenter/): Provides on-campus health and wellness services including medical care, nutrition, physical therapy, sexual and reproductive health and more.
- Office of Victim Assistance (https://www.colorado.edu/ova/): Offers free and confidential support, consultation, advocacy and counseling for students, staff and faculty who've experienced a traumatic, disturbing or life-disruptive event.
- Recreation Services (https://www.colorado.edu/recreation/): Get moving with all that The Rec has to offer, including intramural sports, fitness classes, nutritional services and the Outdoor Program.

Student Support & Development

- Career Services (https://www.colorado.edu/career/): Find student and alumni jobs, fine-tune your resume, learn about your strengths, land that internship and make connections with employers.
- Student Conduct & Conflict Resolution (https://www.colorado.edu/osccr/): Get support for resolving conflicts and learn more about the Student Code of Conduct and the Honor Code.
- Student Legal Services (https://www.colorado.edu/studentlegal/): Offers accessible, low-cost legal advice and education to students regarding their rights, responsibilities and how to navigate the legal system.
- Students Support & Case Management (https://www.colorado.edu/studentaffairs/sscm/): Provides individual support for students and advocates for their needs in all aspects of campus life.
- Veteran and Military Affairs (https://www.colorado.edu/veterans/): Serves prospective and current student veterans and veteran dependents, including program information, policies, pay and support.
- Volunteer Resource Center (https://www.colorado.edu/volunteer/): Explore volunteer opportunities for CU Boulder students and staff throughout the greater Boulder community.

Student Data Privacy

Annual Notice to Students

As a CU Boulder student, it’s important to understand your rights regarding access to and disclosure of information in your education record. The Family Educational Rights and Privacy Act (https://www.colorado.edu/registrar/students/records/ferpa/) (FERPA) affords you the right to:

- Inspect and review your education record
- Request amendment of your education record
- Consent to disclosure of personally identifiable information in your education record
- File a complaint with the U.S. Department of Education (Family Policy Compliance Office, U.S. Department of Education, 400 Maryland Avenue, SW, Washington, DC 20202)
To review or request an amendment to your record, contact the Office of the Registrar or the university office that maintains the record. This does not apply to grade changes, which are at faculty discretion.

Under FERPA, the university may release education record information if the disclosure is:

- To CU Boulder officials who have a legitimate educational interest (https://www.colorado.edu/registrar/students/records/ferpa/glossary/)
- To officials of another institution at which you seek or intend to enroll
- To authorized representatives of federal, state or local educational authorities
- To connection with financial aid you’ve applied for or received
- To an organization conducting studies for or on behalf of the university
- To your parents or guardians (if you are a dependent student for tax purposes)
- To an accrediting organization
- To comply with a judicial order or lawfully issued subpoena
- In connection with a health or safety emergency or other exception under FERPA (https://www.colorado.edu/registrar/students/records/ferpa/exceptions/)
- To fulfill a request for data that CU Boulder defines as directory information (https://www.colorado.edu/registrar/students/records/ferpa/directory-info/)

Student data that is not directory information may only be released with your documented consent.

To authorize third-party access to your non-directory information, see CU Guest Access (https://www.colorado.edu/registrar/students/records/privacy/guest-access/) and FERPA Consent to Release (https://www.colorado.edu/registrar/students/records/privacy/consent/). You may restrict the release of directory information by placing full privacy (https://www.colorado.edu/registrar/students/records/privacy/full/) on your record.

Questions may be directed to the Office of the Registrar.

**Directory Information**

The following items of student information have been designated by the University of Colorado Boulder as public or "directory" information:

- student name\(^1\)
- hometown (city, state)
- campus email address\(^2\)
- dates of attendance
- previous educational institutions attended
- school/college or division of enrollment
- majors, minors and fields of study
- classification level (e.g., first-year, sophomore, etc.)
- university-recognized honors and awards
- degree status (e.g., expected graduation date and/or conferral dates/terms)
- enrollment status
- employment related to student status (e.g., teaching assistant, resident assistant or work-study) and dates for positions held
- participation in officially recognized activities/sports, including height and weight of athletes
- photos and videos taken or maintained by the university

\(^1\) If a student provides a preferred name, the university uses it when communicating directly with the student and in campus systems, rosters, etc., unless there is a documented business or legal reason to use a student’s primary name. When communicating with outside third parties, including parents, the university generally uses a student’s primary (legal) name. Students may also select a diploma name (https://www.colorado.edu/registrar/students/graduation/) for graduation and commencement materials.

\(^2\) Campus email addresses are only disclosed to requestors who agree to not use them for solicitation.

**Withholding Directory Information**

Students have the right to withhold directory information from inquirers. To restrict the release of directory information, students must bring a photo ID to the Office of the Registrar during business hours to complete a privacy form.

**Student Consent for Release of Confidential Information**

Students may authorize the university to release educational records to parents, spouses or other third parties by granting consent in their student portal. The Privacy Settings (http://www.colorado.edu/registrar/students/records/privacy/) webpage has more information about various options for granting and restricting access to student records.

**Release of Disciplinary Information**

Provisions of the Family Educational Rights and Privacy Act of 1974, as amended by the Higher Education Amendments of 1998, govern access to a student’s academic transcript or conduct file. The student and/or those university officials who demonstrate a legitimate educational need for disciplinary information may have access to the student’s conduct file.

Parent(s) who provide proof that a student is a dependent as defined in Section 152 of the Internal Revenue Code of 1954 (i.e., a copy of the last federal income tax return listing the student as a dependent) may have access to the student's conduct file without written consent of the student. In this case, parents may have access to a conduct file, even if the student has requested otherwise.

In addition, parent(s) may be notified if a student under 21 is found responsible for a violation involving use or possession of alcohol and controlled substances. All other inquiries, including but not limited to inquiries from employers, government agencies, news media, family, friends or police agencies, require a written release from the student before access to university conduct files is granted. Exception: information may be released pursuant to a lawfully issued subpoena and as provided by the Campus Security Act as amended by the Higher Education Amendments of 1992.

The Campus Security Act permits higher education institutions to disclose to alleged victims of any crime of violence (e.g., murder, robbery, aggravated assault, burglary, motor vehicle theft, arson) the results of the conduct proceedings conducted by the institution against an alleged perpetrator with respect to such crime. The Campus Security Act also requires that both the accused and the accuser be informed of campus conduct proceedings involving a sexual assault.
**Student Finances**

**Costs**

**College Opportunity Fund (COF)**

The College Opportunity Fund (COF), created by the Colorado Legislature, provides a stipend to eligible undergraduate students paying in-state tuition. The stipend pays a portion of total in-state tuition for eligible undergraduate students who attend a Colorado public institution or a participating private institution. Eligible undergraduate students must be admitted and enrolled at a participating institution to use the stipend for eligible undergraduate classes.

To receive the COF stipend, students must both apply for COF and authorize CU Boulder to use the stipend on their behalf (two separate steps). New accounts offer 145 available undergraduate credit hours. COF-eligible students who exceed 145 eligible COF hours toward their degree may apply for additional semesters of eligibility. For more information, visit the Office of the Registrar’s College Opportunity Fund (http://www.colorado.edu/registrar/students/cof/) webpage.

Details of the COF program are determined by the Colorado Department of Higher Education (CDHE) and the College Assist Program (https://cof.college-assist.org/). Students with questions about COF may contact the Office of the Registrar (http://www.colorado.edu/registrar/about/contact-us/).

**Confirmation Deposit**

All new students (in-state, out-of-state and international) must confirm their intent to enroll and pay the $200 confirmation deposit. The deposit is nontransferable and must be paid by all students, regardless of financial aid awards. Students who have paid the deposit and who decide not to attend CU Boulder forfeit their deposit. Students who submit deposits after enrollment levels have been reached will not be accepted, and their deposits will be returned.

The confirmation deposit is not applied to the tuition bill. It is refunded after graduation or official withdrawal within established dates and guidelines, and after paying any outstanding university obligations.

**Housing Deposit**

Please see the Housing (p. 53) section for details.

**Estimated Costs**

Costs for students attending CU Boulder vary depending on housing (on or off campus), program of study, state residency (tuition classification), personal needs and individual interests.

Tuition and fees are approved annually by the Board of Regents. Visit the Bursar’s Office (https://www.colorado.edu/bursar/) website for current rates.

The figures below are university-billed cost estimates based on a single undergraduate student enrolled full time for academic year 2019–20 (two semesters). For detailed descriptions of tuition and fees, visit the Bursar’s Office (https://www.colorado.edu/bursar/costs/) website. The difference in range depends upon the student’s college/school/program. Residential academic program (RAP) (https://catalog.colorado.edu/undergraduate/colleges-schools/academic-enrichment-programs/undergraduate-residential-programs/#residentialacademicprogramtext) fees of $850 per year are not included in the estimated total. Additional costs such as transportation, medical and personal expenses should also be considered for planning purposes. The Bursar’s Office Costs (https://www.colorado.edu/bursar/costs/) pages provide estimates of indirect costs which may help students plan accordingly.

**2019–20 In-State Costs** (https://www.colorado.edu/bursar/costs/fallspring-costs/undergraduate-colorado-resident/)(one academic year; resident for tuition purposes)

- Tuition and Fees: $12,500–$17,804
- On-Campus Room and Board (based on double occupancy; standard room): $14,778
- Books and Supplies: $1,200
- On-Campus Estimated Total: $28,478–$33,782

**2019–20 Out-of-State Costs** (https://www.colorado.edu/bursar/costs/fallspring-costs/undergraduate-nonresident/)(one academic year; nonresident for tuition purposes)

- Tuition and Fees: $38,318–$41,714
- On-Campus Room and Board (based on double occupancy): $14,778
- Books and Supplies: $1,200
- On-Campus Estimated Total: $54,296–$57,692

**2019–20 International Costs** (https://www.colorado.edu/bursar/costs/fallspring-costs/undergraduate-international/)(one academic year; international nonresident for tuition purposes)

- Tuition and Fees: $40,188–$43,584
- On-Campus Room and Board (based on double occupancy): $14,778
- Student Health Insurance Plan (SHIP): $3,748 (included in estimated total)
- Books and Supplies: $1,200
- On-Campus Estimated Total: $59,914–$63,310

Notes:

- The resident tuition amount assumes eligibility for and authorization of the COF stipend, which was $94 per credit hour in 2019–20.
- Residency classification (https://www.colorado.edu/registrar/students/state-residency/) for tuition is determined by Colorado law.
- These estimates do not include a one-time new student fee ($232–$500) or the Student Health Insurance Plan ($1,874 per semester). Health insurance is mandatory but students have the option to submit proof of private insurance health insurance if they choose. See the Health & Wellness (p. 53) section.
- In-state tuition is charged per credit hour. Out-of-state and international tuition is a flat rate, regardless of the number of credit hours.
- In-state undergraduate students must apply for and authorize the COF stipend to help offset part of their tuition. See the undergraduate COF section above.
- In-state undergraduate tuition and mandatory fees are guaranteed for four years. For more information, visit Undergraduate Resident Tuition Guarantee (https://www.colorado.edu/bursar/costs/cu-boulder-tuition-guarantee/).
- Out-of-state and international undergraduate students are guaranteed the same tuition rate for four years (not including mandatory fees). For more information, visit Undergraduate Nonresident Tuition Guarantee (https://www.colorado.edu/bursar/costs/cu-boulder-tuition-guarantee/).
- Students planning to attend summer session can visit the Bursar’s Office (https://www.colorado.edu/bursar/costs/summer-costs/) website for summer rates.
- Tuition for no-credit (NC) courses (p. 45) is the same as for courses taken for credit.
• Students simultaneously enrolled in programs leading to two different degrees will be assessed tuition for the college or school with the higher tuition rate.

**Bills & Payments**

**Online Bills**

The university bill includes tuition, mandatory fees, on-campus room and board (p. 53), residential academic program (RAP) fees, student health insurance (see health insurance requirement (p. 53)) and other direct-university costs. Costs are billed one semester at a time. Textbooks, digital course materials and supplies up to $1,500 from the CU Book Store can be charged to the bill. Adjustments made throughout the semester will appear on the student account (e.g. health insurance waiver, dropping or adding courses, etc.). Additional costs such as transportation, medical and personal are not charged on the university bill but should be considered for planning purposes. See the Bursar’s Office Costs (https://www.colorado.edu/bursar/costs/) pages for examples of indirect costs.

Bills for fall are available in mid-August, depending on a student's registration date. Spring bills are available in mid-January. Emails are sent to students’ colorado.edu addresses and to authorized payers when bills are available online. New and unpaid charges are billed each subsequent month. Failure to check email or receive an email notification of the bill does not relieve any student of responsibility for payment by the published deadline. Students can log in to Buff Portal (https://buffportal.colorado.edu) and authorized payers can log in to CU Bill&Pay (https://quikpayasp.com/cu/boulder/tuition/authorized.do) at any time to view the bill.

Any student who completes registration agrees to pay CU Boulder according to the payment terms in the Tuition and Fee Agreement and Disclosure (https://www.colorado.edu/bursar/payments/payment-agreement/).

**Authorized Payers**

Family members do not automatically have access to CU Bill&Pay to view and pay the tuition bill because of federal privacy laws (http://www.colorado.edu/registrar/students/records/ferpa/). If they are helping pay the bill on the student’s behalf, students must give them access to CU Bill&Pay by authorizing them as payers (https://www.colorado.edu/bursar/billing/#give_parents_others_access_to_the_billAuthorized_payer_access_-939). Students can authorize payers in Buff Portal (https://buffportal.colorado.edu). Students are ultimately responsible for payment of the bill.

Authorized payer access is separate and distinct from CU Guest Access (https://www.colorado.edu/registrar/students/records/privacy/guest-access/) and FERPA Consent to Release (https://www.colorado.edu/registrar/students/records/privacy/consent/). If a family member is helping pay tuition and fees on a student's behalf, we recommend giving them authorized payer access and CU Guest Access.

If a third, non-related party is helping pay the bill (e.g., military, countries sponsoring international students), then see the 3rd Party Sponsorships (https://www.colorado.edu/bursar/payments/payment-options/3rd-party-sponsorships/) webpage.

**Payments**

Payment due dates are the 5th of the month. The primary deadlines are Sept. 5 for fall semester and Feb. 5 for spring semester.

**Payment Methods**

Payments can be made online from a traditional checking or savings account (electronic check or eCheck). Paying by eCheck is secure, fast and free.

We also accept American Express, Mastercard, Visa and Discover. A nonrefundable 2.75 percent fee (charged by NelNet Business Solutions) applies to all credit and debit card transactions, so we encourage payment from a checking or savings account in order for you to save money and avoid paying the service fee.

International payments (bank and wire transfers) are made using Flywire in CU Bill&Pay. For more information about sending money internationally, visit the Wire Transfers (https://www.colorado.edu/bursar/payments/payment-options/wire-transfers/) webpage.

Learn about other payment methods on the Bursar’s Office (https://www.colorado.edu/bursar/payments/payment-options/) website.

**Payment Plans**

Payment plans are also available for students and authorized payers to pay tuition and fees in monthly payments over the course of the semester. For more information, visit the Payment Plans (https://www.colorado.edu/bursar/payments/payment-plans/) webpage.

Also see the Policies (p. 59) section.

**Tuition and Fee Policies**

**Add/Drop Tuition Adjustment**

Adjustment of tuition and fees is made accordingly based on dates in the Add/Drop Calendar (https://www.colorado.edu/registrar/students/calendar/).

**Credit and Debit Card Service Fee**

A nonrefundable 2.75 percent service fee charged by NelNet Business Solutions applies to all credit and debit card transactions. To avoid paying this fee, we encourage payment from a U.S. checking or savings accounts (electronic check or eCheck).

**Dispute Rights**

To dispute tuition and mandatory fee charges, students must make a formal appeal to the Bursar’s Office by the end of the semester (last day of finals). Disputes will only be considered under extenuating circumstances, such as university error, recent medical condition, immediate family emergency, recent unanticipated financial problems and verified nonattendance. Official documentation must be provided to substantiate the circumstances. Learn more about the process, complete the tuition dispute form and submit the documentation online on the Tuition Dispute (https://www.colorado.edu/bursar/billing/tuition-dispute/) webpage. If you disagree with the charges and fail to avail yourself of the dispute process by the end of the semester, you will have waived your right to dispute the charges.

**Failure to Make Payment**

Failure to make the required payment in accordance with the scheduled payment deadline may result in any or all of the actions described below.
A financial hold may be placed on the student record and remain until the balance is paid in full. A financial hold will prevent students from being able to:

• Adjust their current schedule (drop or add classes).
• Register for future classes.
• Receive transcripts.
• Receive a diploma or certification materials.
• Be re-admitted.

A late payment charge is assessed once per semester based on the amount due.

### Balance Due and Late Charges

<table>
<thead>
<tr>
<th>Balance Due</th>

<tr>
<td>$900 and over</td>
<td>$50</td>
</tr>
</tbody>
</table>

In addition, finance charges of one percent (1%) per month are assessed on the unpaid principal balance. Finance charges are calculated by applying the periodic rate of one percent (1%) per month (annual percentage rate of twelve percent) to the unpaid principal balance less any payments or credits made.

After the end of the semester, past due accounts are referred to the university’s Student Debt Management department for collection. Students will have an opportunity to establish a university-approved repayment agreement. Establishing a repayment agreement does not result in release of financial holds.

If the balance is not paid or a university-approved repayment agreement does not exist after six months, Colorado law requires the university to place all delinquent accounts with a private collection agency at which time the delinquency is reported to national credit bureaus.

Student accounts referred to an outside collection agency may incur collection agency costs, expenses and fees. Such collection costs, expenses and fees may include percentage-based fees charged to the university by the collection agency, including percentage-based fees of up to 30 percent of the debt collected. Any collection costs stated above are charged in addition to the principal, fees and interest due on the student’s account. The student may be responsible for reasonable attorneys’ fees and court costs associated with collecting or enforcing payment on the past due account as allowed under Colorado law. Pursuant to Colorado Revised Statutes § 23-5-115, in the event the student defaults on the amount owed to the university, the university may certify to the Colorado Department of Revenue information required for the recovery of past due debt.

### Nondegree Students

Nondegree undergraduate students are assessed tuition at the undergraduate rate. Nondegree graduate students are assessed tuition at the graduate rate. Nondegree students in both graduate and undergraduate courses are assessed tuition at the undergraduate rate.

### Returned Payments

A $20 fee is charged for all payments (regardless of the amount) returned due to insufficient funds, closed account, payment stopped, or for other reasons. A $30 fee is charged by NelNet Business Solutions for returned payment plan payments. In addition, late and finance charges may be assessed and certified funds may be required when you make payment. A financial hold may also be placed on your account and you may be liable for collection costs and attorneys’ fees as allowed by Colorado laws.

### Students Registered on More than One Campus

Students registering for courses on more than one campus of the university during a single semester pay tuition and fees to each campus at the rate appropriate to the number of credits for which they are registered on that campus. Students may be eligible to use the concurrent registration option, in which case they pay the tuition rate of their home campus for the total hours enrolled at all campuses.

### Tuition and Fee Agreement and Disclosure

Any student who completes registration agrees to pay CU Boulder according to the payment terms in the Tuition and Fee Agreement and Disclosure (https://www.colorado.edu/bursar/payments/payment-agreement/).

### Tuition Classification

Students are classified as residents, nonresidents or international nonresidents for tuition purposes on the basis of answers provided on their application for admission and other relevant information. For more information, go to Tuition Classification (http://www.colorado.edu/registrar/students/state-residency/).

### Withdrawal Policy Regarding Tuition and Fees

Students who pay the $200 confirmation deposit and are registered for classes for any given semester are obligated to pay full tuition and fees, unless they officially withdraw from CU Boulder by published deadlines.

Tuition and fee obligations for students withdrawing from fall or spring semesters:

• Continuing students: Students who withdraw during the full-refund periods will have their confirmation deposit refunded unless there are any outstanding charges.
• New and readmitted students: New, readmitted and new transfer students are not eligible for a refund of the confirmation deposit.

Deadlines to withdraw with no financial penalty vary by semester but occur about ten days before the first day of instruction. For the current refund and assessment schedule, visit the Withdraw from the Semester (https://www.colorado.edu/registrar/students/withdraw/) webpage.

If students withdraw after the deadline to withdraw without being assessed a financial penalty, but before 11:59 p.m. on the third Wednesday of instruction, they are assessed a $200 withdrawal processing fee. The confirmation deposit is automatically applied to the withdrawal fee.

After the third Wednesday of instruction (the first drop deadline), there are three additional assessment periods.

• From the third Wednesday of instruction through the fifth Wednesday, students will be charged 40 percent of total tuition (not including the portion of tuition paid by College Opportunity Fund (COF) for in-state undergraduate students) and mandatory fees (CUSG student
fees, athletic fee and capital construction fee). COF credit hours are expended and not refunded for withdrawals after the published deadline.

• After the fifth Wednesday of instruction through the seventh Wednesday, students will be charged 60 percent of total tuition (not including the portion of tuition paid by COF for in-state undergraduate students) and mandatory fees (CUSG student fees, athletic fee and capital construction fee).

• After the seventh Wednesday of instruction, tuition will not be adjusted. In the case of extenuating circumstances (university error, recent medical condition, immediate family emergency, recent unanticipated financial problems or verification of non-attendance), students may dispute tuition and mandatory fee charges through the Bursar’s Office through the last day of finals.

To comply with federal financial aid regulations, financial aid recipients’ loan and scholarship awards may be adjusted.

Visit the Withdraw from the Semester (https://www.colorado.edu/registrar/students/withdraw/) webpage for current information. The Board of Regents reserves the right to revise this schedule at any time. Refer to the Summer Session (http://www.colorado.edu/summer/) website for information on the withdrawal policy and refund schedule for summer terms.

Students who do not pay the full amount due to the university at the time of withdrawal must make arrangements for payment with the Bursar’s Office. Withdrawals are handled through the Office of the Registrar.

Tuition Classification

In-State and Out-of-State Tuition Classification

Tuition classification is governed by state law and by judicial decisions that apply to all public institutions of higher education in Colorado. The University of Colorado does not have discretion to make exceptions to the rules as established by state law.

New students are classified as in-state or out-of-state residents for tuition purposes on the basis of information provided on their admission application and other relevant information. Applicants may be required to submit evidence substantiating their claim of in-state eligibility.

Current nonresident students who believe they have become eligible for a change to in-state status must submit a petition with documentation in order to have their status reviewed. The petition requirements, deadlines for submission, explanation of Colorado tuition classification statutes, specific legal residency exceptions and Office of the Registrar contact information are available on the Tuition Classification (http://www.colorado.edu/registrar/students/state-residency/) webpage.

Basic Requirement for Establishing Colorado Residency

To become eligible for in-state residency, a person must establish legal residence in Colorado. Legal residence, or “domicile,” is defined as a person’s true, fixed and permanent home and place of habitation. No person may establish domicile in Colorado solely for the purpose of obtaining in-state tuition benefits. An individual who seeks to establish domicile while registered as a student is presumed to establish Colorado domicile solely for tuition purposes unless there is clear and convincing evidence to the contrary.

Colorado in-state tuition classification requires Colorado domicile for 12 consecutive months. A person must be 22 years of age or older, married, a graduate student or an emancipated minor in order to begin the 12-month period of establishing domicile in Colorado. Unemancipated minors qualify for in-state status if their parents have been domiciled in Colorado for at least one year.

Evidence of Domicile

Establishing Colorado domicile includes actions that would be expected of any permanent resident. Pursuant to Colorado law, the following may be considered evidence of domicile:

• filing a tax return in Colorado and, if applicable, payment of Colorado state income tax;
• Colorado driver’s license or Colorado ID card within 120 days of move to Colorado;
• Colorado vehicle registration within 180 days of move to Colorado;
• voter registration in Colorado;
• graduation from a Colorado high school;
• lease or deed showing permanent occupancy of residential real property in Colorado;
• continued residence in Colorado while not enrolled as a student and during semester breaks;
• permanent employment or acceptance of future employment in Colorado; or
• any other factor particular to the individual that tends to establish the necessary intent to make Colorado a permanent home.

No single factor constitutes proof of domicile. All evidence, both positive and negative, is considered. Not all of the listed items are necessary, but individuals should take action on any factors that are appropriate in their circumstance.

Domicile Exceptions

Colorado tuition law provides the following rare exceptions to the one-year domicile requirement in certain circumstances:

• Colorado National Guard members,
• active duty military stationed in Colorado and their dependents,
• honorably discharged members of the U.S. Armed Forces and their dependents,
• returning active-duty military members,
• Canadian military stationed in Colorado,
• ASSET law qualified students with three years of Colorado high school and graduation,
• children of new faculty members at Colorado state colleges and universities,
• employees of companies moving to Colorado receiving government economic incentives,
• Western Regional Graduate Program enrollees in specific major fields of study,
• Olympic athletes training in Colorado, and
• others (see Residency Exceptions for Domicile (http://www.colorado.edu/registrar/students/state-residency/domicile-exceptions/) webpage).
Requirements, including spouse and child eligibility, are detailed on the Residency Exceptions for Domicile (http://www.colorado.edu/registrar/students/state-residency/domicile-exceptions/) webpage.

### Unemancipated Minors

Students under age 23 who depend on their parents for support may qualify for in-state tuition if either of their parents, regardless of custody, has been domiciled in Colorado for 12 consecutive months preceding the first day of class in a given semester, even if the student resides elsewhere. In certain circumstances, students may qualify through their parents up to age 23.

### Emancipation

An emancipated minor is someone under age 23 who demonstrates total financial and residential independence. This means the student’s parents and all others have entirely surrendered the right to the student’s care, custody and earnings, and make no provision for support of any kind. Emancipation is very rare; undergraduates under age 23 who do not have a parent domiciled in Colorado are highly unlikely to be classified as a Colorado resident student.

Students who give false information to evade payment of out-of-state tuition or who fail to provide timely notice of their loss of in-state eligibility are subject to retroactive assessment of out-of-state tuition, as well as disciplinary and legal actions.

For more information on all requirements, see the Tuition Classification (http://www.colorado.edu/registrar/students/state-residency/) webpage.

### University Policies

#### Alcohol and Other Drugs

In order to create the best possible environment for teaching and learning, the University of Colorado Boulder affirms its support for a responsible campus policy that addresses the inappropriate use of alcohol and other drugs.

In compliance with the federal Drug Free Schools and Communities Act, the University of Colorado Boulder prohibits the unlawful manufacture, possession, use or distribution of a controlled substance (illicit drugs and alcohol) of any kind and in any amount. These prohibitions cover any individual’s actions that are part of any university activities, including those occurring while on university property or in the conduct of university business away from the campus.

Information on policies, penalties, health effects and resources available to students and staff regarding alcohol and other drugs can be found on the Alcohol & Other Drugs Information (http://www.colorado.edu/aod/) website.

These policies are also described by various university offices in several publications:

- **Student Code of Conduct**: Students’ Rights and Responsibilities Regarding Standards of Conduct and Alcohol and Drug Policy, available from Student Conduct & Conflict Resolution, 303-492-5550. See also the Student Code of Conduct (https://www.colorado.edu/sccr/student-conduct/).
- **Safety**: Annual Security and Fire Safety Report (http://www.colorado.edu/clery/).
- **Student life**: The Guide to Student Life, distributed to new and continuing students. Resources available on CU Boulder Students (http://www.colorado.edu/students/) webpage.

Individual and group counseling for students with substance abuse concerns is available through Counseling and Psychiatric Services. For more information, visit the Counseling and Psychiatric Services (http://www.colorado.edu/health/counseling/) webpage or call 303-492-2277.

#### Smoking

For student health and the health of our community, smoking is prohibited in all campus buildings and on all campus grounds.

At this time, the use of smoking products of any sort shall be prohibited on all university-owned and operated campus grounds both indoors and outdoors. This smoking ban does not apply to public rights-of-way (sidewalks, streets) on the perimeter of the campus.

"Smoking," as used in this policy, means smoking any substance, including but not limited to, tobacco, cloves or marijuana. "Smoking products" include, but are not limited to, all cigarette products (cigarettes, bidis, kreteks, e-cigarettes, etc.) and all smoke-producing products (cigars, pipes, hookahs, etc.).

University-owned and operated campus grounds include, but are not limited to: all outdoor common and educational areas; all university buildings; university-owned on-campus housing; campus sidewalks; campus parking lots; recreational areas; outdoor stadiums; and university-owned and leased vehicles (regardless of location). In keeping with university policy, the sale, distribution and sampling of all tobacco products and tobacco-related merchandise is prohibited on all university-owned and operated property and at university-sponsored events. Littering campus with remains of smoking products is prohibited.

This policy applies to all employees, students, visitors, contractors and externally affiliated individuals or companies renting university-owned space on university-owned and operated property campus grounds.

### Campus Safety

#### Personal Safety on Campus

While the University of Colorado Boulder is a relatively safe place to be, the campus is not a haven from community problems. Through the joint effort of various organizations on campus, CU is committed to providing ample safety resources for faculty, staff and students.

Specific efforts to promote safety on campus include the provision of adequate lighting, police protection, educational programs and special prevention programs, such as the CU NightRide escort services and laptop and bicycle registration programs.

In compliance with the federal Clery Act, students and employees receive information on campus security policies and programs, including crime statistics, in an Annual Security and Fire Safety Report (http://www.colorado.edu/clery/). This report will be sent to CU Boulder affiliates by Oct. 1 of each year. In any emergency or life-threatening situation, always call 9-1-1.

Members of the university community are encouraged to report any incident of threatening or harmful behavior to the CU Boulder Police by
calling 9-1-1 in an emergency or the non-emergency line, 303-492-6666. Visit Don’t Ignore It (http://www.colorado.edu/dontignoreit/) for more information about the wide range of campus and community resources and reporting options available.

Additional safety information can be found on the CU Police Department (http://www.colorado.edu/police/) website. For information on crime alerts, trends and safety tips, follow the CU Police Department on Twitter (@CUBoulderPolice) and Facebook (CUBoulderPolice (https://www.facebook.com/CUBoulderPolice/)).

**Communication**

**Student Email**

All CU students receive an email account from the university, which is an official means of sending information to students. Students are responsible for maintaining this CU email address. The official email address can be used by professors to contact students and provide course-related information. Administrative offices, such as the Office of the Registrar, use official email addresses to contact students and provide important information. Students are responsible for frequently checking their official CU email address. For more information on the student email policy, visit the Student E-mail Policy (http://www.colorado.edu/policies/student-e-mail-policy/) webpage, call the IT Service Center at 303-735-HELP or email HELP@colorado.edu. To learn more about student email accounts, visit the Office of Information Technology's Messaging and Collaboration (https://oit.colorado.edu/services/messaging-collaboration/) webpage.

**Copyright & Fair Use**

The University of Colorado Boulder community respects the intellectual property of others, regardless of the medium by which it is transmitted. This is a cornerstone of academic integrity. We prohibit the use of unauthorized distribution of copyrighted material, which is subject to both civil and criminal penalties as well as university procedures.

Distributing copyrighted materials using peer-to-peer or file-sharing programs is illegal and the university uses technological solutions to deter this activity. Still, the university regularly receives notices of copyright violations and is required by law to take action. Common consequences include loss of network access and referral to the Office of Judicial Affairs. Guidance on campus fair use and copyright issues is provided on the University Libraries (http://www.colorado.edu/libraries/copyright-information/) website.

**Diversity & Nondiscrimination**

**Commitment to Diversity**

The Division of Student Affairs supports and contributes to creating and sustaining a diverse, multicultural, socially just and inclusive campus climate by learning about, recognizing and honoring the diverse backgrounds, histories, identities and life experiences of all our students, faculty and staff. Our goal is to create an environment in which all campus community members can thrive while feeling welcomed, safe and at home.

At the University of Colorado Boulder we are committed to building a campus community in which diversity is a fundamental value. People are different and the differences among us are what we call diversity—a natural and enriching hallmark of life. Diversity includes, but is not limited to, ethnicity, race, gender, age, class, sexual orientation, religion, disability, veteran status, gender identity/expression, veteran status, political affiliation or political philosophy and health status. A climate of healthy diversity is one in which people value individual and group differences, respect the perspectives of others and communicate openly.

"Diversity is a key to inclusive excellence in education. A diverse learning environment better prepares all students for the world that awaits them. CU Boulder is committed to enriching the lives of our students, faculty and staff by providing a diverse campus where the exchange of ideas, knowledge and perspectives is an active part of learning."—from the Guidelines for Diversity Planning (https://www.colorado.edu/odece/diversity-plan/).

**Nondiscrimination Statement**

The University of Colorado Boulder does not discriminate on the basis of race, color, national origin, sex, pregnancy, age, disability, creed, religion, sexual orientation, gender identity, gender expression, veteran status, political affiliation or political philosophy in admission and access to, and treatment and employment in, its educational programs and activities. The university takes affirmative action to increase ethnic, cultural, and gender diversity; to employ qualified disabled individuals; and to provide equal access and opportunity to all students and employees.

**Equity & Compliance**

The University of Colorado Boulder is committed to maintaining a positive learning, working, and living environment free from discrimination and harassment. The Office of Institutional Equity and Compliance (OIEC) (http://www.colorado.edu/oiec/) addresses all claims of sexual misconduct, harassment and/or discrimination, or related retaliation by students, staff or faculty pursuant to the University of Colorado Sexual Misconduct, Intimate Partner Abuse and Stalking Policy, the University of Colorado Boulder Policy on Protected-Class Discrimination and Harassment, and the University of Colorado Boulder Policy on Conflict of Interest in Cases of Amorous Relationships. The university is committed to addressing concerns and taking appropriate action against those found in violation of these policies.

In response to a report, OIEC determines what immediate and long-term support and safety measures are needed in order to minimize disruptions to education or employment and to help keep the involved parties and the campus safe. OIEC also offers education and assessment to identify areas in need of improvement and foster a more welcoming campus culture.

To learn more about university policy or the role and programs offered by OIEC, please visit the Office of Institutional Equity and Compliance (https://www.colorado.edu/oiec/) website or call 303-492-2127.

**Colleges, Schools & Programs**

**Arts & Sciences**

The College of Arts & Sciences is the liberal arts college at CU Boulder. Its mission is to provide an outstanding liberal arts education for its undergraduates, cutting-edge graduate education and world-class research, scholarship and creative work. In addition to gaining the knowledge and skills of their areas of study, students learn how new information is acquired and can participate in original research and creative work with individual faculty members.
The college offers a wide variety of fields of study, with nearly 50 undergraduate majors. The environment and advantages of a small liberal arts college are created through "academic neighborhoods" in which students can meet and interact with other students and faculty in small group settings. In addition, more than 60 percent of undergraduate classes are small, with 25 or fewer students.

As the liberal arts college of CU Boulder, the College of Arts and Sciences has several goals in the education of its students:

- Educate citizens who can think for themselves, understand the rapidly changing world and make wise choices within a democratic system.
- Impart a love of learning so that students can continue to grow throughout life.
- Teach ways of thinking about and approaching new problems. For some students, this will enable them to further advance knowledge and scholarship in the academy. For all students, this is important for enriching their lives.
- Prepare students to help enrich the lives of others. Arts and sciences graduates become lifelong resources for their families, neighbors, friends and co-workers.
- Provide students with a well-rounded education. Arts and sciences students acquire a broad knowledge and an integrated understanding of art and music, great literary works, philosophy, history and politics, the social world, science and technology. They learn how to critically evaluate and think about morals, ethics and values. The General Education requirements give students a broad, liberal-arts education that develops the whole person, not just the specialist.
- Educate students for careers and a productive life. Arts and sciences students gain the most current knowledge and skills in their major fields of study. In addition, they learn how to acquire new skills to contend with-and lead-the changes that will occur in the decades to come. Education for a productive life also requires that students learn how to analyze situations, solve problems and speak and write effectively.

The college is also dedicated to outstanding graduate education. Advanced degrees are offered by nearly every academic department in the college, and the PhD is offered in approximately 30 different disciplines. In addition, an increasing number of departments offer combined bachelor's/master's degrees that can be earned in five years. Graduate training focuses on teaching and research careers as well as on professional careers in the public and private sector.

The strength of the College of Arts and Sciences comes from its outstanding faculty. In addition to being dedicated teachers, they are active scholars in disciplines throughout the arts and humanities, social and behavioral sciences, biological sciences and physical and mathematical sciences. They are the recipients of numerous national awards and honors for their research, scholarship and creative work. Faculty and staff of the College of Arts and Sciences join together to create an intellectual community of students and scholars to discover, critically examine, integrate, preserve and transmit knowledge, wisdom and values.

**Arts and Sciences Honors Program**

The Arts and Sciences Honors Program provides a community for highly motivated and academically prepared undergraduate students and offers opportunities for intellectual engagement through honors courses, academic-inspired events, and honors thesis research and creative work.

The Honors Program is a program of excellence in which the best teaching faculty are committed to serving the most highly motivated students. The Honors Program offers the opportunity to work closely with faculty, to engage with other honors students (http://www.colorado.edu/honors/community/) and to write an honors thesis. Honors offers over 50 courses per year (http://www.colorado.edu/honors/courses/) in a wide variety of areas. Honors courses are limited to a maximum enrollment of 17 students.

Incoming first-year students and transfer students are invited to participate (http://www.colorado.edu/honors/admission/) in the Honors Program based on multiple criteria that are set by the Office of Admissions. Currently enrolled students are eligible based on their academic achievement at CU Boulder and are expected to have a 3.3 GPA or better.

Latin honors (http://www.colorado.edu/honors/graduation/) in the College of Arts and Sciences are conferred by the Honors Program. Students who wish to graduate *cum laude*, *magna cum laude* or *summa cum laude* must write and defend an honors thesis and maintain a certain GPA. Most students pursue Latin honors in their major (based on departmental requirements), but students may also pursue General Honors (http://www.colorado.edu/honors/generalhonors/) via the Honors Program, providing students the opportunity to write an interdisciplinary thesis.

The Honors Residential Academic Program (Honors RAP (http://www.colorado.edu/hrap/)) is the optional residential component of the program. Honors RAP is open to a limited number of qualified incoming and continuing students. Students engage in small classes and co-curricular activities, forming an academic community in their residence hall.

**Faculty**

Chadwick, Jeffrey  
Instructor; PhD, Purdue University

Fischer, Kate (https://experts.colorado.edu/display/fisid_155474/)  
Instructor; PhD, University of Colorado Boulder

Hatch, Alison  
Instructor; PhD, University of Colorado Boulder

Hickcox, Abby Lynn (https://experts.colorado.edu/display/fisid_151860/)  
Senior Instructor, Associate Faculty Director; PhD, University of Colorado Boulder

Jacobs, Janet L. (https://experts.colorado.edu/display/fisid_100744/)  
Director; PhD, University of Colorado Boulder

Schwartz, Jennifer  
Instructor; PhD, Emory University

**Miramontes Arts and Sciences Program**

The Miramontes Arts and Sciences Program (MASP) is a community of diverse scholars dedicated to academic achievement. MASP accepts highly motivated students with strong academic records who are also members of traditionally underrepresented groups and/or are first-generation college students. MASP supports students through mentoring, instruction, skills workshops, enrichment opportunities, community activities and participation scholarships.

For most members of MASP, support begins the summer before freshman year with the Program for Excellence in Academics and Community...
Specific admission requirements are detailed in the majors) granting major by the start of the second semester (or earlier for certain for the four-year guarantee, students must declare and enter a degree-program by the time they have completed 60 credit hours. To maintain eligibility Open Option majors are required to enter a specific degree program by in the college or they may enter the college as "Arts and Sciences Open " major (when they are sure of their college choice but are unsure about their major). To ensure that students graduate in a timely manner, Open Option majors are required to enter a specific degree program by the time they have completed 60 credit hours. To maintain eligibility for the four-year guarantee, students must declare and enter a degree-granting major by the start of the second semester (or earlier for certain majors)

Specific admission requirements are detailed in the Admissions (https://catalog.colorado.edu/undergraduate/admissions/) section of this catalog. Contact the campus Admissions Office (http://www.colorado.edu/admissions/) for more information.

Transfer Students
Students desiring to transfer (https://www.colorado.edu/artsandsciences/student-resources/transfer-students/) from other accredited collegiate institutions are considered for admission on an individual basis. To earn a degree from the College of Arts and Sciences at CU Boulder, transfer students, like all other Arts and Sciences students, must complete at least 45 credit hours at CU, at least 30 upper-division credit hours in College of Arts and Sciences coursework, and at least 12 upper-division credit hours in their major at CU Boulder. Admission criteria for students transferring from the other University of Colorado campuses are the same as for other transfer students.

Intra-University Transfer (IUT)
Students from another school or college on the CU Boulder campus or the Program in Exploratory Studies, who wish to transfer into the College of Arts and Sciences must meet the following minimum requirements.

Minimum requirements to apply to IUT into the College of Arts and Sciences:

- 24 credit hours completed, at least 12 at CU Boulder
- CU GPA of at least 2.0

Students may apply to IUT when they have 24 credit hours completed and/or in-progress. Students who apply to IUT must choose a degree-granting major offered by the college. A student cannot IUT into Arts and Sciences and declare an Open Option major.

During their first term at CU Boulder, new students may IUT into Arts and Sciences without meeting the above requirements if they apply before the term census date, which is the Friday of the third week of the term during the fall and spring semesters.

Students should contact an academic advisor in their intended major (https://www.colorado.edu/artssciences-advising/team/) for additional information about the IUT process.

Readmission
Students who have not been active at CU Boulder for 3 or more semesters including suspended students who have been reinstated, may need to apply for readmission to the University of Colorado Boulder through the Admissions Office. Students are encouraged to submit readmission requests well in advance of the semester for which they plan to return.

Minimum Academic Preparation Standards (MAPS)
All students entering the University of Colorado who finished high school in the spring of 1988 or after must meet minimum academic preparation standards (MAPS) specified by each school or college. The College of Arts and Sciences has adopted the following standards for students. These standards are defined in high school units; a unit is one full year of high school coursework:

- English: 4 (includes 2 of composition)
- Mathematics: 4 (includes at least 2 of algebra, 1 of geometry and 1 of college preparatory math such as trigonometry, analytic geometry or elementary functions)
- Natural science: 3 (includes 2 of lab science, 1 of which must be either chemistry or physics)
- Social science: 3 (includes 1 of U.S. or world history and 1 of geography; if U.S. history is used to meet the history requirement, the geography requirement may be met with 1/2 unit of geography and 1/2 unit of world history)
- Single foreign language: 3
- Total credit units: 17

For additional information, see the Admissions (https://catalog.colorado.edu/undergraduate/admissions/) and MAPS (https://catalog.colorado.edu/undergraduate/admissions/minimum-academic-preparation-standards/) sections of this catalog.

Credit by Examination
Advanced Placement Program
CU Boulder participates in the Advanced Placement program of the College Board. General college credit is granted for scores of 3 or higher on most AP exams, but credit for specific CU Boulder courses usually requires a score of 4 or in a few cases a score of 5. Official scores must be sent to the Admissions Office directly from the College Board for both first-year students and transfer students. See Undergraduate Admission (https://catalog.colorado.edu/undergraduate/admissions/) for more info and the Advanced Placement
Table (https://catalog.colorado.edu/undergraduate/admissions/credit-examination/) for specific equivalencies.

**International Baccalaureate**
Any student admitted to a University of Colorado campus after June 30, 2003, who has graduated from high school having successfully completed an International Baccalaureate (IB) diploma, program will be granted 24 credit hours of college credit. No tuition will be charged for these credits. These credits will be granted, however, only if the student receives a score of 4 or better on an examination administered as part of the IB diploma program. Students admitted to the College of Arts and Sciences for the Fall 2018 semester or thereafter with an IB diploma will be waivered from the Lower-Division Written Communication portion of the college’s General Education Skills Requirement.

In addition, CU Boulder grants specific course credit for International Baccalaureate examinations at the higher level with a score of 4 or better and general college credit for examinations at the standard level with a score of 4. For specific equivalencies see the International Baccalaureate (IB) Credit Table (https://catalog.colorado.edu/undergraduate/admissions/credit-examination/internationalbaccalaureatebcredittext).

**College-Level Examination Program (CLEP)**
CU Boulder grants credit for most, but not all, CLEP subject examinations. In the College of Arts and Sciences the credit earned by passing most CLEP examinations may be used to fulfill General Education requirements and to make up for deficiencies in the minimum academic preparation standards (MAPS) but not to fulfill major requirements. Credits from a CLEP exam may not be used to fulfill any of the college’s residency requirements. For specific equivalencies see the College Level Examination Program Table (p. 38). CU Boulder’s Testing Services (https://www.colorado.edu/career/testing-services/) administers all CLEP examinations.

**DSST Examinations**
CU Boulder grants credit for many, but not all, DSST subject examinations. In the College of Arts and Sciences the credit earned by passing most DSST examinations may be used to fulfill General Education requirements and to make up for deficiencies in the minimum academic preparation standards (MAPS) but not to fulfill major requirements. Credits from a DSST exam may not be used to fulfill any of the college’s residency requirements. For specific equivalencies see the DSST Examinations Table (p. 40). CU Boulder’s Testing Services (https://www.colorado.edu/career/testing-services/) does not offer DSST examinations, which are usually taken by activity duty members of the United States Armed Forces.

**Transfer Credit Policies**

**Transfer of credit from other institutions of higher education**
Work from another accredited institution of higher education that has been completed with a grade of C- (1.70) or better may be transferred to the University of Colorado. Categories of transfer coursework not accepted by the university are described in the undergraduate Transfer of College-Level Credit (https://catalog.colorado.edu/undergraduate/admissions/transfer-college-level-credit/) section.

All courses transferred from junior and community colleges carry lower-division credit. Courses transferred from four-year institutions carry credits at the level at which they were taught at the previous institution, but, if the level at the sending institution is unclear, courses will be reviewed on a course-by-course basis. Upper-division courses from another four-year institution sometimes will transfer to CU Boulder as lower-division credit while lower-division courses will always carry lower-division credit even if they are allowed to fill a requirement usually filled by an upper-division course at CU Boulder.

**Colorado Student Bill of Rights**
In the interests of promoting timely graduation and facilitating the transfer of students among the institutions of higher education in the state of Colorado, the College of Arts and Sciences and the University of Colorado Boulder adhere to the Student Bill of Rights as presented in Colorado Statute 23-1-125.

**Statewide Guaranteed Transfer of General Education Courses**
As of fall 2003, the two-year and four-year transfer articulation agreements among Colorado institutions of higher education were replaced by a statewide guaranteed transfer of approved general education courses taken at any Colorado public institution of higher education. Under the statewide guaranteed transfer program (gtPathways), up to 31-33 credits of successfully (C- or better) completed coursework will automatically transfer and apply towards the general education requirements at the receiving institution. The coursework must be drawn from the list of approved gtPathways courses and must meet the distribution requirements of the guaranteed transfer program. Further information about the statewide transfer program, including the list of approved courses and distribution requirements, can be found on the Colorado Department of Higher Education (https://highered.colorado.gov/Academics/Transfers/Students.html) website.

As of fall 2018, a student graduating with an associate of arts or an associate of science degree from a Colorado community college and entering the College of Arts and Sciences is exempt from the General Education requirements of the College. Note that students are still
subject to the College’s MAPS requirements. Additional information on the evaluation of transfer credit of Colorado community college coursework and its application in select arts and sciences major programs can also be found at the College of Arts & Sciences Guide for Colorado Community College Students (https://www.colorado.edu/artsandsciences/student-resources/transfer-students/guide-colorado-community-college-students/) webpage. Students are required to follow the graduation requirements listed in this catalog at the time of their initial entry into the College of Arts and Sciences.

Concurrent College Credits Earned While in High School
Students who took college-level courses while enrolled in high school may be able to transfer the credit to CU Boulder. Only courses taken at an accredited college or university of recognized standing with grades of C- or better are accepted for transfer. If a student earned concurrent college credit for a high school course for which the student also earned college credit via an Advanced Placement (AP) or International Baccalaureate (IB) exam, the concurrent college credit will be cut back in favor of the credit earned for the score on the AP or IB exam.

Students should be prepared to provide syllabi for any and all concurrent college credit they earned while in high school. Such syllabi should be nearly identical to those used on campus at the accredited college or university granting the concurrent credit.

Requirements
Students are subject to the general degree requirements in effect at the time they first enter the College of Arts and Sciences at CU Boulder and are subject to the major requirements in force at the time they declare the major. All degrees offered by the College of Arts and Science require the completion of a specific number of credits, a major, and the General Education (Gen Ed) curriculum.

Students must complete a degree within 10 years. If it has been more than 10 years since matriculation into the College of Arts and Sciences and no degree has been completed, students may be subject to new curricula in place at the time of re-enrollment.

Students may contact the Arts and Sciences Academic Advising Center for further assistance.

Graduation Requirements
Arts and sciences students must fulfill the following requirements for graduation:

• Pass a total of 120 credit hours.
• Maintain a 2.00 (C) GPA in all University of Colorado coursework and a 2.00 (C) in all coursework attempted for the major. (Some majors may require a higher minimum GPA.)
• Pass 45 credit hours of upper-division work (courses numbered in the 3000s and 4000s).
• Arts and sciences students must complete a minimum of 45 credit hours in University of Colorado courses on the Boulder campus. Of these 45 credit hours, a minimum of 30 credit hours must be in upper-division courses offered by a department in the College of Arts and Sciences. A maximum of 6 credit hours taken at other University of Colorado campuses (CU Denver and UCCS) can be counted toward the minimum 45 credit hours required on the Boulder campus but cannot be counted toward the 30 upper-division credit hours in arts and sciences coursework. Courses taken while on CU Boulder study abroad programs or through CU Boulder Continuing Education are considered to be in residence.
• For the Bachelor of Arts degree, students must complete a minimum of 75 credit hours outside their major department. Students who complete designated departmental honors courses in their major department and/or in honors thesis credit can reduce the 75 credit hours required outside the major department by a corresponding number of credits, up to a maximum of 6.
• For the Bachelor of Fine Arts degree, students must complete a minimum of 53 credit hours outside of their major.
• Students must complete a major offered by the College of Arts and Sciences. Students are subject to the major requirements in force when they declare the major.
• Complete the General Education (Gen Ed) and Minimum Academic Preparation Standards (MAPS) requirements with the following limitations:
  • Students may not use a course to fulfill any area of the Gen Ed Skills requirement and also use this course to fulfill part of the Gen Ed Distribution or Diversity requirements. This restriction applies to first- and second-semester foreign language courses taken as prerequisites to a third-semester language course that satisfies the Foreign Language area of the Skills Requirement.
  • Students may not use thesis hours, independent study, internship, or practicum courses to satisfy any of the Gen Ed or MAPS requirements.
  • A single course may be used to meet both MAPS and Gen Ed requirements as long as the course is applicable to both requirements. For example, a student admitted with a MAPS deficiency in English composition may take WRTG 1150 (https://catalog.colorado.edu/search/?P=WRTG%201150), to satisfy both the MAPS requirement and the Gen Ed lower-division Written Communication Skills requirement.
  • Students may not use a course taken using the pass/fail option to fulfill any Gen Ed or MAPS requirements.

Credit Limitations
Credit for Foreign Language Courses
Students will not receive credit for a lower level Foreign Language course after credit has been given for a higher level course in the same sequence. For example, students who have passed a 2000-level class will not receive credit for a 1000-level class in the same sequence. Consult each foreign language department for specific restrictions, requirements and prerequisites.

Students must receive a grade of C or better to enroll in the next level of a language sequence in Arabic, Chinese, Farsi, Hindi, Indonesian, Japanese and Korean. Students must receive a grade of C- or better to enroll in the next level of a language sequence in American Sign Language, Danish, Finnish, French, German, Greek, Hebrew, Italian, Latin, Norwegian, Portuguese, Russian, Spanish and Swedish.

Introductory language courses (numbered at the 1000 and 2000 level) are designed for non-native speakers. Fluent speakers of a language are prohibited from enrolling in introductory courses in the language and can be dropped from these courses by the department or by the course instructor. Fluent speakers should consult the department website and this catalog or consult with the course instructor or department language coordinator about eligibility to enroll in upper-division language courses (numbered at the 3000 and 4000 level) before enrolling in such courses.
Departments can exclude fluent speakers from upper-division language courses based on course content and/or instructional resources. Students who have not formally studied the language but have spoken the language in their home should consult with the associate chair of the language department or the department language coordinator about appropriate placement before enrolling in a language course.

**Credit taken in CU Online Courses**
A maximum of 30 credit hours of online coursework offered by CU Boulder may count toward the degree.

**Credit taken outside the College of Arts and Sciences**
Students may apply 30 credit hours from the other colleges and schools at CU Boulder as well as specified ROTC and President’s Leadership Class courses toward the fulfillment of requirements for the BA and BFA degrees. Within these 30 total credit hours, up to 8 credit hours in activities courses (applied music and ensembles) may be used. Transferred courses that were taught by departments considered to be outside the College of Arts and Sciences are counted as part of the allowed 30 credit hours. If a course has been approved to meet a General Education requirement and the course is taught outside the College of Arts and Sciences, the credit for this course will not be included as part of the 30-semester hour limitation.

**Independent Study Credit**
With departmental approval, students may register for independent study during the normal registration periods for each semester. Students may not register for more than 6 credit hours of independent study credit during any term. No more than 8 credit hours of independent study taken in a single department or program can be applied toward the total credit hours needed for graduation. A maximum of 16 credit hours of independent study may count toward the degree. The minimum expectation for each hour of credit is 25 hours of work.

A student may not use independent study credit to fulfill the college’s General Education requirements. Some departments further restrict the use of independent study hours toward meeting major requirements.

**Internship Credit**
Students in the College of Arts and Sciences may receive up to nine credit hours for a department-sponsored internship. A maximum of six of the nine internship credits can be taken in the same department. Each internship project must be approved by the chair or associate chair of the department awarding the credit before the student enrolls in the course in order for the student to receive credit. Students are encouraged to contact their major department office or Career Services for information regarding the possibility of enrolling in an internship in their major. Many internships are graded on a pass/fail basis. Participation in an internship with mandatory pass/fail grading does not affect the total credit hours of pass/fail a student may apply toward a degree.

A student may not use internship credit to fulfill the college’s General Education requirements. Some departments further restrict the use of internship credit toward meeting major requirements.

**Pass/Fail Credit**
Students in the College of Arts and Sciences can count a maximum of 6 credit hours of pass/fail coursework toward the 120 credit hours required for graduation. Courses offered on a mandatory pass/fail basis are excluded from the maximum allowed. The pass/fail option may be used only in classes taken as free electives.

Students may not use the pass/fail option for courses taken to fulfill General Education requirements, courses used to fulfill the Minimum Academic Preparation Standards (MAPS), courses used to complete minor requirements or courses used to complete the minimum requirements for the major. A grade of F when earned in a course taken pass/fail will calculate into the GPA as a failing grade.

**Required Credit Hours Outside the Major**
To complete the BA degree, students are required to complete a minimum of 75 credit hours outside their major department. Exceptions are:

- Students who complete designated departmental honors courses in their major and/or in honors thesis credit can reduce the 75 credit hours required outside the major department by a corresponding number of credits, up to a maximum of six.
- Students completing the bachelor of fine arts degree must complete a minimum of 53 credit hours outside of their major department.
- Courses that are cross-listed in two or more departments are credited in the department in which the student has the most credit hours, irrespective of the department in which the student formally enrolled for the course.

**Credit from Repeated Courses**
Students can take a course more than once. In fact, in Arts and Sciences there is no limit on how many times a student make repeat a course. However, the course credit hours only count toward the credit hours needed to graduate once, unless a course description specifically states that a course can be taken more than once for credit. Such repeatable courses, usually topics courses, have a limit to how many times you may receive credit for that course.

**ROTC Credit**
The ROTC courses listed below have been certified as acceptable college-level coursework by the faculty of the College of Arts and Sciences or by other colleges and schools on the Boulder campus. These courses are counted as elective credit toward the degree, subject to the 30-credit-hour limitation on coursework taken outside the college for students in the BA and BFA programs. ROTC courses that do not appear on this list do not count toward any degree requirements in the College of Arts and Sciences. Transfer ROTC coursework must be evaluated as equivalent to coursework on this list to count toward degree requirements.

The following minimum requirements are specified by the college. In many cases departmental requirements may be higher than the minimums listed here.

- A minimum of 30 credit hours in the major area for a BA or a minimum of 50 credit hours in the major area for a BFA.
- A minimum of 18 credit hours of upper-division courses in the major area.
- A minimum of 12 credit hours of upper-division coursework in the major taken on the CU Boulder campus.
- All coursework applied to the major must be completed with a grade of C- or better (no pass/fail work may be applied).
- The GPA for all coursework attempted in the major department must be equal to 2.00 (C) or higher.
- Special requirements as stipulated by the major department.
- No more than 8 credit hours of independent study.

Double Majors
Students pursuing a BA or BFA degree in the College of Arts and Sciences may graduate with more than one major within the degree from CU Boulder (i.e., Economics and French or Dance and Art Practices). Students must complete all requirements for both majors. A minimum of 120 total credit hours is required for double majors within the college.

Students pursuing both a BA major and a BFA major are considered dual degree rather than double major students (see below). A student is allowed to add a major to an existing degree from the College of Arts and Science provided that the additional major is in the same degree as the existing degree. For example, a History major (BA), could be added to an existing degree from the College of Arts and Sciences.

Minors
Most but not all departments and programs in the College of Arts and Sciences offer minor programs. Participation in a minor program is optional for students pursuing a bachelor's degree. Students may not earn a major and a minor in the same program of study. All requirements for the minor must be completed by the time the BA or BFA is conferred, and a minor cannot be converted into a major in the same program of study after graduation.

Although the structure of specific minor programs may differ, all minors offered in the College of Arts of Sciences must have the following restrictions or minimum requirements:

- A minimum of 18 credit hours must be taken in the minor area.
- A minimum of 9 of the 18 credit hours must be completed at the upper-division level.
- All coursework applied to the minor must be completed with a grade of C- or better (no pass/fail work may be applied).
- The GPA for all coursework attempted in the minor department must be equal to 2.00 (C) or higher.
- Students pursuing a major in distributed studies or an individually structured major are not eligible to earn a minor.
- Students are allowed to apply no more than 9 credit hours, including 6 upper-division credit hours, of transfer work toward a minor.
- Students must complete all requirements for a minor by the time they graduate.

Certificates
The college also sponsors undergraduate certificates in a number of fields of study. Although similar to minors in the required number of credit hours, certificates have a substantially different focus and purpose from a minor in that they are interdisciplinary in nature and thus require the completion of courses in multiple departments instead of just one. Students interested in a certificate should contact the director of the appropriate certificate.

Although the structure of specific certificates may differ, all certificates offered in the College of Arts of Sciences must have the following restrictions or minimum requirements:

- A certificate cannot be a subset of existing major or minor requirements in the same way a student cannot earn a minor within the same department as their major.
- A minimum of 18 credit hours of specified coursework within the College of Arts and Sciences.
- A minimum of 9 of the 18 credit hours must be completed at the upper-division level.
- A minimum of 12 credit hours must be take on the CU Boulder campus.
- A maximum of 6 semester credit hours from other institutions will be accepted.

Multiple Degrees
Dual Degrees
Students may earn multiple degrees from CU Boulder from different schools or colleges or within a single school or college. This includes students pursuing a BA and BFA from the College of Arts and Sciences. The following conditions must be fulfilled:

- The student meets the residency requirements of, and is enrolled in, both the College of Arts and Sciences and the college or school granting the second degree.
- The student completes a minimum of 145 credit hours when both degrees are offered within the College of Arts and Sciences.
- The student completes all requirements for both degrees when the degrees are offered by two different colleges.
• The student has completed all MAPS, General Education, and major requirements of the College of Arts and Sciences.
• Both degrees must be awarded at the same time.

Second Baccalaureate Degrees
A student who has been awarded a baccalaureate degree, either from the College of Arts and Sciences or elsewhere, may be granted a second baccalaureate degree provided the following conditions have been fulfilled:

• All general requirements for the degree to be awarded by the College of Arts and Sciences have been met. (Students are subject to the general degree requirements in effect the semester they enter the second baccalaureate degree program.)
• The subject of the major is different from the subject of the major or minor in the first baccalaureate degree earned.
• Arts and sciences students must complete a minimum of 45 credit hours in University of Colorado Boulder courses after matriculation in the second baccalaureate degree program. Of these 45 post-matriculation credit hours, a minimum of 30 credit hours must be in upper-division courses offered by a department in the College of Arts and Sciences, and at least 12 of these 30 upper-division credit hours must be in major coursework. Courses taken as a non-degree student or as part of a graduate degree program do not count in these minimum credit hour requirements.

Applying for Graduation
Arts and Sciences students who have earned 90 or more credit hours and wish to walk in a commencement ceremony and/or graduate at the close of a term must submit an online application to graduate in Buff Portal (https://buffportal.colorado.edu/), meeting all appropriate application deadlines published by the Office of the Registrar.

Students who intend to complete their degree in summer (August) and want their name to appear in the spring (May) commencement program should apply online for the summer graduation term, submitting their application prior to the published spring commencement program deadline. Summer applicants who apply prior to the spring program deadline will automatically be included in the spring commencement program.

Students who apply to graduate but fail to fulfill all degree requirements by the deadline for that term/year must submit a new online graduation application for a future term/year in order for the college to confer the degree once all remaining requirements are complete. To be certified as having completed all degree and major/minor requirements, all credit hours and grades (including transfer coursework and Continuing Education credit hours and grades) must be posted to the student records system by the deadline for reporting degrees for that term/year.

Four-Year Graduation
CU Boulder guarantees that if the scheduling of essential courses is found to have prevented a student in the College of Arts and Sciences from completing all coursework necessary for a BA or BFA degree from the university by the end of the student’s eighth consecutive fall and spring semester, the college will provide tuition plus any course fees for all courses required for completion of the degree requirements. (Students are subject to the requirements of the College of Arts and Sciences. This guarantee extends to all students who enrolled the summer of 1994 or after into the College of Arts and Sciences as first-semester freshmen without MAPS deficiencies and who satisfy all the requirements described below. This guarantee cannot be extended to include completion of a second major, a double degree, a minor, a teaching certificate or other certificate program. Some CU Boulder study abroad programs may not provide a sufficient range of courses to allow students to meet the requirements and thus students who participate in study abroad are not included in this guarantee.

Four-Year Guarantee Requirements
• Students should enroll in University of Colorado Boulder coursework for eight consecutive fall and spring semesters.
• No fewer than 60 credit hours of applicable coursework should be completed with passing grades by the end of the second year (24 calendar months), 90 credit hours by the end of the third year (36 calendar months) and 120 credit hours by the end of the fourth year. Students should enroll in and pass an average of 15 credit hours each semester.
• A minimum of 30 credit hours of college General Education courses should be completed by the end of the second year, including General Education courses that also meet major requirements. All remaining college General Education requirements must be fulfilled by the end of the eighth semester.
• Students should complete 45 upper-division credit hours by the end of the eighth semester of study.
• A GPA of at least 2.00 must be earned each semester.
• Grades of C- or better in all coursework required for the major should be earned, and students should have a cumulative GPA of 2.00 in all major coursework attempted.
• A recommended plan of study must be started toward the major no later than the start of the second semester of study and thereafter students must make adequate progress toward completing the major (defined by each major). A statement of adequate progress is available from the major or departmental office at the time the major is declared.
• The major must be declared no later than the start of the second semester of study, and students must remain in that major until graduation.
• Students should meet with their assigned primary advisor each semester.
• Students must register each semester within one week of the assigned registration time.
• Students should avoid taking courses that are in conflict with the advice of their assigned primary advisor.
• Students should adhere to the Graduation Requirements listed above.
• Courses in conflict with major or college General Education requirements should be avoided.
• The student should apply online to graduate no later than the beginning of the seventh semester of study (see Graduation Deadlines section).
• Documentation should be kept proving that these requirements were satisfied (e.g., records of advising meetings attended, advising records and instructions, etc.).

Academic Advising
Students are advised by the professional academic advisors in the Arts and Sciences Academic Advising Center (https://www.colorado.edu/advising/) and by faculty mentors from their respective major
department/program, typically at least once a semester. Students use MyCUHub (http://www.colorado.edu/mycuhub/) to communicate with advisors, schedule appointments, explore majors, etc. Academic advisors are responsible for advising students and also for certifying the completion of those students’ programs for graduation.

Students in the college are expected to assume responsibility for planning their academic program in conjunction with their academic advisor in accordance with college rules and policies and with departmental major requirements. Any questions concerning these provisions are to be directed to the student’s academic advisor.

General Education & Core Requirements

General Education

Note: All students pursuing a bachelor’s degree in the College of Arts and Science who entered the college in fall 2018 or thereafter must complete the General Education requirements. Students who entered the college before fall 2018 have the option to complete either the General Education requirements or the old Core Curriculum (see below).

Mission Statement

The College of Arts and Sciences (A&S) General Education (Gen Ed) requirements are the heart of a liberal arts education at CU Boulder. This set of requirements allows students to pursue their passions while also ensuring that they venture into diverse areas of learning. The flexibility of the Gen Ed requirements enables students to explore areas of particular interest in depth, and in so doing facilitates the addition of minors or second majors. The Gen Ed requirements are straightforward, streamlined, rigorous and timeless; as society changes and technology advances, the courses of study that comprise these requirements will evolve naturally within the Gen Ed framework. These requirements reflect the Arts and Sciences identity and learning goals.

Identity Statement

The College of Arts and Sciences at CU Boulder consists of teachers, scholars, researchers and artists who strive to understand, and find meaning in, the natural world, social structures, history, art, morals and the human experience. The college comprises a wide range of departments and programs, but woven throughout are the college’s fundamental values: academic excellence, intellectual honesty, creative freedom, open inquiry and the pursuit of knowledge. We are dedicated to a pedagogy that recognizes our responsibility in developing a diverse community of students and scholars. Our students can expect to have their critical thinking skills honed, their understanding of themselves deepened, their vision of the natural world and its peoples expanded, and their ability to communicate enhanced. As a result, our graduates leave the college as well-rounded adults, prepared to participate productively as citizens in a democracy and to flourish in their careers.

Learning Goals

1: Develop the skills of communication, expression, and reasoning.

Students hone their communication skills through writing and speaking for various purposes (informing, instructing, persuading) and audiences (academic, civic, professional). They learn to design their message ethically and effectively using appropriate evidence and technologies, which may include alphabetic, visual, and aural elements. Students explore the breadth of human experience through diverse expressive forms. To develop problem-solving and analytical skills, students exercise various forms of reasoning—logical, computational and mathematical.

2: Understand our world, in all its dimensions, through critical inquiry.

Students apply humanistic and scientific principles and methods to investigate local and global issues. Through exposure to multiple viewpoints, intellectual frameworks, and cultural contexts, students prepare to respond ethically, creatively, and collaboratively to open-ended questions.

Overview

The Arts and Sciences General Education curriculum consists of 45 credits in three basic categories of requirements: skills, distribution and diversity.

• Skills requirement: 9 credits (6 written communication, 3 quantitative reasoning and mathematical skills, plus foreign language proficiency). Courses taken to fulfill this requirement may not also count toward the distribution or diversity requirements.
• Distribution requirement: 36 credits (12 arts and humanities, 12 social sciences, 12 natural sciences).
• Diversity requirement: 0–6 credits. Courses taken to fulfill this requirement may also count toward the Distribution Requirement.

Policies

Students who take approved CU Boulder coursework to fulfill their Gen Ed requirements must take those courses for a letter grade and receive a grade of D- or higher. Students may not use thesis hours, independent study, internship or practicum courses to fill any of the Gen Ed requirements. All courses approved to fulfill specific Arts and Sciences Gen Ed requirements are identified as such in this catalog and are searchable in the CU Boulder Class Search tool.

Skills Requirement

This requirement is designed to assure that each student has attained a minimum level of competency in foreign language, quantitative reasoning & mathematical skills, and written communication. Students may not use a course to fulfill any area of the Skills requirement and also use this course to fulfill part of the Distribution or Diversity requirements. This restriction applies to first- and second-semester foreign language courses taken as prerequisites to a third-semester language course that is satisfying the Foreign Language area of this requirement.

1. Foreign Language (third-level proficiency)

All students are required to demonstrate, while in high school, third-level proficiency in a single modern or classical foreign language. Students who have not met this requirement at the time of matriculation will have a MAPS deficiency. They may make up the deficiency and fill this Gen Ed requirement by passing an appropriate third-semester college course that is part of a three-course sequence of at least 12 semester credit hours or by passing a CU-Boulder approved proficiency examination.

The goal of the language requirement is to encourage students to examine the formal and semantic structure of another language, significant and difficult works in that language, and one or more aspects of the culture lived in that language. This enables students to understand their own language and culture better, analyze texts more clearly and effectively, and appreciate more vividly the dangers and limitations of using a translated document. The language requirement concentrates on reading, although in some languages other abilities may be emphasized as well. Understanding what it means to read a significant text in its original language is essential for a liberal education according to the standards of this university.
Students who are subject to the General Education requirements, but not subject to MAPS, must complete the Foreign Language Gen Ed Skills requirement to meet degree requirements.

2. Quantitative Reasoning and Mathematical Skills (QRMS) (3–6 credit hours)
This requirement has two principal objectives. The first is to provide students with the analytical tools used in some of their other Gen Ed courses and used in their major areas of study. The second is to help students acquire the reasoning skills necessary to assess adequately the data that will confront them in their daily lives. Students completing this requirement should be able to: construct a logical argument based on the rules of inference; analyze, present, and interpret numerical data; estimate orders of magnitude as well as obtain exact results when appropriate; and apply mathematical methods to solve problems in their university work and in their daily lives.

To fulfill the QRMS Gen Ed Skills requirement, student must:

- Earn credit for one of the approved QRMS courses or sequences of courses
- Earn credit for any 3 credits of mathematics courses numbered MATH 1300 or higher or applied mathematics courses numbered APPM 1350 or higher
- Have Prior Learning Assessment credit (PLA), like AP, IB or CLEP credit, that has been approved to fill QRMS

3. Written Communication (3 lower-division and 3 upper-division credit hours)
Writing is a skill that is fundamental to all intellectual endeavors. In fulfilling this requirement, students hone their communication skills by writing for various purposes (informing, instructing, persuading) and audiences (academic, civic, professional). They learn to design their message ethically and effectively using appropriate evidence and technologies.

Lower-division written communication courses focus on the central rhetorical elements of purpose, audience, and context to help students craft effective writing in a variety of situations. They emphasize the relationships among these elements, including a writer’s choices of content, structure, style and use of language conventions. In addition, courses in this area develop students’ analytical reading skills and introduce them to principles and practices of information literacy.

By the end of a lower-division written communication course, students will:

- Demonstrate their rhetorical knowledge through their writing choices
- Construct effective and ethical arguments
- Analyze texts in a variety of genres
- Refine and reflect on their writing process
- Practice information literacy
- Apply appropriate language conventions, including grammar, spelling, punctuation and format

In upper-division written communication courses, students apply the rhetorical elements of purpose, audience, and context to investigate and practice writing using disciplinary language, forms, and genres. These courses emphasize the application of students’ disciplinary knowledge to a variety of writing situations, adjusting content, format, style and language conventions to accomplish specific purposes and communicate with specific audiences.

By the end of an upper-division written communication course, students will:

- Demonstrate specialized rhetorical knowledge through composing texts in a variety of disciplinary forms and genres for specific audiences and purposes
- Argue persuasively and with evidence, using discipline-specific forms and genres to present ideas and information
- Demonstrate enhanced critical reading skills
- Refine and reflect on their writing process
- Demonstrate specialized information literacy through applying research to disciplinary questions/issues
- Apply language conventions appropriately, including format, documentation, spelling, grammar, and punctuation.

To fulfill the lower-division part of the written communication Gen Ed Skills requirement, students must either:

- Pass a 3-credit course approved as Skills – Lower-Division Written Communication, or
- Earn an International Baccalaureate diploma, or
- Have Prior Learning Assessment credit (PLA), like AP, IB or CLEP credit, that has been approved to fill Skills – Lower-Division Written Communication

To fulfill the upper-division part of this requirement, students must either:

- Pass an upper-division written communication proficiency exam
- Pass a 3-credit course approved as Skills – Upper-Division Written Communication or
- Pass an upper-division written communication proficiency exam

Distribution Requirement
For the distribution requirement, students must pass a minimum of 12 credits in each of the three Arts & Sciences divisions (Arts & Humanities, Social Sciences, and Natural Sciences). At least four different course prefixes must be represented in a student’s distribution requirement coursework. No more than two lower-division (1000- and 2000-level) courses with the same course prefix may count toward the distribution requirement.

As part of, or in addition to, the 12 credits in the natural sciences division, students must meet the natural sciences lab requirement. (One- and 2-credit NS lab courses are excepted from the restriction to two lower-division courses with the same course prefix counting toward the Distribution requirement.)

4. Arts & Humanities (12 credits)
Courses in the arts and the humanities explore the variety of human creative and intellectual experiences, as well as the history and foundations of culture, through the examination of human languages, literatures and other artistic, material, social, cultural, and political products, the forms they have taken in different places and eras, and the way these have changed over time. As a result, these courses cultivate perspectives and intellectual skills necessary to comprehend and respond adeptly to the world in which we live, offering frameworks for thinking critically about the universe and the smaller societies we inhabit. In particular, these courses help students develop the ability to appreciate and evaluate human efforts to explain, translate, and transform their diverse experiences of the world, as these efforts take shape in language, literature, philosophical systems, historical contexts, religious experience, material culture, images, sounds and performances.
The Arts & Humanities Gen Ed Distribution requirement is meant to ensure that students:

- Understand the evolving state of knowledge in at least one scientific discipline
- Gain experience in scientific observation and measurement, in organizing and quantifying results, in drawing conclusions from data, and in understanding the uncertainties and limitations of the results
- Learn sufficient general scientific vocabulary and methodology to acquire additional information, evaluate it critically and make informed decisions

Laboratory or Field Experience: The Laboratory or Field Experience requirement is satisfied with a stand-alone lab of at least one credit, or another course with a substantial lab component, as approved by the Natural Sciences division. The lab requirement is broadly defined to include different types of hands-on learning, including—but not limited to—bench work, fieldwork, instrumentation and data analysis.

To fulfill the Natural Sciences Gen Ed Distribution requirement, students must pass a minimum of 12 credits in courses approved as Distribution – Natural Sciences courses, including a laboratory or field experience.

6. Social Sciences (12 credits)

Social science courses examine the individual, social, ideological, cultural, political, and economic dimensions of human activities and behaviors. They address a broad range of topics through diverse theoretical and empirical approaches. As a result, these courses cultivate perspectives and intellectual skills necessary to apply qualitative and quantitative methods of inquiry to issues of societal significance.

Students in social science courses are taught to analyze and interpret data from many different sources, such as fieldwork, interviews, surveys, peer-reviewed literature, published and unpublished repositories and electronic media. These courses also discuss applications of the social sciences, which range from developing fundamental theories of the social world to solving problems and informing advocacy and activism.

The Social Sciences Gen Ed Distribution requirement is meant to ensure that students:

- Explore the development of the institutions and functioning of human society
- Understand the interpersonal relationships of individuals as members of social groups
- Gain experience with social science vocabulary, methods and tools in systematic studies of the social world

To fulfill the Social Sciences Gen Ed Distribution requirement, students must pass a minimum of 12 credits in courses approved as Distribution – Social Sciences courses.

Diversity Requirement

For the Diversity requirement, students must pass a minimum of 3 credits in each of the two diversity categories for a total of 6 credits in courses that have been identified as fulfilling diversity learning goals. Students may use the same course to fulfill one of the diversity categories and part of the distribution requirement.

The diversity requirement addresses the need to prepare students to navigate the complexities of living and working in a diverse and increasingly interconnected world. Diversity courses are designed to provide students with the necessary understanding and analytical skills to successfully function and lead in a multicultural, multiethnic, transnational and global society. All diversity courses promote historical and/or contemporary understanding of how social differences shape, and have been shaped by, political, economic, and cross-cultural relationships within the United States and the world. Generally diversity courses in either category will explore the ways in which marginalization has occurred and the reasons for this marginalization.

7. United States Perspective (3 credits)

United States perspective diversity courses promote historical and/or contemporary understanding of how social differences have shaped social, political, economic and cross-cultural relationships within the United States. These courses must substantially address one or more forms of diversity (for example: race, ethnicity, gender, gender identity, sexual orientation, socioeconomic class, religion, disability).

To fulfill the U.S. Perspective Gen Ed Diversity requirement, students must pass a minimum of 3 credits in a course approved as Diversity – U.S. Perspective courses.

8. Global perspective (3 credits)

Global perspective diversity courses address the need for students to learn and think critically about historical and/or contemporary global forces and transnational connections. These courses might: 1) focus in-depth on a particular country or culture outside the U.S., placing it within transnational and global context; 2) address a problem or phenomenon in the context of two or more countries, cultures, or regions; 3) examine global forces through a comparative framework; 4) be courses with a substantial cross-cultural curricular component that are part of a study abroad experience.
To fulfill the Global Perspective Gen Ed Diversity requirement, students must pass a minimum of 3 credits in a course approved as Diversity – Global Perspective courses.

Core Curriculum

Note: All students pursuing a bachelor's degree in the College of Arts and Sciences who entered the college before fall 2018 have the option to complete either the Core Curriculum or the General Education requirements.

The College of Arts and Sciences Core Curriculum requirements are divided into two parts: skills acquisition and content areas of study. For full descriptions of the individual requirement areas and their underlying educational philosophies and goals please refer to the 2018-2019 catalog or an earlier catalog (p. 2357).

Policies and Exemptions

Students may use a course to meet only one core requirement even if that course has been approved to fulfill more than one requirement. A student may not use independent study projects to fulfill core requirements.

Students who take approved CU Boulder coursework to fulfill their core requirements must take those courses for a letter grade and receive a grade of D- or higher. All courses that have been approved to fulfill specific requirements in the A&S Core Curriculum have that noted in their catalog entries and can be searched for using the CU Boulder Class Search (https://classes.colorado.edu) tool.

Selected majors and the ecology and evolutionary biology minor are exempt from portions of the core curriculum, as core coursework is considered equivalent to coursework in the major or minor. Students who graduate with more than one exempt major may apply their exemptions cumulatively.

Skills Acquisition

1. Foreign Language

All students are required to demonstrate, while in high school, third-level proficiency in a single modern or classical foreign language. Students who have not met this requirement at the time of matriculation will have a MAPS deficiency. They may make up the deficiency and fill this core curriculum requirement by either:

- Passing an appropriate third-semester college course, or
- Passing a CU Boulder-approved proficiency examination

Students who are subject to the Core Curriculum, but not subject to MAPS, must complete the foreign language requirement to meet degree requirements.

2. Quantitative Reasoning and Mathematical Skills (QRMS) (3–6 credit hours)

To fulfill the QRMS Gen Ed Skills requirement, students must:

- Pass one of the approved QRMS courses or sequences of courses
- Pass any 3 credits of mathematics courses numbered MATH 1300 or higher or applied mathematics courses numbered APPM 1350 or higher

3. Written Communication (3 lower-division and 3 upper-division credit hours)

To fulfill the lower-division part of the Written Communication Core requirement, students must:

- Pass or receive placement credit (as determined, for example, by scores on AP or IB exams) for a 3-credit course approved for lower-division written communication
- Earn an International Baccalaureate diploma

To fulfill the upper-division part of this requirement, students must:

- Pass a 3-credit course approved for upper-division written communication
- Pass an upper-division written communication proficiency exam

Content Areas of Study

4. Historical Context (3 credit hours)

Students must pass one of the 3-credit courses that has been approved to fulfill Historical Context.

5. Human Diversity (3 credit hours)

Students must pass one of the 3-credit courses that has been approved to fulfill Human Diversity.

Students who graduate with a major in ethnic studies are exempt from completing the Human Diversity requirement.

6. United States Context (3 credit hours)

Students must pass one of the 3-credit courses that has been approved to fulfill U.S. Context.

7. Literature and the Arts (6 credit hours, 3 of which must be upper-division)

Students must pass 6 credit hours of coursework that has been approved to fulfill Literature and the Arts, of which at least 3 credit hours must be upper-division.

Students who graduate with a major dealing in depth with literature and the arts (Chinese, classics, dance, English, fine arts, French, Germanic studies, humanities, Italian, Japanese, Portuguese, Russian, Spanish or theatre), are exempt from this requirement.

8. Natural Science (13 credit hours, including a two-course sequence and a laboratory or field experience)

Students must pass 13 credit hours of approved natural science coursework, which includes one two-semester sequence of courses and at least 1 credit hour of an associated lab or field experience. No more than two lower-division courses may be taken from any single department (1-credit-hour lab/field experience courses are excepted) and the lab/field experience course must be affiliated with a Natural Science lecture course.

Students who graduate with a major in the natural sciences (astrophysical and planetary sciences, biochemistry, chemistry, ecology and evolutionary biology, geology, integrative physiology, molecular, cellular and developmental biology or physics) or students who graduate with a minor in ecology and evolutionary biology are exempt from completing the natural science requirement.

9. Contemporary Societies (3 credit hours)

Students must pass one 3-credit course that has been approved to fulfill Contemporary Societies.

Students who graduate with a major in anthropology, economics, international affairs, political science, psychology or sociology are exempt from the contemporary societies requirement.
10. Ideals and Values (3 credit hours)

Students must pass one 3-credit course that has been approved to fulfill Ideals and Values.

Academic Standards

Students in the College of Arts and Sciences must abide by all policies and procedures as outlined in the university catalog and on the Arts and Sciences’ Academic Advising website (https://www.colorado.edu/advising/). Students should refer to these webpages often since policies, procedures, and forms may be updated throughout the academic year.

Attendance

Successful work in the College of Arts and Sciences is dependent upon regular attendance in all classes. Students who are unavoidably absent should make arrangements with instructors to make up the work missed. Failure to attend regularly may result in receipt of an “F” in a course. Students who, for illness or other legitimate reason, miss a final examination must notify the instructor no later than the end of the day on which the examination is given. Failure to do so may result in receipt of an F in the course. The instructor determines whether the reason is legitimate and whether to make an accommodation.

Registration and Enrollment

It is the students’ responsibility to enroll each semester in the requisite number of credit hours in accordance with the students’ individual degree plan. To be considered a full-time student, a minimum of 12 credit hours each fall and spring semester is required. Part-time enrollment (less than 12 credit hours) may impact student’s financial aid and scholarships, health insurance, on-campus housing, and the four-year graduation guarantee. Students must petition to be enrolled in more than 21 credit hours in any given fall or spring semester, in more than 16 credit hours in Summer Session as a whole, and in more than one class in either Maymester, Augmester, or Winternester.

Sequence of Courses

Students are expected to follow the curriculum outlined by their major department/program. A student who receives a grade of D+ or lower in a course is prerequisite to another may not enroll in the succeeding course without approval from the student’s major department/program or the instructor of the succeeding course. Students should check with the major department/program for more stringent requirements on prerequisite course grades.

All courses are not necessarily offered each semester. According to college policy, undergraduate courses having an enrollment of fewer than 20 students may be cancelled. Students can minimize scheduling problems by closely following the curricular sequence outlined by their major department/program.

Add and Drop Policies

See the Office of the Registrar’s website (http://www.colorado.edu/registrar/) for campuswide add and drop policies, and specific deadline dates for a given semester/term.

Late Drop Policy

After the final drop deadline, students must file a detailed college petition to request a late drop, which may be approved under the following conditions:

- After the tenth week of class and before the last day of class in the term, a student may be approved to late drop a class with documentation to verify extenuating circumstances beyond their control or a university error.
- Students who are approved for a late drop of a class will receive a grade of “W” for that class on their transcript.

Students are responsible for being aware of the consequences of a late drop(s), including impacts on financial aid/scholarships, health insurance, on-campus housing eligibility, academic progress towards degree requirements, etc.

Withdrawal

Arts and Sciences students may withdraw from all classes for a term until the last day that classes are taught by requesting a withdrawal in the Office of the Registrar. In the event of extenuating circumstances, students may petition for a retroactive withdrawal through the Office of Undergraduate Education. For specific withdrawal procedures and campus-wide policies, see the Withdrawal (p. 52) section.

Consecutive Withdrawal

Students in the College of Arts and Sciences who withdraw from two regular semesters in a row will have a dean’s stop placed on their registration. Summer session is not counted as a regular semester. They will not be permitted to return to CU Boulder before one full academic year has elapsed (not including their semester of withdrawal).

Good Academic Standing

Good academic standing in the College of Arts and Sciences requires a cumulative grade point average of 2.000 (C) or above in all University of Colorado work. Grades earned at another institution are not used in calculating the grade point average at the University of Colorado (this includes courses taken at Metropolitan State University on the Denver campus). However, grades earned in another school, college or campus within the University of Colorado system are used in determining a student’s academic standing and progress toward the degree in the College of Arts and Sciences. Determinations on good academic standing are made at the end of the fall and spring terms only, and not at the end of the summer term.

Academic Alert – Probation for First-Year Semester Students Only

First-time first-year students and first-semester transfer students who earn a cumulative GPA in their first semester that is below 2.000 are placed on Academic Alert. Students placed on Academic Alert are not in good academic standing. Students on Academic Alert who earn a semester GPA of 2.000 or higher during their active alert semester but do not earn a cumulative GPA of 2.000 or higher are placed on Academic Probation and are afforded a second semester to achieve a cumulative GPA of at least a 2.000, the GPA required to return to good academic standing. Students who earn below a 2.000 semester GPA during their active alert semester will be placed on Academic Suspension. Students who successfully complete the Academic Coaching Program Agreement during their active alert semester will be offered an additional semester of Academic Probation.

Academic Probation

Continuing students whose cumulative GPA falls below 2.000 are placed on Academic Probation. Those students who enroll in a main campus classes any term in the calendar year, excluding summer term, after being placed on Academic Probation are expected to raise their cumulative GPA to a 2.000 or above by the end of that term or will face Academic Suspension. Students placed on Academic Probation who elect to remain out of main campus classes for a full calendar year can return to the
Academic Suspension

Students who fail to earn a cumulative GPA of 2.000 or higher following their semester(s) of Academic Probation will be suspended and will not be able to register for University of Colorado main campus classes on any campus during any regular academic term, excluding summer term.

Academic Reinstatement

Academic Reinstatement eligibility requires a cumulative GPA of 2.0 or higher. A student on Academic Suspension who is seeking Academic Reinstatement may choose from the following options:

Enrollment Options

1. Students may take classes through the CU Boulder’s Division of Continuing Education (evening or online courses) to try to raise their CU GPA and are eligible for reinstatement when they have reached a 2.000 cumulative GPA. Students who enroll in Continuing Education classes to restore their good academic standing must maintain a 2.50 GPA or above during each term to avoid dismissal from Continuing Education.

2. Students can take courses at another academic institution. To be reinstated to main campus classes, your cumulative GPA at CU plus the grades and credit hours resulting from all work done at other institutions after your suspension must calculate to a cumulative GPA of at least 2.000. This is referred to as a virtual GPA. These transfer grades are used only for the purpose of reinstatement and do not impact your official University of Colorado GPA. If students choose this option and are reinstated based on a virtual GPA, they will be readmitted on Academic Probation and given two semesters of main campus enrollment to bring their CU cumulative GPA to a 2.000 minimum.

3. Students on Academic Suspension may enroll in main campus Summer Session classes to try to raise their CU GPA and are eligible for reinstatement when they have reached a 2.000 cumulative GPA.

4. Students may choose any combination of numbers 1, 2 and 3.

The procedure to apply for reinstatement can be found on the Arts and Sciences Academic Advising Website (https://www.colorado.edu/artssciences-advising/policies-forms/reinstatement-readmission/). If a student, who has earned Academic Reinstatement, has not been enrolled at CU Boulder for more than 3 regular semesters they may apply for readmission (https://catalog.colorado.edu/undergraduate/colleges-schools/arts-sciences/policies-requirements/#creditandenrollmenttext) to the university.

Dismissal from Continuing Education

Students already on Academic Suspension, who enroll in Continuing Education classes to restore their good academic standing and fail to earn a term GPA of 2.500 or higher, will also be dismissed from Continuing Education. Dismissals from Continuing Education are processed only at the conclusion of the fall and spring terms. Dismissals are not processed at the end of the summer term. Students on dismissal will not be able to register for University of Colorado classes on any campus during fall and spring terms, but can enroll in either main campus or Continuing Education classes during the summer term. Students on dismissal must successfully apply for reinstatement in order to enroll in classes at CU Boulder during the fall or spring semester.

Academic Ethics

The College of Arts and Sciences follows the policies and procedures governing acts of academic dishonesty can be found on CU Boulder's Student Conduct & Conflict Resolution website (https://www.colorado.edu/scrr/honor-code/). A university's intellectual reputation depends on the maintenance of the highest standards of intellectual honesty. Commitment to those standards is a responsibility of every student and faculty member at the University of Colorado.

Policy on Grade Appeals

The following shall be the official policy of the academic units of the College, unless an academic unit submits an alternative procedure to the Dean for approval.

When a student believes that a grade has been improperly assigned, and discussions between the instructor and the student have not led to any resolution of the problem:

1. The student shall have the option of making a formal written appeal to the Department Chair. The appeal must specify the remedy desired by the student, and it must be submitted within 45 days of the end of the academic term in which the course was taken.

2. The Chair or designee will meet (together or separately) with the student and with the faculty member who taught the course. If the Chair/designee is unable to broker a solution mutually acceptable to both student and instructor, then:

3. The Chair shall appoint an ad hoc Grade Appeals Committee, which will review the dispute. This Committee will consist of at least three impartial faculty members competent in the subject matter of the course in question. The Chair will provide the Committee with the student's appeal and a written response from the faculty member.

4. Within 45 days, the Committee will submit a report and recommendation to the Chair, and the Chair will recommend to the instructor either (1) that the originally assigned grade stand; or (2) that a new grade be assigned.

5. In cases where a change of grade is recommended and the instructor does not wish to accept the recommendation of their colleagues, the Chair shall forward the written materials associated with the appeal to the Arts and Sciences' Deans Office.

Policy on Incomplete Grades

An incomplete grade of "I" is given at the discretion of the course instructor only when a student has satisfactorily completed a substantial portion of a course and, for reasons beyond the student's control, is prevented from completing all work for the course within the term. Incomplete grades must be requested by the student and should not be awarded by the instructor for non-attendance. (In the case of non-attendance, the instructor should award the student the grade[s] earned.) If an incomplete grade is given, the instructor is required to document the reasons/grounds for the awarding of the incomplete grade, the specific work and conditions for completion of the course and the time frame within which the coursework must be completed. The maximum time the instructor can allow for the completion of the coursework and subsequent award of a course grade is one year from the end of the term the course was taken. After one year, if no final grade is awarded, the "I" grade will change to the grade of "F." A copy of a departmental Incomplete Agreement signed by the student and instructor and accompanied by documentation of the extenuating circumstances that resulted in the awarding of an incomplete should be filed with the instructor’s
Policy on Exceptions to Academic Rules and Policies
The College of Arts and Sciences does not waive degree requirements or excuse students from completing degree requirements. Petitions for exceptions to the College of Arts and Sciences' academic rules and policies stated in this catalog may be submitted to the Appeals Committee on Academic Rules and Policies (ACARP). Such petitions will be considered only if they meet all three of the following conditions:

1. The student must document that they have made every effort to fulfill the policy or requirement as defined and must demonstrate that no other options exist for fulfilling the requirement as defined in this catalog.
2. The student must document the compelling reasons beyond their control that are preventing them from fulfilling the policy or meeting the requirement as defined in the catalog.
3. The student must demonstrate to the satisfaction of the faculty committee that they have fulfilled or will fulfill the intent of the policy or the requirement through an appropriate alternative.

Students who believe that their circumstances meet the conditions to submit a petition must first consult with their academic advisor. If the advisor offers options for meeting the requirement or policy as defined here, the student must pursue those options and should not submit a petition. Usually ACARP only accepts petitions from students who are in their third year at CU Boulder.

The ACARP petitions should be filed with the Office of Academic and Curricular Affairs.

Academic Excellence
Arts and Sciences Honors Program
The Arts and Sciences Honors Program (https://www.colorado.edu/honors/) provides a community for highly motivated and academically prepared undergraduate students and offers opportunities for intellectual engagement through honors courses, academic-inspired events, and honors thesis research and creative work. It is an enrichment program for undergraduate students who want to add something extra to their experience at the University of Colorado Boulder. Honors-qualified students are eligible to take Honors Program courses and attend Honors Community events. In addition, the Honors Program sponsors the Honors Journal (http://www.colorado.edu/honorsjournal/), a student-run publication which publishes works from all academic disciplines represented on the CU Boulder campus.

Honors Residential Academic Program
The Honors Residential Academic Program (http://living.colorado.edu/get-involved/raps-honors/) is the residential component of the Arts and Sciences Honors Program (https://www.colorado.edu/honors/). It promotes and sustains academic excellence within a lively community setting. First-year students take one, onsite, seminar-style three-credit-hour course each semester. Beyond the classroom, Honors RAP offers a variety of co-curricular and student-led activities that enhance the learning experience. It is open to approximately 335 first-year and continuing honors-qualified students in the College of Arts and Sciences.

Graduation with Honors
Students in the College of Arts and Sciences are eligible to earn Latin honors at graduation—cum laude, magna cum laude or summa cum laude. The award of Latin honors is determined by the Arts and Sciences Honors Program (https://www.colorado.edu/honors/) and is based on several criteria, including the quality of original scholarly work. Honors are not conferred on a graduate simply by virtue of high grades. Students pursuing multiple majors or multiple degrees must complete their honors program and defend their thesis by the published deadline for the term/year in which their first major or first degree is conferred. Students intending to pursue honors must register with the Honors Program by the deadlines published on the Honors Program (https://www.colorado.edu/honors/graduation/) website. Honors requirements must be complete prior to graduation. Students "walking" in May but graduating in August must complete honors requirements, including defending the thesis, by the Honors Program deadline for May graduation. Interested students should consult the Honors Program listing in this catalog or contact the Honors Program (https://www.colorado.edu/honors/graduation/) in Norlin Library.

Graduation with Distinction
Students will graduate "With Distinction" if they have completed at least 12 credit hours of CU Boulder coursework for a letter grade in any single semester with a term GPA of 3.75 or better. They are included on the dean’s list and receive a notation on their transcript and a letter from the dean.

Dean's List
Students in the College of Arts and Sciences who have completed at least 12 credit hours of CU Boulder coursework for a letter grade in any single semester with a term GPA of 3.75 or better are included on the dean’s list and receive a notation on their transcript and a letter from the dean. Arts and Sciences students who are pursuing a double degree in another school or college at CU Boulder are not eligible for the Arts and Sciences deans list but rather are eligible to for dean’s list in their other college.

Phi Beta Kappa
All upper-division students in the College of Arts and Sciences whose undergraduate academic records are outstanding are eligible for election to Phi Beta Kappa, the nation’s oldest and most prestigious honor society. The CU Boulder chapter was established in 1904. Membership in this distinguished honors society recognizes superlative scholastic achievement in the liberal arts and sciences and at CU is only open to Arts and Sciences students. Students are notified by mail of their nomination; students do not apply for Phi Beta Kappa membership.

Programs of Study
Actuarial Studies and Quantitative Finance
The Actuarial Studies and Quantitative Finance Certificate Program is an interdisciplinary undergraduate program housed in the College of Arts and Sciences and the Leeds School of Business. The curriculum is designed to provide the necessary mathematics, economics and finance training needed to pursue a career as an actuary or in quantitative finance.

The program appeals to quantitatively strong students who are excited about applying these skills in a business setting.
Students with these skills and interests are in high demand in the job market. Students who succeed in the program will also be well-prepared for graduate study in these fields.

**Certificate**

- Actuarial Studies and Quantitative Finance - Certificate (p. 78)

### Actuarial Studies and Quantitative Finance - Certificate

#### Program Tracks

The actuarial studies and quantitative finance certificate program offers two tracks:

- actuarial studies track
- quantitative finance track

#### Actuarial Studies Track

The actuarial studies track, offered by the College of Arts and Sciences, is designed to help students obtain the expertise in mathematics, economics and finance necessary to become actuaries—the mathematical planners of the insurance and pension industries.

Students in the program can be of any major or college, or can be classified as nondegree. The entrance requirement is three semesters of calculus completed with grades of B+ or better. There are a number of courses in mathematics, economics and business required to earn the certificate. The certificate is awarded by the dean of the College of Arts and Sciences.

Besides taking courses, students are encouraged to take the professional exams offered by the various actuarial societies. The entrance requirements can be waived for students who pass the first actuarial examination.

Interested students should contact one of the co-directors: David Grant at 303-492-7208 or Anne Dougherty at 303-492-4011, who will also provide advice on actuarial studies to students who are not in the program. For more information, visit the Actuarial Studies and Quantitative Finance Certificate Program (http://www.colorado.edu/asqf/) webpage.

#### Quantitative Finance Track

The quantitative finance track, offered jointly by the College of Arts and Sciences and the Leeds School of Business, was initiated in the fall of 2004 and is designed to prepare students for financial and economics analyst positions that require outstanding quantitative skills. Often employers hire graduate students for such positions due to a shortage of undergraduates with the required combination of skills and training. This program is designed to meet this need.

The required curriculum is extensive and rigorous. Potential participants are encouraged to begin work early in their studies, preferably during the first year. Coursework draws from the Departments of Mathematics, Applied Mathematics and Economics; and the Leeds School of Business. Qualified students enrolled in any college are invited to participate.

For admittance to the program, a student must earn a GPA of 2.87 or higher in Calculus I through III. However, students may be provisionally admitted after completion of Calculus I (MATH 1300 or APPM 1350) with a grade of B or better or through advanced placement. Additional GPA requirements must be met to earn the certificate. Participants may be given preference when enrolling in certain courses in the Leeds School of Business.

Interested students should contact Daniel Brown, Leeds School of Business, at daniel.brown@colorado.edu. For more information, visit the Actuarial Studies and Quantitative Finance Certificate Program (http://www.colorado.edu/asqf/) webpage.

### Requirements

#### Overview

Curricula are rigorous and multi-disciplinary, with required coursework drawing from the Mathematics, Applied Mathematics and Economics Departments, as well as the Finance Division of the Leeds School of Business. The confluence of such widely varying material is one of the unique features of the program. Successful completion of the program requirements is a significant accomplishment.

#### Actuarial Studies Track

The courses listed below are the minimum required in order to complete the actuarial studies track of the program. You must achieve a grade of C or better in all courses.

**Quantitative Finance Track**

Program requirements are extensive and challenging. Students must meet two separate GPA requirements:

1. The overall GPA for all courses applied to certificate requirements must be at least 3.00.
2. Students must meet a requirement specifically for mathematics and statistics courses applied to certificate requirements. This requirement can be met one of two ways, either by achieving a GPA of 2.87 or greater in calculus courses or a GPA of 3.00 or greater in the six mathematics and statistics courses required for the certificate.

Most students will begin study during their freshman year and continue throughout their undergraduate career. The number of credit hours taken may vary according to the specific courses completed.

The courses listed below are the minimum required in order to complete the quantitative finance track of our program. Please note that students must pass Calculus I, II, and III with a B grade or better in order to be admitted into the program. Students are encouraged to go beyond the minimum requirements, and most students do.

For a complete list of requirements and further information regarding the quantitative finance track and the related actuarial studies track, see the Actuarial Studies and Quantitative Finance Certificate Program (https://www.colorado.edu/program/actsf/) webpage. Interested students should contact Daniel Brown, daniel.brown@colorado.edu (Daniel.Brown@colorado.edu), Leeds School of Business.

**Anthropology**

Anthropology is the study of humans and our biological relatives across time and space. It is the only field to address the diversity of the human experience in its biological, cultural, and historical contexts. The discipline necessarily incorporates a wide range of theoretical and methodological traditions, drawing on and contributing to approaches in the humanities, social sciences, and natural sciences. It is the breadth of our vision of what it means to be human, as well as the breadth of our theoretical and methodological approaches, that constitute our unique mission and role within the university. We feel it is of crucial importance to communicate this broad vision of diversity and complexity to students so that they come to have a deeper understanding of what it means to be human.

We view the three subdisciplines of anthropology (archaeology, biological anthropology and cultural anthropology) as important foundations of our program because of their well-defined fields of study. Yet we also believe that recent trends in anthropological thought offer creative new directions that cut across and bridge the subdisciplines. We see our long-term vision as a department that addresses and analyzes social, biological, and environmental problems. We have identified four broad themes that address these problems and potential solutions in ways that cut across the subdisciplines: ecology and evolution; human responses to local and global crises; cultural, ethical, and political practices of worldmaking; and collaborative and public anthropology. These serve as intellectual bridges to create powerful new collaborations within the department and with other programs and institutions that will advance...
our research and teaching missions as well as create a more integrated departmental vision.

Course code for this program is ANTH.

**Bachelor's Degree**
- Anthropology - Bachelor of Arts (BA) (p. 89)

**Minor**
- Anthropology - Minor (p. 91)

**Faculty**
While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Courses

ANTH 1030 (3) Principles of Anthropology 1
Evolution of humanity and culture from beginnings through early metal ages. Covers human evolution, race, prehistory, and rise of early civilizations. This course is taught through Continuing Education.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ANTH 1040 (3) Principles of Anthropology 2
Surveys the world’s major culture areas. Covers components of culture, such as subsistence, social organization, religion, and language. This course is taught through Continuing Education.
Additional Information: Arts Sci Gen Ed: Social Science

ANTH 1100 (3) Exploring a Non-Western Culture: The Tamils
Surveys the social and economic patterns, ideas and values, and aesthetic achievements of the Tamils, a Hindu people who live in South India and Sri Lanka.
Additional Information: Arts Sci Core Curr: Human Diversity

ANTH 1105 (3) Exploring a Non-Western Culture: Tibet
Introduction to Tibetan culture, history, religion, and society from an anthropological perspective, including traditional as well as contemporary dimensions. Topics will include Tibetan Buddhism, politics, nomadism, gender, refugee issues, and the global Tibetan diaspora, all framed within the larger methods and concepts of cultural anthropology.
Additional Information: Arts Sci Core Curr: Human Diversity

ANTH 1110 (3) The Caribbean in Post-Colonial Perspective
Introduces the student to the varied peoples and cultures in the Caribbean region, emphasizing the historical, colonial, and contemporary political-economic contexts of their social structure and cultural patterns.
Additional Information: Arts Sci Core Curr: Human Diversity

ANTH 1120 (3) Exploring a Non-Western Culture: Pueblo Indians of the Southwest
Examines the geography, kinship, politics and religious values of Pueblo Indian peoples of the US Southwest in historical and contemporary context through an anthropological perspective. Specific details of Pueblo Indian languages, cultures, and histories are used to illustrate basic ideas and debates in anthropology including: the concept of culture, the influence of language on thought, the grounding of culture in human biology, religion and reason, the nature of oral traditions, and archaeological interpretation.
Additional Information: Arts Sci Core Curr: Human Diversity

ANTH 1125 (3) Exploring Cultural Diversity in the U.S.
Examines the geography, kinship, politics and religious values of various cultures in the United States in historical and contemporary context through an anthropological perspective. Check with department for semester offerings.
Repeatability: Repeatable for up to 9.00 total credit hours.
Additional Information: Arts Sci Gen Ed: Diversity-U.S. Perspective

ANTH 1135 (3) Exploring a Non-Western Culture: The Aztecs
Explores the culture of the Aztec people of Central Mexico: their subsistence, society, religion, and achievements, as well as the impact of the Aztec empire in Mesoamerica. Also reviews the clash of a non-western society with the western world with the arrival of the Spanish conquistadors.
Additional Information: Arts Sci Gen Ed: Diversity-Global Perspective

ANTH 1140 (3) Exploring a Non-Western Culture: The Maya
Examines the geography, kinship, politics and religious values of various cultures in the United States in historical and contemporary context through an anthropological perspective. Check with department for semester offerings.
Repeatability: Repeatable for up to 9.00 total credit hours.
Additional Information: Arts Sci Gen Ed: Diversity-U.S. Perspective

ANTH 1143 (3) Civilization, The Early Years: Ancient Mesopotamia in the Second Millennium BC
Introduces you to the peoples and cultures of ancient Mesopotamia during the second millennium B.C. In conjunction with the political history of shifting dynasties, wars, and power struggles, we will examine a number of issues in various cultural contexts. These include the interplay of texts and archaeological data in reconstructing the past; societal ‘collapse’—what it is and what it isn’t; legitimation of power; Mesopotamian mythology, and the role of women. Previously offered as a special topics course.
Additional Information: Arts Sci Core Curr: Human Diversity

ANTH 1145 (3) Exploring a Non-Western Culture: Regional Cultures of Africa
Explores a small number of cultures in a specific sub-region of Africa from an integrated holistic viewpoint, emphasizing material adaptations, social patterns, ideas and values, and aesthetic achievements.
Additional Information: Arts Sci Core Curr: Human Diversity

ANTH 1150 (3) Exploring a Non-Western Culture: Regional Cultures of Africa
Explores a small number of cultures in a specific sub-region of Africa from an integrated holistic viewpoint, emphasizing material adaptations, social patterns, ideas and values, and aesthetic achievements.
Additional Information: Arts Sci Core Curr: Human Diversity
ANTH 1155 (3) Exploring Global Cultural Diversity
Examines the geography, kinship, politics and religious values of various cultures globally in historical and contemporary context through an anthropological perspective. Check with department for semester offerings.
Repeatability: Repeatable for up to 9.00 total credit hours.
Additional Information: Arts Sci Gen Ed: Diversity-Global Perspective

ANTH 1170 (3) Exploring Culture and Gender through Film
Explores the concepts of culture and gender from an anthropological perspective, using films and other media, as well as written texts. By analyzing media about other ways of life, students will learn the basic concepts of cultural anthropology and be able to apply them to any society. In addition, students will learn to think critically about documentary and ethnographic media.
Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Distribution-Social Sciences
Arts Sci Gen Ed: Diversity-Global Perspective

ANTH 1180 (3) Maritime People: Fishers and Seafarers
Explores important milestones in the development of human societies and cultures that live from the sea. Emphasizes the evolution of maritime adaptations associated with fishing and seafaring from more than 10,000 years ago through the present.
Additional Information: Arts Sci Core Curr: Historical Context
Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 1190 (3) Origins of Ancient Civilizations
Examines origins of the world’s first civilizations in Mesopotamia, Egypt, the Indus Valley, Mesoamerica, and the Andes. Covers archaeology of ancient cities, trade, economy, politics, warfare, religion, and ideology. Seeks insights into general processes of cultural evolution.
Additional Information: Arts Sci Core Curr: Historical Context
Arts Sci Gen Ed: Distribution-Social Sciences
Arts Sci Gen Ed: Diversity-Global Perspective

ANTH 1200 (3) Culture and Power
Compares contemporary sociopolitical systems across cultures, from non-Western tribal groups to modern states. Introduces students to anthropological approaches for understanding and analyzing political forces, processes, and institutions that affect cultures such as colonialism, warfare, violence, ethnicity, migration, and globalization.
Additional Information: Arts Sci Core Curr: Contemporary Societies
Arts Sci Gen Ed: Distribution-Social Sciences
Arts Sci Gen Ed: Diversity-Global Perspective

ANTH 2010 (3) Introduction to Biological Anthropology 1
Detailed consideration of human biology, the place of humans in the animal kingdom, primate ecology and fossil evidence for human evolution. Required for ANTH majors.
Additional Information: GT Pathways: GT-SC2 - Natural Physical Sci: Lec
Crse w/o Req Lab
Arts Sci Core Curr: Natural Science Sequence
Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences
MAPS Course: Natural Science

ANTH 2020 (3) Introduction to Biological Anthropology 2
Continuation of ANTH 2010. Emphasizes genetics, human variation, and microevolution.
Recommended: Prerequisite ANTH 2010.
Additional Information: GT Pathways: GT-SC2 - Natural Physical Sci: Lec
Crse w/o Req Lab
Arts Sci Core Curr: Natural Science Sequence
Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences

ANTH 2030 (1) Laboratory in Biological Anthropology 1
Lab in human osteology and musculoskeletal system emphasizing comparative primate morphology, adaptation, and the fossil record documenting the natural history of primates. Meets the MAPS requirement for natural science: lab, when taken with ANTH 2010.
Recommended: Corequisite ANTH 2010.
Additional Information: GT Pathways: GT-SC1 - Natural Physical Sci: Lec
Crse w/ Req Lab
Arts Sci Core Curr: Natural Science Lab
Arts Sci Gen Ed: Distribution-Natural Sciences
Arts Sci Gen Ed: Distribution-Natural Sci Lab
MAPS Course: Natural Science Lab or Lab/Lec

ANTH 2040 (1) Laboratory in Biological Anthropology 2
Experiments and hands-on exercises designed to enhance understanding of the principles and concepts presented in ANTH 2020. One two-hour class per week.
Recommended: Corequisite ANTH 2020.
Additional Information: GT Pathways: GT-SC1 - Natural Physical Sci: Lec
Crse w/ Req Lab
Arts Sci Core Curr: Natural Science Lab
Arts Sci Gen Ed: Distribution-Natural Sciences
Arts Sci Gen Ed: Distribution-Natural Sci Lab

ANTH 2070 (3) Bones, Bodies, and Disease
Studies the human skeleton and introduces techniques used to evaluate demographic variables. Applies techniques through evaluation of photographic images of an excellently preserved mummified skeletal population from ancient Nubia to reconstruct prehistoric patterns of adaptation and biocultural evolution. Offered through Continuing Education only.
Recommended: Prerequisite ANTH 2010.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ANTH 2100 (3) Introduction to Cultural Anthropology
Covers current theories in cultural anthropology and discusses the nature of fieldwork. Explores major schools of thought and ethnographic fieldwork in a range of cultures studied by anthropologists. Required for Anthropology majors.
Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Distribution-Social Sciences
Arts Sci Gen Ed: Diversity-Global Perspective

ANTH 2200 (3) The Archaeology of Human History
Where do we come from? This course provides a brief introduction to the practice of archaeology and then emphasizes the evidence for major events/transitions in human history over the last 2.5 million years. Required for ANTH majors.
Additional Information: Arts Sci Core Curr: Historical Context
Arts Sci Gen Ed: Distribution-Social Sciences
ANTH 2210 (1) Laboratory Course in Archaeological Methods
Studies analytical methods in archaeological research including those employed both in the field and in the laboratory. Deals with practical exercises illustrating many of the theoretical principles covered in ANTH 2200.
Recommended: Corequisite ANTH 2200.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 2525 (3) Environmental Anthropology
Examines the impacts of human impacts on the planet from a cross-cultural perspective. This course will explore how different cultures have impacted their environments, and the diverse responses that cultures make to ecosystem changes. Also studies what different human groups have done, and are doing, to mitigate and adapt to ecological degradation, biodiversity loss, and climate change.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 3000 (3) Primate Behavior
Surveys naturalistic primate behavior. Emphasizes social behavior, behavioral ecology, and evolution as they lead to an understanding of human behavior.
Requisites: Requires a prerequisite course of ANTH 2010 or EBIO 1220 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior).
Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence

ANTH 3009 (3) Modern Issues, Ancient Times
Considers issues of vital importance to humans, both now and in ancient times. Topics such as food, death, sex, family, literacy, or power are explored to consider how ancient societal norms and attitudes evolved and how they relate to modern culture. Draws on material and literary evidence to develop an understanding of the complexities of ancient life.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 3009
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Arts Sci Core Curr: Historical Context

ANTH 3010 (3) The Human Animal
Identifies genetic, anatomical, physiological, social, and behavioral characteristics humans share with other mammals and primates. Explores how these characteristics are influenced by modern culture.
Requisites: Restricted to students with 57-180 credits (Junior or Senior).
Recommended: Prerequisite ANTH 2100.
Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence

ANTH 3100 (3) Africa: Peoples and Societies in Change
Examines culture and politics in Africa through works by anthropologists and historians, as well as novels, films, and journalistic accounts. Special attention is devoted to the ways in which various African cultures have creatively and resiliently responded to the slave trade, European colonialism, and post-colonialism.
Requisites: Restricted to students with 57-180 credits (Junior or Senior).
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 3110 (3) Ethnography of Mexico and Central America
A broad overview, focusing on Mexico and Guatemala. Major topics include ethnohistory, indigenous and mestizo peoples, and contemporary problems and issues.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 3119 (3) The Archaeology of Death
Consider Death. It is a universal human phenomenon. Humans across time and space have caused, planned for, reacted to, and carried out death practices in extraordinarily different ways. Mortuary practice provides a fascinating insight into human history and culture in both the modern and ancient world.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 3119

ANTH 3160 (3) Peoples of the South Pacific
Surveys traditional island cultures and contemporary changes in the Pacific, focusing on how the Pacific Islands were first settled, some of the great anthropologists who studied the islanders, and how current environmental changes, such as global warming, threaten the future existence of the islands.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Core Curr: Historical Context

ANTH 3170 (3) America: An Anthropological Perspective
Historical and contemporary aspects of American life are considered from an anthropological perspective.

ANTH 3180 (3) Gender, Culture, and Sexuality
Focuses on gender, that is, the making of men and women, and how gender is culturally constructed in different societies. Gender describes many areas of behavior, feelings, thoughts, and fantasies that cannot be understood as primarily biologically produced. Sexuality and sexual systems are sometimes viewed as products of particular genderizing practices, but recent theories suggest that sexual systems themselves constitute gender.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Recommended: Prerequisite ANTH 2100.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 3300 (3) Elements of Religion
Explores universal components of religion, as inferred from religions of the world, ranging from smaller-scale oral to larger-scale literate traditions.
Equivalent - Duplicate Degree Credit Not Granted: ETHN 3301
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
ANTH 3760 (3) Exploring Culture and Media in Southeast Asia
Introduces students to the ethnomethodic method and critical media practices through immersion in the cultural politics of Indonesia. Students will learn to conduct ethnographic research and to use media-making as a research method. Students will learn the ethnohistory of Southeast Asia by focusing on the cultural diversity of Indonesia, with special attention to religious and political issues among marginalized groups.
Repeatable: Repeatable for up to 9.00 total credit hours.
Grading Basis: Letter Grade
Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Distribution-Social Sciences
Arts Sci Gen Ed: Diversity-Global Perspective

ANTH 3770 (3) Primates of Vietnam: Conservation in a Rapidly Developing Country
Immersive global seminar that will take place in southern and central Vietnam. We will travel to Ho Chi Minh City to begin an exploration into the conservation of primates in this country. Vietnam is home to 25 primate species and a rapidly growing human population. This course will examine challenges, success, and failures in the conservation of these creatures within the context of development within the historical context of Vietnam.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ANTH 4000 (3) Quantitative Methods in Anthropology
Surveys ways of deriving meaning from anthropological data by numerical means, including but not confined to basic statistical procedures.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 5000
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Recommended: Prerequisites ANTH 2010 and ANTH 2020.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ANTH 4020 (3-6) Explorations in Anthropology
Special topics in cultural and physical anthropology, as well as archaeology. Check with the department for semester offerings.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 5020
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4045 (3) Introduction to Museum Anthropology
Traces the development of Anthropology and museums in America from late 19th century to present day. Students are encouraged to: explore museum theory and practice; think critically about the history of relations among Native Americans, Anthropology, and museums; consider the legacy of collecting and challenges of representing others; and, examine the interplay of Anthropology, material culture, and colonialism.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 5045 and MUSM 5045
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4050 (3) Anthropology of Jews and Judaism
Explores topics in Jewish anthropology. Uses the lens of anthropological inquiry to explore, discover and analyze different concepts within Jewish culture. Topics explored will include customs, religious practices, languages, ethnic and regional subdivisions, occupations, social composition, and folklore. Explores fundamental questions about the definition of Jewish identity, practices and communities.
Equivalent - Duplicate Degree Credit Not Granted: JWST 4050
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

ANTH 4060 (3) Nutrition and Anthropology
Overview of the evolution of human diet and ecological and cultural factors shaping modern diets. Introduces fundamentals of nutrition and analysis of nutritional status. Analyzes ecological, social, and cultural factors leading to hunger and undernutrition, as well as biological and behavioral consequences of undernutrition.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 5060
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Recommended: Prerequisites ANTH 2010 and ANTH 2020 or EBIO 1210 and EBIO 1220 or EBIO 1030 and EBIO 1040.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ANTH 4070 (3) Methods in Biological Anthropology
Provides laboratory-based research experience in selected areas of biological anthropology. Research designs, methods and applications will be used to develop research skills. Students will read original research papers and carry out a research project of their own design. Area of emphasis within biological anthropology will depend on instructor.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 5070
Repeatable: Repeatable for up to 6.00 total credit hours.
Recommended: Prerequisites ANTH 2010 and ANTH 2020 and ANTH 2030 and ANTH 2040 and ANTH 4000 and students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Arts Sci Gen Ed: Distribution-Natural Sci Lab

ANTH 4110 (3) Human Evolutionary Biology
Detailed consideration of the fossil evidence for human evolution. Covers the discovery of important fossils and interpretations; descriptive information about the fossils; and data and theory from Pleistocene studies relating to ecology, ecological and behavioral data on modern apes and molecular studies that have bearing on the study of human evolution.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 5110
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
ANTH 4120 (3) Advanced Biological Anthropology
Selected topics in physical anthropology emphasizing faculty specialties. Topics may include population genetics and its application to understanding modern human diversity, human population biology, and primate ecology and evolution. Check with department for semester offerings.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 5120
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Recommended: Prerequisite ANTH 2010 or ANTH 2020 or EIBIO 1210 or EIBIO 1220.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ANTH 4125 (3) Evolution and the Human Life Cycle: A Primate Life History Perspective
Surveys primate biology, behavior and ecology using a life history approach. Using a comparative approach, explores life history as mammals, as primates and as humans by focusing on evolutionary decisions that occur during different life stages.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 5125
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ANTH 4129 (3) Aegean Art and Archaeology
Detailed study of the cultures of prehistoric Greece, the Cycladic Islands and Crete, their art and archaeology and their history within the broader context of the eastern Mediterranean, from earliest human settlement to the collapse of the Bronze Age at about 1100 B.C.E. Emphasis is on palace states.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 5129 and ARTH 4129 and CLAS 4129 and CLAS 5129
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

ANTH 4130 (3) Advanced Osteology
Detailed study of the human skeleton with special attention to health and demographic conditions in prehistoric cultures and the evaluation of physical characteristics and genetic relationships of prehistoric populations.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 5130
Recommended: Prerequisites ANTH 2010 and ANTH 2020 and ANTH 4000 and students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ANTH 4160 (3) Early Hominin Paleoecology
Explores current thinking about the diets, environments and lives of early human ancestors and their close kin. Strong emphasis on the methods used to construct such knowledge.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 5160
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ANTH 4170 (3) Primate Evolutionary Biology
Focuses on the fossil record of primates excluding the Hominini). Special emphasis is placed on delineating the origins of the order Primates, the origins of the primate suborders Strepsirhini and Haplorhini and the adaptations of extinct primates in light of our understanding of the modern primate adaptive radiations.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 5170
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Recommended: Prerequisite ANTH 2010 or EIBIO 1210.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ANTH 4180 (3) Anthropological Perspectives: Contemporary Issues
Students read, discuss, and write critical evaluations of contemporary publications in anthropology. Identifies basic themes that inform major anthropological perspectives. Students then bring these perspectives to bear on issues currently facing the human species.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4210 (3) Southwestern Archaeology
Explores the prehistory of the American Southwest from the earliest entry of humans into the area to the Spanish entrada. Focuses on important themes in cultural development: the adoption of agricultural strategies, sedentism, population aggregation, population movement, and social complexity.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 5210
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Recommended: Prerequisite ANTH 2200.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4220 (3) From Olmec to Aztec: The Archaeology of Mexico
Examines the archaeology of Mexico from the initial peopling of the Americas to the Spanish conquest of the Aztec empire. Studies origins of complex societies; ancient Mexican cities, states and empires; religion and politics; trade and interaction; ecology and economy; and social organization.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 5220
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Recommended: Prerequisite ANTH 2200.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4224 (3) Archaeology of the Maya and Their Neighbors
Begins with the environment and describes the earliest inhabitants and the Olmec civilization, then shifts to the earliest Maya and the emergence and collapse of classic Maya civilization. Compares and contrasts the societies of lower Central America.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 5224
Recommended: Prerequisite ANTH 2200.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4240 (3) Geoarchaeology
Applies geological principles and instruments to help solve archaeological problems. Focuses on site formation processes, soils, stratigraphy, environments, dating, remote sensing and geophysical exploration. Environmental and ethical considerations are included.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 5240
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Recommended: Prerequisite ANTH 2200.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
ANTH 4245 (3) Ceramics in Archaeology
Examines how archaeologists use ceramics to reconstruct the past. Topics include: the relationship between form and function; typology and classification; chronology and seriation; compositional analysis; production and exchange; social, cognitive and ideological aspects of style; and ethnoarchaeological studies of pottery use in contemporary societies. Includes two hours of lecture and two-hours of hands-on laboratory practicum per week.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 5245
Requisites: Requires prerequisite of ANTH 2200 (minimum grade D-).
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4270 (3) Plains Archaeology
Archaeological evidence for Native American ways of life on the North American Great Plains from the initial peopling of the region into the 19th century.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 5270
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Recommended: Prerequisite ANTH 2200.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4330 (3) Human Ecology: Archaeological Aspects
Surveys archaeological approaches to ecology, economy and landscape: glaciation, geomorphology and other physical processes creating and affecting sites and regions; environmental reconstruction; theories of human-environment interaction; landscape formation by forager, agricultural and complex societies; and ideologically structured landscapes.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 5330
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Recommended: Prerequisite ANTH 2200.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4340 (3) Archaeological Method and Theory
Surveys archaeological theories and methods within the context of the history of archaeology. Includes archaeological approaches to data recovery, analysis, and interpretation as well as an overview of cultural resources management and ethical issues in contemporary archaeology.
Recommended: Prerequisites ANTH 2200 and students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4350 (2-6) Archaeological Field and Laboratory Research
Students participate in archaeological field research or conduct laboratory analysis of archaeological materials and data. Students work with faculty on archaeological research projects with a field or lab focus, depending on the project undertaken.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 5350
Repeatability: Repeatable for up to 6.00 total credit hours.
Recommended: Prerequisites ANTH 2200 and students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4380 (3) Lithic Analysis and Replication
Uses diversity of approaches to the analysis of ancient stone tools, including fracture mechanics, lithic technology, materials, heat treatment and functional analysis. Percussion and pressure-flaking experiments are performed.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 5380
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Recommended: Prerequisite ANTH 2200.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4390 (3) Research Methods in Archaeology I
Method and theory of archaeology, emphasizing the interpretation of materials and data and the relationship of archaeology to other disciplines. Instructor consent required.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 5390
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Recommended: Prerequisite ANTH 2200.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4465 (3) The Archaeology of Inequality
Examines the theoretical and archaeological literature to understand how inequality develops, how it is maintained over time, and how it is negated. Presents an understanding of, and critically evaluates, the most prominent paradigms for understanding socially unequal relationships, and considers the vital role archaeology plays in understanding inequality.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4470 (3) Collections Research Practicum in Cultural Anthropology
Designed as a practicum, introduces students to research and practice in museum anthropology, utilizing the extensive anthropology collections at CU-Boulder Museum. Students will gain skills in primary and secondary research, collections and object research and narrative story development for the exhibition of anthropological material culture.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 5470 and MUSM 4912 and MUSM 5912
Repeatability: Repeatable for up to 6.00 total credit hours.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4500 (3) Cross-Cultural Aspects of Socioeconomic Development
Examines goals of international agencies that support development in underdeveloped countries. Anthropological perspective is provided for such issues as urban planning, health care and delivery, population control, rural development and land reform.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 5500
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4505 (3) Globalization and Transnational Culture
Covers the historical foundations for contemporary global change, addressing colonialism, global outsourcing, and cultural imperialism, with a particular emphasis on gender, class, and consumerism.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Recommended: Prerequisite ANTH 2100.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences Departmental Category: Asia Content

ANTH 4525 (3) Global Islams
Examines the historical formation of Islam in Indonesia and Southeast Asia so as to situate contemporary Islamic practices in a global context.
Recommended: Prerequisite ANTH 2100.
ANTH 4530 (3) Theoretical Foundations of Sociocultural Anthropology
Critically examines the pivotal schools of 20th century social theory that have shaped modern sociocultural anthropology, including the ideas of cultural evolutionism, Marxism, Durkheim, Weber, Freud, structuralism, postmodernism and contemporary anthropological approaches. Includes primary readings and seminar-style discussion.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 5530
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Recommended: Prerequisite ANTH 2100.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4570 (3) Anthropology of Fishing
Examines fishing methods, peoples, societies and cultures, emphasizing anthropology’s role in shaping fisheries management and development policy.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 5570
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4580 (3) The Holocaust: An Anthropological Perspective
Focuses on the Holocaust during the Third Reich, which involved the murder of millions of people, including six million Jews. Reviews the Holocaust’s history, dynamics and consequences as well as other genocides of the 20th century, using an anthropological approach.
Equivalent - Duplicate Degree Credit Not Granted: JWST 4580
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4605 (3) Anthropology of Neuroscience
Examines the connections between the production and social uptake of neuroscientific knowledge, and explores how transformations in neuroscience shape understandings of human nature. Focusing on anthropological, philosophical, and popular literature, this course addresses the following themes through a cultural and anthropological lens: subjectivity and neuroimaging, "disability" and "neurodiversity", child development, gender, "risk" and neoliberal governance, and the production of scientific expertise.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 5605
Grading Basis: Letter Grade

ANTH 4610 (3) Medical Anthropology
Examines health, illness, disease and treatment across a diversity of cases, all of which involve political economic inequalities, individual and collective experiences of medical systems and the historical and contemporary treatment of distinct populations. A demanding upper-level cultural anthropology course in the field of Medical Anthropology, a subfield of cultural anthropology designed for advanced undergraduate students and early graduate students with an emphasis on the intersections of science, medicine and populations.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 5610
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Recommended: Prerequisite ANTH 2100.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4615 (3) Kinship: Being and Belonging
Explores interpersonal relationships as foundational objects of analysis. This course takes a comparative approach to examine both large-scale social movements and intimate practices, examining how the ideologies and practices of relatedness intersect with and are shaped by gender and sexuality, national identity and state building, race and ethnicity, embodiment, ways of understanding signs in the world (semiotics), the law, and economic relationships. Previously offered as a special topics course.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Recommended: Prerequisite ANTH 2100.
Grading Basis: Letter Grade

ANTH 4620 (3) Nationalism and Cultural Citizenship
Explores the nature of ethnic conflict, nationalism, and cultural citizenship in different contexts, including the United States. Is the nation-state dead? What effect do extranational and transnational organizations/institutions (e.g., European Union) have on the development of nationalism? Through the exploration of contemporary theory and case studies, this class will address these important contemporary concerns.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Recommended: Prerequisite ANTH 2100.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4630 (3) Nomadic Peoples of East Africa
Examines the issues of current concern in the study of East African pastoral peoples. First half of the course is devoted to historical perspectives and the second half explores the transition from subsistence to market oriented economies.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 5630
Recommended: Prerequisite students with 57-180 credits (Junior or Senior) Anthropology (ANTH) majors only.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4690 (3-6) Anthropology of Tibet
Explores the culture of Tibet in both historical and thematic manners, considering the long-term development of Tibetan cultural practices and institutions as well as the role of political changes introduced to Tibet in the 20th century. Topics covered include region, politics, gender, warfare, poetry and literature, and life under Chinese rule and as refugees around the world.
Requisites: Restricted to students with 57-180 credits (Junior or Senior) Anthropology (ANTH) majors only.
Recommended: Prerequisite ANTH 2100.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4700 (3) Practicing Anthropology
Learn ethnographic methods in the classroom and implement these skills in placements with community organizations, where students pursue an applied research project. This course teaches students how to use anthropological theory and methods to investigate social problems, and to consider how ethnographic research techniques can be applied to positively impact society.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 5700
Requisites: Requires prerequisite course of ANTH 2100 (minimum grade B). Restricted to students with 87-180 credits (Junior or Senior) Anthropology (ANTH) majors only.
Grading Basis: Letter Grade
ANTH 4710 (3) Departmental Honors in Anthropology 1
Course work built around theme of research design as a means of integrating previous training in the field of anthropology as well as providing an opportunity to perform creative scientific investigations. Prepares students to write an honors thesis in ANTH 4720. Required of students doing Anthropology departmental honors.  
**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.  
**Additional Information:** Arts Sciences Honors Course

ANTH 4720 (3) Departmental Honors in Anthropology 2
Continuation of ANTH 4710.  
**Recommended:** Prerequisite ANTH 4710.  
**Additional Information:** Arts Sciences Honors Course

ANTH 4730 (3) Latin American Politics and Culture through Film and Text
Introduces students to the political cultures and societies of Latin America. Through historical and ethnographic text and documentary and non-documentary cinema, this course will explore class relations, ideology and resistance from the conquest to the present.  
**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 5730  
**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).  
**Recommended:** Prerequisite ANTH 2100.  
**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4735 (3) Contemporary Cuban Culture: Race, Gender and Power
Ground students' understanding of contemporary Cuba within the global context. How do those outside the island imagine Cuba and why? What are the realities? In a world of U.S. dominated globalization, only recently have we relaxed a forceful economical blockade on the island: what does the U.S. mean in the Cuban imaginary, both in the past and present? To attend to global processes as they affect local (Cuban) experience, texts from anthropology, history, policy, literature, film and music will be drawn upon. Students will learn how long-standing patterns regarding race, color, class and gender relations have evolved into the socialist and now the "post-socialist" context.  
**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 5735  
**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.  
**Grading Basis:** Letter Grade  
**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4740 (3) Peoples and Cultures of Brazil
Thematically surveys theoretical and ethnographic issues that have been important in understanding Brazil. Read and write critically about textual and visual representations of Brazil presented in the course.  
**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).  
**Recommended:** Prerequisites ANTH 2100 and three or more cultural anthropology courses.  
**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4745 (3) Science, Technology and Society
Explores the cultural work of science and technology in contemporary societies. The course will focus on anthropological studies of technoscientific works ranging from high-energy particle physics and marine biology to hackathons and space exploration. Discussion topics include the relationship between science, technology and political power; scientific controversies; paradigm shifts and scientific revolutions; and ideas of objectivity, representation and abstraction.  
**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 5745  
**Grading Basis:** Letter Grade  
**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4750 (3) Culture and Society in South Asia
Intensive analysis of major issues in anthropological research on South Asia (India, Pakistan, Bangladesh, Nepal and Sri Lanka), including kinship, gender, marriage, caste system, religion and ritual, ethnic conflict and social change.  
**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 5750  
**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).  
**Recommended:** Prerequisite ANTH 2100.  
**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4755 (3) Cultures of Expertise: Science, Power and Knowledge
Examines the expertise as a cultural category. Students will consider the historical and cultural contexts of various forms of expertise and the social roles of experts from car mechanics to civil engineers, doctors and scientists. Students will be given opportunities to reflect analytically on their own experiences with increasingly specialized education as they develop "professional vision" in their chosen fields.  
**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 5755  
**Grading Basis:** Letter Grade  
**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4760 (3) Ethnography of Southeast Asia and Indonesia
Introduces the historical, political, and cultural dimensions of Southeast Asia, focusing primarily on Malaysia, the Philippines, Singapore and Indonesia, with some coverage of mainland Southeast Asia.  
**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 5760  
**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).  
**Recommended:** Prerequisite ANTH 2100.  
**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4770 (3) Anthropology of Tourism
Introduces students to anthropological theories on tourism and considers those theories in the contexts of the varied sites and forms of tourism practiced around the world today. We will ask: why do people tour? Where do they go? And most centrally: how do the hosts to tourism feel about these outside visitors? Having been exposed to questions of globalization, development, belonging, race, gender, and desire, students will then be asked to reflect upon and theorize their own touristic experiences.  
**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).  
**Recommended:** Prerequisite ANTH 2100.  
**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4800 (3) Language and Culture
Principles of language structure and how language and culture interrelate, how language and language use are affected by culture and how culture may be affected by use of, or contact with, particular languages.  
**Equivalent - Duplicate Degree Credit Not Granted:** LING 4800  
**Recommended:** Prerequisites ANTH 2100 or LING 1000 or LING 2400 and students with 57-180 credits (Junior or Senior) only.  
**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4840 (1-8) Independent Study
For upper-division undergraduate students.  
**Repeatable:** Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.  
**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
ANTH 4910 (1-3) Teaching Anthropology
Practicum by special arrangement only. Students learn to teach anthropology by serving as recitation leaders or tutors in introductory courses or as small group leaders in advanced courses. 
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
ANTH 4919 (3) Collections Research Practicum: Archaeology
Focuses on Museum collections management from archaeological sites mainly in the American Southwest and Mongolia. The course involves readings, discussion, and collections analysis and archival documentation. Extra time outside of class is required for the practicum aspect of this course. Each student will need to schedule with the professor an additional 3 hours each week when they will focus on an aspect of their project, to be discussed below under grading criteria. 
Equivalent - Duplicate Degree Credit Not Granted: MUSM 5919 and ANTH 5919
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Grading Basis: Letter Grade
ANTH 4930 (1-6) Anthropology Internship
Provides academically supervised opportunities for junior and senior anthropology majors to work in public and private sectors on projects related to students’ career goals. Relates classroom theory to practice. Requires at least 48 hours on the job per credit hour and evidence (paper, employer evaluation, work journal) of significant learning. 
Equivalent - Duplicate Degree Credit Not Granted: ANTH 5930
Repeatable: Repeatable for up to 9.00 total credit hours.
Recommended: Prerequisites ANTH 2010 and ANTH 2100 and ANTH 2200 and students with 57-180 credits (Junior or Senior) Anthropology majors, with a minimum 3.25 GPA.

Anthropology - Bachelor of Arts (BA)
Anthropology is the study of humans and our biological relatives across time and space. The field involves a global look at human cultures from prehistoric times to the present, integrating findings from the social sciences, natural sciences and humanities. Students of anthropology learn to appreciate biological, social, and cultural diversity throughout human history and to understand the meaning of human biological and cultural development.

The undergraduate degree in anthropology emphasizes knowledge and awareness of:

- Basic methods, concepts, alternative theories and approaches and modes of explanation appropriate to each of the three main subfields of the discipline (archaeology, biological anthropology and cultural anthropology).
- Basic archaeological techniques, including stratigraphy, dating and inference of human behavior from archaeological data, as well as human history from its beginning through the emergence of complex societies.
- Variation, patterning and creativity in human communities and symbolic systems, including ecological, social structural and cultural factors exemplified in a diverse array of the world’s societies, including those undergoing change as a result of globalization and the impact of contemporary social and political movements.
- Theories of primate and human evolution and the basic data of the hominin fossil record, as well as biological variation in contemporary human populations.

In addition, students completing the degree in anthropology are expected to acquire the ability and skills to:

- Identify trends or patterns in anthropological data from different cultures or periods, identify an appropriate context of explanation or interpretation and formulate a testable explanation or reasonable interpretation, including the ability to identify data that constitute credible evidence for an explanation or interpretation.
- Identify and define a significant problem or topic in anthropology and analyze and interpret data in a systematic manner.

Requirements
Program Requirements
Students must complete the general requirements of the College of Arts and Sciences and the required courses listed below. A minimum of 30 credit hours in anthropology is required for the degree, 18 of which must be upper-division.

Through the required coursework for the major, students will complete all 12 credits in the Social Sciences area and a minimum of 6 credits in the Natural Sciences area of the Gen Ed Distribution Requirement, and the Global Perspective component of the Gen Ed Diversity Requirement. Depending on elective courses selected within the major, students can complete the rest of the Natural Sciences area in the Gen Ed Distribution Requirement and the US Perspective component of the Gen Ed Diversity Requirement.

Additional notes for the ANTH major:

- Archaeology and Cultural Anthropology classes are within the Gen Ed Social Sciences division.
- Biological Anthropology classes are within the Gen Ed Natural Sciences division.

Electives in Anthropology

| Lower or Upper-division ANTH Elective | 3 |
| Upper-division ANTH Electives (students planning to pursue graduate work in anthropology are advised to take ANTH 4000 and ANTH 4530) | 9 |

Total Credit Hours 30

In addition, students planning to pursue writing a senior honor’s thesis or graduate work in anthropology are advised to take ANTH 4000 and an upper-division anthropology theory course.
Graduating in Four Years
Consult the Four-Year Guarantee Requirements for more information on eligibility. The concept of "adequate progress" as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress in anthropology, students should meet the following requirement:

- By the beginning of the second semester, declare the anthropology major.

Recommended Four-Year Plan of Study

Learning Outcomes
Through their coursework in anthropology, students will:

- Understand the concepts of cultural relativism and ethnocentrism by studying other cultures.
- Understand the range of human diversity, both biological and cultural, across space and throughout time, by examining human evolution, early complex polities, and contemporary groups.
- Analyze the ways the environment influenced/influences humans and the ways humans influenced/influences the environment, by studying the long- and short-term trajectory of human development.
- Apply anthropological knowledge to pressing social issues by debating current events.
Anthropology - Minor

Anthropology is the study of humans and our biological relatives across time and space. Anthropology is the only field to address all aspects of the human experience—cultural, biological, historical—so the discipline necessarily incorporates a wide range of theoretical and methodological traditions, drawing on and contributing to approaches in the humanities, social sciences and natural sciences. It is the breadth of our vision of what it means to be human, as well as the breadth of our theoretical and methodological approaches, that constitutes our unique mission and role within the university. Thus, a minor in anthropology would provide a rich intellectual complement to a wide range of majors within the College of Arts and Sciences.

Requirements

A minimum of 18 credit hours of anthropology courses, including a minimum of 9 upper-division credit hours, are required for the minor. All coursework applied to the minor must be completed with a grade of C- or better; no pass/fail work may be applied. The grade point average for all anthropology coursework must equal 2.00 (C) or higher.

Students will be allowed to apply no more than 9 credit hours, including 6 upper-division credit hours, of transfer work towards a minor in anthropology.

Coursework applied towards a minor in anthropology may also be applied towards Gen. Ed. requirements.

Electives

Nine hours of upper-division electives in anthropology 9

Total Credit Hours 18

The three introductory courses will provide all minors with an appreciation of the range of scholarship encompassed by contemporary anthropology.

Students are recommended to select upper-division coursework to best complete their majors. For example, the following subjects work well with the majors listed:

- **Cultural anthropology**: Asian studies, communications, economics, ethnic studies, film studies, history, international affairs, Jewish studies, linguistics, media studies, political science, religious studies, sociology or women and gender studies majors.
- **Archaeology**: Art history, classics or environmental design majors.
- **Biological anthropology**: Ecology and evolutionary biology, integrated physiology or molecular, cellular and developmental biology majors.
- **Archaeology or biological anthropology**: History or humanities majors.
- **Any of the anthropology sub-disciplines**: Environmental studies or geography majors.

Applied Mathematics

The Department of Applied Mathematics in the College of Arts and Sciences offers courses that focus on providing students with the mathematical tools and problem-solving strategies that are useful in science and engineering. The department offers a range of courses and research opportunities in many areas, including computational mathematics, mathematical biology, nonlinear phenomena, physical applied mathematics and probability and statistics. Each of these areas is described below.

The undergraduate Bachelor of Science degree (p. 676) in Applied Mathematics is offered through the College of Engineering and Applied Science. The undergraduate Bachelor of Arts degree in Statistics and Data Science is offered through the College of Arts and Sciences.

**Course codes for this program include APPM and STAT.**

**Computational Mathematics**

The study of computational mathematics has grown rapidly over the past 15 years and has allowed mathematicians to answer questions and develop insights not possible only 20-30 years ago. Modern computational methods require an in-depth knowledge of a variety of mathematical subjects which include linear algebra, analysis, ordinary and partial differential equations, asymptotic analysis, elements of harmonic analysis, and nonlinear equations.

Since computers are invaluable tools for an applied mathematician, students are expected to attain a highly professional level of computer literacy and gain a substantial knowledge of operating systems and hardware.

Computational mathematics courses include the study of computational linear algebra, optimization, numerical solution of ordinary and partial differential equations, solution of nonlinear equations as well as advanced seminars in wavelet and multi-resolution analysis.

**Mathematical Biosciences**

Recent advances in our ability to quantitatively study biological phenomena have provided a tremendous number of exciting opportunities for applied mathematicians. The careful modeling, analysis, and simulation of these systems using the standard tools of applied mathematics has led to novel and non-intuitive insights into biology.

Furthermore, deeper understanding of the inherently complex and multiscale nature of biological systems, in many cases, requires the development of new mathematical tools, techniques, and methodologies (a challenge to which applied mathematics is particularly well suited). Research areas in APPM encompass immunology, infectious diseases, cardiology, neuroscience, and population genetics.

See the Mathematical Biology Group page (http://mathbio.colorado.edu/)

**Mathematical Geosciences**

Mathematical geosciences encompass quantitative modeling, analysis, and simulation of all aspects of the Earth system. Our faculty’s research intersects a broad range of geosciences: from the geodynamo to ocean circulation, from computational methods for seismic imaging to the impacts of weather on epidemiology, from tsunamis to stochastic weather generators. The complex and multiscale nature of geophysical systems, in many cases, requires the development of new mathematical
models and simulation strategies, a challenge to which applied mathematics is particularly well suited.

Appropriate coursework includes analysis and computation, probability and statistics, as well as background courses in one of the sciences or engineering fields in which one intends to do research.

**Nonlinear Waves and Dynamical Systems**

In recent years there has been an explosion of interest in the study of nonlinear waves and dynamical systems with analytical results often motivated by the use of computers. The faculty in the Program is actively and intensively involved in this growing field; research areas include integrable and near-integrable systems, conservative and dissipative chaos, as well as numerical computation.

Topics of interest include solitons, dispersive shock waves, integrable systems, cellular automata, pattern formation, qualitative structure and bifurcation theory, onset of chaos and turbulence, analytic dynamics, and transport phenomena. Program courses in this field include dynamical systems, nonlinear wave motion and many advanced seminars.

Suitable background courses are analysis, computation, partial differential equations, and methods in applied mathematics. Valuable supplemental courses include mechanics and fluid dynamics.

**Physical Applied Mathematics**

Physical Applied Mathematics is a term which generally refers to the study of mathematical problems with direct physical application. This area of research is intrinsically interdisciplinary. In addition to mathematical analysis, it requires a deep understanding of the underlying applications area, and usually requires knowledge and experience in numerical computation.

The Program’s affiliated faculty have a wide variety of expertise in various areas of application, e.g. atmospheric and fluid dynamics, theoretical physics, plasma physics, genetic structure, etc. The course requirements of the Program are designed to provide students with a foundation for their study (analysis and computation).

The Program also requires supplemental courses in one of the science or engineering fields which are needed to begin doing thesis research in physical applied mathematics.

See the Dispersive Hydrodynamics Lab (https://www.colorado.edu/amath/dispersive-hydrodynamics-lab/) page, APPM’s own fluid dynamics laboratory.

**Statistics and Applied Probability**

Almost all natural phenomena in the technological, biological, physical and social sciences have random components. Applied probability is the application of probabilistic methods to understand the random elements in real-life problems. Statistics is the science of using data, which typically arises from the randomness inherent in nature, to gain new knowledge.

Research areas of the applied math and affiliated faculty exhibit this interplay between mathematics and real-life problems. Areas of current interest include optimization of stochastic networks; the study of stochastic processes and stochastic differential equations in hydrology and telecommunications; probabilistic models, and statistical tests based on these models, in genetics and RNA sequencing; extreme value theory in estimation of maximal wind speeds.

Appropriate coursework includes analysis, probability and statistics, as well as background courses in one of the sciences or engineering fields in which one intends to do research.

For details on the range of courses and research opportunities available through the Department of Applied Mathematics, visit www.colorado.edu/amath.

**Bachelor’s Degree**

- Statistics and Data Science - Bachelor of Arts (BA) (p. 99)

**Minors**

- Applied Mathematics - Minor (p. 101)
- Statistics - Minor (p. 101)

**Faculty**

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member’s home department.

Ablowitz, Mark J. (https://experts.colorado.edu/display/fisid_100691/) Professor; PhD, Massachusetts Institute of Technology

Courses

APPM 1235 (4) Pre-Calculus for Engineers
Prepares students for the challenging content and pace of the calculus sequence required for all engineering majors. Covers algebra, trigonometry and selected topics in analytical geometry. Prepares students for the calculus courses offered for engineering students. Requires students to engage in rigorous work sessions as they review topics that they must be comfortable with to pursue engineering coursework. Structured to accustom students to the pace and culture of learning encountered in engineering math courses. For more information about the math placement referred to in the "Enrollment Requirements", please contact your academic advisor. Formerly GEEN 1235.
Equivalent - Duplicate Degree Credit Not Granted: MATH 1021 or MATH 1150
Requisites: Requires an ALEKS math exam taken in 2016 or earlier, or placement into pre-calculus based on your admissions data and/or CU Boulder coursework.

APPM 1236 (1) Precalculus Work Group
Develops and enhances problem solving skills for students enrolled in APPM 1235. Course is conducted in a collaborative learning environment with students working in groups under the guidance of a facilitator.
Requisites: Requires enrollment in corequisite course of APPM 1235.
Grading Basis: Pass/Fail
APPM 1340 (4) Calculus 1 with Algebra, Part A
Studies selected topics in analytical geometry and calculus: rates of change of functions, limits, derivatives and their applications. This course and APPM 1345 together are equivalent to APPM 1350. The sequence of this course and APPM 1345 is specifically designed for students whose manipulative skills in the techniques of high school algebra and precalculus may be inadequate for APPM 1350. For more information about the math placement referred to in the "Enrollment Requirements", please contact your academic advisor.

Requisites: Requires prerequisite course of APPM 1235 or MATH 1021 or MATH 1150 or MATH 1160 (minimum grade C-) or an ALEKS math exam taken in 2016 or earlier, or placement into pre-calculus based on your admissions data and/or CU Boulder coursework.

APPM 1340 (4) Calculus 1 with Algebra, Part B
Continuation of APPM 1340. Studies selected topics in calculus: derivatives and their applications, integration, differentiation and integration of transcendental functions. Algebraic and trigonometric topics are studied throughout, as needed.

Equivalent - Duplicate Degree Credit Not Granted: APPM 1350 or ECON 1088 or MATH 1081 or MATH 1300 or MATH 1310 or MATH 1330
Requisites: Requires prerequisite course of APPM 1340 (minimum grade C-).

APPM 1350 (4) Calculus 1 for Engineers
Topics in analytical geometry and calculus including limits, rates of change of functions, derivatives and integrals of algebraic and transcendental functions, applications of differentiations and integration. Students who have already earned college credit for calculus 1 are eligible to enroll in this course if they want to solidify their knowledge base in calculus 1. For more information about the math placement referred to in the "Enrollment Requirements", contact your academic advisor.

Equivalent - Duplicate Degree Credit Not Granted: APPM 1345 or ECON 1088 or MATH 1081 or MATH 1300 or MATH 1310 or MATH 1330
Requisites: Requires prerequisite course of APPM 1340 or MATH 1021 or MATH 1150 or MATH 1160 or MATH 1300 (minimum grade C-) or an ALEKS math exam taken in 2016 or earlier, or placement into calculus based on your admissions data and/or CU Boulder coursework.

Additional Information: GT Pathways: GT-MA1 - Mathematics
Arts Sci Core Curr: Quant Reasn Mathmat Skills
Arts Sci Gen Ed: Quantitative Reasoning Math

APPM 1351 (1) Calculus 1 Work Group
Provides problem-solving assistance to students enrolled in APPM 1350. Student groups work in collaborative learning environment. Student participation is essential.

Repeatable: Repeatable for up to 2.00 total credit hours.

Requisites: Requires enrollment in corequisite course of APPM 1350 or APPM 1345.

Grading Basis: Pass/Fail

APPM 1360 (4) Calculus 2 for Engineers
Continuation of APPM 1350. Focuses on applications of the definite integral, methods of integration, improper integrals, Taylor’s theorem, and infinite series.

Equivalent - Duplicate Degree Credit Not Granted: MATH 2300
Requisites: Requires prerequisite course of APPM 1345 or APPM 1350 or MATH 1300 (minimum grade C-).

APPM 1361 (1) Calculus 2 Work Group
Provides problem solving assistance for students enrolled in APPM 1360. Conducted in a collaborative learning environment. Student work groups solve calculus problems with assistance of facilitator.

Requisites: Requires enrollment in corequisite course of APPM 1360.

Grading Basis: Pass/Fail

APPM 1390 (1) A Game for Calculus
Coaches students to implement study strategies geared specifically toward APPM Calculus in a structured, supportive, small group environment. Department consent required.

Repeatable: Repeatable for up to 3.00 total credit hours.

APPM 2350 (4) Calculus 3 for Engineers
Covers multivariable calculus, vector analysis, and theorems of Gauss, Green, and Stokes.

Equivalent - Duplicate Degree Credit Not Granted: MATH 2400
Requisites: Requires prerequisite course of APPM 1360 or MATH 2300 (minimum grade C-).

APPM 2351 (1) Calculus 3 Work Group
Provides problem solving assistance to students enrolled in APPM 2350. Conducted in a collaborative learning environment. Student work groups solve calculus problems with the assistance of a facilitator.

Requisites: Requires enrollment in corequisite course of APPM 2350.

Grading Basis: Pass/Fail

APPM 2360 (4) Introduction to Differential Equations with Linear Algebra

Equivalent - Duplicate Degree Credit Not Granted: both MATH 2130 and MATH 3430
Requisites: Requires prerequisite course of APPM 1360 or MATH 2300 (minimum grade C-).

APPM 2450 (1) Calculus 3 Computer Lab
Selected topics in analytic geometry and calculus with a focus on symbolic computation using Mathematica.

Requisites: Requires a corequisite course of APPM 2350.

Grading Basis: Pass/Fail

APPM 2460 (1) Differential Equations Computer Lab
Selected topics in differential equations and linear algebra with a focus on symbolic computation using MATLAB.

Requisites: Requires enrollment in a corequisite course of APPM 2360.

Grading Basis: Pass/Fail

APPM 2720 (1-3) Open Topics in Lower Division Applied Mathematics
Provides a vehicle for the development and presentation of new topics that are accessible to lower division Applied Mathematics students. These topics have the potential to be incorporated into the core APPM curriculum.

Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite course of APPM 1350 or MATH 1300 (minimum grade C-).

Grading Basis: Letter Grade
APP 2750 (4) Java: Training, Mathematical Algorithms, and Mobile Apps
Preparatory course for Java programming. Provides necessary background for Java language: basic object-oriented concepts, analysis, and design. Learn to create Java applets, applications and mobile apps, create graphic context, and identify the key features of Java foundation classes as well as other Java-related technology. Material is taught in the context of mathematical algorithms from calculus. Department enforced requisite, knowledge of a programming language.
Requisites: Requires prerequisite course of APPM 1350 or MATH 1300 (minimum grade C-).

APP 3010 (3) Chaos in Dynamical Systems
Introduces undergraduate students to chaotic dynamical systems. Topics include smooth and discrete dynamical systems, bifurcation theory, chaotic attractors, fractals, Lyapunov exponents, synchronization and networks of dynamical systems. Applications to engineering, biology and physics will be discussed.
Requisites: Requires prerequisite course of APPM 2360 or MATH 3430 (minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

APP 3050 (3) Scientific Computing in Matlab
Topics covered include: approximations in computing, computer arithmetic, interpolation, matrix computations, nonlinear equations, optimization, and initial-value problems with emphasis on the computational cost, efficiency, and accuracy of algorithms. The problem sets are application-oriented with examples taken from orbital mechanics, physics, genetics, and fluid dynamics.
Requisites: Requires prerequisite course of APPM 2360 or MATH 3430 (minimum grade C-).

APP 3170 (3) Discrete Applied Mathematics
Introduces students to ideas and techniques from discrete mathematics that are widely used in science and engineering. Mathematical definitions and proofs are emphasized. Topics include formal logic notation, proof methods; set theory, relations; induction, well-ordering; algorithms, growth of functions and complexity; integer congruences; basic and advanced counting techniques, recurrences and elementary graph theory. Other selected topics may also be covered.
Requisites: Requires a prerequisite of APPM 1360 or MATH 2300 (all minimum grade C-).

APP 3170 (3) Matrix Methods and Applications
Introduces linear algebra and matrices with an emphasis on applications, including methods to solve systems of linear algebraic and linear ordinary differential equations. Discusses vector space concepts, decomposition theorems, and eigenvalue problems.
Equivalent - Duplicate Degree Credit Not Granted: MATH 2130 and MATH 2135
Requisites: Requires prerequisite course of APPM 2350 or APPM 2360 or MATH 2400 (minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

APP 3350 (3) Advanced Engineering Calculus
Extends the treatment of engineering mathematics beyond the topics covered in Calculus 3 and differential equations. Topics include non-dimensionalization, elementary asymptotics and perturbation theory, Reynold’s transport theorem and extensions of Leibnitz’s rule, as applied to continuum conservation equations, Hamiltonian formulations, Legendre and Laplace transforms, special functions and their orthogonality properties.
Requisites: Requires prerequisite course of APPM 2350 or MATH 2400 and APPM 2360 (all minimum grade C-).

APP 3570 (3) Applied Probability
Studies axioms, counting formulas, conditional probability, independence, random variables, continuous and discrete distribution, expectation, joint distributions, moment generating functions, law of large numbers and the central limit theorem.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 3810 or MATH 4510 STAT 3100
Requisites: Requires a prerequisite or corequisite course of APPM 2350 or MATH 2400 (prereq minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

APP 4120 (3) Introduction to Operations Research
Studies linear and nonlinear programming, the simplex method, duality, sensitivity, transportation and network flow problems, some constrained and unconstrained optimization theory, and the Kuhn-Tucker conditions, as time permits.
Equivalent - Duplicate Degree Credit Not Granted: APPM 5120 and MATH 4120 and MATH 5120
Requisites: Requires a prerequisite course of APPM 3310 or MATH 3130 or MATH 3135 (minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

APP 4350 (3) Methods in Applied Mathematics: Fourier Series and Boundary Value Problems
Reviews ordinary differential equations, including solutions by Fourier series. Physical derivation of the classical linear partial differential equations (heat, wave, and Laplace equations). Solution of these equations via separation of variables, with Fourier series, Fourier integrals, and more general eigenfunction expansions.
Equivalent - Duplicate Degree Credit Not Granted: APPM 5350
Requisites: Requires prerequisite courses of APPM 2350 or MATH 2400 and APPM 2360 (all minimum grade C-) and a prerequisite or corequisite course of APPM 3310 or MATH 3130 or MATH 3135 (prereq minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

APP 4360 (3) Methods in Applied Mathematics: Complex Variables and Applications
Introduces methods of complex variables, contour integration and theory of residues. Applications include solving partial differential equations by transform methods, Fourier and Laplace transforms and Riemann-Hilbert boundary-value problems, conformal mapping to ideal fluid flow and/or electrostatics.
Equivalent - Duplicate Degree Credit Not Granted: APPM 5360
Requisites: Requires prerequisite courses of APPM 2350 or MATH 2400 and APPM 2360 (all minimum grade C-) and a prerequisite or corequisite course of APPM 3310 or MATH 3130 or MATH 3135 (prereq minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
APPM 4370 (3) Computational Neuroscience
Applies mathematical and computational methods to neuroscience. Techniques from linear algebra, differential equations, introductory dynamical systems, probability, stochastic processes, model validation, and machine learning will be learned and used. Neuroscience topics include neural spiking, network dynamics, probabilistic inference, learning, and plasticity. Will learn how the brain uses computational principles to enact decision making, vision, and memory. Recommended background includes linear algebra, differential equations, probability, and programming. Students will hone programming skills in MATLAB/Python.
Equivalent - Duplicate Degree Credit Not Granted: APPM 3310
Requisites: Requires prerequisite courses of APPM 2360 and APPM 3310 (all minimum grade C-).
Recommended: Prerequisite APPM 3570/STAT 3100, STAT 2600 or CSCI 3022.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

APPM 4380 (3) Modeling in Applied Mathematics
An exposition of a variety of mathematical models arising in the physical and biological sciences. Students' modeling projects are presented in class. Topics may include: GPS navigation, medical imaging, ocean waves, and computerized facial recognition.
Equivalent - Duplicate Degree Credit Not Granted: APPM 5380
Requisites: Requires prerequisite courses of APPM 2350 or MATH 2400 and APPM 2360 (all minimum grade C-).
Recommended: Prerequisites APPM 3310 and APPM 4350 and APPM 4650.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

APPM 4390 (3) Modeling in Mathematical Biology
Investigates how complex systems in biology can be studied using applied mathematics. Examines several case studies which include topics from microbiology, enzyme reaction kinetics, neuroscience, ecology, epidemiology, physiology and bioengineering.
Equivalent - Duplicate Degree Credit Not Granted: APPM 5390
Requisites: Requires prerequisite courses of APPM 2360 and APPM 3310 or MATH 3130 or MATH 3135 (all minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

APPM 4440 (3) Undergraduate Applied Analysis 1
Provides a rigorous treatment of topics covered in Calculus 1 and 2. Topics include convergent sequences; continuous functions; differentiable functions; Darboux sums, Riemann sums, and integration; Taylor and power series and sequences of functions.
Requisites: Requires prerequisite courses of APPM 2350 or MATH 2400 and APPM 2360 (all minimum grade C-) and a prerequisite or corequisite course of APPM 3310 or MATH 3130 or MATH 3135 (prereq minimum grade C-).

APPM 4450 (3) Undergraduate Applied Analysis 2
Continuation of APPM 4440. Study of multidimensional analysis including n-dimensional Euclidean space, continuity and uniform continuity of functions of several variables, differentiation, linear and nonlinear approximation, inverse function and implicit function theorems, and a short introduction to metric spaces.
Requisites: Requires prerequisite course of APPM 4440 or MATH 3001 (minimum grade C-).

APPM 4490 (3) Theory of Machine Learning
Presents the underlying theory behind machine learning in proofs-based format. Answers fundamental questions about what learning means and what can be learned via formal models of statistical learning theory. Analyzes some important classes of machine learning methods. Specific topics may include the PAC framework, VC-dimension and Rademacher complexity.
Requisites: Requires prerequisite course of APPM 4440 (minimum grade C-).
Recommended: Prerequisite APPM 3570/STAT 3100, STAT 2600 or CSCI 3022.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

APPM 4510 (3) Data Assimilation in High Dimensional Dynamical Systems
Develops and analyzes approximate methods of solving the Bayesian inverse problem for high-dimensional dynamical systems. After briefly reviewing mathematical foundations in probability and statistics, the course covers the Kalman filter, particle filters, variational methods and ensemble Kalman filters. The emphasis is on mathematical formulation and analysis of methods.
Equivalent - Duplicate Degree Credit Not Granted: APPM 5510, STAT 4250 and STAT 5250
Requisites: Requires prerequisite courses of APPM 3310 and APPM 3570 or STAT 3100 or MATH 4510 (all minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

APPM 4515 (3) High-Dimensional Probability for Data Science
Provides students with an exposition of the most recent methods of high-dimensional probability for the analysis of high dimensional datasets. Applications include randomized algorithms and high-dimensional random models of datasets.
Equivalent - Duplicate Degree Credit Not Granted: APPM 5515
Requisites: Requires prerequisite courses of APPM 3310 and APPM 3570 (minimum grade C-).

APPM 4530 (3) Stochastic Analysis for Finance
Studies mathematical theories and techniques for modeling financial markets. Specific topics include the binomial model, risk neutral pricing, stochastic calculus, connection to partial differential equations and stochastic control theory.
Equivalent - Duplicate Degree Credit Not Granted: APPM 5530, STAT 4230 and STAT 5230
Requisites: Requires prerequisite courses of APPM 3310 and APPM 3570, or STAT 3100, or MATH 4510 (all minimum grade C-).

APPM 4560 (3) Markov Processes, Queues, and Monte Carlo Simulations
Brief review of conditional probability and expectation followed by a study of Markov chains, both discrete and continuous time, including Poisson point processes. Queuing theory, terminology and single queue systems are studied with some introduction to networks of queues. Uses Monte Carlo simulation of random variables throughout the semester to gain insight into the processes under study.
Equivalent - Duplicate Degree Credit Not Granted: APPM 5560 and STAT 4100
Requisites: Requires prerequisite courses of APPM 3570 or STAT 3100 or MATH 4510 (all minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
APPMM 4565 (3) Random Graphs
Introduces mathematical techniques, including generating functions, the first- and second-moment method and Chernoff bounds to study the most fundamental properties of the Erdos-Renyi model and other celebrated random graph models such as preferential attachment, fixed degree distribution, and stochastic block models.
Equivalent - Duplicate Degree Credit Not Granted: APPM 5565
Requisites: Requires prerequisite APPM 3570 or MATH 4510 (both minimum grade C).
Grading Basis: Letter Grade

APPMM 4570 (3) Statistical Methods
Covers basic statistical concepts with accompanying introduction to the R programming language. Topics include discrete and continuous probability laws, random variables, expectation and variance, central limit theorem, testing hypothesis and confidence intervals, linear regression analysis, simulations for validation of statistical methods and applications of methods in R.
Equivalent - Duplicate Degree Credit Not Granted: APPM 5570
Requisites: Requires prerequisite course of APPM 1360 or MATH 2300 (minimum grade C).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

APPMM 4590 (3) Statistical Modeling
Introduces methods, theory and applications of statistical models, from linear models (simple and multiple linear regression), to hierarchical linear models. Topics such as estimation, residual diagnostics, goodness of fit, transformations, and various strategies for variable selection and model comparison will be discussed in depth. Examples and exercises will be demonstrated using statistical software.
Equivalent - Duplicate Degree Credit Not Granted: APPM 5590
Requisites: Requires prerequisite course of APPM 4520 or APPM 4570 or MATH 4520 (minimum grade C).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

APPMM 4650 (3) Intermediate Numerical Analysis 1
Focuses on numerical solution of nonlinear equations, interpolation, methods in numerical integration, numerical solution of linear systems, and matrix eigenvalue problems. Stresses significant computer applications and software. Department enforced prerequisite: knowledge of a programming language.
Equivalent - Duplicate Degree Credit Not Granted: MATH 4650
Requisites: Requires a prerequisite course of MATH 3430 or APPM 2360 and APPM 3310 (minimum grade C-).

APPMM 4660 (3) Intermediate Numerical Analysis 2
Continuation of APPM 4650. Examines numerical solution of initial-value problems and two-point boundary-value problems for ordinary differential equations. Also looks at numerical methods for solving partial differential equations. Department enforced prerequisite: knowledge of a programming language.
Equivalent - Duplicate Degree Credit Not Granted: MATH 4660
Requisites: Requires prerequisite course of APPM 4650 or MATH 4650 (minimum grade C-).

APPMM 4720 (1-3) Open Topics in Applied Mathematics
Provides a vehicle for the development and presentation of new topics that may be incorporated into the core courses in applied mathematics. Department enforced prerequisite: variable, depending on the topic, see instructor.
Equivalent - Duplicate Degree Credit Not Granted: APPM 5720
Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

APPMM 4840 (1-3) Reading and Research in Applied Mathematics
Introduces undergraduate students to the research foci of the Department of Applied Mathematics. Department enforced prerequisite: variable depending on the topic.
Repeatable: Repeatable for up to 9.00 total credit hours.

APPMM 4950 (1-3) Seminar in Applied Mathematics
Introduces undergraduate students to the research foci of the program in applied mathematics. It is also designed to be a capstone experience for the program's majors. Department enforced prerequisite: variable depending on the topic.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

STAT 2600 (4) Introduction to Data Science
Introduces students to importing, tidying, exploring, visualizing, summarizing, and modeling data and then communicating the results of these analyses to answer relevant questions and make decisions. Students will learn how to program in R using reproducible workflows. During weekly lab sessions students will collaborate with their teammates to pose and answer questions using real-world datasets.
Requisites: Requires prerequisite of APPM 1350 or MATH 1300 (both require minimum grade C-).
Grading Basis: Letter Grade

STAT 3100 (3) Applied Probability
Studies axioms, counting formulas, conditional probability, independence, random variables, continuous and discrete distribution, expectation, joint distributions, moment generating functions, law of large numbers and the central limit theorem.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 3810 or MATH 4510 APPM 3570
Requisites: Requires a prerequisite or corequisite course of APPM 2350 or MATH 2400 (prereq minimum grade C-).

STAT 3400 (3) Applied Regression
Introduces methods, theory, and applications of linear statistical models, covering topics such as estimation, residual diagnostics, goodness of fit, transformations, and various strategies for variable selection and model comparison. Examples will be demonstrated using statistical programming language R.
Requisites: Requires prerequisite STAT 2600 and STAT 3100 or MATH 4510 (all minimum grade C-). Requires corequisite APPM 3310.
Grading Basis: Letter Grade

STAT 4000 (3) Statistical Methods and Application I
Introduces exploratory data analysis, probability theory, statistical inference, and data modeling. Topics include discrete and continuous probability distributions, expectation, laws of large numbers, central limit theorem, statistical parameter estimation, hypothesis testing, and regression analysis. Considerable emphasis on applications in the R programming language.
Equivalent - Duplicate Degree Credit Not Granted: STAT 5000
Requisites: Requires prerequisite APPM 1360 or MATH 2300 (both minimum grade C-).
Grading Basis: Letter Grade
STAT 4010 (3) Statistical Methods and Applications II
Expands upon statistical techniques introduced in STAT 4000. Topics include modern regression analysis, analysis of variance (ANOVA), experimental design, nonparametric methods, and an introduction to Bayesian data analysis. Considerable emphasis on application in the R programming language.
Equivalent - Duplicate Degree Credit Not Granted: STAT 5010
Requisites: Requires prerequisite STAT 4000 (minimum grade C-).
Grading Basis: Letter Grade

STAT 4100 (3) Markov Processes, Queues, and Monte Carlo Simulations
Brief review of conditional probability and expectation followed by a study of Markov chains, both discrete and continuous time, including Poisson point processes. Queueing theory, terminology and single queue systems are studied with some introduction to networks of queues. Uses Monte Carlo simulation of random variables throughout the semester to gain insight into the processes under study.
Equivalent - Duplicate Degree Credit Not Granted: APPM 4560 and APPM 5560
Requisites: Requires prerequisite courses of APPM 3570 or STAT 3100 or MATH 4510 (all minimum grade C-).

STAT 4230 (3) Stochastic Analysis for Finance
Studies mathematical theories and techniques for modeling financial markets. Specific topics include the binomial model, risk neutral pricing, stochastic calculus, connection to partial differential equations and stochastic control theory.
Equivalent - Duplicate Degree Credit Not Granted: APPM 4530, APPM 5530 and STAT 5230
Requisites: Requires prerequisite courses of APPM 3310 and APPM 3570, or STAT 3100, or MATH 4510 (all minimum grade C-).

STAT 4250 (3) Data Assimilation in High Dimensional Dynamical Systems
Develops and analyzes approximate methods of solving the Bayesian inverse problem for high-dimensional dynamical systems. After briefly reviewing mathematical foundations in probability and statistics, the course covers the Kalman filter, particle filters, variational methods and ensemble Kalman filters. The emphasis is on mathematical formulation and analysis of methods.
Equivalent - Duplicate Degree Credit Not Granted: APPM 5510, APPM 5510 and STAT 5250
Requisites: Requires prerequisite courses of APPM 3310 and APPM 3570 or STAT 3100 or MATH 4510 (all minimum grade C-).

STAT 4400 (3) Advanced Statistical Modeling
Introduces methods, theory and applications of modern statistical models, from linear to hierarchical linear models, to generalized hierarchical linear models, including hierarchical logistic and hierarchical count regression models. Topics such as estimation, residual diagnostics, goodness of fit, transformations, and various strategies for variable selection and model comparison will be discussed in depth. Examples will be demonstrated using statistical programming language R.
Requisites: Requires prerequisite STAT 3400 and (STAT 4520 or STAT 5010) (all minimum grade C-).
Grading Basis: Letter Grade

STAT 4430 (3) Spatial Statistics
Introduces the theory of spatial statistics with applications. Topics include basic theory for continuous stochastic processes, spatial prediction and kriging, simulation, geostatistical methods, likelihood and Bayesian approaches, spectral methods and an overview of modern topics such as nonstationary models, hierarchical modeling, multivariate processes, methods for large datasets and connections to spines.
Equivalent - Duplicate Degree Credit Not Granted: STAT 5430
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

STAT 4520 (3) Introduction to Mathematical Statistics
Examines point and confidence interval estimation. Principles of maximum likelihood, sufficiency, and completeness: tests of simple and composite hypotheses, linear models, and multiple regression analysis if time permits. Analyzes various distribution-free methods.
Equivalent - Duplicate Degree Credit Not Granted: STAT 5520 and MATH 4520 and MATH 5520
Requisites: Requires prerequisites APPM 3570 or STAT 3100 or MATH 4510 (all minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

STAT 4540 (3) Introduction to Time Series
Studies basic properties, trend-based models, seasonal models modeling and forecasting with ARIMA models, spectral analysis and frequency filtration.
Equivalent - Duplicate Degree Credit Not Granted: STAT 5540 and MATH 4540 and MATH 5540
Requisites: Requires prerequisite course of APPM 4520 or STAT 4520 or MATH 4520 (minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

STAT 4610 (3) Statistical Learning
Consists of applications and methods of statistical learning. Reviews multiple linear regression and then covers classification, regularization, splines, tree-based methods, support vector machines, unsupervised learning and Gaussian process regression.
Equivalent - Duplicate Degree Credit Not Granted: STAT 5610
Requisites: Requires prerequisite course of STAT 3400 (minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

STAT 4630 (3) Computational Bayesian Statistics
Introduces Bayesian statistics, normal and non-normal approximation to likelihood and posteriors, the EM algorithm, data augmentation, and Markov Chain Monte Carlo (MCMC) methods. Additionally, introduces more advanced MCMC algorithms and requires significant statistical computing. Examples from a variety of areas, including biostatistics, environmental sciences, and engineering, will be given throughout the course.
Equivalent - Duplicate Degree Credit Not Granted: STAT 5630
Requisites: Requires prerequisite courses of (APPM 4560 or STAT 4100) and STAT 3400 and (STAT 4520 or MATH 4520) (minimum grade C-).
Recommended: Prerequisite prior programming experience.
STAT 4680 (3) Statistical Collaboration
Educates and trains students to become effective interdisciplinary collaborators by developing the communication and collaboration skills necessary to apply technical statistics and data science skills to help domain experts answer research questions. Topics include structuring effective meetings and projects; communicating statistics to non-statisticians; using peer feedback, self-reflection and video analysis to improve collaboration skills; creating reproducible statistical workflows; working ethically.
Equivalent - Duplicate Degree Credit Not Granted: STAT 5680
Requisites: Requires a prerequisite course of STAT 4520 or MATH 4520 (minimum grade C-).
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

STAT 4690 (2) Advanced Statistical Collaboration
Educates and trains students to become advanced interdisciplinary collaborators by developing and refining the communication, collaboration and technical statistics and data science skills necessary to collaborate with domain experts to answer research questions. Students work on multiple projects. Discussions center on technical skills necessary to solve research problems and video analysis to improve communication and collaboration skills.
Equivalent - Duplicate Degree Credit Not Granted: STAT 5690
Requisites: Requires prerequisite course of STAT 4680 or STAT 5680 (minimum grade C-).
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

STAT 4700 (3) Philosophical and Ethical Issues in Statistics
Introduces students to philosophical issues that arise in statistical theory and practice. Topics include interpretations of probability, philosophical paradigms in statistics, inductive inference, causality, reproducible, and ethical issues arising in statistics and data analysis.
Equivalent - Duplicate Degree Credit Not Granted: STAT 5700
Requisites: Requires prerequisites STAT 4520 or STAT 3400 or STAT 4000 (all minimum grade C-).
Grading Basis: Letter Grade

Statistics and Data Science - Bachelor of Arts (BA)
The Department of Applied Math offers a broad range of undergraduate research opportunities funded by a variety of federal agencies. Working with faculty, students interested in statistics and data science have developed solutions to various problems in fluids, dynamical systems, data analysis, probability and statistics, networks, signal processing, math biology, math education and numerics. Students can gain professional exposure through the student chapter of the Society of Industrial and Applied Mathematics (SIAM) on campus.

Outside Area of Emphasis/Application
Students will choose an outside area of emphasis/application to acquire knowledge in a discipline-specific area, where statistical applications are prevalent. Students will take a minimum of 18 credits in a department or certificate program outside of APPM/STAT, including a minimum of 6 credits at the upper-division level. Final course selection will be made in consultation with advisors and faculty from the departments, as well as faculty advisors within the Department of Applied Mathematics.

Laboratory for Interdisciplinary Statistical Analysis (LISA)
After learning the communication and collaboration skills necessary to help domain experts answer their research, business or policy questions, students have the opportunity to join LISA to gain additional practical experience. Students will collaborate with a variety of researchers around campus and in the community to apply statistics and data science to solve real problems. Students in LISA will also work with graduate students and faculty to engage in outreach activities to improve statistics and data science skills and literacy in the wider community.

Requirements
Course Requirements
To earn a BA in statistics and data science, a student must complete the requirements of the College of Arts and Sciences.

Students must earn a grade of C- or better in all coursework applied to the major, and have at least a C average for all attempted work for the major. Calculus 1 & 2 (usually APPM 1350 and APPM 1360) are considered introductory courses and are prerequisites for entry into the major.

Graduating in Four Years

Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of “adequate progress” as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress in Statistics and Data Science, students should meet the following requirements:

• In the first semester, declare the statistics and data science major.

Students must consult with a major advisor to determine adequate progress toward completion of the major.

Recommended Four-Year Plan of Study

Through the required coursework for the major, students can likely fulfill some of the required credit hours of the Gen. Ed. Distribution Requirement and Diversity Requirement (depending on the courses used for the Outside Area of Emphasis) and will complete the QRMS component of the Gen. Ed. Skills Requirement.

</table>
The Department of Applied Mathematics offers a minor in Statistics and Data Science. Declaration of a minor is open to any undergraduate student enrolled at CU Boulder, regardless of college or school. For more information, see the university's minor requirements on the Policies & Requirements (p. 67) page.

The minor in Statistics and Data Science was developed to provide in-depth training in data science, statistical methods and techniques well beyond the training usually received by science and engineering majors. The ability to understand, visualize, and analyze data is becoming an increasingly important skill in many disparate fields. This minor offers undergraduate students from any major the opportunity to develop their statistical knowledge.

### Requirements

#### Prerequisites

Prerequisites for the applied math minor are two semesters of calculus and computing experience, as provided by CSCI 1300, CSCI 1320 or CHEN 1310.

#### Residency

A minimum of 20 credits at the 2000 level and above is required. At least three APPM or STAT courses, two of which must be at the 3000 level or above, need to be taken on the Boulder campus. No more than 9 credits may be applied from transfer work; of those, no more than 6 credits may be 3000 level or above.

#### Minimum Grades

A cumulative GPA of 2.00 or better is required in the courses that are used to satisfy the requirements for this minor. Each individual course that is counted towards these degree requirements must be passed with a grade of C- or better.

</table>

1. APPM 3050 is not appropriate for junior or senior aerospace engineering sciences majors. These students should substitute another upper division applied math course.

2. A student cannot earn a minor in statistics (p. 101) and a minor in automated mathematics with probability and statistics emphasis.
undergraduate students from any major the opportunity to develop their statistical knowledge.

**Requirements**

Prerequisites for the Statistics and Data Science minor are two semesters of calculus and computing experiences such as provided by CSCI 1300, CSCI 1320 or CHEN 1310. A student cannot earn both a minor in statistics and data science and a minor in applied mathematics (p. 101) with the probability and statistics emphasis.

Students may earn both a BS in Applied Mathematics and a minor in Statistics and Data Science. However, the 12 upper-division credits of statistics required for the minor may not be counted towards the 24 credits of upper-division applied math courses. The 12 upper-division credits of statistics may, however, count towards the 24 credits of technical electives required for all applied math majors.

**Residency**

A minimum of 23 credits at the 2000 level and above is required. At least three APPM or STAT courses, two of which must be at the 3000 level or above, need to be taken on the Boulder campus. No more than nine credit hours may be applied from transfer work; of those nine, no more than six may be 3000 level or above.

**Minimum Grades**

A cumulative GPA of 2.00 or better is required in the courses that are used to satisfy the requirements for this minor. Each individual course that is counted towards these degree requirements must be passed with a grade of C- or better.

Total Credit Hours 23-24

¹ Any one of APPM's 3-credit special topics courses in probability or statistics may also be used to meet this requirement.

**Art and Art History**

The Department of Art and Art History (AAH) comprises two programs at the undergraduate level: art history and art practices. The art history program offers the BA and the art practices program is divided into five areas that offer degree tracks for the BA and the BFA: ceramics, integrated media arts practices (photography, digital media, video, integrated arts), painting & drawing, printmaking, and sculpture & post-studio practice. The department offers a rigorous curriculum that crosses disciplines and attracts inquisitive, dedicated students with wide-ranging interests, encouraging creative investigation as an essential skill informed by the highest standards of critical thought. Our diverse faculty, students and staff are committed to ongoing engagement with communities locally and globally.

**Course codes for these programs are ARTF, ARTH and ARTS.**

**Honors**

Students may graduate with departmental honors. Those interested in pursuing this program should contact the Honors Department and/or the Department of Art and Art History honors representative as early as possible. The minimum GPA requirement is 3.300 overall and 3.500 in the major. Students may take Art Practices or Art History Honors Thesis to complete individual work.

**Special Programs**

**The CU Art Museum**

The CU Art Museum is a cultural gateway to the University of Colorado Boulder, facilitating engagement with larger societal issues through a greater understanding of the arts in a global context. The CU Art Museum is committed to enhancing understanding and appreciation of the visual arts within the academic community and among regional, national and international audiences. It provides access to art of the highest quality through exhibitions, publications and related educational events that reflect diversity, critical thinking and creative research. The museum also facilitates student training in museum practices. As a collecting institution, the CU Art Museum promotes the excellence, preservation, scholarly interpretation, exhibition and growth of its comprehensive permanent collection, which includes artworks from numerous time periods, artistic traditions and cultures. The state of the art 25,000-square-foot CU Art Museum contains five galleries including permanent collection galleries, changing exhibition galleries and a video gallery. The CU Art Museum also includes a collections study center, allowing students, faculty and researchers the opportunity to schedule appointments to view, research and study works in its permanent collection.

**The CU Art Museum’s Permanent Collection**

The Permanent Collection of the CU Art Museum contains over 8,800 works of art. The collection includes works from numerous time periods and cultures including ancient Greek pottery, Roman Glass, ancient Iranian pottery, Southwestern and South American santos, Southeast Asian pottery, African sculpture, Old Master works on paper, British 18th century prints, 19th and 20th century American prints and paintings, Japanese ukiyo-e prints, 19th century photography, Pop art, Minimalist works on paper and modern and contemporary ceramics, contemporary New Mexican Santos, sculpture, works on paper, paintings, photography, video and new media art.
Visiting Scholar Program
This program is organized to explore the discipline of art history—its cultural connections, methodological pursuits and its changing nature—by focusing extensively on the research and insights of individual academic experts. Three to five highly regarded art historians and/or art critics speak at a public lecture, presenting current research and published papers.

Visiting Artist Program
Artists of national and international reputation interact with graduate and advanced undergraduate students and discuss their studio work at seminar meetings. Artists present a public lecture during their visit, providing continuous input of significant developments and a comprehensive view of contemporary issues in the arts.

Visual Resources Center (VRC)
The mission of the VRC is to provide and facilitate access to images, imaging and related information resources for teaching and research in the Department of Art and Art History. This includes:

1. a departmental image collection and support for other important image resources;
2. resources, training and support in digital imaging and image presentation software; and
3. equipment for use in creative work, documentation and classrooms within the department.

The digital image collection contains works by faculty, MFA thesis recipients, visiting artists and other contemporary and historical works. Digital imaging resources include slide and flatbed scanning stations, with training available in digitization standards and best practices. VRC equipment includes laptops, data projectors, digital SLR cameras, video cameras, tripods and other equipment for use in the department. The VRC also circulates its collection of DVDs containing lectures and interviews from the department's Visiting Artist Program. More information is available on the department's Visual Resources Center (http://cuart.colorado.edu/resources/vrc/) webpage.

Rural Environments Field School
The Art & Rural Environments Field School (http://www.ruralenvironments.org/) is an intensive off-campus course designed for students interested in the intersection of art and the rural environment. The Field School experience puts students in touch with various rural landscapes and focuses on site and context-based approaches to art creation. While living and working together in the field and on the road, students create site-interpretation artworks exploring various mediums including photography, sculpture and drawing, as well as dialogical projects, social actions and collaborative experiments.

Based out of CU Boulder, sessions are open to both CU students and students from further afield. The Field School also partners with various other schools. For students from other universities: in most cases, the 6 hours of Art Practices course credit will transfer to the home institution. This is an advanced or 4000-level course and is also open to graduate students at the 5000 level.

For more information, visit the Department of Art & Art History (http://cuart.colorado.edu/) website.

Bachelor's Degrees
- Art History - Bachelor of Arts (BA) (p. 121)
- Art Practices - Bachelor of Arts (BA) (p. 122)
- Art Practices - Bachelor of Fine Arts (BFA) (p. 124)

Minors
- Art History - Minor (p. 125)
- Art Practices - Minor (p. 125)

Faculty
While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Courses

Art History

ARTH 1300 (3) History of World Art 1
Surveys major art styles from the Paleolithic period through the Renaissance, including European, Asian, and the Pre-Columbian/Islamic world. Emphasizes comparison of Western and non-Western visual expressions as evidence of differing cultural orientations.

Additional Information: GT Pathways: GT-AH1 - Arts Hum: Arts Expression
Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 1400 (3) History of World Art 2
Surveys major art styles from about 1600 to the present, including Europe, Asia, the Islamic world, the Americas and Africa. Emphasizes comparison of Western and non-Western visual expressions as evidence of differing cultural orientations.

Additional Information: GT Pathways: GT-AH1 - Arts Hum: Arts Expression
Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 1500 (3) Global Art and Visual Culture
Introduces critical issues in the study and interpretation of the arts and visual cultures of Africa, the Americas, Asia, Europe, and Oceania. This course serves as a complement to U.S. Art Across Cultures (ARTH 1600). Themes explored include the conceptual and social status of the artist, cultural exchange, the environment, gender, and power. In lecture and in recitations sections, you will be introduced to methods of object-based research and principles of museum exhibition curation. You will leave this class with an understanding of key concepts and methods in the history of art, as well as familiarity with an array of global visual cultures.

Recommended: Corequisite ARTH 1600.

Additional Information: Arts Sci Gen Ed: Diversity-Global Perspective
Arts Sci Gen Ed: Distribution-Arts Humanities
ARTH 1509 (3) Trash and Treasure, Temples and Tombs: Art and Archaeology of the Ancient World
Introduces the art and archaeology of ancient Egypt, Mesopotamia, Greece and Rome, examining various ancient approaches to power, religion, death and the human body. Analyzes art, architecture and everyday trash to learn about ancient humanity.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 1509
Requisites: Restricted to students with 0-56 credits (Freshmen or Sophomore) only.
Additional Information: Arts Sci Core Curr: Historical Context
Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Diversity-Global Perspective
Departmental Category: Art History

ARTH 1600 (3) U.S. Art Across Cultures
Examines historical and contemporary issues in American arts and visual culture, emphasizing issues of race, gender, class, cross-cultural interactions, diversity of artistic traditions, and the global position of the United States in the modern world. We will focus on key monuments, objects, artists, and concepts relevant to the American context and impactful across geopolitical borders, ethnic groups, and genders.
Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Diversity-U.S. Perspective

ARTH 1709 (3) Freshmen Seminar: Critical Introduction to Art History
Provides a broad introduction to understanding and appreciating art and art history within a critical lecture seminar and discussion format. The focus of this course is a selected Particularly directed to nonmajors.
Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 2029 (3) Art and Archaeology of Ancient Egypt
Emphasizes the origin of the Egyptian culture, its importance and its impact on other cultures. In addition, the different points of view of various scholars are discussed with a comparative study of the ancient Egyptian culture and modern culture of Egypt and the Middle East. Formerly ANTH 1160.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 2029
Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Diversity-Global Perspective
Departmental Category: Art History

ARTH 2039 (3) Greek Art and Archaeology
Covers prehistoric Aegean through the fourth century B.C.E., considering architecture, pottery, painting, sculpture, and personal ornament. Societal customs such as use of space and burial patterns are considered as well as art and its uses, to help understand developments in Greek culture.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 2039
Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 2049 (3) Introduction to Roman Art and Architecture
Introduces the monuments and sites of the ancient Roman world from the foundation of Rome (753 B.C.E.) to Constantine (306-307 C.E.). Emphasizes the relationship of art, architecture, and artifacts to the political, social, and religious institutions of Italy and the provinces.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 2049
Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 2409 (3) Intro to Asian Art
Designed for those having no previous experience in the study of Asian art. Traces development of sculpture, painting, architecture, and the other visual arts of South Asia, the Far East, and Southeast Asia, with a synopsis of developments from 1453 through the 18th century.
Additional Information: GT Pathways: GT-AH1 - Arts Hum: Arts Expression
Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History
Departmental Category: Asia Content

ARTH 3009 (3) Critical Thinking in Art History
Through structured discussions, selected readings, and written assignments provides an understanding of how art history has evolved as an academic discipline and how art historians evaluate complex issues of style, form, content, and theory in the visual arts.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 3019 (3) Pompeii and the Cities of Vesuvius
Introduces the towns and villas buried by the eruption of Mt. Vesuvius in 79 C.E. Explores the layout and decoration of ancient Roman houses, the variety of artifacts uncovered as evidence for daily life and the history of the excavations.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 3019
Additional Information: Arts Sci Core Curr: Historical Context
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 3079 (3) Medieval Art Survey
Surveys the history of Western art from Constantine to around the year 1300, including Carolingian, Ottonian, Anglo-Saxon, Romanesque, and Gothic. Considers "Barbarian," Byzantine, and Islamic influences.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 3109 (3) Art in Contemporary Society
Examines writings by philosophers and art critics as they address the question: What is art for? Readings focus on the 19th and 20th centuries, including current theories and some non-Western theories. Students are encouraged to develop their own responses to the question.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 3209 (3) Art, Culture, and Gender Diversity, 1400--1600: Renaissance Art Out of the Canon
Studies the rising status of painting, sculpture, and architecture in Europe and how Europeans perceived non-Western art during the early modern period. Introduces history of race/ethnicity, gender, and class concerns embodied in the European category visual arts. Emphasizes new methods for interpreting history without imposing Eurocentric viewpoints.
Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Diversity-Global Perspective
Departmental Category: Art History
ARTH 3241 (3) Art in Islamic Cultures
Offers an overview of art in Islamic cultures. Discusses a range of literary texts and images in order to understand these cultures. Offers an opportunity for undergraduates to expand their understanding of literature and art. Taught in English.
Equivalent - Duplicate Degree Credit Not Granted: ARAB 3241
Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 3329 (3) Art in France: Revolution to 1870
Covers major art movements and theories in France from 1793 to 1870 on location in Paris. Students study ceramics, painting, sculpture, photography and some architecture. Political and cultural events are considered for their influence on art: excavations at Pompeii, colonial expansion in Middle East and Africa, influx of Asian art, exploration of Americas and various technical inventions.
Recommended: Prerequisites ARTH 1300 and second semester sophomore, junior or senior standing.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 3339 (3) Art in France: 1870-1970
Covers major art movements and theories in France from the Paris Commune through 1970 on location in Paris. Students study ceramics, painting, sculpture, photography and some architecture. Political and cultural events are considered for their influence on art: excavations at Pompeii, colonial expansion in Middle East and Africa, influx of Asian art, exploration of Americas and various technical inventions.
Recommended: Prerequisite ARTH 1300 and second semester sophomore, junior or senior standing.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 3359 (3) Art in Spain: Goya to 1900
Explores the scope of Goya's works in context of his contemporaries and antecedent, Velazquez; Moorish influences, genre painting costumbrismo, Romanticism and historical narratives are considered in relation to Enlightenment ideals, French Neoclassicism, Romanticism, Orientalism and the Napoleonic invasion. Teaching occurs mostly on site: Alhambra, Prado, Bellas Artes, Palacio Real, Museo de Romanticismo; seminars and tests are in Madrid classrooms.
Recommended: Prerequisite ARTH 1300.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 3369 (3) Art in Spain: 1900-1990
Covers Gaudi, Picasso and artists of Modernismo movement as well as Dali are studied in Barcelona; Dada and Surrealism are explored through works of Picasso, Gonzalez, Gris, Varo, Dalí, Bunuel and others. Photography and film of Spanish Civil War and thereafter are studied in seminar in Madrid classroom; students experience flamenco performances and Q&A with performers. Tests administered in class.
Recommended: Prerequisite ARTH 1300.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 3419 (3) Modern Art Survey
Surveys the loss of beauty in art and discusses whether or not that loss is regrettable. Questions the function and historical meaning of modern and postmodern art: is it all hype and strategic positioning by artists for fame and fortune? Is it serious? Are the fine arts still fine?
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 3509 (3) American Art
Surveys American art and material culture from the precolonial era to the present day. Considers cultural and artistic interaction, ethnic expressions, patronage, European and non-Western influences, and the struggle to develop a uniquely American artistic identity.
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 3519 (3) Modern Architecture, 1780--1960
Introduces the major movements and developments in European and American architecture from Neoclassicism to Postmodernism. Considers the impact of exhibitions, expositions, and vernacular architecture.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 3539 (3) Contemporary Art
Examines contemporary art and theory in the transition from modern to postmodern expression. Discusses painting, sculpture, installations, performance, video, photography, and architecture with attention to historical context and criticism. Considers neoexpressionist, feminist, minority, political, and public art.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 3619 (3) The Arts of China
Surveys Chinese painting, sculpture, architecture, and other arts from neolithic to modern times.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History
Departmental Category: Asia Content

ARTH 3629 (3) The Arts of Japan
Offers an appreciation and chronological development of the arts of Japan. Emphasizes the arts of Shintoism and Buddhism as well as the particular Japanese aesthetic from prehistoric times to the present.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History
Departmental Category: Asia Content

ARTH 3719 (3) History of Media Arts
Surveys the development of technological media both as sources of information and as art. Photography and related media, film, video, holography, and electronic imaging systems are surveyed as art and as technologies, emphasizing major artists, movements, exhibitions, and other productions in the 19th and 20th centuries.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 3729 (3) Foundations in Latin American Art
Examines Latin America's cultural pluralism and art production beginning in pre-Columbian times and following through to the present. Considers the various functions of art as well as the relationship between objects, artists, and the cultures from which they come. Provides students with a broad frame of reference for many historical periods and equips students to evaluate art objects and their cultural contexts.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History
ARTh 3929 (1–3) Special Topics in Art History
Repeatable: Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTh 4029 (1) Art History Research Methods
In this class we will investigate how art scholarship is formed and organized; learn to expertly navigate the vast array of art research resources; and explore advanced techniques for searching both online and offline sources of art information. We will work to develop a critical understanding of our own research processes and reflect on the tools and techniques that lead to both expert research and successful participation in art discourse.
Equivalent - Duplicate Degree Credit Not Granted: LIBR 4029 and ARTH 5029
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTh 4069 (3) Medieval Manuscripts
Surveys decorated books from late antiquity to the advent of the printing press. Examines the various roles manuscripts played within different medieval communities.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTh 4089 (3) Romanesque and Gothic Art
Examines major artistic trends in Europe between the years 1000 and 1300, a period that witnessed, among others, the development of gothic cathedrals and the rise of the professional artist. Particular attention will be given to exchange with other cultures.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTh 4099 (3) Ancient Greek Sculpture
Understanding that Greek sculpture, like all visual media, was part of the fabric of ancient Greek life and expressed the values of its creators and audience is a valuable way to gain insights into the social, economic, and political world of ancient Greece. This course will examine the work of Greek sculptors from the Archaic to the Hellenistic period. Key stylistic and technical developments, as well as significant works of art, sculptors and workshops will be discussed in detail. Some issues we will consider are the physical, religious and/or socio-historical context of individual freestanding sculptures and how specific sculptural programs illustrate aspects of Greek culture. Iconographic and narrative choices made by artists working in stone, compared to other material, will also be addressed.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 5099, CLAS 4099 and ARTH 5099

ARTh 4109 (3) Ancient Italian Painting
Explores the problems, theories and methods for understanding the iconography, styles, topologies, contexts and techniques of fresco wall painting in ancient Italy from the 6th century B.C.E. to the 4th century C.E. Topics covered include Etruscan tomb paintings, late Republican and early imperial fresco paintings from Rome and Campania and later Roman wall paintings, including the painted images in ancient catacombs. Previous coursework on ancient Italy or the history of pre-modern art is highly recommended.
Equivalent - Duplicate Degree Credit Not Granted: ARTH 5109 and CLAS 4109 and CLAS 5109
Recommended: Prerequisite CLAS 1509 or ARTH 1509 or CLAS 2049 or ARTH 2049.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTh 4119 (3) Roman Sculpture
Examines ancient Roman sculpture with emphasis on the display, iconography, and production of private and public monuments in the Roman Empire. Explores sculpture as evidence for historical developments, societal and gender attitudes, and state ideologies in the ancient Roman world.
Equivalent - Duplicate Degree Credit Not Granted: ARTH 5119 and CLAS 4119 and CLAS 5119
Recommended: Prerequisite ARTH 1300 or CLAS 2049.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTh 4129 (3) Aegean Art and Archaeology
Detailed study of the cultures of prehistoric Greece, the Cycladic Islands and Crete, their art and archaeology and their history within the broader context of the eastern Mediterranean, from earliest human settlement to the collapse of the Bronze Age at about 1100 B.C.E. Emphasis is on palace states.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4129 and ANTH 5129 and CLAS 4129 and CLAS 5129
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTh 4139 (3) Greek Vase Painting
A comprehensive overview of Greek vase painting, from prehistoric through the fourth century B.C.E. Emphasis is on learning the development of primary decorative styles and on refining skills of visual analysis, scholarly research, critical thinking, oral commentary and written presentation.
Equivalent - Duplicate Degree Credit Not Granted: ARTH 5139 and CLAS 4139 and CLAS 5139
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTh 4149 (3) Greek Cities and Sanctuaries
Examines Greek architecture in context, from the ninth century B.C.E. into the Hellenistic period, considering the use of space, both in religious and in civic settings and using texts as well as material culture. Emphasis is on developing analytical skills.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4149 and CLAS 5149
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTh 4169 (3) Topics in Ancient and Classical Art and Archaeology
In-depth consideration of an aspect of ancient Mediterranean culture. Topics vary and may include ancient wall painting, Greek sculpture, artists and patrons, the ancient Near East, Egyptian art and archaeology, or Etruscan art and archaeology.
Equivalent - Duplicate Degree Credit Not Granted: ARTH 5169 and CLAS 4169 and CLAS 5169
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTh 4189 (3) Medieval Art
Focuses on one area of medieval art. Topics vary, but may include Carolingian, Ottonian, Romanesque, or Gothic art. Emphasizes critical thinking, methods of scholarly research, and development of writing skills.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History
ARTh 4199 (3) Roman Architecture
Examines the designs, functions and construction methods of ancient
Roman towns, temples, baths, houses and civic structures, as well as
utilitarian structures including roads and aqueducts. Emphasizes Roman
architectural forms and spaces as vehicles for political propaganda and
empire consolidation.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4199 and
CLAS 5199
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTh 4209 (6) Classical Archaeological Field Methods
Offers experiential learning in theories and methods of archaeological
fieldwork in the western Argolid in Greece. Applies methods for extensive
survey, stratigraphic excavation, GIS modeling, ceramic analysis,
nomismatic analysis, architectural studies, artifact and data processing
and documentation. Offered abroad only.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4209 and
CLAS 5209
Repeatable: Repeatable for up to 12.00 total credit hours.
Recommended: Prerequisites CLAS 1509 or ARTH 1509 or CLAS/
ARTH 2039 or CLAS/ARTH 2049.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTh 4229 (3) Ancient Egyptian Art and Archaeology
Archeology of ancient Egypt in light of recent excavations; the history
of excavations of the different sites; and the art of ancient Egypt through
time. Formerly ANTH 4420.
Equivalent - Duplicate Degree Credit Not Granted: ARTH 5229 and
CLAS 4229 and CLAS 5229
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTh 4269 (3) Art and Archaeology of the Ancient Near East
Examines civilizations of the Iran-Iraq region from the rise of urbanism
in Mesopotamia through the era of the first 'world empire,'Achaemenid
Persia. Emphasizes the material record of religious and state institutions
of the ancient Near East, especially monuments that illustrate concepts
of kingship. Explores notions of style, symbolism, visual rhetoric, text-
image synthesis, patronage, creativity and roles of artists.
Equivalent - Duplicate Degree Credit Not Granted: ARTH 5269 and
CLAS 4269 and CLAS 5269
Recommended: Prerequisite CLAS 1509 or ARTH 1509.
Additional Information: Arts Sci Gen Ed: Human Diversity
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Diversity-Global Perspective
Departmental Category: Art History
Departmental Category: Asia Content

ARTh 4279 (3) Michelangelo (1475-1564)
Focuses on Michelangelo’s long career, marked by outstanding
achievements in sculpture, painting, architecture and poetry. Emphasizes
his projects and achievements in light of 16th century artistic theory,
including relationships to his contemporaries in the arts and literature.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTh 4309 (3) Neoclassicism and Romanticism: 1760-1840
Surveys painting and sculpture in England and France from the last
quarter of the 18th century through the first half of the 19th century.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTh 4319 (3) European Art from 1830 to 1886
Surveys the major movements in painting in France and England from the
Revolution of 1830 to the impressionist crisis of 1886. Emphasizes and
discusses painting and major expressions in sculpture and architecture.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTh 4329 (3) Modern Art 1
Provides an in-depth study of the fin de siecle, stressing
postimpressionism, art nouveau and symbolism. Concludes with fauvism
in France and the expressionist movement in Germany.
Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTh 4339 (3) Modern Art 2
Begins with early Picasso and cubism, including analytic and synthetic
cubism and emphasizing the various isms of the 20th century. Also
studies Italian futurism, de Stijl and the Bauhaus, dada and surrealism.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTh 4419 (3) The Arts of Colonial Mexico and Peru
Examines important works, artists, and themes that comprise the artistic
production of colonial Latin America. Focuses on the intermingling,
convergence, and at times the clash of European, Amerindian, and African
cultures, which established the foundation of Latin America’s pluralism.
Recommended: Prerequisite ARTH 3729.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTh 4449 (3) Arts of India and Southeast Asia
Surveys Indian painting, sculpture and architecture from its earliest
phases in the Indus Valley through the Mughal Empire. Encompasses
Hindu, Buddhist and Islamic art of the subcontinent and Southeast
Asia, as well as Himalayan cultures directly impacted by India’s artistic
legacies. Department enforced prerequisite: one 3000-level art history
course (minimum grade D).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTh 4459 (3) Prcolumbian Art of Mesoamerica
Introduces students to the art, architecture, and cultures of Mesoamerica,
a region that encompasses modern-day Mexico, Guatemala, Belize, and
parts of El Salvador, and Honduras. Focuses on major Pre-Columbian art
objects and monuments to learn about the societies and cultures from
which they came. Also considers the various roles that the visual arts
and architecture played in these societies. Covers Olmec through Aztec
civilizations.
Recommended: Prerequisite ARTH 3729.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTh 4469 (3) Twentieth-Century Architecture
Examines the major movements and development in European and
American architecture, 1900-1960’s. Considers the major styles, as well
as cultural interactions, race/ethnicity, gender and class concerns as they
relate to both the practice and profession of architecture.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History
ARTH 4569 (3) United States Architecture  
Examines architecture as it developed in the area now defined as the continental United States from early cultures to the present. Considers the major styles and issues of cultural interaction, race/ethnicity, gender and class concerns as they relate to the practice, theory, and profession of architecture.  
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Art History  
ARTH 4599 (3) Contemporary Architecture  
Examines the history and theory of contemporary architecture. In the field of architecture, theory and history differ in that the former describes and analyzes past work, while theory offers alternative solutions or new strategies for approaching the discipline. Both of these components are key to understanding contemporary architecture, and this course will work between the two modes of understanding.  
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Art History  
ARTH 4609 (3) Critical Issues in Photography  
Examines the history and theory of photography and the relationship of photography to the other arts, as well as to literary, political, social and philosophical issues. Analyzes the critical issues that inform photography through the writings of critics, historians, and photographers using both thematic and chronological approaches.  
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Art History  
ARTH 4639 (3) Manet Seminar  
Introduces current Manet studies and research methods by drawing upon recent books, exhibition catalogues, and scholarly journal articles. Fulfills requirement for ARTH 4919, Capstone Seminar.  
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Art History  
ARTH 4649 (3) Impressionism & Post-Impressionism  
Fosters creative study of the background and foundation in modern art. Considers 19th-century European painting and, to a lesser degree, sculpture, in relation to social, cultural, and political history from 1863 to 1900. Focuses on France, but gives attention to other countries as well.  
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Art History  
ARTH 4669 (3) Romanticism & Realism  
Fosters creative study of the background and foundation of modern art. Considers 19th-century European (and, to a lesser degree, American) painting and sculpture in relation to social, cultural, and political history from 1789 (the French Revolution) to 1863 (the Salon des refusés). Focuses on France, but gives attention to other countries as well.  
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Art History  
ARTH 4689 (3) Post-Impressionism Seminar  
Introduces current Post-Impressionism studies and research methods by drawing upon recent books, exhibition catalogues, and scholarly journal articles.  
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Art History  
ARTH 4699 (3) The Idea of Art  
Studies contemporary critiques of historical ideas about the twin institutions of the university and the museum and the role of art history in the cultural mission of both. Explores fundamental questions about the role of art in society through weekly discussions of readings, a class presentation, and final research. Fulfills ARTH 4919 capstone seminar required for art history majors.  
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Art History  
ARTH 4739 (3) The Intellectual Roots of Italian Renaissance Art  
Studies critical issues raised in the literature on art, focusing on Renaissance interpretations of key historical themes such as imitation and decorum. Carefully examines the language used in primary sources (available in English).  
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Art History  
ARTH 4749 (3) Italian Renaissance Art: Studies in the Exchange between Theory and Practice  
Addresses how artists developed new compositional procedures, graphic techniques and audiences, and how these procedures were theorized in an age when artists’ intellectual and social status rose dramatically. Explores reception of new graphic technology. Studies specific commissions and primary texts in depth.  
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Art History  
ARTH 4769 (3) Gender Studies in Early Modern Visual Culture  
Examines 15th and 16th century European ideas about women from a variety of feminist perspectives. Focuses on recent contributions to history of women as they intersect with the visual arts.  
Equivalent - Duplicate Degree Credit Not Granted: WGST 4769  
Additional Information: Arts Sci Core Curr: Human Diversity  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Diversity-Global Perspective  
Departmental Category: Art History  
ARTH 4909 (1-3) Independent Study---Art History  
Repeatable: Repeatable for up to 7.00 total credit hours.  
Additional Information: Departmental Category: Art History  
ARTH 4919 (3) Capstone Seminar: Topics in Art History  
Seminar course dealing with selected areas or problems within the history of art. Consult current online Schedule Planner for seminar topic.  
Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.  
Requisites: Restricted to Art History (AAAH) majors only.  
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Art History  
ARTH 4929 (1-3) Special Topics in Art History  
Equivalent - Duplicate Degree Credit Not Granted: ARTH 5929  
Repeatable: Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.  
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Art History
ARTH 4939 (3-6) Art Museum Internship
Focuses on opportunities at the Denver Art Museum, working with individual curators and master teachers in selected areas, such as audience interpretation, interpretive research files, and public school curriculums. Introduces students to the professional culture and activities of art museums.
Equivalent - Duplicate Degree Credit Not Granted: ARTH 5939
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Art History

ARTH 4959 (3) Art History Honors Thesis
May be elected during the final semester. Consists of a substantial, original written thesis. Requires faculty sponsorship. Does not guarantee a student will receive honors.
Additional Information: Arts Sciences Honors Course
Departmental Category: Art History

Art Studio and Non-Studio

ARTS 1002 (3) Beginning Drawing 1
Formal visual elements are presented through a study of spatial relationship. Built around a series of related problems, each of which is designed to develop fluency in drawing, offer experience in handling media, foster self-confidence and promote an understanding of the visual elements and their role in the development of pictoral space.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Painting/Drawing

ARTS 1003 (3) Printmaking for Non-Majors
Emphasizes processes involved with both nonmultiple and multiple methods, including but not limited to metal plate etching (intaglio), lithography, collagraph, woodcut, linoleum cut, Xerox transfer, and monotype. Places equal emphasis on developing drawing skills and understanding design principles.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Printmaking

ARTS 1010 (3) Introduction to Studio Art
Presents creative activity conceptually, and art history thematically, with an interdisciplinary, experimental, and multicultural focus. Fine arts majors explore visual literacy and culture through presentations and student-centered projects that emphasize individual development.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Foundations

ARTS 1012 (3) Drawing for Non-Majors
Explores varied drawing techniques and media. Introduces concepts relevant to the understanding of drawing and the creative process. May not be repeated.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Painting/Drawing

ARTS 1202 (3) Basic Painting
Offers an orientation involving three-dimensional form and application. Studies expressive and conceptual problems based on non-objective form relationships in various sculptural materials. May not be repeated.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Sculpture

ARTS 1212 (3) Painting for Non-Majors
Explores varied painting techniques. Introduces concepts relevant to the understanding of painting and the creative process. May not be repeated.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Painting/Drawing

ARTS 1411 (3) Sculpture for Non-Majors
Introduces techniques and concepts of photography as art. Emphasizes photography as a means to formal and expressive ends. Students must have an adjustable film camera.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 2171
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Photography

ARTS 1514 (3) Sculpture for Non-Majors
Offers an orientation involving three-dimensional form and application. Studies expressive and conceptual problems based on non-objective form relationships in various sculptural materials. May not be repeated.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Sculpture

ARTS 1875 (3) Ceramics for Non-Majors
Introduces the relative effects of color as used by the artist. Emphasizes the practice of color relations including basic characteristics, mixtures, illusions, optical mixture, color intervals, and color quantity. May not be repeated.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Foundations

ARTS 1876 (3) Ceramics for Non-Majors
Introduces the relative effects of color as used by the artist. Emphasizes the practice of color relations including basic characteristics, mixtures, illusions, optical mixture, color intervals, and color quantity. May not be repeated.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Foundations

ARTS 2004 (3) Participatory Objects (Sculpture and Post-Studio Practice)
Looks at the tendency in contemporary sculpture to create interactive objects and experiences for the viewer. Students in this course are required to create hands-on projects, participate in group critiques and develop presentations and research projects.
Recommended: Prerequisite ARTS 2504.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Sculpture
ARTS 2022 (3) Beginning Drawing
Emphasizes proportion and perspective through observation based drawing. Students are introduced to various drawing materials and learn to translate what they see into drawing media using two basic subjects: still-life and the figure.
Requisites: Requires prerequisite or corequisite course of ARTS 1020 (minimum grade C).
Grading Basis: Letter Grade

ARTS 2085 (3) Ceramics 2: Handbuilding
Introduces techniques of hand-built clay forms as they relate to function and nonfunction. Various clay techniques, glazing and firing procedures are explored. Emphasizes ceramics in the broader context of contemporary art. May not be repeated.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Ceramics

ARTS 2095 (3) Ceramics 2: Wheelthrowing
Introduces techniques of wheel-thrown forms as they relate to function and nonfunction. Explores various glazing and firing methods. May not be repeated.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Ceramics

ARTS 2104 (3) Colossal Objects (Sculpture and Post-Studio Practice)
Focuses on the conception, design and production of art works that are larger than human scale. Each object will be the result of individual and team design collaboration. Primarily focuses on sculpture constructed and engineered from metal although other materials are welcome.
Recommended: Prerequisite ARTS 2504.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Ceramics

ARTS 2126 (3) Digital Art 1
An introductory course in the use of the personal computer to create and process images in the visual arts.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Media Arts

ARTS 2171 (3) Photography 1
Introduces techniques and concepts of photography as art. Emphasizes photography as a means to formal and expressive ends. Students must have an adjustable camera.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 1171
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Photography

ARTS 2191 (3) Photography 2
Explores more sophisticated technical and conceptual skills to the creative process.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Photography

ARTS 2222 (3) Beginning Painting
Emphasizes color and descriptive mark making through observation based painting. Students are introduced to various painting materials and learn to translate what they see into painting media using two basic subjects: still-life and the figure.
Requisites: Requires prerequisite or corequisite course of ARTS 1020 (minimum grade C).
Grading Basis: Letter Grade

ARTS 2244 (3) Drawing for Sculpture (Sculpture and Post-Studio Practice)
Explores and examines many relationships between sculpture and drawing. Projects will explore 2-D drawing and mixed media projects through the lens of sculptural practice. Scale, materials and styles will be researched along with topics such as the artists proposal, investigative processes, drawing and sculptural installations.
Recommended: Prerequisite ARTS 2504.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Sculpture

ARTS 2284 (3) Nothing Flat 1: Project a Week (Sculpture & Post-Studio Practice)
Provides students the opportunity to work with a range of sculptural materials through a series of quick projects (e.g. installation, objects, writing). Students will learn to generate ideas quickly, engage issues and formats particular to sculpture, and produce a wide range of work over 15 weeks.
Requisites: Requires prerequisite course of ARTS 1010 (minimum grade C).
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Sculpture

ARTS 2303 (3) Beginning Relief
Emphasis on introductions to the concepts and techniques of relief processes, including white line, black line and four color reductive processes. Students will gain a working knowledge of fundamental relief processes, plus safe and appropriate use of all materials and equipment in the studio.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Requires prerequisite course of ARTS 1010 (minimum grade C). Restricted to Freshman or Sophomore Studio Arts (AASA/AASF) or Art History (AAAH) majors only.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Printmaking

ARTS 2384 (3) Fleeting and Found 1: Ephemeral Sculpture 1
Focuses on introductory level processes of creating sculpture projects which are ephemeral and temporary. Themes of process, lifespan, migration, tension, entropy, and degradation will be explored. This course will include lectures, readings and discussions, writing assignments, studio projects, and visual presentations.
Requisites: Requires prerequisite of ARTS 1010 (minimum grade C).
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Sculpture

ARTS 2403 (3) Beginning Intaglio
Emphasizes an introduction to techniques of intaglio and a focus on working with copper and ferric chloride. Historical approaches and use through contemporary materials/concepts. Emphasizes interrelationship of process, materials and ideas/aesthetics.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Requires prerequisite course of ARTS 1010 (minimum grade C). Restricted to Freshman or Sophomore Studio Arts (AASA/AASF) or Art History (AAAH) majors only.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Printmaking
ARTS 2413 (3) Beginning Lithography
Exploration into stone lithography and aluminum plate is presented in this class. Individual direction and development of conceptual focus and studio techniques are important objectives in this class. Safer ways to make lithographs is highlighted and the toxic traditional methods are left behind.
Repeatability: Repeatable for up to 6.00 total credit hours.
Requisites: Requires prerequisite course of ARTS 1010 (minimum grade C). Restricted to Freshman or Sophomore Studio Arts (AASA/AASF) or Art History (AAAH) majors only.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Printmaking

ARTS 2423 (3) Beginning Screenprinting
Exploration into screenprinting at the basic level, using stencil-making processes for screenprinting with acrylic-based screenprinting inks. Emphasis is placed on exploring and developing challenging concepts, mastering basic techniques and creating compositions and visual images that successfully convey your concept and challenge the viewer. Course is focused on the art of fine art printing on paper.
Repeatability: Repeatable for up to 6.00 total credit hours.
Requisites: Requires prerequisite course of ARTS 1010 (minimum grade C). Restricted to Freshman or Sophomore Studio Arts (AASA/AASF) or Art History (AAAH) majors only.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Printmaking

ARTS 2453 (3) Beginning Alternative Printmaking
Presents creative development of concepts in printmaking beyond the traditional two-dimensional image on paper that is contained in a portfolio or frame. Focus will be made on expanding the concept of what is a print will be explored in relation to each student’s studio practice and interests.
Repeatability: Repeatable for up to 6.00 total credit hours.
Requisites: Requires prerequisite course of ARTS 1010 (minimum grade C). Restricted to Freshman or Sophomore Studio Arts (AASA/AASF) or Art History (AAAH) majors only.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Printmaking

ARTS 2414 (3) Visual Thinking (Sculpture and Post-Studio Practice)
Explores ideas concerning the structure and nature of visual thinking and their relationship to the creative thought process. Investigates form in terms of the organizing principles of three-dimensional design and its application to contemporary sculpture. Includes lecture and studio projects.
Repeatability: Repeatable for up to 6.00 total credit hours.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Sculpture

ARTS 3002 (3) Drawing Alternative Process/Materials
Continuation of Drawing 2. Offers creative possibilities in drawing and related media. Emphasizes experimentation and individual expression. Content varies by semester according to instructor; contact individual instructor for more information. May be repeated once.
Repeatability: Repeatable for up to 6.00 total credit hours.
Requisites: Requires prerequisite course of ARTS 2002 (minimum grade C). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Painting/Drawing

ARTS 3004 (3) Land and Environmental Art (Sculpture and Post-Studio Practice)
Covers land and environmental art, providing an historical survey along with hands on projects in the landscape. Focusing on themes of site, environment, landforms, weather and earth materials, students will design and realize art projects on the land. Includes lectures, readings and discussions, writing assignments, studio projects and visual presentations.
Requisites: Requires prerequisite course of ARTS 1020 (minimum grade C). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.
Recommended: Prerequisites ARTS 2504 and ARTS 2524.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Painting/Drawing

ARTS 3012 (3) Figure Drawing
Explores varied drawing techniques and media. Introduces concepts relevant to the understanding of drawing and the creative process. May not be repeated. Formerly ARTS 2002.
Requisites: Requires prerequisite or co-requisite course of ARTS 1020 (minimum grade C).
Recommended: Students are also eligible to take this class with instructor permission if they have taken a non-majors class in Drawing.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Painting/Drawing

ARTS 3014 (3) Art and Social Practice (Sculpture and Post-Studio Practice)
Covers social art practice, providing an historical survey along with hands on projects in social environments. Focusing on issues of public space, economic and cultural marginalization and political causes, this course provides students a forum for expressions of social reality. Includes lectures, readings and discussions, writing assignments, studio projects and visual presentations.
Requisites: Requires prerequisite or corequisite course of ARTS 1020 (minimum grade C). Restricted to Studio Arts (AASA/AASF) or Art History (AAAH) majors only.
Recommended: Prerequisites ARTS 2504 and ARTS 2524.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Sculpture

ARTS 2504 (3) Basic Sculpture: Materials and Techniques
Introduces the basic properties of metal, wood and mold making. Students will explore and demonstrate an understanding of basic fabrication methods involved in each element. Students will investigate both traditional and non-traditional working methods and will consider how materials and techniques inform sculptural concepts.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Sculpture

ARTS 2524 (3) Visual Thinking (Sculpture and Post-Studio Practice)
Explores ideas concerning the structure and nature of visual thinking and their relationship to the creative thought process. Investigates form in terms of the organizing principles of three-dimensional design and its application to contemporary sculpture. Includes lecture and studio projects.
Repeatability: Repeatable for up to 6.00 total credit hours.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Sculpture
ARTS 3017 (1-3) Special Topics in Studio Arts
Introduces timely subjects in studio arts courses that cannot be offered on a regular basis. Information concerning the topics in any given semester is available prior to pre-registration from the Department of Art and Art History.
Repeatability: Repeatable for up to 7.00 total credit hours.
Requisites: Requires prerequisite courses of ARTS 1010 and ARTS 1020 and ARTH 1300 or ARTH 1400 (all minimum grade C-). Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Seminars/Special Topics

ARTS 3022 (3) Intermediate Drawing
In addition to a continuation of Beginning Drawing, Intermediate Drawing will focus on a non-traditional approach to making images encouraging conceptual development, experimentation and research. Moving beyond observation based drawings multiple thematic possibilities will be explored. Emphasis will be placed equally on ideas and technical execution.
Requisites: Requires prerequisite courses of ARTS 1010, 1020 and 2022 (all minimum grade C-). Restricted to students with 57-180 credits (Juniors or Seniors).
Grading Basis: Letter Grade

ARTS 3054 (3) Sculpture: Modules and Multiples 2
Exposes students to the practice of creating large works through smaller multiples and modules. By learning about the practices of artists such as Andy Warhol, Joseph Beuys, Rachel Whiteread and Robert Gober, along with many others, students will generate an understanding and appreciation for the module and multiple in contemporary art practice. Students will learn to cast using plaster and other type of molds, will be introduced to jigs as a way to streamline production of multiple objects and will work with found objects. Students will be required to complete 3 projects, participate in group critiques of projects, produce a slide presentation on a contemporary artist whose work/practice fits within the theme of the course and prepare a final portfolio. Studio work and demonstrations will be augmented by readings and discussions on contemporary art.
Requisites: Requires prerequisite courses of ARTS 1020 (minimum grade D-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.
Recommended: Prerequisite ARTS 2504.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Sculpture

ARTS 3085 (3) Ceramics 3
Deals with further exploration of techniques approached in ARTH 2085 and ARTH 2095. Students are encouraged to develop personal concentration in relation to medium.
Repeatability: Repeatable for up to 6.00 total credit hours.
Requisites: Requires prerequisite courses of ARTS 2085 and ARTS 2095 (all minimum grade C-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Ceramics

ARTS 3097 (1-3) Special Topics - Non-Studio
Introduces timely subjects in fine arts that cannot be offered on a regular basis. Information concerning the topics offered in any given semester is available prior to preregistration from the Department of Art and Art History.
Repeatability: Repeatable for up to 7.00 total credit hours.
Requisites: Requires prerequisite courses of ARTS 1010 and ARTS 1020 and ARTH 1300 or ARTH 1400 (all minimum grade C). Restricted to Studio Arts (AASA) or Fine Arts-Studio (BASA and BFAS) or Fine Arts-Art History (BAAH) or Art History (AAAH) majors only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Seminars/Special Topics

ARTS 3124 (3) Intervention, Exchange, and Duration (Sculpture & Post-Studio Practice)
Focuses on the production of works of art outside of the traditional studio, museum and gallery. Projects will be designed to interrupt, intervene, co-opt, provide a service, exist for a defined amount of time, or engage a site, community or situation. Includes lectures, readings and discussions, writing assignments, studio projects and visual presentations.
Requisites: Requires prerequisite or corequisite course of ARTS 1020 (minimum grade C). Restricted to Studio Arts (AASA) or Art History (AAAH) majors only.
Recommended: Prerequisite ARTS 2504.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Sculpture

ARTS 3184 (3) Nothing Flat: Project a Week (Sculpture & Post-Studio Practice)
Provides students the opportunity to work with a range of sculptural materials through a series of quick projects (e.g. installation, objects, writing). Students will learn to generate ideas quickly, engage issues and formats particular to sculpture, and produce a wide range of work over 15 weeks. Formerly ARTS 2184.
Requisites: Requires prerequisite or corequisite course of ARTS 1020 (minimum grade C-). Restricted to Studio Arts (AASA) or Art History (AAAH) majors only.
Recommended: Prerequisite ARTS 2504.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Sculpture

ARTS 3191 (3) Photography 3
Continues the exploration of the possibility of individual photographic expression. Students are encouraged to discover and develop a personal position in relation to the medium.
Repeatability: Repeatable for up to 6.00 total credit hours.
Requisites: Requires prerequisite course of ARTS 2191 (minimum grade C). Restricted to Studio Arts (AASA) or Art History (AAAH) majors only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Photography

ARTS 3196 (3) Photo-Imaging
Introduces techniques, software, and related concepts of digital photography as art. Emphasizes digital photography as a means to formal and expressive ends.
Requisites: Requires prerequisite course of ARTS 1171 (minimum grade C).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Media Arts
ARTS 3202 (3) Painting Alternative Process/Materials
Continuation of Painting 2. Offers creative possibilities in painting and related media. Emphasizes experimentation and individual expression. Content varies by semester according to instructor; contact individual instructor for more information.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Requires prerequisite course of ARTS 3212 (minimum grade C). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

ARTS 3212 (3) Figure Painting
Explores varied painting techniques. Introduces concepts relevant to the understanding of painting and the creative process. May not be repeated. Formerly ARTS 2202.
Requisites: Requires prerequisite or corequisite course of ARTS 1020 (minimum grade C).

ARTS 3222 (3) Intermediate Painting
In addition to being a continuation of Beginning Painting, this course focuses on a non-traditional approach to making paintings encouraging conceptual development, experimentation and research. Moving beyond observation based painting multiple thematic possibilities will be explored. Emphasis will be placed equally on ideas and technical execution.
Requisites: Requires prerequisite courses of ARTS 1010 and ARTS 1020 and ARTS 2222 (all minimum grade C). Restricted to students with 57-180 credits (Juniors or Seniors).
Grading Basis: Letter Grade

ARTS 3224 (3) Picturing Sculpture
Explores the many ways photography and other forms of imagery have been utilized in the field of sculpture. Students will start from the sculptural, but those objects and installations will function as an intermediary to creating final work that will rest in the image. Include lectures, readings and discussions, writing assignments, studio projects and visual presentations.
Requisites: Requires prerequisite or corequisite course of ARTS 1020 (minimum grade C). Restricted to Studio Arts (AASA) or Art History (AAAH) majors only.
Recommended: Prerequisites ARTS 2504 and ARTS 2524.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Sculpture

ARTS 3236 (3) Electronic Arts Survey
Explores the development of video as an art form through tape screenings, readings, lectures, and discussions. Prerequisite for further studies in video production.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Media Arts

ARTS 3284 (3) Nothing Flat 2: Project a Week (Sculpture and Post-Studio Practice)
Provides students the opportunity to work with a range of sculptural materials through a series of quick projects (e.g. installation, objects, writing). Students will learn to generate ideas quickly, engage issues and formats particular to sculpture, and produces a wide range of work over 15 weeks. This course builds on ideas introduced in Nothing Flat 1.
Requisites: Requires prerequisite course of ARTS 1020 and prerequisite or corequisite course of ARTS 2504 (all minimum grade C).
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Sculpture

ARTS 3303 (3) Relief 1
Continued exploration of relief processes: various techniques of the collage process in combination with the art and process of the collagraph. Examining the collage aesthetic, creating collages and collagraph prints from found materials and objects. Other skills to be focused on include registration methods, blend rolls and the experimentation with rubbings.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Requires prerequisite courses of ARTS 1020 and ARTS 2303 (all minimum grade C).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Printmaking

ARTS 3354 (3) Bend, Build, Burn: Sculpture in Wood
Focuses on the production of works of art in wood. Class projects explore building, bending, and burning with wood. Focuses on sculptural constructed objects although possibilities of installation, site-specific and public art will also be explored.
Requisites: Requires prerequisite course of ARTS 1020 (minimum grade C).
Recommended: Prerequisites ARTS 2504 and ARTS 2524.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Sculpture

ARTS 3384 (3) Fleeting and Found 2: Ephemeral Sculpture 2
Focuses on creating sculpture projects which are ephemeral and temporary. Themes of process, lifespan, migration, tension, entropy and degradation will be explored. Includes lectures, readings and discussions, writing assignments, studio projects and visual presentations.
Requisites: Requires prerequisite of ARTS 1010 (minimum grade C).
Recommended: Prerequisites ARTS 2504 and ARTS 2524.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Sculpture

ARTS 3403 (3) Intaglio 1
Exploration into techniques of Intaglio with a focus on working with copper and ferric chloride. Historical approaches and use through contemporary materials and concepts. Emphasis is placed on mastering basic techniques, creating compositions and visual images, and exploring and developing concepts that challenge the viewer.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Requires prerequisite courses of ARTS 1020 and ARTS 2403 (minimum grade C). Restricted to Studio Arts (AASA) or Art History (AAAH) majors only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Printmaking
ARTS 3413 (3) Lithography 1  
Introduces the study of stone and metal plate lithography, emphasizing individual creative development in black and white and further development in color printing processes. Not available to freshmen. Taught with ARTS 4413 and ARTS 5413.  
Repeatable: Repeatable for up to 6.00 total credit hours.  
Requisites: Requires prerequisite or corequisite course of ARTS 1020 (minimum grade C). Restricted to Studio Arts (AASA/AASF) or Art History (AAAH) majors only.  
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Printmaking  
ARTS 3423 (3) Screen Printing 1  
Introduces the study of silkscreen techniques, emphasizing creativity, individual development, and experimentation in contemporary silkscreen processes.  
Repeatable: Repeatable for up to 6.00 total credit hours.  
Requisites: Requires prerequisite or corequisite course of ARTS 1020 (minimum grade C). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) Studio Arts (AASA/AASF) or Art History (AAAH) majors only.  
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Printmaking  
ARTS 3433 (3) Alternative Printmaking 1  
Continued exploration into the development of alternative techniques and materials, methods of extending the print beyond 2-dimensions and expanding the concept of what is a print will be explored in relation to each student’s studio practice and interests.  
Repeatable: Repeatable for up to 6.00 total credit hours.  
Requisites: Requires prerequisite courses of ARTS 1020 and ARTS 2433 (minimum grade C).  
Grading Basis: Letter Grade  
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Printmaking  
ARTS 3434 (3) Collaboration: Art and Collective Action  
Covers both historical background and hands on projects that are collaborative in nature. Includes lectures, readings and discussions, writing assignments, studio projects and visual presentations.  
Requisites: Requires prerequisite or corequisite course of ARTS 1020 (minimum grade C). Restricted to Studio Arts (AASA) or Art History (AAAH) majors only.  
Recommended: Prerequisites ARTS 2504 and ARTS 2524.  
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Sculpture  
ARTS 3453 (3) Monotype 1  
A continued exploration in the monoprint and monotype methods. Use of a varied grouping of matrices will be the focus of this class. Students will develop a portfolio of finished prints during the semester.  
Repeatable: Repeatable for up to 6.00 total credit hours.  
Requisites: Requires prerequisite courses of ARTS 1020 and ARTS 2453 (all minimum grade C). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) Studio Arts (AASA/AASF) or Art History (AAAH) majors only.  
Grading Basis: Letter Grade  
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Printmaking  
ARTS 3504 (3) Sculpture 3: Experiments 1  
Explores materials, methods, and techniques through a series of assignments emphasizing individual ideas and their relationship to contemporary aesthetics.  
Requisites: Requires prerequisite courses of ARTS 2504 and ARTS 2524 (minimum grade C). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.  
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Sculpture  
ARTS 3514 (3) Sculpture 3: Experiments 2  
Explores individual concepts and ideas and their relationship to contemporary issues and aesthetics. a series of assignments are worked out with the instructor based on individual interest.  
Requisites: Requires prerequisite course of ARTS 3504 (minimum grade C). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.  
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Sculpture  
ARTS 3604 (3) Beyond the Studio: Post-Studio Art Practice  
Overview of post-studio art practice and covers the historical landscape of artists and projects that have pushed “beyond the studio” since 1970. Includes lectures, readings and discussions, writing assignments, studio projects and visual presentations.  
Requisites: Requires prerequisite or corequisite course of ARTS 1020 (minimum grade C). Restricted to Studio Arts (AASA/AASF) or Art History (AAAH) majors only.  
Recommended: Prerequisites ARTS 2504 and ARTS 2524.  
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Sculpture  
ARTS 3614 (3) Lost in Space: Installation Art  
Students learn how to develop ideas in relation to installation art, exhibition spaces, and explore practical skills to help carry out their ideas. Includes lectures, readings and discussion, writing assignments, studio projects and visual presentations.  
Requisites: Requires prerequisite or corequisite course of ARTS 1020 (minimum grade C). Restricted to Studio Arts (AASA/AASF) or Art History (AAAH) majors only.  
Recommended: Prerequisites ARTS 2504 and ARTS 2524.  
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Sculpture  
ARTS 3702 (3) Special Focus in Painting and Drawing  
Offers varied focus and special topics in painting, drawing, and related media to explore specialized directions and creative possibilities. Emphasizes experimentation. Content varies by semester; contact individual instructor for more information.  
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.  
Requisites: Requires prerequisite course of ARTS 2002 or ARTS 2202 (minimum grade C).  
Recommended: Prerequisite ARTS 3002 or ARTS 3202.  
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Painting/Drawing
ARTS 3714 (3) Experimental Structures (Sculpture and Post-Studio Practice)
Explores the interface of sculpture and architecture. Looks at individuals and collectives that have become renowned for their work with experimental structures and students will have the opportunity to build hands-on experiments. Includes lectures, readings and discussions, writing assignments, studio projects and visual presentations.
Requisites: Requires prerequisite or corequisite course of ARTS 1020 (minimum grade C). Restricted to Studio Arts (AASA/AASF) or Art History (AAAH) majors only.
Recommended: Prerequisites ARTS 2504 and ARTS 2524.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Sculpture

ARTS 3841 (1-3) Undergraduate Independent Study---Photography
Reserved only for special projects in photography, not offered in the curriculum. Requires a detailed proposal, instructor's signature and departmental approval.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Requires prerequisite course of ARTS 3191 or ARTS 4161 (minimum grade C).
Additional Information: Departmental Category: Photography

ARTS 3842 (1-3) Undergraduate Independent Study---Painting
Reserved for special projects in painting not offered in the curriculum. Requires a detailed proposal, instructor's sponsorship, and departmental approval.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Requires prerequisite course of ARTS 3202 (minimum grade C).
Additional Information: Departmental Category: Painting/Drawing

ARTS 3845 (1-3) Undergraduate Independent Study---Ceramics
Reserved for special projects in ceramics not offered in the curriculum. Requires a detailed proposal, instructor's sponsorship, and departmental approval.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Requires prerequisite course of ARTS 3085 (minimum grade C).
Additional Information: Departmental Category: Ceramics

ARTS 3847 (1-3) Independent Study
Reserved for special projects not offered in the curriculum. Department enforced prerequisite: detailed proposal, instructor sponsorship, and departmental approval.
Repeatable: Repeatable for up to 6.00 total credit hours.
Additional Information: Departmental Category: Seminars/Special Topics

ARTS 3906 (1-3) Undergraduate Independent Study---Video
Reserved for special projects in video not offered in the curriculum. Requires a detailed proposal, instructor's sponsorship, and departmental approval.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Requires prerequisite course of ARTS 4246 (minimum grade C).
Additional Information: Departmental Category: Media Arts

ARTS 3937 (1-6) Internship
Gives upper-division students the opportunity to work in public or private organizations on assignments relating to their career goals, and allows them to explore the relationship between theory and practice in their major.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to students with 57-180 credits (Junior or Senior) Studio Arts (AASA or AASF) or Art History (AAAH) majors only.
Additional Information: Departmental Category: Seminars/Special Topics

ARTS 4002 (3) Advanced Drawing/Portfolio
Continuation of Drawing 3. Advanced studio class in drawing for creative expression and individual portfolio development. Emphasis varies by semester; contact individual instructor for more information.
Repeatable: Repeatable for up to 12.00 total credit hours.
Requisites: Requires prerequisite courses of ARTS 1020 and ARTS 2022 and ARTS 3022 (all minimum C). Restricted to Junior and Senior Studio Arts (AASA/AASF) or Art History (AAAH) majors only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Painting/Drawing

ARTS 4004 (3) Land and Environmental Art (Sculpture and Post-Studio Practice)
Covers land and environmental art, providing an historical survey along with hands on projects in the landscape. Focusing on themes of site, environment, landforms, weather, and earth materials, students will design and realize art projects on the land. Includes lectures, readings and discussions, writing assignments, studio projects and visual presentations.
Requisites: Requires prerequisite or corequisite course of ARTS 1020 (minimum grade C). Restricted to Studio Arts (AASA/AASF) or Art History (AAAH) majors only.
Recommended: Prerequisites ARTS 2504 and ARTS 2524.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Sculpture

ARTS 4014 (3) Art and Social Practice (Sculpture and Post-Studio Practice)
Covers social art practice, providing an historical survey along with hands on projects in social environments. Focusing on issues of public space, economic and cultural marginalization and political causes, provides students a forum for expressions of social reality. Includes lectures, readings and discussions, writing assignments, studio projects and visual presentations.
Requisites: Requires a prerequisite or corequisite course of ARTS 1020 (minimum grade D). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.
Recommended: Prerequisites ARTS 2504 and ARTS 2524.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Sculpture

ARTS 4017 (1-3) Special Topics in Studio Arts
Introduces timely subjects in studio art courses that cannot be offered on a regular basis. Information on topics in any given semester is available prior to pre-registration in departmental office.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 5017
Repeatable: Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.
Requisites: Requires prerequisite courses of ARTS 1010 and ARTS 1020 and ARTH 1300 or ARTH 1400 (all minimum grade C). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Seminars/Special Topics
ARTS 4024 (3) Public Art
Focuses on the two areas 1) lecture/discussion, both based on political, historical and the aesthetic evolution regarding examples of public art and 2) current practice, in reference to how to use such information to generate new more innovative and original ideas regarding public art and its application. Includes lectures, readings and discussions, writing assignments, studio projects and visual presentations.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 5024
Requisites: Requires a prerequisite or corequisite course of ARTS 1020 (minimum grade D-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.
Recommended: Prerequisites ARTS 2504 and ARTS 2524 and ARTS 3504.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Sculpture

ARTS 4085 (3) Ceramics 4
Develop a personal creative practice through self-generated, independent projects. The focus is on developing an individual studio discipline through experimentation, research, reading and writing and examining the work in individual critiques.
Repeatable: Repeatable for up to 12.00 total credit hours.
Requisites: Requires prerequisite course of ARTS 3085 (minimum grade D-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Ceramics

ARTS 4087 (3) Selected Topics in Contemporary Art
Selectively studies significant areas of visual art of the last decade including major critical opinions.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 5087
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Requires prerequisite of 20 units of ARTS or ARTH coursework completed (minimum grade D-).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Seminars/Special Topics

ARTS 4095 (3) Special Topics in Ceramics
Designed for students majoring in ceramics.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 5095
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Requires prerequisite course of ARTS 3085 (minimum grade D). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Ceramics

ARTS 4097 (1-3) Special Topics-Non-Studio
Introduces timely subjects in the visual arts that cannot be offered on a regular basis. Information concerning the topics offered in any given semester is available prior to preregistration from the fine arts department.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 5097
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Requires prerequisite courses of ARTS 1010 and ARTS 1020 and ARTH 1300 or ARTH 1400 (all minimum grade C). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Seminars/Special Topics

ARTS 4104 (3) Performance/Installation
Primarily focuses upon personal imagery as a live situation occurring in either an invented constructed reality or real environment. Work may be individual or group configuration and may also take on the visual linguistic form of a solo performance or of a multimedia presentation.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 5104
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Requires prerequisite courses of ARTS 1010 and ARTS 1020 and ARTH 1300 or ARTH 1400 (all minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Sculpture

ARTS 4107 (1-3) Special Topics
Repeatable: Repeatable for up to 3.00 total credit hours.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Seminars/Special Topics

ARTS 4117 (3) BFA Seminar
For students intending to pursue graduate work and/or a professional career in art. Emphasizes the development of a critical overview of their work and interests and how they relate to the problems of professional activity.
Requisites: Restricted to Studio Arts (AASF) majors only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Seminars/Special Topics

ARTS 4118 (3) Visiting Artist Program
Artists of national and international reputation, interacting with graduate and advanced undergraduate students, discuss their studio work at seminar meetings and at public lectures or events. Provides continuous input of significant developments and a comprehensive view of contemporary issues in the arts. Department enforced prerequisite: portfolio review.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 5118
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to students with 87-180 credits (Senior) Studio Arts (AASA or AASF) or Art History (AAAH) majors only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Visiting Artist Program

ARTS 4126 (3) Digital Art 2
Offers studio experience using personal computer in the generation and processing of imagery in the visual arts.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 5126
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Requires prerequisite course of ARTS 2126 (minimum grade C). Restricted to Studio Arts (AASA/AASF) or Art History (AAAH) majors only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Media Arts

ARTS 4127 (3) Art from Nature
Provides an opportunity for advanced students to create nature based art. Studio work and/or appropriate on-site works will be generated through readings and individual and group experiences of nature.
Requisites: Requires prerequisite of one 4000-level ARTS course (minimum grade D-).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Seminars/Special Topics

ARTS 5024 (3) Public Art
Focuses on the two areas 1) lecture/discussion, both based on political, historical and the aesthetic evolution regarding examples of public art and 2) current practice, in reference to how to use such information to generate new more innovative and original ideas regarding public art and its application. Includes lectures, readings and discussions, writing assignments, studio projects and visual presentations.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 5024
Requisites: Requires a prerequisite or corequisite course of ARTS 1020 (minimum grade D-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.
Recommended: Prerequisites ARTS 2504 and ARTS 2524 and ARTS 3504.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Sculpture

ARTS 5085 (3) Ceramics 4
Develop a personal creative practice through self-generated, independent projects. The focus is on developing an individual studio discipline through experimentation, research, reading and writing and examining the work in individual critiques.
Repeatable: Repeatable for up to 12.00 total credit hours.
Requisites: Requires prerequisite course of ARTS 3085 (minimum grade D-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Ceramics

ARTS 5087 (3) Selected Topics in Contemporary Art
Selectively studies significant areas of visual art of the last decade including major critical opinions.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 5087
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Requires prerequisite of 20 units of ARTS or ARTH coursework completed (minimum grade D-).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Seminars/Special Topics

ARTS 5095 (3) Special Topics in Ceramics
Designed for students majoring in ceramics.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 5095
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Requires prerequisite course of ARTS 3085 (minimum grade D). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Ceramics

ARTS 5097 (1-3) Special Topics-Non-Studio
Introduces timely subjects in the visual arts that cannot be offered on a regular basis. Information concerning the topics offered in any given semester is available prior to preregistration from the fine arts department.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 5097
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Requires prerequisite courses of ARTS 1010 and ARTS 1020 and ARTH 1300 or ARTH 1400 (all minimum grade C). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Seminars/Special Topics

ARTS 5104 (3) Performance/Installation
Primarily focuses upon personal imagery as a live situation occurring in either an invented constructed reality or real environment. Work may be individual or group configuration and may also take on the visual linguistic form of a solo performance or of a multimedia presentation.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 5104
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Requires prerequisite courses of ARTS 1010 and ARTS 1020 and ARTH 1300 or ARTH 1400 (all minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Sculpture

ARTS 5107 (1-3) Special Topics
Repeatable: Repeatable for up to 3.00 total credit hours.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Seminars/Special Topics

ARTS 5117 (3) BFA Seminar
For students intending to pursue graduate work and/or a professional career in art. Emphasizes the development of a critical overview of their work and interests and how they relate to the problems of professional activity.
Requisites: Restricted to Studio Arts (AASF) majors only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Seminars/Special Topics

ARTS 5118 (3) Visiting Artist Program
Artists of national and international reputation, interacting with graduate and advanced undergraduate students, discuss their studio work at seminar meetings and at public lectures or events. Provides continuous input of significant developments and a comprehensive view of contemporary issues in the arts. Department enforced prerequisite: portfolio review.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 5118
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to students with 87-180 credits (Senior) Studio Arts (AASA or AASF) or Art History (AAAH) majors only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Visiting Artist Program

ARTS 5126 (3) Digital Art 2
Offers studio experience using personal computer in the generation and processing of imagery in the visual arts.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 5126
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Requires prerequisite course of ARTS 2126 (minimum grade C). Restricted to Studio Arts (AASA/AASF) or Art History (AAAH) majors only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Media Arts

ARTS 5127 (3) Art from Nature
Provides an opportunity for advanced students to create nature based art. Studio work and/or appropriate on-site works will be generated through readings and individual and group experiences of nature.
Requisites: Requires prerequisite of one 4000-level ARTS course (minimum grade D-).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Seminars/Special Topics
ARTS 4130 (3) Integrated Media
Encourages experimentation with media and integration of traditional areas of drawing, painting, sculpture and photography. Covers two- and three-dimensional collage/assemblage, correspondence art, artist’s books, site-specific, performance, audio and video art.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 5130
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Integrated Arts

ARTS 4154 (3) Metalsmithing 1
Introduces students to the fundamental techniques used in metalsmithing, including cold and hot fabrication techniques, forming and coloring. Through projects, discussions, readings and demonstrations, students will learn how to create, analyze, understand and critique contemporary metalwork. Projects will focus on design and concept development, while enhancing students’ technical and problem-solving skills.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 5154
Requisites: Requires prerequisite courses of ARTS 1010, 1020, at least one 2000-level ARTS course, and at least one 3000-level ARTS course (all minimum grade D-).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Sculpture

ARTS 4161 (3) Photography 4
Explores advanced techniques and concepts of photography as art. Emphasizes photography as a means to formal and expressive ends.
Repeatable: Repeatable for up to 12.00 total credit hours.
Requisites: Requires prerequisite course of ARTS 3191 (minimum grade D-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Photography

ARTS 4171 (3) New Directions in Photography
Investigates the use of the photographic image in new, antique, or nonstandard ways including nonsilver, photosculpture, various color processes, photolanguage, photoinstallations, electronic media, performance, filmmaking, electrostatic art (copy machine), photobooks, photocollage, and audio/visual art. Course content changes each semester.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 5171
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Requires prerequisite course of ARTS 3191 (minimum grade D-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Photography

ARTS 4176 (3) New Directions in Digital Art
Investigates the use of digital art in various contexts including digital narrative, web publishing, internet art, multimedia performance, animation, conceptual art, information art, sound art, language art and network installations.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 5176
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Requires prerequisite courses of ARTS 2126 (minimum grade C-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Media Arts

ARTS 4196 (3) Advanced Photo-Imaging
Offers an in-depth exploration of digital imaging in the context of the history, aesthetics, and tradition of photography as contemporary art. Emphasis is on digital manipulation, output and individual growth and development.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 5196
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Requires prerequisite course of ARTS 2191 (minimum grade C-).
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Media Arts

ARTS 4202 (3) Advanced Painting/Portfolio
Continuation of Painting 3. Advanced studio class in painting for creative expression and individual portfolio development. Emphasis varies by semester; contact individual instructor for more information.
Repeatable: Repeatable for up to 12.00 total credit hours.
Requisites: Requires prerequisite course of ARTS 1010 and 1020 and 2222 and 3222 (minimum grade C-). Restricted to Junior and Senior Studio Arts (AASA/AASF) or Art History (AAAH) majors only.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Painting/Drawing

ARTS 4217 (3) Art and Race/Ethnicity
Equivalent - Duplicate Degree Credit Not Granted: ARTS 5217
Recommended: Prerequisites ARTS 1300 and ARTS 1400 or instructor consent required.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Seminars/Special Topics

ARTS 4226 (3) Advanced Computer Imaging
Explores advanced techniques and concepts of digital image-making. Emphasizes the creative application of computer imaging in the production of visual art through individual projects.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 5226
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Requires prerequisite course of ARTS 4126 (minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Studio Arts (AASA/AASF) or Art History (AAAH) majors only.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Media Arts

ARTS 4236 (3) Electronic Arts Survey 2
Continuation of electronic arts survey. Explores the development of video as an art form. Prerequisite for further studies in video production.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 5236
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Media Arts
ARTS 4246 (3) Beginning Video Production
Presents a studio course on basic single camera video production strategies and concepts. Through class screenings, projects, demonstrations, discussions, and readings, students gain an introductory familiarity with camera, lighting, sound, editing and the organization and planning involved in a video project. Explores a basic theoretical understanding of video as an art form and its relationship to television, film, art, history, culture.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 5246
Repeatable: Repeatable for up to 9.00 total credit hours.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Media Arts

ARTS 4303 (3) Relief 2
Continued exploration into the expressive/formal aesthetics of relief processes. Studio practice/investigation of artistic attitudes as exemplified through historical perspectives, traditional/contemporary usages.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Requires prerequisite courses of ARTS 1010 and ARTS 1020 and ARTS 3303 (all minimum grade C-).
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Printmaking

ARTS 4316 (3) History and Theory of Digital Art
Explores the history and theory of digital art. Discussion topics include the emergence of Internet art, hypertext, new media theory, online exhibitions, web publishing, virtual reality and the networked interface. Includes collaborative and individual projects.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 5316
Requisites: Requires prerequisite course of ARTS 2126 (minimum grade C-). Restricted to Studio Arts (AASA/AASF) or Art History (AAAH) majors only.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Printmaking

ARTS 4327 (3) Biennial Art
Covers art represented in the most current international biennials (Documenta, Venice Biennale, Sao Paulo Biennial, Havana Biennial, Gwanju Biennial and the Istanbul Biennial). Art will be analyzed by applying postmodern theory, postcolonial theory and international theoretical perspectives that have not yet been integrated into Western thought.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 5327
Requisites: Requires prerequisite courses of ARTH 1300 and ARTH 1400 (minimum grade C-).
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Printmaking

ARTS 4403 (3) Intaglio 2
Continued exploration of techniques of intaglio process, including non-acid and ferric chloride techniques with copper as the main matrix being used. Possible processes focused on include: photo etching using solar plates and introduction to printing ala pouppee wiping, chine colle and basic color. Building a unified body of work is the main focus.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Requires prerequisite courses of ARTS 1020 and ARTS 3403 (minimum grade C-). Restricted to Studio Arts (AASA/AASF) or Art History (AAAH) majors only.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Printmaking

ARTS 4413 (3) Lithography 2
Continues the study of stone and metal plate lithography, emphasizing individual creative development in black and white and further development in color printing processes. Digital imaging and nontoxic processes are emphasized as much as possible. Taught with ARTS 3413 and ARTS 5413.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Requires prerequisite course of ARTS 3413 (minimum grade D). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Printmaking

ARTS 4423 (3) Screen Printing 2
Introduces advanced screen printing technology, emphasizing individual creativity and the ability to resolve problems of two-dimensional form.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Requires prerequisite course of ARTS 3423 (minimum grade C-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) Studio Arts (AASA/AASF) or Art History (AAAH) majors only.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Printmaking

ARTS 4433 (3) Alternative Printmaking 2
Continued research into developing a sharper critical response, both aesthetically and conceptually, to their own work, as well as the work of other artists. Various alternative printmaking methods will be introduced and each student is expected to explore and examine these processes through a body of work. Emphasis is put on the interrelationship of processes, materials and ideas/aesthetics.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 5433
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Requires prerequisite courses of ARTS 1020 and ARTS 3433 (minimum grade C-). Restricted to Studio Arts (AASA/AASF) or Art History (AAAH) majors only.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Printmaking

ARTS 4434 (3) Collaboration: Art & Collective Action
Covers both historical background and hands on projects that are collaborative in nature. Includes lectures, readings and discussions, writing assignments, studio projects and visual presentations.
Requisites: Requires prerequisite courses of ARTS 1010 and ARTS 1020 (all minimum grade C-).
Recommended: Prerequisites ARTS 2504 and ARTS 2524.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Sculpture
ARTS 4444 (6) Art and Rural Environments Field School
Puts students in touch with various rural landscapes in Colorado. Takes place off campus each summer during Maymester. Focuses on site-based approaches to art creation and is designed as an experiential course, meaning that students learn through the experience of place and then by the process of making. After introductions to each site, students will be responsible for a site interpretation piece utilizing various mediums including photography, drawing, land art and collaboration.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 5444
Requisites: Requires prerequisite courses of ARTS 1010 and ARTS 1020 (all minimum grade C).
Recommended: Prerequisite ARTS 2504.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Sculpture

ARTS 4453 (3) Monotype 2
Continued research into developing techniques of using a varied grouping of matrices will be the focus of this class. Students will be expected to develop sharper critical responses both aesthetically and conceptually, to their own work, as well as the work of other artists.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 5453
Repeatable: Repeatable for up to 6.00 total credit hours.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Printmaking

ARTS 4457 (3) Sound Art Seminar
Covers the history of sound art from Luigi Russolo and his noise machine during the Futurist Movement to today’s experimental music/sound art contributions. Students will listen to sound art works by artists in all areas of sound art, as well as read about theoretical views on sound art.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 5457
Requisites: Requires prerequisite courses of ARTH 1300 and ARTH 1400 (minimum grade C).
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Seminars/Special Topics

ARTS 4504 (3) Advanced Sculpture Studio
Students in this course will be required to complete projects, participate in group critiques of projects, produce a slide presentation on a contemporary artist whose work/practice fits within the theme of the course, and collectives that have become renowned for their work with art fabricators. Highlights national and international hybrid art, design, and engineering advanced degree programs and additional art-related internships and job opportunities. Previously offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 5607
Requisites: Requires prerequisite courses of ARTH 1300 and ARTH 1400 (minimum grade C).
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Seminars/Special Topics

ARTS 4607 (3) Art and Social Change
Examines how art is used as an agent for social change. Among topics addressed by artists interested in social change are: immigration, HIV/AIDS, illness/disease, ecology/the environment, feminism, gay and lesbian issues, war, violence, racial and ethnic minorities, etc.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 5607
Requisites: Requires prerequisite courses of ARTH 1300 and ARTH 1400 (minimum grade C).
Grading Basis: Letter Grade

ARTS 4641 (3) String Instrument Building
As a prelude to sculptural art making processes, this course explores a variety of materials, methods and techniques and their application to the making of a musical string instrument, i.e. planning, designing, material selection and a wide variety of woodworking processes. We will also cover theoretical discussions into what is being made.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 5641
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Sculpture

ARTS 4714 (3) Experimental Structures (Sculpture and Post Studio Practice)
Explores the interface of sculpture and architecture. Looks at individuals and collectives that have become renowned for their work with experimental structures and students will have the opportunity to build hands-on experiments. Includes lectures, readings and discussions, writing assignments, studio projects and visual presentations.
Requisites: Requires prerequisite courses of ARTS 1010 and ARTS 1020 (all minimum grade C).
Recommended: Prerequisites ARTS 2504 and ARTS 2524.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Sculpture

ARTS 4717 (1-3) Studio Critique
Consists of consultations with faculty on individual studio problems and projects. Department consent required.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Seminars/Special Topics

ARTS 4934 (3) Art, Design, and Engineering: Thinking and Making
Examines the aesthetics, design, and engineering of sculpture, installation, and public art. Through research presentations, readings, and field trips, students learn about the process of making art. In addition to classroom learning, students engage in internships with artists and design offices. Highlights national and international hybrid art, design, and engineering advanced degree programs and additional art-related internships and job opportunities. Previously offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 5934
Requisites: Restricted to Art History (AAAH) or Engineering and Applied Science (COEN) majors or minors with a minimum of 50 credits only.
Recommended: Prerequisites ARTS 1010, ARTS 1020, ARTH 1300, ARTH 1400, COEN 1400, COEN 3930.
Grading Basis: Letter Grade
Art History - Bachelor of Arts (BA)

The Art History program teaches students how to analyze art within many contexts, including historical, intellectual, cultural, political, social and stylistic. In addition to examining diverse methodologies, introductory and upper-division courses cover artistic production from a wide range of cultures and periods, including Medieval art, Early Modern art, Pre-Columbian art, Colonial Latin American art, Asian art, Native North American art, Modern art and architecture, Contemporary art and critical theory/Museology.

Requirements

Students must complete the general requirements of the College of Arts and Sciences and the required courses listed below. A minimum of 39 credits are required for the major, 24 of which must be upper-division.

Required Courses

<table>

</table>

Upper-division Art History Courses

- 3000 or 4000-level art history courses: 9 credits
- 4000-level art history courses: 12 credits
- ARTH 4919: Capstone Seminar: Topics in Art History (in addition to the 12 hours of 4000 level art history courses): 3 credits

Major Electives

- Arts or ARTH electives; fourth semester or higher foreign language is also acceptable: 3 credits

Total Credit Hours: 39

Distribution Requirements

It is strongly recommended that students take classes in a wide variety of time periods and cultures. It is recommended that students complete at least three hours at the 3000- or 4000-level in at least three of the four following areas: Africa, Americas, Europe, and Asia. Students must complete at least 36 hours at the upper-division level on the Boulder campus after starting the program.

Recommended Four-Year Plan

Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of “adequate progress” as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress toward a BA in art history, students should meet the following requirements:

- Declare the major by the beginning of the second semester.
- By the end of the third semester, complete lower-division studio courses, lower-division art history courses and two classes in upper-division art history.
- By the end of the sixth semester complete up to 32 credits in the major.

Through the required coursework for the major, students will fulfill all 12 credits of the Arts & Humanities area of the Gen Ed Distribution Requirement.

Learning Outcomes
The undergraduate degree in art history emphasizes knowledge and awareness of:

• The major artistic traditions of the world in a historical and theoretical context.
• Varied methodologies used to study art historically.
• Artistic media and techniques.

In addition, students completing the degree in art history are expected to:

• Think and write critically about art in its cultural and historical contexts.
• Interpret historical and critical information about works of art, artists and related issues.
• Know the methods by which art can be evaluated.
• Carry out scholarly research on art historical topics.

Bachelor’s–Accelerated Master’s Degree Program(s)
The Bachelor’s–Accelerated Master’s (BAM) degree program options offer currently enrolled CU Boulder undergraduate students the opportunity to receive a bachelor’s and master’s degree in a shorter period of time. Students receive the bachelor’s degree first, but begin taking graduate coursework as undergraduates (typically in their senior year). Because some courses are allowed to double count for both the bachelor’s and the master’s degrees, students receive a master’s degree in less time and at a lower cost than if they were to enroll in a stand-alone master’s degree program after completion of their baccalaureate degree. In addition, staying at CU Boulder to pursue a bachelor’s–accelerated master’s program enables students to continue working with their established faculty mentors.

BA and MA in Art History
The BAM program in art history is a demanding, accelerated program aimed primarily at our best undergraduates who are planning to pursue a PhD. The typical student will be a student writing an honors thesis who will use that project as the basis for developing the MA thesis. It is expected that the BAM program be completed within five years. For details about admission into the program and degree requirements, visit the department’s BAM webpage (https://www.colorado.edu/artandarthistory/degrees/bachelors-accelerated-masters-bam-art-history/).

Admission Requirements
In order to gain admission to the BAM program, a student must meet the following criteria:

• Secure a faculty sponsor from the Department of Art and Art History.
• Have a GPA of 3.6 or higher in the art history major, with a cumulative GPA of 3.3 or higher.
• Transfer students must have completed a minimum of 24 credit hours at CU Boulder.
• Must have completed all MAPS deficiencies.

Program Requirements
Students may take up to and including 12 hours while in the undergraduate program which can later be used toward the master’s degree. However, only 6 credits may be double counted toward the bachelor’s degree and the master’s degree. Students must apply to graduate with the bachelor’s degree, and apply to continue with the master’s degree, early in the semester in which the undergraduate requirements will be completed.

If you are interested in the BAM degree program, please contact the Graduate Program Coordinator for the Department of Art and Art History at art.grad@colorado.edu.

Art Practices - Bachelor of Arts (BA)
The BA in art practices allows students to explore their interests and refine their skills in ceramics, Integrated Media Arts Practices/ IMAP (photography, digital media, video, integrated arts), painting and drawing, printmaking, and sculpture and post-studio practice. Students gain a broad understanding of the field of contemporary art and experience in contemporary art practices while pursuing a liberal arts degree at the university.

Portfolio submission is not required to declare art practices as a major or minor.

Required Courses
Students must complete the general requirements of the College of Arts and Sciences and the required courses listed below. Students must complete 39 credits in the major. See the Art Practices - Bachelor of Fine Arts (BFA) (p. 124) page for information about admission to the BFA program.

*The BA degree requires a minimum of 45 upper-division (3000- and 4000-level courses) credits. Please consult with your advisor to ensure this general BA degree requirement is met by the fourth year.

**Learning Outcomes**
The undergraduate degree in art practices emphasizes knowledge and awareness of:

- The significance of the major traditions in art history.
- At least one discipline of art practices.
- Related critical issues in art practice.
- A wide range of stylistic approaches.
In addition, students completing a degree in art practices are expected to acquire the ability and skills to:

• Analyze their own works of art in terms of form and content.
• Interpret the work of others.
• Execute ideas in one or more artistic media.
• Demonstrate artistic ability and technical proficiency in one chosen medium.
• Communicate in verbal and written form the particular conceptual and perceptual attitudes and stances of their own artistic production.

Art Practices - Bachelor of Fine Arts (BFA)

The BFA in art practices is a more in-depth degree intended for motivated students interested in and committed to pursuing a professional career in the arts. Students gain training in studio techniques and post-studio practice, an overview of historical and contemporary artists and movements, and an introduction to criticism. Additionally, students participate in the BFA Seminar, are eligible to enroll in the Visiting Artist Seminar, and present work in the culminating BFA exhibition.

Requirements

Admission Requirements

The BFA is a highly selective program. Only art majors may apply to the program with a portfolio and application materials, which are reviewed once in the fall and once in the spring.

For application information, please visit the department’s website (https://www.colorado.edu/artandarthistory/degrees/bfa-degree-information-application/). For overall degree requirements, students should run a degree audit and consult with their advisor. Students must have completed or be in progress of completing 30 credits in the major to apply for the BFA.

Required Courses and Credits

Students must complete 63 credits toward the major, of which at least 12 upper-division credits must have been completed at CU Boulder. Students must present and pass a portfolio review to be eligible for the BFA degree (a minimum of 30 ARTS/ARTH credits are required to be completed or in progress to apply).

Upper-division Art History Courses

Any two 3000- or 4000-level ARTH courses

Major Electives

Upper- or lower-division electives in ARTS or ARTH

Total Credit Hours

63

Students must also complete at least 12 upper-division ARTS/ARTH courses on the Boulder campus after starting the program.

Recommended Four-Year Plan of Study

Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of "adequate progress" as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress toward a BFA in studio arts or divisional studio arts, students should meet the following requirements:

• Declare the major by the beginning of the first semester, freshman year.
• By the end of the third semester, complete ARTS 1010 and ARTS 1020, ARTH 1500 and ARTH 1600, two 2000-level courses and one lower-division or upper-division studio or art history course (21 credit hours).
• Apply for the BFA in the fourth or fifth semester, with a minimum of 30 credit hours in the major.
• By the end of the sixth semester, complete up to 48 credit hours in the major.
• A total of 18 credit hours in ARTS/ARTH electives are required. Up to 6 credit hours of electives may be taken outside the department with advisor permission.

Through the required coursework for the major, students will fulfill all 12 credits of the Arts & Humanities area of the Gen Ed Distribution Requirement.

Learning Outcomes

- To allow students the opportunity to study, in depth, contemporary art practice and provide them the opportunity to exhibit BFA work in a curated group exhibition during their final semester.
- To allow students the opportunity to develop a portfolio of work required for application to MFA programs.
- To prepare students for a variety of careers in the arts, including in museums and galleries, community outreach programs, design, artist studio assistantships, and the establishment of their own studio practices.

Art History - Minor

The Department of Art and Art History offers a minor in art history for undergraduate students, regardless of college or school, who are interested in the field.

Requirements

All coursework applied to the minor must be completed with a grade of C- or better; no pass/fail work may be applied. The grade point average for all minor degree coursework must be equal to 2.000 (C) or higher.

Students are allowed to apply no more than 9 credits, including 6 upper-division credits, of transfer work toward a minor. Art practices majors may apply ARTH 1300 and ARTH 1400 OR ARTH 1500 and ARTH 1600 (both major requirements) toward the completion of an art history minor, but may not apply major electives toward completion of the minor.

Required Courses

The minor in art history requires a minimum of 18 credit hours in art history coursework, as follows:

Art Practices - Minor

The Department of Art and Art History offers a minor in art practices for undergraduate students who are interested in studio arts.

Requirements

The requirements for the minor in art practices include:
Asian Languages and Civilizations

The Department of Asian Languages and Civilizations, founded in 1982, offers undergraduate majors in Chinese and Japanese, minors in Arabic, Chinese, Hindi/Urdu, Japanese and Korean, and certificates in Middle Eastern and Islamic Studies and South Asian Languages and Civilizations, as well as language, literature and culture courses in Arabic, Chinese, Farsi, Hindi/Urdu, Japanese and Korean.

Undergraduate students receive a thorough grounding in the modern language, an introduction to the classical language and literature and a broad familiarity with the literary and cultural history of their selected area.

Students interested in Chinese or Japanese (https://www.colorado.edu/alc/undergraduate/majors/) are encouraged to broaden their academic horizon through a double major, combining either language with another field of interest. Likewise, students in all Asian Languages and Civilizations programs as well as programs outside the department can pursue one of the department's minors (https://www.colorado.edu/alc/undergraduate/minors/) or certificates (https://www.colorado.edu/alc/undergraduate/certificates/) as a way of broadening their career options.

Before registering for specific courses, students should consult with a departmental advisor (https://www.colorado.edu/alc/undergraduate/advising/) concerning appropriate placement in language classes beyond the beginning level.

In addition to language instruction courses, the department offers several courses taught in English (https://www.colorado.edu/alc/courses/). These courses provide an excellent introduction to the literary and cultural histories of the areas involved. They are open to all interested students and do not require previous study of the language or subjects addressed.

The department strongly encourages all students to participate in Study Abroad to enrich their studies in our programs. For information about programs throughout the world, contact the Education Abroad office (http://abroad.colorado.edu/).

Recent graduates have found positions in such fields as government service, international business and secondary-school teaching; others have gone on to graduate study in Chinese or Japanese. Additional career opportunities can be found on the Career Services website (http://www.colorado.edu/career/).

For more information about the Department of Asian Languages and Civilizations, please visit the department website (https://www.colorado.edu/alc/).

Course codes for the department's six programs are ARAB, CHIN, FRSI, HIND, JPNS and KREN.

Bachelor's Degrees
- Chinese - Bachelor of Arts (BA) (p. 138)
- Japanese - Bachelor of Arts (BA) (p. 140)

Minors
- Arabic - Minor (p. 143)
- Chinese - Minor (p. 144)
- Hindi/Urdu - Minor (p. 144)
- Japanese - Minor (p. 144)
- Korean - Minor (p. 145)

Certificates
- Middle Eastern and Islamic Studies - Certificate (p. 145)
- South Asian Languages and Civilizations - Certificate (p. 146)

Faculty
While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Thompson, Thomas Levi (https://experts.colorado.edu/display/fisid_164187/)
Assistant Professor; PhD, University of California, Los Angeles

Courses

Arabic

ARAB 1010 (5) Beginning Arabic 1
Introduces students to speaking, listening, reading, and writing skills in the standard means of communication in the Arab world. This course is proficiency-based. All activities within the course are aimed at placing the student in the context of the native-speaking environment from the very beginning.

Additional Information: Arts Sci Core Curr: Foreign Language
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Foreign Language
Departmental Category: Arabic
Departmental Category: Asia Content

ARAB 1011 (3) Introduction to Arab and Islamic Civilizations
Provides an interdisciplinary overview of the cultures of the Arabic-speaking peoples of Southwest Asia and North Africa from the rise of Islam in the 7th century to the present. Readings include historical, religious, literary and cultural texts from both the medieval and modern eras. Taught in English.

Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Diversity-Global Perspective
Departmental Category: Arabic Courses in English
Departmental Category: Asia Content

ARAB 1020 (5) Beginning Arabic 2
Continuation of ARAB 1010.
Requisites: Requires prerequisite course of ARAB 1010 (minimum grade C).

Additional Information: Arts Sci Core Curr: Foreign Language
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Foreign Language
Departmental Category: Arabic
Departmental Category: Asia Content

ARAB 2110 (5) Intermediate Arabic 1
Proficiency-based course emphasizes speaking, listening, reading, and writing. Covers a variety of topics. Students give classroom presentations and write short essays in Arabic. Speaking ability is assessed through an oral proficiency interview.
Requisites: Requires prerequisite course of ARAB 1020 (minimum grade C).

Additional Information: GT Pathways: GT-AH - Arts Hum: Foreign Languages
Arts Sci Core Curr: Foreign Language
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Foreign Language
Departmental Category: Arabic
Departmental Category: Asia Content

ARAB 2120 (5) Intermediate Arabic 2
Continuation of ARAB 2110.
Requisites: Requires prerequisite course of ARAB 2110 (minimum grade C).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Arabic
Departmental Category: Asia Content

ARAB 2231 (3) Love, Loss and Longing in Classical Arabic Literature
Surveys Arabic literature from the sixth through the eighteenth centuries. It offers an introduction to Arabic literature, namely prose and poetry, through its key texts as well as the range of themes and techniques found in this literature, and it lays the groundwork for contextualizing the literature in the framework of other literary traditions. Taught in English.

Grading Basis: Letter Grade

Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Arabic
Departmental Category: Asia Content
ARAB 2320 (3) The Muslim World, 600-1250
Focusing on the history of the Muslim World in the age of the caliphates, this course takes an interdisciplinary, comparative approach to the development of Islamicate society, focusing on social structure, politics, economics and religion. Students will use primary and secondary sources to write a research paper, and make in-class presentations to cultivate critical thinking, research and writing skills. Taught in English.
Equivalent - Duplicate Degree Credit Not Granted: RLST 2320
Grading Basis: Letter Grade
Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Diversity-Global Perspective
Departmental Category: Arabic Courses in English
Departmental Category: Asia Content

ARAB 3110 (3) Advanced Arabic 1
Designed to train students further in the four language skills (writing, speaking, reading, listening/comprehension) at an advanced level. Enables students to acquire a better and broader understanding of Arabic culture and texts drawn from various genres of Arabic letters.
Requisites: Requires prerequisite course of ARAB 2120 (minimum grade C).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Arabic
Departmental Category: Asia Content

ARAB 3120 (3) Advanced Arabic 2
Continues training in the four language skills (writing, speaking, reading, listening/comprehension) at an advanced level. Enables students to acquire a better and broader understanding of Arabic culture and texts drawn from various genres of Arabic letters.
Requisites: Requires prerequisite course of ARAB 3110 (minimum grade C).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Arabic
Departmental Category: Asia Content

ARAB 3220 (3) Arabian Nights, Arabian Days: Popular Literature in the Arab World and Beyond
Explores the development of popular literature in Arabic, studying the Arabian Nights and related genres including tribal epics, poetry, and plays. We will interrogate the cultural, class, and textual boundaries between popular literature and courtly, elite works across time. We will also explore the modern, Western enterprise of discovering and engaging with Arabic literary works, examining how global excitement for texts like the Nights has created new possibilities for cultural production and exchange.

ARAB 3230 (3) Islamic Culture and the Iberian Peninsula
Examines Islamic, especially Arab, culture and history as it relates to the Iberian Peninsula from 92 Ah/711 Ce to the present. Taught in English.
Additional Information: Arts Sci Core Curr: Historical Context
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Arabic Courses in English
Departmental Category: Asia Content

ARAB 3231 (3) In the Footsteps of Travelers: Travel Writing in Arabic Lit
Offers an excursion into the role and significance of travel and travel writing in Arabic literature in translation. We will read and discuss a range of literary works written by, about, and for travelers. More broadly, this course will offer an opportunity for undergraduates to expand their understanding of literature and the arts. Taught in English.
Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Arabic Courses in English
Departmental Category: Asia Content

ARAB 3241 (3) Art in Islamic Cultures
Offers an overview of art in Islamic cultures. Discusses a range of literary texts and images in order to understand these cultures. Offers an opportunity for undergraduates to expand their understanding of literature and art history. Taught in English.
Equivalent - Duplicate Degree Credit Not Granted: ARTH 3241
Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Arabic Courses in English
Departmental Category: Asia Content

ARAB 3330 (3) The Arabic Novel
Focusing on the origins and development of the novel genre in the Arabic tradition, this course examines both the aesthetic qualities of the genre as an artistic form and the ways that it has depicted and intervened in the modern social, political, and cultural upheavals that have shaped the Arab world in the 20th century. Authors include Najib Mahfuz, Abd al Rahman Munif, Hanan al-Shaykh, and Ghassan Kanafani. Taught in English.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Arabic Courses in English
Departmental Category: Asia Content

ARAB 3340 (3) Representing Islam
Explores the cultural politics of representations of the Arab and Islamic worlds both with an emphasis on literary representations of the Islamic world in travel narratives and novels from both the West and the Arab world. Examines historical, anthropological, and visual texts to consider how Islam has been narrated in colonial European imaginings about the Islamic world as well as contemporary representations. Taught in English.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Arabic Courses in English
Departmental Category: Asia Content

ARAB 3350 (3) Narrating the City: Literary Mappings of the Urban Landscape
Examines literary narratives primarily from the Arabic tradition through focusing on the relationship of literature to the development and transformations of cities and urban spaces in the modern period. Begins with readings of 19th century European narratives that chronicle the changing space of the modern city followed by urban narratives from the Arabic literary tradition in order to comparatively examine how "universal" processes of modernization, development, and globalization in the modern world have been narrated. Writers include Mahfouz, Munif, al-Takarli, al-Aswani, Celik, Abu Lughod. Taught in English.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Arabic Courses in English
Departmental Category: Asia Content
ARAB 3410 (3) Gender, Sexuality and Culture in the Modern Middle East
Examines the issues of gender and sexuality in the modern Middle East and North Africa from the colonial period to the present, focusing on how feminist movements, Arab women's writing, and constructions of gender and sexuality have been shaped by local, national and international factors. Taught in English.
Equivalent - Duplicate Degree Credit Not Granted: WGST 3410
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Diversity-Global Perspective
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Arabic Courses in English
Departmental Category: Asia Content

ARAB 4200 (3) Advanced Readings in Arabic
Develops student proficiency and communication in modern standard Arabic at the advanced (4th year) level. Emphasis placed on developing reading comprehension, speaking, and writing skills.
Requisites: Requires prerequisite course of ARAB 3120 (minimum grade C).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Arabic
Departmental Category: Asia Content

ARAB 4250 (3) Arabic Media
Designed to provide students with advanced Arabic language skills for use in the media. By negotiating authentic materials in Arabic, students will gain a perspective on global issues in the Arab and Islamic world and will attain a better awareness of Arab and Islamic culture.
Requisites: Requires prerequisite course of ARAB 3120 (minimum grade C).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Arabic
Departmental Category: Asia Content

ARAB 4840 (1-3) Independent Study
Department consent required.
Repeatable: Repeatable for up to 6.00 total credit hours.
Additional Information: Departmental Category: Arabic
Departmental Category: Asia Content

Chinese
CHIN 1010 (5) Beginning Chinese 1
Introduces modern Chinese (Mandarin), developing all four skills (speaking, listening, reading and writing) and communicative strategies. Students learn both traditional full-form characters and the principles for converting them into simplified characters.
Additional Information: Arts Sci Core Curr: Foreign Language
Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Asia Content

CHIN 3200 (3) Adv Wrtg Topics on Chinese & Japanese Literature and Civilization
Provides an introduction to the academic study of Chinese and Japanese literature and culture with a focus on writing skills in English through a survey of standard academic writing conventions. Review and assessment of selected textual materials, class presentation, critique, and revision. Recommended for majors. Taught in English.
Equivalent - Duplicate Degree Credit Not Granted: JPN 3200
Requisites: Restricted to students with a minimum of 45 credits completed.
Additional Information: Arts Sci Core Curr: Written Communication
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Written Communication-Upper
Departmental Category: Japanese Courses in English
Departmental Category: Asia Content

CHIN 3311 (3) The Dao and the World in Medieval China
An interdisciplinary examination of the role of Daoist and Buddhist philosophical and religious concepts and images in medieval Chinese civilization, including literature and the arts. Focuses on the personal aspects of this period of religious and intellectual ferment, tracing the representation of these ideas in Chinese poetry, prose, painting and the plastic arts as well as their role in philosophical and religious speculation. Taught in English.
Recommended: Prerequisite CHIN 1012 or CHIN 1051.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Chinese Courses in English
Departmental Category: Asia Content

CHIN 3321 (3) Political Thought in Ancient China
Focuses on the political, religious, philosophical and literary aspects of ancient Chinese civilization (1500 B.C.-A.D. 200). Special attention is paid to foundational works that influenced later developments in Chinese culture. All readings are in English and taught in English.
Equivalent - Duplicate Degree Credit Not Granted: HUMN 3321
Recommended: Prerequisite CHIN 1012 or CHIN 1051.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Chinese Courses in English
Departmental Category: Asia Content

CHIN 3331 (3) Culture and Literature of Late Imperial China
The late imperial period was marked by growth of great metropolitan areas, expanded urban entertainments, and an extensive popular culture. Focuses on the literature and artifacts of this urban culture as well as the hegemonic culture of the state and of traditional social codes and their literary manifestations. Also considers growing contacts with the West and the transition to the modern period. All readings are in English. Taught in English.
Recommended: Prerequisite CHIN 1012 or CHIN 1051.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Chinese Courses in English
Departmental Category: Asia Content

CHIN 3334 (3) Chinese Narrative Tradition
Examines the major works of Chinese narrative tradition from the fourth to the nineteenth century. Emphasizes the reading and analysis of selected texts and understanding of the cultural and social contexts of text production and circulation. Text selections vary from year to year. Taught in English.
Recommended: Prerequisite CHIN 1012.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Chinese Courses in English
Departmental Category: Asia Content

CHIN 3341 (3) Literature and Popular Culture in Modern China
Surveys 20th century Chinese literature and popular culture against the historical background of rebellion, revolution and reform. Emphasizes close and critical reading skills and an understanding of how aesthetic texts reflect and critically engage with historical and cultural experiences. Assignments include novels, essays, short stories, poems, plays, songs, films and scholarly articles. Taught in English.
Equivalent - Duplicate Degree Credit Not Granted: HUMN 3341
Recommended: Prerequisite CHIN 1012 or CHIN 1051.
Additional Information: Arts Sci Gen Ed: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Chinese Courses in English
Departmental Category: Asia Content

CHIN 3351 (3) Reality and Dream in Traditional Chinese Literature
Explores the role of dreams in pre-modern Chinese literature from the beginnings in the 2nd millennium B.C.E. to the 19th century. The source texts will range from religious, philosophical, medical and historical writings to poetry to various genres of fictional prose and drama. Taught in English.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Chinese Courses in English
Departmental Category: Asia Content

CHIN 3361 (3) Women and the Supernatural in Chinese Literature
Explores the relationship between the worlds of women and the supernatural in Chinese literature, from ancient to modern times. Focuses on selected significant works of classical and vernacular fiction, religious texts, and poetry. Taught in English.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Chinese Courses in English
Departmental Category: Asia Content
CHIN 3371 (3) Topics in Chinese Film
Offers in-depth, critical analysis of key issues in Chinese culture as represented in Chinese film. Focuses on various topics, such as specific directors, regions, representation of gender in Chinese film, historical periods, etc. Varies from year to year. Requires no knowledge of Chinese. Taught in English.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Recommended: Prerequisite CHIN 1051 or CHIN 2441.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Chinese
CHIN 4110 (3) Advanced Readings in Modern Chinese 1
Surveys a wide variety of 20th- and 21st-century texts that are of recognized literary or cultural importance. Focuses on translation, including discussion of content and style.
Requisites: Requires prerequisite course of CHIN 3120 (minimum grade C).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Chinese
CHIN 4120 (3) Advanced Readings in Modern Chinese 2
Surveys a wide variety of 20th- and 21st-century texts that are of recognized literary or cultural importance. Focuses on translation, including discussion of content and style.
Requisites: Requires prerequisite course of CHIN 3120 (minimum grade C).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Chinese
CHIN 4120 (3) Advanced Readings in Modern Chinese 2
CHIN 4210 (3) Introduction to Classical Chinese
Introduces the classical language based on texts from the pre-Han and Han periods. Stresses precise knowledge of grammatical principles and exactitude in translation—the basis for all further work in classical Chinese.
Requisites: Requires prerequisite course of CHIN 2120 (minimum grade C).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Chinese
CHIN 4220 (3) Readings in Classical Chinese
Close reading of selected texts of ancient and medieval literature. Readings in both prose and poetry. Emphasizes a disciplined, philological approach to the texts, with proper attention to diction, tone, and nuance.
Requisites: Requires prerequisite course of CHIN 4120 (minimum grade C).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Chinese
CHIN 4300 (3) Open Topics: Readings in Chinese Literature
Studies selected texts on a particular topic taught by regular or visiting faculty. Topics change each term.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Chinese
CHIN 4750 (3) Daoism
Detailed examination of scriptures, liturgies, precept codes and hagiographies of Daoism, China's indigenous organized religion. Focusing on origins and development, ethical teachings, ritual activities and world view. Topics include the relationship of Daoism to popular religion, practice of alchemy and self-cultivation, beliefs concerning death and afterlife and structure of the Daoist pantheon.
Equivalent - Duplicate Degree Credit Not Granted: CHIN 5750 and RLST 4750 and RLST 5750
Requisites: Requires prerequisite course of RLST 3800 (minimum grade C).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Chinese
CHIN 4900 (1-3) Independent Study
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content
CHIN 4950 (3) Honors Thesis
Additional Information: Arts Sciences Honors Course
Departmental Category: Chinese
Departmental Category: Asia Content
CHIN 4980 (1) Practical Issues in Chinese Language Pedagogy
Focuses on practical issues in Chinese language pedagogy for students who will serve as teaching assistants in Chinese language courses. Examines the connection between theory and practice as well as practical methods for teaching Chinese. Equips students with basic Chinese linguistic knowledge. Discusses the use of Communicative Approach in teaching Chinese as a second language.
Equivalent - Duplicate Degree Credit Not Granted: CHIN 5980
Requisites: Requires prerequisite course of CHIN 4120 (minimum grade C).
Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

Farsi
FRSI 1011 (5) Beginning Farsi 1
Provides a grounding in basic Persian Farsi grammar. The morphological and phonological nuances of the language will be introduced, along with Persian culture. Basic conversation is reinforced on a daily basis with strong emphasis and reiteration upon the homework and covered grammar.
Additional Information: Arts Sci Core Curr: Foreign Language
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Foreign Language
Departmental Category: Farsi
Departmental Category: Asia Content
FRSI 1010 (5) Beginning Farsi 1
FRSI 1020 (5) Beginning Farsi 2
Continuation of FRSI 1010. Completes the presentation of basic structures of Farsi. Continued acquisition of vocabulary and practice of speaking, listening, reading, and writing. Class conducted largely in Farsi. The second half of the course will introduce authentic texts of Persian prose literature. Some poetry may be included.
Requisites: Requires prerequisite course of FRSI 1010 (minimum grade C).
Additional Information: Arts Sci Core Curr: Foreign Language
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Farsi
Departmental Category: Asia Content

FRSI 1051 (3) Masterpieces of Persian Literature in Translation
Offers a broad introduction to Persian literature, one of the richest traditions in world literature. Students will read a selection of poetry by Rumi, Hafiz, Omar Khayyam, as well as a variety of works written by leading Iranian contemporary poets and writers. Through a close reading of literary texts, this course emphasizes their historical and cultural context. Taught in English.
Additional Information: Arts Sci Core Curr: Foreign Language
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Farsi
Courses in English

FRSI 2110 (4) Intermediate Farsi 1
Provides an intensive introduction to cultural and literary texts of Iran, along with an introduction of the grammatical and rhetorical complexities of Persian prose and poetry. Students continue to develop speaking, listening, and writing skills through activities based on the readings.
Requisites: Requires prerequisite course of FRSI 1020 (minimum grade C).
Additional Information: Arts Sci Core Curr: Foreign Language

Departmental Category: Asia Content  

**JPNS 3110 (5) Advanced Japanese 1**  
Enhances student competence and performance in Japanese language in a holistic and integrative manner.  
**Requisites:** Requires prerequisite course of JPNS 2120 (minimum grade C).  
**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Japanese  
Departmental Category: Asia Content  

**JPNS 3120 (5) Advanced Japanese 2**  
Continuation of JPNS 3110. Enhances student competence and performance in Japanese language in a holistic and integrative manner.  
**Requisites:** Requires prerequisite course of JPNS 3110 (minimum grade C).  
**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Japanese  
Departmental Category: Asia Content  

**JPNS 3200 (3) Adv Wrtg Topics on Chinese & Japanese Literature and Civilization**  
Provides an introduction to the academic study of Chinese and Japanese literature and culture with a focus on writing skills in English through a survey of standard academic writing conventions. Review and assessment of selected textual materials, class presentation, critique, and revision. Recommended for majors. Taught in English.  
**Equivalent - Duplicate Degree Credit Not Granted:** CHIN 3200  
**Requisites:** Restricted to students with a minimum of 45 credits completed.  
**Additional Information:** Arts Sci Core Curr: Written Communication  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Written Communication-Upper  
Departmental Category: Chinese Courses in English  
Departmental Category: Asia Content
JPNS 3311 (3) Japanese Colonial and Transnational Literature
Explores the development of Japanese and colonial identities in literature produced in and about Japan’s colonies during the first half of the 20th century. We will read works written during and about the Japanese empire by Chinese, Japanese, Korean, Okinawan and Taiwanese writers looking at the different representations of empire. Taught in English.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Japanese Courses in English

JPNS 3321 (3) Fantasy and Sci-Fi in Japanese Literature, Film and Culture
Explores the development of Japanese science fiction and fantasy literature produced in the past century. We will read works written by writers such as Abe Kobo, Hoshi Shin’ichi, Kurahashi Yumiko, Ueda Sayuri and Project Ito. Taught in English.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Japanese Courses in English

JPNS 3331 (3) Business Japanese
Designed to teach Japanese with emphasis on using Japanese for professional purposes. The course aims to foster the skills and the knowledge of effective cross-cultural and interpersonal communication in Japanese and to develop intercultural competence in business contexts.

Requisites: Requires prerequisite course of JPNS 2120 (minimum grade C).

Recommended: Prerequisite JPNS 3110.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 3511 (3) From Rebellion to Calamity: Contemp Japanese Lit in Transl
Explores post-1945 Japanese literature through close reading of prose fiction (including SF, mystery, horror, e-novel and cell-phone novel genres), poetry, visual narratives (manga) and critical essays. Texts will be considered in historical and cultural contexts, with attention to their relationship to traditional arts and global trends. Taught in English.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Japanese Courses in English

JPNS 3811 (3) Love, Death, and Desire: Classical Japanese Literature in Translation
Surveys the major works and authors of classical Japanese literature, both poetry and prose, from the earliest historical records and literary anthologies through the Heian period (784-1185). Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: HUMN 3811
Recommended: Prerequisite JPNS 1051.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Japanese Courses in English
Departmental Category: Asia Content

JPNS 3821 (3) Monsters, Monks, and Mayhem: Medieval Japanese Literature in Translation
Surveys the major works and authors of medieval Japanese (poetry, prose, and drama) from the Kamakura and Muromachi periods (1185-1600). Taught in English.

Recommended: Prerequisite JPNS 1051.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Japanese Courses in English
Departmental Category: Asia Content

JPNS 3831 (3) The Floating World of Play and Passion: Early Modern Japanese Literature in Translation
Surveys the major works, authors, and genres of literature from the Tokugawa through Meiji periods in their historical and cultural contexts. Attention is given to various approaches of literary analysis and interpretation. Taught in English.

Recommended: Prerequisite JPNS 1051.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Japanese Courses in English
Departmental Category: Asia Content

JPNS 3841 (3) Tradition and Transgression: Modern Japanese Literature in Translation
Surveys the major works, authors and genres of literature from the late Meiji period and 20th century in their historical and cultural contexts. Attention is given to various approaches of literary analysis and interpretation. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: HUMN 3841
Recommended: Prerequisite JPNS 1051.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Japanese Courses in English
Departmental Category: Asia Content

JPNS 3851 (3) Studies in Japanese Popular Culture
Introduces aspects of Japanese popular culture from the early 1990s economic collapse until the present through a variety of artistic mediums including manga, anime, literature, live-action cinema, video gaming, music, and the visual arts. Taught in English.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Japanese Courses in English
Departmental Category: Asia Content

JPNS 3861 (3) Imagining the Samurai in Japanese Literature and Culture
Explores the rich history of the imagination of the samurai in Japan, across multiple genres of fiction, poetry, drama, visual art, and cinema, from earliest times to the present. Attention is given to the varied meanings the image of the samurai has held at different historical moments, and to contrasts between the representations of the realities of samurai life. Taught in English.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Japanese Courses in English
Departmental Category: Asia Content

JPNS 3871 (3) Horror and the Macabre in Japanese Literature, Film, Culture
Explores Japanese horror texts from both the pre-modern and modern eras in a variety of genres, including the monogatari, kaidan, kabuki, contemporary horror fiction, film and anime. Texts will be considered in historical and cultural context with attention being given to interactions with and within popular culture. Taught in English.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Japanese Courses in English
Departmental Category: Asia Content
JPNS 3881 (3) Environment, Nature and Disaster in Japanese Literature and Culture
Explores the significance of the environment, nature and disaster in Japanese literature and culture through readings in a variety of genres, including fiction, essay, poetry, sci-fi, film and anime. Attention will also be given to environmental/ecological issues, such as conservation, pollution, biodiversity and industrial development. Taught in English.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Japanese Courses in English
Departmental Category: Asia Content

JPNS 3891 (3) Travel/Travel Writing in Japanese Literature and Culture
Explores selected Japanese literary and cultural texts that treat travel and travel writing, including short and long fiction, poetry, memoir, nonfiction, biography and travel commentary. Taught in English.

Requisites: Prerequisite JPNS 1051.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Diversity-Global Perspective
Departmental Category: Japanese Courses in English
Departmental Category: Asia Content

JPNS 4030 (3) Japanese Syntax
Deals with syntactic phenomena from five areas of Japanese grammar that cause the most difficulty for learners. Their characteristics are explored in forms and discoursal functions that go beyond the explanations in basic, prescriptive grammars of Japanese.

Requisites: Requires prerequisite course of JPNS 3120 or JPNS 4120 (minimum grade C).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 4050 (3) Japanese Sociolinguistics
Explores issues related to contemporary Japanese language and society, such as language and identity, language and ideology, and language variation and change in Japan. More specifically, we will reconsider topics such as diversity in gender language, honorifics, dialects, and use of English in Japanese society that have been unidirectionally taught in Japanese language classrooms. The course aims to provide students opportunities to incorporate critical perspectives of sociolinguistics into analyses of Japanese literature and Japanese language education.

Equivalent - Duplicate Degree Credit Not Granted: LING 4050
Requisites: Requires prerequisite course of JPNS 3110 (minimum grade C).
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Diversity-Global Perspective
Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 4070 (3) Second Language Acquisition of Japanese
Studies language acquisition theories and research on Japanese as a second language (JSL). Covers the issues in JSL from linguistic, cognitive and sociolinguistic perspectives: orthography, grammar, phonology and vocabulary in the contexts of teaching and learning JSL. Department consent required.

Equivalent - Duplicate Degree Credit Not Granted: JPNS 5070
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 4080 (3) Kanji in Japanese Orthography
Covers the issues in kanji research from historical, sociolinguistic, linguistic, cognitive perspective and vocabulary acquisition theories in the context of teaching and learning the Japanese language.

Equivalent - Duplicate Degree Credit Not Granted: JPNS 5080
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 4110 (3) Advanced Readings in Modern Japanese 1
Surveys a variety of material written in modern Japanese, including texts from literature, the social sciences, religion, and cultural history. Emphasizes content and style. Texts and selections vary from year to year.

Requisites: Requires prerequisite course of JPNS 3120 (minimum grade C).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 4120 (3) Advanced Readings in Modern Japanese 2
Continuation of JPNS 4110. Texts and selections vary from year to year.

Requisites: Requires prerequisite course of JPNS 4110 (minimum grade C).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 4150 (3) Japanese to English Translation: Theory and Practice
Introduction to a range of translation tasks and approaches, as well as to professional translation practices, ethics, methods and resources. Emphasis is on application, through translation of representative texts from Japanese into English in the fields of social science, humanities and the arts, journalism, and commerce.

Recommended: Prerequisite JPNS 3110.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 4210 (3) Contemporary Japanese 1: Current Issues
Offers intensive review of Japanese language skills beyond the first eight semesters and cultivates further proficiency. Readings will be selected from a wide range of contemporary writings that reflect and represent issues in Japanese as well as global communities. Emphasizes all skills: reading, listening, writing, speaking and translation. Instructional technology is extensively integrated into the curriculum.

Requisites: Requires prerequisite course of JPNS 4120 (minimum grade C).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 4300 (3) Open Topics: Readings in Japanese
Examines selected texts on a particular topic taught by regular or visiting faculty. Topics change each term.
Repeatable: Repeatable for up to 6.00 total credit hours.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Japanese
Departmental Category: Asia Content
JPNS 4310 (3) Classical Japanese 1
Requisites: Requires prerequisite course of JPNS 3110 (minimum grade C).
Recommended: Prerequisites JPNS 3120 and JPNS 3811 and JPNS 3821.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 4320 (3) Classical Japanese 2
Continuation of JPNS 4310. Surveys changes in Japanese literary language from the Nara (eighth century) to Meiji (late 19th century) periods. Attention given to changes in grammar, vocabulary, and use of scripts in premodern Japanese. Introduces representative works of classical Japanese literature of all periods.
Requisites: Requires prerequisite course of JPNS 4310 (minimum grade C).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 4400 (3) Critical Theory and Japanese Literature and Culture
Examines Japanese literary and cultural texts through the lens of specific theoretical paradigms as developed by Japanese and non-Japanese thinkers and academicians. Taught in English.
Recommended: Prerequisite JPNS 1051.
Additional Information: Arts Sci Gen Ed: Foreign Language
Departmental Category: Japanese Courses in English
Departmental Category: Asia Content

JPNS 4900 (1-3) Independent Study
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 4950 (3) Honors Thesis
Additional Information: Arts Sciences Honors Course
Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 4980 (1) Practical Issues in Japanese Language Pedagogy
Focuses on practical issues in Japanese language pedagogy for students who will serve as teaching assistants in Japanese language classes. Examines the connection between theory and practice as well as practical methods for teaching Japanese. Discusses how to teach Japanese as a second language in a communicative approach and how to assess student language learning.
Equivalent - Duplicate Degree Credit Not Granted: JPNS 5980
Requisites: Requires prerequisite course of JPNS 4120 (minimum grade C).
Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

Korean
KREN 1010 (5) Beginning Korean 1
Trains students in elementary conversational and writing skills and provides grounding in the basic idiomatic and syntactical features of Korean, through lectures, drills, and language laboratory sessions based on set dialogues and readings.
Additional Information: Arts Sci Core Curr: Foreign Language
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Foreign Language
Departmental Category: Korean
Departmental Category: Asia Content

KREN 1011 (3) Introduction to Korean Civilization
Introduces the history of Korean culture within the context of political, social, and economic history. Covers the old Choson dynasty to present day Korea. Taught in English.
Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Diversity-Global Perspective
Departmental Category: Korean Courses in English
Departmental Category: Asia Content

KREN 1020 (5) Beginning Korean 2
Continuation of KREN 1010.
Requisites: Requires prerequisite course of KREN 1010 (minimum grade C).
Additional Information: Arts Sci Core Curr: Foreign Language
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Foreign Language
Departmental Category: Korean
Departmental Category: Asia Content

KREN 2110 (5) Intermediate Korean 1
Extends the conversational and written skills acquired at the elementary level. Although emphasis remains on spoken Korean, readings are increased, elementary writing skills are introduced gradually, and some Sino Korean characters are taught.
Requisites: Requires prerequisite course of KREN 1020 (minimum grade C).
Additional Information: Arts Sci Core Curr: Foreign Language
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Foreign Language
Departmental Category: Korean
Departmental Category: Asia Content

KREN 2120 (5) Intermediate Korean 2
Continuation of KREN 2110.
Requisites: Requires prerequisite course of KREN 2110 (minimum grade C).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Korean
Departmental Category: Asia Content

KREN 4980 (1) Practical Issues in Korean Language Pedagogy
Focuses on practical issues in Korean language pedagogy for students who will serve as teaching assistants in Korean language classes. Examines the connection between theory and practice as well as practical methods for teaching Korean. Discusses how to teach Korean as a second language in a communicative approach and how to assess student language learning.
Equivalent - Duplicate Degree Credit Not Granted: KREN 5980
Requisites: Requires prerequisite course of KREN 4120 (minimum grade C).
Additional Information: Departmental Category: Korean
Departmental Category: Asia Content
KREN 2441 (3) Film and Korean Culture
Introduces students to major works, genres, and trends of Korean cinema from the colonial period to the present. We will explore how cinema registers Korea’s experience with modernity, colonialism, national division, the Cold War, and globalization, paying particular attention to class, gender, nation, race and migration. Taught in English. No prior knowledge of Korean or film art is required.
Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Korean Courses in English
Departmental Category: Asia Content

KREN 3110 (5) Advanced Korean 1
Promotes an advanced level of speaking, reading, and writing. Focuses on contemporary business Korean language as reflected in various Korean media such as newspapers, magazines, and television. The goal is to acquire Korean language skills at a level that allows students to conduct business activities.
Requisites: Requires prerequisite course of KREN 2120 (minimum grade C).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Korean
Departmental Category: Asia Content

KREN 3120 (5) Advanced Korean 2
This second semester of Korean offers advanced level speaking and writing. Focuses on understanding contemporary Korean languages as reflected in various communication media, such as print, TV, and films to help students understand Korean in a variety of contexts.
Requisites: Requires prerequisite course of KREN 3110 (minimum grade C).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Korean
Departmental Category: Asia Content

KREN 3841 (3) Modern Korean Literature in English Translation
Surveys masterpieces of modern Korean literature written by significant Korean/Korean American authors in English. Provides various literary and theoretical frameworks to understand Korean literature within the context of Asian global culture. Covers from colonial period to the present. Taught in English. No prior knowledge of Korea or Korean literature is required.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Diversity-Global Perspective
Departmental Category: Korean Courses in English
Departmental Category: Asia Content

KREN 3851 (3) Studies in Korean Popular Culture
Introduces Korean popular culture, considering its ideological, economic, and socio-political function, its reception and use, and medium-specific textual operations of individual works, drawing from music, cinema, dance, music videos, literature, comics, and other forms of texts and events. The course moves from the Japanese colonial period to the contemporary moment, providing coverage of North and South Korea. Taught in English.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Korean Courses in English

KREN 4900 (1-6) Independent Study
Repeatable: Repeatable for up to 6.00 total credit hours.
Additional Information: Departmental Category: Korean
Departmental Category: Asia Content

Chinese - Bachelor of Arts (BA)
The undergraduate degree in Chinese emphasizes knowledge and awareness of:

- Chinese literary history, focusing on selected canonical or widely recognized works.
- The historical and cultural contexts in which particular works were written.
- Critical approaches to the study of Chinese language and civilization.
- The challenges, deficiencies and possible gains inherent in the process of translating from one language to another.

In addition, students completing the degree in Chinese are expected to acquire the ability and skills to:

- Read modern Chinese at a level at which critical literary analysis can be performed.
- Read classical Chinese, with the aid of appropriate reference works, at the level at which the text may begin to be appreciated for its literary value.
- Speak and comprehend Mandarin sufficient for all situations in daily life and for a basic level of academic conversation.
- Analyze and interpret literary texts in terms of style, structure, character, themes and use of allusion.
- Communicate such interpretations competently in standard written English.

With a Chinese major (https://www.colorado.edu/alc/undergraduate/majors/), students will have skills, information and concepts that are relevant to careers in virtually every area. Competency in a foreign language is a highly desirable skill in all fields. A knowledge of Chinese is particularly beneficial and useful in business, engineering, industry, commerce, the civil or foreign service, law, library science, natural and social sciences, the media, economics, public administration, journalism, government and teaching at all levels. In addition, China is an increasing source of a wide variety of excellent careers, as it is among the world's largest economies (http://databank.worldbank.org/data/download/GDP.pdf) and trading partners with the U.S. and Colorado.

Students are encouraged to consider combining their Chinese language training with courses in these or other fields. Additional career opportunities can be found on the Career Services website (http://www.colorado.edu/career/).

Requirements
Students must complete the general requirements of the College of Arts and Sciences and the required courses listed below. CHIN 1010, CHIN 1020 and CHIN 2110 do not count toward the maximum of 45 credit hours in the major department.

The major program for the BA degree in Chinese requires successful completion of 30 credits, of which at least 18 credits must be at the upper-division level.

Required Courses and Credits

CHIN 4750  Daoism
CHIN 4900  Independent Study
CHIN 4950  Honors Thesis

Total Credit Hours 30

1 Transfer credit for these courses, whether from universities in this country or abroad, will be considered only in exceptional cases; normally, no credit toward the major will be given for these courses unless taken in residence.

2 Fulfills both a major elective requirement and a component of the Gen Ed Skills Requirement.

Graduating in Four Years
Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of “adequate progress” as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress in Chinese, students should meet the following requirements:

- Declare the major by the first semester of sophomore year.
- Students wishing to major in Chinese and who have no prior knowledge of the language should begin the required major courses no later than the sophomore year.
- Students must consult with the department’s undergraduate academic advisor (https://www.colorado.edu/alc/undergraduate/advising/) to determine adequate progress toward completion of the major.

Recommended Four-Year Plan of Study
Through the required coursework for the major, students will fulfill all 12 credits of the Arts & Humanities area of the Gen Ed Distribution Requirement. Average 30 credits per year. Credits may vary due to 5 credit language courses. Expect to take 14-17 credits per term. Keep the first year schedule closer to 14. Not all courses will be taught in the semester listed below. Be flexible with course options and speak with your advisor for specific recommendations.

### Bachelor’s–Accelerated Master’s Degree Program(s)

The Bachelor’s–Accelerated Master’s (BAM) degree program options offer currently enrolled CU Boulder undergraduate students the opportunity to receive a bachelor’s and master’s degree in a shorter period of time. Students receive the bachelor’s degree first, but begin taking graduate coursework as undergraduates (typically in their senior year). Because some courses are allowed to double count for both the bachelor’s and the master’s degrees, students receive a master’s degree in less time and at a lower cost than if they were to enroll in a stand-alone master’s degree program after completion of their baccalaureate degree. In addition, staying at CU Boulder to pursue a bachelor’s–accelerated master’s program enables students to continue working with their established faculty mentors.

### BA in Chinese, MA in Asian Languages and Civilizations

The Bachelor’s-Accelerated Master’s (BAM) degree program in Chinese recognizes the need for master’s-level training upon entering the job market in a variety of sectors that call for highly advanced proficiency in the Chinese language, knowledge of the culture of China and its literature and the skills acquired by BA and MA graduates in the humanities: research, analysis, interpretation, translation and communication. This degree offers a challenging and focused academic experience for exceptional students (particularly those who enter the university with significant preparation in Chinese studies from high school or with other backgrounds, or those who participate in study abroad opportunities at CU) who demonstrate the ability to express their ideas clearly, both orally and in written form, using standard English.

#### Admissions Requirements

In order to gain admission to the BAM program named above, a student must meet the following criteria:

- Current CU Boulder Undergraduate Student
- Completion of all MAPS deficiencies
- Have a cumulative GPA of 3.25 or higher for all courses taken at CU Boulder
- Transfer students must have completed a minimum of 24 credit hours at CU Boulder

Students must submit the following materials by September 1 of their junior year (or, in exceptional circumstances, during the student’s senior year) to the director of graduate studies in Chinese (https://www.colorado.edu/alc/graduate/advising/). Applications will be reviewed by the Chinese graduate faculty. Students interested in applying for this option must consult with the department’s undergraduate academic advisor (https://www.colorado.edu/alc/undergraduate/advising/) early in their career at CU to establish their program of study.

- Intent application
- Statement of purpose
- Writing sample
- Three letters of recommendation (at least one from a full-time member of the Chinese faculty)

#### Program Requirements

Students are required to fulfill separately all requirements for the BA in Chinese and MA in Chinese, with the following exception that can satisfy requirements for both the BA and the MA:

- CHIN 4220 Readings in Classical Chinese (3 credits)
- CHIN 5010 Sinological Methods (3 credits)

Students must apply to graduate with the bachelor’s degree, and apply to continue with the master’s degree, early in the semester in which the undergraduate requirements will be completed.

Additional information about the BAM requirements and curriculum (https://www.colorado.edu/alc/graduate/chinese/) can be found on the department website.

### Japanese - Bachelor of Arts (BA)

The undergraduate degree in Japanese emphasizes knowledge and awareness of:
• The outlines of the history of Japanese literature from the Nara period to the present.
• The outlines of Japanese historical and cultural development.
• Appropriate research strategies for Japanese language, literature and culture.

Students completing the degree in Japanese are expected to acquire the ability and skills to:

• Speak and comprehend Japanese sufficiently for daily life.
• Read, interpret and analyze modern written texts.
• Compose letters and simple compositions.
• Use cultural awareness and understanding to function appropriately in a range of social situations.
• Communicate the results of research in English.

In addition, students target one or more of the following goals:

• Read and comprehend classical Japanese, with the aid of appropriate reference works.
• Translate a range of Japanese texts into English.
• Understand and analyze the structure of the Japanese language and communication patterns in Japanese.

With a Japanese major (https://www.colorado.edu/alc/undergraduate/majors/), students will have skills, information and concepts that are relevant to careers in virtually every area. Competency in a foreign language is a highly desirable skill in all fields. A knowledge of Japanese is particularly beneficial and useful in business, engineering, industry, commerce, the civil or foreign service, law, library science, natural and social sciences, the media, economics, public administration, journalism, government and teaching at all levels. In addition, Japan is an increasing source of a wide variety of excellent careers, as it is among the world’s largest economies (http://databank.worldbank.org/data/download/GDP.pdf) and trading partners with the U.S. and Colorado.

Students are encouraged to consider combining their Japanese language training with courses in these or other fields. Additional career opportunities can be found on the Career Services website (http://www.colorado.edu/career/).

**Requirements**

**Program Requirements**

Students must complete the general requirements of the College of Arts and Sciences and the required courses listed below. JPNS 1010, JPNS 1020 and JPNS 2110 do not count toward the maximum of 45 credit hours in the major department.

The major program for the BA degree in Japanese requires successful completion of 30 credit hours, of which at least 18 credit hours must be at the upper-division level.

**Required Courses and Credits**

**Total Credit Hours** 30
Transfer credit for these courses, whether from universities in this country or abroad, will be considered only in exceptional cases; normally, no credit toward the major will be given for these courses unless taken in residence.

Independent Study will be considered only in exceptional cases. Please consult with the Japanese Undergraduate Faculty Advisor.

Graduating in Four Years
Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of “adequate progress” as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress in Japanese, students should meet the following requirements:

- Declare the major by the first semester of sophomore year.
- Students wishing to major in Japanese and who have no prior knowledge of the language should begin the required major courses no later than the sophomore year.
- Students must consult with the department’s undergraduate academic advisor (https://www.colorado.edu/alc/undergraduate/advising/) to determine adequate progress toward completion of the major. An example four-year plan is available on the department website (https://www.colorado.edu/alc/undergraduate/majors/).

Recommended Four-Year Plan of Study
Through the required coursework for the major, students will fulfill all 12 credits of the Arts & Humanities area of the Gen Ed Distribution Requirement, and potentially, the Upper-division Written Communication component of the Gen Ed Skills Requirement and the Global Perspective category of the Gen Ed Diversity Requirement.

- Transfer students must have completed a minimum of 24 credit hours at CU Boulder

Students must submit the following materials by September 1 of their junior year (or, in exceptional circumstances, during the student’s senior year) to the director of graduate studies in Japanese (https://www.colorado.edu/alc/graduate/advising/). Applications will be reviewed by the Chinese graduate faculty. Students interested in applying for this option must consult with the department’s undergraduate academic advisor (https://www.colorado.edu/alc/graduate/chinese/) early in their career at CU to establish their program of study.

- Intent application
- Statement of purpose
- Writing sample
- Three letters of recommendation (at least one from a full-time member of the Chinese faculty)

Program Requirements

Students are required to fulfill separately all requirements for the B.A. in Japanese and M.A. in Japanese, with the exception that 6 credits of coursework can satisfy requirements for both the B.A. and the M.A. Selection of the overlap courses should be made in consultation with the director of graduate studies in Japanese (https://www.colorado.edu/alc/people/advising/graduate/).

Students must apply to graduate with the bachelor’s degree, and apply to continue with the master’s degree, early in the semester in which the undergraduate requirements will be completed.

Specific information about the BAM requirements and curriculum (https://www.colorado.edu/alc/graduate/chinese/) can be found on the department website.

Arabic - Minor

A minor in Arabic studies can be selected by students who wish to gain a basic understanding of the language as well as history, culture and literary traditions of the Middle East and North Africa. Students cannot earn both the certificate in Middle Eastern and Islamic studies and the minor in Arabic studies.

For more information, visit the department's Minors (http://www.colorado.edu/alc/undergraduate/minors/) webpage or see the department's undergraduate academic advisor (https://www.colorado.edu/alc/undergraduate/advising/).

Requirements

A minimum of 19 credits must be taken in Arabic language and literature courses, including a total of 9 upper-division credits. A cumulative GPA of 2.00 or better is required in all ARAB courses attempted. Each course that is counted towards these degree requirements must be passed with a grade of C- or better. Pass/fail work will not apply to the minor. Students are allowed to apply no more than 9 credits, including 6 upper-division credits, of transfer work toward a minor.

Hindi/Urdu - Minor

A minor in Hindi/Urdu studies can be selected by students who wish to gain a basic understanding of the language as well as history, culture and literary traditions of South Asia. Students cannot declare both the certificate in South Asian languages and civilizations and the minor in Hindi/Urdu studies.

For more information, visit the department’s Minors (http://www.colorado.edu/alc/undergraduate/minors/) webpage or see the department’s undergraduate academic advisor (https://www.colorado.edu/alc/undergraduate/advising/+).

Requirements

A minimum of 18 credit hours must be taken in Hindi/Urdu language and literature courses, including a total of 13 upper-division credit hours.

Pass/fail work and HIND 3200 will not apply to the minor. Students are allowed to apply no more than 9 credit hours, including 6 upper-division credits, of transfer work toward a minor.

All coursework applied to the minor must be completed with a grade of C- or better (no pass/fail work may be applied). The GPA for all coursework taken in the minor department must be equal to 2.00 (C) or higher.

Middle Eastern and Islamic Studies - Certificate

The Certificate in Middle Eastern and Islamic Studies provides students the opportunity to formally explore the cultural, political and religious diversity of the Middle East and the Islamic worlds.

The region commonly referred to as the Middle East includes over 20 Arabic speaking countries, as well as Iran, Turkey, and Israel and spans Southwest Asia and North Africa. A culturally, religiously and linguistically diverse region, the Middle East today is one of the most geopolitically critical regions in the world. It is the birthplace of the three major monotheistic faiths, Judaism, Christianity and Islam; the home of medieval Islamic civilizations; and home to rich literary, architectural and religious traditions. Islam, a monotheistic faith that began in the Arabian Peninsula in the 7th century, is today practiced by over one billion people and is diversely expressed through a vast geographic, linguistic and cultural terrain, from West Africa to East Asia.

Students currently pursuing the requirements of the Certificate in Middle Eastern and Islamic Studies (MEIS) or interested in doing so should complete the Statement of Intent form (https://www.colorado.edu/alc/undergraduate/certificates/) available on the department website. Students who have completed the requirements for the MEIS certificate and are graduating in December or May must complete the Program of Study form (https://www.colorado.edu/alc/undergraduate/certificates/) and the Certificate Completion form (https://www.colorado.edu/alc/undergraduate/certificates/), also available on the department website, and submit them to the MEIS certificate advisor (https://www.colorado.edu/alc/undergraduate/advising/) two months prior to graduation.

Students cannot earn both the Certificate in Middle Eastern and Islamic Studies and the Minor in Arabic.

Requirements

The certificate requires a total of 19 credit hours (9 of which must be upper-division), which include both language and content courses.

Required Courses: At least one year of either Arabic or Farsi language courses beginning at the intermediate level (2000 level) with a grade of C or better. A student who participates in an approved study abroad program may earn up to 10 credit hours for language study at an intermediate or advanced level.

Electives: Three courses, at least one of which must be a course designated ARAB and has a specific focus on Islam and the Islamic world. These nine credit hours may be selected from the list of approved content courses below and are to be completed with a grade of C- or better. Approval of study abroad credits for content courses will be reviewed on a case-by-case basis.

Students cannot earn both the certificate in Middle Eastern and Islamic studies and the minor in Arabic studies.

Students should consult with the MEIS certificate advisor (https://www.colorado.edu/alc/undergraduate/advising/) annually and must fulfill the requirements for an undergraduate degree at CU Boulder.

## South Asian Languages and Civilizations - Certificate

The Certificate in South Asian Languages and Civilizations is designed to help prepare CU students for careers with international companies and government agencies that are searching for employees with language skills in Hindi/Urdu and a broad understanding of South Asia.

South Asia—comprising India, Pakistan, Sri Lanka, Bangladesh, Nepal and Tibet—has emerged as a key center of economic, political and cultural power in the 21st century. South Asia in ancient times drove the economy of Central and Southeast Asia, exported a cosmopolitan Sanskrit literary culture and was the spiritual home of Hinduism and Buddhism. South Asia in medieval times was a major hub of global trade and the pride of a wide-ranging Persianate civilization. Its Mughal Empire was far more populous and wealthy than the Ottomans and Safavids combined. South Asia today is home to over 100 officially recognized languages and most of the world’s major religious traditions. With some 500 million speakers, Hindi/Urdu is one of the most popular languages in the world, alongside Mandarin, English and Spanish. Hindi-Urdu boasts thriving contemporary literary and media cultures, and—with Bollywood—the world’s largest and most influential film industry.

Students currently pursuing the requirements of the Certificate in South Asian Languages and Civilizations (SALC) or interested in doing so should complete the Statement of Intent form (https://www.colorado.edu/alc/undergraduate/certificates/) available on the department website. Students who have completed the requirements for the SALC certificate and are graduating in December or May must complete the Program of Study form (https://www.colorado.edu/alc/undergraduate/certificates/) and the Certificate Completion form (https://www.colorado.edu/alc/undergraduate/certificates/), also available on the department website, and submit them to the SALC certificate advisor (https://www.colorado.edu/alc/undergraduate/advising/) two months prior to graduation.

Students cannot earn both the Certificate in South Asian Languages and Civilizations and the Minor in Hindi/Urdu.

### Requirements

The certificate requires a total of 19 credit hours (9 of which must be upper-division), which include both language and content courses.

#### Required Courses:
- At least one year of Hindi/Urdu language courses beginning at the intermediate level (2000 level) with a grade of C or better. A student who participates in an approved study abroad program may earn up to 10 credit hours for language study at an intermediate or advanced level.

#### Electives:
- Three courses, at least one of which must be a course designated HIND. These 9 credit hours may be selected from the list of approved content courses below and are to be completed with a grade of C- or better. Approval of study abroad credits for content courses will be reviewed on a case-by-case basis.

Students should consult with the SALC certificate advisor (https://www.colorado.edu/alc/undergraduate/advising/) annually and must fulfill the requirements for an undergraduate degree at CU Boulder.

Asian Studies

The Center for Asian Studies offers a broad interdisciplinary undergraduate major in Asian studies—including optional tracks for students wishing to focus on the Middle East/West Asia, Korea or South Asia—and a minor.

Students planning to major in Asian studies may obtain credit when they participate in study abroad programs in Asia with prior approval from the Asian Studies Program and Education Abroad.

For additional information on the major program, see Asian Studies - Bachelor of Arts (BA) (p. 148) or contact Colleen Berry at colleen.berry@colorado.edu or 303-735-5224.

Course code for this program is ASIA.

Bachelor's Degree

- Asian Studies - Bachelor of Arts (BA) (p. 148)

Minor

- Asian Studies - Minor (p. 157)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Berry, J. Colleen (https://experts.colorado.edu/display/fisid_155491/) Associate Faculty Director, Instructor; PhD, Indiana University Bloomington

Oakes, Tim (https://experts.colorado.edu/display/fisid_109269/) Faculty Director; PhD, University of Washington

Courses

**ASIA 2000 (3) Gateway to Modern Asia: Exploring Regional Connections**

Introduces main themes, intellectual approaches used in Asian Studies through a transdisciplinary perspective that focuses on interactions and links between geographic regions and national boundaries. Presents Asia as a concept, a powerful imaginary geography, and historically dynamic construct that has shaped / been shaped by global patterns of economic development, nation building, war and diplomacy, colonialism and aspirations for better lives.

Grading Basis: Letter Grade

Additional Information: Arts Sci Core Curr: Human Diversity

Arts Sci Gen Ed: Distribution-Arts Humanities

Arts Sci Gen Ed: Diversity-Global Perspective

Arts Sci Gen Ed: Distribution-Social Sciences

Departmental Category: Asia Content
Asian Studies - Bachelor of Arts (BA)

The study of Asia is highly relevant and important in this global age. Its influences on the Western world can be seen in economics, politics, music, the arts, entertainment and religion.

The Asian studies major at CU Boulder encompasses a diverse interdisciplinary study of Asia and gives students an opportunity to discover Asia through a wide variety of courses that reflect the astonishing diversity of the region. Many students choose Asian studies as a second major to complement the study of such subjects as history, international affairs, Asian languages and geography. As part of the Asian
studies major requirements, students will receive a thorough grounding in the history of Asia and will study an Asian language: Arabic, Chinese, Hindi, Farsi, Japanese, Korean, Sanskrit or Tibetan. All majors complete their Asian studies degree with the Senior Capstone in Asian Studies, a cumulative learning experience to deepen student knowledge of Asian studies.

Upon completion of this course of study, students will have received a highly individualized and broad education in the Asian region that will allow them to better understand its history and culture as well as its current dynamics.

Optional Program Tracks
Students have several options when majoring in Asian studies. One is the general Asian studies Bachelor of Arts degree. Alternately, if a student wishes to choose a particular area of emphasis that will appear on their transcript, they may choose from the following three options:

- Korea track
- South Asia track
- West Asia/Middle East track

View the Program Tracks tab (p. 153) for more information.

Requirements
Students must complete the general requirements of the College of Arts and Sciences and the required courses listed below: 42 credits minimum, 18 of which must be upper division (College of Arts and Sciences minimum). Other courses not listed here, including some study abroad courses and special topics courses, may be applicable toward the Asian studies major, but they must first be approved by the Asian studies faculty advisor.

**Asian Language**

4 semesters of Korean language (20 credit hours). Additional semesters can count as Asian Studies Electives.

**Traditional Asian Civilizations**

Students take two introductory courses, one on Korea and one on South or West Asia; 6 credits minimum, lower division.

**Korean Civilization**

- HIST 1438 Introduction to Korean History
- KREN 1011 Introduction to Korean Civilization

**West or South Asian Civilization**

**West Asian Civilization**

- ARAB 1011 Introduction to Arab and Islamic Civilizations
- ARAB 2231 Love, Loss and Longing in Classical Arabic Literature
- FRSI 1011 Introduction to Persian Civilization
- HIST 1308 Introduction to Middle Eastern History
- RLST 2202 Islam

**South Asian Civilization**

- HIND 1011 Introduction to South Asian Civilizations
- HIST 1518 Introduction to South Asian History to 1757
- RLST 2610 Happiness and Nirvana: Enlightenment in Indian Religions

**East or West Asian Civilization**

**West Asian Civilization**

- ARAB 1011 Introduction to Arab and Islamic Civilizations
- ARAB 2231 Love, Loss and Longing in Classical Arabic Literature
- FRSI 1011 Introduction to Persian Civilization
- HIST 1308 Introduction to Middle Eastern History
- RLST 2202 Islam

**East Asian Civilization**

- CHIN 1012 Introduction to Chinese Civilization
- HIST 1438 Introduction to Korean History
- HIST 1618 Introduction to Chinese History to 1644
- HIST 1708 Introduction to Japanese History
- JPNS 1012 Introduction to Japanese Civilization
- KREN 1011 Introduction to Korean Civilization
- RLST 2620 Religions of East Asia

**Modern Asian Civilizations**

Students take one course; 3 credit hours, lower division or upper division.

**Electives**

Students take 12-15 credit hours, 6 credit hours of which focus on Korea, all upper-division.

Courses with a Korean focus

- All KREN courses
- HIST 1438 Introduction to Korean History
- HIST 2220 History of War and Society (Korea through Wars)

Total Credit Hours 50-47

**South Asia Track**

Students must complete the general requirements of the College of Arts and Sciences and the required courses listed below: 42 credit hours minimum, 18 of which must be upper-division (College of Arts and Sciences minimum). Other courses not listed here, including some study abroad courses and special topics courses, may be applicable toward the Asian Studies major, but must first be approved by the Asian Studies Faculty Advisor.
### West Asia/Middle East Track

Students must complete the general requirements of the College of Arts and Sciences and the required courses listed below: 42 credit hours minimum, 18 of which must be upper-division (College of Arts and Sciences minimum). Other courses not listed here, including some study abroad courses and special topics courses, may be applicable toward the Asian Studies major, but must first be approved by the Asian Studies Faculty Advisor.

#### Asian Language

4 semesters of a single West Asian language (14-20 credit hours). Additional semesters can count as Asian Studies Electives.

- Arabic (sequence of three years offered)
- Farsi (sequence of three years offered)

#### Traditional Asian Civilizations

Students take two introductory courses, one on West Asia and one on South or East Asia; 6 credits minimum, lower division.

#### West Asian Civilization

- ARAB 1011 | Introduction to Arab and Islamic Civilizations
- FRSI 1011 | Introduction to Persian Civilization
- RLST 2202 | Islam

#### Electives

Students take 15-12 credit hours, 6 credit hours of which must focus on West Asia, all upper-division.

**Courses with a West Asian Focus**

- All ARAB and FRSI courses
- ARTH 4269 | Art and Archaeology of the Ancient Near East
- GEOG 4742 | Topics in Environment and Society (Geographies of Contemporary Muslim Societies: Islam, Biopolitics, and the Postcolonial)
- GEOG 4762 | Geographies of Political Islam: Empire, Terror and Revolution
- HIST 1308 | Introduction to Middle Eastern History
- HIST/JWST/RLST 1818 | Jewish History to 1492
- HIST 3328 | Seminar in Middle Eastern History
- HIST 4328 | The Modern Middle East, 1600 to the Present
- HIST/JWST 4338 | History of Modern Israel/Palestine
- HIST/JWST 4378 | History of Modern Jewish-Muslim Relations
- HUMN 3850 | The Mediterranean: Religion Before Modernity
- IAFS/JWST 3650 | History of Arab-Israeli Conflict
- IAFS 4500 | The Post-Cold War World (Afghanistan and Iraq)
- JWST/IAFS/RLST 3530 | Global Seminar: Jews and Muslims - The Multiethnic History of Istanbul
Recommended Four-Year Plan of Study

Through the required coursework for the major, students will complete all 12 credits of the Arts & Humanities area and some of the credits in the Social Sciences area of the Gen Ed Distribution Requirement and the Global Perspective component of the Gen Ed Diversity Requirement. Depending on elective courses selected within the major, students can potentially also complete the Social Sciences area of the Gen Ed Distribution Requirement.

Learning Outcomes

With an undergraduate degree in Asian Studies, students will:

- Develop a rich understanding of Asia as a complex and diverse region of critical importance in historical and contemporary geopolitics.
- Learn from Asia through self-critical and respectful, curiosity-based intellectual inquiry, rather than treating it as an object of knowledge, thus gaining a broader, more nuanced understanding.
- Have a better understanding of the challenges confronting various Asian countries and possible solutions as well as the complexities of the historic and current situations in Asian countries.
- Acquire an interdisciplinary view of issues based on the ways issues or events would be viewed differently by historians, sociologists, anthropologists, geographers and others.
- Gain practical knowledge through hands-on, student-driven research projects, internships in Asia and in Boulder, and study abroad programs in Asia.
- Become more skilled critical readers and thinkers, and better communicators with the skills to analyze and to communicate complex ideas in a clear, coherent manner.
- Have a basic level of familiarity with an Asian language.
- Be able to understand the pivotal importance Asia has to life in the U.S. in the 21st century.
• Appreciate the diversity within Asia and connections among countries and regions within Asia.
• Have the skill sets to be able to work in Asia and in Asia-related careers such as media and technology, foreign service, the military, development and education.

Asian Studies - Minor

The minor in Asian studies allows students to engage in interdisciplinary study of Asia, adding an important global focus to their primary studies. While the minor does not grant credit for foreign language, students are encouraged to study abroad, and are able to gain a strong foundation in knowledge of the Asian world through a vast array of fascinating coursework. The Asian studies academic advisor and faculty advisor strongly encourage thematic or regional concentration, and are available for help in customizing the minor.

For any questions, please email Dr. Colleen Berry (colleen.berry@colorado.edu) or call (303) 735-5224. Visit the Asian Studies Minor (http://www.colorado.edu/cas/academics/asian-studies-minor/) webpage for additional information.

Requirements

Required Courses and Credit Hours

Students must take a minimum of 21 credit hours, 12 of which must be upper-division (usually four 3-credit courses). Up to, but no more than, 9 credit hours earned through study abroad can be counted toward the minor.

All coursework applied to the minor must be completed with a grade of C- or better; no pass/fail work may be applied. The grade point average for all minor degree coursework must be equal to 2.000 (C) or higher.

Students are allowed to apply no more than 9 credit hours, including 6 upper-division credit hours, of transfer work toward a minor.

Traditional Asian Civilizations

Students take two of the following introductory courses, choosing one from each of two different civilizations (East Asia, South Asia, West Asia); 6 credit hours minimum, lower division. See the requirements on the Asian Studies - Bachelor of Arts (BA) (p. 149) page and scroll down to the Traditional Asian Civilizations courses.

Modern Asian Civilizations

Students take one course; 3 credit hours. This course must be upper-division since the minor as a whole requires 12 upper-division credits. See the requirements on the Asian Studies - Bachelor of Arts (BA) (p. 149) page and scroll down to the Modern Asian Civilizations courses.

Upper-Division Electives

Students take at least 3 courses (9 credits, upper division). Upper-division credits are required for the electives, since the minor as a whole requires 12 upper-division credits. See the requirements on the Asian Studies - Bachelor of Arts (BA) (p. 149) page and scroll down to the Electives courses for possible choices.

After meeting the Modern Asian Civilizations requirement, additional upper-division courses from that category may also be be taken as electives. ASIA 4830 can also be taken as an elective.

Astrophysical and Planetary Sciences

The Department of Astrophysical and Planetary Sciences is one of the few programs that combines both astrophysics and planetary science, providing a unified view of space sciences, the solar system and comparative planetology, stellar and galactic astronomy, and cosmology. Students are given hands-on experience with telescopes, optics, instrumentation, and computer-image processing and modeling.

For further information concerning undergraduate studies, contact the undergraduate program assistant.

Course code for this program is ASTR.

Bachelor's Degree

• Astronomy - Bachelor of Arts (BA) (p. 161)

Minor

• Astronomy - Minor (p. 165)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Courses

**ASTR 1000 (3) The Solar System**

Introduction to the night sky, planets, moons and the life in our solar system. Highlights the latest discoveries from space. For non-science majors. Some lectures may be held at Fiske Planetarium. Offers opportunities for nighttime observations at Sommers-Bausch Observatory.

**Equivalent - Duplicate Degree Credit Not Granted:** ASTR 1010, but without lab ASTR 1010 or ASTR 1030

**Requisites:** Restricted to non-Astronomy (ASTR) majors only.

**Additional Information:** Arts Sci Core Curr: Natural Science Sequence
Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences
MAPS Course: Natural Science
ASTR 1010 (4) Introductory Astronomy 1
Introduction to the night sky, planets, moons and the life in our solar system. Highlights the latest discoveries from space. For non-science majors. Some lectures may be held at Fiske Planetarium. Requires nighttime observations at Sommers-Bausch Observatory. Degree credit granted for only one of ASTR 1000 or ASTR 1010.
Equivalent - Duplicate Degree Credit Not Granted: ASTR 1000
Requisites: Restricted to non-Astronomy (ASTR) majors only.
Additional Information: Arts Sci Core Curr: Natural Science Sequence
Arts Sci Core Curr: General Education: Natural Sciences
Arts Sci Gen Ed: Distribution-Natural Science Lab
Arts Sci Gen Ed: Distribution-Natural Sciences
MAPS Course: Natural Science Lab or Lab/Lec

ASTR 1020 (4) Introductory Astronomy 2
Non-science majors learn the nature and workings of the Sun, stars, neutron stars, black holes, galaxies, quasars, structure and origins of the universe. Some lectures may be held at Fiske Planetarium. Offers opportunities for nighttime observations at Sommers-Bausch Observatory. Includes recitation. Sequence link ASTR 1010. Credit granted for only one of ASTR 1020, ASTR 1200, and ASTR 1040.
Requisites: Restricted to non-Astronomy (ASTR) majors only.
Additional Information: Arts Sci Core Curr: Natural Science Sequence
Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences

ASTR 1030 (4) Accelerated Introductory Astronomy 1
Covers principles of modern astronomy summarizing our present knowledge about the Earth, Sun, moon, planets and origin of life. Requires nighttime observation sessions at Sommers-Bausch Observatory. Required in ASTR major/minor. Like ASTR 1000 and 1010, but taught at a higher intellectual level, including a significant amount of quantitative analysis.
Equivalent - Duplicate Degree Credit Not Granted: ASTR 1000 or ASTR 1010
Requisites: Requires prerequisite or corequisite course of MATH 1300 or APPM 1350 or APPM 1340 and APPM 1345 (all minimum grade C).
Additional Information: GT Pathways: GT-SC1 - Natural Physical Sci:Lec
Crse w/ Req Lab
Arts Sci Core Curr: Natural Science Sequence
Arts Sci Core Curr: Natural Science Lab
Arts Sci Gen Ed: Distribution-Natural Sciences
Arts Sci Gen Ed: Distribution-Natural Science Lab

ASTR 1040 (4) Accelerated Introductory Astronomy 2
Covers principles of modern astronomy summarizing our present knowledge about the Sun, stars, birth and death of stars, neutron stars, black holes, galaxies, quasars, and the organization and origins of the universe. May require nighttime observing sessions at Sommers-Bausch Observatory. Required in ASTR major/minor. Includes a recitation. Taught at a higher intellectual level including a significant amount of quantitative analysis.
Equivalent - Duplicate Degree Credit Not Granted: ASTR 1020 and ASTR 1200
Requisites: Requires prerequisite course of ASTR 1010 or ASTR 1030 and MATH 1300 or APPM 1350 or APPM 1340 and APPM 1345 (all minimum grade C).
Additional Information: GT Pathways: GT-SC2 -Natural Physical Sci:Lec
Crse w/o Req Lab
Arts Sci Core Curr: Natural Science Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences

ASTR 1200 (3) Stars and Galaxies
Non-science majors are introduced to the nature and workings of the Sun, stars, neutron stars, black holes, interstellar gas, galaxies, quasars, plus structure and origins of the universe. Some lectures may be held at Fiske Planetarium. Offers opportunities to attend nighttime observation sessions at Sommers-Bausch Observatory.
Equivalent - Duplicate Degree Credit Not Granted: ASTR 1020 and ASTR 1040
Requisites: Restricted to non-Astronomy (ASTR) majors only.
Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences
MAPS Course: Natural Science

ASTR 2000 (3) Ancient Astronomies of the World
Documents the numerous ways in which observational astronomy and cosmology have been features of ancient cultures. Includes naked eye astronomy, archaeoastronomy, ethnoastronomy, concepts of time, calendrics, cosmogony, and cosmology.
Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Diversity-Global Perspective
Arts Sci Gen Ed: Distribution-Natural Sciences
MAPS Course: Natural Science

ASTR 2010 (3) Modern Cosmology-Origin and Structure of the Universe
Introduces modern cosmology to nonscience majors. Covers the Big Bang, the age, size, and structure of the universe; and the origin of the elements and of stars, galaxies, the solar system, and life.
Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences
MAPS Course: Natural Science

ASTR 2020 (3) Space Astronomy and Exploration
Covers physical principles of performing astronomy from space for science and exploration. The basic design of launch vehicles and spacecraft, orbital dynamics, and instruments will be described in the context of specific space missions (e.g. Hubble Telescope, Mars rovers) as well as prospects for future space observatories in orbit and on the Moon.
Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences
MAPS Course: Natural Science

ASTR 2030 (3) Black Holes
Black holes are one of the most bizarre phenomena of nature. Students are introduced to the predicted properties of black holes, astronomical evidence for their existence and formation, and modern ideas about space, time, and gravity.
Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences
MAPS Course: Natural Science

ASTR 2040 (3) The Search for Life in the Universe
Introduces the scientific basis for the possible existence of life elsewhere in the universe. Includes origin and evolution of life on Earth and the search for evidence of life in our solar system, including Mars and Jupiter's moon Europa. Discusses the conditions necessary for life and whether they might arise on planets around other stars. Credit only for this course or ASTR 3300.
Equivalent - Duplicate Degree Credit Not Granted: GEOL 2040
Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences
ASTR 2050 (3) The Sun and Society: Living with an Active Star  
Introduces non-science majors to the many ways out Sun influences life and society. Covers how the Sun generates energy, how it evolves over billions of years, how it affects Earth’s climate and biology, how it produces dangerous “space weather”, how we can harness its power and how life in other solar systems would depend on the properties of their Suns.  
Grading Basis: Letter Grade  
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences  
MAPS Course: Natural Science

ASTR 2100 (3) Fundamental Concepts in Astrophysics  
Covers topics in modern physics required for upper-level astrophysics and planetary science courses, including quantum mechanics, electromagnetic spectra, atomic and nuclear physics, and thermodynamics, in the context of astrophysics, planetary and space sciences. Also introduces key topics in mathematics to support these topics.  
Requisites: Requires prerequisite course of PHYS 1120 or PHYS 1125 and APPM 1360 or MATH 2300 (minimum grade C-).  
Grading Basis: Letter Grade

ASTR 2500 (3) Gateway to Space  
Introduces the basics of atmosphere and space sciences, space exploration, spacecraft design, rocketry and orbits. Students design, build, and launch a miniature satellite on a high altitude balloon. Explores the current research in space through lectures from industry.  
Equivalent - Duplicate Degree Credit Not Granted: ASEN 1400  
Requisites: Restricted to Astronomy (ASTR) majors only.  
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ASTR 2600 (3) Introduction to Scientific Programming  
Introduces principles, methods and tools of scientific programming commonly used in research. Topics include an introduction to programming in Python, data structures, numerical methods for calculus and data manipulation/visualization. Techniques covered are relevant to many technical fields but emphasis is placed on application to problems in astronomy and planetary science. Class time is split between lectures and in-lab tutorials.  
Requisites: Requires prerequisite course of MATH 1300 or APPM 1350 and PHYS 1110 or PHYS 1115 (minimum grade C-).  
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ASTR 2840 (1-3) Independent Study  
Instructor consent required.  
Repeatable: Repeatable for up to 6.00 total credit hours.

ASTR 3300 (3) Extraterrestrial Life  
Discusses the scientific basis for the possible existence of extraterrestrial life. Includes origin and evolution of life on Earth; possibility of life elsewhere in the solar system, including Mars; and the possibility of life on planets around other stars. Department enforced prerequisite: one-year sequence in a natural science. Credit only for this course or ASTR 2040.  
Equivalent - Duplicate Degree Credit Not Granted: GEOL 3300  
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ASTR 3400 (3) Research Methods in Astronomy  
Introduces research methods in astronomy and engages students in an active research project. The research projects will vary and may include astronomical observations, data analysis, scientific programming, theoretical models and statistical inference. As part of their research, students will read scientific papers, attend local seminars and prepare oral and written research proposals and reports. Elective for ASTR majors.  
Requisites: Requires prerequisite courses of ASTR 1040 and PHYS 1125 or 1120 (all minimum grade C-). Requires co-requisite or prerequisite of ASTR 2600 (minimum grade C-). Restricted to ASTR majors.  
Grading Basis: Letter Grade  
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences  
Arts Sci Gen Ed: Distribution-Natural Sci Lab

ASTR 3510 (4) Observations and Instrumentation 1  
Lab course in astronomical observation and instrumentation. Hands-on exercises include obtaining and analyzing multi-wavelength data, basic optical design and instrumentation and statistical analysis of data, with emphasis on imaging applications. A significant number of night time observation sessions are required. Elective for APS majors. Elective for APS minors on space available basis.  
Requisites: Requires a prerequisite or corequisite core of APPM 1360 or MATH 2300 and ASTR 1020 or ASTR 1040 and PHYS 1120 (all minimum grade C-). Restricted to Astrophysics (ASTR) majors only.  
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences  
Arts Sci Gen Ed: Distribution-Natural Sci Lab

ASTR 3520 (4) Observations and Instrumentation 2  
Lab course in observation and instrumentation. Hands-on exercises include obtaining and analyzing multi-wavelength data, optical design and instrumentation, and statistical analysis, with emphasis on spectroscopy. A significant number of night time observation sessions are required. Elective for APS majors. Elective for APS minors on space available basis.  
Requisites: Requires a prerequisite course of ASTR 3510 (minimum grade C-). Restricted to Astrophysics (ASTR) majors only.  
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences  
Arts Sci Gen Ed: Distribution-Natural Sci Lab

ASTR 3560 (3) Astronomical Instrumentation Laboratory  
Teaches students aspects of astronomical instrument design in a hands-on setting. Students will learn elementary principles of geometrical optics, diffraction, light detection, signal conditioning, data acquisition and motion control, and mechanical design. Students will apply these principles working in groups to design and build optical spectrometers.  
Requisites: Requires prerequisites courses of ASTR 1040 and MATH 2300 or APPM 1360 and PHYS 2170 (minimum grade C-).  
Grading Basis: Letter Grade  
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences  
Arts Sci Gen Ed: Distribution-Natural Sci Lab

ASTR 3710 (3) Formation & Dynamics of Planetary Systems  
Covers the origin of planetary systems and their dynamical evolution. Topics include the physics and chemistry of planetary formation, orbital mechanics and extrasolar planets. This course and ASTR 3720 and ASTR 3750 may be taken in any order. Elective for APS major and minor.  
Requisites: Requires prerequisite course of PHYS 1120 and MATH 2300 or APPM 1360 (all minimum grade C-).  
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
**Requisites:**

instructor consent.

Elective for APS major and minor.

**Equivalent - Duplicate Degree Credit Not Granted:** ATOC 3720

**Requisites:** Requires prerequisite courses of PHYS 1120 and APPM 1360 or MATH 2300 (all minimum grade C).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**ASTR 3730 (3) Astrophysics 1 - Stellar and Interstellar**

Provides a quantitative introduction to the radiative and gravitational physics relevant to stellar and galactic astrophysics, as applied to understanding observations of stars, stellar evolution, stellar remnants and the structure of the Milky Way. Elective for APS major and minor.

**Requisites:** Requires prerequisite courses of PHYS 2130 or PHYS 2170 or ASTR 2100 (all minimum grade C).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**ASTR 3740 (3) Cosmology and Relativity**

Special and general relativity as applied to astrophysics, cosmological models, observational cosmology, experimental relativity and the early universe. Elective for APS major and minor.

**Requisites:** Requires prerequisite courses of PHYS 2100 or PHYS 2170 or ASTR 2100 (all minimum grade C).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**ASTR 3750 (3) Planets, Moons, and Rings**

Approaches the physics of planets, emphasizing their surfaces, satellites, and rings. Topics include formation and evolution of planetary surfaces, history of the terrestrial planets, and dynamics of planetary rings. This course and ASTR 3720 may be taken for credit in any order. Elective for APS major and minor.

**Requisites:** Requires prerequisite courses of PHYS 1120 and APPM 1360 or MATH 2300 (all minimum grade C).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**ASTR 3760 (3) Solar and Space Physics**

Explores the physical processes linking the Sun and planets, emphasizing solar radiative and particulate variability and the response of planetary atmospheres and magnetospheres. Topics include the solar dynamo, solar wind, coronal mass ejections, cosmic ray modulation, magnetospheres, aurora, the space environment, and climate variability. Elective for APS major and minor.

**Requisites:** Requires prerequisite courses of PHYS 2130 or PHYS 2170 or ASTR 2100 (all minimum grade C).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**ASTR 3780 (3) Introduction to Scientific Data Analysis and Computing**

Introduces scientific data analysis from a practical perspective. Covers statistical analysis, model fitting, error analysis, theoretical compliance and image analysis with examples from space-based and ground-based astronomy. Elective for APS major. Opened to qualified non-majors with instructor consent.

**Requisites:** Requires prerequisite course of ASTR 2600 and prerequisite or corequisite courses of ASTR 1020 or ASTR 1040 and PHYS 1120 and APPM 1360 or MATH 2300 (all minimum grade C).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**ASTR 3830 (3) Astrophysics 2 - Galactic and Extragalactic**

The second semester of a year-long introduction to astrophysical processes. The physical processes developed in ASTR 3730 are applied to topics in extragalactic astronomy, including galaxies, supermassive black holes, galaxy clusters and cosmology. Elective for APS major and minor.

**Requisites:** Requires prerequisite courses of ASTR 3730 and PHYS 2130 or PHYS 2170 and APPM 2350 or MATH 2400 (all minimum grade C).  

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**ASTR 4330 (3) Cosmochemistry**

Investigates chemical and isotopic data to understand the composition of the solar system: emphasis on the physical conditions in various objects, time scales for change, chemical and nuclear processes leading to change, observational constraints, and various models that attempt to describe the chemical state and history of cosmological objects in general and the early solar system in particular. Department enforced prerequisite: upper-division undergraduate standing in physical science and upper-division undergraduate chemistry or physics or math courses.

**Equivalent - Duplicate Degree Credit Not Granted:** ASTR 5330 and GEOL 4330 and GEOL 5330

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**ASTR 4500 (1-3) Special Topics in Astrophysical and Planetary Sciences**

Topics vary each semester.

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**ASTR 4800 (3) Space Science: Practice and Policy**

Exposes students to current controversies in science that illustrate the scientific method and the interplay of observation, theory, and science policy. Students research and debate both sides of the issues, which include strategies and spin-offs of space exploration, funding of science, big vs. small science, and scientific heresy and fraud.

**Recommended:** Prerequisite one year of college level astronomy or physics.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**ASTR 4840 (1-3) Independent Study**

Instructor consent required.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**ASTR 4841 (1-3) Independent Study**

Repeatable: Repeatable for up to 7.00 total credit hours.

**Astronomy - Bachelor of Arts (BA)**

The APS Department is one of the few programs to combine both astrophysics and planetary science. As a result, we provide a unified view of solar and space sciences, planetary systems (our Solar System and others), stellar and galactic astronomy, and cosmology. We also offer hands-on experience with telescopes, optics, instrumentation, computer image processing, and computer modeling. These skills are useful for students wishing to pursue graduate degrees or careers in aerospace, technical or computer industries.

The University of Colorado is recognized as a top university in the exploration and study of space. Our faculty members carry out forefront research in a wide range of disciplines, from theoretical cosmology to finding planets around other stars, from observing cosmic microwave background in Antarctica to building space probes to explore Mars’ atmosphere. We offer many types of research opportunities for undergraduates including research-based courses, student positions that support research programs, and individual research projects with faculty. Students can apply for funding from the Undergraduate Research
Opportunities Program. The Honors Program (https://www.colorado.edu/aps/undergraduate-students/honors-program/) encourages students to write research theses to qualify for Latin Honors upon graduation.

We encourage all students to explore and share their enthusiasm for science and we support a wide range of extra-curricular activities. These include student groups, the Learning Assistant program, research activities, and public outreach. The Sommers-Bausch Observatory (http://www.colorado.edu/sbo/) and Fiske Planetarium (http://www.colorado.edu/fiske/) offer opportunities for undergraduate students to become involved.

We offer students the ability to graduate with honors. Students must maintain a minimum GPA and write and defend an honors thesis. More information can be obtained from the APS department office and/or the Honors Council Representative (Ann-Marie Madigan (https://www.colorado.edu/aps/ann-marie-madigan/)). More general information about the honors thesis is on CU Boulder’s Honors Program page (http://www.colorado.edu/honors/).

Program Tracks
Students pursuing an astronomy degree can choose to add the astrophysics/physics track. For more detailed information, visit the department website (https://www.colorado.edu/aps/undergraduate-students/degree-requirements/).

Students may declare either track when beginning their coursework, or wait until completion of their foundational courses in astronomy, physics, and mathematics (usually after the first 2-3 semesters). Students are mentored in groups during these first semesters, but meet individually with an APS faculty member every semester thereafter to discuss their academic progress and post-graduation plans.

General Astronomy Track
The astronomy degree highlights the science of astronomy, observation and technology. As a major on this track, students receive core training in astronomy, mathematics, physics, and computational and instrumental technology. These skills prepare students for professions in space sciences and a range of other careers in education, science, and technology. The astronomy degree is also designed to provide opportunities for students to explore a minor or second major in a complementary area of study.

Astrophysics/Physics Track
The astrophysics/physics addition shares the same foundational astronomy, math, and physics course sequences as the astronomy degree for the first two semesters, but then focuses on more advanced work in these topics. This track is jointly administered with the Department of Physics and requires substantial upper-division work in this field. Upon graduation, students should have solid theoretical and applied training for careers or graduate studies in the space sciences.

Requirements
The degree requirements are listed for the astronomy major and the astronomy-astrophysics/physics track. APS students will need to take the listed courses specific to their track in order to complete their astronomy degree.

General Astronomy Track
This is appropriate for someone aiming for a career in K–12 education, science journalism, science policy, information technology, science management, or technical work who does not expect to pursue a graduate degree.

Students must complete a minimum of 32 credit hours in astronomy (this must include at least 18 upper-division credit hours) and a minimum of 9 credit hours in physics.

Through the required coursework for this track of the major, students will fulfill all 12 credits of the Natural Sciences area of the Gen Ed Distribution Requirement, including the lab component, and the QRMS component of the Gen Ed Skills Requirement. If ASTR 2000 (https://catalog.colorado.edu/search/?P=ASTR%202000) is selected, a student could also complete the Global Perspective component of the Gen Ed Diversity Requirement.

For more information, view the Astronomy Degree Requirements Flowchart (https://www.colorado.edu/aps/sites/default/files/block/astroonomy_flowchart_0.jpg).

ASTR 3560  Astronomical Instrumentation Laboratory
ASTR 3710  Formation & Dynamics of Planetary Systems
ASTR 3740  Cosmology and Relativity
ASTR 3760  Solar and Space Physics
ASTR 4330  Cosmochemistry
ASTR 4800  Space Science: Practice and Policy
ASTR 5760  Astrophysical Instrumentation
ATOC 4720  Atmospheric Dynamics

Total Credit Hours 44-47

Required Ancillary Coursework

Required Ancillary Calculus Coursework

Select one of the following sequences: 8-10

- APPM 1350 & APPM 1360
  Calculus 1 for Engineers and Calculus 2 for Engineers
- MATH 1300 & MATH 2300
  Calculus 1 and Calculus 2

Required Ancillary Science Sequence with Lab

Select one other science sequence with lab, such as: 7-10

CHEM Sequence

- CHEM 1113 & CHEM 1114
  General Chemistry 1 and Laboratory in General Chemistry 1
- CHEM 1133 & CHEM 1134
  General Chemistry 2 and Laboratory in General Chemistry 2

EBIO Sequence

- EBIO 1210 & EBIO 1230
  General Biology 1 and General Biology Laboratory 1
- EBIO 1220 & EBIO 1240
  General Biology 2 and General Biology Laboratory 2

GEOL Sequence

- GEOL 1010 & GEOL 1030
  Exploring Earth and Introduction to Geology Laboratory 1
- GEOL 1020
  Dodos, Dinos, and Deinococcus: The History of a Habitable Planet

ATOC Sequence

- ATOC 1050 & ATOC 1070
  Weather and the Atmosphere and Weather and the Atmosphere Laboratory
- ATOC 1060
  Our Changing Environment: El Nino, Ozone, and Climate

Total Credit Hours 15-20

1 Or ASTR 1010 and ASTR 1020 with permission from Lead APS Faculty Mentor.

Astrophysics/Physics Track

The astrophysics/physics track is jointly supervised by the APS and Physics Departments.

For students aiming for a graduate program in astronomy or planetary sciences. Similar to Physics Plan 2 (Astrophysics), with additional astrophysics instrumentation labs and different electives.

Students must complete a minimum of 23 credits in astronomy and a minimum of 28 credits in physics (this must include at least 15 upper-division credits in astronomy and 12 in physics).

Through the required coursework for this track of the major, students will fulfill all 12 credits of the Natural Sciences area of the Gen Ed Distribution Requirement, including the lab component, and the QRMS component of the Gen Ed Skills Requirement.

For more information, view the Astrophysics Option Flowchart (https://www.colorado.edu/aps/sites/default/files/block/astrophysics_flowchart.jpg).

Select one of the following two astronomy sequences (6-hour minimum):

- ASTR 3720 & ASTR 3750
  Planets and Their Atmospheres and Planets, Moons, and Rings
- ASTR 3730 & ASTR 3830
  Astrophysics 1 - Stellar and Interstellar and Astrophysics 2 - Galactic and Extragalactic

Astronomy Electives

Select three additional courses from the following or from those sequence courses not used above (9-hour minimum):

- ASTR 3510 | Observations and Instrumentation 1 |
- ASTR 3520 | Observations and Instrumentation 2 |
- ASTR 3560 | Astronomical Instrumentation Laboratory |
- ASTR 3710 | Formation & Dynamics of Planetary Systems |
- ASTR 3740 | Cosmology and Relativity |
- ASTR 3760 | Solar and Space Physics |
ASTR 3800  Introduction to Scientific Data Analysis and Computing
ASTR 4330  Cosmochemistry
ATOC 4720  Atmospheric Dynamics
Any ASTR 5000- or 6000-level course with instructor’s permission

Total Credit Hours  51

Required Ancillary Calculus Coursework

Select one of the following sequence of courses:

- APPM 1350 & APPM 1360 & APPM 2350 & APPM 2360
- MATH 1300 & MATH 2300 & MATH 2400 & APPM 2360

Total Credit Hours  16-19

1 Or equivalent PHYS 1110 + PHYS 1120 + PHYS 1140 sequence.

Recommended Physics Electives

- PHYS 4150  Plasma Physics
- PHYS 4230  Thermodynamics and Statistical Mechanics
- PHYS 4410  Quantum Mechanics 2
- PHYS 4420  Nuclear and Particle Physics
- PHYS 4510  Optics

Astronomy - Bachelor of Arts (BA)

Four-Year Plans of Study

Astronomy Major

Course  Title  Credit Hours

Year One

Fall Semester

- ASTR 1030  Accelerated Introductory Astronomy 1  4
- APPM 1350 or MATH 1300  Calculus 1 for Engineers or Calculus 1  4-5
- PHYS 1115 or PHYS 1110  General Physics 1 for Majors or General Physics 1  4
- Gen Ed Skills course/Elective/MAPS /FYSM  3

Total Credit Hours  15-16

Spring Semester

- ASTR 1040  Accelerated Introductory Astronomy 2  4
- APPM 1360 or MATH 2300  Calculus 2 for Engineers or Calculus 2  4-5
- PHYS 1125 or PHYS 1120  General Physics 2 for Majors or General Physics 2  4
- PHYS 1140  Experimental Physics 1  1

Total Credit Hours  15

Year Two

Fall Semester

- ASTR 2600  Introduction to Scientific Programming  3
- PHYS 2170 or ASTR 2100  Foundations of Modern Physics or Fundamental Concepts in Astrophysics  3
- PHYS 2150  Experimental Physics 2  1
- APPM 2350 or ASTR 2100  Calculus 3 for Engineers or Fundamental Concepts in Astrophysics  3-4

Total Credit Hours  14-16

Spring Semester

- ASTR 2100 or ASTR 3400  Fundamental Concepts in Astrophysics or Research Methods in Astronomy  3
- ASTR 3800  Introduction to Scientific Data Analysis and Computing (Or Upper Division ASTR-Elective)  3
- ASTR 2000-level course  3
- Ancillary Science Sequence Continued (Chem 1133, EBIO 1220, GEOL 1020, or ATOC 1060)  3-4
- Gen Ed Distribution/Diversity course/MAPS/Elective/Minor  3

Total Credit Hours  15-16

Year Three

Fall Semester

- ASTR 3720 or ASTR 3730  Planets and Their Atmospheres or Astrophysics 1 - Stellar and Interstellar  3
- ASTR Upper division or Elective/Minor  3
- Gen Ed Skills course/Maps/Elective/Minor  3
- Gen Ed Distribution Course  3
- Elective  3

Total Credit Hours  15

Spring Semester

- ASTR 3750 or ASTR 3830  Planets, Moons, and Rings or Astrophysics 2 - Galactic and Extragalactic  3

**Astronomy - Minor**

Declaration of a minor in Astrophysical and Planetary Sciences is open to any student enrolled at CU-Boulder. Coursework applied to the Astronomy minor may be applied to another major or towards General Education requirements.
Requirements

Coursework applied to the minor may be applied toward General Education requirements or to a major offered by another department. Minimum requirements for a minor include:

- A minimum of six ASTR courses (18 credits), including at least three advanced courses (numbered above 3500; 9 credits).
- All coursework applied to a minor must be completed with a grade of C- or better; no pass/fail work may be applied. The GPA for all coursework completed in the minor department must be equal to 2.00 (C) or higher.
- Students pursuing an individually structured major or a major in distributed studies are not eligible to earn a minor.
- Students are allowed to apply no more than three courses (9 credits), including two advanced courses (6 credits), of transfer work toward a minor.

Advanced

Select one of the following upper-division course sequences: 6

**Planetary Sequence:**

- ASTR 3720 & ASTR 3750 Planets and Their Atmospheres and Planets, Moons, and Rings

**Astrophysics Sequence:**

- ASTR 3730 & ASTR 3830 Astrophysics 1 - Stellar and Interstellar and Astrophysics 2 - Galactic and Extragalactic

Select a minimum of one of the following: 3-4

- ASTR 3400 Research Methods in Astronomy
- ASTR 3510 Observations and Instrumentation 1
- ASTR 3520 Observations and Instrumentation 2
- ASTR 3710 Formation & Dynamics of Planetary Systems
- ASTR 3720 Planets and Their Atmospheres
- ASTR 3730 Astrophysics 1 - Stellar and Interstellar
- ASTR 3740 Cosmology and Relativity
- ASTR 3750 Planets, Moons, and Rings
- ASTR 3760 Solar and Space Physics

Total Credit Hours 18-19

1 Or ASTR 1010 and ASTR 1020 with permission.

Additional information is available from any faculty mentor. See the department's Undergraduate Studies (https://www.colorado.edu/aps/undergraduate-students/prospective-students/) webpage.

**Atmospheric and Oceanic Sciences**

The Department of Atmospheric and Oceanic Sciences (ATOC) is an interdisciplinary program that provides an educational and research environment to examine the dynamical, physical and chemical processes in the atmosphere, ocean and land surface, and the manner in which they interact. A major theme is the establishment of a physical basis for understanding, observing and modeling climate and global change.

ATOC began offering an undergraduate major in fall 2016. This Bachelor of Arts degree is the first of its kind at CU Boulder for students interested in an in-depth understanding of the physical basis for the role of the atmosphere and oceans in Earth's climate system. In addition, ATOC offers a minor in atmospheric and oceanic sciences for students pursuing a bachelor's degree in another academic department. ATOC also offers many courses approved for the Natural Science Distribution Area of the College of Arts & Sciences General Education Requirements.

For more information about ATOC programs and application procedures, call the ATOC office at 303-492-6633 or visit the Atmospheric and Oceanic Sciences (http://www.colorado.edu/atoc/) website.

**Course code for this program is ATOC.**

**Bachelor's Degree**

- Atmospheric and Oceanic Sciences - Bachelor of Arts (BA) (p. 170)

**Minor**

- Atmospheric and Oceanic Sciences - Minor (p. 172)

**Faculty**

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Associate Professor; PhD, University of Wyoming

Friedrich, Katja (https://experts.colorado.edu/display/fisid_133607/)  
Associate Chair, Associate Professor; PhD, Ludwig-Maximilians-Universität München (Germany)

Giglio, Donata  
Assistant Professor; PhD, University of California, San Diego
Courses

ATOC 1050 (3) Weather and the Atmosphere
Introduces principles of modern meteorology for nonscience majors, with emphasis on scientific and human issues associated with severe weather events. Includes description, methods of prediction, and impacts of blizzards, hurricanes, thunderstorms, tornadoes, lightning, floods, and firestorms.

Additional Information: GT Pathways: GT-SC1 - Natural Physical Sci/Lec Crse w/o Req Lab
Arts Sci Core Curr: Natural Science Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences
MAPS Course: Natural Science

ATOC 1060 (3) Our Changing Environment: El Nino, Ozone, and Climate
Discusses the Earth's climate for nonscience majors, focusing on the role of the atmosphere, oceans, cryosphere and land surface. Describes the water cycle, atmospheric circulations and ocean currents, and how they influence global climate, El Nino and the ozone hole. Discusses human impacts from climate change.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 1060
Recommended: Prerequisite ATOC 1050.

Additional Information: Arts Sci Core Curr: Natural Science Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences

ATOC 1070 (1) Weather and the Atmosphere Laboratory
Illustrates fundamentals of meteorology with laboratory experiments. Covers collection, analysis and discussion of data related to local weather. Uses computers for retrieval and interpretation of weather data from Colorado and across the U.S. Optional lab for ATOC 1050.

Recommended: Prerequisite or corequisite ATOC 1050.

Additional Information: GT Pathways: GT-SC1 - Natural Physical Sci/Lec Crse w/ Req Lab
Arts Sci Core Curr: Natural Science Lab
Arts Sci Gen Ed: Distribution-Natural Sci Lab
Arts Sci Gen Ed: Distribution-Natural Sciences
MAPS Course: Natural Science Lab or Lab/Lec

ATOC 2050 (3) Introduction to Atmospheric Research
Uses real world data to investigate the basic physical processes that drive the coupled atmosphere-ocean system (e.g., energy distribution, phase changes, stability, winds and currents). Students will apply logic to predict how processes are impacted as different environmental characteristics change and develop skills in graphical literacy, investigative thinking, societal and personal relevancy, and communication.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ATOC 2500 (1-3) Special Topics in Atmospheric and Oceanic Sciences - Lower Division
Acquaints students at the lower division level with current research in atmospheres, oceans and climate (Topics may vary each semester). Students may register for more than one section of this course in the same semester. Recommended restriction: students with 0-56 credits (Freshmen or Sophomores).

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Recommended: Prerequisite or corequisite will vary depending on topic.
ATOC 3050 (3) Principles of Weather
Explores the processes that influence middle latitude weather including atmospheric thermodynamics, cloud and precipitation processes, atmospheric dynamics, air masses and fronts, and mid-latitude cyclones. Recitations and homework assignments will allow students to apply these concepts to real weather data through analysis of weather maps, thermodynamics diagrams and conceptual models.

Recommended: Prerequisites ATOC 1050 or ATOC major.
Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences

ATOC 3070 (3) Introduction to Oceanography
Explores Earth's dynamic oceans. Discusses the disciplines of oceanography including marine geology, chemistry, biology and physical oceanography with emphasis on global change. Specific topics may include: tectonics, currents, biogeochemical cycles, ecology and global warming.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 3070
Recommended: Prerequisite any 1000-level ATOC or GEOL course or ATOC major.
Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences

ATOC 3180 (3) Aviation Meteorology
Familiarizes students with a wide range of atmospheric behavior pertinent to air travel: rudiments of aerodynamics; aircraft stability and control; atmospheric circulation, vertical motion, turbulence and wind shear; fronts, clouds and storms.

Recommended: Prerequisite ATOC 1050 or ATOC major.
Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences

ATOC 3300 (3) Analysis of Climate and Weather Observations
Discusses instruments, techniques and statistical methods used in atmospheric observations. Covers issues of data accuracy and analysis of weather maps. Provides application to temperature and precipitation records, weather forecasting and climate change trends. Uses computers to access data sets and process data.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 3301
Recommended: Prerequisites ATOC 1050 or ATOC 1060 or ATOC 3600 or GEOG 3601 or GEOG 3001 or GEOG 1001 or ATOC major and minor.
Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences

ATOC 3400 (3) Principles of Climate
Describes the basic components of the climate system: the atmosphere, ocean, cryosphere and lithosphere. Investigates the basic physical processes that determine climate and link the components of the climate system. Covers the hydrological cycle and its role in climate, climate stability and global change.

Equivalent - Duplicate Degree Credit Not Granted: ENVS 3600
Recommended: Prerequisite any 1000-level ATOC or GEOL course or ATOC major.
Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences

ATOC 3720 (3) Planets and Their Atmospheres
Explores the physics and chemistry of the atmospheres of Mars, Venus, Jupiter, Saturn, and Titan. Examines evolution of the atmospheres of Earth, Venus, and Mars; and the escape of gases from the Galilean satellites, Titan and Mars; the orbital characteristics of moons, planets, and comets. Uses recent results of space exploration. Elective for APS major and minor.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 3720
Recommended: Prerequisites courses of PHYS 1120 and APPM 1360 or MATH 2300 (all minimum grade C). Restricted to students with 57-180 credits (Junior or Senior) Astronomy (ASTR) or Atmospheric Oceanic Sciences (ATOC) majors only.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ATOC 4020 (1-3) Seminar in Atmospheric and Oceanic Sciences
Explores current research areas; students read selected papers, give presentations and participate in discussions; fellowship and internship opportunities; discussion on practical skills necessary for academic and professional life; career-building activities with outside speakers from academia and industry. May be repeated for a total of 6 credit hours within the degree as long as the topic is different. May be repeated for a total of 3 credit hours within a semester.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

ATOC 4200 (3) Biogeochemical Oceanography
Provides a large-scale synthesis of the processes impacting ocean biogeochemistry. Transforms theoretical understanding into real-world applications using oceanographic data and models. Topics include: chemical composition, biological nutrient utilization and productivity, air-sea gas exchange, carbonate chemistry, ocean acidification, ocean deoxygenation, iron fertilization, biogeochemical climate feedbacks and more.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 5200
Recommended: Prerequisite any 1000-level ATOC or ATOC major
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ATOC 4500 (1-3) Special Topics in Atmospheric and Oceanic Sciences - Upper Division
Accompanies students at the upper division level with current research in atmospheres, oceans, and climate. Topics may vary each semester. Students may register for more than one section of this course in the same semester. Recommended restriction: students with 57-180 credits (Juniors or Seniors).
Repeatable: Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.
Recommended: Prerequisites and corequisites: will vary depending on topic.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
ATOC 4550 (3) Mountain Meteorology
Investigating main processes that control weather and climate in the western United States and other mountain ranges around the world is the emphasis of this course. Provides an advanced survey of synoptic, mesoscale, and microscale meteorology in complex terrain including orographically modified cyclone evolution, front-mountain interactions, terrain and thermally driven flows, mountain waves, downslope winds, and orographic precipitation.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 5550
Recommended: Prerequisite ATOC 1050 or ATOC major.
Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences

ATOC 4700 (3) Weather Analysis & Forecasting
Utilizing a range of operational weather observations to analyze current weather conditions, providing hands-on experience interpreting observations and relating those observations to the physical principles that govern atmospheric behavior is the course emphasis. It focuses on how to read weather reports, analyze observations, and how to prepare weather maps to analyze current conditions and how to interpret numerical weather forecasts.
Recommended: Prerequisite ATOC 1050 or ATOC 1060 or ATOC 4720 or ATOC major.
Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences

ATOC 4710 (3) Introduction to Atmospheric Physics
Provides a fundamental overview of the physics of Earth’s atmosphere. Topics include atmospheric composition and structure, atmospheric radiation and optics (rainbows, halos and other phenomena), atmospheric thermodynamics, cloud physics and atmospheric electricity and lighting. Including both descriptive and quantitative approaches to the subject material. Where applicable, observations from the ATOC Skywatch Observatory will be introduced.
Recommended: Prerequisite one year of calculus and one year of physics with calculus.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ATOC 4720 (3) Atmospheric Dynamics
Introduces the fundamental physical principles that govern the atmospheric circulations across a range of spatial and temporal scales and provides a quantitative description and interpretation of a wide range of atmospheric phenomena. Topics include atmospheric forces, governing equations, balanced and unbalanced flows, atmospheric waves and mid-latitude cyclones.
Recommended: Prerequisite one year of calculus and one semester of physics with calculus.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ATOC 4730 (3) Physical Oceanography and Climate
Introduces the field of physical oceanography, with emphasis on the ocean's interaction with the global atmosphere. Analysis of the ocean's heat, salt, and momentum budgets, wind-driven and thermohaline circulations, climate cycles including El Nino, and the ocean's role in climate change. Theory complemented by state-of-the-art observations and models. Department recommended prerequisites: ATOC 1060 or ATOC 3070 or ATOC 3600 and one semester of calculus.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 5730
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ATOC 4750 (3) Desert Meteorology and Climate
Introduces students to the dynamic causes of deserts in the context of atmospheric processes and land-surface physics. Discusses desert severe weather, desert microclimates, human impacts and desertification, inter-annual variability in aridity (drought), the effects of deserts on global climate and the impact of desert climate on humans.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 5750
Recommended: Prerequisites one semester of calculus and ATOC 1050 or ATOC 1060 or ATOC 3600 or ATOC major.
Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences

ATOC 4770 (3) Renewable Energy Meteorology
Explores the complex interactions of the atmosphere and wind energy generation. Surveys wind turbine designs. Explores planetary boundary layer dynamics, traditional and novel wind measurement methods, forecasting methods, wind turbine and wind farm wakes, wind farm optimization, sound propagation from wind plants, climate change impacts on wind resources and the impacts of wind plants on local environments.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 5770
Recommended: Prerequisite ATOC 1050 or ATOC major.
Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences

ATOC 4800 (3) Policy Implications of Climate Controversies
Examines controversial issues related to the environment, including climate change. Covers scientific theories and the intersection between science and governmental policy. Includes discussion, debate and critical reading of textual materials. Department enforced prerequisite: ATOC 1060 or ATOC 3600.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 5000 and ENVS 5830
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ATOC 4815 (3) Scientific Programming, Data Analysis and Visualization Laboratory
Teaches programming in python, as well as analysis skills for accessing, analyzing and visualizing data that are commonly used in the atmospheric and oceanic sciences. Basic data analysis includes curve fitting and re-gridding/aggregation of satellite observations or meteorological data for global climatologies. The course content is primarily conveyed through hands-on code development. A final project, involving the independent analysis and visualization of a scientific data set, integrates skills acquired throughout the course.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 5815
Recommended: Requisites prior experience with Python or a basic programming course such as CSCI 1300 or equivalent, basic knowledge of calculus and algebra.

ATOC 4830 (3) Remote Sensing Lab
Fundamentals of remote sensing of the atmosphere and ocean including fundamentals of atmospheric radiation and inverse methods for deriving geophysical variables from measurements. Principles of satellite and ground-based active (lidar and radar) and passive remote sensing methods, instrumentations, and applications. Lectures will include both descriptive and quantitative approaches to the subject material and include in-class demonstrations and measurements and data from the ATOC Skywatch Observatory and NASA satellites.
Recommended: Prerequisites one year of calculus and one year of physics with calculus.
ATOC 4840 (3) Field Observations and Measurements Laboratory
This course introduces students to all aspects of observing the atmospheric state including issues associated with observational and instrument errors, planning and executing measurement campaigns and analyzing and presenting results based on data collected during field campaigns. During the semester students will plan, conduct and analyze data from two atmospheric field campaigns conducted near Boulder, CO using a suite of meteorological sensors.
Recommended: Prerequisites: ATOC 1050 or ATOC 3050.

ATOC 4850 (3) Numerical Methods Laboratory
Teach students how to convert physical descriptions of the earth system into numerical models. Students will learn how to make assumptions to simplify complex systems, how to discretize and code mathematical equations so they can be solved on a computer, and how to assess if the results are reasonable. The course content is primarily conveyed through hands-on code development in python. A final project integrates skills acquired throughout the course.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 5850
Recommended: Prerequisites: ATOC 4815 or ATOC 5815, Calculus 1, Calculus 2, Differential Equations, Linear Algebra, and a basic knowledge of/interest in atmospheric, oceanic, climatic, or cryospheric physics.

ATOC 4880 (3) Mesoscale Meteorology
Provides a comprehensive study of the structure, evolution, and dynamics of atmospheric phenomena on the mesoscale, which have horizontal scales ranging from a few to several hundred kilometers. Topics include land/sea breezes, horizontal convective rolls, drylines, deep convective storms, outflow boundaries, tornadoes, mesoscale convective systems, terrain induced airflows, mountain waves and the mesoscale aspects of extratropical cyclones. Previously offered as a special topics course. Recommended restriction: Senior or Fifth-Year Senior standing.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 5880
Recommended: Prerequisites: One year of Calculus, one year of Physics with Calculus, and at least one ATOC fundamental or core course, preferably ATOC 3050 or ATOC 4720.

ATOC 4900 (1-3) Independent Study
Department enforced prerequisite: instructor consent.
Repeatable: Repeatable for up to 6.00 total credit hours.

ATOC 4950 (1-3) Honors Thesis
Students work independently on a research topic under the guidance of a faculty member. A written thesis and an oral presentation of the work are required. Registration by arrangement and with consent of faculty mentor. Department enforced prerequisite: minimum 3.00 GPA.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors)
Additional Information: Arts Sciences Honors Course

ATOC 4990 (1-3) Internship
This course is designed to provide junior and senior ATOC majors with the opportunity to work hands-on in the community and to gain practical knowledge and experience in both research and industry. Participation in the program requires both on-site and academic work. 0.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Recommended: Students should have junior or senior standing (at the time of the internship) and have a minimum cumulative GPA of 2.

Atmospheric and Oceanic Sciences - Bachelor of Arts (BA)
The atmospheric and oceanic sciences (ATOC) Bachelor of Arts degree is the first of its kind at CU Boulder for students interested in an in-depth understanding of the physical basis for the role of the atmosphere and oceans in Earth’s climate system. An ATOC degree will prepare students to pursue a wide range of careers in areas as diverse as the energy sector, insurance, military, air and water quality monitoring, weather and aerospace industries. It will provide a solid foundation for advanced degrees in the atmospheric and oceanic sciences, and for professions in scientific research and academia.

ATOC’s curriculum responds to demands of current students for more interactive learning opportunities and to demands of employers for graduates who have been trained to provide quantitative solutions to real-world problems. It is designed to provide students with a core set of knowledge and skills related to atmospheric and oceanic sciences, and to engage students in hands-on, interactive learning early and often. To that end, it requires students to take several “methods” courses that emphasize quantitative problem-solving by focusing on some combination of data analysis, observations and/or modeling; all of these courses will incorporate some level of computer programming or scientific computing. ATOC strongly recommends that every student have a laptop computer if it is financially feasible. Students who intend to purchase a computer and wish to have its cost included in their financial aid calculations are strongly encouraged to consult the Office of Financial Aid before purchase.

ATOC’s curriculum is also designed to take advantage of our unique position as a university in the center of a world-renowned mecca for earth system science. Scientists from the local community contribute their expertise to the ATOC curriculum, particularly in the interactive methods courses, and mentor seniors in their thesis research.

For further information concerning undergraduate studies, contact ATOC’s graduate and undergraduate program assistant, Laurie Conway (laurie.conway@colorado.edu).

Requirements
Students receiving a BA in atmospheric and oceanic sciences (ATOC) must satisfy the basic requirements of the College of Arts and Sciences
Students are required to complete 45 credits in lower and upper-division ATOC coursework, including 21 credits of core ATOC courses, 12 credits of methods in ATOC, and 12 credits of designated upper-division ATOC electives. The requirements for the ATOC major also include 32–37 hours of ancillary science and mathematics. All required major courses and all required ancillary courses must be passed with a C- or better.

Under normal circumstances, no more than 45 credits in ATOC may be used toward a student's total University of Colorado graduation requirements. However, up to 6 hours of designated department honors courses are exempted from this credit-hour maximum. Students must have a grade point average of at least 2.000 in the major in order to graduate.

### Required Courses and Credits

#### ATOC Major Requirements

#### Core Atmospheric and Oceanic Sciences Requirements

Select three of the following courses: 9

- ATOC 3050 Principles of Weather
- ATOC/GEOL 3070 Introduction to Oceanography
- ATOC 3300 Analysis of Climate and Weather Observations
- ATOC 3500/ CHEM 3151 Air Chemistry and Pollution
- ATOC 3600 Principles of Climate

#### Fundamentals of Atmospheric and Oceanic Sciences

Select three of the following courses: 9

- ATOC 4200 Biogeochemical Oceanography
- ATOC 4710 Introduction to Atmospheric Physics
- ATOC 4720 Atmospheric Dynamics
- ATOC 4730 Physical Oceanography and Climate

#### Methods in Atmospheric and Oceanic Sciences

Select 12 credit hours of the following, 6 of which can be from independent research (ATOC 4900 or ATOC 4950).

- ATOC 4500 Special Topics in Atmospheric and Oceanic Sciences - Upper Division
  (Choose from the following: topics: Weather Modeling Lab, Instrument Lab, Remote Sensing, Field Observations and Measurements, Numerical Methods and Modeling, Objective Data Analysis, Synoptic Dynamic Meteorology, and Applications of Numerical Models)
- ATOC 4700 Weather Analysis & Forecasting

- ATOC 4815 Scientific Programming, Data Analysis and Visualization Laboratory
- ATOC 4900 Independent Study
- ATOC 4950 Honors Thesis
- ATOC 4990 Internship

#### ATOC Electives

Upper-Division ATOC Electives 9
Upper- or Lower-Division ATOC Elective 3

Total Credit Hours 45

### Required Ancillary Coursework from Outside ATOC

### Graduating in Four Years

Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of "adequate progress" as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress in ATOC, students should meet the following requirements:

- In the first semester, declare the Atmospheric and Oceanic Sciences major.

Students must consult with a major advisor to determine adequate progress toward completion of the major.

### Sample Four-Year Plan of Study

Through the required coursework for the major, students will complete all 12 credits of the Natural Sciences area of the Gen Ed Distribution Requirement and the QRMS component of the Gen Ed Skills Requirement.

- ATOC 1050  Weather and the Atmosphere
- ATOC 1060  Our Changing Environment: El Nino, Ozone, and Climate
- ATOC 2500  Special Topics in Atmospheric and Oceanic Sciences - Lower Division
- FYSM 1000  First Year Seminar (ATOC offered sections)
- ATOC 3050  Principles of Weather
- ATOC 3300  Analysis of Climate and Weather Observations
- ATOC 3500/ CHEM 3151  Air Chemistry and Pollution
- ATOC 3600  Principles of Climate
- ATOC 4200  Biogeochemical Oceanography
- ATOC 4710  Introduction to Atmospheric Physics
- ATOC 4720  Atmospheric Dynamics
- ATOC 4730  Physical Oceanography and Climate
- ATOC 4815  Scientific Programming, Data Analysis and Visualization Laboratory
- ATOC 4900  Independent Study
- ATOC 4950  Honors Thesis
- ATOC 4990  Internship
- ATOC 4500  Special Topics in Atmospheric and Oceanic Sciences - Upper Division
- APPM 1350  Calculus 1 for Engineers
- or MATH 1300  Calculus 1
- APPM 1360  Calculus 2 for Engineers
- or MATH 2300  Calculus 2
- APPM 2350  Calculus 3 for Engineers
- or MATH 2400  Calculus 3
- APPM 2360  Introduction to Differential Equations with Linear Algebra (Or MATH 2130 and MATH 3430)
- CHEM 1113  General Chemistry 1
- CSCI 1300  Computer Science 1: Starting Computing
- PHYS 1110  General Physics 1
- PHYS 1120  General Physics 2

Total Credit Hours 32-37
Not all ATOC 4500 courses satisfy all requirements. See department for more information.

**Learning Outcomes**

ATOC's curriculum responds to demands of current students for more interactive learning opportunities and to demands of employers for graduates who have been trained to provide quantitative solutions to real-world problems. It is designed to provide students with a core set of knowledge and skills related to atmospheric and oceanic sciences, and to engage students in hands-on, interactive learning early and often.

To that end, it requires students to take several "methods" courses that emphasize quantitative problem-solving by focusing on some combination of data analysis, observations, and/or modeling; all of these courses will incorporate some level of computer programming or scientific computing.

ATOC course learning goals include graphical literacy, investigative thinking, societal and personal relevance, and knowledge of the physical processes of weather and climate. In addition, ATOC majors should demonstrate skill in communication scientific concepts elegantly and clearly.

**Atmospheric and Oceanic Sciences - Minor**

The Department of Atmospheric and Oceanic Sciences (ATOC) offers an undergraduate minor for students pursuing a bachelor's degree in another academic department. Students who successfully complete a major at CU Boulder in a quantitative field, such as physics or chemistry, and a minor in ATOC, will be prepared for graduate work in atmospheric and oceanic sciences. The ATOC minor is offered through the College of Arts and Sciences and is noted on the official CU Boulder transcript.

Although the ATOC minor is primarily designed for students who are interested in developing a knowledge base in atmospheric and oceanic sciences with an emphasis on the earth's climate, there is considerable latitude within the minor program for students to design a course of study that is tailored to their individual interests.
Students who wish to declare the ATOC minor should contact the ATOC Undergraduate & Graduate Program Assistant by email at atocasst@colorado.edu or by phone at 303-492-6633. Questions regarding coursework or advising should be directed to the ATOC minor advisor, Dr. Katja Friedrich, at katja.friedrich@colorado.edu.

Requirements

A minimum of 18 credits is required for the minor, at least 9 of which must be upper-division (see list below). The other 9 may be lower-division, upper-division or a combination of both.

All coursework applied to the minor must be completed with a grade of C- or better; no pass/fail work may be applied. Students must have at least a C (2.00) average for all attempted work in atmospheric and oceanic sciences.

Courses toward a minor may also be applied toward graduation requirements, as well as the major requirements for a non-ATOC major. Students are allowed to apply no more than 9 credit hours, including 6 upper-division credit hours, of transfer work to a minor.

Biochemistry

The biochemistry major provides interdisciplinary training, education and experience in the chemical and biological sciences. Biochemistry focuses on understanding the chemical processes of living organisms, the reaction pathways that sustain life, the principles of how structure defines function and the physical basis of biomolecular interactions. Students who major in biochemistry are prepared for diverse careers in medicine, scientific research, biotechnology, pharmacy, biomedical consulting, teaching and education, among other professions.

Because biochemistry connects to scientific disciplines ranging from genetics, human physiology, microbiology, neuroscience, cell biology, chemistry and geology, biochemistry majors are given the freedom to explore advanced electives in many of these subjects. Additional information about the biochemistry BA can be found on the Biochemistry Department website (https://www.colorado.edu/biochemistry/).

Course code for this program is BCHM.

Palmer, Amy E. (https://experts.colorado.edu/display/fisid_141901/)
Professor; PhD, Stanford University

Pardi, Arthur (https://experts.colorado.edu/display/fisid_105996/)
Professor; PhD, University of California, Berkeley

Parker, Roy Robert (https://experts.colorado.edu/display/fisid_151440/)
Distinguished Professor; PhD, University of California, San Francisco

Rinn, John (https://experts.colorado.edu/display/fisid_159338/)
Professor; PhD, Yale University

Schnizer-Luger, Karoline (https://experts.colorado.edu/display/fisid_156579/)
Endowed Chair, Professor; PhD, Univ of Basel (Switzerland)

Sousa, Marcelo Carlos (https://experts.colorado.edu/display/fisid_122806/)
Professor; PhD, Univ of Buenos Aires (Argentina)

Spencer, Sabrina Leigh (https://experts.colorado.edu/display/fisid_154911/)
Assistant Professor; PhD, Massachusetts Institute of Technology

Stephen, Ricardo Hugh (https://experts.colorado.edu/display/fisid_145994/)
Instructor; PhD, University of Colorado Boulder

Taatjes, Dylan J. (https://experts.colorado.edu/display/fisid_102436/)
Professor; PhD, University of Colorado Boulder

Wuttke, Deborah S. (https://experts.colorado.edu/display/fisid_108412/)
Professor, Associate Chair; PhD, California Institute of Technology

Courses

BCHM 1041 (3) Biotechnology and Society
Covers recent advances in biotechnology and how those impact society. Content and discussion will focus on both the science behind technological advances, their impact on society, and the ethical issues raised by new technologies. Topics change each semester but can include: GMO crops, genome editing, drug discovery and development, stem cell therapies, development and use of new cancer treatments, human genome sequencing and its impact on diagnosis and treatments, human microbiome, neurodegenerative diseases. Formerly CHEM 1041.

Requisites: Restricted to students with 0-56 credits (Freshmen or Sophomore) only.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

BCHM 1701 (1) Biochemistry Program for Research Exploration and Planning
Biochem PREP is focused on developing first and second year student interest and engagement in undergraduate research. The program is designed to present participants with mentorship and opportunities to identify whether research is an opportunity students wish to participate in, and if so, get students connected to potential research opportunities. Participants will be provided with a cohort of their peers to explore and plan for research together through preparation workshops, research information sessions, mentorship, and lab technique training. The ultimate goal of the program is for participants to understand their research interests, possess the necessary skills to identify and obtain a research opportunity, and develop community with their peers and the Department of Biochemistry at large.

Requisites: Restricted to Biochemistry (BCHM) majors and minors only.
Grading Basis: Pass/Fail

BCHM 2700 (4) Foundations of Biochemistry
Covers chemistry of aqueous solutions; energetics in biology; structure of proteins, nucleic acids, carbohydrates, and membranes; protein evolution; macromolecular interactions; enzyme kinetics, mechanism and regulation. Will be taught from a strong chemical perspective and mastery of basic concepts of general and organic chemistry will be required. Familiarity with basic concepts of molecular and cellular biology encouraged. Formerly CHEM 4700.

Requisites: Requires prerequisite course of CHEM 3311 or CHEM 3451 (minimum grade C-). Restricted to Biochemistry (BCHM) majors and minors only.
Grading Basis: Letter Grade

BCHM 3491 (4) Organic Chemistry 2 for Biochemistry Majors
Covers chemistry of aqueous solutions; energetics in biology; structure of proteins, nucleic acids, carbohydrates, and membranes; protein evolution; macromolecular interactions; enzyme kinetics, mechanism and regulation. Will be taught from a strong chemical perspective and mastery of basic concepts of general and organic chemistry will be required. Familiarity with basic concepts of molecular and cellular biology encouraged. Formerly CHEM 4700.

Requisites: Requires prerequisite course of CHEM 3311 or CHEM 3451 (minimum grade C-). Restricted to Biochemistry (BCHM) majors and minors only.
Grading Basis: Letter Grade

BCHM 3491 (4) Organic Chemistry 2 for Biochemistry Majors
Covers chemistry of aqueous solutions; energetics in biology; structure of proteins, nucleic acids, carbohydrates, and membranes; protein evolution; macromolecular interactions; enzyme kinetics, mechanism and regulation. Will be taught from a strong chemical perspective and mastery of basic concepts of general and organic chemistry will be required. Familiarity with basic concepts of molecular and cellular biology encouraged. Formerly CHEM 4700.

Requisites: Requires prerequisite course of CHEM 3311 or CHEM 3451 (minimum grade C-). Restricted to Biochemistry (BCHM) majors and minors only.
Grading Basis: Letter Grade

BCHM 4312 (3-4) Quantitative Optical Imaging
Explores the fundamentals of optical imaging in biology, especially molecular and cellular biology. Covered topics include an introduction to optics and microscopes, fluorescence microscopy and image analysis, and biological applications. MATLAB will be taught at the beginning of the course and used throughout for image processing. Prior experience with MATLAB (or Python) is highly recommended but not required.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 4312, MCD 5312 and BCHM 5312
Grading Basis: Letter Grade
**BCHM 4400 (4) Core Concepts in Physical Chemistry for Biochemists**
Introduces thermodynamics, kinetics and spectroscopy, emphasizing macromolecule and biochemical applications. Includes thermodynamics, chemical and physical equilibriums, solution chemistry, rates of chemical and biochemical reactions, chemical bonds and principles and selected examples of spectroscopies applied to biological systems. Department enforced prerequisite or corequisite: PHYS 1120 or PHYS 2020. Formerly CHEM 4411.

**Equivalent - Duplicate Degree Credit Not Granted:** BCHM 5400 and CHEM 4511

**Requisites:** Requires prerequisite courses BCHM 2700 or BCHM 4611 or BCHM 4700 or and PHYS 1110 or PHYS 2010 and MATH 2300 or APPM 1360 (all minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**BCHM 4491 (3) Modern Biophysical Methods**
Covers the basic theory of biophysical methods widely employed in biochemistry and biology, including: electrophoresis, mass spec, calorimetry, evanescent waves, plasmon resonance, X-ray diffraction, absorbance and fluorescence spectroscopy, magnetic resonance, electron and optical microscopy and single molecule methods. Discusses ways to maximize rigor and reproducibility in biophysical studies. Department enforced prerequisites: undergraduate chemistry (general, organic physical); physics; calculus.

**Equivalent - Duplicate Degree Credit Not Granted:** BCHM 5491

**Requisites:** Requires prerequisite courses of PHYS 1110 or PHYS 2010 and MATH 2300 or APPM 1360 and BCHM 2700 or BCHM 4700 or BCHM 4611 (all minimum grade C).

**Recommended:** Prerequisite or corequisite BCHM 4400 or CHEM 4531.

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**BCHM 4611 (3) Principles of Biochemistry**
One-semester overview of the main themes of modern biochemistry: biomolecular structure/function, metabolism, biosynthesis, DNA from genome to proteome and cellular signaling. For biology and engineering majors and others wanting an overview of biochemistry. Formerly CHEM 4611.

**Equivalent - Duplicate Degree Credit Not Granted:** BCHM 5611

**Requisites:** Requires prerequisite course of CHEM 3311 or CHEM 3451 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**BCHM 4621 (3) Genome Databases: Mining and Management**
Develops essential skills for performing genomic analyses, with focus on developing practical research tools. Introduces human genome and microbiome projects, Python/Sql scripting, accessing and understanding genomic data, sequence alignment and search, evolutionary models, expression data, biological networks, and macromolecular structure.

**Equivalent - Duplicate Degree Credit Not Granted:** MCDB 4621, MCDB 5621 and BCHM 5621

**Requisites:** Requires prerequisite course of BCHM 2700 or BCHM 4700 or CSCI 3104 or MCDB 3500 (minimum grade C-).

**Recommended:** Prerequisite MCD 3135 or CSCI 3104 or BCHM 2700 and recommended corequisite of CSCI 2270.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**BCHM 4631 (3) Statistical and Computational Analysis of the Human Genome**
This lab course covers fundamental statistical and computational approaches to large scale data. Students will learn the unix command line to: access public human genome data, learn what statistics apply to which types of data and apply them to study specific regions of the human genome involved in development and disease. This lab course will cover fundamental aspects of Virtual computing, Container analysis pipelines (e.g. NextFlow, GitHub) in an intuitive and practical learning framework.

**Equivalent - Duplicate Degree Credit Not Granted:** BCHM 5631

**Requisites:** Requires prerequisite course of BCHM 4740 or MCDB 3135 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**BCHM 4720 (4) Metabolic Pathways and Human Disease**
Covers energy metabolism and anabolic/catabolic pathways; metabolism of carbohydrates, lipids, amino acids, and nucleic acids; photosynthesis; special topics on human diseases with pathologies and metabolic pathways. Formerly CHEM 4720.

**Equivalent - Duplicate Degree Credit Not Granted:** BCHM 5720

**Requisites:** Requires prerequisite courses of BCHM 2700 and CHEM 3331 or CHEM 3471 (all minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**BCHM 4740 (4) Biochemistry of Gene Transmission, Expression and Regulation**
Covers biosynthesis and function of macromolecules including DNA, RNA and proteins; molecular basis of replication, transcription and translation; biochemistry of subcellular systems; signaling and regulation of gene expression in eukaryotes; and special topics. Formerly CHEM 4740.

**Equivalent - Duplicate Degree Credit Not Granted:** BCHM 5740

**Requisites:** Requires a prerequisite course of BCHM 2700 or CHEM 4700 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**BCHM 4751 (3) Current Topics in Biochemical Research**
Lec. Covers current topics in modern biochemical research through lectures, reading recent research articles, critical thinking and class discussion. Topics include protein and nucleic acid structure and function, biomolecular interactions, enzyme function and cellular signaling and regulation. Formerly CHEM 4751.

**Equivalent - Duplicate Degree Credit Not Granted:** BCHM 5751

**Requisites:** Requires prerequisite courses of MCDB 3135 or BCHM 4700 or BCHM 2700 and BCHM 4740 (all minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**BCHM 4761 (3) Biochemistry Laboratory**
Two 4-hour periods per week. Introduction to modern biochemical techniques. Topics include enzymology, spectrophotometry, electrophoresis, multi-step protein purification, recombinant DNA techniques and molecular cloning. Formerly CHEM 4761.

**Requisites:** Requires prerequisite courses of BCHM 2700 or CHEM 4700 and CHEM 3341 or 3381 (all minimum grade C-). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sci Lab

**BCHM 4901 (1-6) Independent Study in Biochemistry**
For undergraduate study. Department consent required.

**Repeatable:** Repeatable for up to 8.00 total credit hours.
Biochemistry - Bachelor of Arts (BA)

The biochemistry major provides interdisciplinary training, education and experience in the chemical and biological sciences. Biochemistry focuses on understanding the chemical processes of living organisms, the reaction pathways that sustain life, the principles of how structure defines function, and the physical basis of biomolecular interactions. Students who major in biochemistry are prepared for diverse careers in medicine, scientific research, biotechnology, pharmacy, biomedical consulting, teaching and education, among other professions.

The undergraduate degree in biochemistry emphasizes knowledge and understanding of:

- Foundational principles of biology and chemistry.
- The building blocks of life (DNA, RNA and proteins), how they evolved, how they interact and how organisms make and degrade these building blocks.
- How living organisms maintain homeostasis and regulate metabolism.
- The molecular mechanisms of how living systems respond to changes, such as environmental perturbations, disease and chemical therapeutics.
- How chemical reactions impact human health.

The undergraduate degree in biochemistry also emphasizes and cultivates development of the following skills:

- Quantitative problem solving.
- Critical thinking and analytical reasoning.
- Communication of scientific concepts and ideas.

Because biochemistry connects to scientific disciplines ranging from genetics, human physiology, microbiology, neuroscience, cell biology, chemistry and geology, biochemistry majors are given the freedom to explore advanced electives in many of these subjects. Additional information about the biochemistry BA can be found on the Biochemistry Department website (https://www.colorado.edu/biochemistry/).

Biochemistry major students are prepared for many different careers after graduation. Career Services (http://www.colorado.edu/careerservices/) offers a number of programs and services designed to help students plan their career, including workshops, internships, and placement services after graduation. For an appointment with a career counselor or for more information, call 303-492-6541 or stop by Center for Community, N352.

Undergraduate Research

Undergraduates are encouraged to participate in research to prepare themselves for graduate school, professional school, or industry. There are multiple opportunities for undergraduates to be involved in research within the Department of Biochemistry. For more information, visit our Departmental Undergraduate research page (https://www.colorado.edu/biochemistry/current-students/undergraduate/undergraduate-research/).

Study Abroad

The experience of studying abroad can prove invaluable. For information about study abroad programs, visit the Education Abroad (https://abroad.colorado.edu/) website.

Teaching Certification

Biochemistry majors can also earn certification as teachers through the School of Education. The program for a secondary school science-teaching certificate is challenging requiring a broad, strong background in science, as well as coursework in education and practice teaching. It usually requires at least five years of study. Students interested in teacher certification are encouraged to contact the School of Education (http://www.colorado.edu/education/).

Requirements

Program Requirements

The biochemistry major provides interdisciplinary training in the biological and chemical sciences, including courses in general chemistry, organic chemistry, physical chemistry and biochemistry, as well as in biology, calculus and physics.

In addition to these, students must fulfill the graduation requirements of the College of Arts and Sciences. No more than 45 credits of BCHM courses can be applied to the 120-credit minimum to graduate.

Transfer students who plan to complete a BA degree in biochemistry must complete at the Boulder campus a minimum of 12 credits of upper-division courses in biochemistry covering at least two of the sub-disciplines in their major: organic, physical and biochemistry.

Students may want to consult each semester's Registration Handbook and Schedule of Courses (http://www.colorado.edu/registrar/), as well as the Professor Performance Guide (http://www.colorado.edu/pba/fcq/) for further information about course offerings and faculty.

---

All students, and especially those intending to go onto graduate school in biochemistry, will benefit from additional advanced courses. Recommended electives include graduate courses in various fields of chemistry, or advanced courses in biology or mathematics.

**Graduating in Four Years**

Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of "adequate progress" as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain progress in biochemistry, students should declare the biochemistry major in the first semester.

Students must consult with a major advisor to determine adequate progress toward completion of the major.

Biochemistry - Minor

A minor is offered in biochemistry. Declaration of a biochemistry minor is open to any student enrolled at CU Boulder, regardless of college or school.

Requirements

The College of Arts and Sciences will allow a maximum of 9 hours of transfer credit, including 6 upper-division credit hours to count toward a minor. Students may transfer courses through organic chemistry only. All courses required for the minor must be completed with a grade of C- or better, and the overall GPA in all BCHM and CHEM courses taken must be a 2.00.

Students who have taken CHEN 1211 and CHEM 1221 may substitute them for CHEM 1113. Engineering students who have taken CHEN 4521 may NOT use this to satisfy the physical chemistry requirement.

Total Credit Hours 21-34
British and Irish Studies

The Center for British and Irish Studies encourages students to develop programs that include a focus on British and Irish culture, history and contemporary life from a variety of disciplinary perspectives. The center offers a certificate in British and Irish studies for students who have taken 24 credits in British and Irish literature, history and/or other fields.

For more information, contact the Center for British and Irish Studies at paul.hammer@colorado.edu. For more information, visit the Center for British and Irish Studies [website](https://www.colorado.edu/artssciences/british/).

Certificate

- British and Irish Studies - Certificate (p. 180)

**British and Irish Studies - Certificate**

Undergraduates interested in the literature, history and culture of Britain and Ireland are encouraged to develop an interdisciplinary concentration in British and Irish studies. Completed in addition to a regular departmental major, this work will lead to a certificate in British and Irish studies. The certificate demonstrates that the student has done serious work in several aspects of British and Irish studies and will be advantageous when applying to graduate school or for jobs. It is open to students in any school or college.

**Requirements**

A total of 24 credits in British and Irish studies (normally eight courses of 3 credits each) with a grade of C- or better in all classes.

The courses should be distributed as follows:

- In the department of primary focus (either English or history, depending on the student's own interests), any four courses in British or Irish studies. CBIS will provide a list of possible courses (see below).
- In the secondary department (either history, English or political science, depending upon primary area), a minimum of two courses and a maximum of four courses. CBIS will provide a list of possible courses (see below). Topics courses may be substituted with approval of the director.
- Students may take one or two courses in departments other than English, history or political science, chosen from the list below, in place of courses in the secondary department. Students are encouraged to do some work of an explicitly interdisciplinary nature such as team-taught courses offered by two departments or an independent study or honors thesis spanning two disciplines.
- Studying in Britain or Ireland would be a fine addition to the certificate. Contact the Office of International Education, Center for Community S355, 303-492-6016, for information on CU's Study Abroad programs.

**Approved Courses**

Central and East European Studies

The Central and East European Studies certificate offers students the opportunity for the integrated, interdisciplinary study of the history, politics, language, literature, and culture of Russia, Central and Eastern Europe.

The program serves to foster new knowledge and understanding of Central and Eastern Europe, and to train a new generation by providing the knowledge, tools, and experience necessary for understanding these societies and for playing productive roles in their reconstruction.

The program offers students a broad understanding of the cultures and societies of Central and Eastern Europe for which it draws upon the expertise of faculty from a variety of campus departments.

Course code for this program is CEES.

Certificate

- Central and East European Studies - Certificate (p. 181)

CEES 1623 (3) Introduction to Central and East European History since 1770

Examines major themes and events in the history of East-Central Europe from the late 1700s to the present. Themes include the impacts of nationalism, fascism, liberal democracy and communism in shaping the history of the region. Topics include World War I, World War II and the Holocaust, the Cold War, the fall of Communism, the Ukrainian revolution and more.

Equivalent - Duplicate Degree Credit Not Granted: HIST 1623

Additional Information: Arts Sci Core Curr: Historical Context

Departmental Category: Arts Sciences Special Courses

Central and East European Studies - Certificate

Students who seek in-depth, interdisciplinary knowledge of the region are encouraged to pursue the certificate in central and east European studies (CEES). The certificate program offers students the opportunity to explore the culture, history and politics of the nations of central and eastern Europe from a variety of disciplinary perspectives.

The purpose of the certificate program is to enhance, rather than to replace, the department major. Students work with CEES faculty advisors to plan an appropriate certificate program. The certificate is awarded in addition to a bachelor's degree in another field.

Requirements

Completion of the certificate requires the completion of 18 credits (9 upper-division) of approved courses with grades of C- or higher. No more than 9 credits in courses with the same course prefix can be used to fulfill CEES certificate requirements, and only 6 semester credit hours transferred from other institutions can be used to fulfill certificate requirements.1

Students pursuing the CEES certificate are strongly encouraged to take advantage of a recognized study abroad program in eastern Europe affiliated with CU Boulder. Courses taken on such a program, as approved by the certificate director, count toward the certificate in CEES even though it is not possible to list them below.

Chemistry

The undergraduate degree in chemistry emphasizes knowledge and awareness of:

- The basic principles of chemistry—atomic and molecular theory, reactivities and properties of chemical substances and the states of matter.
- The basic subfields of chemistry—organic, physical, analytical and inorganic.
- Mathematics sufficient to facilitate the understanding and derivation of fundamental relationships and to analyze and manipulate experimental data.
- The basic principles of physics.
- Safe chemical practices, including waste handling and safety equipment.

In addition, students completing a degree in chemistry are expected to acquire the ability and skills to:

- Read, evaluate and interpret information on a numerical, chemical and general scientific level.
- Assemble experimental chemical apparatus, design experiments and use appropriate apparatus to measure chemical composition and properties.
- Communicate results of scientific inquiries verbally and in writing.

Course code for this program is CHEM.

Bachelor's Degree

- Chemistry - Bachelor of Arts (BA) (p. 189)
Minor

- Chemistry - Minor (p. 192)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member’s home department.

Courses

CHEM 1011 (3) Environmental Chemistry 1
Introduces basic principles of chemistry with applications to current environmental issues including toxic chemicals, air and water pollution, energy sources and their environmental impact, and climate change resulting from the greenhouse effect. No credit given to chemistry or biochemistry majors for this course if students already have credit in any college-level chemistry course numbered 1113/1114 or higher.

Additional Information: GT Pathways: GT-SC1 - Natural Science
Arts Sci Core Curr: Natural Science Sequence
Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences
MAPS Course: Chemistry
MAPS Course: Natural Science
MAPS Course: Physics

CHEM 1021 (4) Introductory Chemistry
For students with no high school chemistry or a very weak chemistry background. Remedies a deficiency in natural science MAPS requirements and prepares students for CHEM 1113 and CHEM 1114 or CHEM 1400 and CHEM 1401. No credit given to chemistry or biochemistry majors for this course if students already have credit in any college-level chemistry course numbered 1113/1114 or higher. Department enforced prerequisite: one year high school algebra or concurrent enrollment in MATH 1011.

Additional Information: GT Pathways: GT-SC1 - Natural Physical Science
Arts Sci Core Curr: Natural Science Sequence
Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Science Lab
Arts Sci Gen Ed: Distribution-Natural Sciences
MAPS Course: Natural Science Lab or Lab/Lec

CHEM 1031 (4) Environmental Chemistry 2
Applications of chemical principles to current environmental issues including acid rain, stratospheric ozone depletion, the Antarctic ozone hole, solar energy conversion and fuel cells, and the environmental consequences of nuclear war. Laboratory experience is included. No credit given to chemistry or biochemistry majors for this course if students already have credit in any college-level chemistry course numbered 1113/1114 or higher.

Requisites: Requires prerequisite course of CHEM 1011 (minimum grade C).

CHEM 1113 (4) General Chemistry 1
Intended for first-semester students whose academic plans require advanced work in chemistry. Subjects: components of matter, stoichiometry, classes of reactions, gases, thermochemistry, atomic structure, electron configuration, chemical bonding, molecular shapes, covalent bonding, organic compounds, intermolecular forces, equilibrium. Department enforced prerequisites: one year high school chemistry or CHEM 1021 (min grade C); high school math through pre-calculus. Not recommended for students with grades below B- in CHEM 1021. Department enforced corequisite: CHEM 1114. Not open to engineering students with exception of EPEN majors.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 1400 or CHEM 1211

Requisites: AMEN, AREN, ASEN, CHEN, CSEN, CVEN, ECEN, EEEN, EVEN, MCEN, OPEN or CBEN majors are not allowed to take this class.

Additional Information: GT Pathways: GT-SC1 - Natural Physical Science
Arts Sci Core Curr: Natural Science Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences

CHEM 1114 (1) Laboratory in General Chemistry 1
Lab. Intended for first-semester students whose academic plans require advanced work in chemistry. Instruction in experimental techniques which coordinate with lecture topics in CHEM 1113. Department enforced prerequisites: one year high school chemistry or CHEM 1021 (min grade C); high school math through pre-calculus. Not recommended for students with grades below B- in CHEM 1021. Department enforced corequisites: CHEM 1113. Not open to engineering students with exception of EPEN majors.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 1401 or CHEM 1221

Requisites: AMEN, AREN, ASEN, CHEN, CSEN, CVEN, ECEN, EEEN, EVEN, MCEN, OPEN or CBEN majors are not allowed to take this class.

Additional Information: GT Pathways: GT-SC1 - Natural Physical Science
Arts Sci Core Curr: Natural Science Lab
Arts Sci Gen Ed: Distribution-Natural Science Lab
Arts Sci Gen Ed: Distribution-Natural Sciences
CHEM 1133 (4) General Chemistry 2
Intended for second-semester students whose academic plans require advanced work in chemistry. Subjects: acid-base equilibria, buffers and titrations, thermodynamics, redox reactions, electrochemistry, transition elements and their coordination compounds, solubility/solubility equilibria, crystal field theory, kinetics, nuclear chemistry. Department enforced corequisite: CHEM 1134.
Equivalent - Duplicate Degree Credit Not Granted: CHEM 2100
Requisites: Requires prerequisite courses of CHEM 1113 and CHEM 1114 or CHEM 1400 and CHEM 1401 or CHEM 1211 and CHEM 1221 (all minimum grade C-).
Additional Information: GT Pathways: GT-SC1 - Natural Physical Sci: Lec Crse w/o Req Lab
Arts Sci Core Curr: Natural Science Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences

CHEM 1134 (1) Laboratory in General Chemistry 2
Intended for second-semester students whose academic plans require advanced work in chemistry. Instruction in experimental techniques which coordinate with lecture topics in CHEM 1133. Department enforced corequisite: CHEM 1133.
Equivalent - Duplicate Degree Credit Not Granted: CHEM 2101
Requisites: Requires prerequisite courses of CHEM 1113 and CHEM 1114 or CHEM 1400 and CHEM 1401 or CHEM 1211 and CHEM 1221 (all minimum grade C-).
Additional Information: GT Pathways: GT-SC2 - Natural Physical Sci: Lec Crse w/o Req Lab
Arts Sci Core Curr: Natural Science Lab
Arts Sci Gen Ed: Distribution-Natural Science Lab
Arts Sci Gen Ed: Distribution-Natural Sciences

CHEM 1400 (4) Foundations of Chemistry
Covers core concepts in chemistry: nature of matter (atomic and molecular structure, bonding and macroscopic properties), transformations of matter (chemical reactivity), and quantifying chemical transformations (thermochemistry, thermodynamics and kinetics). Emphasizes critical thinking and cultivate core problem solving skills utilized by scientists. Intended for first semester CHEM/BCHM majors. Department enforced prerequisites: one year high school chemistry or CHEM 1021 (minimum grade C) and high school math through pre-calculus. Not recommended for students with grades below B- in CHEM 1021. Department enforced corequisite: CHEM 1401.
Equivalent - Duplicate Degree Credit Not Granted: CHEM 1113
Requisites: Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.
Grading Basis: Letter Grade
Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences

CHEM 1401 (1) Foundations of Chemistry Lab
Coordinates with lecture topics in CHEM 1400. Intended for first-semester CHEM and BCHM majors. Emphasizes the development of hands-on practical laboratory skills, experimental design, data interpretation, problem solving and open inquiry. Department enforced prerequisites: one year high school chemistry or CHEM 1021 (minimum grade C) and high school math through pre-calculus. Not recommended for students with grades below B- in CHEM 1021. Department enforced corequisite: CHEM 1400.
Equivalent - Duplicate Degree Credit Not Granted: CHEM 1114 or CHEM 1221
Requisites: Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.
Grading Basis: Letter Grade
Additional Information: Arts Sci Core Curr: Natural Science Lab
Arts Sci Gen Ed: Distribution-Natural Science Lab
Arts Sci Gen Ed: Distribution-Natural Sciences

CHEM 2100 (4) Foundations of Chemistry 2
Covers the energetic principles that determine when chemical reactions occur and the dynamic principles that determine how rapidly they will occur. Applications include ionic equilibria in solution (acids and bases, buffers and titrations), oxidation-reduction reactions, electrochemistry and chemical kinetics. These applications will be situated in a context of current research problems in areas such as renewable energy and atmospheric chemistry. Department enforced corequisite: CHEM 2101.
Equivalent - Duplicate Degree Credit Not Granted: CHEM 1133
Requisites: Requires prerequisite courses of CHEM 1400 and CHEM 1401 (minimum grade C-) or CHEM 1113 and CHEM 1114 (minimum grade B) and prerequisite or corequisite of MATH 2300 or APPM 1360 (minimum grade C-).
Additional Information: Arts Sci Core Curr: Natural Science Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences

CHEM 2101 (1) Laboratory in Foundations of Chemistry 2
Coordinates with the lectures topics in CHEM 2100. Emphasizes the acquisition of more advanced laboratory skills, experimental design, data interpretation and analysis. Department enforced corequisite: CHEM 2100.
Equivalent - Duplicate Degree Credit Not Granted: CHEM 1134
Requisites: Requires prerequisite courses of CHEM 1400 and CHEM 1401 (minimum grade C-) or CHEM 1113 and CHEM 1114 (minimum grade B) and prerequisite or corequisite of MATH 2300 or APPM 1360 (minimum grade C-).
Grading Basis: Letter Grade
Additional Information: Arts Sci Core Curr: Natural Science Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences
Arts Sci Gen Ed: Distribution-Natural Sciences

CHEM 3151 (3) Air Chemistry and Pollution
Examines the composition of the atmosphere, and sources of gaseous and particulate pollutants: their chemistry, transport and removal from the atmosphere. Applies general principles to acid rain, smog and stratospheric ozone depletion. Department enforced prerequisite: two semesters of chemistry.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 3500
Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences
CHEM 3251 (3) Sustainable Energy from a Chemistry Perspective
Explores qualitative and quantitative chemical aspects of energy systems (production, transmission, storage, utilization) including fossil, wind, solar, nuclear and biomass energy. Applies chemical principles including composition, structure, bonding, physical properties, thermodynamics, equilibrium and kinetics to energy systems and sustainability, especially environmental implications. Describes the importance of energy to the chemical industries and society as a whole.

Requisites: Requires prerequisite course of CHEM 1133 and CHEM 1134 or CHEM 2100 and 2101 or CHEN 1211 and CHEM 1221 (all minimum grade C).

CHEM 3311 (4) Organic Chemistry 1
Intended primarily for nonmajors. Topics include structure and reactions of alkanes, alkenes, alkynes, alkyl halides, and aromatic molecules; nomenclature of organic compounds; stereochemistry; reaction mechanisms and dynamics. Department enforced corequisite: CHEM 3321 or CHEM 3361.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 3451
Requisites: Requires prerequisite course of CHEM 1133 and CHEM 1134 or CHEM 2100 and CHEM 1211 and CHEM 1221 (all minimum grade C).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

CHEM 3321 (1) Laboratory in Organic Chemistry 1
Instruction in experimental techniques of modern organic chemistry emphasizing chemical separations and reactions of alkanes, alkenes, and aromatic compounds. Stereochemical modeling and the identification of organic unknowns by spectroscopic and chemical methods are also introduced. Department enforced corequisite: CHEM 3311 or CHEM 3451.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 3361
Requisites: Requires prerequisite courses of CHEM 1133 and CHEM 1134 or CHEM 2100 and CHEM 1211 and CHEM 1221 (all minimum grade C).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sci Lab
Arts Sci Gen Ed: Distribution-Natural Sciences

CHEM 3331 (4) Organic Chemistry 2
Lect. and rec. Intended primarily for nonmajors. Topics include structure and reactions of alkyl halides, alcohols, ethers, carboxylic acids, aldehydes, ketones, and amines; introduction to the chemistry of heterocycles, carbohydrates, and amino acids; nomenclature of organic compounds; synthesis; and reaction mechanisms. Department enforced corequisite: CHEM 3341 or CHEM 3381.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 3471 or BCHM 3491
Requisites: Requires prerequisite courses of (CHEM 3311 or CHEM 3451) and (CHEM 3321 or CHEM 3361) all minimum grade C.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

CHEM 3341 (1) Laboratory in Organic Chemistry 2
Lab. For biochemistry and nonchemistry majors. Instruction in experimental techniques of modern organic chemistry emphasizing reactions involving alcohols, ketones, carboxylic acids, and their derivatives. Multistep syntheses are also introduced. Department enforced corequisite: CHEM 3331 or CHEM 3471 or CHEM 3491.

Requisites: Requires prerequisite courses of CHEM 3311 or CHEM 3451 and CHEM 3321 or CHEM 3361 (all minimum grade C).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

Arts Sci Gen Ed: Distribution-Natural Sci Lab

CHEM 3361 (2) Laboratory in Organic Chemistry 1 for Chemistry Majors
Required course for chemistry majors. Instruction in experimental techniques of modern organic chemistry emphasizing chemical separations and reactions of alkanes, alkenes, alcohols, ketones, and alkyl halides. Explores stereochemical modeling and the chemical identification of organic unknowns. Department enforced corequisite: CHEM 3311 or CHEM 3451.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 3321
Requisites: Requires prerequisite courses of CHEM 1133 and CHEM 1134 or CHEM 1400 and CHEM 1401 or CHEM 2100 and CHEM 2101 or CHEM 1211 and CHEM 1221 (all minimum grade C). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sci Lab
Arts Sci Gen Ed: Distribution-Natural Sciences

CHEM 3381 (2) Laboratory in Organic Chemistry 2 for Chemistry Majors
Lab. Required course for chemistry majors. Instruction in experimental techniques of modern chemistry, emphasizing reactions involving alcohols, ketones, carboxylic acids, aromatic compounds, and their derivatives. Multistep syntheses are also introduced. Department enforced corequisite: CHEM 3331 or CHEM 3471 or CHEM 3491.

Requisites: Requires prerequisite courses of CHEM 3311 or CHEM 3451 and CHEM 3321 or CHEM 3361 (all minimum grade C). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Arts Sci Gen Ed: Distribution-Natural Sci Lab

CHEM 3451 (4) Organic Chemistry 1 for Chemistry and Biochemistry Majors
Covers bonding, acidity, reaction mechanisms, nomenclature of organic compounds; stereochemistry; structure and reactions of aldehydes, ketones, and carboxylic acids and derivatives. Department enforced corequisite: CHEM 3361 or CHEM 3321.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 3311
Requisites: Requires prerequisite courses of CHEM 1133 and CHEM 1134 or CHEM 1400 and CHEM 1401 or CHEM 2100 and CHEM 2101 or CHEM 1211 and CHEM 1221 (all minimum grade C). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

CHEM 3471 (4) Organic Chemistry 2 for Chemistry Majors
Covers Amines, alkylation reactions, additions to unsaturated C-C bonds, aromacity, and aromatic reactivity, organic materials, biomolecules, nomenclature of organic compounds, reaction mechanisms. Department enforced corequisite: CHEM 3381 or CHEM 3431.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 3331 or BCHM 3491
Requisites: Requires prerequisite courses of CHEM 3451 and CHEM 3361 or CHEM 3321 (all minimum grade C). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

Arts Sci Gen Ed: Distribution-Natural Sciences
CHEM 4001 (3) Modern Inorganic Chemistry
Required course for chemistry majors. Introduces modern inorganic chemistry for undergraduates. Includes atomic structure, chemical periodicity, structure and bonding in molecules and crystals, reaction mechanisms, chemistry of selected main group and transition elements, and emphasis on catalyst, materials, bioinorganic, and organometallic systems.
Equivalent - Duplicate Degree Credit Not Granted: CHEM 5011
Requisites: Requires prerequisite course of CHEM 3331 or CHEM 3471 or CHEM 3491 (minimum grade C-). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

CHEM 4011 (3) Inorganic Laboratory
One lect. and two 3-hour labs per week. Instruction in experimental techniques of modern inorganic chemistry. Includes syntheses and spectroscopic characterizations of transition metal and main group compounds, experience in manipulation of air sensitive compounds, and techniques involving unusual conditions of pressure or temperature.
Requisites: Requires prerequisite course of CHEM 4011 (minimum grade C-). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.

CHEM 4141 (3) Environmental Water and Soil Chemistry
Application of basic chemical principles to understanding the processes that determine the chemical composition of oceans, lakes, rivers, soils and sediments. Topics include air-water exchange; acid-base, redox, coordination, precipitation and dissolution, ion exchange and sorption reactions; nutrient chemistry; and the use of simple equilibrium and kinetic models for describing the chemistry of inorganic and organic species in air-water-soil systems.
Equivalent - Duplicate Degree Credit Not Granted: CHEM 5141
Requisites: Requires prerequisite course of CHEM 2100 and CHEM 2101 or CHEM 1133 and CHEM 1134 (minimum grade C-). Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

CHEM 4171 (3) Instrumental Analysis - Lecture and Laboratory 1
Two Lect. and 3 hours of lab per week. Instruction and experience in using instrumental methods of chemical analysis to address problems in chemistry, biochemistry, industrial chemistry and environmental chemistry.
Requisites: Requires prerequisite course of CHEM 3331 or CHEM 3471 or CHEM 3491 and CHEM 3381 or PHYS 1140 or CHEM 4400 or CHEM 4511 (minimum grade C-). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.
Grading Basis: Letter Grade

CHEM 4181 (3) Instrumental Analysis - Lecture and Laboratory 2
Two lect. and 3 hours of lab per week. Instruction and experience in using instrumental methods of chemical analysis. Builds on material learned in CHEM 4171.
Requisites: Requires prerequisite course of CHEM 4171 (minimum grade C-). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.
Grading Basis: Letter Grade

CHEM 4251 (3) Materials Chemistry and Properties
Lec. Understanding of materials from chemistry perspective including metals, oxides, semiconductors and polymers. Basic description of chemical preparation of materials. Overview of fundamental properties of materials including structural, chemical, mechanical, thermal, electrical, and optical properties. Description of behavior of materials and various applications in modern technology. Discussion of materials characterization methods.
Equivalent - Duplicate Degree Credit Not Granted: CHEM 5251
Requisites: Requires prerequisite course of CHEM 3331 or CHEM 3471 or CHEM 3491 and CHEM 4521 or CHEM 4531 (all minimum grade grade C-).

CHEM 4261 (3) Organic Materials: Structures and Functions
Overview of the preparation and functioning mechanism of novel organic materials that have recently been developed, including conductive polymers, 2-D macrocyclic structures, 3-D molecular cages, molecular machines/muscles switches, fullerene derivatives and carbon nanotube composites. Emphasizes the use of organic and physical chemistry as tools to develop novel materials and probe their structure-property relationship.
Equivalent - Duplicate Degree Credit Not Granted: CHEM 5261
Requisites: Requires prerequisite courses of CHEM 3331 or CHEM 3471 or CHEM 4511 and CHEM 4531 (all minimum grade grade C-).

CHEM 4271 (3) Chemistry of Solar Energy
Chemical principles of conversion of solar energy into electricity and fuels in molecular and semiconductor-based systems. Overview of solid-state electronic structure of materials and interfaces, light-matter interactions, principles of harvesting photoexcited currents and useful chemical species. Description of processes utilized in established and emerging solar energy technologies.
Equivalent - Duplicate Degree Credit Not Granted: CHEM 5271
Requisites: Requires prerequisite courses of CHEM 3331 or CHEM 3471 or CHEM 4511 and CHEM 4531 (all minimum grade grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

CHEM 4511 (3) Physical Chemistry 1
Chemical thermodynamics and kinetics. Includes study of laws of thermodynamics, thermochemistry, entropy, free energy, chemical potential, chemical equilibriums, and the rates and mechanisms of chemical reactions. Department enforced prereq or coreq, PHYS 1120 (minimum grade C-).
Equivalent - Duplicate Degree Credit Not Granted: BCHM 4400 and BCHM 5400
Requisites: Requires prereq courses of CHEM 1133 CHEM 1134 or CHEM 2100 CHEM 2101 or CHEM 1211 CHEM 1221 and MATH 2400 or APPM 2350 and PHYS 1110 or PHYS 1115 or PHYS 2020 (all minimum grade C-). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

CHEM 4531 (3) Physical Chemistry 2
Lect. Introduces the quantum theory of atoms, molecules and chemical bonding, and statistical thermodynamics. Includes principles of quantum mechanics and their application to atomic structure, molecular spectroscopy, symmetry properties, and the determination of molecular structure. Also includes principles of statistical mechanics and their applications to properties of gases, liquids, and solids.
Requisites: Requires prerequisite courses of CHEM 4511 and PHYS 1120 or PHYS 2020, and MATH 2400 or APPM 2350 (all minimum grade C-). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
CHEM 4555 (4) Theoretical and Computational Chemistry
Explores computational methods to understand chemical systems. Topics include: atomic and molecular electronic structure calculations, Monte Carlo and molecular dynamics simulations and thermodynamic calculations. Not recommended for students with a grade below B- in the prerequisite course.
Equivalent - Duplicate Degree Credit Not Granted: CHEM 5555
Requisites: Requires prerequisite course of CHEM 4531 (minimum grade C-).
Grading Basis: Letter Grade

CHEM 4581 (1) Physical Chemistry Lab 1
One 3-hour lab per week. Instruction in experimental techniques of modern physical chemistry. Experiments illustrate the fundamental principles of thermodynamics and chemical kinetics. Illustrates the material discussed in CHEM 4511.
Requisites: Requires prerequisite or corequisite course of CHEM 4511 (minimum grade C-). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.

CHEM 4591 (2) Physical Chemistry Lab 2
One lect. and one 3-hour laboratory every two weeks. A continuation of CHEM 4581, but may be taken concurrently with CHEM 4531. Experiments illustrate the principles of quantum chemistry and spectroscopy discussed in CHEM 4531.
Requisites: Requires prerequisite courses of CHEM 4511 and CHEM 4581 (all minimum grade C-). Requires prerequisite or corequisite course of CHEM 4531 (minimum grade C-). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.

CHEM 4901 (1-6) Independent Study in Chemistry
For undergraduate study. Department consent required. Repeatable up to 8 total credit hours.
Repeatable: Repeatable for up to 8.00 total credit hours.

Chemistry - Bachelor of Arts (BA)
Chemistry major students are prepared for many different careers after graduation. About 50 percent of chemistry majors enter directly into industry or government positions that require scientific expertise, such as chemical, oil, electronics, mining and manufacturing industries, water districts, crime laboratories, biotechnology, health and safety, atmospheric science and environmental quality.
Approximately 25 percent of chemistry graduates are attracted by specialized graduate education in chemistry or biochemistry. Graduate work is often in one of the traditional areas of analytical, inorganic, organic or physical chemistry and, increasingly, in interdisciplinary areas such as atmospheric, bio-organic or organo-metallic chemistry, molecular biology, biotechnology and chemical physics for their advanced work. Another 25 percent of a typical graduating class goes on to professional school, pursuing advanced degrees in medicine, dentistry, pharmacy, law, business, engineering and computer science.

Career Services (http://www.colorado.edu/careerservices/) offers a number of programs and services designed to help students plan their career, including workshops, internships, and placement services after graduation. For an appointment with a career counselor or for more information call 303 492 6541, or stop by Center for Community, S440.

Announcements
See the undergraduate blog (http://www.colorado.edu/chembio/undergraduate-blog/) and second-floor Ekeley bulletin board for announcements and postings. Some examples of the information posted are:

- Main page: contact information and general announcements.
- Student opportunities: internship/job announcements, summer programs, events/programs offered by other campus offices and departments that may be of interest.
- Scholarship announcements: announcements of scholarships opportunities and information meetings.
- Seminars and conferences: seminar and conference announcements.
- Academic support: SASC workshop schedule, tutors, and other academic support opportunities.
- Career services: schedule of events offered by this office.
- Education abroad: announcements from education abroad about their programs and information meetings.
- Courses: information about new and/or interesting courses for core and elective credit.

Chemistry Honors Program
Opportunity is provided for qualified chemistry and chemistry/biochemistry double majors to participate in the departmental honors program and graduate with honors (cum laude, magna cum laude, or summa cum laude) in chemistry. Students interested in the honors program should contact the departmental honors advisor during their junior year.

American Chemical Society Certified Degree
The American Chemical Society maintains a certification program in which a student graduating with a specified minimum program is certified to the society upon graduation. To be certified, a graduate must satisfy requirements in addition to the minimum for graduation. The department offers this certificate for chemistry or chemistry/biochemistry double majors only. More information can be found in J. Chem. ED., Vol.92, pp. 965-968 (2015). Specific course requirements can be obtained in the Undergraduate Office, EKLC M199.

Research Opportunities
Undergraduate Research Opportunities Program
The Undergraduate Research Opportunities Program (UROP) offers students a chance to work alongside a faculty sponsor on original research. Learn to write proposals, conduct research, pursue creative work, analyze data, and present the results. For more information please visit the Undergraduate Research Opportunities Program (http://www.colorado.edu/suep/about-urop/) website. Visit Other Funding Opportunities (http://www.colorado.edu/suep/urop/other-funding/) for a list of other funding opportunities for undergraduate students.

Independent Study
Independent study (CHEM 4901), provides an opportunity for a student to work on a research project with an individual faculty member outside of the regular class structure. This generally provides an experience much more like real-life chemistry or biochemistry, where new results are being sought and the outcome of the research is not known in advance. The
student may have a totally independent project or may become part of a research team working at the forefront of science. In favorable cases the project may result in publication of the results of the independent study in the scientific literature. As part of the research team in a particular group the student will usually participate in group seminars and informal discussions with other members of the group.

Education Abroad

The experience of studying abroad can prove invaluable. For information about study abroad programs, visit the Education Abroad (http://studyabroad.colorado.edu/) website.

Teaching Certification

Chemistry majors can also earn certification as teachers through the School of Education. The program for a secondary school science-teaching certificate is challenging requiring a broad, strong background in science, as well as coursework in education and practice teaching. It usually requires at least five years of study. Students interested in teacher certification are encouraged to contact the School of Education (http://www.colorado.edu/education/).

Requirements

Program Requirements

The chemistry major requires 30 credits of upper-division chemistry coursework, including courses in general, organic, physical and analytical/instrumental chemistry, as well as an introductory general chemistry sequence and ancillary work in calculus and physics.

Students must complete the general requirements of the College of Arts and Sciences and the required courses listed below. No more than 45 credits of CHEM courses can be applied to the 120-credit minimum to graduate.

Transfer students who plan to take a chemistry major must complete at the Boulder campus a minimum of 12 credits of upper-division work covering at least two subdisciplines: organic, physical, analytical and inorganic for chemistry majors.

Students may want to consult each semester’s Registration Handbook and Schedule of Courses (http://www.colorado.edu/registrar/) as well as the Professor Performance Guide (http://www.colorado.edu/pba/fcq/) for further information about course offerings and faculty.

Organic Chemistry

Organic Chemistry 1 Lecture

Choose one of the following lectures:

- CHEM 3451 Organic Chemistry 1 for Chemistry and Biochemistry Majors
- or CHEM 3311 Organic Chemistry 1

Organic Chemistry 2 Lecture

Choose one of the following lectures:

- CHEM 3471 Organic Chemistry 2 for Chemistry Majors
- or BCHM 3491 Organic Chemistry 2 for Biochemistry Majors
- or CHEM 3331 Organic Chemistry 2

Organic Chemistry Labs

- CHEM 3361 & CHEM 3381 Laboratory in Organic Chemistry 1 for Chemistry Majors and Laboratory in Organic Chemistry 2 for Chemistry Majors

Required Advanced CHEM Coursework

- CHEM 4011 Modern Inorganic Chemistry
- CHEM 4171 Instrumental Analysis - Lecture and Laboratory 1
- CHEM 4181 Instrumental Analysis - Lecture and Laboratory 2
- CHEM 4511 Physical Chemistry 1 & CHEM 4581 and Physical Chemistry Lab 1
- CHEM 4531 Physical Chemistry 2 & CHEM 4591 and Physical Chemistry Lab 2

Graduating in Four Years

Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of "adequate progress" as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain progress in chemistry students should declare the chemistry major in the first semester.

Students must consult with a major advisor to determine adequate progress toward completion of the major.

Recommended Four-Year Plan of Study

Through the required coursework for the major, students will fulfill all 12 credits of the Natural Sciences area of the Gen Ed Distribution Requirement, including the lab component and the QRMS component of the Gen Ed Skills Requirement.

Chemistry - Minor

The department offers a minor in chemistry. Declaration of a chemistry minor is open to any student enrolled at CU Boulder, regardless of college or school.

Requirements

The College of Arts and Sciences will allow a maximum of 9 hours of transfer credit, including 6 upper-division credit hours, to count toward a minor. Students may only transfer courses through organic chemistry. All courses required for the minor must be completed with a grade of C- or better, and the overall GPA in all CHEM courses taken must be a 2.00.

Students who have taken CHEN 1211 and CHEM 1221 may substitute them for General Chemistry 1. Engineering students who have taken CHEN 4521 may not use this to satisfy the physical chemistry requirement. CHEM 4511 requires prerequisites of calculus 3 and general physics 1.

Total Credit Hours: 26-28

Cinema Studies & Moving Image Arts

The Department of Cinema Studies & Moving Image Arts educates students in the history and development of film as an art form, from its inception to its contemporary forms. The curriculum instills an informed analytic awareness of the ways in which cinema has evolved, its artistic and stylistic evolution, and the contexts of international cinemas. For students in the creative BA and BFA tracks, the curriculum also provides the resources for significant cutting edge and original creative exploration of the medium in all its forms.

The undergraduate degrees in cinema studies emphasize knowledge and awareness of:

- The major artistic contributions to the evolution of cinema, from the advent of the moving image to the present.
- The general outlines of world cinema from the silent period to the present, with emphasis on the historical contributions of major national cinemas.
- Film criticism, aesthetics and film theory.

Students completing either the BA or the BFA degree in cinema studies are expected to acquire the ability and skills to:

- Analyze and interpret films critically.
- Communicate critical interpretations competently in essay form.
- Make several short creative film or video works (BA production emphasis and BFA only).

Note: Admission to any class after the third meeting of the class is contingent on professor permission. The department may drop a student from a class if the student misses the first two classes of the semester.

Course code for this program is CINE.

Bachelor’s Degrees

- Cinema Studies - Bachelor of Arts (BA) (p. 202)
- Cinema Studies & Moving Image Arts - Bachelor of Fine Arts (BFA) (p. 200)
Minor

- Cinema Studies - Minor (p. 207)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Acevedo-Munoz, Ernesto R. (https://experts.colorado.edu/display/fisid_113061/)
Professor; PhD, Massachusetts College of Art

Barlow, Melinda B. (https://experts.colorado.edu/display/fisid_109696/)
Associate Professor; PhD, New York University

Espelie, Erin Marie (https://experts.colorado.edu/display/fisid_148671/)
Assistant Professor; MFA, Duke University

Ganguly, Suranjan (https://experts.colorado.edu/display/fisid_102045/)
Professor; PhD, Purdue University

Gatten, David Edward (https://experts.colorado.edu/display/fisid_156495/)
Professor; MFA, School of the Art Institute of Chicago

Lawson, Angelica Marie (https://experts.colorado.edu/display/fisid_154727/)
Assistant Professor; PhD, University of Arizona

Liotta, Jeanne M. (https://experts.colorado.edu/display/fisid_145808/)
Associate Professor; BFA, New York University

Lundy, Tiel Louise (https://experts.colorado.edu/display/fisid_151085/)
Senior Instructor; PhD, University of Denver

Marslett, Geoffrey C. (https://experts.colorado.edu/display/fisid_155970/)
Assistant Professor; MFA, University of Texas at Austin

Negri, Sabrina (https://experts.colorado.edu/display/fisid_159292/)
Assistant Professor; PhD, University of Chicago

Osborn, Christopher (https://experts.colorado.edu/display/fisid_142982/)
 Instructor; MFA, University of Colorado Boulder

Palmer, James
Professor Emeritus; PhD, Claremont Graduate School

Sears, Kelly L. (https://experts.colorado.edu/display/fisid_154467/)
Assistant Professor; MFA, University of California, San Diego

Shell, Hannah Rose (https://experts.colorado.edu/display/fisid_163199/)
Associate Professor; PhD, Harvard University

Solomon, Phillip (https://experts.colorado.edu/display/fisid_100867/)
Professor Emeritus; MFA, Massachusetts College of Art

Yannacito, Donald R. (https://experts.colorado.edu/display/fisid_103944/)
Lecturer, Senior Instructor Attendant Rank; MA, University of Colorado Boulder

Courses

CINE 1002 (3) Film Analysis for Non-Majors
Introduces the critical study of film, exploring theoretical, historical and technical concerns while presenting a survey of important film periods and genres. Students will hone critical-thinking, close-analysis, and writing skills. Covers a wide variety of films, approaching them from numerous perspectives, considering both the effects films have on individual viewers and their ability to reflect culture. Formerly FILM 1002.

Additional Information: Departmental Category: Genre and Movements

CINE 1502 (3) Introduction to Cinema Studies
Introduces basic media literacy by exploring the technical and aesthetic principles behind the production, analysis and interpretation of films. Explores comprehension and thinking about movies critically as technological, cultural and artistic products. Study of films in different social and historical contexts and discussion of the importance of movies as cultural products. Formerly FILM 1502.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Genre and Movements

CINE 2000 (3) Moving Image Foundations I
Introduces students to basic image making technology, aesthetics and methods. Fundamentals of film/video production in Super 8mm film, Digital ProRes 422 and other analog and digital image making, editing and management formats. May emphasize personal, experimental or narrative approaches with individual exercises, according to instructor. Basic competencies include composition, lighting, basic audio, basic editing, studio critique, file management, web upload, etc. Formerly FILM 2000.

Requisites: Requires prerequisite course of CINE 1502 (minimum grade D-).

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Production

CINE 2001 (3) Space Odysseys: Astrophys/Astronomy via Cinema/Arts
Understanding representation of space in cinematic arts, as well as the underlying science. What are the political, societal, scientific and commercial motives in attempting to show our species venturing beyond Earth? These adventures highlight our hopes and fears for the future, while simultaneously clarifying contemporary anxieties. From the director G. Melies to the screenwriter B. Marling. Formerly FILM 1003.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Production

CINE 2002 (3) Recent International Cinema
Familiarizes students with current trends and major directors in international cinema. Students attend specific films screened in class and/or offered in the International Film Series, and read and write about these films. Formerly FILM 2002.

Recommended: Prerequisite CINE 1502 or 6 hours humanities courses involving critical writing.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Genre and Movements

CINE 2003 (3) Film Topics
Varying topics on important individuals, historical developments, groupings of films, film directors, critical and theoretical issues in film. Formerly FILM 2003.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Topics
CINE 2004 (3) CU Cinema Studies Seminar: The Telluride Film Festival
Offers students a unique first-hand understanding of the significance of the film festival circuit in the context of global film culture and scholarship. Students will attend Telluride Film Festival screenings, discussions, and Q&A sessions. After the festival, weekly screenings of select films from the previous year’s festival offer insight into the festival’s influence on box-office and the industry’s award season. Formerly FILM 2004.

Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Intensive and Small Courses

CINE 2005 (3) Form, Structure, and Narrative Analysis
Analyzes the form and structure of narrative, experimental non-narrative, and documentary films. Familiarizes students with the general characteristics of the classic three-act structure, principles of adaptation, form and content of experimental films, structural approaches, and the basic formal, narrative, and rhetorical strategies of documentary filmmaking. Formerly FILM 2005.

Requisites: Requires prerequisite or corequisite course of CINE 1502 (minimum grade D-). Restricted to Cinema Studies majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Workshops

CINE 2010 (3) Moving Image Computer Foundations
Provides students with artistic foundational hands-on experience in integrated use of media software in both the PC and Mac creative imaging making digital working environments. Includes fundamentals in general computer maintenance, creative and practical audio editing, image management and manipulation, and creative moving image practice. Formerly FILM 2010.

Requisites: Restricted to Cinema Studies majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Production

CINE 2105 (3) Introduction to the Screenplay
Explores, through close reading and original student work, the form and structure of the screenplay. Students will learn to analyze structural and character elements of classic screenplays, and breaking down such elements as character, motivation, and arc. Students may learn some very basics of screenwriting form, develop a treatment, explore formal and technical issues, etc. Formerly FILM 2105.

Requisites: Requires prerequisite or corequisite course of CINE 1502 (minimum grade D-). Restricted to Cinema Studies majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Workshops

CINE 2203 (3) American Indians in Film
Surveys the image of American Indians in American (especially Hollywood) film with an emphasis on "revisionist," or "breakthrough" films. It follows the creation of "the Hollywood Indian" from early literature to contemporary motion pictures. Films are analyzed within historical, social, and artistic contexts, and examined in terms of the impact their images have exerted upon American society at large, as well as Native communities. Near the end of the course we will look at what happens when Native Americans write, direct, and act in their own independent films.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 2203

CINE 2300 (3) Beginning/Intermediate Filmmaking
Covers basic camera, editing, and splicing techniques for Super-8 film. Equipment is available at the film studies office for a modest rental fee. Formerly FILM 2300.

Requisites: Requires prerequisite course of CINE 1502 (minimum grade D-).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Production

CINE 2312 (3) Film Trilogies
Study of films designed as trilogies, drawing on a wide range of international cinema. Films include Satyajit Ray's Apu Trilogy (India), Krzysztof Kieslowski's Three Colors Trilogy (Poland), Francois Truffaut's Antoine Doinel cycle (France), and Abbas Kiarostami's Iran Trilogy (Iran). Non-majors will need instructor's consent. Formerly FILM 2312.

Requisites: Restricted to Cinema Studies majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Genre and Movements

CINE 2500 (3) Moving Image Foundations II
Instructs students in developing a technical and aesthetic understanding of the principles of analog and digital cinematography. Technical, creative, and studio critique emphasis on the Bolex 16mm RX and Black Magic Pocket Cinema cameras, advanced composition, grammar and mechanics of cinema editing, film/digital lighting (exposure, latitude) multi-format origination and file management, non-sync sound techniques, etc. Formerly FILM 2500.

Requisites: Requires prerequisite courses of CINE 1502 and CINE 2000 or CINE 2300 (all minimum grade C). Restricted to Cinema Studies majors only.

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Production

CINE 2513 (3) Major Asian Filmmakers
Surveys the major Asian directors from China, India, Japan, Taiwan, and Vietnam. Non-majors will need instructor’s consent. Formerly FILM 2513.

Requisites: Restricted to Cinema Studies majors only.

Recommended: Prerequisite CINE 1502.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Topics

Departmental Category: Asia Content

CINE 2521 (3) Classics of the Foreign Cinema: 1960s to Present
Surveys the classics of international cinema from the 1960s to the present. Non-majors will need instructor’s consent. Formerly FILM 2521.

Requisites: Restricted to Cinema Studies majors only.

Recommended: Prerequisite CINE 1502.

CINE 2610 (3) Animation Production
Includes analysis of independent and experimental animation and an introduction to various animation techniques (object, line, collage, sand or paint on glass, Xerox, camereless, pixelation, etc.). Students produce exercise films and a final film exploring these techniques. Formerly FILM 2610.

Requisites: Requires prerequisite course of CINE 2000 or CINE 2300 (minimum grade D-).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Production
CINE 2900 (3) Lighting
Covers the basics of "why you need lighting", color temp, as well as camera techniques, lighting theory, and lighting set-ups for still and motion picture film video. Emphasizes hands on as well as theory. Formerly FILM 2900.
Requisites: Requires prerequisite course of CINE 2000 or CINE 2300 (minimum grade D-). Restricted to Cinema Studies majors only.
Recommended: Prerequisite CINE 2051.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Production

CINE 3002 (3) Major Film Movements
Historical-aesthetic survey dealing with various styles, movements, genres or national cinemas. Can be taught in conjunction with the appropriate language department. Typical offers are in the French, the German or the Russian films, etc. Also offers detailed approaches to specific styles, subjects or genres: film comedy, melodrama, the Western, women filmmakers, German expressionist cinema, Italian neorealism, etc. Formerly FILM 3002.
Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Genre and Movements

CINE 3003 (3) Major Film Directors
Focuses on the work of a single director or a group of related directors. Course content varies each semester. Consult the online Schedule Planner for specific topic. Non-majors need instructor consent. Formerly FILM 3003.
Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Cinema Studies majors only.
Recommended: Prerequisite students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Topics

CINE 3004 (3) Alfred Hitchcock: The American Films
Intensive survey of Hitchcock's American films from 1940 (Rebecca) to 1964 (Marnie). We will concentrate on in-depth analysis of the most influential and significant films made by the most important movie director of the Hollywood era. We will pay special attention to Hitchcock's deep understanding of the intricacies of film language, style and form in relation to the themes and subjects that interested him: guilt, sex, gender relations, crime and punishment, "mothers". Non-majors will need instructor's consent. Formerly FILM 3004.
Requisites: Restricted to Cinema Studies majors only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Topics

CINE 3010 (1-3) Film Production Topics
Offers students both theoretical and practical experience in various specialized areas of cinematic production. Topics vary but include production in the documentary, fictional narrative, animation, computer animation, and experimental genres. Formerly FILM 3010.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Requires prerequisite course of CINE 2000 or CINE 2300 (minimum grade D-). Restricted to Cinema Studies majors only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Production

CINE 3012 (3) Documentary Film
Provides a historical and theoretical introduction to the documentary film. Examines the historical beginnings of documentary film as well as exploring contemporary documentary practice. Canonical moments of documentary history and lesser known examples of documentary film work will be explored. Formerly FILM 3012.
Requisites: Requires prerequisite course of CINE 1502 (minimum grade D-).
Recommended: Prerequisite CINE 3051.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Genre and Movements

CINE 3013 (3) Women and Film
Examines the representation of women in film, the role of women in the filmmaking process, and the contributions made by women as critics and scholars of the cinema. Its orientation is therefore both historical and theoretical. Organized chronologically, the course examines how women have been addressed and "constructed" as spectators in and through cinema over the last 120 years, the relationship between cinema and social history, how films express ideology, and how feminist films scholarship has changed from the 1970's to the present day. The course focuses on American and international narrative, documentary, and experimental films from 1895 to present directed by or about women. Formerly FILM 3013.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

CINE 3030 (3) Analog Alternatives
Introduction to small gauge analog moving image formats and technologies with a focus on process and experimentation through hands-on exploration and demonstrations. This process-oriented class will utilize DIY methods and Alternative Process Photography approaches to work creatively with silver based holographic mediums. Students will create moving image works with Super 8mm and 16mm film while exploring the implications and possibilities of working with these mediums within our current digital paradigm. Formerly FILM 3030.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Requires prerequisite courses of CINE 1502 and CINE 2000 (all minimum grade D-).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Production

CINE 3033 (3) Color and Cinema
Examines color and cinema from historical, technological, aesthetic and theoretical perspectives. Students will be required to complete both creative and scholarly assignments. Formerly FILM 3033.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Topics
CINE 3041 (3) Environmental Cinema
Interrogates how fiction and nonfiction filmmakers, writers, cinematographers, and moving-image editors have creatively responded to discoveries made in the field of environmental science. Using books by Rachel Carson and Scott MacDonald as a framework, we will examine a broad spectrum of filmmakers (e.g. Wes Anderson, Todd Haynes, Jennifer Baichwal, Bruce Conner, Percy Smith) alongside the most pressing environmental issues. Formerly FILM 3041.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) Cinema Studies or Environmental Studies (ENVS) majors only.
Grading Basis: Letter Grade

CINE 3042 (3) Horror Film: History, Contexts, Aesthetics
Surveys the most exemplary and significant films in the Horror film genre from the 1920s to the present. With a historical emphasis, the course explores the ways in which the Horror genre has evolved in response to shifting social anxieties and cultural developments, and its reflections on society in various national or international contexts. Expect disturbing content and images. Formerly FILM 3042. Non-majors will need department consent to enroll.
Requisites: Requires prerequisite course of CINE 1502 (minimum grade D-). Restricted to Cinema Studies (FILM) majors and minors only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Genre and Movements

CINE 3043 (3) Topics in Critical Film Studies
Prepares students for advanced Film Critical Studies work. Subject matter varies from semester to semester. Formerly FILM 3043.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Topics

CINE 3051 (4) Film History 1
Intensive introduction to film history from 1895 to 1959. Topics covered include the beginnings of motion picture photography, the growth of narrative complexity from Lumiere to Griffith, American silent comedy, Soviet theories of montage, German expressionist films, and the transition to sound. Formerly FILM 3051.
Requisites: Requires prerequisite course of CINE 1502 (minimum grade D-).

CINE 3061 (4) Film History 2
Starts in 1959 and follows the historical growth and evolution of film aesthetics to the present. Studies Italian neorealism, French new wave, and recent experimental films, as well as the films of major auteur figures such as Bergman, Kurosawa, Fellini, Hitchcock, Bunuel, Antonioni, and Coppola. Formerly FILM 3061.
Requisites: Requires prerequisite course of CINE 1502 (minimum grade D-).
Recommended: Prerequisite CINE 3051 (minimum grade D-).

CINE 3081 (3) Contemporary American Cinema: 1980 to Present
Examines the relationship between American films from 1980 to the present and their cultural and historical context. Includes films by Bigelow, Fincher, Scorsese, Lee, Linklater, Lynch, Stone, the Coen brothers, and Jenkins. Assumes some film knowledge but is not restricted to majors. This course is open to Cinema Studies majors and non-majors, sophomores, juniors and seniors. Non-majors need instructor consent to enroll. Formerly FILM 3081.
Requisites: Restricted to Cinema Studies majors only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Production

CINE 3104 (3) Film Criticism and Theory
Surveys the range and function of film criticism, introduces major positions and concepts of film theory and focuses on students' abilities to write about film.
Equivalent - Duplicate Degree Credit Not Granted: HUMN 3104
Requisites: Requires prerequisite course of CINE 1502 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) Cinema Studies or Humanities (HUMN) majors only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Intensive and Small Courses

CINE 3211 (3) History of Russian Cinema
Surveys Russian cinema in historical and cultural context from early 20th century to the present. Taught in English.
Equivalent - Duplicate Degree Credit Not Granted: RUSS 3211
Requisites: Requires prerequisite course of CINE 1502 or RUSS 3211 (minimum grade D-).

CINE 3400 (3) Cinema Production I
Exploration of creative cinema production through short production and post-production projects. A short final project will be required. Focuses on the tactics and strategies of independent cinema production, examining a variety of approaches to genre. Explores a range of film and digital technologies. Formerly FILM 3400.
Requisites: Requires prerequisites courses of CINE 1502 (minimum grade C) and CINE 2000 and CINE 2500 (both minimum grade of B-). Requires corequisite courses of CINE 3515 and CINE 3525. Restricted to Cinema Studies majors only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Production

CINE 3402 (3) European Film and Culture
Studies the relationships between European film, art and culture. Offered each summer in a different European city (Rome, Paris, London, Athens, Barcelona). There will be regular in-class lectures, film screenings, field trips and on-site teaching. Formerly FILM 3402.
Repeatable: Repeatable for up to 12.00 total credit hours.
Recommended: Prerequisite introductory film and art history courses.
CINE 3422 (3) The Hollywood Musical
Second only to jazz, some critics regard the Hollywood musical as the greatest American popular art form of the 20th century. Proposes a historical, formal and theoretical approach to the musical through its several iterations, from the classical, to the revisionist, to the unusual, placing the changes in the genre’s form, structure, and ideology in the context of America’s changing social, political and religious values.
Formerly FILM 3422.
Requisites: Requires prerequisite course of CINE 1502 (minimum grade D-).
Recommended: Prerequisite CINE 3051.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Topics

CINE 3503 (3) German Film Through World War II
History and theory of Weimar and Nazi film with sociocultural emphasis. Taught in English.
Equivalent - Duplicate Degree Credit Not Granted: GRMN 3503
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Topics

CINE 3513 (3) German Film and Society 1945-1989
Introduces issues in German society through film during the Cold War. Focus on East and West Germany, though some other German language films may be included. Emphasis is on reading films in their social, historical and political contexts. Taught in English.
Equivalent - Duplicate Degree Credit Not Granted: GRMN 3513
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Topics

CINE 3515 (3) Lights, Camera, Action
In this practical and technical lecture course, students will gain an understanding of a variety of models for creative use of camera, lighting, and sound equipment. A broad survey of production topics, including mise-en-scene, single-camera cinematography, multi-camera cinematography, cinematic lighting design, and sync-sound capture will be introduced/outlined in support of CINE 3400. Formerly FILM 3515.
Requisites: Requires prerequisites courses of CINE 1502 (minimum grade C) and CINE 2000 and CINE 2500 (both minimum grade of B-). Requires corequisite courses of CINE 3400 and CINE 3525. Restricted to Cinema Studies majors only.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Workshops

CINE 3525 (3) Post Production Lecture
Covers the essentials of working with captured material to produce crafted art and messages in conjunction with CINE 3400. We will look at: the technical aspects of managing a wide range of digital formats; how to balance and mix audio; how to work with color and picture adjustments and how to use graphics and animation. The class leads students through all the steps to produce technically proficient material and gives students the tools, concepts and workflows to understand how to solve common production problems in filmmaking and video. Formerly FILM 3525.
Requisites: Requires prerequisites courses of CINE 1502 (minimum grade C) and CINE 2000 and CINE 2500 (both minimum grade of B-). Requires corequisite courses of CINE 3400 and CINE 3515. Restricted to Cinema Studies majors only.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Workshops

CINE 3563 (3) Producing the Independent Film
Introduces the role of the producer from development through production and sales, distribution. Students will practice pitching, develop pitch decks and apply for funding for one project. The role of labs, residencies, markets and film festivals will be addressed as well as modes of financing including crowd funding, tax incentives, equity finance, pre-sales, co-productions and gap financing. Formerly FILM 3563.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Topics

CINE 3603 (3) Sound and Vision
Historical and aesthetic overview of sound in relation to film, ranging from Hitchcock’s Blackmail to Malick’s The Thin Red Line. Pursues issues in sound design, mixing film scores, voiceovers, and film/sound theory in narrative, experimental, and documentary films. Among the filmmakers to be studied are Vertov, Welles, Altman, Brakhage, Lipsett, Eisenstein, Coppola, Scorcese, Stone, Leone, Godard, Nelson. Also explores a limited practicum using Pro Tools for sound design. Formerly FILM 3603.
Requisites: Requires prerequisite course of CINE 1502 (minimum grade D-).
Recommended: Prerequisite CINE 3051.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Topics

CINE 3620 (3) Experimental Digital Animation
Explores boundaries of traditional animation construction and delve into contemporary animation history. Small projects will involve experimentation with animation techniques that integrate with analog animation, frame-by-frame digital processes and live-action footage. Ideal for students who have taken CINE 2010 or CINE 2610 or CINE 3525. Students familiar with animation and digital imaging or those eager to explore the process are encouraged to enroll. Formerly FILM 3620.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Production

CINE 3700 (3) Cinema Audio Design
Studies and applies Pro Tools as a post-production audio toolbox. Applied techniques include sound recording, field recording, Foley, vocal recording and editing, plug-in generated sound creation, MIDI, basic scoring principles, audio sweetening and audio mixing. Students will be required to complete regular editing assignments in addition to a final soundscape project. Formerly FILM 3700.
Requisites: Requires prerequisite course of CINE 2010 or CINE 2610 (minimum grade D-). Restricted to Cinema Studies majors only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Production

CINE 3900 (1-3) Independent Study (Production)
Limit of 3 credit hours per semester. Formerly FILM 3900.
Repeatable: Repeatable for up to 6.00 total credit hours.
Additional Information: Departmental Category: Production

CINE 3901 (1-3) Independent Study (Critical Study)
Limit of 3 credit hours per semester. Formerly FILM 3901.
Repeatable: Repeatable for up to 6.00 total credit hours.
Additional Information: Departmental Category: History
CINE 3920 (1-3) Professional Seminar
Learning aspects of professional development in the field of cinema. Through workshops and assignments students will learn of the many opportunities found within all areas of production. Guests will help inform the students of professional options and expectations. Topics will include: crew work, fund raising, marketing festivals, low budget filmmaking, and alternative venues. Students may have an internship concurrently with this course. Formerly FILM 3920.
Repeatability: Repeatable for up to 6.00 total credit hours.
Requirements: Requires prerequisite course of CINE 2500 (minimum grade D-).
Recommended: Cinema Studies majors only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Production

CINE 3940 (1-6) Cinema Studies Internship
Provides students with professional internship experiences with film, video, new media production companies, governmental agencies, production units, audio recording studios and new media industries. Students will be responsible for securing their own internship position. Formerly FILM 3940.
Repeatability: Repeatable for up to 9.00 total credit hours.
Requirements: Restricted to Cinema Studies majors only.
Recommended: Prerequisite CU GPA of at least 2.00 and upper-division standing and a 3.00 GPA as a BA or BFA Cinema Studies major.
Grading Basis: Pass/Fail
Additional Information: Departmental Category: Production

CINE 3990 (1) Film Practicum
Offers creative and technical experience in aspects of film, video and media production for students in the BFA track and BA production emphasis. Students earn credit by working in any number of "crew" positions for Upper Division Production, MFA productions or faculty projects under the supervision of the course instructor. Formerly FILM 3990.
Repeatability: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.
Grading Basis: Pass/Fail
Additional Information: Departmental Category: Production

CINE 4000 (3) Advanced Digital Postproduction
Through projects, discussions and screenings, explores the advanced practices and aesthetics of computer-based moving-image art editing. Topics include how to edit and manage a postproduction cycle, how to use digital editing systems and capabilities such as compositing, digital audio, and optical effects treatments. Cannot be taken simultaneously with CINE 3400 or CINE 4400.
Equivalent - Duplicate Degree Credit Not Granted: ARTF 5000
Requirements: Requires prerequisite courses CINE 1502 and CINE 2000 or CINE 2300 and CINE 2500 and CINE 3400 or CINE 4400 (all minimum grade D-). Restricted to Cinema Studies majors only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Production

CINE 4001 (3) Screening Race, Class & Gender in the U.S. and the Global Borderland
Engaging with the ways in which racial, class, gender and sexual oppression intersect, this class examines several film productions by and about diasporic and subaltern subjects (especially children and women) in the U.S./Mexico borderlands, and the urban ethnic metropoles of the global borderlands.
Equivalent - Duplicate Degree Credit Not Granted: ETHN 4001 and ETHN 5001
Requirements: Requires prerequisite course of ETHN 2001 (minimum grade D-).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: History

CINE 4003 (3) Film and Literature
Explores similarities and differences between literature and film as narrative arts. Studies several novels, short stories and plays and films made from them. Examines problems in point of view, manipulation of time, tone, structure, and setting.
Equivalent - Duplicate Degree Credit Not Granted: ARTF 5003
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Topics

CINE 4004 (3) Topics in Film Theory
Provides topic-centered analyses of controversial areas in film theory. Students read extensive materials in the topic area, analyze and summarize arguments as presented in the literature, write "position" papers and make oral presentations in which they elaborate their own arguments about specific assigned topic, establishing critical dialogue with the primary materials.
Equivalent - Duplicate Degree Credit Not Granted: HUMN 4004 and ARTF 5004
Repeatability: Repeatable for up to 6.00 total credit hours.
Requirements: Restricted to students with 57-180 credits (Junior or Senior) Cinema Studies or Humanities (HUMN) majors only.
Recommended: Prerequisite CINE 3051.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Intensive and Small Courses

CINE 4005 (3) Screenwriting Workshop: Short Form
A writing intensive course that focuses on the art of the short form screenplay. Students will complete regular writing exercises, presentations, and several short scripts. Formerly FILM 4005.
Repeatability: Repeatable for up to 6.00 total credit hours.
Requirements: Requires prerequisite courses of CINE 1502 and CINE 2005 or CINE 2105 (all minimum grade D-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) Cinema Studies (CINE or CINM) majors only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Workshops

CINE 4010 (1-3) Topics in Film Production
Prepares students for advanced Cinema Studies production courses. Subject matter varies each semester. Formerly FILM 4010.
Equivalent - Duplicate Degree Credit Not Granted: ARTF 5010
Repeatability: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requirements: Requires prerequisite courses of CINE 1502 and CINE 2000 or CINE 2300 and CINE 2500 (all minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) Cinema Studies majors only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Production
CINE 4021 (3) Directing/Acting for the Camera
Offers an intensive production seminar to prepare actors and directors to work collaboratively and effectively for the medium of the camera. Directing vocabulary, script interpretation, film terminology and acting techniques are applied. Explores situations in which actors and directors interact, from auditions to rehearsals to filming. Requires attendance, textbook readings, research and production responsibilities on both sides of the camera. Formerly FILM 4021.
Equivalent - Duplicate Degree Credit Not Granted: ARTF 5021
Recommended: Prerequisite CINE 1502.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: History

CINE 4023 (3) Topics in International Cinema
Focuses on major international filmmakers who have had a decisive impact on world cinema. Students will learn how directors create their own innovative body of work with specific formal and thematic patterns and will also learn to place such work within multiple frameworks that will cover film history, theory, aesthetics, philosophy and social and cultural analysis. Formerly FILM 4023.
Equivalent - Duplicate Degree Credit Not Granted: ARTF 5023
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Requires prerequisite course of CINE 1502 (minimum grade D-). Restricted to Cinema Studies (CINE or CINM) or Fine Arts - Creative Arts (ARTC) majors only.
Recommended: Prerequisite CINE 3051.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: History

CINE 4024 (3) Advanced Research Seminar
Focuses on a specific topic, director, or genre chosen by the professor. Research skills and critical thinking are emphasized. With faculty guidance, students determine individual projects and present them to the class. Class participation is mandatory. Each student submits a thorough and original research paper for a final grade. Department enforced requisite: restricted to students with 57-180 credits (Juniors or Seniors) with a minimum GPA of 3.0. Formerly FILM 4024.
Equivalent - Duplicate Degree Credit Not Granted: ARTF 5024
Repeatable: Repeatable for up to 6.00 total credit hours.
Recommended: Prerequisites CINE 3051 and CINE 3061.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Intensive and Small Courses

CINE 4040 (3) Advanced Analog Alchemy
Investigating, developing, and re-interpreting historical approaches and processes involved in the creation of Analog motion picture works. Students will work with Analog mediums in alternative modes and unestablished ways and develop their personal process towards the goal of producing a unique moving image work to be presented in a final analog format for exhibition.
Equivalent - Duplicate Degree Credit Not Granted: ARTF 5040
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Requires prerequisite course of CINE 3030 (minimum grade D-). Restricted to Cinema Studies majors only.

CINE 4043 (1-3) Topics in Cinema Critical Studies
Prepares students for advanced Cinema Studies critical studies courses. Subject matter varies each semester. Formerly FILM 4043.
Equivalent - Duplicate Degree Credit Not Granted: ARTF 5043
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Topics

CINE 4105 (3) Advanced Screenwriting
Introduces professional screenwriting in the form of a creative writing workshop. Admission by portfolio (see film department). Students write scenes and scripts for short films, feature treatments, etc., and are graded on a final portfolio.
Equivalent - Duplicate Degree Credit Not Granted: ARTF 5105
Requisites: Requires prerequisite course of CINE 4005 (minimum grade D-).
Recommended: Prerequisites CINE 3051 and CINE 3061 and an approved writing sample.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Workshops

CINE 4200 (3) Flow Visualization
Explores techniques for the visualization of the physics of fluid flows including seeding with dyes, particles and bubbles, and shadowgraphy and schlieren. Reviews optics and fluid physics, especially atmospheric clouds. Assignments are student-driven, to individuals and mixed teams of graduates, undergraduates, engineering majors and photography/video majors.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 4151, MCEN 5151, CINE 5200 and ARTF 5200
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Production

CINE 4400 (3) Digital Post-Production
Through projects, discussions, and screenings, this class explores the practices and aesthetics of computer-based moving-image art editing. Formerly FILM 4400.
Equivalent - Duplicate Degree Credit Not Granted: ARTF 5400
Requisites: Requires prerequisite course of CINE 3525 (minimum grade D-). Restricted to Cinema Studies majors only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Production

CINE 4453 (3) History of Avant-Garde Film
Survey course tracing the history, aesthetics and contexts of the American avant-garde cinema in light of contemporary art movements till today. Viewing key cultural works of film, video, and moving image arts. Includes Dada and Surrealist precursors, the mythopoetics of Deren, Anger and Brakhage, Abstraction and Animation, Mekas¿s lyrical diaries, Conner, collage and the Beats, Warhol and Pop Art, Nam Jun Paik and the pioneering video artists , Kuchar and camp, Schneemann¿s radical body politics and performance, AIDS activist media, and current works from the myriad marginal voices that drive avant-garde art practices. Formerly FILM 4453.
Equivalent - Duplicate Degree Credit Not Granted: ARTF 5453
Requisites: Requires prerequisite course of CINE 1502 (minimum grade D-).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Topics
CINE 4500 (3) Cinema Production 2
Advanced exploration of creative cinema production through short production and post-production projects. Course focuses on the tactics and strategies of independent cinema production leading to the completion of a BFA thesis project exploring either documentary, experimental, or narrative genres. Formerly FILM 4500.
Equivalent - Duplicate Degree Credit Not Granted: ARTF 5500
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Requires prerequisite courses of CINE 3400 and CINE 3515 and CINE 3525 (all minimum grade C). Restricted to Cinema Studies majors only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Production

CINE 4505 (3) Screenwriting Workshop: Long Form
Creative writing workshop in which students plan and write a feature-length screenplay with emphasis on format, dialogue, characterization, and story.
Requisites: Requires prerequisite course of CINE 1502 and CINE 2000 (all minimum grade D-).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Workshops

CINE 4604 (3) Colloquium in Film Aesthetics
Seminar for the serious round table discussion and critique of film as an art form, emphasizing development of appropriate verbal and written language skills for description of film. Department enforced prerequisite: restricted to students with 57-180 credits (Juniors or Seniors) with a minimum GPA of 3.0 or instructor consent required. Formerly FILM 4604.
Equivalent - Duplicate Degree Credit Not Granted: ARTF 5604
Repeatable: Repeatable for up to 6.00 total credit hours.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Intensive and Small Courses

CINE 4959 (3-6) Honors Senior Thesis
For exceptional Film Studies majors who wish to write an honors thesis based on independent research or creative work under the direction of a faculty member. Formerly FILM 4959.
Repeatable: Repeatable for up to 6.00 total credit hours.
Additional Information: Arts Sciences Honors Course Departmental Category: Intensive and Small Courses

Cinema Studies & Moving Image Arts - Bachelor of Fine Arts (BFA)
The Bachelor of Fine Arts is a competitive degree program requiring an application and selection procedure. All students begin their Cinema Studies & Moving Image Arts track declaring the Bachelor of Arts (BA) in Cinema Studies as their major. Students wishing to declare a BFA in Cinema Studies & Moving Image Arts as their major must first satisfy specific prerequisites. The mission of the BFA is to prepare artists who will be competitive and original as independent filmmakers, who may aspire to advanced graduate degrees beyond the BFA, or who are considering an artistic approach to their filmmaking portfolio.

In addition to acquiring the skills to make creative films and video works, students completing the BFA will also advance their ability to analyze and interpret films critically, and to communicate and express themselves about film competently in written form.

Requirements
Admission Requirements
The Department of Cinema Studies & Moving Image Arts educates students in the history and development of film as an art form and contemporary medium. The curriculum instills an informed analytic awareness of the ways in which film has evolved artistically and stylistically, and provides the resources for significant creative exploration of the medium.

The Bachelor of Fine Arts degree is competitive. In order to graduate with a BFA degree, students must first satisfy a number of prerequisites and then submit a formal application to the BFA program at the prescribed time (deadline will be posted each semester on the cinema studies website). Students are encouraged to apply to the BFA program at the end of their sophomore year.

Applicants must have a cumulative GPA at CU Boulder of 2.3 or higher, and a CINE GPA of 3.3 or higher. Applicants must submit a written application, a writing sample and a sample film. Applicants may also submit one additional "best" example of creative work (see specific admission guidelines for details). Admission into the BFA program is contingent upon approval of the application materials by the BFA committee. Students are required to attend a BFA orientation meeting prior to submitting their application. The program recommends that BFA students purchase film and sound media-capable Apple computing systems.

For more information, visit the department website (https://www.colorado.edu/cinemastudies/). Students are encouraged to consult with the Cinema Studies advisor in order to obtain advice and current information.

Program Requirements
No more than 6 credit hours of independent study may be credited toward the major. Students must complete the required cinema courses with a grade of C or better.

Students must complete the general requirements of the College of Arts and Sciences as well as the required courses listed below. The Department of Cinema Studies & Moving Image Arts requires a minimum of 62 credit hours in support of the BFA degree requirements.

### Production Course Electives

Select 15 credit hours of any combination of the following courses—see degree audit for specifics

- CINE 2010 Moving Image Computer Foundations
- CINE 2300 Beginning/Intermediate Filmmaking
- CINE 2610 Animation Production
- CINE 2900 Lighting
- CINE 3010 Film Production Topics
- CINE 3030 Analog Alternatives
- CINE 3563 Producing the Independent Film
- CINE 3620 Experimental Digital Animation
- CINE 3700 Cinema Audio Design
- CINE 3900 Independent Study (Production)
- CINE 3920 Professional Seminar
- CINE 3940 Cinema Studies Internship
- CINE 3990 Film Practicum
- CINE 4000 Advanced Digital Postproduction
- CINE 4005 Screenwriting Workshop: Short Form
- CINE 4010 Topics in Film Production
- CINE 4021 Directing/Acting for the Camera
- CINE 4040 Advanced Analog Alchemy
- CINE 4105 Advanced Screenwriting
- CINE 4400 Digital Post-Production
- CINE 4505 Screenwriting Workshop: Long Form

### Critical Studies Elective Requirements

Select 9 credit hours (6 credit hours must be upper-division) from the following:

- CINE 2001 Space Odysseys: Astrophys/Astronomy via Cinema/Arts
- CINE 2002 Recent International Cinema
- CINE 2003 Film Topics
- CINE 2004 CU Cinema Studies Seminar: The Telluride Film Festival
- CINE 2005 Form, Structure, and Narrative Analysis
- CINE 2312 Film Trilogies
- CINE 2513 Major Asian Filmmakers
- CINE 2521 Classics of the Foreign Cinema: 1960s to Present
- CINE 3002 Major Film Movements
- CINE 3003 Major Film Directors
- CINE 3004 Alfred Hitchcock: The American Films
- CINE 3012 Documentary Film
- CINE 3013 Women and Film
- CINE 3033 Color and Cinema
- CINE 3042 Horror Film: History, Contexts, Aesthetics
- CINE 3043 Topics in Critical Film Studies
- CINE 3081 Contemporary American Cinema: 1980 to Present
- CINE 3104 Film Criticism and Theory
- CINE 3211 History of Russian Cinema
- CINE 3422 The Hollywood Musical
- CINE 3503 German Film Through World War II
- CINE 3513 German Film and Society 1945-1989
- CINE 3603 Sound and Vision
- CINE 3901 Independent Study (Critical Study)
- CINE 3940 Cinema Studies Internship
- CINE 4001 Screening Race, Class & Gender in the U.S. and the Global Borderland
- CINE 4003 Film and Literature
- CINE 4004 Topics in Film Theory
- CINE 4023 Topics in International Cinema
- CINE 4024 Advanced Research Seminar
- CINE 4043 Topics in Cinema Critical Studies
- CINE 4105 Advanced Screenwriting
- CINE 4453 History of Avant-Garde Film
- CINE 4604 Colloquium in Film Aesthetics

Any CINE class crosslisted with another department (i.e., foreign language) that has been approved by the cinema studies chair

### Total Credit Hours

62

---

1. This course is a prerequisite for CINE 2000 and CINE 3051.
2. It is recommended that these courses be taken in chronological order.
3. Must receive a B- or higher to continue to the next required production course.
4. Course may be taken for credit more than once, provided the topics vary.
5. Both are usually offered through Continuing Education; only one may count toward the cinema studies degree.
6. Total number of independent study credit hours cannot exceed 6, and they cannot be used to duplicate regular course offerings.
7. Course may be taken for credit more than once.
8. Total number of independent study credit hours cannot exceed 6.

### Graduating in Four Years with a BFA

Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of “adequate progress” as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress toward a BFA in cinema studies & moving image arts, students should meet the following requirements:

- Declare and start the cinema studies major the first semester freshman year.
- Complete CINE 1502, CINE 2000, CINE 2005 or CINE 2105 and one lower- or upper-division critical studies course for 3 credit hours by the end of the third semester.
- Complete 3 credit hours upper-division Critical Studies Elective, CINE Foundation Elective (3 credit hours) and CINE 2500 by the end of the fourth semester.
- Note: In order to graduate in four years, a student must apply and be accepted into the BFA program at the end of the fourth semester. See the admission requirements section above for details of the application process.
- Complete CINE 3051, CINE 3400, CINE 3515 and CINE 3525 by the end of the fifth semester.
• Complete CINE 3061, digital elective (3 credit hours), production elective (3 credit hours) and CINE 3990 by the end of the sixth semester.
• Complete CINE 4500, 3 credit hours upper-division critical studies elective, CINE 3990 by the end of the seventh semester.
• Complete 3 additional credit hours of CINE 4500, CINE 4604, an additional 1 credit hour of CINE 3990 and 3 more credit hours of production electives by the end of the eighth semester.

Recommended Four-Year Plan of Study

Through the required coursework for the major, students will complete all 12 credits of the the Arts & Humanities area of the Gen Ed Distribution Requirement.

**Cinema Studies - Bachelor of Arts (BA)**

CU Boulder's Bachelor of Arts in Cinema Studies & Moving Image Arts emphasizes the critical study of film as an art form. The cinema studies BA is designed to give students a solid knowledge of the history and aesthetics of international film, as well as exposure to the various methodological approaches of cinema studies as an academic discipline. Cinema studies courses take a multi-faceted approach comprised of film screenings, readings and lectures, while students are expected
to practice their film analysis skills in writing assignments and class discussion.

Like many programs in the Arts and Humanities, the BA program in cinema studies aims more broadly to teach two fundamental skills: critical thinking and writing ability. These skills are developed in our program specifically through the examination of films, but they are also broadly useful well beyond the realm of cinema studies. Students also have the option to pursue a BA with emphasis in production. The BA program enrolls approximately 425 majors.

Requirements

General Requirements

Students must complete the general requirements of the College of Arts and Sciences and the required courses listed within the emphasis that the student is pursuing.

No more than 6 credit hours of independent study may be credited toward the major. Students must complete the required cinema studies courses with a grade of C or better. The College of Arts and Science’s 18 credit hour minimum of upper-division credit hours must be fulfilled with CU cinema studies courses.

Areas of Emphasis

Critical Studies Emphasis

In addition to the general requirements of the College of Arts and Sciences and the required cinema studies core, the critical studies emphasis requires a minimum of 41 credit hours in support of the BA requirements.

Critical Studies Elective Requirements

Select 21 credit hours from the following (at least 15 must be upper division):

- CINE 2001: Space Odysseys: Astrophys/Atmosphere via Cinema/Arts
- CINE 2002: Recent International Cinema
- CINE 2003: Film Topics
- CINE 2004: CU Cinema Studies Seminar: The Telluride Film Festival
- CINE 2005: Form, Structure, and Narrative Analysis
- CINE 2312: Film Trilogies
- CINE 2513: Major Asian Filmmakers
- CINE 2521: Classics of the Foreign Cinema: 1960s to Present
- CINE 3002: Major Film Movements
- CINE 3003: Major Film Directors
- CINE 3004: Alfred Hitchcock: The American Films
- CINE 3012: Documentary Film
- CINE 3013: Women and Film
- CINE 3033: Color and Cinema
- CINE 3042: Horror Film: History, Contexts, Aesthetics

- CINE 3043: Topics in Critical Film Studies
- CINE 3081: Contemporary American Cinema: 1980 to Present
- CINE 3211: History of Russian Cinema
- CINE 3422: The Hollywood Musical
- CINE 3503: German Film Through World War II
- CINE 3513: German Film and Society 1945-1989
- CINE 3603: Sound and Vision
- CINE 3901: Independent Study (Critical Study)
- CINE 3940: Cinema Studies Internship
- CINE 4001: Screening Race, Class & Gender in the U.S. and the Global Borderland
- CINE 4003: Film and Literature
- CINE 4004: Topics in Film Theory
- CINE 4023: Topics in International Cinema
- CINE 4024: Advanced Research Seminar
- CINE 4043: Topics in Cinema Critical Studies
- CINE 4105: Advanced Screenwriting
- CINE 4453: History of Avant-Garde Film
- CINE 4604: Colloquium in Film Aesthetics

Certain classes from other departments (i.e., foreign language) that have been approved by the cinema studies chair.

Cinema Elective Requirements

In addition to required cinema classes, Cinema Studies majors must complete an additional six credit hours of CINE courses.

Total Credit Hours: 41

Production Emphasis

In addition to the general requirements of the College of Arts and Sciences and the required cinema studies core, the production emphasis requires a minimum of 45 credit hours in support of the BA requirements, including cinema studies courses and courses taken in other departments.

The Department of Cinema Studies & Moving Image Arts strongly urges students pursuing production classes in the BA degree program to purchase film and sound media-capable Apple computing systems.

### Total Credit Hours 45

1. This course is a prerequisite for CINE 2000 and CINE 3051.
2. It is recommended that these courses be taken in chronological order. CINE 1502 is a prerequisite.
3. Course may be taken for credit more than once, provided that the topics vary.
4. Total number of independent study credit hours cannot exceed 6.

### Graduating in Four Years

Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of "adequate progress" as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major.

To maintain adequate progress toward a BA in cinema studies, students should meet the following requirements (see the recommended four-year plans of study on the Areas of Emphasis (catalog.colorado.edu/undergraduate/colleges-schools/arts-sciences/programs-study/film-studies/film-studies-bachelor-arts-ba/#areasofemphasistext) tab):

- Declare a cinema studies major by the beginning of the second semester.
- Complete 3 hours of lower-division critical studies electives and CINE 3051 and CINE 3061 by the end of the sixth semester.
- Complete 6 critical studies elective credit hours and 6 CINE elective credit hours by the end of the seventh semester (at least 3 of these credit hours must be upper-division credit hours).
- Complete an additional 9 credit hours of critical studies elective courses and CINE 3104 or all required production courses by the eighth semester.

### Recommended Four-Year Plans of Study

#### Critical Studies Emphasis

Through the required coursework for the major, students will fulfill all 12 credits of the Arts & Humanities area of the Gen Ed Distribution Requirement.

- Upper-division Elective 3
- Upper-division Elective 3

**Credit Hours** 15

**Total Credit Hours** 123-125

### Production Emphasis

Through the required coursework for the major, students will fulfill all 12 credits of the Arts & Humanities area of the Gen Ed Distribution Requirement.
## Bachelor’s–Accelerated Master’s Degree Program(s)

The Bachelor’s–Accelerated Master’s (BAM) degree program options offer currently enrolled CU Boulder undergraduate students the opportunity to receive a bachelor’s and master’s degree in a shorter period of time. Students receive the bachelor’s degree first, but begin taking graduate coursework as undergraduates (typically in their senior year). Because some courses are allowed to double count for both the bachelor’s and the master's degrees, students receive a master's degree in less time and at a lower cost than if they were to enroll in a stand-alone master's degree program after completion of their baccalaureate degree. In addition, staying at CU Boulder to pursue a bachelor’s–accelerated master’s program enables students to continue working with their established faculty mentors.

### BA in Cinema Studies, MA in Art and Art History

The cinema studies bachelor of arts/master of arts in art and art history degree gives highly motivated BA students the opportunity to earn an MA degree using an accelerated undergraduate program in combination with a fifth year of study.

#### Program Description

The BAM degree in cinema studies is a critical studies track under the auspices of the art MA program. This collaboration between the Department of Cinema Studies & Moving Image Arts and the Department of Art and Art History is an extension of our common interests in visual art. The cinema studies tenured and tenure-track faculty also have graduate faculty standing within art and art History.

The BAM track prepares students for professional careers in teaching and criticism, from the perspective of innovative critical approaches and in preparation for a PhD track at another university. The aim of the BAM cinema studies track is to aid in the advancement of the scholarly understanding of film art, with emphasis on theoretical and research approaches and their role in academia. The BAM will, therefore, prepare its graduates to assume the responsibilities of the academic study of cinema as one of the fine arts and to pursue careers in teaching, research, curating and the overall advancement of the study of cinema as art.

The program offers studies leading to the MA in the areas of film criticism and theory. Advanced students are encouraged to explore interdisciplinary approaches as well as to enhance their program of study with cognate courses in other departments such as history, comparative literature, anthropology, English, women’s studies, ethnic studies, Spanish and Portuguese, French and Italian, Germanic and Slavic languages and literature and others. Cinema studies offers a broad selection of seminar topics on their current faculty research interests and in response to student demand. The Visiting Film Artist program brings additional distinguished, innovative film and video artists and critics to campus and students are encouraged to register for their seminars.

#### Admissions Requirements

In order to gain admission to the BAM program named above, a student must meet the following criteria:

- Have a cumulative GPA of 3.3 or higher
- Have completed all MAPS deficiencies before admission to the program
- Student enrolled in the BAM track cannot pursue a double major or dual degree of any kind

Only currently enrolled University of Colorado Boulder students may be considered for admission to the program. Transfer students must have completed a minimum of 24 credit hours at CU Boulder before applying to the program.

Admission to the program occurs during the second semester of the junior year. Before filling out the BAM intent form, the student should...
Students interested in the BAM degree program should contact the Art & Art History graduate program coordinator for more information.

Program Requirements
Students may take up to and including 12 hours while in the undergraduate program which can later be used toward the master’s degree. However, only six credits may be double counted toward the bachelor’s degree and the master’s degree. Students must apply to graduate with the bachelor’s degree, and apply to continue with the master’s degree, early in the semester in which the undergraduate requirements will be completed.

Cinema Studies - Minor
The cinema studies minor is open to students in any field who are interested in the study of cinema history, culture and aesthetics, but who are too busy to pursue the full major. Students who pursue the cinema studies minor have the opportunity to develop their interest by acquiring critical and comparative skills and understanding the place and importance of cinema as a cultural and social phenomenon. Students in the minor have access to lower- and upper-division courses on film history, aesthetics, criticism, social and historical contexts, classical genres, and groundbreaking directors from the U.S. and abroad, acquiring an edge in visual analysis, critical thinking and media literacy.

Requirements
Declaration of a minor is open to any student enrolled at CU Boulder, regardless of college or school. To obtain the cinema studies minor, students must declare a minor in cinema studies. Additional requirements:

- All coursework applied to the minor must be completed with a grade of C- or better (no pass/fail work may be applied). The GPA for all coursework taken in the minor department must be equal to 2.00 (C) or higher.
- Complete 19 credit hours of cinema studies coursework as listed below.

Required Courses and Credits

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>CINE 1502</td>

<td>Film History 2</td>
<td></td>
</tr>
</tbody>
</table>

Note: Both CINE 3051 and 3061 may be taken, but one will count as an elective.

Electives
Complete 12 credit hours from elective courses in the Cinema Studies Program. 9 credit hours of the elective courses must be at the upper-division (3000-4000) level.

Total Credit Hours 19

Classics
Through consultation with the undergraduate advisor, the bachelor’s degree in classics is tailored to the student’s interests in the field. Major and minor programs can be arranged with a concentration in either Latin or Greek or a combination of the two, with a focus on classical literature, culture and thought (including mythology, literature, philosophy, religion, art, archaeology and history), classical history, art and archaeology, or classical civilization. Prospective majors and minors should consult with the undergraduate advisor.

The undergraduate degree in classics emphasizes knowledge and awareness of:

- The fundamental outlines of the history of Greek and Roman literature, from Homer to the end of classical antiquity.
- The historical and cultural contexts of particular works.
- The art, religion and philosophy of ancient Greece and Rome and their roles in world cultural history.

In addition, students completing the degree in classics are expected to acquire the ability and skills to:

- Read, understand and interpret written documents and works of literature in ancient Greek or Latin where relevant, as well as in translation.
- Communicate in spoken and written form with adequate clarity and complexity for the relevant audience.
- Read and think critically.

Interested students are encouraged to consult the department’s Undergraduate (https://www.colorado.edu/classics/undergraduate/) webpage for more information.

Course codes for this program are CLAS, GREK and LATN.

Tzavella-Evjen, Terpsichori H.
Professor Emerita

Courses

**CLAS 1010 (3) The Study of Words**
Study of English words of Latin and Greek origin, focusing on etymological meaning by analysis of component parts (prefixes, bases, suffixes) and on the ways in which words have changed and developed semantically. No Greek or Latin required.

**Equivalent - Duplicate Degree Credit Not Granted:** LING 1010

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Literature, Culture, and Thought

**CLAS 1020 (3) Argument from Evidence: Critical Writing about the Ancient World**
Introduces students to writing about the ancient world, with special attention to the possibilities and the limitations of ancient source-material. Taught as a writing workshop, with emphasis on critical thinking, analysis, argument and inquiry. While the course reads foundational ancient texts, the skills acquired will be broadly useful among humanities disciplines.

**Additional Information:** Arts Sci Core Curr: Written Communication

Equivalent - Duplicate Degree Credit Not Granted: PHIL 1010
Additional Information: Arts Sci Core Curr: Historical Context
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Literature, Culture, and Thought

CLAS 1051 (3) The World of the Ancient Greeks
Surveys of the emergence, major accomplishments, failures and the
decline of the ancient Greeks, from the Bronze Age civilizations of the
Minoans and Mycenaeans through the Hellenistic Age (2000-30 B.C.). No
Greek or Latin required.
Equivalent - Duplicate Degree Credit Not Granted: HIST 1051
Additional Information: Arts Sci Core Curr: Historical Context
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Ancient History

CLAS 1061 (3) The Rise and Fall of Ancient Rome
Surveys the rise of ancient Rome in the eighth century B.C. to its fall in the
fifth century A.D. Emphasizes political institutions, foreign policy, leading personalities, and unique cultural accomplishments. No Greek or
Latin required.
Equivalent - Duplicate Degree Credit Not Granted: HIST 1061
Additional Information: Arts Sci Core Curr: Historical Context
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Ancient History

CLAS 1071 (3) Ancient Sport and Spectacle
Surveys the development, evolution and impact of sport and spectacle in the Greco-Roman world through the deconstruction of games during the
Christian era of the Roman Empire. Examines, among other relevant topics, games in the Homeric tradition, the development of the Greek
Olympics and Roman spectacles including the circus, amphitheaters and gladiators.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

CLAS 1100 (3) Greek and Roman Mythology
Covers Greek and Roman myths as expressions of religious experience and imagination, of Greek and Roman culture and society, and as part of the fabric of Western cultural tradition. Of particular interest to students of literature and the arts, psychology, anthropology, and history. No Greek or Latin required.
Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Literature, Culture, and Thought

CLAS 1110 (3) Gods, Monsters and Mortals: Literature of Ancient Greece
Read about mythological heroes and historical individuals from Achilles to Socrates. Explore why Greek authors told stories the way they did and what those stories might have meant to them and might mean to us. Ancient texts in English translation.
Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Literature, Culture, and Thought

CLAS 1115 (3) Masterpieces of Greek Literature in Translation
Students read about mythological heroes and historical individuals from Achilles to Socrates in Greek literature. Class discusses why the Greeks told stories the way they did and what those stories might have meant to them and might mean to us.
Additional Information: Arts Sciences Honors Course
Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Honors

CLAS 1120 (3) Power and Passion in Ancient Rome
Read about mythological heroes and historical individuals from Romulus to Catiline and the emperors Augustus and Nero. Explore why Roman authors told stories the way they did and what those stories might have meant and might mean to us. Ancient texts in English translation.
Additional Information: GT Pathways: GT-AH2 - Arts Hum: Lit Humanities
Arts Sci Core Curr: Historical Context
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Literature, Culture, and Thought

CLAS 1140 (3) Bread and Circuses: Society and Culture in the Roman World
Surveys the outstanding achievements of Roman culture and society as reflected in literature; philosophy and art; private and official religion; and legal and political thought. No Greek or Latin required.
Additional Information: GT Pathways: GT-AH2 - Arts Hum: Lit Humanities
Arts Sci Core Curr: Historical Context
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Literature, Culture, and Thought

CLAS 1509 (3) Trash and Treasure, Temples and Tombs: Art and Archaeology of the Ancient World
Introduces the art and archaeology of ancient Egypt, Mesopotamia, Greece and Rome, examining various ancient approaches to power, religion, death and the human body. Analyzes art, architecture and everyday trash to learn about ancient humanity.
Equivalent - Duplicate Degree Credit Not Granted: ARTH 1509
Requisites: Restricted to students with 0-56 credits (Freshmen or Sophomore) only.
Additional Information: Arts Sci Core Curr: Historical Context
Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Diversity-Global Perspective
Departmental Category: Art and Archaeology

CLAS 2020 (3) Science in the Ancient World
Covers the development of scientific modes of thought, theory, and research from mythological origins (e.g., Hesiod's poetry) through pre-Socratic philosophers. Culminates in theories and research of Plato and Aristotle, including the Roman Empire. Students read original sources in translation. No Greek or Latin required.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Literature, Culture, and Thought

CLAS 2029 (3) Art and Archaeology of Ancient Egypt
Emphasizes the origin of the Egyptian culture, its importance and its impact on other cultures. In addition, the different points of view of various scholars are discussed with a comparative study of the ancient Egyptian culture and modern culture of Egypt and the Middle East. Formerly ANTH 1160.
Equivalent - Duplicate Degree Credit Not Granted: ARTH 2029
Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Diversity-Global Perspective
Departmental Category: Art and Archaeology
CLAS 2030 (3) The Ancient Roots of Modern Medicine
Students learn the meaning and use of the Greek and Latin roots in modern medical terminology; they gain an appreciation of ancient Roman and Greek medicine history and culture in their relation to the modern practice of Western medicine and the sciences; they become familiar with common ancient bioethical principles that govern the ancient practice of medicine and the sciences and learn to appreciate how these principles inform and influence modern medicine and the sciences.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

CLAS 2039 (3) Greek Art and Archaeology
Covers prehistoric Aegean through the fourth century B.C.E., considering architecture, pottery, painting, sculpture and personal ornament. Societal customs such as use of space and burial patterns are considered as well as art and its uses, to help understand developments in Greek culture. Formerly CLAS 3039.
Equivalent - Duplicate Degree Credit Not Granted: ARTH 2039
Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art and Archaeology

CLAS 2041 (3) War and Society in Ancient Greece
Studies Greek warfare in its cultural, social and economic contexts, in the light of anthropological comparisons and modern theories. No Greek or Latin required.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Ancient History

CLAS 2049 (3) Introduction to Roman Art and Architecture
Introduces the monuments and sites of the ancient Roman world from the foundation of Rome (753 B.C.E.) to Constantine (306-307 C.E.). Emphasizes the relationship of art, architecture, and artifacts to the political, social, and religious institutions of Italy and the provinces. Formerly CLAS 3049.
Equivalent - Duplicate Degree Credit Not Granted: ARTH 2049
Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art and Archaeology

CLAS 2100 (3) Gender and Sexuality in Ancient Greece
Examines evidence of art, and literature of Greek antiquity from a contemporary feminist point of view. Focuses on women's roles in art, literature, and daily life. No Greek or Latin required.
Equivalent - Duplicate Degree Credit Not Granted: WGST 2100
Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Diversity-Global Perspective
Departmental Category: Literature, Culture, and Thought

CLAS 2110 (3) Gender and Sexuality in Ancient Rome
Uses art, archaeology, and literature to study, from a contemporary feminist point of view, the status of women in works of Roman art and literature, the development of attitudes expressed toward them, and their daily life. No Greek or Latin required.
Equivalent - Duplicate Degree Credit Not Granted: WGST 2110
Additional Information: GT Pathways: GT-H1 - History
Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Diversity-Global Perspective
Departmental Category: Literature, Culture, and Thought

CLAS 2610 (3) Paganism to Christianity
Offers a cultural history of Greek and Roman religion. Students read ancient texts in translation and use evidence from archaeology to reconstruct the shift from paganism to Christianity in antiquity. No Greek or Latin required.
Equivalent - Duplicate Degree Credit Not Granted: RLST 2614
Additional Information: Arts Sci Core Curr: Ideals and Values
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Literature, Culture, and Thought

CLAS 3009 (3) Modern Issues, Ancient Times
Considers issues of vital importance to humans, both now and in ancient times. Topics such as food, death, sex, family, literacy, or power are explored to consider how ancient societal norms and attitudes evolved and how they relate to modern culture. Draws on material and literary evidence to develop an understanding of the complexities of ancient life.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 3009
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Arts Sci Core Curr: Historical Context
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Art and Archaeology

CLAS 3019 (3) Pompeii and the Cities of Vesuvius
Introduces the towns and villas buried by the eruption of Mt. Vesuvius in 79 C.E. Explores the layout and decoration of ancient Roman houses, the variety of artifacts uncovered as evidence for daily life and the history of the excavations.
Equivalent - Duplicate Degree Credit Not Granted: ARTH 3019
Additional Information: Arts Sci Core Curr: Historical Context
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Art and Archaeology

CLAS 3119 (3) The Archaeology of Death
Considers Death. It is a universal human phenomenon. Humans across time and space have caused, planned for, reacted to, and carried out death practices in extraordinarily different ways. Mortuary practice provides a fascinating insight into human history and culture in both the modern and ancient world.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 3119
Additional Information: Arts Sci Core Curr: Historical Context
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Art and Archaeology

CLAS 3400 (3) Special Topics in Classics
Topics in Greek, Latin or Classical civilization.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Literature, Culture, and Thought

CLAS 4021 (3) Athens and Greek Democracy
Studies Greek history from 800 B.C. (the rise of the city-state) to 323 B.C. (the death of Alexander the Great). Emphasizes the development of democracy in Athens. Readings are in the primary sources.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 5021 and HIST 4021
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Ancient History
CLAS 4031 (3) Alexander the Great and the Rise of Macedonia
Covers Macedonia's rise to dominance in Greece under Philip II and the reign and conquests of Alexander the Great.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 5031 and HIST 4031
Recommended: Prerequisite one of the following CLAS 1051, 1509, 2039, 2041, 4021, 4041, 4071, 4139, 4149, GREK 3113, HIST 1051.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Ancient History

CLAS 4040 (3) Seminar in Classical Antiquity
Examines an advanced topic in classical language, literature, history, philosophy, art, or culture. Combines the techniques of philology with a critical approach to the literary and material legacy of the past.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Recommended: Requisite second-year proficiency in Greek or Latin.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Literature, Culture, and Thought

CLAS 4041 (3) Classical Greek Political Thought
Studies main representatives of political philosophy in antiquity (Plato, Aristotle, Cicero) and of the most important concepts and values of ancient political thought. No Greek or Latin required.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 5041 and HIST 4041 and PHIL 4210
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Ancient History

CLAS 4061 (3) Twilight of Antiquity
Explores the reasons for the fall of the Roman Empire in the western Mediterranean and its survival in the East as Byzantium. Emphasizes Christianity, barbarians, social, economic and cultural differences; contemporary views of Rome; and modern scholarship. No Greek or Latin is required.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 5061 and HIST 4061 and HIST 5061
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Ancient History

CLAS 4071 (3) Ancient Social History
Considers topics ranging from demography, disease, family structure, and the organization of daily life to ancient slavery, economics, and law. Focuses on Persia, Greece, or Rome and includes a particular emphasis on the methodology required to reconstruct an ancient society, especially the interpretation of problematic literary and material evidence and the selective use of comparisons with better known societies. No Greek or Latin required.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 5071 and HIST 4071
Repeatable: Repeatable for up to 9.00 total credit hours.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Ancient History

CLAS 4081 (3) The Roman Republic
Studies the Roman Republic from its foundation in 753 B.C. to its conclusion with the career of Augustus. Emphasizes the development of Roman Republican government. Readings are in the primary sources. No Greek or Latin required.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 5081 and HIST 4081
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Ancient History

CLAS 4091 (3) The Roman Empire
Intense survey of Imperial Rome from the Roman revolution to the passing of centralized political authority in the western Mediterranean. Emphasizes life, letters and personalities of the empire. No Greek or Latin required.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 5091 and HIST 4091
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Ancient History

CLAS 4099 (3) Ancient Greek Sculpture
Understanding that Greek sculpture, like all visual media, was part of the fabric of ancient Greek life and expressed the values of its creators and audience is a valuable way to gain insights into the social, economic, and political world of ancient Greece. This course will examine the work of Greek sculptors from the Archaic to the Hellenistic period. Key stylistic and technical developments, as well as significant works of art, sculptors and workshops will be discussed in detail. Some issues we will consider are the physical, religious and/or socio-historical context of individual freestanding sculptures and how specific sculptural programs illustrate aspects of Greek culture. Iconographic and narrative choices made by artists working in stone, compared to other material, will also be addressed.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 5099, ARTH 4099 and ARTH 5099

CLAS 4101 (3) Greek and Roman Slavery
Surveys slavery in ancient Greece and Rome beginning with its growth, economics and political effects, moving to the life experiences of slaves, resistance and revolt, and finishing with the ideology of slavery. Focuses throughout on the challenge of understanding classical slavery on the basis of scattered and biased evidence and on the controversies that have surrounded this topic.
Equivalent - Duplicate Degree Credit Not Granted: HIST 4101
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Diversity-Global Perspective
Arts Sci Gen Ed: Distribution-Arts Humanities

CLAS 4109 (3) Ancient Italian Painting
Explores the problems, theories and methods for understanding the iconography, styles, topologies, contexts and techniques of fresco wall painting in ancient Italy from the 6th century B.C.E. to the 4th century C.E. Topics covered include Etruscan tomb paintings, late Republican and early imperial fresco paintings from Rome and Campania and later Roman wall paintings, including the painted images in ancient catacombs. Previous course work on ancient Italy or the history of pre-modern art is highly recommended.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 5109 and ARTH 4109 and ARTH 5109
Recommended: Prerequisite CLAS 1509 or ARTH 1509 or CLAS 2049 or ARTH 2049.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art and Archaeology

CLAS 4110 (3) Greek and Roman Epic
Students read in English translation the major epics of Graeco-Roman antiquity such as the Iliad, Odyssey, Argonautica, Aeneid, and Metamorphoses. Topics discussed may include the nature of classical epic, its relation to the novel, and its legacy. No Greek or Latin required.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 5110 and HUMN 4110
Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Literature, Culture, and Thought
CLAS 4119 (3) Roman Sculpture
Examines ancient Roman sculpture, emphasizing the display, iconography, and production of private and public monuments in the Roman Empire. Explores sculpture as evidence for historical developments, societal and gender attitudes, and state ideologies in the ancient Roman world.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 5119 and ARTH 4119 and ARTH 5119
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art and Archaeology

CLAS 4120 (3) Greek and Roman Tragedy
Intensive study of selected tragedies of Aeschylus, Sophocles, Euripides and Seneca in English translation. No Greek or Latin required.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 5120 and HUMN 4120
Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Literature, Culture, and Thought

CLAS 4129 (3) Aegean Art and Archaeology
Detailed study of the cultures of prehistoric Greece, the Cycladic Islands and Crete, their art and archaeology and their history within the broader context of the eastern Mediterranean, from earliest human settlement to the collapse of the Bronze Age at about 1100 B.C.E. Emphasis is on palace states.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 5129 and ANTH 4129 and ANTH 5129 and ARTH 4129
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art and Archaeology

CLAS 4130 (3) Greek and Roman Comedy
Studies Aristophanes, Plautus, and Terence in English translation. No Greek or Latin required.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 5130 and ANTH 4130 and ANTH 5130
Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Literature, Culture, and Thought

CLAS 4139 (3) Greek Vase Painting
A comprehensive overview of Greek vase painting, from prehistoric through the fourth century B.C.E. Emphasis is on learning the development of primary decorative styles and on refining skills of visual analysis, scholarly research, critical thinking, oral commentary and written presentation.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 5139 and ARTH 4139 and ARTH 5139
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art and Archaeology

CLAS 4140 (3) The Greek and Roman Novel
Studies a number of complete Greek and Roman novels from Classical Antiquity and their predecessors and contemporary neighbors in the genres of Greek prose fiction. Ancient texts in English translation.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 5140 and HUMN 4131
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Literature, Culture, and Thought

CLAS 4149 (3) Greek Cities and Sanctuaries
Examines Greek architecture in context, from the ninth century B.C.E. into the Hellenistic period, considering the use of space, both in religious and in civic settings and using texts as well as material culture. Emphasis is on developing analytical skills.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 5149 and ARTH 4149
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art and Archaeology

CLAS 4169 (3) Topics in Ancient and Classical Art and Archaeology
In-depth consideration of an aspect of ancient Mediterranean culture. Topics vary and may include ancient wall painting, Greek sculpture, artists and patrons, the ancient Near East, Egyptian art and archaeology, or Etruscan art and archaeology.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 5169 and ARTH 4169 and ARTH 5169
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art and Archaeology

CLAS 4199 (3) Roman Architecture
Examines the designs, functions and construction methods of ancient Roman towns, temples, baths, houses and civic structures, as well as utilitarian structures, including roads and aqueducts. Emphasizes Roman architectural forms and spaces as vehicles for political propaganda and empire consolidation.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 5199 and ARTH 4199
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art and Archaeology

CLAS 4209 (6) Classical Archaeological Field Methods
Offers experiential learning in theories and methods of archaeological fieldwork in the western Argolid in Greece. Applies methods for extensive survey, stratigraphic excavation, GIS modeling, ceramic analysis, numismatic analysis, architectural studies, artifact and data processing and documentation. Offered abroad only.
Equivalent - Duplicate Degree Credit Not Granted: ARTH 4209 and CLAS 5209
Repeatable: Repeatable for up to 12.00 total credit hours.
Recommended: Prerequisites CLAS 1509 or ARTH 1509 or CLAS/ ARTH 2039 or CLAS/ARTH 2049.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art and Archaeology

CLAS 4229 (3) Ancient Egyptian Art and Archaeology
Archaeology of ancient Egypt in light of recent excavations; the history of excavations of the different sites; and the art of ancient Egypt through time. Formerly ANTH 4420.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 5229 and ARTH 4229 and ARTH 5229
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art and Archaeology
CLAS 4269 (3) Art and Archaeology of the Ancient Near East
Examines civilizations of the Iran-Iraq region from the rise of urbanism in Mesopotamia through the era of the first 'world empire,' Achaemenid Persia. Emphasizes the material record of religious and state institutions of the ancient Near East, especially monuments that illustrate concepts of kingship. Explores notions of style, symbolism, visual rhetoric, text-image synthesis, patronage, creativity and roles of artists.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 5269 and ARTH 4269 and ARTH 5269
Recommended: Prerequisite CLAS 1509 or ARTH 1509.
Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Diversity-Global Perspective
Departmental Category: Art and Archaeology
Departmental Category: Asia Content

CLAS 4761 (3) Roman Law
Studies the constitutional and legal history of ancient Rome; emphasizes basic legal concepts and comparisons with American law. No Greek or Latin required.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 5761 and HIST 4761 and HIST 5761
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Ancient History

CLAS 4840 (1-4) Independent Study
No Greek or Latin required.
Repeatable: Repeatable for up to 7.00 total credit hours.
Additional Information: Departmental Category: Literature, Culture, and Thought

CLAS 4849 (1-3) Independent Study
Repeatable: Repeatable for up to 7.00 total credit hours.
Additional Information: Departmental Category: Art and Archaeology

CLAS 4852 (1-6) Honors Thesis
Repeatable: Repeatable for up to 6.00 total credit hours.
Additional Information: Arts Sciences Honors Course
Departmental Category: Classical Philology

GREK 1013 (4) Beginning Classical Greek 1
For students with no previous knowledge of Greek. Introduces basic grammar and vocabulary.
Additional Information: Arts Sci Core Curr: Foreign Language
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Foreign Language
Departmental Category: Greek

GREK 1023 (4) Beginning Classical Greek 2
Completes the presentation of grammar and introduces reading of literature.
Recommended: Prerequisite GREK 1013.
Additional Information: Arts Sci Core Curr: Foreign Language
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Foreign Language
Departmental Category: Greek

GREK 3013 (1) Readings in the Greek New Testament and Septuagint
Readings in ancient (koine) Greek from the New Testament and the Septuagint. Students aim to achieve fluency in reading and to enrich their knowledge of key terms and ideas borrowed from the Greek past in the early Christian tradition. Formerly CLAS 3013.
Repeatable: Repeatable for up to 4.00 total credit hours.
Recommended: Prerequisites GREK 1013 and GREK 1023.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Greek

GREK 3113 (3) Intermediate Classical Greek 1
Reading of selected prose texts of authors in ancient Greek such as Plato, Xenophon, Lysias, and selections from the Greek New Testament. Incorporates review of grammar.
Repeatable: Repeatable for up to 6.00 total credit hours.
Recommended: Prerequisites GREK 1013 and GREK 1023.
Additional Information: Arts Sci Core Curr: Foreign Language
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Foreign Language
Departmental Category: Greek

GREK 3123 (3) Intermediate Classical Greek 2
Reading of selections from Homer or a Greek tragedy in ancient Greek, with attention to literary form and context as well as advanced grammar and syntax.
Repeatable: Repeatable for up to 6.00 total credit hours.
Recommended: Prerequisites GREK 1013 and GREK 1023 and GREK 3113.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Greek

GREK 4013 (3) Topics in Greek Prose
Author or topic in ancient Greek specified in the online Schedule Planner (e.g., Thucydides, Herodotus, Plato, Aristotle, Attic Orators).
Equivalent - Duplicate Degree Credit Not Granted: GREK 5013
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Greek

GREK 4023 (3) Topics in Greek Poetry
Author or topic in ancient Greek specified in the online Schedule Planner (e.g., Homer, Hesiod, lyric poetry, tragedy, comedy).
Equivalent - Duplicate Degree Credit Not Granted: GREK 5023
Repeatable: Repeatable for up to 9.00 total credit hours.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Greek

GREK 4093 (3) Survey of Greek Literature
Greek literary history in ancient Greek from Homer to the Hellenistic age.
Equivalent - Duplicate Degree Credit Not Granted: GREK 5093
Recommended: Prerequisites GREK 3113 and GREK 3123.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Greek

GREK 4843 (1-3) Independent Study
Repeatable: Repeatable for up to 7.00 total credit hours.
Additional Information: Departmental Category: Greek

LATN 1014 (4) Beginning Latin 1
Introduces basic grammar and vocabulary. For students with no previous knowledge of Latin.
Additional Information: Arts Sci Core Curr: Foreign Language
Arts Sci Gen Ed: Foreign Language
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Latin

LATN 1024 (4) Beginning Latin 2
Continues the presentation of grammar, incorporates review of fundamentals, and introduces the reading of literature. For students with previous experience of Latin.
Recommended: Prerequisite LATN 1014 or equivalent.
Additional Information: Arts Sci Core Curr: Foreign Language
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Foreign Language
Departmental Category: Latin
LATN 2004 (3) Accelerated Latin 1
Intensive introductory course in Latin including a survey of grammar and practice reading and writing. No previous knowledge of Latin is required.
**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Latin

LATN 2044 (3) Accelerated Latin 2
Continuation of LATN 2004. Reading of advanced texts: Caesar, Cicero, Ovid and others.
**Recommended:** Prerequisite LATN 2004.

LATN 2114 (4) Intermediate Latin 1
Completes the presentation of grammar and continues the reading of literature, from a variety of authors of poetry and prose.
**Recommended:** Prerequisite LATN 1024 or equivalent.
**Additional Information:** GT Pathways: GT-AH4 - Arts Hum: Foreign Languages
Arts Sci Core Curr: Foreign Language
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Foreign Language
Departmental Category: Latin

LATN 2124 (4) Intermediate Latin 2
Selections from Virgil's Aeneid with attention to literary form and context as well as advanced grammar and syntax.
**Recommended:** Prerequisite LATN 2114.
**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Latin

LATN 3014 (3) Introduction to Latin Prose
Author or topic in Latin specified in the online Schedule Planner (e.g., Cicero, Livy, Pliny). Formerly CLAS 3014.
**Repeatable:** Repeatable for up to 9.00 total credit hours.
**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Latin

LATN 3024 (3) Introduction to Latin Poetry
Author or topic in Latin specified in the online Schedule Planner (e.g., Virgil, Ovid, Catullus, Horace).
**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Latin

LATN 3041 (3) Topics in Latin Prose
Author or topic in Latin specified in the online Schedule Planner (e.g., Roman historians, Roman epistemology, Cicero, Roman novel).
**Equivalent - Duplicate Degree Credit Not Granted:** LATN 5014
**Repeatable:** Repeatable for up to 9.00 total credit hours.
**Recommended:** Prerequisites LATN 3014 and LATN 3024.
**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Latin

LATN 4014 (3) Topics in Latin Prose
Author or topic in Latin specified in the online Schedule Planner (e.g., Roman historians, Roman epistemology, Cicero, Roman novel).
**Equivalent - Duplicate Degree Credit Not Granted:** LATN 5014

LATN 4044 (3) Topics in Latin Poetry
Author or topic specified in Latin specified in the online Schedule Planner (e.g., Roman elegy, Neronian poetry, Lucretius, Roman satire).
**Equivalent - Duplicate Degree Credit Not Granted:** LATN 5044
**Repeatable:** Repeatable for up to 9.00 total credit hours.
**Recommended:** Prerequisites LATN 3014 and LATN 3024.
**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Latin

LATN 4084 (3) Survey of Roman Literature Part 2: Imperial
Covers Imperial Roman literary history from the mid-late Augustan Period to the start of Late Antiquity. Students read principal surviving works of Imperial Roman poetry and prose in the original Latin.
**Equivalent - Duplicate Degree Credit Not Granted:** LATN 5084
**Recommended:** Prerequisites LATN 3014 and LATN 3024.
**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Latin

LATN 4094 (3) Survey of Roman Literature Part 1: Republican to Augustan
Introduces Roman literary history from its origins to the 30s BCE. Students read principal surviving works of the Roman Republican poetry and prose in the original Latin.
**Equivalent - Duplicate Degree Credit Not Granted:** LATN 5094
**Recommended:** Prerequisites LATN 3014 and LATN 3024.
**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Latin

LATN 5084 (3) Latin Teaching Methods: Open Topics
Covers specialized topics in Latin pedagogy specified in the online Schedule Planner.
**Equivalent - Duplicate Degree Credit Not Granted:** LATN 5084
**Recommended:** Prerequisites LATN 3014 and LATN 3024.
**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Latin

LATN 5094 (1-3) Independent Study
Formerly CLAS 4844.
**Repeatable:** Repeatable for up to 7.00 total credit hours.
**Additional Information:** Departmental Category: Latin

**Classics - Bachelor of Arts (BA)**

Through consultation with the undergraduate advisor, the bachelor's degree in classics is tailored to the student's interests in the field. Major and minor programs can be arranged with a concentration in either Latin or Greek or a combination of the two, with a focus on classical literature, culture and thought (including mythology, literature, philosophy, religion, art, archaeology and history), classical history, art and archaeology, or classical civilization. Prospective majors and minors should consult with the undergraduate advisor.

The undergraduate degree in classics emphasizes knowledge and awareness of:

- the fundamental outlines of the history of Greek and Roman literature, from Homer to the end of classical antiquity;
- the historical and cultural contexts of particular works; and
- the art, religion and philosophy of ancient Greece and Rome and their roles in world cultural history.

In addition, students completing the degree in classics are expected to acquire the ability and skills to:

- read, understand and interpret written documents and works of literature in ancient Greek or Latin where relevant, as well as in translation;
• communicate in spoken and written form with adequate clarity and complexity for the relevant audience; and
• read and think critically.

Interested students are encouraged to consult the department’s Undergraduate [webpage](https://www.colorado.edu/classics/undergraduate/) for more information.

## Requirements

### Program Requirements

Students must complete the general requirements of the College of Arts and Sciences and the required courses listed below. Students must complete the major requirements in one of the tracks below, including:

- a minimum of 36 credit hours, all with a grade of a C- or better, in the major;
- a minimum 2.000 GPA for courses in the major; and
- a minimum of 18 upper-division credit hours in the major.

### Track I: Greek, Latin or Greek and Latin

1 Students should designate either Greek or Latin as the primary field of language study. Only courses above the introductory sequence (GREK 1013-GREK 1023 and LATN 1014-LATN 1024) of the primary language count towards the major. If a student also takes the second language, all credit hours taken in that language as well as any other Greek and Latin credit hours above the 1000-level count toward the major. If a student has learned the equivalent of the introductory sequence in the primary language before beginning language study at CU and begins language instruction in the department at the 2000-level or above, all credit hours in both languages immediately count toward the major.

With the approval of the undergraduate faculty advisor, additional Greek or Latin courses may be substituted in place of classical literature, culture and thought or ancient history, art and archaeology courses.

An additional 24 elective hours in any of the previously named categories: Literature Culture and Thought, History, Art and Archaeology, Greek or Latin.

Total Credit Hours 36

**Graduating in Four Years**

Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of "adequate progress" as it is used here refers only to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress towards graduation in classics within four years, students should meet the following requirements:

- Declare the classics major by the beginning of the second semester.
- Students must consult frequently with a major advisor to determine adequate progress toward completion of the major.

**Recommended Four-Year Plan of Study**

Through the required coursework for the major, students will fulfill all 12 credits of the Arts & Humanities area of the Gen Ed Distribution Requirement.

---

1 At least 3 credits. All those preparing themselves for the major must take one language course. Students with no prior knowledge of Greek or Latin may take one semester or more of the beginning sequence of either language (GREK 1013 or LATN 1014). Students who have studied Latin or Greek prior to entering the major may instead take a more advanced-level course in Latin (LATN 2114 or higher) or Greek (GREK 3113 or higher). Consult with the Latin Program Coordinator or the undergraduate faculty advisor to determine the right level for you. Additional Greek or Latin courses may be substituted in place of literature, culture and thought, history, or art and archaeology courses.

With the approval of the undergraduate faculty advisor, additional Greek or Latin courses may be substituted in place of classical literature, culture and thought or ancient history, art and archaeology courses.

Classics BA: Learning Outcomes

By studying the literary, material and intellectual culture of the ancient world, students learn to think critically, argue effectively and communicate clearly in both speech and writing. More broadly, a rigorous and methodical engagement with the literature, history, thought, and material culture of antiquity fosters thoughtful and creative reflection on contemporary society and the world at large.

Through the study of classics, students have the opportunity to:

- Read and interpret, with attention to literary and historical context, a variety of texts in both Greek and Latin and in translation.
- Engage with the complex intellectual, moral and historical questions presented by ancient cultures that are simultaneously familiar and strange.
- Identify and contextualize ancient art, architecture and artifacts while acquiring familiarity with interpretive strategies and current research methods in the field (survey, excavation, GIS and other digital technologies).
- Recognize historical narrative as a form of argument, built from evidence and interpretation and open to rigorous questioning.
- Apply various categories of evidence—literary, historical, philosophical, religious and archaeological—to the interpretation of the complex and multicultural society of the ancient Mediterranean world, and by extension, that of our own day.
- Assess how modern authors interpret and deploy primary (written or material) and secondary sources in forming scholarly narratives and arguments.
- Conduct research, which includes navigating libraries, databases and archives; identifying, locating, and managing sources; and synthesizing significant amounts of information.
- Articulate arguments that weigh multiple forms of evidence, in oral and written form.

Bachelor’s–Accelerated Master’s Degree Program(s)

The Bachelor’s–Accelerated Master’s (BAM) degree program options offer currently enrolled CU Boulder undergraduate students the opportunity to receive a bachelor’s and master’s degree in a shorter period of time. Students receive the bachelor’s degree first, but begin taking graduate coursework as undergraduates (typically in their senior year). Because some courses are allowed to double count for both the bachelor’s and the master’s degrees, students receive a master’s degree in less time and at a lower cost than if they were to enroll in a stand-alone master’s degree program after completion of their baccalaureate degree. In addition, staying at CU Boulder to pursue a bachelor’s–accelerated master’s program enables students to continue working with their established faculty mentors.

BA and MA in Classics

The five-year Bachelor’s–Accelerated Master’s degree program in Classics is designed for students who enter the University of Colorado ready to take courses in Latin or Greek at the 3000-level or above, and who wish to prepare themselves for application to competitive PhD programs in Classics. Students will normally need to study both Latin and Greek in order to meet their course requirements within five years: course offerings in just one language will normally not be sufficient, and competence in both languages is in any case necessary for competitive entry to PhD programs in Classics, which is the goal of this degree. The five-year degree combines the BA in Greek and/or Latin (Track I) with the MA in classics with concentration in Greek or Latin (Program I), Plan II (no thesis). Students with strong research interests may be able to complete the BA with honors or the MA with concentration in Greek or Latin, Plan I (with thesis).

Admissions Requirements

In order to gain admission by application in the second semester of the sophomore year to the BAM program named above, a student must meet the following criteria:

- Have a cumulative GPA of 3.0 or higher
- Have completed a minimum of 60 credit hours of coursework
- Transfer students must have completed a minimum of 24 credit hours at CU Boulder

Program Requirements

Students may take up to and including 12 hours of graduate credit while in the undergraduate program which can later be used toward the
master's degree. However, only 6 credits may be double counted toward the bachelor's degree and the master's degree; those 6 credits must be at the graduate level (5000 level or above) and may not be used to diminish the language class requirement for either degree. Students must apply to graduate with the bachelor's degree, and apply to continue with the master's degree, early in the semester in which the undergraduate requirements will be completed.

If you are interested in the BAM degree program, please contact the Classics graduate program for more information.

Classics - Minor

The department offers courses in language and literature, ancient history, art and archaeology, and philosophy within several programs of study. Classics ranks among the most vibrant programs in humanistic studies at the University of Colorado, a department in which students at every level are challenged to integrate the world of scholarship into their daily lives. The department offers a minor in classics that can satisfy your needs.

Requirements

Program Requirements

The department offers a minor in classics for students who would like to study the world of antiquity but don't have the time to devote to a major. Students are subject to the College of Arts and Sciences minor requirements, including:

- a minimum of 18 credit hours, all with a grade of C- or better, in the minor,
- a minimum of 9 upper-division credit hours in the minor, and
- a minimum 2.00 GPA for courses in the minor.

Students can concentrate in either classical language/literature or classical studies. The specific requirements for completion of the classics minor are as follows:

Students should designate either Greek or Latin as the primary field of language study. Only courses above the introductory sequence (GREK 1013/GREK 1023 and LATN 1014/LATN 1024) of the primary language count towards the minor. If a student also takes the second language, all credit hours taken in that language as well as any other Greek and Latin credit hours above the 1000 level count toward the minor. If a student has learned the equivalent of the introductory sequence in the primary language before beginning language study at CU and begins language instruction in the department at the 2000 level or above, all credit hours in both languages immediately count toward the minor.

With the approval of the undergraduate faculty advisor, additional upper-division Greek or Latin courses may be substituted in place of classical literature, culture and thought or ancient history, art and archaeology courses.

**Additional Electives**

Select an additional 6 hours in any of the previously named categories or Greek or Latin.

**Total Credit Hours**: 18

---

1 Greek and/or Latin courses may be substituted in place of courses in the three subject groups: Classical Literature, Culture and Thought; Ancient History; and Art and Archaeology.

**Cognitive Science**

Cognitive science is the study of human knowledge, of which one aspect is the study of how knowledge is acquired, stored and represented in the mind, including the mind's underlying biological mechanisms. Another aspect of cognitive science concerns how knowledge is understood,
remembered, communicated and used in the performance of activities, including the acquisition and application of skills and information. This latter aspect provides the practical applications of cognitive science, and thereby ensures a demand for graduates in both academic and industrial markets.

Undergraduate students majoring in computer science; information science, integrative physiology; linguistics; philosophy; psychology and neuroscience; education; speech, language, hearing sciences may be interested in extending the breadth of their undergraduate studies to include the cognitive sciences and earn an undergraduate Certificate in Cognitive Science.

Training for graduates in cognitive science prepares students admirably for many of the fields that are targeted as the major growth fields of the 21st century: telecommunications, information processing, medical analysis, data retrieval, education and multimedia services.

The undergraduate program includes courses in the eight core departments with basic courses and two of five possible advanced skill sequences of courses. For more information, visit the Institute of Cognitive Science’s Undergraduate Program (http://www.colorado.edu/ics/undergraduate-program/) webpage.

Certificate
• Cognitive Science - Certificate (p. 222)

Cognitive Science - Certificate

Undergraduate students majoring in psychology and neuroscience; philosophy; linguistics; computer science; speech, language and hearing sciences; education; integrative physiology; information science; or architecture and planning may be interested in extending the breadth of their undergraduate studies to earn a certificate in cognitive science.

Training in cognitive science prepares students admirably well for many of the fields that are targeted as the major growth fields of the 21st century: telecommunications, information processing, medical analysis, data retrieval, education and multimedia. As the world is enveloped by the information age, cognitive scientists will be uniquely positioned to deal with this information.

Students interested in the program can learn more on the department’s Undergraduate Program (https://www.colorado.edu/ics/undergraduate-program/) webpage.

Requirements

To earn the certificate, students must take at least six courses for a minimum of 18 credit hours. Students must receive a grade of C or better in all courses for the certificate and must have an overall grade point average of 3.0 or better.

Additional credit hours may be required as prerequisites to classes chosen to fulfill the certificate plan of study, but these courses usually also fulfill degree requirements. Proposed substitute courses must be preapproved by the ICS Academic Director.

Distributed Studies Program

Admission to the disciplinary and divisional track of the distributed studies major requires completion of 60 credits or more, a one-year break in the student's academic career, and permission from the College of Arts & Sciences dean's office. The disciplinary and divisional track of the distributed studies major is intended for returning students who have accumulated a significant number of credits toward the completion of one or more arts and sciences majors, are not eligible to continue in any of those majors, and have taken a break in their academic career.

An individually structured track also is available in the distributed studies major. Admission to this track also requires permission from the College of Arts & Sciences dean's office. Students pursuing the individually structured track must work with a faculty member to construct a major that meets the college's minimum major requirements and that focuses on some aspect of the arts and sciences not adequately addressed by any other major offered by the college. Students pursuing this track must write and defend a thesis based on original scholarly or creative work.

For more information about either of the tracks in the distributed studies major please consult with your Arts and Sciences Academic Advisor.

Ecology and Evolutionary Biology

Ecology seeks to understand the processes that control the abundance and distribution of organisms and how they interact with one another in a changing environment. Evolutionary biology provides a unifying conceptual framework for all of biology, including the characteristics of organisms and biological diversity. Taken together, ecology and evolutionary biology form a fundamental, broad, diverse and interdisciplinary area of scientific inquiry. Study in both areas is necessary for understanding the complex biological issues of today, including fighting diseases, understanding of the responses of life and humankind to Earth’s changing environment and learning how species develop, thrive and decline. Also, ecology and evolutionary biology are working toward solving some of the world's most demanding problems, including sustainability and the future of life on earth, human health and welfare and wise stewardship of our planet. Students majoring in Ecology and Evolutionary Biology (EBIO) apply scientific approaches to issues in ecology and evolution, with an emphasis on critical evaluation of the literature, generating and testing hypotheses, designing and carrying out experiments to test predictions and articulating, in oral or written form, the results of investigations.

EBIO majors include students who:

- Have strong and compelling interests in the natural world and who are interested in making a difference.
- Are interested in pursuing advanced graduate degrees in science, especially biology.
- Want careers in the areas of natural resources management, environmental consulting, environmental law, environmental science, science teaching and scientific journalism, among other professions.
- Are passionate about making a difference in the lives of others by improving their physical and mental health.

- Are interested in many different areas of biology, from the molecular to ecosystem levels.
- Are fascinated with the complexity and diversity of nature.

The Bachelor of Arts in Ecology and Evolutionary Biology provides excellent training, education and experience, preparing students for many successful careers and for admission to and success in graduate study or medical school and other health professions because:

- Ecology and evolution are subjects of central importance for understanding the ways all organisms live, grow and survive—everything from microbes to humans.
- The department and its classes provide students a broad learning experience in the biological sciences.
- The department's faculty provide EBIO majors with excellent classes and research opportunities.

Course code for this program is EBIO.

Courses

EBIO 1010 (3) Introduction to Statistics and Quantitative Thinking for Biologists
Focuses on the collection, visualization and analysis of data that are relevant for advanced critical thinking, student-directed learning, and the development of quantitative analysis skills, with an emphasis on using R and examples from ecology and evolutionary biology.

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

EBIO 1020 (1) Introduction to Ecology and Evolutionary Biology
Introduces students to EBIO. Provides an overview of the major and how it differs from other biology programs; how to get involved in clubs, research, and/or internship opportunities; strategies for succeeding in EBIO courses; and career options. This is a first-year colloquium course specifically designed for freshman and other students exploring their educational and career opportunities.

Grading Basis: Pass/Fail

EBIO 1040 (3) Biology: A Human Approach 2
Lect. Continues EBIO 1030, focusing on the function of the human body, and maintenance of dynamic equilibrium in the internal environment in the face of a continually changing external environment. Discusses factors influencing these homeostatic conditions and how and why they change. Recommended for nonscience majors.

Recommended: Prerequisite EBIO 1030 (minimum grade C).

Additional Information: Arts Sci Core Curr: Natural Science Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences

EBIO 1100 (3) Biology and Society
Lect. Studies the dynamic relationships between the biological sciences and society. Areas of inquiry include interconnections between ecological and evolutionary theory and concepts and emerging questions being raised on a societal level. Students will explore topics such as human populations and sexual reproduction; biological factors affecting sociability and social patterns; environmental change with a focus on global biodiversity and the services to people; natural resource management; and public health. Recommended for majors and non-majors.

Prerequisites: Requires corequisite course of EBIO 1110.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

EBIO 1110 (1) Biology and Society Laboratory
One two-hour lab per week. Provides experiments and exercises relating to concepts presented in EBIO 1100. Recommended for majors and non-majors. When taken with EBIO 1100, meets the MAPS requirement for natural science: lab.

Prerequisites: Requires corequisite course of EBIO 1100.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Arts Sci Gen Ed: Distribution-Natural Sci Lab

EBIO 1210 (3) General Biology 1

Additional Information: GT Pathways: GT-SC2 -Natural Physicl Sci:Lec Crse w/o Req Lab
Arts Sci Core Curr: Natural Science Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences
MAPS Course: Natural Science

EBIO 1220 (3) General Biology 2
Provides a concentrated introduction to organisms, homeostasis, development, behavior, and ecology. Emphasizes fundamental principles, concepts, facts, and questions. Intended for science majors.

Recommended: Prerequisite EBIO 1210 (minimum grade C).

Additional Information: GT Pathways: GT-SC2 -Natural Physicl Sci:Lec Crse w/o Req Lab
Arts Sci Core Curr: Natural Science Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences

EBIO 1230 (1) General Biology Laboratory 1
One 3-hour lab per week. Consists of experiments and exercises to provide an extension of basic concepts and scientific approaches presented in General Biology 1. Intended for science majors.

Recommended: Prerequisite or corequisite EBIO 1210 (minimum grade C).

Additional Information: GT Pathways: GT-SC1 - Natural Physcl Sci:Lec Crse w/ Req Lab
Arts Sci Core Curr: Natural Science Lab
Arts Sci Gen Ed: Distribution-Natural Sci Lab
Arts Sci Gen Ed: Distribution-Natural Sciences
MAPS Course: Natural Science
MAPS Course: Natural Science Lab or Lab/Lec

EBIO 1240 (1) General Biology Laboratory 2
One 3-hour lab per week. Consists of experiments and exercises to provide an extension of basic concepts and scientific approaches presented in General Biology 2. Intended for science majors.

Recommended: Prerequisite or corequisite EBIO 1220 (minimum grade C).

Additional Information: GT Pathways: GT-SC1 - Natural Physcl Sci:Lec Crse w/ Req Lab
Arts Sci Core Curr: Natural Science Lab
Arts Sci Gen Ed: Distribution-Natural Sciences
Arts Sci Gen Ed: Distribution-Natural Sci Lab

EBIO 1250 (4) Introduction to Ecology and Evolutionary Biology Research
Introduces students to research in ecology and evolutionary biology topics in the context of investigations about Boulder’s local historic apple trees. Students will learn about the genetics, physiology, and urban ecology of the trees in the lecture and have the opportunity to research one of these topics more in depth in the laboratory courses. Results from the research on Boulder’s Apples will be reported back to the Boulder community by student researchers.

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

EBIO 1300 (1-3) Topics in Biological Sciences
Covers special topics in biology for freshmen or nonmajors. Introduces scientific methods and principles in biology, as well as issues of current interest in biology. Does not count toward the major in EBIO.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

EBIO 1940 (3) Introduction to Scientific Writing
Introduces first year students to college writing, focusing on developing academic research and writing skills of particular interest to science students. Emphasizes habits of mind in topic invention, drafting, revision and writing style, as well as critical thinking and information literacy.

Prerequisites: Requires experience in the sciences.

Additional Information: Arts Sci Gen Ed: Written Communication
Arts Sci Gen Ed: Written Communication-Lower
**EBIO 2010 (1-3) Environmental Issues and Biology**
Lect. Describes how the natural environment is currently stressed by a variety of human actions. Examines the nature of these environmental problems and their impact on living organisms, both human and nonhuman species.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**EBIO 2040 (4) Principles of Ecology**
Lecture and laboratory. Introduces principles of ecology, emphasizing patterns and processes at various levels of biological organization. Scope global, but examples often from local environment. Laboratory emphasizes techniques of field biology. Uses animals and/or animal tissues.

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 2640 and ENVS 2000

**Recommended:** Prerequisites EBIO 1030 and EBIO 1040 and EBIO 1050 or EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 (minimum grade C).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences
Arts Sci Gen Ed: Distribution-Natural Sci Lab

**EBIO 2070 (4) Genetics: Molecules to Populations**
Lect. and rec. Covers principles of genetics and developmental biology at levels of molecules, cellular organelles, individuals and populations; asexual and sexual life cycles; heredity. Recitations allow discussion of genetics problems and implications of genetic principles and provide demonstrations and simulations of genetic processes. Intended for sophomore majors in EBIO.

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 2640

**Recommended:** Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 (minimum grade C).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences
Arts Sci Gen Ed: Distribution-Natural Sci Lab

**EBIO 2090 (3) Tropical Island and Marine Ecology**
Examines fundamental concepts of marine ecology, emphasizing organismal diversity, species interactions, dispersal, colonization, physiology and adaptations. Includes study of beach and coral formation, island organisms and their population dynamics. Students may also register for an optional 1 credit, one week, tropical island and coral reef trip that complements the lecture portion of the class but has an additional cost.

**Recommended:** Prerequisite EBIO 1220 (minimum grade C).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**EBIO 2091 (3) Field Studies in Marine and Island Ecology and Oceanography**
Investigates tropical island and marine ecology as well as all four disciplines of oceanography. A three-credit course focused on a tropical island ecology and oceanography field trip that complements the lecture portion of EBIO 2090 and ATOC 3070 with an additional cost. Examines fundamental concepts of marine ecology, emphasizing organismal diversity, species interactions, study of beach and coral formation, island formation, organisms and their population dynamics. The course consists of a one-week field trip to the Keys Marine Laboratory in the Florida Keys and once-weekly class room meeting (of variable duration from 1-4 hours) throughout the semester.

**Requisites:** Requires a corequisite course of EBIO 2090 or ATOC 3070 or GEOL 3070.

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences
Arts Sci Gen Ed: Distribution-Natural Sci Lab

**EBIO 2640 (5) Honors Principles of Ecology**
Lect., lab, and rec. Introduces principles of ecology, emphasizing patterns and processes at various levels of biological organization. Scope global, but examples often from local environment. Laboratory emphasizes techniques of field biology. Uses animals and/or animal tissues.

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 2040 and ENVS 2000

**Recommended:** Prerequisites EBIO 1030 and EBIO 1040 and EBIO 1050 or EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 (minimum grade C).

**Additional Information:** Arts Sciences Honors Course
Arts Sci Gen Ed: Distribution-Natural Sciences
Arts Sci Gen Ed: Distribution-Natural Sci Lab

**EBIO 2840 (1-6) Independent Study: Lower Division**

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**EBIO 3010 (1-2) Teaching Biology**
Provides an opportunity to assist in teaching of specific lecture or laboratory section in EBIO under direct faculty supervision. Students must first make arrangements with the appropriate faculty member and turn in a form to the EBIO office.

**Repeatable:** Repeatable for up to 4.00 total credit hours. Allows multiple enrollment in term.

**EBIO 3040 (4) Conservation Biology**
Applies principles of population ecology, population genetics, biogeography, animal behavior, and paleobiology to the maintenance of biodiversity and natural systems. The resulting theory is then applied to conservation policy and management techniques.

**Equivalent - Duplicate Degree Credit Not Granted:** ENVS 3040

**Recommended:** Prerequisite EBIO 2040 or EBIO 2640 or ENVS 2000 (minimum grade C).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**EBIO 3080 (4) Evolutionary Biology**
Lect. and lab. Emphasizes the fundamental evolutionary concepts that provide explanations for the diversification of life on Earth. Specific topics include the evidence for evolution, adaptation by natural selection, speciation, systematics, molecular and genome evolution, and macroevolutionary patterns and processes. Recitations allow students to explore specific topics in more depth and smaller groups.

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 3680

**Recommended:** Prerequisites EBIO 1210 and EBIO 1220 (minimum grade C).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences
Arts Sci Gen Ed: Distribution-Natural Sci Lab

**EBIO 3110 (3) Population and Community Ecology**

Presents principles of ecology that relate to the niche, population growth, metapopulations, population interactions (within and between trophic levels), community structure and development, landscape ecology and species diversity.

**Recommended:** Prerequisite EBIO 1240 or EBIO 2640 (minimum grade C).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences
EBIO 3170 (3) Mountain Ecology and Conservation
Focuses on the ecology of mountain environments around the world, including climatic gradients, plant and animal diversity and distributions, habitat zonation, evolutionary processes, and various aspects of montane conservation from habitat change to climate change.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Recommended: Prerequisites EBIO 1210 and EBIO 1220 and EBIO 2040 (minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

EBIO 3180 (3) Global Ecology
Lect. Involves study of ecological principles and problems at the biosphere level. Presents a worldwide approach to populations, biotic resources, ecologic interactions, land use, deforestation, desertification, species extinctions, pollution, environmental quality, global change, and environmental ethics.
Recommended: Prerequisites EBIO 1210 and EBIO 1220 (minimum grade C-).
Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence

EBIO 3190 (3) Tropical Marine Ecology
Lect. Examines the biology and ecology of marine ecosystems, emphasizing those occurring in tropical regions such as coral reefs. Studies how these ecosystems are changing and the future impact of human stress on the marine environment.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Recommended: Prerequisite any two-semester introductory biology course.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

EBIO 3240 (4) Animal Behavior
Lect. and lab. Topics include basic concepts and history, methods of study, ethical issues, neurobiology, behavior, the development of behavior, predator-prey relationships, communication, aggression and dominance, mating systems, cognitive ethology, and parental care. When possible, life-history strategies, the evolution of behavior, and behavioral ecology are stressed. Uses animals and animal tissues.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Recommended: Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 (minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

EBIO 3400 (3) Microbiology
Surveys distinguishing characteristics of microorganisms based on structural-functional relationships, taxonomy, growth and physical-chemical agents of control including antibiotics, metabolism and genetics. Introduces applied microbiology emphasizing infectious diseases, basic concepts of immunology and microbial ecology. Uses animals and/or animal tissues.
Recommended: Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 (minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

EBIO 3410 (1) Microbiology Lab
Accompanies EBIO 3400.
Requisites: Requires a prerequisite or corequisite course of EBIO 3400 (minimum grade D-).
Grading Basis: Letter Grade

EBIO 3523 (3) The Art and Strategy of Science Communication: Branding Climate Change
Integrating the science of climate change and science communication with the research, strategy and execution practices of strategic communication (e.g., advertising and public relations).
Equivalent - Duplicate Degree Credit Not Granted: APRD 3523 and ATLS 3523
Grading Basis: Letter Grade

EBIO 3590 (4) Plants and Society
A writing intensive course for majors and non-majors which acquaints students with the history of plant use in our society. Topics center on the evolving relationship between humans and plants as food sources, medicines, fuel, and other products, such as fibers and dyes.
Requisites: Requires prerequisite courses of EBIO 1100 or EBIO 1210 or EBIO 1220 or EBIO 1250 (minimum grade C).
Recommended: Prerequisite EBIO 3590.
Grading Basis: Letter Grade

EBIO 3630 (4) Parasitology
Lect. and lab. Surveys animal parasites, including life histories; emphasizes parasites of humans. Uses animals and/or animal tissues.
Recommended: Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 (minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

EBIO 3680 (5) Honors Evolutionary Biology
Lect., rec., and co-sem. Emphasizes the fundamental evolutionary concepts that provide explanation for the diversification of life on Earth. Specific topics include the evidence for evolution, adaptation by natural selection speciation, systematics, molecular and genome evolution, and macroevolutionary patterns and process. Recitations allow students to explore specific topics in more depth and smaller groups.
Equivalent - Duplicate Degree Credit Not Granted: EBIO 3080
Recommended: Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 and EBIO 2070 (minimum grade C-).
Additional Information: Arts Sciences Honors Course

EBIO 3850 (4) Animal Diversity: Invertebrates
Lect. and lab. Offers a broad study of the biology of the most diverse group of organisms on Earth. Areas include ecology, physiology, evolution and morphology of aquatic and terrestrial forms. Uses animals and/or animal tissues.
Recommended: Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 (minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

EBIO 3930 (1-6) Internship
Provides an academically supervised opportunity for upper-division students to work in public or private organizations. Projects are usually related to students’ career goals. Each project has both academic and work components. Pass/fail only.
Repeatability: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Grading Basis: Pass/Fail

EBIO 3940 (3) Written Communication in the Sciences
Focuses upon communication commonly practiced by scientists, with special emphasis on writing. Directs attention to scientists’ strategic use of written arguments, statistical data and visual representations. Prepares students for communication tasks within advanced study and professional work.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Core Curr: Written Communication
Arts Sci Gen Ed: Written Communication-Upper

EBIO 3980 (2) Seminar: Introduction to EBIO Honors
Offers an opportunity for students who are either exploring the option of writing an Honors thesis, or are in the process of conducting Honors research, to receive guidance on the process of thesis writing, evaluation and presentation of research results and thesis defense. Thesis requirements and the role of the A&S Honors Council will be discussed. Also offers the opportunity to hear practice defense talks from the graduating Honors candidates.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sciences Honors Course

EBIO 3990 (1-3) EBIO Honors Thesis Research
Provides an introduction to the departmental Honors program. Consists of individual library research on a potential Honors thesis topic under the guidance of a faculty mentor.
Requisites: Restricted to Ecology and Evolutionary Biology (EBIO) majors only.
Recommended: Prerequisites minimum 3.2 GPA and approval by departmental honors committee.

EBIO 4030 (3) Limnology
Examines the ecology of inland waters, including a detailed consideration of physical, chemical and biological properties of freshwater ecosystems: origins and major characteristics of lakes and streams, survey of chemical and nutrient cycles in freshwater habitats and survey of biotic composition of freshwater environments. Important themes in modern freshwater ecology are considered, including energy flow, trophic structure, eutrophication and management of freshwater ecosystems.
Equivalent - Duplicate Degree Credit Not Granted: EBIO 5030
Recommended: Prerequisites EBIO 1210 and EBIO 1220 (minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Arts Sci Gen Ed: Distribution-Natural Sci Lab

EBIO 4040 (3) Speciation
The process by which new species arise is fundamental to understanding life’s diversity, with implications for how we define and protect species. In this class, we will explore models of adaptive and non-adaptive speciation and how we test, find evidence for, and distinguish among these. Each class will include both a short lecture and discussion. Students will be able to choose and work on independent projects on any area of speciation research. Recommended Prerequisites: EBIO 1220 and EBIO 3080.

EBIO 4060 (3) Landscape Ecology
Studies distributional patterns of communities and ecosystems, ecological processes that affect those patterns, and changes in pattern and process over time. Consideration of spatial and temporal scales in ecological analyses is required to understand and predict response to broad-scale environmental change.
Equivalent - Duplicate Degree Credit Not Granted: EBIO 5060
Recommended: Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 and EBIO 2040 or EBIO 2640 (minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Arts Sci Gen Ed: Distribution-Natural Sci Lab

EBIO 4070 (3) DNA Methods in Ecology and Conservation Biology
Acquiring skill with molecular methods in ecology and conservation biology is most quickly accomplished with hands-on experience. Combines classroom lectures with collecting in the field and laboratory exercises to provide experience extracting DNA, amplifying DNA with the Polymerase Chain Reaction (PCR), designing FRC primers, sequencing DNA and editing and aligning sequences with the Sequencher software.
Requisites: Requires prerequisite course of EBIO 2070 (minimum grade C).
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Arts Sci Gen Ed: Distribution-Natural Sci Lab

EBIO 4080 (4) Freshwater Phycology
Algae are a non-monophyletic group of organisms that play critical roles in ecosystem structure and function. They have a long history of being used in a variety of ways by the human species, but are increasingly being applied to modern issues of understanding water quality and climate change, engineering at the nano scale and in the production of renewable biofuels.
Equivalent - Duplicate Degree Credit Not Granted: EBIO 5080
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Recommended: Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 (minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Arts Sci Gen Ed: Distribution-Natural Sci Lab

EBIO 4090 (3) Coral Reef Ecology
Combines classroom-based instruction in the Fall semester with an international, field-based SCUBA diving expedition to learn about the incredible coral reef ecosystems of the Caribbean (in early January). Students learn about and observe a variety of organisms that make the reef their home. The course covers threats to coral reefs worldwide as well as ongoing efforts aimed at conservation. Scuba certification required.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Recommended: Prerequisite any ecology course is a highly recommended.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sci Lab
Arts Sci Gen Ed: Distribution-Natural Sciences
EBIO 4100 (3) Advanced Ecology
Emphasizes specific aspects of ecology based on specialties of faculty. One or more courses are offered most semesters. Topics have included dynamics of mountain ecosystems, tundra ecology, ethnecology, population dynamics, tropical and insular biology, ecology of fishes, quantitative plant ecology, and arctic and alpine environments. May use animals and/or animal tissues.
Equivalent - Duplicate Degree Credit Not Granted: EBIO 5100
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Recommended: Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 and EBIO 2040 or EBIO 2640 (minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

EBIO 4120 (2-4) Advanced Ecology
Emphasizes specific aspects of ecology based on specialties of faculty. One or more courses are offered most semesters. Topics have included dynamics of mountain ecosystems, tundra ecology, ethnecology, population dynamics, tropical and insular biology, ecology of fishes, quantitative plant ecology and arctic and alpine environments. May use animals and/or animal tissues.
Equivalent - Duplicate Degree Credit Not Granted: EBIO 5120
Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.
Recommended: Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 and EBIO 2040 or EBIO 2640 (minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

EBIO 4140 (3) Plant Ecology
Examines the relationships between plants and their physical and biological environments, encompassing physiology, competition, plant-soil and plant-animal interactions, population dynamics, diversity, and influence on ecosystem function.
Recommended: Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 (minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

EBIO 4145 (4) Restoration Ecology
Examines ecological theories that inform the practice of ecological restoration, with particular emphasis on grassland ecosystems near Boulder and linkages with social, political and economic factors. In conjunction with local partner organizations, students work on a current management challenge, generate novel data using accepted field techniques, and formulate a professional restoration management plan.
Requirements: Requires prerequisite EBIO 2040 or ENVS 3434 or CVEN 3434 (all minimum grade C-).
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

EBIO 4150 (1-2) Techniques in Ecology
Emphasizes application of modern ecological techniques, such as stream biology, aquatic biology, environmental measurement and control, and techniques in geocology.
Equivalent - Duplicate Degree Credit Not Granted: EBIO 5150
Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.
Recommended: Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 and EBIO 2040 or EBIO 2640 (minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

EBIO 4155 (3) Ecosystem Ecology
Integrates information from physics (energetics), chemistry (element properties) and biology (evolutionary traits, photosynthetic pathways) to understand the structure and functioning of ecosystems. Provides an analysis of biotic community responses and feedbacks to environmental change drivers. Strong focus on water, nutrient cycling and carbon dynamics of diverse terrestrial and aquatic landscapes. Formerly EBIO 3270.
Recommended: Prerequisites general biology, EBIO 2040 or equivalent.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

EBIO 4160 (3) Introduction to Biogeochemistry
Covers fundamentals of biogeochemical cycling, emphasizing water, carbon and nutrient dynamics in terrestrial ecosystems; chemical interactions of atmosphere, biosphere, lithosphere and hydrosphere; natural and human-managed environments.
Equivalent - Duplicate Degree Credit Not Granted: ENVS 4160 and GEOL 4160
Recommended: Prerequisites GEOL 3320 or EBIO 3270 and CHEM 1011 (minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

EBIO 4175 (3) The Scientific Basis for Ecosystem Management of Public Lands
An advanced field ecology course emphasizing measurements, statistical procedures and biotic data information management relevant to land management issues. Develops concepts of adaptive ecosystem management using ongoing field studies on public land in the Colorado Front Range.
Recommended: Prerequisites EBIO 3270 and EBIO 4500 (minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

EBIO 4240 (4) Phylogenetics and Comparative Biology
Reviews the principles and methodology of phylogenetic inference using molecular data. Emphasizes the application of comparative approaches to hypothesis testing in evolution, ecology and medicine and provides a broad foundation in both theory and practice of phylogenetics.
Equivalent - Duplicate Degree Credit Not Granted: EBIO 5240
Recommended: Prerequisite EBIO 3080 (minimum grade C-) or instructor consent required.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

EBIO 4250 (4) Phylogeny and Comparative Biology
Reviews the principles and methodology of phylogenetic inference using molecular data. Emphasizes the application of comparative approaches to hypothesis testing in evolution, ecology and medicine and provides a broad foundation in both theory and practice of phylogenetics.
Equivalent - Duplicate Degree Credit Not Granted: EBIO 5250
Recommended: Prerequisite EBIO 3080 (minimum grade C-) or instructor consent required.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
EBIO 4340 (4) Conservation Biology and Practice in Brazil’s Atlantic Forest
Field Studies. Examines the application of conservation principles in the Atlantic Forest of Brazil, a ‘biodiversity-in-crisis’ setting. Explores successful conservation strategies integrated with efforts to alleviate socioeconomic issues. Three-week Maymester; Study Abroad Global Seminar.
Equivalent - Duplicate Degree Credit Not Granted: EBIO 5340 and ENVS 4340 and ENVS 5340
Recommended: Prerequisite EBIO 2040 or ENVS 2000 or 2000/higher-level course in ANTH, EBIO, ENVS, EVEN, GEOG, IAFS or other discipline related to ecology or sustainability.
Grading Basis: Letter Grade

EBIO 4410 (4) Biological Statistics
Lect. and lab. Offers a demanding, problems-oriented methods course in statistical inference procedures, assumptions, limitations, and applications emphasizing techniques appropriate to realistic biological problems. Includes data file management using interactive computing techniques.
Equivalent - Duplicate Degree Credit Not Granted: EBIO 5410
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Recommended: Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 (minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

EBIO 4420 (3) Computational Biology
Covers a wide range of techniques for simulating biological systems, developing computer programs and scripts to interact with data and making research shareable and reproducible.
Equivalent - Duplicate Degree Credit Not Granted: EBIO 5420
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

EBIO 4440 (4) Animal Developmental Diversity
Surveys development in a range of vertebrate and invertebrate systems to reconstruct the common bilaterian ancestor, and elucidate the developmental genetic changes underlying animal diversification. Lab focuses on vertebrate embryos and explores key methods in evolutionary developmental biology including in situ hybridization, embryo microinjection, and transgenesis.
Equivalent - Duplicate Degree Credit Not Granted: EBIO 5440 and MCDB 4441 and MCDB 5441
Recommended: Prerequisites MCDB 1150 or EBIO 1210 and MCDB 2150 or EBIO 2070 (minimum grade C-).

EBIO 4460 (1-5) Special Topics
Familiarizes students with specialized areas of biology.
Equivalent - Duplicate Degree Credit Not Granted: EBIO 5460
Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.
Recommended: Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 (minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

EBIO 4500 (4) Plant Biodiversity and Evolution
Surveys plant types emphasizing diagnostic features of plants in general and major taxa in particular. Focuses on identity, morphology, anatomy, reproduction, ecology, geography, evolution, fossil record, and economic use of taxa.
Equivalent - Duplicate Degree Credit Not Granted: EBIO 5500
Recommended: Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 (minimum grade C-).

EBIO 4510 (4) Plant Anatomy and Development
Lect. and lab. Introduces structures of seed plants, especially angiosperms, and developmental history of these structures. Studies cell types, and their location and function in plant tissues and organs. The laboratory provides an opportunity to examine plant tissues and to prepare tissues for examination by the light microscope. Stresses role of plant structures in the living plant.
Recommended: Prerequisites, EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 (minimum grade C-).

EBIO 4520 (4) Plant Systematics
Lect. and lab. Studies the principles and techniques of modern systematics of organisms, illustrated with examples from the plant kingdom, usually the angiosperms. Framework of course is evolutionary and ecological, as well as taxonomic.
Equivalent - Duplicate Degree Credit Not Granted: EBIO 5520
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

EBIO 4530 (4) Functional Plant Biology
Lect. and lab. Explores mechanisms of plant functioning and how such functioning relates to the performance of the plant under different environmental conditions. Phenomena include water relations, growth and development, and metabolic processes including photosynthesis, respiration, and responses to stress.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Recommended: Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 (minimum grade C-).

EBIO 4550 (4) Plant Eco-Evo-Devo
Explores the fundamental principles of plant form from the perspectives of ecological function, evolutionary origin, and developmental dynamics. Students are presented with conceptual and analytical tools to interpret the vast diversity of growth form-function relationships that exist among plants. Laboratory sessions apply concepts presented in lecture and students will engage in original research using light and scanning electron microscopy.
Recommended: Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 (minimum grade C-).
EBIO 4560 (4) The Lichen Biome
Focuses on lichens as biologically diverse hubs of interactions, and will cover numerous dimensions of diversity within the symbiosis (algae, bacteria, and ecological and evolutionary relationships therein) and beyond it (diversity of lichen symbioses in nature, their functions, and conservation).
Equivalent - Duplicate Degree Credit Not Granted: EBIO 5560
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Arts Sci Gen Ed: Distribution-Natural Sci Lab

EBIO 4600 (4) Evolutionary Ecology
Evaluates how interactions within species, among species and between species and the environment evolve over time. Emphasizes the development of scientific skills, including ecological, genetic and statistical tools for testing hypotheses in evolutionary ecology. Lab activities include research projects that quantify natural selection, gene flow and phenotypic plasticity in natural systems, and a semester-long class experiment examining plant dispersal.
Equivalent - Duplicate Degree Credit Not Granted: EBIO 5600
Requisites: Requires prerequisite courses of EBIO 2040 and EBIO 3080 (all minimum grade C-).
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Natural-Sciences
Arts Sci Gen Ed: Distribution-Natural Sci Lab

EBIO 4640 (3) Plant Field Studies
Includes field-oriented courses offered at irregular intervals during the academic year or during summer sessions.
Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.
Requisites: Requires prerequisite courses of EBIO 2040 or EBIO 2640 or ENVS 2000 (all minimum grade C-).
Recommended: Prerequisites EBIO 2040 and EBIO 2640 (minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Arts Sci Gen Ed: Distribution-Natural Sci Lab

EBIO 4660 (4) Insect Biology
Lect. and lab. Introduction to evolution, ecology, physiology, and behavior of insects. Emphasizes how insects have solved problems, such as maintaining water balance or finding food, that are shared by all animals but for which there may be unique solutions among the insects. Agricultural and human health problems relative to entomology are discussed. Uses animals and/or animal tissues.
Equivalent - Duplicate Degree Credit Not Granted: EBIO 5660
Recommended: Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 (minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural-Sciences
Arts Sci Gen Ed: Distribution-Natural Sci Lab

EBIO 4740 (3) Biology of Amphibians and Reptiles
Comparative morphology, taxonomy, ecology, behavior and geographic distribution of amphibians and reptiles. Uses animals and animal tissue.
Equivalent - Duplicate Degree Credit Not Granted: EBIO 5740
Recommended: Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 (minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

EBIO 4750 (4) Ornithology
Lect., lab, and field trips. Presents origin, evolution, ecology, physical and behavioral characteristics and taxonomy of orders and families of birds of North America; field work with local species emphasizing avian ecology. Uses animals and/or animal tissues.
Equivalent - Duplicate Degree Credit Not Granted: EBIO 5750
Recommended: Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 (minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Arts Sci Gen Ed: Distribution-Natural Sci Lab

EBIO 4760 (4) Mammalogy
Lect., lab, and field studies. Discusses origin, evolution and adaptation, geographic distribution, ecology and taxonomy of mammals; field and laboratory study of Coloradan species. Uses animals and/or animal tissues.
Equivalent - Duplicate Degree Credit Not Granted: EBIO 5760 and MUSM 5760
Recommended: Prerequisites EBIO 1210 and EBIO 1220 and EBIO 2040 and EBIO 2640 (minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Arts Sci Gen Ed: Distribution-Natural Sci Lab

EBIO 4800 (3) Critical Thinking in Biology
Lect. and discussion. Explores controversial issues, historical themes, or emerging developments in biology. Consult the EBIO Undergraduate Advising Center for current listings.
Equivalent - Duplicate Degree Credit Not Granted: EBIO 5800
Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Recommended: Prerequisite minimum of 14 hours of EBIO course work.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

EBIO 4811 (3) Teaching and Learning Biology
Provides an introduction to recent research into student learning on the conceptual foundations of modern biology, together with pedagogical methods associated with effective instruction and its evaluation. Students will be involved in active research into conceptual and practical issues involved in biology education, methods to discover student preconceptions, and the design, testing and evaluation of various instructional interventions.
Equivalent - Duplicate Degree Credit Not Granted: EDUC 6811 and Mcdb 4811 and Mcdb 5811 and EDUC 4811
Recommended: Prerequisites Mcdb 1150 or EBIO 1210 and Mcdb 2150 and Mcdb 3145.
EBIO 4840 (1-6) Independent Study: Upper Division
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

EBIO 4860 (1-2) Critical Thinking in Biology - Lab
EBIO 4870 (1-6) Independent Research: Upper Division
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

EBIO 4900 (1-3) Public Health Practicum
Offers practical experience in Public Health with direct supervision.
Equivalent - Duplicate Degree Credit Not Granted: EBIO 4900 and Mcdb 4900
Repeatable: Repeatable for up to 6.00 total credit hours.
EBIO 4980 (2) Seminar: EBIO Honors Thesis
Offers guidance to graduating Honors students during the process of thesis writing, evaluation and presentation of their research results and thesis defense. Thesis requirements and the role of the A&S Honors Council will be discussed. All graduating candidates will present a practice defense talk for peer feedback and will be expected to offer feedback to their peers.
**Recommended:** Prerequisites minimum 3.3 GPA and a declared EBIO major and approval by departmental honors committee.

**Additional Information:** Arts Sciences Honors Course

EBIO 4990 (1-3) EBIO Honors Thesis Research
To be taken during the final academic year prior to graduation. Consists of the final phase of honors research and thesis preparation under the guidance of a faculty mentor.
**Required:** Restricted to Ecology and Evolutionary Biology (EBIO) majors only.
**Recommended:** Prerequisites minimum 3.3 GPA and a declared EBIO major and approval by departmental Honors program.

**Additional Information:** Arts Sciences Honors Course

**Ecology and Evolutionary Biology - Bachelor of Arts (BA)**

The undergraduate program in ecology and evolutionary biology offers a highly interactive, intellectual environment that prepares students for a career in the natural sciences.

Our program was specifically designed for students who are interested in a broad exposure to the concepts and methodologies of the biological sciences, as well as those interested in a more specific sub-discipline. We offer a broad range of learning opportunities, including traditional classroom experiences, field and laboratory research opportunities, and independent study.

**Requirements**

**AP & Transfer Credit**
Students with scores of 4 or 5 on the AP biology test receive 8 hours of credit and are exempt from the general biology sequence (EBIO 1210 and EBIO 1220), and EBIO 1230 and EBIO 1240. Students who score in the 66th percentile or higher on the CLEP test in biology receive 6 hours of credit and are exempt from EBIO 1210 and EBIO 1220.

EBIO majors with transfer credit in biology from other institutions or advanced placement credits must consult with the EBIO undergraduate advisor. Transfer students must complete at least 12 upper-division (3000-level or above) EBIO credit hours on the Boulder campus.

**Program Requirements**
In addition to the general College of Arts and Sciences requirements, students in EBIO must complete complete 9–15 credit hours in ancillary coursework, plus a statistics course and 38 credit hours of coursework in EBIO.

Up to 12 credit hours of courses taken in other departments may be counted toward the 38 credit hours required for the EBIO major. A list of acceptable courses can be obtained from the EBIO advisor. A maximum of 6 credit hours of Independent Study/Research may be applied toward the major. A maximum of 6 credit hours of internship may be applied toward the major.

</table>

1 These 6 credit hours must include one course taken at the CU Boulder campus, the Mountain Research Station or on a CU Boulder Global Seminar, and may include a maximum of 3 credit hours of independent study or independent research.

2 Of these, only EBIO 4410 counts toward the 38 credit hours of EBIO required for the major.

3 Students must take the lecture and lab for these courses.

**Total Credit Hours 120-122**

**Learning Outcomes**

In light of the broad importance of ecology and evolution for fundamental understanding of living systems, the undergraduate EBIO degree emphasizes knowledge and problem-solving in the following areas:

- The ecology of organisms, populations and communities
- The distribution and function of terrestrial, freshwater and marine ecosystems
- Principles and patterns of evolution, including natural selection and the history of life on Earth
- Comparative, systematic, evolutionary and environmental aspects of botany, microbiology and zoology
- Adaptation of organisms to the physical and biotic environment
- Animal behavior and emotion
- Molecular evolution and population genetics
- Developmental biology and the evolution of development
- Conservation biology and management of ecosystems
- The relevance of mathematics, chemistry and physics to biology
- The development of biological thought
- Infectious disease ecology
- Landscape and ecosystem ecology
- Sustainability and human-nature systems
- Energy and biofuels
- Darwinian medicine
- Health and population genetics
- Genetically-engineered organisms

**Bachelor’s–Accelerated Master’s Degree Program(s)**

The Bachelor's–Accelerated Master's (BAM) degree program options offer currently enrolled CU Boulder undergraduate students the opportunity to receive a bachelor's and master's degree in a shorter period of time. Students receive the bachelor's degree first, but begin taking graduate coursework as undergraduates (typically in their senior year). Because some courses are allowed to double count for both the bachelor's and the master's degrees, students receive a master's degree in less time and at a lower cost than if they were to enroll in a stand-alone master's degree program after completion of their baccalaureate degree. In addition, staying at CU Boulder to pursue a bachelor's–accelerated master's program enables students to continue working with their established faculty mentors.

**BA and MA in Ecology and Evolutionary Biology**

A combined bachelor's and master's degree with thesis is offered for highly motivated undergraduate students. The BAM program allows students to take advanced courses at an accelerated pace, engage in an independent research project and obtain both degrees in five years. In addition to preparing graduates for additional graduate study or medical school, the program is expected to position them for employment in areas such as environmental consulting, teaching at the high school or community college level or by businesses with an environmental or biomedical emphasis.

**Admissions Requirements**

In order to gain admission to the BAM program named above, a student must meet the following criteria:
• Have a cumulative GPA of 2.75 or higher
• Have a major GPA in EBIO of 3.0 or higher
• Have the support of a faculty research advisor
• Have completed a minimum of 12 credit hours of coursework
• Transfer students must have completed a minimum of 24 credit hours at CU Boulder
• Students must have completed prerequisite courses EBIO 2040, EBIO 2070 and EBIO 3080

Applications from sophomores and juniors for the BAM degree are considered on a competitive basis. Applications are available from the EBIO graduate coordinator, and are due on October 15 and March 15.

Program Requirements
Students may take up to and including 12 hours while in the undergraduate program which can later be used toward the master’s degree. However, only six undergraduate credits (at the 4000-level) may be double counted toward the bachelor’s degree and the master’s degree. Students must apply to graduate with the bachelor’s degree, and apply to continue with the master’s degree, early in the semester in which the undergraduate requirements will be completed.

Students interested in this program are encouraged to consult with the EBIO associate chair for graduate studies early in their undergraduate career. No financial support is available from the department for students enrolled in this program.

Ecology and Evolutionary Biology - Minor
A minor is offered in ecology and evolutionary biology. Declaration of a minor is open to any student enrolled at CU Boulder, regardless of college or school.

We offer a broad range of learning opportunities, including traditional classroom experiences, field and laboratory research opportunities, and independent study.

Requirements
Program Requirements
Students must complete:
• A total of 20 credit hours in EBIO with grades of C- or better.
• A 2.00 GPA or higher for all coursework attempted in EBIO.
• 9 hours of upper-division credit in EBIO.
• 3 hours of 4000-level credit in EBIO.
• A minimum of 12 credit hours must be taken on the Boulder campus, including a minimum of 6 of the 9 upper-division credit hours.
• A minimum of 12 credit hours of independent study, Independent research or internship credit.

All courses must have an EBIO subject code. EBIO 1030, EBIO 1040, EBIO 1050, EBIO 1300 and EBIO 3010 do not count toward the minor requirement.

Economics
The Department of Economics at CU Boulder is recognized for the high quality of its teaching and research.

Economics describes the processes by which scarce resources are allocated, how changes in these processes affect this allocation, and how these processes can be improved. Economics is a quantitative, policy-oriented social science with a highly-developed body of theory and a vast range of applications. Theoretical and quantitative analyses are informed by and contribute to our understanding of our economic, social and political institutions.

Microeconomics is the study of the daily decisions that consumers, workers, and business people make, and of the interactions between these decisions in markets. Macroeconomics is the study of how the decisions made by all individuals and businesses are together responsible for the size and growth of the economy, for recessions and for unemployment.

Among the major topics within economics are natural resource and environmental economics, international trade and finance, public economics, labor economics, urban and regional economics, development economics, economic history, industrial organization, law and economics, health economics, financial economics and monetary economics. In addition, econometrics is the study of how statistical methods can be best applied to economic problems. Our department offers courses in most of these fields in every semester.

Course code for this program is ECON.

Economics Honors Program
The honors program in economics provides an opportunity for highly motivated majors to undertake individualized research and to graduate with honors (cum laude, magna cum laude, summa cum laude) in economics. Economics majors with senior standing and both economics and overall GPAs of 3.40 or better are eligible to participate. Participants enroll in the economics honors seminars, which provide instruction in research methodology essential to the preparation of the honors thesis.
Students interested in the economics honors program should contact the departmental honors advisor during their junior year.

**Bachelor's Degree**
- Economics - Bachelor of Arts (BA) (p. 242)

**Minor**
- Economics - Minor (p. 244)

**Faculty**
While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Courses

ECON 1078 (3) Mathematical Tools for Economists 1
Teaches mathematical skills and logical thinking for use in economics. Topics include algebra, graphs, functions, and probability. Includes many "real world" examples and some illustrative computer assignments.

Additional Information: Arts Sci Core Curr: Quant Reasn Mathmat Skills
Arts Sci Gen Ed: Quantitative Reasoning Math
Departmental Category: Quantitative Economics

ECON 1088 (3) Mathematical Tools for Economists 2
Continuation of ECON 1078. Teaches mathematical skills for use in economics. Topics include derivatives, optimization and integration. These skills are used on "real world" problems and illustrated with computer assignments. For more information about the math placement referred to in the "Enrollment Requirements", contact your academic advisor.

Equivalent - Duplicate Degree Credit Not Granted: APPM 1345 or APPM 1350 or MATH 1081 or MATH 1300 or MATH 1310 or MATH 1330

Requisites: Requires prerequisite course of ECON 1078 or MATH 1011 or MATH 1071 or MATH 1150 or MATH 1160 (minimum grade C-) or an ALEKS math exam taken in 2016 or earlier, or placement into pre-calculus based on your admission data and/or CU Boulder coursework.

Additional Information: Arts Sci Core Curr: Quant Reasn Mathmat Skills
Arts Sci Gen Ed: Quantitative Reasoning Math
Departmental Category: Quantitative Economics

ECON 2010 (4) Principles of Microeconomics
Examines basic concepts of microeconomics or the behavior and the interactions of individuals, firms and government. Topics include determining economic problems, how consumers and businesses make decisions, how markets work, and how they fail and how government actions affect markets.

Additional Information: Arts Sci Core Curr: Contemporary Societies
Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Theory and History of Economic Thought
MAPS Course: Social Science

ECON 2020 (4) Principles of Macroeconomics
Provides an overview of the economy, examining the flows of resources and outputs and the factors determining the levels of income and prices. Explores policy problems of inflation, unemployment and economic growth.

Requisites: Requires prerequisite course of ECON 2010 (minimum grade C).

Additional Information: Arts Sci Core Curr: Contemporary Societies
Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Theory and History of Economic Thought
MAPS Course: Social Science

ECON 3070 (4) Intermediate Microeconomic Theory
Explores theory and application of models of consumer choice, firm and market organization, and general equilibrium. Extensions include intertemporal decisions, decisions under uncertainty, externalities, and strategic interaction.

Requisites: Requires prerequisite courses of ECON 2010 and ECON 1088 or MATH 1081 or MATH 1300 or MATH 1310 or MATH 1330 or APPM 1350 or FNCE 2010 (all min grade C). Restricted to students with 22-180 units completed.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Theory and History of Economic Thought

ECON 3080 (3) Intermediate Macroeconomic Theory
Introduces theories of aggregate economic activity including the determination of income, employment, and prices; economic growth; and fluctuations. Macroeconomic policies are explored in both closed and open economy models. ECON 3070 ECON and 3080 may be taken in any order; there is no recommended sequence.

Requisites: Requires prerequisite courses of ECON 2020 and (ECON 1088 or APPM 1350 or FNCE 2010 or MATH 1081 or MATH 1300 or MATH 1310) (all min grade C). Restricted to students with 22-180 units completed.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Theory and History of Economic Thought

ECON 3403 (3) International Economics and Policy
Examines national and supranational policies that affect the international economy, with attention to trade barriers, economic nationalism and regionalism, international political economy, exchange market intervention, and international transmission of economic perturbations. Credit given in this course is not included in the calculation of an economics major GPA. May not be taken after either ECON 4413 or ECON 4423.

Requisites: Requires prerequisite courses of ECON 2010 and ECON 2020 (all minimum grade C). Economic (ECON) majors are restricted from taking this course. ECON minors are allowed to enrolled.

Additional Information: Arts Sci Core Curr: Contemporary Societies
Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: International Trade and Finance
ECON 3535 (3) Natural Resource Economics
Integrates economic analysis with life science aspects of natural resource systems to develop social policies for use of natural resources. Studies economists’ approaches to resources policy analysis and applies them to energy, forestry, fisheries, mineral and water systems. Credit given in this course is not included in the calculation of an economics major GPA.
Equivalent - Duplicate Degree Credit Not Granted: ECON 4535
Requisites: Requires prerequisite course of ECON 2010 (minimum grade C-). Economic (ECON) majors are restricted from taking this course. ECON minors are allowed to enrolled.

ECON 3545 (3) Environmental Economics
Highlights causes of excessive environmental pollution and tools for controlling it through economic analysis, values of preservation and distribution of costs and benefits from environmental protection programs. Credit given in this course is not included in the calculation of an economics major GPA.
Equivalent - Duplicate Degree Credit Not Granted: ECON 4545
Requisites: Requires prerequisite course of ECON 2010 (minimum grade C-). Economic (ECON) majors are restricted from taking this course. ECON minors are allowed to enrolled.

ECON 3616 (3) Employment, Wages and the Future of Work
Examines how automation, globalization and information technology are changing which jobs get done, by whom and how much they pay. Illustrates how basic labor supply and demand theory helps predict the impact of technological progress on occupational composition, income inequality and the nature of work itself. These theoretical tools also guide our search for appropriate public policy responses. Credit given in this course is not included in the calculation of an economics major GPA.
Requisites: Requires a prerequisite course of ECON 2010 (minimum grade C-). Economic (ECON) majors are excluded from taking this course. ECON minors are allowed to enrolled.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences Departmental Category: Labor and Human Resources

ECON 3618 (4) Introduction to Statistics with Computer Applications
Introduces statistical methods and their applications in quantitative economic analysis.
Requisites: Requires prerequisite courses of ECON 2010 and 2020 and either ECON 1088 or MATH 1081 or MATH 1300 or MATH 1310 or MATH 1330 or APPM 1350 or FNCE 2010 (all minimum grade C-). Restricted to students with 22-180 units completed.

ECON 3784 (3) Economic Development and Policy
Studies utility maximization under uncertainty, risk, game theory, moral hazard, and adverse selection. Applications include insurance markets and the theory of contracts.
Requisites: Requires prerequisite courses of ECON 3070 and ECON 3818 (all minimum grade C-).

ECON 3818 (4) Introduction to Statistics with Computer Applications
Introduces statistical methods and their applications in quantitative economic analysis.
Requisites: Requires prerequisite courses of ECON 2010 and 2020 and either ECON 1088 or MATH 1081 or MATH 1300 or MATH 1310 or MATH 1330 or APPM 1350 or FNCE 2010 (all minimum grade C-). Restricted to students with 22-180 units completed.

ECON 4050 (3) Market Design
Develops foundations for the modern market design practices. Economists are increasingly involved in studying and designing practical market mechanisms. Includes topics such as designing efficient matching markets (students to schools, doctors to hospitals), designing auction mechanisms (Google, Facebook, government) and designing market platforms (eBay, Amazon).
Requisites: Requires prerequisite course of ECON 3070 (minimum grade C-).

ECON 4060 (3) Choice Theory and Economic Ethics: Good, Bad and Happiness
Critiques how economists model and judge behavior. How we judge is contrasted with other moral philosophies. Economists assume individuals behave in their own best interests. What does this mean and is it true? Looks at research from psychology and neuroscience. Quizzes and a multi-step research paper, designed for students who love to question, research, write and rewrite.
Requisites: Requires prerequisite course of ECON 3070 (minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior).
Recommended: Prerequisite ECON 3080.

ECON 4070 (3) Topics in Microeconomics
Studies utility maximization under uncertainty, risk, game theory, moral hazard, and adverse selection. Applications include insurance markets and the theory of contracts.
Requisites: Requires prerequisite courses of ECON 3070 and ECON 3818 (all minimum grade C-).

ECON 4111 (3) Money and Banking Systems
Discusses money, financial institutions and the monetary-financial system in a modern economy.
Requisites: Requires prerequisite course of ECON 3080 (minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences Departmental Category: Money and Banking

ECON 4211 (3) Public Economics: the Economics of the Government Sector
Focuses on taxation and public expenditures. Topics include economic rationale for government action, economic theory of government behavior, and effects of government policies on allocation of resources and distribution of income.
Requisites: Requires prerequisite courses of ECON 3070 and ECON 3818 or STAT 4520 or APPM 4570 or CHEN 3010 or CSCI 3022 or CVEN 3227 or MATH 4520 (all minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences Departmental Category: Public Economics
ECON 4221 (3) Political and Public Choice Economics
Explores decision-making in non-traditional market settings, specifically political market settings, using economic models. We investigate policy outcomes as the product of interactions among individuals in political markets, and analyze how governmental decisions are the result of rational optimizing behavior, even if they do not lead to policies that maximize national welfare.
Requisites: Requires prerequisite courses of ECON 3070 and ECON 3818 or STAT 4520 or APPM 4570 or CHEN 3010 or CSCI 3022 or CVEN 3227 or MATH 4520 (all minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences Departmental Category: Public Economics

ECON 4231 (3) Applied Economic Analysis and Public Policy
Applies economic analysis to current issues of public policy. Reviews basic public finance and economic justifications for government action. Examines structure and procedures of Colorado State Legislature. Chooses current legislative issues, reviews relevant economic literature and applies implications through briefing papers and testimony at legislative hearings. Explores the challenges of integrating informed economic analysis into legislative process.
Requisites: Requires prerequisite course of ECON 3070 (minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences Departmental Category: Public Economics

ECON 4242 (3) Urban Economics: The Economics of Cities
Considers the economic forces which drive households and jobs to congregate in metropolitan areas. It then considers the forces within the city which determine how the established cities "look" - how rents vary with location, the distribution of jobs and households within a city, urban sprawl, and the sorting of households between neighborhoods. Finally it considers some government policies relating to land use and housing.
Requisites: Requires prerequisite courses of ECON 3070 and ECON 3818 or STAT 4520 or APPM 4570 or CHEN 3010 or CSCI 3022 or CVEN 3227 or MATH 4520 (all minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences Departmental Category: Urban and Regional Economics

ECON 4292 (3) Migration, Immigrant Adaptation, and Development
Examines historical and current patterns of migration with an emphasis in international movement. Looks at leading migration theories related to both origin- and destination-based explanations while critically looking at the role of development as a potential cause and consequence of population movement. Finally, covers some aspects of immigrants' social and economic adaptation to their host society.
Requisites: Requires prerequisite course of ECON 3070 (minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences Departmental Category: Urban and Regional Economics

ECON 4309 (3) Economics Honors Seminar 1
For information consult the department's director of honors. Open only to qualified seniors.
Requisites: Requires prerequisite courses of ECON 3070 and ECON 3080 and ECON 3818 (all minimum grade C-). Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sciences Honors Course Arts Sci Gen Ed: Distribution-Social Sciences Departmental Category: Independent Study and Other Courses

ECON 4339 (3) Economics Honors Seminar 2
For information consult the department's director of honors. This course does not count toward major requirements.
Requisites: Requires prerequisite courses of ECON 3070 and ECON 3080 and ECON 3818 (all minimum grade C-). Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences Departmental Category: Independent Study and Other Courses

ECON 4413 (3) International Trade
Focuses on theories of international trade and its impacts on economic welfare. Analyzes commercial policy, including tariffs, non-tariff barriers, retaliation, regional integration, and factor migration.
Requisites: Requires prerequisite course of ECON 3070 (minimum grade C-).

ECON 4423 (3) International Finance
Covers balance of payments; foreign exchange market, income, trade, and capital flows; asset markets adjustment mechanisms; stabilization policies in an open economy; and problems of international monetary systems.
Requisites: Requires prerequisite course of ECON 3080 (minimum grade C-).

ECON 4504 (3) The New Institutional Economics: Institutions, Contracts and Economic Outcomes
Understand the conceptual tool kit of the New Institutional Economics. The concepts include transaction costs, property rights, credible commitment, and most importantly the roles of formal and informal institutions. We will examine the impact of institutions on contracting and organizations. The goal is to understand how the underlying institutions determine the degree to which societies improve their economic performance.
Requisites: Requires prerequisite courses of ECON 3070 and ECON 3080, and (ECON 3818 or STAT 4520 or APPM 4570 or CHEN 3010 or CSCI 3022 or CVEN 3227 or MATH 4520) (all minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences Departmental Category: Economic History

ECON 4514 (3) Economic History of the United States
Covers evolution of modern economic growth and development in the United States from colonial times to the present emphasizing institutional change.
Requisites: Requires prerequisite course of ECON 3070 or ECON 3080 (minimum grade C-).

ECON 4524 (3) Economic History of Europe
Covers evolution of modern economic growth and development in Europe, emphasizing institutional change.
Requisites: Requires prerequisite course of ECON 3070 or ECON 3080 (minimum grade C-).

ECON 4524 (3) Economic History of the United States
Covers evolution of modern economic growth and development in the United States from colonial times to the present emphasizing institutional change.
Requisites: Requires prerequisite courses of ECON 3070 or ECON 3080 (minimum grade C-).
ECON 4534 (3) Chinese Economic History in Comparative Perspective
Surveys the economic history of China in a comparative perspective, to understand the history of economic development in China in terms of existing economic theories of growth. The approximate timeline is from the 18th century to the 20th century.
Requisites: Requires prerequisite courses of ECON 3070 or ECON 3080 (minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Economic History
Departmental Category: Asia Content

ECON 4535 (3) Natural Resource Economics
Analysis of problems associated with socially optimal use of renewable and nonrenewable natural resources over time. Problems of common property resources, irreversible forms of development, and preservation of natural areas.
Equivalent - Duplicate Degree Credit Not Granted: ECON 3535
Requisites: Requires prerequisite course of ECON 3070 (minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Natural Resources and Environmental Economics

ECON 4545 (3) Environmental Economics
Examines the effects of economic growth on the environment; application of economic theory of external diseconomies, cost-benefit analysis, program budgeting, and welfare economics to problems of the physical environment.
Equivalent - Duplicate Degree Credit Not Granted: ECON 3545
Requisites: Requires prerequisite course of ECON 3070 (minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Natural Resources and Environmental Economics

ECON 4555 (3) Transportation Economics and Policy
Provides an overview of the characteristics and structure of transportation markets including aggregate demand, vehicle and mode choice, surface freight and air travel. Explores market failures in the transportation sector including market power and externalities such as pollution, congestion and accidents as well as policies aimed at addressing these issues.
Requisites: Requires prerequisite courses of ECON 3070 and ECON 3818 or STAT 4520 or APPM 4570 or CHEN 3010 or CSCI 3227 or MATH 4520 (all minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Natural Resources and Environmental Economics

ECON 4616 (3) Labor Economics
Examines the influence of markets, unions, and government on labor allocation and remuneration. Analyzes human capital, discrimination, mobility and migration, productivity, unemployment, and inflation. Compares outcomes under competition with those in a world marked by shared market power and bargaining.
Requisites: Requires prerequisite course of ECON 3070 (minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Labor and Human Resources

ECON 4626 (3) The Economics of Inequality and Discrimination
Examines the unique insights available through economic analysis regarding the causes, mechanisms, and consequences of inequality and discrimination. Examines the extent of inequality, the varieties and extents of discrimination, and explores the economic models that suggest explanations.
Requisites: Requires prerequisite course of ECON 3070 (minimum grade C-).
Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Distribution-Social Sciences
Arts Sci Gen Ed: Diversity-U.S. Perspective
Departmental Category: Labor and Human Resources

ECON 4646 (3) Topics in Health Economics
Growth in health expenditures worldwide over the past three decades has led to an increase in research in health economics and its importance in public policy in developed and developing countries. The purpose of this course is to encourage students to read, think, and do research on issues in health economics. This course will cover issues that are pertinent to the US, other developed and developing countries. It will cover the basics of health economics such as health production functions and the role for government as well as touching on topical issues such as health care reform.
Requisites: Requires prerequisite course of ECON 3070 (minimum grade C-).
Recommended: Prerequisites ECON 3818 or CSCI 3022.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Labor and Human Resources

ECON 4697 (3) Industrial Organization and Regulation
Explores neoclassical theory of the firm, the determinants of industrial structure, and the purposes and institutions of public policy to control or maintain a competitive environment.
Requisites: Requires prerequisite course of ECON 3070 (minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Industrial Organization

ECON 4717 (3) Economics of Entrepreneurship
Introduces economic analysis of entrepreneurship, its financing, performance and public policy issues. We will investigate in depth the business of venture capital and start-ups. Aims to understand both academic and practical implications from the burgeoning literature on economics of entrepreneurship and private equity.
Requisites: Requires prerequisite courses of ECON 3070 and ECON 3818 (all minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Industrial Organization
ECON 4774 (3) Topics in Economic Development, History and Political Economy
Sustained economic growth is a relatively recent economic phenomenon that came about due to the Industrial Revolution and as a result of which the standards of living improved dramatically in the Anglo-Saxon West since the 18th century. However, global inequality has also risen to unprecedented levels because other parts of the world still significantly lag the West in economic, social and political terms. In this class, we shall study the comparative development paths of Anglo-Saxon Europe and the Middle East. In doing so, we shall primarily focus on an expansive list of influential and relevant articles published and the four books required for the class.
Requisites: Requires prerequisite course of ECON 3070 or ECON 3080 (minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Economic Development
Departmental Category: Asia Content

ECON 4784 (3) Economic Development
Explores empirical, theoretical, and policy issues in economic development. Examines topics with reference to the developing countries: income distribution and poverty, demographic change, labor force employment and migration, human capital, physical capital, natural resources and the environment, industrial structure, international trade, and finance.
Requisites: Requires prerequisite course of ECON 3070 or ECON 3080 (minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Economic Development
Departmental Category: Asia Content

ECON 4784 (3) Economic Growth
Introduces theories explaining why differences in standards of living among countries are so large. Examines a variety of data on historical experiences of economic growth. Surveys recent research on why some countries are so rich and some are so poor, and why some countries grow so quickly and others grow so slowly.
Requisites: Requires prerequisite course of ECON 3070 or ECON 3080 (minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Economic Development

ECON 4794 (3) Economic Growth
Introduces economic growth and development. Examines the role of economic growth in both developed and developing countries. Discusses the factors that contribute to economic growth and the consequences of economic growth.
Requisites: Requires prerequisite course of ECON 3070 or ECON 3080 (minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Economic Development

ECON 4797 (3) Antitrust and Regulation
Explores two major branches of Industrial Organization—antitrust and regulation. Focus is on developing qualitative and quantitative skills for the legal-economic analysis of issues and problems across a variety of industries. Case studies are used to illustrate concepts, including mergers, collusive agreements, monopolization, and networks. Individual and group projects help develop advocacy and public speaking skills.
Requisites: Requires prerequisite course of ECON 3070 (minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Industrial Organization

ECON 4808 (3) Introduction to Mathematical Economics
Introduces the use of mathematics in economics. Topics include vectors and matrices, differential calculus, and optimization theory, with economic applications.
Requisites: Requires prerequisite courses of ECON 3070 and ECON 3818 or STAT 4520 or APPM 4570 or CHEN 3010 or CSCI 3022 or CVE 3227 or MATH 4520 (all minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Quantitative Economics

ECON 4818 (3) Introduction to Econometrics
Provides undergraduate economics majors with an introduction to econometric theory and practice. Develops the multiple regression model and problems encountered in its application in lecture and individual applied projects.
Requisites: Requires prerequisite courses of ECON 3070 and ECON 3818 or STAT 4520 or APPM 4570 or CHEN 3010 or CSCI 3022 or CVE 3227 or MATH 4520 (all minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Quantitative Economics

ECON 4838 (3) Microcomputer Applications in Economics
Teaches basic concepts in Java programming applied to economic models. Development of Web pages and dynamic modeling will be introduced. Students will gain a foundation that can be applied to creating advanced applications relating to analysis of statistical data and custom projects.
Requisites: Requires prerequisite courses of ECON 3070 and ECON 3818 or STAT 4520 or APPM 4570 or CHEN 3010 or CSCI 3022 or CVE 3227 or MATH 4520 (all minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Quantitative Economics

ECON 4848 (3) Applied Econometrics
Introduces students to the practice of applied regression analysis. Summarizes and reviews the regression technique, explores U.S. census data sources, introduces an advanced statistical software package and provides structured exercises in regression analysis of census data. Concludes with independent research projects analyzing social and economic issues using regression analysis and census data.
Requisites: Requires prerequisite courses of ECON 3070 and ECON 3818 or STAT 4520 or APPM 4570 or CHEN 3010 or CSCI 3022 or CVE 3227 or MATH 4520 (all minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Quantitative Economics

ECON 4858 (3) Financial Econometrics
Introduces statistical models, estimation and testing procedures used in analyzing financial data for advanced undergraduates. Topics include the modeling of returns, portfolio theory, the capital asset pricing model, options pricing and fixed income securities.
Requisites: Requires prerequisite courses of ECON 3070 and ECON 3818 or STAT 4520 or APPM 4570 or CHEN 3010 or CSCI 3022 or CVE 3227 or MATH 4520 (all minimum grade C-).
Recommended: Prerequisite ECON 4818.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Quantitative Economics

ECON 4868 (3) Simulation Modeling in Microeconomics
Computer simulation modeling translates theory into computer code to examine questions numerically; for example, the effects of taxes or emissions permits on welfare and income distribution. We use GAMS (general algebraic modeling system); a version may be downloaded for free. Students must have access to a computer (not needed in the classroom).
Requisites: Requires prerequisite courses of ECON 3070 and ECON 3818 (all minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Quantitative Economics
ECON 4897 (3) Economics of Organizations
Introduces students to the economic analysis of relationship between firms and incentives within firms. The first part covers classical theories of firm boundaries and contractual relationship between firms. The second part focuses on compensation and incentive issues within firms.
**Requisites:** Requires prerequisite courses of ECON 3070 and ECON 3818 or STAT 4520 or APPM 4570 or CHEN 3010 or CSCI 3022 or CVEN 3227 or MATH 4520 (all minimum grade C-).
**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences Departmental Category: Industrial Organization

ECON 4909 (3-4) Independent Study
Department enforced prerequisites: completion of at least 12 hours of ECON classes and a minimum GPA of 3.00. Department consent required. **Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Requires prerequisite courses of ECON 2010 and ECON 2020 and ECON 3070 or ECON 3080 (all minimum grade C-).
**Additional Information:** Departmental Category: Independent Study and Other Courses

ECON 4929 (3) Special Topics In Economics
This course number is assigned to upper-level Economics electives that become available on an incidental basis. Refer to the Economics Department for a detailed description of current content. Formerly ECON 4999.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Requires prerequisite courses of ECON 3070 and ECON 3080 (all minimum grade C-). Restricted to students with 57-180 credits (Juniors or Seniors).
**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences Departmental Category: Independent Study and Other Courses Departmental Category: Asia Content

ECON 4939 (2-6) Internship/Seminar
Offers students the opportunity to integrate theoretical concepts of economics with practical experience in economics-related institutions. The theoretical portion arises from seminars and readings, the practical from activities in organizations related to the economics field. A maximum of 3 credit hours counts toward major requirements. Department consent required.
**Requisites:** Requires prerequisite courses of ECON 3070 and ECON 3080 and ECON 3818 (all minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Economic (ECON) majors or minors only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Independent Study and Other Courses

Economics - Bachelor of Arts (BA)
The economics major provides a highly structured experience that develops increasing levels of sophistication. It begins with courses in economic principles, continues to intermediate courses in economic theory and empirical practice, and culminates with rigorous courses in the applied fields of economics. Successful graduates are well-equipped to perform economic analysis in most commercial and policy settings, and to continue on to graduate school.

Special Emphasis Options
The Department of Economics offers four enhanced major tracks for students who have a relatively high GPA and want to focus their upper-division coursework in a specific area of interest. Interested students must have completed at least 6 credit hours of economics coursework at CU in order to declare the special emphasis. Students must have completed two out of three intermediate-level courses (ECON 3070, ECON 3080 and/or ECON 3818) with a minimum of 3.00 GPA in these courses, and must also have a minimum of 3.00 GPA in economics coursework at CU by the time of declaration and completion of the special emphasis. Requirements are listed on the Department of Economics (http://www.colorado.edu/economics/) website.

Environmental and Natural Resources Emphasis
The environmental and natural resources emphasis is designed for economics majors who are considering careers in fields requiring a thorough understanding of a broad range of issues associated with business practices and public policies addressing natural resource use and environmental quality, including environmental regulation and compliance: energy production and consumption, development of energy transportation, urban, rural and regional infrastructures.

International Emphasis
The international emphasis is designed for students who have an interest in courses with an international perspective both within economics and outside the department. Courses in international trade and finance are combined with selections of international courses in related social science disciplines. This program may be of particular interest to students seeking careers in international business, international organizations, nongovernmental organizations and government agencies.

Public Policy Emphasis
The public policy emphasis is designed for students who have an interest in taking courses with a public policy perspective both within economics and outside the department. Courses in public economics are combined with selections of public policy oriented courses from various social sciences. This emphasis is recommended for students with interests in public policy seeking careers in local, state, national or international agencies.

Quantitative Emphasis
The quantitative emphasis is designed for well-qualified majors with an interest in theoretical and/or applied mathematics. Economics courses in quantitative methods are combined with courses from the Department of Mathematics and the Department of Applied Mathematics. This program may be of interest to students planning to pursue graduate studies in economics or those seeking a career in applied quantitative research.

Requirements
**Required Courses and Credits**
Students must complete at least 33 credit hours of economics courses. The math requirement does not count toward either the minimum total economics credit requirement or in the major GPA calculation. At least 24 credit hours must be upper-division courses. Students transferring two 3-credit principles courses must complete at least 27 credit hours of upper-division economics.

ECON 4818 Introduction to Econometrics
ECON 4848 Applied Econometrics
ECON 4858 Financial Econometrics
Electives in 4000-level ECON courses 12
Total Credit Hours 34

Ancillary Mathematics Requirement
Complete one of the following calculus courses: 3-5
APPM 1350 Calculus 1 for Engineers
ECON 1088 Mathematical Tools for Economists 2
MATH 1300 Calculus 1
MATH 1330 Calculus for Economics and the Social Sciences
Total Credit Hours 3-5

Note: Transfer students majoring in economics must complete at least 12 credit hours of upper-division economics courses at CU Boulder.

Graduating in Four Years
Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of "adequate progress" as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress in economics, students should to the extent feasible and in consultation with their economics advisor, follow the plan-of-study grid and declare economics as a major by the beginning of the second semester.

Recommended Four-Year Plan of Study
Through the required coursework for the major, students will complete all 12 credits of the the Social Sciences area of the Gen Ed Distribution Requirement, as well as the QRMS component of the Gen Ed Skills Requirement.

Learning Outcomes

The undergraduate degree in economics emphasizes six preferred learning outcomes:

- Students will learn the tools of microeconomic theory, including optimization and price theory, and be able to apply these skills in new contexts.
- Students will learn the tools of macroeconomic theory, including theories of business cycles, international trade/finance, and the role of government in affecting the equilibrium, and be able to apply these skills in new contexts.
- Students will learn the tools of statistical analysis, including multiple regression techniques, the estimation of causal effects, and any resulting biases from estimation, and understand similar analyses performed by others.
- Students will acquire economic literacy, i.e. a basic knowledge regarding important economic events in history and understanding of the economic institutions in the world.
- Students will learn to integrate theory and empirics to make assessments of economic policy, with a critical eye toward distinguishing causality and an understanding of the micro-foundations of economic policy.
- Students will acquire the ability and skill to communicate economic reasoning orally and in writing.

Economics - Minor

The Department of Economics at CU Boulder is recognized as a very high quality research and teaching department.

Economics is a quantitative, policy oriented social science with a highly developed body of theory and a wide range of real-world applications. Economists seek to describe the process by which societies use scarce resources to attain societal goals and predict the consequences of changes in those processes. Theoretical models, understanding of economic and policy making institutions, quantitative analysis, and the examination of data are all part of this field of knowledge.

In general, economists are interested in the economic behavior of individuals. Investigations of the daily decisions that consumers, workers and firm managers make, as well as the interactions of such economic decisions in markets, constitute the subject of microeconomics. Macroeconomics refers to the analysis of economic activity of individuals aggregated over many markets. Some of the specific issues of macroeconomics include economic growth, inflation, recession and unemployment. Finally, international economics investigates the interrelationships among different economies and, in particular, studies the pattern of trade and payments between countries.

Faculty fields of specialization include international trade/finance, natural resource and environmental economics, public economics, urban and regional economics, development economics, labor economics and demography, political economics, economic history, industrial organization/game theory and econometrics.

The Department of Economics offers a minor. It is open to any student enrolled at CU Boulder, regardless of college or school, except for those pursuing an individually structured major or a major in distributed studies.

Requirements

Program Requirements

Completion of the minor requires a minimum of 20 credit hours in economics.

All coursework applied to the minor must be completed with a grade of C- or better. No pass/fail work may be applied. The GPA for all minor coursework must equal 2.00 or higher.

Students will be allowed to apply no more than 9 credit hours, including 6 upper-division credit hours, of transfer work toward a minor. If transferred coursework includes replacements for ECON 2010 or ECON 2020 that are fewer than a combined 7 credit hours for both courses, an additional upper-division elective will be added to the requirements for a minor.

Students may elect to take the 3000-level ECON courses that are designed for non-economics majors (e.g., ECON 3403, ECON 3535, ECON 3545, ECON 3616 and ECON 3784).

ECON 3070, ECON 3080 and all 4000-level ECON courses require a prerequisite of calculus. Students may take the following courses to meet this prerequisite: ECON 1088, MATH 1330 or APPM 1350.

¹ ECON 3818 and equivalent substitutes are not allowed to count as an upper-division elective. If transferred coursework includes replacements for ECON 2010 or ECON 2020 that are fewer than a combined 7 credit hours for both courses, an additional upper-division elective will be required.

English

The literature track of the undergraduate degree in English emphasizes knowledge and awareness of:

- canonical and non-canonical works of English and American literature;
- the history of British and American literature;
- literary theories, including recent theoretical developments; and
- the social and historical contexts in which the traditions developed.

The creative writing track of the undergraduate degree in English emphasizes knowledge and awareness of:
• literary works, including the genres of fiction, poetry, creative nonfiction, playwriting and screenwriting, and the major texts of contemporary writers;
• literary history, including the origins and development of genres, major writers of the past and the role of the writer in society; and
• analysis of literary form, including theories of literary composition and critical theory.

Course code for this program is ENGL.

Advising

Upon declaring an English major, students are assigned an English advisor. The advisors are available to meet with students by appointment and on a drop-in basis. The advisors monitor and evaluate student progress in completing the arts and sciences core curriculum and major requirements, and certify students for graduation. The department encourages students to meet with their primary advisor at least once each semester to update their student file and ensure that they are making satisfactory progress in meeting the college and major requirements.

Departmental Honors

Students interested in pursuing a special program leading to graduation with departmental honors should confer with the associate chair for undergraduate studies as soon as possible, but definitely no later than the beginning of spring term in their junior year. For additional information on departmental honors, visit the department’s Undergraduate Studies (https://www.colorado.edu/english/current-students/undergraduates/) webpage.

Students Who Contemplate Teaching

Sheets listing the curriculum required for a teaching license for secondary schools may be obtained in room Education 151. Since fulfilling requirements for both education and English makes a very tight schedule, students should seek early advising to complete their college requirements. For additional information, see the Teacher Licensure Program (p. 645).

Undergraduate English Awards and Prizes

The Alex McGuiggan Scholarship

The Alex McGuiggan Scholarship was established in spring 2010 to recognize the achievement of an undergraduate English major studying creative writing with a preference for students whose strength is in writing poetry. The scholarship was established in memory of Alex McGuiggan, an English major at the University of Colorado Boulder.

The Curtis Michael Gimeno Memorial Scholarship

This scholarship benefits students with a creative writing emphasis who exemplify promise of talent in communicating through the written language. The scholarship was generously established by Donna Jorgenson Farrell in memory of and as a legacy to her son, Curtis Michael Gimeno, who enjoyed writing.

The Dick Shahan CU Boulder Undergraduate Writing Competition

Created by English alumnus Dick Shahan, this scholarship is open to all CU Boulder undergraduate students enrolled in the department of English. Students can use their imaginations and demonstrate their writing skills in different genres.

The Gentian Ascension Scholarship

This scholarship is a variable annual award established to benefit an undergraduate student who exhibits a past that demonstrates overcoming academic obstacles and shows budding talent as a writer.

The Harold D. Kelling Essay Prize

The Kelling prize is a variable cash award for the best essay on literature submitted by an undergraduate currently enrolled in the university. The essay must have been written for an English class at CU Boulder.

The Joanne Easley Arnold Award

The Joanne Easley Arnold English Scholars Fund is a two-year award designed to recognize and provide financial and intellectual support to a top English major in honor of the donor, Joanne Easley Arnold, who was a dean with the university.

The Jovanovich Imaginative Writing Prize

The Jovanovich prize is an annual award for excellence in poetry, fiction, playwriting or nonfiction prose.

The Katherine Lamont Scholarship

The Lamont scholarship is a variable annual award to a continuing English major in recognition of sustained excellence and exceptional scholarly performance in the major.

Bachelor's Degree

• English - Bachelor of Arts (BA) (p. 256)

Minors

• Creative Writing - Minor (p. 259)
• English - Minor (p. 259)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

**Courses**

**ENGL 1001 (3) Freshman Writing Seminar**  
Provides training and practice in writing and critical thinking. Focuses on the writing process, the fundamentals of composition, and the structure of argument. Provides numerous and varied assignments with opportunity for revision.  
**Requisites:** Restricted to students with 0-56 credits (Freshmen or Sophomore) College of Arts and Sciences majors only.  
**Additional Information:** Arts Sci Core Curr: Written Communication  
Arts Sci Gen Ed: Distribution-Arts Humanities  
MAPS Course: English  
**Grading Basis:** Letter Grade

**ENGL 1191 (3) Introduction to Creative Writing**  
Introduces techniques of fiction and poetry. Student work is scrutinized by the instructor and may be discussed in a workshop atmosphere with other students. May not be taken concurrently with ENGL 2021 or ENGL 2051. May not be repeated.  
**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Undergraduate Writing

**ENGL 1210 (3) The Novel**  
Explores the many possibilities of the novel, or, the novel as possibility, and emphasize that formal and aesthetic innovation is not peripheral to the novel’s development but central to its influence and existence. Focuses on the elements of fiction in order to develop an aesthetic and literary appreciation of this complex art form.  
**Grading Basis:** Letter Grade  
**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: General Literature and Language

**ENGL 1220 (3) From Gothic to Horror**  
Explores literature in the Gothic mode and aesthetic and critical theories related to modern “horror” genres or their precursors. Introduces literary-critical concepts (such as notions of abjection, repression and anxiety) that developed alongside this branch of literature. Students read canonical works in British and American traditions while reflecting on notions of popular or marginalized literature.  
**Additional Information:** Arts Sci Core Curr: Literature and the Arts  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: General Literature and Language

**ENGL 1230 (3) Environmental Literature**  
Introduces students to the tradition of nature writing dating from Romanticism through realist and experimental contemporary literary texts. Students will study key terms and concepts related to the environment such as anthropocentrism, bioregionalism, eco-cosmopolitanism, environmental justice, deep ecology, and posthumanism. They will apply them to different literary genres toward developing critical analyses and environmental readings.  
**Grading Basis:** Letter Grade  
**Additional Information:** Arts Sci Core Curr: Literature and the Arts  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: General Literature and Language

**ENGL 1240 (3) Planetarity**  
Focuses on the elements of fiction in order to develop an aesthetic and literary appreciation of this complex art form. Provides training and practice in writing and critical thinking. Focuses on the writing process, the fundamentals of composition, and the structure of argument. Provides numerous and varied assignments with opportunity for revision.  
**Requisites:** Restricted to students with 0-56 credits (Freshmen or Sophomore) College of Arts and Sciences majors only.  
**Additional Information:** Arts Sci Core Curr: Written Communication  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Undergraduate Writing  
**MAPS Course:** English  
**Grading Basis:** Letter Grade

**ENGL 1250 (3) Introduction to Global Women’s Literature**  
Introduces global literature by women. Covers both poetry and fiction and varying historical periods. Acquaints students with the contribution of women writers to the literary tradition and investigates the nature of this contribution.  
**Equivalent - Duplicate Degree Credit Not Granted:** WGST 1250  
**Additional Information:** Arts Sci Core Curr: Human Diversity  
Arts Sci Gen Ed: Diversity-Global Perspective  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: General Literature and Language

**ENGL 1260 (3) Introduction to Women’s Literature**  
Introduces literature by women in England and America. Covers both poetry and fiction and varying historical periods. Acquaints students with the contribution of women writers to the English literary tradition and investigates the nature of this contribution.  
**Equivalent - Duplicate Degree Credit Not Granted:** WGST 1260  
**Additional Information:** Arts Sci Core Curr: Human Diversity  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Diversity-Global Perspective  
Departmental Category: General Literature and Language

**ENGL 1270 (3) Introduction to American Women’s Literature**  
Introduces literature by women in America. Covers both poetry and fiction and varying historical periods. Acquaints students with the contribution of women writers to the literary tradition and investigates the nature of this contribution.  
**Equivalent - Duplicate Degree Credit Not Granted:** WGST 1270  
**Additional Information:** Arts Sci Core Curr: Human Diversity  
Arts Sci Gen Ed: Diversity-U.S. Perspective  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: General Literature and Language

**ENGL 1340 (3) Mysticism and the Jewish American Literary Tradition**  
Explores the mystical tradition within Judaism from ancient times to the present. With roots in the Hebrew Bible, Jewish mysticism is one of the oldest forms of mysticism and has had an influence on some of the greatest philosophical traditions of western civilization.  
**Equivalent - Duplicate Degree Credit Not Granted:** JWST 1234  
**Grading Basis:** Letter Grade  
**Additional Information:** Arts Sci Core Curr: Ideals and Values  
Departmental Category: American Literature
ENGL 1420 (3) Poetry
Introduces students to how to read a poem by examining the great variety of poems written and composed in English from the very beginning of the English language until recently.
Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: General Literature and Language

ENGL 1500 (3) Introduction to British Literature
Introduces students to the British literary tradition through intensive study of centrally significant texts and genres.
Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: General Literature and Language

ENGL 1600 (3) Introduction to American Literature
Introduces students to the American literary tradition through intensive study of centrally significant texts and genres.
Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: General Literature and Language

ENGL 1800 (3) American Ethnic Literatures
Introduces significant fiction by ethnic Americans. Explores both the literary and the cultural elements that distinguish work by these writers. Emphasizes materials from Native American, African American, and Chicano traditions.
Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Diversity-U.S. Perspective
Departmental Category: General Literature and Language

ENGL 2017 (3) World Genres
Explores literary form and language in a wide range of cultures, introducing students to the global English literary tradition, comprising multiple lineages. Introduces students to poetry, narrative, drama, orality, media, digitality, and/or other genres drawn from diverse traditions, each locally historicized and contextualized.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

ENGL 2021 (3) Introductory Poetry Workshop
Introductory course in poetry writing. Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Requires prerequisite course of ENGL 1191 (minimum grade B).

ENGL 2036 (3) Introduction to Media Studies in the Humanities
Serves as an introduction to media studies specifically from a humanities perspective. Studies both histories and theories of media from the 20th and 21st centuries. Touches on methodologies for undertaking media studies (including distant ready and media archaeology). Objects of study may include such topics as film, radio, social media platforms and games, as well as digital art and literature.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 2036
Repeatable: Repeatable for up to 6.00 total credit hours.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Advanced Theory, Genre Studies and Popular Culture

ENGL 2051 (3) Introductory Fiction Workshop
Introductory course in fiction writing. Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Requires prerequisite course of ENGL 1191 (minimum grade B).

ENGL 2058 (3) Twentieth- and Twentyfirst-Century Literature
Surveys the major literary trends in prose and poetry from 1900 to the present in the Anglo-American tradition of modern, postmodern, and contemporary literature. Provides students with a grounding in the major authors and motifs of 20th- and 21st-century in literature in conjunction with political and cultural changes across the periods
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Critical Studies in English

ENGL 2102 (3) Literary Analysis
Provides a basic skills course designed to equip students to handle the English major. Emphasizes critical writing and the acquisition of basic techniques and vocabulary of literary criticism through close attention to poetry and prose.
Requisites: Restricted to English (ENGL) majors and minors only.

ENGL 2112 (3) Introduction to Literary Theory
Introduces students to a wide range of critical theories that English majors need to know. Covers major movements in modern literary/critical theory, from Matthew Arnold through new criticism to contemporary postmodern frameworks. Required for all English majors.
Requisites: Restricted to English (ENGL) majors and minors only.

ENGL 2115 (3) American Frontiers
Considers the backdrop of the American West in literature, film, photography and computer gaming. Focuses on a range of narratives and images depicting this wide swathe of American geography while simultaneously cultivating close reading skills, digital media analysis and film analysis that will aid in deeper insights at the textual level.
Arts Sci Gen Ed: United States Context
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Critical Studies in English

ENGL 2503 (3) British Literary History to 1660
Provides a chronological study of great figures and forces in English literature from Beowulf to 1660.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: American Literature

ENGL 2504 (3) British Literary History after 1660
Surveys key trends and works in British literature from 1660 to 1900 by focusing on issues such as modernity; national identity; political, economic, social, and scientific revolutions; reading and media technologies; and the relationship between literary and visual culture. May include works by Apha Behn, William Hogarth, the Wordsworths, Jane Austen, the Brontës, Charles Dickens, Christina Rossetti, and Joseph Conrad. Formerly ENGL 2512.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: British Literature to 1660

ENGL 2555 (3) Introduction to American Literature
Chronological survey of the literature from Bradford to Whitman.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: American Literature
ENGL 2665 (3) Introduction to American Literature 2
Chronological survey of the literature from Whitman to Faulkner. Continuation of ENGL 2655.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: American Literature

ENGL 2707 (3) Introduction to Lesbian, Bisexual, and Gay Literature
Offers students at sophomore and junior levels an introduction to some of the forms, concerns, and genres of contemporary lesbian, bisexual, transgender and gay writing in English.
Equivalent - Duplicate Degree Credit Not Granted: LGBT 2707
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Multicultural and Gender Studies

ENGL 2717 (3) American Indian Literature
Surveys historical and contemporary North American Native American literature. Examines the continuity and incorporation of traditional stories and values in Native Literature, including novels, short stories and poetry.
Equivalent - Duplicate Degree Credit Not Granted: ETHN 2713
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Multicultural and Gender Studies

ENGL 2727 (3) Survey of African American Literature 1
Surveys African American literature from the 17th century through the Harlem Renaissance and Depression.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Multicultural and Gender Studies

ENGL 2737 (3) Survey of African American Literature 2
Surveys African American literature from the Depression to the present.
Equivalent - Duplicate Degree Credit Not Granted: ETHN 2732
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Multicultural and Gender Studies

ENGL 2747 (3) Chicana/Chicano and Mexican Literature
Introduces Chicana and Chicano and Mexican literary studies, focusing on narrative works by Chicana and Chicano writers. Examines diverse range of Mexican writing in Greater Mexico as it addresses recurring issues and themes, including language, race and class, questions of identity and gender relations.
Equivalent - Duplicate Degree Credit Not Granted: ETHN 2746
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Multicultural and Gender Studies

ENGL 2767 (3) Survey of Post-Colonial Literature
Surveys the development of literatures in English in former British colonies. Topics include the spread and adaptation of English language literary forms in Asia, Africa, the Caribbean, and the far new world (Australia and New Zealand). Students learn the causes of the dispersion and the motivations for the clearly different uses of English literary forms in the ex-colonies.
Equivalent - Duplicate Degree Credit Not Granted: ETHN 2761
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Diversity-Global Perspective
Departmental Category: Multicultural and Gender Studies

ENGL 3000 (3) Shakespeare for Nonmajors
Introduction to Shakespeare. Introduces students to 6-10 of Shakespeare's major plays. Comedies, histories, and tragedies will be studied. Some non-dramatic poetry may be included. Viewing of Shakespeare in performance is often required.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only. English (ENGL) and Humanities (HUMN) majors are excluded from taking this class.
Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: General Literature and Language

ENGL 3005 (3) The Literature of New World Encounters
Explores American literature as a site of cultural intersection between European settlers and indigenous peoples.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: American Literature

ENGL 3006 (3) Digital Editions & Web Publishing
Introduces students to the theories and practices involved in making a scholarly edition. Students create their own digital editions and learn the requisite skills to publish scholarly research on the web.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

ENGL 3008 (3) Developments in the Novel, Post-1900
Introduces students to the major works, authors and formal trends of the 20th and 21st-century novel. Texts may be drawn from British, American and global literary traditions. Focuses on a specific movement, development, or transformation in the genre post-1900, for instance, modernism, postmodernism, naturalism, realism, postcolonial fiction, historical fiction.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

ENGL 3011 (3) Literary Forms and Styles in Post-1900 Literature
Studies special topics in literary forms and styles (e.g. magical realism, naturalism, language poetry, etc.) and also the development of genres (e.g. poetry, drama, digital media, novel) in the 20th- and 21st-centuries. Topics vary each semester. Specially design for English majors. May be repeated for a total of 6 units for different topics.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Critical Studies in English

ENGL 3021 (3) Intermediate Poetry Workshop
Intermediate course in poetry writing.
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Requires prerequisite course of ENGL 2021 (minimum grade B). Restricted to Creative Writing minor students or students with a sub plan of Creative Writing.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Undergraduate Writing
ENGL 3025 (3) American Nationalisms
Examines how literature participates in the creation of American national culture and identify. Surveys major political writing and a variety of literary genres, tropes, and themes from early Native American tales to the 20th-century literature.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: American Literature

ENGL 3026 (3) Syntax, Citation, Analysis: Writing About Literature
Students hone their writing skills by closely analyzing the language in literary texts. The course will focus on the nuances of sentence structure and grammar, in order to help students become better writers and readers. Students will learn how to perform research in literary criticism and will write and revise a research paper, as well as a number of other short papers for different audiences. Students will learn and use citation methods within the discipline and will discuss the reasoning behind citation practice.
Recommended: Prerequisite completion of lower-division writing requirement.
Additional Information: Arts Sci Gen Ed: Written Communication-Upper

ENGL 3031 (3) Studies in Creative Writing for Nonmajors
How do stories work, and what's involved with writing them and then getting them out into the world? This course will, through lectures and recitation, work through the many techniques writers use to pull the reader ahead page by page, dialogue, exposition, prose, structure, and the rest, as well as the various mechanisms by which that writing can make its way out into the world.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

ENGL 3041 (3) Studies in Fiction and Poetry
Examines literary forms and themes with special emphasis on issues related to the craft of poetry and fiction. This course is taught in conjunction with visiting lectures by practicing writers. Does not count as Creative Writing workshop credit.
Requisites: Requires prerequisite course of ENGL 1191 (minimum grade B).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Undergraduate Writing

ENGL 3051 (3) Intermediate Fiction Workshop
Intermediate course in fiction writing.
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Requires prerequisite course ENGL 2051 (minimum grade B). Restricted to Creative Writing minor students or students with a sub plan of Creative Writing.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Undergraduate Writing

ENGL 3060 (3) Modern and Contemporary Literature for Nonmajors
Close study of significant 20th-century poetry, drama, and prose works. Readings range from 1920s to the present.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: General Literature and Language

ENGL 3068 (3) Literature in English, 1900-1945
Surveys major literary trends from 1900-1945 in the Anglo-American tradition, including the characteristics of literary modernism. Covers both prose and poetry, as well as the relationship between literature and history to the close of World War II.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Critical Studies in English

ENGL 3078 (3) Literature in English, 1945-Present
Explores major literary and theoretical trends in the Anglo-American tradition after 1945.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors).
Recommended: Prerequisites ENGL 2102 and ENGL 2058.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Critical Studies in English

ENGL 3081 (3) Intermediate Nonfiction Workshop
Discussion and practical criticism of student work and discussion of relevant works of literary nonfiction.
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Requires prerequisite course of ENGL 2021 or ENGL 2051 (minimum grade B).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Undergraduate Writing

ENGL 3088 (3) Major Authors of Post-1900 Literature
Provides an in-depth study of the work of one or two major authors in the Anglo-American tradition after 1900. May be repeated for a total of 9 units for different topics.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Critical Studies in English

ENGL 3106 (3) Introduction to Literary Study with Data Science
Introduces students to the use of data science methods in literary criticism. This course explores how computers and data science methods can provide insight into literature while also developing the necessary coding skills to perform such analysis. Students will learn both to perform and to think critically about computationally-based literary scholarship.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

ENGL 3116 (3) Topics in Advanced Theory
Studies special topics in theory; specially designed for English majors. Topics vary each semester.
Repeatable: Repeatable for up to 6.00 total credit hours.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Advanced Theory, Genre Studies and Popular Culture

ENGL 3164 (3) History and Literature of Georgian Britain
Provides an interdisciplinary study of England in one of its most vibrant cultural and historical periods. Topics include politics, religion, family life, and the ways contemporary authors understood their world.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Additional Information: Arts Sci Core Curr: Historical Context
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: British Literature after 1660
ENGL 3204 (3) Developments in the Novel
Surveys key developments in the formal and socio-cultural history of the British novel, from its rise in the long eighteenth century to its preeminence during the Victorian era. Readings may include works by Aphra Behn, Daniel Defoe, Jonathan Swift, Samuel Richardson, Laurence Sterne, Jane Austen, Mary Shelley, the Brontës, Charles Dickens, George Eliot, Thomas Hardy, Oscar Wilde and Joseph Conrad.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: British Literature after 1660

ENGL 3217 (3) Topics in Gender Studies
Studies special topics in gender studies; specially designed for English majors. Topics vary each semester.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Multicultural and Gender Studies

ENGL 3226 (3) Folklore
Emphasizes formal study of folk traditions (including tales, songs, games, customs, beliefs, and crafts) within a theoretical framework, using examples from several cultures.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Multicultural and Gender Studies

ENGL 3235 (3) American Novel
Surveys the American novel. Covers the early development of the American novel, its rise in the 19th- and 20th-centuries, and its contemporary expressions. Students will be introduced to theories of the novel, the major movements and authors, as well as the characteristics that define the American novel as unique.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: American Literature

ENGL 3245 (3) American Poetry
Surveys American poetry from the 17th- to the 21st-century. Includes training in poetic theory, form, and genre, as well as in poetic analysis.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: American Literature

ENGL 3246 (1-3) Topics in Popular Culture
Studies special topics in popular culture; specially designed for English majors. Topics vary each semester. May be repeated for a total of 6 credit hours for different topics.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

ENGL 3267 (3) Women Writers
Introduces literature by British and American women.
Equivalent - Duplicate Degree Credit Not Granted: WGST 3267
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Multicultural and Gender Studies

ENGL 3300 (3) Literary London
Study the works of a major author, school or period of English literary history in London. Subject rotates each year, with possible topics ranging from medieval to contemporary literature. Course incorporates local sites, landmarks, museums, performances and scholars. Application through the Office of International Education required.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Grading Basis: Letter Grade

ENGL 3310 (3) The Bible as Literature
Surveys literary achievements of the Judeo-Christian tradition as represented by the Bible. Formerly ENGL 3312.
Equivalent - Duplicate Degree Credit Not Granted: HUMN 3310 and JWST 3310
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

ENGL 3377 (3) Multicultural Literature
Studies special topics in multicultural literature; specially designed for English majors. Topics vary each semester.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Multicultural and Gender Studies

ENGL 3523 (3) The Early English Renaissance
Surveys prose, poetry and drama of the Tudor era, from Skelton and More through Shakespeare and his contemporaries. Formerly ENGL 4523.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: British Literature to 1660

ENGL 3533 (3) The Later English Renaissance
Surveys prose, poetry and drama of the seventeenth century, from Donne, Jonson and Bacon through Milton and his contemporaries. Formerly ENGL 4533.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: British Literature to 1660
ENGL 3544 (3) The Long Eighteenth Century: Satire, Sense, and Sentiment from Behn to Austen
Examines the literature and culture of the "long eighteenth century" (1660-1815), when satire ruled, the novel rose to prominence, philosophers challenged authority, and romanticism took hold. Studies how authors used evolving forms to confront and buttress authority and ask what being human means: Is it to reason and feel? To trade and own things? To be free?
**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: British Literature after 1660

ENGL 3553 (3) Geoffrey Chaucer
Selection of Chaucer's works, including The Canterbury Tales and other shorter poems. Includes an introduction to Middle English.
**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: British Literature to 1660

ENGL 3563 (3) Shakespeare
Shakespeare's poetry and drama.
**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: British Literature to 1660

ENGL 3564 (3) Romanticism
Surveys British Romanticism, including Blake, Coleridge, Wordsworth, Keats, Shelley, and Byron.
**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: British Literature to 1660

ENGL 3573 (3) Shakespeare in Performance
Focuses on Shakespeare the dramatist through the study of the three Shakespeare plays produced in the summer by the Colorado Shakespeare Festival. In addition to exploring the text, the historical context and performance conventions c. 1600, students meet the CSF teams (professional directors, dramaturgs, designers and actors) of the three plays and the Producing Artistic Director of the CSF.
**Repeatable:** Repeatable for up to 9.00 total credit hours.
**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: British Literature to 1660

ENGL 3583 (3) Milton
Milton's poetry and selected prose.
**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: British Literature to 1660

ENGL 3593 (3) Major Authors in British Literature before 1660
Focuses on one major author of the medieval or early modern period, such as William Langland, John Lydgate, Edmund Spenser or Ben Jonson. Course content varies with instructor and may include literary influences, contemporary writers, and historical influences as necessary to understanding the writer. May be repeated for a total of 9 units for different topics.
**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: British Literature to 1660

ENGL 3604 (3) The Victorians
Surveys Victorian literature, including poetry, the novel, and other prose writings, from the Brontës and Charles Dickens to the Pre-Raphaelites and Oscar Wilde. Explores such topics as industrialization and class conflict, the "Woman Question," the British Empire, science and technology, degeneration and apocalypse, mass literacy and popular culture, consumerism, the metropolis vs. the countryside, and visual culture.
**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: British Literature after 1660

ENGL 3675 (3) Majors Authors in American Literature
Provides an in-depth study of the work of one or two major American authors. Explores the range, influences, and development of a writer over his or her life.
**Repeatable:** Repeatable for up to 9.00 total credit hours.
**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors).
**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: American Literature

ENGL 3767 (3) Feminist Fictions
Examines a series of literary texts to consider how writers across the world have used fiction to creatively stage and reimagine gender and sexuality. Attends to the formal and narrative techniques by which these texts call attention to the fictionality—and thereby the creative malleability—of gender itself. Some cinematic and performance texts will also be included.
**Equivalent - Duplicate Degree Credit Not Granted:** WGST 3767
**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities Arts Sci Gen Ed: Diversity-Global Perspective Departmental Category: Multicultural and Gender Studies

ENGL 3796 (3) Queer Theory
Surveys theoretical, critical, and historical writings in the context of lesbian, bisexual, transgender and gay literature. Examines relationships among aesthetic, cultural and political agendas, and literary and visual texts of the 20th century.
**Equivalent - Duplicate Degree Credit Not Granted:** LGBT 3796
**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors).
**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Advanced Theory, Genre Studies and Popular Culture
ENGL 3856 (1-3) Topics in Genre Studies
Studies special topics in genre studies; specially designed for English majors. Topics vary each semester. May be repeated for a total of 6 credit hours for different topics.
Repeatable: Repeatable for up to 6.00 total credit hours.
Required: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Advanced Theory, Genre Studies and Popular Culture

ENGL 3930 (1-6) Internship
Provides academically supervised opportunity for upper-division students to work in public or private organizations on projects related to students' career goals and to relate classroom theory to practice. Department enforced prerequisite: 3.0 GPA and faculty supervision.
Repeatable: Repeatable for up to 8.00 total credit hours.
Required: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Departmental Category: General Literature and Language

ENGL 3940 (1-3) Service Learning Practicum
Under faculty supervision, students participate in a service project in conjunction with an academic course.
Repeatable: Repeatable for up to 6.00 total credit hours.
Additional Information: Departmental Category: General Literature and Language

ENGL 4003 (3) Introduction to Old English
Introduces students to Old English, the ancient ancestor of Modern English (as Latin is the ancestor of Spanish and Italian, distinct from both). Course will focus on reading knowledge through grammar study and translation, and to a lesser extent on pronunciation. Provides basic parsing and translation skills and an introduction to the history, culture, and literature of early medieval Britain. Provides an introduction to grammar and to the history of the English language.
Equivalent - Duplicate Degree Credit Not Granted: ENGL 5003
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: British Literature to 1660

ENGL 4013 (3) Intermediate Old English I
Continues to develop skills in Old English reading and translation. Focusses on shorter canonical texts in verse and prose. Students will produce idiomatic translations for every class, write a midterm exam based on those translations, and write either a final exam or a final paper. Students will also memorize and present a short section of the poem in the original language. Graduate students will read and present on secondary scholarship and produce original research.
Equivalent - Duplicate Degree Credit Not Granted: ENGL 5013
Required: Requires prerequisite course of ENGL 4003 (minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: British Literature to 1660

ENGL 4018 (3) Literature and Globalization
Studies special topics that focus on transnational and global issues since 1600. Topics vary each semester and may include globalization, cross-cultural exchanges, migration, and the history and legacies of imperialism. Specially designed for English majors. May be repeated for a total of 6 credits for different topics.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Required: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Undergraduate Writing

ENGL 4021 (3) Advanced Poetry Workshop
Advanced course in poetry writing.
Repeatable: Repeatable for up to 9.00 total credit hours.
Required: Requires prerequisite course ENGL 3021 (minimum grade B).
Restricted to Creative Writing minor students or students with a sub plan of Creative Writing.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Undergraduate Writing

ENGL 4023 (3) Intermediate Old English II: Beowulf
Continues to develop students' proficiency in Old English through the translation and literary study of the heroic poem _Beowulf_. Students will produce idiomatic translations for every class, write a midterm exam based on those translations, and write either a final exam or a final paper. Students will also memorize and present a short section of the poem. Graduate students will read and present on secondary scholarship and produce original research. Previously offered as a special topics course.
Required: Requires prerequisite courses of ENGL 4003 or ENGL 4013 (minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

ENGL 4026 (3) Special Topics in Genre, Media, and Advanced Writing
Studies theoretical and historical approaches to genre, media, and writing at the advanced level.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Required: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Advanced Theory, Genre Studies and Popular Culture

ENGL 4039 (3) Critical Thinking in English Studies
Concerned with developments in the study of literature that have significantly influenced our conception of the theoretical bases for study and expanded our understanding of appropriate subject matter.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Required: Requires prerequisite courses of ENGL 2102 and ENGL 2112 (all minimum grade C). Restricted to students with 57-180 credits (Junior or Senior) English (ENGL) or Humanities (HUMN) majors and minors only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Critical Studies in English

ENGL 4048 (3) Modern British and Irish Novel
Studies major figures and trends in the 20th century. Formerly ENGL 4224.
Required: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: British Literature after 1660
ENGL 4051 (3) Advanced Fiction Workshop
Advanced course in fiction writing.
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Requires prerequisite course of ENGL 3051 (minimum grade B). Restricted to Creative Writing minor students or students with a sub plan of Creative Writing.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Undergraduate Writing

ENGL 4071 (3) Screenwriting Workshop
Designed to give students practical criticism of their script writing and technical format requirements. Either stage plays or screenplays are studied, as announced.
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Requires prerequisite course of ENGL 3021 or ENGL 3051 (minimum grade B). Restricted to Creative Writing minor students or students with a sub plan of Creative Writing.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Undergraduate Writing

ENGL 4081 (3) Playwriting Workshop
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Requires prerequisite course of ENGL 3021 or ENGL 3051 (minimum grade B). Restricted to Creative Writing minor students or students with a sub plan of Creative Writing.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Undergraduate Writing

ENGL 4098 (3) Special Topics in the Novel, Post-1900
Explores a special topic in literature written in, or translated into English, post-1900.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

ENGL 4113 (3) History and Culture of Medieval England
Explores the major historical, literary, and cultural developments in England from the Anglo-Saxon period through the 15th-century.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

ENGL 4116 (3) Advanced Topics in Media Studies
Studies specialized topics in the history, theory, and practice of media, such as the history of the book, the theory of digital media, and the theory and practice of multimedia forms. Specially designed for English majors. Topics vary year to year.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

ENGL 4206 (3) Writing for the Real World
Trains students in advanced techniques of writing with a view toward real world application—that is, usefulness after graduation. Emphasis on writing for a variety of audiences and techniques for achieving conciseness, clarity, expressiveness, logic, and appropriateness of diction and evidence. Readings include classic and contemporary writings about writing and exemplary professional essays from a variety of fields. Previously offered as a special topics course.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

ENGL 4250 (3) Modern and Contemporary Novel
Close study of masterpieces by such novelists as Proust, Joyce, Woolf, Lawrence, Mann, Kafka, and Faulkner.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: General Literature and Language

ENGL 4277 (3) Topics in Women's Literature
Focuses on areas of research interest in the study of women's literature, such as selected themes or critical issues. Students are expected to contribute original research to the topic under consideration.
Equivalent - Duplicate Degree Credit Not Granted: WGST 4277
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Multicultural and Gender Studies

ENGL 4286 (3) Folklore 2
Upper-division studies of folk groups, events, texts, and contexts as they reflect traditional knowing—folk perceptions and teachings about the structure and purpose of the universe.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

ENGL 4287 (3) Special Topics in LGBT Literature
Examines a special topic in LGBT literature, foregrounding an approach that focuses on how same-sex desire is represented in literature. May explore the rhetorical and ideological depiction of masculinity and femininity; literary representations of inversion, bisexuality, and transgenderism; the social construction of homosexuality and heterosexuality. Specific topics vary each semester.
Equivalent - Duplicate Degree Credit Not Granted: LGBT 4287 and WGST 4287
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Multicultural and Gender Studies

ENGL 4368 (3) Modern Drama
Explores continental, British, and American drama since Ibsen.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: General Literature and Language
ENGL 4468 (3) Modern Poetry
Selects works of British and American poets from 1900 to the present.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: General Literature and Language

ENGL 4503 (3) Continental Medieval Literature
Intensive study of the major literary works of the Middle Ages in Europe.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: British Literature to 1660

ENGL 4514 (3) Advanced Topics: The Long 18th Century
Covers advanced topics in the Restoration and Eighteenth-century.
Repeatability: Repeatable for up to 9.00 total credit hours. Allows multiple
enrollment in term.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: British Literature after 1660

ENGL 4524 (3) Advanced Topics: Romanticism
Covers advanced topics in British Romanticism. Formerly ENGL 4574.
Repeatability: Repeatable for up to 6.00 total credit hours. Allows multiple
enrollment in term.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: British Literature after 1660

ENGL 4534 (3) Advanced Topics: The Victorians
Covers advanced topics in Victorian literature. Formerly ENGL 4614.
Repeatability: Repeatable for up to 6.00 total credit hours. Allows multiple
enrollment in term.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: British Literature after 1860

ENGL 4624 (3) Transnational/Historic/Interdiscipline Approaches
1660-1900
Explores a special topic in British literature written between 1660-1900
that crosses traditional divisions of nationality, history, and discipline.
Repeatability: Repeatable for up to 9.00 total credit hours. Allows multiple
enrollment in term.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: British Literature after 1660
ENGL 4697 (3) Special Topics in Multicultural and Ethnic American Literature
Provides advanced in-depth study of literatures written by ethnic American authors. Texts may be drawn from a range of African-American, Chicano/a, Latino/a, Asian American, Native American or Indigenous literature traditions. Topics vary each semester.
Equivalent - Duplicate Degree Credit Not Granted: ETHN 4692
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
                      Arts Sci Gen Ed: Diversity-U.S. Perspective
Departmental Category: Multicultural and Gender Studies
ENGL 4717 (3) Native American and Indigenous Studies Capstone Seminar
Engages a wide range of NAIS methodologies with a series of case studies. Focuses on print, visual, and digital texts encompassing wide swath of Eurowestern disciplines, while seeking to recuperate and restore Indigenous epistemic practices within our scholarship. Refines students' skills in intellectual debate in the spirit of shared inquiry and challenges research and writing skills.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
                      Arts Sci Gen Ed: Diversity-Global Perspective
Departmental Category: Multicultural and Gender Studies
ENGL 4820 (3) Honors Seminar
Prepares prospective honors students to write honors theses. Focuses on sharpening the skills needed to write a successful thesis, including research techniques and the ability to evaluate and respond to secondary materials. Required for Honors in English Literature.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sciences Honors Course
Departmental Category: General Literature and Language
ENGL 4830 (3) Honors Thesis
Students accepted to English Departmental Honors are enrolled in this course.
Additional Information: Arts Sciences Honors Course
Departmental Category: General Literature and Language
ENGL 4840 (1-3) Independent Study---Upper Division Creative writing.
Repeatable: Repeatable for up to 8.00 total credit hours.
Additional Information: Departmental Category: General Literature and Language
ENGL 4850 (1-3) Independent Study---Upper Division Literature/language.
Repeatable: Repeatable for up to 8.00 total credit hours.
Additional Information: Departmental Category: General Literature and Language

English - Bachelor of Arts (BA)
The English department offers two undergraduate major concentrations culminating in a Bachelor of Arts (BA) in English. These programs overlap so that all English majors learn the skills of literary criticism and the art of excellent writing.

Honors Program
Students interested in pursuing a special program leading to graduation with departmental honors should confer with the associate chair for undergraduate studies as soon as possible, but definitely no later than the beginning of spring term in their junior year.

Requirements
General Requirements
The English department offers two undergraduate major tracks culminating in the Bachelor of Arts (BA) in English. Students must complete the general requirements of the College of Arts and Sciences and one of the two tracks listed below.

A minimum of 12 credit hours of upper-division coursework for the English major must be completed on the Boulder campus. English courses taken at other colleges must be evaluated by the Department of English. Courses taken in other departments (except approved cross-listed courses) normally do not count toward the English major. English courses taken on a pass/fail basis do not fulfill major requirements. Independent study credit hours cannot fulfill a major requirement unless that requirement is not being offered or available within the year that the student graduates.

Note: For the Advanced Placement examination in English literature and composition, students will receive credit for ENGL 1500 for an exam score of 4 or 5.

Program Tracks
Literature Track
Students must complete the major requirements in effect at the time they formally declare the major. A minimum of 36 credit hours must be earned in the Department of English, 18 of which must be upper division. Requirements may be fulfilled by taking specific courses designated by the Department of English.

Optional Electives
In addition to the 36 credit hours required for the major, another 9 credit hours may be taken, for a maximum of 45 credit hours in English.

Total Credit Hours 36

Creative Writing Track
Students are subject to those major requirements in effect at the time they formally declare the major. A minimum of 36 credit hours must be earned in the Department of English, 18 of which must be upper division.
Students declare the creative writing track when declaring their English major with the help of an academic advisor. Students should declare no later than the second semester of their junior year. In order to take workshops beyond the 2000 level, students must declare the creative writing track or the creative writing minor. Each workshop may be taken three times for credit, except for ENGL 1191.

All students completing the creative writing track must take and complete a 4000-level writing workshop. Students may not take two poetry or two fiction workshops in the department in the same semester.

Students must satisfy all required creative writing workshop prerequisites in sequence, with a grade of B or better, before moving on to the workshop at the next level.

1 The sequence of creative writing workshops must begin with ENGL 1191 and proceed according to genre through the 2000-level, 3000-level and 4000-level workshops. For example, the required prerequisites for ENGL 4021 are ENGL 1191, ENGL 2021 and ENGL 3021; and the required prerequisites for ENGL 4051 are ENGL 1191, ENGL 2051 and ENGL 3051.

**Graduating in Four Years**

Consult the Four-Year Guarantee Requirements for information.

The concept of "adequate progress" as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress in English, students should meet the following requirements:

- No later than the beginning of the second semester, declare the English major and begin coursework in the major.
- By the end of the fourth semester, successfully complete one-third of the credit hour requirements for the major for literature track majors, this includes ENGL 2102, an English elective and any 2000-level course for the major. For creative writing track majors, this includes ENGL 2102, ENGL 1191, and ENGL 2021 or ENGL 2051, as well as formal declaration of the creative writing track.
- By the end of the sixth semester, successfully complete two-thirds of the credit hour requirements for the major, including ENGL 2112.
- By the end of the eighth semester, successfully complete the remaining major requirements, including ENGL 4039.

**Recommended Four-Year Plans of Study**

**Literature Track**

Please speak with your advisor for specific recommendations; the following is intended to be a general outline only and there may be flexibility to this plan.

Through the required coursework for the major, students will fulfill all 12 credits of the Arts & Humanities area of the Gen Ed Distribution Requirement, and potentially one or both categories of the Gen Ed Diversity Requirement.

**Total Credit Hours** 122-124

1. Students following the creative writing track of the English major can take up to three optional ENGL electives, with a maximum of 45 total hours in ENGL coursework allowed.

Learning Outcomes

Students completing the literature track are expected to acquire the ability and skills to:

- analyze literary texts;
- interpret texts on the basis of such analysis;
- relate analyses and interpretations of different texts to one another; and
- communicate such interpretations competently in written form.

Students completing creative writing track are expected to acquire the ability and skills to:

- write in various poetic modes and styles,
- write in various fictive styles,
- write in various nonfiction styles, and
- evaluate other students’ written work.

Creative Writing - Minor

Declaration of a minor is open to any student enrolled at CU Boulder, regardless of college or school. Students majoring in English, literature or creative writing track, cannot declare a creative writing minor. Students are subject to those minor requirements in effect at the time they formally declare the minor.

Requirements

Declaring the Minor

Students declare the creative writing minor with the help of an academic advisor. Three hours of transfer workshop credits can be applied with department approval. Students should ideally declare no later than the second semester of their junior year.

In order to take workshops beyond the 2000-level, students must declare the creative writing minor or the creative writing major track. Each workshop may be taken three times for credit, except for ENGL 1191. Students may not take two poetry or two fiction writing workshops in the department in the same semester. Students must satisfy all prerequisites in sequence with a grade of B or better before moving on to the workshop at the next level.

Required Courses and Credit Hours

Completion of the minor requires 18 credit hours, at least 9 of which must be upper division.

English - Minor

Declaration of a minor is open to any student enrolled at CU Boulder, regardless of college or school. Students majoring in English (literature or creative writing track) cannot declare a literature minor. Students are subject to those minor requirements in effect at the time they formally declare the minor.

Requirements

Completion of the minor requires 18 credit hours with grades of C- or better, at least 12 of which must be upper division.

Students may not apply creative writing courses toward the literature minor, and this includes ENGL 3041 Studies in Fiction and Poetry. Students may count either ENGL 3000 Shakespeare for Nonmajors or ENGL 3060 Modern and Contemporary Literature for Nonmajors toward the minor requirements, but may not apply both nonmajors courses to the requirements.

Students must maintain at least a 2.00 (C) GPA in all CU Boulder ENGL courses.

Students may apply no more than 9 credit hours of transfer work, including no more than 6 upper-division credit hours, towards a minor. This is a college residency rule for an 18-credit-hour minor.

Environmental Studies

The Environmental Studies program at CU Boulder is a hub for facilitating interdisciplinary collaboration in environment and sustainability. The program nurtures interdisciplinary academic training for undergraduate and graduate students, provides guidance for students with career aspirations in environment and sustainability venues, promotes diverse
professional education experiences, fosters fundamental and applied research, forms meaningful connections with communities beyond the university, and integrates innovative, interdisciplinary programs unified by the themes of environment and sustainability.

Course code for this program is ENVS.

Bachelor's Degree

• Environmental Studies - Bachelor of Arts (BA) (p. 264)

Certificate

• Global Environmental Affairs (https://catalog.colorado.edu/undergraduate/colleges-schools/arts-sciences/programs-study/international-affairs/global-environmental-affairs-certicate/#text)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Courses

ENVS 1000 (4) Introduction to Environmental Studies
Surveys environmental studies, examining ecological, socioeconomic, political, aesthetic, and technological factors that influence the quality of life on Earth. Required for ENVS majors.

ENVS 1001 (4) Introduction to Developing Environmental Solutions
Builds on ENVS 1000 to give students greater understanding of how to approach environmental issues and work toward solutions. Integrates all focal areas of ENVS - sciences, policy, values - with greatest emphasis on learning science, data analysis and critical thinking fundamentals. Uses case studies of local issues to provide context for skill building and synthesis.

Requisites: Requires a prerequisite course of ENVS 1000 (minimum grade C). Restricted to Environmental Studies (ENVS) majors only.

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ENVS 1150 (3) First-Year Writing in Energy, Environment and Sustainability
Provides development of effective writing skills, knowledge and habits for success in the campus culture using topics related to the environmental sciences, energy, sustainability and academic/career interests. Focuses on the processes in rhetoric, emphasizing skills in creative, analytical and critical thinking, as well as research and presentation using digital and "old fashioned" methods and materials.

Requisites: Restricted to Environmental Studies (ENVS) students with 0-56 credits (Freshman or Sophomore) only.

Grading Basis: Letter Grade

ENVS 2000 (4) Applied Ecology for Environmental Studies
Covers how ecological ideas and principles underlie both the problems and solutions of multiple environmental issues. Ecology of environmental concerns ranging from endangered species to global carbon cycling will be reviewed, including perspectives from physiological, behavioral, population, community and ecosystem ecology. Fulfills intermediate natural science requirement for Environmental Studies major.

Equivalent - Duplicate Degree Credit Not Granted: EBI0 2040 and EBI0 2640
Recommended: Prerequisites ENVS 1000 and a course in introductory statistics and two courses in introductory biology or physical geography.

ENVS 2001 (3) Topical Seminar in Environmental Studies
Serves as an introductory seminar to topics in environmental studies. Topics are diverse and include such areas as climate and conflict, food production, land use change, and other emerging areas in environmental studies.

Grading Basis: Letter Grade

ENVS 2030 (3) Introduction to Human Dimensions of the Environment
Reviews social science concepts and research important to the understanding of human interactions with the environment. Serves as an introduction to the study of demographic processes, human decision making, approaches to environmental governance, consumption patterns, among other foundational topics. Content will be grounded in contemporary case studies that will vary with instructor. Positions students to participate in interdisciplinary dialogue and practice related to solving environmental problems.

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ENVS 2100 (2-4) Topics in Applied Environmental Studies
Covers a variety of topics not currently offered in the curriculum: offered depending on instructor availability and student demand. Fulfills application requirement in Environmental Studies major.

Repeatable: Repeatable for up to 6.00 total credit hours.
Recommended: Prerequisite ENVS 1000.

ENVS 2840 (1-6) Independent Study
Students work with an approved faculty sponsor to explore a topic in greater depth and to pursue an interest that is not offered in the formal curriculum.

Repeatable: Repeatable for up to 8.00 total credit hours.
Recommended: Prerequisite ENVS 1000.

ENVS 3001 (3) Sustainable Solutions Consulting
Introduces students to green design, industrial ecology, and life cycle analysis. Students use basic techniques of environmental auditing to analyze the CU Boulder campus. Fulfills application requirement for Environmental Studies major.

Requisites: Requires prerequisite course of ENVS 1000 (minimum grade D). Restricted to students with 57-180 credits (Junior or Senior) Environmental Studies (ENVS) majors only.

Recommended: Requisite any two-semester science sequence.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ENVS 3005 (3) Environmental Education: From Theory to Practice
Learning to teach about the environment is an essential skill for helping to create a sustainable world. From urban school programs to nature centers, to fostering social justice and international collaboration - becoming an effective environmental educator can support many professional pursuits. It’s fun too! This class will help you gain essential knowledge and skills for starting on this path.

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ENVS 3007 (3) Animal Ethics and Policy
Explores the principles that underlie our treatment of and attitudes toward non-human animals. Analyzes how these principles impact environmental policy in the context of contemporary environmental issues and debates.

ENVS 3020 (3) Advanced Writing in Environmental Studies
Offers training in critical thinking and analytical writing skills appropriate to upper-division classes. Writing assignments integrate the subject matter of different topical areas. Fulfills writing requirement for Environmental Studies major.

Recommended: Prerequisite ENVS 1000.

Additional Information: Arts Sci Core Curr: Written Communication
Arts Sci Gen Ed: Written Communication-Upper

ENVS 3022 (3) Climate Politics and Policy
Engages students in exploring the realm of contemporary and historical climate policy at three major levels of government: international, national and local/regional. Through course lectures, discussions, readings and activities, students will become conversant with the actors, mechanisms and concerns involved in climate policy and politics and develop their own sense of how to judge the success of climate policies. Fulfills intermediate social science requirement in Environmental Studies Major.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 3022
Recommended: Prerequisite ENVS 1000 or GEOG 1972.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ENVS 3030 (3-4) Topics in Environmental Social Sciences
Covers a variety of topics that may include human ecology, environment and society, and quantitative environmental social science. Offered depending upon instructor availability and student demand. Fulfills intermediate social science requirement for Environmental Studies major.

Not repeatable for credit.

Recommended: Prerequisite ENVS 1000.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ENVS 3031 (3) Environmental Psychology
Examines how people interact with the environment by examining theories and methods from Environmental Psychology. How does nature impact human well-being? How do people make decisions that have environmental consequences? How can we promote behavior change to reduce environmental degradation? Fulfills intermediate social science requirement for ENVS major.

Requisites: Require prerequisites of ENVS 1000 and ENVS 1001 (both minimum grade C-).

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
ENVS 3032 (3) Environment, Media and Society
Examines how mass media influence our society, specifically with regard to environmental issues and outcomes. Focuses on media influence over environmental politics and policy, environmental public opinion, popular culture, and environmental/scientific knowledge. Fulfills intermediate social science requirement for Environmental Studies major.
Recommended: Prerequisite ENVS 1000.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ENVS 3033 (3) Governing the Environment
Examines how, when, and why human communities succeed in conserving environmental commons. Using a marine lens and taking a social-ecological systems approach, this course will provide foundations in environmental governance while examining case studies from local to global scale. Utilizes lecture, discussion, group work, literature, film, guest speakers, and class projects to study environmental problems and their solutions, including the student’s personal role in governing natural resources. Fulfills intermediate social science requirement for ENVS major.
Recommended: Prerequisite ENVS 1000.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ENVS 3040 (4) Conservation Biology
Applies principles of population ecology, population genetics, biogeography, animal behavior, and paleobiology to the maintenance of biodiversity and natural systems. The resulting theory is then applied to conservation policy and management techniques.
Equivalent - Duplicate Degree Credit Not Granted: EBIO 3040
Recommended: Prerequisite EBIO 2040 or EBIO 2640.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ENVS 3064 (3) Environmental Political Theory
Examines contemporary discourse as conceptual means for theorizing environmental politics, and applies normative political theories to contemporary environmental policy issues. Considers the roles of political actors (individuals, groups, the state) in defining and addressing environmental problems on local, national, and global levels.
Equivalent - Duplicate Degree Credit Not Granted: PSCI 3064
Additional Information: Arts Sci Core Curr: Ideals and Values
Arts Sci Gen Ed: Distribution-Social Sciences
Arts Sci Gen Ed: Distribution-Arts Humanities

ENVS 3070 (3) Energy and the Environment
Examines contemporary issues in energy consumption and its environmental impact, including fossil fuel use and depletion; nuclear energy and waste disposal; solar, wind, hydroelectric, and other renewable sources; home heating; energy storage; fuel cells; and alternative transportation vehicles. Includes some basic physical concepts and principles that often constrain choices. No background in physics is required.
Equivalent - Duplicate Degree Credit Not Granted: PHYS 3070
Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences

ENVS 3100 (2-4) Topics in Applied Environmental Studies
Covers a variety of topics not currently offered in the curriculum; offered depending upon instructor availability and student demand. Fulfills application requirement for Environmental Studies major.
Repeatable: Repeatable for up to 8.00 total credit hours.
Recommended: Prerequisite ENVS 1000.

ENVS 3103 (3) Applied Environmental Studies: Mining in Four Corners
Explores mining related issues that have pronounced impact on the environment, economy and politics of the Four Corners region. Students apply their basic knowledge of environmental science, policy and values toward the understanding of and productive discourse about the conflicts and opportunities brought about by the mining industry in the Four Corners region. Course includes a seven day field trip, visiting mining and reclamation sites in New Mexico, Utah and Colorado. Fulfills application requirement for Environmental Studies majors.
Recommended: Prerequisite ENVS 1000 and one year natural science.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ENVS 3140 (3) Environmental Ethics
Examines major traditions in moral philosophy to see what light they shed on value issues in environmental policy and the value presuppositions of the economic, ecological, and juridical approaches to the environment.
Equivalent - Duplicate Degree Credit Not Granted: PHIL 3140
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Additional Information: Arts Sci Core Curr: Ideals and Values
Arts Sci Gen Ed: Distribution-Arts Humanities

ENVS 3173 (3) Creative Climate Communication
We generate multimodal compositions on the subject of climate change and engage with various dimensions of issues associated with sustainability. We work to deepen our understanding of how issues associated with climate change are or can be communicated, by analyzing previously created expressions from a variety of media (interactive theatre, film, fine art, television programming, blogs, performance art, for example) and then be creating our own work.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 3173 and THTR 4173
Recommended: Prerequisite ENVS 1000.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Distribution-Social Sciences

ENVS 3434 (3) Introduction to Applied Ecology
Emphasizes the integration of physical, chemical and biological processes in controlling terrestrial and aquatic ecosystems. Ecosystem concepts are applied to current environmental and water quality problems. Includes field trips and a group project.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 3434
Requisites: Requires prerequisite courses of CHEM 1113 or CHEN 1211 and CHEM 1221 (all minimum grade D).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ENVS 3520 (3) Energy and Climate Change: An Interdisciplinary Approach
Examines sources of energy and other resources in light of their availability, use, environmental impact, as well as their impact on policy, economics and values. As fossil fuels are the dominant energy source today, particular emphasis is placed on climate impacts and the carbon cycle. All material is assessed through the lenses of the physical sciences, policy, ethics and economics.
Equivalent - Duplicate Degree Credit Not Granted: GEOL 3520
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Recommended: Prerequisite a two-course sequence in any natural science.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
ENVS 3525 (3) Intermediate Environmental Problem Analysis: Topical Cornerstones
Engages students in in-depth study of a topic such as climate change, energy, natural resources or sustainability. Through lectures, discussions, readings and activities, students will become conversant with how science, policy and values are integrated in environmental problem solving, and develop their own sense of how to critically engage with proposed solutions. Fulfills cornerstone requirement for Environmental Studies Major. Recommended corequisite: ENVS 3020.
**Repeatability:** Repeatable for up to 6.00 total credit hours.
**Recommended:** Prerequisite ENVS 1000.

ENVS 3555 (3) Sustainable Economies
Applies a holistic and transdisciplinary approach to answering the following questions: (i) What might an environmentally sustainable economy look like? (ii) What social and political challenges might such an economy face? (iii) What institutions might support an environmentally and socially sustainable economy? The course draws on concepts from several branches of economics, especially macroeconomics, ecological economics, and public finance, as well as other related disciplines, including history, psychology, politics, and evolutionary biology.
**Recommended:** Prerequisites ECON 2010 or ECON 2020 or other introductory-level economics course.
**Grading Basis:** Letter Grade
**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

ENVS 3600 (3) Principles of Climate
Describes the basic components of the climate system: the atmosphere, ocean, cryosphere and lithosphere. Investigates the basic physical processes that determine climate and link the components of the climate system. Covers the hydrological cycle and its role in climate, climate stability and global change.
**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 3601 and ATOC 3600
**Recommended:** Prerequisites one semester of calculus and ATOC 1060 or ATOC 3300 or GEOG 3301 or GEOG 1001.
**Additional Information:** Arts Sci Core Curr: Natural Science Non-Sequence
**Arts Sci Gen Ed:** Distribution-Natural Sciences

ENVS 3621 (3) Energy Policy and Society
Examines how society makes decisions about energy, and how these decisions affect the environment and the economy. Uses tools from policy analysis, economics, and other disciplines to build an in-depth understanding of energy’s role in U.S. contemporary society. Fulfills Cornerstone requirement of ENVS majors. Recommended corequisite: ENVS 3020.
**Recommended:** Prerequisites ENVS 1000 and ENVS 3070 or PHYS 3070.
**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

ENVS 3640 (3) Data Analysis for Global Environmental Affairs
Develops data analysis techniques for global environmental data including demographic, economic, agricultural, fisheries and energy sectors. Designed to support the development of basic and intermediate data analysis skills for students in the Global Environmental Affairs certificate program. Includes hands-on exploration of up-to-date global data sets from a variety of sources. Fulfills the application requirement for the ENVS major.
**Equivalent - Duplicate Degree Credit Not Granted:** IAFS 3640
**Grading Basis:** Letter Grade
**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

ENVS 3800 (3) The Art of Research: The Essential Elements of Research in Environmental Studies
Introduces students to the practice of doing research in environmental studies. Examines how to define a research problem, select methods, design research, construct arguments and evaluate others’ research. Aims to familiarize students with the process of doing research and enable them to proceed with confidence in pursuing their own research topics. Recommended for juniors planning to write ENVS honors theses. Fulfills capstone requirement in Environmental Studies major.
**Requisites:** Requires prerequisite course of ENVS 1000 (minimum grade D). Restricted to students with 57-180 credits (Junior or Senior) majors only.
**Recommended:** Prerequisite ENVS 3020.

ENVS 3930 (1-3) Internship
Relates classroom theory to practice. Provides academically supervised opportunities for environmental studies majors to work in public and private organizations on projects related to students’ career goals. Fulfills application requirement in Environmental Studies major.
**Repeatability:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Recommended:** Prerequisite ENVS 1000.

ENVS 4027 (3) Inequality, Democracy, and the Environment
Focuses on the structural forces affecting environmental degradation and environmental behavior by examining the relationships between (a) inequality and democratic decision making and (b) undemocratic decision making; U.S. and corporate food and energy policy; and global environmental degradation. The course also focuses on the role that global inequality plays in fostering environmental degradation.
**Equivalent - Duplicate Degree Credit Not Granted:** SOCY 4027
**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).
**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

ENVS 4030 (3) Sociology of Climate Change
Examines the human drivers and causes of climate change, the health and security risks it creates and the efforts of societies to mitigate and adapt to its effects.
**Equivalent - Duplicate Degree Credit Not Granted:** SOCY 4030
**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).
**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

ENVS 4050 (2-4) Field Methods in Ecosystem Science
Studying the relationships among organisms, physical features, biogeochemistry and humans in ecological communities - this is ecosystem science. This course provides conceptual understanding and practical experience conducting research. Students will pose their own scientific questions, learn several field and lab methods, analyze data and design a project. Upon completion, they will have useful skills for internships, jobs and graduate school. Fulfills application requirement in ENVS major. Department enforced prerequisite: ENVS 1000 or two semesters of natural sciences; such as chemistry, geology or biology.
**Grading Basis:** Letter Grade
**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences
**Arts Sci Gen Ed:** Distribution-Natural Sci Lab

ENVS 4100 (3) Special Topics in Environmental Studies
Various topics not normally covered in the curriculum: offered depending on student demand and specialties of faculty. Applied to specialization requirement for Environmental Studies major.
**Repeatability:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
ENVS 4160 (3) Introduction to Biogeochemistry
Covers fundamentals of biogeochemical cycling, emphasizing water, carbon and nutrient dynamics in terrestrial ecosystems; chemical interactions of atmosphere, biosphere, lithosphere and hydrosphere; natural and human-managed environments.
Equivalent - Duplicate Degree Credit Not Granted: EBIO 4160 and GEOL 4160
Requisites: Requires prerequisite courses of GEOL 3320 or EBIO 3270 and CHEM 1011 (all minimum grade D-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
ENVS 4185 (3) Geomicrobiology
Examines how microbial and chemical processes interact on the Earth's surface today and have shaped the planet throughout its history. Emphasis will be placed on how the life styles and chemical ingenuity of microorganisms drive key biogeochemical processes including weathering and transformations of carbon, oxygen, sulfur, iron and nitrogen. Towards this goal, major geologic and evolutionary events will be examined through the lens of microbial diversity, metabolic energetics, microbe-mineral interactions, and molecular biomarkers.
Equivalent - Duplicate Degree Credit Not Granted: GEOL 5185, GEOL 4185, and MCDB 4185
Requisites: Requires prerequisite courses of CHEM 1113 and CHEM 1114 or CHEM 1400 and CHEM 1401 (minimum grade D-).
Recommended: Prerequisites GEOL 1180 or MCDB 1150 or GEOL 3320 or EBIO 3400 or ENVS 4160 or EVEN 4484.
Grading Basis: Letter Grade
ENVS 4201 (3) Biometeorology
Introduces this interdisciplinary science, studying the interactions between atmospheric processes and living organisms (plants, animals, and humans). Discusses how organisms adapt to a changing environment. Uses a practical, problem-solving approach to explore these interactions.
Equivalent - Duplicate Degree Credit Not Granted: GEOG 4201
Requisites: Requires a prereq course of GEOG 1001 and APPM1340 and 1345 or APPM1350 or ECON1088 or MATH1081 or 1300 or 1310 or 2510 or ANTH4000 or APPM4570 or BCOR1020 or ECON3818 or GEOG3023 or GEOL3023 or PSCI2075 or PSYC3101 or SOCY2061 or 4061 (min grade D-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
ENVS 4340 (4) Conservation Biology and Practice in Brazil's Atlantic Forest
Field Studies. Examines the application of conservation principles in the Atlantic Forest of Brazil, a 'biodiversity-in-crisis' setting. Explores successful conservation strategies integrated with efforts to alleviate socioeconomic issues. Three-week Maymester, Study Abroad Global Seminar.
Equivalent - Duplicate Degree Credit Not Granted: ENVS 5340, EBIO 4340 and EBIO 5340
Recommended: Prerequisites EBIO 2040 or ENVS 2000 or 2000/higher-level course in ANTH, EBIO, ENVS, EVEN, GEOG, IAFS or other discipline related to ecology or sustainability.
Grading Basis: Letter Grade
ENVS 4795 (3) Field Methods in Zoology and Botany
Class covers research and field methods for biological disciplines associated with natural history museums: vertebrates, invertebrates and plants. Emphasis is on field research techniques: observations, sampling, collection and preservation methods and comparisons among elevation zones. Includes 5 field labs, 2 weekend trips, 5 lab practica, experience with several taxonomic experts and individual research projects.
Equivalent - Duplicate Degree Credit Not Granted: MUSM 4795 and MUSM 5795
ENVS 4800 (3) Capstone: Critical Thinking in Environmental Studies
Examines a specific environmental topic in depth, synthesizing information from complex and controversial issues. Different course sections present different topics. Fulfills capstone requirement for Environmental Studies major.
Requisites: Restricted to students with at least 87 credits. Restricted to Environmental Studies (ENVS) majors only.
Recommended: Prerequisites ENVS 1000 and ENVS 3020.
ENVS 4840 (1-6) Independent Study
Students work with an approved faculty sponsor to explore a topic in greater depth and to pursue an interest that is not offered in the formal curriculum.
Repeatable: Repeatable for up to 8.00 total credit hours.
Recommended: Prerequisite ENVS 1000.
ENVS 4850 (1-3) ENVS Honors Thesis Research
To be taken in final academic year prior to graduation. Consists of honors research and thesis preparation under the guidance of a faculty mentor. Department enforced restriction: Requires a minimum 3.3 GPA and a declared ENVS major and approval by departmental honors committee.
Repeatable: Repeatable for up to 6.00 total credit hours.
Grading Basis: Letter Grade
ENVS 4950 (3) Seminar: ENVS Honors Thesis
Offers an opportunity for students who are either in the process of writing an Honors thesis, or are in the early process of conducting Honors research, to receive guidance on the process of thesis writing, evaluation and presentation of research results, and defending a thesis. Thesis requirements and the role of the A&S Honors Council will be discussed. Also offers the opportunity to hear practice defense talks from the graduating Honors candidates. Department enforced prerequisite: Requires a minimum 3.3 GPA and a declared ENVS major and approval by departmental honors committee.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Grading Basis: Pass/Fail
ENVS 4990 (3) Senior Thesis
Supervised writing project involving original research. Fulfills Capstone requirement in Environmental Studies major. Open only to Environmental Studies majors.
Requisites: Requires prerequisite course of ENVS 1000 (minimum grade D-). Restricted to students with 87-180 credits (Senior) Environmental Studies (ENVS) majors only.
Recommended: Prerequisite ENVS 3020.

Environmental Studies - Bachelor of Arts (BA)

The Environmental Studies Program (ENVS) is an interdisciplinary program that combines and integrates different types of knowledge
to address the complex environmental, resource, and sustainability challenges in coupled human environment systems. This is accomplished by addressing the grand challenges related to sustaining the planet and its people. How do we meet the needs of a growing human population while sustaining our life support systems—climate, air and water systems, natural resources, species assemblages, and ecosystems on land and in the oceans? How do we increase the well-being of those at risk of global environmental change in an unequal world while not compromising future generations? Our research expertise include food systems; dimensions of global change; conservation biology, restoration ecology; ecosystem biogeochemistry; environmental governance, science and policy interactions; environmental inequality, and climate justice; environmental ethics; sustainable livelihoods; and behavioral dimensions of climate change mitigation and adaptation.

Undergraduate students acquire an awareness of the complexity of factors relating to human interaction with the environment. They become acutely aware that environmental problems have both human and biophysical components, and gain knowledge of the general principles of human-environmental interactions, global habitability, environmental change and sustainable societies. The ENVS majors includes introductory coursework in natural sciences, economics and mathematics; intermediate coursework in policy, ethics, economics and writing; and advanced coursework offered by several departments and programs across CU Boulder.

**Requirements**

Students must complete:

- the general requirements of the College of Arts and Sciences;
- foundational courses in sciences, policy, ethics, economics, writing and math;
- 12 credit hours of upper-division coursework to specialize in an area of interest;
- an internship or field course;
- a cornerstone course; and
- a capstone course.

Total Credit Hours 120-126

Ethnic Studies

The Department of Ethnic Studies at the University of Colorado Boulder draws on a tradition of culturally sustaining pedagogy and engaged scholarship to examine how race and the interrelated categories of culture, ethnicity, indigeneity, gender, class, sexuality, religion and legal status impact the lives of people locally, regionally, nationally and internationally. The foundation of Ethnic Studies is comprised of four pillars of interrelated areas of scholarly research and pedagogy: Africana, Asian American, Chicana/Latina, and Native American & Indigenous studies. Our interdisciplinary department offers an undergraduate major and minor in ethnic studies, and an undergraduate certificate in critical sports studies.

Study Abroad

The Department of Ethnic Studies encourages students to participate in the study abroad programs offered through the Education Abroad office. These programs give students a deeper understanding of culture and attitudes of people of color in other parts of the world and their carryover into the United States. CU-Boulder partners with several study abroad organizations that offer summer, semester and full year programs in many locations around the world, most notably in Africa, Asia and Latin America. Programs of special interest include study abroad in Australia, Bolivia, Cuba, Dominican Republic, Ecuador, Ghana, Japan, Mexico, Morocco, Peru, South Africa, Spain and Taiwan.

For additional information, contact the Education Abroad office. Students should always consult with their academic advisor prior to choosing their study abroad program.

Bachelor's Degree

- Ethnic Studies - Bachelor of Arts (BA) (p. 275)

Minor

- Ethnic Studies - Minor (p. 277)

Certificate

- Critical Sports Studies - Certificate (p. 278)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Aldama, Arturo James (https://experts.colorado.edu/display/fisid_130739/)
Associate Professor, Associate Chair; PhD, University of California, Berkeley

Atuire, Awon (https://experts.colorado.edu/display/fisid_149885/)
Instructor; MFA, University of Colorado Boulder

Avalos, Natalie
Assistant Professor; PhD, University of California, Santa Barbara
Courses

ETHN 1022 (3) Introduction to Africana Studies
Overview of Africana studies as a field of investigation, its origins and history.
Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Distribution-Social Sciences
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Diversity-Global Perspective
Departmental Category: Africana Studies

ETHN 1023 (3) Introduction to Native American and Indigenous Studies
Introduces critical terms, issues, and questions that inform the discipline of American Indian Studies. Examines "historical silences" and highlights how American Indian scholars, poets, and filmmakers use their work to address/redress historical subjects, and represent their Native communities.
Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Distribution-Social Sciences
Arts Sci Gen Ed: Diversity-U.S. Perspective
Departmental Category: American Indian Studies

ETHN 1025 (3) Introduction to Asian American Studies
Examines the various factors that define minority groups and their positions in American society using Asian Americans as a case study. Emphasizes the perspectives and methodologies of the discipline of ethnic studies.
Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Core Curr: Contemporary Societies
Arts Sci Gen Ed: Distribution-Social Sciences
Arts Sci Gen Ed: Diversity-U.S. Perspective
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Asian American Studies

ETHN 2001 (3) Foundations of Comparative Ethnic Studies: Race, Gender and Culture(s)
Introduction to the study of race, ethnicity and gender in the United States. Overview of concepts, theories and analytic frames that shape the interdisciplinary field of Ethnic Studies. Focuses on historic, institutional, legal and cultural issues that impact African-Americans, Asian-Americans, Chicanas and Chicanos, European Americans, Native Americans and Indigenous peoples in the U.S.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Crosscultural/Comparative Studies

ETHN 2004 (3) Themes in American Culture 1
Examines these themes, which vary each year, in their social context.
Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: American Studies

ETHN 2013 (3) Critical Issues in Native North America
Explores a series of issues including regulations of population, land and resource holdings, water rights, education, religious freedom, military obligations, the sociopolitical role of men and women, self-governance, and legal standing as these pertain to American Indian life.
Arts Sci Gen Ed: Distribution-Social Sciences
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: American Indian Studies

ETHN 2014 (3) Themes in American Culture 2
Examines these themes, which vary each year, in their social context.
Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: American Studies
ETHN 2044 (3) Crime and Society
Explores issues related to crime, the criminal justice system, and crime-related public policy. It addresses what we know about crime and how we know it, how our society responds to crime, how the institutions designed to address crime (police, courts, corrections) function, and diversity in experiences with the criminal justice system.
Equivalent - Duplicate Degree Credit Not Granted: SOCY 2044
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Crosscultural/Comparative Studies

ETHN 2203 (3) American Indians in Film
Surveys the image of American Indians in American (especially Hollywood) film with an emphasis on "revisionist," or ¿breakthrough¿ films. It follows the creation of the Hollywood Indian from early literature to contemporary motion pictures. Films are analyzed within historical, social, and artistic contexts, and examined in terms of the impact their images have exerted upon American society at large, as well as Native communities. Near the end of the course we will look at what happens when Native Americans write, direct, and act in their own independent films.
Equivalent - Duplicate Degree Credit Not Granted: CINE 2203
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: American Indian Studies

ETHN 2215 (3) The Japanese American Experience
Surveys the Japanese American experience, emphasizing post-WWII developments. Gives attention to intragroup diversity having to do with generation, ethnicity, ecology, and gender.
Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Distribution-Social Sciences
Arts Sci Gen Ed: Diversity-U.S. Perspective
Departmental Category: Asian American Studies

ETHN 2232 (3) Contemporary African American Social Movements
Examines selected case studies of African American collective behavior in a historical context. Emphasizes an in-depth investigation of the continuing African American struggle for social/democratic rights.
Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Core Curr: Contemporary Societies
Arts Sci Gen Ed: Distribution-Social Sciences
Arts Sci Gen Ed: Diversity-U.S. Perspective
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Africana Studies

ETHN 2242 (3) African American Social and Political Thought
Introductory course designed to acquaint students with historical and contemporary thinking, writings, and speeches of African Americans.
Additional Information: GT Pathways: GT-SS3 · Soc Behav Sci: Hmn Behav, Cult, Soc Frame
Arts Sci Core Curr: Human Diversity
Arts Sci Core Curr: Contemporary Societies
Arts Sci Gen Ed: Distribution-Social Sciences
Arts Sci Gen Ed: Diversity-U.S. Perspective
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Africana Studies

ETHN 2304 (3-4) Introduction to Social Justice
Provides undergraduate students with an understanding of how social systems, primarily the educational and health care systems, are key to understanding injustices and criminalization. Topics covered will include trauma and victimization, food and housing justice, educational justice, physical and mental health justice, mass incarceration, #BlackLivesMatter and restorative justice.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: American Studies

ETHN 2432 (3) African American History
Surveys African American history. Studies, interprets and analyzes major problems, issues and trends affecting African Americans from about 1600 to the present.
Equivalent - Duplicate Degree Credit Not Granted: HIST 2437
Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Diversity-U.S. Perspective
Arts Sci Gen Ed: Distribution-Social Sciences
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Africana Studies

ETHN 2500 (3) Race, Ethnicity, and Language
Explores the relationship between race, ethnicity, and language and how they are co-constructed. How do speakers of different racial and ethnic groups use language differently, and what are the social implications of these different language varieties? We discuss the implications of ethnolinguistic variation on racial stereotypes, education, and the law.
Equivalent - Duplicate Degree Credit Not Granted: LING 2500
Recommended: Prerequisite LING 1000.
Additional Information: Arts Sci Gen Ed: Diversity-U.S. Perspective
Arts Sci Gen Ed: Distribution-Social Sciences

ETHN 2536 (3) Survey of Chicana/o History and Culture
Through historical and social scientific studies, novels, autobiographies, testimonies, films, music, and art, this course will provide students a survey of Chicana/o history and culture. Historical overviews of Chicana/o peoples from Mesoamerica; the Spanish Conquest; the historical presence of Chicana/o peoples in the Southwest; the rise of the Chicana/o student and community movements; immigration issues; and the gender, sexuality, and criminalization issues.
Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Diversity-U.S. Perspective
Arts Sci Gen Ed: Distribution-Social Sciences
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Chicana/o Studies

ETHN 2546 (3) Chicana and Chicano Fine Arts and Humanities
Provides foundation for study of Chicano literature, music, the plastic arts, theatre and film. Also introduces aesthetic and critical concepts and their applications in Chicana and Chicano studies.
Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Diversity-U.S. Perspective
Departmental Category: Chicana/o Studies

ETHN 2703 (3) American Indian Religious Traditions
Introduces religions of the peoples indigenous to the Americas. Concerns include ritual, mythology and symbolism occurring throughout these cultures in such areas as art, architecture, cosmology, shamanism, sustenance modes, trade and history.
Equivalent - Duplicate Degree Credit Not Granted: RLST 2700
Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Core Curr: Ideals and Values
Arts Sci Gen Ed: Diversity-U.S. Perspective
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: American Indian Studies
ETHN 2713 (3) American Indian Literature
Surveys historical and contemporary North American Native American literature. Examines the continuity and incorporation of traditional stories and values in Native Literature, including novels, short stories and poetry.
Equivalent - Duplicate Degree Credit Not Granted: ENGL 2717
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: American Indian Studies

ETHN 2732 (3) Survey of African American Literature 2
Surveys African American literature from the Depression to the present.
Equivalent - Duplicate Degree Credit Not Granted: ENGL 2737
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Africana Studies

ETHN 2746 (3) Chicana/Chicano and Mexican Literature
Introduces Chicana and Chicano and Mexican literary studies, focusing on narrative works by Chicana and Chicano writers. Examines diverse range of Mexican writing in Greater Mexico as it addresses recurring issues and themes, including language, race and class, questions of identity and gender relations.
Equivalent - Duplicate Degree Credit Not Granted: ENGL 2747
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Chicana/o Studies

ETHN 2761 (3) Survey of Post-Colonial Literature
Surveys the development of literatures in English in former British colonies. Topics include the spread and adaptation of English language literary forms in Asia, Africa, the Caribbean, and the far new world (Australia and New Zealand). Students learn the causes of the dispersion and the motivations for the clearly different uses of English literary forms in the ex-colonies.
Equivalent - Duplicate Degree Credit Not Granted: ENGL 2767
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Crosscultural/Comparative Studies

ETHN 3015 (3) Asian Pacific American Communities
Covers the concepts, methods, and theories commonly used in community research, as well as substantive information on selected Asian/Pacific American communities. Emphasizes the ethical/political dimensions of community studies.
Recommended: Prerequisite ETHN 1025 or ETHN 2001.
Additional Information: Arts Sci Core Curr: Contemporary Societies
Arts Sci Gen Ed: Diversity-Global Perspective
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Crosscultural/Comparative Studies

ETHN 3024 (3) Introduction to Critical Sports Studies
Learn to think in an informed and critical way about sports in society. Examine the socio-cultural significance of sports as it relates to topics such as youth, social class, race/ethnicity, gender, identity, and intercollegiate athletics. Readings, class discussions, videos, and guest speakers will help expand our understanding of this important social phenomenon.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Crosscultural/Comparative Studies

ETHN 3026 (3) Women of Color: Chicanas in U.S. Society
Critically explores the Chicana experience and identity. Examines issues arising from the intersection of class, race, and gender. Focuses on controversies surrounding culture and gender through an analysis of feminism and feminismo.
Recommended: Prerequisite ETHN 2001 or ETHN 2536.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Chicana/o Studies

ETHN 3044 (3) Race, Class, Gender, and Crime
Overview of race, class, gender and ethnicity issues in offending, victimization and processing by the justice system. Examines women and people of color employed in the justice system.
Equivalent - Duplicate Degree Credit Not Granted: SOCY 3044 and WGST 3044
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Recommended: Prerequisite ETHN 2001.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Crosscultural/Comparative Studies

ETHN 3101 (3) Selected Topics in Ethnic Studies
Intensive examination of a particular topic, theme, issue, or problem in ethnic studies as chosen by the instructor.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Recommended: Prerequisite ETHN 2001.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Crosscultural/Comparative Studies

ETHN 3102 (3) Selected Topics in African American Studies
Intensive examination of a particular topic, theme, issue, or problem concerning the African American presence, as chosen by the instructor. Sample offerings could include African American Pop Culture, the Civil Rights Movement, or other African American issues.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Recommended: Prerequisite ETHN 1022 or ETHN 2001.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Africana Studies

ETHN 3103 (3) Selected Topics in American Indian Studies
Examines a particular topic, theme, issue, or problem in American Indian Studies.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Recommended: Prerequisite ETHN 2001 or ETHN 2536.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: American Indian Studies

ETHN 3104 (3) Selected Topics in American Studies
Critically examines American identity and experiences, past and present, focusing on ethnicity, gender, popular culture, and political culture.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Recommended: Prerequisite ETHN 2001.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: American Studies
ETHN 3105 (3) Selected Topics in Asian American Studies
Intensive examination of a topic or issue affecting Asian Americans, such as the Japanese American internment during World War II, or Asian American social movements or community organizations.
Repeatability: Repeattable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Recommended: Prerequisite ETHN 1025 or ETHN 2001.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Asian American Studies

ETHN 3106 (3-6) Selected Topics in Chicana and Chicano Studies
Intensive examination of a particular topic, theme, issue, or problem in Chicana and Chicano studies as chosen by the instructor.
Repeatability: Repeattable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Recommended: Prerequisite ETHN 2001 or ETHN 2536.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Chicana/o Studies

ETHN 3136 (3) Chicana Feminisms and Knowledges
Provides insight into the present socioeconomic condition of Chicanas and the concept of feminism through interdisciplinary study of history, sociology, literary images, and film portrayals.
Equivalent - Duplicate Degree Credit Not Granted: WGST 3135
Recommended: Prerequisite ETHN 2001 or ETHN 2536.
Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Distribution-Social Sciences
Arts Sci Gen Ed: Diversity-U.S. Perspective
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Chicana/o Studies

ETHN 3201 (3) Social Justice, Leadership and Community Engagement Internships
Focuses on leadership theories and skills necessary for effectiveness in social justice settings. Students gain understanding of traditional and culturally diverse approaches to leadership and change. Community service required.
Equivalent - Duplicate Degree Credit Not Granted: INVS 3100
Requisites: Restricted to Ethnic Studies (ETHN) majors, minors or INVS Community Studies (IVT) subplan students only.
Recommended: Prerequisite ETHN 2001.
Grading Basis: Letter Grade
Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Distribution-Social Sciences
Arts Sci Gen Ed: Diversity-U.S. Perspective
Departmental Category: Crosscultural/Comparative Studies

ETHN 3212 (3) Introduction to Hip Hop Studies
Examines critical questions posed by hip hop culture. Accentuated in this course are hip hop's contributions to the political-economic, philosophical, and sociological study of race, racism, sexism and sexuality. Examines the ways in which hip hop, as a new social phenomenon, cultural force and aesthetic form, have influenced contemporary American and global culture.
Recommended: Prerequisite ETHN 1022 or ETHN 2001.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Africana Studies

ETHN 3213 (3) American Indian Women
Explores the experiences, perspectives, and status of American Indian women in historical and contemporary contexts. Examines representations of Indigenous women in mainstream culture. Emphasizes the agency of American Indian women-their persistence, creativity, and activism, especially in maintaining Indigenous traditions.
Equivalent - Duplicate Degree Credit Not Granted: WGST 3210
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Recommended: Prerequisite ETHN 1023 or ETHN 2001 or WGST 2000 or WGST 2600.
Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Distribution-Social Sciences
Arts Sci Gen Ed: Diversity-U.S. Perspective
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: American Indian Studies

ETHN 3252 (3) African American Urban History
Fosters a better understanding and appreciation of the role African Americans have played in the evolution and shaping of urban America. Employs techniques of urban studies to more effectively assess the many dimensions, subtitles, and insensitivities of life in the city. S. and Afro-American history.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Recommended: Prerequisite ETHN 1022 or ETHN 2001 and a working knowledge of U.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Africana Studies

ETHN 3301 (3) Elements of Religion
Explores universal components of religion, as inferred from religions of the world, ranging from smaller-scale oral to larger-scale literate traditions.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 3300
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Crosscultural/Comparative Studies

ETHN 3314 (3) Violence Against Women and Girls
Focuses on aspects of the victimization of women and girls that are "Gendered" - namely, sexual abuse and intimate partner abuse. Also explores the importance of race, class, and sexuality in gendered violence.
Equivalent - Duplicate Degree Credit Not Granted: SOCY 3314 and WGST 3314
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Crosscultural/Comparative Studies

ETHN 3403 (3) Indigenous Rights and Red Power Movement
Deals with historical events involving conflicts between the U.S. government and American Indians. Examples include the role of the FBI in the Pine Ridge Sioux Reservation (1972-76) or the 1864 massacre of the Cheyenne and Arapaho Indians in Colorado territory. Additional courses may relate to tribal governments.
Repeatable: Repeattable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Recommended: Prerequisite ETHN 1023 or ETHN 2001.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: American Indian Studies
ETHN 3501 (3) Theory/Methods/Writing in Ethnic Studies
Preparation for empirical inquiry in Ethnic Studies. Emphasizes philosophy of social science and cultural studies. Students engage rigorous, theoretical concepts to understand research methods. Prepares students for writing a lengthy, cogent research paper.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) Ethnic Studies (ETHN) majors only.
Recommended: Prerequisite ETHN 2001.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Crosscultural/Comparative Studies

ETHN 3575 (3) Japanese American Internment: Critical Thinking in Sociocultural Diversity
Offers a historical overview of the Japanese American experience in the United States. Introduces and explores fundamental issues inherent in the study of human beings from the perspective of cultural social difference.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Recommended: Prerequisite ETHN 1025 or ETHN 2001.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Asian American Studies

ETHN 3671 (3) People of Color and Social Movements
People of color the world over are struggling for sovereignty, independence, civil and human rights, food security, decent wages and working conditions, healthy housing, and freedom from environmental racism and other forms of imperialism. Course analyzes and brings alive these struggles.

Equivalent - Duplicate Degree Credit Not Granted: INVS 3671
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Distribution-Social Sciences
Arts Sci Gen Ed: Diversity-U.S. Perspective
Departmental Category: Crosscultural/Comparative Studies

ETHN 3672 (3) African Am Music: Fr Spirituals and the Blues to Rap/Hip Hop Soul
Offers an overview of the origins and evolution of African American music. Guides students through the musical history, as well as the social, political and cultural history, of the spirituals, blues, ragtime, jazz, gospel, freedom songs, rhythm and blues, rock and roll, soul, funk, disco, techno, house, rap and hip hop soul.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Recommended: Prerequisites ETHN 1022 and ETHN 2001 and ETHN 3212.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Africana Studies

ETHN 3701 (3) Gender, Sport and Culture
Critically examines the experiences of girls and women in American sport from a psycho-socio-cultural perspective with a particular emphasis on the constructs of gender, race, class and sexuality and how these constructs both independently and collectively mediate the female sport experience. Explores theories and interpretive frameworks from sport studies, feminist studies, race studies, psychology and cultural studies.

Recommended: Prerequisite ETHN 3024.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Crosscultural/Comparative Studies

ETHN 3702 (3) African American Sport Experience
Provides a socio-cultural and historical overview of the contributions of African Americans (men and women) to sport in America. Focus is on the macro (patterns of behavior related to large-scale social structures and processes) and micro (behaviors we observe in society, often readily observable in the context of sport and exercise) level of sport analysis.

Recommended: Prerequisite ETHN 3024.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Africana Studies

ETHN 3704 (3) Athlete as a National Symbol: Nationhood/Nationalism, Sport
This is a global seminar that explores the nationalistic terrain of sport as a way to understand how athletes became a symbol of nationhood and how they are influenced by, and themselves influence, other aspects of society and culture. Using historical and contemporary examples, this course examines how race, gender, sexuality, economics and the media constructed the nationalistic world of sports today.

Repeatable: Repeatable for up to 6.00 total credit hours.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Crosscultural/Comparative Studies

ETHN 3705 (3) Sport and Culture in Latin America and the Caribbean
A critical examination of the changing relationship between sport and culture in Latin America and the Caribbean. Examines the historical evolution and current dynamics of Latin American sport and leisure from the post-colonial period through the 21st Century. A variety of sources examine specific examples from several cities, including Buenos Aires, Bogotá, Brasilia, Caracas, Havana, Santo Domingo, Mexico City, Lima, Rio de Janeiro, and São Paulo. Topics include colonialism, nationalism, transnationalism, consumer cultures, masculinity & femininity, and sports.& leisure.

Recommended: Prerequisite ETHN 3024.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

ETHN 3707 (3) Critical Study of Race and Ethnicity in Sports Films
Examines how race/ethnicity, gender, identity, social class, and nationalism are represented in sport films. The films examined will focus on historical social movements throughout the twentieth century, as well as socio-cultural topics today. Readings, class discussions, videos, and guest speakers will help expand our understanding of this important social phenomenon.

Recommended: Prerequisite ETHN 3024.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

ETHN 3777 (3) Inside-Out: Prison and Social Justice
Provides a unique experience for Inside (prisoner) and Outside (CU-B undergraduate) students to take a seminar course together in a prison. We address social justice through an ethnic studies, intersectional, and interdisciplinary lens, including social justice topics such as health, education, and work. Outside students must complete an application provided by the instructor and pass a criminal history check by the Colorado Department of Corrections to be enrolled and space is limited. Previously offered as a special topics course.

Recommended: Prerequisite ETHN 2001.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
ETHN 3841 (1-6) Undergraduate Independent Study
Consult the Department of Ethnic Studies for information. Instructor consent required.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Recommended: Prerequisite ETHN 2001.
Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 4001 (3) Screening Race, Class & Gender in the U.S. and the Global Borderland
Engaging with the ways in which racial, class, gender and sexual oppression intersect, this class examines several film productions by and about diasporic and subaltern subjects (especially children and women) in the U.S./Mexico borderlands, and the urban ethnic metropoles of the global borderlands.
Equivalent - Duplicate Degree Credit Not Granted: CINE 4001 and ETHN 5001
Requisites: Requires a prerequisite course of ETHN 2001 (minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Crosscultural/Comparative Studies

ETHN 4006 (3) Chicana/Chicano Native American Cultures of the U.S.
Theoretically engaged seminar considers intersections of Chicana/o and Native American studies to shape our scholarly understanding of the U.S. and Mexico borderlands. Ethnographies, historical studies, novels, film, and music will be used to understand the processes of Spanish and Euro-American colonization, neocolonialism, identity formation, gender, syncretism, and mestizaje.
Requisites: Requires a prerequisite course of ETHN 2001 or ETHN 2536 (minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).

ETHN 4084 (3) Punishment, Law and Society
Places the current state of punishment in the U.S. in historical and cross national context. Examines key features of penal systems and key sociological theories about the relationship between punishment and society. Department enforced prerequisite: SOCY 1001 or SOCY 1004.
Equivalent - Duplicate Degree Credit Not Granted: SOCY 4084
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

ETHN 4102 (3) Special Topics in Chicana and Chicano Studies
Variable topic that allows intensive coverage of a subject, theme, or issue in Chicana and Chicano studies.
Equivalent - Duplicate Degree Credit Not Granted: ETHN 5102
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Requires a prerequisite course of ETHN 1022 or ETHN 2001 (minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences Departmental Category: Africana Studies

ETHN 4106 (3) Special Topics in Chicana and Chicano Studies
Examines a particular topic, theme, issue or problem concerning Chicana and Chicano studies.
Equivalent - Duplicate Degree Credit Not Granted: ETHN 4106
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Requires a prerequisite course of ETHN 2001 or ETHN 2536 (minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).

ETHN 4116 (3) Spoken Word Latinx Poetics and Poetry
This is a writing intensive workshop in contemporary poetry writing and Chicana/o and Latina/o poetics-specifically, Nuyorican and Afro-Latino (the Nuyorican Poets Cafe). The purpose of the course is dual-fold: 1) students will be encouraged and empowered to express and develop their poetic voice; 2) students will be challenged to develop and refine their poetic craft. Examines primarily Chicana and Latino specific poetic expression that reflects the cultural mestizage of Chican/a and Latina/o peoples.
Equivalent - Duplicate Degree Credit Not Granted: ETHN 51116
Requisites: Requires a prerequisite course of ETHN 2001 (minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).
Recommended: Requisite 6 credits in any ETHN class.

ETHN 4213 (3) Indigenous Futurisms: Speculative Genres and Native Tomorrows
Examines how Indigenous authors, artists and filmmakers have recently begun exploring the genres of Horror, Science Fiction and Fantasy. Considers this shift in light of past and present Native realities. Explores why this shift is happening now, how it helps communities and individuals make political statements, address/redress historical subjects and help to build better futures for us all.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Grading Basis: Letter Grade

ETHN 4232 (3) The Life and Thought of Martin Luther King Jr
An intensive exploration and examination of the life and thought of the Rev. Dr. Martin Luther King Jr. Special emphasis on the stages of his life and their corresponding productions.
Requisites: Requires a prerequisite course of ETHN 1022 or ETHN 2001 (minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences Departmental Category: Africana Studies

ETHN 4233 (3) Native American and Indigenous Environmental Issues
Explores the unique knowledges, practices and perspectives of Native American and Indigenous peoples with regard to environmental issues, and how they both contrast with and complement dominant ways of knowing. Views central themes of Land, Plants, Animals, and Air/Water through political-ecological lenses. Critically assesses historical and contemporary Indigenous environmental matters in the contexts of colonial histories and tribal sovereignty.
Equivalent - Duplicate Degree Credit Not Granted: ETHN 5233
Recommended: Prerequisite ETHN 1023 or ETHN 2013.
ETHN 4272 (3) W.E.B. Du Bois Seminar
Analyzes the life and thought of W.E.B. Du Bois for its contributions to interdisciplinary and intersectional studies. Emphasis will be placed on the innovative interdisciplinary and intersectional nature of Du Bois's epistemology and research methodology, as well as his participation in radical political and social movements.
Equivalent - Duplicate Degree Credit Not Granted: ETHN 5272
Requisites: Requires a prerequisite course of ETHN 1022 or ETHN 2001 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) Ethnic Studies (ETHN) majors only.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Africana Studies

ETHN 4306 (3) The Chicana and Chicano and U.S. Social Systems
Gives special attention to ways U.S. institutions (i.e., legal, economic, educational, governmental and social agencies) affect Chicanas and Chicanos. Discusses internal colonialism, institutional racism, assimilation and acculturation, and identity.
Equivalent - Duplicate Degree Credit Not Granted: ETHN 5306
Requisites: Requires a prerequisite course of ETHN 2001 or ETHN 2536 (minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Chicana/o Studies

ETHN 4353 (3) Indigenous Traditions and Law: A Global Perspective
Explores intersections of indigenous religions and law through historical and contemporary case studies. American Indian and Hawaiian contexts will be featured, as well as the study of the United Nations Declaration on the Rights of Indigenous Peoples and its recent implementation in places as diverse as Bolivia, Norway and Nagaland. Theoretical issues in the academic study of religion and ethnic studies will be emphasized.
Equivalent - Duplicate Degree Credit Not Granted: ETHN 5353 and RLST 4353 and RLST 5353
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Crosscultural/Comparative Studies

ETHN 4504 (3) Ethnic-American Autobiography
Investigates the genre of autobiography in America from its inception to the present. American autobiography has been associated with the invention of national character and, thus, is a site of cultural contestation and identity formation. Its changing form crosses disciplinary lines and provides a site for discourses on ethnicity, class, gender, sexuality, age, family, religion and other American cultural conflicts.
Requisites: Requires a prerequisite course of ETHN 2001 (minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: American Indian Studies

ETHN 4552 (3) The Harlem Renaissance: Fr Black Wmn's Club Mvmnt to Hip Hop
Offers an interdisciplinary and intersectional overview of the origins and evolution of the Harlem Renaissance. Explores classic texts, music and works of art emerging from the Harlem Renaissance and related events and movements of its epoch: the Black Women's Club Movement, New Negro Movement, Pan-African Movement, Lost Generation, Jazz Age, World War I and World War II.
Equivalent - Duplicate Degree Credit Not Granted: HUMN 4552 and ETHN 5552
Requisites: Requires prerequisite course of ETHN 1022 or ETHN 2001 or ETHN 3212 (minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Africana Studies

ETHN 4553 (3) Indigenous Representations in the United States
Examines the relationship and negotiation of culture/status/place through representation(s) within and concerning Indigenous peoples/communities. Focuses on U.S. representational forms in popular experiences e.g., literature, film, media and the roots of those representations via legal and medical definitions. This investigation and analysis is supplemented with focus on gender as well as contextualization through global Indigenous portrayals.
Equivalent - Duplicate Degree Credit Not Granted: ETHN 5553
Requisites: Requires a prerequisite course of ETHN 2001 (minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).
Recommended: Prerequisite ETHN 1023.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: American Indian Studies

ETHN 4632 (3) Frantz Fanon Seminar
Analyzes the life and thought of Frantz Fanon for its contributions to interdisciplinary and intersectional studies. Emphasis will be placed on the innovative interdisciplinary and intersectional nature of Fanon's psychology, sociology and philosophical anthropology, as well as his participation in African and Caribbean anti-colonial movements.
Equivalent - Duplicate Degree Credit Not Granted: ETHN 5632
Requisites: Requires a prerequisite course of ETHN 1022 or ETHN 2001 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) Ethnic Studies (ETHN) majors only.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Africana Studies

ETHN 4672 (3) Seminar on the Civil Rights and Black Power Movements
A review of the ideas, events, persons, organizations oriented to the quest for African American social justice in the decade of the sixties.
Requisites: Requires a prerequisite course of ETHN 1022 or ETHN 2001 (minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Africana Studies
ETHN 4692 (3) Special Topics in Multicultural and Ethnic American Literature
Provides advanced in-depth study of literatures written by ethnic American authors. Texts may be drawn from a range of African-American, Chicano/a, Latino/a, Asian American, Native American or Indigenous literature traditions. Topics vary each semester.
Equivalent - Duplicate Degree Credit Not Granted: ENGL 4697
Requisites: Requires a prerequisite course of ETHN 1022 or ETHN 2001 (minimum grade D). Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Africana Studies
ETHN 4714 (3) Sport for Social Justice
Takes a look at the nuanced and controversial relationship between sport and peace. Although sport is heralded as a powerful tool for social good, drawing attention to causes such as conflict resolution, HIV prevention, environmental initiatives and improved international relationships, it also continues to reflect and reproduce social inequalities in ways commonly overlooked.
Equivalent - Duplicate Degree Credit Not Granted: ETHN 5714
Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior).
Recommended: Prerequisite ETHN 3024.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Crosscultural/Comparative Studies
ETHN 4841 (1-6) Independent Study
Work with an approved faculty sponsor to explore a topic in greater depth. Instructor consent required.
Repeatable: Repeatable for up to 6.00 total credit hours.
Recommended: Prerequisite ETHN 2001.
Additional Information: Departmental Category: Crosscultural/Comparative Studies
ETHN 4951 (3) Senior/Graduate Seminar in Ethnic Studies
Capstone experience in Ethnic Studies. Includes an independent research project and public presentation.
Equivalent - Duplicate Degree Credit Not Granted: ETHN 5951
Requisites: Requires prerequisite courses of ETHN 2001 and ETHN 3501 (all minimum grade D). Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Crosscultural/Comparative Studies
ETHN 4961 (3) Honors Thesis 1
Supervised original research project in the field of ethnic studies. The goal is to make substantial progress on a written honors thesis that will be orally defended and submitted to the Honors Program of the College of Arts and Sciences. Department enforced restriction: application and acceptance into the ETHN Honors Program.
Requisites: Requires a prerequisite course of ETHN 2001 (minimum grade D). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Ethnic Studies (ETHN) majors only.
Additional Information: Arts Sciences Honors Course
Departmental Category: Crosscultural/Comparative Studies
ETHN 4971 (3) Honors Thesis 2
Supervised original research project in the field of ethnic studies. The goal is to complete progress on a written honors thesis that will be orally defended and submitted to the Honors Program of the College of Arts and Sciences. Department enforced prerequisite: application and acceptance into the ETHN Honors Program.
Requisites: Requires prerequisite courses of ETHN 2001 and ETHN 4961 (all minimum grade D). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Ethnic Studies (ETHN) majors only.
Additional Information: Arts Sciences Honors Course
Departmental Category: Crosscultural/Comparative Studies

Ethnic Studies - Bachelor of Arts (BA)
The department offers an undergraduate major and minor in ethnic studies.
The department offers courses in five areas of concentration: Africana Studies, Native American and Indigenous Studies, Asian American Studies, Latinx and Chicanx studies, and Comparative Ethnic Studies. In addition, they can take classes in the area of Critical Sports Studies (https://www.colorado.edu/ethnicstudies/undergraduate/critical-sports-studies/) to fulfill the undergraduate certificate in critical sports studies.

Requirements
In addition to the general requirements of the College of Arts and Sciences, students must complete 33 credit hours of ethnic studies requirements: 12 credit hours of required ethnic studies core classes and an additional 21 credit hours in ethnic studies, 15 credit hours of which must be upper division for a total of 24 upper-division credit hours in the major (required courses mentioned below are included). The 21 credit hours in ethnic studies can be selected from the current ethnic studies course offerings; they may include courses that are cross-listed with the Department of Ethnic Studies, as listed in this catalog.
A grade of C- or better must be received in all courses used to satisfy the major requirements, with an overall average of 2.00 in the major. No more than 6 credit hours may be taken in independent study. No pass/fail graded courses may satisfy the 33-credit-hour minimum requirement.

Elective Courses
A minimum of 21 credit hours in ETHN electives, 15 credit hours of which must be upper-division courses in the major. The 21 credit hours in electives can be selected from the current ETHN course offerings; they may also include coursework from outside the department, as approved by the department’s curriculum committee and advisor.

Lower or Upper-division Major Electives 6
Upper-Division Major Electives 15
Total Credit Hours 33

Graduating in Four Years
Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of "adequate progress" as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress in ethnic studies, students should meet the following requirements:

- Declare ethnic studies as their major.
- Complete at least 12 credit hours toward the ethnic studies major requirements by the fourth semester.
- Complete at least 21 credit hours toward the ethnic studies major requirements by the end of the sixth semester.
- Complete ETHN 2001 no later than the fourth semester.
- Complete ETHN 3501 no later than the seventh semester.
- Complete at least one ethnic studies selected topics course selected from the following: ETHN 3101, ETHN 3102, ETHN 3103, ETHN 3105 or ETHN 3106 no later than the eighth semester.
- Complete ETHN 4951 no later than the eighth semester.

Recommended Four-Year Plan of Study
Through the required coursework for the major, students will complete at least 12 credit hours across the Arts & Humanities and Social Sciences areas of the Gen Ed Distribution Requirement, and potentially one or both of the components of the Gen Ed Diversity Requirement. (Most ETHN students will complete all of the Arts and Humanities and Social Sciences areas of the Gen Ed Distribution Requirement and the U.S. Perspective in the Gen Ed Diversity Requirement with major coursework.)

Learning Outcomes
Upon completing an undergraduate degree in ethnic studies, students will be able to:

- Critically examine how race and the interrelated categories of culture, ethnicity, indigeneity, gender, class, sexuality, religion and immigration status impact the lives of people locally, regionally, nationally and internationally
- Analyze how power and privilege function at the intersection of gender, sexuality, race, class, ability, nationality and colonialism
- Examine how colonial and imperial projects facilitate and perpetuate structural dispossession through racialization and juridical power, producing marginalized communities
- Learn about the histories, cultures and worldviews of marginalized communities (domestic and transnational)
- Understand how both intersectional and multidisciplinary approaches inform comparative work in our four core disciplines

Students will learn the following practical skills:

- Think critically about social disparities and use an intersectional epistemic frame to understand social justice and strategies for social liberation
- Use creative ways to engage with social issues and communicate complex ideas from the field of ethnic studies to academic and general audiences
- Develop a broader view of history from the margins in order to support a more nuanced understanding of the political landscape in the U.S. (and beyond)
- Make evidence-based written and oral arguments to address complex social problems, such as those sitting at the intersection of racism, classism, sexism and homophobia

Bachelor’s–Accelerated Master’s Degree Program(s)
The Bachelor’s–Accelerated Master’s (BAM) degree program options offer currently enrolled CU Boulder undergraduate students the opportunity to receive a bachelor’s and master’s degree in a shorter period of time. Students receive the bachelor’s degree first, but begin taking graduate coursework as undergraduates (typically in their senior year). Because some courses are allowed to double count for both the bachelor’s and the master’s degrees, students receive a master’s degree in less time and at a lower cost than if they were to enroll in a stand-alone master’s degree program after completion of their baccalaureate degree. In addition, staying at CU Boulder to pursue a bachelor’s–accelerated master’s program enables students to continue working with their established faculty mentors.

BA in Ethnic Studies, MA in Educational Foundations, Policy and Practice
The School of Education and Department of Ethnic Studies have partnered to support a BAM degree program that reflects each unit's commitment to educational opportunity, diversity, and engaged scholarship examining how race and the interrelated categories of ethnicity, disabilities, language, gender, class and sexuality impact the lives of people locally and globally.

The program invites highly-focused ethnic studies majors who are interested in applying their dedication to social justice and critical thinking skills to transformative careers in education. The program emphasizes policy and curricular issues, and the development of an interdisciplinary lens in graduate level research.

The BAM degree program offers an efficient and rigorous path toward earning, in five years, a bachelor's degree in Ethnic Studies and a master's degree in educational foundations, policy and practice.

Admissions Requirements
In order to gain admission to the BAM program named above, a student must meet the following criteria:

- A cumulative GPA of 3.0 or higher
- A minimum of 90 credit hours of coursework completed or in progress
- Declared ethnic studies as a major
- Completed all MAPS requirements

Program Requirements
Students may take up to and including 12 hours while in the undergraduate program which can later be used toward the master's degree. However, only six credit hours may be double counted toward the bachelor's degree and the master's degree.

Students must complete six credit hours of graduate level coursework by their eighth undergraduate semester. Students must also maintain a cumulative GPA of 3.0 or higher to continue in the program.

Students must apply to graduate with the bachelor's degree, and apply to continue with the master's degree, early in the semester in which the undergraduate requirements will be completed.

Contact Us
Completing the BAM degree program requires early and careful planning. To learn more about the program or how to apply, please contact an advisor at any time.

- Contact education advisors at edadvise@colorado.edu or 303-492-6555.
- Contact ethnic studies advisors at ethnicst@colorado.edu or 303-492-8852.

Ethnic Studies - Minor
A minor is offered in ethnic studies. Declaration of a minor is open to any student enrolled at CU Boulder, regardless of college or school.

The minor emphasizes engaged scholarship that examines how race and the interrelated categories of ethnicity, gender, class and sexuality impact the lives of people in the United States and around the globe.

To declare a minor, please schedule an appointment with our advisor (https://www.colorado.edu/ethnicstudies/undergraduate/advising/).

Requirements
Students must complete 18 credits hours in ethnic studies (ESTHN) coursework. All coursework applied to the minor must be completed with
a grade of C- or better; no pass/fail work may be applied. The grade point average for all minor coursework must be equal to 2.0 (C) or higher.

Students are allowed to apply no more than 9 credit hours, including 6 upper-division credit hours, of transfer work toward a minor.

### Critical Sports Studies - Certificate

Critical sports studies—which examines sports and their social, cultural, historical and economic contexts—is a rapidly growing interdisciplinary and intersectional field that engages cultural studies, the humanities, social sciences and professional fields such as business and law. At CU Boulder, critical sports studies is a multifaceted discipline that addresses the growing interest in society to examine social and cultural issues in sports today. Critical sports studies is also making great strides in understanding how sport and play function in everyday interactions and how it can be harnessed to support social and cultural change.

The certificate in critical sports studies is open to all degree-seeking undergraduate students pursuing any major at CU Boulder. The program framework demands that students analyze race, gender, class and nation as they study sports, preparing students to engage in an increasingly diverse and globalized society. Students also participate in co-curricular activities to augment their understanding of the development, focus, functioning, and future of sports in society.

### Requirements

#### Admission Requirements

Applications for admission into the certificate program will be reviewed once each semester. Degree-seeking undergraduate students may apply before they begin coursework, while they are engaged in it, or after they have completed certificate requirements.

#### Required Courses and Credits

A total of 18 hours of coursework are required to complete the certificate. Students are encouraged to take advantage of the interdisciplinary course offerings based in cultural studies, political science, history, study abroad, journalism, philosophy, communications, and writing and rhetoric.

All students are required to take ETHN 3024 Introduction to Critical Sports Studies. At least 6 additional credits must be taken within the Department of Ethnic Studies for a minimum total of 9 credits within ETHN.

The remaining 9 credits must be taken in other departments and in other disciplines. Alternately students may take 6 credits in other departments plus 3 credits from an experiential learning course such as the Education Abroad Summer Seminar: ETHN 3704 Athlete as a National Symbol: Nationhood/Nationalism, Sport (offered annually).

A grade of C- or higher is required to count a class toward the certificate. Students must achieve a minimum GPA of 2.0 in certificate coursework in order to earn the degree.

### French and Italian

The Department of French and Italian provides instruction in the languages, literatures, cinema, and cultures of France, Italy, and other areas where these languages are spoken.

We offer a wide selection of undergraduate courses (http://www.colorado.edu/frenchitalian/courses-0/), covering topics ranging from the Middle Ages to Italian-American culture and the Francophone literature of Africa, the Caribbean and the Middle East.

The department offers:

- Majors and Minors in French (http://www.colorado.edu/frenchitalian/undergraduate/french/) and Italian (http://www.colorado.edu/frenchitalian/undergraduate/italian/)
- Joint BA/MA (http://www.colorado.edu/frenchitalian/undergraduate/french/bama/) in French
Study abroad opportunities in French (http://www.colorado.edu/frenchitalian/study-abroad/) and Italian (http://www.colorado.edu/frenchitalian/study-abroad/) to help students complete their international experience.

Course codes for these programs are FREN and ITAL.

**Study Abroad**

CU Boulder offers French study abroad programs in Annecy, Paris, Rennes, Strasbourg and Toulouse, France. In addition, students may study in Quebec, Brussels, Geneva and in the Francophone African nations of Cameroon, Madagascar, Mali and Senegal. CU Boulder offers Italian study abroad programs in Ferrara, Florence and Perugia, Italy. Students may obtain course-credit equivalences for work done while abroad. For further information about study abroad programs, students may visit departmental advisors or the Education Abroad office. Credit hours earned on this program may be applied to the Italian major. Students may also take a summer film class in Rome and/or Paris (in alternate years). This class is taught in English. The Ayer Romance Language Scholarship is available for French and Italian majors who plan to study abroad. The Il Circolo Italiano is also available for Italian majors who will be studying abroad. Both of these scholarships are awarded by the Department of French and Italian.

**Bachelor's Degrees**

- French - Bachelor of Arts (BA) (p. 288)
- Italian - Bachelor of Arts (BA) (p. 290)

**Minors**

- French - Minor (p. 292)
- Italian - Minor (p. 293)

**Faculty**

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

**Courses**

**FREN 1010 (5) Beginning French 1**

For students with no previous knowledge of French. Presents basic grammar and most commonly used French vocabulary. Introduces students to Francophone culture.

*Equivalent - Duplicate Degree Credit Not Granted: FREN 1050*

*Additional Information: Arts Sci Core Curr: Foreign Language*

*Arts Sci Gen Ed: Foreign Language*

*Departmental Category: French*

**FREN 1020 (5) Beginning French 2**

Continuation of FREN 1010. Completes the presentation of most basic structures and French vocabulary.

*Equivalent - Duplicate Degree Credit Not Granted: FREN 1050*

*Requisites: Requires a prerequisite course of FREN 1010 (minimum grade C).*

*Additional Information: Arts Sci Core Curr: Foreign Language*

*Arts Sci Gen Ed: Foreign Language*

*Departmental Category: French*
FREN 1050 (5) Beginning French Review
Covers the material of FREN 1010 and 1020 in one accelerated semester. Intended for students who know some French (i.e., four to five semesters in high school) but do not have skills adequate for 2000-level courses. Department enforced prerequisite: 2 years of high school French.
Equivalent - Duplicate Degree Credit Not Granted: FREN 1010 or FREN 1020
Additional Information: Arts Sci Gen Ed: Foreign Language
Departmental Category: French

FREN 1200 (3) Medieval Epic Through Game of Thrones
Covers the most important works of medieval literature, in English translation. Among the texts studied are the Song of Roland, and Arthurian romances, including the stories of Lancelot and Guinevere. Offers a general introduction for nonmajors to medieval literature and society. Taught in English.
Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: French

FREN 1400 (3) Medieval/Renaissance Women Writers in Italy and France
Introduces major literature through close readings of women's writings in their historical context. Offers a general introduction to women's status and roles in Italy and France. Taught in English.
Equivalent - Duplicate Degree Credit Not Granted: ITAL 1400
Additional Information: GT Pathways: GT-AH2 - Arts Hum: Lit Humanities
Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Diversity-Global Perspective
Departmental Category: French

FREN 1500 (3) Literature and Politics in the Age of Enlightenment
Introduces political dimensions of 18th century French literature. Surveys political and social preoccupations that manifest themselves across genres (novels, scientific treatises, dialogues, erotic literature, etc.). Examines contributions made by 18th century French writers to the sociological and political imagination of Western tradition. Taught in English.
Additional Information: Departmental Category: French

FREN 1550 (3) The Power of Fairy Tales in Italy and France
Examines French and Italian fairy tales written between 1550 and 1750 and analyzes their connections to each other and to contemporary fairy tales literature, film, and the arts.
Equivalent - Duplicate Degree Credit Not Granted: ITAL 1550

FREN 1610 (3) How to Be French, 1: The Ancien Regime
Explores medieval and early modern French culture in the widest sense, encompassing masterpieces of French literature, architecture, and visual art as a key to the habits, customs, and practices of everyday life. Major themes are "living and dying," "heroes, villains, and kings," "courtliness, civility, and the art of love," and "crafty little guys."
Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: French

FREN 1620 (3) How To Be French? 2: Modernity
Introduces students to French culture in its widest sense and in particular to reflect on major social and cultural contradictions inherited from the French Revolution, which still define "Frenchness" today. Taught in English.
Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: French

FREN 1700 (3) Francophone Literature in Translation
Studies the literary expression of French-speaking peoples of Africa, the Caribbean, and Canada. Gives special attention to oral tradition, identity, question, and cultural conflict. Taught in English.
Additional Information: GT Pathways: GT-AH2 - Arts Hum: Lit Humanities
Departmental Category: French

FREN 1750 (3) French Colonialism: North Africa and the Middle East
Offers a general introduction to French and Francophone literature and visual arts (painting, photography, film) from the nineteenth century to the present depicting cultures and societies of the Middle East and North Africa. In English with English translations of French texts.
Additional Information: GT Pathways: GT-AH2 - Arts Hum: Lit Humanities
Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Diversity-Global Perspective
Departmental Category: French

FREN 1800 (3) Contemporary French Literature in Translation
Reviews the major philosophical, political, and aesthetic issues in the 20th century French novel and drama. Beginning with existentialist literature, discussion focuses subsequently on the Theatre of the Absurd, the new novel, World War II and the Holocaust, and recent women writers. Taught in English.
Additional Information: Departmental Category: French

FREN 1850 (3) Introduction to French Society and Culture through Cinema
Introduces students to French society and culture through French cinema by focusing thematically on major historical events (e.g., World War II; student revolts of 1968) and cultural constants of French society (e.g., feminism; colonialism and its aftermath). Taught in English.
Additional Information: Departmental Category: French

FREN 1900 (3) Modern Paris in Literature, Photographs, Paintings and Movies
Introduces the rise of modern Paris from the French Revolution (1789) to today. Studies the physical and sociological changes of the city in terms of architecture and industrialization through French literature, movies, paintings and photographs. Addresses problems due to the magnitude of the city, the growing fear of urban vices, and the dilemma of controlling massive urban populations. Taught in English.
Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: French

FREN 2000 (3) Modern Paris in Literature, Photographs, Paintings and Movies
Introduces the rise of modern Paris from the French Revolution (1789) to today. Studies the physical and sociological changes of the city in terms of architecture and industrialization through French literature, movies, paintings and photographs. Addresses problems due to the magnitude of the city, the growing fear of urban vices, and the dilemma of controlling massive urban populations. Taught in English.
Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: French
FREN 1950 (3) French Feminisms
Introduces students to the central problematics that have defined French feminist studies. This course focuses on the various literary and historical contexts in which core concepts such as female subjectivity and agency, feminist writing and political engagement have arisen and developed in Early Modern and Modern France by looking at multiple media (literary text, film, painting). Taught in English.
Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Diversity-Global Perspective
Departmental Category: French

FREN 2110 (3) Second-Year French Grammar Review and Reading 1
A film based curriculum will expand the knowledge of francophone culture and will continue the development of communication skills begun in the first year. This third semester course will review essential beginning grammar before introducing intermediate structures, vocabulary, and cultural/literary readings.
Requisites: Requires a prerequisite course of FREN 1020 or FREN 1050 (minimum grade C-).
Additional Information: GT Pathways: GT-AH4 - Arts Hum: Foreign Languages
Arts Sci Core Curr: Foreign Language
Arts Sci Gen Ed: Foreign Language
Departmental Category: French

FREN 2120 (3) Second-Year French Grammar Review and Reading 2
Completes the film-based study of intermediate grammar begun in FREN 2110. Continued reading in French literature and culture, with considerable practice in writing and speaking French. Fulfills the Graduate School language requirement for the Ph.D.
Requisites: Requires a prerequisite course of FREN 2110 (minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: French

FREN 2500 (3) Conversation in French
Puts into practice all that has been learned in the first four semesters of college French. Builds conversational skills and confidence through acquisition of new vocabulary and a review of grammar essential to discussing different aspects of French culture. All work is in French.
Requisites: Requires a prerequisite course of FREN 2120 (minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: French

FREN 3010 (3) French Phonetics and Pronunciation
Improves students' ability to pronounce French correctly. Coursework involves the International Phonetic Alphabet, understanding the differences between pairs of sounds, and recognizing the relationship between spelling and pronunciation. Required of all FREN majors.
Requisites: Requires a prerequisite course of FREN 2120 (minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: French

FREN 3020 (3) French Phonetics Through Musical Performance
Advanced oral practice and interpretation of a French Musical. This course of applied and corrective phonetics concentrates on developing good pronunciation and fluency through song. The course culminates with a public presentation of the musical studied in class.
Requisites: Requires a prerequisite course of FREN 3010 (minimum grade C-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: French

FREN 3050 (3) French Composition 1
French third-year level composition course. Students practice and write different forms of formal French writing. They also hone their grammar skills and analytical reading of short literature pieces. This course or FREN 3060 is required for all French majors.
Requisites: Requires a prerequisite course of FREN 2120 (minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: French

FREN 3060 (3) French Composition 2
French third year level composition course. Students build on their previous knowledge of formal writing in French and more emphasis is given to argumentative and analytical style of writing. This course or FREN 3050 is required for all French majors.
Requisites: Requires a prerequisite course of FREN 2120 (minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: French

FREN 3100 (3) Introduction to Critical Reading and Writing in French Literature
Study of French literature through close readings of representative examples of major literary forms (poetry, fiction, drama, essay) and through the composition of critical writings in French. Required for French majors.
Requisites: Requires a prerequisite or corequisite course of FREN 3100 or a prerequisite or corequisite course of FREN 3060 (minimum grade C-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: French

FREN 3110 (3) Main Currents of French Literature 1
Surveys 19th and 20th century French literature. Close reading of selected texts and the principal writers and schools. This course or FREN 3120 are required for all majors.
Requisites: Requires a prerequisite or corequisite course of FREN 3100 (minimum grade C-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: French

FREN 3120 (3) Main Currents of French Literature 2
Surveys 19th and 20th century French literature. Close reading of selected texts of the principal writers and schools. This course or FREN 3110 are required for all majors.
Requisites: Requires a prerequisite or corequisite course of FREN 3100 (minimum grade C-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: French
FREN 3200 (3) Introduction to Literary Theory and Advanced Critical Analysis  
Introduces important aspects of both classical and modern literary theory as an aid to reading and understanding literary texts. Covers theoretical works by figures ranging from Plato and Aristotle to modern French critics such as Barthes, Foucault, and Derrida in conjunction with selected literary works. Offers students more sophisticated means of understanding issues like gender, ethnicity, the roles of both author and reader in constructing meaning, the nature and functions of signs, and the relationship between literature and the larger society. Conducted in English, though French majors are required to read the texts in the original language. Required for students taking honors in French or Italian. 
Additional Information: Arts Sci Core Curr: Literature and the Arts  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: French

FREN 3300 (3) French Culture Through Fashion  
Studies fashion as a means of identity construction as well as a means of resistance in France from 1789 until present day. Through an analysis of clothing trends and visits to various sites in Paris, students will study the cultural significance of certain fads in French history that allowed marginalized demographics to define and assert their individuality.  
Grading Basis: Letter Grade

FREN 3400 (3) Culture, Performance and Development in Dakar, Senegal  
Offers students an immersive experience in Dakar, Senegal, one of Africa’s most historically rich and electrifying capitals. Introduces the history, culture and religious practices of a country at the crossroads of global notions of African, Francophone and Muslim identities. Includes a capstone public presentation in collaboration with a Senegalese activist theater company.  
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Diversity-Global Perspective

FREN 3500 (3) French Current Events: Conversation and Composition  
For students who have spent fewer than four months in a French-speaking environment. Focuses on presentations, debates, discussions, readings and written work.  
Requisites: Requires prerequisite course of FREN 2120 (minimum grade C-) and corequisite course of (FREN 3010 or FREN 3020 or 3050 or FREN 3060).  
Grading Basis: Letter Grade  
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: French

FREN 3600 (3) Business French 1  
Provides students the tools needed to function in a French-speaking work environment. A culminating project involves creating a business in a francophone country.  
Requisites: Requires a prerequisite course of FREN 2120 (minimum grade C).  
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: French

FREN 3700 (3) French-American Cultural Differences  
Through readings, films, discussion and activities, students learn the defining values of their own country, those of France, and key differences between the two cultures. Taught in French.  
Requisites: Requires a prerequisite or corequisite course of FREN 3050 or a prerequisite or corequisite course of FREN 3060 (minimum grade C).  
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: French

FREN 3800 (3) France and the Muslim World  
Introduces students to the polemic colonial, social, and cultural interactions of France and Islam. Close attention will be paid to paradigms of identities of one of the major European nations and the Islamic world. Readings and discussion topics for this course cover the social, cultural, and literary depictions of Islamic and French interactions, negotiations, and contradictions. Taught in English. Cannot be used for French major or minor credit.  
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.  
Additional Information: Arts Sci Core Curr: Human Diversity  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Diversity-Global Perspective  
Departmental Category: French

FREN 4030 (3) Advanced Oral Practice and Interpreting  
Concentrates on developing (or preserving) speaking fluency, correct pronunciation, and a good working vocabulary.  
Repeatable: Repeatable for up to 6.00 total credit hours.  
Requisites: Requires prerequisite courses of FREN 3050 or FREN 3060 and FREN 3100 (all minimum grade C).  
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: French

FREN 4110 (3) French Special Topics  
Topics vary each semester. Consult the online Schedule Planner for specific topics. See also FREN 4120.  
Repeatable: Repeatable for up to 6.00 total credit hours.  
Requisites: Requires a prerequisite course of FREN 3100 (minimum grade C).  
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: French

FREN 4120 (3) French Special Topics  
Topics vary each semester. Consult the online Schedule Planner for specific topics. See also FREN 4110.  
Repeatable: Repeatable for up to 6.00 total credit hours.  
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: French

FREN 4170 (3) Francophone Literature  
Studies the literary expression of French-speaking peoples of Africa, the Caribbean, and French Canada. Gives special attention to oral tradition, identity question, and cultural conflict.  
Requisites: Requires prerequisite course of FREN 3100 (minimum grade C). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.  
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: French

FREN 4250 (3) Medieval and Renaissance Readings  
Explores the complex and evolving cultural and historical contexts of medieval and/or Renaissance French. Introduces the masterpieces of French medieval and Renaissance literature, such as the Chanson de Roland, Arthurian romances, and the work of Christine de Pizan. Course explores a variety of literary genres, while focusing on specific themes, such as representations of licit or illicit desire.  
Requisites: Requires prerequisite courses of FREN 3050 or FREN 3060 and FREN 3100 (all minimum grade C).  
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: French
FREN 4300 (3) Theatre and Modernity in 17th Century France
Readings of plays by Corneille, Molière and Racine introduce students to theatre's role as a mirror of the multifarious tensions shaping modern Western experience. Taught in English with English translations.
**Requisites:** Requires prerequisite courses of FREN 3050 or FREN 3060 and FREN 3100 (all minimum grade C-).
**Additional Information:** Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: French

FREN 4330 (3) Molière and 17th Century French Comedy
Close readings of farces and comedies of Molière in context with selected comedies by Corneille, Rotrou and Cyrano de Bergerac and selected satires by Boileau and La Fontaine. Themes include comedy as a form of social criticism and the sociocultural significance of such episodes of Molière's career as the scandalous quarrels of L'ecole des Femmes and Tartuffe.
**Requisites:** Requires prerequisite courses of FREN 3050 or FREN 3060 and FREN 3100 (all minimum grade C-).
**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: French

FREN 4350 (3) French Enlightenment
Studies fiction, essays, theatre, and philosophical tales. Emphasizes the Enlightenment in France through the texts of its major representatives: Montesquieu, Voltaire, Marivaux, Diderot, and Rousseau.
**Requisites:** Requires a prerequisite course of FREN 3100 (minimum grade C-).
**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: French

FREN 4430 (3) Survey of 19th Century French Literature
Examines fiction, poetry and theatre in 19th century France. Focuses on developing and changing literary styles and subject matter throughout the century in historical, philosophical and social context.
**Requisites:** Requires prerequisite course of FREN 3050 or FREN 3100 (minimum grade C-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: French

FREN 4470 (3) 20th Century French Theatre and Poetry
Close readings of plays from the turn of the century to the contemporary period introduce the principal themes and techniques of modernist and postmodernist French theatre. Students are encouraged to consider problems commonly evoked by these texts and to compare the positions that each text takes on such problems as the status and uses of language, the function and limits of the theatre and the dialectic of appearance and reality.
**Requisites:** Requires prerequisite courses of FREN 3050 or FREN 3060 and FREN 3100 (all minimum grade C-).
**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: French

FREN 4480 (3) 20th Century French Novel
Close readings of novels from the 1930s to the contemporary period introduce the principal themes and techniques of the modernist and postmodernist French novel. Students are encouraged to analyze a variety of questions commonly evoked in these texts, such as the problem of representation, the uses and abuses of writing, the relation of fiction and history and the status of the subject in the world.
**Requisites:** Requires prerequisite courses of FREN 3050 or FREN 3060 and FREN 3100 (all minimum grade C-).
**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: French

FREN 4600 (3) Topics in French Film
Covers various topics in the French and some other Francophone cinemas (Belgian, Swiss, Quebecois) from 1895 to the present. Focuses on periods, schools, themes, and directors from Melies to Duras, and the critical approaches by which they are studied. Varies from year to year.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Requires prerequisite courses of FREN 3050 or FREN 3060 and FREN 3100 (all minimum grade C-).
**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: French

FREN 4700 (3) Encountering Animals: Contemporary Discourse and the Dialog of Species
Explores Western philosophy and literature recent challenges to species' differences and human privileges and includes contemporary theory, novels as well as movies and other cultural artifacts. Themes include animal representations in today's culture, animal and human bond, animal welfare, post-humanism. Taught in English.
**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).
**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: French

FREN 4750 (3) Methods of Teaching French and Professional Orientation
Presents current methodology and techniques for teaching foreign language for proficiency. Areas of study include ACTFL guidelines, National Standards, assessment, classroom activities, curriculum, and syllabus design.
**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).
**Additional Information:** Departmental Category: French

FREN 4800 (3) Postmodernist French Novel in Translation
Focuses upon recent innovations in the French novel, and upon the postmodernist literary aesthetic. Students will examine a variety of avant-garde novels, and analyze the kinds of literary experimentation that those novels propose. They will be asked to consider a series of questions concerning the changing nature of literary representation and the status of the novel as a cultural form. Taught in English. Cannot be used for major or minor credit.
**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).
**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: French

FREN 4840 (1-6) Independent Study: Language
Upon consultation only and at the undergraduate level.
**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.
**Additional Information:** Departmental Category: French
FREN 4860 (3) War, Trauma, and Memory: Amnesias, Revisions, and Representations of Traumatic History
Attempts to investigate how extreme historical events (war, genocides, terror attacks) function as “trauma” and how these extreme events are dealt with by personal and collective memory in historical narratives, literary and cinematic fiction, and memorials. Amnesia and other types of historical negations or revisions will be analyzed, along with representations of trauma and the difficulties raised by this memorializing. Taught in English. Cannot be used for major or minor credit.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Core Curr: Ideals and Values
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: French

FREN 4960 (6) High School French Teaching
Offered as a part of the supervised student teaching in a secondary school required for state licensure to teach French. These hours do not count toward student hours in the major nor in the maximum departmental hours allowed. Pass/Fail only.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Grading Basis: Pass/Fail
Additional Information: Departmental Category: French

FREN 4980 (3) French Senior Honors Thesis
The senior honor thesis is a 40 to 45 page original research paper, written in French, and constitutes a requirement for graduating with departmental honors.
Requisites: Requires a prerequisite course of FREN 3200 (minimum grade D-).
Additional Information: Arts Sciences Honors Course
Departmental Category: French

FREN 4990 (3) Senior Seminar
Preparation of a 15-page research paper in French presented to two members of the department faculty and defended orally in class.
Recommended: Prerequisite at least one course numbered FREN 4100 or above and all third-year requirements and advisor consent.
Additional Information: Departmental Category: French

ITAL 1010 (4) Beginning Italian 1
The four skills of listening, speaking, reading, and writing are progressively developed in a predominantly oral presentation. Grammatical concepts are explained and practiced through dialogues, written exercises, and conversations. The cultural focus is on the personal world and life of students.
Equivalent - Duplicate Degree Credit Not Granted: ITAL 1050
Additional Information: Arts Sci Core Curr: Foreign Language
Arts Sci Gen Ed: Foreign Language
Departmental Category: Italian

ITAL 1020 (4) Beginning Italian 2
Continuation of ITAL 1010, with more difficult grammatical concepts explored. The cultural focus shifts to social and civic areas.
Equivalent - Duplicate Degree Credit Not Granted: ITAL 1050
Requisites: Requires a prerequisite course of ITAL 1010 (minimum grade C-).
Additional Information: Arts Sci Core Curr: Foreign Language
Arts Sci Gen Ed: Foreign Language
Departmental Category: Italian

ITAL 1050 (4) Fast-Track Italian
Two semesters of beginning Italian in one, for students who have studied other languages or have had previous exposure to Italian.
Equivalent - Duplicate Degree Credit Not Granted: ITAL 1010 or ITAL 1020
Additional Information: Departmental Category: Italian

ITAL 1300 (3) La Dolce Vita: How to Live a Good Life, Italian Style
Introduces students to a critical appraisal of the Humanities in their world. Because the Humanities were rediscovered in the late Middle Ages in Italy, the course explores the Humanities from an Italian-centered perspective, though it broadens the scope of its analysis to make this perspective relevant for students who come from a variety of cultures and backgrounds.
Additional Information: Arts Sci Core Curr: Ideals and Values
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Italian

ITAL 1400 (3) Medieval/Renaissance Women Writers in Italy and France
Introduces major literature through close readings of women's writings in their historical context. Offers a general introduction to women's status and roles in Italy and France. Taught in English.
Equivalent - Duplicate Degree Credit Not Granted: FREN 1400
Additional Information: GT Pathways: GT-AH2 - Arts Hum: Lit Humanities
Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Diversity-Global Perspective
Departmental Category: Italian

ITAL 1500 (3) That's Amore: Introduction to Italian Culture
Introduces students to representations of Italian society that have persisted through the ages. The course readings allow students to better understand how certain stereotypes about Italian society (e.g., Latin lover, Mafia) were born and persist in the present. Taught in English.
Additional Information: GT Pathways: GT-AH2 - Arts Hum: Lit Humanities
Arts Sci Core Curr: Contemporary Societies
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Italian

ITAL 1550 (3) The Power of Fairy Tales in Italy and France
Examines French and Italian fairy tales written between 1550 and 1750 and analyzes their connections to each other and to contemporary fairy tales literature, film, and the arts.
Equivalent - Duplicate Degree Credit Not Granted: FREN 1550

ITAL 1600 (3) Strategies of Fear: Introduction to Italian Fantastic Literature
Traces the development of the fantastic theme in Italian Literature from its origins (late nineteenth century) to contemporary times. Analyzes the modes of reception and appropriation of non-Italian gothic and fantastic narrative traditions through which Italian writers have subverted the national literary model proposed by realist narrative. Taught in English.
Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Italian
ITAL 2110 (4) Intermediate Italian Reading, Grammar, and Composition 1
Enhances the skills learned in the first-year course and develops greater fluency in understanding and speaking. More emphasis is placed on reading and writing through the use of activities featuring cultural themes that present a realistic portrait of contemporary Italy. Taught in Italian.
Requisites: Requires a prerequisite course of ITAL 1020 or ITAL 1050 (minimum grade C).
Additional Information: GT Pathways: GT-AH4 - Arts Hum: Foreign Languages
Arts Sci Core Curr: Foreign Language
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Foreign Language
Departmental Category: Italian

ITAL 2120 (4) Intermediate Italian Reading, Grammar, and Composition 2
Continuation of ITAL 2110. Some reading in Italian literature and culture with considerable practice in writing and speaking Italian. Fulfills the Graduate School language requirement for the Ph.D.
Requisites: Requires a prerequisite course of ITAL 2110 (minimum grade C).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Italian

ITAL 2130 (3) Introduction to Literary Analysis
Increases student's ability to read and analyze literary texts by improving vocabulary and terminology. Students read short stories, essays, short plays, and poems to acquire critical skills and improve expression of opinions and arguments in Italian. Taught in Italian.
Requisites: Requires a prerequisite course of ITAL 2120 (minimum grade C).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Italian

ITAL 2271 (3) Space, Invention, and Wonder in Fairy Tales, Literature and Film
Explores the themes of space, invention, technology and wonder in fairy tales from Italian, Russian, French, German, and Spanish traditions in order to compare their transformation in different national and historical settings. Students analyze the intersection of fairy tales and science in literature and film. Counts for the Space Minor. Taught in English.
Equivalent - Duplicate Degree Credit Not Granted: RUSS 2271
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

ITAL 3015 (3) Advanced Composition 1
Teaches students to write in Italian in a variety of genres, focusing on the creative aspects of writing. Exercises and themes are drawn primarily from current events and culture (i.e., blogging, journaling, essays and films), but also allows students to develop their critical skills in other areas.
Requisites: Requires a prerequisite course of ITAL 2120 (minimum grade C).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Italian

ITAL 3025 (3) Advanced Composition 2: Introduction to Literary Writing
Introduces students to complex forms of writing within Italian studies. Focuses on the analysis of literary genres (e.g., autobiography, essays, short stories) through a step-by-step process that allows students to craft advanced arguments in Italian. Studies will read Italian literary texts and write and revise in workshop format (e.g., peer review, collaborative assignments).
Requisites: Requires a prerequisite course of ITAL 3015 (minimum grade C).
Additional Information: Arts Sci Core Curr: Written Communication
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Written Communication-Upper
Departmental Category: Italian

ITAL 3030 (3) Storia dell'arte: Advanced Composition/Conversation 3
Improves vocabulary and fluency in spoken Italian, and competence and confidence in correct and more sophisticated written Italian through the study of the history of Italian art. Exercises and themes focus on Italian Classical, Medieval, Renaissance, and Modern Art.
Requisites: Requires a prerequisite course of ITAL 2120 (minimum grade C).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Italian

ITAL 3040 (3) Italian Conversation Through Cinema
Taught in Italian, the course covers various topics of Italian Cinema from WWII to the present. Focus is on periods, genres, themes, and auteur/directors. Emphasis on review of language structures previously learned and acquisition of new vocabulary to enable students to discuss different aspects of Italian culture, in Italian.
Requisites: Requires a prerequisite course of ITAL 2120 (minimum grade C).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Italian

ITAL 3140 (3) Literary and Artistic Cultures in Italy 3: 1900-present
Uses literary masterpieces as a springboard to explore the literature, visual arts, film, theater, and music produced in Italy from 1900 to today in its cultural and historical context. Emphasizes interpretation and critical analysis of major cultural figures, artistic forms, and ideas of the period. Taught in Italian.
Requisites: Requires prerequisite course of ITAL 2130 (minimum grade C).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Italian

ITAL 3150 (3) Literary and Artistic Cultures in Italy 2: 1800-1900
Uses literary masterpieces as springboard to explore the literature, visual arts, film, theater, and music produced in Italy from 1800 to 1900 in its cultural and historical context. Emphasizes interpretation and critical analysis of major cultural figures, artistic forms, and ideas of the period. Taught in Italian.
Requisites: Requires prerequisite course of ITAL 2130 (minimum grade C).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Italian

ITAL 3160 (3) Literary and Artistic Cultures in Italy 4: pre-1900
Uses literary masterpieces as springboard to explore the literature, visual arts, film, theater, and music produced in Italy from pre-1900 to today in its cultural and historical context. Emphasizes interpretation and critical analysis of major cultural figures, artistic forms, and ideas of the period. Taught in Italian.
Requisites: Requires prerequisite course of ITAL 2130 (minimum grade C).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Italian
ITAL 3160 (3) Literary and Artistic Cultures in Italy 1: 1200-1800
Uses literary masterpieces as springboard to explore the literature, visual arts, film, theater, and music produced in Italy from 1200 to 1800 in its cultural and historical context. Emphasizes interpretation and critical analysis of major cultural figures, artistic forms, and ideas of the period. Includes hands-on work with texts and arts from the period. Taught in Italian.
Requisites: Requires prerequisite course of ITAL 2130 (minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Italian
ITAL 4010 (3) Problems in Translation, Advanced Grammar, and Stylistics 1
Emphasizes practice in translating varying types of prose from Italian into English and English into Italian.
Requisites: Requires a prerequisite course of ITAL 2130 or ITAL 3015 (minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Italian
ITAL 4030 (3) Contemporary Italian Culture, Politics, and the Media
Serves as an introduction to the study of the effect that politics and the media have in shaping Italian culture. Makes use of the World Wide Web for instruction. Taught in Italian. Familiarity with Internet helpful.
Requisites: Requires a prerequisite course of ITAL 2130 or ITAL 3015 (minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Italian
ITAL 4040 (3) Business Italian Style
Provides an introduction to the Italian way of conducting business, with a close view on the company and its world through learning marketing and producing a real company project for the market. Analyzes topics of international marketing and trade using Italian and American economics websites. Focuses on building cross-cultural bridges between the U.S. and Italy to have smoother business relationships and enable students to participate more easily in joint international working teams.
Requisites: Requires a prerequisite course of ITAL 2120 (minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Italian
ITAL 4140 (3) The Age of Dante in Italian
Focuses on close readings of Dante's poetry with emphasis on the intellectual, religious, political, and scientific background of the medieval world. Taught in Italian.
Equivalent - Duplicate Degree Credit Not Granted: ITAL 4140 or ITAL 4147 or HUMN 4140
Requisites: Requires prerequisite course of ITAL 2130 (minimum grade C-).
Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Italian
ITAL 4145 (3) Visualizing Dante's Inferno: A Global Seminar in Florence Italy
Focuses on close reading of Dante's Inferno. Examines the specific sites and art in Florence and nearby cities that Dante references in the Inferno, as well as visual representations of Hell created both before and after Dante's poem. Taught in English. Offered through the CU Study Abroad Program.
Equivalent - Duplicate Degree Credit Not Granted: ITAL 4140 or ITAL 4145 or HUMN 4140
Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Italian
ITAL 4150 (3) Boccaccio's Decameron: Tales of Sex and Death in the Middle Ages
Studies Boccaccio's masterpiece, the Decameron, as emblematic of the post-Black Plague era in the late Middle Ages. Focuses on the art of storytelling through gendered perspectives to portray the complexity of the Middle Ages. Taught in English.
Equivalent - Duplicate Degree Credit Not Granted: HUMN 4150
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Diversity-Global Perspective
Departmental Category: Italian
ITAL 4160 (3-5) Italian Literature Special Topics
Topics vary each semester. Consult the online Schedule Planner for specific topics.
Repeatable: Repeatable for up to 8.00 total credit hours.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Italian
ITAL 4170 (3) Italian Literature Special Topics
Topics vary each semester. Consult the online Schedule Planner for specific topics.
Repeatable: Repeatable for up to 6.00 total credit hours.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Italian
ITAL 4200 (3) Topics in Italian Culture and Civilization from the Origins through the Renaissance
Taught in English. Topics vary.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Italian
ITAL 4250 (3) History of Modern Italy
Examines the major historical, economic and social factors that have shaped the identity of modern Italy, from the enthusiasm of young patriots during Italy’s unification in the 1860s to the discontent and domestic terrorism of the 1960s-1980s. Focuses on Mussolini, the Fascist movement and on World War II, as well as the changing role of women. Taught in English.
Equivalent - Duplicate Degree Credit Not Granted: HIST 4313
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Italian

ITAL 4260 (3) Mafia and Terrorism: Organized Violence in Italy
Investigates the origins and development of the Sicilian Mafia and Political Terrorism in Italy. In the first part of the course, the context of Italian politics, economy and society in which the mafia was born and flourished in the 19th and 20th century will be explored. The ramifications of the Mafia in the United States in the 20th c. will also be studied. In the second part of the course, the political and social causes of Italian left and right wing Terrorism will be examined, starting from the Piazza Fontana slaughter (1969) until the murder of Professor Marco Biagi (2002). Particular attention will be devoted to the kidnapping and murder of Democratic Christian Party President Aldo Moro and to the Red Brigades terrorist movement. The role of women in both Mafia and Terrorism will be explored.
Equivalent - Duplicate Degree Credit Not Granted: HIST 4323
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

ITAL 4280 (3) Topics in Italian Cinema
Examines different aspects of Italian cinema from the origins of neorealism to the present. May focus on a particular director, the culture of a specific period, or certain themes (e.g., the representation of women, the relationship between cinema and literature, or socio-aesthetic movements like Futurism or Fascism). Taught in English.
Repeatable: Repeatable for up to 6.00 total credit hours.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Italian

ITAL 4290 (3) Italian Culture Through Cinema
Examines the representations of Italian culture through its cinema. Focusing especially on post-World War II cinema, examines how Italian filmmakers have portrayed Italian history and specific aspects of its culture (i.e., Fascism, post-war reconstruction, the Mafia, patriarchy) in the past 50 years. Taught in English.

ITAL 4300 (3) Multiculturalism in Italy
Focuses on multiculturalism and difference in contemporary Italian society. Readings assigned explore the experience and co-existence of ethnic and religious minorities in Italy. Students will study how specific minorities live in a major Western-European country and will investigate the connotations that the concept of ‘multiculturalism’ takes in the Italian context.

ITAL 4350 (3) From Wops to Dons to Movers and Shakers: The Italian-American Experience
Exposes students to the history of Italian immigration to the United States. By studying how Italians and Americans negotiated different ideas concerning identity, traditions and community, it helps students understand how Italians transformed themselves from a despised and marginalized minority into active participants in the success of the United States in the 20th and 21st centuries. Taught in English.

ITAL 4500 (4) Italian Theatre
Using theatre as a medium, this course helps students attain a higher level of proficiency in spoken and written Italian. Study of Italian theatre is integrated with acting activities and pronunciation exercises. Culminates in the production of a play. Performance is in Italian and the students participate in the writing of the script. Taught in Italian.
Repeatable: Repeatable for up to 8.00 total credit hours.
Requisites: Requires a prerequisite course of ITAL 2120 (minimum grade C).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Italian

ITAL 4600 (3) Once Upon a Time in Italy
Examines the evolution of the Italian fairy tale from the 1500s to the 2000s in literature, theater, and film. Considers the tales and their authors in their social-historical context.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

ITAL 4730 (3) Italian Feminisms: Culture, Theory, and Narratives of Difference
Studies Italian women writers, artists and filmmakers. Literary and visual texts are analyzed in dialogue with readings of leading Italian gender theorists. Italian history and culture is reread by following the development of a discourse about women. Taught in English; readings in Italian for Italian majors.
Equivalent - Duplicate Degree Credit Not Granted: HUMN 4730

ITAL 4840 (1-3) Independent Study
Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Italian

ITAL 4930 (1-3) Languages Internship for Professions
Offers opportunities to use Italian skills in service to various sectors of the community, including private industry, government, and education.
Repeatable: Repeatable for up to 3.00 total credit hours.
Requisites: Requires a prerequisite course of ITAL 2120 (minimum grade C).
Additional Information: Departmental Category: Italian
ITAL 4980 (3) Italian Senior Honors Thesis
The senior honors thesis is a 40 to 45 page original research paper, written in Italian, and constitutes a requirement for graduating with departmental honors.
Requisites: Requires a prerequisite course of ITAL 3015 (minimum grade C-).
Additional Information: Arts Sciences Honors Course
Departmental Category: Italian

ITAL 4990 (3) Senior Seminar
Preparation of a 15-page research paper in Italian presented to two members of the faculty and defended orally in class.
Requisites: Requires a prerequisite course of ITAL 3015 (minimum grade C-).
Additional Information: Departmental Category: Italian

French - Bachelor of Arts (BA)

Beyond providing mastery of the language skills (listening, speaking, reading, writing), the main objective of the French program is to develop students’ awareness of the French and Francophone cultural tradition. Our coursework exposes majors and minors to the wealth of cultural experiences in the French-speaking world and gives students a solid knowledge of French and Francophone thought, literature, arts and visual media.

Survey courses and upper-division seminars offer a range of exposure to the French cultural past and the vast ethnic and national diversity of the French-speaking present. The major explores distinctly French contributions to world culture and allows students to familiarize themselves with the history, forms, and conventions of a rich literary and artistic tradition. In addition to covering a broad range of historical periods, trans-cultural approaches, and topics ranging from Enlightenment political thought to animal studies and France’s relations with the Muslim world, the French curriculum brings far-flung periods and places to life. It links analysis of contemporary cultural phenomena with more distant historical epochs and texts. Medieval epic is studied in tandem with “Game of Thrones,” for example, or the history of Caribbean slavery with the figure of the Zombie. All courses for the major and minor are interdisciplinary and associate elements of other disciplines such as media studies, art history, science studies, philosophy, sociology, ecology or anthropology with the study of literary texts and other cultural artifacts.

Recent course topics include FREN 1200 Medieval Epic Through Game of Thrones; FREN 1900 Modern Paris in Literature, Photographs, Paintings and Movies; FREN 1880 The Zombie in History and Popular Culture; FREN 3800 France and the Muslim World; FREN 4110 French Special Topics: Tourists, Exiles and other Outsiders; FREN 4700 Encountering Animals: Contemporary Discourse and the Dialog of Species.

Students must complete the general requirements of the College of Arts and Sciences and the required courses listed under Requirements. Students wishing to pursue an Honors major should also consult the Honors requirements.

Requirements

Program Requirements
Students must complete the general requirements of the College of Arts and Sciences and the required courses listed below. Students wishing to pursue an Honors major should also consult the Honors requirements listed below.

Note: Students undertaking a major in French should expect to have regular conferences with a college advisor to ensure that they are making adequate progress and that requirements are being met in a timely way. The department will not certify majors for graduation when a failure to satisfy requirements is the fault of the student.

A minimum of 30 upper-division credit hours in French must be completed (see below for specific courses). FREN 2120 or its equivalent is the prerequisite for admission to courses required for the major.

Required Courses and Credits

One semester of independent study 1

Total Credit Hours 6

1 NOTE: The semester of independent study is taken concurrently with FREN 4980, and is devoted to one-on-one work on the senior honors thesis with a faculty advisor. See departmental brochure for details.

Graduating in Four Years
Consult the four-year guarantee requirements for information on eligibility. The concept of “adequate progress” as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress in French, students should meet the following requirements (one option):

First Year
- Fall semester: FREN 1010 Beginning French 1 (if needed; does not fulfill French major course requirements)
- Spring semester: FREN 1020 Beginning French 2 (if needed; does not fulfill French major course requirements)
Second Year
- Fall semester: FREN 2110 Second-Year French Grammar Review and Reading 1 (if needed; does not fulfill French major course requirements)
- Spring semester: FREN 2120 Second-Year French Grammar Review and Reading 2 (prerequisite for courses required for French major, but does not fulfill major course requirements); FREN 3010 French Phonetics and Pronunciation, 3 credits total required.

Third Year
- Fall semester: FREN 3050 French Composition 1; upper-division (3000 level and up) course, 6 credits total required
- Spring semester: FREN 3060 French Composition 2; FREN 3100 Introduction to Critical Reading and Writing in French Literature; FREN 3110 Main Currents of French Literature 1 or FREN 3120 Main Currents of French Literature 2; upper-division (3000 level and up) FREN course, 9 credits total required.

Fourth Year
- Fall semester: FREN 4990 Senior Seminar; upper-division (3000 level and up) FREN course, 6 credits total required
- Spring semester: FREN course 4100 or higher (3 credits required); upper-division (3000 level and up) FREN course, 6 credits total required.

Note: Completion of French requirements includes the successful written and oral presentation of a senior essay (FREN 4990) by the end of the fourth (senior) year.

Recommended Four-Year Plan of Study
Through the required coursework for the major, students will complete all 12 credits of the Arts & Humanities area of the Gen Ed Distribution Requirement.

Learning Outcomes
The undergraduate degree in French emphasizes knowledge and awareness of:

- Critical thinking
- Significant works of textual and visual culture in the French-speaking world
- A range of French Literature, its historical and cultural context seen from an interdisciplinary perspective (in relation with art, philosophy, religion) as well as methods of literary and other media analysis
- Contemporary French culture, politics and current events

In addition, students completing their degrees in French are expected to acquire the ability and skills to:

- Speak and understand modern French both in daily life and academic settings
- Read and write modern standard French for all academic and professional settings
- Follow with reasonable comprehension French broadcasts and films
- Analyze and interpret texts or visual representations
- Become familiar with a range of cultural expressions and literary genres
- Become familiar with critical methodologies

Bachelor's–Accelerated Master's Degree Program(s)
The Bachelor's–Accelerated Master's (BAM) degree program options offer currently enrolled CU Boulder undergraduate students the opportunity to receive a bachelor's and master's degree in a shorter period of time. Students receive the bachelor's degree first, but begin taking graduate coursework as undergraduates (typically in their senior year). Because some courses are allowed to double count for both the bachelor's and the master's degrees, students receive a master's degree in less time and at a lower cost than if they were to enroll in a stand-alone master's degree program after completion of their baccalaureate degree. In addition, staying at CU Boulder to pursue a bachelor's–accelerated master's program enables students to continue working with their established faculty mentors.

BA and MA in French
The Bachelor's Accelerated Masters (BAM) degree program in French is normally a five-year program designed for currently enrolled CU Boulder students.

The BAM program is administered jointly by the Graduate School and the French and Italian Department. The department assumes primary administrative authority and responsibility reflecting the full authority and standards of both the undergraduate and graduate degrees.

Admissions Requirements
Initial admission to the program typically occurs during the junior year. Minimum standards for admission require a cum GPA of 3.0 and completion of all MAPS deficiencies. Any student inquiring should consult a college advisor and the Associate Chair for Graduate Studies in the French and Italian Department for details. Students admitted to the BAM program will be admitted at undergraduate status.

In order to gain admission to the BAM program named above, a student must meet the following criteria:

- Have a cumulative GPA of 3.0 or higher
- Must be a full-time CU Boulder student
- Transfer students must complete at least 24 credit hours as a degree seeking student before applying

Program Requirements
Students may take up to and including 12 hours while in the undergraduate program which can later be used toward the master's degree. However, only 6 credits may be double counted toward the bachelor's degree and the master's degree. Students must apply to graduate with the bachelor's degree, and apply to continue with the master's degree, early in the semester in which the undergraduate requirements will be completed.

If you are interested in the BAM degree program, please contact the graduate program assistant for more information.

Italian - Bachelor of Arts (BA)
The Italian major prepares students to live and work in a global society by developing multilingualism and intercultural competency. Students will master Italian language skills (listening, speaking, reading, writing) needed for all purposes of daily life and gain diverse perspectives on Italian culture though courses focusing on literature, history, visual arts, film, media and business.

The program promotes an understanding of the role of the Italian literary and cultural tradition within today's global society. As the birthplace of Dante, Boccaccio, Michelangelo and Da Vinci, Italy was the cradle of the Renaissance. Italy continues to project a powerful, formative influence into our own day through the work of contemporary writers like, Elena Ferrante, Dacia Maraini, Primo Levi, Italo Calvino and Umberto Eco; composers like Gioachino Rossini, Giacomo Puccini and Giuseppe Verdi; philosophers and critics like Benedetto Croce, Antonio Gramsci, Fanco Cassano and Giorgio Agamben; educators like Maria Montessori; and filmmakers like Federico Fellini, Pier Paolo Pasolini and Roberto Benigni. Thus, in addition to supplying the necessary background for advanced professional study and specialization, the Italian major introduces students to a rich literary, artistic and intellectual history at the roots of the modern world.

For courses in other departments with an Italian emphasis (including classics, humanities, art and art history, history and honors) see those sections.

Requirements
Program Requirements
Students must complete the general requirements of the College of Arts and Sciences and the required courses listed below. Thirty-six credit hours beyond the first year with a 2.00 (C) grade point average or better are required, as listed below.

Learning Outcomes
The undergraduate degree in Italian emphasizes knowledge and awareness of:

- A range of critical approaches and methodologies for the analysis of Italian culture.
- The fundamental outlines of Italian history and culture from the Middle Ages to the present.
- Contemporary issues in Italian culture, as debated in media, literary and visual texts.
- Significant works in the Italian literary, cinematic and artistic traditions.
- The grammatical structure of modern standard Italian.

In addition, students completing the degree in Italian are expected to acquire the ability and skills to:

- Speak and understand modern, spoken, standard Italian sufficient for all purposes of daily life and in academic and professional settings.
- Read and write modern Italian in everyday, academic and professional settings.
- Follow with reasonable comprehension authentic Italian film and other media (such as television, podcasts, print and music).

French - Minor

We offer undergraduate courses in French language, literature and culture.

The language courses make use of CU Boulder’s ALTEC language lab (http://www.colorado.edu/frenchitalian/altec-facilities/) to provide maximum flexibility in language learning, with rich audio-visual content. Courses cover spoken and written language, literature, composition, conversation and Business French.

Culture courses focus on current events, differences between the U.S. and France, professional development, and the culture of the larger Francophone world.

Literature courses cover topics ranging from the Middle Ages to the 21st-century novel. We also offer study abroad programs (http://www.colorado.edu/frenchitalian/study-abroad/) in a number of French-speaking locations.

Declaration of a minor is open to any student enrolled at CU Boulder, regardless of college or school. To declare a French minor, visit the Academic Advising Center (https://www.colorado.edu/artssciences-advising/).

Requirements

Prerequisites

Prerequisite for admission to courses for the minor is FREN 2120 or equivalent.

Program Requirements

A total of 18 upper-division credit hours is required for the minor. All courses counted for the minor must be numbered 3000 or above. Courses taught by the department in English, do not, in general, apply to the minor, with the exception of FREN 3200 and FREN 3300.

All courses for minor credit hours must be taken for a grade. The only exception to this rule is course credit, which although taken for a grade, is recorded pass/fail on the student’s transcript (this includes transfer credit from accredited universities and courses taken on CU study abroad programs).
Students must earn a minimum grade of C- in all courses counted for the minor. The GPA for all coursework taken in the minor department must be equal to 2.00 (C) or higher.

A maximum of 6 credit hours upper-division credit may be transferred from other universities or non-CU Boulder study abroad programs. Courses taken on CU Boulder study abroad programs are considered to be CU credit hours and are not subject to this limitation.

Italian - Minor

A minor program is offered in Italian. Declaration of a minor is open to any student enrolled at CU Boulder, regardless of college or school.

To declare an Italian minor, go to the Academic Advising Center (https://www.colorado.edu/artssciences-advising/) website and make an appointment with the Italian advisor.

Requirements

Program Requirements

Students must consult with the Italian advisor during each registration period and before a study abroad program. All courses must carry an ITAL subject code, students may apply a maximum of 3 credit hours from Italian courses taught in English, and students may apply credit hours to the Italian minor earned through a CU Boulder Study Abroad program in Italy. Specific course equivalencies must be determined by the Italian advisor.

Students may apply a maximum of 9 transfer credit hours to the Italian minor, and a maximum of 6 credit hours at the upper-division level. Specific course equivalencies must be determined by an Italian faculty member.

Students must maintain an overall and Italian grade point average of 2.00 (C). They must earn a grade of C- or higher in ALL courses required for the Italian minor and may not take minor requirement courses pass/fail.

Geography

The Geography Department offers theoretical and applied work in human geography, environment and society geography, physical geography and geographic information science. Each subfield covers a broad range of topics. Human geography includes political, cultural, development, feminist, population and urban geography. Environment and society geography includes political ecology, natural hazards and conservation practice. Physical geography includes climatology, geomorphology, hydrology and biogeography. Geographic information science includes spatial analysis using GIS, remote sensing and cartography. The department also offers regionally focused courses on mountain geography and geographies of China, Latin America, Africa and South Asia. To complement its curriculum, the department also offers internship opportunities for geography majors.

The undergraduate degree in geography emphasizes knowledge and awareness of:

- the unique contributions of the discipline to understanding the spatial components of problems and the diverse factors relating to human interaction with the environment;
- the spatial distributions of physical and human characteristics on the Earth surface, the general patterns these form and the processes that have created and are changing these patterns;
- major themes of geographical analysis, including human and physical characteristics of place; human-environmental relations; movement of people, ideas and products; and regionalization; and
- the general geographical principles of human-environment interaction, global change and human spatial organization.

In addition, students completing the degree in geography are expected to acquire proficiency in:

- one or more of the specific geographic skill areas of cartography, remote sensing and geographic information systems;
- writing, quantitative methods, computer literacy, and library and field methods of data collection; and
- identifying the geographic dimensions of a problem and analyzing, synthesizing and evaluating relevant data and applying geographic principles offering a geographic perspective on that problem.

The course code for this program is GEOG.

Minimum Academic Preparation Standards (MAPS)

To fulfill a MAPS deficiency in geography, students may take one of the following courses: GEOG 1962, GEOG 1972, GEOG 1982, GEOG 1992, GEOG 2092 or pass the Geography Exemption Exam. Declared majors or minors with junior standing (57 credit hours minimum) or transfers with
junior standing may take GEOG 3682, GEOG 3742 or GEOG 4712 to fulfill the MAPS deficiency.

For more information on the exemption exam, contact Testing Services at 303-492-5854 or visit the Testing Services (https://www.colorado.edu/career/testing-services/) webpage.

**Geography Honors Program**

Students interested in earning honors with their work in geography should contact the departmental honors advisor during their junior year.

**Geography Internship Program**

To complement its curriculum, the department offers geography majors internship opportunities that can be used to earn credit towards their degree. Students interested in pursuing an internship should contact the Department for information on eligibility and terms.

**Residential Academic Program**

Students may visit the Geography Department Office to learn more about the Baker Residential Academic Program (https://www.colorado.edu/bakerrap/).

**Bachelor's Degree**

- Geography - Bachelor of Arts (BA) (p. 303)

**Minor**

- Geography - Minor (p. 306)

**Certificates**

- Arctic Studies - Certificate (catalog.colorado.edu/undergraduate/colleges-schools/arts-sciences/programs-study/international-affairs/arctic-studies-certificate/)
- GIS and Computational Science - Certificate (p. 309)

**Faculty**

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Associate Professor; PhD, Clark University
Courses

GEOG 1001 (4) Environmental Systems: Climate and Vegetation
Lect. and lab. Introduces the atmospheric environment of the Earth: elements and controls of climate and their implications for hydrology, vegetation, and soils. Emphasizes distribution of physical features across the Earth’s surface and interactions between humans and their environment, especially those leading to global change on the decade to century time scale.

Additional Information: GT Pathways: GT-SC1 - Natural Physical Sci: Lec Crse w/ Req Lab
Arts Sci Core Curr: Natural Science Sequence
Arts Sci Core Curr: Natural Science Lab
Arts Sci Gen Ed: Distribution-Natural Sciences
Arts Sci Gen Ed: Distribution-Natural Sci Lab
Departmental Category: Physical Geography
MAPS Course: Natural Science Lab or Lab/Lec
MAPS Course: Natural Science

GEOG 1011 (4) Environmental Systems: Landscapes and Water
Lect. and lab. Introduces landscapes and flowing water, emphasizing the formation and geographic distribution of mountains, volcanoes, valleys, and deserts, and their shaping by rivers and glaciers. Includes field trips.

Additional Information: GT Pathways: GT-SC1 - Natural Physical Sci: Lec Crse w/ Req Lab
Arts Sci Core Curr: Natural Science Sequence
Arts Sci Core Curr: Natural Science Lab
Arts Sci Gen Ed: Distribution-Natural Sciences
Arts Sci Gen Ed: Distribution-Natural Sci Lab
Departmental Category: Physical Geography
MAPS Course: Natural Science Lab or Lab/Lec
MAPS Course: Natural Science

GEOG 1962 (3) Geographies of Global Change
Familiarizes students with a geographic understanding of conflicts around the globe and of economic and cultural globalization. Analyzes the relationship between global forces, regions and local interests in contemporary territorial and geopolitical tensions and conflicts, emphasizing issues such as nationalism, migration, labor and natural resources. Formerly GEOG 2002.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Asia Content
MAPS Course: Geography

GEOG 1972 (3) Environment-Society Geography
Examines interactions between humans and the environment across the globe from a geographical perspective. Introduces different analytical perspectives through which to understand nature-society relationships, with a focus on social, cultural and political-economic dimensions, and examples from different natural resource sectors (e.g., water, agriculture) and countries. Formerly GEOG 2412.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Arts Sci Gen Ed: Diversity-Global Perspective
Departmental Category: Environment-Society Geography
MAPS Course: Geography

GEOG 1982 (3) World Regional Geography
Introduces a comparative framework for recognizing and understanding world regions. Units combine historical understanding with discussion of problems and challenges that face them, including discussion of economic growth, inequality, political conflict, colonialism, race and climate change.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Asia Content
MAPS Course: Geography

GEOG 1992 (3) Human Geographies
Examines social, political, economic, and cultural processes creating the geographical worlds in which we live, and how these spatial relationships shape our everyday lives. Studies urban growth, geopolitics, agricultural development and change, economic growth and decline, population dynamics, and migration exploring both how these processes work at global scale as well as shape geographies of particular places.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
MAPS Course: Geography

GEOG 2053 (3) Mapping a Changing World
Examines roles that maps, geospatial data and technology play in understanding and explaining our world with a focus on geospatial literacy. Emphasizes critical thinking about the use of natural and social science data and discusses maps used for social and political purposes. In hands-on exercises students learn how to critically read and evaluate maps for expanding spatial awareness of nature and society.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Techniques (Skills)

GEOG 2092 (3) Advanced Introduction to Human Geography
Provides a rigorous introduction to key analytical concepts of human geography - place, space, scale, regions, nature, landscapes and territory - while giving an overview of topics addressed in subfields including economic geography, political geography, cultural geography and development geography. Specific topics may vary slightly from semester to semester but will likely include borders and migration, maps, tourism, climate change and the Anthropocene, geopolitical conflict, development, urbanization, nationalism, gender, race, inequality and identity.

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

GEOG 2271 (3) Introduction to the Arctic Environment
Rising temperatures and shrinking sea ice are only the most visible indications of a rapidly changing Arctic. This course addresses the climate of the Arctic and the changes being observed at a non-mathematical level. It is intended to provide students with a basic understanding of the Arctic physical environment.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Departmental Category: Physical Geography
GEOG 2852 (3) Contemporary Southeast Asia: Environmental Politics
Examines globally pressing questions of environmental sustainability, regional inequality and development in the dynamic and heterogeneous landscapes of contemporary Southeast Asia. Focuses on interactions between histories of uneven development and contemporary debates over energy and infrastructure, food security, governance and access to land, forest and water-based resources.
Equivalent - Duplicate Degree Credit Not Granted: ASIA 2852
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Environment-Society Geography

GEOG 3022 (3) Climate Politics and Policy
Engages students in exploring the realm of contemporary and historical climate policy at three major levels of government: international, national and local/regional. Through course lectures, discussions, readings and activities, students will become conversant with the actors, mechanisms and concerns involved in climate policy and politics and develop their own sense of how to judge the success of climate policies. Fulfills intermediate social science requirement in Environmental Studies Major.
Equivalent - Duplicate Degree Credit Not Granted: ENVS 3022
Recommended: Prerequisite ENVS 1000 or GEOG 1972.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Environment-Society Geography

GEOG 3023 (4) Statistics and Geographic Data
Introduces computational and statistical tools to solve problems in the geographic domain. Provides an understanding of introductory statistical concepts and applies them to real world problems through lab exercises. Emphasizes spatial data, which requires specialized descriptive and predictive analysis techniques. Demonstrates how to manipulate and visualize data, and make inference using state-of-the-art statistics software, applied to various social and earth science problems.
Equivalent - Duplicate Degree Credit Not Granted: GEOL 3023
Recommended: Prerequisite GEOG 1972.
Arts Sci Gen Ed: Distribution-Natural Sciences
Departmental Category: Techniques (Skills)

GEOG 3053 (4) Geographic Information Science: Mapping
Introduction to Geographic Information Systems (GIS) and the fundamentals of cartographic design. Emphasis on the science and art of map design in a GIS environment. Students will learn how to build a spatial database, implement best practice for processing various types of environmental and social data and apply basic visual analytics to understand spatial patterns.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors).
Recommended: Prerequisite basic familiarity with computers and an introductory course in statistics (may be taken concurrently).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Departmental Category: Techniques (Skills)

GEOG 3251 (3) Mountain Geography
Surveys mountain environments and their human use with illustrations from temperate and tropical mountain areas.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Physical Geography

GEOG 3301 (3) Analysis of Climate and Weather Observations
Discusses instruments, techniques and statistical methods used in atmospheric observations. Covers issues of data accuracy and analysis of weather maps. Provides application to temperature and precipitation records, weather forecasting and climate change trends. Uses computers to access data sets and process data.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 3300
Requisites: Requires prerequisite courses of APPM 1340 and 1345 or APPM 1350 or ECON 1088 or MATH 1081 or MATH 1300 or MATH 1310 and ATOC 1050 and ATOC 1060 or GEOG 3601 or ATOC 3600 or ENVS 3600 or GEOG 1011 (all minimum grade D-).
Recommended: Prerequisites ATOC 1050 or ATOC 1060 or GEOG 3601 or ENVS 3600 or GEOG 1001 and one semester calculus.
Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences
Departmental Category: Physical Geography

GEOG 3351 (3) Biogeography
Surveys and analyzes plant and animal distributions on a world scale from ecological and historical perspectives. Emphasizes human impact on species.
Requisites: Requires prerequisite course of GEOG 1001 (minimum grade D-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Departmental Category: Environment-Society Geography

GEOG 3402 (3) Natural Hazards
Explores the impacts of extreme geophysical events on human society. Emphasizes adaptations to extreme events and ways of reducing vulnerability and damage.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Environment-Society Geography

GEOG 3412 (3) Conservation Practice and Resource Management
Studies policy and management of natural resources. Emphasizes practical approaches to the conservation and management of soil, land, water and air resources.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Environment-Society Geography

GEOG 3422 (3) Political Ecology
Introduces students to political ecology, an influential approach to understanding society-environment relationships. Explores issues including different philosophies of nature and wilderness, the politics of conservation, causes of environmental degradation, environmental conflict and indigenous ecological knowledge.
Recommended: Prerequisite GEOG 1972.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Environment-Society Geography

GEOG 3511 (4) Introduction to Hydrology
Examines hydrologic processes in the surface environment, emphasizing the environment of the western United States. Emphasizes natural processes and their management to augment water resources.
Requisites: Requires a prerequisite course of GEOG 1011 or GEO 1010 (minimum grade D-).
Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences
Arts Sci Gen Ed: Distribution-Natural Science Lab
Departmental Category: Physical Geography
GEOG 3601 (3) Principles of Climate
Describes the basic components of the climate system: the atmosphere, ocean, cryosphere and lithosphere. Investigates the basic physical processes that determine climate and link the components of the climate system. Covers the hydrological cycle and its role in climate, climate stability and global change.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 3600 and ENVS 3600
Requisites: Restricted to Geography (GEOG) or Environmental Studies (ENVS) majors or Atmospheric Oceanic Sciences (ATOC) minors only.
Recommended: Prerequisites one semester of calculus and ATOC 1060 or ATOC 3300 or GEOG 3301 or GEOG 1001.
Departmental Category: Physical Geography

GEOG 3612 (3) Geography of American Cities
Introduces geography of American cities. Includes demographic and ideological contexts of urban development, emergence of the city system, location theory and rent models, and urban-economic problems.

GEOG 3622 (3) Cities of the Global South
Examines the geographies, processes, structural forces and everyday forms of urban life that are at the core of rapid urban transformation in the global South. Through using interdisciplinary scholarship, empirical case studies and key theoretical work, the course covers themes such as migration and urbanization, informality and governance, infrastructures of everyday life and urban-environmental politics.
Equivalent - Duplicate Degree Credit Not Granted: IAFS 3670

GEOG 3662 (3) Economic Geography
Presents theories of the spatial organization of economic production, consumption and exchange systems. Geographical dynamics of industrialization, urbanization and economic growth. Examination of property, labor and social conflict, with a focus on political economy.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

GEOG 3672 (3) Gender and the Global Economy
Examines the role of gender in global economy. Explores the impacts of colonialism and modern global economy on gender relations, with particular emphasis on Third World societies. Also focuses on related issues of population politics, environmental crisis, women's sexual exploitation, and women's social movements worldwide.
Equivalent - Duplicate Degree Credit Not Granted: WGST 3672
Recommended: Prerequisite GEOG 1962 or GEOG 1972 or GEOG 1982 or GEOG 1992 or GEOG 2092 or WGST 2000 or WGST 2600.
Departmental Category: Human Geography

GEOG 3682 (3) Geography of International Development
Compares and contrasts global characteristics and processes of development, emphasizing the developing countries of the world. Integrates theories of development, specific development topics, and case studies to explore the problems of development.
Recommended: Prerequisite GEOG 1962 or GEOG 1972 or GEOG 1982 or GEOG 1992 or GEOG 2092.
Departmental Category: Human Geography
Departmental Category: Asia Content

GEOG 3692 (4) Introduction to Global Public Health
Introduces global health by putting its contemporary definition, determinants, development and direction as a field into a broad global context. The course is divided into four core topics: 1) the burden and distribution of disease and mortality; 2) the determinants of global health disparities; 3) the development of global health policies; and 4) the outcomes of global health interventions. Required for the Public Health Certificate.

GEOG 3742 (3) Place, Power, and Contemporary Culture
Examines the relationship between places, power, and the dynamics of culture. Explores how the globalization of economics, politics, and culture shapes cultural change. Looks at how place-based cultural politics both assist and resist processes of globalization.
Recommended: Prerequisite GEOG 1962 or GEOG 1982 or GEOG 1992 or GEOG 2092.
Departmental Category: Human Geography

GEOG 3812 (3) Mexico, Central America, and the Caribbean
Introduces the geography of Latin America, focusing on the lands and peoples of Mexico, Central America, and the Caribbean. Examines regional and national culture, history, environment, and population, as well as ongoing environmental and socioeconomic changes.
Recommended: Prerequisite GEOG 1962 or GEOG 1972 or GEOG 1982 or GEOG 1992 or GEOG 2092.
Additional Information: Arts Sci Gen Ed: Diversity-Global Perspective

GEOG 3822 (3) Geography of China
Surveys the world's most populous country, examining physical and historical geography, urbanization and regional development, agriculture, population, energy, and the environment. Seeks to situate China's development in a broader Asian and global context.
Recommended: Prerequisite GEOG 1962 or GEOG 1972 or GEOG 1982 or GEOG 1992 or GEOG 2092.

GEOG 3832 (3) Geographies of South Asia
Examine the geopolitics of South Asia through four interrelated themes: Territory, Trade, Transportation, and Tributaries. Learn about territory including physical features, political conflicts and changing borders. Explore trade, transportation routes, and tributaries to understand economic, social/cultural and political geographies. Investigate culture and society through analyses of gender roles/relations.
Recommended: Prerequisites GEOG 1962 or GEOG 1972 or GEOG 1982 or GEOG 1992 or GEOG 2092.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Human Geography
Departmental Category: Asia Content
GEOG 3840 (1-6) Undergraduate Independent Study
Provides an independent study opportunity, by special arrangement with faculty, for students presenting strong geography preparation. Instructor consent required.
Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Geography (GEOG) majors only.
GEOG 3842 (3) Human Geography of Czechia: Political, Economic and Social Transitions
Excursions in Prague will begin with an understanding of Czech history through various imprints on the landscape, such as city planning, design, architecture and culture. This will be followed by a discussion of Prague in the 20th century and the various political, economic and social transitions. These transitions will be explored through field based study in and outside of Prague.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

GEOG 3842 (3) Human Geography of Africa
Studies physical and cultural regions of Africa. Analyzes and compares the development of present nation-states and contemporary geographic issues including globalization, conservation, public health and food security.
Recommended: Prerequisite GEOG 1962 or GEOG 1972 or GEOG 1982 or GEOG 1992 or GEOG 2092.
Additional Information: Arts Sci Gen Ed: Diversity-Global Perspective
Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Human Geography

GEOG 3882 (3) Geography of the Former Soviet Union
Examines the contemporary social, political, population, cultural, ethnic and resource geography of the former Soviet Union. Relations between Russia and neighboring countries are also considered. Historical and physical geography are introduced as background to understanding post-Soviet developments and challenges.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

GEOG 3930 (3) Internship
Provides an academically supervised opportunity for advanced geography or environmental studies majors to work in public and private organizations on projects related to the student's career goals and to relate classroom theory to practice. Instructor consent required.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Geography (GEOG) or Environmental Studies (ENVS) majors only.

GEOG 4001 (1-4) Topics in Physical Geography
Examines various topics in physical geography that are not typically covered in the curriculum. Offered intermittently depending on student demand and availability of instructors.
Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

GEOG 4002 (1-4) Topics in Human and Environment/Society Geography
Examines various topics in human and environment / society geography that are not typically covered in the curriculum. Offered intermittently depending on student demand and availability of instructors.
Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

GEOG 4003 (1-4) Topics in Geographic Skills
Examines various topics in geographical skills and techniques that are not typically covered in the curriculum. Offered intermittently depending on student demand and availability of instructors.
Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

GEOG 4023 (4) Advanced Quantitative Methods for Spatial Data
Reviews fundamental statistical and quantitative modeling techniques and introduces more advanced statistical techniques widely used in geography today. Emphasizes geographic examples and spatial problems teaching hands-on skills in statistical programming. Topics covered include generalized linear models, spatial autocorrelation, spatial regression methods, and working with complex datasets.
Equivalent - Duplicate Degree Credit Not Granted: GEOG 5023
Requisites: Requires prerequisite course of GEOG 3023 (minimum grade D-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Departmental Category: Methods

GEOG 4043 (4) Advanced Geovisualization and Web Mapping
Advanced technical course in web-based cartography and geovisualization stressing the important role digital cartography plays in cyberspace and society. Focuses on principles of effective cartographic design in multimedia and hypertext environments. Labs are organized around hands-on active learning projects demonstrating skills in geovisualization and cartographic practice.
Equivalent - Duplicate Degree Credit Not Granted: GEOG 5043
Requisites: Requires prerequisite course of GEOG 3053 (minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Methods

GEOG 4093 (4) Remote Sensing of the Environment
Covers acquisition and interpretation of environmental data by remote sensing. Discusses theory and sensors as well as manual and computerized interpretation methods. Stresses infrared and microwave portions of the spectrum.
Equivalent - Duplicate Degree Credit Not Granted: GEOG 5093 and GEOE 4093 and GEOE 5093
Requisites: Requires prerequisite course of APPM 1340 1345 or APPM 1350 or 4570 or ECON 1088 or 3818 or MATH 1081 or 1300 or 1310 or 2510 or ANTH 4000 or BCOR 1020 or GEOG 3023 or GEOE 3023 or PSCI 2075 or PSYC 2111 or SOCY 2061 or 4061 (minimum grade D-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sci Lab
Arts Sci Gen Ed: Distribution-Natural Sciences
Departmental Category: Methods

GEOG 4100 (1-3) Special Topics in Geography
Various topics not normally covered in the curriculum; offered intermittently depending on student demand and availability of instructors. See also GEOG 4110 and GEOG 4120.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
GEOG 4103 (4) Geographic Information Science: Spatial Analytics
Explores advanced topics in geospatial databases, spatial analytics and geoprocessing in a Geographic Information System (GIS). Emphasizes how geographic concepts are linked to methodological frameworks for recording, transforming, storing/retrieving, analyzing, and processing geographic data as well as various forms of uncertainty. Exercises demonstrate the application of GIS-based methods to real world scenarios in interdisciplinary settings.
Equivalent - Duplicate Degree Credit Not Granted: GEOG 5103
Requisites: Requires prerequisite course of GEOG 3053 any one of the following (ANTH 4000 or APPM 4570 or BCR 1020 or ECON 3818 or GEOG 3023 or GEOL 3023 or MATH 2510 or PSY 2111 or PSY 2111 or SOC 2061 or 4061) (all min grade C-). Restricted to students with 57-180 credits (JR/SR).

GEOG 4110 (1-4) Special Topics in Geography
Various topics not normally covered in the curriculum; offered intermittently depending on student demand and availability of instructors. See also GEOG 4100 and GEOG 4120.
Repeatable: Repeatable for up to 8.00 total credit hours.

GEOG 4120 (1-3) Special Topics in Geography
Various topics not normally covered in the curriculum; offered intermittently depending on student demand and availability of instructors. See also GEOG 4100 and GEOG 4110.
Repeatable: Repeatable for up to 6.00 total credit hours.

GEOG 4173 (3) Research Seminar
Examines the nature of research and develops pregraduate skills for geographic research, emphasizing problem definition, methods, sources, data interpretation, and writing. Recommended for students pursuing honors.
Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Geography (GEOG) or Environmental Studies (ENVS) majors only.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences Departmental Category: Methods

GEOG 4201 (3) Biometeorology
Interdisciplinary science, studying the interactions between atmospheric processes and living organisms (plants, animals, and humans). Discusses how organisms adapt to a changing environment. Uses a practical, problem-solving approach to explore these interactions.
Equivalent - Duplicate Degree Credit Not Granted: ENVS 4201
Requisites: Requires prerequisite course of GEOG 1001 any of APPM 1340 1345 or APPM 1350 or 4570 or ECON 1088 or 3818 or MATH 1081 or 1300 or 1310 or 2510 or ANTH 4000 or BCR 1020 or GEOG 3023 or GEOL 3023 or PSCI 2075 or PSYC 2111 or SOC 2061 or 4061 (min grade D-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences Departmental Category: Physical Geography

GEOG 4203 (4) Geographic Information Science: Spatial Modeling
Focuses on the use and development of advanced models for human and environmental applications in a geospatial environment integrating raster and vector data models. Covers terrain and hydrologic modeling, geostatistical modeling, dasymetric modeling, as well as multi-criteria modeling. Group projects critically design, implement and test spatial models to develop independent skill sets in a chosen problem setting.
Equivalent - Duplicate Degree Credit Not Granted: GEOG 5203
Requisites: Requires prerequisite course of GEOG 4103 (minimum grade C).
Recommended: Requisite working knowledge of GIS software.

GEOG 4241 (4) Principles of Geomorphology
Studies weathering, mass-wasting, fluvial, wind, and marine processes and the resulting landforms.
Equivalent - Duplicate Degree Credit Not Granted: GEOL 4241
Requisites: Requires prerequisite course of GEOG 1011 or GEOL 1010 or 1020 or 1030 or 1040 or 1060 and APPM 1340 and 1345 or APPM 1350 or ECON 1088 or MATH 1081 or 1300 or 1310 (min grade D-). Restricted to students with 57-180 credits (JR/SR) EVOC, GEOG, GEOL, ENVS majors only

GEOG 4251 (4) Fluvial Geomorphology
Emphasizes landscapes formed by running water. Includes basic fluid mechanics, sediment transport, hillslope and channel erosion, and sediment yield.
Equivalent - Duplicate Degree Credit Not Granted: GEOG 5251
Requisites: Requires prerequisite courses of GEOG 1011 and GEOG 3511 (minimum grade D-).
Recommended: Prerequisite GEOG 3023.

GEOG 4261 (3) Glaciers and Permafrost
Surveys the major terrestrial components of the cryosphere, including permafrost, glaciers and ice sheets. Emphasizes physical processes involving ice, including thermal behavior, ice deformation and mass balance, but also considers biogeochemical processes and landforms associated with ice. The climate context, including human interactions and recent climate history, will be considered. Taught in a combination lecture-seminar format.
Requisites: Requires prerequisite course of GEOG 1011 or GEOL 1010 (minimum grade D-).
Recommended: Prerequisite GEOG 4241.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences Departmental Category: Physical Geography
GEOG 4271 (3) The Arctic Climate System
Understanding the climate of the Arctic requires a synthetic, system oriented approach. The course focuses on the intimate linkages between the atmosphere, ocean and land that give the Arctic region its unique character, link the Arctic to the larger global climate system, and promote understanding the rapid changes occurring in the Arctic.
Equivalent - Duplicate Degree Credit Not Granted: GEOG 5271
Requisites: Requires prerequisite course of GEOG 1001 or ATOC 1050 or ATOC 1060 (minimum grade D-).
Recommended: Prerequisites GEOG 3511 or GEOG 3601 or ATOC 3600 or ENVS 3600 and statistics.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Departmental Category: Physical Geography

GEOG 4292 (3) Migration, Immigrant Adaptation, and Development
Examines historical and current patterns of migration with an emphasis in international movement. Looks at leading migration theories related to both origin- and destination-based explanations while critically looking at the role of development as a potential cause and consequence of population movement. Finally, covers some aspects of immigrants' social and economic adaptation to their host society.
Equivalent - Duplicate Degree Credit Not Granted: GEOG 5292
Recommended: Prerequisite GEOG 1962 or GEOG 1972 or GEOG 1982 or GEOG 1992 or GEOG 2092.
Additional Information: Arts Sci Gen Ed: Diversity-Global Perspective
Arts Sci Gen Ed: Distribution-Social Sciences
Arts Sci Gen Ed: Diversity-U.S. Perspective
Departmental Category: Human Geography

GEOG 4303 (4) Geographic Information Science: Spatial Programming
Focuses on the extension of geographic information systems (GIS) through programming as well as on the development of algorithms for spatial analysis and information extraction in vector and raster data using open source tools. Covers concepts, principles and techniques of programming and solving spatial problems in natural and social science settings. Group projects will foster skillsets in implementing solutions to complex spatial problems.
Equivalent - Duplicate Degree Credit Not Granted: GEOG 5303
Requisites: Requires prerequisite course of GEOG 4103 (minimum grade C).
Recommended: Prerequisite GEOG 4203.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sci Lab
Arts Sci Gen Ed: Distribution-Natural Sciences
Departmental Category: GIScience

GEOG 4311 (3) Watershed Biogeochemistry
Emphasizes terrestrial-aquatic linkages in headwater catchments, focusing on hydrologic pathways, isotopic and geochemical tracers, nutrient cycling, water quality, experimental manipulations, and modeling.
Requisites: Requires prerequisite courses of GEOG 1011 and GEOG 3511 (minimum grade D-).
Recommended: Requisite parametric statistics.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Departmental Category: Physical Geography

GEOG 4321 (3-4) Snow Hydrology
Offers a multidisciplinary and quantitative analysis of physico-chemical processes that operate in seasonally snow-covered areas, from the micro- to global-scale: snow accumulation, metamorphism, ablation, chemical properties, biological aspects, electromagnetic properties, remote sensing, GIS and quantitative methods.
Equivalent - Duplicate Degree Credit Not Granted: GEOG 5321
Requisites: Requires prerequisite course of APPM 1340 1345 or APPM 1350 or 4570 or ECON 1088 or 3818 or MATH 1081 or 1300 or 1310 or 2510 or ANTH 4000 or BCOR 1020 or GEOG 3023 or GEOL 3023 or PSCI 2075 or PSYC 2111 or SOCY 2061 or 4061 (minimum grade D-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Arts Sci Gen Ed: Distribution-Natural Sci Lab
Departmental Category: Physical Geography

GEOG 4331 (3-4) Mountain Climatology
Surveys and analyzes climatic characteristics of mountain environments worldwide.
Equivalent - Duplicate Degree Credit Not Granted: GEOG 5331
Requisites: Requires prerequisite course of GEOG 1001 or ATOC 1050 or ATOC 1060 (minimum grade D-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Departmental Category: Physical Geography

GEOG 4371 (3) Forest Geography. Principles and Dynamics
Surveys principles of forest geography and ecology. Includes both individual tree responses to environmental factors and species interactions within communities. Emphasizes forest dynamics and their relation to management problems.
Equivalent - Duplicate Degree Credit Not Granted: GEOG 5371
Requisites: Requires prerequisite course of GEOG 1001 (minimum grade D-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Departmental Category: Physical Geography

GEOG 4401 (3) Soils Geography
Discusses chemical and physical properties of soils, soil development, distributions and management relevant to understanding plant-soil relationships in natural and human-altered landscapes.
Equivalent - Duplicate Degree Credit Not Granted: GEOG 5401
Requisites: Requires prerequisite course of GEOG 1011 (minimum grade D-).
Recommended: Prerequisite inorganic chemistry.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Departmental Category: Physical Geography

GEOG 4403 (3) Geographic Information Science: Space Time Analytics
Focuses on understanding processes (human, natural, social or physical) through data driven analysis of patterns in spatio-temporal data. Covers a wide range of topics relevant to space time data, including pattern analysis, modeling and visualization as well as time geography and various contemporary issues in space time analytics. Utilizes a hands-on, flipped classroom approach with in-class development of technical skills.
Equivalent - Duplicate Degree Credit Not Granted: GEOG 5403
Requisites: Requires a prerequisite course of GEOG 3023 or GEOG 4023 (minimum grade C).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Departmental Category: GIScience
**GEOG 4430 (3) Seminar: Conservation Trends**
Provides environmental studies or geography majors with an undergraduate format for interdisciplinary discussion and research into current and future directions of conservation.

**Repeatability:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Environment-Society Geography

**GEOG 4463 (3) Earth Analytics Data Science Bootcamp**
Learn key skills to automate data processing and visualization workflows that support both repeatable analysis and collaborative project approaches using scientific programming, version control and project management tools. Covers working with heterogeneous, large spatio-temporal data derived from space, airborne and ground based sensors and other sources. Gain applied experience through group projects that address real world problems.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 5463

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences
Departmental Category: Methods

**GEOG 4501 (3) Water Resources and Water Management of Western United States**
Interprets and analyzes hydroclimatic data, surface and groundwater. Critically evaluates water use, emphasizing problems associated with geographic maldistribution, appropriations, irrigation, industry, pollution and regional development.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 5501

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Environment-Society Geography

**GEOG 4503 (3) Geographic Information Science: Project Management**
Managing a geospatial project encompasses problem identification, project design, analysis and supporting team dynamics. The class mixes lectures and class exercises with student-selected projects and works through all stages of a project from articulating an initial idea to project planning and scoping, building a work plan, timeline and budget, executing the work plan and evaluating a project's progress.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 5503

**Requisites:** Requires prerequisite course of GEOG 3053 or GEOG 4103 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences
Departmental Category: GIScience

**GEOG 4563 (3) Earth Analytics**
Introduce students to major unanswered questions in Earth science and to the analytical tools, including data management, analysis and visualization, necessary to explore 'big data' from a suite of sensors. Aligns with Earth Lab, a new initiative of the University’s Grand Challenge project planning and scoping, building a work plan, timeline and budget, executing the work plan and evaluating a project's progress.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 5563

**Requisites:** Requires prerequisite course of APPM 1340 and 1345 or one of following: GEOG 4023, 4103, 3023, APPM 1350, 4570, ECON 1088, 3818, MATH 1081, 1300, 1310, 2510, 3510, ANTH 4000, BCOR 1020, GEOL 3023, PSCI 2075, PSYC 2111, SOCY 2061 or EBIIO 4410 (minimum grade C).

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences
Departmental Category: Methods

**GEOG 4603 (3) GIS in the Social and Natural Sciences**
Introduces Geographic Information Systems and their underlying principles through interactive lectures and lab exercises. Students get basic skills for working in a GIS environment and learn how to handle and manage geospatial data, create maps and conduct geospatial analysis focusing on project tasks typically encountered in the social and natural sciences.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 5603

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences
Departmental Category: GIScience

**GEOG 4622 (3) City Life**
Analyzes social, behavioral, political and demographic factors that influence development and maintenance of communities in contemporary urban environments, with primary emphasis on U.S. cities.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 5622

**Recommended:** Prerequisite GEOG 1962 or GEOG 1972 or GEOG 1982 or GEOG 1992.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**GEOG 4632 (3) Development Geography**
Provides an overview of development policy and practice, surveying foundational works in Development Studies as well as critical interventions. Required for Graduate Certificate in Development Studies.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 5632

**Requisites:** Requires prerequisite course of GEOG 1962 or GEOG 1972 or GEOG 1982 or GEOG 1992 (minimum grade D-).

**Recommended:** Prerequisite GEOG 1962 or GEOG 1972 or GEOG 1982 or GEOG 1992 or GEOG 2092 (minimum grade D-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Human Geography

**GEOG 4712 (3) Political Geography**
Systematic study of relations between geography and politics, especially as background for better understanding of international affairs. Includes topics such as frontiers and boundaries, power analysis, geopolitics, international political economy, and strategic concepts.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 5712

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

**Recommended:** Prerequisite GEOG 1962 or GEOG 1972 or GEOG 1982 or GEOG 1992 or GEOG 2092 or IAAS 1000 or PSCI 2012 or PSCI 2223.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Human Geography

**GEOG 4722 (3) Field Methods in Human Geography**
Examines research methods associated with fieldwork in human geography. Prepares students for fieldwork by focusing on geographic and interdisciplinary field work techniques; interpretation of field data; discussion of the politics, ethics and gender, race, class and cross-cultural issues related to field work.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 5722

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Methods
GEOG 4732 (3) Population Geography
Emphasizes spatial aspects of population characteristics including fertility, mortality, migration, distribution and composition. Includes both theoretical and empirical considerations, in addition to field work and computer simulations.
Equivalent - Duplicate Degree Credit Not Granted: GEOG 5732
Recommended: Prerequisite GEOG 1962 or GEOG 1972 or GEOG 1982 or GEOG 1992 or GEOG 2092.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Human Geography
GEOG 4742 (3) Topics in Environment and Society
Studies peoples and their environments, including human modification of nature and cultural interpretation and construction of rural and urban landscapes.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Recommended: Prerequisite GEOG 1962 or GEOG 1972 or GEOG 1982 or GEOG 1992 or GEOG 2092.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Environment-Society Geography
GEOG 4762 (3) Geographies of Political Islam: Empire, Terror and Revolution
Explores the postcolonial landscape of political Islam through the lens of political and cultural geography. Develops a critical anti-essentialist framework for understanding the political crisis of the Muslim world in relation to broader questions of empire, nationalism, democracy, revolution, security, terrorism, globalization and modernity. Focuses on the post-1979 period, several key Muslim nation-states (Saudi-Arabia, Egypt, Iran, Turkey, Pakistan) and movements (Taliban, ISIS).
Recommended: Prerequisite GEOG 1982 or GEOG 1992 or GEOG 2092 or GEOG 3742.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Human Geography
GEOG 4772 (3) The Geography of Food and Agriculture
Course examines geographies of food systems through consideration of food as both a commodity and as culture. Topics covered include the political economy of global food systems, alternative food movements, and environmental factors, as well as interactions between food and gender, race, class, and culture. Previously offered as as a special topics course.
Recommended: Prerequisites GEOG 1972 or GEOG 1982 or GEOG 2092.
GEOG 4812 (3) Environment and Development in South America
Presents theoretical approaches to the links between environment and development in Latin America and focuses on analytical discussion of contemporary (and controversial) issues in sustainable development in South America. Examines social, ecological, economic, and political forces influencing the use of natural resources.
Recommended: Prerequisite GEOG 1962 or GEOG 1972 or GEOG 1982 or GEOG 1992 or GEOG 2092 or GEOG 3812 or GEOG 3422 or ANTH 3110 or PSCI 3032.
Additional Information: Arts Sci Gen Ed: Diversity-Global Perspective
Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Environment-Society Geography
GEOG 4822 (3) Environment and Development in China
Examines key environmental problems in relation to China's rapid modernization and development.
Recommended: Prerequisite GEOG 1962 or GEOG 1982 or GEOG 1992 or GEOG 2092 or HIST 1618.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Environment-Society Geography
Departmental Category: Asia Content
GEOG 4832 (3) Geography of Tibet
Rigorously examines contemporary Tibetan society, culture and nature from a geographical perspective. Uses readings on contemporary Tibet as an entry point into scholarly about nationalism, representation, diaspora, landscape and place, sustainable development, natural resource management, identity and environmentalism.
Equivalent - Duplicate Degree Credit Not Granted: GEOG 5832
Recommended: Prerequisite GEOG 3822 or other classes on China.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Asia Content
GEOG 4842 (3) Global Frontiers in Southeast Asia
Uses the theme of the global frontier to examine and compare three key moments in the modern history of Southeast Asia: the colonial encounter, the rise of the modern territorial state, and the age of contemporary globalization. Examines case studies from earlier eras to analyze emerging global frontiers at the junction of state territoriality and transnational economic expansion.
Equivalent - Duplicate Degree Credit Not Granted: GEOG 5842 and ASIA 4842
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Distribution-Social Sciences
GEOG 4852 (3) Health and Medical Geography
Examines geographical patterns of health and disease with an emphasis on global health issues. Focuses on three major approaches to medical geographic research: ecological approaches, which systematically analyze relationships between people and their environments; social approaches, including political economy and socio-behavioral approaches; and spatial approaches, which employ maps and spatial analysis to identify patterns of health and disease. Elective course for Public Health Certificate.
Equivalent - Duplicate Degree Credit Not Granted: GEOG 5852
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Recommended: Prerequisites GEOG 1001 or GEOG 1011 and GEOG 1962 or GEOG 1972 or GEOG 1992 or GEOG 2092.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Human Geography
GEOG 4892 (3) Geography of Western Europe
Provides a regional survey of cultural, political, economic, social, and physical geography of Western Europe, emphasizing the distinctive character and problems of each major area and the relationship of the region to the world.
Recommended: Prerequisite GEOG 1962 or GEOG 1972 or GEOG 1982 or GEOG 1992 or GEOG 2092.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Human Geography
GEOG 4990 (3) Senior Thesis
Offers thesis research under faculty supervision. Instructor consent required.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to students with 57-180 credits (Junior or Senior) Geography (GEOG) majors only.

Geography - Bachelor of Arts (BA)
The Department of Geography offers a bachelor of arts (BA) degree in geography. The geography BA emphasizes knowledge and awareness of:

- The unique contributions of the discipline to understanding the spatial components of problems and the diverse factors relating to human interaction with the environment.
- The spatial distributions of physical and human characteristics on the Earth surface, the general patterns these form and the processes that have created and are changing these patterns.
- The major themes of geographical analysis, including absolute and relative location; human and physical characteristics of place; human and environmental relations; movement of people, ideas and products; and regionalization.
- The general geographical principles of human-environment interaction, global change and human spatial organization.

Requirements
General Requirements
Students must complete the general requirements of the College of Arts and Sciences and the required courses below.

In addition to a standard degree in geography, the department offers transcripted concentrations in geographic information science, human geography, environment-society geography and physical geography. Coursework required for each concentration is listed on the Concentration Areas tab.

Students must complete at least 37 and no more than 45 credit hours in geography with grades of C- or better (23 credit hours must be upper-division). No pass/fail grades are allowed in the major.

Transfer students majoring in geography must complete at least 12 credit hours of upper-division geography courses at CU Boulder. No course may be used to fulfill more than one requirement for the major.

Required Courses and Credit Hours
Certain course selections are better preparation for certain concentrations.

Total Credit Hours: 37

1 Does not count as a methods course for students pursuing the GIS concentration.

Graduating in Four Years
This applies only to the general geography degree. Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of "adequate progress" as it is used here only refers to maintaining eligibility for the four-year guarantee: it is not a requirement for the major. To maintain adequate progress in geography, students should meet the following requirements:

- By the end of the third semester, complete GEOG 1001, GEOG 1011 and one of the following: GEOG 1962, GEOG 1972, GEOG 1982, GEOG 1992 or GEOG 2092.
- By the end of the sixth semester, complete an approved upper-division human geography course and 9 credit hours of upper-division geography courses.
- By the end of the sixth semester, complete GEOG 2053 or GEOG 3053 and GEOG 3023.
- By the eighth semester, complete the remaining upper-division credit hours.

Concentration Areas
General Geography Concentration
In addition to the courses required of all concentrations, complete the following GEOG coursework.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>At least one upper-division human or environment-society geography course (3XX2, 4XX2 or GEOG 4501).</td>

</tbody>
</table>

Take one upper-division elective in Geographic Information Science, Environment and Society, or Physical Geography. 3

Total Credit Hours: 15-17

1 This requirement may be met by completion of one or two semester-long, third-year, university-level grammar courses (depending on the language) with a grade of C- or better, while also satisfying language department requirements for advancement through the sequence.

2 Unless otherwise noted, the department-enforced prerequisite for all courses is GEOG 1962, GEOG 1982, GEOG 1992 or GEOG 2092.

Environment and Society Geography Concentration
In addition to the courses required of all concentrations, complete the following GEOG coursework.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>GEOG 3402</td>
<td>Natural Hazards</td>
<td>3</td>
</tr>
<tr>

<td></td>
<td>16-20</td>
</tr>
</tbody>
</table>

### Recommended Four-Year Plan of Study

Through the required coursework for the major, students will complete all 12 credit hours of the Natural Sciences area of the Gen Ed Distribution Requirement, including the lab component and at least 6 credits hours of the Social Sciences area of this requirement.

Depending on which track students follow and which elective courses they select within the track of the major, students can complete all of the Social Sciences area and 3 credits in the Arts and Humanities area of the Gen Ed Distribution Requirement and, potentially, the Global Perspective and United States Perspective component of the Gen Ed Diversity Requirement.

</table>

The minor program in geography is meant for students who would like to acquire basic knowledge of geography in addition to their major area of study. The department also offers undergraduate certificates in GIS (https://www.colorado.edu/geography/undergrad-program/undergraduate-certificates/#GIS-Certificate) and arctic studies. For more information, visit the Undergraduate Geography Major & Minor Degrees (https://www.colorado.edu/geography/undergrad-program/undergraduate-geography-major-minor-degrees/) webpage.

**Requirements**

**Program Requirements**

Declaration of a minor is open to any student enrolled at CU Boulder, regardless of college or school affiliation.

- A minimum of 18 credit hours must be taken in the Department of Geography, including a minimum of 9 upper-division credit hours.
- All coursework applied to the minor must be completed with a grade of C- or better. No pass/fail work may be applied. The GPA of all minor coursework must equal 2.00 (C) or greater.
- Student pursuing an individually structured major or who are pursuing a major in distributed studies, will not be eligible to earn a minor.
- Students will be allowed to apply no more than 9 credit hours (including 6 upper-division) of transfer work toward a minor.
- Coursework applied toward a minor may also be applied toward Gen Ed as well as the requirements for other majors.
Optional Concentrations
No specific concentration is required and is not noted on student transcripts. However, students who do wish to focus on one area of geography should see the suggested course lists below. The list of courses may change at the department’s discretion.

Physical Geography Focus
The following two courses are prerequisites to all upper-division courses listed further below.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>GEOG 1001</td>
<td>Environmental Systems: Climate and Vegetation</td>
<td>4</td>
</tr>
<tr>
<td>GEOG 1011</td>
<td>Environmental Systems: Landscapes and Water</td>
<td>4</td>
</tr>
</tbody>
</table>

An additional lower-division course is available.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>GEOG 2271</td>
<td>Introduction to the Arctic Environment</td>
<td>3</td>
</tr>
</tbody>
</table>

Among upper-division courses, the following sequences are suggested:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>GEOG 3301</td>
<td>Analysis of Climate and Weather Observations</td>
<td>3</td>
</tr>
<tr>
<td>GEOG 3601</td>
<td>Principles of Climate</td>
<td>3</td>
</tr>
<tr>
<td>GEOG 4331</td>
<td>Mountain Climatology</td>
<td>3-4</td>
</tr>
</tbody>
</table>

Biogeography

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>GEOG 3351</td>
<td>Biogeography</td>
<td>3</td>
</tr>
<tr>
<td>GEOG 3711</td>
<td>Forest Geography: Principles and Dynamics</td>
<td>3</td>
</tr>
<tr>
<td>GEOG 4401</td>
<td>Soils Geography</td>
<td>3</td>
</tr>
</tbody>
</table>

Hydrology and Geomorphology

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>GEOG 3511</td>
<td>Introduction to Hydrology</td>
<td>4</td>
</tr>
<tr>
<td>GEOG 4241</td>
<td>Principles of Geomorphology</td>
<td>4</td>
</tr>
<tr>
<td>GEOG 4261</td>
<td>Snow Hydrology</td>
<td>3-4</td>
</tr>
<tr>
<td>GEOG 4401</td>
<td>Soils Geography</td>
<td>3</td>
</tr>
</tbody>
</table>

In addition, you will find it important to complete one course in statistics at the time you commence upper-division work in physical geography. Students considering graduate school in physical geography are strongly encouraged to complete a year of coursework in general chemistry, physics, calculus and statistics.

Upper-Division Courses

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>GEOG 1962</td>
<td>Geographies of Global Change</td>
<td>3</td>

### Arctic Studies - Certificate

The Department of Geography (GEOG) offers an interdisciplinary undergraduate certificate in arctic studies, in collaboration with the Program in Nordic Studies (SCAN), the International Affairs Program (IAFS), the Department of Environmental Studies (ENVS), the Department of Anthropology (ANTH), the Department of Ethnic Studies (ETHN) and the research entities of the Cooperative Institute for Research in Environmental Sciences (CIRES), the National Snow and Ice Data Center (NSIDC) and the Institute of Arctic and Alpine Research (INSTAAR).

This certificate prepares students to address pressing environmental, political and cultural issues in the far north. A laboratory for studying the effects of global climate change, the arctic region spans three continents, with territories in Canada, Greenland (Denmark), Finland, Iceland, Norway, Sweden, Russia and the United States. Its population exhibits considerable ethnic, linguistic, and sociopolitical diversity, and contains numerous indigenous peoples. Issues as critical as nationalism, territorial rights and law, security, economic development and resource technology place the arctic at the center of global, regional and national
interests. Further, the region’s natural and social characteristics have inspired influential and enduring expressive culture—produced by locals and outsiders—from antiquity to the present.

These features make study of the arctic ideal for students pursuing careers in international politics and diplomacy, indigenous rights, environmental science and climate change, humanistic scholarship or creative work.

For more information, and to apply to the certificate in arctic studies, please contact Professor Mark Serreze (https://www.colorado.edu/geography/mark-serreze-0/) at serreze@nsidc.org

Requirements
The certificate is open to all CU undergraduates and requires the completion of six courses for a total of 18 credit hours.

Credit hours are distributed in three categories: (1) Certificate Core Courses, (2) Environment and Policy, and (3) Culture and Society.

Students must complete all three courses in the core category and at least one course in each of the other two categories. They will then take one elective course, and only one 1000-level course is allowed. Nine of the 18 credits must be upper-division.

Up to three credits of approved study abroad experience may be applied to either the Environment and Policy or Culture and Society categories.

Total Credit Hours 18

GIS and Computational Science - Certificate

The Department of Geography (GEOG) and the Department of Computer Science (CSCI) are offering a joint undergraduate certificate in GIS and computational science. The program draws upon faculty expertise in both departments, providing interdisciplinary training in spatial data analysis and computation, both of which characterize GIS in most career paths.

Geographic Information Scientists (GIScientists) have an ongoing concern with the collection, analysis and display of high precision spatial data. Computational geospatial skills are in high demand on campus and in local, regional and national job markets such as government employment, industry or consulting careers, and graduate school.

The certificate is available for all majors to apply to and may be of particular interest for students in other earth science disciplines and social science disciplines.

Non-matriculated students may enroll at CU through Continuing Education and once admitted, may apply for the certificate.

GIS and Computational Science Certificate

The Department of Geography (GEOG) and the Department of Computer Science (CSCI) are offering a joint undergraduate certificate in GIS and computational science. Requirements
Admissions
Visit the GIS and Computational Science Certificate (https://www.colorado.edu/geography/undergraduate-certificate-gis-and-computational-science/) website for application and admissions details.

Prerequisites
The prerequisite courses must be completed prior to application to the certificate program, and can be met by completing AP coursework in high school or by completing an equivalent course that transfers from another college.

<table>

</tr>
</tbody>
</table>

Required Courses and Credits

The certificate requires 18–20 hours of coursework, including required courses and electives (but excluding prerequisites). Courses required for this certificate are offered each semester, and geography electives are offered at least once per year. Required courses and electives must be taken at CU Boulder.

Students who fulfill the introductory statistics requirement through AP coursework in high school are eligible to take an additional elective. Students undertaking the certificate as well as a GEOG minor can count no more than 9 credits from the GIS GEOG courses listed below toward the GEOG minor requirements.

Students must earn a C or better in all coursework in the certificate, and may not take certificate courses pass/fail.

</table>
GEOG 4103 Geographic Information Science: Spatial Analytics 4
GEOG 3053 Geographic Information Science: Mapping 4
or GEOG 4603 GIS in the Social and Natural Sciences

Electives
Choose two or more of the following to fulfill 18-20 credit hours: 6-8
GEOG 4043 Advanced Geovisualization and Web Mapping
GEOG 4203 Geographic Information Science: Spatial Modeling
GEOG 4303 Geographic Information Science: Spatial Programming
GEOG 4403 Geographic Information Science: Space Time Analytics
GEOG 4503 Geographic Information Science: Project Management
Approved GEOG topics course
GEOL 3050 GIS for Geologists
One or two upper-division GIS-based courses in another A&S department (syllabi to be approved beforehand by the certificate committee) (2-4 credits apiece)

Total Credit Hours 18-20

1 Students cannot apply both GEOG 3053 and GEOG 4603 to the certificate.

Geological Sciences
The options available in the undergraduate program in geological sciences are geology and geophysics and lead to the BA degree. Both options provide a strong basis for understanding the functioning of the Earth system. Students who are uncertain as to which option best suits their needs should contact a departmental advisor or faculty member. In each option, the undergraduate program emphasizes coursework in theoretical, laboratory and field-oriented aspects of the geological sciences. The nearby Rocky Mountains provide a natural laboratory for many of these courses.

Students interested in the geological sciences may also wish to consider the Baker Residential Academic Program (see the Undergraduate Residential Programs (p. 940) section). Students who do not wish to pursue a career in the geosciences, or who would like to combine a basic knowledge of geologic sciences with that of some other field, should consider a minor in geological sciences. Students who intend to pursue graduate study in the geological sciences are encouraged to consider developing an honors thesis as part of their undergraduate studies.

The two options available in the undergraduate major offer different focus areas of instruction. Both options offer excellent preparation for students interested in pursuing professional careers, or graduate study, in the geological sciences.

Each option emphasizes knowledge in:

- The ways in which Earth responds to internal and external forces; the physical, chemical and biological evolution of Earth; and the nature of the materials of which the Earth is made.
- The role of physics, chemistry, mathematics and biology in understanding geological processes.

Course code for this program is GEOL.

Geology Honors Program
Opportunity is provided for qualified geology majors to participate in the geology honors program and graduate with honors (cum laude, magna cum laude or summa cum laude) in geology. Students interested in the honors program should contact the departmental honors advisor during their junior year.

Bachelor's Degree
- Geology - Bachelor of Arts (BA) (p. 317)

Minor
- Geology - Minor (p. 322)

Faculty
While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Courses

**GEOL 1010 (3) Exploring Earth**
Introductory geology for majors and non-majors. Studies Earth, its materials, its characteristics, its dynamic processes, and how it relates to people. Separate lab (GEOL 1030) is recommended. Degree credit not granted for both GEOL 1010 and GEOL 1012.

**Additional Information:** GT Pathways: GT-SC2 - Natural Science Lecture Crse w/o Req Lab

Arts Sci Core Curr: Natural Science Non-Sequence

Arts Sci Core Curr: Natural Science Sequence

Arts Sci Gen Ed: Distribution-Natural Sciences

MAPS Course: Natural Science

**GEOL 1012 (3) Exploring Earth for Scientists**
Studies Earth, its materials, its characteristics, its dynamic processes, and how it relates to people. This course is an introductory geology course suitable for geology and other STEM majors. Like GEOL 1010, but taught at a higher intellectual level with a greater amount of quantitative analysis. Separate lab (GEOL 1030) is recommended. Degree credit not granted for both GEOL 1010 and GEOL 1012.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**GEOL 1020 (3) Dodos, Dinos, and Deinococcus: The History of a Habitable Planet**
Examines how the solid, fluid, and living Earth interact, how changes in the oceans, atmosphere and life reflect that interaction over the immensity of geologic time, and how the rock record is analyzed to reconstruct the co-evolution of Earth and life.

**Additional Information:** GT Pathways: GT-SC2 - Natural Science Lecture Crse w/o Req Lab

Arts Sci Core Curr: Natural Science Sequence

Arts Sci Core Curr: Natural Science Non-Sequence

Arts Sci Gen Ed: Distribution-Natural Sciences

MAPS Course: Natural Science

**GEOL 1030 (1) Introduction to Geology Laboratory I**
Features field trips to local points of geologic interest. Studies rocks and topographic and geologic maps. Meets the MAPS requirement for natural science lab, if taken with GEOL 1010 or GEOL 1012.

**Recommended:** Requisite Concurrent registration in any 1000-level geology course is beneficial but not required.

**Additional Information:** GT Pathways: GT-SC1 - Natural Physical Science Lecture Crse w/ Req Lab

Arts Sci Core Curr: Natural Science Lab

Arts Sci Gen Ed: Distribution-Natural Science Lab

Arts Sci Gen Ed: Distribution-Natural Sciences

MAPS Course: Natural Science Lab or Lab/Lecture

**GEOL 1040 (3) Geology of Colorado**
Reviews the geologic evolution and history of Colorado. It first develops the basic concepts needed to interpret the geology and then systematically shows how the state evolved through geologic time. Designed for those who enjoy understanding the beauty and splendor of the state.

**Additional Information:** Arts Sci Core Curr: Natural Science Sequence

Arts Sci Gen Ed: Distribution-Natural Sciences

MAPS Course: Natural Science
GEOL 1060 (3) Global Change: An Earth Science Perspective
Focuses on evidence for planetary warming, climate change, glacier and ice-sheet melting and sea level rise both now and in the recent past. Attempts to develop understanding of the interactions within the coupled Earth system that regulate such changes. Utilizes examples from the geological and instrumental records, and evaluates the global warming forecast.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 1060
Additional Information: Arts Sci Core Curr: Natural Science Sequence
Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences
MAPS Course: Natural Science

GEOL 1150 (3) Water, Energy and Environment: An Introduction to Earth Resources
Explores how geological processes and human populations together affect the quantity, quality and availability of Earth resources. Includes examination of the water cycle and how humans use and modify water, fossil-fuel and mineral resources, and renewable energy options. Sustainable versus non-sustainable use and population growth is considered.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
MAPS Course: Natural Science

GEOL 1170 (3) Our Deadly Planet
This course investigates those events so dramatic and catastrophic that they have left evidence in the geologic record that suggest they significantly impacted life on the planet. These include, but are not limited to, violent volcanic eruptions, mega-earthquakes and associated tsunamis, landslides and sector collapse on volcanoes, megafloods, rapid climatic change, superstorms, and impacts from asteroids and comets. The intent is to use examples from recent events and processes to frame and interpret evidence for these types of events observed in the rock record.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
MAPS Course: Natural Science

GEOL 1180 (3) Our Microbial Planet
Examines how microorganisms shape the world around us, both throughout the Earth's history and today. Major topics include the origin and evolution of life, the interplay between microbes and the environment, roles of microbes in global change, and applications of microbiology in biotechnology and energy.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
MAPS Course: Natural Science

GEOL 2001 (4) Planet Earth
Explores the dynamics of planet Earth with particular emphasis on the factors that make the planet habitable. Includes examination of heat balance, hydrology, geomorphology, biogeochemistry and climate history through both lecture and lab-based activities. Required for the Geology major; introduces students to the major concepts in contemporary Earth system science.
Requisites: Requires prerequisite course of GEOL 1010 or GEOL 1012 or GEOL 1020 or GEOL 1040 or GEOL 1060 or GEOL 1150 or GEOL 1170 or GEOL 1180 or GEOL 2100 or ENVS 1000 (minimum grade D-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sci Lab
Arts Sci Gen Ed: Distribution-Natural Sciences

GEOL 2005 (4) Introduction to Earth Materials
Provides introduction to the classification, composition and properties of the materials that compose the Earth, how these materials are studied, and how they are used to interpret Earth history and processes. Required for the Geology major.
Requisites: Requires prerequisite courses of GEOL 1010 or GEOL 1012 or GEOL 1020 or GEOL 1040 or GEOL 1060 or GEOL 1150 or GEOL 1170 or GEOL 1180 or GEOL 2100 and CHEM 1113 and CHEM 1114 (all minimum grade D-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sci Lab
Arts Sci Gen Ed: Distribution-Natural Sciences

GEOL 2100 (3) Environmental Geology
Introduces the influences of geologic processes on human lives and the changes human actions cause in geologic systems. Uses examples and case studies from Colorado and the West.
Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences

GEOL 2700 (2) Introduction to Field Geology
Introduces basic field techniques necessary to collect geologic data and samples, and necessary to map geologic units.
Requisites: Requires prerequisite courses of GEOL 1030 and GEOL 2005 (all minimum grade D-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sci Lab
Arts Sci Gen Ed: Distribution-Natural Sciences

GEOL 3010 (3) Introduction to Mineralogy
Covers origin, occurrence, identification, classification, and uses of minerals with emphasis on applications of mineralogy to economic geology and petrology. Two lectures and one lab per week.
Requisites: Requires prerequisite courses of CHEM 1113 and CHEM 1114 and GEOL 2005 and MATH 1300 or APPM 1350 (all minimum grade D-).
Recommended: Prerequisite GEOL 2005.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Arts Sci Gen Ed: Distribution-Natural Sci Lab

GEOL 3020 (3) Petrology
Studies field relations, petrography, petrology, chemistry, and origins of igneous and metamorphic rocks by means of lectures, reading, and lab and field experience. Labs include instruction in the fundamentals of optical petrography and the study of rocks in thin section.
Requisites: Requires prerequisite course of GEOL 2005 or GEOL 3010 (minimum grade D-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Arts Sci Gen Ed: Distribution-Natural Sci Lab
GEOL 3023 (4) Statistics and Geographic Data
Introduces computational and statistical tools to solve problems in the geographic domain. Provides an understanding of introductory statistical concepts and applies them to real world problems through lab exercises. Emphasizes spatial data, which requires specialized descriptive and predictive analysis techniques. Demonstrates how to manipulate and visualize data, and make inference using state-of-the-art statistics software, applied to various social and earth science problems.
Equivalent - Duplicate Degree Credit Not Granted: GEGG 3023
Arts Sci Gen Ed: Distribution-Natural Sciences

GEOL 3030 (3) Introduction to Hydrogeology
Introduces groundwater flow concepts, hydrologic cycle, physical and chemical properties, flow net, hydraulic potential, geologic controls on heterogeneity and anisotropy, aquifers and aquitards in a geologic system, saturated and unsaturated flow, flow to a well, pumping tests, and role of groundwater in geologic processes.
Requisites: Requires prerequisite courses of GEOL 1150 or GEOL 1010 or GEOL 1012 and MATH 1300 or APPM 1350 (all minimum grade D-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

GEOL 3040 (3) Global Change: The Recent Geological Record
Geological records in lakes, oceans, deserts, and around glaciers indicate the significant changes in the global systems that have taken place over the last few hundred or thousand years. Explores the timing and nature of these changes. Department enforced prerequisites: any two-course sequence of natural science core courses.
Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences

GEOL 3050 (2) GIS for Geologists
Provides an introduction to Geographic Information Systems (GIS) techniques focused on geological applications. Covers GIS analyzing, mapping and GPS use. Basic computer skills are a plus before entering the class.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Arts Sci Gen Ed: Distribution-Natural-Sci Lab

GEOL 3070 (3) Introduction to Oceanography
Explores Earth's dynamic oceans. Discusses the disciplines of oceanography including marine geology, chemistry, biology and physical oceanography with emphasis on global change. Specific topics may include: tectonics, currents, biogeochemical cycles, ecology and global warming.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 3070
Recommended: Prerequisite any 1000-level ATOC or GEOL course or ATOC major.
Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences

GEOL 3090 (3) Developing Scientific Writing Skills
Focuses on the development of scientific writing skills. Enhances student ability to write professionally, revise text and review the work of others. Writing assignments integrate the subject matter of different topics in earth science. Department enforced prerequisites: a lower division writing course and two of the following: GEOL 2001 or GEOL 2005 or GEOL 2700 or GEOL 3010 or GEOL 3030 or GEOL 3120 or GEOL 3320 or GEOL 3430 or GEOL 3820.
Additional Information: Arts Sci Core Curr: Written Communication
Arts Sci Gen Ed: Written Communication-Upper

GEOL 3120 (4) Structural Geology
Introduces the basic principles and processes involved in deformation of natural rocks and minerals and the techniques used to analyze a variety of common geological structures (e.g., fractures, folds, fault zones).
Requisites: Requires prerequisite course of GEOL 2005 (minimum grade D-).
Recommended: Prerequisite GEOL 2001.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sci Lab
Arts Sci Gen Ed: Distribution-Natural Sciences

GEOL 3300 (3) Extraterrestrial Life
Discusses the scientific basis for the possible existence of extraterrestrial life. Includes origin and evolution of life on Earth; the possibility of life elsewhere in the solar system, including Mars; and the possibility of life on planets around other stars. Department enforced prerequisite: one-year sequence in a natural science.
Equivalent - Duplicate Degree Credit Not Granted: ASTR 3300
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

GEOL 3320 (3) Introduction to Geochemistry
Students build upon principles introduced in general chemistry in order to predict and interpret chemical dynamics in Natural environmental systems. We explores the formation and chemical differentiation of the early Earth, how chemical weathering and mineral dissolution and precipitation modifies the Earth's surface, and how redox biogeochemistry shapes aquatic environments.
Requisites: Requires prerequisite courses of CHEM 1113 and CHEM 1114 and MATH 1300 or APPM 1350 (all minimum grade D-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

GEOL 3330 (3) Principles of Geophysics
Provides an introduction to fundamental geophysics including seismology, geomagnetism, gravity, and electromagnetic methods with applications to plate tectonics and exploration of the subsurface.
Requisites: Requires prerequisite courses of MATH 1300 or APPM 1350 and PHYS 1110 or PHYS 1115 and GEOL 2001 (all minimum grade D).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

GEOL 3410 (3) Paleobiology
Surveys morphology, ecology and evolution of ancient animal and plant life and their interactions on Earth. Fossils used to solve geological and biological problems. Department enforced prerequisites: GEOL 1010 and GEOL 1020 or GEOL 2005 or EBIOL 1030 and EBIOL 1040 or EBIOL 1210 and EBIOL 1220.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Arts Sci Gen Ed: Distribution-Natural Sci Lab

GEOL 3430 (4) Sedimentology and Stratigraphy
Introduces the study of sedimentary rocks emphasizing their origin, characteristics, and interpretation; and the principles and techniques for establishing the temporal order and spatial distribution of sedimentary layers.
Requisites: Requires prerequisite course of GEOL 2005 (minimum grade D-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sci Lab
Arts Sci Gen Ed: Distribution-Natural Sciences
GEOL 3520 (3) Energy and Climate Change: An Interdisciplinary Approach
Examines sources of energy and other resources in light of their availability, use, environmental impact, as well as their impact on policy, economics and values. As fossil fuels are the dominant energy source today, particular emphasis is placed on climate impacts and the carbon cycle. All material is assessed through the lenses of the physical sciences, policy, ethics and economics. Department enforced prerequisite: a two-course sequence in any natural science.
Equivalent - Duplicate Degree Credit Not Granted: ENVS 3520
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences

GEOL 3540 (3) Introduction to Petroleum Geology
Discusses the origin and distribution of conventional and unconventional petroleum resources, source rocks, types of traps and seals, reservoir rock properties, exploration methods (seismic data analysis and interpretation, formation evaluation, subsurface mapping), reservoir characterization and modeling, reserves calculations. Department enforced prerequisite: GEOL 1010.
Recommended: Corequisite GEOL 3430.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences

GEOL 3550 (3) Energy and Climate Change: An Interdisciplinary Approach
Examines the ocean as a system influencing the Earth's surficial processes and climate. Composition and properties of seawater, ocean circulation, waves, tides, coastal, shallow-, and deep-water processes, biogeochemical cycles, deep sea sediments. Laboratory emphasizes the use of oceanographic data. Department enforced prerequisite: one semester chemistry or physics or geology.
Equivalent - Duplicate Degree Credit Not Granted: GEOL 5060
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Arts Sci Gen Ed: Distribution-Natural Sci Lab

GEOL 4070 (3) Paleoclimatology
Covers the primary forcings and feedbacks that determine Earth's energy balance and the resultant climate system on decadal to millennial time scales. Covers ocean/atmosphere circulation, the role of ice sheets in the climate system, monsoons, Holocene climate change and 20th Century warming. Includes coverage of the proxies available to reconstruct climates of the past and the archives that contain these proxies. Department enforced prerequisite: environmental science or geology introduction sequence courses.
Recommended: Prerequisite natural science majors only.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Arts Sci Gen Ed: Distribution-Natural Sciences

GEOL 4093 (4) Remote Sensing of the Environment
Covers acquisition and interpretation of environmental data by remote sensing. Discusses theory and sensors, as well as manual and computerized interpretation methods. Stresses infrared and microwave portions of the spectrum.
Equivalent - Duplicate Degree Credit Not Granted: GEOL 5093 and GEOG 4093 and GEOG 5093
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Arts Sci Gen Ed: Distribution-Natural Sci Lab

GEOL 4120 (3) Advanced Structural Geology and Tectonics
Provides valuable exposure to theory and applications related to deformation (rheology) of solid Earth materials as well as the structural and geophysical characteristics of the world's major orogenic belts. The processes that will be covered span a wide range of Earth's depths, from compaction in sedimentary rocks and flow of ice/salt near Earth's surface to cataclastic mechanisms in fault rocks to plastic flow of deep crust and mantle rock. The course will involve lectures, some in-class and take home problem sets, some local field exercises and field data analysis, classic and modern paper discussions, and a research term project (written and oral presentation).
Equivalent - Duplicate Degree Credit Not Granted: GEOL 5120
Requisites: Requires prerequisite course of GEOL 3120 (minimum grade C).
Grading Basis: Letter Grade

GEOL 4150 (2) Planetary Field Geology
Provides an overview of the geology, age and origins of the solid (rocky) planets, dwarf planets and moons of our solar system and the processes that form them from comparative studies from comparative geology. Includes modules on volcanism, rifting, aeolian processes, fluvial erosion, impacts, climate change and paleontology.
Equivalent - Duplicate Degree Credit Not Granted: GEOL 5150
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
**GEOL 4160 (3) Introduction to Biogeochemistry**
Covers fundamentals of biogeochemical cycling, emphasizing water, carbon and nutrient dynamics in terrestrial ecosystems; chemical interactions of atmosphere, biosphere, lithosphere and hydrosphere; natural and human-managed environments. Department enforced prerequisites: GEOL 3320 or EBIOL 4160 and ENVS 4160
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

**GEOL 4185 (3) Geomicrobiology**
Examines how microbial and chemical processes interact on the Earth’s surface today and have shaped the planet throughout its history. Emphasis will be placed on how the life styles and chemical ingenuity of microorganisms drive key biogeochemical processes including weathering and transformations of carbon, oxygen, sulfur, iron and nitrogen. Towards this goal, major geologic and evolutionary events will be examined through the lens of microbial diversity, metabolic energetics, microbe-mineral interactions, and molecular biomarkers.
Equivalent - Duplicate Degree Credit Not Granted: GEOL 5185, ENVS 4185, and MCDB 4185
Requisites: Requires prerequisite courses of CHEM 1113 and CHEM 1114 or CHEM 1400 and CHEM 1401 (minimum grade D-).
Recommended: Prerequisites GEOL 1180 or MCD 1150 or GEOL 3320 or EBIOL 3400 or ENVS 4160 or EVEN 4484.
Grading Basis: Letter Grade

**GEOL 4215 (2) Geochronology and Thermochronology**
Constraining the timing of events and rates of processes is fundamental to earth science research. The field of geochronology and thermochronology is rapidly evolving. Cutting-edge aspects of geochronologic methods and emerging techniques will be especially emphasized. Lectures will emphasize the principles and assumptions of each technique. Seminar discussions will focus on recent papers that demonstrate state-of-the-art applications to diverse problems.
Equivalent - Duplicate Degree Credit Not Granted: GEOL 5215
Requisites: Requires prerequisite courses of GEOL 2001 and GEOL 2005 (minimum grade D).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

**GEOL 4241 (4) Principles of Geomorphology**
Studies weathering, mass-wasting, fluvial, wind, and marine processes and the resulting landforms.
Equivalent - Duplicate Degree Credit Not Granted: GEOG 4241
Requisites: Requires prerequisite course of GEOG 1011 or GEOL 1010 and MATH 1300 or APPM 1350 or APPM 1340 and APPM 1345 (all minimum grade D-).

**GEOL 4270 (3) Marine Chemistry and Geochemistry**
Examines the chemical, biological, geological and physical processes affecting (and affected by) the chemistry of the oceans. Topics include: chemical cycling in seawater; the marine carbon cycle and its long-term control on atmospheric CO2; the large-scale interdependence of nutrient distributions and biological productivity, chemical tracers of ocean circulation; the chemistry of marine sediments, including early diagenesis.
Equivalent - Duplicate Degree Credit Not Granted: GEOL 5270
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Recommended: Prerequisites introductory chemistry, introductory geology, introductory oceanography.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

**GEOL 4330 (3) Cosmochemistry**
Investigates chemical and isotopic data to understand the composition of the solar system: emphasis on the physical conditions in various objects, time scales for change, chemical and nuclear processes leading to change, observational constraints, and various models that attempt to describe the chemical state and history of cosmological objects in general and the early solar system in particular. Department enforced prerequisite: upper-division undergraduate standing in physical science and upper-division undergraduate chemistry or physics or math courses.
Equivalent - Duplicate Degree Credit Not Granted: GEOL 5330 and ASTR 4330 and ASTR 5330
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

**GEOL 4380 (3) Fundamentals of Stable Isotope Geochemistry**
This course teaches students the fundamental principles of stable isotope fractionation during physical and biological processes, and the application of these behaviors to a wide range of important geologic questions. The course will use classic case studies from the geologic record to illustrate these principles.
Equivalent - Duplicate Degree Credit Not Granted: GEOL 5380
Requisites: Requires prerequisite course of MATH 1300 or APPM 1350 (minimum grade D-).

**GEOL 4474 (4) Vertebrate Paleontology**
Discusses the history and evolution of the vertebrates, including the phylogenetic relationships and evolutionary patterns of the major groups. Lab focuses on comparative vertebrate osteology and fossil representation of major groups. Department enforced prerequisites: GEOL 1020 and GEOL 3410 (or permission from the instructor).
Equivalent - Duplicate Degree Credit Not Granted: GEOL 5474
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

**GEOL 4611 (3) Organic Geochemistry**
Explores the biomarker concept as a tool to elucidate microbial, biogeochemical, and climatic processes in natural systems through three fundamental goals: a) characterization and classification of organic molecules in complex, natural mixtures; b) biosynthesis, transport, transformation, preservation and destruction of organic matter in nature; c) application of lipid biomarkers and their stable isotope composition to study biological, biogeochemical, and climatic processes in modern and ancient systems.
Requisites: Requires prerequisite course of CHEM 1113 or CHEM 1400 (minimum grade D-).
Recommended: Prerequisite GEOL 3320 or GEOL 4270.
Grading Basis: Letter Grade
GEOL 4670 (3) Isotope Geology
Introduces principles of stable and radiogenic isotope systems in inorganic and organic geochemistry. Emphasizes application of isotope data to problems in igneous, metamorphic and sedimentary petrology, geobiogeochemistry, and petroleum genesis.
Equivalent - Duplicate Degree Credit Not Granted: GEOL 5670
Requisites: Requires prerequisite a course of MATH 1300 or APPM 1350 (minimum grade D-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

GEOL 4675 (3) Stable Isotopes in Paleoclimate and Paleoecology
Explores use of stable isotope geochemistry for research questions in paleoclimatology and paleoecology. Covers physical and biological drivers of isotopic fractionation, systematics and applications of light elements such as carbon, nitrogen, oxygen, hydrogen, sulfur and boron and some less traditional isotopic systems. Applications include marine and terrestrial paleoclimate proxies and some uses for ecology and paleoecology.
Equivalent - Duplicate Degree Credit Not Granted: GEOL 5675
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

GEOL 4700 (1-4) Special Geological Topics
Studies in selected geological subjects of special current interest (for undergraduates).
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

GEOL 4711 (2) Igneous and Metamorphic Field Geology
Applies field techniques to interpretation of igneous and metamorphic rocks. Field exercises and lectures focus on collecting data required to map igneous and metamorphic rock units.
Requisites: Requires prerequisite courses of GEOL 3020 and GEOL 2001 or GEOL 2700 (all minimum grade D-).

GEOL 4712 (2) Structural Field Geology
Explores methods of field study of structure of rocks, including observations, data collection and interpretation to understand geometry of deformation and causative processes and kinematics. Field projects are mapped using different scales, air photos, topographic maps and compass and tape.
Requisites: Requires prerequisite courses of GEOL 2700 and GEOL 3120 (all minimum grade D-).

GEOL 4714 (2) Field Geophysics
Applies geophysical field techniques and data interpretation to studying geological and engineering problems. Fieldwork includes seismic, gravity, magnetic, and electrical measurements.
Requisites: Requires prerequisite courses of GEOL 2001 or GEOL 2700 and GEOL 3330 and MATH 1300 and PHYS 1110 or PHYS 1115 (all minimum grade D-).

GEOL 4715 (2) Field Techniques in Hydrogeology
Introduces various field techniques and data analysis methods in hydrogeologic studies for students in geology, environmental studies, geography, and civil engineering. Exercises include mapping ground water levels, conducting slug and pumping tests, measuring stream flows, interpreting aquifer parameters from geophysical measurements, and using field data for water budget analysis.
Requisites: Requires prerequisite courses of GEOL 3030 and GEOL 2001 or GEOL 2700 (all minimum grade D-).

GEOL 4716 (2) Environmental Field Geochemistry
This is a critical thinking course that makes use of field and laboratory environments. Students learn methods and develop hands-on expertise needed to identify, characterize and interpret the reactions that govern the quality of water in natural systems, through activities in local watersheds.
Requisites: Requires prerequisite courses of GEOL 2001 or GEOL 2700 and GEOL 3320 and CHEM 1011 and CHEM 1031 or CHEM 1113 and CHEM 1133 (all minimum grade D-).

GEOL 4717 (2) Field Seminar in Geology and Tectonics
Studies geologic features in and around Colorado to gain an overview of the geologic and tectonic evolution of the western U.S.
Requisites: Requires prerequisite courses of GEOL 2001 or GEOL 2700 and GEOL 3120 or GEOL 3320 or GEOL 3430 or GEOL 4241 (all minimum grade D-).

GEOL 4719 (2) Field Analysis and Tectonics of Crystalline Rocks
Introduces basic and advanced mapping tools and concepts for structural and tectonic analysis of solid-state and magmatic deformation, metamorphism, and fluid flow in igneous and metamorphic rocks. Includes some digital mapping concepts using smartpad and smartphone applications, and computer-based analysis of structure data. Includes multi-day mapping projects in the Front Range, and in western Colorado, southern Wyoming, or northern New Mexico. Also includes introductions to Precambrian tectonic history of western North America and mineral resources of Colorado.
Equivalent - Duplicate Degree Credit Not Granted: GEOL 5719
Requisites: Requires prerequisite courses of GEOL 2700 and GEOL 3120 (all minimum grade D).
Grading Basis: Letter Grade

GEOL 4721 (2) Field Methods in Active Tectonics
Analysis of active geologic structures, including strike slip fault systems, secondary structures in stepovers and related eruptive centers. Includes the use of digital imagery, elevation models, offset geomorphic features and Quaternary deposits to determine local deformation rates and their relation to plate motions.
Requisites: Requires prerequisite courses of GEOL 2700 and GEOL 3120 (all minimum grade D-).
Recommended: Prerequisite GEOL 4712.
GEOL 4723 (2) Field Studies in Sedimentology
Provides students experience in observing and interpreting sedimentary rocks in the field. We will visit outcrops in CO and UT spanning a range of depositional environments, including eolian, lacustrine, fluvial, and marine. Developing observational and notetaking skills will be emphasized; students will be responsible for contributing to a group field guide based on their guided field observations at each site. 
**Requisites:** Requires prerequisite courses of GEOL 2700 and GEOL 3430 (all minimum grade D-).

GEOL 4725 (1-4) Field Based Special Topics in Geoscience
Explores selected geological subjects of special interest in a field setting.  
**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 5725  
**Repeatable:** Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.  
**Grading Basis:** Letter Grade  
**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

GEOL 4840 (1-3) Independent Study in Geology
Time and credit to be arranged. For advanced undergraduates who have high scholastic standing. Open only upon consultation with department advisor.  
**Repeatable:** Repeatable for up to 7.00 total credit hours.

GEOL 4841 (1-3) Independent Study-Economic Geology
Time and credit to be arranged. For advanced undergraduates who have high scholastic standing. Open only upon consultation with department advisor. May be repeated for a total of 7 credit hours.  
**Repeatable:** Repeatable for up to 7.00 total credit hours.

GEOL 4842 (1-3) Independent Study-Petrology
Time and credit to be arranged. For advanced undergraduates who have high scholastic standing. Open only upon consultation with department advisor. May be repeated for a total of 7 credit hours.  
**Repeatable:** Repeatable for up to 7.00 total credit hours.

GEOL 4843 (1-3) Independent Study-Sedimentology
Time and credit to be arranged. For advanced undergraduates who have high scholastic standing. Open only upon consultation with department advisor. May be repeated for a total of 7 credit hours.  
**Repeatable:** Repeatable for up to 7.00 total credit hours.

GEOL 4844 (1-3) Independent Study-Structure/Tectonics
Time and credit to be arranged. For advanced undergraduates who have high scholastic standing. Open only upon consultation with department advisor. May be repeated for a total of 7 credit hours.  
**Repeatable:** Repeatable for up to 7.00 total credit hours.

GEOL 4845 (1-3) Ind Stdy-Geochemistry
Time and credit to be arranged. For advanced undergraduates who have high scholastic standing. Open only upon consultation with department advisor. May be repeated for a total of 7 credit hours.  
**Repeatable:** Repeatable for up to 7.00 total credit hours.

GEOL 4846 (1-3) Independent Study-Geophysics
Time and credit to be arranged. For advanced undergraduates who have high scholastic standing. Open only upon consultation with department advisor. May be repeated for a total of 7 credit hours.  
**Repeatable:** Repeatable for up to 7.00 total credit hours.

GEOL 4847 (1-3) Independent Study-Hydrology
Time and credit to be arranged. For advanced undergraduates who have high scholastic standing. Open only upon consultation with department advisor. May be repeated for a total of 7 credit hours.  
**Repeatable:** Repeatable for up to 7.00 total credit hours.

GEOL 4848 (1-3) Independent Study-Paleontology
Time and credit to be arranged. For advanced undergraduates who have high scholastic standing. Open only upon consultation with department advisor. May be repeated for a total of 7 credit hours.  
**Repeatable:** Repeatable for up to 7.00 total credit hours.

GEOL 4851 (1-3) Independent Study in Geoscience Education
Repeatable: Repeatable for up to 3.00 total credit hours.

GEOL 4862 (1-4) Geology Independent Study  
**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 5862  
**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

GEOL 4990 (1-3) Honors Thesis
Supervised project involving original research in any area of the geological sciences. The thesis is submitted to the Honors Program of the College of Arts and Sciences and is orally defended. Must be accepted by the departmental honors committee. Department enforced prerequisite: minimum cumulative GPA of 3.30.  
**Additional Information:** Arts Sciences Honors Course

---

**Geology - Bachelor of Arts (BA)**

The options available in the undergraduate program in geological sciences are geology and geophysics and lead to the BA degree. Both options provide a strong basis for understanding the functioning of the Earth system. Students who are uncertain as to which option best suits their needs should contact a departmental advisor or faculty member. In each option, the undergraduate program emphasizes coursework in theoretical, laboratory and field-oriented aspects of the geological sciences. The nearby Rocky Mountains provide a natural laboratory for many of these courses.

Students interested in the geological sciences may also wish to consider the Baker Residential Academic Program. Students who do not wish to pursue a career in the geosciences, or who would like to combine a basic knowledge of geologic sciences with that of some other field, should consider using geological sciences as one subject in a distributed studies major or as a minor. Students who intend to pursue graduate study in the geological sciences are encouraged to consider developing an honors thesis as part of their undergraduate studies.

The two options available in the undergraduate major offer different focus areas of instruction. Both options offer excellent preparation for students interested in pursuing professional careers, or graduate study, in the geological sciences.

Each option emphasizes knowledge in:

- the ways in which Earth responds to internal and external forces; the physical, chemical and biological evolution of Earth; and the nature of the materials of which the Earth is made
- the role of physics, chemistry, mathematics and biology in understanding geological processes
- the history of discoveries and ideas that have contributed to our current knowledge of Earth and the planetary system

---

**Program Tracks**

**Geology Track**

The geology option emphasizes processes that function both in the solid earth and at Earth's surface:
• the mineralogy and petrology of igneous, metamorphic and sedimentary rocks
• the processes of sedimentation and the applications of stratigraphy and paleobiology in the reconstruction of Earth history
• the role of geophysics and geochemistry in understanding the nature of Earth and its history
• the study of faults, folds and other rock structures and the tectonic processes that create those structures
• the methods used in the field to map and interpret the diverse variety of rock types and structures
• the function of the integrated Earth system including the atmosphere, hydrosphere, biosphere and geosphere
• the fundamental controls on surface Earth processes including energy balance, hydrology, geomorphology, geochemistry and biogeochemistry
• the role of humans in the Earth system

Geophysics Track
The geophysics option emphasizes:

• applications of fundamental mathematical formulations and physical principles to an understanding of the Earth
• methods utilized to map and characterize those portions of the planet that lie below the surface, from just beneath our feet down to the core

International Bachelor of Arts
The International Bachelor of Arts (IBA) is a joint degree between CU Boulder and the University of Wollongong, Wollongong, Australia. To earn an IBA in geology, in addition to completing all the current requirements for the BA with a major in geology at the home institution, students must complete one full-time semester experiential, customized, international learning experience at the non-home institution.

Requirements
Required Courses and Credits
Students must complete the general requirements of the College of Arts and Sciences and the required courses listed below.

Students in either the geology option or the geophysics option must take the following coursework in GEOL.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>GEOL 2005</td>
<td>Introduction to Earth Materials</td>
<td>4</td>
</tr>
<tr>
<td>GEOL 2700</td>
<td>Introduction to Field Geology</td>
<td>2</td>
</tr>
<tr>
<td>Total Credit Hours</td>
<td>17</td>
<td></td>
</tr>
</tbody>
</table>

Ancillary Coursework
Students in either the geology option or the geophysics option must take the following coursework from outside GEOL.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>Select one of the following Calculus 1 &amp; 2 sequences</td>
<td>8-10</td>

GEOL 4715 Field Techniques in Hydrogeology
GEOL 4716 Environmental Field Geochemistry
GEOL 4717 Field Seminar in Geology and Tectonics
GEOL 4721 Field Methods in Active Tectonics
EVEN 4100 Environmental Sampling and Analysis

**Upper-division electives**

Sufficient additional upper-division coursework from following list to total 27 upper-division credits. (Of these 27, a minimum of 18 upper-division credits must be GEOL)

Any GEOL 3000- to 4000-level course (with exceptions, see footnote)

Or approved non-GEOL courses from following list:

- APPM 3050 Scientific Computing in Matlab
- ASTR 3710 Formation & Dynamics of Planetary Systems
- ASTR 3720 Planets and Their Atmospheres
- ASTR 3750 Planets, Moons, and Rings
- ASTR 4800 Space Science: Practice and Policy
- ATOC 4720 Atmospheric Dynamics
- ATOC 4800 Policy Implications of Climate Controversies
- CHEM 4511 Physical Chemistry 1
- CVEN 4404 Water Chemistry
- CVEN 4718 Mechanics and Dynamics of Glaciers
- EBIO 3080 Evolutionary Biology
- EBIO 3850 Animal Diversity: Vertebrates
- EBIO 4030 Limnology
- EBIO 4060 Landscape Ecology
- EBIO 4155 Ecosystem Ecology
- EBIO 4410 Biological Statistics
- EBIO 4500 Plant Biodiversity and Evolution
- ECON 3403 International Economics and Policy
- ENVS 3434 Introduction to Applied Ecology
- EVEN 4100 Environmental Sampling and Analysis
- GEOG/ENVS 4201 Biometeorology
- GEOG 4251 Fluvial Geomorphology
- GEOG 4261 Glaciers and Permafrost
- GEOG 4321 Snow Hydrology
- GEOG 4401 Soils Geography
- MCDB 4350 Microbial Diversity and the Biosphere
- MUSM 4914 Museum Practicum in Geology
- PSCI 3183 International Law

Total Credit Hours 27-30

1 Note: A maximum of 3 of these credit hours may consist of a policy course from the following list:
- ASTR 4800 Space Science: Practice and Policy
- ATOC 4800 Policy Implications of Climate Controversies
- ECON 3403 International Economics and Policy
- ENVS 4023 Environmental Impact Assessment
- PSCI 3183 International Law

2 GEOL 3040, GEOL 3070, GEOL 3520, GEOL 3720, and GEOL 3950, cannot be used to fulfill the upper-division elective requirements within the major.

3 Note that some courses are listed in multiple major specific categories. Students can choose which category to apply the course to but, a given course can be applied to only one category.

**Geophysics Option**

Students electing the geophysics option are required to take the following additional courses:

Additional information on required courses and other departmental requirements may be obtained from the departmental office. Students should contact the department for a list of current major requirements.

Transfer students must satisfactorily complete a minimum of 12 credit hours of advanced work (3000-level or above) in the Department of Geological Sciences in Boulder if they wish to obtain a degree in geology from CU Boulder. Before registering for the first time, or within the first week of the semester, such students must see a geological sciences department undergraduate advisor to have previous coursework in geology, math and allied sciences evaluated.

Graduating in Four Years
Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of “adequate progress” as it is used here refers only to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress in geology, students should meet all college requirements plus specific departmental requirements. These departmental requirements vary slightly between the two major options. Detailed information is available from the department office, but in general these requirements include:

- Declare a geology major and begin coursework in the major during the first semester freshman year.
- Meet with a departmental advisor prior to the second and fifth semesters and during the seventh semester.
- Complete at least 33 credit hours (geology option; 44 credit hours for geophysics option) required for the major by the end of the fourth semester.
- Complete at least 47 credit hours (geology option; 63 credit hours for geophysics option) required for the major by the end of the sixth semester.
- Complete the remaining requirements for the major by the end of the eighth semester.

Recommended Four-Year Plans of Study
Geology Track
Through the required coursework for either track of the major, students will fulfill all 12 credits of the Natural Sciences area of the Gen Ed Distribution Requirement including the Lab Requirement, as well as the QRMS area of the Gen Ed Skills area.

Geology - Minor

The minor program in geological sciences is meant for students who would like to acquire a basic knowledge of geology in addition to their major area of study.

For more information, please visit the Geological Sciences website (https://www.colorado.edu/geologicalsciences/academic/undergraduate/minor-requirements/).

Requirements

The College of Arts and Sciences’ requirements for a minor include a minimum of 18 credit hours in the minor area, including a minimum of 9 upper-division credit hours.

All coursework applied to the minor must be completed with a grade of C- or better; no pass/fail work may be applied. The grade point average for all minor degree coursework must be equal to 2.000 (C) or higher. Students are allowed to apply no more than 9 credit hours, including 6 upper-division credit hours, of transfer work toward a minor.

The departmental requirements for the minor are listed below. The department strongly urges students interested in pursuing a minor in geology to consult a departmental advisor.

Geology Electives

Additional geology coursework to bring the total upper-division credit hours to 9 and total credit hours in geology to 18.

Total Credit Hours: 18

1. Students cannot take GEOL 1010 and GEOL 1012 as these two course are considered similar to each other and the student will lose credit for one of the courses.
2. Students cannot take GEOL 1020 and GEOL 1040 as these two course are considered similar to each other and the student will lose credit for one of the courses.

Germanic and Slavic Languages and Literatures

Undergraduate students may choose to major in either German studies or Russian studies; minors are offered in both. The department also offers a minor in Nordic studies.

To declare a major or minor with this department, please meet with the GSLL advisor, Christine Luft (christine.luft@colorado.edu), to start your application.

Course codes for these programs are DANE, FINN, GRMN, GSLL, NORW, RUSS, SCAN and SWED.

Bachelor’s Degrees

- German Studies - Bachelor of Arts (BA) (p. 337)
- Russian Studies - Bachelor of Arts (BA) (p. 339)

Minors

- German Studies - Minor (p. 345)
- Nordic Studies - Minor (p. 346)
- Russian Studies - Minor (p. 347)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member’s home department.

Firestone, Robert

Courses

Danish

DANE 1010 (4) Beginning Danish I-DILS
Provides practical, communicative language skills for use in a variety of situations. Examines basic language structure and grammatical forms. Introduces students to Danish history and contemporary culture and society.

Additional Information: Departmental Category: Danish Courses

DANE 1020 (4) Beginning Danish II-DILS
Provides practical, communicative language skills for use in a variety of situations. Examines basic language structure and grammatical forms. Introduces students to Danish history and contemporary culture and society. Department enforce prerequisite: DANE 1010 (min grade C-).

Additional Information: Departmental Category: Danish Courses

DANE 2010 (4) Intermediate Danish I - DILS
Building on the skills that the students have acquired in Beginners Danish I-II, this course offers additional reading, writing, speaking and verbal comprehension. Students will learn to conduct business at a government office, talk about holidays and festivals and discuss conservation and environmental protection. They will read and write small texts, becoming exposed to differences between written and spoken Danish.

Requisites: Requires prerequisite course of DANE 1020 (minimum grade C).

Additional Information: Arts Sci Core Curr: Foreign Language
Arts Sci Gen Ed: Foreign Language
Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Danish Courses

DANE 2020 (4) Intermediate Danish II - DILS
Offers extensive reading, writing, speaking and verbal comprehension skills in Danish. The students will discuss Danish history, cultural differences and stereotypes, politics, social groups, learn how to write letters and email in Danish, read short texts and write short essays on the above topics.

Requisites: Requires prerequisite course of DANE 2010 (minimum grade C).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Danish Courses

Finnish

FINN 1010 (4) Beginning Finnish 1 - DILS
Provides practical, communicative language skills for use in a variety of situations. Examines basic language structure and grammatical forms. Introduces students to Finnish history and contemporary culture and society. Directed independent language study course, requires work outside of class.

Additional Information: Departmental Category: Finnish Courses

FINN 1020 (4) Beginning Finnish 2- DILS
Continuation of Beginning Finnish I. Provides practical, communicative language skills for use in a variety of situations. Examines basic language structure and grammatical forms. Introduces students to Finnish history and contemporary culture and society. Directed independent language study course, requires work outside of class. Department enforced prerequisite: FINN 1010 (minimum grade C).

Additional Information: Departmental Category: Finnish Courses

FINN 2010 (4) Intermediate Finnish 1 - DILS
Continuation of Beginning Finnish 2. Provides practical, communicative language skills for use in a variety of situations. Examines intermediate language structure and grammatical forms. Introduces students to Finnish history and contemporary culture and society. Directed independent language study course, requires work outside of class. Department enforced prerequisite: FINN 1020 (minimum grade C).

Additional Information: Arts Sci Core Curr: Foreign Language
Arts Sci Gen Ed: Foreign Language
Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Finnish Courses
FINN 2020 (4) Intermediate Finnish 2 - DILS
Continuation of Intermediate Finnish I. Provides practical, communicative language skills for use in a variety of situations. Examines intermediate language structure and grammatical forms. Introduces students to Finnish history and contemporary culture and society. Directed independent language study course, requires work outside of class. Department enforced prerequisite: FINN 2010 (minimum grade C-).
**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Finnish Courses

German

GRMN 1010 (4) Beginning German 1
Introduction to language and culture of the German-speaking world, with emphasis on the acquisition of basic communication skills in cultural context. For students with no previous training in German.
**Equivalent - Duplicate Degree Credit Not Granted:** GRMN 1030
**Additional Information:** Arts Sci Core Curr: Foreign Language
Arts Sci Gen Ed: Foreign Language
Departmental Category: German

GRMN 1020 (4) Beginning German 2
Continued development of German-language skills and cultural knowledge for effective communication. Emphasis on more complex language structures and sustained interactions. Department enforced prerequisite: GRMN 1010 (min grade of C-).
**Equivalent - Duplicate Degree Credit Not Granted:** GRMN 1030
**Additional Information:** Arts Sci Core Curr: Foreign Language
Arts Sci Gen Ed: Foreign Language
Departmental Category: German

GRMN 1030 (5) Intensive Beginning German
Covers the same material as GRMN 1010 and GRMN 1020 in one course. Focuses on acquiring ability to understand and speak everyday German; on developing reading and writing skills; and on learning about the cultures of the German-speaking countries.
**Equivalent - Duplicate Degree Credit Not Granted:** GRMN 1010 and GRMN 1020
**Additional Information:** Departmental Category: German

GRMN 1500 (3) German for Reading Knowledge
Designed especially for graduate students. Emphasizes analytical skills for acquiring reading proficiency in specialized and technical German in one's field of research. Recommended for pass/fail registration. Does not satisfy the arts and sciences foreign language requirement. Does not count towards the German major.
**Additional Information:** Departmental Category: German

GRMN 1601 (3) Germany Today
Introduces contemporary debates in Germany, Austria and Switzerland through analysis of contemporary cultural products such as film, literature, graphic novels, and other media/art. Examines refugee migration, far-right parties, social justice movements, responses to climate change. Taught in English.
**Additional Information:** Arts Sci Core Curr: Contemporary Societies
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: German Courses Taught in English

GRMN 1602 (3) Metropolis and Modernity
An interdisciplinary introduction to the modern industrial city in Europe and the USA, with particular attention to the representation of urbanism in the visual arts. Taught in English.
**Additional Information:** Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: German Courses Taught in English

GRMN 1701 (3) Nature and Environment in German Literature and Thought
Critically examines titles in German literature and thought. Nature and environment are used to explore alienation, artistic inspiration, nihilism, exploitation, sexuality, rural versus urban, meaning of the earth, cultural renewal, identity and gender. This "Green" survey of German classics spans Romanticism's conception of nature as unconscious spirit to the politics and values of contemporary Germany's Green Party. Taught in English.
**Equivalent - Duplicate Degree Credit Not Granted:** HUMN 1701
**Additional Information:** Arts Sci Core Curr: Ideals and Values
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: German Courses Taught in English

GRMN 2010 (4) Intermediate German 1
Development of skills for independent use of German. Discussions, writing and listening/viewing activities that address topics of the contemporary German-speaking world. Department enforced prerequisite: GRMN 1020 or 1030 (minimum grade C-).
**Equivalent - Duplicate Degree Credit Not Granted:** GRMN 2030
**Additional Information:** GT Pathways: GT-AH4 - Arts Hum: Foreign Languages
Arts Sci Core Curr: Foreign Language
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Foreign Language
Departmental Category: German

GRMN 2020 (4) Intermediate German 2
Development of communication skills and knowledge about recent social, cultural and political developments in German speaking countries through texts, media and film. Department enforced prerequisite: GRMN 2010 (minimum grade C-).
**Equivalent - Duplicate Degree Credit Not Granted:** GRMN 2030
**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: German

GRMN 2030 (5) Intensive Intermediate German
Covers the same material as GRMN 2010 and GRMN 2020 in one semester. Offers review and continuation of basic skills begun in the first year: reading, writing, speaking and oral comprehensive. Department enforced prerequisite: GRMN 1020 or GRMN 1030 (minimum grade C-).
**Equivalent - Duplicate Degree Credit Not Granted:** GRMN 2010 and GRMN 2020
**Additional Information:** Arts Sci Core Curr: Foreign Language
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Foreign Language
Departmental Category: German

GRMN 2301 (3) Inside Nazi Germany: Politics, Culture, and Everyday Life in the Third Reich
Examines social culture and everyday life in Nazi Germany. Topics include the role of propaganda in the media and entertainment industries, anti-Semitism and suppression of ethnic, social and religious minorities, the role of education and youth organizations, as well as the role of women, the churches, and the effects of a controlled economy before and during World War II. Taught in English.
**Additional Information:** Arts Sci Core Curr: Historical Context
Arts Sci Gen Ed: Distribution-Arts Humanities

GRMN 2501 (3) Miniatures of Modern Life: Introduction to Short Fiction
Introduces students to short fiction from the 20th century. Focuses on issues and themes of modern life, such as: alienation and anxiety; cultures of spectatorship; gender roles, sexuality and social life; memory and nostalgia; technology, industry and capitalism; state power and revolution. Taught in English.

**Additional Information:** Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: German Courses Taught in English

GRMN 2502 (3) Representing the Holocaust
Examines representations of the Holocaust in film, memoirs, poetry, novels, graphic novels, memorials. Considers questions such as: How to depict an event that resists representation? How does the memory of the Holocaust transform over generations? How do representations of the Holocaust inform our understanding of other experiences of racism and genocide? What ethical issues are at stake? Taught in English.

**Equivalent - Duplicate Degree Credit Not Granted:** JWST 2502

**Additional Information:** Arts Sci Core Curr: Ideals and Values
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: German Courses Taught in English

GRMN 2503 (3) Fairy Tales of Germany
Explores the origins, cultural significance, stylistic and thematic features of the German fairy tale, with emphasis on the Brothers Grimm; on artistic fairy tales by Goethe, Tieck, Brentano, and others; and, on, modern retellings in literature and popular culture. Taught in English.

**Additional Information:** GT Pathways: GT-AH2 - Arts Hum: Lit Humanities
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: German Courses Taught in English

GRMN 2601 (3) Kafka and the Kafkaesque
Exposes the students to a wide selection of Kafka’s literary output and aims to define the meaning of the Kafkaesque by looking not only for traces of Kafka’s influence in the verbal and visual arts, but also for traces left in Kafka’s own work by his precursors in the literary tradition. Taught in English.

**Equivalent - Duplicate Degree Credit Not Granted:** HUMN 2601

**Additional Information:** GT Pathways: GT-AH2 - Arts Hum: Lit Humanities
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: German Courses Taught in English

GRMN 2603 (3) Moral Dilemmas in Philosophy and Literature
Examines the moral dilemmas that arise when opportunities afforded by basic freedoms or advances in technology clash with the ethical imperatives that issue from the Enlightenment and the social contract. Guiding questions include: When does the quest for knowledge legitimate transgression of prevailing morality? By what standard do we adjudicate the ambitions of the individual when they compete with the interests of the state? Taught in English.

**Additional Information:** Arts Sci Core Curr: Ideals and Values
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: German Courses Taught in English

GRMN 3010 (3) Advanced German 1
Focuses on cultural topics and reviews grammatical topics, expands vocabulary and provides practice in reading, writing, listening and conversation skills. Students have the option of taking the internationally recognized exam Goethe-Zertifikat B1 after GRMN 3010. Department enforced prerequisite: four semesters of college German or equivalent. Open to freshmen with instructor consent.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: German

GRMN 3020 (3) Advanced German 2
Expands and refines skills acquired in GRMN 3010. Improves overall fluency and deepens cultural understanding of the German-speaking countries. Develops an advanced skill level in the areas of listening, speaking, reading and writing. Students have the option of taking the internationally recognized exam Goethe-Zertifikat B1 or B2 after GRMN 3020. Department enforced prerequisite, GRMN 3010 (minimum grade C).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: German

GRMN 3030 (3) Business German
Introduces students to key issues in German society, politics, culture, institutions, economy, business and professional life. Topics and assignments are geared towards practicing and expanding all language skills with an emphasis on Business German. Students will have the option of taking the internationally recognized exam Goethe-Zertifikat B1 or B2 after GRMN 3030. Department enforced prerequisite, GRMN 2020 (minimum grade C). Taught in German.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: German

GRMN 3110 (3) German Literature from the Avant-garde to the Postmodern
Examines selected literary texts. Emphasizes longer unedited texts as well as critical skills. May be taken either before or after GRMN 3120. Department enforced prerequisite, GRMN 2020 (minimum grade C). Taught in German.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: German

GRMN 3120 (3) German Literature from the Enlightenment to Expressionism
Examines selected literary texts of various periods. Emphasizes longer texts and critical skills. May be taken either before or after GRMN 3110. Department enforced prerequisite, GRMN 2020 (minimum grade C). Taught in German.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: German

GRMN 3130 (3) Issues in German Philosophy and Literature
Examines selected interdisciplinary texts from the German literary and philosophical tradition. Topics address issues central to philosophical inquiry, and may include knowledge and its limits, mind and body, determinism and free will, reason and religious belief, and ethical problems. Department enforced prerequisite, GRMN 2020 or 2030 (minimum grade C). Taught in German.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: German

GRMN 3140 (3) Current Issues in German Literature
Examines issues pervading contemporary German literature, such as concerns of youth, gender, stereotyping as it affects women and men in their relations with one another, loneliness and sexual frustration, work experiences, and other issues. Department enforced restriction: ability to read unedited German and to speak German. Taught in German.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: German
GRMN 3150 (3) Issues in German Politics and Literature
Examines literary and theoretical texts in German about the relationship between literature and politics. Topics may include history and revolution, political theater, feminist aesthetics or terrorism. Readings and discussion in German. Department enforced prereq., GRMN 2020 or GRMN 2030 (minimum grade C-). Taught in German.

Repeatable: Repeated for up to 6.00 total credit hours.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: German

GRMN 3401 (3) The German Experience in North America
Discusses the motives and conditions of German immigration to North America, particularly the history, culture, and literature of German-speaking migrants and refugees from the 17th to the 21st century. Investigates factors that shape human activity through learning about the reasons for migration and the diaspora of Germans in Russia to the United States and Canada. Studies individual settlements and stories of German pioneer authors as well as theories of nationalism and migration. Taught in English.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: German Courses Taught in English

GRMN 3501 (3) The German-Jewish Experience: From the Enlightenment to the Present
Provides insight into the German-Jewish identity through essays, autobiographies, fiction and journalism from the Enlightenment to the post-Holocaust period. Examines the religious and social conflicts that typify the history of Jewish existence in German-speaking lands during the modern epoch. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: JWST 3501

Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Diversity-Global Perspective
Departmental Category: German Courses Taught in English

GRMN 3502 (3) Literature in the Age of Goethe
Features the writings of Germany's major literary figures from 1749 to 1832. Special attention is paid to the formation of literary periods, genres, aesthetic, and socio-historical developments contributing to the birth of modernism in German intellectual history and literature. Taught in English.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: German Courses Taught in English

GRMN 3503 (3) German Film Through World War II
History and theory of Weimar and Nazi film with sociocultural emphasis. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: CINE 3503

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: German Courses Taught in English

GRMN 3504 (3) Topics in German Film
Analyzes key issues in German culture as they are represented in film and other media, e.g., technology, architecture, women and the Holocaust. Taught in English.

Repeatable: Repeated for up to 6.00 total credit hours.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: German Courses Taught in English

GRMN 3505 (3) The Enlightenment: Tolerance and Emancipation
Examines Enlightenment notions of reason, humanity and social progress. Topics include 18th century views on government, science, education, religion, slavery and gender roles. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: HUMN 3505

Additional Information: Arts Sci Core Curr: Ideals and Values
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: German Courses Taught in English

GRMN 3506 (3) Tracing the Criminal: Crime in 19th C Society and Culture
Examines cultural and literary representations of crime from the Enlightenment to the early 20th century and contextualizes them within the history of judicial and medical approaches to criminality. Focusing on representations of the criminal as an object of knowledge, this survey of intellectual history introduces students to critical approaches in the humanities and the study of social phenomena in their historical context. Taught in English.

Grading Basis: Letter Grade

Additional Information: Arts Sci Core Curr: Historical Context
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: German Courses Taught in English

GRMN 3507 (3) Engineering and the Practice of Literature
Examines the relation between the practices of engineering and the production of fictional worlds in words and images. Focusing on the history of engineering and of literature, the course interlaces these seemingly disparate practices by showing commonalities and shared solutions to common problems. Readings highlight stages in the development of engineering in parallel with literary works from the end of the eighteenth century to the present. May include analysis of media like film and television. Taught in English.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

GRMN 3508 (3) Masters of Suspicion: Marx, Nietzsche, Freud
Explores some of the most significant writings by Karl Marx, Friedrich Nietzsche, and Sigmund Freud, three authors who have radically shaped much of modern thinking. Students will practice the analysis of challenging theoretical texts from the German intellectual tradition and develop a critical, theoretically informed vocabulary. Taught in English.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

GRMN 3513 (3) German Film and Society 1945-1989
Introduces issues in German society through film during the Cold War. Focus on East and West Germany, though some other German language films may be included. Emphasis is on reading films in their social, historical and political contexts. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: CINE 3513

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: German Courses Taught in English

GRMN 3514 (3) German Film & Society After 1989
Introduces post-1989 German culture through film. Emphasizes films in their socio-historical contexts and explores developments in German culture during and after the unification. Taught in English.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: German Courses Taught in English

GRMN 3520 (3) Open Topics in the Cultural Context
Examines topics in the cultures of German-speaking central Europe. Contact the departmental office for specific course offerings. Department enforced prereq., GRMN 3020 (minimum grade C-)

Repeatable: Repeated for up to 6.00 total credit hours.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: German
GRMN 3601 (3) German Women Writers
Explores writing by German/Austrian women from 1945 to the present, with special attention to the representation of the Holocaust, the continuation of avant-garde traditions, innovations in literary form, and feminism. Visual arts, film, and feminist theory will also be considered in their relation to literature. Taught in English.
Equivalent - Duplicate Degree Credit Not Granted: WGST 3601
Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Diversity-Global Perspective
Departmental Category: German Courses Taught in English

GRMN 3681 (3) Refugees in German Culture
This interdisciplinary course introduces the diversity of refugee migration in German culture through artistic and cultural "texts," including those created by or in collaboration with refugees (film, comic journalism, literature, blogs, hashtag campaigns, music, etc). These texts are discussed in relationship to theories of racism, precarity, and biopolitics together and contextualized by work from other disciplines. This interdisciplinary course is methodologically informed by the theory and practice of cultural studies.
Equivalent - Duplicate Degree Credit Not Granted: IAFS 3681 and JWST 3681
Recommended: for students with sophomore standing or higher.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

GRMN 3702 (3) Dada and Surrealist Literature
Surveys the major theoretical concepts and literary genres of the Dada and Surrealist movements. Topics include Dada performance and cabaret, the manifesto, montage, the ready made, the Surrealist novel, colonialism and the avant-garde, and literary and philosophical precursors to the avant-garde. Taught in English.
Equivalent - Duplicate Degree Credit Not Granted: HUMN 3702
Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: German Courses Taught in English

GRMN 3802 (3) Politics and Culture in Berlin 1900-1939
Examines early 20th century German culture, with emphasis on the Weimar Republic (1918-1933) in light of contemporaneous political discussions. The course presents modern art and literature (Expressionism, Dada, Brecht's epic theater) and architecture and design (Bauhaus, Werkbund) as well as political movements of women, sexual minorities, and Berlin's Jewish communities. Taught in English. Offered through CU Study Abroad Program.
Equivalent - Duplicate Degree Credit Not Granted: HUMN 3802
Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: German Courses Taught in English

GRMN 3900 (1-6) Independent Study
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: German

GRMN 3930 (1-6) Internship
Provides an academically supervised opportunity for upper-division students to earn credit while working for public or private organizations. Students apply skills and knowledge earned in the major, and supplement their work experience through directed readings and assignments.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to students with 57-180 credits (Junior or Senior) German Studies (GRMN) majors only.
Additional Information: Departmental Category: German

GRMN 4010 (3) Advanced German III
Emphasizes idiomatically correct spoken and written German in a variety of genres and culturally relevant contexts. Includes a comprehensive grammar review and readings, discussions, and writing on topics related to current cultural, social, and political issues in the German-speaking countries. Students have the option of taking the internationally recognized exam Goethe-Zertifikat B2 or C1 after GRMN 4010. Department enforced prereq., GRMN 3020 (minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: German

GRMN 4051 (3) Critical Theory of the Frankfurt School
Serves as an introduction to the "Frankfurt School" and Critical Theory with particular emphasis upon rationality, social psychology, cultural criticism, and aesthetics. Through close readings of key texts by members of the school (Horkheimer, Benjamin, Adorno, Habermas) we will work toward a critical understanding of the analytical tools they developed and consider their validity. Taught in English.
Equivalent - Duplicate Degree Credit Not Granted: GRMN 5051
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: German Courses Taught in English

GRMN 4231 (3) Sex, Love and Marriage in Literature and Philosophy
Traces notions of love, sex and marriage in 19th-20th century philosophy and literature. Considered will be whether/how these representations reflect or challenge ideas of human agency, dignity and happiness. Examined will be shifting views of gender and other social configurations (e.g., friendship, adultery, same-sex desire) to understand their influence on modern attitudes towards sexuality and fidelity.
Equivalent - Duplicate Degree Credit Not Granted: GRMN 5231
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: German Courses Taught in English

GRMN 4251 (3) Marxism
Examines the economic, political, and philosophical thought of Karl Marx, placing it in the context of his predecessors in the classical German tradition and his successors (and critics) in the twentieth century. Themes may include the development of historical materialism; Marx's analysis of estranged labor; the critique of utopian socialism; the categories of Marxist economic analysis; the relation between politics, philosophy, and economics; theories of labor, surplus value, and exploitation; and the fate of communism.
Equivalent - Duplicate Degree Credit Not Granted: PHIL 4250
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: German Courses Taught in English
GRMN 4301 (3) Gender, Race and Immigration in Germany and Europe
Introduces students to debates surrounding migration and race in contemporary Germany. Emphasis is placed on reading texts in context using tools of cultural studies, integrating analyses of gender, race, nation, and sexuality. Texts may include film, literature, television, magazine images, etc. Topics include: questioning multiculturalism, self-representation, integration, Islam, citizenship, violence, public space, youth culture, racism and nationalism. Taught in English.
Equivalent - Duplicate Degree Credit Not Granted: WGST 4301 and GRMN 5301
Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Distribution-Social Sciences
Arts Sci Gen Ed: Diversity-Global Perspective
Departmental Category: German Courses Taught in English

GRMN 4340 (3) The Age of Goethe
German literature from 1770 to 1830. Close examination of representative texts from the periods of Sturm und Drang, classicism, and romanticism. Emphasizes philosophical and social background. Department enforced prereq., GRMN 3020 (minimum grade C). Taught in German.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: German

GRMN 4340 (3) Seminar in German Literature
Intensive study of a particular literary period, author, or genre. Secondary sources are used. Course content differs each time. Department enforced prereq., GRMN 3020 (minimum grade C). Taught in German.
Repeatable: Repeatable for up to 6.00 total credit hours.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: German

GRMN 4450 (3) Methods of Teaching German
Required of students who desire the recommendation of the department for secondary school teaching positions. For student teaching in German, see EDUC 4712 under the School of Education.
Requisites: Restricted to School of Education (EDUC) undergraduates only
Additional Information: Departmental Category: German

GRMN 4450 (6) High School German Teaching
Part of the supervised student teaching in a secondary school required for state certification to teach German.
Requisites: Restricted to School of Education (EDUC) undergraduates only
Grading Basis: Pass/Fail
Additional Information: Departmental Category: German

GRMN 4501 (3) Seminar: Literature in Cultural Context
Provides a broader basis for the work of literature, viewing it from various cultural perspectives. Specific content of course is defined by the instructor. Taught in English.
Repeatable: Repeatable for up to 6.00 total credit hours.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: German Courses Taught in English

GRMN 4502 (3) Nietzsche: Literature and Values
Emphasis is placed on Nietzsche's major writings spanning the years 1872-1888, with particular attention to the critique of Western values. A systematic exploration of doctrines, concepts and ideas leading to the values of creativity. Taught in English.
Equivalent - Duplicate Degree Credit Not Granted: HUMN 4502
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Additional Information: Arts Sci Core Curr: Ideals and Values
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: German Courses Taught in English

GRMN 4503 (3) Issues in German Thought
Provides the opportunity to examine major issues in German philosophical, social, and religious thought from the end of German idealism to existentialism and critical theory. Emphasizes the relationship between ideas and social and political action. Taught in English.
Repeatable: Repeatable for up to 6.00 total credit hours.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: German Courses Taught in English

GRMN 4504 (3) Goethe's Faust
Systematic study of the Faust motif in Western literature, with major emphasis on Faust I and II by Goethe and Thomas Mann's Doctor Faustus. Taught in English.
Equivalent - Duplicate Degree Credit Not Granted: GRMN 5504 and HUMN 4504
Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: German Courses Taught in English

GRMN 4550 (3) Senior Seminar in German Studies
This course provides students with a capstone experience through in-depth study of a topic in German Studies, and deepens students' engagement with theories and methodologies informing contemporary German Studies scholarship. Students work closely with faculty to develop a major final research paper or project. Topic varies by semester.
Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) German (GRMN) or School of Education (EDUC) majors only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: German

GRMN 4900 (1-6) Independent Study
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: German

Germanic & Slavic Languages & Literatures

GSLL 2350 (3) Introduction to Jewish Culture
Explores the development and expressions of Jewish cultures across the chronological and geographical map of the Jewish people, with an emphasis on the variety of Jewish ethnicities and their cultural productions, cultural syncretism, and changes, including such issues as sexuality and foodways. Sets the discussion in relevant contexts and looks at cultural representations that include literary, religious and visual texts.
Equivalent - Duplicate Degree Credit Not Granted: JWST 2350
Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Diversity-U.S. Perspective
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Diversity-Global Perspective
Departmental Category: Germanic and Slavic Courses
GSLL 2551 (3) Modern Jewish Literature
Examines Jewish experience through the study of literary texts from around the world, mainly from the 20th and 21st centuries. Discusses issues pertaining to secularism and tradition; diasporas and homelands; modernity and questions of identity raised by the intellectual transitions brought about by political and social emancipation; sexualities; enormous changes wrought by population redistributions, world wars and rapid cultural transformations.
Equivalent - Duplicate Degree Credit Not Granted: JWST 2551
Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Germanic and Slavic Courses

GSLL 3401 (3) The Heart of Europe: Filmmakers and Writers in 20th Century Central Europe
Surveys the major works of 20th century central and central east European film and literature. Examines cultural production in the non-imperial countries and non-national languages of the region including Yiddish, Belarusian, Czech, Hungarian, Polish and Romanian, among others. Traces the rise of nationalism over the course of the century from the age of empires through the "Cold War." Taught in English.
Equivalent - Duplicate Degree Credit Not Granted: JWST 3401
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Germanic and Slavic Courses

GSLL 3600 (3) Contemporary Jewish Societies
Uses transnational lens to explore contemporary debates about Jewish people, places and practices of identity and community; places that Jews have called 'home', and what has made, or continues to make those places 'Jewish'; issues of Jewish homelands and diasporas; gender, sexuality, food and the Jewish body; religious practices in contemporary contexts. Readings drawn primarily from contemporary journalism and scholarship.

Russian

RUSS 1010 (4) Beginning Russian 1
For students with no previous training in Russian.
Equivalent - Duplicate Degree Credit Not Granted: RUSS 1050
Additional Information: Arts Sci Core Curr: Foreign Language
Arts Sci Gen Ed: Foreign Language
Departmental Category: Russian

RUSS 1020 (4) Beginning Russian 2
A continuation of RUSS 1010. Provides a basic introduction to Russian language and life. Covers the basics of Russian grammar; classroom activities develop speaking, reading and comprehension skills. Course will have midterm and final.
Equivalent - Duplicate Degree Credit Not Granted: RUSS 1050
Recommended: Prerequisite RUSS 1010 (minimum grade C-).
Additional Information: Arts Sci Core Curr: Foreign Language
Arts Sci Gen Ed: Foreign Language
Departmental Category: Russian

RUSS 1050 (5) Intensive Beginning Russian
Covers same material as RUSS 1010 and RUSS 1020 combined in one course. Focuses on acquiring basic grammar (all cases for nouns, adjectives and possessives, verb conjugations, in all three tenses), and ability to understand and speak basic everyday Russian. Develops basic reading and writing skills and provides exposure to the fundamentals of the Russian culture.
Equivalent - Duplicate Degree Credit Not Granted: RUSS 1010 or RUSS 1020
Additional Information: Arts Sci Core Curr: Foreign Language
Arts Sci Gen Ed: Foreign Language
Departmental Category: Russian

RUSS 1900 (1-6) Independent Study
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Russian
RUSS 2010 (4) Second-Year Russian 1
Review and continuation of basic skills learned in the first year: reading, writing, speaking, and oral comprehension. Department enforced prerequisite: RUSS 1020 or RUSS 1050 (minimum grade C-).
**Additional Information:** GT Pathways: GT-AH4 - Arts Hum: Foreign Languages
Arts Sci Core Curr: Foreign Language
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Foreign Language
Departmental Category: Russian

RUSS 2020 (4) Second-Year Russian 2
Continuation of RUSS 2010. Department enforced prerequisite: RUSS 2010 (minimum grade C-).
**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Russian Courses Taught in English

RUSS 2211 (3) Introduction to Russian Culture
Provides a chronological overview of civilization in the area now known as Russia, from its beginnings to the end of the Romanov dynasty, paying particular attention to the geographic, social, artistic, economic, and political forces that have combined to give the Russian people and their culture their unique characteristics. Taught in English.
**Additional Information:** Arts Sci Core Curr: Historical Context
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Russian Courses Taught in English

RUSS 2221 (3) Introduction to Modern Russian Culture
Introduces students to major trends in Russian culture from the 1890’s to the present, through the study of literature, art, architecture, music and film in an historical context. Addresses such questions as: how have past events affected Russian society? How can we use knowledge about Russia’s past to understand social and cultural forces today? Taught in English.
**Equivalent - Duplicate Degree Credit Not Granted:** LIBB 2100
**Additional Information:** Arts Sci Core Curr: Historical Context
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Russian Courses Taught in English

RUSS 2222 (3) Sports and the Cold War
Explores the multiple connections between sports and international politics during the Cold War in the Post-War period. Examines how the issues of class, nation, ethnicity, and gender intersect with sports and international politics by studying cases from various sport events since 1945. Taught in English.
**Additional Information:** Arts Sci Core Curr: Historical Context
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Russian Courses Taught in English

RUSS 2241 (3) The Vampire in Literature and the Visual Arts
Introduces students to the folkloric and historic origins of the vampire of contemporary culture. Students will read both Russian and Western literary works, analyzing the image of the vampire as represented in folk narrative, popular fiction and film. Students will learn to apply critical approaches to understanding the vampire metaphorically, symbolically and as a demonized “other”. Taught in English.
**Additional Information:** Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Russian Courses Taught in English

RUSS 2251 (3) Knights and Amazons: Superheroes in Russian Epics and Film
Immerses students in the mythological past of medieval Russia and introduces them to the legendary warrior heroes and heroines through epic narratives, fairy tales, literature, art, film and animation. Taught in English.
**Additional Information:** Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Russian Courses Taught in English

RUSS 2261 (3) The Russian Short Story
Introduces students to the short story as a unique literary form, emphasizing the significant contributions of Russian writers to both the short story genre and its criticism. Familiarizes students with various styles and subgenres of the short story, including the romantic, psychological, and supernatural tale, and allegorical and satirical tale. A good introduction to further literary or Russian studies. Taught in English.
**Additional Information:** Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Russian Courses Taught in English

RUSS 2271 (3) Space, Invention, and Wonder in Fairy Tales, Literature and Film
Explores the themes of space, invention, technology and wonder in fairy tales from Italian, Russian, French, German, and Spanish traditions in order to compare their transformation in different national and historical settings. Students analyze the intersection of fairy tales and science in literature and film. Counts for the Space Minor. Taught in English.
**Equivalent - Duplicate Degree Credit Not Granted:** ITAL 2271
**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Russian Courses Taught in English

RUSS 2471 (3) Women in Russian Culture: From Folklore to the Nineteenth Century
Explores the changing role and cultural images of women as reflected in Russian folklore, historical documents, costumes, icons, paintings and literature from medieval times to 19th century. Focuses on the way Russian women have transgressed boundaries of patriarchy and secured powerful positions in society and culture. Taught in English.
**Additional Information:** GT Pathways: GT-AH2 - Arts Hum: Lit Humanities
Arts Sci Core Curr: Historical Context
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Russian Courses Taught in English

RUSS 2501 (3) Russia Today
Introduces students to post-communist Russia, its politics, values and ideologies. Neither totalitarian nor liberal, contemporary Russia raises numerous questions about such ideological and cultural constructions as neo-liberalism and capitalism, nationalism, globalization, state power and popular vs. high cultures. Taught in English.
**Additional Information:** Arts Sci Core Curr: Contemporary Societies
Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Russian Courses Taught in English
RUSS 3000 (3) Advanced Conversation
Enables students to speak and understand contemporary Russian. Discussion topics and source materials vary. Department enforced prerequisite: RUSS 2010 (minimum grade C).
Repeatable: Repeatable for up to 6.00 total credit hours.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Russian

RUSS 3010 (4) Third-Year Russian 1
Review of Russian grammar coordinated with reading, speaking, writing and understanding modern Russian. Uses some texts from modern Russian literature. Department enforced prerequisite: RUSS 2020 (minimum grade C).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Russian

RUSS 3020 (4) Third-Year Russian 2
Continuation of RUSS 3010. Department enforced prerequisite: RUSS 3010 (minimum grade C).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Russian

RUSS 3060 (4) Advanced Russian for Heritage Speakers (Part 1)
Enhances heritage student competence and performance in Russian language. Offers intensive review of Russian grammar and focuses on developing advanced reading, writing and translation skills. Readings are selected from a wide range of contemporary writings that reflect current issues in Russia.
Equivalent - Duplicate Degree Credit Not Granted: RUSS 4010 or RUSS 5010
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Russian

RUSS 3111 (3) History of Russian Cinema
Surveys Russian cinema in historical and cultural context from early 20th century to the present. Taught in English.
Equivalent - Duplicate Degree Credit Not Granted: CINE 3111
Recommended: Prerequisite RUSS 2221 or CINE 1502.
Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Russian Courses Taught in English

RUSS 3211 (3) Space Race in Russian and American Culture
Explores facts and fantasies of American and Soviet cultural narratives accompanying the Space Race, focusing on the production of recorded history as a process of mythmaking during the Cold War. Ponders the significance of presenting astronauts as national heroes and constructing national identities around the triumphs and failures of the competing space programs in science, art, music, film, and journalism.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Russian Courses Taught in English

RUSS 3231 (3) Laughter in Slavic Cultures
Examines forms, genres and social functions of laughter in Slavic cultures (Russian, Polish, Czech, Serbian and others) and provides an introduction to literature and film of Eastern Europe. All readings are in English. Taught in English.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Russian Courses Taught in English

RUSS 3241 (3) Red Star Trek: Russian Science Fiction Between Utopia and Dystopia
Examines Russo-Soviet science fiction in literature and film. Within this popular genre, writers conceive and criticize social utopias, thus creating works situated between the poles of utopia and dystopia. Through discussions of Soviet and post-Soviet science fiction the course introduces a Russo-Soviet "alternative modernity" and studies its historical development. All readings are in English. Taught in English.
Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Russian Courses Taught in English

RUSS 3251 (3) Arctic Noir: Environment, Landscape and Literature of the Far North
Explores 19th- and 20th-century Russian and Nordic literature, film and television with a special emphasis on the role of extremes of geography and climate and physical space on the development of plot and character. Taught in English.

RUSS 3301 (3) Contemporary Issues in Russian Film
Explores the relationship between politics, economics, aesthetics, and the way moral and social issues are treated in noteworthy Russian films from the last 20 years. Taught in English.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Russian Courses Taught in English

RUSS 3333 (3) Spies Like Us: Espionage in the Culture of the Cold War and Beyond
Explores the figure of the spy in Western and Soviet/post-Soviet imagination of the Cold War period and after. Focuses on the constructions and transformations of the "enemy" concept in modern and post-modern societies. Taught in English.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Russian Courses Taught in English

RUSS 3601 (3) Russian Culture Past and Present
Russian culture from the ninth century to the present. Focuses on interdisciplinary exploration of literature, folklore, art, architecture and music through study in St. Petersburg. Taught in English. Offered abroad only.
Additional Information: Arts Sci Core Curr: Historical Context
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Russian Courses Taught in English

RUSS 3701 (3) Slavic Folk Culture: Ideals and Values in the Contemporary World
Explores contemporary Slavic and American folk practices and investigates the possible origins and consequences of such practices. Focuses upon the value systems these practices represent, and ways that core values help to define identities and cultures. Topics include folk religion, magic, healing, life cycle and calendar rituals and folk music. Taught in English.
Additional Information: Arts Sci Core Curr: Ideals and Values
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Russian Courses Taught in English
RUSS 3705 (3) Crimes of Passion: Gender and Sexual Politics in Tolstoy's Russia
Examines the historical evolution of gender and sexual politics and the status of women in the late Imperial Russian culture, with particular attention to the writings of Leo Tolstoy and his masterpiece Anna Karenina. Topics-based survey considers debates around marriage, sexuality and gender equality through analysis of primary text by Tolstoy and his contemporaries, as well as secondary materials in gender studies, literary criticism and intellectual history. Taught in English.
Additional Information: Arts Sci Core Curr: Human Diversity

RUSS 3900 (1-6) Independent Study
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Russian

RUSS 3930 (1-6) Russian Internship
Provides an academically supervised opportunity for upper-division students to earn credit while working for public or private organizations. Students apply skills and knowledge earned in the major, and supplement their work experience through directed readings and assignments.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to students with 57-180 credits (Junior or Senior) Russian (RUSS) majors only.
Additional Information: Departmental Category: Russian

RUSS 4010 (4) Advanced Conversation and Composition 1
Review of all aspects of Russian grammar, with a focus on difficulties, vocabulary for communication at an advanced level and contextual usage. Includes intensive writing and editing of compositions on a variety of topics, reading of authentic Russian texts, interactive work with Russian media and fluent conversation in Russian that moves beyond functional proficiency. Department enforced prerequisite: RUSS 3020 (minimum grade C-).
Equivalent - Duplicate Degree Credit Not Granted: RUSS 3060 RUSS 5010
Repeatable: Repeatable for up to 8.00 total credit hours.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Russian

RUSS 4020 (4) Advanced Conversation and Composition 2
Review of all aspects of Russian grammar, with a focus on difficulties, vocabulary for communication at an advanced level and contextual usage. Includes intensive writing and editing of compositions on a variety of topics, reading of authentic Russian texts, interactive work with Russian media and fluent conversation in Russian that moves beyond functional proficiency. Department enforced prerequisite: RUSS 4010 (minimum grade C-).
Equivalent - Duplicate Degree Credit Not Granted: RUSS 4060 RUSS 5020
Repeatable: Repeatable for up to 8.00 total credit hours.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Russian

RUSS 4050 (4) Professional Russian
Introduces stylistic and idiomatic forms of Russian used in business, politics, media and the Internet. Develops new vocabulary with a special focus on fluency of speech and written communication skills. Offers immersion into the world of contemporary Russian media, politics and culture. Formerly RUSS 3050.
Equivalent - Duplicate Degree Credit Not Granted: RUSS 5050
Repeatable: Repeatable for up to 8.00 total credit hours.
Recommended: Prerequisite RUSS 3020.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Russian

RUSS 4060 (4) Advanced Russian for Heritage Speakers (Part 2)
Enhances heritage student competence and performance in Russian language. Offers intensive review of Russian grammar and focuses on developing advanced reading, writing and translation skills. Readings are selected from a wide range of contemporary writings that reflect current issues in Russia. Department enforced prerequisite: RUSS 3060 or RUSS 4010 (minimum grade C-).
Equivalent - Duplicate Degree Credit Not Granted: RUSS 4020 or RUSS 5020
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Russian

RUSS 4120 (3) Russia after Communism: Post-Soviet Politics and Culture
Explores the process of the re-invention and re-shaping of the Russian national identity after the collapse of the communist society. Topics will include the formation of neoconservative and neo-imperialist agenda (Ukraine crisis), growth of the anti-western attitudes and the protest movement against Putin's politics. Taught in English.
Equivalent - Duplicate Degree Credit Not Granted: RUSS 5120
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Russian Courses Taught in English

RUSS 4220 (3) Topics in Russian Culture
Selected topics in Russian literature, film, art and music. Taught in English.
Equivalent - Duplicate Degree Credit Not Granted: RUSS 5210
Repeatable: Repeatable for up to 9.00 total credit hours.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Russian Courses Taught in English

RUSS 4221 (3) Stalinism: Culture and Society
Examines Soviet society and culture of Stalin period (1929-1953). The Great Terror, communist ideology, shady, commercial practice, political intrigues and show trials, as well as many other aspects of Stalinism will be discussed. Course materials include historical studies, documents, memoirs, diaries, novels and films of or about the period. Taught in English.
Equivalent - Duplicate Degree Credit Not Granted: RUSS 5221
Additional Information: Arts Sci Core Curr: Ideals and Values
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Russian Courses Taught in English
**RUSS 4230 (3) Russian Cultural Idioms**
Focuses on the critical analysis of the Russian cultural discourse through Russian idioms. Taught in Russian. Department enforced prerequisite: RUSS 2020 (minimum grade C-).
Equivalent - Duplicate Degree Credit Not Granted: RUSS 5230
Repeatability: Repeatable for up to 6.00 total credit hours.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Russian

**RUSS 4301 (3) American-Russian Cultural Relations**
Surveys the development of American-Russian cultural relations from the second half of the 18th century to the present. Examines the character and significance of Russian-American relations in social, intellectual, artistic, and other spheres from a comparative perspective. Taught in English.
Equivalent - Duplicate Degree Credit Not Granted: RUSS 5301
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Recommended: students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Core Curr: Historical Context
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Russian Courses Taught in English

**RUSS 4401 (3) The Russian Jewish Experience**
Examines the experience of Russian Jews from the late 19th century to the present through fiction and films dealing with the Bolshevik Revolution, Stalinism, Holocaust, and post-Stalin period; the place of Jews as individuals and a minority within Russian and Soviet society; challenges of co-existence of Jews and their neighbors; and emigration to America and elsewhere in the late 20th and early 21st centuries. Taught in English.
Equivalent - Duplicate Degree Credit Not Granted: RUSS 5401 and JWST 4401
Recommended: Prerequisite any 1000 or 2000-level undergraduate literature course.
Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Russian Courses Taught in English

**RUSS 4431 (3) Dostoevsky**
Focuses on close reading of major novels and other works by Dostoevsky, one of the most important psychological novelists in modern literature, a profound religious thinker and the greatest crime novelist in the world. Taught in English.
Equivalent - Duplicate Degree Credit Not Granted: RUSS 5431
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Russian Courses Taught in English

**RUSS 4441 (3) Tolstoy**
Examines the development of Tolstoy's thought and literary style through study of one of his novels and short works from different periods of Tolstoy's writing. Taught in English.
Equivalent - Duplicate Degree Credit Not Granted: RUSS 5441
Recommended: Prerequisite lower division literature course.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Russian Courses Taught in English

**RUSS 4451 (3) Chekhov**
Analyzes the life and creative works of the author of some of the funniest and some of the gloomiest stories in Russian literature. Examines Chekhov's major plays that laid the foundation for modernist theatre. Taught in English.
Equivalent - Duplicate Degree Credit Not Granted: RUSS 5451
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Russian Courses Taught in English

**RUSS 4471 (3) Women in 20th-21st Century Russian Culture**
Examines issues facing women in 20th-21st century Russia, based on study of current events, history, literature, posters and film. Studies images of women as Amazons and rebels, salon hostesses and poets, New Soviet Women and women in combat, prostitutes and mothers. Taught in English.
Equivalent - Duplicate Degree Credit Not Granted: WGST 4471 and RUSS 5471
Recommended: Prerequisite lower level literature or culture course.
Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Diversity-Global Perspective
Departmental Category: Russian Courses Taught in English

**RUSS 4481 (3) Rogues to Revolutionaries: Russian Rebels, Past and Present**
Explores the tradition of dissent and opposition in Russian culture, from the medieval period to present, approaching forms of rebellion (religious, political, social, aesthetic) in historical context. This survey in intellectual history will trace this phenomenon across historical documents, literary texts, film, and the fine and performing arts, pairing these primary materials with readings in Russian history. Taught in English.
Equivalent - Duplicate Degree Credit Not Granted: RUSS 5481 and IAFS 3621
Grading Basis: Letter Grade
Additional Information: Arts Sci Core Curr: Historical Context
Arts Sci Gen Ed: Distribution-Arts Humanities

**RUSS 4811 (3) 19th Century Russian Literature**
Surveys background of Russian literature from 1800 to 1900. Russian writers and literary problems in the 19th century emphasizing major authors: Pushkin, Lermontov, Gogol, Dostoevsky, Turgenev, Tolstoy, and Chekhov. Taught in English.
Equivalent - Duplicate Degree Credit Not Granted: HUMN 4811
Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Russian Courses Taught in English

**RUSS 4821 (3) 20th Century Russian Literature and Art**
Interdisciplinary course emphasizing the influence of literature and art in 20th century Russian literature. Follows the changing cultural landscape from the time when Russia was in the vanguard of modern European literature to the period of Stalinism. Taught in English.
Equivalent - Duplicate Degree Credit Not Granted: HUMN 4821
Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Russian Courses Taught in English
RUSS 4831 (3) Contemporary Russian Literature
Acquaints students with the most representative works of Russian writers after the collapse of the Soviet regime. Examines the relationships between ideological concepts and aesthetics, and the treatment of moral and social issues in recent literary works. All readings are in English. Taught in English.
Equivalent - Duplicate Degree Credit Not Granted: RUSS 5831
Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Core Curr: Contemporary Societies
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Russian Courses Taught in English

RUSS 4841 (3) History of Modern Russian Drama
Examines Russian plays of the 20th and 21st centuries (from Chekhov to contemporary authors) in the context of the Western dramatic theory. Surveys most influential directorial styles from Stanislavsky’s “method” to contemporary verbatim theatre. All readings are in English. Taught in English.
Equivalent - Duplicate Degree Credit Not Granted: RUSS 5841
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Russian Courses Taught in English

RUSS 4850 (4) Russian Film and Society (taught in Russian)
Examines topics in Russian film and TV series from sociohistorical and cultural perspectives, while simultaneously developing students’ auditing, comprehension, and speaking skills in Russian language. Critical thinking and analytical approaches will be key to working through the course’s material. Screenings, discussions, and written assignments are in Russian. Taught in Russian.
Equivalent - Duplicate Degree Credit Not Granted: RUSS 5850
Repeatable: Repeatable for up to 8.00 total credit hours.
Recommended: Prerequisites RUSS 2020 or equivalent.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Russian

RUSS 4851 (3) Critical Thinking: Russian Film and Society (taught in English)
Through structured discussions, selected readings and written assignments, examines topics in Russian film from socio-historical and cultural studies perspectives. Taught in English.
Equivalent - Duplicate Degree Credit Not Granted: RUSS 5851
Repeatable: Repeatable for up to 6.00 total credit hours.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Russian Courses Taught in English

RUSS 4861 (3) Absurd and Supernatural in Russian Literature
Studies themes of grotesque, bizarre, surreal, absurd, supernatural and fantastic in Russian short stories and novels of the 19th and 20th centuries. Discusses works by Pushkin, Gogol, Dostoevsky, Kharmas, Bulgakov, Sinyavsky, Petrushevskaya and Pelevin within the contexts of Russian folklore, Freud and Jung’s interpretations of jokes and dreams, and Romanticism. Taught in English.
Equivalent - Duplicate Degree Credit Not Granted: RUSS 5861
Recommended: Prerequisite one lower level literature or culture course.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Russian Courses Taught in English

RUSS 4900 (1-6) Independent Study
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Russian

Scandinavian

SCAN 1202 (3) Tolkien's Nordic Sources and the Lord of the Rings
Examines the Nordic aspect of J.R.R. Tolkien's work, especially The Lord of the Rings. Concentrates on the Nordic saga tradition, mythology, folklore and fairy tales Tolkien used as his sources. Students will explore the transformations of these sources from prehistoric times to contemporary cinematic adaptations, while paying special attention to cultural appropriations, national revisions and political alterations. Taught in English.
Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Nordic Studies Courses Taught in English

SCAN 1900 (1-6) Independent Study
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Nordic Studies Courses Taught in English

SCAN 2201 (3) Introduction to Modern Nordic Culture and Society
Provides a comprehensive introduction to modern Nordic culture and society. Surveys the history of Nordic countries and examines their culture using art, architecture, literature, and film. Studies social issues, environmental concerns, and political patterns. In profiling aspects of culture and society unique to Nordic countries, students arrive at a conception of a collective Nordic identity. Taught in English.
Additional Information: Arts Sci Core Curr: Contemporary Societies
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Nordic Studies Courses Taught in English

SCAN 2202 (3) The Vikings
Examines the social, cultural, technological, and artistic backgrounds of the Viking experience, charting the history of the period both within the Nordic region and Europe as well as North America. Additionally, looks at some of the lasting influences of the Vikings on Western civilization. Taught in English.
Additional Information: Arts Sci Core Curr: Historical Context
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Nordic Studies Courses Taught in English

SCAN 2900 (1-6) Independent Study
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Nordic Studies Courses Taught in English

SCAN 3020 (3) Advanced Readings in Scandinavian
Develops the type of advanced reading knowledge of the four closely related Scandinavian languages (Swedish, Danish and the two Norwegian standards) that will prepare students for their senior thesis and for possible graduate work. Readings will help students see relationships and connections operating across national and linguistic borders within the Nordic region. Department enforced prerequisites: NORW 2120 and NORW 3900 or SWED 3900 (all minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Norwegian
Departmental Category: Swedish
SCAN 3101 (3) Global Seminar: Identity, Arts & Ethics in Contemporary Norway
Explores contemporary Norwegian society from an interdisciplinary, global perspective. Norway is recognized throughout the world for a high standard of living, ethical business culture, and rich art, literature, and cinema. We will examine how Norwegian society has adapted to its recent transformation from being one of the poorest countries in Europe to being one of the richest in the world. Offered through Education Abroad. Taught abroad only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

SCAN 3110 (3) Topics in Contemporary Nordic Society and Culture
Provides insight into cultural adaptations, political struggles and social transformations taking place in the contemporary Nordic world. Subjects treated vary according to current developments in the region, student interest and faculty availability.
Additional Information: Departmental Category: Nordic Studies Courses Taught in English

SCAN 3201 (3) Contemporary Nordic Society and Culture
Explores contemporary Nordic culture and society with special focus on Iceland. Emphasis is on the relationship between historical, geographic, artistic, and political forces in Iceland and their effects on culture and society. Provides insight into the life and attitudes of contemporary Icelanders and stresses their place in the global culture of today. Taught in English.
Recommended: Prerequisite SCAN 2201.

SCAN 3202 (3) Old Norse Mythology
Surveys the mythology and heathen cult practices of the Old Norse world. Students learn to read mythological texts and study the major gods (Odin, Thor, Frey and Freyja, among others), along with other mythological beings. Examines and evaluates evidence for beliefs and cult practices in texts, art, archeological finds and other sources. Taught in English.

SCAN 3203 (3) 19th & 20th Century Nordic Literature
Examines the Nordic region's influence on social realism, expressionism, and postwar literature, including such themes as women in society, nature and industrialization, and identity and angst. May include works by Ibsen, Strindberg, Dinesen, and Nobel Prize winners Lagerlof, Hamsun, Undset, and Lagerkvist. Taught in English.

SCAN 3204 (3) Medieval Icelandic Sagas
Advanced introduction to medieval Icelandic saga with readings in the family, outlaw, skald, and legendary sagas as well as the main scholarly approaches to this unique literature. Topics include honor, blood feud, fate, sexuality/gender, oral composition, and legend. Taught in English.

SCAN 3205 (3) Scandinavian Folk Narrative
Introduces the rich tradition of Scandinavian oral narrative. Looks at relationships between the various genres of oral narrative and their historical, social, and cultural contexts. Genres studied may include ballad, fairy tale, rural legend, and urban legend. Explores various interpretive methodologies. Taught in English.

SCAN 3206 (3) Nordic Colonialisms
Examines Nordic colonial enterprise and the relationship between the Scandinavian center and colonial peripheries from the Arctic to the Caribbean, Africa, and India. Studies colonial and postcolonial cultures, and postcolonial criticism and theory. Taught in English.

SCAN 3208 (3) Women in Nordic Society: Modern States of Welfare
Examines the role and status of women and marginalized social classes in the Nordic countries, whose societies have been heralded as egalitarian models since the twentieth century. Texts include a variety of media, from literature to sociological works to artifacts of political and popular culture. Taught in English.
Equivalent - Duplicate Degree Credit Not Granted: WGST 3208

SCAN 3209 (3) Contemporary Nordic Literature and Film
Advanced introduction to contemporary Nordic literature and film. Readings/screenings of recent translated Nordic texts and films, presenting a broad spectrum of contemporary issues, along with current critique and theoretical approaches. Topics: history, culture, translation, gender/sexuality, national identity, minority issues, etc. Taught in English.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Nordic Studies Courses Taught in English

SCAN 3251 (3) Arctic Noir: Environment, Landscape and Literature of the Far North
Explores 19th- and 20th-century Russian and Nordic literature, film and television with a special emphasis on the role of extremes of geography and climate and physical space on the development of plot and character. Taught in English.
Equivalent - Duplicate Degree Credit Not Granted: RUSS 3251

SCAN 3301 (3) Radical Nationalism in Contemporary Northern Europe
Examines the current rise of National Socialists, white supremacists, ethnic separatists, anti-Islam activists and social and cultural ultraconservatives in northern Europe. Treats extremist nationalism as a social, cultural, aesthetic, intellectual and political movement. Consults scholarship from sociology, criminology and political science, as well as music, literature, art and film. Taught in English.
Equivalent - Duplicate Degree Credit Not Granted: IAFS 3630
SCAN 3302 (3) Witchcraft and Magic in Scandinavia
Investigates witchcraft and magic in Scandinavian cultures from the Viking Age to the Burning Age. The class examines witchcraft and magic in the broad perspective of Scandinavian cultural history, tracing traditions of magic from the earliest sources in runes to film and literature in the modern era. We will investigate the styles of magic and cultural attitudes to it in Iceland, Norway, Denmark, and Sweden.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

SCAN 3506 (3) Scandinavian Drama
Examines the many contributions of Scandinavian dramatists to world theater from the 18th century to the present. With emphasis on Holberg, Bjornson, Ibsen, Strindberg, and Bjorneboe, surveys Enlightenment comedy, national romanticism, realism, naturalism, symbolism, expressionism, and Brechtian epic theater. Taught in English.
Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Nordic Studies Courses Taught in English

SCAN 3631 (3) Arctic Society and Culture
Investigates representations of the Arctic in literature, art, cinema, media and scientific, and geographical writing over the past century and a half, spanning material from North America, Britain, continental Europe and the Nordic region. Interpretive approaches include ecocriticism; post-colonialism; literary studies; indigenous studies; visual, film and media theory; Cold War studies.
Equivalent - Duplicate Degree Credit Not Granted: IAFS 3631
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Nordic Studies Courses Taught in English

SCAN 3632 (3) Scandinavia and the European Union
Examining the role that the EU plays in the Nordic region, this course is an introduction to the complex relationship between the Nordic nation states and the European project. We explore how the EU is perceived in the Nordic countries and investigate why the Nordic region is reluctant in its relation to the European Union.
Equivalent - Duplicate Degree Credit Not Granted: IAFS 3632
SCAN 3900 (1-6) Independent Study
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Swedish

**German Studies - Bachelor of Arts (BA)**

The major in German studies is an interdisciplinary program focusing on study of the literary, artistic and philosophical aspects of German culture in the past and the present; the major historical events and developments in Germany and its neighboring countries; and the current political institutions and dynamics in Germany within the broader European framework.

**Education Abroad**

The department strongly recommends that all majors take part in study abroad and offers competitive scholarships to support study abroad. The university offers study abroad programs in Regensburg (academic year or spring semester) and Berlin (academic year, fall, spring or summer semester and internship). Please consult with the major advisor. For more information on study abroad programs, visit the Education Abroad (http://abroad.colorado.edu/) website

**Requirements**

**Program Requirements**

Students must complete the general requirements of the College of Arts and Sciences and the required courses listed below.

The major requirement in German studies is 32 hours beyond GRMN 1020 (with grades of C- or above). Students design their own major in consultation with the undergraduate advisor and a faculty mentor. At least 18 hours taken toward the major must be completed at the 3000 or 4000 level.

NOTE: GRMN 4550 must be taken at CU Boulder.

JWST 4544 History of Yiddish Culture

Total Credit Hours 32-35

1 Students have the option of taking the exam Goethe-Zertifikat B1 or B2 in GRMN 3020 and the Goethe-Zertifikat B2 or C1 in GRMN 4010.

2 With the approval of the German program faculty advisor, one course from another department may be taken in lieu of one of the four courses, provided that the course has a direct link to German studies.

3 GRMN 4450 and GRMN 4460 can be taken with faculty approval and in most cases only after full admission to the teacher education program in the School of Education.

Secondary Teacher Certification Program
In addition to other requirements as stated by CU Boulder’s School of Education, the following courses are required for students in the secondary teacher certification program:

• GRMN 4450 Methods of Teaching German (3)
• GRMN 4460 High School German Teaching (6)

Study Abroad
The department recommends that all majors take part in study abroad. The university’s program in Regensburg provides an academic year and spring semester study abroad program. The Berlin program offers an academic year, fall, spring, summer study abroad and internship opportunity. Please consult with a faculty advisor and visit the Education Abroad (http://abroad.colorado.edu/) website for program-specific information. Scholarships are available to help cover the costs of study abroad.

Graduating in Four Years
Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of “adequate progress” as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress in German studies, students should meet the following requirements:

• Begin to study the language in the freshman year, or have received AP credit.
• In consultation with the major advisor before the end of the drop/add period in the first semester, plan a tentative schedule of courses to be taken over eight semesters.

• Discuss progress toward the degree each semester with the major advisor.

NOTE: Although these requirements apply only in cases in which students are seeking to graduate under the terms of the four-year guarantee, they are good advice for all majors. Consult the major advisor about the major at any time.

Recommended Four-Year Plan of Study
Through the required coursework for the major, students will complete all 12 credit hours of the Arts & Humanities area of the Gen. Ed. Distribution Requirement.

BA and MA in German

The concurrent BAM degree in German studies recognizes the need for master’s-level training upon entering the job market in a variety of sectors that call for highly advanced proficiency in the German language, knowledge of the German-speaking Central Europe and its cultures, and the skills afforded to BA and MA graduates in the humanities (research, analysis, interpretation, translation, communication).

The degree gives highly motivated BA students the opportunity to earn an MA degree using an accelerated undergraduate program in combination with a fifth year of study.

For more information, visit the department’s Concurrent BAM Degree in German Studies (http://www.colorado.edu/gsll/german/undergraduate/concurrent-bama-degree-german-studies/) webpage.

Admissions Requirements

In order to gain admission to the BAM program named above, a student must meet the following criteria:

- Have a cumulative GPA of 3.25 or higher
- Have completed a minimum of 75 credit hours of coursework
- Transfer students must have completed a minimum of 24 credit hours at CU Boulder

Applications (https://www.colorado.edu/gsll/gsll-bama-application/) can be obtained on the Germanic and Slavic Languages and Literatures website (https://www.colorado.edu/gsll/). It is recommended that applications be submitted the spring semester of the third year of study, but late applications will also be accepted.

Students should have completed most of their MAPS/core requirements by the end of their sophomore year. No GRE is required.

Program Requirements

Students may take up to and including 12 hours while in the undergraduate program which can later be used toward the master’s degree. However, only 6 credits may be double counted toward the bachelor’s degree and the master’s degree. Students must apply to graduate with the bachelor’s degree, and apply to continue with the master’s degree, early in the semester in which the undergraduate requirements will be completed.

If you are interested in the BAM degree program, please contact the German MA program (https://www.colorado.edu/gsll/german/graduate/) for more information.

Russian Studies - Bachelor of Arts (BA)

The major in Russian studies is an interdisciplinary program focusing on study of the current cultural and social context, and the literary, artistic, and historical aspects of Russian culture in the past and present. The aim of the language curriculum is to equip students to read, write, speak and understand Russian on a level allowing communication with natives.
and other users of the language. Before registering for a course, students should consult with a departmental advisor concerning appropriate placement.

Students interested in Russian studies should consider a double major in order to increase their career opportunities. Prospective teachers might combine Russian studies with a major in another foreign language, while those preparing for a career in government, business or social services should benefit from a combination of Russian studies and a social science or business major. Students structure their curriculum according to the departmental checklist for majors, in close consultation with a departmental advisor.

Study Abroad
The department strongly recommends that all Russian majors take part in the university summer language program in St. Petersburg. For more information on CU Study Abroad programs, visit the Education Abroad (http://abroad.colorado.edu/) website.

Courses Taught in English
A number of courses are offered in translation. These courses generally require no previous study in the language, history or culture of the area involved, and are open to all interested students, regardless of major.

Requirements
General Requirements
Students must complete at least 30 credit hours in Russian studies, at least 18 of which must be completed at the 3000 or 4000 level, with grades of C- or better (none may be taken as pass/fail).

• RUSS 1010 and RUSS 1020 do not count toward the 30 credit hours required for the major in Russian studies.

• Students may not receive credit for both RUSS 3060 and RUSS 4010 or RUSS 4020 and RUSS 4060. Choose either the RUSS 3060/4060 sequence or the RUSS 4010/4020 sequence.

• Beginning or middle-level language course requirements may be met by transfer credit or by testing out of the course. Students who enter the program at the third-year level must complete at least 18 credit hours in residence in courses numbered 3000 or above with grades of C- or better (none may be taken pass/fail).

• Students who enter at and enroll in Russian language courses at the 3000- or 4000-level may not receive credit for lower-division Russian language courses, unless lower-division language coursework was completed prior to registration for 3000- and 4000-level Russian language courses.

• No course can be used for more than one category.

Students are required to structure their curriculum for the major in close consultation with a departmental advisor. Students with advanced Russian language skills are strongly encouraged to meet with a departmental faculty advisor to discuss language placement. Students who have Russian language transfer credit and/or students who are Russian language native or heritage speakers may enter the program at the upper-division level, up to RUSS 4010, with faculty permission.

In the case of advanced language placement, students will be required to meet with the Russian faculty advisor for Russian course substitutions and recommendations. Students who place out of Russian language courses required for the major must replace the credits with additional coursework in Russian Studies. Any substitutions to major coursework must be preapproved by the Russian faculty advisor.

Graduating Russian studies majors are asked to participate in an annual assessment exercise during their last (spring) semester at the university to help evaluate the quality of the Russian Studies major. Students may also be interested in learning their level of language competence from the standardized online test. Students cannot study for the exams, and they do not affect course grades or graduation in any way.

NOTE: Study abroad is recommended after the second year of language study.

RUSS 4451 Chekhov
RUSS 4841 History of Modern Russian Drama
RUSS 4861 Absurd and Supernatural in Russian Literature

Elective
One other 3000- to 4000-level RUSS or GSLL culture/literature or language course, or a course in another department pertaining to Russia, upon consent of advisor.

Total Credit Hours 32

1 Students may not receive credit for both RUSS 3060 and RUSS 4010 or RUSS 4020 and RUSS 4060. Choose either the RUSS 3060/RUSS 4060 sequence or the RUSS 4010/RUSS 4020 sequence.

Graduating in Four Years
Consult the Four-Year Guarantee Requirements (https://www.colorado.edu/advising/programs-requirements/germanic-slavic-languages-literatures/) for information on eligibility. The concept of "adequate progress" as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major.

Recommended four-year plans of study appear on the Four-Year Plans (p. 342) tab. To maintain adequate progress in Germanic or Russian studies, students should meet the following requirements:

- Begin to study the language in the freshman year, or have received AP credit.
- In consultation with the major program advisor before the end of the drop/add period in the first semester, plan a tentative schedule of courses to be taken over eight semesters.
- Discuss progress toward the degree each semester with the major advisor.

NOTE: Although these requirements apply only in cases in which students are seeking to graduate under the terms of the four-year guarantee, they are good advice for all majors. Consult the program advisor about the major at any time.

Recommended Four-Year Plans of Study
Through the required coursework for all tracks of the major, students can complete all 12 credit hours of the Arts & Humanities area of the Gen Ed Distribution Requirement. Depending on the courses selected from options, students can potentially complete some credit hours in the Social Sciences area of the Gen Ed Distribution Requirement and the Global Perspective component of the Gen Ed Diversity Requirement.

Bachelor's–Accelerated Master's Degree Program(s)

The Bachelor's–Accelerated Master's (BAM) degree program options offer currently enrolled CU Boulder undergraduate students the opportunity to receive a bachelor's and master's degree in a shorter period of time. Students receive the bachelor's degree first, but begin taking graduate coursework as undergraduates (typically in their senior year). Because some courses are allowed to double count for both the bachelor's and the master's degrees, students receive a master's degree in less time and at a lower cost than if they were to enroll in a stand-alone master's degree program after completion of their baccalaureate degree. In addition, staying at CU Boulder to pursue a bachelor's–accelerated master's program enables students to continue working with their established faculty mentors.

BA and MA in Russian Studies

Highly motivated undergraduates majoring in Russian studies at CU Boulder have the opportunity to enter a BAM program, thereby earning both the BA and the MA in five years. The accelerated degree program offers a unique academic credential designed to produce skilled graduates for a variety of occupations.

Admissions Requirements

In order to gain admission to the BAM program named above, a student must meet the following criteria:

- Have a cumulative GPA of 3.0 or higher and a minimum GPA of 3.25 for all Russian Studies courses
- Have completed a minimum of 75 credit hours of coursework
- Transfer students must have completed a minimum of 24 credit hours at CU Boulder

It is recommended that applications be submitted the spring semester of the third year of study, but late applications will also be considered. Two letters of recommendation indicating strong potential for advanced, intensive work in Russian also required. Students should have completed most of their MAPS/Core requirements by the end of the sophomore year. Only CU Boulder students may apply.
Program Requirements
Students may take up to and including 12 hours while in the undergraduate program, which can later be used toward the master's degree. However, only 6 credits may be double counted toward the bachelor's degree and the master's degree. Students must apply to graduate with the bachelor's degree, and apply to continue with the master's degree, early in the semester in which the undergraduate requirements will be completed.

BAM students are expected to take graduate courses in the fourth and fifth years only.

If you are interested in the BAM degree program, please contact the Russian MA program (https://www.colorado.edu/gsll/graduate/). For more information, visit the BA/MA Degree in Russian Studies (https://www.colorado.edu/gsll/russian/undergraduate/concurrent-bama-degree-russian-studies/) webpage.

Learning Outcomes
The following areas are central to the undergraduate degree in Russian:

- An awareness of the fundamental outlines of the history of Russian literature and culture from the Middle Ages to the present day.
- Familiarity with the major Russian creative writers of the nineteenth, twentieth and twenty-first centuries.
- Familiarity with the historical context of Russian literature and culture.
- An awareness of basic critical methodologies as they relate to the study of Russian literature and culture.

In addition, students with a degree in Russian are expected to acquire the ability to:

- Comprehend contemporary Russian, written or spoken, to a degree permitting sophisticated analysis of cultural texts.
- Analyze Russian literary texts and give a reasoned response to them in literate English.
- Write and converse in Russian at their own intellectual level.

German Studies - Minor
The minor in German studies is an interdisciplinary program focusing on study of German culture, including contemporary German society, current political institutions and dynamics in Germany within the broader European framework, and the history of German literature, art, politics, and philosophy.

Declaration of a minor in German studies is open to any student enrolled at CU Boulder, regardless of college or school.

Requirements
Students must complete 20 credit hours as directed below, with grades of C- or above. The GPA for all coursework taken in the minor department must be equal to 2.00 (C) or higher. Students may not apply more than 9 hours of transfer credit (including 6 upper-division credits) toward the minor. Transfer courses must be approved by the department.

Electives
At least one of the following upper-division courses taught in German:

- GRMN 3030 Business German
- GRMN 3110 German Literature from the Avant-garde to the Postmodern
- GRMN 3120 German Literature from the Enlightenment to Expressionism
- GRMN 3130 Issues in German Philosophy and Literature
- GRMN 3140 Current Issues in German Literature
- GRMN 3150 Issues in German Politics and Literature
- GRMN 3520 Open Topics in the Cultural Context
- GRMN 4010 Advanced German III
- GRMN 4330 The Age of Goethe
- GRMN 4340 Seminar in German Literature

One additional GRMN literature, film or culture course (any level) taught in English (listed below) or German (listed above) 3

- GRMN 1601 Germany Today
- GRMN 1602 Metropolis and Modernity
- GRMN 1701 Nature and Environment in German Literature and Thought
- GRMN 2301 Inside Nazi Germany: Politics, Culture, and Everyday Life in the Third Reich
- GRMN 2501 Miniatures of Modern Life: Introduction to Short Fiction
- GRMN 2502 Representing the Holocaust
- GRMN 2503 Fairy Tales of Germany
- GRMN 2601 Kafka and the Kafkaesque
- GRMN 2603 Moral Dilemmas in Philosophy and Literature
- GRMN 3401 The German Experience in North America
- GRMN 3501 The German-Jewish Experience: From the Enlightenment to the Present
- GRMN 3502 Literature in the Age of Goethe
- GRMN 3503 German Film Through World War II
- GRMN 3504 Topics in German Film
- GRMN 3505 The Enlightenment: Tolerance and Emancipation
- GRMN 3506 Tracing the Criminal: Crime in 19th C Society and Culture
Nordic Studies - Minor

Courses are offered in English on Nordic culture and civilization. Courses are also offered in Swedish and Danish language and may be offered in Norwegian and/or Finnish language. In addition, there is an exchange program with Uppsala University in Sweden and with the University of Copenhagen in Denmark (DIS).

The language courses satisfy College of Arts and Sciences language requirements for the BA and BFA degrees.

Requirements

Declaration of a minor is open to any student enrolled at CU Boulder, regardless of college or school.

A minor in Nordic Studies requires the completion of 18 credit hours. A minimum of 9 credit hours must be taken in upper division courses. All courses used to fulfill requirements for the minor must receive a grade of C- or better and the GPA for all coursework taken in the minor department must be equal to 2.00 (C) or higher; no courses may be taken pass/fail.

1. Students who take GRMN 2030 cannot also receive credit for GRMN 2010 and GRMN 2020, and must take one additional 3-credit GRMN course toward the minor, such that the total number of credits for the minor equals 20.

2. Students have the option of taking the exam Goethe-Zertifikat B1 in GRMN 3020.

Total Credit Hours 18

1. FINN 2010, FINN 1020, NORW 2110, NORW 2120 and NORW 3900 are not currently being offered by GSLL. DANE 1010, DANE 1020, DANE 2010, SWED 1110, SWED 1120, SWED 2010 and SWED 2020 are currently being offered by GSLL.

2. SCAN 3206, SCAN 3208 SCAN 3209 and SCAN 3210 may be counted either toward Language, Culture and Society or toward Literature, but not both.
Russian Studies - Minor

The Russian minor introduces students to the basics of Russian Studies. Students fulfilling requirements for Russian minor must complete or test out of Russian language courses through RUSS 2020 and take a number of survey courses in culture and literature.

Requirements

Declaration of a minor in Russian studies is open to any student enrolled at CU Boulder, regardless of college or school.

A minor in Russian requires the completion of 20 credit hours, 9 of which must be upper-division credit hours. All courses used to fulfill requirements for the minor must receive a grade of C- or better. The GPA for all coursework taken in the minor department must be equal to 2.00 (C) or higher. No courses applied to the minor may be taken pass/fail. Students may not apply more than 9 hours of transfer credit toward the minor. Transfer courses must be approved by the department.

One additional 2000-4000 level RUSS course 3

Total Credit Hours 20-21

1 Heritage speakers should take RUSS 3060 and RUSS 4060 as well as any other 4000-level Russian language course in lieu of RUSS 2010 and RUSS 2020. In this case, 18 credit hours will be sufficient for the minor if other requirements are fulfilled.

2 Courses cannot fulfill more than one requirement.

History

Historians study the past, in all of its complexity, to better understand our contemporary world and the forces that created it. Historians analyze change over time, and they use archival and other primary-source evidence to build interpretations that explain change and put it into context. In seeking to understand historical subjects on their own terms, and by appreciating the diverse perspectives of past actors, students of history develop empathy even as they rigorously engage with the ethical dimensions of past human decisions and actions. When students understand the past, they recognize their power to shape the present and the future.

History faculty conduct research and teach courses in a wide range of eras—from ancient to modern times—and across most major world areas including Africa and the Middle East, South and East Asia, Europe and the Americas. History faculty also pursue multiple methodologies and approaches, including cultural, diplomatic, demographic, economic, environmental, ethnic, gender, intellectual, legal, political, religious, social and transnational history.

Many students choose history as a major or minor because of their fascination with the rich imaginative terrain of the past, but the study of history is also practical. In the complex and contentious world in which we live, history provides the tools for thoughtful public citizenship. Historians are essential experts in helping us to navigate contemporary controversies, and the study of history cultivates the interpersonal skills and cultural awareness essential to heightening civic discourse and engagement. As importantly, students of history gain valuable skills that prepare them for careers in many fields. In this knowledge economy, employers increasingly want employees who can write and speak clearly and persuasively, who can read deeply and critically, who can think independently and ethically, who can do complex research and make cogent evidence-based arguments, who can locate relevant sources and discern good information from bad, who understand how and why change occurs, who are culturally literate and understand the complex
world in which we live, and who can manage the diversity of the modern workplace in all of its forms. These are skills you will gain through the study of History, and they are highly valued by today's employers.

We welcome students who wish to develop the knowledge, skills and habits of mind essential to the discipline of history. Studying history will hone your abilities in reasoning, research, analysis and expression, and it will prepare you to participate in, and adapt to, an increasingly complex and interconnected world of continual change over time.

**Bachelor's Degree**
- History - Bachelor of Arts (BA) (p. 371)

**Minor**
- History - Minor (p. 374)

**Faculty**
While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Departmental Category: Asia Content

HIST 1800 (3) Introduction to Global History
The first cornerstone course for history majors applies a broad perspective to the global past in order to illuminate how common historical patterns and processes, as well as unique elements, shaped the human experience. Using a thematic approach, all topical variations of this course highlight cross-cultural interactions among societies, and, when relevant, how historical processes that began centuries ago still impact the contemporary world. Topics will vary by section. Department enforced prerequisite: 3 hours of any history coursework.

Requisites: Restricted to students with 27-180 credits (Sophomore, Junior, or Senior) History (HIST) majors and minors only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Methodological, Comparative, and Global

HIST 1818 (3) Jewish History to 1492
Focus on Jewish history from the Biblical period to the Spanish Expulsion in 1492. Study the origins of a group of people who call themselves, and whom others call, Jews. Focus on place, movement, power/powerlessness, gender, and the question of how to define Jews over time and place. Introduces Jews as a group of people bound together by a particular set of laws; looks at their dispersion and diversity; explores Jews' interactions with surrounding cultures and societies; introduces the basic library of Jews; sees how Jews relate to political power.

Equivalent - Duplicate Degree Credit Not Granted: JWST 1818 and RLST 1818

Additional Information: Arts Sci Core Curr: Historical Context
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Diversity-Global Perspective
Departmental Category: World Areas: Specific Regions
Departmental Category: Asia Content

HIST 1623 (3) Introduction to Central and East European History since 1770
Examines major themes and events in the history of East-Central Europe from the late 1700s to the present. Themes include the impacts of nationalism, fascism, liberal democracy and communism in shaping the history of the region. Topics include World War I, World War II and the Holocaust, the Cold War, the fall of Communism, the Ukrainian revolution and more.

Equivalent - Duplicate Degree Credit Not Granted: CEES 1623

Additional Information: Arts Sci Core Curr: Historical Context
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Europe: Specific Countries
HIST 1828 (3) Jewish History Since 1492
Surveys the major historical developments encountered by Jewish communities beginning with the Spanish Expulsion in 1492 up until the present day. Studies the various ways in which Jews across the modern world engaged with the emerging notions of nationality, equality and citizenship, as well as with new ideologies such as liberalism, socialism, nationalism, imperialism and antisemitism.
Equivalent - Duplicate Degree Credit Not Granted: JWST 1828 and RLST 1828
Additional Information: GT Pathways: GT-HI1 - History
Arts Sci Core Curr: Historical Context
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: World Areas: Specific Regions

HIST 1830 (3) Global History of Holocaust and Genocide
Examines the interplay of politics, culture, psychology and sociology to try to understand why the great philosopher Isaiah Berlin called the 20th century, "The most terrible century in Western history." Our focus will be on the Holocaust as the event that defined the concept of genocide, but we will locate this event that has come to define the 20th century within ideas such as racism, imperialism, violence, and most important, the dehumanization of individuals in the modern world.
Equivalent - Duplicate Degree Credit Not Granted: JWST 1830 and RLST 1830
Grading Basis: Letter Grade
Additional Information: Arts Sci Core Curr: Historical Context
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Diversity-Global Perspective
Departmental Category: Methodological, Comparative, and Global

HIST 1830 (3) Global History of Holocaust and Genocide
Examines major themes in the development of colonial societies in North America from the 15th to the early 19th centuries. Explores intercultural relations, economic development, labor systems, religion and society, and family life. Specific course focus may vary.
Additional Information: GT Pathways: GT-HI1 - History
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: United States: Chronological Periods

HIST 2100 (3) Revolution in History
Examines the causes, character, and significance of political revolution in world history. Concentrating on one of the major revolutions of modern history, it examines why revolutions occur, who participates in revolution, and to what effect. Specific course focus varies.
Additional Information: Arts Sci Core Curr: Historical Context
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Methodological, Comparative, and Global

HIST 2110 (3) History of Early Modern Societies
Examines major themes in Early Modern history in a variety of global contexts. Issues to be explored could include intellectual developments, religion, popular culture, social history, economic and political changes, and states and warfare, usually in a specific region or nation (i.e. Europe, Latin America, the Atlantic World, Spain, Russia, China, Japan, etc.).
Topics vary in any given semester.
Additional Information: Arts Sci Core Curr: Historical Context
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Methodological, Comparative, and Global

HIST 2126 (3) Issues in Modern U.S. Politics and Foreign Relations
Traces the historical development of modern U.S. politics and foreign relations. Analyzes subjects such as the Cold War, the Vietnam War, the War on Terror, and the relationship between foreign and domestic politics, and the developing meaning of political conservatism, liberalism, and radicalism in the U.S. Explains the impact of race, gender, class, and immigration. Topics vary in any given semester.
Additional Information: Arts Sci Core Curr: Contemporary Societies
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: United States: Topical Courses 1

HIST 2166 (3) The Vietnam Wars
Equivalent - Duplicate Degree Credit Not Granted: HIST 4166
Additional Information: Arts Sci Core Curr: Contemporary Societies
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: United States: Topical Courses 1
Departmental Category: Asia Content

HIST 2170 (3) History of Christianity 1: To the Reformation
General introduction to the history of Christianity from its beginnings through the first period of the Protestant Reformation. Examines religious life and the church in relation to its social and cultural setting.
Additional Information: GT Pathways: GT-HI1 - History
Arts Sci Core Curr: Historical Context
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Methodological, Comparative, and Global

HIST 2220 (3) History of War and Society
Focuses on war and society in a variety of global contexts. Explores the character, origins, and social, political, and intellectual impacts of war in contexts ranging from several centuries of international conflict to the experience of individual nations in specific wars. Topic varies in any given semester; contact Department of History for details.
Additional Information: GT Pathways: GT-HI1 - History
Arts Sci Core Curr: Historical Context
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Methodological, Comparative, and Global

HIST 2326 (3) Issues in the History of U.S. Society and Culture
Examines the origins, development, and impacts (social, political, cultural, economic, etc.) of significant issues and themes in the cultural,intellectual, and/or social history of the United States from independence to the present day. Explains the impact of race, gender, ethnicity, and class on these issues. Topics vary in any given semester.
Additional Information: GT Pathways: GT-HI1 - History
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: United States: Topical Courses 1
HIST 2437 (3) African American History
Surveys African American history. Studies, interprets and analyzes major problems, issues and trends affecting African Americans from about 1600 to the present.
Equivalent - Duplicate Degree Credit Not Granted: ETHN 2432
Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Distribution-Social Sciences
Arts Sci Gen Ed: Diversity-U.S. Perspective
Departmental Category: United States: Topical Courses 2

HIST 2516 (3) America Through Baseball
Baseball could not have existed without America. Explains how the game fit into the larger context of social, cultural, economic and political history from the 19th century to the present. Studies the events and people who made baseball the national pastime.
Equivalent - Duplicate Degree Credit Not Granted: HIST 4556
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: United States: Topical Courses 1

HIST 2616 (3) History of Gender in America
Introduces the social and cultural construction of femininity and masculinity in America from 1500 to the present. Explores gender as a status acquired and performed through tasks, clothing, adornment and bodily movement. Examines gender ideals, expression and practices such as gender crossing, gender bending and gender plan.
Additional Information: GT Pathways: GT-HI1 - History
Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Diversity-U.S. Perspective
Departmental Category: United States: Topical Courses 1

HIST 2629 (3) China in World History
Examines the multiple connections between Chinese history and other parts of the world over the course of China's long history. Specific course focus may vary by instructor/term.
Additional Information: Arts Sci Core Curr: Historical Context
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: World Areas: Comparable and General
Departmental Category: Asia Content

HIST 2728 (3) Militarism in Japanese History
From the early use of stone and metal in the archaic period through the post-World War II resurgence of nationalism, experiences of war and the development of military ideologies have exerted transformative and far-reaching effects on Japanese history. This course embeds the events, persons, institutions, and philosophies that shaped the course of militarism in Japan within a broader social and geographic context.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

HIST 3012 (3) Seminar in Modern European History
Capstone seminars are designed for advanced history majors to pull together the skills they have honed in previous courses. This seminar focuses on modern European history, and will include readings and discussions in a small seminar setting. In relation to the course topic, students will develop an individual research project and write a substantial and original paper based on primary sources.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Requires prerequisite course HIST 3020 (minimum grade C-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) History (HIST) majors (excludes minors).
Recommended: History GPA of 2.0 or higher.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Europe: Modern

HIST 3018 (3) Seminar in Latin American History
Capstone seminars are designed for advanced history majors to pull together the skills they have honed in previous courses. This seminar focuses on Latin American history, and will include readings and discussions in a small seminar setting. In relation to the course topic, students will develop an individual research project and write a substantial and original paper based on primary sources.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Requires prerequisite course HIST 3020 (minimum grade C-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) History (HIST) majors (excludes minors).
Recommended: History GPA of 2.0 or higher.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: World Areas: Specific Regions

HIST 3020 (3) Historical Thinking & Writing
The second cornerstone course for history majors centers on the essential skills all historians use. Students will advance their reading, sourcing, and research techniques, hone critical, analytical, and synthetic skills, navigate scholarly discourse, and practice historical writing. As this simultaneously satisfies the College's upper-division writing requirement, all sections involve substantial, regular, and varied writing assignments as well as instruction in methods and the revision process. All topical variations of this course are limited to a maximum of 18 students in order to focus on supporting students as they learn to write and think like an historian. Topics will vary by section. Recommended for sophomores or juniors, HIST 3020 may be taken concurrently with, but not prior to, HIST 1800.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Requires prerequisite courses of ARSC 1080 or 1150 or CLAS 1020 or ENGL 1001 or PHIL 1500 or WRTG 1100 or 1150 or 1250 (all min grade C-). Restricted to students with 27-180 credits (Soph, Jr, or Sr) HIST majors only.
Additional Information: Arts Sci Core Curr: Written Communication
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Written Communication-Upper
Departmental Category: Methodological, Comparative, and Global
HIST 3109 (3) Seminar in Asian History
Capstone seminars are designed for advanced history majors to pull together the skills they have honed in previous courses. This seminar focuses on Asian history, and will include readings and discussions in a small seminar setting. In relation to the course topic, students will develop an individual research project and write a substantial and original paper based on primary sources. Previously offered as a special topics course.

Repeatability: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course HIST 3020 (minimum grade C). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) History (HIST) majors (excludes minors).

Recommended: History GPA of 2.0 or higher.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Asia Content

HIST 3110 (3) Honors Seminar
Practical historiography for students who wish to write a senior honors thesis. Emphasizes choice of topic, critical methods, research, organization, argumentation, and writing.

Repeatability: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course HIST 3020 (minimum grade C). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) History (HIST) majors (excludes minors).

Recommended: History GPA of 2.0 or higher.

Additional Information: Arts Sciences Honors Course Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Methodological, Comparative, and Global

HIST 3112 (3) Seminar in Renaissance and Reformation
Capstone seminars are designed for advanced history majors to pull together the skills they have honed in previous courses. This seminar focuses on the history of the Renaissance and Reformation, and will include readings and discussions in a small seminar setting. In relation to the course topic, students will develop an individual research project and write a substantial and original paper based on primary sources.

Repeatability: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course HIST 3020 (minimum grade C). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) History (HIST) majors (excludes minors).

Recommended: History GPA of 2.0 or higher.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: United States: Topical Courses 1

HIST 3113 (3) Seminar in Medieval and Early Modern English History
The third, and final, cornerstone course for history majors is a capstone seminar. Capstone seminars are designed for advanced history majors to pull together the skills they have honed in previous classes towards producing historical knowledge about a particular area of interest. This seminar focuses on medieval and early modern English history, and will include readings and discussions in a small seminar setting. These and other class activities and assignments will support the central goal: for each student to develop an individual research project on a topic of their own choosing in relation to medieval and early modern English history. Students will then write a substantial and original research paper based on primary sources. Completion of HIST 3020 is required for history majors to enroll in a senior seminar.

Repeatability: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course HIST 3020 (minimum grade C). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) History (HIST) majors (excludes minors).

Recommended: History GPA of 2.0 or higher.

HIST 3115 (3) Seminar in Early American History
The third, and final, cornerstone course for history majors is a capstone seminar. Capstone seminars are designed for advanced history majors to pull together the skills they have honed in previous classes towards producing historical knowledge about a particular area of interest. This seminar focuses on early American history, and will include readings and discussions in a small seminar setting. These and other class activities and assignments will support the central goal: for each student to develop an individual research project on a topic of their own choosing in relation to early American history. Students will then write a substantial and original research paper based on primary sources. Completion of HIST 3020 is required for history majors to enroll in a senior seminar.

Repeatability: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course HIST 3020 (minimum grade C). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) History (HIST) majors (excludes minors).

Recommended: History GPA of 2.0 or higher.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: United States: Topical Courses 1

HIST 3116 (3) Seminar in American Diplomatic History
Capstone seminars are designed for advanced history majors to pull together the skills they have honed in previous courses. This seminar focuses on American diplomatic history, and will include readings and discussions in a small seminar setting. In relation to the course topic, students will develop an individual research project and write a substantial and original paper based on primary sources.

Repeatability: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course HIST 3020 (minimum grade C). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) History (HIST) majors (excludes minors).

Recommended: History GPA of 2.0 or higher.

HIST 3120 (3) Honors Thesis
Department enforced prerequisite: HIST 3110 and instructor consent.

Additional Information: Arts Sciences Honors Course Departmental Category: Methodological, Comparative, and Global
HIST 3133 (3) Seminar in Britain since 1688
Capstone seminars are designed for advanced history majors to pull together the skills they have honed in previous courses. This seminar focuses on British history since 1688, and will include readings and discussions in a small seminar setting. In relation to the course topic, students will develop an individual research project and write a substantial and original paper based on primary sources.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Requires prerequisite course HIST 3020 (minimum grade C). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) History (HIST) majors (excludes minors).
Recommended: History GPA of 2.0 or higher.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Europe: Specific Countries

HIST 3212 (3) Seminar in Early Modern Europe
Capstone seminars are designed for advanced history majors to pull together the skills they have honed in previous courses. This seminar focuses on early modern European history, and will include readings and discussions in a small seminar setting. In relation to the course topic, students will develop an individual research project and write a substantial and original paper based on primary sources.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Requires prerequisite course HIST 3020 (minimum grade C). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) History (HIST) majors (excludes minors).
Recommended: History GPA of 2.0 or higher.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Europe: Specific Countries

HIST 3218 (3) Seminar in African History
Deals with the history and anthropology of selected west African societies in the period before the imposition of European colonial rule.
Requisites: Requires prerequisite course HIST 3020 (minimum grade C). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) History (HIST) majors (excludes minors).
Recommended: History GPA of 2.0 or higher.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Europe: Modern

HIST 3317 (3) Seminar in the American West
Capstone seminars are designed for advanced history majors to pull together the skills they have honed in previous courses. This seminar focuses on the history of the American West, and will include readings and discussions in a small seminar setting. In relation to the course topic, students will develop an individual research project and write a substantial and original paper based on primary sources.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Requires prerequisite course HIST 3020 (minimum grade C). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) History (HIST) majors (excludes minors).
Recommended: History GPA of 2.0 or higher.

HIST 3328 (3) Seminar in Middle Eastern History
Examines selected issues in modern Middle Eastern history. Check with the department concerning the specific subject of the seminar.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Requires prerequisite course HIST 3020 (minimum grade C). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) History (HIST) majors (excludes minors).
Recommended: History GPA of 2.0 or higher.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: World Areas: Specific Regions Departmental Category: Asia Content

HIST 3414 (3) Seminar in Modern European Thought and Culture
Capstone seminars are designed for advanced history majors to pull together the skills they have honed in previous courses. This seminar focuses on the history of modern European thought and culture, and will include readings and discussions in a small seminar setting. In relation to the course topic, students will develop an individual research project and write a substantial and original paper based on primary sources.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Requires prerequisite course HIST 3020 (minimum grade C). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) History (HIST) majors (excludes minors).
Recommended: History GPA of 2.0 or higher.

HIST 3415 (3) Seminar in Recent American History
Capstone seminars are designed for advanced history majors to pull together the skills they have honed in previous courses. This seminar focuses on recent American history, and will include readings and discussions in a small seminar setting. In relation to the course topic, students will develop an individual research project and write a substantial and original paper based on primary sources.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Requires prerequisite course HIST 3020 (minimum grade C). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) History (HIST) majors (excludes minors).
Recommended: History GPA of 2.0 or higher.

HIST 3416 (3) Seminar in American Society and Thought
Capstone seminars are designed for advanced history majors to pull together the skills they have honed in previous courses. This seminar focuses on the history of American society and thought, and will include readings and discussions in a small seminar setting. In relation to the course topic, students will develop an individual research project and write a substantial and original paper based on primary sources.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Requires prerequisite course HIST 3020 (minimum grade C). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) History (HIST) majors (excludes minors).
Recommended: History GPA of 2.0 or higher.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: United States: Topical Courses 1
HIST 3417 (3) Seminar in African American History
Capstone seminars are designed for advanced history majors to pull together the skills they have honed in previous courses. This seminar focuses on African American history, and will include readings and discussions in a small seminar setting. In relation to the course topic, students will develop an individual research project and write a substantial and original paper based on primary sources.
Repeatability: Repeatable for up to 6.00 total credit hours.
Requisites: Requires prerequisite course HIST 3020 (minimum grade C). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) History (HIST) majors (excludes minors).
Recommended: History GPA of 2.0 or higher.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: United States: Topical Courses 1

HIST 3511 (3) Seminar in Medieval History
Capstone seminars are designed for advanced history majors to pull together the skills they have honed in previous courses. This seminar focuses on medieval history, and will include readings and discussions in a small seminar setting. In relation to the course topic, students will develop an individual research project and write a substantial and original paper based on primary sources.
Repeatability: Repeatable for up to 6.00 total credit hours.
Requisites: Requires prerequisite course HIST 3020 (minimum grade C). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) History (HIST) majors (excludes minors).
Recommended: History GPA of 2.0 or higher.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Europe: Ancient and Medieval

HIST 3516 (3) American Culture and Reform, 1880--1920
Addresses the issues of reform, religion, and culture that emerged as a 19th century world view confronted a 20th century America.
Requisites: Requires prerequisite course HIST 3020 (minimum grade C). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) History (HIST) majors (excludes minors).
Recommended: History GPA of 2.0 or higher.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Europe: Ancient and Medieval

HIST 3616 (3) Seminar in U.S. Women's History
Capstone seminars are designed for advanced history majors to pull together the skills they have honed in previous courses. This seminar focuses on U.S. women's history, and will include readings and discussions in a small seminar setting. In relation to the course topic, students will develop an individual research project and write a substantial and original paper based on primary sources.
Repeatability: Repeatable for up to 6.00 total credit hours.
Requisites: Requires prerequisite course HIST 3020 (minimum grade C). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) History (HIST) majors (excludes minors).
Recommended: History GPA of 2.0 or higher.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: United States: Topical Courses 1

HIST 3628 (3) Seminar in Recent Chinese History
Capstone seminars are designed for advanced history majors to pull together the skills they have honed in previous courses. This seminar focuses on recent Chinese history, and will include readings and discussions in a small seminar setting. In relation to the course topic, students will develop an individual research project and write a substantial and original paper based on primary sources.
Repeatability: Repeatable for up to 6.00 total credit hours.
Requisites: Requires prerequisite course HIST 3020 (minimum grade C). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) History (HIST) majors (excludes minors).
Recommended: History GPA of 2.0 or higher.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: World Areas: Specific Regions Departmental Category: Asia Content

HIST 3713 (3) Seminar in Russian History
Capstone seminars are designed for advanced history majors to pull together the skills they have honed in previous courses. This seminar focuses on Russian history, and will include readings and discussions in a small seminar setting. In relation to the course topic, students will develop an individual research project and write a substantial and original paper based on primary sources.
Repeatability: Repeatable for up to 6.00 total credit hours.
Requisites: Requires prerequisite course HIST 3020 (minimum grade C). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) History (HIST) majors (excludes minors).
Recommended: History GPA of 2.0 or higher.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Europe: Specific Countries

HIST 3718 (3) Seminar in Japanese History
Capstone seminars are designed for advanced history majors to pull together the skills they have honed in previous courses. This seminar focuses on Japanese history, and will include readings and discussions in a small seminar setting. In relation to the course topic, students will develop an individual research project and write a substantial and original paper based on primary sources.
Repeatability: Repeatable for up to 6.00 total credit hours.
Requisites: Requires prerequisite course HIST 3020 (minimum grade C). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) History (HIST) majors (excludes minors).
Recommended: History GPA of 2.0 or higher.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: World Areas: Specific Regions Departmental Category: Asia Content

HIST 3800 (3) Seminar in Global History
Organized around themes that change year to year, this seminar allows students to explore and research processes, phenomena, and events of global significance in historical context. Stress will be upon subjects that span multiple world areas. Possible topics include: the international arms trade; slavery; health and disease; youth culture; women’s rights; genocide. See department for current theme.
Repeatability: Repeatable for up to 6.00 total credit hours.
Requisites: Requires prerequisite course HIST 3020 (minimum grade C). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) History (HIST) majors (excludes minors).
Recommended: History GPA of 2.0 or higher.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Methodological, Comparative, and Global
HIST 3840 (1-3) Independent Study
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Departmental Category: Methodological, Comparative, and Global

HIST 3841 (1-3) Independent Study
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Departmental Category: Europe: Ancient and Medieval

HIST 3842 (1-3) Independent Study
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Departmental Category: Europe: Modern

HIST 3843 (1-3) Independent Study
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Departmental Category: Europe: Specific Countries

HIST 3844 (1-3) Independent Study
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Departmental Category: United States: Chronological Periods

HIST 3845 (1-3) Independent Study
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Departmental Category: United States: Topical Courses 1

HIST 3846 (1-3) Independent Study
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Departmental Category: United States: Topical Courses 2

HIST 3847 (1-3) Independent Study
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Departmental Category: World Areas: Specific Regions

HIST 3848 (1-3) Independent Study
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Departmental Category: World Areas: Comparable and General

HIST 3849 (1-3) Independent Study
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Departmental Category: World Areas: Europe: Specific

HIST 4013 (3) Law and Society in Premodern England to 1688
Examines the origins and developments of English legal and political institutions, including kingship, the common law, procedure and the court and jury system and sets such developments in the context of broader social and religious changes from the Anglo-Saxon period to the 17th century. Emphasizes the implications of these institutions for the development of contemporary American, English and British colonial legal systems.
Equivalent - Duplicate Degree Credit Not Granted: HIST 5013
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Recommended: Prerequisite HIST 1011 or HIST 1113.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Europe: Specific Countries

HIST 4018 (3) Aztecs, Incas, and the Spanish Conquest of the Americas
Building upon contemporary texts and modern histories of both famous and ordinary people, this course examines the indigenous empires known as the Aztecs and the Incas. It also examines the encounter of Europeans and native people, following the history of exploration and conquest from the time of Columbus to about 1550. Equal consideration is given to the course's three components: Aztec, Inca and the Spanish conquest.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Recommended: Prerequisite HIST 1018 or HIST 3020.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: World Areas: Specific Regions

HIST 4020 (3) Topics in Comparative History
Explores historical themes from a comparative perspective. Encourages students to think more analytically about historical change. Consult current online schedule for specific topics. Often team-taught by more than one faculty.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Recommended: Prerequisite two 4000-level History courses in differing content areas.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Methodological, Comparative, and Global

HIST 4021 (3) Athens and Greek Democracy
Studies Greek history from 800 B.C. (the rise of the city-state) to 323 B.C. (the death of Alexander the Great). Emphasizes the development of democracy in Athens. Readings are in the primary sources.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4021 and CLAS 5021
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Recommended: Prerequisite two 4000-level History courses in differing content areas.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Europe: Ancient and Medieval

HIST 4031 (3) Alexander the Great and the Rise of Macedonia
Covers Macedonia's rise to dominance in Greece under Philip II and the reign and conquests of Alexander the Great.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 5031 and CLAS 4031
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Recommended: Prerequisite CLAS 1051 or CLAS 1509 or CLAS 2039 or CLAS 4139 or CLAS 4149 or CLAS 2041 or CLAS 4021 or CLAS 4041 or HIST 1051 or GREK 3113.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Europe: Ancient and Medieval
HIST 4040 (3) The History of Space Exploration and Defense
This course examines the development and impact of American, Soviet/Russian, and European civilian and military space activities from the dawn of the space age to the space challenges of the 21st century.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Methodological, Comparative, and Global

HIST 4041 (3) Classical Greek Political Thought
Studies main representatives of political philosophy in antiquity (Plato, Aristotle, Cicero) and of the most important concepts and values of ancient political thought. No Greek or Latin required.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4041 and CLAS 5041 and PHIL 4210
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Europe: Ancient and Medieval

HIST 4050 (3) A Global History of World War II
Examines World War II in a global perspective. This era witnessed transformations in the social, political and economic orders across the globe. Traces the domestic and international developments, including military issues, that shaped the period in Europe, Asia, Africa and North America and assesses the war’s legacy.
Requisites: Requires prerequisite course of HIST 1012 or 1025 or 1028 or 1123 or 1228 or 1308 or 1528 or 1628 or 1708 or 1800 or 1828 (minimum grade D-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Methodological, Comparative, and Global
Departmental Category: Asia Content

HIST 4053 (3) Britain and the Empire, 1688-1964
Examines the external polity of Great Britain from 1688 to 1964 in Europe, the East, Africa and the Americas.
Equivalent - Duplicate Degree Credit Not Granted: HIST 5053
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Europe: Specific Countries

HIST 4061 (3) Twilight of Antiquity
Explores the reasons for the fall of the Roman Empire in the western Mediterranean and its survival in the east as Byzantium. Emphasizes Christianity; barbarians; social, economic and cultural differences; contemporary views of Rome; and modern scholarship. No Greek or Latin is required.
Equivalent - Duplicate Degree Credit Not Granted: HIST 5061 and CLAS 4061 and CLAS 5061
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Europe: Ancient and Medieval

HIST 4071 (3) Seminar in Ancient Social History
Considers topics ranging from demography, disease, family structure, and the organization of daily life to ancient slavery, economics, and law. Focuses either on Persia, Greece, or Rome and includes a particular emphasis on the methodology required to reconstruct an ancient society, especially the interpretation of problematic literary and material evidence, and the selective use of comparisons with better known societies. No Greek or Latin required.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4071 and CLAS 5071
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Europe: Ancient and Medieval

HIST 4081 (3) The Roman Republic
Studies the Roman Republic from its foundation in 753 B.C. to its conclusion with the career of Augustus. Emphasizes the development of Roman Republic government. Readings are in the primary sources. No Greek or Latin required.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4081 and CLAS 5081
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Europe: Ancient and Medieval

HIST 4091 (3) The Roman Empire
Studies Imperial Roman history beginning with the Roman Revolution and ending with examination of the passing of centralized political authority in the western Mediterranean. Emphasizes life, letters and personalities of the Empire.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4091 and CLAS 5091
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Europe: Ancient and Medieval

HIST 4101 (3) Greek and Roman Slavery
Surveys slavery in ancient Greece and Rome beginning with its growth, economics and political effects, moving to the life experiences of slaves, resistance and revolt, and finishing with the ideology of slavery. Focuses throughout on the challenge of understanding classical slavery on the basis of scattered and biased evidence and on the controversies that have surrounded this topic.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4101
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Diversity-Global Perspective
Arts Sci Gen Ed: Distribution-Arts Humanities

HIST 4103 (3) England from the Viking Age to the Tudors
During the Middle Ages Germanic values of honor and retribution became deeply ingrained in the warrior culture of the English aristocracy. This course begins with an examination of the Scandinavian and Germanic roots of this warrior culture before exploring the residue of that culture in the centuries leading up to the Tudor period.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors).
Recommended: Prerequisite HIST 1011 or HIST 1113.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
HIST 4109 (3) World War II in Asia and the Pacific
For Asia, World War II began with the Mukden Incident (1931), resulting in the Japanese domination of Manchuria and leading to a full-scale war between China and Japan in 1937. Only after the Japanese attacked the U.S. Pacific fleet at Pearl Harbor four years later did the United States enter the war. Discusses the various socioeconomic and political factors leading to the war in Asia, examines the nature of the conflict on the Asian mainland and in the Pacific, and assesses legacy of the war on all those involved.

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: World Areas: Comparable and General
Departmental Category: Asia Content

HIST 4116 (3) History of U.S. Foreign Relations, 1865-1940
Traces the rise of the United States to world power. Explores the interactions of expansionist and isolationist impulses with politics, ideology, culture and economics, with a focus on the Spanish American War and the acquisition of empire, World War I and the coming of World War II.

**Equivalent - Duplicate Degree Credit Not Granted:** HIST 5116

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: United States: Topical Courses 1

HIST 4117 (3) Colorado History
Presents the story of the people, society, culture, and environment of Colorado from the earliest Native Americans, through the Spanish influx, the fur traders and mountain men, the gold rush, railroad builders, the cattlemen and farmers, the silver boom, the twentieth-century tourists, city-dwellers, workers and activists. Highlights the historical origins of twenty-first century institutions, problems, challenges, and opportunities.

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

**Recommended:** Prerequisite HIST 1015 or HIST 1025.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: United States: Topical Courses 2

HIST 4118 (3) History of Mexico to 1821
Studies Mexican history beginning with roots and evolution of pre-Columbian civilizations and concluding with the events of Mexican independence in 1821. Emphasizes society and culture of the Aztecs and Mayans, the Spanish conquest of Mexico, and the colonial regime of New Spain.

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: World Areas: Specific Regions

HIST 4122 (3) Europe During the Renaissance
Explores the history and culture of Western Europe, 1300-1520. Comprehensive in scope, with analysis of political, economic, social, religious, intellectual and artistic matters. Discusses significance of the Renaissance for origins of modern civilization.

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

**Recommended:** Prerequisite HIST 1011.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Europe: Modern

HIST 4123 (3) Kings & Commoners in an Age of Crisis: English History 1327-1487
England in the 14th and 15th centuries endured climate change, the Black Death, peasant revolts, foreign and civil war and the forcible removal of five kings; yet this period also saw renewed forms of religious devotion, famous military victories and the exaltation of kingship. Crucially, it also saw the growing importance of the common people in English politics and the notion that government should aspire to serve the common good of the whole realm.

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

**Recommended:** Prerequisite HIST 1011 or HIST 1113.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Europe: Specific Countries

HIST 4125 (3) Early American History to 1763
Explores the colonial era of American history from the pre-Columbian period to the end of the Seven Years’ War. Topics include pre-contact Native societies, exploration, European settlement and Native American responses, labor system and the rise of slavery, imperial wars, and the developments in religion, society, politics and culture.

**Equivalent - Duplicate Degree Credit Not Granted:** HIST 5125

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities Arts Sci Gen Ed: Diversity-U.S. Perspective
Departmental Category: United States: Chronological Periods

HIST 4126 (3) History of U.S. Foreign Relations Since 1941
Traces the development of the United States as a superpower. Details American power and diplomacy in World War II and the rise of the national security state in the Cold War. Explores the Korean, Vietnam and Persian Gulf Wars, and the era of modern-day globalization.

**Equivalent - Duplicate Degree Credit Not Granted:** HIST 5126

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: United States: Topical Courses 1

HIST 4128 (3) The History of Modern Mexico Since 1821
Centers on the Mexican search for political consolidation and stability through the 19th, 20th and 21st centuries. Focuses on the Mexican Revolution (1910-1940) and the post revolutionary rule of the Institutional Revolutionary Party. Examines the War on Drugs and the causes of Mexican migration to the United States.

**Equivalent - Duplicate Degree Credit Not Granted:** HIST 5128

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

**Recommended:** Prerequisite HIST 1028 or HIST 3020.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: World Areas: Specific Regions

HIST 4131 (3) The Origins of Christianity
Surveys the sources for the development of ancient Christianity from the ministry of Jesus Christ to the conversion of the emperor Constantine in the early 4th century. Through lectures and a close reading of primary source materials in translation, students will examine the social activity and theological development of early Christians in their Roman and Jewish context.

**Requisites:** Requires prerequisite course of HIST 1011 or HIST 1061 or HIST 2170 or CLAS 1061 (minimum grade C). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Europe: Ancient and Medieval
HIST 4133 (3) The Tudors: British History 1485-1603
Deals with the history of England from 1485 to 1603. Examines patterns of daily life, the impact of the Reformation and the Renaissance and the development of Parliament and the monarchy under the Tudor rulers, especially Henry VIII and Elizabeth.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Recommended: Prerequisite HIST 1011 or HIST 1113.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Europe: Specific Countries

HIST 4143 (3) The Making of Great Britain: British History 1603-1714
Covers the history of the British Isles from 1603 to 1714, the era of the English Civil War and the Glorious Revolution. Traces economic and social relationships, cultural change and religious and political conflict under the Stuart monarchs.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Recommended: Prerequisite HIST 1011 or HIST 1012 or HIST 1113 or HIST 1123.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Europe: Specific Countries

HIST 4146 (3) U.S. Military History since 1898
Examines America's national defense and war efforts from the Spanish American War to the present, emphasizing causes and consequences of modern conflicts, and the impact of military activities on American society.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Recommended: Prerequisite HIST 1025.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: United States: Topical Courses 1

HIST 4158 (3) History of Modern Brazil
Surveys the post independence history of 19th and 20th century Brazil. Looks at the development of Brazilian nationalism and political institutions and focuses heavily on race, ethnicity, gender and sexuality in Brazil, understanding how different peoples have settled and accommodated themselves to the Brazilian environment. Finally, it will look at Brazilian economic development and its consequences at the beginning of the 21st century.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

HIST 4166 (3) The Vietnam War in Politics and Culture
Examines America's second-longest and most divisive war from the beginning of the U.S. involvement in the 1950s to the repercussions echoing into the 1980s. Considers the global context, motives, and evolution of U.S. involvement, support for and opposition to the war at home, the war's repercussions in international policy and domestic politics, and representations of the war in popular culture.
Equivalent - Duplicate Degree Credit Not Granted: HIST 2166
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: United States: Topical Courses 1
Departmental Category: Asia Content

HIST 4190 (3) French Connections: Contemporary France and America in Historical Context
Faculty-led Global Seminar, based in Bordeaux, France provides an opportunity to compare French history and contemporary culture, economy, and culture to that of the United States. Lectures in Boulder and Bordeaux are supplemented by interactions with officials, scholars, business leaders, interest groups, and organizations in France. Offered through Study Abroad.
Equivalent - Duplicate Degree Credit Not Granted: IAFS 3500

HIST 4205 (3) The Colonial Wars and the Coming of American Independence, 1739-1776
Investigates imperial warfare and its effects during the late colonial period, concentrating on the French and Indian War (1754-1763), the disruption of Anglo-American relations and the origins of the War of American Independence (1775-1783).
Equivalent - Duplicate Degree Credit Not Granted: HIST 5205
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

HIST 4207 (3) The American West to 1800
Addresses the history of the early West until 1800. Probes the origins of the first Americans, early cultures and civilizations, and the consequences of Spanish, French, and Russian colonization. Topics addressed include warfare, disease, diplomacy, environmental change, missionary enterprises, captives, gender, and the slave trade.
Recommended: Prerequisite HIST 1015.

HIST 4212 (3) The Age of Religious Wars: Reformation Europe, 1500-1648
Traces the history of Europe from the end of the Hundred Years War through the Thirty Years War. During this period Europe experienced tremendous changes including emerging religious heresies, the advent of the Spanish Inquisition, violent civil wars, the witch craze, and the Thirty Years War, a precursor to the World Wars of the 20th century.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Recommended: Prerequisite HIST 1011 or HIST 1113.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Europe: Modern

HIST 4215 (3) The Revolutionary War and the Making of the American Republic, 1775-1801
Investigates the Revolutionary War and its impact on the creation of American political institutions, as well as its cultural, social and economic effects, from the Battles of Lexington and Concord through the inauguration of Thomas Jefferson.
Equivalent - Duplicate Degree Credit Not Granted: HIST 5215
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
HIST 4217 (3) The American West in the 19th Century
Explores cultural, social and political interaction in the American West during the 19th century. Themes include environmental change; conflict and syncretism across race, class, and gender lines; mythic images, and their relationship to the "Real" West.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Recommended: Prerequisite HIST 1015 or HIST 1025.

HIST 4218 (3) Lost Kingdoms & Caliphates: West Africa to 1900
Investigates the formation and dissolution of West Africa's kingdoms, caliphates and stateless societies during the era of the trans-Atlantic and trans-Saharan slave trades. Through a survey of oral and written sources, this course examines West Africa's geopolitical transformation in warfare, jihad, trade and slavery, especially in relation to the African Diaspora to the Americas and Muslim world.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

HIST 4222 (3) War and the European State, 1618-1793
Studies the development of the European states in response to international power struggles in the 17th and 18th centuries (up to the French Revolution).

Equivalent - Duplicate Degree Credit Not Granted: HIST 5222
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Europe: Modern

HIST 4223 (3) The French Revolution and Napoleon
Traces the origins, course, and consequences of the most important modern revolution, the French Revolution of 1789. While seeking to explain how a liberal movement for progressive change soon degenerated into the factional bloodbath of the Terror, will also examine the revolution's global impact and how three decades or revolutionary warfare lead to the rise and fall of Napoleon Bonaparte.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5223
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Europe: Specific Countries

HIST 4227 (3) The American West in the 20th Century
Explores cultural, social, and political interaction in the American West during the 20th century. Themes include popular culture, state-federal relationships, environmental change, urbanization, immigration, and cultural formation.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Recommended: Prerequisite HIST 1025.

HIST 4232 (3) From Absolutism to Revolution in Europe, 1648-1789
Studies the history of Europe from the end of the Thirty Years War through the outbreak of the French Revolution. Central themes include the establishment of more centralized, increasingly bureaucratic states; global expansion and economic commercialization; cultural developments such as the Scientific Revolution and the Enlightenment.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Recommended: Prerequisite HIST 1012 or HIST 1123.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Europe: Modern

HIST 4233 (3) History of France since 1815
Examines the ongoing struggle between the revolutionary and counter-revolutionary traditions of France and how it shaped the political history and affected the social, cultural and intellectual character of the nation from 1815 to the present.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Recommended: Prerequisite HIST 1012.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Europe: Specific Countries

HIST 4235 (3) Jacksonian America
Focuses on the social and cultural history of the Jacksonian Era. Issues include the transformation of the market economy, slavery, moral reform, Indian removal, changes in ideas about men's and women's natures and roles, western expansion, and political culture.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5235
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Recommended: Prerequisite HIST 1015.

HIST 4238 (3) History of Southern Africa
Examines the history of southern Africa history from the earliest times to the present. Short background readings and lectures cover southern African's history and class discussions of novels are layered over these basics. Topics of study include Cecil Rhodes and the diamond/gold mines; Shaka and the Zulu "nation"; apartheid; Nelson Mandela and the antiapartheid movement; issues facing South Africa today.

Requisites: Requires prerequisite course of HIST 1218 or 1228 or 3109 or 4258 or 4218 or ANTH 1150 or ANTH 3100 or ANTH 4630 or GEOL 3862 or PSCI 3082 or WGST 3712 (minimum grade C-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only

HIST 4258 (3) Africa under European Colonial Rule
Looks at the British, French, Portuguese and German empires that undertook the "Scramble for Africa" in the late 19th century. Themes include slavery and the slave trade; colonization and "pacification"; African resistance to European rule; missionaries and converts; decolonization and anti-colonial uprisings; issues facing Africa today, including oil, war and the Rwandan genocide.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Recommended: Prerequisite HIST 1218 or HIST 1228 or HIST 3020 or ANTH 1150 or ANTH 3100 or ANTH 4630 or GEOL 3862 or PSCI 3082.
HIST 4303 (3) Venice and Florence during the Renaissance
Comparative urban study of Florence and Venice from 13th through 16th centuries. Principal subjects are the distinctive economies of the cities, political developments, Renaissance humanism, patronage of the arts, and foreign policy. Equivalent - Duplicate Degree Credit Not Granted: HIST 5303
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Recommended: Prerequisite HIST 1011.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Europe: Specific Countries
HIST 4304 (3) The Cosmos in Premodern Mediterranean Societies
Through a chronological investigation of ideas about the cosmos in ancient Mediterranean societies, this course communicates how ancient and premodern people thought about, described, and made space part of their daily lives. It will expose students to primary sources such as hieroglyphs, paintings, poems, lyrics & maps. By doing so students will also develop knowledge about ancient societies. The course will include lectures, student skit presentations, learning cells & one class project. Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Recommended: Prerequisites HIST 1011 or CLAS 1051 or CLAS 1061.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Europe: Modern
HIST 4312 (3) 19th Century Europe
Concerned with major social, political and cultural developments in Europe from circa 1800 to the outbreak of World War I. Special emphasis is placed upon the Napoleonic experience, the rise of modern nationalism, romanticism, Darwinism and its social applications, the Industrial Revolution, imperialism, the emergence of modern ideologies, and the background of World War I. Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Recommended: Prerequisite HIST 1012.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Europe: Modern
HIST 4313 (3) History of Modern Italy
Examines the major historical, economic and social factors that have shaped the identity of modern Italy, from the enthusiasm of young patriots during Italy’s unification in the 1860s to the discontent and domestic terrorism of the 1960s-1980s. Focuses on Mussolini, the Fascist movement and on World War II, as well as the changing role of women. Taught in English. Equivalent - Duplicate Degree Credit Not Granted: ITAL 4250
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Europe: Modern
HIST 4315 (3) Civil War and Reconstruction
Describes the forces at work in the antebellum period that led to sectional warfare; social, economic, and political changes effected by the war; the American agony of reconstruction; and the long-range results of that difficult era. Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Recommended: Prerequisite HIST 1015.
HIST 4320 (3) The History of the Mediterranean, 600 CE-1600 CE
Familiarizes students with the Mediterranean ecumene covering concepts such as the Renaissance, the Crusades, traders and travelers, religions and cities. Explores both conflicts (military, confessional) and exchanges (commercial, artistic, scientific) thus helping students think cross culturally, comparatively and thematically. Emphasizes the Mediterranean contribution to historical developments of western Europe, the Middle East, and North Africa. Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Recommended: Prerequisite HIST 1011 or HIST 1061 or HIST 1308 or HIST 4061 or HIST 4071 or HIST 4081 or HIST 4091 or HIST 4711.
HIST 4323 (3) Mafia and Terrorism: Organized Violence in Italy
Investigates the origins and development of the Sicilian Mafia and Political Terrorism in Italy. In the first part of the course, the context of Italian politics, economy and society in which the mafia was born and flourished in the 19th and 20th century will be explored. The ramification of the Mafia in the United States in the 20th c. will also be studied. In the second part of the course, the political and social causes of Italian left and right wing Terrorism will be examined, starting from the Piazza Fontana slaughter (1969) until the murder of Professor Marco Biagi (2002). Particular attention will be devoted to the kidnapping and murder of Democratic Christian Party President Aldo Moro and to the Red Brigades terrorist movement. The role of women in both Mafia and Terrorism will be explored. Equivalent - Duplicate Degree Credit Not Granted: ITAL 4260
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
HIST 4326 (3) Epidemic Disease in US History
Focuses on the impact of infectious epidemic disease on American history, from smallpox and cholera to influenza, AIDS and Ebola. Addresses early depopulation of the Americas; contagion and social upheaval; interpretations of pestilence; social construction of disease; urbanization; doctors and alternative practitioners; public health; prejudice and infection; the ethics of quarantine; public versus individual interests; and the paradox of prevention. Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
HIST 4328 (3) The Modern Middle East, 1600 to the Present
Primarily from 1800 to the present. Attention divided equally between the region's political history and international relations and its patterns of economic, social and cultural modernization in the main countries. Equivalent - Duplicate Degree Credit Not Granted: HIST 5328
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Recommended: Prerequisite HIST 1308.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: World Areas: Specific Regions Departmental Category: Asia Content
HIST 4329 (3) Islam in the Modern World: Revivalism, Modernism, and Fundamentalism, 1800-2001
Examines the more important movements of reform in Muslim world (including Africa, the Middle East and India) from the 18th century to the present, and their origins and intellectual import. Due to the trans-regional nature of this broad movement of reform, particular attention is paid to how these movements related to local political, economic and social contexts, and how they, in turn, moved across larger networks of oceanic commerce and trade. Concludes with extended case studies of Islamic reformism in modern Egypt and India, and their ultimate influence on the politics of contemporary Islamist movements, especially the intellectual position of Usama B. Ladin.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Recommended: Prerequisite HIST 1308.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Asia Content

HIST 4336 (3) Nineteenth-Century American Thought and Culture
Examines the emergence of intellectual traditions and cultural trends in their social and political contexts from the early republic to the beginning of the modern era. Addresses developing arguments about democracy, religion, transcendentalism, gender, race, union/disunion, the Darwinian revolution, utopia/dystopia realism and naturalism in literature and the arts.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: United States: Topical Courses 1

HIST 4338 (3) History of Modern Israel/Palestine
Explore the history culture, and politics of this crossroads of Europe and Asia from the late Ottoman period to the present. Topics include: nationalism and colonialism, development of Zionist ideology, Palestinian nationalism, the Jewish community (Yishuv) under British rule, the founding of the State of Israel, Arab-Israeli and Palestinian-Israeli relations, Israel's minorities, and the conflict of religion and state.
Equivalent - Duplicate Degree Credit Not Granted: JWST 4338
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Recommended: Prerequisite HIST 1818 or JWST 1818 or HIST 1828 or JWST 1828 or HIST 1308 or JWST 2350 or other course work in Middle Eastern or Jewish History.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: World Areas: Specific Regions
Departmental Category: Asia Content

HIST 4339 (3) Borderlands of the British Empire
Examines the development of the borderlands of the British empire through imperial expansion, consolidation, and early decolonization. Focuses on the 19th and early 20th centuries. Topics include domination, resistance and negotiation in areas such as India, Afghanistan, the Palestine Mandate. Aims for students to acquire skills in comparative history and to develop a better understanding of the roots of contemporary conflicts.
Equivalent - Duplicate Degree Credit Not Granted: HIST 5339
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Recommended: Prerequisite HIST 1012 or HIST 1123 or HIST 1228 or HIST 1308 or HIST 1528.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Diversity-Global Perspective
Departmental Category: World Areas: Comparable and General
Departmental Category: Asia Content

HIST 4343 (3) Spain and Portugal during the Golden Age
Surveys the history of Spain and Portugal from the late medieval period through early modern period. Explores the thought, art, politics and socio-economic milieu of the Golden Age. Topics include attitudes toward minorities, the Inquisition, the Age of Exploration and the establishment of colonial empires in Asia and the Americas, court culture and architecture, religious conflicts and literary production. Formerly HIST 4064.
Equivalent - Duplicate Degree Credit Not Granted: HIST 5343
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Recommended: Prerequisite HIST 1011 or HIST 1018.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Europe: Topical

HIST 4346 (3) Twentieth-Century American Thought and Culture
Examines the emergence of intellectual traditions and cultural trends in their social and political contexts from the beginning of the modern era through the onset of the postmodern. Addresses developing arguments about democracy, science, race, gender, faith, American identity, radicalism and conservatism, modernist thinking and artistic expression, and the role of intellectuals in society.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: United States: Topical Courses 1

HIST 4348 (3) Topics in Jewish History
Covers topics in Jewish history from biblical beginnings to present day. Topics vary each semester. Consult the online Schedule Planner for specific topics.
Equivalent - Duplicate Degree Credit Not Granted: JWST 4348
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Recommended: Prerequisite HIST 1818 or JWST 1818 or HIST 1828 or JWST 1828 or HIST 1308 or JWST 2350 or other course work in Middle Eastern or Jewish History.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: World Areas: Specific Regions
HIST 4349 (3) Decolonization of the British Empire
Examines the end of the British Empire. Focuses on connections between imperial territories, such as networks of anticolonial activists and links between British decision makers. Students will acquire research skills and develop a better understanding of the roots of contemporary conflict. Prior coursework in British imperial history and excellent writing skills are required.
Equivalent - Duplicate Degree Credit Not Granted: HIST 5349
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Recommended: Prerequisite HIST 1123 or HIST 1228 or HIST 1308 or HIST 1528 or HIST 4053 or HIST 4238 or HIST 4258 or HIST 4328 or HIST 4329 or HIST 4338 or HIST 4339 or HIST 4538 or HIST 4548 or HIST 4558.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: World Areas: Comparable and General

HIST 4359 (3) The Global History of Modern Arabia
Examines the history, politics and society of the countries of the Arabian Peninsula (modern day Saudi Arabia, Oman, Yemen, Bahrain, Qatar and the UAE) in the period between 1800 and the present. The guiding assumption will be that the histories of Arabia cannot be studied in isolation from broader histories of capital formation, imperialism, religious reform, state formation and the discourses and practices which they informed. To that end, the focus will be on Arabia as part of the British, Ottoman and Omani Empires, a participant in Indian Ocean commerce, a source and destination for migrant scholars, students and laborers, the center of the petroleum economy and a domain of struggle for activists and intellectuals representing multiple political/ideological currents—not only Islamist, but also, liberal, socialist and communist.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: World Areas: Comparable and General

HIST 4366 (3) Culture Wars: Modernism, Mass Culture, and the Modern U.S.
Examines how U.S. public moralists, intellectuals, and artists from the end of the nineteenth century to World War II both celebrated and attacked the rise of two characteristic features of modernity: mass culture (amusement parks, popular music, radio, movies), and modernist literary and artistic expression. Addresses how Americans both constructed and violated the line between “popular” and “high” culture.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Recommended: Prerequisite HIST 1025.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: United States: Topical Courses 1

HIST 4378 (3) History of Modern Jewish-Muslim Relations
Examines the modern history and culture of Jewish communities under Islamic rule in the Middle East and North Africa; Jews’ and Muslims’ encounters with empire, westernization and nationalism; representations of Sephardi and Eastern Jews; Jewish-Muslim relations in Europe and the U.S.; and contact and conflict between Jews and Muslims in (and about) Israel/Palestine. Sources include memoirs, diaries, newspapers and films.
Equivalent - Duplicate Degree Credit Not Granted: JWST 4378
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: World Areas: Specific Regions
Departmental Category: Asia Content

HIST 4388 (3) History Today: Global Seminar in Israel/Palestine
This global seminar analyzes history, memory and nationalism in one of the areas where the relationship between these three categories is the most fraught: Israel/Palestine. After learning the historical background to the Arab/Israeli and Palestinian conflict in Boulder, students will spend three weeks in Israel and the West Bank/Occupied Territories/Judea and Samaria. Through this course, students will gain a nuanced, multi-sided perspective of Israel, Palestine and the uses of history and memory.
Equivalent - Duplicate Degree Credit Not Granted: JWST 4388
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: United States: Topical Courses 1
Departmental Category: Europe: Topical

HIST 4412 (3) Europe, 1890-1945
Examines the origins, character and significance of the First and Second World Wars for the major nations of Europe during the first half of the 20th century.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Recommended: Prerequisite HIST 1012.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Europe: Modern

HIST 4414 (3) European Thought and Culture, 1750-1870
Explores major developments in European thought from the Enlightenment to Nietzsche. Special attention given to the individuals whose ideas have had the greatest influence on modern intellectual history, e.g., Rousseau, Hegel, Herder, Marx, Kierkegaard, Baudelaire, Darwin, and others.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Europe: Modern

HIST 4415 (3) Teddy Roosevelt's America - the U.S. from 1877 to 1917
Examines the social, economic, political, and cultural history of the United States from the end of Reconstruction to the eve of World War I. Topics include the struggles of labor and industry, race and immigration, western and environmental issues, city life and new technologies, feminism and Progressivism, and Indian wars and imperialism.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Recommended: Prerequisite HIST 1015 or HIST 1025 or ENV 1000.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: United States: Chronological Periods

HIST 4416 (3) Environmental History of North America
Examines how people of North America, from precolonial times to the present, interact with, altered, and thought about the natural world. Key themes include Native American land uses; colonization and ecological imperialism; environmental impacts of food and agriculture; industrialization, urbanization and pollution; energy transitions; cultures of environmental appreciation; the growth of the conversation and environmental movements.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: United States: Topical Courses 1
HIST 4422 (3) World War I in Europe
Examines the origins of World War I; the military, social and cultural character of the conflict; and its enduring impact in the post-1918 world. By thinking about the war as both a military undertaking and an experience that affected domestic and global politics, the course will explore why World War I constituted an event of major importance to Europe and the 20th century world.
Equivalent - Duplicate Degree Credit Not Granted: HIST 5422
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Recommended: Prerequisite HIST 1012.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Europe: Modern

HIST 4423 (3) German History 1848-1989: Weimar Republic, Nazism, State Socialism
Cultural, political and social history of Germany from the Revolutions of 1848 to the Fall of the Berlin Wall in 1989. Emphasizes German unification & Bismarck, the effects of World War I, Weimar politics, the rise of Nazism, World War II and the Holocaust, the post-war paths of West and East Germany, and reunification.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Recommended: Prerequisite HIST 1012.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Europe: Specific Countries

HIST 4424 (3) Modern European Thought and Culture, 1870-Present
Emphasizes Nietzsche and the youth revolt against middle class society, the literary and artistic avant garde (impressionism to existentialism), the psychoanalytic movement, the European right and left, and post-WWII European thought.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Europe: Topical

HIST 4425 (3) United States History, 1917-1945
Examines U.S. history from World War I through World War II. Key themes include: warfare; the rise of the modern state; consumer culture; the shift from conservative politics to the New Deal liberalism; the women's movement; immigration restriction; segregation; the Great Migration, and civil rights; conflicts between secular modernism and religious fundamentalism; and new technologies such as the automobile.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Recommended: Prerequisite HIST 1025.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: United States: Chronological Periods

HIST 4433 (3) Nazi Germany and the Holocaust
Focuses on the political, social, and cultural origins of National Socialism, the nature of the Nazi regime, the origins and course of the Second World war, and the perpetration of the Holocaust.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Europe: Specific Countries

HIST 4435 (3) From the Cold War to the Counterculture: U.S. History 1945-73
Analyzes high politics, grassroots movements, and cultural change in the years of unprecedented economic prosperity and rapid change after WWII. Explores the foreign and domestic politics of the Cold War; labor unionism; the Vietnam War; the Civil Rights, antiwar, and women's rights movements; and technocultural changes like the rise of television and the growing dominance of the automobile.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Recommended: Prerequisite HIST 1025.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: United States: Chronological Periods

HIST 4437 (3) African American History, 1619--1865
Examines the history of Africans in America from the first arrivals to emancipation, and their role in the social, cultural, economic, and political evolution of the United States.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Recommended: Prerequisite HIST 1015.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: United States: Topical Courses 2

HIST 4442 (3) Europe since 1945
Explores Europe from the end of World War II through the present day. Topics include postwar reconstruction; the cold war; anticommunist opposition and new social movements; consumer culture and punk music; the fall of communism; the Yugoslav wars; European unity.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Recommended: Prerequisite HIST 1012.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Europe: Modern

HIST 4444 (3) Topics in Modern European Thought
Explores a selected theme in European thought since the Enlightenment. Topics vary each term.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Europe: Topical

HIST 4445 (3) United States History since 1973
Traces political, diplomatic, economic, and social developments in the United States from 1973 to the present.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Recommended: Prerequisite HIST 1025.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: United States: Chronological Periods

HIST 4448 (3) World War II in Southeast Asia
Examines World War II in Southeast Asia, emphasizing the political, social, economic, cultural, and ideological impact of the conflict. How can we define ¿Southeast Asia¿? In what ways did conflict affect men and women, soldiers and civilians, and ethnic, religious, and sexual communities? How can we understand the war as a local, regional, and global experience, with legacies for today?
Equivalent - Duplicate Degree Credit Not Granted: HIST 5448 and ASIA 4448
HIST 4454 (3) Jewish Thought in Modern History
Takes students on a journey from Medieval Spain to contemporary United States to explore how Jews, living in different societies, have attempted to reshape and interpret central Jewish values and beliefs in accordance with the prevailing ideas of their host societies. Focuses on the historical context of each Jewish society that produced the thinkers and ideas considered in this course.
Equivalent - Duplicate Degree Credit Not Granted: JWST 4454
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Europe: Topical

HIST 4511 (3) Europe in the Dark Ages (400-1000 A.D.)
Examines the history of Europe from the fall of the Roman Empire to the turn of the first millennium. Treats social, political and religious transformations in the barbarian kingdoms, and considers the persistence of Roman institutions and culture and the impact of Christianity in northern Europe.
Requisites: Requires prerequisite course of HIST 1011 or HIST 2170 (minimum grade C-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Europe: Ancient and Medieval

HIST 4516 (3) U.S. Society in the 19th Century
Concerned with the American family and community in the changing social environments of the 19th century. Examines families of different ethnic and class backgrounds, observing how they are changed by new economic conditions, reform, or new political institutions.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Recommended: Prerequisite HIST 1015 or HIST 1025.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: United States: Topical Courses 1

HIST 4521 (3) Europe in the High Middle Ages (1000-1400 A.D.)
Examines the history of Europe from the emergence of feudal institutions to the rise of nation states, with specific attention to social, intellectual and religious change, the role of law and ritual, the crusades and European expansion, and urban growth and identity in the West.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Recommended: Prerequisite HIST 1011 or HIST 2170.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Europe: Ancient and Medieval

HIST 4524 (3) The Jews of Spain and Portugal: After Expulsion
This course considers the experience of Jews and converses during the Spanish Inquisition and the Iberian expulsions of the 1490s. Sephardic refugees faced social, economic, and political upheavals in the decades after their exile, leading to new communities in settings as diverse as North Africa, India, Turkey, the Caribbean, and the Americas. The study of texts and traditions from the Sephardic diaspora will explore themes including forced conversion, rabbinic authority, colonialism, and mercantile networks. Previously offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: JWST 4524
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

HIST 4526 (3) Immigrants, Workers and the 1 percent - Recent U.S. Social History
In the 21st century we see a widely divided U.S. society, with a privileged "one percent" on one end, and a striking pattern of poverty on the other. How did the U.S. get this way? This course shows students how to explore social change through the people of the 20th century, their experiences, and the words they left behind.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Recommended: Prerequisite HIST 1025.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: United States: Topical Courses 1

HIST 4527 (3) Mexican-American History since 1848
Examines Mexican-origins people in the United States from the 19th century through the present. Focuses on Mexican-American history as both an integral part of American history and as a unique subject of historical investigation. Using primary and secondary sources, students will examine how Mexicans and Mexican-Americans have negotiated, influenced, and responded to political, social, cultural, and economic circumstances in the U.S.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Recommended: Prerequisite HIST 1015 or HIST 1025.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Diversity-U.S. Perspective
Departmental Category: United States: Topical Courses 1

HIST 4528 (3) Islam in South and Southeast Asia (1000 to the Present)
Examines the history of Muslim societies in South and Southeast Asia from 1000 to the present. Focuses on themes such as the rise of Islamic empires in South Asia, Sufism, trade and the spread of Islam in Southeast Asia, the rise or Muslim nationalism and religious fundamentalism, and the impact of modernization and globalization on Muslims of the region.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Recommended: Require 6 hours of any history coursework.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: World Areas: Specific Regions
Departmental Category: Asia Content

HIST 4534 (3) Modern European Jewish History
Focus on the last 500 years of European Jewish history, from 1492 until the present, to examine Jews' place in European history and how Europe has functioned in Jewish history. Does not end with the Holocaust, since, although Hitler and the Nazis attempted to destroy European Jewish civilization, they did not succeed. Rather, this course will spend several weeks looking at European Jewish life in the past sixty years.
Equivalent - Duplicate Degree Credit Not Granted: JWST 4534
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Recommended: Prerequisite HIST 1818 or JWST 1818 or HIST 1828 or JWST 1828 or HIST 1012.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Europe: Topical
HIST 4538 (3) History of Modern India
Examines the history of India from the British conquest of India in the late 18th century to independence in 1947. Emphasizes the impact of British rule on the political, economic and social development of modern India.
Equivalent - Duplicate Degree Credit Not Granted: HIST 5538
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Recommended: Prerequisite 6 hours of any history coursework.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: World Areas: Specific Regions
Departmental Category: Asia Content

HIST 4544 (3) History of Yiddish Culture
Jews have produced culture in Yiddish, the vernacular language of Eastern European Jewry, for 1000 years and the language continues to shape Jewish culture today. We will look at the literature, film, theater, music, art, sound and laughter that defined the culture of Eastern European Jewry and, in the 20th century, Jews around the world.
Equivalent - Duplicate Degree Credit Not Granted: HIST 5544 and JWST 4544
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Recommended: Prerequisite HIST 1818 or JWST 1818 or HIST 1828 or JWST 1828 or HEBR 2350 or JWST 2350.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Europe: Topical

HIST 4546 (3) Popular Culture in the Modern United States
Traces the history of cultural expression in the United States since the late nineteenth century. From art, fiction, and music to the movies, amusement parks, shopping, and sports, popular culture offers clues to decipher shifting patterns of consumption, globalization, race, gender, politics, technology, and media. Includes instruction and practice interpreting cultural materials in historical context.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Recommended: Prerequisite HIST 1025.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: United States: Topical Courses 1

HIST 4548 (3) Women in Modern India
Examines the history of women and gender in India from the late 18th century to the present. Explores topics such as the changing legal status of women in the colonial and postcolonial period, marriage, domesticity and patriarchy, and women's education and participation in anti-colonial and postcolonial politics, women, work and the environment, violence against women, and women and globalization.
Equivalent - Duplicate Degree Credit Not Granted: HIST 5548
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Recommended: Prerequisite HIST 1528.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: World Areas: Specific Regions
Departmental Category: Asia Content

HIST 4556 (3) The History of America through Baseball
Baseball serves as a window to view the American experience. Covers U.S. history since 1830, addressing the major topics that reflect on American society, such as professionalization, labor management conflict, race, gender, culture, politics, economics and diplomacy.
Equivalent - Duplicate Degree Credit Not Granted: HIST 2516
Requisites: Requires prerequisite course of HIST 1025 (minimum grade D-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Recommended: Prerequisite HIST 1015.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: United States: Topical Courses 1

HIST 4558 (3) Buddha to Gandhi: A History of Indian Nonviolence
Focuses on the intellectual history of nonviolence in India from the time of the Buddha to Mahatma Gandhi who led India to national independence from the British Empire in 1947. Pursues this history in light of the encounter between Indian and western cultural traditions in modern India.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: World Areas: Specific Regions
Departmental Category: Asia Content

HIST 4616 (3) History of Gender and Sexuality in the United States to 1870
Examines the social history and cultural construction of genders and sexualities in America to 1870, exploring how discourses of race, religion, nationalism, medicine and criminality have shaped erotic encounters, informed gender and sexual identities a served as sites of political conflict.
Equivalent - Duplicate Degree Credit Not Granted: HIST 5616 and WGST 4616
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: United States: Topical Courses 1

HIST 4617 (3) Native North American History I: Human Settlement to 1815
Explores the establishment and development of human societies in North America prior to 1492; the varied experiences of contact; the crises, opportunities, and transformations that attended colonialism; Indians and the inter-imperial contests of the eighteenth century; and the struggles of native peoples confronting the newly-independent United States.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: United States: Topical Courses 2
HIST 4618 (3) Early Modern China: From Genghis Khan to the Opium War
Examines political, social, and cultural history of China from the Song Dynasty (960-1279) to the opium War (1839-1842). Topics covered include the development of imperial political institution and gender society, Conquest Dynasties, Neo-Confucianism, China's "medieval economic revolution", Chinese world order in East Asia, Qing multiethnic empire, Chinese overseas migration, and the coming of the West.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Recommended: Prerequisite HIST 1618 or HIST 1628 or CHIN 1012.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: World Areas: Specific Regions
Departmental Category: Asia Content

HIST 4619 (3) Women in East Asian History
Considers major issues in the history of women in East Asia (China, Korea, Japan) in the 17th through 20th centuries. Focuses on gender roles in Asian family, state, and cultural systems. Topic varies in any given semester.
Equivalent - Duplicate Degree Credit Not Granted: WGST 4619 and HIST 5619
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: World Areas: Comparable and General
Departmental Category: Asia Content

HIST 4620 (3) A Global History of Sexuality: The Modern Era
Provides an introduction to the history of sexuality in the modern era through engagement with recent interdisciplinary research into what sexuality has meant in the everyday lives of individuals; in the imagined communities formed by the bonds of shared religion, ethnicity, language and national citizenship; on the global stage of cultural encounter, imperialist expansion, transnational migration and international commerce.
Equivalent - Duplicate Degree Credit Not Granted: WGST 4620
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Methodological, Comparative, and Global

HIST 4621 (3) History of Eastern Europe Since 1914
Examines the struggle of nations of eastern Europe to assert their independence, from break-up of the imperial system at the end of World War I, through the Soviet bloc that emerged after World War II, to the establishment of democratic governments after the 1989 revolutions.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Recommended: Prerequisite HIST 1012.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Europe: Specific Countries

HIST 4622 (3) History of Gender and Sexuality in the United States from 1870
Examines the social history and cultural construction of genders and sexualities in America from 1870, exploring how discourses of race, religion, nationalism, medicine and criminality have shaped erotic encounters, informed gender and sexual identities and served as sites of political conflict.
Equivalent - Duplicate Degree Credit Not Granted: WGST 4626
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: United States: Topical Courses 1

HIST 4623 (3) History of Gender and Sexuality in the United States from 1870
Examines the social history and cultural construction of genders and sexualities in America from 1870, exploring how discourses of race, religion, nationalism, medicine and criminality have shaped erotic encounters, informed gender and sexual identities and served as sites of political conflict.
Equivalent - Duplicate Degree Credit Not Granted: WGST 4626
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: United States: Topical Courses 1

HIST 4627 (3) Native North American History II: 1815 to Present
Explores the longevity and continuity of human history in North America by discussing pre-European social and cultural developments. By examining ways in which Indian societies west of the Mississippi River responded to Euro-Americans, the Indians' role in western North American history is demonstrated.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: United States: Topical Courses 2

HIST 4628 (3) Modern China: Collapse of Imperial Brilliance, 1644-1949
Examines the brilliance of the Qing dynasty, its collapse in 1911, and the bloody and chaotic several decades that followed, up to the 1949 Communist Revolution. Focuses on such topics a Qing imperialism in Central Asia, global capitalism and Western imperialism in China, the opium trade, domestic violence, nationalism, concepts of modernity, competing revolutionary movements, and WW II in Asia.
Equivalent - Duplicate Degree Credit Not Granted: HIST 5628
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: World Areas: Specific Regions
Departmental Category: Asia Content

HIST 4636 (3) Lesbian and Gay History: Culture, Politics, and Social Change in the United States
Considers current theoretical approaches to the history of sexuality and traces the changing meaning of same-sex sexuality in the United States through investigation of lesbian/gay identity formation, community development, politics, and queer cultural resistance.
Equivalent - Duplicate Degree Credit Not Granted: HIST 5636 and WGST 4636
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Recommended: Prerequisite HIST 1015 or HIST 1025 or LGBT 2000.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: United States: Topical Courses 1
HIST 4638 (3) Contemporary China: Radicalism and Reform, 1949 to Present
Examines the dramatic, often tragic, and globally transformative history of China under the Chinese Communist Party. Focuses on such topics as political, social, and cultural revolution, nationalism, Maoism, the Great Leap Forward, Red Guards and the Great Proletarian Cultural Revolution, the Deng Xiaoping era, relations with Taiwan, the 1989 Tiananmen Massacre, and China's rise as a world power.
Equivalent - Duplicate Degree Credit Not Granted: HIST 5638
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: World Areas: Specific Regions Departmental Category: Asia Content

HIST 4640 (3) Women, Gender and War
Study of how women experience war, how the structure, practice and memory of war, and the rights and obligations of military service (masculinity and femininity) are structured by the gender system.
Equivalent - Duplicate Degree Credit Not Granted: WGST 4640
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Recommended: Prerequisite HIST 1015 or HIST 1012 or HIST 1123 or HIST 1628 or HIST 1708.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Methodological, Comparative, and Global

HIST 4643 (3) Poland since the 16th Century: Democracy and Nation
Traces themes of democracy and nationalism in Polish history from the "Noble Republic" of the early modern era through the struggles with fascism and communism in the 20th century, to Poland's current position on the eastern edge of Western Europe.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Recommended: Prerequisite HIST 1012.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Europe: Specific Countries

HIST 4648 (3) Inventing Chinese Modernity, 1800 to Present
Examines the long and painful transformation, during the modern period of native Chinese concepts about the meaning of life, the proper order of politics and society, the role of the individual, the nature and role of human emotions, the place of the gods, the definition of nation, the proper relations between the sexes, and China's place in the global order.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Recommended: Prerequisite HIST 1618 or HIST 1628 or CHIN 1012.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: World Areas: Specific Regions Departmental Category: Asia Content

HIST 4658 (3) China and Islam from the 7th Century to the 20th Century
Traces how "Muslims in China" transformed themselves into "Chinese Muslims" while at once accommodating and conflicting with Chinese states and people throughout history until the present time.
Equivalent - Duplicate Degree Credit Not Granted: HIST 5658
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Recommended: Prerequisite HIST 1618 or HIST 1628 or CHIN 1012.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: World Areas: Specific Regions Departmental Category: Asia Content

HIST 4688 (3) Window on Modern China
Examines the relationship between China's recent history and its booming contemporary economy and society through on-location study in a Chinese city. The course makes use of a rich array of historical and other kinds of sites to teach students to think critically about themes and events that played a shaping role in the unfolding of modern Chinese history.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: World Areas: Specific Regions Departmental Category: Asia Content

HIST 4711 (3) The Medieval Crusades: Holy War and Its History, 1095-1400
Studies the innovation, impact and meaning of holy war and the expansion of Christendom during the High Middle Ages. Topics include the definition of crusade and crusaders, religious persecution and tolerance, the expansion of European modes of government, war memory, colonization and its aftermath, the meaning of the Holy Land and the home front.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Recommended: Prerequisite HIST 1011 or HIST 2170.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Europe: Ancient and Medieval

HIST 4713 (3) History of Russia through the 17th Century
Introduces the history and culture of Russia from the 9th to the 17th century. Emphasizes selected topics in social, economic, religious and cultural history, including the formation of the Russian state conversion to Orthodox Christianity, the Mongol invasion and the reign of Ivan the Terrible.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Recommended: Prerequisite HIST 1011.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Europe: Specific Countries

HIST 4718 (3) Ancient, Classical, and Medieval Japanese History
Begins with the prehistoric and protohistoric periods. Explores the development of Japan's classical age and traces the rise and attenuation of an elite warrior government.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: World Areas: Specific Regions Departmental Category: Asia Content

HIST 4723 (3) Imperial Russia
Surveys major cultural, social, and economic changes from the reign of Peter the Great through World War I.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Recommended: Prerequisite HIST 1012.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Europe: Specific Countries
HIST 4726 (3) A Nation of Immigrants: Immigration in American History
Examines the shifting kaleidoscope of immigration to the United States in the 19th and 20th centuries. Considers immigrant motives, cultures and experiences; changing cultural and political ideas about the value of immigration; the relationship of immigration and immigration policy to ideas about the American national project; the creation and consequences of immigration law.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: United States: Topical Courses 1

HIST 4728 (3) Modern Japanese History
Begins with early modern Japan, proceeds through the era of rapid modernization after the Meiji Restoration in the mid-19th century, and concludes with Japan’s gradual descent into prolonged war, first with China and then in the Pacific.
Equivalent - Duplicate Degree Credit Not Granted: HIST 5728
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: World Areas: Specific Regions Departmental Category: Asia Content

HIST 4733 (3) The Russian Revolution and the Soviet Regime
Covers in detail the significant social, economic and political events of Soviet Russia from the February Revolution of 1917 to the present.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Recommended: Prerequisite HIST 1012.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Europe: Specific Countries

HIST 4738 (3) History of Early Modern Japan (1590-1868)
Covers the history of early modern Japan (1590-1868). Explores the political, social, cultural and economic context of Japan’s history from the era of Warring States through the rise and fall of the Tokugawa military government (Shogunate).
Equivalent - Duplicate Degree Credit Not Granted: HIST 5738
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: World Areas: Specific Regions Departmental Category: Asia Content

HIST 4758 (3) The History of Postwar Japan, 1945 to Present
Explores political, economic, social and cultural factors in postwar Japan. Although the defeat in 1945 is often seen as “zero hour”, a moment of near total disjunction, the outlines of postwar Japan emerged during World War II. Beginning with the 1930s, traces growth and development, social change, globalization, the quest for collective identity and other themes in the evolving Japanese nation-state.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

HIST 4761 (3) Roman Law
Studies the constitutional and legal history of ancient Rome; emphasizes basic legal concepts and comparisons with American law. No Greek or Latin required.
Equivalent - Duplicate Degree Credit Not Granted: HIST 5761 and CLAS 4761 and CLAS 5761
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Europe: Ancient and Medieval

HIST 4800 (3) Special Topics in Global History
Organized around themes that change yearly, this class allows students to study and research processes, phenomena, and events of global significance in historical context. Will stress historical subjects that span multiple geographic regions of the globe. Topics could include the global history of: the arms trade; slavery; health and disease; youth culture; women’s rights; genocide, the environment, migration, economic trade, warfare exploration etc...
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Methodological, Comparative, and Global

HIST 4803 (3) Special Topics in European History
Covers specialized topics in European history, usually focusing on a specific country or theme.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Recommended: Prerequisite HIST 1011 or HIST 1012.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Europe: Specific Countries

HIST 4806 (3) Special Topics in American History
Focuses on special topics in U.S. history to provide a novel thematic, comparative, or methodological focus that cuts across usual geographical and temporal ranges within American history. Topics vary each semester. Students will engage in focused historical learning and research that spans across geographical and temporal ranges within American history. Topics may include: the History Animals in the American West, Slavery along the Atlantic Rim, Presidential Power in the Twentieth Century, the History of American Football, Immigration and Migration in the American Past, etc...
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Methodological, Comparative, and Global

HIST 4808 (3) Special Topics in World Areas History
Covers specialized topics in the history of World Areas outside of Europe and/or North America, usually focusing on one country or region.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
HIST 4820 (3) Human Rights: Historical Perspectives
Examines the history of modern ideas of human rights. Focuses on themes such as the universalism/cultural relativism debate, colonialism, nationalism, refugees and stateless peoples, the United Nations and humanitarianism, ethnic genocide in Rwanda, and human rights abuses by the Taliban regime in Afghanistan.
Requisites: Requires a prerequisite of 6 hours of credit in any History course. Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Methodological, Comparative, and Global

HIST 4827 (3) Modern U.S. Jewish History since 1880
Explores the experience of Jews in the United States from the 1880's when the great migration of Jews from Eastern Europe began, through the twentieth century. Students will explore the changing ways in which Jews adapted to life in the U.S., constructed American Jewish identities, and helped to participate in the construction of the United States as a nation.
Equivalent - Duplicate Degree Credit Not Granted: JWST 4827
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

HIST 4830 (3) Human Trafficking in Global Perspective
Surveys the global history of slavery, serfdom, chattel slavery, debt bondage, pawnshop, domestic servants, bonded labor, child soldiers, forced marriage, sex trafficking, abolitionism, and meanings associated with freedom, from the ancient world to the modern day.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Additional Information: Arts Sci Gen Ed: Diversity-Global Perspective

HIST 4837 (3) Jews in the American West
Explores the history of Jewish migration and settlement in the American West. Jewish pioneers in the nineteenth century included explorers, businessmen, and cowgirls that established small communities in territories that had not yet achieved statehood. As westward expansion progressed, Jews continued to find opportunity in the West, balancing assimilation with unique expressions of religious identity. The history of communal institutions including synagogues, hospitals and summer camps offers new perspectives on this underrepresented segment of American Jewry.
Equivalent - Duplicate Degree Credit Not Granted: JWST 4837

HIST 4930 (1-6) History Internship
Matches selected students with supervised internships in professional archives research libraries, historical associations, and special projects. Interns apply their academic area specialty to their work in the field. Internships have a work and academic (reading and writing) component.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to students with 57-180 credits (Junior or Senior) History (HIST) majors and minors only.
Recommended: Prerequisite completion of lower-level history coursework (for example HIST 1015 or HIST 1025).
Grading Basis: Pass/Fail
Additional Information: Departmental Category: Methodological, Comparative, and Global

HIST 4990 (1-3) History Lab: Methods, Sources, and Practices of the Past
Offers students an additional, intensive, historical learning experience intended to enrich and deepen students’ study of the past. Lab credit is designed to enhance the traditional three-credit upper-division lecture course by offering students supplementary training in aspects of historical methods, interpretation, application tools, and analysis. Possible lab topics might include but not be limited to: oral history lab, digital history lab, primary source lab, etc.
Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Methodological, Comparative, and Global

History - Bachelor of Arts (BA)
Historians study the past, in all of its complexity, to better understand our contemporary world and the forces that created it. Historians analyze change over time, and they use archival and other primary-source evidence to build interpretations that explain change and put it into context. In seeking to understand historical subjects on their own terms, and by appreciating the diverse perspectives of past actors, students of history develop empathy even as they rigorously engage with the ethical dimensions of past human decisions and actions. When students understand the past, they recognize their power to shape the present and the future.

History faculty conduct research and teach courses in a wide range of eras—from ancient to modern times—and across most major world areas including Africa and the Middle East, South and East Asia, Europe and the Americas. History faculty also pursue multiple methodologies and approaches, including cultural, diplomatic, demographic, economic, environmental, ethnic, gender, intellectual, legal, political, religious, social and transnational history.

The undergraduate degree in history balances the broad study of various world regions, exposure to multiple discipline-specific methods, and the freedom to pursue individual areas of interest. At the lower-division level, you are required to take one introductory course on the history of the United States, one on the history of Europe, and one on the history of other areas of the world. Methods courses will provide an Introduction to Global History and more intensive practice in Historical Thinking and Writing (a sophomore-level seminar course that also serves as your upper-division writing requirement). At the upper-division level, you have greater flexibility because you take more courses, so long as you take at least one class in U.S. history, one in European history, and two in the history of other areas of the world or in comparative/global history. In addition, when choosing courses to fulfill your major requirements, you will need to take at least two pre-modern history courses and two modern history courses.

While the major requires both geographical and chronological breadth, the requirements are flexible enough that you can concentrate your studies in a specific geographic area (for example Britain, China, Latin America or the U.S.), historical period (for example the Ancient world, the Medieval period or the twentieth century), or central theme (for example, environmental or diplomatic history, the history of revolution and war, imperialism and colonialism, borderlands and migration, cultural and intellectual history, or religious history). Within these areas, you are free to plan your program around a diverse set of rotating course offerings.

As you gain expertise in historical skills, knowledge of multiple regions, and familiarity with diverse methodologies, you will apply that training
to a capstone project. During a one-semester capstone senior seminar or a two-semester honors sequence, you will engage in your own original research, producing either a substantial research paper or an Honors thesis. History majors also have other undergraduate research opportunities and access to history-related internships.

Many history majors and minors combine their study in fruitful ways with other humanities fields or related programs such as international affairs, Jewish studies, women and gender studies, or Asian languages and civilizations. Moreover, many of our students combine a major or minor in history with studies in other social or natural science disciplines, or even as a complement to training in CU’s professional schools such as Business or Engineering and Applied Sciences.

Course code for this program is HIST.

Requirements

Total Credit Hours

Students must complete 42 credit hours in history courses with grades of C- or better. Of those 42 credit hours, 24 must be at the upper division. Students should complete the required 1000-level survey courses, HIST 1800 (or an equivalent 1000-level Global Comparative Course) and HIST 3020, before the end of their sophomore year and before they enroll in any 4000-level history courses.

Required Courses and Credits

Students must complete the general requirements of the College of Arts and Sciences and the required courses listed below.

Graduating in Four Years

Students should consult the Four-Year Guarantee Requirements for further information on eligibility for the four-year guarantee. The concept of "adequate progress" as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress in history, students must consult a history advisor each semester, but the following plan provides a rough outline of acceptable progress.

Recommended Four-Year Plan of Study

Through the required coursework for the major, students will fulfill all 12 credits of the Arts & Humanities area of the Gen Ed Distribution Requirement and both components of the Written Communication Gen Ed Skills Requirement. Depending on the courses selected within the major, students can also potentially complete some of the Social Sciences
area of the Gen Ed Distribution Requirement and both the US and Global Perspective components of the Gen Ed Diversity Requirement.

**Learning Outcomes**

To study history is to develop a disciplined way of making sense of the world by inquiring about the past. The History Department has identified a common set of learning objectives that are crucial components of historical thinking. No single course will attend to all of the objectives listed below. Instructors identify learning goals specific to the course they are teaching, and so each course will reflect a unique combination of these broader objectives. However, taking multiple courses at increasing levels of difficulty during your time at CU Boulder will allow students to develop proficiency in historical literacy—the substantive knowledge, skills, concepts, methods and habits of mind specific to the discipline of history. These skills build upon and add to critical thinking skills shared across multiple disciplines, such as attentive reading, engaged discussion, recognition of multiple perspectives and effective writing. Mastering each cluster of historical elements will allow students to develop a portfolio of analytical and communication skills that will serve them in and beyond the discipline.

1. **Substantive Essentials**
   What do we know about the past? How do we interpret it?
   1. **Facts:** Call upon substantial factual knowledge about the past.
   2. **Evidence:** Understand that history is an evidence-based discipline that requires identifying reliable sources of information.
   3. **Questions:** Ask rigorous and open-ended questions of historical evidence in order to interpret what happened in the past.
   4. **Context:** Establish relevant context to relate historical facts and/or evidence to the time and place of their original existence.

2. **Conceptual Foundations**
   What foundational concepts frame how we think about the past? How do we analyze historical change?
   1. **Change** over time: Understand how change over time, and continuity, shape narratives of the past.
   2. **Causation:** Account for causation in explanations of historical change.
   3. **Contingency:** Consider historical change as never preordained but dependent upon a set of prior conditions, actions, and events in human societies and the non-human world.
4. Complexity: Treat historical change as complex and not easily reduced to simple explanations or single variables.

3. Analysis of Historical Narrative
How do we assess accounts of history? How do we engage in scholarly conversation about the past?

1. Argument: Recognize historical narrative as a form of argument, built from evidence and interpretation and open to rigorous questioning and critique.
2. Sources: Assess authors’ interpretations of sources (primary and secondary) as evidence in their historical narratives and arguments.
3. Methods: Identify how historians have used various sources and methodological traditions, including those drawn from other disciplines where relevant, to build their interpretations.
4. Historiography: Evaluate historical argument as part of a larger historiographical conversation among scholars who offer multiple and changing interpretations.

4. Production of Historical Knowledge
How do we develop arguments about the past? How do we share historical narratives?

1. Research: Conduct historical research, which includes: navigating libraries, databases, and archives; identifying, locating, and managing sources; and summarizing significant amounts of information.
2. Explain: Build historical explanations by evaluating, interpreting, and synthesizing historical evidence, and applying relevant theory and methods.
3. Express: Share historical knowledge and argument through written, oral, digital, and/or other forms of expression.

5. History and Perspective
Why do multiple perspectives matter to interpreting history? How can history help us to understand the present world?

1. Global literacy: Develop in-depth knowledge of multiple regions, countries, cultures, and communities across the world, and the factors that have shaped their historical interactions and interconnections, sometimes at a global scale.
2. Diversity: Identify relevant categories of analysis to frame and explore questions that aim to deepen our understanding of the complexity, richness, diversity, and power dynamics within human experience in the past and present.
3. Public application: Apply historical knowledge, skills, and habits of mind to the problems of the present world.

History - Minor

Historians study the past, in all of its complexity, to better understand our contemporary world and the forces that created it. Historians analyze change over time, and they use archival and other primary-source evidence to build explanations that explain change and put it into context. In seeking to understand historical subjects on their own terms, and by appreciating the diverse perspectives of past actors, students of history develop empathy even as they rigorously engage with the ethical dimensions of past human decisions and actions. When students understand the past, they recognize their power to shape the present and the future.

History faculty conduct research and teach courses in a wide range of eras—from ancient to modern times—and across most major world areas including Africa and the Middle East, South and East Asia, Europe and the Americas. History faculty also pursue multiple methodologies and approaches, including cultural, diplomatic, demographic, economic, environmental, ethnic, gender, intellectual, legal, political, religious, social and transnational history.

Students who enjoy taking history courses may want to consider becoming either a history major or minor. In general, the major requires a more in-depth commitment from students, whereas the minor offers students an opportunity for some specialization in history without all the obligations of the major.

For those students already pursuing a major in another field, a history minor might be the more viable option, because the minor requires the completion of fewer overall history courses.

Program Requirements

All coursework applied to the minor must be completed with a grade of C- or better. No pass/fail work may be applied. The GPA for all minor coursework must equal 2.00 or higher. At least 12 of the 21 total credits and 6 of the 12 upper-division credits in History must be in courses taught by CU Boulder faculty.

Note: All History courses taken at any CU campus, even ones not applied to minor requirements, are figured into the minor GPA.

1000- 2000- and 4000-level HIST courses are applicable to the minor. 4000-level courses may be used to fulfill both upper-division credit hours and geographic area credit hours.

HIST 3020 and all 3000-level Senior Seminars are restricted to history majors. 3000-level courses may occasionally be taken by minors if the course is not full as of the second week of drop-add and/or you have written permission from the instructor.

Humanities

Humanities is an interdisciplinary program that allows students to combine different fields of study from all the disciplines of the humanities as well as from the social sciences (in particular, anthropology, ethnic studies, political science, psychology, sociology, women and gender studies). This major especially encourages students to develop their interdisciplinary interests in fields of cultural and humanistic expression such as literature, art, music, film, philosophy, history, modern media, religion and contemporary critical practice and theory.
The undergraduate degree in humanities emphasizes knowledge and awareness of:

- the ways cultures and traditions define both themselves and each other;
- the formal, rhetorical and ideological properties of cultural texts in a variety of forms and media (literature, history, philosophy, film, music, visual arts, architecture, dance, theatre, performance);
- the dynamic relationships between texts and their social and historical contexts;
- the genres and modes of texts and their production, transformation and reception; and
- the theoretical and ideological underpinnings and implications of one's own and others' interpretive approaches and assumptions.

In addition, students completing the degree in humanities are expected to acquire the ability and skills to:

- analyze and interpret texts in a variety of forms and media;
- articulate such analyses and interpretations at a sophisticated level in both written and oral forms;
- discern similarities and differences among individual works, artistic media, historical periods and cultural traditions;
- reason critically; and
- explore the connections between contemporary issues and academic work.

Course code for this program is HUMN.

**Bachelor's Degree**

- Humanities - Bachelor of Arts (BA) (p. 381)

**Minor**

- Humanities - Minor (p. 382)

**Faculty**

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Bernardini, Giulia (https://experts.colorado.edu/display/fisid_143777/)
Senior Instructor; MA, University of Colorado Boulder

Burba, Audrey
Lecturer; PhD, Emory University

Catlos, Brian Aivars (https://experts.colorado.edu/display/fisid_147829/)
Professor; PhD, University of Toronto

Ferris, David S. (https://experts.colorado.edu/display/fisid_116817/)
Professor, Chair; PhD, SUNY at Buffalo

Ganguly, Suranjan (https://experts.colorado.edu/display/fisid_102045/)
Professor; PhD, Purdue University

Gerland, Oliver W. (https://experts.colorado.edu/display/fisid_101092/)
Associate Professor; PhD, Stanford University

Gordon, Paul (https://experts.colorado.edu/display/fisid_100661/)
Professor; PhD, Yale University

Professor; PhD, Temple University

Wiese, Anjeanette Michelle (https://experts.colorado.edu/display/fisid_146485/)
Instructor; PhD, University of Colorado Boulder

Zemka, Sue (https://experts.colorado.edu/display/fisid_103078/)
Professor; PhD, Stanford University

**Courses**

**HUMN 1110 (3) Introduction to Humanities: Literature 1**
Introduces students to works from the major Western literary periods (Classical, Medieval, Renaissance, Baroque) from the 8th c. BC to the early 17th c. AD comparatively, i.e., outside their national literary boundaries. Theorizes interdisciplinary, genre studies, periodization, comparativism, thematology, hermeneutics, criticism, etc. May be taken separately from HUMN 1120.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities

**HUMN 1120 (3) Introduction to Humanities: Literature 2**
Introduces students to works from the major Western literary periods (Baroque, Enlightenment, Romanticism, Realism, Modernism) from the 17th- through the 20th-centuries comparatively, i.e., outside their national literary boundaries. Theorizes interdisciplinary, genre studies, periodization, comparativism, thematology, hermeneutics, criticism. May be taken separately from HUMN 1110.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities

**HUMN 1210 (3) Introduction to Humanities: Art and Music 1**
Examines the major artistic and musical works in the Western tradition from ancient Greece through the 16th century in their larger historical, interdisciplinary, and theoretical ("aesthetic") contexts. May be taken separately from HUMN 1220.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities

**HUMN 1220 (3) Introduction to Humanities: Art and Music 2**
Examines the major artistic and musical works in the Western tradition from the 17th century to 21st-century post-modernism in their larger historical, interdisciplinary, and theoretical ("aesthetic") contexts. May be taken separately from HUMN 1210.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
HUMN 1400 (3) Mediterranean Foundations  
Examines the pre-Modern Mediterranean as the foundational zone of Western Humanism and culture, beginning with Classical Antiquity and through to the dawn of Modernity. Through history, art, literature and thought, it studies the region’s role as the crucible of Helleno-Persian culture, Roman society, of Judaism, Christianity and Islam, the intersection of Europe, Africa and Asia in the development of Modernity.  
Grading Basis: Letter Grade  
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

HUMN 1701 (3) Nature and Environment in German Literature and Thought  
Critically examines titles in German literature and thought. Nature and environment are used to explore alienation, artistic inspiration, nihilism, exploitation, sexuality, rural versus urban, meaning of the earth, cultural renewal, identity and gender. This “Green” survey of German classics spans Romanticism’s conception of nature as unconscious spirit to the politics and values of contemporary Germany’s Green party.  
Equivalent - Duplicate Degree Credit Not Granted: GRMN 1701  
Additional Information: Arts Sci Core Curr: Ideals and Values  
Arts Sci Gen Ed: Distribution-Arts Humanities

HUMN 2000 (3) Methods and Approaches to the Humanities  
Provides a transition from the introductory courses to the upper-division courses. Introduces the various introductory methods and topics encountered in the department’s comparative, interdisciplinary upper-division courses, including cultural studies, rhetoric, translation, hermeneutics, word/image studies.
